 - ii. The following Overhead Structures shall be designed using a “Level 3” classification:
 - i. Highway 417 Westbound Off-Ramp at Pinecrest Road (SN015160);
 - ii. Highway 417 Westbound On-Ramp at Pinecrest Road (SN015170);
 - iii. Pinecrest Road Bridge (SN015180);
 - iv. Highway 417 S-W On-Ramp at Moodie Drive (SN116370); and,
 - v. Highway 417 N-W On-Ramp at Moodie Drive (SN116330).
 - B. Retained Soil Systems shall be designed in accordance with the performance and appearance categories of Retained Soil Systems as defined in the MTO document “RSS Design Guidelines”.
 - C. Aesthetics for Retaining Walls, Noise Barriers, and other structural components shall be in accordance with Article 9 of Part B of this Schedule 15-2, Part 9 and the MTO Context Sensitive Design requirements as detailed in Appendix F of this Part 9.
- (v) Corrosion Protection
- A. DB Co shall provide corrosion protection according to CAN/CSA S6 and the Structural Manual. Where there are conflicts in the clearance requirements where premium reinforcement is to be used, Table 2.8.2 of the Structural Manual shall apply.
 - B. The grade for Superstructure members shall be 350 AT Category 3 for plate and 350 A Category 2 for rolled sections. Miscellaneous steelwork (including railings, Deck joints, restrainers bolts, anchor bolts, drains, embedment in concrete, fence) shall be hot-dipped galvanized in accordance with CAN/CSA-G164-M92. All non-structural steel shall be hot-dipped galvanized.

- C. GFRP is only to be used in Barrier walls on structures that meet the following criteria:
 - i. Is an Overpass Structure; and,
 - ii. Has an AADT of less than or equal to 2000.
 - D. Any reference to Grade I GFRP shall be deleted in its entirety, including anything listed in Reference Documents.
 - E. Stray current corrosion control for all Overheads shall be in accordance with Schedule 15-2, Part 3, Article 12 – Corrosion Control.
- (vi) Deck Wearing Surface Systems
- A. The Deck wearing surface systems are defined as the replaceable surfaces and waterproofing elements that protect the Bridge Decks, from abrasion and the ingress of water and chlorides.
 - B. Deck wearing surface systems shall be provided on all Bridges.
 - C. Deck wearing surface systems shall be designed to prohibit water penetration into the structural Deck over the Service Life of the Deck wearing surface system.
 - D. The wearing surface for all Bridge Decks shall consist of a hot applied rubberized asphalt waterproofing system with protection board and asphalt Pavement in accordance with OPSS PROV 914.
 - E. For Deck wearing surface systems where the Deck wearing surface cannot be rehabilitated without damaging the waterproofing elements, the Deck wearing surface and waterproofing and the drainage elements of the Deck wearing surface system shall have the same Service Life and shall be repaired as per OPSS PROV 914.
- (vii) Bridge Decks
- A. DB Co shall ensure that the Bridge Deck systems, including the interaction of Deck concrete, concrete cover, reinforcement, Deck wearing surface system, joints and Deck drainage details, are such that the Bridge Decks meet the Service Life requirements of Highway Works.
 - B. Cantilevered Structures or steel grated systems are prohibited for new repurposed Underpass Bridges.
 - C. Parapet Walls shall be integral with the Bridge Deck.
- (viii) Bridge Deck Joints

- A. Bridge Decks shall be designed to minimize the occurrence of joints.
 - B. Integral and semi-integral abutments shall make provision for movement at the interface between the approach slab and the approach Road Pavement construction.
 - C. All components of Modular Expansion Joints shall be designed such that they can be individually replaced without damaging the joints.
 - D. In-span and mid-span expansion joints shall not be used.
 - E. Where Deck sections flare to accommodate more or fewer lanes, expansion joints shall be carried across the full width of the Deck.
- (ix) Deck Drainage
- A. Bridge Deck Drainage shall be designed in accordance with the Highway Drainage Design Standards. A Deck drainage discharge system consisting of downpipes shall be provided where the discharge cannot meet the conditions of Structural Manual, Clause 9.2.1. Runoff water from the Road surface of Bridges shall be discharged in accordance with the drainage and environmental requirements of Highway Works.
- (x) Approach Slabs
- A. Approach slabs shall be provided at all Bridge abutments and shall be designed to mitigate anticipated settlements.
 - B. Sleeper slabs shall be considered as defined in MTO Structure Manual.
- (xi) Slope Protection
- A. Concrete slope protection in accordance with MTO Structure Manual shall be provided on the sloped embankments in front of the abutments under all Bridges.
- (xii) Piers
- A. Pier design protection shall be in compliance with the [REDACTED].
- (xiii) Water Ingress
- A. Water ingress into or onto the Substructure or abutment wall backfill from the Superstructure above shall be prevented.
- (xiv) Barriers
- B. Structures shall be provided with Barriers as required by CAN/CSA-S6.

(xv) Bearings

- A. Sufficient space shall be allowed at the Bearings for inspection, maintenance, and replacement of the Bearings including provisions for jacking.
- B. Bearings shall be restrained from unintended movement.
- C. Elastomeric plain and steel laminated Bearings shall be tested according to OPSS PROV 1202, as amended by Special Provision 922F01.

(xvi) Pre-stressed and Post-tensioned Concrete

- A. Un-bonded pre-stressing cables are not permitted except at the ends of pre-stressed girders. Un-bonded post-tensioned cables are not permitted.

(xvii) Hydraulic Design

- A. DB Co shall undertake all hydrology/hydraulic analyses and design for Structures. This shall include all hydrotechnical modeling, analyses, and design to ensure that all Foundations, adjacent facilities, Utilities, and water course banks are protected from scour.
- B. DB Co shall identify, design, and construct all scour protection, erosion control, and stabilization necessary to prevent damage to Structures, Roads, or property affected by the Highway Works.

(xviii) Steel Girder Bridges

- A. Steel girders are not permitted for the Superstructure of the Highway 417 Bridges.

(xix) Precast Deck Panels

- A. Full depth and partial depth Deck panels may only be considered for use at the following Structure locations:
 - i. Pinecrest Road Structure (SN015180);
 - ii. Holly Acres Road Bridge (SN115230);
 - iii. Moodie Drive Bridge (SN116350);
 - iv. Highway 417 Westbound Off-Ramp at Pinecrest Road (SN015160);
 - v. Highway 417 Westbound On-Ramp at Pinecrest Road (SN015170);

- vi. Highway 417 S-W On-Ramp at Moodie Drive (SN116370); and,
 - vii. Highway 417 N-W On-Ramp at Moodie Drive (SN116330).
- (xx) Traffic Staging for Future Bridge Deck Rehabilitation
- A. Bridges shall be designed and detailed such that they can be rehabilitated without major disruption to traffic.
 - B. DB Co shall demonstrate that rehabilitation can be carried out with no more than one lane in each direction being taken out of service.
- (xxi) Provision for Illumination, Electrical, and ATMS
- A. The Bridges shall include the embedded conduit, lighting pole anchorage, pole bases and junction boxes meeting MTO or the local municipal lighting standards as required. DB Co shall coordinate the lighting design with the local municipality.
 - B. The Bridges shall include provisions for ducting, conduits and PVC junction boxes to accommodate future Underpass illumination where required by the Electrical Design Manual.
 - C. Ducting, conduits and junction boxes on Bridge Decks are only permitted in the Barrier walls. A maximum of two ducts per Barrier wall are permitted.
 - D. Surface mounted conduits are only permitted on existing Structures in accordance with the MTO Structural Manual Division 2, Section 16.3.1 where no additional widening or new Barrier walls are being constructed. Conduits shall be embedded for all new Structures or widened portion of Structures. If there is insufficient space to embed all conduits in new and existing Structures, the conduits shall be provided underground.
- (xxii) Structures listed below shall be classified as follows for the purpose of assigning an Importance Category under the CAN/CSA-S6:
- A. Overpasses: Major Route Bridges
 - B. Underpasses and Overheads: Other Bridges
- (xxiii) Concrete materials shall be in accordance with OPSS PROV 1350 and concrete construction shall be in accordance with OPSS PROV 904.
- (xxiv) Collision Protection
- A. Piers supporting new and existing Bridges over the alignment and with a clear distance of less than 6m from the centerline of a Track shall be of

heavy construction or shall be protected by a reinforced concrete crash wall.

- i. Crash walls shall have a minimum height of 1200mm above the top of rail. The crash wall shall be at least 600mm thick and at least 3.5m long. When two or more columns compose a pier, the crash wall shall connect the columns and extend at least 900mm beyond the outermost columns parallel to the Track. The crash wall shall be anchored to the footings and columns, if applicable, with adequate reinforcing steel and shall extend to at least 1200mm below the lowest surrounding grade.
- ii. Piers shall be considered of heavy construction if they have a cross-sectional area equal to or greater than that required for the crash wall and the larger of its dimensions is parallel to the Track.

(xxv) The OCS foundation and structural design shall include, but not be limited to, consideration of wind, ice accretion, wire tensioning forces, upward force to the contact wire or contact rail, and the effect of wire break. The OCS foundation shall be designed in conjunction with the requirements in Schedule 15-2, Part 3, Clause 14.4.

4.4 New Retaining Walls

- (a) See Article 5 – Geotechnical/Foundation Design Criteria of Part B of this Schedule 15-2, Part 9 for additional requirements for Retaining Walls.

4.5 Sign, Traffic Signal and Lighting Structures

- (a) DB Co shall design, fabricate and install Structures for Signs, traffic signals, and lighting in accordance with CAN/CSA-S6 and applicable Reference Documents.
- (b) Camera support structures shall have a maximum sway of 25 mm at 65 km/h wind speed.
- (c) Sign support Structures shall be designed according to MTO Sign Support Manual.

4.6 Noise Barriers

- (a) Noise Barriers shall be designed and constructed in accordance with CAN/CSA-S6, SP 760F01 and Design Criteria specified in this Section. Noise Barrier aesthetics requirements are governed by Article 9 of Part B of this Schedule 15-2, Part 9 and the MTO Context Sensitive Design requirements as detailed in Appendix F of this Part 9.

4.7 Culverts

- (a) Culverts shall be designed to ensure accessibility for inspection and maintenance. For clarity, accessibility includes accessibility for personnel to enter a Culvert to conduct inspection and maintenance activities.

- (b) Wire mesh shall not be substituted as reinforcement for new Culverts or extension of existing Culverts.

4.8 Openness Ratio

- (a) For the smaller watercourse crossings, a minimum height of 1.2 m and a minimum Openness Ratio of 0.05 shall be provided for the Culverts in order to facilitate movement of small and medium sized mammals.
- (b) The Openness Ratio for the above shall be based on the structural dimensions relative to dry ground/structural surface/platform beside the watercourse that can be traversed by wildlife during the 2 year flood flow level. Culvert dimensions shall be confirmed during the design stage in Coordination with DB Co's terrestrial specialist.

4.9 Structural Widening and Rehabilitation

- (a) DB Co shall perform structural widening and rehabilitation as part of the Highway Works such that all Structures meet and/or exceed the recommendations set out in the Project Agreement.
- (b) A general outline of the rehabilitation and widening work to be done for the key Structures is given below:

- (ii) Graham Creek Culvert (Site 3-537/C), Lat:45.345120, Long: 075.813220

- A. DB Co's comprehensive rehabilitation and extension of Graham Creek Culvert shall accommodate a new Highway 417 on-ramp and include repairs of deteriorated concrete on exposed surfaces of the existing Culvert barrel. The Culvert extension will be a cast-in-place box Culvert with the same hydraulic opening as the existing box Culvert and will utilize environmental protection measures and temporary flow passage system during construction. The Culvert extension shall be doveled into the existing Structure. The top slab of the Culvert extension is to be waterproofed and the waterproofing shall extend 1 m onto the existing Culvert such that the construction joint between the new and existing Culverts is covered. DB Co shall perform concrete repairs on all delaminated and spalled areas on all exposed concrete surfaces on the existing Culvert barrel and outlet header walls and wingwalls.
- B. The culvert extension shall have a minimum Design Life of 75 years starting at the Highway Substantial Completion Date. The rehabilitated components of the existing culvert shall have a minimum Service Life of 25 years starting at the Highway Substantial Completion Date.

- (iii) Stillwater Creek Culvert at LMSF (SN 110180)

- A. DB Co shall review the limits of this existing Culvert, which crosses Highway 417 at the site of the proposed LMSF. Any extensions required

for this Structure shall be designed and constructed by DB Co. Guideway structures crossing Stillwater Creek shall exhibit at minimum the light filtering characteristics of an open deck Bridge Structure. Culverts of any type are not acceptable.

4.10 Description of New Overhead Structures

- (a) DB Co shall design and construct the following overhead structures as part of the Highway Works.
 - (i) Highway 417 Westbound Off-Ramp at Pinecrest Road (SN015160)
 - A. Design and construct a new Overhead Bridge to carry the Westbound Off-Ramp at Pinecrest Road over the alignment. The new Bridge shall accommodate the following:
 - iii. The proposed Off-Ramp roadway cross section in accordance with Schedule 15-2, Part 9, Clause 1.3 on the Structure; and,
 - iv. EB and WB alignment, including Emergency walkways, under the Structure.
 - (ii) Highway 417 Westbound On-Ramp at Pinecrest Road (SN015170)
 - A. Design and construct a new Overhead Bridge to carry the Westbound On-Ramp at Pinecrest Road over the alignment. The new Bridge shall accommodate the following:
 - i. The proposed On-Ramp roadway cross section in accordance with Schedule 15-2, Part 9, Clause 1.3 on the Structure; and,
 - ii. EB and WB alignment, including Emergency walkways, under the Structure.
 - (iii) Pinecrest Road Structure (SN015180)
 - A. Design and construct a new Overhead structure to carry Pinecrest Road over the alignment. The new Structure shall accommodate the following:
 - i. The proposed Pinecrest Road roadway cross section in accordance with Schedule 15-2, Part 9, Clause 1.3 on the Structure; and,
 - ii. The EB and WB alignment, including Emergency walkways.
 - iii. The design of the Structure shall protect for and accommodate a future grade raise of up to 500 mm at the adjacent Pinecrest Road Highway 417 bridge location.

1. Buried structures, abutments and retaining walls shall, as a minimum, be designed to support an additional 500mm of granular material above the structure.
 2. Bridge girders and bridge deck shall be detailed to accommodate future lifting and reuse as part of the future elevated Pinecrest Road Structure (SN015180). Integral bridges shall not be used at this location. This lifting and reuse, along with modifications to the abutments and retaining walls, will have to be completed concurrently during a rapid bridge replacement of the Pinecrest Road Highway 417 bridge location. DB Co shall demonstrate in the PFDD submission how this future grade raise and modification of the bridge can be designed and constructed without impacting the LRT operation during the construction.
 3. Foundation design loading shall include appropriate allowances for the future elevated Pinecrest Road Structure (SN015180).
- B. Design of the Structure shall be coordinated with the design of Pinecrest Station. Refer to Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.
- C. Provide pedestrian access to Pinecrest Station in accordance with the requirements in Schedule 15-2, Part 6, Article 4 – Site Specific Desired Outcomes.
- D. Construction of the new Structure shall be staged in accordance with the requirements of Schedule 15-2, Part 7, Article 2 – Existing Municipal Roadways.
- (iv) Highway 417 S-W On-Ramp at Moodie Drive (SN116370)
- A. Design and construct a new Overhead Bridge to carry Highway 417 S-W On-Ramp at Moodie Drive over the alignment. The new Bridge shall accommodate the following:
- i. The proposed On-Ramp cross-section in accordance with Clause 6.19 of Schedule 15-2 Part 2 on the Structure.
 - ii. The proposed EB and WB LRT alignment including an Emergency walkway and an allowance for a future MUP on the north side of the alignment under the Structure.
- (v) Highway 417 N-W On-Ramp at Moodie Drive (SN116330)

- A. Design and construct a new Overhead Bridge to carry Highway 417 N-W On-Ramp at Moodie Drive over the alignment. The new Bridge shall accommodate the following:
 - i. The proposed On-Ramp cross-section in accordance with Clause 6.19 of Schedule 15-2 Part 2 on the Structure.
 - ii. The proposed EB and WB LRT alignment including Emergency walkway and an allowance for a future MUP on the north side of the alignment under the Structure.
- (vi) Holly Acres Road Bridge (SN115230)
 - A. Design and construct a new Overhead Bridge to carry the alignment over Holly Acres Road. The new Bridge shall accommodate the following:
 - i. The proposed EB and WB alignments, including an Emergency walkway on the Structure.
 - ii. The proposed Holly Acres Road roadway cross section in accordance with Clause 6.19 of Schedule 15-2, Part 2, pedestrian facilities and Transitway access to the Highway 417 on-ramp under the Structure.
- (vii) Moodie Drive Bridge (SN116350)
 - A. Design and construct a new Overhead Bridge to carry Moodie Drive over the proposed alignment. The new Bridge shall accommodate the following:
 - i. The proposed Moodie Drive cross-section in accordance with Clause 6.19 of Schedule 15-2, Part 2 on the Structure.
 - ii. The proposed EB and WB alignment including an Emergency walkway and an allowance for a future MUP on the north side of the alignment under the Structure.
 - B. The proposed Moodie Drive overpass shall have a raised concrete sidewalk on the West side of the Moodie Drive, in accordance with Article 6 - Roadways, Bus Terminals and Lay-Bys, of Schedule 15-2, Part 2.
 - C. Install Bridge Structure fencing in accordance with Schedule 15-2, Part 6, Article 2 – Design Criteria.

ARTICLE 5 GEOTECHNICAL/FOUNDATION DESIGN CRITERIA

5.1 Order of Precedence

- (a) DB Co's design and construction of all Foundation work shall be in accordance with the criteria contained in this Article 5 and the Reference Documents identified below. If there is any conflict between the criteria contained in this Article 5 and any the Reference Documents below, the following shall apply in descending order of precedence:
- (i) The criteria contained in this Article 5;
 - (ii) MTO Special Provisions;
 - (iii) The applicable MTO Directives, MTO Policy Memorandums, and MTO Design Bulletins;
 - (iv) OPSS;
 - (v) MTO Contract Design, Estimating and Documentation (CDED) Manual;
 - (vi) Guidelines for Foundation Engineering – Tunneling Specialty for Corridor Encroachment Permit Application;
 - (vii) MTO Laboratory Testing Manual, February 2016;
 - (viii) RSS Design Guidelines, MTO, September 2008;
 - (ix) Embankment Settlement Criteria for Design, July 2, 2010, MTO;
 - (x) MTO Guidelines for Rock Fill Settlement and Rock Fill Quantity Estimates, September 2010;
 - (xi) MTO Sign Support Manual, April 2015;
 - (xii) MTO Guidelines for the Design of High Mast Pole Foundations, 4th Edition, May 2004;
 - (xiii) Integral Abutment Guidelines and Semi-Integral Abutment Guidelines, MTO;
 - (xiv) MTO Standard Drawings;
 - (xv) OPSD;
 - (xvi) DSM;
 - (xvii) CHBDC, for Highway applications;
 - (xviii) Canadian Foundation Engineering Manual;

- (xix) Guideline for Professional Engineers Providing Geotechnical Engineering Services, published by Professional Engineers of Ontario;
- (xx) ASTM Standards; and,
- (xxi) Geotechnical Resistance Factors – Highway 417 Widening and Rehabilitation, Thurber Engineering, June 28, 2017.

5.2 Subsurface Investigations and Testing Prior to Construction

- (a) DB Co shall, notwithstanding the requirements specified in this Clause 5.2 of Part B of Schedule 15-2, Part 9, be responsible for undertaking sufficient additional subsurface investigations to permit the detail design and construction of Highway Works. Results of investigations shall be provided to the City for information purposes promptly upon receipt of same and shall include a Geocres number for the MTO Foundation Database.
- (b) Boreholes shall extend to refusal or to a competent stratum that will provide sufficient axial resistance or bearing resistance for the design of structure foundations or sufficient bearing resistance to settlements and/or instability for the design of embankment to meet the design requirements.
- (c) For Temporary Protection System and Temporary Cofferdam, boreholes shall be extended to depth to provide sufficient tip resistance, lateral resistance and resistance to basal heave.
- (d) Refusal is defined by material for which the resistance measured by the Standard Penetration Test (SPT) exceeds 100 blows per 0.3 m of penetration.
- (e) Where possible, explorations shall be located to minimize disruption to traffic, environmentally sensitive areas and not to interfere with private property.
- (f) For re-use of existing Foundation, a minimum of one borehole is required at each final Bridge pier and abutment location, advancing to a minimum of 3 m below refusal. If bedrock is encountered, the borehole shall be cored for a minimum depth of 3 m. Additional boreholes, sufficient in number to permit the detail design and construction of Structure Foundations shall be carried out as required and, shall also be located as needed at such locations and at retaining Structure locations, within Bridge approaches, and in cut/fill sections.
- (g) For design of new or replacement Foundation, a minimum of two boreholes are required at each Foundation element advancing to a minimum of 3 m below refusal. If bedrock is encountered, a minimum of 50% of explorations shall be cored for a minimum depth of 3 m.
- (h) A minimum of one borehole within 20 m of the abutment shall be advanced at each Bridge approach location. The borehole shall be advanced to 3 m into a competent stratum.

- (i) A minimum of two boreholes shall be advanced at each Structural Culvert, one at the inlet and one at the outlet location. For greater clarity, at locations where separate Structural Culverts are designed along the same waterway, such as under each carriageway, each of those Structural Culverts requires a minimum of two boreholes. If bedrock is encountered, bedrock shall be cored for a minimum depth of 3 m.
- (j) Minimum borehole spacing along retaining wall shall not exceed 50 m and one borehole at each end of the retaining structure shall be drilled. The boreholes shall be advanced to 3 m into a competent stratum.
- (k) A minimum of one borehole shall be advanced for each Overhead Sign Support Structure Foundation and for each High Mast Lighting Foundation. The borehole shall be advanced to 3 m into a competent stratum. If bedrock is encountered, the rock shall be cored for a minimum depth of 3 m.
- (l) Minimum borehole requirements for the drainage crossing installation by trenchless method are:
 - (i) One borehole at each end (entry and exit portal);
 - (ii) A minimum of one borehole shall be placed between the embankment crest and the ends of the culvert (or sewer);
 - (iii) Borehole spacing along the tunnel alignment shall not exceed 50 m;
 - (iv) All boreholes shall be located outside but within 2 m of the drainage crossing's alignment;
 - (v) Boreholes shall be advanced to a depth of triple the drainage crossing diameter below invert; and,
 - (vi) If bedrock is encountered, bedrock shall be cored for a minimum depth of 3 m below the invert of the drainage crossing.
- (m) Minimum borehole spacing along the alignment of Noise Barrier shall not exceed 50 m. The borehole shall be advanced 3 m below competent stratum. If bedrock is encountered, the rock shall be cored for a minimum depth of 3 m.
- (n) Boreholes shall be advanced at 50 m spacing in high fill and deep cut sections when fill height and cut depths exceed 4.5 m. The boreholes shall be advanced 3 m into a competent stratum or 10 m below the base of the fill or 6 m below the base of the cut, whichever is less. If bedrock is encountered coring is not required.
- (o) All field and laboratory testing shall be carried out in accordance with applicable MTO Standards.
- (p) Field testing locations shall be consistent with the Coordinate system identified in Part A of this Schedule 15-2, Part 9.

- (q) All aspects of implementation of geotechnical test holes (including, but not limited to, planning, licensing, construction, maintenance, abandonment, and reporting) shall be in accordance with Ontario Regulation 903 (Wells) and its amendments made under the Ontario Water Resources Act (R.S.O. 1990).
- (r) Fieldwork shall be carried out in accordance with the OHSA and MTO Occupational Health and Safety Field Guide for Engineering Functions.

5.3 Structure and Utility Protection

- (a) DB Co shall be responsible for the protection of all structures and Utilities that may be affected by the Project Operations and the repair of any structures and Utilities damaged by the Project Operations. DB Co shall follow and satisfy the requirements identified in Part 2, Article 9 – Protection of Existing Adjacent Structures.

5.4 Foundation Design and Construction

- (a) Foundation engineering design shall be carried out in accordance with the most recent edition of the CHBDC and Canadian Foundation Engineering Manual, as applicable, and the Reference Documents in Clause 5.1 of Part B of this Schedule 15-2, Part 9.
- (b) Foundations for the integral abutments shall be designed in accordance with Integral Abutment Guidelines, MTO.
- (c) Foundations for High Mast Lighting shall be designed in accordance with the latest edition of the CHBDC, Canadian Foundation Engineering Manual and Guidelines for the Design of High Mast Pole Foundations.
- (d) Foundations for sign support structures shall be designed in accordance with the latest edition of the CHBDC, Canadian Foundation Engineering Manual and MTO Sign Support Manual,
- (e) Foundation design and construction shall consider existing Utilities or buildings. Excessive settlement that can compromise the performance and serviceability of existing Utilities or buildings shall be prevented.
- (f) DB Co shall carry out a detailed site specific seismic Hazard assessment for Sites where the subsoil has been screened and flagged as potentially liquefiable. Detailed seismic Hazard assessment shall be performed per CHBDC using a rigorous dynamic Site response analysis.
- (g) Physical and mechanical properties and erodibility of Soil/Rock shall be provided to the Drainage/Hydrology Engineer for scour analysis. The Geotechnical Engineer shall review the Drainage/Hydrology Report and confirm that the proposed countermeasures for scour protection are sufficient to ensure the performance of the Structure Foundations.

5.5 Permanent Retaining Walls/Structures

- (a) Reinforced soil slopes shall be considered as Retaining Walls in accordance with the “RSS Design Guidelines, MTO”, CHBDC and Canadian Foundation Engineering Manual.
- (b) Both the proprietary retained soil system and conventional retaining structures shall be designed for durability and shall satisfy sliding, bearing resistance, overturning and global stability with appropriate factors of safety, in accordance with CHBDC and Canadian Foundation Engineering Manual, and RSS Design Guidelines, MTO. The internal stability of the proprietary retained soil system shall also be checked.
- (c) Proprietary Retained Soil Systems not prequalified on the DSM shall be approved by the MTO RSS Committee on a project specific basis. DB Co shall allow six weeks for each iteration of review.
- (d) Proprietary Retained Soil Systems, if used, shall be designed and constructed in accordance with the “RSS Design Guidelines, MTO” and applicable Special Provisions. Walls required to retain Bridge embankments adjacent to Bridge Foundations are considered abutment walls. RSS walls shall not be used as True Abutments where True Abutments are defined by “RSS Design Guidelines, MTO”.
- (e) Gabion baskets shall not be utilized as retaining structures within the MTO ROW.
- (f) Design of all permanent retaining structures and Barriers shall allow for full-depth replacement of Pavements.
- (g) Design of all permanent retaining structures shall eliminate pressures generated by frost action.
- (h) At each side where construction of a Retained Soil System is considered, DB Co shall engage a Geotechnical Engineer to evaluate the suitability of the site for use of the Retained Soil System that satisfies the intended purposes and to consider the anticipated ground movement or settlement and global stability. Based on the findings of this evaluation, DB Co shall provide design details of the ground improvement method, to accelerate the consolidation settlement and limit the secondary compression and/or to strengthen the existing soils.

5.6 Permanent Cut and Fill Slopes

- (a) Permanent cut and fill slopes shall be designed to:
 - (i) Be compliant with the CHBDC;
 - (ii) Provide an applicable factor of safety against global slope failure according to the Canadian Foundation Engineering Manual;
 - (iii) Be protected against surficial erosion and shallow surface failures;

- (iv) Control discharge of surface water and subsurface seepage;
 - (v) Allow for regular maintenance of the slope surface;
 - (vi) Satisfy short-term stability during construction using appropriate undrained strength parameters;
 - (vii) Satisfy long-term stability using effective strength parameters; and,
 - (viii) Satisfy embankment settlement performance requirements as specified in the Embankment Settlement Criteria for Design (MTO).
- (b) An applicable factor of safety shall be used for slopes adjacent to, abutting, or surrounding Bridge abutments that considers the risk and consequences of slope failure adjacent to the Bridge.
- (c) In accordance with OPSD 202.010, independent of stability analyses, for embankment earth fills equal to or greater than 8 m in height, fill slopes shall incorporate horizontal benches for surficial stability at maximum 8 m intervals. For rock fills equal to or greater than 10 m in height, rock fill slopes shall incorporate horizontal benches at maximum 10 m intervals. Slopes shall be constructed in accordance with OPSS PROV 206 and OPSS PROV 804.
- (d) Horizontal benches shall be provided for surficial stability for cut slopes higher than 6 m and shall be provided at maximum 6 m intervals.
- (e) Permanent cut and fill slopes shall be designed and constructed to avoid tension cracks, toe bulging, slumping, or sloughing of embankment or cut slope.

5.7 Temporary Slopes and Retaining Structures

- (a) The performance of each Temporary Works shall be sufficient for its expected Service Life. All Temporary Highway Works must comply with the OHSA, MOL requirements and the applicable construction projects regulation thereunder current at the time of excavation and the additional criteria identified below:
- (i) Temporary retaining structures shall be designed and constructed to meet OPSS PROV 539 Construction Specification for Protection Systems and this Article 5.

5.8 Earthwork and Geo-Environmental

- (a) Earthwork shall be constructed to meet the applicable requirements of OPSS PROV 501 Construction Specification for Compaction, and as modified by SP 105S22, OPSS PROV 401 Construction Specification for Trenching, Backfilling, and Compacting, OPSS PROV 206 Construction Specification for Grading, OPSS PROV 212 Construction Specification for Earth Borrow, and OPSS PROV 1010 Aggregates – Base, Subbase, Selected Subgrade and Backfill Material.

- (b) All Lightweight Fills shall be adequately protected from wheel load, groundwater, road salts, weather, fire, flotation under flood conditions, and fuel spills.
- (c) Geo-Environmental requirements are specified in Schedule 17, Part 4 – Contamination and Excavated Material Management.

5.9 Instrumentation and Monitoring

- (a) DB Co shall develop and submit plans and procedures to the City for instrumentation and monitoring at least three months prior to commencement of monitoring of the Highway Works.
- (b) DB Co shall determine and install geotechnical instrumentation in the key and critical areas described as follows where special attention or continued monitoring is required before, during, and after Highway Works construction to check the safety of the work; assess the effects of construction on the surrounding ground and existing facilities including Structure abutments and footings; identify likely causes and distribution of ground movements; evaluate design assumptions and refine estimates of future performance; and check compliance with performance specifications. As needed, the monitoring shall address, frequency and duration of monitoring for construction-induced noise and vibration, groundwater elevation and pressure, loads and strains in the ground, on adjacent facilities and structures, and vertical and horizontal movements including displacement and strains for fill embankments and Ground Movements adjacent to deep excavations, temporary retaining structures (including piles, struts and tiebacks), permanent retaining structures, Utilities Infrastructure, hydro towers, Roadways and pathways, existing buildings, Bridges or other Structures that shall remain in service on temporary and permanent works. DB Co shall be responsible for designing and implementing the program, obtaining baseline survey data, organizing, evaluating and preserving the data, submitting it to the City for information, and undertaking corrective actions if and as needed.
- (c) Design of the geotechnical instrumentation and monitoring program shall be under the direct supervision of a Professional Engineer.
- (d) Staff for the design and implementation of the geotechnical instrumentation and monitoring program shall include personnel who have verifiable design and construction experience with similar programs.
- (e) DB Co shall decommission and dispose of all geotechnical, hydrogeological, and/or geo-environmental instrumentation installed by DB Co or MTO for the purposes of this Project, at the end of construction or after the instrumentation is no longer required for Project activities. DB Co shall decommission and dispose of any existing geotechnical, hydrogeological, and/or geo-environmental instrumentation, that is documented in the Background Information or that may not be documented and otherwise encountered by DB Co during construction, used for monitoring/not used for monitoring, on, in, or under the Lands. DB Co shall obtain acceptance from the City prior to decommissioning and disposal of any existing geotechnical, hydrogeological, and/or geo-environmental

instrumentation, that is documented in the Background Information or that may not be documented and otherwise encountered by DB Co during construction, used for monitoring/not used for monitoring, on, in, or under the temporary Lands as defined in Schedule 20 - Lands. DB Co shall provide decommissioning records to the City.

- (f) GIMP: DB Co shall prepare a comprehensive GIMP and submit to the City for review in accordance with Schedule 10 - Review Procedure. The GIMP shall be applicable for the duration of construction, testing, and Commissioning. As a minimum, the GIMP shall include the following:
- (i) A DMP for monitoring the impacts on Existing Adjacent Structures including in areas where the underlying soil is clay, dewatering of the excavation could lead to impacts on Existing Adjacent Structures, and excavations are across existing Roadway Structures. The DMP shall be a GIS-based and web-based system using a secure internet connection capable of receiving and visualizing near real time monitoring data. The DMP shall be used to create and send alarm reports/notifications and create monitoring reports including batch reports if Response Levels defined by DB Co and indicated in Schedule 15-2, Part 2, Article 9 – Protection of Existing Adjacent Structures, are exceeded. DB Co shall provide access credentials to the City for simultaneous users for the DMP. DB Co shall set up the DMP such that the City is immediately notified of exceedances.
 - (ii) For Existing Adjacent Structures located in areas where underlying clay soil is not present, dewatering for the excavation would not impact Existing Adjacent Structures, and excavations are not across existing Roadway Structures, conventional survey monitoring using benchmarks may be used..
 - (iii) All instruments including existing instruments turned over to DB Co by the City or MTO and instruments to be installed by DB Co.
 - (iv) Typical installation details and location of additional instruments.
 - (v) Schedule for installation, taking baseline readings, frequency and duration of monitoring for each phase of construction.
 - (vi) Construction-induced noise and vibration control and monitoring plan.
 - (vii) The plan and schedule for decommissioning and disposing of all additional instruments installed by DB Co as well as all existing instruments turned over to DB Co. DB Co shall notify the City of the intention to decommission instruments.
 - (viii) All Response Levels (refer to Part 2, Article 9 – Protection of Existing Adjacent Structures), as specified and defined by DB Co.
 - (ix) A Response Action Plan, which shall consist of methods and means to respond to various Review and Alert Level scenarios as outlined in Part 2, Article 9 – Protection of Existing Adjacent Structures, based on types of geotechnical instruments that indicate Review and Alert Levels. DB Co shall inform the City of

subsequent response actions in accordance with the Response Action Plan. At a minimum, a Response Action Plan shall include the following:

- A. Names, telephone numbers, and locations of persons responsible for implementation of contingency plans.
 - B. Materials and equipment required to implement contingency plans.
 - C. Location on Site of all required materials and equipment to implement contingency plans.
 - D. Step-by-step procedure for performing works involved in implementation of the contingency plans.
 - E. Specific actions related to the Alert Level values for all instruments, including means of reducing or eliminating movements and rates of movements.
 - F. Inspection of affected facilities, structures and utilities and performance of acceptable corrective and restorative measures.
 - G. Clear identification of objectives of contingency plans and methods to measure plan success.
- (x) All measures and specific instrumentation and monitoring requirements to protect Existing Adjacent Structures in accordance with Part 2, Article 9 – Protection of Existing Adjacent Structures.
- (xi) All measures and specific instrumentation and monitoring requirements for protecting heritage buildings, if any, identified in the Project Assessment Study Environmental Project Report and relevant updated revisions which are within the Project ZOI as defined in Part 2, Article 9 – Protection of Existing Adjacent Structures.
- (xii) For all Underground Structures, DB Co shall supply, install, maintain, and monitor for the duration of construction, testing, and Commissioning a system of instruments that will indicate the pressures and deformations imparted to the permanent Structures. The instrumentation shall include:
- A. Two arrays of pressure cells with one array on each long side of the Station. Each array shall consist of three cells installed at three different elevations (top, middle and bottom levels along the vertical side walls and away from end walls). Pressure cells shall be installed behind the water proofing system on the overburden side, including soil and rock, prior to start of concrete pouring for the walls.
 - B. Install a minimum of three equally spaced surface settlement monitoring points on both sides of the excavation along a line perpendicular to the

excavation, with the first monitoring point located at the edge of the excavation, the second monitoring point located at the farthest point no further away than the limits of the Project ZOI outlined in Part 2, Article 9 – Protection of Existing Adjacent Structures, and the third monitoring point located equally between the first and second monitoring points. These lines of monitoring points shall be spaced a maximum of every 30 m running parallel to the excavation.

- C. Install In-Place-Inclinometers on both sides of the excavation spaced a maximum of 50 m running parallel to the alignment. Inclinometers to be placed a maximum allowable distance of 1 m from the edge of excavation.
 - D. Install piezometers on both sides of the excavation spaced a maximum of every 50 m. DB Co to locate and monitor piezometers to ensure the groundwater drawdown restrictions of Clause 5.10 of this Part 9, Part B are followed.
 - E. All the above instruments shall be connected to permanent data loggers.
 - F. All of the above instruments shall have a minimum daily reading frequency when located less than or equal to 30 m from the edge of excavation and a weekly reading frequency (a minimum of once per week) when located greater than 30 m from the edge of excavation.
 - G. DB Co shall submit an updated monitoring report in electronic format, in accordance with requirements of Schedule 10 – Review Procedure every week.
- (g) Stable benchmarks shall be established along the length of the alignment. Coordinates and elevations shall be established at least three months prior to monitoring with repeat baseline survey readings taken during this time. The number of reference benchmarks established shall be sufficient to provide adequate sight distances to permit monitoring as specified in this Article 5. Benchmark coordinates and elevations shall thereafter be resurveyed annually. Data shall be submitted to the City for information.
- (h) Measurements of differential settlements between abutments and abutment approaches must be taken at the end of years 1 and 2 of the Highway Warranty Period. Measurement data shall be provided to the City.
- (i) Immediately following paving, elevations at the centreline of each lane shall be measured at all Bridge abutments and at distances of 20 m, 50 m, 75 m, and 100 m from the abutments.
- (j) DB Co shall validate and demonstrate the effectiveness of ground improvement when it is carried out to mitigate seismic Hazards, by appropriate insitu and laboratory testing.

- (k) DB Co shall carry out settlement monitoring for the drainage crossings installed by subsurface methods and shall satisfy the requirements of the Tunneling Guidelines including adherence to Review and Alert Level protocol.
- (l) Provide a demonstration of the features of the instrumentation DMP to the City prior to the start of construction and afterwards as modifications are made to the website.
- (m) Meet with the City as needed to discuss instrumentation levels and necessary actions to protect EAS.
- (n) Replace damaged or malfunctioning instrumentation. The City may order a temporary work stoppage in areas where there is insufficient working instruments to ensure the protection of EAS.
- (o) Accommodate the City in inspecting the installation of geotechnical instrumentation, related hardware, and in verifying the proper functioning of the instrumentation monitoring system including, but not limited to the collection, transmission, storage, backup, and reduction of data.
- (p) DB Co shall indicate locations where, due to contractual interfaces or changes in the extent of the Project ZOI outlined in Part 2, Article 9 – Protection of Existing Adjacent Structures, re-baselining of instrumentation readings shall be conducted.

5.10 Groundwater Control – Dewatering/Unwatering

- (a) For the purposes of this Clause 5.10, unwatering is defined as the removal of water that has accumulated in an excavation and is an element of groundwater control. Groundwater control is defined as dewatering/unwatering and/or aquifer depressurization.
- (b) DB Co shall develop and submit plans and procedures for groundwater control (including effluent discharge), in accordance with Schedule 10 – Review Procedure. The plans and procedure shall include, but not be limited to the following items:
 - (i) Detailed shop drawings of the entire dewatering system(s) that bear the seal and signature of a Professional Engineer, and include, but not be limited to, details, and calculations of proposed type of dewatering system(s), showing arrangement, location, and depths of components of system including details of screens and filter media, complete description of equipment and materials to be used, procedure to be followed, standby equipment, standby power supply, and proposed location(s) of points of discharge of water and abandonment of dewatering system(s), a description of any permits and approvals that pertain to the groundwater control activities;
 - (ii) A discharge plan that includes: discharge location(s) including methods; procedures and equipment to convey water to discharge locations; location and dimensions of treatment equipment; procedures for water testing; water quality laboratory analyses procedures, test results or analyses, and water treatment

methods; location and construction details of monitoring observation wells, and a description of any permits and approvals that pertain to the discharge activities.

- (c) DB Co shall apply for Permits, Licences and Approvals, including PTTW and/or Environmental Activity and Sector Registry, and discharge permits (e.g., Municipal, conservation authority and/or ECA).
- (d) Design, construction, and operation of groundwater control measures shall not induce detrimental short- and/or long-term movements of surrounding Structures, infrastructure and ground surface. Evaluation of detrimental movements shall follow provisions included in Part 2, Article 9 – Protection of Existing Adjacent Structures.
- (e) DB Co shall develop plans and procedures for groundwater control (including effluent discharge), establish monitoring requirements, and perform a hydrogeological impact assessment and associated risk assessment and submit to the City. This process shall consider all required project Permits and Approvals. DB Co shall ensure that any groundwater control, effluent discharge, and subsequent effects during construction or during the Design Life shall have no adverse impact on the following features within the Project ZOI: properties, adjacent Structures, infrastructure, active groundwater supply wells, and environmental features. Specifically, the following potential impacts shall be managed/mitigated such that they are not/do not become adverse:
 - (i) Groundwater drawdown effects including impacts on the quantity and quality of groundwater available for groundwater dependent ecosystems and existing groundwater users;
 - (ii) Groundwater drawdown effects which may cause settlement of existing Structures or Utilities within the Project ZOI as required in Part 2, Article 9 – Protection of Existing Adjacent Structures; and,
 - (iii) Appropriate quantity and quality of dewatering effluent with respect to the receiver (e.g., municipal sewer, natural environment, off-site receiver, etc.), in accordance with all applicable Project permits and approvals.
- (f) Any activity within RVCA regulated area shall be performed in agreement with the applicable requirements and regulations and will require RVCA review and approval.
- (g) DB Co shall design, install, operate, monitor, maintain, and decommission (as required) the project-specific groundwater control systems, as necessary to meet Project requirements and shall continue proper discharging of effluent according to the relevant City's Sewers Use By-law, as well as any other applicable regulatory (e.g., conservation authority and MOECC) approvals without any interruption or negative impact on existing Structures. It shall be the sole responsibility of DB Co to verify the condition of the groundwater control systems and operate them as required.
- (h) DB Co shall submit, on a quarterly basis, the data obtained from all instrumentation utilized for monitoring including hydrogeological and geotechnical instrumentation to the City for review in accordance with Schedule 10 – Review Procedure.

- (i) DB Co shall conduct all monitoring required by the obtained permits and approvals (including daily pumping volumes).
- (j) DB Co shall submit the monitoring results to the applicable agencies as stated in the obtained permits and approvals.
- (k) DB Co shall respond to/address any complaints received that are potentially related to groundwater control activities.
- (l) Dewatering shall be carried out in accordance with OPSS PROV 517 and SSP 517F01.
- (m) Extraction of groundwater for the purposes of construction dewatering and/or depressurization is subject to the following provincial regulatory requirements:
 - (i) Environmental Protection Act (R.S.O. 1990) and Ontario Regulation 63/16 thereunder that requires registration on the Environmental Activity and Sector Registry (EASR) for extracting greater than a total of 50,000 litres per day but no more than 400,000 litres per day (cumulative from all sumps, wells, well points, educators, etc.).
 - (ii) Ontario Water Resources Act (R.S.O. 1990) and the Water Taking regulation thereunder that requires a Permit to Take Water (PTTW), Category 3, for extracting more than a total of 400,000 litres per day (cumulative from all sumps, wells, well points, educators, etc.).
 - (iii) DB Co shall obtain any required PTTW or complete EASR registration as applicable, for construction dewatering or groundwater pressure reduction activities. Refer to Part B, Clause 7.4 of this Part 9.
- (n) Discharge of water extracted during dewatering and/or groundwater pressure control activities shall be completed by DB Co in compliance with all applicable federal, provincial, and municipal requirements for water quality and flow rates. DB Co shall obtain any required Permits or Authorizations, as applicable, for the discharge of water extracted for construction dewatering and/or groundwater pressure reduction activities.

5.11 Submission Requirements

- (a) DB Co shall prepare a comprehensive Geotechnical Report (the “Geotechnical Report”) for Highway Works that covers existing geotechnical information and known site conditions, new investigations performed for the Project, geotechnical engineering analysis, geotechnical design assumptions and design parameters (and the basis for these) and geotechnical design recommendations for all Structures. The report shall be submitted in accordance with Schedule 10 – Review Procedure, and shall include, as a minimum, the following items:
 - (i) A summary of any additional work and subsurface investigations that have been completed by DB Co, including drafted drill summary logs in a format acceptable to the City;

- (ii) Final recommendations for Foundation systems, allowable loads and estimates of total and differential settlements at 2, 5, 10, 20, 40 and 75 years following construction;
- (iii) Geotechnical design recommendations for retaining structures;
- (iv) Design of trenchless crossings;
- (v) Design of high fill embankments, including fill stages and consolidation period between each fill stage;
- (vi) Design details to time-rate-of-settlement control measures such as prefabricated vertical drains, lightweight fills, and preload/surcharge;
- (vii) Estimates of total and differential settlement of embankments and roadways at 2, 5, 10, 20, 40 and 75 years following construction;
- (viii) A settlement monitoring and instrumentation plan along with details of instrumentation to be installed, monitoring requirements, and instrumentation reading threshold values at which construction is halted or resumed;
- (ix) Requirements for ground improvement measures necessary to meet the static and seismic performance requirements for Foundations, cut and fill slopes, embankments and retaining structures;
- (x) An assessment of the stability of approach embankments, road embankments, cut slopes and fill slopes under static and seismic loading conditions and the ability of these to meet the seismic performance requirements;
- (xi) Reduced size (11" x 17") drawings showing the road alignment in plan and profile with drill hole locations shown on the plan and simplified summary logs shown on the profile (design notes are to be shown along the bottom of the drawings);
- (xii) A final geotechnical progress report for the Structures with reduced size (11" x 17") drawings showing the general arrangements for Structures, including Bridge, pedestrian bridge, Culvert, Retaining Wall, and Overhead Sign Support Structure in plan and profile, with drill locations shown in plan and simplified summary logs shown in profile (with Overhead Sign Support exempt from the simplified summary log requirement); and
- (xiii) Geotechnical design recommendations for stormwater management ponds, including identification of subsurface conditions, borehole data, and inclusion of stratigraphic information.

ARTICLE 6 ELECTRICAL, SIGNALS AND LIGHTING DESIGN CRITERIA

6.1 Order of Precedence

- (a) DB Co's design for all electrical, lighting, and Traffic Signal Systems shall be in accordance with the criteria contained in this Article 6 and the following Reference Documents, and if there is any conflict between criteria contained in this Article 6 and any of the Reference Documents, the following shall apply in descending order of precedence:
- (i) The criteria contained in this Article 6;
 - (ii) MTO Special Provisions;
 - (iii) The applicable MTO Directives, MTO Policy Memorandums, and MTO Design Bulletins;
 - (iv) OPSS;
 - (v) MTO Contract Design, Estimating and Documentation (CDED) Manual;
 - (vi) Ontario Electrical Safety Code, Electrical Safety Authority;
 - (vii) MTO – Electrical Engineering Bulletin;
 - (viii) Electrical Engineering Manual, MTO;
 - (ix) Roundabout Lighting Policy;
 - (x) Illumination Warrant Policies PLNG –B-05 & PLNG – B- 06;
 - (xi) MTO accepted luminaire Photometric list;
 - (xii) Policy for spill light beyond MTO Right-of-way and for Light Trespass onto the MTO Right-of-way, (September 2007);
 - (xiii) MTO Electrical Engineering Bulletin 2018-01;
 - (xiv) AODA and Ontario Regulation 413/12;
 - (xv) Ontario Traffic Manual, MTO;
 - (xvi) Traffic Signal Bulletin 2009-01;
 - (xvii) Roadside Safety Manual, MTO;
 - (xviii) MTO Design Supplement for TAC Geometric Design Guide for Canadian Roads, June 2017;

- (xix) Geometric Design Guide for Canadian Roads (TAC);
- (xx) MTO Standard Drawing;
- (xxi) OPSD;
- (xxii) DSM;
- (xxiii) NCHRP Report 498: Illumination Guidelines For Highway Nighttime Work;
and,
- (xxiv) The applicable standards of the City of Ottawa.

6.2 General Requirements

- (a) There are existing chambers such as maintenance holes and handholes within the Highway Works limits that may be utilized as part of Highway Works. DB Co is advised that some of the chambers may require cleaning prior to using/entering the chambers. Cleaning shall include, but not be limited to, pumping water, mud and sludge that may have accumulated within and legally disposing of removed materials.
- (b) Maintenance holes and handholes metallic components shall be bonded and grounded per item specific requirements. There are existing chambers utilized by Highway Works, and some such chambers may require bonding connectors accordingly. Subsection 609.07.07 of OPSS 609 is amended by the addition of the following:
 - (i) Ground wires passing through new or existing electrical chambers, the ground wire shall be connected to the chamber's ground lugs (attached to ladder and/or frame and cover) with an appropriate ground wire connector. Where chambers found without bonded lugs, issue shall be raised with the City. At all locations where a new or existing ground electrode is present in the electrical chamber and/or enclosure, the ground wire shall be connected to the ground electrode with an appropriate ground wire connector.

6.3 Power Distribution

- (a) When the work in this Article 6 requires communication and Coordination with Utility Companies, the requirements of Article 4 of Part A of this Schedule 15-2, Part 9 and Section 11.30 of the Project Agreement shall be followed.
- (b) The power distribution system shall provide power to the Highway Works including illumination, ATMS, traffic signal control systems, and all other systems and components that require electrical power.
- (c) DB Co shall undertake all Coordination with power Utility Companies for all required servicing and shall provide a list of all electrical loads to the power Utility Companies, as required. DB Co shall coordinate preparation and submittal of service applications on behalf of the City.

- (d) DB Co shall provide power installations and connections to all components of the Highway Works that require electrical power and shall be metered.
- (e) DB Co shall provide an Arc Flash Study Report (the “Arc Flash Study Report”), including a coordination study and short circuit study, and warning labels for arc flash Hazard for all power supply equipment.

6.4 Lighting

- (a) All permanent lighting poles shall be base mounted with underground ducts and wiring.
- (b) Lighting shall meet the MTO Context Sensitive Design requirements as detailed in Appendix F of this Part 9.
- (c) All permanent Roadway lighting Design Criteria shall meet the appropriate standard for the Roadway classification and shall comply with MTO Directives and MTO Standards. DB Co shall use LED luminaires for all high mast, conventional, and underpass illumination design. Luminaires shall be selected from the most current MTO Accepted Photometric List. Rotatable high mast luminaires shall be used for all high mast illumination design. DB Co shall be responsible to verify product availability. DB Co shall use a manufacturer that provides IES files with independent lab tests.
- (d) DB Co shall provide a Preliminary Lighting Design (the “Preliminary Lighting Design”) consisting of:
 - (i) Assessment of existing Highway Lighting System within Highway Works limits.
- (e) DB Co shall provide, at a minimum, the following illumination:
 - (i) Upgrade of the existing illumination (not requiring removal) to current standard LED luminaires and reinstate illumination impacted by Highway Works:
 - A. Greenbank Road/Pinecrest Road interchange and impacted ramps;
 - B. New power supply at Greenbank Road/Pinecrest Road to feed interchange (if required);
 - (ii) Ensure adequate illumination for new Holly Acres N/S-E on-ramp.
- (f) DB Co shall provide municipal lighting to City of Ottawa standards and shall coordinate and liaise design and installation with the City in accordance with Schedule 15-2, Part 2, Clause 6.16, on the following Crossing Roads. In each case, DB Co’s lighting design shall include provisions for lighting on the Underpass Structures (i.e. pole bases on the Deck and associated ductwork).
 - (i) Pinecrest Road/Greenbank Road;

- (g) DB Co shall determine the need for and provide any additional illumination within the Highway Works, interchanges, Crossing Roads and adjacent Highways including Underpasses.
- (h) All permanent Roadway illumination Design Criteria shall meet the appropriate standard for the Roadway classification and shall comply with MTO Directives. All lighting calculations shall be carried out utilizing MTO approved software. Illumination Design Criteria shall be met within the Highway Works limits.
- (i) Where the Highway lighting system is specified to be a full High Mast Lighting system, in-fill conventional lighting shall not be permitted.
- (j) The lighting design shall accommodate more than one high mast luminaire manufacturer (i.e. the selection of high mast pole placements shall accommodate alternate luminaires, both of which must satisfy the MTO's lighting criteria).
- (k) DB Co shall replace high mast luminaire support components to install additional luminaires. Mixing of new and old luminaires on a high mast pole is not permitted. Modification of existing high mast luminaire support components is not permitted. All high mast poles that are taken down shall have their raising and lowering devices and luminaire support assemblies replaced.
- (l) DB Co shall not modify existing high mast pole footings.
- (m) DB Co shall relocate or replace associated underground lighting power cables and wiring, conduit, and maintenance holes. Permanent underground cable splices are not permitted. Disruptions to electrical cables will require the installation of new continuous cables.
- (n) All high mast poles that are taken down shall be inspected to ensure that their condition is suitable for reinstallation, if damaged or found to be not suitable for reinstallation, new high mast poles shall be installed.
- (o) Only external raising/lowering drives shall be used for high mast poles. A minimum of two drills shall be provided for each type of raising/lowering device. Granular maintenance access shall be provided for each high mast pole.
- (p) DB Co shall provide a minimum of one spare conduit for each under pavement crossing. Hand holes shall be minimum 600 x 600 mm.
- (q) DB Co shall coordinate all under pavement crossing operations with the installation of Noise Barriers, retaining walls and Barrier walls adjacent to the auguring pits for the subsurface installation of ducts and steel encasements.
- (r) Electrical ducts behind concrete barrier on the outside Shoulders shall be offset a minimum of 1.2 m.
- (s) The following total light loss factor (LLF) shall be used when completing lighting calculations: Total LLF of 0.70 for LED conventional, total LLF of 0.74 for LED high

mast, and total LLF of 0.55 for LED underpass. When completing lighting calculations for trespass levels, total LLF of 1.0 shall be used.

6.5 Temporary Lighting during Construction

- (a) All existing lighting shall be maintained in operational order during performance of the Highway Works until such time as replacement temporary or permanent lighting is energized.
- (b) DB Co shall review the need for temporary lighting for each construction stage and provide lighting where required.
- (c) Temporary illumination shall be provided for the Roads to accommodate traffic Detour Routes and Diversions in accordance with the OPSS 106 and Electrical Engineering Manual (MTO).
- (d) All temporary Roadway illumination Design Criteria shall meet the appropriate standard for the Roadway classification and shall comply with MTO Directives. All lighting calculations shall be carried out utilizing MTO approved software. Illumination Design Criteria shall be met within the Highway Works limits.

6.6 Traffic Signals

- (a) Traffic signals shall be constructed at the following locations:
 - (i) Holly Acres Road at Highway 417 N/S-E and N/S-W on-ramps;
 - (ii) Richmond Road at Bayshore Drive/Highway 417 E-N/S ramp (as required);
 - (iii) Pinecrest Road at Highway 417 north ramp terminal;
 - (iv) Greenbank Road/Iris Street at Highway 417 south ramp terminal;
 - (v) Holly Acres Road at Highway 417 N/S-W on-ramp;
- (b) General Requirements
 - (i) DB Co shall coordinate the design, approvals and construction requirements for temporary and permanent traffic signals with the City.
 - (ii) In accordance with the requirements of this Schedule 15-2, Part 9, DB Co shall be responsible for all aspects of the design of the signalized intersections listed in this Clause 6.6, with the following exception:
 - A. Upon review and approval of DB Co's geometric design of each signalized intersection, the City shall design traffic signals (including below and above ground plant) in accordance with AODA and Ontario Regulation 413/12 and applicable MTO guidelines. Where the location

selected for a traffic signal pole is not suitable for a pole foundation as per City of Ottawa Standard Detail Drawings (e.g., where the pole is designed to go on top of pre-existing utilities), DB Co shall be responsible for the design of the non-standard foundation, in addition to the construction requirement.

- (iii) For temporary and permanent traffic signals, DB Co shall prepare PHM-125 drawings, and shall coordinate review and approval by MTO prior to commencing construction.
- (iv) Interconnection shall be provided only where the signal is part of an existing municipal Interconnection network.
- (v) DB Co shall be responsible for providing communication to the traffic signals in coordination with the City.
- (vi) DB Co shall be responsible for liaising with the City and providing emergency pre-emption upon consultation with these municipalities and emergency services.
- (vii) Following the receipt of completed traffic signal designs from the City, DB Co shall contact the City's designated traffic control signal contact person at least 30 calendar days in advance to arrange for a mutually acceptable date and time to have City forces available to perform the installation, relocation, modification, and connection of the traffic control signal.
- (viii) DB Co shall complete the related civil Works at least 14 calendar days prior to the date when City forces are available in order for appropriate inspections to occur. Prior to the crew arriving on Site, DB Co shall provide adequate space and time for the Works to be completed.
- (ix) The City or a City Party shall have an inspection role during the construction and activation of the permanent and temporary traffic signals for both the above and below ground work. The City shall also be present for all traffic signal activations and deactivations of any traffic signal system, permanent or temporary within the Highway Works limits.
- (x) Access to the Traffic Signal controller cabinets:
 - A. The traffic signal controller cabinets will be locked at all times by the City. DB Co shall maintain access at all times to the traffic signal controller cabinet for all work inside the cabinet including for routine maintenance and/or emergency repair for the City of Ottawa Traffic Signal Department.
 - B. Should DB Co require access to the traffic signal controller cabinet, they shall request access from the City Representative.

- C. DB Co shall have both IMSA Traffic Signal Level II (Bench & Field) & Traffic Signal Level III (Bench & Field) certification in order to perform work inside of the traffic signal controller cabinet.
- D. A representative from the City of Ottawa Traffic Signal Department shall be allowed to inspect any work being done inside the traffic signal controller cabinet including for routine maintenance and/or emergency repair.

(c) MTO Permanent Traffic Signals

- (i) For permanent new traffic and transit signal facilities, or new permanent configurations at existing signalized intersections, the City shall supply and install all above ground traffic signal equipment as required by the governing road authority including but not limited to controller, poles, pedestrian and traffic signal heads with push buttons, audible displays, etc. The City shall supply, install and make all required terminations for the traffic signal wiring. The City shall provide all equipment and labour associated with the installation of permanent above-ground traffic signal infrastructure.
- (ii) DB Co shall coordinate with the City the design of electrical power feeds for all alterations to existing traffic signals, and new traffic signals; the cost of obtaining new electrical power feeds shall be a City responsibility.
- (iii) DB Co shall construct all permanent underground traffic infrastructure, including the supply and construction of concrete encased ducts, direct buried ducts, pole foundations, maintenance holes, maintenance hole frames & covers, vehicle loop detection and concrete pads.
- (iv) All traffic signal poles shall be base mounted poles with underground ducts and wiring.
- (v) The traffic signal controller unit shall be provided by the City.
- (vi) The City shall design and implement signal timing plans to accommodate traffic at Highway Substantial Completion.
- (vii) DB Co shall be responsible for obtaining all traffic data that may be required for analysis and signal timing design purposes. Traffic data shall be no older than two years.
- (viii) All traffic signal controllers shall be equipped with uninterruptable power supplies and emergency pre-emption, based on municipal standard.
- (ix) DB Co shall coordinate type of Detection with the City Representative.

(d) Municipal Traffic Signals

- (i) DB Co shall be responsible for liaising and Coordinating with the City of Ottawa with regard to all modifications that may be required at municipal traffic signals both during and after Highway Substantial Completion of the Highway Works. Proposed modifications shall be supported by traffic engineering analysis.
- (e) MTO PHM-125 Legal Drawings
 - (i) DB Co shall prepare and submit temporary PHM-125 legal drawings to the City Representative in accordance with Schedule 10 – Review Procedure and to MTO for review and approval following return of the Construction Document Submittal, and a minimum of 15 Business Days prior to implementation of each stage of construction where physical changes occur (i.e., geometric changes, signals hardware modification, etc.).
 - (ii) DB Co shall prepare and submit permanent PHM-125 legal drawings to the City Representative in accordance with Schedule 10 – Review Procedure and to MTO for review and approval following return of the Construction Document Submittal, and a minimum of 90 Business Days prior to implementation.
 - (iii) All permanent and temporary MTO PHM-125 legal drawings on an MTO PHM-125 drawing template for the permanent and temporary traffic control signals must be approved by the MTO prior to the construction of the signal or implementation of physical changes.
 - (iv) All permanent and temporary PHM-125 drawings shall identify all Regulatory Signs that impact operations.
 - (v) DB Co shall use and submit the current MTO PHM-125 drawing check list.
 - (vi) DB Co shall obtain the existing PHM-125 drawings from the City and shall update them based on the final conditions.
- (f) MTO Temporary Traffic Signals during Construction
 - (i) For temporary traffic and transit signals, or temporary modifications to existing signalized intersections, the City shall supply and install all above ground traffic signal equipment as required by the governing road authority including but not limited to controller, poles (with the exception of wood poles), pedestrian and traffic signal heads with push buttons, audible signals, etc. The City shall also supply and install and make all required terminations for the traffic signal wiring. The City shall provide all equipment and labour associated with the installation of temporary above-ground traffic signal infrastructure.
 - (ii) DB Co shall coordinate with the City the design of electrical power feeds for all temporary traffic signals or temporary modifications to existing signalized intersections; the cost of obtaining new electrical power feeds shall be a City responsibility.

- (iii) DB Co shall construct all temporary underground traffic infrastructure, including the supply and construction of concrete encase ducts, direct buried ducts, pole foundations, maintenance holes, maintenance hole frames & covers, vehicle loop detection and concrete pads. DB Co shall undertake all above ground infrastructure Work, including but not limited to installation, removals and reinstatement of wood poles, double span and anchors, along with any required underground civil Works including conduit, foundations, manholes/hand holes, frames & covers etc., as required to accommodate the staged construction of Work, with the exception of traffic signal equipment as described above, which shall remain the responsibility of the City.
 - (iv) All existing traffic signals shall be maintained in operational order during performance of the Highway Works until such time as replacement temporary or permanent traffic signal is energized.
 - (v) DB Co shall determine the need for temporary traffic signals to facilitate construction staging and provide where required including auxiliary heads, Advance Warning Signing, advance Flasher Beacons and down lights.
 - (vi) The City shall design and implement temporary signal timings during the Highway Works.
 - (vii) Integration with existing permanent traffic signals and temporary traffic signals is to be provided where needed.
 - (viii) The City shall operate and maintain the temporary traffic signals.
 - (ix) The City shall design and construct the traffic signal controllers.
 - (x) Where a temporary signal infrastructure requires the use of wood poles and/or span wire, the City shall be responsible for the design of signal head placement only. DB Co shall design the location of the wood poles, guy wires, and span wires based on the City's signal head placement.
- (g) Notification Requirements and Timelines
- (i) DB Co shall provide advanced notification in relation to traffic signal work to the City, in accordance with Table 6.5a. In any instances where the timelines of Table 6.5a may conflict with review periods specified elsewhere within this Schedule 15-2, Part 9, the longer duration shall apply.

| Table 6.5a – Traffic Signal Notification Requirements | | | | | |
|--|--------------------|---|-----------------|---|--|
| Item | Description | Notification (Calendar Days) | Prior to | Information to be supplied to City | Information to be supplied to DB Co |
| | | | | | |

| | | | | | |
|---|--|----|------------------------------------|--|--|
| 1 | Design | 30 | Desired receipt of signal design | 1:250 CADD for the intersection, including pavement markings on all approaches | City provides traffic signal design within 30 calendar days |
| 2 | Commencement of civil works (prerequisite – signal design completed) | 30 | construction of civil works | Date when works are to begin, schedule of work | None |
| 3 | Electrical work involving the City (prerequisite – signal design completed) | 30 | construction of civil works | Meeting date regarding electrical works, schedule of work | Contact names and telephone numbers of relevant staff |
| 4 | Scheduling of installation date by City forces (prerequisite – signal design completed) | 30 | Desired signal installation date | Desired installation date by City forces | Scheduled date for installation to be provided to DB Co within eight calendar days of the notification. Scheduled date shall be within 10 calendar days of DB Co's request |
| 5 | City Inspection of civil work completed by DB Co (pre-requisite – signal installation date) | 14 | Scheduled signal installation date | Confirmation of work being completed | Confirmation that the work was completed to City satisfaction, within 7 calendar days of DB Co's notification |

| | | | | | |
|--|------------|--|--|--|-------------------------|
| | scheduled) | | | | that work was completed |
|--|------------|--|--|--|-------------------------|

6.7 Counting Stations and Loops

- (a) DB Co shall identify the actual locations of Counting Stations and Loops (traffic data collection stations) along the Highway 417 and ramps. DB Co shall provide Counting Station and Loops at the locations identified below.
- (i) Traffic count Counting Stations and Loops:
- A. Greenbank W-N/S ramp (if existing plant is impacted by DB Co design);
 - B. Pinecrest N-W ramp;
 - C. Pinecrest E-N/S ramp;
 - D. Holly Acres N/S-W ramp;
 - E. Moodie S-W ramp;
 - F. Moodie N-W ramp; and
 - G. Pinecrest S-W ramp (if existing plant is impacted by DB Co design).
- (ii) Permanent data collection Counting Stations and Loops (approx. locations):
- (b) Counting Stations and Loops shall be installed within the milled surface or binder course of the Roadway.

6.8 Embedded Work in Structure

- (a) DB Co shall provide embedded work in new and rehabilitated structures.
- (b) DB Co shall provide new conventional pole bases throughout the core Continuous Illuminations.

ARTICLE 7 DRAINAGE AND EROSION CONTROL DESIGN CRITERIA

7.1 Order of Precedence

- (a) DB Co's Drainage design and construction shall be in accordance with the criteria contained in this Article 7 and the following Reference Documents and, if there is any conflict between the criteria contained in this Article 7 and any of the Reference Documents, the following shall apply in descending order of precedence:
 - (i) The criteria contained in this Article 7;
 - (ii) Federal and Provincial Codes, Acts, and Regulations;
 - A. Fisheries Act (Canada)
 - B. CHBDC
 - C. MTO Special Provisions
 - D. MTO Standard Drawings
 - E. MTO Drainage Directives
 - F. Ontario Water Resources Act
 - G. Drainage Act (Ontario)
 - H. Ontario Building Code
 - (iii) MTO Publications;
 - A. The applicable MTO Directives, MTO Policy Memorandums, and MTO Design Bulletins
 - B. MTO Highway Drainage Design Standards
 - C. MTO Drainage Management Manual
 - D. MTO Special Provisions
 - E. MTO Standard Drawings
 - F. MTO Drainage Directives
 - G. MTO Intensity-Duration-Frequency Curves
 - H. MTO Contract Design, Estimating and Documentation (CDED) Manual

- I. MTO Gravity Pipe Design Guidelines for Circular Culverts and Storm Sewers
- J. MTO Environmental Guide for Erosion and Sediment Control During Construction of Highway Projects
- K. MTO Evaluation of Drainage Management Software
- L. Guide for Preparing Hydrology Reports for Water Crossings (MTO)
- (iv) OPS;
- (v) MOECC Publications;
 - A. MOECC Stormwater Management Planning and Design Manual
 - B. MOECC Stormwater Pollution Prevention Handbook
 - C. Environmental Activity and Sector Registry information
<https://www.ontario.ca/page/environmental-activity-and-sector-registry>
 - D. Permit To Take Water Manual
- (vi) Conservation Authority Publications;
 - A. Conservation Authority Subwatersheds Studies and Criteria (RVCA)
 - B. RVCA: Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses (Ontario Regulation 174/06)
 - C. TRCA/CVC: Low Impact Development Stormwater Management Planning and Design Guideline
 - D. CVC: Low Impact Development Construction Guide
- (vii) City of Ottawa Sewer Design Guidelines, including Technical Bulletins; and,
- (viii) Environment Canada Stormwater Best Management Practice Handbook: Construction.

7.2 General Criteria

- (a) DB Co shall develop and implement a drainage strategy in accordance with the Reference Documents listed above, in consultation with applicable Stakeholders, and prepare a Drainage and Stormwater Management Report (the “Drainage and Stormwater Management Report”) to comply with the criteria and design parameters as outlined in this Project Agreement.

- (b) The Drainage and Stormwater Management Report shall present the drainage and stormwater management strategy taking into consideration all upstream and downstream impacts. The report shall describe the required measures to meet City of Ottawa, MOECC, and RVCA requirements for the management of stormwater runoff. The report shall identify hydrologic reference points downstream of Highway 417, and demonstrate how post development discharge shall be controlled to pre-development (existing) peak flow rates.
- (c) The Drainage and Stormwater Management Report shall be submitted within 120 days following Financial Close in accordance with Schedule 10 – Review Procedure.
- (d) DB Co shall secure all permits and approvals, where necessary for the implementation of the Drainage and SWM systems for the Project, and shall be responsible for preparing and submitting all necessary drawings and supporting documentation associated with obtaining those permits and approvals in accordance with Schedule 10 – Review Procedure.
- (e) DB Co shall be responsible for all costs associated with obtaining the required permits and approvals, and those associated with providing the Drainage and SWM systems.
- (f) DB Co shall obtain sewer discharge permits and approvals in accordance with the City, MOECC, and RVCA requirements. Sewer discharge permits and approvals shall be obtained a minimum of two weeks prior to the anticipated discharge date.
- (g) DB Co shall obtain all PTTWs and/or Environmental Activity and Sector Registry (EASR) registrations, in accordance with current MOECC requirements, for the Works.
- (h) All drainage from new or widened ramps and roadways shall be captured and managed within the Highway 417 or City ROW, as applicable, with SWMPs that provide water quality protection that meets MOECC’s ‘Enhanced’ standard before discharging to outlet locations.
- (i) All additions or modifications to existing sewers and related appurtenances will require municipal approval and shall conform to the requirements of the City.
- (j) All proposed changes to existing crossings of watercourses shall be analyzed to determine the impact of the proposed design on flood levels. The available Floodplain Mapping for all existing crossings shall be obtained from the RVCA. Existing Floodplain Mapping shall be updated with the proposed design.
- (k) DB Co shall assess the drainage impacts of the Highway 417 runoff where such runoff directly interfaces with the LRT trench. DB Co shall modify or replace the existing drainage system within Highway 417 to the extents required to accommodate the Highway Works, while protecting the LRT trench from infiltration, seepage, and flooding due to the existing Highway 417 runoff. Notwithstanding, any such drainage system provided by DB Co shall not preclude the future Highway 417 widening plan to install a closed drainage system.

- (l) Highway drainage is to discharge to existing outlets unless otherwise approved by the City at its sole discretion. Upstream of these outlets, the Highway 417 storm sewer system shall be a standalone gravity system and shall not be integrated with the municipal system or New Municipal Infrastructure.
 - (i) DB Co shall adjust, modify, or replace the drainage features along the south side of the Guideway to the existing rural ditch drainage system that may be impacted by construction of the West Works and/or TL-5 adjacent to the Guideway, as described in Clause 1.3 (a) of Part B – Design and Construction Requirements of this Part 9.
 - (ii) If DB Co's drainage design includes new or modified outlet locations, DB Co shall demonstrate to the City through hydrologic/hydraulic modeling that the cumulative impacts of the Highway Works will not increase peak flow rates or the peak hydraulic grade line of the City storm sewer for all rain events up to the 100-Year Storm. This analysis shall be submitted in accordance with Schedule 10 – Review Procedure. This analysis shall be presented in the Drainage and Stormwater Management Report. The available outlet constraints shall be obtained from the City.
- (m) The new storm sewer system shall be designed to accommodate a 1 in 10 year return period storm.
- (n) Storm sewers shall have longitudinal slopes of 0.3% or greater, to avoid constructability issues.
- (o) Post-construction discharge shall be controlled to pre-construction (existing) peak flow rates. Where capacity is insufficient for pre-construction peak flows, DB Co shall design the drainage system to control peak flows to within existing capacity.
- (p) DB Co shall ensure that the Roadway is adequately drained to meet MTO Standards during all stages of construction.
- (q) For any Municipal Roadway affected by the Highway Works, DB Co shall:
 - (i) Include insulation for sewers that have less than the minimum standard cover;
 - (ii) Design the drainage system to leave at least one lane free of water in each direction for emergency vehicle traffic during the 1:100 year return period event;
 - (iii) Ensure that existing maintenance hole top sections, frames, and covers are upgraded to current standards including water tight covers on sanitary manholes in ponding areas;
 - (iv) Conduct pre and post construction video inspection of existing sewers to remain as part of DB Co's design; and,

- (v) Assess adjacent properties for surface drainage impacts as a result of the Highway Works, and ensure no adverse impacts as a result of the design.

7.3 Highway Drainage Criteria

- (a) The design and construction of all Provincial Highway drainage features shall meet or exceed the requirements of MTO Highway Drainage Design Standards, 2008. Project specific criteria are listed below.
 - (i) The minor system associated with the new Roadways shall be designed to capture and convey the 10-year storm event. Major system (overland) flows are to be directed to an outlet with sufficient capacity. In the case where no outlet is available, major system flows are to be conveyed to storage areas within the Highway 417 ROW.
 - (ii) Watercourse crossings with upstream drainage areas that exceed the limit established by the RVCA, the crossing shall be designed to convey the Regulatory Storm, defined as the 100-year design storm event, without any increase in water surface elevations outside of the Highway 417 ROW.
 - (iii) All watercourse crossings shall be designed to convey the 50-year storm for the span less than 6.0 m and the 100-year storm event for the total span more than 6.0 m (MTO HDDS WC-1, 2008) with a minimum 1.0 m freeboard from the water surface elevation to the edge of pavement, without requiring a change to the existing Roadway profile.
 - (iv) All watercourse crossings shall be designed as per the criteria set out in Schedule 17 – Environmental Obligations.
 - (v) All discharge to municipal storm sewers shall be in accordance with City of Ottawa Sewer Design Guidelines.
 - (vi) Following construction, DB Co shall prepare a CCTV assessment of all storm sewers forming part of the Highway Works drainage system as per OPSS 409. The CCTV footage shall be submitted to the City in accordance with Schedule 10 – Review Procedure.
 - (vii) There shall be no flow spread onto travelled lanes.

7.4 Stormwater Management Criteria

- (a) DB Co shall implement a stormwater management design:
 - (i) That provides “*Enhanced*” quality treatment to all Highway Works runoff (as described in Chapter 3 “Environmental Design Criteria” of the “Stormwater Management Planning and Design Manual”, MOECC), including mitigation of thermal impacts on cold water streams;

- (ii) That addresses the downstream impacts on conveyance and erosion for all watercourse crossings; and
 - (iii) That includes necessary mitigation measures in compliance with requirements of the RVCA.
- (b) With reference to Schedule 17 – Environmental Obligations, DB Co shall maintain base flows in all watercourses during construction.
- (c) In-watercourse works will only be conducted during appropriate construction windows as set by the RVCA and DFO. DB Co shall prepare a Highway Erosion and Sediment Control Plan (the “Highway Erosion and Sediment Control Plan”), as a component plan of the Environmental Management Plan described in Schedule 17 – Environmental Obligations, and submitted to the City Representative, in accordance with Schedule 10 – Review Procedure, 30 days prior to the commencement of any Highway Works Construction Activities. This plan shall:
 - (i) Meet all requirements in this Article 7;
 - (ii) Meet all requirements of the Schedule 17 – Environmental Obligations;
 - (iii) Be developed in accordance with the MTO Environmental Guide for Erosion and Sediment Control during Construction of Highway Projects;
 - (iv) Include a contingency plan in the event the erosion and sediment control measures fail;
 - (v) Detail the temporary works during construction as described in the MTO Highway Drainage Design Standards TW-1 and TW-2 (2008);
 - (vi) Include provisions for maintaining the site, providing adequate over-winter protection and controlling erosion on all exposed earth surfaces and temporary fill embankments until conditions permit application of the final specified seed and cover; and,
 - (vii) Include the following, at a minimum:
 - A. Work area requirements, including equipment access, operation and storage, and material supply, utilization and storage;
 - B. Surface drainage from outside, through or around the work;
 - C. Areas of disturbed soil and soil stockpiles;
 - D. Means of access to erosion and sediment control measures requiring maintenance;
 - E. Protection of completed portions of the work; and,

- F. All vegetated cover not specified for removal shall be preserved in order to minimize erosion and sedimentation.
- (d) Watercourses shall not be diverted, intercepted or blocked unless specifically approved by the RVCA.
- (e) Temporary erosion and sediment control measures shall be maintained and kept in place until all work has been completed. Temporary control measures shall be removed at the completion of the work provided that permanent erosion control measures, have been established.
- (f) DB Co shall inspect erosion and sediment control measures within 24 hours after a significant rainfall event.
- (g) Unless otherwise specified, the time interval between commencement and completion of any Construction Activity that disturbs earth surfaces shall be a maximum of 45 calendar days. Commencement of such work shall be considered to have occurred when the original stabilizing ground cover has been removed, including grubbing, or has been covered with fill material. Completion of such work shall be considered to have occurred when the specified cover material (seed and mulch, seed and erosion control blanket, sod, riprap, etc.) has been applied.
- (h) Where interceptor ditches or subsurface drains are specified, they shall be constructed before commencement of any related cut or fill.
- (i) Run-off from construction materials and any stockpiles shall be contained and discharged so as to prevent entry of sediment to watercourses.
- (j) Where dewatering is required or where culverts are cleaned by hydraulic means, effluent shall be discharged so as to prevent discharge of sediment to watercourses.
- (k) Erosion and sedimentation control measures shall not be placed in watercourses unless specifically approved by the RVCA and the City.
- (l) A 200 m stand-by supply of prefabricated silt fence barrier, in addition to silt fence barrier which may be specified elsewhere, shall be maintained at any site where Construction Activities are underway prior to commencement of grading operations and throughout the duration of the Highway Works.
- (m) Oil-grit separators shall not be permitted to treat MTO Highway 417 runoff.

7.5 Numerical Computational Procedures and Models

- (a) All numerical computation procedures shall comply with the principles outlined in the MTO Drainage Management Manual (1997). Computer models used shall comply with the computer model selection criteria identified in the MTO Drainage Management Manual (1997).

- (b) Rational method will be limited to areas less than 40 ha.
- (c) For areas greater than 40 ha and for the purpose of designing stormwater facilities, an MTO approved computer model shall be utilized.
- (d) Modelling output files shall be included in the deliverables. Final deliverable shall include the hydrologic and hydraulic digital model files.

7.6 Deliverables

- (a) In addition to those listed elsewhere in this Article 7, the following deliverables shall be submitted in accordance with Schedule 10 – Review Procedure:
 - (i) If applicable, stormwater management facility design drawings showing details of inlet and outlet structures, pipe sizes, pond layout plan and section, with details of overflow weir, outlet structure, access road, and elevations. For water within the pond, surface elevations shall be shown for permanent pool, 25 mm event, 100-year events on the pond section view;
 - (ii) Where existing Floodplain Mapping exists, updated floodplain drawings showing changes to 100-year storm event water level delineation;
 - (iii) Details of water course realignments such as:
 - A. Proposed plan and profiles
 - B. Erosion protection and environmental rehabilitation design
 - C. Fluvial Geomorphological report as per RVCA
 - (iv) Proposed storm sewer design sheets;
 - (v) Design drawings showing the proposed drainage conveyance system (swales, storm sewers, culverts, ditches, ditch inlets, spillways). These drawings will include summary tables of all components of the drainage conveyance system, such as structures ID's (for Catch Basins and manholes), structure inverts, Ditch slopes, typical Ditch cross-sections and Ditch elevations.

ARTICLE 8 SIGNING AND PAVEMENT MARKING DESIGN CRITERIA

8.1 Order of Precedence

- (a) Signing and Pavement Marking shall be designed, applied and installed in accordance with the criteria contained in this Article 8 and the following Reference Documents, and if there is any conflict between the criteria contained in this Article 8 and any of the Reference Documents, the following shall apply in descending order of precedence:
- (i) The criteria contained in this Article 8;
 - (ii) MTO Special Provisions;
 - (iii) The applicable MTO Directives, MTO Policy Memorandums, and MTO Design Bulletins;
 - (iv) OPSS;
 - (v) MTO Contract Design, Estimating and Documentation (CDED) Manual;
 - (vi) Ontario Traffic Manual, MTO;
 - (vii) Highways Standards Bulletin Memorandum 2014-04 – Guidelines for Reducing Speed Limits in Construction Workzones;
 - (viii) Highways Standards Bulletin HSB-DSCO-2017-01 Permanent Ground Mounted Sign Support Systems – Small and Intermediate Sign Assemblies;
 - (ix) HSBM #2011-01, Fluorescent Orange Temporary Pavement Markings, MTO Highway Standards Branch Provincial Engineering Memorandum;
 - (x) DSM;
 - (xi) Temporary Conditions Traffic Management: Advanced Notification, Advanced Warning, and Alternate Route Signing Manual (April 2001), MTO Central Region Traffic Office;
 - (xii) Portable Variable Message Signs (PVMS) Best Practices Manual, May 2009, MTO;
 - (xiii) Ramp Closure Gate Sign Installation Drawing, December 2009, MTO;
 - (xiv) Sign Sheeting Memorandum for Ground Mounted Regulatory Warning, and Temporary Condition Signs, October 4, 2013, MTO;
 - (xv) Sign Support Manual, MTO;
 - (xvi) MTO Design Supplement for TAC Geometric Design Guide for Canadian Roads, June 2017;

- (xvii) Geometric Design Guide for Canadian Roads, TAC;
- (xviii) MTO Standard Drawings;
- (xix) OPSD;
- (xx) King's Highway Guide Signing Policy Manual, MTO;
- (xxi) Manual of Uniform Traffic Control Devices; and,
- (xxii) OPP Aircraft Enforcement Area Policy, MTO.

8.2 Materials

- (a) Except as noted in Clause 8.3(g) and Clause 8.4(n) of Part B of this Schedule 15-2, Part 9, DB Co shall supply all Signing and Pavement Markings Materials specified in the Reference Documents noted in Clause 8.1 of Part B of this Schedule 15-2, Part 9.

8.3 Temporary Signing

- (a) DB Co shall be responsible for the design, supply, installation, relocation, reinstatement, maintenance, and removal of all temporary Signs and Pavement Markings, including Regulatory, Warning, guide, advisory and directional Signs with the exception of temporary advance and turn (non-standard) ground-mounted Signs which will be designed and fabricated by MTO and supplied to DB Co for installation.
- (b) DB Co shall provide signing requirements for all temporary conditions, including Advance Notification, Advance Warning and Alternative Route signing, all as defined in the MTO Central Region Temporary Conditions Traffic Management: Advanced Notification, Advanced Warning, and Alternate Route Signing Manual and the Ontario Traffic Manual. All temporary signing shall be in accordance with the Ontario Traffic Manual, and MTO standards. The location, size and type of each Sign shall be indicated on the Highway Traffic Control Plans.
- (c) DB Co shall prepare a Temporary Signing Plan (the "Temporary Signing Plan") and a Temporary Signing Table (the "Temporary Signing Table"). The Temporary Signing Plan shall depict the location of all Signs, and shall include staging drawings, which indicate the timing for installation and removal of temporary signage. The Temporary Signing Table shall include, but, not be limited to information detailing Sign location (station of final location, removal location and on which side of the road to be installed in relation to the direction of travel), height to bottom of Sign, lateral offset to post #1, support type with dimensions, alpha-numeric Sign code with dimensions, timing for installation and removal, and the message/description.
- (d) Temporary Signs shall be in French and English or bilingual and MTO Standards and guidelines shall be used.

- (e) The Temporary Signing Plan shall be combined into one drawing at a scale of 1:1000 with the Temporary Pavement Marking Plan.
- (f) The Temporary Signing Plan and Temporary Signing Table shall be submitted to the City Representative for review and acceptance in accordance with Schedule 10 – Review Procedure, and a minimum of 60 days prior to implementation of the plan.
- (g) MTO, through the City, will prepare and supply the temporary advance and turn ground-mounted Sign designs (guide Signs only) to DB Co, and will supply these fabricated Signs to DB Co for the locations where overhead Signs will be removed for a period greater than short duration (per DB Co's Temporary Signing Plan). When the temporary ground-mounted Sign locations have been confirmed, MTO will create the Sign design details to include in DB Co's design. MTO, through the City, must provide these Sign design details and fabricated boards for MTO's jurisdiction. Sign boards shall be fabricated and supplied by MTO's Provincial Sign Shop. MTO's Provincial Sign Shop will not accept Sign designs from DB Co. DB Co will not be charged for signs from MTO's Provincial Sign Shop. The Signs ordered through the MTO Provincial Sign Shop will be delivered to a location identified by DB Co. The list of temporary Signs and shop drawings shall be submitted by DB Co to the City a minimum of 12 weeks prior to the pickup date.

8.4 Permanent Signing

- (a) DB Co shall provide Main Line overhead signing at the locations, and in accordance with the requirements identified in Table 8.4a. The exact locations of the signs shall be determined by DB Co in accordance with its final design. In all cases DB Co shall provide new Overhead Sign Support Structures and footings, and install new sign boards (supplied by MTO), subject to Clause 8.4(b).

| Table 8.4a – Highway 417 Main Line Overhead Signing | |
|---|---|
| Station (approx.) | Notes |
| WB Upstream of Pinecrest E-N/S Ramp | - Exact location station to be determined by DB Co as per OTM |
| WB Upstream of Pinecrest E-N/S Ramp | - Exact location station to be determined by DB Co as per OTM |

- (b) Where it is indicated in Table 8.4a that DB Co may salvage a component of an existing Overhead Sign Support Structure, or use existing footings, DB Co may do so, only if it verifies that these options are feasible, meet current MTO Standards, and are compatible with its final design. DB Co shall be responsible to provide new Overhead Sign Support Structures or footings in all instances where existing infrastructure cannot be re-used.
- (c) DB Co shall engage a structural Engineer to verify and certify that the sign boards provided by MTO are compatible with the Overhead Sign Support Structures designed by DB Co prior to installation. In any instances where DB Co proposes to salvage an existing Overhead Sign Support Structure (or component thereof), an Engineer shall

inspect and certify whether the entire Structure is suitable for re-use. If as a result of the inspection, DB Co determines that the Structure cannot be salvaged, DB Co shall be responsible to provide a new Overhead Sign Support Structure.

- (d) For all other locations within the Highway Corridor Lands, DB Co shall determine all required permanent ground-mounted and overhead signing, in accordance with the Reference Documents noted in Clause 8.1 of Part B of this Schedule 15-2, Part 9. DB Co shall contact the City to confirm, in writing, the official Municipal Roadway names as well as '911' signing requirements. If the information received indicates a road name change, DB Co shall obtain the municipal bylaw, Council Resolution or written direction in this regard and provide a copy to the City Representative for their records. The location, size, and type of each Sign shall be indicated on the Highway Traffic Control Plan.
 - (i) DB Co shall install signage to identify Emergency Detour Routes (as defined in OTM Book 8) established by the City and MTO. DB Co shall confirm the routes with the City. Sign locations shall be established in consultation with the City.
 - (ii) DB Co shall install a new overhead tri-chord sign structure on the Pinecrest E-N/S ramp if the existing structure is impacted by the Highway Works design.
- (e) DB Co shall prepare a Permanent Signing Plan (the "Permanent Signing Plan") and a Permanent Signing Table (the "Permanent Signing Table"). The Permanent Signing Plan shall depict the location of all Signs, and shall include staging drawings, which indicate the timing for installation of permanent signage. The plan shall also include Overhead Sign section drawings depicting the position of sign boards on Overhead Sign structures overtop of travelled lanes. The Permanent Signing Table shall include, but not be limited to, information detailing Sign location (station of final location, removal location and on which side of the road to be installed in relation to the direction of travel), height to bottom of Sign, lateral offset to post #1, support type with dimensions, alpha-numeric Sign code with dimensions, timing for installation, and the message/description.
- (f) The Permanent Signing Plan shall be combined into drawings at a scale of 1:1000 with the Permanent Pavement Marking Plan.
- (g) Permanent Signs shall be in French and English or bilingual and MTO Standards and guidelines shall be used.
- (h) DB Co shall design and supply all Overhead Sign support Structures, ground-mounted Sign break-away steel supports and associated Sign footings. Sign support Structures shall conform to the MTO Context Sensitive Design requirements as detailed in Appendix F to this Part 9.
- (i) The Permanent Signing Plan (combined with the Permanent Pavement Marking Plan), Permanent Signing Table, Sign details and shop drawings for all support structures and footings shall be submitted to the City Representative for review and acceptance in

accordance with Schedule 10 – Review Procedure, and a minimum of 60 days prior to the implementation of the plan.

- (j) DB Co shall include in the Permanent Signing Plan any changes to existing Signs.
- (k) All overhead Signs shall be provided on a separate structure. Overhead Sign boards may be mounted on existing support structures where applicable. In general, DB Co shall construct Sign support Structures per the following criteria:
 - (i) Main Line static Signs shall be provided on a tri-chord or cantilever structure; and,
 - (ii) Static lane designation Signs on ramps may be provided on a tri-chord, cantilever or monotube structure.
- (l) MTO through the City will supply all fabricated sign boards for all overhead and ground-mounted extruded Signs and non-standard Signs. Sign layouts will be provided by the City to DB Co for the design of Sign structures. DB Co shall replace existing with any new Sign boards that are supplied by MTO.
- (m) All permanent ground-mounted and overhead Sign boards shall be ordered through MTO Provincial Sign Shop and such Signs shall be supplied by the City. DB Co shall submit a list of Signs required to the City Representative for each year of construction. The list of Signs shall contain the quantity and details of the Signs, and the date for pick-up by DB Co. DB Co shall also submit to the City Representative structural shop drawings for all Sign support structures. The list of Signs and shop drawings shall be submitted a minimum of 12 weeks prior to the pickup date. The Signs ordered through the MTO Provincial Sign Shop will be delivered to a location identified by DB Co. DB Co shall within five Business Days of pickup, confirm in writing to the City Representative that all the ordered signs were received in accordance with the list of required signs. Any Signs damaged following delivery will be required to be replaced at DB Co expense.
- (n) Static Sign Structure Locations:
 - (i) DB Co shall install Sign structures in accordance with the Reference Documents noted in Clause 8.1 of Part B of this Schedule 15-2, Part 9.

8.5 Pavement, Hazard and Delineation Markings (Temporary)

- (a) DB Co shall provide all temporary Pavement Markings (including temporary Roadway Pavement Markings) in accordance with the Reference Documents noted in Clause 8.1 of Part B of this Schedule 15-2, Part 9. DB Co shall prepare a Temporary Pavement Marking Plan (the “Temporary Pavement Marking Plan”), which shall be submitted to the City Representative in accordance with Schedule 10 – Review Procedure, a minimum of 30 days prior to the implementation of the plan. The Temporary Pavement Marking Plan shall include scale drawings of the proposed Pavement Marking layout.

- (b) All temporary Pavement Markings shall have a minimum of two applications of Traffic Paint. Glass beads shall be applied for reflectivity and shall conform to the requirements of OPSS 710 and OPSS 1750.
- (c) DB Co shall paint or reinstate this same day any Pavement Markings that are removed that day.

8.6 Pavement, Hazard and Delineation Markings (Permanent)

- (a) DB Co shall provide all permanent Pavement Markings in accordance with the Reference Documents noted in Clause 8.1 of Part B of this Schedule 15-2, Part 9. DB Co shall prepare a Permanent Pavement Marking Plan (the “Permanent Pavement Marking Plan”), which shall be submitted to the City Representative in accordance with the requirements of the Review Procedure, a minimum of 60 days prior to implementation of the plan.
- (b) All painted permanent Pavement Markings shall have a minimum of two applications. Glass beads shall be applied for reflectivity and shall conform to the requirements of OPSS 710 and OPSS 1750.
- (c) All permanent Pavement Markings on Main Line and interchange ramps shall be durable type.
- (d) DB Co shall paint or reinstate this same day any Pavement Markings that are removed that day.

8.7 Ramp Closure Gates

- (a) Ramp closure gate signage shall be in accordance with the Reference Documents noted in Clause 8.1 of Part B of this Schedule 15-2, Part 9.

ARTICLE 9 LANDSCAPE ARCHITECTURE AND ECOLOGICAL RESTORATION

9.1 Order of Precedence

- (a) DB Co's landscape architecture and ecological restoration shall be in accordance with the criteria contained in this Article 9 and the following Reference Documents, and if there is any conflict between the criteria contained in this Article 9 and any Reference Document(s), the following shall apply in descending order of precedence:
 - (i) The criteria contained in this Article 9;
 - (ii) MTO Special Provisions;
 - (iii) The applicable MTO Directives, MTO Policy Memorandums, and MTO Design Bulletins;
 - (iv) OPSS;
 - (v) MTO Contract Design, Estimating and Documentation (CDED) Manual;
 - (vi) MTO Standard Drawings; and,
 - (vii) OPSD.

9.2 General Requirements

- (a) DB Co's landscape architecture and ecological restoration requirements for Highway Works shall be in accordance with Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.
- (b) DB Co shall adhere to MTO Context Sensitive Design requirements as detailed in Appendix F of this Part 9.
- (c) DB Co shall submit plan drawings depicting proposed tree removals and mitigations within the Highway Corridor Lands in accordance with Schedule 10 – Review Procedure, within 60 days following Financial Close.

ARTICLE 10 ROAD SAFETY REVIEW AND AUDIT

10.1 Order of Precedence

- (a) DB Co shall have independent Design Safety Review and Road Safety Audits completed in accordance with the criteria set out in this Article 10 and the following Reference Documents, and if there is any conflict between the criteria contained in this Article 10 and any of the Reference Documents, the following shall apply in descending order of precedence:
- (i) The criteria contained in this Article 10;
 - (ii) MTO Special Provisions;
 - (iii) The applicable MTO Directives, MTO Policy Memorandums, and MTO Design Bulletins;
 - (iv) OPSS;
 - (v) MTO Contract Design, Estimating and Documentation (CDED) Manual;
 - (vi) Roadside Safety Manual, MTO;
 - (vii) MTO Design Supplement for TAC Geometric Design Guide for Canadian Roads, June 2017;
 - (viii) Geometric Design Guide for Canadian Roads, TAC;
 - (ix) The Canadian Road Safety Audit Guide, TAC;
 - (x) MTO Standard Drawings;
 - (xi) OPSD;
 - (xii) Ontario Traffic Manual, MTO;
 - (xiii) King's Highway Guide Signing Policy Manual, MTO;
 - (xiv) MTO General Conditions of Contract;
 - (xv) MTO Contract Design, Estimating and Documentation Manual;
 - (xvi) NCHRP Report 280 Work Zone Practices – Table 3: GENERAL GUIDELINES ON VEHICLE CAPACITY THROUGH WORK ZONES;
 - (xvii) Electrical Engineering Manual, MTO;
 - (xviii) Bikeways Design Manual;

- (xix) Ontario Bikeways Planning & Design Guidelines, MTO;
- (xx) Policy – Municipal Work on MTO Traffic Signals, September 2008; and,
- (xxi) MTO Policy – Roadway Lighting on Municipal Crossroads, October 24, 2003.

10.2 Road Safety Audit Team

- (a) The Road Safety Audit Team shall perform the Road Safety Audit and shall consist of a team of auditors, with a minimum of three Qualified Personnel, who are independent of the Construction Contractor, and shall meet the following minimum criteria:
 - (i) Be Engineers trained in the area of road and public safety, with over 20 years of engineering experience and demonstrated record or resume working in the road safety field and undertaking formal road safety audits with criteria similar to the Road Safety Audits in this Project, with references from government agency;
 - (ii) Possess demonstrated experience in undertaking safety reviews and experience with TAC's Canadian Road Safety Audit Guide, and Canadian and Ontario Roadside safety standards;
 - (iii) Possess demonstrated experience in road safety, traffic engineering, geometric design, and demonstrated expertise with human factors in design and safety reviews or audits;
 - (iv) Have participated in at least two recent road safety audits with criteria similar to the Road Safety Audits in this Project, where such previous participation was on projects delivered using design build or public private partnership methods; and,
 - (v) Possess demonstrated professional independence in undertaking Road Safety Audit in this Project.

10.3 General Requirements

- (a) Road Safety Audits shall include the Road Safety Audit processes as identified in the Canadian Road Safety Audit Guide, and shall for clarity include human factor considerations.
- (b) The Road Safety Audit Team's individuals' qualifications, experience, and knowledge, and letters of reference from the relevant Governmental Authority where prior audits were performed, shall be provided to the City Representative 60 days in advance of any safety audit work and be accepted by the City in accordance with the Review Procedure prior to any safety review or audit work being initiated.
- (c) The Road Safety Audit Team's individuals shall not be an employee of any of the companies on DB Co's team and, other than being paid for services rendered to DB Co in their capacity as Road Safety Auditor, the team shall be fully independent and at arm's length from any company participating on DB Co's team.

- (d) All Road Safety Audits and safety reviews shall include a human factors expert experienced in road and Highway design and construction, who shall provide input and review of the safety and operation of the work from a human factors perspective.
- (e) Any “as constructed” element that does not conform to the design, does not meet the required safety standards, or deemed not to meet a reasonable level of safety by the Safety Auditor, shall be corrected by DB Co immediately. The rectification recommendations shall to be prepared by an individual with the requisite skill and training in the area of the work, stamped and sealed by the Engineer and the solution shall be acceptable to the Road Safety Audit Team and to the City.
- (f) DB Co shall be responsible for any existing or proposed Site conditions found not to meet a reasonable level of safety, and shall rectify the condition immediately, or otherwise construct temporary works to Address the safety concern until repairs are made.

10.4 DB Co’s Responsibility

- (a) DB Co shall undertake Road Safety Audit and Road Design Safety Reviews as per the requirements of this Article 10 of Part B of Schedule 15-2, Part 9 on all temporary and permanent elements of the Highway Works.
- (b) DB Co shall be responsible for:
 - (i) Scheduling, initiating, allowing access to the applicable Site and managing the Road Safety Audit and Design Safety Review process at the appropriate times during the course of the Highway Works;
 - (ii) Providing all necessary design drawings and supporting documentation for the Road Safety Audit Team to conduct the Road Safety Audit and Design Safety Review;
 - (iii) Ensuring that the Design Safety Review and Road Safety Audit is conducted in accordance with Good Industry Practice;
 - (iv) Receiving and reviewing the Road Safety Audit Team’s report with the City Representative;
 - (v) Responding to the Design Safety Review and Road Safety Audit Report including presenting alternatives to Address deficiencies;
 - (vi) Implementing required re-design as a result of the corrective suggestions described in (v) above in an expeditious and Timely manner;
 - (vii) Updating changes on the required design drawings; and,
 - (viii) Providing all draft and final documentation related to the Design Safety Review and Road Safety Audit to the City Representative.

- (c) All costs associated with the Design Safety Review and Road Safety Audit, including any re-design and increased costs to the Highway Works that result from the Design Safety Review and Road Safety Audit, shall be borne by DB Co.
- (d) After each Design Safety Review and Road Safety Audit, except as otherwise expressly agreed in writing by the City Representative, DB Co shall address all recommendations made by the Road Safety Audit Team.

10.5 Design Safety Review

- (a) At the outset of the Highway Works and no later than 60 days after Commercial Close, an initial Design Safety Review shall be undertaken to assess all design elements proposed by DB Co or required in the Output Specifications that may have any bearing on public, maintenance or operational safety from the point of view of any user within the Highway Works. The initial Design Safety Review shall precede the design activity and the subsequent design shall accommodate any required recommendation or resolution of this initial Design Safety Review.
- (b) Design Safety Reviews shall be undertaken on an ongoing basis through the stages and duration of all designs and all to be constructed temporary and permanent elements that may have any bearing on public, maintenance or operational safety from the point of view of any users within the Highway Works.
- (c) Design Safety Reviews shall review, identify and resolve any safety concerns prior to design such that the design can be modified in a Timely manner to Address the safety concerns for permanent and temporary works within the Highway Works. DB Co shall plan, schedule and execute the review, together with providing a report that Addresses any safety concerns and the recommendation or resolution of each Design Safety Review.

10.6 Road Safety Audit Process

- (a) The Road Safety Audit process shall be carried out in accordance with the Canadian Road Safety Audit Guide (TAC). References to “review” or “response” from the owner agency, or other qualifying phrase with similar connotation, shall be construed as the responsibility of DB Co in accordance with the requirements in this Article 10.
- (b) The Road Safety Audit Team shall prepare a report (the “Road Safety Audit Report”) to document the audit findings. Road Safety Audit Reports shall be submitted to the Design Team for the stages identified in Clause 10.6(c) below. The Road Safety Audit Reports shall clearly identify safety Hazards that need to be Addressed by DB Co along with recommendations for remediation. DB Co shall respond to the identified Hazards and recommendations with remediation counter-measures or provide to the City Representative for approval, appropriate reasons why the safety issue may not be Addressed as recommended in the reports. Under any circumstances, DB Co’s response and remediation countermeasures shall Address the safety issue to the satisfaction of the Road Safety Audit Team.

(c) The Road Safety Audit Reports shall be provided to the City Representative in accordance with Schedule 10 – Review Procedure for review at the stages identified below:

(i) Stage 1: Pre-Final Design Road Safety Audit

A. Stage 1 Road Safety Audit shall be conducted immediately before submission of the Pre-Final Design Development Submittals in accordance with Schedule 10 – Review Procedure, and Section 11.1 of the Project Agreement. The audit shall undertake a detailed review of the Pre-Final Design Development Submittals to identify any potential safety-related enhancements that might have an impact on the New MTO Infrastructure or New Municipal Infrastructure, including Crossing Roads and local roads. Issues considered shall include but not be limited to:

- i. Design consistency;
- ii. Site conditions and visibility;
- iii. Drivers' work load and perceived road information;
- iv. Vehicular traffic speed management and associated safety risk factors;
- v. Traffic control devices
- vi. Human factors;
- vii. Horizontal and vertical alignment;
- viii. Cross section design;
- ix. Interchange/intersection configuration;
- x. Access location;
- xi. Sight distance including, but not limited, to stopping sight distance and turning sight distance, sight distances to Traffic Control Devices, Bullnoses, etc.;
- xii. Operation of public transit;
- xiii. Operational and maintenance safety;
- xiv. Traffic operations;
- xv. Environmental factors;
- xvi. Clearances to Roadside objects;

- xvii. Safety Barriers; and,
 - xviii. Provision for vulnerable road and all multimodal ROW users.
- (ii) Stage 2: Final Design Road Safety Audit
- A. Stage 2 Road Safety Audit shall be conducted immediately before submission of the Final Design Development Submittals in accordance with Schedule 10 – Review Procedure, and Section 11.1 of the Project Agreement. The audit shall undertake a detailed review of the completed Final Design Development Submittals to identify any potential safety-related enhancements that might have an impact on the operational safety of the New MTO Infrastructure or New Municipal Infrastructure, including Crossing Roads and local roads. Issues considered shall include, but not be limited to:
- i. Signing and Pavement Markings;
 - ii. All interface with adjacent design disciplines;
 - iii. Traffic signal configuration;
 - iv. Intersection details;
 - v. Drainage and storm water management elements;
 - vi. Lighting;
 - vii. Fencing;
 - viii. Clearances to Roadside objects;
 - ix. Safety Barriers;
 - x. Surface standards including treatments and structures;
 - xi. Traffic Control Devices;
 - xii. Landscaping, streetscape and road furniture;
 - xiii. Provision for vulnerable road and all multimodal ROW users;
 - xiv. Accommodation of design vehicles;
 - xv. Emergency response requirements;
 - xvi. Road maintenance;
 - xvii. Traffic staging plan; and,

- xviii. Any other Stage 1 Road Safety Audit results affected by the Final Design Development.
- (iii) Stage 3a: Temporary Traffic Control On-Site Road Safety Audit
 - A. Stage 3a Road Safety Audits shall be conducted on the applicable Site before implementation of temporary Traffic Control set-ups that meet one or more of the following criteria:
 - i. Two or more individual temporary work zones in close proximity to each other such that one would influence the traffic operation of the other. The spacing between the termination area of one work zone and the Advance Warning area of the next work zone for which one temporary Traffic Control set-up influences the traffic operations of the next temporary Traffic Control set-up is 2.0 km or less.
 - ii. Temporary staging are required within the existing Highway 417 and the duration of temporary Traffic Control set-ups is five calendar days or more. The set-up does not necessarily have to be in place for the entire time but can be one of a number of repeating set-ups that are active at different times.
 - iii. The duration of temporary Traffic Control set-ups is 10 calendar days or more on roads other than those identified above. The set-up does not necessarily have to be in place for the entire time but can be one of a number of repeating set-ups that are active at different times.
- (iv) Stage 3b: Construction Road Safety Audit
 - A. Stage 3b Road Safety Audits shall be conducted on the applicable Site during construction. These audits shall examine the field conditions of the work under construction and assess any circumstances that may have a bearing on public safety from the point of view of any user and public areas that are within the Highway Works, or are modified and constructed as a part of the Highway Works. The audits shall meet the following criteria:
 - i. Two of the Stage 3b Road Safety Audits shall be undertaken annually within the high construction season, between June and September (i.e. two audits to be performed annually between June and September) and one in the winter, annually between December and February. Only one of the audits shall be preplanned with DB Co, while the others shall be performed unannounced.
- (v) Stage 4: Post-Construction Road Safety Audit

- A. Prior to opening any portions of the Highway Works and Crossing Roads and local roads for traffic operation, a Stage 4 Road Safety Audit shall be carried out. The audit shall investigate and identify potential safety enhancements that may reduce the frequency and/or the severity of collisions. The Road Safety Audit Team shall also check for safety deficiencies that result from using particular combinations of design elements not previously detected or any synergistic effects of using minimum Design Criteria for multiple design elements that may compromise users' safety;
- B. Stage 4 Road Safety Audits shall take place prior to and as a condition of the issuance of the Highway Construction Certificate (Completion); and,
- C. For the purposes of completing a Stage 4 Road Safety Audit required pursuant to paragraphs A and B above, the Road Safety Audit Team must fully examine the Highway Works by:
 - i. Meeting with DB Co to review any issues relating to the Highway Works, in particular design changes that may affect the safety of the New MTO Infrastructure or New Municipal Infrastructure, including all Crossing Roads and local roads;
 - ii. Checking to ensure that safety issues identified in the Stage 2 Road Safety Audit are Addressed and the resulting design changes do not create further safety issues;
 - iii. Reviewing any design changes that occurred during the relevant Highway Works to ensure they do not create safety issues; and,
 - iv. Conducting field reviews of such Highway Works, under both daytime and night time conditions.

10.7 City Requested Safety Audit

- (a) Road Safety Audits shall be undertaken by the Road Safety Audit Team at any time upon City request, in addition to the audits required in Clause 10.6 of this Part B. Such request may be for any Site condition, design element, design concern or constructed element of work that is of concern to the City. The City written request will outline the safety concern and the issue required to be investigated and Addressed by DB Co.
- (b) DB Co shall be responsible to demonstrate that the design and proposed constructed Highway Works meets a reasonable level of safety for all users. DB Co shall provide supporting research or engineering rationale and analysis for the design decisions, and for the support of the proposed design and constructed Highway Works that are subject to investigation.

- (c) DB Co shall Address the concerns and/or modify the proposed design and construction works accordingly and provide all available technical information to the Road Safety Audit Team for consideration.
- (d) The Road Safety Audit Team will render an opinion with the safety issue, and DB Co shall Address the safety issue to the satisfaction of the Road Safety Audit Team and City. The disposition and rectification of the safety concern is DB Co's full responsibility and obligation based on full and due consideration of input from the City and the Safety Audit Team.

10.8 Certificates

- (a) DB Co shall submit to the City Representative a certificate (a "Road Safety Audit Certificate") in the form attached as Appendix A - Form of Road Safety Audit Certificates to this Schedule 15-2, Part 9 in respect of the Stage 1, Stage 2 and Stage 4 Road Safety Audits respectively. Each Road Safety Audit Certificate shall be signed by the Design Manager, the Road Safety Audit Team, the Construction Contractor, and the DB Co Representative.
- (b) The Stage 4 Road Safety Audit Certificate shall be provided to the Independent Certifier and the Highway Substantial Completion Certificate shall not be issued unless a Stage 4 Road Safety Audit Certificate has been submitted and signed by the Design Manager, the Road Safety Audit Team, the Construction Contractor and DB Co's Representative.

10.9 Random Audits

- (a) The City and/or MTO retains the right to perform any additional independent audits on any part of design and construction Works at any time.

ARTICLE 11 DEMOLITION, REMOVALS AND DISPOSAL

12.1 General Requirements

- (a) DB Co's demolition, disassembly, removals and disposal of infrastructure and other buildings, improvements and amenities from the Site prior to Highway Substantial Completion shall be carried out in accordance with this Article 12, Schedule 17 – Environmental Obligations, and shall satisfy all Applicable Law and requirements of Governmental Authorities, Railway Companies and Utility Companies.
- (b) DB Co shall prepare and submit a Demolition, Removals, and Disposal Plan (the “Demolition, Removals, and Disposal Plan”) to the City Representative in accordance with Schedule 10 – Review Procedure a minimum of 60 days in advance of implementation of the plan.
- (c) The Demolitions, Removals, and Disposal Plan shall include, at a minimum, the following:
 - (i) Overall plan and schedule for demolition, removals and disposal within the Highway Works;
 - (ii) Procedures for demolition, removals and disposal of any special structures or Infrastructure;
 - (iii) Waste management and recycling plans and procedures;
 - (iv) Identification and definition of contaminated material, including contaminated soils, and any other dangerous or deleterious material, and DB Co's plan in managing them; and,
 - (v) DB Co's steps in complying with all Applicable Law, including the OHSA, Schedule 17 – Environmental Obligations, and the requirements in this Article 12.

12.2 Demolition

- (a) Demolition in accordance with this Article 12 shall be completed before DB Co submits a Notice to City in respect of West Final Completion, pursuant to Section 25.14 of the Project Agreement, with the following clarification:
 - (i) DB Co shall provide access to salvage works and shall comply with other environmental works as identified in Schedule 17 – Environmental Obligations prior to demolition of a structure.
- (b) Demolition shall include backfilling all excavations, grading and site stabilization/erosion control of demolition site upon completion of the demolition work.
- (c) Demolition of Structures shall be carried out as necessary to avoid effects on the Main Line or other Roads, or as specified elsewhere in the Project Agreement.

- (d) Portions of existing roads that are not retained as part of the New MTO Infrastructure or New Municipal Infrastructure, including any abandoned roads and driveways, shall be removed and restored to match conditions of adjacent, undisturbed areas in a clean and tidy condition, and in accordance with this Article 12. Re-vegetation shall be in accordance with DB Co's Final Vegetation Restoration Plan as required in Schedule 17.
- (e) Provisions must be made by DB Co to minimize the creation of dust generated during any demolition activities in accordance with the requirements of Schedule 17 – Environmental Obligations and in compliance with the air quality mitigation plan.
- (f) DB Co shall comply with noise and vibration requirements of Schedule 17 – Environmental Obligations.
- (g) Conduct demolition operations to ensure minimum interference with roads, streets, walks, walkways, and other adjacent occupied and used facilities.
- (h) DB Co shall install temporary security fencing around any excavations, should the site remain open overnight and during those times DB Co is not on site.
- (i) DB Co shall be responsible to make the area secure if any contaminated soil and deleterious material are encountered. DB Co shall install fencing if necessary.
- (j) Excavations are to be backfilled and levelled with clean fill and graded to promote positive drainage (i.e., no ponding).
- (k) DB Co shall not use explosives in any demolition operations.
- (l) A Designated Substances Survey report has been prepared for Structures that have been identified for replacement or rehabilitation. Refer to Schedule 17 – Environmental Obligations.

12.3 Waste Management

- (a) DB Co shall train applicable DB Co Parties and ensure all suppliers are trained on proper waste management procedures, as appropriate for the Highway Works.
- (b) DB Co shall, prior to Highway Substantial Completion, remove from the Site and dispose of all Materials and installations not incorporated in the Highway Works. Such removal and disposal shall include any abandoned vehicles, equipment, or waste material.
- (c) DB Co shall recycle construction waste to the maximum extent possible and, at a minimum, in accordance with Good Industry Practice.
- (d) All contaminated or dangerous material, including, but not limited to, elements of Infrastructure and buildings to be removed from the Site that contain designated substances and excess excavated material containing contaminants, shall be disposed of in accordance with the regulations of relevant Governmental Authorities.

- (e) Burning of waste is not permitted.

12.4 Removal of Existing Electrical Equipment

- (a) DB Co shall, prior to Highway Substantial Completion, remove from the Site and dispose of all existing electrical equipment, including underground boxes, Foundations and wiring, not incorporated into the Highway Works.

12.5 Removal of Existing Utilities

- (a) DB Co shall:
 - (i) Obtain approvals from Utility Companies, as required, prior to the start of demolition/removal work;
 - (ii) Grout or remove from the Highway Corridor Lands and dispose of, in its entirety, all Utility structures that are abandoned through the Project, situated beneath permanent travelled lanes or where it may otherwise affect the New MTO Infrastructure, subject to the additional requirements below;
 - A. Any facilities that contain hazardous material shall be removed.
 - (iii) Where required, cut, flush, and cap any municipal sewer lines in accordance with the requirements of the applicable municipality; and,
 - (iv) Ensure that prior to demolitions/removals, all Utilities are appropriately disconnected and all Utility meters and Utility rentals are returned to the appropriate Utility Company.

ARTICLE 12 CONSTRUCTION HAUL ROUTE

13.1 General Requirements

- (a) DB Co shall be responsible for the cleaning and maintenance of any and all haul roads used to complete the Highway Works to the satisfaction of the City or the local municipality. Haul routes shall be kept clean and free of construction dust and Debris.
- (b) Road conditions shall be inventoried and photographed by DB Co before construction and after.
- (c) Road condition shall be restored to original or better condition than prior to construction and to the satisfaction of the City or the local municipality.
- (d) DB Co shall determine the haul route and applicable load restrictions after consultation with the City and applicable local municipalities, and shall comply with their requirements. Haul routes shall comply with the City's by-laws for goods movement and use of truck routes.
- (e) DB Co shall be required to submit a construction Haul Route Plan (the "Haul Route Plan") a minimum of 90 days prior to start of any construction activities, in accordance with Schedule 10 – Review Procedure. The Haul Route Plan shall be reviewed by the City under the Review Procedure. The Haul Route Plan shall include the inventoried road conditions and photographs taken by DB Co before construction.
- (f) The Haul Route Plan shall include, at a minimum, the following:
 - (i) Existing condition of Municipal Roadways that will be used as haul routes;
 - (ii) A schematic of the general construction haul routes undertaken in each of the municipalities at or immediately adjacent to the Highway Works;
 - (iii) A description of the construction equipment or vehicles, including type and quantities, as applicable that will be traveling on the identified haul routes.
 - (iv) DB Co's plan and approach to cleaning and maintaining municipal haul roads as per requirements in this Article.

PART C
TRAFFIC MANAGEMENT AND CONSTRUCTION ACCESS

ARTICLE 1 GENERAL TRAFFIC MANAGEMENT REQUIREMENTS

1.1 Order of Precedence

- (a) DB Co's Traffic Management Plan and Traffic Control operations shall comply with the criteria contained in this Part C, and all standards, regulations, policies, Applicable Law, guidelines or practices applicable to the Project, including but not limited to each of the following Reference Documents. In the event of a conflict between the criteria and any of the Reference Documents, the following shall apply in descending order of precedence:
- (i) The criteria contained in this Part C;
 - (ii) MTO Special Provisions;
 - (iii) The applicable MTO Directives, MTO Policy Memorandums, and MTO Design Bulletins;
 - (iv) OPSS;
 - (v) MTO Contract Design, Estimating and Documentation (CDED) Manual;
 - (vi) Ontario Traffic Manuals;
 - (vii) MTO Design Supplement for TAC Geometric Design Guide for Canadian Roads, June 2017;
 - (viii) Urban Supplement to the Geometric Design Guidelines for Canadian Roadways, TAC;
 - (ix) Geometric Design Guide for Canadian Roads, TAC;
 - (x) Roadside Safety Manual, MTO;
 - (xi) MTO Standard Drawings;
 - (xii) OPSD;
 - (xiii) Fluorescent Orange Temporary Pavement Markings Policy #2011-11;
 - (xiv) MTO Policy 2011-02 – Full Road Closures;
 - (xv) Manual of Uniform Traffic Control Devices;
 - (xvi) Sign Sheeting Memorandum, February 21, 2008, MTO;

- (xvii) NCHRP Report 280 Work Zone Practices - Table 3: General Guidelines on Vehicle Capacity Through Work Zones;
- (xviii) Electrical Engineering Manual, MTO;
- (xix) Policy – Municipal Work on MTO Traffic Signals, September 2008;
- (xx) MTO Policy – Roadway Lighting on Municipal Crossroads, October 24, 2003;
- (xxi) Portable Variable Message Signs – Best Practices Manual, MTO;
- (xxii) Bikeways Design Manual; and,
- (xxiii) Guidelines for Reducing Speed Limits in Construction Work Zones.

1.2 General Requirements

- (a) DB Co shall manage the traffic and transit impacts of the Project and shall develop a Highway Traffic and Transit Management Plan (TTMP) for the Highway Works to meet the requirements of this Part C. DB Co shall manage and coordinate the Highway TTMP developed under this Part C with DB Co's requirement to manage and develop the TTMP required for the Confederation Line Extension Works as prescribed in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access. The management and development of the Highway TTMP shall complement the requirements of the other respective TTMP and for further certainty neither the Highway TTMP nor the TTMP shall diminish the other nor the requirements prescribed in this Part 9 and Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.
 - (i) The Highway TTMP shall be applicable to the Highway Works Construction Activities only.
- (b) DB Co shall coordinate the Permitted Periods for Closures and shall work collaboratively with adjacent MTO Contract 2017-4031 and the ATMS work at the Highway 416 / Hunt Club Road interchange, as outlined in Clause 2.6 of Part A. The Highway TTMP shall include how DB Co will manage this coordination. DB Co may reasonably be required to plan the Works with recognition of periodic Closures required by MTO Contract 2017-4031, which shall be given priority. DB Co shall expect to temporarily revise Designated Construction Zone limits to accommodate these Closures, when necessary. Designated Construction Zone revision shall allow Closures necessitated by DB Co and MTO Contract 2017-4031 to maintain compliance with OTM Book 7. Coordination requirements with other work are further detailed in Clause 2.5 of Part A of this Schedule 15-2, Part 9.
- (c) The Permitted Periods for Closures outlined in this Part C shall be the basis for the development of the Highway TTMP. Variations to the applicable Permitted Periods for Closures, at specific locations, may be permitted for such specific locations, but only if substantiated through a plan by DB Co that addresses, at a minimum, traffic

- requirements, analyses and Stakeholder consultation, where applicable, and such plan is submitted to the City for approval in accordance with Schedule 10 – Review Procedure.
- (d) DB Co shall work collaboratively and diligently, in a reasonable manner with the City and OC Transpo, Stakeholders, MTO, EMS organizations and other City service providers and Governmental Authorities so that transit service is maintained during construction in terms of travel time and frequency.
 - (e) Construction shall be scheduled so that the duration and extent of the proposed Highway Works and traffic control measures minimize the impact to all modes of transportation and adjacent land owners, and shall not prohibit any part of the traveling public access prior to receiving the required authorization to do so.
 - (f) All traffic data used for analysis for traffic management purposes shall be based on the most current data, no older than two years. The information to be collected shall include, but not be limited to, typical hourly traffic volumes in each direction for a 24 hour period for each season, considering all modes of travel on all Roads, bus Facilities, bike facilities and pedestrian facilities which will be affected by the Project, including any potential Detour Routes. DB Co shall be responsible for obtaining or collecting all traffic data necessary for its traffic analysis; the data shall reflect typical conditions of the roadway. DB Co shall confirm with the City that the data is appropriate prior to conducting an analysis using said data.
 - (g) DB Co shall undertake a Traffic Management Study (the “Traffic Management Study”), where road capacity is reduced, to determine the impact of the construction on possible diverted traffic and to determine appropriate mitigation measures. The Traffic Management Study shall extend along the entire extent of projected impacts and address all modes of transportation including adjacent corridors impacted by the construction. The study shall include DB Co’s forecast for, but not limited to, routes, diverted traffic volumes, speeds and travel times, for all modes of travel on all routes subject to the study. The Traffic Management Study shall be submitted as a part of the Highway TTMP document in accordance with Schedule 10 – Review Procedure.
 - (h) The OTM supersedes all reference in this Schedule 15-2, Part 9 to the MTO MUTCD. The supply and placement of all necessary temporary TCDs shall be performed under the sole direction of DB Co and in accordance with DB Co’s submitted/reviewed Highway TTMP and associated Highway TCP, prior to commencing any construction, on or adjacent to any Provincial Highways, Municipal Roadways or Other Affected Municipal Roadways. The Highway TCP shall be developed in accordance with guidelines established by the most recent version of the OTM, the OHSA and this Part C which details the required contents and submission of the Highway TTMP and associated Highway TCPs.
 - (i) Vehicular and pedestrian/cyclist traffic control within the Highway Works limits shall remain the sole responsibility of DB Co. The City delegate this authority to DB Co in accordance with the submitted/reviewed Highway TTMP. Notwithstanding the foregoing,

DB Co shall, at its own expense, remove any equipment or Material, which in the City's opinion, constitute a Hazard to traffic, pedestrians and cyclists.

- (j) DB Co shall be fully and solely responsible to ensure the development and implementation of a submitted/reviewed Highway TTMP as required in this Part C. The Highway TTMP and its sub-plans, and all required TCDs shall be designed/installed, monitored, operated/maintained and removed, utilizing only competent persons and workers as defined under the OHSA. DB Co shall be responsible for coordination of this work with the City.
- (k) DB Co shall not store any equipment or materials on a provincial or municipal road or the Roadway shoulders, the Transitway, Park and Rides, or boulevards, unless the storage areas are identified in the Highway TCP and appropriate TCDs have been implemented to protect the equipment or materials. The City shall review and approve any storage of equipment and/or materials within the Highway Corridor Lands. Construction shall be scheduled so that the duration and extent of the proposed Highway Works and traffic control measures minimize the impact on the traveling public. DB Co shall remove all dirt and Debris from all paved or concrete surfaces outside of the staging area at the close of each workday, and are responsible for any repairs or maintenance associated with the construction activity, to City and MTO Standards.
- (l) Implementation and removal of any Closure, Full Closures, Detour Routes, Lane Shifts, and Diversions and/or other changes in traffic patterns shall not be permitted outside of the applicable Permitted Periods for Closures as defined in this Part C and elsewhere in this Project Agreement.
- (m) The City Representative may, acting in a reasonable manner, temporarily adjust the applicable Permitted Periods for Closures in circumstances considered appropriate by the City including but not limited to, Holidays, as further addressed in Clause 1.4 of this Part C – Holidays and Special Events and Clause 4.4 of this Part C – Permitted Times for Lane and Ramp Closures.
- (n) The City Representative may direct DB Co, on seven Business Days advance notice, to eliminate or modify any or all Closures and restore free-flow traffic for a 24-hour period on the day of any planned event other than a Holiday, as per this Part C.
- (o) The City Representative may direct DB Co, on short notice (within 48 hours), to remove any or all Closures and restore or maximize Road cross-section including Shoulders and maintain existing traffic flow, where practical for any unplanned / emergency events.
- (p) DB Co shall temporarily cease any relevant Construction Activities that are affecting traffic and make all the necessary travel lanes available to traffic as quickly as possible if the City Representative or DB Co Traffic Control Supervisor determines that vehicular queues related to Closure, Full Closures, Detour Routes, Lane Shifts and/or Diversions are excessive. For example, where vehicular queues at intersections or interchanges extend onto the Main Line.

- (q) If DB Co's Traffic Control Supervisor or the City Representative determine that there are significant unexpected and/ or unmitigated traffic safety or operational issues related to Closure, Full Closures, Detour Routes, Lane Shifts and/or Diversions, DB Co shall temporarily cease any relevant Construction Activities that are affecting traffic and take necessary steps to Address the safety and operational issues.
- (r) Any proposed DB Co initiated Closure, Full Closures, Detour Routes, Lane Shifts, and Diversions, not included in DB Co's accepted Highway TCP, shall be submitted to the City in an updated Highway TCP in accordance with Schedule 10 – Review Procedure. DB Co shall not proceed with implementation of the Closure, Full Closure, Detour Route, Lane Shift or Diversion without a Highway TCP accepted by the City. DB Co shall not commence any work on Highway Corridor Lands without an applicable current accepted Highway TCP.
- (s) Multiple work zones that impact each other along Provincial Highways, Municipal Roadways, and Other Affected Municipal Roadways or routes between them, such that traffic encounters multiple disruptions and/or discontinuity in the lane geometries, shall not be permitted.
- (t) Notwithstanding any Closures or Full Closures, DB Co shall maintain access to all adjacent properties through Detours or otherwise.
- (u) Access to/from work zones along existing Provincial Highways and Roads shall not be permitted outside of the applicable Permitted Periods for Closures.
- (v) Access to/from work zones on the Provincial Highways during applicable Permitted Periods for Closures shall only be permitted with a Closure of the adjacent lane to provide vehicle acceleration / deceleration.
- (w) Construction vehicles/equipment shall only use accesses to/from work zones in the same direction of traffic thereby diverging/merging with the flow of traffic. A minimum distance of 1,000 m shall be maintained between construction egress and access locations. If this minimum spacing cannot be accommodated due to spatial constraints, DB Co shall propose an alternate configuration through the Highway TTMP. The City reserves the right to close any access to/from any work zones that it deems to be unsafe or which constitutes a Hazard to the public.
- (x) DB Co shall ensure that an open excavation adjacent to a lane carrying traffic will not be present except where a Barrier designed to restrain errant vehicles is located between the traffic and the excavation.
- (y) DB Co shall ensure that Materials and / or equipment is not stored within 10 m of the traveled portion of any Roadway unless protected by a Barrier. Notwithstanding compliance by DB Co with the foregoing, DB Co shall, at its own expense, remove Materials and construction vehicles and equipment which, in the opinion of the City Representative, constitute a traffic Hazard, or obstruction to maintenance operations.

- (z) DB Co shall be responsible for identifying to the City in advance all Roads being utilized for haul routes. DB Co shall be responsible for the cleaning and maintenance of haul routes. Requirements pertaining to haul routes are identified in Article 13 of Part B of this Schedule 15-2, Part 9.
- (aa) The City shall be granted access to the work zones to install portable cameras or other devices required for monitoring, audit, public communication, data collection or other purposes.
- (bb) All TC-54s used by DB Co shall be equipped with two sets of rubber tire ballast rings. DB Co shall remove all TC 54s from Roads, within the limits of the Highway Works, immediately after the conclusion of any traffic control requiring their use.
- (cc) DB Co shall be responsible for providing, installing and maintaining all TCDs and protective devices identified in the approved Highway TTMP.

1.3 Accommodation of Transit Services

- (a) DB Co shall be responsible for liaising and coordinating with all applicable municipal transit agencies for any modifications to bus routes and/or bus stops that may be required due to Closures, Full Closures, Detour Routes, Lane Shifts and Diversions and/or other changes in traffic patterns.
- (b) DB Co shall maintain access for transit customers at all adjacent existing Transitway and transit facilities, bus lanes and Transit Priority Lanes and non Transitway routes through detours or otherwise as detailed elsewhere in Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access, and elsewhere in the Project Agreement, unless exceptions have been approved.
- (c) DB Co shall provide the City and OC Transpo at least 35 calendar days' notice to coordinate adjustments required to their facilities as a result of construction. Access by buses, pedestrians and cyclists to all existing bus stops located within the work zone shall be maintained at all times, except where otherwise stated in Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access or elsewhere in this Project Agreement or agreed upon by the City and OC Transpo.
- (d) Proposed modifications to bus routes and/or bus stops shall be submitted in accordance with Schedule 10 – Review Procedure.

1.4 Holidays and Special Events

- (a) DB Co shall comply with the following requirements when scheduling hours of work or DB Co initiated Closures during the Holidays identified in Tables 1-1.1 and 1-1.2 (the "Holidays"):
 - (i) DB Co shall not commence the implementation of any Closures on any of the Holidays, after 12:00 on Fridays or a day proceeding a Holiday weekend, and

before 12:00 on a day following a Holiday or on the first Business Day following a Holiday weekend.

- (ii) Closures required for the installation of the Pedestrian Bridge at Queensview Station shall be permitted on Holiday weekends, except the weekends of Canada Day and Thanksgiving, subject to DB Co's receipt of approval from the City according to Article 4 of this Part C.

TABLE 1-1.1 – ONTARIO STATUTORY HOLIDAYS

|-------------------|-----------------|
| Easter Monday | Remembrance Day |
| St. Jean Baptiste | |

- (b) DB Co shall minimize traffic disruptions on Provincial Highways, Municipal Roadways, and Other Affected Municipal Roadways during special events. DB Co shall be responsible for obtaining a listing of planned special events on an as required basis from the City of Ottawa Events Central Office, the Traffic Management Special Events office, and the NCC, recognizing that the special events calendar is updated by the City and the NCC on a regular basis.

1.5 Detour Route, Lane Shift, Diversion, Closure and Construction Requirements

- (a) General
- (i) DB Co shall not implement any Closure, Detour Route, Lane Shift or Diversion without an applicable current accepted Highway TTMP and Highway TTMP sub-plans.
 - (ii) DB Co shall pave all Detour Routes, Lane Shifts and Diversions and have appropriate Pavement Markings and Signs placed in accordance with the OTM, MTO Standards, policies, guidelines and best practices.
 - (iii) DB Co shall be responsible for all Pavement Markings and non-regulatory signage on all Detour Route, except as identified in Clause 8.3 of Part B of this Schedule 15-2, Part 9, in preparation for the detour and during detour operations.
 - (iv) DB Co shall ensure that the Pavement structure and condition of any new, existing or temporary Road, bus lanes, cycling facility and pedestrian facility used for all Detour Routes, Lane Shifts and Diversion is designed and constructed for its intended purpose in accordance with the requirements set out in Schedule 15-2,

Part 9, Part B, Clause 3.3, and does not adversely impact the safety and intended function of such Detour Routes, Lane Shifts and Diversions for all road users of the facilities.

- (v) DB Co shall schedule Construction Activities such that no milled surface shall remain for more than 10 calendar days, or over Holidays and adjoining Weekend Periods. Each milled surface shall have a uniform texture, not be raveled, and not allow standing water on the surface.
- (vi) DB Co shall prepare an engineered design for each Detour Route, Lane Shift and Diversion that shall conform to the design requirements in the Reference Documents. Detour Routes shall be designed to the same design speed of the existing Road. Where a Diversion design speed for a Crossing Road cannot match the existing design speed within the proposed ROW limits, a reduced design speed corresponding to the posted speed shall be submitted to the City Representative for acceptance in accordance with Schedule 10 – Review Procedure.
- (vii) DB Co shall provide Detour Routes, Lane Shifts and Diversions with drainage facilities to prevent standing water and flow of water across the Roads, bus lanes, cycling and pedestrian facilities.
- (viii) Implementation and removal of any Closures, Full Closures, Detour Routes, Lane Shifts and Diversions and/or other changes in traffic patterns shall not be permitted outside of the applicable Permitted Periods for Closures.
- (ix) Lane Closure duration shall be limited to the time required to execute the necessary Construction Activities. DB Co shall not close a lane for purposes other than actual Construction Activities, such as, but not limited to, Material and equipment storage, and staff parking, unless approved by the City.
- (x) Detour Routes, Lane Shifts and Diversion requirements and any modifications thereto, shall be submitted in accordance with Schedule 10 – Review Procedure. The submittal shall in addition include modifications to the various Highway TTMP sub-plans as applicable.
- (xi) All Highway Works related Closures associated with traffic of any kind shall be the responsibility of DB Co, as well as any associated requirements for traffic control (such as but not limited to signage, line painting, TCD, Barriers, flag persons, point duty police, etc.). Closures and their ancillary requirements shall be submitted as part of the submittals in accordance with Schedule 10 – Review Procedure.
- (xii) DB Co shall prepare and submit Record Drawings to the City in accordance with the requirements of Schedule 15-2, Part 1, Article 16 – Record Drawings, and Schedule 15-2, Part 9, Part A, Clause 2.2, where new traffic signals, temporary traffic signals or modifications are being made to existing traffic signals, within 30 calendar days of signal activation.

- (xiii) DB Co shall have independent Road Safety Audits and Road Design Safety Reviews completed for any temporary or permanent Road, or Road detour, in accordance with the criteria set out in Article 6 - Roadways, Bus Terminals and Lay-Bys, of Schedule 15-2, Part 2 and Article 10 of Part B of this Part 9.
- (b) Traffic Control Devices
 - (i) DB Co shall supply, install and maintain DSM approved PVMS as required to supplement the Highway TCP and shall use the same to provide advance notification and advance warning of traffic pattern changes. Sign locations and messages shall be as shown in the Highway TCP which shall be submitted to the City in accordance with Schedule 10 – Review Procedure two weeks prior to being displayed. The City retains the right to require DB Co to provide additional PVMS in support of the Highway TCP.
 - (ii) DB Co shall provide PVMS(s) to provide advance notification and advance warning of Incidents as deemed necessary by the Highway Emergency Traffic Plan. Sign messages and the duration that the PVMS is deployed and displayed shall be submitted to the City for acceptance prior to being implemented, and the Highway TCP shall be updated to record the messages which were used.
 - (iii) PVMS signs shall meet the following requirements:
 - A. Be capable of displaying a sequence of up to six panels;
 - B. Each display panel shall be capable of displaying up to three lines;
 - C. Accommodate up to 12 characters on each line of text; and,
 - D. Messages shall be legible from 50 m to 300 m.
 - (iv) DB Co shall utilize standard MTO and bilingual messages on all PVMS Signs and message boards (one Sign per approach) with translations accepted by the City.
 - (v) DB Co shall provide TC-64 Signs or PVMS for all re-occurring Lane Closures, Full Closures, detours and Diversions. Additional PVMS may be used as an option in lieu of the TC-64 Signs. PVMS are required for all Full Closures.
- (c) Temporary Barrier Requirements
 - (i) DB Co shall supply and install temporary Barriers based on the requirements of the OTM, OHSA and the Roadside Safety Manual.
 - (ii) DB Co shall show the temporary Barriers in the Highway TCP which shall be submitted in accordance with Schedule 10 – Review Procedure.
 - (iii) Temporary Barriers used for Closures, Full Closures, Detour Routes, Lane Shifts and Diversions, shall meet the OPS standards and have appropriate flare offsets,

end treatments and crash cushions. Temporary Barriers shall have reflectors installed. DB Co shall make adequate provision for drainage and removal of snow, ice and Debris where temporary Barriers are used.

- (iv) DB Co shall install anti-glare screens, on or adjacent to Barriers, in order to avoid driver distraction and headlight glare in locations adjacent to Municipal Roadways and Other Affected Municipal Roadways where Equipment is actively working. DB Co shall submit the documentation and product samples proposed for anti-glare screens in accordance with Schedule 10 – Review Procedure.
- (d) Daily Backfilling to Subgrade Level
- (i) At locations where temporary Concrete Barrier is present, excavation for the roadworks, placement of Granular Materials, and any other operation which will result in an excavation shall only be completed to within 1.0 m of the backface of the Barriers when the Barriers are positioned in their temporary configuration, in accordance with MTO Design and Contracts Standards Policy #2017-04. The remainder of the excavation, Granular Materials and asphalt pavement shall be completed by shifting the Barrier and implementing a lane Closure in accordance with the timing constraints specified elsewhere in this Part C. The Barrier shall then be returned to its un-shifted position.
 - (ii) DB Co shall ensure that prior to completion of work each day, areas that are excavated below a subgrade level are backfilled to the subgrade level in accordance with methods specified elsewhere within the Project Agreement.
 - (iii) DB Co shall ensure measures are taken against undermining of the adjacent Pavement structure at open excavations throughout the contract limits, where traffic is protected by temporary Concrete Barrier. This shall be done by backfilling with the specified Material up to profile grade within 2 m of the back of Barrier prior to ceasing operations each weekend.
- (e) Guide Rail Construction Operations
- (i) DB Co shall ensure that the existing guide rail system or an approved Barrier System shall remain in place at all times or the removed guide rail is replaced with the new guide rail or an approved Barrier System within the same working day at all locations with an existing guiderail or Barrier System.
- (f) Ramp and Side Street Closures
- (i) DB Co shall provide notice of one-time ramp and side street Closures consistent with requirements detailed elsewhere.
 - (ii) Ramp and Side Street Closures – Short Duration
 - A. DB Co shall comply with conditions covered elsewhere in the Project Agreement for all nightly Closures of ramps and/or Lane Closures on side

streets. Ramps shall only be closed if work is directly located on the ramp or on Highway 417 or side street at the ramp junction, or if Closure is required to implement other lane Closures in accordance with OTM Book 7. Short-term ramp Closures are restricted to one ramp at a time per interchange per direction.

(iii) Ramp and Side Street Closures – Long Duration

- A. DB Co shall only close ramps if work is directly located on the ramp, or on the Highway or side street at the ramp junction, if Closure is required to implement other Lane Closures in accordance with OTM Book 7, with the exception of the Long Duration temporary closure of the Richmond Road N-E ramp.

| RAMP / SIDE STREET | DURATION |
|---------------------------|---|
| Moodie Drive S-W ramp | Permitted to be closed for a single construction season to facilitate the construction of the grade separation between the S-W ramp and the LRT alignment, with associated lane reductions/traffic management measures on Moodie Drive |
| Richmond Road N-E ramp | This ramp shall be closed temporarily from the commencement of the Transitway Segment W-7 detour/opening of the temporary Holly Acres N/S-E transit only ramp until Revenue Service of the Confederation Line West Extension is achieved. |

(f) Existing Roadway Illumination

- (i) DB Co shall ensure all existing Roadway illumination remains fully operational during the hours of darkness until such time as a temporary and/or permanent Highway Lighting System is installed and operational during hours of darkness. For instances where the Roadway is closed to traffic to accommodate construction, the existing Roadway illumination may be turned off within the limits of the road Closure only. Any temporary and/or permanent Highway Lighting System must have equivalent lighting levels to the existing lighting levels.

(h) Underpass Illumination

- (i) DB Co shall ensure that existing Underpass illumination is fully operational at all times during the hours of darkness until such time as the temporary or permanent Underpass lighting is installed and operational during the hours of darkness. Any temporary and/or permanent Highway Lighting System must have equivalent lighting levels to the existing lighting levels.

- (i) Electrical Coordination
 - (i) DB Co shall coordinate the installation of guiderail with the location of any electrical work (permanent, temporary and existing) within the Highway Works limits.
- (j) Signage
 - (i) DB Co shall be responsible for the design, supply, installation, relocation, maintenance and removal of all temporary signage, including Warning Signs, guide, advisory and directional Signs in accordance with this Part C and Clause 8.3 of Part B of Schedule 15-2, Part 9.
 - (ii) All temporary signage shall be in accordance with the City of Ottawa, OTM and MTO Standards. DB Co shall provide signage requirements for all temporary conditions as per MTO's Temporary Conditions Traffic Management Manual dated April 2001, throughout the Highway Works. The location, size and type of each Sign shall be indicated on the Highway TCP.
 - (iii) DB Co shall supply and install bilingual Signs, with translations accepted by the City.
 - (iv) DB Co shall prepare and submit as part of the Highway TTMP sub-plans a Temporary Signing Plan and a Temporary Signing Table in accordance with Clause 8.3 of Part B of Schedule 15-2, Part 9.
 - (v) DB Co shall be responsible to install and remove all necessary construction signage for any proposed Detour Routes. DB Co shall notify the City a minimum of 14 calendar days in advance of the requirement for the detour.
 - (vi) Project Information Signage will be provided by the City. DB Co shall install project Information Signage at locations designated by the City.
- (k) Temporary Lighting During Construction
 - (i) DB Co shall be responsible for all temporary street light relocation.
 - (ii) All existing lighting in each staging phase shall be maintained in operational order to applicable standards during construction on the relevant construction phase until such time as replacement temporary or permanent lighting is energized.
 - (iii) DB Co shall provide temporary illumination as per Clause 6.5 of Part B of this Schedule 15-2, Part 9.
- (l) Pavement Drop-Offs
 - (i) DB Co shall perform all Construction Activities so as to minimize any Drop-offs (abrupt changes in Road elevation) left exposed to traffic, pedestrians and cyclists

during non-working hours. Drop-offs left exposed to traffic, pedestrians and cyclists during non-working hours shall be delineated as follows:

- A. Drop-offs up to 40 mm may remain exposed with appropriate TCDs alerting motorists of the condition. However, no drop-offs shall be allowed between adjacent lanes of traffic;
 - B. Drop-offs greater than 40 mm that are in the Road or Shoulder shall be delineated with appropriate TCDs and further delineated as described in Clause 1.5(c) of this Part C;
 - C. Ramping shall be provided for vehicular traffic at a slope of 10:1 if the elevation difference, where unavoidable, is more than 40mm for longitudinal edge drops.
 - i. The provisions for temporary ramping shall also meet the requirements of OPSS PROV 313.
 - ii. DB Co shall ensure that adequate and positive drainage is maintained along and across the Roadway at all times and during all construction stages.
 - D. All transverse edge drops located on roads utilized by traffic and transit shall be ramped at a slope of 120:1.
- (ii) All areas of excavation near areas of traffic and their proposed safety measures shall be shown in the Highway TCP.
 - (iii) All Highway Works shall meet AODA requirements at all times.
- (m) Temporary Pavement Markings, symbols and devices
- (i) DB Co shall be responsible for the execution of all temporary Pavement Markings and symbols in accordance with this Part C, and Clause 8.5 of Part B of Schedule 15-2, Part 9.
 - (ii) DB Co shall be responsible for the application, maintenance and removal of all Temporary Pavement Markings, symbols, Road pavement markers, channelizing devices, barricades, reflective devices, etc., in accordance with the OTM, and all of which shall be specified and detailed in the Highway TCP which shall be submitted to the City in accordance with Schedule 10 – Review Procedure. Only permanent Pavement Markings shall be applied to the final Pavement surface.
 - (iii) DB Co shall eradicate all redundant Temporary or Permanent Pavement Markings that are not required for the intended traffic pattern using DSM listed equipment.
 - A. Eradication of Pavement Markings shall be in accordance with the CDLED Manual, such that removal of Pavement Markings, when necessary, shall

- be by means of asphalt grinding, sandblasting, soda blasting, water blasting or some other form of mechanical removal and not by the use of black paint.
- B. DB Co shall resurface all locations where scarring of Pavement occurs due to the removal of Pavement Markings for construction staging. Resurfacing requirement applies to all locations where more than one Lane Shift or diversion occurs. DB Co shall provide full width paving throughout the limits of the scarring prior to the application of permanent Pavement Markings.
- (iv) Temporary Pavement Markings Materials shall be in accordance with OPSS 710, and shall be specified and detailed in the Highway TCP.
- (v) DB Co shall apply all Temporary Pavement Markings in accordance with OPSS 710 and the accepted Signing and Pavement Markings drawings and the Closure, Detour Route, Lane Shift and Diversion drawings as submitted to the City in accordance with Schedule 10 – Review Procedure.
- (vi) Fluorescent Orange Temporary Pavement Markings shall be used on all Provincial Highways where there are changes in alignment to accommodate construction staging.
- (n) Speed limits and safe passage through work zones
- (i) The City reserves the right to determine speed limits through the work zones. Unless specified in this Part C or agreed to in writing by the City, the existing regulatory speed limits shall be maintained.
- (ii) DB Co shall review the need for short- or long-term speed reduction for all staging in accordance with the Reference Documents. Proposed speed reduction shall be submitted to the City Representative through the Designation of Construction Zone forms. Proposed posted speed reductions on Provincial Highways below 80 km/h will not be accepted.
- (iii) Speed limits on all Provincial Highways, Municipal Roadways, and Other Affected Municipal Roadways shall remain unchanged outside of Designated Construction Zones. DB Co shall prepare the necessary Designation of Construction Zone forms, (PH-M-101), which shall be submitted to the City Representative for approval in accordance with Schedule 10 – Review Procedure. The City Representative will submit the forms to MTO for approval.
- (iv) Construction Activities shall be carried out in such a manner as to maximize safety and minimize disruption to Highway traffic.
- (v) Outside the Winter Period, lane widths of no less than 3.5 m and lateral offsets between the travelled lane and temporary Barriers of no less than 0.5 m must be maintained at all times during Construction Activities.

- (vi) During the Winter Period, lane widths shall be as per Clause 1.14.
- (vii) Floodlighting used to illuminate areas of the Highway Works during Construction Activities, shall be included in the Highway TCP and shall be adjusted so as to not interfere with the vision of drivers on the affected or opposing lane and also so as to not be directed towards residences or businesses near the work zone.
- (o) Maintenance of Closures, Detour Routes, Diversions, Lane Shifts, pathways and sidewalks
 - (i) DB Co shall keep existing Roads open to traffic, and DB Co shall be responsible for providing a road through the Designated Construction Zone for the duration of the Highway Works, whether along an existing Road, including the road under construction, or on Detours, Diversions or Lane Shifts.
 - (ii) DB Co shall maintain and repair Closures, Detour Routes, Diversions, Lane Shifts, pathways and sidewalks and their appurtenances, which are built as permanent infrastructure, as per the maintenance provisions set out in this Part C for temporary infrastructure.
 - (iii) DB Co shall be responsible for all aspects of maintenance and repair for all temporary Closures, Detour Routes, Diversions, Lane Shifts, pathways and sidewalks and their appurtenances throughout their duration of use.
 - (iv) DB Co shall execute the maintenance on temporary infrastructure, throughout its duration of use:
 - A. In accordance with Applicable Law and Good Industry Practice;
 - B. In accordance with the accepted Highway TTMP;
 - C. To ensure that the condition of the DB Co temporary infrastructure is sufficient to meet the design, construction and operational requirements for the intended use; and,
 - D. In coordination with the City, so as to permit the City to operate City infrastructure, while minimizing any adverse impact on third parties.
 - (v) Prior to putting part of temporary or permanent transportation infrastructure into service, DB Co shall convene a meeting with the City in order to coordinate maintenance activities at the interface between existing City or MTO infrastructure and the DB Co temporary or permanent infrastructure. DB Co shall take minutes of the meeting and, distribute the documented proceedings and conclusions to the participants.
 - (vi) On the first Monday after Thanksgiving Day each year, DB Co shall convene a meeting with the City to discuss “winter readiness”, so that all parties know their respective roles prior to a sudden onset of winter weather. DB Co shall take

minutes of the meeting and distribute the documented proceedings and conclusions to the participants.

- A. MTO shall be responsible for winter maintenance (snow plowing, winter sanding, snow clearing) on Provincial Highways and Crossing Road ramps, excluding existing Transitway lanes and ramps. No Lane Closures will be permitted if any precipitation is anticipated during the requested Lane Closure period.
- B. DB Co shall be responsible for the winter maintenance of any construction Roads or accesses to construction sites.

1.6 Accommodation of Pedestrians and Cyclists During Construction

- (a) DB Co shall not close or relocate any Pedestrian Walkway or cycle track without a Highway TTMP that has been accepted by the City. The Highway TTMP and sub-plans shall identify any Pedestrian Walkway or cycle track Closure, relocation and alternate route in accordance with Schedule 10 – Review Procedure, complete with a detailed explanation of why the Pedestrian Walkway or cycle track is required to be closed or relocated and the signs which shall be installed as a part of the Closure or relocation.

1.7 Working within Vicinity of a Traffic Control Signal

- (a) DB Co shall notify and be responsible for all costs associated with Ottawa Police Services (OPS) being on duty to control traffic, when DB Co is required to work within 200 m of a traffic control signal. Advanced notice of 48 hours shall be provided to OPS. No traffic control person shall be permitted to direct traffic in this area, nor may they direct traffic from more than one direction at any time. DB Co shall notify the City of this situation prior to OPS contact.

1.8 Temporary Traffic Control Signals

- (a) DB Co shall design and construct temporary Traffic Signal Systems in accordance with Clause 6.6 of Part B of this Schedule 15-2, Part 9.
- (b) Where there are active ongoing Construction Activities and DB Co personnel are present within an intersection where there are existing traffic control signals to be temporarily modified, or new temporary traffic control signals to be installed, DB Co shall be responsible to arrange for OPS paid-duty officers to provide point duty within an intersection while the City modifies or installs the traffic control signals.
- (c) At an intersection where as part of Highway Works, existing traffic control signals are to be modified temporarily, or temporary traffic control signals are to be installed, and only City forces will be working at the intersection, the City shall arrange for the OPS services and DB Co shall be responsible for the costs.

1.9 Traffic Engineering Requirements During Construction

- (a) DB Co shall meet the traffic engineering requirements outlined in Clause 1.4 of Part B of this Schedule 15-2, Part 9.
- (b) If DB Co demonstrates through detailed traffic analysis that pre-construction performance cannot be achieved through optimized signal timing, geometric improvements or other intersection improvements, DB Co shall submit a request to the City in accordance with Schedule 10 – Review Procedure to receive exemption on this performance and acceptance of the intersection design during construction in City’s sole discretion.

1.10 Record Keeping of Traffic Control Devices/Collisions

- (a) DB Co shall maintain Accurate records of the traffic controls which are in place within temporary infrastructure that is in service.
- (b) DB Co shall maintain an Accurate daily record of the inspection of the traffic accommodations, and provide copies of the information to the City immediately upon request. The daily record shall include the following:
 - (i) A twice daily video (hand held, dash-cam, etc.) in both or all directions as applicable, such that all portions of the Highway Works are recorded in sufficient detail to accurately see and distinguish/read all of the TCDs in place on Site;
 - (ii) Condition and placement including changes, additions and removals of all TCDs;
 - (iii) Confirmation of compliance with the Highway TTMP and its sub-plans;
 - (iv) All traffic collisions;
 - (v) The dates, times and content of all messages on all PVMS; and,
 - (vi) The date and time of Lane Closures;

1.11 Traffic Monitoring During Construction

- (a) DB Co shall undertake traffic monitoring in accordance with its Highway Traffic Monitoring Plan, as defined in Clause 5.2(h) of this Part C.

1.12 Communications

- (a) DB Co shall ensure that all communications and stakeholder engagements in relation to the Highway TTMP are in accordance with Schedule 18 – Communications and Stakeholder Engagement Obligations and as further detailed in this Clause 1.12 of Part C.
- (b) DB Co shall be responsible for providing road Closure and detour information to the City for the purposes of public notification.

- (c) DB Co shall schedule and attend Highway TTMP meetings and workshops with the City in order to obtain Highway TTMP approvals and with key Stakeholders prior to implementation. The frequency of the meetings will vary at the City's discretion. DB Co shall record and distribute minutes for these meetings to the City within five Business Days of the meeting, including but not limited to attendance sheets, agenda, record copy of material presented, comments received, issues raised, and the follow up action proposed by DB Co to resolve each issue. Resolution of the issues shall be raised and recorded by DB Co at the regularly scheduled Highway TTMP meetings.
- (d) DB Co shall attend any public meetings that are held prior to detour implementation, and shall be responsible for Addressing issues raised at the public meetings in the forum of the technical Highway TTMP meetings.
- (e) DB Co shall provide the City with a process as part of the Communication and Stakeholder Engagement Plan detailed in Schedule 18 – Communications and Stakeholder Engagement Obligations, and a contact person to whom the City can rely on to respond to any stakeholder relations obligations pertaining to traffic management. Issues and the resolutions thereto shall be raised and recorded by DB Co at the regularly scheduled Traffic Management Committee meetings.
- (f) DB Co shall assist the City and attend stakeholder events and stakeholder outreach meetings in relation to the Highway TTMP in accordance with Schedule 18, Part 4 – Communications and Stakeholder Engagement Activities. At these events and meetings, DB Co shall explain in terms easily communicated to the public, the process of how the specific segment of the Project will be built, with a focus on an overview of the proposed traffic Closures and detours/alternate routes for pedestrians, cyclists and vehicles, and how the related traffic/transit management staging is proposed to be carried out.
- (g) DB Co shall provide design illustrations, display boards and narratives to the City for the traffic related information such as traffic volumes, traffic detours/alternate routes, traffic Emergency/contingency plans, collision data, truck routes, construction traffic routes, etc. All material provided shall be dated and include a contact name and contact coordinates (DB Co & City jointly). All materials shall be provided in quantity for distribution in both hard copy and electronically, in both official languages.
- (h) DB Co shall provide Timely e-mail distribution regarding traffic/transit updates, including major cycling route impacts.
- (i) DB CO shall provide to the City, content for weekly traffic/transit information/forecast updates, for release to the City's website and the MTO website.
- (j) DB Co shall provide content for the City's quarterly technical briefing to Committee and/or Council.
- (k) DB Co shall provide Timely content for social media updates to the City for release on the City's social media accounts so as to inform followers as to quick updates about on-the-ground traffic control implementation.

- (l) DB Co's Director of Communications and Stakeholder Engagement shall be the spokesperson whom the City will contact to Address all Project related complaints pertaining to traffic/transit management issues which are reported to the City, unless an alternate spokesperson has been agreed to by the City. The spokesperson shall provide pertinent and Timely information to the City in response to the complaint.
- (m) DB Co shall be advised that in the weeks leading up to and on the weekend of the Queensview Pedestrian Bridge installation, there will be requests from media, interest groups and City and MTO staff to gain access to the site. DB Co shall co-ordinate these requests and identify to these non-construction personnel the requirements they must meet to allow them to access the site (proper clothing, footwear, hard hat, etc.). DB Co shall provide any and all training to allow the non-construction personnel access to the site to meet DB Co's requirements as the constructor.

1.13 Highway Works Traffic Management Communications Plan

- (a) DB Co shall, no later than 180 days before commencement of Construction Activities for Highway Works, submit a plan (the "Highway Works Traffic Management Communications Plan") for review by the City pursuant to Schedule 10 – Review Procedure.
- (b) Project Co shall implement the Highway Works Traffic Management Communications Plan for the period covering commencement of Highway Works Construction Activities on the Highway Corridor until Highway Works Final Completion. The Highway Works Traffic Management Communications Plan will clearly describe how DB Co will communicate to all Stakeholders on matters relating to traffic flow, including, specifically, how it will provide Timely notice of construction related delays, Closures, Full Closures, Detour Routes, Lane Shifts, Diversions, and Incidents.
- (c) For the installation of the Pedestrian Bridge at Queensview Station (in accordance with the requirements of Schedule 15-2, Part 9), DB Co shall include and employ the following communication tactics in its Highway Works Traffic Management Communications Plan:
 - (i) Advertising in City of Ottawa and surrounding municipalities local newspapers;
 - (ii) Providing content for social media and project websites;
 - (iii) Leading Stakeholder consultation meetings as required, commencing a minimum of 90 days prior to weekend Closures;
 - (iv) Drafting and issuing media releases, as required; and,
 - (v) Notification to and coordinating with the City Representative, MTO Compass Traffic Operations Centre and MTO Road Work Scheduling and Coordination Unit.
- (d) The Highway Works Traffic Management Communications Plan must include communication and outreach tactics to ensure all Stakeholders are properly notified and

provided with the appropriate information. For purposes of this Clause 1.13, Stakeholders include, but are not limited to the following:

- (i) Stakeholders (as defined in Schedule 1 – Definition and Interpretation of the Project Agreement);
- (ii) Emergency services: Police, Fire and Ambulance;
- (iii) City of Ottawa;
- (iv) OC Transpo;
- (v) School boards;
- (vi) Any and all affected transit commissions;
- (vii) Vulnerable road users such as pedestrians, cyclists and special interest groups (consider disabled/ODA requirements);
- (viii) Municipal and provincial elected officials;
- (ix) Large traffic generators, such as major employers, commercial/retail establishments, businesses, entertainment venues, places of worship, etc.;
- (x) Industries/shippers;
- (xi) Ontario Trucking Association;
- (xii) Motorists and professional drivers; and
- (xiii) General public.

1.14 Winter Period

- (a) DB Co shall perform all Maintenance Operations during the Winter Period except for snow, ice, and frost control as defined in Appendix G.
- (b) DB Co shall submit to the City for review a Winter Season Plan for each year by the first Monday in October each year in accordance with Schedule 10 – Review Procedure (the “Winter Season Plan”). The plan shall detail any and all Construction Activities to continue during the Winter Period, as well as any changes to the current Highway TTMP during the Winter Period, including the signing and Pavement Marking changes, and document the Shoulder widths available for snow storage during the Winter Period.
- (c) All permanent Highway 417 and Municipal Roadway lanes, Shoulders, Pavement Markings, Signs, Structures and interchange ramps that were in place prior to the start of construction, or their reconstructed counterparts, shall be paved, and/or reinstated prior to the Winter Period. All lanes (Provincial Highway and other Roads) and interchange

ramps shall be opened to traffic and shall remain unrestricted at all times to public traffic during the Winter Period.

- (d) DB Co shall complete all of the following work, prior to the Winter Period, in areas where the Highway Works was initiated in the same year:
- (i) Partial depth Pavement removal and paving operations (to the top of the upper binder course) on all Road lanes, including Shoulders, Structures and ramps;
 - (ii) Construction of all drainage courses, Culverts and storm sewers/Catch Basin grates (temporary and/or permanent) to elevations and provision of positive drainage of the Roadway, sub-base, Ditches and ROW in any areas where the existing road/median Ditches or drainage system has been altered from its pre-contract state;
 - (iii) Installation of new Barriers or temporary Barriers, with appropriate end treatments, in locations where existing roadside Barriers have been removed;
 - (iv) Installation of all erosion and sedimentation control measures as required;
 - (v) Completion of all permanent and/or Temporary Pavement Markings, Pavement Marking obliterating and installation of all guiderail systems;
 - (vi) If construction related Signs and supports are required during the winter, they shall not be placed on any asphalt surface or within two metres from the edge of pavement, so as to ensure winter plowing shall not be impeded;
 - (vii) DB Co's equipment and Material shall be removed from within the Highway Works limits consistent with the Winter Season Plan;
 - (viii) All Temporary Flexible Guide Posts shall be removed prior to the Winter Period;
 - (ix) All median construction access locations shall be closed off using temporary Concrete Barrier in accordance with DB Co's Winter Season Plan, deflected at 40:1;
 - (x) Temporary Pavement Markings shall be painted and receive a second application of paint each calendar year if they will be left in place during the Winter Period;
 - (xi) The removal of Temporary Pavement Markings that are not part of DB Co's Winter Season Plan and were placed for work during the construction season shall be completed using approved methods;
 - (xii) All new guiderail systems installed prior to the Winter Period shall be installed to the grades required for the final top of Pavement elevation; and,

- (xiii) Shoulder widths/offsets to Barriers shall be provided on Highway 417 on the right side and the left hand side of the lanes (in the direction of traffic) during the Winter Period; according to the following:
 - A. For the right hand side, DB Co shall provide a minimum 2.5 m Side Clearance. Where the right edge of Pavement is at the final location, DB Co shall maximize the offset but provide no less than the offset provided during construction. All Shoulders are to be paved and the concrete Barriers are to be installed on Pavement.
 - B. For the left hand side, DB Co shall maintain the existing offset during widening construction and shall provide a minimum 1.0 m Side Clearance during median construction. All Shoulders are to be paved and the concrete Barriers are to be installed on Pavement.
- (e) If the Highway Works on any Crossing Road is not completed in one season, then DB Co shall provide a paved surface with width consistent with the existing and/or to be constructed geometry, and with sidewalks as identified elsewhere in this Part 9 prior to the Winter Period.
- (f) All frames and covers of catch basins, maintenance holes and valve chambers located in the travelled portion of the Roadway shall be set flush with the pavement at the time of the Winter Period as required. All depressed curbs for entrances, cross-walks, curb ramps, uneven longitudinal/transverse joints, etc. shall be ramped with hot mix asphalt before the start of the Winter Period.
- (g) DB Co shall be responsible for preparing the Site each spring including, but not limited to:
 - (i) Re-instatement of all necessary construction related Signs;
 - (ii) Re-instatement to the design cross-fall all granular Shoulders on the contract, including any Material that is required; and,
 - (iii) Carrying out a detailed inspection of the binder course, identification of any deficiencies, and carrying out repairs as required to the satisfaction of the City.
- (h) Winter Period requirements, as contained in this Clause 1.14 of Part C, shall not relieve DB Co of any other requirements of the Project Agreement. All hot mix paving work performed by DB Co to meet Winter Period requirements, that do not meet the full requirements as specified elsewhere, shall be considered temporary paving and DB Co shall be responsible for the placement and subsequent removal of the temporary Pavement.
- (i) DB Co's Works Schedule shall at all times reflect the Winter Period requirements as defined in Clause 1.14 of this Part C.

ARTICLE 2 EXISTING MUNICIPAL ROADWAYS

2.1 General Requirements – Municipal Roadways

- (a) DB Co shall not perform any Highway Works on Municipal Roadways (Crossing Roads) or Other Affected Municipal Roadways during the following Peak Periods unless noted as an exception in this Part C:
 - (i) Monday to Friday inclusive: 06:30 to 09:30 and 15:00 to 18:30.
- (b) DB Co shall be permitted to partially close portions of Municipal Roadways due to Construction Activities while always maintaining local traffic access. There shall be at least one lane per direction (or two lanes per direction for segments with three existing lanes in each direction) and sufficient lane widths to accommodate bus travel. Exceptions to the principle of maintaining two lanes per direction in segments with three existing lanes per direction shall be defined by DB Co and presented to the City as part of the Highway Traffic Control Plans for acceptance.
- (c) DB Co shall schedule intersection disruptions during Off Peak Periods, Night Periods or Weekend Periods only. During those periods, there shall be at least one lane of traffic per street permitted at all times. Flagging shall be required if a single lane of traffic is in operation during Construction Activities. No active Construction Activities shall be performed in an intersection during Peak Periods.
- (d) DB Co shall develop a sequencing plan to minimize the length of the Municipal Roadway that is closed at any one time and include as part of the Highway Traffic Control Plans.

2.2 Conditions of Highway Works on Municipal Roadways

- (a) DB Co shall provide at least 35 Business Days advance notice in the form of an e-mail to the City Representative for all Closures, detours and Diversions.
- (b) DB Co shall only be permitted to close any existing Municipal Roadway for the purposes of carrying out Highway Works after all other safe and reasonable methods of construction have been investigated by DB Co and deemed not to be feasible or practicable.
- (c) DB Co shall maintain two-way traffic at successive intersections on either side of a closed intersection at times of the Closure.
- (d) DB Co shall maintain a pedestrian sidewalk on each Crossing Road in accordance with City design standards at all times during the construction. DB Co shall be responsible for all design, approvals, construction and Maintenance of the sidewalk for the duration of the Detour.
- (e) DB Co shall not use accesses to/from work zones, Shoulder Closures, and the loading and unloading of materials and construction vehicles/equipment to/from the travelled portion

of existing Municipal Roadways during Peak Periods on any weekday. Exceptions to this shall be made for the delivery of concrete.

- (f) DB Co shall accommodate all turning movements at intersections at all times, unless specified elsewhere in this Schedule 15-2, Part 9. This includes all protected auxiliary turn lanes.
- (g) DB Co shall make all travel lanes available during non-work times unless Construction Activities have rendered them temporarily unsuitable for traffic use, or unless a Closure was approved by the City.

2.3 Permits from the City of Ottawa

- (a) Road Cut Permit
 - (i) DB Co shall obtain a Road Cut Permit prior to the start of Highway Works on any Municipal Roadway or Other Affected Municipal Roadway. The requirements of the Road Cut Permit are outlined in City of Ottawa By-Law — Road Activity By-Law No. 2003-445.
 - (ii) When an application for a Road Cut Permit is made for Highway Works or any portion thereof, DB Co shall ensure that it contains a reference therein, that the application pertains to the Project. Furthermore, DB Co shall include in their application, the Highway TCP sub-plan as submitted to and accepted by the City in accordance with Schedule 10 – Review Procedure. If as a result of the Road Cut Permit approval process the Highway TCP is revised, DB Co shall submit the revised Highway TCP to the City in accordance with Schedule 10 – Review Procedure for re-acceptance, and, shall update and resubmit the Highway TCP sub-plans to reflect the changes found in the approved Road Cut Permit version of the Highway TCP.
- (b) Road Close Permit
 - (i) DB Co is required to obtain Road Close Permits prior to closing Municipal Roadways or Other Affected Municipal Roadways as specified elsewhere. DB Co shall submit to the City the road Closure request forms no later than four weeks prior to each Closure event.
 - (ii) DB Co shall ensure that an application for Road Close Permit contains a reference to the Project and shall include in their application, the Highway TCP sub-plan as submitted to and accepted by the City in accordance with Schedule 10 – Review Procedure. If as a result of the Road Close Permit approval process the Highway TCP is revised, DB Co shall submit the revised Highway TCP to the City in accordance with Schedule 10 – Review Procedure for re-acceptance. It shall include the updated Highway TCP and sub-plans to reflect the changes found in the approved Road Close Permit version of the Highway TCP.
- (c) Private Approach Permit Application

- (i) DB Co shall obtain a Private Approach Permit for any construction site access from Municipal Roadways or Other Affected Municipal Roadways.
 - (ii) DB Co shall ensure that an application for a Private Approach Permit contains a reference to the Project and shall include in their application, the relevant portion of the Highway TTMP as submitted to and accepted by the City in accordance with Schedule 10 – Review Procedure. If as a result of the Private Approach Permit approval process the Highway TTMP is revised, DB Co shall submit the revised Highway TTMP to the City in accordance with Schedule 10 – Review Procedure, for re-acceptance. It shall include the updated Highway TTMP and sub-plans to reflect the changes found in the approved Private Approach Permit version of the Highway TTMP.
- (d) OC Transpo Permits
 - (i) DB Co shall not carry out any work on bus-only lanes, the Transitway, or any bus facilities, without completing the Transitway Access Permits and receiving approval from the City and OC Transpo.
 - (ii) When an application for an OC Transpo Permit is made for the Project or any portion thereof, DB Co shall ensure that an application for an OC Transpo Permit contains a reference to the Project and shall include in their application, the Highway TCP as submitted to and accepted by the City in accordance with Schedule 10 – Review Procedure. If as a result of the OC Transpo approval process the Highway TCP is revised, the DB Co shall submit the revised Highway TCP to City in accordance with Schedule 10 – Review Procedure for re-acceptance, and, shall update and resubmit the Highway TTMP and sub-plans to reflect the changes found in the approved OC Transpo version of the Highway TCP.
 - A. DB Co shall ensure that the Highway TCP is approved by the City at least 14 calendar days prior to any detour or Construction Activity that has operational impacts on transit service. If the action is an extended detour or requires a shelter relocation, notification shall be provided as otherwise specified in Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access.
 - B. The submission of a Highway TCP does not constitute advance notice, which does not include timelines for potential revisions to the Highway TCP.
- (e) Noise Bylaw Exemption
 - (i) DB Co shall apply and obtain an exemption to the City Noise Bylaw if required for evening/night work.

2.4 Crossing Roads

- (a) Crossing Roads are defined as the following Municipal Roadways within the MTO ROW:
 - (i) Holly Acres Road
 - (ii) Richmond Road
 - (iii) Pinecrest Road/Greenbank Road
- (b) The following constraints shall be followed within the Crossing Roads corridor:
 - (i) DB Co shall maintain access across Highway 417 on Crossing Roads at all times for vehicles, transit services, emergency services, pedestrians and cyclists. All existing travel lanes on Crossing Roads shall be maintained at all times during the Peak Periods throughout construction.
 - (ii) DB Co shall maintain uninterrupted access to all Highway 417 ramps at all times, except for MTO authorized ramp Closures obtained in accordance with the provisions of this Part C.
 - (iii) Notice of the scheduled dates of the Full Closure for the installation of the Pedestrian Bridge at Queensview Station shall be identified to the City a minimum 35 Business Days in advance of the each of the scheduled Closures for approval. The Closure dates shall not be scheduled during events identified in Clause 4.2 of this Part C.

ARTICLE 3 WEST TRANSITWAY SEGMENT W-6, W-7 AND W-8

3.1 West Transitway Segment W-6 – Queensway Station to Pinecrest Station

- (a) The traffic management for this West Transitway Segment is covered by Clause 3.11 of Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access.
- (b) Any modification or realignment to the existing dedicated bus lanes on Highway 417 that would remove the barrier separating buses from general purpose lanes requires an approved Ontario Regulation prior to implementation. If such a modification is proposed by DB Co, it shall supply scale drawings of the proposed configuration in AutoCAD and PDF format to the City Representative for submission to MTO. The proposal may be approved or rejected by the Relevant Authority at its sole discretion. If approved, DB Co shall coordinate with the City and MTO to implement the Ontario Regulation, and shall notify the City once the Ontario Regulation is no longer required. DB Co is advised that approval of an Ontario Regulation may take in excess of six months.

3.2 West Transitway Segment W-7 – Pinecrest Station to Bayshore Station

- (a) The traffic management for this West Transitway Segment is covered by Clause 3.12 of Schedule 15-2, Part 7 Traffic and Transit Management and Construction Access.
- (b) This detour involves the design and construction of a temporary N/S-E bus-only ramp at Holly Acres Road and the temporary closure of the Richmond Road N-E ramp, as described in Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access, and this Schedule 15-2, Part 9 Part B. The Holly Acres Road N/S-E bus-only ramp shall open and the Richmond Road N-E ramp shall close upon the commencement of the W-7 BRT Detour; the closure of the Holly Acres Road N/S-E bus-only ramp and the re-opening of the Richmond Road N-E ramp shall occur following Revenue Service of the Confederation Line West Extension and shall be considered Remaining Works.

3.3 West Transitway Segments W-8 and W-9 – Bayshore Station to Moodie Station

- (a) The traffic management for this West Transitway Segment is covered by Clause 3.13 of Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access.
- (b) This detour involves the design and construction of a fourth lane on the Highway 416 S/Highway 417 W – Holly Acres N/S ramp, as described in this Schedule 15-2, Part 9, Part B.

**ARTICLE 4 EXISTING PROVINCIAL HIGHWAYS AND MUNICIPAL
ROADWAYS WITHIN MTO ROW**

4.1 General Requirements

- (a) The requirements in this Article 4 are applicable to the following Roads:
 - (i) Existing Provincial Highway 417 and Highway 416 including all interchange ramps; and,
 - (ii) Existing Municipal Roadways connecting or spanning over Highway 417 within MTO's designated jurisdiction, ("Crossing Roads") including but not limited to:
 - A. Holly Acres Road;
 - B. Richmond Road;
 - C. Pinecrest Road / Greenbank Road;
- (b) DB Co shall not proceed with any Construction Activities on Provincial Highways without an accepted Highway TTMP and Highway TTMP sub-plans applicable to said Construction Activities.
- (c) DB Co shall ensure that there is coordination between the Stage 2 LRT TTMP and the Highway TTMP, as per Article 5 – Implementation Constraints, of Schedule 15-2, Part 1.
- (d) DB Co shall use PVMS for all Closures, Detour Routes and Diversions including ramps and Crossing Roads. PVMS shall be placed at strategic upstream locations to allow motorists the opportunity to divert prior to reaching the Closure, Detour Route or diversion location. The PVMS location shall be submitted to and approved by the City in accordance with Schedule 10 – Review Procedure.
- (e) PVMS placed in support of Highway Works shall be controlled by the OTOC.
- (f) PVMS shall be equipped with modems active on the MTO communications network to allow OTOC to operate. DB Co shall be responsible for modem procurement and activation from the modem supplier at least two weeks prior to requiring the Signs. DB Co shall be responsible for all fees associated with the procurement of the modem including but not limited to activation of service, modem rental and monthly data communication fees.
- (g) DB Co shall provide at least 35 calendar days advance notice to the City for all Closures, Detour Routes, and Diversions.
- (h) Transit facilities on Highway 417 (West Transitway) and interchanges shall remain in service until after West Substantial Completion, and upon notice by the City.

- (i) DB Co failure to abide by the requirements set out in this Article 4 shall result in shutdown of the relevant Works until the requirements have been met.
- (j) DB Co shall maintain a minimum of three through lanes in each direction on Highway 417 at all times, except during Permitted Periods for Closures.

4.2 Restrictions on Construction Operations

- (a) DB Co shall not use construction access/egress, Shoulder Closures or load and unload materials and construction equipment onto and from the traveled portion of Highway 417, Highway 416 and Highway 417/416 interchange ramps on days identified under Clause 1.4 of this Part C, or outside of the Permitted Periods for Closures as detailed in this Part 9.
- (b) Construction operations shall not be carried out during the four hours preceding or three hours after any scheduled events at the [REDACTED]. DB Co shall obtain the schedule of events from the [REDACTED] and schedule work accordingly.
 - (i) Events with fewer than 10,000 attendees, or “all-day” events that do not have a specific peak traffic demand period associated with them are exempted from this requirement.
- (c) Construction operations shall not be carried out during the two hours preceding or two hours after any [REDACTED], or other major events at [REDACTED], as identified by the City. DB Co shall obtain the schedule of [REDACTED] and schedule work accordingly.

4.3 Delivery and Trucking

- (a) DB Co shall plan and schedule the routes of vehicles transporting all Materials to, from or within the Site, so that vehicular movements are accomplished with minimum interference and interruptions to traffic according to the requirements of this Part C, including but not limited to Clauses 4.2, 4.4 and 4.9. This will necessitate vehicles to “slip-off” or “slip-on” in the direction of traffic, in order to merge with and thereby avoid crossing traffic lanes.
- (b) Access to and from the Provincial Highway ROW shall be restricted to ramps at the interchanges unless otherwise provided for in the Project Agreement.
- (c) Median cross-overs shall not be used except where single axle vehicles are entering a passing lane that is closed to traffic.
- (d) DB Co shall obtain the City Representatives’ prior acceptance for the location of any “slip-off” or “slip-ons” through review of the Highway TTMP. The City Representatives reserve the right to alter, reject or close same as considered necessary. DB Co shall notify suppliers of Materials and equipment of the above requirements.

4.4 Permitted Times for Lane and Ramp Closures

- (a) Lane Closures and ramp Closures for construction will only be allowed during the following times, subject to the additional restrictions covered under Clause 1.4 of this Part C – Holidays and Special Events. Any Closures proposed by DB Co outside of the times indicated in this Part C are subject to review and approval by the City in accordance with Schedule 10 – Review Procedure. All Sunday Closures proposed by DB Co are subject to review and approval by the City. Applications for extended Closures by DB Co shall be submitted to the City for approval, supported by traffic analysis. The City may reject applications for Closures at its discretion.
- (b) Weekend Lane Closures
- (i) All weekend Lane Closures shall be subject to the following conditions:
- A. DB Co shall adhere to all traffic timing restrictions identified elsewhere in the Project Agreement, including Holiday Restrictions and Canadian Tire Centre Events and Ottawa Redblacks games.
 - B. The exact weekend Lane Closure dates shall be subject to approval by the City.
 - C. DB Co shall notify the stakeholders and ESP of the Closure(s), as specified elsewhere in the Project Agreement.
- (c) Permitted Lane Closure periods for Provincial Highways are included in Table 4-4.1. Permitted Crossing Road Closure periods for Provincial Highways are included in Table 4-4.2. Permitted ramp Closure periods for Provincial Highways are included in Table 4-4.3.

* Applications for Full Closures are subject to acceptance by the City, as further detailed in Clause 4.4(f) of Part C of this Schedule 15-2, Part 9. No two successive on and/or off ramps shall be closed at the same time.

** All Sunday Closures are subject to acceptance by the City.

*** Apply to two lane ramps only. For single lane ramp Closures, “Full Closure” restrictions apply.

- (d) Full Closure of the ramps at the Highway 417 and Highway 416 interchange shall not be permitted.
- (e) DB Co shall use PVMS for all Closures, Detour Routes and Diversions including ramps and Crossing Roads. For Full Closure of off-ramps DB Co may utilize existing MTO permanent VMS in place of PVMS, subject to approval of the City Representative.
- (f) Applications for all Full Closures are subject to acceptance by the City Representative in accordance with Schedule 10 – Review Procedure. Full Closures may be permitted on a site-specific basis for work such as overhead Sign installation/modification and hydro wire installation/modification between 01:00 and 04:00 and be restricted to 15 consecutive minutes per any one hour period or until the end of the traffic queue passes. DB Co may also apply for an extended Full Closure period between 23:00 and 05:00. Approval for extended Full Closure period is at the sole discretion of the City Representative. Applicable Police Services must be employed to assist all Full Closures and PVMS signage is required. DB Co shall provide supporting rationale, including but not limited to a traffic analysis, as part of an application for any Full Closure, at the request of the City Representative.

4.5 Lane Closures and Full Closures for Queensview Pedestrian Bridge

- (a) DB Co shall be permitted to fully close all lanes of Highway 417 between Pinecrest Road / Greenbank Road and Woodroffe Avenue on a weekend for 17 consecutive hours, from 18:00 hours on the Saturday until 11:00 hours on the Sunday.
- (b) Lane reductions on Highway 417 associated with the full closure shall be permitted to commence at 16:00 hours on the Saturday

- (c) During the full closure period noted above, the following Highway 417 ramps shall be exempt from the restrictions of Clause 4.4 of this Part 9, Part C:
- (i) Pinecrest Road at Highway 417 E-N/S ramp;
 - (ii) Greenbank Road at Highway 417 S-E ramp;
 - (iii) Greenbank Road at Highway 417 N-E ramp;
 - (iv) Woodroffe Avenue at Highway 417 W-N/S ramp; and,
 - (v) Woodroffe Avenue at Highway 417 N/S-W ramp.
- (d) DB Co shall provide advanced notice to the City and MTO as early as possible, or a minimum of 35 Business Days in advance of the scheduled closure. The dates scheduled by DB Co shall be subject to approval by the City and MTO. These closure dates shall not be scheduled during events identified in Clause 4.2 of this Part 9, Part C.

4.6 Early and Late Opening of Lanes and Ramps

- (a) Construction Period Quality Failures deductions shall be applied as detailed in Schedule 21, Part B - Construction Period Failures.

4.7 Closure Notification

- (a) DB Co shall perform the following prior to lane and/or Shoulder Closures:
- (i) Inform the City Representative of any Closure one week prior to the start date of the Closure;
 - (ii) Inform the City Representative of any Closure lasting more than one week at least two weeks prior to the start date of the Closure;
 - (iii) Inform the City Representative and OTOC of Emergency Closures as soon as any details are known;
 - (iv) Obtain a Closure Notification Number from the MTO Representative for each Closure;
 - (v) Submit to the OTOC a completed ROW Form (MTO);
 - (vi) Inform the City Representative and OTOC of any Closure that is being cancelled subsequent to (i) and (ii) above;
 - (vii) Notify the OTOC by phone ([REDACTED]) immediately prior to the set-up of any Closure stating the Closure Notification Number and details of the Closure;

- (viii) Notify the OTOC immediately of any changes to the Closure or anticipated problems that may delay the opening time, stating the Closure Notification Number and details of the changes to and/or problems with the Closure; and,
- (ix) Notify the OTOC immediately upon removing the Closure stating the Closure Notification Number and details of the Closure.

4.8 Lane and Ramp Closures by OPP Officers (Paid Duty)

- (a) DB Co shall incorporate OPP assistance into all lane and ramp Closures. DB Co shall be responsible to arrange for the OPP-assisted Lane Closures.

4.9 Construction on or Adjacent to Highway 417 and Highway 416

- (a) The supply and placement of all traffic control required by the MTO shall be performed by DB Co in accordance with the Ontario Traffic Manual Book 7, latest edition (and enhancements to staging and traffic control where it cannot be achieved), where construction is being performed on or adjacent to Highway 417 and 416 or its ramps. This requirement is in addition to the MTO's requirement for deployment of PVMS.
- (b) DB Co shall follow the requirements of the City's Special Provision – General D-001, in addition to MTO requirements for construction on or adjacent to Highway 417 and 416.
- (c) Traffic Signal Construction Start-Up Meeting
 - (i) DB Co shall arrange a start-up meeting to confirm the protocol for the traffic signals at all affected intersections. The meeting shall also be used to confirm communication protocols with the MTO, DB Co, and the City of Ottawa Traffic Operations for dealing with traffic signal timing changes if required during construction. DB Co shall create a contact list and distribute it to all parties involved for any non-routine and/or emergency repairs to the traffic signals.
 - (ii) DB Co shall invite MTO Regional Traffic Office, MTO Electrical Coordinator, and City of Ottawa Traffic Operations to attend this meeting.
- (d) Advanced Notice of Work
 - (i) DB Co shall provide a minimum of 30 Business Days advance notice to the City of all Highway Works that may impact the traffic signals, unless a signal design is required, in which case DB Co shall abide by the requirements set out in Schedule 15-2, Part 9, Part B, Article 6.
- (e) Access to the Traffic Signal Controller Cabinets
 - (i) For any Emergency Works at any of the impacted traffic control signals, DB Co shall coordinate with the City of Ottawa Traffic Operations:

City of Ottawa
Transportation Services Department
Program Manager, Signal Installation and Field Program (or the individual responsible for this function)

4.10 Transitway Detours

- (a) As specified elsewhere in this Project Agreement, a Transitway detour will be required when the Western Transitway is taken out of service during this Project as part of the West Works. The following requirements shall apply to DB Co's Highway TTMP, and the submission in accordance with Schedule 10 – Review Procedure:
 - (i) DB Co shall be responsible for the design and coordination of the Highway 417 transit detour segments to the satisfaction and acceptance of the City.
- (b) DB Co shall not implement any new dedicated bus lanes on Highway 417.
- (c) Per Schedule 15-2, Part 9, Part B Clause 1.3 and Schedule 15-2, Part 7, Clause 3.12, DB Co shall add a third eastbound left turn lane (for transit only) to the W-N/S ramp at Greenbank, if such an added lane is found to provide a travel time benefit to eastbound buses while they are on detour. This lane, if built, shall be removed as part of the Remaining Works.
- (d) Per Schedule 15-2, Part 9, Part B Clause 1.3 and Schedule 15-2, Part 7, Clause 3.12, DB Co shall design and construct a temporary bus-only N/S-E on ramp from Holly Acres to Highway 417, in conjunction with the long term temporary closure of the Richmond Road N-E ramp. The temporary N/S-E on ramp at Holly Acres shall be closed and the Richmond Road N-E ramp shall be reopened as Remaining Works.

4.11 MTO Encroachment Permits

- (a) DB Co shall obtain MTO Encroachment Permits prior to working within the Highway 417 and Highway 416 ROW or on any Roads adjacent to Highway 417 within MTO's designated jurisdiction. DB Co shall provide the City with copies of the approved MTO Encroachment Permits immediately upon receipt of same.

4.12 Moodie Drive and Interchange Ramps Traffic Conditions

- (a) The following constraints shall be followed within the Moodie Drive corridor:
 - (i) DB Co shall ensure all northbound lanes on Moodie Drive are open and available for vehicles, transit services, Emergency services, pedestrians, cyclists during the following times:
 - A. weekdays between 6:00 and 9:30 hrs.

- (ii) DB Co shall ensure all southbound lanes on Moodie Drive are open and available for vehicles, transit services, Emergency services, pedestrians, cyclists during the following times:
 - A. weekdays between 15:00 and 18:30 hrs.
- (iii) DB Co shall ensure that a minimum of one lane in each direction on Moodie Drive shall remain open at all times, in addition to any auxiliary lanes at intersections
- (iv) Uninterrupted access to and from all Highway 417 ramps shall be maintained at all times, except for MTO authorized ramp closure times obtained in accordance with the provisions of this Part 9.
 - A. DB Co shall be permitted to close the S-W ramp for the purposes of constructing the grade separation for the Confederation Line for a period not exceeding one construction season. This closure shall require public notification in accordance with Article 5 of Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access, and shall be supported by a traffic analysis. Detour signage shall be provided as required.
- (v) The conditions in items (i) and (ii) above permit that DB Co use a three-lane cross section, with a center lane that changes direction. Should it not be possible to achieve this staging concept while remaining compliant with OTM Book 7, DB Co shall use decking to maintain a four-lane cross section.

ARTICLE 5 HIGHWAY TRAFFIC AND TRANSIT MANAGEMENT PLAN

5.1 General Requirements

- (a) DB Co shall submit a separate Highway TTMP for the Highway Works.
- (b) DB Co shall submit an initial Highway TTMP to the City in accordance with Schedule 10 – Review Procedure no later than 60 calendar days following Financial Close, and at least 45 calendar days in advance of the start of any Construction Activity, and in accordance with the requirements of this Part C. Following the acceptance of the initial Highway TTMP by the City, DB Co shall submit all subsequent proposed changes to the Highway TTMP to the City Representatives in accordance with Schedule 10 – Review Procedure. As a minimum, the initial Highway TTMP shall be updated and submitted on an annual basis in accordance with Schedule 10 – Review Procedure. The Highway TTMP shall not be considered complete for the purpose of initiating Construction Activities until all comments (as described in Article 4 of Schedule 10 – Review Procedure) have been resolved and addressed by DB Co.
- (c) The Highway TTMP shall outline how public traffic, transit, pedestrians, and cyclists as well as the traffic generated by Construction Activities, is to be managed. It shall include all aspects of traffic management as set out in this Part C, as well as any traffic management related matters which may arise as a result of the execution of any aspect of the Highway Works. The Highway TTMP shall include a Traffic Management Study, as per the requirements of Clause 1.2 of this Part C.
- (d) The Highway TTMP and all updates thereto shall be consistent with and comply with all of the requirements set forth in this Part C and all other relevant provisions of this Project Agreement (including reference and interface with DB Co Traffic Management Auditing as described in Schedule 11 – Integrated Management Systems), the OTM, and City of Ottawa and MTO Standards, Operation Policies, Procedures and Guidelines.
- (e) Each submission of the Highway TTMP or Highway TTMP sub-plans shall be stamped by DB Co's designated Traffic Engineer, and signed off by DB Co's designated Traffic Manager, both of whom shall be as identified in Clause 5.3 – DB Co Responsibilities of this Part C.
- (f) The Highway TTMP and all updates thereto shall include a traffic schedule which shall be adapted from the Project Schedule. The traffic schedule shall show start and finish dates for all the information pertinent to traffic management for the Highway Works, such as but not limited to, detours and Diversions, and relevant submissions.
- (g) The Highway TTMP shall show proof of constructability in terms of schedule (traffic schedule versus Project Schedule), and, in terms of onsite Construction Activities and physical work area requirements versus spatial accommodations for Highway TTMP and Highway TTMP sub-plan traffic management requirements.
- (h) DB Co's Highway TTMP shall consider all direct and indirect impacts relating to the construction that pertain to the existing operations of the City and the street network

within, and include impacts on all road users, pedestrians, cyclists, transit vehicles, and private vehicles of all types.

- (i) DB Co's Highway TTMP shall reference and interface with DB Co's Traffic Management Auditing as described in Schedule 11 – Integrated Management System, DB Co's Highway Emergency Traffic Plan as described in this Part C, the OTM, and City of Ottawa and MTO Standards, Operation Policy and Procedures.
- (j) DB Co's updates to the Highway TTMP shall be prepared and submitted in accordance with Schedule 10 – Review Procedure for any and all Project activities which may result in changes to the traffic management strategies set out in the Highway TTMP. The initial Highway TTMP shall be updated and submitted on an annual basis in accordance with Schedule 10 – Review Procedure
- (k) DB Co shall not conduct any Construction Activity that affects traffic without a signed and sealed Highway TTMP that is current to the activities on Site, and has been accepted by the City.
- (l) DB Co's Highway TTMP shall comply with the definitions and guidelines provided in the OTM and City of Ottawa and MTO Standards, Operation Policy, Procedures and Guidelines.
- (m) DB Co shall prepare detailed Highway TCPs complete with traffic control layout drawings and fully integrated with the approved Project Schedule, outlining the provision of all forms of traffic control required throughout the duration of the Project. The plans shall be consistent with the Highway TTMP and submitted in accordance with Schedule 10 – Review Procedure.
- (n) DB Co shall prepare drawings that address stage-specific activities and requirements for each stage of the Highway Works that affects traffic. These drawings shall accompany the Highway TTMP submissions in accordance with Schedule 10 – Review Procedure.
- (o) The Highway TTMP shall provide detailed drawings for project-related designated truck access and egress points, the applicable haul and heavy vehicle routes through the City and applicable staging areas. The drawings shall be consistent with the Highway TTMP and submitted in accordance with Schedule 10 – Review Procedure. As a minimum the designated truck route drawings shall be updated and submitted on a quarterly basis in accordance with Schedule 10 – Review Procedure. The City may, at its discretion, require that DB Co's site, where contiguous with an active construction site, be utilized for haul and heavy vehicle routes in order to reach the City's truck route network in a manner acceptable to the City.
- (p) DB Co shall be responsible for providing, installing and maintaining all TCDs and protective devices identified in the approved Highway TTMP.
- (q) The following Highway TTMP sub-plans for DB Co's Highway TTMP are required and shall be submitted in accordance with Schedule 10 – Review Procedure. The Highway TTMP sub-plans shall be:

- (i) Highway Traffic Control Plan;
- (ii) Highway Emergency Traffic Plan;
- (iii) Highway Traffic Incident Management Plan;
- (iv) Highway Traffic Management Implementation Plan;
- (v) Highway Traffic Advisory Temporary Signage Plan;
- (vi) Highway Traffic Risk Assessment Plan;
- (vii) Highway Traffic and Transit Management Communications Plan; and,
- (viii) Highway Traffic Monitoring Plan.

5.2 Highway Traffic and Transit Management Sub-Plans

(a) Highway Traffic Control Plans

- (i) DB Co shall prepare and submit Project specific Highway TCPs in accordance with Schedule 10 – Review Procedure. The Highway TCPs shall be prepared in accordance with the OTM, City of Ottawa and MTO Standards, policies, procedures and guidelines and other Reference Documents for all activities that affect traffic operations, and shall include the following:
 - A. Start and completion dates of Highway Work;
 - B. Hours of work and also indicate if there is a requirement to work during peak hours;
 - C. Work zone locations and direction and distance to nearest landmarks and survey stations;
 - D. Size of the work zone;
 - E. Lanes affected by the Highway Works;
 - F. Lane configuration in the work zone;
 - G. Confirmation of whether accesses or intersections will be affected by the work zone or by TCD;
 - H. Traffic volume capacity during Highway Works;
 - I. Proposed delays or Closure times;
 - J. Show that local traffic access is maintained;

- K. 1:500 Scale drawing(s) prepared in CADD and submitted in PDF identifying:
- i. The location of the work zone using landmarks, survey stations and LKI where applicable;
 - ii. Accesses or intersections affected by the work zone or by TCDs;
 - iii. Traveled lanes affected;
 - iv. Resultant lane configuration including widths;
 - v. Location of restricted width lanes;
 - vi. Required Closures;
 - vii. Lane use requirements;
 - viii. Posted speeds;
 - ix. Requirements for road closure;
 - x. Any bus routes and bus stops affected by work activity;
 - xi. Traffic and transit routing and detour requirements;
 - xii. Location of Hazardous areas created by road geometry or local geography;
 - xiii. Any local roads used for a Detour Route;
 - xiv. The design speed and the design vehicle for each road used as a Detour Route;
 - xv. Any traffic signal changes required by the Detour Route or Project Works;
 - xvi. Any signing impacted by the Highway Work; and,
 - xvii. Location of construction accesses, and safety provisions applied in instances where a construction access crosses a sidewalk, pathway, MUP or cycling facility.
- L. Should DB Co adopt a Traffic Control layout exactly as shown in OTM Book 7 with no changes, DB Co shall provide a reference to the OTM Book 7 layout. Where enhancements to OTM Book 7 are required and/or for any deviations to OTM Book 7, DB Co shall submit to the City for review and acceptance, in accordance with Schedule 10 – Review Procedure, a custom Traffic Control layout as described in (ii) below;

- M. Be sealed by a Professional Engineer; and,
 - N. Include a summary description of the public notification undertaken wherein the subject matter of this specific Highway TCP is mentioned.
- (ii) Custom Traffic Control layouts shall:
- A. Be designed in CADD Format AutoCAD 2015 dwg, Nad83, in a scale 1:250; composite drawings can be in 1:500 scale and also submitted in PDF;
 - B. Provide signed and sealed custom Traffic Control layouts;
 - C. Show schematically the placement of all TCDs;
 - D. Place all TCDs in accordance with the standards contained in the OTM;
 - E. Follow symbol conventions for identifying TCDs as per the OTM;
 - F. Show on the drawings the locations and details of all Signs, PVMS, Pavement Markings, Barriers, and protective works;
 - G. Have all dimensions and explanatory notes on the drawing; and,
 - H. Show traffic operations at all phases of the Project.
- (iii) DB Co shall document any proposed DB Co-initiated Closures, Full Closures, Detour Routes, Lane Shifts and Diversions in the Highway TCP. The Highway TCP shall be updated and amended as required such that it is current at all times with respect to the existing and proposed Traffic Control measures in the field.
- (iv) DB Co shall conduct traffic analysis including modelling on the Highway TCP for each construction stage and construction where traffic operations are affected. The traffic analysis shall determine the effect of each Highway TCP on the capacity and operation, including the resulting vehicle delays, queue lengths, and traffic signal timing. The analysis shall confirm that the resulting queues are expected to clear before the commencement of a Restricted Period. The traffic analysis shall be conducted for the representative hour(s) and day(s) that each Highway TCP is in operation. The analysis and the results and recommendations shall be provided to the City in accordance with Schedule 10 – Review Procedure.
- (v) DB Co shall be responsible for including construction generated traffic in the Highway TCP and any associated analysis such as but not limited to the potential for conflict between construction generated traffic and pedestrian and cyclist movements.
- (vi) DB Co shall continuously measure the effectiveness of Highway TCPs and, if those measurements indicate a Highway TCP is non-compliant with the OTM,

accepted Highway TCPs and other Reference Documents, DB Co shall immediately adjust the Highway TCP to bring it into compliance.

- (vii) Auxiliary lane lengths at existing signalized intersections shall not be reduced unless analysis confirms operation is acceptable to the City Representative.
- (viii) DB Co shall not reduce the acceleration/deceleration lane lengths unless analysis confirms operation is acceptable to the City Representative
- (ix) DB Co shall implement the accepted Highway TCPs and accepted revisions thereto.

(b) Highway Emergency Traffic Plan

- (i) DB Co shall prepare and submit a Highway Emergency Traffic Plan in accordance with Schedule 10 – Review Procedure. The Highway Emergency Traffic Plan shall specify how DB Co shall facilitate access for Emergency vehicles to and through affected sites. DB Co shall consult with local municipalities and Emergency Service Providers (ESP) in developing the Highway Emergency Traffic Plan, and liaise closely with them throughout the design and construction as it evaluates and updates the plan on an annual basis, or, whenever there is a change in the site conditions which materially alters the ability to execute the accepted Highway Emergency Traffic Plan.
- (ii) DB Co shall provide specific scenarios for Emergency vehicle access to and through the Site for each of the cases identified in the Highway Traffic Incident Management Plan and the Highway Traffic Risk Assessment Plan.
- (iii) DB Co shall implement the accepted Highway Emergency Traffic Plan and accepted revisions thereto.
- (iv) DB Co shall update the plan such that the information therein is kept current with the upcoming and ongoing Construction Activities. DB Co shall submit the updated plan for review/acceptance in accordance with Schedule 10 – Review Procedure.
- (v) DB Co shall notify Emergency Service Providers, at least two weeks in advance of the start of Highway Works construction, regarding the construction schedule, and if any changes to traffic flow are anticipated.
- (vi) DB Co shall not commence any work on Site without an applicable current accepted Highway Emergency Traffic Plan.

(c) Highway Traffic Incident Management Plan

- (i) DB Co shall prepare and submit a Highway TIMP in accordance with Schedule 10 – Review Procedure. It shall be in accordance with the MTO and City of Ottawa's Emergency Management Plan. The Highway TIMP shall include a

process flow chart which covers but is not limited to occurrence of the Incident, nature and timing of notifications to partner agencies, names and coordinates of contacts, actions to Address the Incident, post Incident review of process, and revisions thereto to the Highway TIMP as appropriate. The primary objectives are to support the City in facilitating Incident response and moving traffic safely and expeditiously around the Incident. The plan shall specify how DB Co will provide access for Emergency vehicles and assistance to Emergency Service Providers (ESP), and how DB Co shall work with the MTO and the City's Traffic Incident Management Group in responding to the Incident.

- (ii) A traffic Incident includes, but is not limited to, any of the following occurrences on or adjacent to a construction Site or Detour Route:
 - A. Motor vehicle accidents;
 - B. Pedestrian and cycling accidents;
 - C. Emergency road repairs;
 - D. Emergency utility repairs;
 - E. Emergency road closures for fire, gas leak, etc.;
 - F. Disabled vehicles; and,
 - G. Debris on the road.
- (iii) DB Co's Highway TIMP shall:
 - A. Work closely and effectively deal with major Incidents with partner agencies including City, OPS, OC Transpo, STO, RCMP, OPP, MTO, City of Gatineau, Sureté du Québec, and the Ministry of Transportation of Québec;
 - i. These efforts shall include the provision of temporary TCD and/or OPP/OPS in the vicinity of DB Co's construction sites or Detour Routes as requested by the MTO and City's Traffic Incident Management Group.
 - B. Coordinate with MTO and/or the City of Ottawa Office of Emergency Management the communications to the public regarding the impacts to the road network of the Incident, via the City, media, and VMSs, and in accordance with established communication protocols; and,
 - C. Define a process to review Incidents and propose modifications to Highway Works that shall reduce the severity and frequency of incidents.

- (iv) DB Co shall document all Incidents, including but not limited to, date location, details of the Incident, comments of the Incident reporter, actions taken, partner agency and agency representatives contacted, follow-up action recommended to be taken and by whom, signed and dated. A copy of the document shall be given to the City within one Business Day of the occurrence of the Incident.
 - (v) DB Co shall implement the accepted Highway TIMP and accepted revisions thereto.
 - (vi) DB Co shall update the plan such that the information therein is kept current with the upcoming and ongoing Construction Activities. DB Co shall submit the updated plan for review/acceptance in accordance with Schedule 10 – Review Procedure.
 - (vii) DB Co shall not commence any work on Site without an applicable current accepted Highway TIMP.
- (d) Highway Traffic Management Implementation Plan
 - (i) DB Co shall prepare and submit a Highway TMIP in accordance with Schedule 10 – Review Procedure. The Highway TMIP shall identify the Traffic Control Supervisor, Traffic Engineer, and Traffic Manager, along with the qualifications and experience of those named individuals demonstrating they meet the qualifications and experience identified in this Part C.
 - (ii) The Highway TMIP shall define processes to ensure that the Highway TTMP and each of the individual Highway TTMP sub-plans are developed and implemented efficiently and appropriately, and that they are kept up-to-date with necessary modifications during the Project. In addition, the processes shall be set out in flow charts, one for the Highway TTMP and one for each of the sub-plans, with an accompanying explanation provided to describe the activities represented by each box in each of the flow charts.
 - (iii) DB Co shall implement the accepted Highway TMIP and accepted revisions thereto.
 - (iv) DB Co shall update the plan such that the information therein is kept current with the upcoming and ongoing Construction Activities. DB Co shall submit the updated plan for review/acceptance in accordance with Schedule 10 – Review Procedure.
 - (v) DB Co shall not commence any work on Site without an applicable current accepted Highway TMIP.
- (e) Highway Traffic Advisory Temporary Signage Plan
 - (i) DB Co shall prepare and submit a Highway Traffic Advisory Temporary Signage Plan in accordance with Schedule 10 – Review Procedure. The primary objective

of the Plan is to notify the City and other stakeholders in advance of scheduled Construction Activities, Closures, Full Closures, Detour Routes, Lane Shifts, and Diversions.

- (ii) The Highway Traffic Advisory Temporary Signage Plan shall be prepared in accordance with the requirements set out in Clause 8.3 of Part B of Schedule 15-2, Part 9.
 - (iii) The DB Co shall update the plan such that the information therein is kept current with the upcoming and ongoing Construction Activities. DB Co shall submit the updated plan for review/acceptance in accordance with Schedule 10 – Review Procedure.
 - (iv) DB Co shall implement the accepted Highway Traffic Advisory Temporary Signage Plan and accepted revisions thereto.
 - (v) DB Co shall not commence any work on Site without an applicable current accepted Highway Traffic Advisory Temporary Signage Plan.
- (f) Highway Traffic Risk Assessment Plan
 - (i) DB Co shall prepare and submit a Highway Traffic Risk Assessment Plan in accordance with Schedule 10- Review Procedure. DB Co shall identify all risks which may have an impact on traffic and state the measures to be implemented to manage, reduce, or eliminate the risks.
 - (ii) DB Co shall perform an independent assessment to identify any risks that could have an impact on traffic management or special conditions that shall be Addressed through DB Co’s Highway Traffic Risk Assessment Plan.
 - (iii) DB Co shall update the plan such that the information therein is kept current with the upcoming and ongoing Construction Activities. DB Co shall submit the updated plan for review/acceptance in accordance with Schedule 10 – Review Procedure.
 - (iv) DB Co shall implement the accepted Highway Traffic Risk Assessment Plan and accepted revisions thereto.
 - (v) DB Co shall not commence any work on Site without an applicable current accepted Highway Traffic Risk Assessment Plan.
- (g) Highway Traffic and Transit Management Communications Plan
 - (i) DB Co shall prepare and submit a Highway Traffic and Transit Management Communications Plan in accordance with Schedule 10 – Review Procedure. It shall describe clearly how DB Co shall communicate to the City and other stakeholders about all matters relating to traffic flow, including specifically, how

it shall provide Timely notice of construction related delays, Closures, detours, traffic Incidents, and emergencies.

- (ii) DB Co shall craft the Highway Traffic and Transit Management Communications Plan to show how DB Co shall incorporate and carry out each of the requirements set out in Clause 1.12 of this Part C.
- (iii) DB Co shall implement the Highway Traffic and Transit Management Communications Plan to apply throughout the Project Term.
- (iv) DB Co shall ensure that the plan is maintained current as related to the activities on Site. DB Co shall submit the updated plan for review/acceptance in accordance with Schedule 10 – Review Procedure.
- (v) DB Co shall not commence any work or Site preparations for same without an accepted Highway Traffic and Transit Management Communications Plan.
- (vi) DB Co shall consult with the City to identify the major user groups affected by the Project. Major user groups may include, but are not limited to, the following:
 - A. Emergency and police services;
 - B. Transit operating companies;
 - C. Motorists;
 - D. Cyclists;
 - E. Pedestrians;
 - F. Transport and tour bus companies;
 - G. Taxi and limousine companies;
 - H. Ontario Trucking Association;
 - I. MTO;
 - J. NCC;
 - K. PSPC;
 - L. Property owners and businesses;
 - M. Community organizers; and,
 - N. Special event organizers.

- (vii) DB Co shall develop and document a process which shall be integrated with the City's communication procedures for traffic management (such as the City Traffic Report and Public Service Announcements and the MTO COMPASS) to keep major user groups informed of planned traffic pattern changes, including, but not limited to the following: hauling and truck routes, transit impacts, detours, Lane Shifts, Lane Closures, sidewalk/MUP Closures, access restrictions, schedule changes, and other Traffic Control procedures. Procedures for disseminating information related to unplanned traffic pattern changes shall be Addressed in the Highway Traffic Incident Management Plan. DB Co shall ensure that this process is acceptable to the Governmental Authorities.
 - (viii) All public inquiries or complaints that DB Co receives shall be documented and handled immediately in the field and forwarded simultaneously to the City, 24-hours a day, seven days a week.
- (h) Highway Traffic Monitoring Plan
 - (i) DB Co shall prepare and submit a Highway Traffic Monitoring Plan for any long- term Lane Closure on Municipal Roadways (Crossing Roads) and for each construction stage on Highway 417, in accordance with Schedule 10 – Review Procedure.
 - (ii) The Highway Traffic Monitoring Plan shall include as a minimum travel time surveys, queue and delays and intersection operational performance within the impacted Highway network.
 - (iii) Monitoring shall be performed in advance of and during each stage or Closure.
 - (iv) In field monitoring shall occur one week after stage or Closure implementation and every four weeks thereafter for the duration of the work.
 - (v) DB Co shall submit the monitoring results to the City in accordance with the Review Procedure and provide recommendations to minimize impacts to traffic.

5.3 DB Co Responsibilities

- (a) DB Co shall accept full responsibility for quality control and quality assurance of all activities affecting the Highway TTMP. The Highway TTMP quality control process shall be included in the Highway Traffic and Transit Management Plan. DB Co shall ensure that all personnel identified in the Highway TTMP are suitably qualified and licensed.
- (b) Traffic Manager
 - (i) DB Co shall designate a Traffic Manager who shall be responsible for the following:
 - A. Development, implementation, and management of the TTMP;

- B. Ensuring the City Representative is kept informed of all upcoming traffic activities and any revisions to the Highway TTMP;
 - C. Ensuring that appropriate modifications are made to the Highway TTMP if the specified Traffic Control measures are not achieving the requirements;
 - D. Coordinating with persons carrying out work in areas adjacent to the Project;
 - E. Co-chairing with the City the Traffic Management Committee;
 - F. Ensuring the timing and organized delivery of public and stakeholder communication information;
 - G. Participating as DB Co's representative in coordinating with the City's Traffic Demand Management program and the Traffic Incident Management Group; and,
 - H. Sign-off of each and every Highway TTMP and Highway TTMP sub-plan prior to their submission to the City.
- (ii) The Traffic Manager shall be a Professional Engineer with the following qualifications:
- A. 20 years of experience overall in the traffic engineering field;
 - B. 10 years of experience specifically related to traffic management and construction staging during construction; and,
 - C. Experience in design/build type projects where Roads and/or Highways were constructed within an existing urban area.
- (c) Traffic Engineer
- (i) DB Co shall designate a Traffic Engineer who is a Professional Engineer and has DB Co's authority to review, and shall seal, the Highway TTMP and associated sub-plans and take responsibility for ensuring that all traffic engineering issues and requirements are taken into account.
 - (ii) The Traffic Engineer shall attend the Project's regularly scheduled Traffic Management Committee meetings and be the Project's representative at the City's Traffic Control Centre when required.
 - (iii) The Traffic Engineer shall Oversee and direct record keeping, reporting and accounting of temporary and permanent traffic signal installations.
 - (iv) The Traffic Engineer shall ensure all traffic signal notification timelines as detailed in this Part C are met.

- (v) The Traffic Engineer shall have the following qualifications:
 - A. 15 years of experience overall in the traffic engineering field.
 - B. 10 years of experience specifically related to traffic modeling, intersection design, construction staging, and installation of traffic signal infrastructure.
 - C. Experience in design/build type projects where Roads and/or Highways were constructed within an existing urban area.
- (d) Traffic Control Supervisors
 - (i) DB Co shall designate Traffic Control Supervisors, each of whom shall have DB Co's authority to respond to Traffic Control requirements, and each of whom shall personally perform all the duties of the Traffic Control Supervisor, in accordance with this Part C.
 - (ii) A Traffic Control Supervisor shall be on the Site full-time when Construction Activities are underway.
 - (iii) The duties of the Traffic Control Supervisor shall include but not be limited to the following:
 - A. Directing all Traffic Control operations for construction;
 - B. The Traffic Control Supervisor shall have direct line authority over all of DB Co's Traffic Control Personnel and procedures on the Site;
 - C. Liaising with the City Representative, OC Transpo, and MTO, as required;
 - D. Monitoring queue lengths in active work zones and implementing appropriate measures when such queues affect the operation and safety of Provincial Highways, Municipal Roadways, and other municipal Roads, and providing the City with documentation outlining the date, location, queue lengths, and measures taken;
 - E. Monitoring, and recording on a daily basis, the transit travel times through work zones and Detour Routes, at a frequency and duration sufficient to identify operational performance issues. Coordinate with OC Transpo ahead of time to establish "geofence" points in the system before measurements are to take place in order to facilitate the collection of Accurate date, route, time, and location data. Document and evaluate the transit travel times versus the forecast times established in the Highway TTMP submissions. Identify operational performance issues and the DB Co recommended mitigation measures immediately to the City. Provide a copy of the record, issues, and mitigation measures to the City daily. Prepare and submit to the City on a monthly basis, in accordance with

Schedule 10 – Review Procedure, a monthly summary report of the daily reports. Report the operational performance issues and their resolution at the next Traffic Management Committee meeting and record same in the notes of the meeting;

- F. Respond to traffic related Incidents resulting from construction and traffic management activities. All major Incidents shall be documented within one Business Day of the Incident and provided to the City per Clause 5.2 (c) – Highway Traffic Incident Management Plan, of this Part C;
- G. Documenting Traffic Control measures and activities in accordance with this Part C and producing a Daily Lane Closure Report as set out in Appendix B;
- H. Documenting Site instructions and items noted on daily (site) reports which pertain to or affect traffic control, and updating the Highway Traffic Control Plans immediately to reflect the changes on Site, and then promptly submitting the revised plans to the City in accordance with Schedule 10 - Review Procedure, as updates to the Highway TTMP and applicable Highway TTMP sub-plans;
- I. Overseeing all requirements that contribute to the safety, convenience, and orderly movement of vehicular, cycling and pedestrian traffic;
- J. Attending the Project’s regularly scheduled traffic management meetings; and,
- K. Traffic Control supervision shall be provided by Traffic Control Supervisors on the Site on a 24 hour per day basis when Construction Activities are underway. During non-work periods, the Traffic Control Supervisor or accepted alternate shall be on the Site within 30 minutes of being notified. The Traffic Control Supervisors shall have appropriate personnel and equipment available on call, at all times.
- L. Carry out daily drive-by inspections as detailed in Appendix G.

(e) Traffic Control Personnel

- (i) All Traffic Control Personnel shall be qualified in accordance with the OHSA/CCOHS and the regulations thereunder.

(f) Traffic Management Committee

- (i) DB Co shall be responsible for forming a Traffic Management Committee that shall be comprised of DB Co, City, OC Transpo, MTO and representatives of Governmental Authorities that shall meet on a weekly basis.

- (ii) The purpose of this committee shall be to coordinate, plan, and take action with respect to current and future traffic and transit impacts that may be caused by the Highway Works.

Appendix A

1. Road Safety Audit Certificate (Stage 1)
2. Road Safety Audit Certificate (Stage 2)
3. Road Safety Audit Certificate (Stage 4)

Certificate Ref No. []

ROAD SAFETY AUDIT CERTIFICATE (STAGE 1)

This Certificate is being delivered pursuant to the agreement between City and [DB Co] dated • (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this Certificate have the same meanings as ascribed thereto in the Project Agreement.

Form of Certificate to be used by the designer for certifying that a Stage 1 Road Safety Audit has been carried out in accordance with Article 10 of Part 9 of Schedule 15-2.

1. We certify that the Pre-Final Design Development of [.....] has been the subject of a Stage 1 Road Safety Audit in accordance with Article 10 of Part 9 of Schedule 15-2, the Design Management Plan and all other relevant provisions of the Project Agreement.

2. The Road Safety Audit Team’s report and statement certifying the audit has been carried out are attached.

Signed:

Road Safety Audit Team (Principal)

Name:

Title:

Date:

Professional Registration Number:

Affix Professional Seal

3. We certify that the Pre-Final Design Development of [.....] has been the subject of a Stage 1 Road Safety Audit in accordance with Article 10 of Part 9 of Schedule 15-2, the Design Management Plan and all other relevant provisions of the Project Agreement and that all observations and recommendations in the Road Safety Audit Team’s report have been satisfactorily addressed and resolved.

ROAD SAFETY AUDIT CERTIFICATE (STAGE 2)

This Certificate is being delivered pursuant to the agreement between City and [DB Co] dated • (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this Certificate have the same meanings as ascribed thereto in the Project Agreement.

Form of Certificate to be used by the designer for certifying that a Stage 2 Road Safety Audit has been carried out in accordance with Article 10 of Part 9 of Schedule 15-2.

1. We certify that the Final Design Development of [.....] has been the subject of a Stage 2 Road Safety Audit in accordance with Article 10 of Part 9 of Schedule 15-2, the Design Management Plan and all other relevant provisions of the Project Agreement.

2. The Road Safety Audit Team’s report and statement certifying the audit has been carried out are attached.

Signed:

Road Safety Audit Team (Principal)

ROAD SAFETY AUDIT CERTIFICATE (STAGE 4)

This Certificate is being delivered pursuant to the agreement between City and [DB Co] dated • (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this Certificate have the same meanings as ascribed thereto in the Project Agreement.

Form of Certificate to be used by the designer for certifying that a Stage 4 Road Safety Audit has been carried out in accordance with Article 10 of Part 9 of Schedule 15-2.

1. We certify that the [reference relevant works] as constructed, tested and commissioned has been the subject of a Stage 4 Road Safety Audit in accordance with Article 10 of Part 9 of Schedule 15-2, the Design Management Plan and all other relevant provisions of the Project Agreement.

2. The Road Safety Audit Team’s report and statement certifying the audit has been carried out are attached.

Appendix B

Daily Lane Closure Report

- a) DB Co shall create a Daily Lane Closure Report for each Lane Closure on the Project. The purpose is to document the status of all of the various Lane Closures for all modes of transportation throughout the Project. The Daily Lane Closure Report may be either a hard copy document or an electronic form in a format compatible with City systems.
- b) The Daily Lane Closure Report shall be a field sheet format. The header of the document shall include but not be limited to headings for the Project Segment and number, date, day of week, location, time of the observations, name of observer, the signature of the observer, and whether the Lane Closure is a General Traffic Lane Closure, or a BRT Lane Closure.
- c) Each day (weekdays and weekends, and statutory and civic holidays), DB Co shall carryout Site inspections, in person or via electronic surveillance, with a focus on both the temporary and long-term Lane Closures in effect for both general traffic and BRT vehicles throughout the entire Project. The data shall be recorded on the Daily Lane Closure Report, the original of which shall be retained by DB Co until the Project warranty period is complete.
- d) In instances where Lane Closures change during the day (or night), DB Co shall carry out Site confirmation of the Lane Closures relevant to the changes at the start and end of each change-over of the Lane Closures and record the inspection on a Daily Lane Closure Report. The observations shall be taken at a frequency so as to confirm with an accuracy of +/- five minutes, the actual start and end times for each of the temporary Lane Closures.
- e) Each day, DB Co shall review the information recorded on the Daily Lane Closure Reports, and assess the execution of the Lane Closures, noting instances where the timing of the Lane Closure implementation/removal is not meeting the expectations of the Highway TTMP and Highway TTMP sub-plans, and identify the remedial action required such that the expectations for Lane Closures as set out in the Highway TTMP and Highway TTMP sub-plans shall be met.
- f) DB Co shall take immediate action to effect the requisite remedial measures needed in order to attend to the noted matters. DB Co shall document in the Daily Lane Closure Report the issue, the remedy and the action taken.
- g) DB Co shall continue to inspect a matter of traffic management concern until the issue is resolved.
- h) Each day, copies of the current Daily Lane Closure Report shall be forwarded by DB Co to the City, and to the Lead Traffic and Mobility.
- i) DB Co shall produce a Monthly Summary of the Daily Lane Closure Reports, noting the number of issues identified, the location and nature of the issues, the remedies for the issues, the actions taken and the results achieved. Trends in issues shall be identified, remedies for the trends ascertained, and remedial action implemented. All of this information shall be

documented in the Monthly Summary of the Daily Lane Closure Reports, and a copy of the summary shall be brought to the weekly Traffic Management Committee meeting for review and discussion, with copy to the City and the Lead Traffic and Mobility.

- j) The Daily Lane Closure Reports shall include, but not be limited to, observations taken during personal Site visits and/or via electronic/camera surveillance, carried out by a DB Co designated Traffic Control Supervisor, with respect to each of the following topics of lane closure information as relates to and in accordance with the current accepted Highway TTMP and current accepted Highway TTMP sub-plans.
- Lane closure required (Yes/no);
 - Planned lane closure (yes/no);
 - Scheduled lane closure time (Military Time – 24 hr clock);
 - Scheduled lane opening time (Military Time);
 - Actual lane closure time (Military Time);
 - Actual lane opening time (Military Time);
 - Period of the day (peak, off-peak, night, weekend, holiday);
 - Lane description:
 - A. Street name;
 - B. Direction of traffic flow;
 - C. Name of upstream cross street;
 - D. Name of downstream cross street;
 - E. Number of lanes closed;
 - F. No of blocks lane(s) is closed; and,
 - G. Lanes closed – Right turn, Through and right turn, Right through, Left through, through and left turn, left turn
 - Comments/other observations;
 - Equivalent lane closure hours for current observation;
 - Location Map to scale showing relevant lane configuration with closed lane(s) shown as hatched area;
 - Checked by (print name then signature); and,
 - Signed off by (print name then signature).

Appendix E

Road Intersection Minimum Lane Configuration Diagrams

Appendix E represents the minimum lane configuration requirements at the following intersections. If the findings of DB Co's Traffic Analysis Report and design require additional travelled or auxiliary lanes in order to satisfy the requirements of this Schedule 15-2, Part 9, DB Co shall be responsible for the necessary roadway expansions or improvements in addition to the requirements shown in this Appendix E. Such expansions or improvements shall be identified to the City upon submission of the Traffic Analysis Report and approved by the City in writing. Active transportation facilities and associated infrastructure is not depicted in this Appendix E, but shall be provided by DB Co in accordance with the requirements detailed elsewhere in Schedule 15-2, Part 9. Grey areas denote raised concrete medians or islands. Raised medians and islands shall only be constructed at ramp terminals at locations identified below.

Appendix F

Context Sensitive Design Requirements

1.1 CSD Background

- (a) On previous Highway 417 projects between Walkley Road and Highway 416 in Ottawa, MTO has implemented a series of consistent architectural and aesthetic treatments (the “Context Sensitive Design Concepts” or “CSD Concepts”) into the design of various elements of highway infrastructure as part of its Context Sensitive Design (CSD) initiative.
- (b) Additional background on the MTO’s CSD initiatives can be found in the MTO’s Context Sensitive Design Report for the Queensway – Highway 417 (2011), however DB Co shall not extract CSD Concepts from this report for use on Highway Works, as it does not reflect actual CSD Concepts applied to recent Highway 417 projects.

1.2 CSD Design and Submission Requirements

- (c) The design requirements contained within this Appendix F pertain to CSD Concepts only and do not release DB Co of its responsibility to meet other Design Criteria contained elsewhere in Schedule 15-2, Part 9.
- (d) DB Co shall be required to incorporate applicable CSD Concepts and associated treatments into its design of the Highway Works to ensure consistency with other sections of Highway 417 in Ottawa. DB Co shall refer to the following MTO contracts and extract all applicable drawings and specifications pertaining to CSD Concepts for incorporation into Highway Works design with a similar level of detail:
 - (i) MTO Contract 2012-4007;
 - (ii) MTO Contract 2014-4030;
 - (iii) MTO Contract 2014-4038; and,
 - (iv) MTO Contract 2017-4031.
- (e) The CSD Concepts listed below shall be integrated into DB Co’s Highway Works design, in accordance with the referenced MTO contracts any other requirements detailed herein. The general descriptions below are made for the purpose of identifying CSD Concepts, and shall not be construed as the sole CSD design requirements applicable to Highway Works.
 - (i) Underpass Bridge Structures
 - A. Pilasters

1. Decorative pilasters shall be designed and constructed at the outside face of intermediate piers on multi-span Underpass Bridges. The pilasters shall incorporate a maple leaf emblem.
 2. Pilaster design shall be aesthetically consistent with those detailed in MTO Contract 2012-4007.
- B. Piers
1. Centre pier design shall be aesthetically consistent with those detailed in MTO Contract 2012-4007.
- C. Abutments
1. Abutment design shall be aesthetically consistent with those detailed in MTO Contract 2012-4007.
- D. Wing Walls
1. Wing wall design shall be aesthetically consistent with those detailed in MTO Contract 2012-4007.
- E. Parapets
1. Parapet design shall be aesthetically consistent with those detailed in MTO Contract 2012-4007.
- F. Underbridge Slopes
1. Underbridge slope design shall be aesthetically consistent with those detailed in MTO Contract 2012-4007.
- G. Beams and Girders
1. Beams and girder design shall be aesthetically consistent with those detailed in MTO Contract 2012-4007.
- H. Lighting
1. Underbridge lighting features shall be aesthetically consistent with those detailed in MTO Contract 2012-4007 and MTO Contract 2014-4038.
- I. Appurtenances
1. Underpass Bridges shall include bridge mounted street names, leaf emblems on pilasters, and any other relevant CSD Concepts.

2. Bridge appurtenances shall be aesthetically consistent with those detailed in MTO Contract 2012-4007.
- (ii) Walls
- A. Noise Barriers
1. Noise Barriers shall generally consist of precast concrete panels and posts. Translucent acrylic Noise Barriers shall be provided at certain locations as indicated elsewhere in this Schedule 15-2, Part 9.
 2. Noise Barriers, including the material, colour and texture patterns, and aesthetics shall be consistent with those detailed in MTO Contract 2012-4007 and MTO Contract 2014-4038.
- B. Retaining Walls
1. Retaining walls, including the material, colour and texture patterns, and aesthetics shall be consistent with those detailed in MTO Contract 2012-4007.
- (iii) Landscape Treatments
- A. Landscaping requirements shall be as detailed elsewhere in Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements and this Part 9.
- (iv) Highway Appurtenances
- A. Light Poles
1. Leaf emblems shall be affixed to every other light pole as per the pattern featured in MTO Contract 2017-4031.
 2. Light poles, including LED luminaires and associated appurtenances, shall be aesthetically consistent with those detailed in MTO Contract 2017-4031.
- B. Fencing
1. Chain link fencing within the MTO ROW shall be black with vinyl fence fabric as detailed in MTO Contract 2017-4031.
 2. Fencing shall be aesthetically consistent with that detailed in MTO Contract 2017-4031.
- C. Sign Structures

1. Overhead sign structures shall be aesthetically consistent with those detailed in MTO Contract 2012-4007 and MTO Contract 2017-4031.
- (f) As part of its Pre-Final Design Development submission in accordance with Schedule 10 – Review Procedure, DB Co shall submit to the City a report demonstrating its adherence to CSD requirements as specified in this Schedule 15-2.
- (i) DB Co shall be required to Address in a subsequent report submission, any CSD Concepts that are not appropriately integrated into its design, as determined by the City.
 - (ii) The report shall detail the following, at a minimum, pertaining to each CSD Concept:
 - A. Locations within the Highway Corridor Lands where each CSD Concept is to be integrated; and,
 - B. Typical aesthetic design details for each CSD Concept (including but not limited to materials, dimensions, layout, colour).

ARTICLE 9 ELECTRICAL MAINTENANCE323

ARTICLE 1 INTRODUCTION

1.1 SCOPE

DB Co shall carry out Maintenance Operations in accordance with the requirements of this Appendix G until Highway Final Completion.

MTO shall only be responsible for snow, ice and frost control on the travelled lanes and paved shoulders within the Construction Zone designation current at the time. DB Co shall be responsible for any snow removal in the construction work zone, behind temporary barriers or other devices.

The Maintenance Operations shall adhere to the specifications detailed in this Appendix G for addressing inspection, maintenance and repair.

The specifications identify DB Co's responsibilities and obligations of DB Co Parties performing the Maintenance Operations requirements.

1.2 TURN-OVER

The Highway Corridor Lands will be turned over to DB Co for maintenance as per the following procedure:

1. DB Co shall submit the Designation of Construction Zone to City in conjunction with Commencement Date to transfer Highway Corridor Lands to DB Co.
2. DB Co shall with City perform a field inspection of the Highway Corridor Lands following Financial Close and prior to the Turn-Over date to identify any deficiencies. City is the sole judge of whether or not the identified deficiencies require correction prior to the turnover date.
3. City shall prepare the Turn-Over Agreement Form A, which identifies the date and time that responsibility for maintenance is transferred to DB Co, and shall be executed by City and DB Co.
4. DB Co shall carry out Maintenance Operations within the Designation of Construction Zone limits until Final Highway Completion within the noted limits.
5. DB Co shall request the turnover of Maintenance Operations to City using the Turn-Over Agreement Form B.
6. A final turnover field inspection prior to turn over from DB Co to City shall be performed by DB Co and City to identify and deficiencies to be corrected by DB Co. The City is the sole judge or whether or not the identified deficiencies require correction prior to turnover date.

1.3 GENERAL

All conditions that are considered, or causing, a Hazard shall be addressed Immediately by DB Co upon Detection or being Made Aware.

All Maintenance Operations shall be completed according to all Laws and Regulations, Standards and this Appendix G to Schedule 15-2 Part 9.

When a date for completion or submission of a component of the Maintenance Operation is identified, such date is considered to be the Maintenance Standard for the activity. When this Appendix G identifies a Remedy Period, the Remedy Period is the time limit to correct a non-compliance to meet the Maintenance Standard. The Remedy Period begins when the non-compliance is Detected or should have been Detected. However if the non-compliance is causing or could cause safety or health Hazards, the Maintenance Operation shall be completed Immediately or as soon as possible to maximize the safety of the public.

The non-compliance becomes a Non Conformance where the Remedy Period time limit has not been met. The Non Conformance process as detailed in Schedule 11 shall be followed. For greater clarity the Maintenance Operations are part of the Works and the Construction Period Quality Failure as detailed in Schedule 21 shall apply.

The tables, in the articles in this Appendix G, detailing the Maintenance Standards designate, in brackets below each Maintenance Standard if the non-compliance will be processed in accordance with the NCR process as per Schedule 11 or in accordance with the Construction Period Quality Failure as defined in Schedule 21 with the designation of Minor Construction Period Quality Failure (Minor CPQF) or Medium Construction Period Quality Failure (Medium CPQF).

Subsequent Construction Period Quality Failure Deductions arising from a failure to remediate prior to the expiration of the applicable Remedial Period will be assessed as detailed in Section 6.2 of Schedule 21.

HIGHWAY MAINTENANCE TURN-OVER AGREEMENT FORM A

CONTRACT NO.: _____ HWY. NO: _____ REGION: _____

LOCATION: _____

DESCRIPTION: _____

CONTRACTOR: _____

DB Co and their parties, as per Project Agreement, do now take responsibility for the maintenance of the roadway, except for the exemptions listed below.

The following list of items will remain the responsibility of the Ministry or its Agents, including the Area Maintenance Contractor:

Winter Maintenance Operations

Date and time of maintenance transfer:

Date: _____ Time: _____

City
Administrator: _____
(signature) _____ Date _____

DB Co: _____
(signature) _____ Date _____

For Confirmation of Receipt:

Maintenance
Superintendent: _____
(signature) _____ Date _____

Area
Maintenance
Contractor: _____
(signature) _____ Date _____

Distribution:

City Administrator
Maintenance Coordinator (MTO)
Area Contracts Engineer (MTO)
Regional Contracts Engineer (MTO)

HIGHWAY MAINTENANCE TURN-OVER AGREEMENT FORM B

CONTRACT NO.: _____ HWY. NO: _____ REGION: _____

LOCATION: _____

DESCRIPTION: _____

CONTRACTOR: _____

The City and its agents, as per Project Agreement, do now take responsibility for the maintenance of the roadway, except for the exemptions listed below.

The following list of items will remain the responsibility of the Contractor or their Agents:

[additional items as per the Maintenance Items List]

Date and time of maintenance transfer:

Date: _____ Time: _____

City
Administrator: _____
(signature) Date

Contractor: _____
(signature) Date

For Confirmation of Receipt:

Maintenance
Superintendent: _____
(signature) Date

Area
Maintenance
Contractor: _____
(signature) Date

Distribution:

City Administrator
Maintenance Coordinator (MTO)
Area Contracts Engineer (MTO)
Regional Contracts Engineer (MTO)

ARTICLE 2 DEFINITIONS

For interpretation, the definitions found in this Article 2 and elsewhere in this document, apply throughout the Agreement (herein defined), unless otherwise specified.

Unless the context otherwise specifies or requires, for the purposes of this Agreement, the following terms shall have the following meanings:

Asphalt Pavement means a road surface made of a mixture of asphalt cement and aggregate, commonly referred to as “hot mix” or “flexible pavement”.

Aggregate means gravel, sand, clay, earth, shale, stone, limestone, dolostone, sandstone, marble, granite, or rock other than metallic ores, slag, and clinkers.

Bi-weekly means occurring every two weeks.

Breakout means damage to Concrete Barrier where concrete is missing from the full width of the cross-section.

Block Separation means a crack through the full width of the Concrete Barrier.

Construction Signs means all traffic control devices and signs, including vehicles, trailers, and the like that are provided to support signs, and equipment to supply sign lighting, but excludes Contract identification signs and Highway number markers, all as may be described in the OTM.

Contractor means the person, partnership, or corporation or joint venture undertaking the Work as identified in the Agreement (DB Co).

Curb and Gutter means a border and channel typically made of concrete at the edge of a street or road for conveying surface water.

Day means a calendar day.

Defect(s): means any deficient condition on the Highway Corridor Lands identified in the maintenance requirements.

Detect, Detected or Detection means observed, should have been observed or has been informed.

Deterioration means a physical breakdown of the Pavement and/or Roadbed.

Disposed, Disposed Of or Disposal means disposal according to the requirements of Schedule 17.

Drainage Features means the features that function to control or convey storm-water runoff. Drainage features may include, but are not limited to the following: curb and gutter, culverts with spans less than three metres, ditches and ditch inlets, drainage channels, swales, catch basins and manholes and sewers.

Driving Surface means that part of the Highway designed or intended for use by vehicular traffic excluding Shoulders, and as defined by the painted edgelines when available.

Energy Absorbing System (EAS) means either: cylinders filled with energy absorbing materials; or; mechanical devices with or without energy absorbing cartridges. Energy absorbing terminals are generally attached to Concrete Barrier, steel beam guide rail, or other fixed objects.

Eradicate/Eradication means to do away with the plants completely as if by pulling up by the roots.

Fully Paved Shoulders means a Paved Surface adjacent to the through or auxiliary lane.

Gravel Shoulders means areas of gravel placed adjacent to through lanes, auxiliary lanes, Partially Paved Shoulder or Fully Paved Shoulders.

Hand Tools means tools that are commonly called tools or implements of the trade and include small power tools. Individually, a tool shall be considered as a Hand Tool where the maximum cost is \$[REDACTED].

Hazardous Substance means, but is not limited to, any solid, liquid, gas or other substance or emission which is a contaminant, pollutant, dangerous substance, liquid waste, industrial waste, hazardous material or hazardous substance which is or becomes regulated by Environmental Laws or occupational health and safety law or which is classified as hazardous or toxic under Environmental Laws.

Immediate or Immediately means initiation of a Maintenance Operation activity as soon as possible after Detection or being Made Aware and no later than 30 minutes from the time of Detection or being Made Aware. If more than one activity requires Immediate action at the same time, DB Co shall complete the work giving priority to the highest degree of Hazard.

Incident Resolution means the Highway is free of Hazards and all lanes closed due to the Incident have been re-opened to public traffic.

Laws and Regulations means any and all applicable federal, provincial or municipal laws, by-laws, codes, orders, directives, rules, regulations or statutes affecting the Maintenance Operation which, in the ordinary and usual course of the maintenance, repair and/or construction of a Highway in the Province of Ontario, would be recognized, followed and/or implemented by the Crown and applicable provincial advisors.

Loop Crack means a pattern of through cracks that form a distinct continuous or discontinuous U-shape or V-shape in Concrete Barrier.

Maintenance Access Point means a structured opening to provide access to underground services.

Maintenance Operation means the activities performed to maintain the Highway in a safe and passable condition, to prolong the life of the asset, and other activities prescribed in the maintenance requirements.

Maintenance Standard means the minimum operational requirements and service levels for Highway maintenance in order to ensure the safety of Highway users and maintain Highway assets. Maintenance Standards are detailed in this Appendix G.

mcd/m2lx means a unit of measurement for Retroreflectivity (milicandelas per square metre per lux).

Partially Paved Shoulder means a Paved Surface adjacent to a through or auxiliary lane for a minimum width of 0.5 metres with the remaining shoulder surface being gravel.

Paved Surface means any surface with a hard surfaced finish constructed of Asphalt Pavement, Concrete Pavement or Surface Treatment.

Priority means completing the function in order of importance with respect to the public's safety.

Qualified Bridge Repair Crew means a group of three identified individuals that have knowledge of maintenance practices and repair methods relating to Highway Structures gained through a minimum of 3 years' work experience working on MTO Bridges. The crew shall consist of as a minimum one qualified supervisor, two qualified workers, a vehicle or vehicle/trailer combination equipped with tools, equipment and materials required to perform bridge repairs, including small hand tools such as hammers, wrenches, saws, trowels, shovels, rakes, brooms and power tools such as chainsaw, concrete saw, concrete vibrator, chipping guns, and hammer drills.

Qualified Inspector means a person with knowledge of Structure maintenance principals and ability to identify structure defects, gained through a minimum of three (3) years of highway or equivalent municipal structures inspection experience. The Qualified Inspector shall possess a certificate from a bridge inspection course, equivalent to the Ontario Good Roads Association's Bridge and Structure Inspection course.

Qualified Person means a person with knowledge of Structure maintenance principals and ability to identify structure defects, gained through a minimum of two (2) years of highway structures or equivalent municipal structures maintenance experience. The Qualified Person shall possess a certificate from a bridge training course, equivalent to the Ontario Good Roads Association's Bridge and Culvert Management course.

Ravelling is the progressive loss of pavement material from the surface downward, leaving a coarse texture of “pock marks” on the pavement surface.

Reasonable means a sound judgment or action that is not excessive or extreme nor insufficient.

Remedial Period means the period of time allowed for correcting a Defect after the expiration of the Remedy Period and as defined in Schedule 21 .

Remedy Period means the maximum period of time allowed for correcting a Defect after Detection.

Retracing of Pavement Markings means the routine recoating of existing markings, including center lines, edge of pavement lines, lane and turn lane lines and Pavement Marking Symbols, including stop bars, crosswalks, school crossings, railway crossings, arrows and other markings listed on the inventory, on existing pavement.

Retroreflectivity means the property of a material or device in which, when directionally irradiated, the reflected rays are preferentially returned in direction close to the opposite of the direction of the incident rays, this property being maintained over wide variations in the direction of the incident rays.

Rippling and Shoving means regular transverse undulations in the surface of the pavement in a wavy or “washboard” effect running across the pavement, or an unevenness of the pavement due to movement of the surface mat.

Roadbed means that part of the Work which is designed to support the Roadway.

Ruts or Rutting means longitudinal depressions or dishing developed on the Paved Surface or Gravel Shoulder.

Security Fence means fencing that is installed to control access to, or limit the movement of, vehicles, pedestrians, and animals within the Provincial Highways or to secure City assets.

Sink Hole means a void beneath the Paved Surface or in the Gravel Shoulder.

Standard means, when used alone, the generic term for Maintenance Standard Specifications, Standard Specifications and Standard Drawings.

Standard Specification or Standard Drawing or Maintenance Standard Specification means a standard practice required and stipulated by the Owner for performance of the Work.

Storm Sewer System means a drainage conveyance system that carries water away from Catch Basins or other underground Drainage Features.

Structural Maintenance means maintenance work completed to reduce further damage or deterioration of the asset, including repairs to clamping bars, joint cover plates, railing and handrails, retainer bars and deck and slab drains.

Sweeping means removal of a sand/gravel/vehicle dirt mixture from the Roadway and may include litter.

Turn-Over has the meaning as per Clause 1.2.

Vegetation means all plant life including grass, weeds, noxious weeds, brush and trees.

Zero Time means that the Remedy Period time is zero minutes

ARTICLE 3 INCIDENT RESPONSE

3.1 SCOPE

This article details the requirements to response to incidents on the Highway Corridor Lands.

3.2 REPORTING

Inspections and reports shall be according to the following including Table 3-1.

A Collision/Incident Report form (provided in Attachment 3 A) shall be completed regarding all Incidents within the Highway Corridor Lands in which there are fatalities, personal injury, lane or road closures, severe damage to crown property, or the possibility of litigation. Photographs complete with date, time and signature of photographer shall be taken to assist with documentation of the Incident. The photographs and documentation shall describe the occurrence as well as the road conditions, general operations and identify DB Co's personnel on site.

The OTOC shall be notified at the time of arrival and departure from each Incident Site. Updates shall be provided every 30 minutes regarding Incident Site status.

Table 3-1

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|--|---|---------------|-----------------|
| INSPECTIONS AND REPORTS | | | |
| Collision/Incident Reports (NCR process) | Collision/Incident Reports completed and submitted to the City within 48 hours of Incident Resolution | Zero Time | 1 Business Day |
| Notification to the OTOC (NCR process) | Notification and updates to the OTOC as specified | Zero Time | 15 minutes |

3.3 MAINTENANCE OPERATIONS

Incidents shall be responded to upon Detection by proceeding to the Incident Site to secure the site and/or provide assistance to emergency responders as required. Incident response shall be in addition to any other operations underway. All necessary action shall be taken to keep the public, adjacent landowners and workers safe. This shall include any or all of the following:

- 1) Provide traffic control according to the OTM and Ministry of Labour orders and assist in restoring traffic movement as quickly as possible.
- 2) Protect public and worker safety at Incident Sites.
- 3) Open and close lanes and/or ramp gates at the request of the police or City, as may be relayed by the OTOC.
- 4) Install, maintain and remove road closure signs as requested by the police or City, as may be relayed by the OTOC.
- 5) Contain spillage on the Highway Corridor Lands in conjunction and co-operation with regulatory agencies, the police and appropriate municipal and provincial authorities. The OTOC shall be notified in the case of a spill.

- 6) Secure, protect, or isolate damaged Highway infrastructure as requested or required and restore the Highway to a condition safe for public travel by completing temporary or permanent repairs to correct damage including damage to the following:
 - i. Roadside barrier systems.
 - ii. Roadside energy attenuators and terminal systems.
 - iii. Drainage systems.
 - iv. Electrical facilities.
 - v. Signs and sign support structures.
- 7) Remove and dispose of Debris from the Highway.
- 8) Permanent or temporary repairs shall be made as required to attain Incident Resolution.

3.4 RESPONSE TIME

Response time to all Incidents shall not exceed the time limits according to Table 3-2 Incident Response Time. The response time is the maximum allowable time from the time of Detection of the Incident until the appropriate Incident Response Equipment (Freeway) is on site.

Table 3-2 Incident Response Time

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|----------------------------------|---|---------------|-----------------|
| RESPONSE TIME | | | |
| Incident Detection (Medium CPQF) | Incident Response Equipment (Freeway) on site | 30 minutes | 10 minutes |

Additional resources including personnel and equipment shall be deployed upon being Made Aware of the necessity for the additional resources at the Incident Site. The additional resources shall include sufficient equipment and personnel to provide lane closures and services as required during winter and summer seasons.

3.5 RESPONSE TO EMERGENCY BRIDGE REPAIRS

The Qualified Inspector shall be available to respond to all emergency bridge Incidents which could require repair. The Qualified Inspector shall be deployed upon a request from the Incident response personnel. Temporary repairs may be allowed as approved by the City to allow for safe passage of vehicular and/or pedestrian traffic with a permanent repair plan submitted to the City within 48 hours.

Table 3-3

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|-----------------------------|--|---------------|-----------------|
| Emergency Bridge Repairs | | | |
| Response Time (Medium CPQF) | Respond on site to all bridge Incidents with a qualified supervisor upon notification of Incident response personnel | 1 hour | 1 hour |

ATTACHMENT 3 A

Contractor Name/Logo

Collision/Incident Report

Contract

☐ Preliminary

☐ Final

a) **Area:** Hwy _____ **LHRS Base Point** _____ **Offset:**

GPS Coordinates (if available):

b) **Location:** (provide distance from known reference point)

c) **Date/Time of Collision/Incident:** **Date:** _____ **Time:**

d) **Time of Road Closure:** _____ **Time Closure was cleared:**

Additional comments:

e) **Detour Information:**

f) **Collision/Incident:** (Brief Description including type of vehicle(s) involved)

g) **Number Fatal:** _____ **Number Serious Injuries:**

h) **Weather at Time of Collision/Incident:** (include start of storms, intensity, visibility, etc.)

i) **Physical Features:** (signage, lane markings, curve, grade, surface condition, shoulder condition, granular, fully or partially paved, etc.)

j) **Road Conditions at Time of Collision/Incident:** (Bare, Snow covered, Ice, Visibility, etc.)

k) **Time of Last Patrol and Equipment Activities: Road/Weather Conditions Detected During Patrol:**
(include actions taken by Patroller/Operator)

l) **Operations Underway at Time of Collision/Incident:** (include start times, DLA, pre-wet, equipment utilized, breakdowns, time equipment passed scene of Collision/Incident, etc.)

m) **Other Relevant Information:** (police activities/reports, public/media enquiries, etc.)

n) **City/Contractor Representative at Scene of Collision/Incident:**

o) **Report Prepared by:** _____ **Phone #:** _____ **Date/Time of Report:**

Update Prepared by: _____ **Phone #:** _____ **Date/Time Report Updated:**

p) **Other documents available:** ☐ **OPP Reports** ☐ **Fatal Collision Report** ☐ **Other** ☐
Photos

q) **Changeable Message Sign** (message used):

Note: The OTOC will provide as much information as possible, such as weather, physical features, road conditions, service delivery, operations and more if available. **Items 1 to 6 and 15 & 16 must be prepared immediately.** It is understood that the information may be very preliminary and subject to confirmation. This report must be reissued when additional details become known and/or, as reports are made available. This should occur within 48 hours of the incident. A full report must be issued once all information is received. This document must be considered as highly confidential and must not be released other than to those listed below.

ARTICLE 4 DRIVE-BY INSPECTIONS

4.1 SCOPE

This article details the requirements to carry out inspections on the Highway Corridor Lands.

4.2 INSPECTIONS AND REPORTS

Drive-by inspections of Highway Corridor Lands shall be undertaken by the Traffic Control Supervisor to note any Defects or Deficiencies that require immediate action or need to be scheduled for repair according to the applicable Maintenance Operation. Inspections shall include recording observations in the record keeping report as per Clause 1.10 of Schedule 15-2 Part 9 Part C and taking appropriate action on the following conditions:

- i. Deficiencies or Defects that pose an imminent Hazard shall be reported Immediately to the OTOC and the City.
- ii. Dangerous Goods Vehicle Accidents and Leaks/Spills of Unidentified Materials.

The primary responsibility for containment, clean-up and disposal of spilled material rests with the owner/person having control of the product at the time of the spill.

Unauthorized Signs

"Tack" signs (signs tacked to M.T.O. signs) or other forms of unauthorized advertising attached to property or set up within the Highway Corridor Lands shall be removed and disposed of properly.

Authorized Signs

Election signs and Canadian Forces Convoy Route markers may be permitted on the Highway Corridor Lands under specific conditions. These conditions shall be provided by the City.

Special signs may be allowed through permission from the City. The City shall provide copies of sign permits covering the approval.

Contaminated Property

The location and description of any evidence of contamination (e.g.: staining on the surface of the ground) on Highway Corridor Lands or adjacent properties shall be reported to the City.

Unplanned Closures

The Patroller shall contact the OTOC regarding all Provincial Highway unplanned closures or partial closures including time of closure, expected duration and time of re-opening.

Any deficiency or unusual circumstance not included above shall be reported to the City.

4.3 RECORD KEEPING

Reports shall be completed, dated and signed daily by the Traffic Control Supervisor(s) and shall include the following information when applicable:

- i. Weather.
- ii. Date.
- iii. Printed Name and Signature.

- iv. The time that drive-by inspections are completed, including start and end times including ramps covered.
- v. Maintenance Operations completed during the day.
- vi. Discussions with the public (name the individual).
- vii. Discussions with the OTOC, City or DB Co staff (name the individual).
- viii. Calls from the police and action taken.
- ix. Incident information.
- x. Page number (e.g., 1 of 1, 1 of 2).
- xi. Highway Corridor Lands deficiencies and Defects.

Reports shall be submitted to the City Bi-weekly after the Bi-weekly period ending or one business day after the City has requested the report. (see Table 4-1)

Any corrections to reports shall be made with a single strikethrough, no overwriting of text, and initialed by the person making the correction.

Table 4-1

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|-----------------------------------|--|---------------|-----------------|
| Inspections and Reports | | | |
| Inspection reports NCR Process | Reports shall be submitted to the City within seven Days of the Bi-weekly period ending or one business day after the City has requested the report. | Zero time | 1 Business Day |

In addition to the minimum daily frequency, inspections shall be conducted as needed to cover non-routine situations including:

- a) During and after heavy wind or rain events.
- b) Emergency call-outs.

4.4 INSPECTION

Deficiencies or Defects that pose an imminent Hazard that are Detected during drive-by inspection shall be Addressed Immediately.

The vehicle used for inspection shall be equipped with a digital camera with date/time stamp and a cellular telephone.

The Highway Corridor Lands shall be inspected within the Designated Construction Zone on a daily basis as per Table 4-2.

Table 4-2

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|------------------------------------|--|---------------|-----------------|
| Inspection | | | |
| Inspection Frequency (NCR Process) | Inspection of the Highway Corridor Lands within the Construction Zone completed by the Traffic Control Supervisor at the specified minimum frequency | Zero Time | 1 Business Day |

- a) Road inspection consists of driving at a safe speed to look for Defects or Deficiencies identified in this Appendix G. Road inspection can be completed as a separate activity or combined with other operations.

Actions to Address Hazardous conditions may include one or more of the following:

- i. Installing signs.
- ii. Dispatching a work crew.
- iii. Contacting the police.
- iv. Undertaking the repair or removal of the Hazard, if it can be completed safely.
- v. Contacting the appropriate authorities (i.e.: the OTOC, O.P.P., MOECC Spills Action Centre in case of a spill).
- vi. Placement of appropriate temporary warning signs or markers.

All Defects identified in the Maintenance Operation are important. However, first Priority should be given to public safety, worker safety and Roadway items.

Damage to MTO property shall be reported to the O.P.P. or local police.

The vehicle used for road inspection shall contain:

- i. Necessary equipment, materials and tools to undertake minor emergency repairs.
- ii. Signs that can be easily installed to warn motorists of potential safety Hazards.

When a Defect is observed, such as Debris on the Roadway that can be Addressed safely, the required Maintenance Operation activity shall be carried out according to the OTM.

When Defects are observed that could be Hazardous, such as washouts or guide rail damage, the location shall be marked with a TC 54, safety cone, or hazard marker, to alert motorists.

If it is noted that a Highway Corridor Lands Closure may be necessary, the O.P.P. or local police shall be contacted through the OTOC. Only the O.P.P. or local police have the authority to close a Provincial Highway.

When stranded motorists are noted they shall be contacted if assistance for towing or other services is required. If an incapacitated vehicle is posing a Hazard to other vehicular traffic, (e.g.: on the inside shoulder) it shall be removed as soon as conditions permit. The OTOC shall be notified.

Visual inspection of traffic signal heads and supports shall be undertaken following storms accompanied by high winds.

ARTICLE 5 ROADWAY MAINTENANCE

5.1 SCOPE

This article details the requirements to carry out Roadway maintenance on the Highway Corridor Lands

5.2 DEBRIS

Removal and management of Debris shall be according to the following.

- a) A spring clean-up shall be scheduled during the spring of each year. The spring clean-up shall include removing accumulations of Debris from the Winter Period including sand, gravel or vehicle dirt mixture from all Paved Surfaces and within the Highway Corridor Lands prior to June 1 of each year.

Accumulations of gravel or sand on Paved Surfaces that occur after completion of the spring clean-up and prior to November 15 of each year shall be removed upon Detection.

Debris, including dead animals, on the Roadway shall be removed according to Table 5-1. All Debris shall be managed in accordance with Schedule 17.

Table 5-1

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|-------------------------------|---|---------------|-----------------|
| Debris | | | |
| Spring Clean-up (Medium CPQF) | Completed no later than June 01 of each year. | Zero Time | 1 Business Day |
| Cleanup – Other (Minor CPQF) | Accumulation of gravel or sand on Paved Surfaces is removed upon Detection | 1 Day | 1 Business Day |
| Debris (Minor CPQF) | Debris on the Roadway greater than 0.010 m ³ (e.g., 20 cm X 20 cm X 25 cm), or greater than 30 cm in any one dimension which is a Hazard to the travelling public, is removed upon Detection | 2 hours | 1 hour |

- a) Spring clean-up shall be scheduled as soon as spring thaw permits and before catch basins are cleaned to limit the amount of foreign material entering the drainage system.
- b) Water shall be used to minimize dusty conditions during cleaning operations.
- c) Sweeping and flushing are two methods of hard surface cleaning.
- d) Debris Removal
 - i. There is a potential hazard when handling dead animals, syringes and other sharp objects. Proper gloves, footwear and clothing should always be worn when engaged in these types of activities.

- ii. Expert assistance should be obtained to identify un-labelled containers or unidentifiable materials.
- iii. Suspected explosives, such as pipe bombs, blasting caps or discarded dynamite, should not be handled and the O.P.P. or local police authority shall be called without delay.

5.3 PAVED SURFACES

Maintenance of Paved Surfaces shall be according to the following including Table 5-2.

Defects on Paved Surfaces shall be noted and action taken as follows and according to Table 7:

- i. Potholes on Roadways, including bridge decks, shall be repaired.
- ii. Pavement edge surface loss which extends more than 100 mm inward from the edge of the Paved Surface shall be repaired to maintain a straight and consistent edge of pavement.
- iii. Rocks or tree stumps protruding through the road surface by more than 25 mm shall be removed.
- iv. Water ponding on Paved Surfaces caused by high Gravel Shoulders shall be corrected.
- v. Cracks exceeding 25 mm in width on Bridge surfaces shall be repaired.
- vi. Sink Holes shall be repaired and reported to the City.
- vii. Deficiencies or Defects that pose an imminent Hazard shall be Addressed Immediately.

Proper signage warning motorists shall be installed upon Detection when indicated for each of the following items.

- i. Cracking – cracks that are 40 mm or wider on Paved Surfaces and cracks wider than 6 mm on concrete Bridge surfaces.
- ii. Distortions:
 - Bumps or depressions with a vertical depth differential of 50 mm or more over a 3 m length; install warning signage
 - Any bump or depression occurring at a bridge approach
 - Any sharp vertical displacement of more than 20 mm on a bridge surface; install warning signage
 - All settlements of approach slabs exceeding 100 mm; install warning signage
- iii. Water Ponding due to Paved Surface depressions.
- iv. Wheel Track Rutting – Paved Surface rutting greater than 25 mm in depth.
- v. Rippling and Shoving, Scaling, Ravelling or Spalling – any occurrence of these conditions.

Table 5-2

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDY PERIOD |
|--------------------------|---|---------------|----------------|
| Paved Surfaces | | | |
| Potholes (Minor CPQF) | Any Pothole that is deeper than 50 mm and greater than 0.04 m² (e.g., 20 cm X 20 cm or 10 cm X 40 cm) on Asphalt Pavement or Concrete Pavement shall be repaired upon Detection | 3 Days | 1 Business Day |
| | Any pothole exceeding 20 mm in depth on a Bridge surface shall be repaired upon Detection | 3 Days | 1 Business Day |

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDY PERIOD |
|--|--|---------------|----------------|
| Paved Surfaces | | | |
| Pavement Edge Surface Loss (NCR process) | Paved Surface edge surface loss which extends more than 100 mm inward from the outer edge shall be repaired upon Detection | 3 Days | 1 Business Day |
| Water Ponding (NCR process) | Water Ponding on Paved Surfaces resulting from high gravel shoulders repaired upon Detection | 3 Days | 1 Business Day |
| Distortion (NCR process) | Distortions as detailed above are marked with warning signage upon Detection | 3 Days | 1 Business Day |
| Cracking (NCR process) | Cracks in Asphalt Pavement Bridge surfaces wider than 25 mm shall be repaired upon Detection. | 3 Days | 1 Business Day |
| Sink Holes (NCR process) | Sink Holes shall be repaired upon Detection. | 3 Days | 1 Business Day |
| Hazards (Medium CPQF) | Deficiencies or Defects that pose an imminent Hazard shall be Addressed upon Detection | 2 hours | 1 hour |

5.4 SHOULDERS

Maintenance of Shoulders shall be according to the following including Table 5.3.

- a) Defects on Shoulders shall be noted and the following action taken.
 - i. Washouts on Shoulders shall be marked with warning devices upon Detection and remain marked until repaired.
 - ii. All washouts on Shoulders greater than 150 mm in depth shall be repaired upon Detection.
 - iii. Impediments to Drainage – Proper drainage of Shoulders may be impeded by preventable conditions including improper crossfall or the presence of berms or windrows. Preventable conditions impeding Shoulder drainage shall be corrected.
 - iv. Drop Off with a depth exceeding 40 mm for a length of at least 100 m shall be repaired upon Detection. Drop Off in excess of 75 mm at any location shall be repaired.
 - v. Ruts with a depth exceeding 100 mm shall be repaired.
 - vi. Deficiencies or Defects that pose an imminent Hazard shall be Addressed Immediately.

Table 5-3

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|---|---|---------------|-----------------|
| Shoulders | | | |
| Washouts (NCR process) | Washouts of 150 mm or deeper repaired upon Detection | 2 Days | 1 Business Day |
| | Washouts of 150 mm or deeper and measuring an area greater than 1.0 m ² ; or washouts of 150 mm or deeper and measuring an area greater than 0.5 m ² within 1.0 m of the Driving Surface, repaired upon Detection | 3 Days | 1 Business Day |
| Impediments to Drainage (NCR process) | Preventable Conditions impeding Shoulder drainage to function as designed corrected upon Detection | 3 Days | 1 Business Day |
| Drop Off (not construction related) (Minor CPQF)) | Drop Off exceeding 50 mm in depth for a length of 100 m or greater repaired upon Detection | 3 Days | 1 Business Day |
| | Drop Off exceeding 75 mm in depth at any location repaired upon Detection | 4 hours | 2 hours |
| Ruts (NCR process) | Ruts deeper than 100 mm repaired upon Detection | 2 Days | 1 Business Day |
| Hazards (Medium CPQF) | Deficiencies or Defects that pose an imminent Hazard shall be Addressed upon Detection | 2 hours | 1 hour |

ARTICLE 6 PAVEMENT MARKING

6.1 SCOPE

This specification covers the responsibilities and obligations for the Retracing of pavement markings and symbols.

The Work shall be completed in full compliance with the requirements of OPSS 710, Construction Specification for Pavement Marking.

6.2 REPORTS

- a) A Pavement Marking work plan based on priority of Pavement Marking condition and in accordance with the annual application completion dates in Table 6-4 Minimum Requirements shall be provided to the City prior to April 1 of each year.

- b) Material Safety Data Sheets

DB Co shall identify the selected pavement marking material(s) and provide Material Safety Data Sheets (MSDS) and Product Data Sheets to the City in advance of application.

- c) Daily Work Log

A Pavement Marking Daily Work Log and/or Durable Marking Daily Work Log (see Attachment 6 A and 6 B) shall be completed and submitted to the City within seven Days of the application.

- d) Retroreflectivity Report

A Retroreflectivity Report of readings taken with a retroreflectometer shall be completed and submitted to the City by September 1st of each year. Readings shall be taken on 10% of the centre lines and skip lines, 10% of edge lines and 10% of symbols.

Retroreflectivity sampling shall be conducted in accordance with ASTM D7585 and ASTM E1710. Sampling, when using mobile retroreflectometers, shall follow the same procedures as for handheld units, but shall also include calibration checks against a handheld unit.

Results from the sampling of centre lines, skip lines and edge line shall be reported as one reading based on the average of the readings taken over each kilometre section sampled.

Additional information outlining the format of the Retroreflectivity Report is detailed in Attachment 6 C.

Table 6-1

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|-------------------------|--|---------------|-----------------|
| Inspections and Reports | | | |
| Reports (NCR process) | All required documents are Timely, Accurate and Complete | Zero Time | 1 Business Day |

6.3 SAMPLING

Sampling shall be according to the following including Table 6-2

Samples shall be taken by DB Co to support Quality Control monitoring and shall be according to Table 6-2 Pavement Marking Material Sampling.

DB Co shall obtain additional samples, in the presence of the City representative, when requested.

Samples of Traffic Paints shall not be thinned or heated. The material shall be well mixed and homogeneous and shall be acquired approximately mid-way through the batch. The sample container shall be filled within 5 mm of the bottom of the lid rim.

The sample data label shall be completed with the manufacturer's name, coating colour, product code and batch number(s), contract number and location. The Sample Data Label, Form PH-CC-360, is available from the City.

All samples taken shall be retained by DB Co for a period of two years.

Table 6-2 Pavement Marking Material Sampling

| MATERIAL | SAMPLE SIZE | SAMPLE FREQUENCY | CONTAINER MATERIAL | SOURCE |
|--|--------------------|-------------------------|--------------------------------------|------------------------------|
| Water borne Traffic Paint | 125 ml | Once per batch | Plastic or plastic lined | Outlet valve (not spray gun) |
| Field reacted polymeric materials - Resin * - Catalyst * | 250 g 50 g | Once per batch | Metal or plastic Metal or plastic | Pail Pail |
| Glass beads | 250g | Once per batch | Metal or plastic | Bead gun |
| Preformed tape | 1 m | Once per batch | Container not required | Roll |
| Thermoplastic materials | 250 g | Once per batch | Steel panel | Applicator ** |

* Material type and manufacturer's mixing ratio of each unmixed material shall be indicated on container.

** An 8 cm x 8 cm raw sample of the thermoplastic material can be substituted for the coated panel sample.

Table 6-3

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|------------------------|--|---------------|-----------------|
| Sampling | | | |
| Sampling (NCR process) | All sampling requirements are met 100% of the time | Zero Time | 1 Business Day |

6.4 RETRACING OF PAVEMENT MARKINGS

Retracing of Pavement Markings shall be completed as per the following including Table 6-6.

The City shall be notified a minimum of 10 Days prior to the start of any on-site Pavement Marking activities or the start of any repairs required.

Only materials listed on the current MTO DSM listing shall be used.

Retroreflectivity Requirements

The Retroreflectivity of the Pavement Markings and Pavement Marking Symbols shall meet the minimum requirements identified in Table 6-4 Minimum Retroreflectivity Requirements (mcd/m²lx) from the Annual Application Completion Date until October 31 of each year. Retracing of all Pavement Markings and Symbols shall be completed each year by the Annual Application Completion Date according to Table 6-4.

An overlay of glass beads shall be applied, without delay after painting either by hand or mechanical means, to achieve complete and uniform coverage across the full width of the line.

Table 6-4 Minimum Retroreflectivity Requirements

| Highway Class | Marking Type | Annual Application Completion Date | Minimum Retroreflectivity | |
|---------------|------------------------|------------------------------------|---------------------------|---------------------------|
| | | Highway 417 and Ramps | White Marking | Yellow Marking |
| Highway | Centre Line Lane Lines | July 1 | 350 mcd/m ² lx | 300 mcd/m ² lx |
| | Edge Lines | August 1 | 350 mcd/m ² lx | 250 mcd/m ² lx |

Durability Requirements

No Pavement Marking Symbol or no 100 m segment of Pavement Marking shall have more than 25% material loss at any time.

Visibility Requirements

The visibility of the Pavement Markings and Pavement Marking Symbols shall meet the minimum requirements identified in Table 6-5 Visibility.

Based on a minimum required preview time of 3.65 seconds and the posted speed limit (vehicle speed) for the highway, the minimum preview distance, listed in Table 6-5 Visibility shall be required:

Table 6-5 Visibility

| Vehicle Speed (km/hr) | Preview Distance (m) |
|--------------------------|-------------------------|
| 60 | 61 |
| 70 | 71 |
| 80 | 81 |
| 90 | 91 |
| 100 | 101 |

Notes:

1. No visual assessments shall be undertaken during any type of inclement weather.
2. No visual assessments shall be undertaken after applications of sand salt or de-icing materials have been applied to the roadway until a duration period of 72 hours (3 Days) have elapsed after the last application of these materials.

Appearance

All Retracing of Pavement Markings shall be according to OTM Book 11.

All lines shall be straight and true with no severe tracking or splatter. Tracking and splatter shall be removed using a method which does not damage the pavement surface, and retracing shall be completed if necessary.

Table 6-6

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|----------------------------------|---|---------------|-----------------|
| Retracing of Pavement Markings | | | |
| Retro-reflectivity (Medium CPQF) | Pavement Markings or Pavement Marking Symbols not meeting minimum Retroreflectivity requirements repaired upon Detection | 14 Days | 1 Business Day |
| Annual Application (Medium CPQF) | Pavement Markings, for each highway class and marking type, retraced by the annual application completion dates in Table 6.4 Minimum Retroreflectivity Requirements | Zero Time | 1 Business Day |
| Durability (NCR process) | Any 100 m segment of Pavement Marking with more than 25% material loss shall be repaired upon Detection | 14 Days | 1 Business Day |
| | Any Pavement Marking Symbol with more than 25% material loss shall be repaired upon Detection | 14 Days | 1 Business Day |
| Visibility (NCR process) | Visibility readings not meeting the requirements of Table 6.5 Visibility on all Pavement Markings and Pavement Marking Symbols shall be repaired upon Detection | 14 Days | 1 Business Day |
| Appearance (NCR process) | Severe tracking or splatter or lines that are not straight and true shall be removed upon Detection | 5 Days | 1 Business Day |
| | Retraced Pavement Markings not in accordance with OTM Book 11 shall be corrected upon Detection | 5 Days | 1 Business Day |

ATTACHMENT 6 C

RETROREFLECTIVITY REPORT

The report shall contain mobile retroreflectometer values (RL) in units of millicandelas per lux per square meter averaged over one kilometer lengths. The corresponding GPS coordinates for each one kilometer average shall be listed in a table showing RL values from the start to the finish of each data recording series. The report shall list the type of equipment used, date, time, line type measured and roadway identification with start and end point descriptions (it is convenient to identify intersections as start and end points). Test sections shall be limited to one roadway (i.e. the test section example below should contain data for only Hwy 11, not a combination of Hwy 11 and Hwy 65). For the case of single edge line or white skip measurements, report RL values in the Left Line column. The report shall be submitted to the City in excel spreadsheet format.

Yellow:

All color measurements shall fall within the Yellow Chromaticity Coordinates.

| | | | | | |
|--------|---------------|-------|-------|-------|-------|
| Yellow | x-coordinates | 0.560 | 0.460 | 0.420 | 0.490 |
| | y-coordinates | 0.440 | 0.400 | 0.440 | 0.510 |

ARTICLE 7 STRUCTURAL MAINTENANCE

7.1 SCOPE

This specification covers the maintenance of MTO Bridges on the Highway Corridor Lands.

The Work shall be completed in full compliance with the requirements of the following documents:

- a) Bridge Clearance and Load Restriction Manual (OSCLIS).
- b) Ontario Structure Inspection Manual.
- c) Concrete Barrier Repair, Rehabilitation and Maintenance Manual, 2003 (Draft).

7.2 INSPECTIONS AND REPORTS

Inspections and reports shall be according to the following including Table 7-1.

Inspections of Structures shall be planned, scheduled and carried out to ensure the safety of the travelling public. The required inspections shall be as follows:

- a) General drive-by inspections by the Traffic Control Supervisor to identify deficiencies and to schedule corrective action.
- b) A detailed annual maintenance inspection of all Structures by a Qualified Inspector completed no later than July 30th of each year.
- c) A detailed walk about inspection completed by a Qualified Person prior to November 15 each year, to identify additional Deficiencies including Hazards, erosion, obstructions to water flow and other general Defects. The Qualified Person shall complete the Structural Walkabout Inspection Report included in Attachment 7 A.
- d) Specific inspections by the Qualified Inspector shall be performed when the following situations occur:
 - i. Accident or motor vehicle collision involving a structure.

The results of the detailed annual inspections shall be noted in the Bridge Maintenance Inspection Report (see Attachment 7 B), Structural Culvert Inspection Form (see Attachment 7 C), or Retaining Wall Inspection Form (see Attachment 7 D) and the inspection reports detailing the condition of each Structure shall be submitted to the City before August 1st of each year.

The results of inspections conducted as a result of an accident or motor vehicle collision involving a structure shall be noted on the Structure Incident Report (see Attachment 7 E), and submitted to the City within 48 hours of the incident.

Structural Maintenance Defects identified in the annual detailed walk about inspections shall be corrected in accordance with this Maintenance Operation, and a summary of repairs made or details of further work required shall be provided to the City within 30 days of the inspections.

The City may conduct its own bridge and scaling inspections and any other structural component. DB Co shall coordinate its Routine Maintenance work, including traffic control, with the City in order to allow the

City to perform its inspection work concurrent with the DB Co's Routine Maintenance work. DB Co shall take all necessary measures to facilitate and accommodate the City inspectors' access when DB Co is performing Routine Maintenance work.

Qualified Inspector Requirements

Documents supporting the qualifications of the Qualified Inspector shall be submitted to the City prior to the Hand Over date. If the Qualified Inspector will be replaced, new documents shall be submitted to the City prior to the new Qualified Inspector performing any structural inspection work. The documents shall include a resume, the course certificate and completed inspection reports.

Reporting of Structural Maintenance Work

All Structural Maintenance and inspection work shall be recorded on the Structural Maintenance Report (see Attachment 7 F) and submitted by November 15th annually. The report shall include information on cleaning, inspections and minor repairs.

The City shall be notified within one Business Day of any temporary repairs completed which will require permanent repairs.

Table 7-1

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|-----------------------------------|---|---------------|-----------------|
| Inspections and Reports | | | |
| Inspections (Medium CPQF) | Detailed annual maintenance inspection of all Structures by a Qualified Inspector completed no later than July 30th of each year. | Zero Time | 1 Business Day |
| Inspections (Medium CPQF) | A detailed walk about inspection completed by a Qualified Person prior to November 15 each year | Zero Time | 1 Business Day |
| Qualified Inspector (NCR process) | All qualifications are provided prior to the individual performing Structural Maintenance or inspections requiring a Qualified Inspector and as updated | Zero Time | 1 Business Day |

The conditions as noted on the Bridge Maintenance Inspection Report (see Attachment B), Structural Culvert Inspection Form (see Attachment C), or Retaining Wall Inspection Form (see Attachment D) shall be inspected.

7.3 STRUCTURE CLEANING

Structure cleaning shall be according to the following.

The annual cleaning of Structures and Structure surfaces shall be planned, scheduled and carried out to remove all dirt, Debris and deleterious material and washing with water to remove the remaining chemicals and winter abrasives while ensuring the safety of the travelling public and meeting all environmental requirements.

The following surfaces are to be cleaned and washed annually:

- a) Decks, sidewalks, handrails, curbs, gutters and barrier walls.
- b) Abutments and pier columns/caps below expansion joints, abutment and retaining walls, columns and piers within five metres of edge of a roadway to a minimum height of five metres above the

surface.

- c) All associated drainage structures, including scuppers, drain troughs and drainpipes and flumes. Deck drains on bridges over water shall be blocked prior to removal of excess dirt, debris and deleterious materials such as sand and salt, to prevent their entry into watercourses.
- d) The approaches to the structure and all associated Bridge elements for a minimum distance of six metres as measured from the abutment joint or the first catch basin thereafter.
- e) Bearing seats, expansion joints and deck joints including troughs and seals.
- f) The roadside surface of light standards and sign supports attached to the structure to a height of three metres above deck level.
- g) Concrete slope protection.
- h) No Debris resulting from Structure cleaning shall be left on previously cleaned surfaces.

All Debris resulting from Structure cleaning shall be managed according to the requirements detailed in Schedule 17.

The accumulation of winter sand, salt and debris shall be removed prior to washing. This can be done manually or by mechanical sweeping.

Table 7-2

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|---------------------------------|---|---------------|-----------------|
| Structure Cleaning | | | |
| Spring Cleanup (Medium CPQF) | All Debris is removed from Structures no later than June 30 th of each year | Zero Time | 1 Business Day |
| | All Structures and components are washed no later than June 30 th of each year | Zero Time | 1 Business Day |

- a) Equipment
 - i. The minimum requirement for pressure washing equipment should be 520 kPa with a volume of 225 litres per minute, continuously running.
 - ii. A water tank with a minimum capacity of 9000 litres is recommended.

Procedures

- i. Particular attention should be given to the cleaning and flushing of any pockets formed where vertical and diagonal members connect to the bottom chord. Bottom truss chords should be cleaned and flushed along their entire length.
- ii. No washing should take place when there is a potential for temperatures below 0°C.
- iii. Washing should occur from higher to lower elevation to allow the water to carry debris downwards.
- iv. Local authorities should be consulted for permits and regulations before obtaining water from hydrants.
- v. Caution should be exercised when cleaning expansion joints so as not to damage the seal.

- vi. Refer to the Schedule 17, for dealing with birds' nests found on structures.
- vii. When performing cleaning operations, workers may be exposed to bird droppings and feathers from birds or bats. These materials may carry spores of infectious diseases. To control dust exposure, these materials should be wetted before removal and workers should wear appropriate personal protective equipment including disposable masks, gloves and coveralls. If materials cannot be dampened before removal, the worker should also wear a high efficiency particulate air (HEPA) filter. Before leaving the work site, protective clothing should be removed and dust should be washed from footwear.

7.4 STRUCTURE MAINTENANCE

Structural Maintenance shall be according to the following.

The structural components of the Bridge shall be maintained. The following Structural Maintenance items shall be completed on a regular maintenance schedule and according to the Remedy Periods in Table 7-2 or according to Article 5 Roadway Maintenance as applicable:

- a) Broken and missing bolts shall be replaced and loose bolts shall be tightened on expansion joints.
- b) All loose steel components or those causing a Hazard to the public, shall be repaired or made safe.
- c) All Handrail and Railing components shall be in place and functioning, and all bolts shall be tight
- d) All loose, damaged or missing Bridge components are tightened, repaired or replaced
- e) Temporary repairs of Concrete Barrier
- f) Defects on bridge surfaces, including potholes, distortions, settlement and cracks, shall be noted and action taken to meet the Maintenance Standards according to MSS 2001-Roadway Maintenance.

Table 7-3

| MAINTENANCE STANDARD | | REMEDY PERIOD | REMEDIAL PERIOD |
|-------------------------------------|--|---------------|-----------------|
| Structural Maintenance | | | |
| Structural Components (Minor CPQF) | All structural components not in place, secured and functioning in a proper operating manner shall be repaired or replaced upon Detection | 5 Days | 1 Business Day |
| Concrete Deficiencies (Medium CPQF) | All concrete deficiencies on all Structures which could result in any material falling on or near a live lane, sidewalk, pedestrian walkway, railway or navigable waterway shall be removed upon Detection | 2 hours | 2 hours |

ARTICLE 8 ROADSIDE MAINTENANCE

8.1 SCOPE

This specification covers the responsibilities and obligations for the year round Maintenance of Roadside features.

The Maintenance Operations shall be completed in full compliance with the requirements of the following documents:

- a) Concrete Barrier Repair and Rehabilitation Maintenance Manual.
- b) Sign Support Manual.
- c) Ontario Traffic Manual.
- d) King's Highway Guide Signing Policy Manual.
- e) Sign Support Inspection Guidelines.
- f) OPSD's for Small Sign Support Systems.
- g) Field Guide for the Restoration of Longitudinal Barriers (Chapter 16 of NCHRP Report 656).
- h) PMM 2016-05 Enhanced Delineation.

8.2 INSPECTIONS AND REPORTS

Inspections and reports shall be according to the following including Table 8-1.

- a) General drive-by inspections shall be carried out as detailed under Article 4.

Record deficiencies noted as detailed under Article 4.

Deficiencies or Defects that pose an imminent Hazard shall be Addressed Immediately and reported to the City.

An annual visual inspection shall be completed of all steel or wood ground mounted signs to identify reduced reflectivity, faded, or illegible signs. Inspections shall be completed prior to the end of the Winter Period of each year and submitted to the City.

An annual inspection shall be completed on all extruded aluminium signs and engineer designed supports on the Overhead Sign Support Maintenance Inspection Report or the Roadside Sign Support Maintenance Inspection Report (see Attachment 8 A and 8 B), and submitted to the City by August 1st. During the inspection for overhead sign supports loose base bolts on the footings shall be re-torqued and for the ground-mounted (roadside) sign supports all loose bolts shall be re-torqued including those on the footings, fuse plates, etc..

Maintenance access points, catch basins and ditch inlets shall be inspected annually by June 1 and the inspection recorded as per Article 5.

Table 8-1

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|--|---|---------------|-----------------|
| Inspections and Reports | | | |
| Extruded Aluminum Signs and Engineer Designed Supports (Medium CPQF) | Annual inspection reports completed and submitted by August 1 each year | Zero Time | 1 Business Day |

8.3 SIGNS AND SIGN SUPPORTS

Maintenance of signs and sign supports shall be according to the following including Table 8-2.

- a) The MTO sign shop shall supply all Regulatory, Municipal (population), Warning and Information Signs as detailed in the Ontario Traffic Manual (OTM). All signs shall be ordered through the City and signs shall be shipped to the MTO Kanata Patrol Yards. All signs supplied by the MTO sign shop shall be received, unloaded and inspected upon delivery to verify the condition and ensure that sign size and directional arrows are correct and sign messages on new signs are spelled correctly. Proper storage and handling of all signs belonging to the City shall be ensured.
- b) Temporary condition and specialty signs are not supplied by the MTO sign shop. All approved temporary condition and specialty signs shall be supplied and installed according to the requirements of the Ontario Traffic Manual (OTM).
- c) Missing, damaged, illegible, obscured, reduced reflectivity, faded, twisted or deflected signs shall be replaced or repaired including overlays applied to ground-mounted extruded aluminium signs. Missing, broken, loose or cracked sign hardware, bent fasteners and bent brackets shall be repaired or replaced. Twisted, cracked, out of plumb, bent, unsound posts or posts not solid in the ground shall be repaired or replaced.
- d) When replacement of sign supports for steel or wood ground mounted signs is required due to damage, deterioration and/or missing sign supports, all non-standard sign supports shall be replaced with supports meeting current Standards.
- e) Missing or damaged snowplow markers, delineator markers, median markers, hazard markers and reflectorized guide rail strips shall be replaced, or new ones installed, including all other materials, hardware and posts for installation as required. These signs shall be supplied by DB Co.
- f) No permanent sign shall be installed at a new location or removed from its present location without Approval from the City. Should a condition or situation be identified that would warrant a new sign installation, the proposed sign, location and justification shall be provided to the City for consideration and approval. The sign layout shall be provided to the City prior to the sign installation.

Table 8-2

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|---|---|---------------|-----------------|
| Signs and Sign Supports | | | |
| Stop, Stop Ahead, Yield, Yield Ahead, Traffic Signals Ahead, “New” (Wb3, Wb3F) and Checkerboard Signs (Medium CPQF) | Missing, damaged, illegible, obscured, reduced reflectivity, twisted or deflected signs; resources shall be deployed to replace or repair upon Detection | 2 hours | 1 hour |
| Regulatory Signs (NCR process) | Missing, damaged, illegible, obscured, reduced reflectivity, twisted or deflected Regulatory signs, other than Stop or Yield signs, shall be replaced or repaired upon Detection | 3 Days | 1 Business Day |
| Warning Signs (NCR process) | Missing, damaged, illegible, obscured, reduced reflectivity, faded, twisted or deflected warning signs, other than Stop Ahead, Yield Ahead, Traffic Signal Ahead, “New” (Wb3, Wb3F) or Checkerboard signs, shall be replaced or repaired upon Detection | 7 Days | 1 Business Day |
| Information Signs (NCR process) | Missing, damaged, illegible, obscured, reduced reflectivity, faded, twisted or deflected information signs shall be replaced or repaired upon Detection | 30 Days | 1 Business Day |
| | All required replacement signs shall be ordered upon Detection | 3 Days | 1 Business Day |
| | All signs installed upon delivery | 30 Days | 1 Business Day |
| Sign Hardware (NCR process) | Missing, broken, loose or cracked sign hardware, bent fasteners and bent brackets shall be replaced or repaired upon Detection | 7 Days | 1 Business Day |
| Sign Posts (NCR process) | Twisted, cracked, out of plumb, bent, unsound posts or posts not solid in the ground shall be replaced or repaired upon Detection | 30 Days | 1 Business Day |
| Engineer Designed Sign Structures (NCR process) | All Debris against the structure, missing plate covers and soil encroaching on the footing base shall be removed upon Detection | 30 Days | 1 Business Day |

- a) Sign inspections shall be carried out when the surface of the sign is dry.

Breakaway steel sign supports shall be inspected and pressure washed at the base to clear away sand/salt and debris as required.

Sign Maintenance

Cleaning:

- i. The face of the signs shall be cleaned by a method that does not scratch or damage the reflective sheeting.
- ii. Graffiti shall be removed using an approved method. The use of an approved clear coat overlay is recommended in areas with recurring graffiti problems.

Temporary Repairs:

- i. When conditions do not allow for the replacement of sign supports, signs shall be mounted on a portable stand or other acceptable method that will maintain the integrity of the sign.

8.4 GUIDERAIL AND OTHER SAFETY SYSTEMS

Maintenance of guiderail and other safety systems shall be according to the following including Table 8-3.

a) Steel Beam Guiderail

- i. Posts that are missing or damaged (including broken, excessively split or cracked or generally unsound) and /or affect the integrity and effectiveness of the system, shall be replaced.
- ii. Blocks that are not bolted firmly between the mounting posts and the steel beam rails shall be re-secured and any missing bolts and nuts shall be replaced.
- iii. Posts that have heaved, settled or are out of plumb in such a manner that the system effectiveness has degraded, shall be reset to the proper elevation and alignment.
- iv. Rails and channels that are missing or damaged (including dented, bent, torn, twisted or rusted) and/or affect the integrity and effectiveness of the system shall be replaced.
- v. The beam height shall be measured from the ground below the beam to the bottom of the beam.
- vi. Damaged or missing reflectorized strips or reflective markers shall be replaced.
- vii. High priority repairs according to NCHRP Report 656 Chapter 16 shall be completed within 7 Days.
- viii. Medium priority repairs according to NCHRP Report 656 Chapter 16 shall be completed prior to November 15 each year.

Concrete Barriers

- i. Two adjacent sections of temporary/modular Concrete Barriers misaligned by more than 7.5 cm or longitudinally separated by greater than 2.5 cm shall be reset to the proper alignment.
- ii. Any Breakout, Block Separation or Loop Crack shall be temporarily repaired and maintained until permanent repairs are completed.
- iii. Defects such as cracks and missing concrete that affect the integrity of the Concrete Barrier shall be reported to the City.
- iv. Other concrete defects such as spalling and scaling shall be reported to the City.
- v. Damaged or missing reflectorized strips or reflective markers shall be replaced.

Energy Absorbing Systems

- vi. Damaged Energy Absorbing Systems which compromise the integrity and effectiveness of the system shall be secured, delineated and made safe.
- vii. Energy Absorbing Systems which have shifted or moved out of original position shall be returned to the original layout.
- viii. All systems that contain moving parts shall be cleaned in order to ensure the system remains fully operational as intended by the design.
- ix. All hardware shall be adjusted, repaired or replaced as required to maintain the integrity and performance of the system.

Anti-Glare Screens that are damaged or missing shall be repaired or replaced.

Snow protection barriers that are damaged shall be reported to the City.

Table 8-3

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|--|--|----------------------|-----------------|
| Guiderail and Other Safety Systems | | | |
| Steel Beam Guiderail (NCR process) | High priority repairs are completed upon Detection | 7 Days | 1 Business Day |
| | Medium priority repairs are completed upon Detection | prior to November 15 | 1 Business Day |
| Concrete Barriers (NCR process) | Two adjacent sections of temporary/modular Concrete Barrier misaligned by more than 7.5 cm or longitudinally separated by greater than 2.5 cm reset to the proper alignment upon Detection | 7 Days | 1 Business Day |
| | Temporary Concrete Barrier with Breakout, Block Separation or Loop Crack are to be replaced upon Detection and reported to the City | 24 hours | 1 Business Day |
| | Permanent Concrete Barrier with Breakout, Block Separation or Loop Crack shall be temporarily repaired upon Detection and maintained until permanent repairs are completed | 24 hours | 1 Business Day |
| Energy Absorbing Systems (NCR process) | All damaged Energy Absorbing Systems are protected and made safe upon Detection | 2 hours | 30 minutes |
| | All systems which require adjustment or realignment are corrected upon Detection | 7 Days | 1 Business Day |
| | All damaged Energy Absorbing Systems shall be repaired or replaced upon Detection | 7 Days | 1 Business Day |
| | All systems that contain moving parts are cleaned by June 1 st every year | Zero Time | 1 Business Day |
| Anti-Glare Screens (NCR process) | All damaged or missing anti-glare screens are repaired or replaced upon Detection | 21 Days | 1 Business Day |
| Snow Protection Barriers (NCR process) | All damaged snow protection barriers are reported to the City upon Detection | 7 Days | 1 Business Day |

8.5 CURB AND GUTTER

Maintenance of curb and gutter shall be according to the following including Table 8-4.

- a) Obstructions which could impede proper drainage shall be removed.

- b) Gaps or separations of greater than 50 mm between the curb and gutter and the adjacent pavement surface shall be repaired.
- c) Shoulder and embankment areas behind the curb and gutter shall be inspected for erosion and restored to their original profiles.

Table 8-4

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|--------------------------------|--|---------------|-----------------|
| Curb and Gutter | | | |
| Obstructions (NCR process) | All obstructions impeding proper drainage are removed upon Detection | 2 hours | 1 hour |
| Gaps/ Separation (NCR process) | Gaps between curb and gutter and pavement surface exceeding 50 mm repaired upon Detection | 30 Days | 1 Business Day |
| Erosion (NCR process) | Erosion damage to the shoulder and embankment behind the curb is repaired by October 1st each year | Zero Time | 1 Business Day |

8.6 DRAINAGE SYSTEMS

Maintenance of drainage systems shall be according to the following including Table 8-5.

All materials removed from a drainage appliance shall be managed according to Schedule 17.

a) Catch Basins and Maintenance Access Points

- i. Remove all debris from the maintenance access points, catch basins and ditch inlets at a minimum once every two years and more frequently as required to ensure the sump is not filled to capacity.
- ii. All missing grates or lids shall be replaced.
- iii. All damaged frames shall be reported to the City.
- iv. All Defects in concrete work, all ladder rungs that are broken, missing or badly rusted, and bricking that is crumbling or broken shall be reported to the City.
- v. Settlement around maintenance access points, catch basins and structure approaches shall be reported to the City.
- vi. If the water flow appears to be obstructed within the connecting pipes, this Defect shall be reported to the City.

b. Sub-drains

- i. All obstructions that are impeding the flow shall be removed.
- ii. Missing rodent screens shall be replaced.
- iii. Buried outlets shall be uncovered.
- iv. Pipe ends that have been crushed shall be repaired.

c. Culverts and Storm Sewer Systems

- i. All Debris that may restrict water flow of a culvert or storm sewer at inlet or outlet, including two metres inside either end, shall be removed.

- ii. Debris and/or other material which is restricting water flow in the interior of a culvert or storm sewer (excluding two metres at either end) shall be reported to the City.
- d. Ditches
- i. All non-planned obstructions that are stopping, rerouting or reducing the free flow of water shall be removed.
 - ii. Damage to ditch lining shall be repaired or controlled to prevent erosion.
 - iii. Eroded or damaged ditch side-slopes, back-slopes and slope protection shall be repaired.

Table 8-5

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|--|--|---------------|-----------------|
| Drainage Systems | | | |
| Catch Basins and Maintenance Access Points (NCR process) | All missing catch basin, ditch inlet and maintenance access point grates or lids are replaced upon Detection | 30 minutes | 1 hour |
| | All damaged catch basin, ditch inlet and maintenance access point frames are marked with warning devices and reported to the City upon Detection | 3 Days | 1 Business Day |
| | Sumps filled to capacity shall be cleaned upon Detection | 7 Days | 1 Business Day |
| | Crushed or buried pipe ends shall be repaired or replaced upon Detection | 30 Days | 1 Business Day |
| | Missing and damaged rodent/wildlife screens are repaired or replaced upon Detection | 60 Days | 1 Business Day |
| Culverts and Storm Sewer Systems (NCR process) | All Debris that may restrict water flow at inlet or outlet, and up to two metres inside either end, removed upon Detection | 30 Days | 1 Business Day |
| | Blockage that is causing a negative impact to City infrastructure or adjacent property shall be Addressed Immediately | Zero Time | 1 Business Day |
| Ditches (NCR process) | Erosion or damage of ditch slopes, linings, back slopes, inlets/outfalls and slope protection are repaired upon Detection | 60 Days | 1 Business Day |
| | Non-planned obstructions that may reduce flow capacity are removed upon Detection | 30 Days | 1 Business Day |
| | All non-planned obstructions that stop or reroute the free flow of water, or may cause flooding, removed upon Detection | 24 hours | 1 Business Day |

8.7 VEGETATION CONTROL

Vegetation control shall be according to the following including Table 8-7.

- a) Sight Distance
- i. Vegetation shall be controlled before it can obscure any sign.
 - ii. Vegetation shall be controlled before it can impair or obstruct sight visibility distances according to Table 8-6 Sight Visibility.

Table 8-6 Sight Visibility

| | | | | | | |
|------------------------------|-----|-----|-----|-----|-----|-----|
| Posted Speed (km/h) | 50 | 60 | 70 | 80 | 90 | 100 |
| Minimum Sight Distance (m) * | 110 | 135 | 160 | 185 | 215 | 245 |

*Note: Minimum sight distance means a clear line of vision along the road between the driver's eye (either moving/stationary vehicle) and the object to be seen (either moving/stationary). Eye level is measured at 1.05 m above road surface.

Vegetation that impedes traffic shall be removed.

Grass Mowing and Trimming

All grass visible to the travelling public shall be maintained at a height not exceeding 15 centimetres.

- i. Grass and weeds behind barrier walls in view of the travelling public shall be maintained below the height of the top of the barrier wall.
- ii. Grass impeding drainage or contributing to erosion by destroying desirable groundcovers shall be reported to the City.

Concrete/Asphalt Joints

- i. Vegetation growing in any concrete and/or asphalt joint or crack shall be Eradicated annually between July 1 and August 31.

Vegetation at Electrical Installations

- i. All vegetation, including trees, shall be removed from around all electrically powered equipment, including communication equipment within the working area, a minimum of twice per year by June 1 and September 1.
- ii. In addition, all vegetation within a two metre radius shall be maintained at a height of no greater than 300 mm around all electrically powered equipment and communication equipment requiring access. This includes all cabinets, power supplies, distribution assemblies, high mast poles, sub stations, RWIS stations, cameras, and communication pedestals. A one metre pathway, from the roadway to the equipment, shall also be maintained at a height no greater than 300 mm.

Table 8-7

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|------------------------------|--|---------------|-----------------|
| Vegetation Control | | | |
| Sight Distance (NCR process) | Vegetation that impairs or obstructs sight visibility distances removed upon Detection | 1 Day | 1 Business Day |

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|--|---|---------------|-----------------|
| Vegetation Control | | | |
| | Vegetation that impedes traffic or obstructs regulatory signs is removed upon Detection | 2 hours | 2 hours |
| Grass Mowing (NCR process) | All grass visible to the travelling public maintained at not more than 15 centimetres | 7 Days | 1 Business Day |
| | All grass and weeds behind barrier walls maintained below the height of the top of the barrier walls. | 7 Days | 1 Business Day |
| Weed Control (NCR process) | Noxious weeds identified through a weed order Eradicated according to the weed order | Zero Time | 1 Business Day |
| Concrete/ Asphalt Joints or Cracks (NCR process) | Vegetation growing in any concrete and/or asphalt joint or crack Eradicated annually by August 31 | Zero Time | 1 Business Day |
| Vegetation at Electrical Installations (NCR process) | Vegetation to be cleared twice annually by June 1 and Sept 1 | Zero Time | 1 Business Day |

8.8 FENCES AND OTHER BARRIERS

Maintenance of fences and other barriers shall be according to the following including Table 8-8.

a) Security Fence (or Farm Fence owned by the MTO)

- i. Where sections of MTO-owned farm or security fence are damaged temporary repairs shall be made immediately and permanent repairs scheduled and completed.

Ramp Gates

- i. Annual maintenance of ramp gates shall include, oiling or greasing of moving parts and locks as required, and replacement of damaged components or complete units.
- ii. All ramp gates shall be equipped with MTO approved locks.
- iii. Where ramp gates are damaged, repair or replacement shall be scheduled and completed.

Table 8-8

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|--------------------------|--|---------------|-----------------|
| Fences & Other Barriers | | | |
| All Fences (NCR process) | Damaged or missing Security Fence or City owned Farm Fence allowing access to the highway is repaired temporarily upon Detection | 2 hours | 2 hours |
| | Permanent repairs completed upon Detection | 14 Days | 1 Business Day |

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|--------------------------|--|---------------|-----------------|
| Fences & Other Barriers | | | |
| Ramp Gates (NCR process) | Ramp Gates maintained and damage repaired upon Detection | 7 Days | 1 Business Day |

8.9 OTHER ROADSIDE FEATURES

Maintenance of other Roadside features identified below shall be according to the following

a) Graffiti

- i. Graffiti visible by the public is removed by a paint removal method as identified in the Designated Sources of Material list.
- ii. All offensive graffiti is temporarily covered and scheduled for permanent removal.

Debris

- i. All mowed grassy areas visible to the travelling public shall be maintained free of litter and debris at all times between April 15th and November 15th of each year.
- ii. Items within the Roadside that may have a negative impact on public health or environmental safety shall be Addressed Immediately.
- iii. Debris, including dead animals, on the Roadside shall be removed. All Debris shall be managed in accordance with Schedule 17.

Table 8-9

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|---------------------------|---|---------------|-----------------|
| Other Roadside Features | | | |
| Graffiti (NCR process) | All graffiti visible by the public is removed by a paint removal method as identified in the Designated Sources of Material list upon Detection | 10 Days | 1 Business Day |
| | All offensive graffiti is temporarily covered upon Detection | 2 hours | 1 hour |
| Debris (NCR process) | All Debris within the Roadside is removed upon Detection | 1 Day | 1 Business Day |

- i. There is a potential hazard when handling dead animals, syringes and other sharp objects. Proper gloves, footwear and clothing should always be worn when engaged in these types of activities.
- ii. Expert assistance should be obtained to identify unlabelled containers or unidentifiable materials.

ARTICLE 9 ELECTRICAL MAINTENANCE

9.1 SCOPE

This specification covers the responsibilities and obligations for all electrical maintenance and servicing activities within the Highway Corridor Lands.

The Maintenance Operation shall include identifying, documenting and taking the appropriate action necessary to correct all defects whether by Minor Maintenance or Non-Routine Maintenance.

The Maintenance Operation shall be completed in full compliance with the requirements of OPSS Prov 106 and the requirements detailed in Schedule 15-2 Part 9.

9.2 Non-Routine Maintenance

Non-Routine Maintenance of electrical systems shall be according to the following Maintenance Standards detailed in Table 9-1 and Table 9-2.

The Electrician (as defined in OPSS Prov 106) shall notify the City and the OTOC of all Critical Failures when first arriving on site. The Electrician shall notify the OTOC upon leaving the site.

Table 9-1 – Categories of Critical Failures in Electrical Systems

| CATEGORY 1 - System components are degraded or not working at all and there is an elevated priority due to a Major Incident or immediate safety hazard. CATEGORY 2 - Major system components are degraded or not working at all and there no immediate safety hazard. CATEGORY 3 - Minor system component is degraded or not working at all and there no immediate safety hazard | | | | |
|---|---|------------|------------|------------|
| SYSTEM | CRITICAL FAILURE | CATEGORY 1 | CATEGORY 2 | CATEGORY 3 |
| Power Distribution System | Aerial span wire down | X | | |
| | Emergency Cable Locates | X | | |
| | Faulty photo control circuit | | X | |
| | Pole knocked down or hit | X | | |
| | Power Supply knocked down, failure, damaged, de-energized or displaced | X | | |
| | Unattended and unsecured cabinet or enclosure | X | | |
| Illumination (Highway, High Mast) | Aerial span wire down | X | | |
| | All lighting not functioning at a Power Supply | X | | |
| | Emergency Cable Locates | X | | |
| | Faulty photo control circuit | | X | |
| | Greater than 30% of the luminaires connected to a Power Distribution System not functioning | | X | |
| | Greater than 40% of the luminaires not functioning at a Partial Illumination Critical Point | | X | |
| | Overhead equipment unfastened or hanging over roadway | X | | |

| CATEGORY 1 - System components are degraded or not working at all and there is an elevated priority due to a Major Incident or immediate safety hazard. CATEGORY 2 - Major system components are degraded or not working at all and there no immediate safety hazard. CATEGORY 3 - Minor system component is degraded or not working at all and there no immediate safety hazard | | | | |
|---|--|------------|------------|------------|
| SYSTEM | CRITICAL FAILURE | CATEGORY 1 | CATEGORY 2 | CATEGORY 3 |
| | Parking lot lighting | | | X |
| | Pole knocked down or hit | X | | |
| | Unattended and unsecured cabinet or enclosure | X | | |
| | Unbalance, unlatched or partially unlatched high mast lighting ring | X | | |
| Permanent Data Collection Stations, Cathodic Protection, Emergency Services Access Gates | Communication failure | | | X |
| | Controller control cabinet or enclosure knocked down, damaged or displaced | X | | |
| | Emergency Cable Locates | X | | |
| | Emergency Services Access Gate not functioning | X | | |
| | Pole knocked down or hit | | | X |
| | Unattended and unsecured cabinet or enclosure | X | | |
| | UPS system failure | | | X |

Table 9-2

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|---------------------------------|---|-------------------|-----------------|
| Non-Routine Maintenance | | | |
| Electrical System (Medium CPQF) | Response to Category 1 Critical Failures upon Detection | 2 hours | 30 minutes |
| Electrical System (Medium CPQF) | Response to Category 2 Critical Failures upon Detection | 24 hours | 1 hour |
| Electrical System (NCR process) | Response to Category 3 Critical Failures upon Detection | Next Business Day | 1 Business Day |

9.3 Highway Lighting

Maintenance of Highway Lighting Systems shall be according to the following Maintenance Standards detailed in 9-3.

Routine Maintenance activities on all Highway Lighting Systems within the Highway Corridor Lands shall include:

- i. Minor Maintenance including inspecting, checking, elementary testing, cleaning, lubricating and performing minor repairs from the ground on all Highway Lighting System components including luminaires, lighting brackets, wiring, fuses, poles, frangible and safety bases, anchorage

- assemblies, pads and footings, lowering and raising devices within the Contract a minimum of once per year.
- ii. Major Maintenance including overhauling, testing and replacement of faulty components on all Highway Lighting System components including luminaires, lighting brackets, wiring, fuses, grounding, poles, pole bases, frangible and safety bases, anchorage assemblies, pads and footings within the Contract on a 4-year cycle starting in 2020.
 - iii. Detailed inspecting, checking, elementary testing, cleaning (including the reflector, refractor and inside the fixture), lubricating and performing minor repairs on conventional, underpass, tunnel and facility lighting on a 4-year cycle concurrent with the 4-year relamping cycle. For LED luminaires, the cleaning shall include the optical assemblies and heat-sinks.
 - iv. Replace all non-LED lamps on conventional, underpass, tunnel and facility lighting on a 4-year cycle. All lamps shall be replaced with the same type, including the exact same photometric distribution.
 - v. LED luminaires will not be replaced on a schedule but shall be replaced as required.

Some power supplies provide power to both Highway Lighting Systems and Intelligent Transportation Systems and other electrical facilities. Maintenance on the Highway Lighting Systems shall be performed without de-energizing the other system.

Table 9-3

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|------------------------------------|--|------------------------|-----------------|
| Highway Lighting | | | |
| Full Illumination (NCR process) | More than 2 consecutive luminaires not functioning shall be repaired upon Detection | 7 Days | 1 Business Day |
| | Greater than 30% of luminaires connected to the Power Distribution System not functioning shall be repaired upon Detection | 24 hours | 1 Business Day |
| | Any single luminaire not functioning shall be repaired upon Detection | Next maintenance cycle | 1 Business Day |
| Partial Illumination (NCR process) | Greater than 40% of the luminaires at Critical Point not functioning shall be repaired upon Detection | 24 hours | 1 Business Day |
| | Any single luminaire not functioning shall be repaired upon Detection | 7 Days | 1 Business Day |
| Maintenance (NCR process) | Complete all Maintenance according to this specification | Zero Time | 1 Business Day |

9.4 High Mast Lighting

Maintenance Standards

Maintenance of high mast lighting shall be according to the following Maintenance Standards as detailed in Table 9-4.

Routine Maintenance activities on all High Mast Lighting Systems shall include:

- vi. Minor Maintenance including inspecting, checking, elementary testing, operational testing, cleaning, lubricating and performing minor repairs on all non-latching High Mast Lighting System components including luminaires, lighting brackets, wiring, poles, lowering and raising devices, anchorage assemblies, pads and footings, within the Contract a minimum of once every six months.
- vii. Major Maintenance including overhauling, testing and replacement of faulty components on all latching or non-latching High Mast Lighting System components including luminaires, lighting brackets, wiring, poles, lowering and raising devices, anchorage assemblies, pads and footings, within the Contract a minimum of once every six months.
- viii. Minor Maintenance including inspecting, checking, elementary testing, cleaning, lubricating and performing minor repairs on all top-latching High Mast Lighting System components including luminaires, lighting supports, wiring, poles, lowering and raising devices, anchorage assemblies, pads and footings, lowering and raising devices within the Contract a minimum of once every two years.
- ix. Major Maintenance including overhauling, testing and replacement of faulty components on all top-latching High Mast Lighting System components including luminaires, lighting brackets, wiring, poles, lowering and raising devices, anchorage assemblies, pads and footings within the Contract a minimum of once every two years.
- x. Replace all conventional lamps on High Mast Lighting System on a 4-year cycle starting in 2020. Lamps shall be replaced with the same type, including the exact same photometric distribution.
- xi. LED luminaires will not be replaced on a schedule but shall be replaced as required.
- i. Some power supplies provide power to both High Mast Lighting Systems and Intelligent Transportation Systems and other electrical facilities. Maintenance on the Highway lighting systems shall be performed without de-energizing the other system.

Table 9-4

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|---------------------------|---|---------------|-----------------|
| High Mast Lighting | | | |
| Luminaires (NCR process) | Any luminaire not functioning shall be repaired upon Detection | 10 Days | 1 Business Day |
| | Non-functioning luminaires replaced when greater than 25% of the luminaires per high mast lighting pole not functioning | 2 Days | 1 Business Day |
| Maintenance (NCR process) | Complete all Maintenance according to this specification | Zero Time | 1 Business Day |

9.5 Permanent Data Collection Stations

Maintenance Standards

Maintenance of permanent data collection stations shall be according to the following Maintenance Standards including Table 9-5.

Routine Maintenance activities on all Permanent Data Collection Stations shall include:

- i. Inspecting, checking, changing, cleaning, summarizing, winterizing, replacing door filter, lubricating and performing minor repairs on all Permanent Data Collection Stations including heater, fan, screws, electrical connections, gasket, thermostats, filter assembly, cabinet/building, door, door handle and lock, digital timers, pole/pedestal, mounting hardware, grass/debris, rodents & insects, light bulb, overhead wiring, loop(s), telephone line, telecommunication modems, wireless VPM modems, counter battery, power supplies and perform Loop Detector Readings within the Contract two times per year between April 1st and May 31st, and between October 1st and November 30th.
- ii. Replace the Cortec corrosion inhibitors every 18 months.

A System Integration Test shall be completed by the manufacturer's authorized representative, for each Non-Routine Maintenance response.

Table 9-5

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|---------------------------------------|---|---------------|-----------------|
| Permanent Data Collection Stations | | | |
| Routine Maintenance (NCR process) | Complete all Maintenance according to Standards | Zero Time | 1 Business Day |
| System Integration Test (NCR process) | Station passes the SIT and is collecting data continually for 14 Days after permanent repairs are completed | Zero Time | 1 Business Day |

9.6 Power Distribution System and Grounding

Maintenance Standards

Maintenance of Power Distribution Systems shall be according to the following Maintenance Standards as detailed in Table 9-6.

Routine Maintenance activities of Power Distribution System shall include:

- i. Minor Maintenance including inspecting, checking, elementary testing, cleaning, lubricating and performing minor repairs on all components including wiring, fuses, poles, frangible and safety bases, anchorage assemblies, pads and footings within the Contract a minimum of once per year.
- ii. Major Maintenance including overhauling, testing and replacement of faulty components including wiring, fuses, breakers, UPS systems, grounding, poles, pole bases, frangible and safety bases, anchorage assemblies, pads and footings, sub-stations, distribution assemblies, cabinets and power supplies on a 4-year cycle.
- iii. Solar panels shall be clean and clear, so there are no interruptions of continuous operations.
- iv. Check all 120 VAC line and ground rods, once every 12 months.
- v. Replace all UPS batteries on a 5-year cycle. Batteries shall be replaced with the same type, voltage and Amp-Hour capacity.

Table 9-6

| Maintenance Standard | | REMEDY PERIOD | REMEDIAL PERIOD |
|---|--|---------------|-----------------|
| Power Distribution System and Grounding | | | |
| Solar Panels (NCR process) | Solar panel output diminished, which causes interruption of continuous operations due to obstruction, dirt or snow to be repaired upon Detection | 2 Days | 1 Business Day |
| Routine Maintenance (NCR process) | Complete all Routine Maintenance according to the Standards | Zero Time | 1 Business Day |

Solar Panels within the Highway Corridor Lands shall be cleaned a minimum of three times per year (Feb, Jun, and Oct).

Appendix H

Pipe Installation by Trenchless Methods

Non Standard Special Provision

1. SCOPE

This Special Provision covers the requirements for pipe installation by various trenchless methods.

DB Co shall select the trenchless method of installation.

American Water Works Association (AWWA)

C206-03 Field Welding of Steel Water Pipe

3.0 DEFINITIONS

For the purposes of this Appendix H, the following definitions apply:

Backreamer means a cutting head designed for the soil conditions and is attached to the leading end of a drill string to enlarge the pilot bore during a pullback operation to enable installation of the product.

Bore Path means a drilled path according to the grade and alignment tolerances specified in the Project Agreement and DB Co's design.

Carrier Pipe means a final pipe in direct contact with the material being conveyed.

Drilling Fluid Fracture or Frac Out means a condition where the drilling fluid's pressure in the bore is sufficient to overcome the in situ vertical confining stress, thereby fracturing the soil and allowing the drilling fluids to migrate to the surface at an unplanned location.

Drilling Fluids means a mixture of water and additives, such as bentonite, polymers, surfactants, and soda ash, designed to block the pore space on a bore wall, reduce friction in the bore, and to suspend and carry cuttings to the surface.

Entry Point means the location or excavation from which the bore is initiated for the installation of product.

Exit Point means the location or excavation to which the bore is directed for the installation of product.

Fusion means connecting product lengths into a continuous length using elevated temperatures and pressure.

Guidance System means an electronic system capable of indicating the position, depth, and orientation of the drill head during the drilling process.

Horizontal Directional Drilling (HDD) means directional boring or guided horizontal boring.

Inadvertent Returns means the flow of unexpected fluids towards the drilling rig that typically originated from an artesian aquifer encountered during the drilling process.

Launch Pit means an access excavation or existing access structure to an existing product for the insertion of the pipe bursting head and new product.

Loss of Circulation means the discontinuation of the flow of slurry in the bore back to the entry or exit point or other planned recovery points.

Multi Product Installation means two or more products installed in the same bore path. The products may or may not have the same diameters.

Pilot Bore means the initial bore to set horizontal and vertical alignment between the connecting points.

Pipe Bursting means the application of a pipe bursting head into the interior of and along the length of an existing product to split or fracture the existing product so that the existing product and surrounding material is opened up to a sufficient size to accommodate the insertion of a new product in the cavity created, without leaving any significant voids around the new product. Pipe bursting methods include static, pneumatic, and hydraulic. Pipe bursting is also known internationally as pipe cracking or pipe splitting.

Pipeline means to include sewers, culverts, watermains, and forcemains.

Product means pipelines, conduits, cable, or ducts.

Pull means the installation of one continuous reach of new product. Generally, a pull shall commence at a launch pit and terminate at a pull pit.

Pull Pit means an access excavation or existing access structure to an existing product to receive the new product or pipe bursting head or both.

Pullback means that part of the HDD method in which the drill string is pulled back through the bore path to the entry point, usually installing the product at the same time.

Reaming means a process for pulling a tool attached to the end of the drill string through the bore path to enlarge the bore and mix the cuttings with the drilling fluid. This could include multiple passes.

Rock means natural beds or massive fragments of the hard, stable, cemented part of the earth's crust that are igneous, metamorphic, or sedimentary in origin, which may or may not be weathered and includes boulders having a volume of 0.5 m³ or greater.

Single Product Installation means a single product installed into a bore path. The product may or may not have a tracer wire attached to it.

Slurry means a mixture of soil cuttings and drilling fluid.

Soil means all soils except those defined as rock, and excludes stone masonry, concrete, and other manufactured materials.

Strike Alert means a system that is intended to alert and protect the operator in the case of inadvertent drilling into an electrical utility cable. The strike alert system consists of a sensor and an alarm connected to the drill rig and a grounding stake. The alarm is set off when the sensor contacts 42.5 volts or 0.5 amperes. The alarm may be audio or visual or both.

Structure means a maintenance hole, valve chamber, or other such facility to access the product.

4.0 SUBMISSION AND DESIGN REQUIREMENTS

4.04 Submission Requirements

The following information shall be submitted to the City Representative for review a minimum of 14 days prior to commencing the pipe installation by trenchless method operations:

- a) A work plan outlining the procedure and schedule to be used to execute the work on the product service laterals, and structures.
- b) The work area layout.
- c) A list of personnel, including backup personnel, and their qualifications and experience.
- d) A traffic control plan.
- e) A safety plan, including the contracting company safety manual and emergency procedures.
- f) A settlement monitoring plan.
- g) Material and Equipment.
- h) Method for the removal of boulders and cobbles.

4.04.01 Jacking and Boring

When jacking and boring is selected as the trenchless method for pipe installation, DB Co shall also submit the following information, in addition to the submission requirements specified elsewhere, to the City Representative for review a minimum of 14 days prior to commencing the jacking and boring operations:

- a) Access shaft or pit design.
- b) Face support and other temporary support details.
- c) Excavation and dewatering plan.
- d) Grouting operation.
- e) Testing and monitoring plan.

The access shaft or pit details shall bear the seal and signature of an Engineer.

4.04.02 Horizontal Directional Drilling

When HDD is selected as the trenchless method for pipe installation, DB Co shall also submit the following information, in addition to the submission requirements specified elsewhere, to the City Representative for review a minimum of 14 days prior to commencing the HDD operations:

- a) A drilling fluid management plan including potential impacts and emergency procedures and associated contingency plans.

4.04.03 Pipe Bursting

When pipe bursting is selected as the trenchless method for pipe installation, DB Co shall also submit the following information, in addition to the submission requirements specified elsewhere, to the City Representative for review a minimum of 14 days prior to commencing the pipe bursting operations:

- a) Launch pit and pull pit locations.
- b) Working Drawings required to execute the work on the product.
- c) When fusion joining is used, written record of current training showing that the operator has been fully trained in the use of the fusion equipment by an authorized representative of the fusion equipment manufacturer and the product manufacturer or, when applicable, certified by the Owner or Utility Company for which the work is being completed.
- d) When applicable, product bypass and temporary supply system plans, including installation, operation, and testing procedures and a list of material and equipment to be used.
- e) Manufacturer's technical data containing complete information on new product:
 - i. Material composition, physical properties, inside diameter, and wall thickness.
 - ii. Maximum tensile strength and corresponding maximum allowable pulling force.
 - iii. Transporting, handling, and storing recommendations.
 - iv. Repair.
 - v. Fusion times and temperatures.
 - vi. Minimum bend radius.
 - vii. Recommended restraint method in structure.
 - viii. Product recovery requirements.
 - ix. Relaxation requirements.
- f) Contingency plans for the following potential conditions:
 - i. Unforeseen obstructions causing burst stoppage.
 - ii. Deviation from required alignment and grade.
 - iii. Extended service disruption.

- iv. Damage to the existing service connections and the replacement of product's structural integrity and methods of repair.
- iv. Damage to other existing Utilities.
- v. Soil heaving or settlement.
- vi. Contaminated soil or water.
- vii. Alignment passing through buried structures.

4.04.04 Pipe Ramming

When pipe ramming is selected as the trenchless method for pipe installation, DB Co shall also submit the following information, in addition to the submission requirements specified elsewhere, to the City Representative for review a minimum of 14 days prior to commencing the pipe ramming operations:

- a) Access shaft or pit design.
- b) Face support and other temporary support details.
- c) Excavation and dewatering plan.
- d) Grouting operation.
- e) Testing and monitoring plan.

The access shaft or pit details shall bear the seal and signature of an Engineer.

5.0 MATERIALS

5.01 Timber

Timber shall be sound, straight, and free from cracks, shakes, and large or loose knots.

5.02 Fittings

Fittings shall be suitable for and compatible with the class and type of pipe with which they will be used.

5.03 Valves

Valve type, class, pressure rating, and size shall be determined by DB Co and shall be suitable for the work.

5.04 Concrete Reinforcement

Steel reinforcing for concrete work shall be according to OPSS 1440.

5.05 Grout

Grout shall consist of a mixture of one part Portland cement according to OPSS 1301 and two parts mortar sand according to OPSS 1004, wetted with sufficient water to make the mixture plastic. Water shall be according to OPSS 1302.

5.08 Jacking and Boring

5.08.01 Pipe Materials

Concrete pipe shall conform to OPSS 1820.

Steel pipe shall conform to OPSS 1802 with welded joints.

5.09 Horizontal Directional Drilling

5.09.01 Drilling Fluids

The drilling fluids shall be mixed according to the manufacturer's recommendations and be appropriate for the anticipated soil conditions. Only bentonite and manufacturer-approved polymers shall be permitted for use as drilling fluids. All additives used shall be chemically inert, biodegradable, and non-toxic. No petroleum-based or detergent additives shall be permitted.

5.09.02 Pipe Materials

DB Co shall determine the pipe type and pipe class suitable for the Work.

5.10 Pipe Bursting

5.10.01 Pipe Materials

DB Co shall determine the pipe type and pipe class suitable for the Work.

5.10.02 Lubricant

Lubricant used to reduce friction, to maintain the annular space created by the pipe bursting head, and to allow the insertion of the new product shall be non-toxic and biodegradable.

5.11 Pipe Ramming

5.11.01 Pipe Materials

Steel pipe shall conform to OPSS 1802 with welded joints.

6.0 EQUIPMENT

6.01 Horizontal Directional Drilling

6.01.01 Directional Drilling Equipment

6.01.01.01 General

The directional drilling equipment shall consist of a directional drilling rig and a drilling fluid mixing and delivery system of sufficient capacity to successfully complete the product installation without exceeding the maximum tensile strength of the product being installed.

6.01.01.02 Drilling Rig

The directional drilling rig shall:

- a) consist of a leak-free hydraulically powered boring system to rotate, push, and pull hollow drill pipe into the ground at a variable angle while delivering a pressurized fluid mixture to a guidable drill head.
- b) contain a guidance system to accurately guide boring operations.
- c) be anchored to the ground to withstand the rotating, pushing, and pulling forces required to complete the product installation.
- d) be grounded during all operations or as specified by the drilling rig manufacturer.

6.01.01.03 Drill Head

The drill head shall be steerable by changing its rotation, be equipped with the necessary cutting surfaces and drilling fluid jets, and be of the type for the anticipated soil conditions.

6.01.01.04 Guidance System

The guidance system shall be setup, installed, and operated by trained and experienced personnel. The operator shall be aware of any magnetic or electromagnetic anomalies and shall consider such influences in the operation of the guidance system when a magnetic or electromagnetic system is used.

6.01.01.05 Drilling Fluid Mixing System

The drilling fluid mixing system shall be of sufficient size to thoroughly and uniformly mix the required drilling fluid.

6.01.01.06 Drilling Fluid Delivery System

The delivery system shall have sufficient flow capacity to ensure that all slurry volumes are adequate for the length and diameter of the final bore and the anticipated soil conditions. Connections between the delivery pump and drill pipe shall be leak-free.

6.02 Pipe Bursting

6.02.01 Pipe Bursting Head

The pipe bursting head shall be according to the manufacturer's specifications for head sizes recommended for various product diameters and types, as well as parameters associated with maximum allowable upsize percentages.

6.02.02 Pipe Bursting Power Source

The pipe bursting power source shall generate sufficient force to burst and compact the existing pipe product into the surrounding material. It must also be able to pull the new pipe product into place, if done simultaneously with the bursting operation without imparting undue stresses to the pipe product installed.

6.02.03 Fusion Equipment

Fusion equipment, when used, shall be size and rated for the product. Fusion clamps shall be sized to clamp the new product properly.

7.0 CONSTRUCTION

7.01 General

DB Co shall perform the pipe installation by a trenchless method as selected from the various methods described herein. An individual with previous experience in the selected method of installation shall supervise the work at all times.

The City Representative shall be notified at least 48 hours in advance of starting work.

The work area shall be kept sufficiently dry at all times to permit work to be performed in a safe and satisfactory manner.

7.02 Site Preparation

The work site shall be graded or filled to provide a level working area for the Equipment. No alterations beyond what is required for the selected pipe installation method shall be made. All activities shall be confined to designated work areas.

7.03 Preservation and Protection of Existing Facilities

Preservation and protection of existing facilities shall be according to OPSS 491 and as specified.

When specified in the Project Agreement and DB Co's design, an existing facility shall be exposed to verify its horizontal and vertical location. The number of exposures required to monitor work progress shall be as specified in the Project Agreement and DB Co's design.

7.04 Transporting, Unloading, Storing, and Handling Materials

Manufacturer's recommendations for transporting, unloading, storing, and handling of materials shall be followed.

7.05 Trenching, Backfilling, and Compacting

Trenching, backfilling, and compacting for entry and exit points or other locations along the pipeline installation shall be according to OPSS 401.

7.06 Support Systems

Support systems shall be according to OPSS 404.

7.07 Dewatering

Dewatering shall be according to OPSS 517.

7.08 Temporary Protection Systems

The construction of temporary protection systems shall be according to OPSS 539.

Where the stability, safety, or function of an existing roadway, railway, watercourse, other works, or proposed works may be impaired due to the method of operation, protection shall be provided. Protection may include sheathing, shoring, and piling where necessary to prevent damage to such works or proposed works.

7.09 Construction Shafts

Where required, construction shafts shall be provided at the locations determined by DB Co.

Shafts shall be maintained in a drained condition.

A secure fence shall be installed around the perimeter of the access shaft or pit area with gates and truck entrances. The fence shall be removed upon completion of the work.

7.10 Removal of Boulders and Cobbles

Methods for the removal of boulders and cobbles shall be according to DB Co's submissions. The City Representative shall be notified immediately of any obstructions encountered.

7.11 Jacking and Boring

7.11.01 Method of Jacking and Boring Procedure

The jacking and boring procedure to be used shall be submitted to the City Representative prior to commencing the work and shall be subject to the following limitations:

- a) Only smooth walled steel or concrete pipe shall be used.
- b) Hydraulically operated jacks of adequate number and capacity shall be provided to ensure smooth and uniform advancement without over-stressing of the pipe.
- c) A jacking head or collar shall be provided to transfer and distribute jacking pressure uniformly over the entire end bearing area of the pipe. In the case of concrete pipe, the jacking head shall be suitably padded.
- d) Two or more lubricated guide rails or sills shall be provided of sufficient length to fully support the pipe at the specified line and grade in the jacking pit.
- e) The jacking and boring procedure shall be compatible with the subsurface and groundwater conditions at the site.

7.11.02 Pipeline Installation

The pipeline shall be installed to the line, grade, and tolerance as designed.

When steel pipe is used as a carrier pipe, butt-welding of pipe joints shall be according to AWWA C206.

When steel pipe is used solely as a casing pipe, the welds shall be sufficient to support the jacking forces of the pipe installation.

The space between the casing pipe and the wall of the excavation shall be filled according to DB Co's submission on grouting operations.

The space between the casing pipe and the carrier pipe shall be filled according to DB Co's submission on grouting operations.

Joints shall be protected from crushing by placing 15 mm thick plywood on spigot shoulder. The plywood shall be cut to form a ring with the outer surface conforming to the outer circumference of the pipe.

7.11.03 Cathodic Protection

When specified in the Project Agreement and DB Co's design, cathodic protection on the casing pipe shall be provided.

7.12 Horizontal Directional Drilling

7.12.01 General

When strike alerts are provided on a drilling rig, they shall be activated during drilling and maintained at all times.

7.12.02 Preservation and Protection of Existing Facilities

Minimum horizontal and vertical clearances to existing facilities as specified in the Project Agreement and DB Co's design shall be maintained. Clearances shall be measured from the nearest edge of the largest backreamer required to the nearest edge of the facility being paralleled or crossed.

Existing underground facilities shall be exposed to verify its horizontal and vertical locations when the bore path comes within 1.0 m horizontally or vertically of the existing facility. Existing facilities shall be exposed by non-destructive methods. The number of exposures required to monitor work progress shall be as specified in the Project Agreement and DB Co's design.

7.12.03 Drilling Fluid Management

DB Co shall employ a containment, collection, and disposal method satisfactory to the City to prevent spillage of drilling fluids and inadvertent returns. DB Co shall immediately clean up and dispose of any spillages of drilling fluids.

7.12.04 Pilot Bore

The pilot bore shall be drilled along the bore path in accordance with the grade, alignment, and tolerances specified in the Project Agreement and DB Co's design. In the event the pilot bore does deviate, the City Representative shall be notified. The City Representative may require DB Co to pullback and re-drill from the location along the bore path before the deviation. In the event that a drilling fluid fracture, inadvertent returns, or loss of circulation occurs during pilot bore drilling operations, the City Representative shall be advised of the event and of the action taken.

If a drill hole beneath a road must be abandoned, the hole shall be backfilled with grout or bentonite to prevent future subsidence.

7.12.05 Reaming

When necessary, the bore shall be reamed using the appropriate tools to a diameter 50% greater than the outside diameter of the products to a maximum 300 mm beyond the product diameter.

The drilling mud in the annular region should not be removed after installation, but permitted to solidify and provide support for the pipe and surrounding soil.

7.12.06 Product Installation

7.12.06.01 General

The product shall be jointed according to manufacturer's recommendations. Where space and the Project Agreement and DB Co's design permit, the length of the product to be pulled shall be jointed as one length before commencement of the pulling operation.

The product shall be protected from damage during the pullback operation.

The minimum allowable bending radius for the product shall not be exceeded at the entry point, exit point, or any other location along the bore path.

Product shall be allowed to recover before the connection to new or existing facility is made. Product recovery time shall be according to manufacturer's recommendations.

A tracer wire shall be supplied and installed along with the product.

7.12.06.02 Pullback

After successfully reaming the bore to the required diameter, the product shall be pulled through the bore path. Once the pullback operation has commenced, it shall continue without interruption until the product is completely pulled into bore.

A swivel shall be used between the reamer and the product being installed to prevent rotational forces from being transferred to the product. When specified in the Project Agreement and DB Co's design, a weak link or breakaway connector shall be used to prevent excess pulling force from damaging the product.

The product shall be inspected for damage where visible at excavation pits and where it exits the bore. Any damage noted shall be rectified to the satisfaction of the City.

7.12.07 Product Testing

Where required, product testing shall be as specified in the Project Agreement and DB Co's design.

7.12.08 Record Keeping

Verification record requirements of the alignment and depth of the installed product shall be as specified in the Project Agreement and DB Co's design. A copy of the verification records shall be given to the City Representative at the completion of the HDD operations.

7.13 Pipe Bursting

7.13.01 General

The product shall be installed following the alignment and grade of the existing pipe and to the ovality specified in the Project Agreement and DB Co's design.

Launch pits and pull pits shall be sized to allow the use of the pipe bursting equipment and to allow the product to be installed such that the product manufacturer's recommendations for product bending radius are not exceeded.

7.13.02 Product By-Pass

When specified in the Project Agreement and DB Co's design, during the execution of the work the flow within the existing product shall be bypassed around the product being replaced and the continuity of service to each facility connected to the affected section of product shall be maintained.

The pumps and by-pass lines shall be of adequate capacity and size to handle all flows.

7.13.03 Preparation of Existing Product and Structures

All existing crosses, tees, valves, and service connections shall be located, exposed, and disconnected prior to any pipe bursting operation.

Prior to pipe bursting, the inlets, outlets, and benching of existing structures shall be enlarged sufficiently for clearance of the pipe bursting head and the new product. Enlargements shall be made neatly and be no greater than that required for their purpose. Size of the enlargements shall be sufficient to allow for restoration and sealing to the new product.

Existing product shall be cleared of obstructions (e.g., rocks and debris) or mechanical obstructions (e.g., repair sleeves, clamps, couplings, and intolerable deviations in grade or alignment) prior to pipe bursting.

7.13.04 Product Joining

7.13.04.01 Genera

The product shall be joined according to the manufacturer's recommendations.

The product shall be assembled and joined at the site to provide a leak-proof joint.

When space and the Project Agreement and DB Co's design permit, the length of the product to be pulled shall be joined as one length prior to the commencement of the pulling operation.

When used, fusion shall be performed by technicians trained in the use of the fusion equipment.

Joints shall be capable of withstanding the loading of the installation process. All joints shall be subject to acceptance by the City prior to insertion.

7.13.04.02 Connection to Product or Structures

Product shall be allowed to recover from any induced stresses and strains before connection to new or existing product or structures are made. Product recovery time shall be according to the manufacturer's recommendations.

The product connection to the structure or to an existing product shall be leak-proof.

7.13.04.03 Service Connections

Service connection work shall be as specified in the Project Agreement and DB Co's design.

Service connection work shall not commence until the product has fully recovered.

7.13.04.04 Product Installation

Installation procedures shall be according to the product manufacturer's guidelines.

The product shall be protected from damage during the installation process.

Suitable guides shall be used to protect the product from damage at the insertion point and at any intermediate re-entry points.

Upon commencement of the bursting process, product insertion shall be continuous from the launch pit to the pull pit, except when approved by the City. A pushing machine may be used to assist insertion from the rear.

When specified in the Project Agreement and DB Co's design, a weak link, breakaway connector, or load monitor shall be used to prevent excess pulling force from damaging the product.

7.13.04.05 Structures and Valves

When the new product enters or exits an existing structure, the structure wall shall be restored as specified in the Project Agreement and DB Co's design. Restoration shall securely locate and anchor the new product in the wall and shall produce a leak-proof seal.

The existing structure's benching shall be restored according to the requirements of the new product, any other incoming product, and as specified in the Project Agreement and DB Co's design.

When new structures or valves are specified, they shall be installed according to OPSS 407 and OPSS 441, respectively.

7.13.04.06 Testing

Testing of the product joining and installation shall be as specified in the Project Agreement and DB Co's design.

7.13.04.07 Record Keeping

Verification record requirements of the alignment and grade of the installed product shall be as specified in the Project Agreement and DB Co's design. A copy of the verification records shall be given to the City Representative at the completion of the pipe bursting operations.

7.14 Pipe Ramming

7.14.01 Method of Pipe Ramming Procedure

Method of installation to be used by DB Co shall be reviewed with the City Representative prior to commencing the work and shall be subject to the following limitations:

- a) Only smooth walled steel pipe shall be used.
- b) Pipe ramming equipment of adequate capacity shall be provided to ensure smooth and uniform advancement without overstressing of the pipe.
- c) A ramming head shall be provided to transfer and distribute jacking pressure uniformly over the entire bearing area of the pipe.
- d) Two or more lubricated guide rails or sills shall be provided of sufficient length to fully support the pipe at the specified line and grade in the ramming pit.

7.14.02 Product Installation

The pipeline shall be installed to the line, grade, and tolerance as specified in the Project Agreement and DB Co's design.

Long delays shall be avoided between pipe ramming operations.

Butt welding of pipe joints shall conform to AWWA C206.

Any distribution to the ground surface (heaving) as a result of the pipe ramming shall be immediately corrected by DB Co.

The space between the casing pipe and the wall of the excavation shall be filled according to DB Co's submission on grouting operations.

7.14.03 Excavated Materials

Satisfactory reusable excavated material required for backfill shall be separated from unsuitable excavated material.

7.15 Site Restoration

Site restoration shall be according to OPSS 492.

7.16 Certificate of Conformance

Certificates of conformance shall be submitted for all work for which Working Drawings are submitted.

A completed certificate of conformance shall be submitted to the City Representative upon completion of the work. The Quality Verification Engineer's seal and signature shall be affixed on the completed certificate of conformance confirming that work has been completed in general conformance with the Working Drawings and Project Agreement and DB Co's design.

7.17 Management of Excess Materials

Management of excess materials shall be according to the Project Agreement and DB Co's design.

SCHEDULE 16

ENCUMBRANCES

- (a) For the purposes of this Schedule 16, the defined term “Lands” shall include any portion of the Lands.
- (b) Each of the following, to the extent affecting the interest (whether real property interest or contractual interest) of the City in the Lands or any other person who owns the Lands (or any part thereof), is, in each case, considered to be an encumbrance for the purposes of the Project Agreement (each, an “**Encumbrance**”):
 - (i) all encumbrances, pledges, liens, charges, security agreements, security interests, leases, subleases, title retention agreements, mortgages, easements, encroachments, rights-of-way, restrictive covenants, work orders, options or adverse claims of any kind or character whatsoever relating to the title to the Lands disclosed or noted on the land registry office parcel registers or abstract indices for the Lands from time to time, including (but not limited to) those that may have been included in the Background Information as of the date of the Project Agreement, those described or contemplated in Schedule 20 - Lands and including those referred to in the legal descriptions for the Lands available in the applicable land registry office, in each case as assigned, amended, extended, supplemented, substituted and replaced from time to time;
 - (ii) liens, charges or prior claims for taxes (which term includes charges, rates and assessments) or utilities (including levies or imposts for sewers and other municipal utility services) not yet due or if due, the validity of which is being contested in good faith, and liens or charges for the excess of the amount of any past due taxes or utilities charges for which a final assessment or account has not been received over the amount of such taxes or utilities charges as estimated and paid by the City;
 - (iii) inchoate liens incidental to construction, renovations or current operations, a claim for which shall not at the time have been registered against the Lands or of which notice in writing shall not at the time have been given to the City pursuant to the CA or otherwise or any lien or charge, a claim for which, although registered, or notice of which, although given, relates to obligations not overdue or delinquent and in respect of any of the foregoing cases, the City has, where applicable, complied with the holdback or other similar provisions or requirements of the relevant construction contracts;
 - (iv) the rights reserved to or vested in the public or any municipality or governmental or other public authority by any statutory provision;
 - (v) any subsisting reservations, limitations, provisions and conditions contained in any grants from the Crown of any land or interests therein, including reservations of under-surface rights to mines and minerals of any kind including rights to enter, prospect and remove the same;
 - (vi) any encroachments, easements, rights-of-way, rights to use or similar interests revealed by any survey of the Lands or which would be revealed by an up-to-date survey of the Lands;

- (vii) any rights in favour of or accruing to holders of under-surface rights which could be ascertained by a review of registered title or other public records, or, if unregistered, which do not materially interfere with the use of the Lands for the purposes of the Works;
- (viii) unregistered agreements with any municipal, provincial or federal governments or authorities and any public utilities or private suppliers of services, provided such unregistered agreements have been disclosed to DB Co, are described in Schedule 20 - Lands or could be ascertained by commercially standard off-title searches, or, if not so disclosed, described, or ascertainable, which do not materially interfere with the use of the Lands for the purposes of the Works, and further provided that such agreements have been complied with up to Financial Close, or, if not complied with (excluding non-compliance by DB Co and DB Co Parties), that any non-compliance does not materially interfere with the use of the Lands for the purposes of the Works;
- (ix) unregistered agreements, authorizations, consents, postponements, subordinations, licences or instruments entered into provided that they have been disclosed to DB Co, are described in Schedule 20 – Lands or could be ascertained by commercially standard off-title searches, or, if not so disclosed, described or ascertainable, which do not materially interfere with the use of the Lands for the purposes of the Works, and further provided such agreements, authorizations, consents, postponements, subordinations, licences or instruments have been complied with up to Financial Close, or, if not complied with (excluding non-compliance by DB Co and DB Co Parties), that any non-compliance does not materially interfere with the use of the Lands for the purposes of the Works;
- (x) unregistered easements, rights-of-way, rights to use, restrictions, restrictive covenants and similar rights in real property or any interest therein provided that they have been disclosed to DB Co, are described in Schedule 20 – Lands or which could be ascertained by commercially standard off-title searches, or if not so disclosed, described or ascertainable, which do not materially interfere with the use of the Lands for the purposes of the Works, and further provided such easements, rights of way, rights to use, restrictions, restrictive covenants and similar rights or interests have been complied with up to Financial Close, or, if not complied with (excluding non-compliance by DB Co and DB Co Parties), that any non-compliance does not materially interfere with the use of the Lands for the purposes of the Works;
- (xi) zoning (including, without limitation, airport zoning regulations), land use, property standards and building by-laws and ordinances, and federal, provincial or municipal by-laws and regulations;
- (xii) minor imperfections of title;
- (xiii) statutory exceptions to title and any rights reserved to or vested in any person by any statutory provision;
- (xiv) the right of any prior owner, occupant or tenant of any portion of the Lands to occupy any portion of the Lands or to remove buildings, fixed machinery, equipment, fittings or other fixtures located on such portion of the Lands; and
- (xv) the rights of any person entitled to any portion of the Lands through length of adverse possession or prescription.

| 8.1 | Application of Performance Criteria | 25 |

PART 1 DEFINITIONS

- 1.1** **“Construction Activities Incident”** has the meaning given in Section 5.1(e).
- 1.2** **“Construction Complaints Protocol”** has the meaning given in Section 4.15(b).
- 1.3** **“Communications Performance Report”** has the meaning given in Section 4.16(a).
- 1.4** **“Communications and Stakeholder Engagement Objectives”** has the meaning given in Section 2.2(a).
- 1.5** **“Communications and Stakeholder Engagement Plan”** has the meaning given in Section 3.1(a)(i).
- 1.6** **“Communications and Stakeholder Engagement Working Group”** has the meaning given in Section 6.1(a).
- 1.7** **“Crisis Communication Plan”** has the meaning given in Section 4.4(a).
- 1.8** **“DB Co Communications and Stakeholder Engagement Team”** has the meaning given in Section 3.2(a)(xix).
- 1.9** **“Key Milestone Celebrations”** means celebrations and larger events with the objective of building momentum for the Project, recognizing project milestones and partners. These celebrations include groundbreakings, progress events, and substantial completion.
- 1.10** **“Stakeholder Relations”** has the meaning given in Section 2.2(a)(i).

PART 2 PRINCIPLES, OBJECTIVES AND SCOPE

2.1 Communications and Stakeholder Engagement Principles

- (a) The Project represents an important infrastructure commitment by the City. Comprehensive plans for communications and Stakeholder engagement are required to ensure Stakeholders are informed and engaged where necessary and to meet the City's communications and Stakeholder engagement requirements.
- (b) The City and DB Co shall work together to deliver these communications and Stakeholder engagement activities pursuant to the Project Agreement, including this Schedule 18.
- (c) The City will act as the public face of the project and lead on all Stakeholder relations and communications activities.
- (d) DB Co acknowledges that:
 - (i) DB Co is the City's and the Stakeholders' primary source of information with respect to all matters within DB Co's control for the Project; and
 - (ii) the City, at all times during the Project Term, shall rely upon DB Co not only to anticipate matters which may be of interest and concern to Stakeholders during the Project Term (based on its experience as well as lessons learned during the course of the Project), but also to proactively organize and disseminate such information in accordance with its obligations in the Project Agreement.

2.2 Communications and Stakeholder Engagement Objectives

- (a) The Communications and Stakeholder Engagement Objectives of the Project are as follows:
 - (i) to engage with Stakeholders to provide targeted information to area residents and businesses on the Project design and Construction Activities and their potential impacts ("Stakeholder Relations") by:
 - (A) communicating disruptions, such as detours, overnight work, traffic adjustments and beginning of construction, in an effective and timely manner;
 - (B) providing public information and consultation opportunities to ensure Stakeholders are informed and engaged throughout to minimize complaints and increase understanding of the Project;
 - (C) ensuring Stakeholder input is obtained in a timely manner so that it may be properly considered by the Parties; and
 - (D) continuing to work with established community working groups and other networks identified during the planning and Environmental Assessment phase.
 - (ii) To communicate in a manner that builds excitement and understanding of the Project by:
 - (A) developing momentum-building communications to promote the Project, including

Key Milestone Celebrations, signage, hoarding, and advertising;

- (B) developing resources and templates to effectively and consistently communicate with Stakeholders; and
- (C) recognizing the contribution of the Parties in this Project Agreement and the City's funding partners.

2.3 Communication and Stakeholder Engagement Scope

- (a) The scope of this Schedule 18 includes, but is not limited to, all print, event and electronic communications and Stakeholder engagement related to: planning, design, Environmental Approvals, Construction Activities, Project milestones, community and Stakeholder relations, media relations, media and governmental events, other special events, public information meetings, branded products, the Project website, social media, complaints and issues related to the Project, and any responses to such complaints or issues.

**PART 3 COMMUNICATIONS AND STAKEHOLDER ENGAGEMENT RESPONSIBILITIES
DURING THE PROJECT TERM**

3.1 City Responsibilities

- (a) The City will assume the lead communications and Stakeholder engagement role and will have the primary responsibility for all communications matters and Stakeholder Relations related to the Project. The City will:
 - (i) develop a yearly updated Project communications and stakeholder engagement plan (the “**Communications and Stakeholder Engagement Plan**”) with input from DB Co;
 - (ii) develop and provide tools and templates for all communications and Stakeholder engagement Project materials, unless otherwise specified in this Schedule 18;
 - (iii) develop and maintain a website, with input from DB Co;
 - (iv) provide identified, dedicated lead communications and Stakeholder engagement contacts;
 - (v) act as the primary media contact for the Project;
 - (vi) provide final review and approval of all communications and Stakeholder engagement materials;
 - (vii) communicate promptly with all relevant parties on Project issues; and
 - (viii) provide coordinated updates to Stakeholders.

3.2 DB Co Responsibilities

- (a) DB Co shall:
 - (i) carry out all activities required to fulfill all of DB Co’s communications and Stakeholder obligations in accordance with this Schedule 18;
 - (ii) along with the City, participate in the development of Communications and Stakeholder Engagement Plans, and develop the Crisis Communication Plan in consultation with the City and Stakeholders and in accordance with this Schedule 18;
 - (iii) implement and comply with all plans, protocols and other documentation that have been reviewed and approved by the City and in accordance with this Schedule 18;
 - (iv) provide all information, materials and support to the City, as the City may reasonably require, in accordance with the requirements in the Communications and Stakeholder Engagement Plan and this Schedule 18;
 - (v) assist the City in responding to media, government and public enquiries related to the Project including but not limited to subject-matter expertise, key facts and media questions and answers in accordance with the requirements in the Communications and

Stakeholder Engagement Plan and this Schedule 18;

- (vi) provide, where required by the City, Project experts, to include but not be limited to design and construction engineers and environmental specialists to participate in special events, Stakeholder events and outreach meetings;
- (vii) in accordance with Part 5 of this Schedule, provide regular notifications to the City related to the management of local traffic during the Construction Period and ensure communication obligations in relation to the TTMP as detailed in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access are fulfilled;
- (viii) attend special events, site tours and Stakeholder events and Stakeholder outreach meetings in accordance with Part 4 of this Schedule;
- (ix) work with the City to build and foster relationships with local businesses and the public in order to address the community's concerns about the Works;
- (x) make staff available to respond to enquiries from Stakeholders about the Works;
- (xi) support the City in providing regular updates to immediately-affected property owners, tenants and neighbourhoods on Works related issues;
- (xii) support the City in notifying affected residents and businesses of Construction Activities in accordance with Part 5 of this Schedule;
- (xiii) provide any necessary information required to demonstrate compliance with and fulfillment of the consultation related provisions of the Environmental Assessments and any other Environmental Approvals as detailed in Schedule 17 – Environmental Obligations;
- (xiv) support the City in making communications materials accessible to the public by meeting the City's Accessibility Standards in compliance with the *Accessibility for Ontarians with Disabilities Act* (AODA) and in keeping with the City's Accessibility Policy and Procedures;
- (xv) support the City in making communications materials available in French and English where required by the City in compliance with the City's Bilingualism Policy;
- (xvi) work with all DB Co Parties, the City, and Project Stakeholders in carrying out DB Co's obligations as set out in this Schedule 18;
- (xvii) ensure that DB Co and DB Co Parties exhibit a high degree of professionalism and courteousness with respect to carrying out all of DB Co's obligations under this Schedule 18, including:
 - (A) attendance at City-requested special events, site tours, Stakeholder events and Stakeholder outreach meetings;

- (B) managing staff and contractor parking such that it does not negatively impact neighbourhood or business access;
 - (C) not littering; and
 - (D) protecting and restoring any affected City and Third Party Facilities adjacent to the Works, in accordance with Schedule 15-2, Part 1, Article 4.1.
- (xix) provide a description of DB Co's dedicated communications and Stakeholder engagement team (the "**DB Co Communications and Stakeholder Engagement Team**"), within 45 days of Financial Close, including the roles, responsibilities and experience of each team member and DB Co Party who will assist the implementation of Schedule 18. The DB Co Communications and Stakeholder Engagement Team shall:
- (A) be led by a Director of Communications and Stakeholder Engagement who:
 - 1) shall have the qualifications set out in Schedule 9 – Key Individuals;
 - 2) is a member of DB Co's management team;
 - 3) is responsible for acting as the media spokesperson;
 - 4) possesses demonstrated relevant communications experience.
 - (B) provide sufficient other members of the team to meet the obligations of this Schedule who have relevant experience in communications writing, media relations, crisis communications, issues management, corporate and community relations;
 - (C) include at least one member acting as a Stakeholder outreach coordinator; and
 - (D) each member of the DB Co Communications and Stakeholder Engagement Team other than the Director shall possess a minimum of five years of transit or transportation construction-related communications experience.
- (b) DB Co acknowledges and agrees that, notwithstanding any other provision in this Schedule 18, the City will review and approve all communications and Stakeholder engagement materials with respect to the Project, and DB Co may not make any communications or disseminate any materials to Stakeholders with respect to the Project without the prior consent of the City.

3.3 Communications and Stakeholder Engagement Plan

- (a) The DB Co Communications and Stakeholder Engagement Team shall, no later than 60 days following Financial Close participate in the first Communications and Stakeholder Engagement Working Group meeting where the City will present an initial outline of the Project Communications and Engagement Plan.
- (b) Based on the outline of the Project Communications and Engagement Plan and in accordance with Schedule 18, DB Co will prepare a description of its communications and Stakeholder engagement requirements, including the DCR Consultation Plan, as part of the Communications and Stakeholder Engagement Plan no later than 90 days following Financial Close. This description will include the first submission of the first yearly construction schedule as detailed in Section 4.3(a)(i).

- (c) DB Co shall participate with the City in a workshop to finalize the Communications and Stakeholder Engagement Plan. The City's communications and stakeholder engagement lead will organize and chair the workshop no later than 120 days following Financial Close.
- (d) DB Co shall participate with the City to update the Communications and Stakeholder Engagement Plan:
 - (i) on an annual basis; or
 - (ii) more frequently as may be requested by the City, or as may be required to account for any changes in the circumstances of, or lessons learned with respect to the Project.

PART 4 COMMUNICATIONS AND STAKEHOLDER ENGAGEMENT ACTIVITIES

4.1 Communications Activities - General

- (a) DB Co shall support the following communication activities during the Construction Period as requested by the City, including:
 - (i) Project communications via the Project website and social media;
 - (ii) construction schedule for communications;
 - (iii) crisis communications;
 - (iv) issues management;
 - (v) media relations;
 - (vi) government reporting;
 - (vii) special events, site tours and trade shows;
 - (viii) Stakeholder events and Stakeholder outreach meetings;
 - (ix) hoarding design, installation and maintenance during the Construction Period;
 - (x) signage and branding;
 - (xi) advertising communications and marketing;
 - (xii) Project identity and graphic design;
 - (xiii) photography and video;
 - (xiv) renderings; and
 - (xv) crisis management.

4.2 Communications via the Project Website and Social Media

- (a) During the Construction Period, DB Co shall:
 - (i) support the City's social media strategy for the Project (which may include tools such as Twitter, Facebook, YouTube and Flickr) and the City's Project websites' static (written) and dynamic (multimedia) content, by providing, for review and approval by the City, where the quality of the photography and video is as described in Section 4.13:
 - (A) a monthly feature web article highlighting, but not limited to, one aspect of the Project including, design, innovations on the Project, feature on local workers,

general contractors or local companies, Construction Activities, or Project benefits, with a minimum length of 500 words, as well as two related Twitter posts for the Project's Twitter account;

- (B) a weekly construction update on Project construction that provides a recent summary of construction work completed and upcoming work along the alignment including high-quality representative professional photographs (see Section 4.13 for photo quality specifications);
 - (C) a weekly Twitter post with photograph(s) along with associated written description for the City's use, including the Mayor;
 - (D) notifications of public consultations, consultation materials and post-consultation summaries;
 - (E) develop all photos for weekly construction updates for submission to and approval by the City;
 - (F) interactive map(s) that provide an overview of the extensions, along with information on key activities at each site (stations), which should be regularly maintained and updated monthly at a minimum;
 - (G) monthly short video clips for the purposes of social media; and
 - (H) up-to-date graphics, photos and video clips showcasing the design of each Station and progress of the Construction Activities;
- (ii) provide drafts of proactive and reactive content for responses to crisis situations, immediate issues, public queries or complaints, no later than two hours after DB Co or the City becomes aware of any such crisis situation, immediate issue, public query or complaint;
 - (iii) provide draft advance notification for the purposes of website and social media updates for review and approval by the City with respect to meetings, events, initiatives, and Construction Activities that will have a direct impact on roads, traffic and/or transit; and
 - (iv) develop web content to support government Stakeholders (e.g. MTO) web and social media communications needs for review and approval by the City.

4.3 Construction Schedule for Communications

- (a) During the Construction Period, DB Co shall prepare and submit for the City's review and approval the following schedule information. In advance of submitting the schedule information, DB Co shall also submit a template of each schedule for the City's review and approval:
 - (i) a yearly construction schedule and detour plan in a format that is readily useable in communicating the Project milestones, to be updated on a yearly basis and no later than March 31st of each calendar year to the end of the Project Term. This yearly plan should come in the form of a report with a visual chart and accompanying wording that identifies

and describes timing and impacts of major issues and disruptive activities, and the communication milestones for the upcoming year, as categorized below:

- (A) final station designs
 - (B) start/end of prescribed detours
 - (C) start/end of station construction
 - (D) start/end of hwy works or other bundled projects/component of the works
 - (E) start/end of road closures
 - (F) start/end of sidewalk and/or MUP re-alignments
 - (G) start/end of works impacting greenspace/park areas
- (ii) a semi-annual construction schedule update for use in communicating project milestones, as well as a semi-annual Project dashboard to support the City's communications and social media strategies that highlights key statistics and benefits of the Project, including but not limited to the number of local firms employed, number of local jobs created and training through registered apprenticeship programs, sub-contract value, kilometres of track laid, amount of concrete poured, level of completion of stations along the alignment extensions, to be updated no later than December 31st and June 30th of each calendar year;
- (iii) a three-month look ahead calendar outlining construction activities, including a description of scope and anticipated impacts, and any notification requirements as detailed in Part 5 of this Schedule, and based on level of impact, and DB Co resources assigned, that will support the City's communications and social media strategies; and
- (iv) a dashboard to provide regular weekly updates and bi-weekly look-aheads about Construction Activities, including statistics, amount of local investments, number of direct jobs and training through registered apprenticeship programs, schedule and other information that will support the City's communications and social media strategies.

4.4 Crisis Communication

- (a) DB Co shall develop, in consultation with the City, a Crisis Communication Plan that outlines the roles, responsibilities and contacts for DB Co in relation to the City and other partners as required (e.g. MTO) with respect to crisis communications, and identify and rank a list of potential crisis issues that could develop during the performance of the Works (the "**Crisis Communication Plan**"). The Crisis Communication Plan shall comply with the City's emergency communication plan and include notification standards for media responses, as described in Section 4.6, and shall include a crisis communication protocol. The Crisis Communication Plan must be submitted to the City, in advance of any construction activities, for review and approval in accordance with Schedule 10 – Review Procedure.
- (b) The Crisis Communication Plan must be updated 30 days following a crisis event;
- (c) During the Project Term, DB Co shall:
- (i) provide ongoing assistance to the City in the City's development and updates to the Crisis Communication Plan;

- (ii) during a crisis situation, make available sufficient DB Co communications staff and Project resources in order to work effectively with the City to proactively manage and perform DB Co's communications responsibilities as set out in this Schedule 18; and
- (iii) during a crisis situation, provide the City with holding lines within 15 minutes of the event occurring.

4.5 Issues Management

- (a) During the Project Term, DB Co shall consult with and provide reasonable assistance to the City with respect to:
 - (i) identifying issues and trends as they emerge and develop strategies for tracking, addressing, mitigating, and minimizing issues related to the Project;
 - (ii) developing messages and strategies to address issues and provide accurate and timely information to affected Stakeholders; and
 - (iii) sharing information about potential issues related to the Project with other partners.
- (b) DB Co shall respond to all issues identified by the City within a timeframe as determined by the City for each issue.
- (c) DB Co shall develop an issues management protocol to be reviewed and approved by the City.

4.6 Media Relations

- (a) During the Project Term, DB Co shall:
 - (i) direct all media enquiries and interview requests to the City's lead communications contact, who will determine the organization that is most suitable to respond to the enquiry;
 - (ii) provide draft responses and messaging to the City, with respect to all media enquiries and interview requests in a timely manner and track each request that DB Co responds to in a media request log;
 - (iii) support the City with respect to all media enquiries and interview requests;
 - (iv) provide designated media relations staff (with backup media trained personnel, as required) with 24/7 availability to monitor, draft messaging and prepare responses to enquiries as requested by the City, in accordance with its level of urgency, as per the categories listed in Part 4.6(vii) below;
 - (v) provide communications training to DB Co staff, including refresher training regarding the City's communication protocols and policies for handling media, public, and Stakeholder interaction;

- (vi) make available a DB Co designated media relations staff member and construction manager or similar expert for the purposes of responding to technical matters related to media requests and interview requests if required and as requested by the City;
- (vii) provide the City with information as requested to respond to media inquiries and with the level of urgency defined by the City where the measure of the level of urgency and timelines is as detailed below:
 - (A) “Crisis” requires DB Co to provide a holding statement within 15 minutes, in line with the Crisis Communications Plan;
 - (B) “Urgent” is 1 hour;
 - (C) “Medium” is 6 hours; and
 - (D) “Low” is 24 hours; and
- (viii) at least twice-yearly, provide the City with a summary of key accomplishments in a media-ready format, that can be used by the City to approach media (summary of construction progress, benefits, local economic impacts, spotlight on innovation, look aheads, etc).

4.7 Government Reporting

- (a) During the Project Term, DB Co shall:
 - (i) support the City in meeting the requirements of the Governmental Authorities funding agreements for the Project by providing information about the Project status, upcoming milestones, and issues that may affect the Project including the provision of appropriate signage for construction and special events; and
 - (ii) participate in meetings with the City and Governmental Authorities when requested by the City.

4.8 Special Events, Site Tours and Trade Show

- (a) The City and DB Co shall collaborate to develop, plan, and coordinate various special events during the Project Term.
- (b) During the Project Term, DB Co shall:
 - (i) at the City’s request, make Project sites available for governmental, public relations, media and public tours and events such that the City may, upon advance notice to, and in conjunction with DB Co, organize special events, including tours of the Site and milestone celebrations, costs of which will be borne by the City, excluding costs related to shutdown of the Project Operations or accommodations at the Site to organize such events, which shall be borne by DB Co. DB Co shall support any event described in this Section 4.8(b) as requested by the City, and provide a power source for communications equipment, and any other associated site costs.

- (ii) ensure sufficient insurance and liability coverage is in place for any special events or venues, as required by the Project Agreement;
- (iii) make DB Co staff available for events, tours of the Site, and provide support as may be required by the City;
- (iv) develop content for events, as requested by the City, including but not limited to invitations, presentations, speaking notes, signage, high quality graphics, and other visuals;
- (v) support a minimum of two on-site full alignment tours (with Site access) and four special events per year;
- (vi) during the Construction Period and in consultation with the City, plan, organize and execute a trade show no later than 180 days following Financial Close. The City will develop templates for material to be used or displayed and will review and approve all materials to be distributed. The cost of the trade show will be borne by DB Co, including costs with respect to:
 - (A) renting the venue, tables, chairs;
 - (B) production of displays, invitations, signage and printed material;
 - (C) catering;
 - (D) print and radio advertising in trade and community and national media outlets as determined by the City;
 - (E) issuing invitations, tracking RSVPs and administering a survey;
 - (F) using best efforts to ensure a minimum attendance of 200 individuals, of which at least [REDACTED]% of attendees consist of industry vendors, suppliers and other Works-related businesses and contacts;
 - (G) providing overall event logistics and event production; and
 - (H) production of post-event report to the City, the content of which may be posted publicly to the City's website.

4.9 Stakeholder Events and Stakeholder Outreach Meetings

- (a) Stakeholder events include public information sessions and public open houses, where information is shared with a group, or community feedback is solicited and presented back to the community, and invitations to the public or a larger group are issued. DB Co shall:
 - (i) With respect to the Highway Works, DB Co shall hold events as required to fulfill the requirements of Schedule 17 – Environmental Obligations, including a minimum of one

event during design, and during Highway Works as required to communicate significant activities or changes and impacts, as requested by the City further to ongoing construction monitoring.

- (ii) hold a minimum of four events during design (presentation of bid designs), 30 events during pre-construction, and during construction as required to communicate significant activities or changes and impacts, as requested by the City further to ongoing construction monitoring; and
- (iii) during the Construction Period and in consultation with the City, support and organize and execute ongoing and unplanned Stakeholder special events, the costs of which will be borne by DB Co, including costs with respect to:
 - (A) developing content for all materials including, but not limited to, high-quality presentations, boards, invitations, handouts, post-event reports;
 - (B) developing high quality pop-up displays that speak to general project details, benefits, and construction timelines that can be used at all Stakeholder events updated for consultation events during design phase and pre-construction and construction outreach;
 - (C) developing high-quality community contact cards with information on project resources and key contacts during construction;
 - (D) covering the cost of print advertising in community newspapers, as described in this Schedule;
 - (E) at the City's discretion, distribute complete unaddressed mail drops to support these events; and
- (b) Stakeholder meetings include community presentations and project presentations. These are targeted meetings for a variety of audiences to resolve issues, and communicate general and/or specific project information to a targeted audience. DB Co shall provide technical staff as required, and provide content as required, including high-quality graphics.

4.10 Signage and Branding

(a) Construction and Promotional Signage

- (i) During the Project Term, DB Co shall:
 - (A) produce, print, install, and remove signage, including wayfinding and business signage;
 - (B) prior to installation, provide to the City for approval stamped shop drawings of the sign fabrication and installation details, together with a mock-up of the signage, location and confirmation of the applicable Permits, Licences, Approvals and Agreements;

- (C) ensure appropriate signage is provided in a visible location for affected businesses to seek to ensure continuity of their business operations, including compliance with the requirements of Schedule 15-2, Part 7, Article 6.
- (D) ensure that DB Co and DB Co Parties comply with the construction and promotional signage requirements set out in the Project Agreement;
- (E) ensure the government Project signs are visibly displayed along the corridor throughout the Project Term;
- (F) ensure that all signage is kept in good condition when installed and when not in use;
- (G) replace any signage that is damaged by DB Co at DB Co's expense;
- (H) provide screws, support posts and other fastening materials to install signage that are made of materials of good quality and durability;
- (I) remove graffiti on temporary signage within 24 hours or, in the event that graffiti cannot be removed by means of normal cleaning methods, DB Co shall replace the damaged signage;
- (J) upon request from the City, DB Co shall design and provide dimensions of hoarding, fencing and barriers to support temporary signage provided by the City; and
- (K) provide personnel to install, remove and relocate signage on an expedited basis, if required by the City.

(b) **Hoarding**

- (i) DB Co shall:
 - (A) develop a hoarding plan with the City that will respect various community contexts and build understanding and enhance the public image of the Project;
 - (B) as part of the hording plan, identify sites for the City's review and acceptance, where decorative hoarding would be beneficial and context-specific materials (scrim, metal sheets or plywood), and develop consistent hoarding design. Sites will include, but are not limited to:
 - 1) high visibility and/or high traffic (pedestrian, cycling or car);
 - 2) sites close to a community or greenspace being affected by Construction Activities; and
 - 3) sites in close proximity to businesses.
 - (C) produce, print, install, remove and store decorative hoarding, including wayfinding and business signage;

- (D) prior to installation, provide to the City for approval, stamped shop drawings of the decorative hoarding, fabrication and installation details, together with a mock-up of the decorative hoarding, location and confirmation of the applicable Permits, Licences, Approvals and Agreements;
 - (E) ensure that DB Co and DB Co Parties comply with the hoarding requirements set out in the Project Agreement;
 - (F) ensure that all decorative hoarding is kept in good condition when installed;
 - (G) replace any decorative hoarding that is damaged by DB Co at DB Co's expense; and
 - (H) remove graffiti on decorative hoarding within 24 hours or, in the event that graffiti cannot be removed by means of normal cleaning methods, DB Co shall replace hoarding at sites, to a maximum of five hoarding panel replacements per year, within a reasonable time period or as otherwise required by Applicable Law.
- (ii) The City shall develop the graphic design of the hoarding.

4.11 Advertising Communications and Marketing

- (a) During the Construction Period, the City shall:
- (i) provide DB Co with its plan detailing advertisement and communications marketing strategies for the Project;
 - (ii) provide DB Co with templates for use in drafting public notices and advertisements including Stakeholder engagement opportunities and construction impacts; and
 - (iii) review and approve advertisements produced by DB Co about the Project's design and construction impacts and Stakeholder engagement opportunities related to the Project.
- (b) During the Construction Period, DB Co shall:
- (i) support and contribute to the planning, development and execution of the City's public education and advertising campaigns related to the Works;
 - (ii) at DB Co's cost, plan, develop, and coordinate the placement of advertisements to communicate ongoing construction impacts and to inform Stakeholders of engagement activities through a mix of media, including but not limited to, print daily, community and commuter newspapers, radio, online media, multimedia and unaddressed mail in accordance with the following:
 - (A) for each of the 30 Stakeholder events described in Part 4 of this Schedule, DB Co shall provide one insertion in a local community or daily newspaper (black and white, half page in size);
 - (B) for construction notices that indicate significant, long-term construction impacts of

more than six months in duration, the frequency of the ads placed or notices issued will be based on the Construction Contractor's schedule and will include content for social media and City's regular communications channels (e.g. public service announcements), and could also include one local community or daily newspaper notice per major stage in work (black and white, quarter page in size); and

- (C) for significant construction impacts (defined by the City in the traffic notification process) that have a significantly high impact on traffic and mobility, DB Co is responsible for the production of and cost to book regular 15-second sponsor messages on weekdays, in the morning and afternoon peak commuter times. Radio ads will be played twice each hour between 6:00 a.m. and 10:00 a.m. in the morning and between 3:00 p.m. and 7:00 p.m. in the afternoon. Ads should appear on local radio stations of equal gross rating points to CFRB and/or CIHT (for radio).
- (iii) DB Co shall be responsible for the cost and coordination of Canada Post distribution of construction notices based on a 500 metre distribution area surrounding the area where the applicable Construction Activities are occurring; and shall:
 - (A) provide content for public information and Stakeholder engagement materials;
 - (B) write content for monthly newsletters about the Project, for review and approval of the City;
 - (C) use hoarding and any other areas within the Lands for communication of the Project; and
 - (D) not use, permit or authorize any third party to use any areas within the Lands for advertisement, without the prior written consent of the City, or as otherwise permitted in accordance with this Project Agreement;
- (iv) for clarity, DB Co shall submit all advertisements, insertions, construction notices, messages, and other associated documentation contemplated in this Section 4.10(b) for the City's review and approval prior to distributing, placing, posting, issuing, or producing any such advertisement, insertion, construction notice, message or any other documentation.

4.12 Project Identity and Graphic Design

- (a) The City shall develop the brand identity for the Project and provide templates to DB Co as required during the Construction Period.
- (b) During the Construction Period, DB Co shall:
 - (i) apply the City' design templates for information related to the Project and comply with Project identity standards on all information materials; and
 - (ii) provide all content and design layout of communication and community engagement materials, including quarterly newsletters, advertisements, public notices, flyers and publications to the City for review and approval at least three weeks prior to distribution.

4.13 Photography and Video

- (a) For the purposes of record-keeping and demonstrating the progress of the Project during the Construction Period, DB Co shall engage a professional photographer or field staff with appropriate equipment and training:
 - (i) on a regular basis and at least weekly, provide high-quality photographs, graphics and images of the Project to the City for use in publications, presentations and on public websites, using a professional DSLR or mirrorless type camera. Photographs must be sharp, high-quality digital JPEG files at 300 DPI with an 8-bit colour depth, preferably converted from RAW image format;
 - (ii) provide quality video clips of the Project to the City for use on Project websites and social media each month;
 - (iii) develop a promotional video during the design phase that incorporates information and visuals of the complete extension, including but not limited to station designs. Video should incorporate key facts of the project, objectives, and connections provided by the extensions (educational institutions, cultural institutions, recreation, retail destinations, etc.) with project objectives, stations renderings, project details and connectivity;
 - (iv) produce yearly, high-quality video during construction that incorporates visuals provided to the City with the objective of showing and highlighting construction progress; and
 - (v) cause DB Co staff or DB Co Parties to provide consent to City with respect to City's disclosure of photo and video content relating to the Project.
- (b) During the Project Term, DB Co shall, from time to time and as reasonably requested by the City, facilitate access for designated photographers and videographers.

4.14 Renderings

- (a) In addition to the renderings required in Schedule 10 – Review Procedure and Schedule 15-2, Part 4, Article 1 - Introduction, DB Co shall submit up to 10 additional photo-realistic renderings as requested by the City.

4.15 Complaints Protocols

- (a) During the Project Term, the City shall be responsible for approving all responses to complaints and enquiries relating to the Project, and will be the lead on their intake, and will lead on tracking.
- (b) During the Construction Period, DB Co shall:
 - (i) provide to the City for incorporation into the Construction Communications and Stakeholder Relations Plan, a complaints protocol addressing how DB Co will deal with and respond to enquiries, suggestions and complaints received with respect to the Project (the “**Construction Complaints Protocol**”) in an appropriate and timely manner, and

shall submit the Construction Complaints Protocol to the City for review and approval under the Schedule 10 – Review Procedure.

- (ii) be responsible for maintaining a software system that will track all complaints, enquiries, suggestions, and responses received with respect to the Project;
 - (iii) provide monthly complaint reports to the City, including an analysis of the main areas of concern to complainants; and
 - (iv) coordinate DB Co's complaint tracking and complaint reports with any internal complaint tracking or complaint reports established by the City with respect to the Project, as requested by the City.
- (c) DB Co acknowledges and agrees that the Construction Complaints Protocol will be publicly available at the request of the City.

4.16 Communications Performance Monitoring and Auditing

- (a) DB Co shall prepare a communications performance report ("**Communications Performance Report**") which shall be available for review each month in advance of the first Communications and Stakeholder Engagement Working Group weekly meeting for the month, as detailed in Section 6 of this Schedule. The Communications Performance Reports shall:
- (i) be in a format agreed to by the City; and
 - (ii) summarize DB Co's performance through the various communications activities in support of and execution of the protocols, strategies and plans developed for the Project.
- (b) DB Co shall develop an annual performance report, based on a template approved by the City, that summarizes the monthly reports and assesses DB Co's overall compliance with Schedule 18 obligations. The annual yearly performance report shall be submitted to the City in accordance Schedule 10 – Review Procedure.

PART 5 NOTIFICATION

5.1 General

- (a) With respect to Construction Activities that are reasonably anticipated to have a major impact on third party property owners, DB Co shall:
 - (i) provide Notice to the City of such Construction Activities at least two weeks prior to the commencement of such Construction Activities; and
 - (ii) provide a draft public notification at least two weeks prior to the commencement of such Construction Activities to the City for review and approval.

The draft notices provided by DB Co in accordance with this Section 5.1(a) shall include a comprehensive list of the elements owned by a third party which DB Co anticipates will have to be removed or relocated by the property owner, what elements can remain on the property, detailed drawings that describes the proposed Construction Activities (including new location of relocated items or impacts that might result from the Construction Activities and restoration plans), proposed timeline for Construction Activities (including duration and anticipated completion), contact information to obtain additional information, and any updates or complaints relating to such Construction Activities.

- (b) With respect to Construction Activities that are reasonably anticipated to have a major impact on transit users, pedestrians, residents, traffic, and/or Stakeholders generally, DB Co shall:
 - (i) provide Notice to the City of such Construction Activities at least 35 days prior to the commencement of such Construction Activities; and
 - (ii) provide a draft public notification at least 35 days prior to the commencement of such Construction Activities to the City for review.

For the purposes of this Section 5.1(b), “major impact” shall include but not be limited to overnight construction, temporary Construction Activities, final paving, commissioning activities, privately-owned elements to be relocated or removed by DB Co, and transit stop relocations.

- (c) With respect to Construction Activities that are reasonably anticipated to have a medium impact on transit users, pedestrians, residents, traffic, and/or Stakeholders generally, DB Co shall:
 - (i) provide Notice to the City of such Construction Activities at least 15 Business Days prior to the commencement of such Construction Activities; and
 - (ii) provide a draft public notification at least 10 Business Days prior to the commencement of such Construction Activities to the City for review.

For the purposes of this Section 5.1(c), “medium impact” shall include but not be limited to, major intersection work, any disruption to water, gas and/or other utilities, and impacts from noise or dust. For clarity, the notification provided by DB Co pursuant to Section 5.1(c)(ii) shall be delivered by DB Co on behalf of the City to all affected properties and in consultation with

Utility Companies, as applicable.

- (d) With respect to Construction Activities that are reasonably anticipated to have a minor impact on transit users, pedestrians, residents, traffic and/or Stakeholders generally, DB Co shall:
 - (i) provide Notice to City of such Construction Activities at least five Business Days prior to the commencement of such Construction Activities; and
 - (ii) provide a draft public notification at least 48 hours prior to the commencement of such Construction Activities to the City for review.

For the purposes of this Section 5.1(d), “minor impact” shall include short-term lane closures, minor pedestrian detours, and access and driveway work. DB Co shall ensure that access is maintained to properties impacted by the Construction Activities at all times.

- (e) With respect to an incident related to Construction Activities that are reasonably anticipated to have an impact on DB Co employees and contractors, transit users, pedestrians, residents, traffic and/or Stakeholders generally, and with respect to which DB Co cannot reasonably provide advance notice of any kind to the City or the public (a “**Construction Activities Incident**”), DB Co shall:
 - (i) immediately notify the City of such Construction Activities Incidents;
 - (ii) provide a draft public notification or messaging no later than 15 minutes following the commencement of such Construction Activities Incidents to the City for review;
 - (iii) be prepared to provide a public statement with respect to the Construction Activities Incidents at the request of the City; and
 - (iv) be prepared to enact the Crisis Communications Plan in consultation with the City and to react quickly to provide an immediate response to all affected Stakeholders.

For the purposes of this Section 5.1(e), a Construction Activities Incident shall include but not be limited to an accident on site or a major catastrophe.

- (f) The notifications provided by DB Co pursuant to this Section 5.1, once finalized by the City, shall be delivered by DB Co on behalf of the City to all affected properties and in consultation with Utility Companies, as applicable.

PART 6 COMMUNICATIONS AND STAKEHOLDER ENGAGEMENT WORKING GROUP

6.1 Communications and Stakeholder Engagement Working Group

- (a) DB Co shall provide staff to support the communications and Stakeholder engagement activities related to the Project. These DB Co staff along with identified City communications and Stakeholder engagement staff, will form a Communications and Stakeholder Engagement Working Group (the “**Communications and Stakeholder Engagement Working Group**”).
- (b) The leads on the Communications and Stakeholder Engagement Working Group representing both the City and DB Co will be members of the Works Committee to ensure that communications and Stakeholder relations issues as part of the Project are addressed in an efficient and effective manner.
- (c) The objective of the Communications and Stakeholder Engagement Working Group is for DB Co and the City to work together to develop and implement all communications plans and Stakeholder engagement and community engagement activities for the Project to:
 - (i) ensure timely, open, transparent, effective, consistent and proactive communications with Stakeholders and elected officials;
 - (ii) foster and maintain positive and constructive relationships with neighbourhoods, agencies and businesses that may be affected by decisions regarding the scope of the Project as well as Construction Activities; and
 - (iii) build trust and maximize Stakeholder understanding and support for the Project.
- (d) DB Co shall ensure that the Construction Manager, Design Manager and any other staff from DB Co or any DB Co Party that the City may require, are made available to support the Communications and Stakeholder Engagement Working Group as required.
- (e) Within 60 days following Financial Close, the Communications and Stakeholder Engagement Working Group will convene to discuss the communications and Stakeholder engagement obligations and to identify the working relationships, roles, responsibilities, deliverables and review approvals processes for the Project.
- (f) The Communications and Stakeholder Engagement Working Group will meet once per week throughout the Construction Period, or less frequently as agreed to by the City, to plan and implement communications and Stakeholder engagement strategies for the Project, share information, discuss community relations updates, identify and plan for communications, Stakeholder engagement and Project milestones, manage issues and receive schedule updates.

PART 7 PUBLIC DISCLOSURE AND MEDIA RELEASES

7.1 Public Disclosure and Media Releases

- (a) Neither DB Co nor any DB Co Parties shall issue or disseminate any media release, public announcement or public disclosure (whether for publication in the press, on the radio, television, internet or any other medium) relating to the Project, the Project Agreement, the City's activities or any related matters, without the prior written consent of the City.
- (b) Neither DB Co nor any DB Co Parties shall issue or disseminate any media release, public announcement or public disclosure (whether for publication in the press, on the radio, television, internet or any other medium) making any implicit or explicit reference to RTG, any RTG Party or any affiliate of RTG or any RTG Party, whatsoever, without prior written consent from RTG.
- (c) Neither Party shall use the other Party's name or refer to the other Party, directly or indirectly, in any media release, public announcement or public disclosure (whether for publication in the press, on the radio, television, internet or any other medium) relating to the Project, the Project Agreement, the City's activities or any matter related thereto, without the prior written consent of the other Party.
- (d) DB Co shall comply and shall ensure that all DB Co Parties comply, at all times, with the City's media release and publicity protocols or guidelines, as such protocols and/or guidelines may be updated by the City from time to time.

PART 8 PERFORMANCE CRITERIA

8.1 Application of Performance Criteria

- (a) DB Co shall comply with the Construction Period Performance Criteria in respect of this Schedule 18 set out in Attachment E of Schedule 21 – Construction Period Payments.

SCHEDULE 19

PROCUREMENT MONITORING AND IMPLEMENTATION PLAN

[REDACTED]

**SCHEDULE 20
LANDS**

PART A – DEFINITIONS AND INTERPRETATION

1. DEFINITIONS

1.1 For the purposes of the Project Agreement, including but not limited to this Schedule 20, the following terms have the following meanings. Any capitalized term not defined in this Schedule 20 shall have the meaning given to such term in the Project Agreement.

- (a) **“Additional Property Interest”** includes any additional parcel of land not forming part of the Lands, the expansion or alteration of any boundary of any parcel of land forming part of the Lands, the extension of any term of use of any parcel of forming part of the Lands beyond the term specified in the column marked “Duration” in the Lands Table and the inclusion of additional Permitted Uses for any parcel of land forming part of the Lands all as requested by DB Co in accordance with Section 8 of this Schedule 20 unless and until such parcel, extension, extended term or additional Permitted Use becomes part of the Lands and is included in the grant of the non-exclusive licence described in Section 16.1 of the Project Agreement in accordance with Section 16.7 of the Project Agreement;
- (b) **“City Road Allowance Lands”** means lands forming part of a municipal road having the status of a highway pursuant to Section 26 of the *Municipal Act, 2001* R.S.O. c.25. Within the Lands Table, property comprising City Road Allowance Lands are designated **“ROW”** in the column marked “Restrictions and Requirements”;
- (c) **“Commencement Date”** means, with respect to each parcel of property forming part of the Lands, either:
 - (i) the date identified in the column marked “Commencement Date” in the Lands Table; or,
 - (ii) the first day of the month following the occurrence of the event described in the column marked “Commencement Date” in the Lands Table (for example, Financial Close); or,
 - (iii) for lands designated City Road Allowance Lands (ROW) or Highway Corridor Lands (HCL), the date(s) specified in required permits, approvals or authorizations as described in Section 5 of this Schedule 20 and in Schedule 35 – Permits, Licenses, Approvals and Agreements;

and is the date upon which any parcel of land identified in the Lands Table becomes part of the Lands and is included in the non-exclusive licence granted by the City to DB Co in accordance with Section 16.1 of the Project Agreement;

- (d) **“Existing LRT Infrastructure Lands”** means lands shown on Property Request Plans identified as **“Stage 1 PRPs”** and included in a folder titled “Stage 1 PRPs” located in the Data Room, which are lands owned by the City, or lands in which the City has acquired an interest, and upon which Existing Infrastructure or Stage 1 Connection Infrastructure comprised of light rail transit system infrastructure and/or related infrastructure which is, has been or will be designed, constructed, operated and/or maintained by RTG and/or the RTG Parties is located. Existing LRT

Infrastructure Lands do not form part of the “Lands” except to the extent that they are also included in the Lands Table;

- (e) **“Highway Corridor Lands”** means lands forming part of the controlled access highways known as Highway 417 and Highway 416 and owned by the MTO which are designated **“HCL”** in the column marked “Restrictions and Requirements” in the Lands Table;
- (f) **“Lands”** means lands owned or to be acquired by the City or lands in respect of which the City has acquired or will acquire certain rights, all as set out in the Lands Table or otherwise deemed to be lands in accordance with this Schedule 20, and over which the City is granting to DB Co a non-exclusive license, right of use and access in accordance with Section 16.1 of the Project Agreement;
- (g) **“Lands Table”** means the table in Part B of this Schedule 20;
- (h) **“Optional Lands”** means property identified by DB Co during the procurement process which DB Co requested be included in the Lands, which the City agreed to make available to proponents and which DB Co requested be included in the Lands subject to the provisions of Section 8.2 with necessary amendments as described in Section 8.3 of this Schedule 20.
- (i) **“Permitted Use” or “Permitted Uses”** means the use(s) which may be put to each parcel forming part of the Lands as designated in the column marked “Permitted Use” in the Lands Table being one or more of the following:
 - (i) **“New MTO Infrastructure Lands”** means property forming part of the Lands and designated **“NMTOI”** in the column marked “Permitted Use” in the Lands Table representing the location where New MTO Infrastructure is to be constructed or installed in accordance with Schedule 15 – Output Specifications.
 - (ii) **“New Municipal Infrastructure Lands”** means property forming part of the Lands and designated **“NMI”** in the column marked “Permitted Use” in the Lands Table representing the location where New Municipal Infrastructure is to be constructed or installed in accordance with Schedule 15 – Output Specifications;
 - (iii) **“System Infrastructure Lands”** means property forming part of the Lands and designated **“SI”** in the column marked “Permitted Use” in the Lands Table representing the location where System Infrastructure is located or is to be constructed or installed in accordance with Schedule 15 – Output Specifications;
 - (iv) **“Temporary Access Lands”** means property forming part of the Lands and designated **“TA”** in the column marked “Permitted Use” in the Lands Table which may be used temporarily for the sole purpose of providing non-exclusive pedestrian and/or vehicular access to other property forming part of the Lands;
 - (v) **“Temporary Mobilization Lands”** means property forming part of the Lands and designated **“TM”** in the column marked “Permitted Use” in the Lands Table which may be used as part of a mobilization site or staging area, being a designated area where personnel, equipment, supplies, site offices and other facilities required to undertake the Construction Activities are established and maintained in accordance with the provisions of Schedule 15 – Output Specifications relating to mobilization sites; and

- (vi) **“Temporary Construction Lands”** means property forming part of the Lands and designated **“TC”** in the column marked **“Permitted Use”** in the Lands Table which may be used temporarily in connection with the construction of System Infrastructure, New Municipal Infrastructure, and/or New MTO Infrastructure but which may not be used as part of a mobilization site or staging area other than for short term storage of mobile equipment and material required for construction in close proximity to the relevant parcel of Temporary Construction Lands.
- (j) **“Property Request Plan”** or **“PRP”** means a diagram defining the extent, limits and/or approximate boundaries of property; and,
- (k) **“Third Party Access Agreements”** means the agreements, including Standard Agreements, listed or described in Section 4.1 of this Schedule 20.

2. TERM

- 2.1** The term of the non-exclusive licence to any parcel forming part of the Lands granted to DB Co by the City in accordance with Section 16.1 of the Project Agreement shall run from the Commencement Date identified in the Lands Table for such parcel until the earlier of:
- (a) the end of the period calculated by adding to the Commencement Date the number of months specified for each parcel in the column marked **“Duration”** in the Lands Table;
 - (b) the applicable Final Completion Date; and
 - (c) the Termination Date.

- 2.2** Unless otherwise stated in the Lands Table, the number of months identified in the column marked “Duration” in the Lands Table, represents a single term comprised of consecutive months commencing on the Commencement Date.

3. PERMITTED USES

- 3.1** DB Co’s use of any parcel forming part of the Lands shall be limited to the Permitted Use(s) designated in the column marked “Permitted Use” in the Lands Table.

- 3.2** The installation or construction of New Municipal Infrastructure in or on any parcel of lands designated New Municipal Infrastructure Lands may be limited to the construction or installation of the type(s) of infrastructure specified in the “Restrictions and Requirements” column of the Lands Table and/or in the Third Party Access Agreement(s) applicable to such parcel.

- 3.3** The installation of temporary excavation supports such as rock bolts, rock dowels, tie backs, soldier piles or secant piles any part of which will be left in place following completion of construction is only permitted in accordance with Section 3.4, within System Infrastructure Lands, or within Temporary Construction Lands if such Temporary Construction Lands have been expressly identified as being available for temporary excavation support.

- 3.4** Except as provided in this Section 3.4 or as expressly provided elsewhere in the Project Agreement, all Works shall take place exclusively within the boundaries of the Lands.

- (i) Subject to the requirements of Section 5.1 of this Schedule 20 and Schedule 35 with respect to the use of City Road Allowance Lands, DB Co may:

- (A) construct or install New Municipal Infrastructure within City Road Allowance Lands; and/or,
- (B) install temporary excavation supports such as rock bolts, rock dowels, tie backs, soldier piles and secant piles within City Road Allowance Lands; and/or,
- (C) use City Road Allowance Lands for the purposes of managing traffic in accordance with a Traffic Management Plan,

irrespective of whether the City Road Allowance Lands required for the purposes listed above are described in the Lands Table or in the PRPs.

- (ii) Subject to the requirements of Section 5.2 of this Schedule 20 and Schedule 35 with respect to the use of Highway Corridor Lands, DB Co may install rock bolts and rock dowels within Highway Corridor Lands for the purposes of providing temporary subterranean support of excavation irrespective of whether the Highway Corridor Lands required for these purposes are described in the Lands Table or in the PRPs.

- (iii) In addition to Section 3.4(i)(B) which permits the installation of temporary excavation supports such as rock bolts, rock dowels, tie backs, soldier piles and secant piles within City Road Allowance Lands, such supports may also be installed in accordance with a licence acquired by DB Co on its own behalf in accordance with Section 16.7(c) of the Project Agreement or by the City in accordance with Section 8 of this Schedule 20.

- (iv) The Lands Table and PRPs do not describe property required to accommodate Utility Works. Without limiting the provisions of the Project Agreement, including Section 8, Part 2, Schedule 15-2, which govern Utility Works, and subject to the requirements of Section 5.1 and 5.2 of this Schedule 20 and Schedule 35 with respect to the use of City Road Allowance Lands and Highway Corridor Lands, DB Co may undertake Utility Works within System Infrastructure Lands, City Road Allowance Lands, Highway Corridor Lands or in accordance with the terms of an existing easement in favour of the relevant Utility Company.
- (v) Utility Works will not be permitted on property other than System Infrastructure Lands, City Road Allowance Lands, Highway Corridor Lands or within the boundaries of and in accordance with the terms of an existing easement in favour of the relevant Utility Company unless and until a new easement over such property in favour of the relevant Utility Company, and satisfactory to the relevant Utility Company, is acquired by DB Co or by the City.
- (vi) New easements for Utility Works contemplated in Section 3.4(v) above shall be acquired by DB Co in accordance with Section 16.7(c) of the Project Agreement or by the City as Additional Property Interests in accordance with Section 8 of this Schedule 20, the costs of which acquisitions are to remain to DB Co's sole account not to be recovered through any Cash Allowance.
- (vii) Notwithstanding Section 3.4 (vi) above, the following exceptions to the provisions of Section 8 of this Schedule 20 shall apply to requests for Additional Property Interests made by DB Co with respect to new easements for Utility Company Self-Performed Works which are required solely as a result of Utility Agreements for Utility Company Self-Performed Work approved by the City in accordance with Section 11.29 of the Project Agreement:
 - (A) Section 8.1(a) shall not apply and a request may be made at any time during the Project Term;
 - (B) Sections 8.1(c), 8.1(d), 8.1(e), 8.1(f) and 8.1(g) shall not apply with the exception that, within fifteen (15) Business Days of the delivery by DB Co to the City of the materials described in Section 8.1(b), the City shall provide to DB Co an approximate estimate of the time which the City anticipates will be required to secure the required easement;
 - (C) Sections 8.2(b), 8.2(c), 8.2(e) and 8.2(f) shall not apply and the City shall use all reasonable efforts to complete the acquisition of the new easement with all due dispatch.

- 3.5 To the extent that DB Co undertakes, in accordance with Sections 3.4(i), 3.4(ii), 3.4(iii), 3.4(iv), and/or 3.4(v) above, any Works, Utility Company Self-Performed Work or traffic management on lands comprising City Road Allowance Lands, Highway Corridor Lands, or in accordance with the terms of a licence or easement acquired by DB Co pursuant to Section 16.7(c) of the Project Agreement or existing easements in favour of relevant Utility Companies, which lands are not identified in the Lands Table and PRPs, all of DB Co's obligations and liabilities in respect of the Lands and Site under the Project Agreement shall apply with equal effect to all activities of DB Co and DB Co Parties on such lands.

4. RESTRICTIONS AND REQUIREMENTS

- 4.1 In addition to any other restriction or requirement contained in the Project Agreement, including this Schedule 20 and Schedule 15- Output Specifications and Schedule 16 - Encumbrances, DB Co's access to and use of the Lands for the purposes of the Construction Activities is subject to the terms of the Third Party Access Agreements and other restrictions, qualifications and requirements contained in the Lands Table including as set out in the column marked "Restrictions and Requirements" including as described below:

- (a) "[REDACTED] Lease Terms" designates property, the use of which is subject to the terms and conditions of a lease between [REDACTED] and the City of Ottawa a copy of which is located in a file folder titled "Agreements" and located in the Data Room;
- (b) "Algonquin College Terms" designates property, the use of which is subject to the terms and conditions of the agreement between the City and Algonquin College a copy of which is located in a file folder titled "Agreements" and located in the Data Room;
- (c) "Existing LRT Infrastructure Lands Constraints" designates property which includes, abuts or is in close proximity to Existing System Infrastructure Lands where coordination with RTG and/or the RTG Parties may be required in accordance with the Interface Agreement and the terms of this Project Agreement;
- (d) "HONI Terms" designates property forming part of an electricity transmission or distribution corridor. The use of such lands may be subject to approvals pursuant to the provincial secondary land use program jointly administered by Infrastructure Ontario and Hydro One Networks Inc. and is also subject to the terms and conditions of a Standard Agreement comprising a grant of an easement or licence, by Her Majesty the Queen in right of Ontario as represented by the Ontario Infrastructure Lands Corporation to the City, to construct, use and maintain infrastructure within lands forming part of an electricity transmission or distribution corridor or to make temporary use of such lands for the purpose stipulated in the grant of easement or licence;
- (e) "[REDACTED] Terms" designates property, the use of which is subject to the terms and conditions of the agreement between the City and [REDACTED] a copy of which is located in a file folder titled "Agreements" and located in the Data Room;
- (f) "MTO Terms" designates property, the use of which is subject to the terms and conditions of a Standard Agreement comprising an encroachment permit granted by the MTO to the City with respect Highway Corridor Lands;
- (g) "NCC Terms & Conditions" designates property, the use of which is subject to the terms and conditions of agreements between the City and the National Capital Commission copies of which

are located in a file folder titled “Agreements” and located in the Data Room as well as the conditions of the Approvals in Principle issued by the National Capital Commission and any Federal Land Use Design and Transaction Approvals granted by the National Capital Commission with respect to the Project or any part thereof;

- (h) **“Parkland Improvement Works”** designates property to be improved with New Municipal Infrastructure being constructed by DB Co for the benefit of the National Capital Commission in accordance with Schedule 15 – Output Specifications and NCC Terms and Conditions;
- (i) **“[REDACTED] Terms”** designates property, the use of which is subject to the terms and conditions of the agreement between the City and [REDACTED] a copy of which is located in a file folder titled “Agreements” and located in the Data Room;
- (j) **“PWGSC Terms”** designates property, the use of which is subject to the terms and conditions of the agreement between the City and Her Majesty the Queen as represented by Public Works and Government Services Canada a copy of which is located in a file folder titled “Agreements” and located in the Data Room;
- (k) **“SOD Parcel”** designates property which has been identified by the City as a property where station oriented development is expected and where the City will provide opportunities for real estate development immediately above and/or integrated with a rail transit station, including but not limited to the sale of air rights above a rail transit station; and,
- (l) **“Stratified Parcel”** designates property having both horizontal and vertical boundaries.

The forgoing does not constitute an exhaustive list of the restrictions and requirements which may be listed in the column designated “Restrictions and Requirements” in the Lands Table or which may apply to any property forming part of the Lands.

4.2 All of the agreements referred to in Section 4.1 above, including the Standard Agreements, shall be treated, for the purposes of Section 17 of the Project Agreement and for the purpose of Schedule 16 – Encumbrances, as Encumbrances of which DB Co had knowledge prior to Financial Close. While the City has made efforts to incorporate significant construction, maintenance and other obligations flowing from the Third Party Access Agreements into the Project Agreement, DB Co shall be deemed to have reviewed each of the Third Party Access Agreements and shall perform all obligations and observe and comply with all restrictions contained therein which are relevant to the use of any part of the Lands and/or the performance of the Construction Activities.

4.3 Notwithstanding Section 4.2 above, to the extent that any of the agreements listed in Section 4.1 provide for the payment of a purchase price, licence fee, rent, or other consideration in exchange for the transfer from a third party property owner to the City of property, an interest in property or a contractual right to use property forming part of the Lands, such purchase price, licence fee, rent, or other consideration shall be paid by the City and not by DB Co, except to the extent that such purchase price, licence fee, rent, or other consideration is paid with respect to an Additional Property Interest, other than an Additional Property Interest acquired subject to the exception described in Section 3.4(vii) of this Schedule 20.

4.4 STANDARD AGREEMENTS

(a) For certain parts of the Lands the City will enter into easement, licence, or similar agreement(s) after Financial Close. The City intends to enter into such agreement(s) on substantively the same terms and conditions as an existing easement, licence or similar agreement that has been entered into by the City and that is provided as Background Information prior to Financial Close or are currently contemplated in the “Restrictions and Requirements” column of Part B (the “**Standard Agreements**”) copies of which are included in the folder titled “Agreements” in the Data Room. If, after Financial Close,

- (i) the City enters into one or more easement, license or similar agreement(s) in respect of any part of the Lands; or
- (ii) the City acquires any interest in or right to use any part of the Lands subject to any easement, license or similar agreement(s),

and such agreement(s) have substantively the same terms and conditions as the Standard Agreements, such agreement(s) shall be treated, for the purposes of Section 17 of the Project Agreement and for the purpose of Schedule 16 – Encumbrances, as though DB Co had knowledge of such agreements prior to Financial Close. This Section 4.4 shall not apply in circumstances where the City enters into an easement, license, or similar agreement after Financial Close on terms and conditions materially different from the Standard Agreement if such material differences cause a delay to DB Co in performing the Construction Activities, create additional material obligations or liabilities for DB Co, or cause a material increase in cost to DB Co, except to the extent that such easement, license or agreement relates to an Additional Property Interest, in which case the provisions of Section 8 of this Schedule 20 shall apply unless the Additional Property Interest is acquired subject to the exception described in Section 3.4(vii) of this Schedule 20.

5. USE OF CITY ROAD ALLOWANCE LANDS, HIGHWAY CORRIDOR LANDS AND TRANSMISSION CORRIDOR LANDS

5.1 City Road Allowance Lands

The use of City Road Allowance Lands or any part thereof by DB Co, including but not limited to the term of such use and the date upon which DB Co may commence any Construction Activities on City Road Allowance Lands or any part thereof is subject to the terms of required permits and approvals, including Road Cut Permits and Temporary Construction-Related Encroachment Permits, to be obtained by DB Co in accordance with Schedule 35 – Permits, Licenses, Approvals and Agreements.

5.2 Highway Corridor Lands

The use of Highway Corridor Lands by DB Co, including but not limited to the term and extent of such use and the date upon which DB Co may commence any Construction Activities on the Highway Corridor Lands is subject to MTO Terms including the requirement for DB Co to obtain from the MTO authorization to access the Highway Corridor Lands in accordance with the process established by the MTO.

5.3 Electricity Transmission/Distribution Corridor Lands

The use by DB Co of lands designated as being subject to HONI Terms, including but not limited to the term and extent of such use and the date upon which DB Co may commence any Construction Activities on such lands, is subject to HONI Terms including the requirement for approvals under the provincial secondary land use program as described in Schedule 35.

6. REPORT CARD PROCEDURE – TEMPORARY USE LANDS

Without altering DB Co's obligations to landscape, restore, remediate and/or reinstate the Lands or adjacent lands in accordance with the Project Agreement, including in accordance with Section 18.2 of the Project Agreement, Schedule 15 - Output Specifications and Schedule 17 – Environmental Obligations, for all parcels forming part of the Lands which are designated in the "Restrictions and Requirements" column of the Lands Table as a "**Report Card Parcel**", DB Co shall comply with the protocol described in this Section 6.

6.1 Report Card

Following the completion by DB Co of all Construction Activities on any Report Card Parcel, and at least thirty (30) days prior to the end of the term of use of such Report Card Parcel as specified in the Lands Table, DB Co shall submit to the City, as part of the Monthly Environmental Report required pursuant to Section 3.9(b) of Schedule 17 – Environmental Obligations, a summary report card in the form attached in Part C of this Schedule 20 together with the attachments set out therein for each Report Card Parcel (a "**Report Card**").

6.2 City Review of Report Card

Within twenty five (25) days of receipt of a Report Card, the City shall notify DB Co if the City, has an objection to the information contained in, or the steps taken by DB Co as set out in the Report Card, or requires additional environmental investigations in accordance with Section 18.2 of the Project Agreement and/or Schedule 17 – Environmental Obligations.

6.3 Remediation and Reinstatement

The remediation of any Contamination and/or reinstatement of any property which DB Co is required to undertake in accordance with Section 18.2 of the Project Agreement, Schedule 15 – Output Specifications and/or Schedule 17 – Environmental Obligations shall be completed prior to the expiry of the term of use for such property as specified in the Lands Table failing which, in addition to any other obligations of DB Co contained in the Project Agreement, DB Co shall be responsible for indemnifying and/or reimbursing the City with respect to all costs, claims and/or damages incurred by the City as a result of any failure to return possession of the property to the owner of the property prior to the end of the term of use described in the Lands Table.

7. ENVIRONMENTAL INVESTIGATION REPORTS

Information regarding the environmental condition of parts of the Lands, including information about Contamination on, in, under or migrating from parts of the Lands, is contained in the Background Information. In some instances, additional site specific environmental investigation reports have been included in the Background Information, in which case the City has made efforts to reference relevant Property Request Plans in Schedule 17 – Environmental Obligations; however, the inclusion of Property Request Plan references in Schedule 17 – Environmental Obligations shall in no way limit DB Co's obligations pursuant to Section 18.2 of the Project Agreement.

8. ADDITIONAL PROPERTY INTERESTS

8.1 Requests for Additional Property Interests

The following provisions shall be in addition to Section 16.7 of the Project Agreement governing requests for Additional Property Interests by DB Co.

- (a) The City will only consider requests for Additional Property Interests:
 - (i) During the sixty (60) day period commencing three (3) months following Financial Close (the “**First Additional Property Interests Request Period**”);
 - (ii) During the sixty (60) day period commencing twelve (12) months following Financial Close (the “**Second Additional Property Interests Request Period**”);
 - (iii) During the sixty (60) day period commencing twenty four (24) months following Financial Close (the “**Third Additional Property Interests Request Period**”); and,
 - (iv) During the sixty (60) day period commencing thirty-six (36) months following Financial Close (the “**Final Additional Property Interests Request Period**”).
- (b) Every request for Additional Property Interests submitted by DB Co shall:
 - (i) include a Property Request Plan prepared by DB Co at DB Co's cost describing the Additional Property Interest, including stratification if appropriate;
 - (ii) state the proposed Commencement Date and duration for the Additional Property Interest;

- (iii) detail DB Co's reasons for requesting the Additional Property Interest and provide a drawing or sketch describing the horizontal and vertical dimensions of any System Infrastructure, New MTO Infrastructure, New Municipal Infrastructure and/or other infrastructure to be installed and/or constructed by DB Co within the boundaries of the Additional Property Interest; and
 - (iv) indicate all reasonably foreseeable implications of acquiring the Additional Property Interest, including whether the acquisition of the Additional Property Interest is expected to result in cost savings for the City from a design, engineering or construction perspective.
- (c) DB Co shall pay to the City, in respect of any request for an Additional Property Interest, an administration fee calculated as follows:
 - (i) For each Additional Property Interest requested during the First Additional Property Interests Request Period, a fee of [REDACTED] Dollars, (\$[REDACTED]); and,
 - (ii) For each Additional Property Interest requested following the First Additional Property Interests Request Period, a fee of [REDACTED] Dollars, (\$[REDACTED]).
- (d) As soon as practicable and in any event within 15 Business Days after receipt of a request for Additional Property Interests, the City shall decide whether or not it is prepared to consider the request and shall either advise DB Co that it has elected not to consider the request or shall deliver to DB Co an approximate estimate of:
 - (i) the time which the City anticipates will be required to secure the Additional Property Interest; and
 - (ii) the anticipated cost of acquiring the Additional Property Interest.

The foregoing approximate estimates shall be in no way binding upon the City and shall not limit DB Co's obligations in Section 8.2(c).
- (e) DB Co acknowledges and agrees that any decision of the City pursuant to Section 8.1(d) above shall be final and binding on the Parties and in the event that the City elects not to consider the acquisition of any Additional Property Interest, DB Co acknowledges and agrees that the City's decision shall not be subject to resolution pursuant to Schedule 27 – Dispute Resolution Procedure.
- (f) If the City, in its sole discretion, elects to consider a request for an Additional Property Interest, the City shall be entitled to retain the administration fee payable in respect of such request for such Additional Property Interest in accordance with Section 8.1(c) above. Such fees are in addition to the costs payable by DB Co in accordance with Section 8.2(c) below and the City shall have no obligation to refund any part of such administrative fee whether or not the request for Additional Property Interests is withdrawn by DB Co as contemplated in 8.1(g)(i) below or whether or not the Additional Property Interest is acquired or accepted as part of the Lands for any reason whatsoever.
- (g) As soon as practicable, and in any event within 15 Business Days after the later of the date the estimate described in Section 8.1(d) above was delivered, DB Co shall either:

- (i) withdraw its request for the Additional Property Interest by written notice to the City; or
- (ii) issue a written confirmation directing the City to proceed with the acquisition of the Additional Property Interest.

If DB Co does not issue the confirmation described in Section 8.1(g)(ii) within such 15 Business Days, then, the request for Additional Property Interests shall be deemed to have been withdrawn. If DB Co does issue the confirmation described in Section 8.1(g)(ii) within such 15 Business Days, the City shall, subject to the provisions of Section 8.2 below, proceed with the acquisition of the Additional Property Interest.

8.2 Acquisition of Additional Property Interests

- (a) Notwithstanding anything to the contrary in the Project Agreement, the City's failure to acquire any Additional Property Interest, or its failure to acquire any Additional Property Interest on or prior to the Commencement Date proposed by DB Co, shall not constitute a Delay Event, a Compensation Event, a Relief Event or a City Event of Default under the Project Agreement.
- (b) The City shall be entitled to abandon the acquisition of any Additional Property Interest at any time, for any reason and in its sole and absolute discretion, in which case the Additional Property Interest will not form part of the Lands and will not be included in the non-exclusive licence granted to DB Co in accordance with Section 16.1 of the Project Agreement.
- (c) DB Co shall be responsible for all costs and expenses incurred by the City in connection with the acquisition of any Additional Property Interest, irrespective of whether the acquisition of the Additional Property Interest is completed and irrespective of whether the Additional Property Interest is acquired by negotiation or expropriation, including but not limited to all consideration paid to the owner, legal costs, including legal costs incurred by the City and third party legal costs, land surveying and appraisal costs, including third party land surveying and appraisal costs, administrative costs, the market value of the Additional Property Interest, disturbance damages, injurious affection and any and all compensation payable under the *Expropriations Act*, R.S.O. 1990, c. E. 26, if applicable, and the City shall be entitled, in accordance with Section 4.8 of the Project Agreement, to set off any such costs and expenses against any amounts otherwise due to DB Co pursuant to the terms of this Project Agreement.
- (d) Notwithstanding any provision of the Project Agreement to the contrary, including but not limited to Section 18.2, 18.3, and 18.4 of the Project Agreement, DB Co shall be responsible for any Contamination on, in or under, or migrating to or from any new parcel of land or any addition to any parcel forming part of the Lands acquired by the City as an Additional Property Interest, and for any Species-at-Risk, fossils, artifacts and other objects having artistic, historic, archaeological or monetary value, including human remains and burial sites which may be found on or at any new parcel of land or any addition to any parcel forming part of the Lands acquired by the City as an Additional Property Interest. DB Co may request the opportunity to undertake additional investigations with respect any Additional Property Interest and, if such additional investigations are undertaken, DB Co shall provide the results of such investigations to the City before the City completes the acquisition of the Additional Property Interest. In the event that the City is unable to obtain the consent of the relevant property owner with respect to any additional investigation requested by DB Co pursuant to this Section 8.2(d), the City shall notify DB Co that it is unable to obtain the required consent, in which case DB Co may, subject to its obligations in Section 8.2(c), direct the City to abandon the acquisition of the relevant Additional Property Interest.

Subject to this Section 8.2(d), the City shall have no obligation to conduct any investigation in connection with the acquisition of an Additional Property Interest.

- (e) The terms of any agreement, or amendment to an existing agreement, negotiated by the City with respect to the acquisition of any Additional Property Interest shall be treated, for the purposes of Section 17 of the Project Agreement and for the purpose of Schedule 16 – Encumbrances, as Encumbrances of which DB Co had knowledge prior to Financial Close provided, however, that if such an agreement or amendment is not a Standard Agreement, the City shall provide a copy of any such agreement or amendment to DB Co prior to concluding the agreement or amending agreement. Within ten (10) Business Days of delivery by the City of a copy of any agreement or amendment to DB Co, DB Co may, subject to its obligations in Section 8.2(c), direct the City to abandon the acquisition of the relevant Additional Property Interest, failing which DB Co shall be deemed to have accepted the terms of the agreement or amending agreement.
 - (f) DB Co may, from time to time request and the City shall provide an accounting of the costs incurred in respect of any acquisition of any Additional Property Interest by the City.
- 8.3** The provisions of Section 8.2 above shall apply with necessary amendments to the acquisition of Optional Lands by the City with the exception that Section 8.2(b) shall not apply and, while Section 8.2(a) shall apply, the City shall be required to use all reasonable efforts to secure the Optional Lands.

9. PROPERTY REQUEST PLANS

9.1 Conflict

In the event of any conflict between information contained on the face of a Property Request Plan and the Lands Table, the provisions contained in the Lands Table shall prevail.

9.2 Building Overlays

Building overlays included in Property Request Plans suggest the approximate extent of existing building envelopes only. Unless otherwise expressly provided in the Lands Table or in Schedule 15 – Output Specifications, notwithstanding the location of any building overlay, the grant of the non-exclusive licence, rights of use and access to any parcel forming part of the Lands extends only to within one hundred and fifty millimetres (150mm) from any existing building or structure. The City makes no representation as to the accuracy or completeness of building overlays included in Property Request Plans.

PART B – LANDS TABLE

[REDACTED]

PART C –FORM OF REPORT CARD

Report Card

Property Description:

PRP Reference:

Commencement Date:

Expected date of completion of Construction Activities and/or Works:

| | |
|--|--|
| Description of Use which DB Co has put to the Report Card Parcel (include particulars): | |
| Description of Any Physical Alteration to Report Card Parcel: | |
| Summary of Baseline Conditions (including reference to relevant Background Information): | |
| Summary of Spill Reports (append reports): | |
| Volume of soil imported (append lab reports): | |
| Description of any soil or groundwater sampling (include results) | |
| Follow up Environmental Investigation Recommended (include detail): | |

Every Report Card shall include the following attachments:

- (1) All applicable Property Request Plan(s) together with relevant site plans describing Report Card Parcel.
- (2) Lab reports with respect to imported soils (if any).
- (3) Spill reports (if any).
- (4) Copies of relevant Background Information or other environmental investigation reports.
- (5) Soil and Groundwater Sampling Reports (if any).

- (6) A summary of all reinstatement, restoration and/or rehabilitation works undertaken in accordance with Parts 1 and 6 of Schedule 15-2 or otherwise is required for all Report Card Parcels:
 - i. Designated Temporary Mobilization Lands (TM); and/or
 - ii. Where a significant grade change has occurred as a result of Construction Activities

SCHEDULE 21

CONSTRUCTION PERIOD PAYMENTS

1. INTERPRETATION AND DEFINITIONS

1.1 Interpretation

- (a) In this Schedule 21, and for the purposes of all calculations pursuant to this Schedule 21, all amounts cited in respect of capital costs and/or costs in respect of the construction of the Works are amounts net of any CA holdback.

1.2 Definitions

Any capitalized term not defined in this Schedule 21 shall have the meaning given to such term in the Project Agreement. In this Schedule 21, unless the context otherwise requires:

- (a) [not used]
- (b) “**Attachment A**”, “**Attachment B**”, “**Attachment C**”, “**Attachment D**”, “**Attachment E**”, “**Attachment F**” and “**Attachment G**” mean, respectively, Attachment A, Attachment B, Attachment C, Attachment D, Attachment E, Attachment F and Attachment G to this Schedule 21.
- (c) “**Capital Costs**” means costs incurred by DB Co in connection with the Project as reflected in the Financial Model that are not DB Co Soft Costs.
- (d) “**Construction Period Deduction**” means a deduction made from a Substantial Completion Payment in accordance with Section 6.1.
- (e) “**Construction Period Event**” means an incident or state of affairs that does not meet or comply with the Construction Period Performance Criteria, which is capable of becoming a Construction Period Quality Failure.
- (f) “**Construction Period Failure Category**” means the failure category described in the fourth column of the tables in Attachment E.
- (g) “**Construction Period Failure Type**” means the failure type described in the third column of the tables in Attachment E.
- (h) “**Construction Period Month**” means a calendar month during the Construction Period, except that:

- (i) the first Construction Period Month shall run from Financial Close until the end of the calendar month in which Financial Close occurs; and
 - (ii) the last Construction Period Month shall run from the first day of the calendar month in which the last Final Completion Date falls until the last Final Completion Date.
- (i) **“Construction Period Payment”** means a payment, which shall be no more frequent than once a month, calculated in accordance with this Schedule 21 and shall include the Financial Close CPP.
- (j) **“Construction Period Payment Application”** has the meaning set out in Section 3.3(a).
- (k) **“Construction Period Performance Criteria”** means the level of performance (as set out in the column entitled “Requirements to be met” in Attachment E) that DB Co must achieve to avoid a Construction Period Event for a failure to achieve compliance with the applicable Project Agreement requirement.
- (l) **“Construction Period Quality Failure”** means any failure by DB Co to comply with the requirements set out in the column entitled “Requirements to be met” corresponding to the Construction Period Performance Criteria designated as Construction Period Failure Type “CPQF” in Attachment E.
- (m) **“Construction Period Quality Failure Deduction”** has the meaning given in Section 6.2(a).
- (n) **“Contested Non-Conforming Works”** means Works in respect of which the City have given Notice to DB Co, pursuant to Section 51 of the Project Agreement (but not a Non-Conformance Report initiated by the City pursuant to Schedule 11 – Integrated Management System Requirements), that, in the opinion of the City, such Works are not in accordance with the Project Agreement, and DB Co has asserted that, in DB Co’s opinion, such Works are in accordance with the Project Agreement.
- (o) **“Credit Rules”** means the rules set out in Attachment F.
- (p) **“Critical Construction Period Quality Failure”** means a Construction Period Quality Failure designated as a Construction Period Failure Category of “Critical” in Attachment E.
- (q) **“Critical Qualifying NCR”** means a Qualifying NCR raised by the City or DB Co on a Critical Non-Conformance that requires all or any portion of DB Co Accepted Works to be removed or repeated because such DB Co Accepted Works have, or would reasonably be expected to have, a significantly adverse or materially adverse impact on:
 - (i) the safety of the Project, the environment, System Users or the public;
 - (ii) statutory and regulatory requirements;
 - (iii) the quality of the Works; or
 - (iv) the durability of the Works.
- (r) **“Critical Qualifying Process NCR”** means a Qualifying Process NCR raised by the City or DB Co on a Non-Conformance that requires physical progress on the Works to be stopped for longer than twenty-four (24) hours.

- (s) **“DB Co Accepted Works”** means all physical elements of the Works that have been accepted by DB Co as meeting its acceptance criteria for those Works, pursuant to its Inspection and Test Plan.
- (t) **“DB Co Construction Period Payment Documentation”** has the meaning set out in Section 3.1(c).
- (u) **“DB Co Funding Amount”** means, for each Payment Period, [REDACTED]% of the Total Capital Cost Incurred to Date for the applicable Payment Period.
- (v) **“DB Co Officer Construction Period Payment Certificate”** has the meaning set out in Section 3.1(d).
- (w) **“DB Co Soft Costs”** means the special purpose vehicle costs, accounting, tax, audit costs, rating agency fees, bid fee cost, independent certifier costs, pre-construction costs (e.g. bid pursuit costs, financial advisor, legal advisor, insurance advisor), other ancillary fees, interest and fees paid in connection with the Financing, in each case, in accordance with and as reflected in the Financial Model and incurred by DB Co in connection with the Project (or with respect to the interest or fees paid in connection with the Financing for purposes of calculating the Total Capital Cost Incurred to Date actually incurred by DB Co and verified pursuant to the Lender Advance Confirmations).
- (x) **“Earned Value”** means the budgeted cost of work performed in respect of each Payment Period, measured using the Earned Value Measurement Techniques and the Performance Measurement Baseline.
- (y) **“Earned Value Measurement Techniques”** means the techniques used to measure Earned Value established by DB Co and agreed with the Independent Certifier in accordance with the “Practice Standard for Earned Value Management” (2nd Edition, published in 2011 by the Project Management Institute, Inc.).
- (z) **“Earned Value Progress Ratio”** means, as of a Payment Calculation Date, the aggregate total Earned Value achieved by DB Co and certified by the Independent Certifier divided by the Projected Earned Value (Cumulative).
- (aa) **“Financial Close CPP”** means the Construction Period Payment to be made by the City to DB Co on Financial Close.
- (bb) **“Financing”** means the financing with the Lenders to finance the costs of the Project pursuant to the Lending Agreements.
- (cc) **“IC Construction Period Payment Authorization Certificate”** has the meaning set out in Section 3.3(c).
- (dd) **“Lender Advance Confirmations”** has the meaning set out in Section 3.1(a).
- (ee) **“Lender Advances”** has the meaning set out in Section 3.1(a)(i).
- (ff) **“Medium Construction Period Quality Failure”** means a Construction Period Quality Failure designated as a Construction Period Failure Category of “Medium” in Attachment E.

- (gg) **“Medium Qualifying NCR”** means a Qualifying NCR raised by the City or DB Co on a Medium Non-Conformance for all or any portion of DB Co Accepted Works that is not a Critical Qualifying NCR.
- (hh) **“Medium Qualifying Process NCR”** means a Qualifying Process NCR raised by the City or DB Co on a Non-Conformance that requires changes to a Works Submittal being used by DB Co in its delivery of the Works that is not a Critical Qualifying NCR.
- (ii) **“Minor Construction Period Quality Failure”** means a Construction Period Quality Failure designated as a Construction Period Failure Category of “Minor” in Attachment E.
- (jj) **“Minor Construction Period Quality Failure Tolerance”** has the meaning given in Section 6.3(a).
- (kk) **“Minor Qualifying NCR”** means a Qualifying NCR raised by the City on a Minor Non-Conformance on all or any portion of the Works that have been inspected and tested or approved by DB Co at a Witness Point or Hold Point, pursuant to the relevant Inspection and Test Plan but are not yet DB Co Accepted Works. For clarity, a Minor Qualifying NCR does not mean a Qualifying NCR raised by DB Co.
- (ll) **“Minor Qualifying Process NCR”** means a Qualifying Process NCR raised by the City on a Minor Non-Conformance that is not a Critical Qualifying Process NCR or Medium Qualifying Process NCR. For clarity, a Minor Qualifying Process NCR does not mean a Qualifying Process NCR raised by DB Co.
- (mm) **“Mobilization Credit”** has the meaning given in Section 1.3(e) of Attachment F.
- (nn) **“Monthly Non-Conformance Report”** means the monthly report to be submitted by DB Co in accordance with Section 2.11 of Schedule 11 – Integrated Management System Requirements.
- (oo) **“NCR”** means a Non-Conformance Report.
- (pp) **“Non-Conformance”** has the meaning given in Schedule 11- Integrated Management System Requirements.
- (qq) **“Non-Conformance Report”** has the meaning given in Schedule 11 – Integrated Management System Requirements.
- (rr) **“Payment Application Requirements”** has the meaning set out in Section 3.3(a).
- (ss) **“Payment Calculation Date”** means the date set out in Column 2 of Table A that is the date to be used as the “Payment Calculation Date” for the applicable Construction Period Payment, subject to Section 2.2(a)(ii).
- (tt) **“Payment Period”** means the payment period(s) identified in Column 1 of Table A.
- (uu) **“Performance Measurement Baseline”** is the Capital Cost loaded Works Schedule, at detailed activity level, that has achieved “NO COMMENT” or “MINOR COMMENT” status in accordance with Section 13 of the Project Agreement, as amended from time to time by the parties in accordance with Section 13 of the Project Agreement.

- (vv) **“Projected Capital Costs”** means, in respect of each Payment Period, the amount set out in Column 3A of Table A.
- (ww) **“Private Capital Invested”** means the total amount of Financing advanced and utilized in the Project to fund the Works, comprising the aggregate of all DB Co Funding Amounts.
- (xx) **“Projected Construction Period Payment”** means, in respect of each Construction Period Payment, the amount set out in Column 9 of Table A, which shall equal [REDACTED]% of the Projected Eligible Construction Period Payment for the applicable Payment Period.
- (yy) **“Projected Construction Period Payment (Cumulative)”** means, in respect of each Construction Period Payment, the amount set out in Column 10 of Table A.
- (zz) **“Projected DB Co Funding Amount”** means, in respect of each Payment Period, the amount set out in Column 6 of Table A, which shall equal [REDACTED]% of the Projected Eligible Construction Period Payment for the applicable Payment Period.
- (aaa) **“Projected DB Co Funding Amount (Cumulative)”** means, in respect of each Payment Period, the amount set out in Column 7 of Table A.
- (bbb) **“Projected DB Co Soft Costs”** means, in respect of each Payment Period, the amount set out in Column 3 of Table A.
- (ccc) **“Projected Earned Value”** means, in respect of each Construction Period Payment, the amount set out in Column 3B of Table A.
- (ddd) **“Projected Eligible Construction Period Payment”** means, in respect of each Construction Period Payment, the amount set out in Column 4 of Table A, which shall be the sum of the Projected DB Co Soft Costs and Projected Capital Costs.
- (eee) **“Projected Eligible Construction Period Payment (Cumulative)”** means, in respect of each Construction Period Payment, the amount set out in Column 5 of Table A.
- (fff) [not used]
- (ggg) **“Qualifying NCR”** means a Non-Conformance Report in accordance with Schedule 11 – Integrated Management System Requirements regarding any Non-Conformance discovered in the physical elements of any of the Works:
- (i) for which DB Co has continued, or has stated the intention to continue, construction of the Works past the relevant Witness Point or Hold Point in contravention of the Inspection and Test Plan; or
 - (ii) following DB Co’s stated completion of a task or component and DB Co’s statement that the requirements for Design and Construction Certification have been met in respect of such Works and such Works have been inspected and tested by DB Co pursuant to the Inspection and Test Plan,
- and shall include “Critical Qualifying NCR”, “Medium Qualifying NCR” or “Minor Qualifying NCR”.

- (hhh) **“Qualifying Process NCR”** means a Non-Conformance Report in accordance with Schedule 11 – Integrated Management System Requirements regarding any Non-Conformance discovered in the Project Operations as described in Attachment E, and shall include “Critical Qualifying Process NCR”, “Medium Qualifying Process NCR” or “Minor Qualifying Process NCR”.
- (iii) **“Remedial Period”** means the period allowed for remedying a Construction Period Quality Failure in accordance with the fifth column of the tables in Attachment E.
- (jjj) **“Repeated Minor Construction Period Quality Failure”** has the meaning set out in Section 6.3(c).
- (kkk) **“Request for Payment”** has the meaning set out in Section 3.3(a)(i).
- (lll) **“Supplementary Payment Calculation Date”** has the meaning set out in Section 2.3(a).
- (mmm) **“Table A”** means the Table A set out in Attachment A.
- (nnn) **“Total Capital Cost”** means \$[REDACTED]
- (ooo) **“Total Capital Cost Incurred to Date”** means the cumulative amount of the Total Capital Cost determined as of each Payment Calculation Date as the sum of:
 - (i) the cumulative aggregate of Capital Costs up to, and including, the Payment Period as set out in Table A, multiplied by the Earned Value Progress Ratio; and
 - (ii) the cumulative aggregate of DB Co Soft Costs up to, and including, the Payment Period as set out in Table A.
- (ppp) **“Unpaid Construction Period Payment”** means any portion of the Projected Eligible Construction Period Payment (Cumulative) set out in Table A that is unpaid after the last Construction Period Payment set out in Table A.

2. PAYMENTS BY THE CITY

2.1 Obligation to Pay

- (a) The City shall pay to DB Co:
- (i) the Construction Period Payments; and
 - (ii) the Substantial Completion Payments,
- in accordance with the Project Agreement and this Schedule 21.

2.2 Calculation of the Construction Period Payments

- (a) Each Construction Period Payment shall be calculated in accordance with the following:
- (i) subject to Section 2.2(a)(ii) and Section 2.3, the number of Construction Period Payments to be paid by the City is set out in Table A;
 - (ii) the first actual Payment Calculation Date shall be the first Payment Calculation Date set out in Table A and each Payment Calculation Date thereafter shall occur on the applicable Payment Calculation Date set out in Table A;
 - (iii) each Construction Period Payment shall equal the lesser of:
 - (A) the Projected Construction Period Payment (Cumulative) set out in Table A for the applicable Payment Period less the total value of all Construction Period Payments made by the City prior to the date of calculation; or
 - (B) the Total Capital Cost Incurred to Date minus the DB Co Funding Amounts prior to and including the applicable Payment Period less the total value of all Construction Period Payments made by the City prior to the date of calculation;

provided that, the amount of the Financial Close CPP shall be as determined in accordance with Section 3.4.

2.3 Payment of Unpaid Construction Period Payment Prior to Substantial Completion

- (a) After the expiration of all Payment Calculation Dates set out in Column 2 of Table A, DB Co may identify additional Payment Calculation Dates (each a “**Supplementary Payment Calculation Dates**”) for the purposes of seeking payment of any Unpaid Construction Period Payment, or any portion thereof, in accordance with the following:
- (i) DB Co shall provide at least 30 days’ Notice to the City of each Supplementary Payment Calculation Date;
 - (ii) All provisions of this Schedule 21 with respect to the application for, and calculation and Independent Certifier review of, a Construction Period Payment shall apply mutatis mutandis to an application for, and calculation and Independent Certifier review of, a payment pursuant to this Section 2.3;
 - (iii) Each Supplementary Payment Calculation Date shall occur no more than once a month;

and

- (iv) any Unpaid Construction Period Payment, or any portion thereof, not paid pursuant to this Section 2.3 shall be paid in accordance with Section 4.2.

2.4 [Not Used]

2.5 Calculation of Substantial Completion Payment

- (a) Subject to Section 2.3, the payment to be made by the City following Substantial Completion shall be calculated in accordance with the following:
 - (i) The payment made following Substantial Completion shall equal,
 - (A) the Substantial Completion Payment; **plus**
 - (B) in respect of West Substantial Completion any Unpaid Construction Period Payment as of the date of payment of the West Substantial Completion Payment.
 - (ii) For clarity, DB Co acknowledges and agrees that,
 - (A) the Substantial Completion Payments are intended to act as a “take-out” payment for Private Capital Invested in the Project;
 - (B) DB Co has structured its Construction Period Payments and the Substantial Completion Payments to ensure that the Total Capital Cost of the Project is paid in a timely manner, and satisfied in full from the final Substantial Completion Payment; and
 - (C) the City has the authority to pay up to **[REDACTED]**% of Total Capital Costs through payment of the Construction Period Payments, plus the Substantial Completion Payments.

3. CONSTRUCTION PERIOD PAYMENTS

3.1 Information to be Provided by DB Co – Lender Advance Confirmations and DB Co Construction Period Payment Documentation

- (a) In order to enable the City and the Independent Certifier to calculate and verify Earned Value, the progress of the Works, the Capital Costs, DB Co Soft Costs and the Construction Period Payments, DB Co shall deliver to the City Representative and the Independent Certifier:

- (i) evidence of all Private Capital Invested, including copies of all draw requests, reports, information, and documentation supporting, or required to be submitted to the Lenders, the Lenders' technical advisor and/or the Lenders' Agent, as the case may be, in respect of DB Co's applications for advances, draws, releases of funds or payments by the Lenders under the Lending Agreements ("**Lender Advances**"); and
 - (ii) all payment or advance confirmations issued by or on behalf of the Lenders including, for clarity, issued by the Lenders' technical advisor,
- (items in Section 3.1(a)(i) and Section 3.1(a)(ii) collectively referred to as "**Lender Advance Confirmations**"). Acceptable forms of confirmation would include such proof as wire transfer statements and/or bank statements and any other evidence as agreed between the City and DB Co.
- (b) DB Co shall acquire, from the Lenders or the Lenders' Agent, as part of the Financing and in a form and content acceptable to the City Representative, the right for DB Co to receive, and to deliver to the City and the Independent Certifier, copies of all Lender Advance Confirmations. DB Co shall deliver to the City Representative and the Independent Certifier, copies of all Lender Advance Confirmations within two Business Days following receipt of each Lender Advance by DB Co.
 - (c) In order to enable the City and the Independent Certifier to calculate and verify progress of the Earned Value of the Works, the Capital Costs, the DB Co Soft Costs and the Construction Period Payments, DB Co shall submit, to the Independent Certifier,
 - (i) all information required by Schedule 33 – Works Reports and Schedule 12 – Works Scheduling Requirements; and,
 - (ii) any other information reasonably required by the Independent Certifier to allow the Independent Certifier to assess the Earned Value, the Capital Costs, the DB Co Soft Costs and the payment to be made under Section 2.2(a)(iii)(B) and to assess the Total Capital Cost Incurred to Date,(collectively, the "**DB Co Construction Period Payment Documentation**").
 - (d) In conjunction with all Construction Period Payment Applications, DB Co shall complete and deliver to the City Representative and the Independent Certifier a DB Co officer certificate in substantially the form set out in Attachment C confirming the information set out therein ("**DB Co Officer Construction Period Payment Certificate**").

3.2 Intentionally Deleted

3.3 Submission and Review of DB Co Construction Period Payment Applications

- (a) No later than five days after each Payment Calculation Date, DB Co shall prepare, complete and deliver an application for payment of the applicable Construction Period Payment (a "**Construction Period Payment Application**") to the City Representative and the Independent Certifier. Each Construction Period Payment Application shall consist of,

- (i) a request for payment substantially in the form attached as Attachment B, including all documents contemplated in the request for payment pursuant to Attachment B (each, a **“Request for Payment”**);
 - (ii) except to the extent already delivered to the City, the Lender Advance Confirmations;
 - (iii) except to the extent already delivered to the City, the DB Co Construction Period Payment Documentation; and
 - (iv) a DB Co Officer Construction Period Payment Certificate certifying the amount of Total Capital Cost Incurred to Date, as of the applicable Payment Calculation Date.
- (collectively, (i) – (iv), the **“Payment Application Requirements”**).
- (b) DB Co shall cooperate with the City Representative and the Independent Certifier to permit the Independent Certifier’s review and assessment of the DB Co Construction Period Payment Documentation, the Lender Advance Confirmations and all other documentation submitted with the Construction Period Payment Application. Such cooperation shall include responding to inquiries by the Independent Certifier so that the Independent Certifier can verify any and all matters related to the DB Co Construction Period Payment Documentation and the Lender Advance Confirmations, and the statements contained therein, to the reasonable satisfaction of the Independent Certifier.
 - (c) Within five Business Days after the receipt by the Independent Certifier of a duly completed Construction Period Payment Application, the Independent Certifier shall review the Total Capital Cost Incurred to Date claimed in the Construction Period Payment Application and shall perform such inquiries, investigations and inspections as are necessary for the Independent Certifier to be able to verify Earned Value and Total Capital Cost Incurred To Date and shall provide a certificate (an **“IC Construction Period Payment Authorization Certificate”**) to the City Representative and the DB Co Representative setting out:
 - (i) a certification to the City of the Total Capital Cost Incurred to Date, in accordance with the Works Report; and
 - (ii) a calculation of the Construction Period Payment pursuant to Section 2.2, and a calculation of the corresponding DB Co Funding Amount for such Payment Period,
 - (d) The City shall, subject to and in accordance Article 4 of the Project Agreement and no later than five Business Days after the date of the IC Construction Period Payment Authorization Certificate, pay the applicable Construction Period Payment to DB Co.
 - (e) DB Co covenants and agrees that DB Co shall,

- (i) carry out the Works and make all payments due and payable to the Construction Contractor in respect of the Works and to the applicable recipients of the DB Co Soft Costs without further payments from the City other than Construction Period Payments, and the Substantial Completion Payments as set out in this Schedule 21; and
- (ii) continue to comply with the provisions of the Project Agreement and the CA including complying with all holdback and trust obligations from its own resources, if necessary, and as required under the CA.

3.4 Financial Close CPP

The preceding Sections 3.1 and 3.3 are subject to this Section 3.4.

The amount of the Financial Close CPP shall be [REDACTED]% of the mobilization costs.

Notwithstanding Sections 3.1 and 3.3, all deliveries of documents and other information, and related determinations, shall be made by the parties during the period prior to Financial Close so that the Financial Close CPP may be made by the City on Financial Close as part of the agreed flow of funds on that date. All required deliveries and other information shall be advised by the parties to each other in a timely manner.

4. SUBSTANTIAL COMPLETION PAYMENTS

4.1 Substantial Completion Payments

- (a) [Not used]
- (b) Once DB Co believes that it has satisfied:
 - (i) all requirements for East Substantial Completion, it shall deliver the East Substantial Completion Notice contemplated in Section 25.4 of the Project Agreement; and
 - (ii) all requirements for West Substantial Completion, it shall deliver the West Substantial Completion Notice contemplated in Section 25.4 of the Project Agreement.
- (c) The City shall, once all preconditions to eligibility for payment have been satisfied in accordance with the provisions of the Project Agreement, and subject to Article 4 of the Project Agreement, pay to DB Co:
 - (i) upon issuance of the East Substantial Completion Certificate, the East Substantial Completion Payment, plus, for clarity, applicable HST, on the East Substantial Completion Payment Date; and
 - (ii) upon issuance of the West Substantial Completion Certificate, the West Substantial Completion Payment plus, for clarity, applicable HST, less any Lane Closure Adjustment and Bus Rapid Transit Lane Closure Adjustment, on the West Substantial Completion Payment Date.

4.2 Payment of Remaining Unpaid Construction Period Payments

- (a) Subject to Section 2.3, once DB Co believes that it has satisfied all requirements for West Substantial Completion, it shall deliver an application for payment of any remaining Unpaid

Construction Period Payments for the Works to the City Representative and the Independent Certifier substantially in the form attached as Attachment D (the “**Unpaid Construction Period Payment Application**”) which shall provide all documentation in respect of such Unpaid Construction Period Payments. Once all of the conditions for payment of the West Substantial Completion Payment have been satisfied by DB Co, the City shall pay or cause to be paid to DB Co all such Unpaid Construction Period Payments.

5. GENERAL

- (a) DB Co shall provide direction to the City as to a bank account with a Schedule 1 Bank in Canada or an alternative bank in Canada provided such bank is permitted under the Lending Agreements, where each Construction Period Payment, the Substantial Completion Payments and any Unpaid Construction Period Payments, together with applicable HST, are to be deposited.
- (b) DB Co acknowledges and agrees that payment by the City of Construction Period Payments, the Substantial Completion Payments and the Unpaid Construction Period Payments in accordance with this Schedule 21 constitutes payment by the City to DB Co in satisfaction of the City’s obligation to pay Construction Period Payments and the Substantial Completion Payments, as applicable, to DB Co under the Project Agreement and in satisfaction of any trust obligation of the City with respect to such payments under Section 7 of the CA pursuant to Section 10 of the CA.
- (c) DB Co shall provide to the City, from time to time and no later than 5 Business Days after a request from the City, such information and documentation as the City may require (including certification in writing by a DB Co officer addressed to the City and the Independent Certifier, to demonstrate that the proceeds of the Construction Period Payments, and the Substantial Completion Payments are being used to pay duly authorized costs of the Works, special purpose vehicle costs, Financing costs, and other costs incurred to complete the Works) to verify that all amounts due and payable in respect of the costs of the Works, special purpose vehicle costs, Financing costs and other costs incurred to complete the Works for the applicable period in excess of the applicable Construction Period Payment or Substantial Completion Payment are being satisfied and to satisfy all holdback and trust obligations owed to the Construction Contractor and other Subcontractors from time to time under the CA.
- (d) Notwithstanding anything to the contrary in this Schedule 21 or the Project Agreement,
 - (i) the City is not obligated to make any payment to DB Co (including for clarity, any Construction Period Payments or Substantial Completion Payments) unless all conditions precedent applicable to such payment pursuant to this Schedule 21 have been satisfied by DB Co; and
 - (ii) the City is not obligated to make payment to DB Co if, in connection with the Works, the City is or becomes aware,
 - (A) that a claim for lien under the CA has been registered against the Lands; or
 - (B) that a notice of lien or claim for lien under the CA has been made against or in respect of the Lands or the holdbacks required to be maintained under the CA; or

- (C) that there has been a failure by DB Co or any DB Co Party to comply with the requirements of the CA, including a failure to satisfy the statutory holdbacks under the CA in respect of the Works,

(in each case to the extent that any such liens, claims or failures have been caused by an act or omission of DB Co or any DB Co Party), and provided that no payment from the City shall be withheld or delayed on the grounds of any liens registered or claimed, where such liens have been duly released, discharged or vacated in accordance with the requirements of the CA.

- (e) No Construction Period Payment, or Substantial Completion Payment or partial or entire use or occupancy of the New City Infrastructure, the New MTO Infrastructure or the Lands shall constitute acceptance by the City of the Works in accordance with the Project Agreement.
- (f) If the City or DB Co, acting in good faith, dispute a determination of the Independent Certifier made pursuant to this Schedule 21, the City shall pay the amounts in dispute in accordance with the determination of the Independent Certifier and the Party that wishes to dispute the decision of the Independent Certifier may refer such Dispute for resolution in accordance with Schedule 27 – Dispute Resolution Procedure.
- (g) Sections 4.2, 4.6 and 4.7 of the Project Agreement apply to Construction Period Payments, and the Substantial Completion Payments.
- (h) Notwithstanding anything to the contrary in the Project Agreement, the City shall not make any deduction, set-off or withholding from any Construction Period Payment or Unpaid Construction Period Payment other than in accordance with this Schedule 21.

6. CONSTRUCTION ENFORCEMENT DEDUCTIONS

6.1 Construction Period Deductions

- (a) If, at any time prior to Substantial Completion, DB Co commits a Construction Period Quality Failure, the City may, in its sole discretion, assess and accumulate a Construction Period Deduction and deduct the total of all Construction Period Deductions from the West Substantial Completion Payment.

6.2 Calculation of the Construction Period Deductions

- (a) Each Construction Period Deduction shall be calculated in accordance with the following formula:

$$TCPD_n = \sum CPD_n$$

Where:

$TCPD_n$ means the total Construction Period Deduction applicable to Payment Period n; and

$\sum CPD_n$ means the sum of Construction Period Deductions in respect of the relevant Payment Period in relation to Construction Period Quality Failures calculated in accordance with this Schedule 21 (the “**Construction Period Quality Failure Deduction**”)

- (b) The deduction attributable to each Construction Period Quality Failure shall be as follows:
- (i) in the case of a Minor Construction Period Quality Failure for a Non-Conformance Report initiated by DB Co, there shall be no deduction;
 - (ii) in the case of a Medium Construction Period Quality Failure for a Non-Conformance Report initiated by DB Co, each deduction shall equal \$[REDACTED];
 - (iii) in the case of a Minor Construction Period Quality Failure for a Non-Conformance Report initiated by the City:
 - (A) the first deduction shall equal \$[REDACTED]; and
 - (B) each subsequent deduction arising from a failure to remediate prior to the expiration of the applicable Remedial Period, shall be [REDACTED] per cent of the immediately previous deduction but shall not exceed [REDACTED] per cent of the first deduction;
 - (iv) in the case of a Medium Construction Period Quality Failure for a Non-Conformance Report initiated by the City:
 - (A) the first deduction shall equal \$[REDACTED]; and
 - (B) each subsequent deduction arising from a failure to remediate prior to the expiration of the applicable Remedial Period shall equal [REDACTED] per cent of the immediately previous deduction but shall not exceed [REDACTED] per cent of the first deduction; and
 - (v) in the case of a Critical Construction Period Quality Failure for a Non-Conformance Report initiated by either Party:
 - (A) the first deduction shall equal \$[REDACTED]; and
 - (B) each subsequent deduction arising from a failure to remediate prior to the expiration of the applicable Remedial Period shall equal [REDACTED] per cent of the immediately previous deduction but shall not exceed [REDACTED] per cent of the first deduction.
- (c) For clarity, subject to DB Co's right to Dispute the Construction Period Quality Failure, the occurrence of a Construction Period Quality Failure will immediately give rise to a right, on behalf of the City, to apply a Construction Period Quality Failure Deduction against the Substantial Completion Payment, irrespective of the Remedial Period permitted.
- (d) After the occurrence of a Construction Period Quality Failure, DB Co shall remediate the Construction Period Quality Failure prior to the expiration of the applicable Remedial Period set out in Attachment E.
- (A) If, prior to the expiration of the applicable Remedial Period, DB Co demonstrates, to the satisfaction of the City Representative, acting reasonably, that it has remedied the Construction Period Quality Failure, no further

Construction Period Deduction shall be made in respect of that Construction Period Quality Failure.

- (B) If DB Co fails to remediate a Construction Period Quality Failure prior to the expiration of the applicable Remedial Period, the City, may, in its sole discretion, apply a further Construction Period Deduction, calculated in accordance with this Section 6.2, and a further Remedial Period (or Remedial Periods) of the same duration shall be deemed to have commenced.
- (C) The City may, in their sole discretion, apply the applicable Construction Period Deduction each time DB Co fails to remediate a Construction Period Quality Failure prior to the expiration of the applicable Remedial Period until such time as DB Co demonstrates, to the satisfaction of the City Representative, acting reasonably, that it has remediated the applicable Construction Period Quality Failure.

6.3 Tolerances for Minor Construction Period Quality Failures for Non-Conformance Reports Initiated by the City

- (a) The City shall assess Construction Period Quality Failures on a Construction Period Month by Construction Period Month basis. Except as provided in Section 6.3(c), the City shall not apply a Construction Period Deduction due to a Minor Construction Period Quality Failure for a Non-Conformance Report initiated by the City in respect of any Construction Period Month in which the total number of Minor Construction Period Quality Failures for Non-Conformance Reports initiated by the City for that Construction Period Month is less than or equal to [REDACTED] (the “**Minor Construction Period Quality Failure Tolerance**”).
- (b) If the Minor Construction Period Quality Failure Tolerance is exceeded, the City may, in their sole discretion, apply a Construction Period Deduction for each Minor Construction Period Quality Failure for a Non-Conformance Report initiated by the City in excess of the Minor Construction Period Quality Failure Tolerance during the applicable Construction Period Month.
- (c) If, in any Construction Period Month, a Minor Construction Period Quality Failure for a Non-Conformance Report initiated by the City is due to circumstances that are substantively the same cause as a previous Minor Construction Period Quality Failure for a Non-Conformance Report initiated by the City (within the same Construction Period Month or in a different Construction Period Month) (a “**Repeated Minor Construction Period Quality Failure**”), then a Construction Period Deduction shall be made in respect of the third and each subsequent Repeated Minor Construction Period Quality Failure, irrespective of the Minor Construction Period Quality Failure Tolerance.

6.4 Administration of Construction Period Quality Failures and Construction Period Deductions

- (a) Subject to Sections 6.4(b) to 6.4(e) inclusive, the City shall use the Monthly Non-Conformance Report produced by DB Co for the purposes of calculating the relevant Construction Period Deductions.
- (b) If either Party believes that there is an error or omission in a Monthly Non-Conformance Report, that Party shall promptly provide Notice to the other Party of such error or omission. Immediately after a Notice given pursuant to this Section 6.4(b), DB Co and the City shall

attempt to resolve or clarify the error or omission and amend the applicable Monthly Non-Conformance Report, to their mutual satisfaction, acting reasonably. Subject to Section 6.4(e), if the Parties fail to resolve or clarify the error or omission within ten Business Days after a Notice given pursuant to this Section 6.4(b), either Party may refer the matter to the Dispute Resolution Procedure. Subject to Section 6.4(d) and Section 6.4(e), the Parties are prohibited from giving Notice of an error or omission pursuant to this Section 6.4(b) after the expiration of 60 days after the date of the applicable Monthly Non-Conformance Report.

- (c) Subject to Section 6.4(e), if DB Co fails to monitor or accurately report a Construction Period Event or Construction Period Quality Failure then, in addition to the Construction Period Deduction to be made in respect of the relevant Construction Period Quality Failure (if any), a failure to monitor or report a Construction Period Event or a Construction Period Quality Failure shall be deemed to be a Minor Construction Period Quality Failure.
- (d) In the event that any inspection or investigation by the City or DB Co pursuant to the Project Agreement reveals new errors, omissions or failures of the type referred to in Section 6.4(b) or Section 6.4(c), such errors, omissions or failures shall be dealt with in accordance with Section 6.4(b) or Section 6.4(c), as applicable, and, for clarity, the City may, in its sole discretion, apply Construction Period Deductions in respect of any Construction Period Quality Failures discovered pursuant to this Section 6.4(d) in the manner set out in Section 6.2. Any such Construction Period Deductions shall be made from the Substantial Completion Payment. For clarity, the 60 day deadline set out in Section 6.4(b) shall not apply to errors, omissions or failures revealed pursuant to this Section 6.4(d).
- (e) For the purposes of Sections 6.4(b), 6.4(c) and 6.4(d), if DB Co or a DB Co Party has engaged in fraudulent action or inaction, deliberate misrepresentation, or gross misconduct or incompetence,
 - (i) in the preparation of the Monthly Non-Conformance Report; or
 - (ii) in carrying out the Work resulting in Construction Period Quality Failures,then,
 - (iii) the 60 day deadline set out in Section 6.4(b) shall not apply; and
 - (iv) a failure to monitor or accurately report a Construction Period Event or Construction Period Quality Failure pursuant to Section 6.4(c) shall be deemed to be a Critical Construction Period Quality Failure.
- (f) For clarity, if Construction Period Performance Criteria are based upon Non-Conformance Reports, no Construction Period Deductions shall be made for a Non-Conformance Report which is subject to an objection by DB Co, a Notice of objection by DB Co or Dispute Resolution Process, pursuant to Part 7 of Schedule 11 – Integrated Management System Requirements.

6.5 Additional Requirements for Tracking and Reporting

- (a) In addition to the requirements of Section 7.2 of Part 7 to Schedule 11 – Integrated Management System Requirements, the Non Conformance Tracking System shall record Construction Period Quality Failure Deductions pursuant to this Schedule 21.

- (b) In addition to the requirements of Section 7.2 of Part 7 to Schedule 11 – Integrated Management System Requirements, the Monthly Non-Conformance Report shall contain:
 - (i) the number of Construction Period Quality Failure Deductions in each Construction Period Failure Category accrued within the last Construction Period Month pursuant to this Schedule 21; and
 - (ii) summary statistics and historic trends since Financial Close for the number of Construction Period Quality Failure Deductions in each Construction Period Failure Category each Construction Period Month pursuant to this Schedule 21.

6.6 Disputing a Non-Conformance Report During the Construction Period

- (a) In respect of the following circumstances, the Parties shall be subject to the binding determination of the Independent Certifier pursuant to Section 4.3 and 4.4 of Schedule 27 – Dispute Resolution Procedure and the Independent Certifier’s decision shall be final and shall not be subject to Dispute Resolution:
 - (i) a Notice of objection to a Non-Conformance Report has not been resolved by mutual agreement between the City and DB Co within five Business Days after the delivery of a Notice of the objection pursuant to Section 7.1(a)(v) and Section 7.1(a)(vii) of Part 7 to Schedule 11 – Integrated Management System Requirements; and
 - (ii) the Non-Conformance Report referred to in Section 6.6(a)(i) would have been a Construction Period Quality Failure with a Construction Period Failure Category of “Minor” if the Notice of objection referred to in Section 6.6(a)(i) had not been issued.

Project Agreement – Schedule 21 Execution Version

CONFIDENTIAL & PROPRIETARY

CONFIDENTIAL & PROPRIETARY

CONFIDENTIAL & PROPRIETARY

ATTACHMENT B

Form of Request for Payment

| | |
|---|--|
| TO: the City AND TO: [Independent Certifier] | BY: [DB Co Name] (“DB Co”) |
| Construction Period Payment No: | Project: Ottawa LRT Project-Stage 2 Confederation Line Extension (“Project”) |
| Date: [Date] | Project Agreement dated _____ (“Project Agreement”) |

1. DB Co hereby makes application for payment in the amount of _____ [insert amount in words] Dollars (\$[insert amount in numbers]) which is in respect of Payment Period No. ____ in Table A. This payment is for a portion of the Total Capital Costs pursuant to the terms of the Project Agreement and Schedule 21 – Construction Period Payments. Capitalized terms used and not defined herein shall have the same meaning given to them in the Project Agreement.
2. Attached to this Request for Payment is a DB Co Officer Construction Period Payment Certificate in respect of this Payment Period No. ____ [Note: Use the form of certificate set out in Attachment C of this Schedule 21.];
3. DB Co hereby certifies that the Earned Value and the Total Capital Cost Incurred To Date for the applicable Payment Period qualifies DB Co for the Construction Period Payment being requested herein.
4. Attached hereto as Appendix 1 are the Lender Advance Confirmations for the period covered by this Request for Payment.
5. Attached hereto as Appendix 2 is a current Workplace Safety and Insurance Board Clearance Certificate for Construction Contractor evidencing full compliance by [DB Co/Construction Contractor] with the requirements of the *Workplace Safety and Insurance Act, 1997* (Ontario).
6. Attached hereto as Appendix 3 is a Statutory Declaration by DB Co on CCDC Form 9A (2001) evidencing compliance by DB Co with the holdback requirements of the CA.

The information and calculations contained herein and on the attachments hereto are certified to be true, accurate and complete.

Dated at [City], [Province] this [day] day of [month], 20 [●].

ATTACHMENT C

Form of DB Co Officer Construction Period Payment Certificate

| | |
|---|---|
| TO: the City AND TO: [Independent Certifier] | BY: [DB Co Name] (“DB Co”) |
| Progress Certificate/Construction Period Payment No: _____ | Project: Ottawa LRT Project-Stage 2 Confederation Line Extension (“Project”) |
| Date: [Date] | Project Agreement dated _____ (“Project Agreement”) |
| | Request for Payment dated _____ (“Request for Payment”) |

I, _____, the [insert title] of [DB Co] hereby certify for and on behalf of DB Co without incurring personal liability and confirm that the same be relied upon by the City and the Independent Certifier without further enquiry as of _____ [insert date] that:

1. I am a duly authorized [signing officer of][signatory for] DB Co, am familiar with the provisions of Project Agreement and have made reasonable investigations of corporate records and inquiries of other officers and senior personnel of DB Co in certifying the information set out below. Terms defined in the Project Agreement have the same meanings when used in this certificate.
2. No DB Co Event of Default has occurred and is continuing under the Project Agreement and the other Project Documents.
3. DB Co has available to it sufficient funds to achieve Substantial Completion in accordance with the Project Agreement subject to DB Co continuing to meet its obligations under the Project Agreement and in receipt of Construction Period Payments from the City.
4. All DB Co Funding Amounts that were to have been funded prior to the date of this Certificate have been funded.
5. All funds received and disbursed by DB Co in connection with the Project prior to the date of this Certificate have been used solely in respect of the payment of Total Capital Costs properly due and payable.
6. The requested Construction Period Payment amount to which this Certificate is attached does not exceed the Projected Eligible Construction Period Payment (Cumulative) set out in Table A applicable to the period to which this Certificate applies.
7. DB Co has complied with all requirements of Applicable Law in connection with the Project, including without limitation, all requirements under the *Workplace Safety and Insurance Act, 1997* (Ontario) and the CA. No claims for lien or notices of lien under the CA have been

received by DB Co or any DB Co Party which have not been duly released, discharged or vacated in accordance with the requirements of the CA, if applicable. Any notice of lien or claim for lien identified in paragraph 10 of the Request for Payment to which this Certificate is attached has been released, discharged or vacated in accordance with the requirements of the CA.

Dated this _____ day of _____, 20____.

Form of Substantial Completion Payment Application

| | |
|--|--|
| TO: the City AND TO: [Independent Certifier] | BY: [DB Co Name] (“DB Co”) |
| [East / West] Substantial Completion Payment Application | Project: Ottawa LRT Project-Stage 2 Confederation Line Extension (“Project”) |
| Date: [Date] | Project Agreement dated _____ (“Project Agreement”) |

1. DB Co hereby makes application for the [East / West] Substantial Completion Payment [and Unpaid Construction Period Payments in the amount of [insert amount in words] Dollars (\$[insert amount in numbers])] [NTD: Unpaid Construction Period Payments to be paid at West Substantial Completion only] pursuant to the terms of the Project Agreement and Schedule 21 – Construction Period Payments. Capitalized terms used and not defined herein shall have the same meaning given to them in the Project Agreement.
2. DB Co has certified to the City that all requirements for [East / West] Substantial Completion and all conditions for issuance of the [East / West] Substantial Completion Certificate have been satisfied, and has performed all requirements and provided all assurances and documents set out in the definition of “[East / West] Substantial Completion” in the Project Agreement.
3. No DB Co Event of Default has occurred and is continuing under the Project Agreement.
4. DB Co has complied with all requirements of Applicable Law in connection with the Project, including without limitation, all requirements under the *Workplace Safety and Insurance Act, 1997* (Ontario) and the CA. No claims for lien or notices of lien under the CA have been received by DB Co or any DB Co Party which have not been duly released, discharged or vacated in accordance with the requirements of the CA.
5. Attached hereto as Appendix 1 is a current Workplace Safety and Insurance Board Clearance Certificate for DB Co evidencing full compliance by [DB Co/Construction Contractor] with the requirements of the *Workplace Safety and Insurance Act, 1997* (Ontario), as amended.
6. Attached hereto as Appendix 2 is a Statutory Declaration by DB Co on CCDC Form 9A (2001) evidencing compliance by DB Co with the holdback requirements of the CA.
7. Attached hereto as Appendix 3 is a sub-search of the title to the Lands against which a claim for lien under the CA could be registered, if applicable. Any notice of lien or claim for lien identified in such Appendix 4 has been released, discharged or vacated in accordance with the requirements of the CA.

The information and calculations contained herein and on the attachments hereto are certified to be true, accurate and complete.

Dated at [City], [Province] this [day] day of [month], 20 [●].

CONSTRUCTION PERIOD PERFORMANCE CRITERIA

Non-Conformances Discovered in Physical Elements of the Works

Table 1

| Reference | Requirement to be met | Construction Period Failure Type | Construction Period Failure Category | Remedial Period |
|---|---|----------------------------------|--------------------------------------|--|
| CPPC-01: Schedule 21 – Construction Period Payments | Physical elements of the Works shall meet the requirements of the Project Agreement, such that: (a) a Critical Qualifying NCR with a 'Pending Status' does not occur; or (b) DB Co Accepted Works are not Contested Non-Conforming Works. | CPQF | Critical | The first Remedial Period shall not exceed the time set in the NCR to resolve the Non-Conformance. The Remedial Period thereafter shall be the lesser of 20 Business Days (or such a period as approved by the City in its sole discretion) and the first Remedial Period. |
| CPPC-02: Schedule 21 – Construction Period Payments | Physical elements of the Works shall meet the requirements of the Project Agreement, such that a Medium Qualifying NCR with a 'Pending Status' does not occur. | CPQF | Medium | The first Remedial Period shall not exceed the time set in the NCR to resolve the Non-Conformance. The Remedial Period thereafter shall be the lesser of 20 Business Days (or such a period as approved by the City in its sole discretion) and the first Remedial Period. |
| CPPC-03: Schedule 21 – Construction Period Payments | Physical elements of the Works shall meet the requirements of the Project Agreement, such that a Minor Qualifying NCR with a 'Pending Status' does not occur. | CPQF | Minor | The first Remedial Period shall not exceed the time set in the NCR to resolve the Non-Conformance. The Remedial Period thereafter shall be the lesser of 20 Business Days (or such a period as approved by the City in its sole discretion) and the first Remedial Period. |

Non-Conformances that are not physical elements of the Works

Table 2

| Reference | Requirement to be met | Construction Period Failure Type | Construction Period Failure Category | Remedial Period |
|---|---|----------------------------------|--------------------------------------|--|
| CPPC-04: Schedule 21 – Construction Period Payments | Works that are not physical elements of the Works shall meet the requirements of the Project Agreement, such that a Critical Qualifying Process NCR with a 'Pending Status' does not occur. | CPQF | Critical | The first Remedial Period shall not exceed the time set in the NCR to resolve the Non-Conformance. The Remedial Period thereafter shall be the lesser of 20 Business Days (or such a period as approved by the City in its sole discretion) and the first Remedial Period. |
| CPPC-05: Schedule 21 – Construction Period Payments | Works that are not physical elements of the Works shall meet the requirements of the Project Agreement, such that a Medium Qualifying Process NCR with a 'Pending Status' does not occur. | CPQF | Medium | The first Remedial Period shall not exceed the time set in the NCR to resolve the Non-Conformance. The Remedial Period thereafter shall be the lesser of 20 Business Days (or such a period as approved by the City in its sole discretion) and the first Remedial Period. |
| CPPC-06: Schedule 21 – Construction Period Payments | Works that are not physical elements of the Works shall meet the requirements of the Project Agreement, such that a Minor Qualifying Process NCR with a 'Pending Status' does not occur. | CPQF | Minor | The first Remedial Period shall not exceed the time set in the NCR to resolve the Non-Conformance. The Remedial Period thereafter shall be the lesser of 20 Business Days (or such a period as approved by the City in its sole discretion) and the first Remedial Period. |

Specific Non-Conformances

Table 3

For clarity a deduction under Table 3 is not subject to a deduction under Table 2.

Construction Period Failure Categories defined in Table 3 shall escalate for persistent, ongoing and repeated Non-Conformances.

| Reference | Requirements to be met | Construction Period Failure Type | Construction Period Failure Category | Remedial Period |
|--|--|----------------------------------|--------------------------------------|------------------|
| CPPC-07: Project Agreement Section 11.19 | DB Co shall follow protocols as set out in Section 11.19 in accordance with TTMP, Construction Access Management Plan and the Output Specification | CPQF | Medium | 10 Business Days |
| CPPC-08: Project Agreement Section 20.1 | DB Co shall provide access to the City, and the Government Entities and their respective representatives to the Lands, the New City Infrastructure, Existing Infrastructure, the New MTO Infrastructure or any workshop | CPQF | Minor | 1 Business Day |
| CPPC-09: Project Agreement Section 20.5 | DB Co shall provide access to the Independent Certifier, and all Other Contractors to the Lands, the New City Infrastructure, Existing Infrastructure, the New MTO Infrastructure or any workshop | CPQF | Minor | 1 Business Day |
| CPPC-10: Project Agreement Section 26.2 | DB Co shall ensure that there are sufficient numbers of competent staff, including all relevant grades of supervisory staff, engaged in the performance of the Works to ensure the proper performance of the Project Agreement | CPQF | Medium | 20 Business Days |

| Reference | Requirements to be met | Construction Period Failure Type | Construction Period Failure Category | Remedial Period |
|--|--|---|---|------------------------|
| CPPC-11: Schedule 12 – Works Scheduling Requirements | DB Co shall prepare and submit PBS-1 at Financial Close. | CPQF | Critical | 5 Business Days |
| CPPC-12: Schedule 12 – Works Scheduling Requirements | DB Co shall prepare and submit, within 180 days after Financial Close, PBS 2. | CPQF | Critical | 5 Business Days |
| CPPC-13: Schedule 12 – Works Scheduling Requirements | DB Co shall prepare and submit a Recovery Schedule in accordance with the requirements of Schedule 12 – Works Scheduling Requirements, no later than the end of the subsequent reporting period. | CPQF | Critical | 5 Business Days |
| CPPC-14: Schedule 10 – Review Procedure | Works Schedules shall not receive a ‘Critical Comment’ or ‘Major Comment’ from the City more than once. | CPQF | Critical | n/a |

| Reference | Requirements to be met | Construction Period Failure Type | Construction Period Failure Category | Remedial Period |
|--|--|----------------------------------|--------------------------------------|-----------------|
| CPPC-15: Schedule 10 – Review Procedure | <p>The following Works Submittals shall not receive a “MAJOR COMMENT” or “CRITICAL COMMENT” from the City more than two times in a row for the same reason:</p> <p>(a) Design Management Plan, Construction Management Plan, Traffic and Transit Management Plan, Environmental Management Plan, Design Certificates, Construction Certificates, from Appendix A to Schedule 10 – Review Procedure; and</p> <p>(b) the Geotechnical Instrumentation Monitoring Plan from Appendix A to Schedule 10 – Review Procedure.</p> | CPQF | Medium | 5 Business Days |
| CPPC-16: Schedule 17 – Environmental Obligations, Appendix B | Submission of Environmental Management Plan Updates | CPQF | Medium | 5 Business Days |
| CPPC-17: Schedule 17 – Environmental Obligations, Appendix B | Submission of Annual Compliance Monitoring Report | CPQF | Medium | 5 Business Days |

| Reference | Requirements to be met | Construction Period Failure Type | Construction Period Failure Category | Remedial Period |
|---|--|---|---|--|
| CPPC-18: Schedule 17 – Environmental Obligations, Appendix B | Submission Independent Environmental Audit | CPQF | Medium | 5 Business Days |
| CPPC-19: Schedule 17 – Environmental Obligations, Appendix B | Submission of Sustainability Annual Report Card | CPQF | Medium | 5 Business Days |
| CPPC-20: Schedule 17 – Environmental Obligations, Appendix B | Submission Independent Environmental Audit | CPQF | Medium | 5 Business Days |
| CPPC-21: Schedule 17 – Environmental Obligations, Section 8.4 | DB Co shall ensure during the Construction Period, air-borne and ground- borne noise and vibration impacts on Sensitive Receivers do not exceed the Applicable Noise and Vibration Requirements and Additional Sensitive Receiver Performance Requirements | CPQF | Critical | 1 Business Day, or longer as agreed to by the City acting reasonably. |
| CPPC-22: Schedule 18 – Communications and Stakeholder Engagement Obligations, Part 4 | DB Co shall deliver communications and stakeholder engagement activities in accordance with Schedule 18 Part 4 | CPQF | Minor | 1 Business Day |
| CPPC-23: Schedule 18 – Communications and Stakeholder Engagement Obligations, Section 5.1 | DB Co shall provide Notification to the City and a draft public notification in accordance with the requirements of Schedule 18 Section 5.1 | CPQF | Minor | 1 Business Day |

| Reference | Requirements to be met | Construction Period Failure Type | Construction Period Failure Category | Remedial Period |
|--|--|---|---|------------------------|
| CPPC-24: Schedule 11 – Integrated Management System Requirements, Section 4.4 | DB Co shall prepare and submit each Inspection and Test Plan in respect of the Works to the City pursuant to Schedule 10 - Review Procedure at least 15 Business Days prior to performing the relevant Works. | CPQF | Minor | 1 Business Day |
| CPPC-25: Schedule 11 – Integrated Management System Requirements, Section 5.1(b) | DB Co shall provide an updated IMS Audit Plan at twelve month intervals following submission of the initial IMS Audit Plan. | CPQF | Medium | 20 Business Days |
| CPPC-26: Schedule 11 – Integrated Management System Requirements, Section 5.1(b) | At each occurrence of DB Co failing to follow the IMS Audit Plan without the prior agreement in writing of the City | CPQF | Medium | 20 Business Days |
| CPPC-27: Schedule 11 – Integrated Management System Requirements, Section 5.2(c) | All IMS Non-Conformances identified by the Internal IMS Audits must be addressed and corrective measures implemented by DB Co. DB Co shall provide final audit reports to the City within 10 Business Days of the closing of the audits. | CPQF | Medium | 5 Business Days |
| CPPC-28: Schedule 11 – Integrated Management System Requirements, Section 5.4(a)(ii) | DB Co shall prepare a Corrective Action plan, and submit it to the City within 20 Business Days of the closing of the City's IMS Audit. At each occurrence of DB Co failing to prepare a Corrective Action plan within the required time period. | CPQF | Minor | 1 Business Day |

| Reference | Requirements to be met | Construction Period Failure Type | Construction Period Failure Category | Remedial Period |
|--|---|---|---|------------------------|
| CPPC-29: Schedule 11 – Integrated Management System Requirements, Section 7.3(a) | DB Co shall resolve Non Conformances within the response time specified on the Non Conformance Reports. | CPQF | Minor | 5 Business Days |
| CPPC-30: Schedule 26 – Record Provisions, Section 1.1 | DB Co shall keep and maintain records in accordance with Schedule 26 Section 1.1 | CPQF | Minor | 10 Business Days |

ATTACHMENT F

CREDIT RULES

1. CREDIT RULES FOR THE EVALUATION OF EARNED VALUE

1.1 Purpose of Credit Rules

- (a) The Credit Rules set out requirements agreed between the City and DB Co for use and interpretation of the Earned Value Measurement Techniques, pursuant to this Schedule 21.

1.2 Change of Credit Rules

- (a) In the event that DB Co or the City propose a change to the Credit Rules, the Independent Certifier may agree to such proposed change to the Credit Rule, provided that:
 - (i) any proposed change to the Credit Rules will result in revised Credit Rules that:
 - (A) continue to meet the Earned Value Measurement Techniques; and
 - (B) follow the principles, guidance, and intent of the Credit Rules set out in this Attachment F, wherever possible;
 - (ii) any proposed change to the Credit Rules is subject to consultation with the City and DB Co at least three months prior to the first Construction Period that uses those revised Credit Rules;
 - (iii) the Independent Certifier considers any responses made by the City and DB Co to a proposed change to the Credit Rules and the Independent Certifier provides a report justifying its decision regarding acceptance or rejection of any proposal to change the Credit Rules; and
 - (iv) prior to the start of the first Construction Period that is to use the revised Credit Rules for the evaluation of Earned Value:
 - (A) the proposed changes to the Credit Rules are agreed to by the Independent Certifier; and
 - (B) both the City and DB Co receive the revised Credit Rules from the Independent Certifier.

1.3 Selection of Measurement Methods

- (a) In principle, when selecting the appropriate measurement methods from the Earned Value Measurement Techniques, the following principles shall be applied:
 - (i) for tangible work or tasks taking three Construction Period Months or more to perform, the measurement methods shall be considered in the following decreasing order of preference:
 - (A) firstly, activity completion and physical measurement using the fixed formula 0/100 method; and
 - (B) secondly, weighted milestone;

- (ii) for tangible work or tasks taking one or two Construction Period Months to perform, the measurement methods shall be considered in the following decreasing order of preference:
 - (A) activity completion and physical measurement using the fixed formula 0/100 method; and
- (iii) for intangible work or tasks, the measurement methods shall be considered in the following decreasing order of preference:
 - (A) firstly, apportioned effort; and
 - (B) secondly, only where apportioned effort is not possible, level of effort.
- (b) Table 1 sets out the measurement methods that shall be used from the Earned Value Measurement Techniques for specific cost categories, unless there are technical reasons preventing these measurement methods from being used. The specific cost categories in Table 1 are set out in ‘Standard Cost Codes for Capital Projects – Definitions’, US Federal Transportation Administration.

| Table 1: Earned Value measurement methods for specific cost categories | | |
|---|---|---|
| Standard Cost Code | Description | Measurement Method from the Earned Value Measurement Techniques |
| 10 | Guideway | |
| 10.01 | Guideway: at-grade exclusive right-of-way (including trackwork) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.04 | Guideway: aerial structure (including trackwork) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.05 | Guideway: Built-up fill | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.06 | Guideway: underground cut & cover (including trackwork) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.07 | Guideway: underground tunnel (including trackwork) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.09 | Track: Direct fixation | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.10 | Track: Embedded | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.11 | Track: Ballasted | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.12 | Track: Special (switches, turnouts) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 20 | Stations, Stops, Terminals, Intermodals | |
| 20.01 | At-grade station; stop; shelter; mall; terminal; platform | Activity completion and physical measurement using the fixed formula 0/100 method |
| 20.03 | Underground station; stop; shelter; mall; | Activity completion and physical |

| Table 1: Earned Value measurement methods for specific cost categories | | |

| 30 | Support Facilities: Yards, Shops and Admin Buildings | |
| 30.01 | Administration Building: Office, sales, storage, revenue counting | Activity completion and physical measurement using the fixed formula 0/100 method |
| 30.03 | Heavy maintenance facility | Activity completion and physical measurement using the fixed formula 0/100 method |
| 30.05 | Yard and Yard Track | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40 | Sitework and Special Conditions | |
| 40.01 | Demolition; clearing; earthwork | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.02 | Site utilities; utility relocation | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.03 | Hazardous material; contaminated soil mitigation; ground water treatments | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.04 | Environmental mitigation, e.g. wetlands, historic/archeologic, parks | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.05 | Site structures including retaining walls; sound walls and other structures | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.06 | Pedestrian and bike access and accommodation; landscaping | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.07 | Automobile; bus; van access ways including roads; parking lots | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.08 | Temporary facilities | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50 | Systems | |
| 50.01 | Train control and signals | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.02 | Traffic signals and crossing protection | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.03 | Traction power supply and substations | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.04 | Traction power distribution and catenary | Activity completion and physical measurement using the fixed formula 0/100 method |

| Table 1: Earned Value measurement methods for specific cost categories | | |
|--|---|---|
| Standard Cost Code | Description | Measurement Method from the Earned Value Measurement Techniques |
| | | method |
| 50.05 | Communications | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.06 | Fare collection system and equipment | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.07 | Central control | Activity completion and physical measurement using the fixed formula 0/100 method |
| 80 | Professional Services and Agency Costs | |
| 80.01 | Preliminary design | Weighted milestone |
| 80.02 | Final design | Weighted milestone |
| 80.03 | Project management for design and construction | Apportioned effort |
| 80.04 | Construction administration and management | Apportioned effort |
| 80.05 | Professional liability and other insurance costs | Weighted milestone |
| 80.06 | Legal; permits; review fees by other agencies, cities, etc; | Weighted milestone |
| 80.07 | Surveys, testing (quality related), investigation, inspection | Weighted milestone or apportioned effort |
| 80.08 | Start up; testing and commissioning | Weighted milestone or apportioned effort |

- (c) The measurement methods associated with procurement of materials shall be in accordance with the following principles:
- (i) except as set out in Section 1.3(c)(ii), the costs of materials used in construction shall be included in the cost of each construction task and shall be evaluated for the purposes of Earned Value as part of each construction task using physical measurement; and
 - (ii) the costs of rail and large long-lead equipment manufactured off-site before installation, such as transformers and packaged air conditioning units, shall be evaluated for the purposes of Earned Value using the fixed formula measurement method, based on the payment terms of the supply contract, except that [REDACTED]% of any payments made by DB Co to the supplier will not be credited for the purposes of Earned Value until the rail or large equipment manufactured off-site is delivered to the Lands or a bonded warehouse.
- (d) The measurement methods associated with procurement of plant, such as cranes and road vehicles, shall be in accordance with the following principles:
- (i) the costs of plant, such as cranes and road vehicles, shall be evaluated for the purposes of Earned Value using the fixed formula measurement method, based on the payment terms of the supply contract, except that [REDACTED]% of any payments made by DB Co to the supplier will not be credited for the purposes of Earned Value until the plant is delivered to the Lands or a bonded warehouse.
- (e) In order to make the measurement of Earned Value more efficient during mobilization, DB Co may choose to identify a tranche of its mobilization cost, the amount of which will be equal to the mobilization cost agreed to between DB Co and the Lenders or Lenders' Consultant of the Cost of

the Works that shall be automatically credited for the purposes of measuring Earned Value at Financial Close (the “**Mobilization Credit**”), where:

- (i) the sum of the costs identified to the Mobilization Credit and the costs identified to the cost codes from Table 1 shall remain equal to the Cost of the Works;
- (ii) the scope of activity associated with the Mobilization Credit shall be documented by DB Co to the satisfaction of the Independent Certifier before the end of the second Construction Period Month in order to avoid double counting with the Earned Value for activities that are not included within the Mobilization Credit; and
- (iii) the Earned Value for the activities included within the Mobilization Credit shall be credited as Earned Value without using a measurement method from the Earned Value Management Techniques.

ATTACHMENT G

Intentionally Deleted

SCHEDULE 22

VARIATION PROCEDURE

1. VARIATIONS

1.1 Definitions

- (a) The following terms shall have the following meanings:
- (i) **“Capital Expenditure”** means capital expenditure as interpreted in accordance with Canadian GAAP.
 - (ii) **“DB Co Variation Notice”** has the meaning given in Section 2.1(a) of this Schedule 22.
 - (iii) **“Direct Cost”** has the meaning given in Appendix A of this Schedule 22.
 - (iv) **“Estimate”** has the meaning given in Section 1.4(a) of this Schedule 22.
 - (v) **“Variation”** means a variation, addition, reduction, substitution, omission, modification, deletion, removal or other change to the whole or any part of the Works.
 - (vi) **“Variation Confirmation”** has the meaning given in Section 1.7(a)(ii) of this Schedule 22.
 - (vii) **“Variation Directive”** means a written instruction which is issued on a form designated as a “Variation Directive Form” and signed by the City Representative directing DB Co to immediately proceed with a Variation pending the finalization and issuance of a Variation Confirmation for that Variation.
 - (viii) **“Variation Enquiry”** has the meaning given in Section 1.3(a) of this Schedule 22.

1.2 General

- (a) City has the right from time to time to propose and require DB Co to carry out and implement a Variation, and any such Variation shall be subject to the provisions of this Schedule 22 provided that City shall not be permitted to withdraw a Variation Enquiry (nor will a Variation Enquiry be deemed to have been withdrawn) with respect to those circumstances specified in the Project Agreement for which City is obligated to proceed with a Variation.
- (b) City shall be obligated to proceed with a Variation in certain circumstances specified in this Project Agreement, and any such Variation shall be subject to the provisions of this Schedule 22.
- (c) DB Co will not be entitled to any payment, compensation or extension of the Scheduled Substantial Completion Dates or other schedule milestones for a Variation except to the extent provided in a Variation Confirmation or Variation Directive in accordance with this

Schedule 22.

1.3 Variation Enquiry

- (a) If City proposes or is obligated pursuant to the terms of this Project Agreement or Applicable Law to initiate a Variation it shall deliver to DB Co a written notice of the proposed Variation (a “**Variation Enquiry**”).
- (b) A Variation Enquiry shall:
 - (i) describe the proposed Variation with sufficient detail to enable DB Co to prepare a detailed Estimate;
 - (ii) in the event that the proposed Variation will require a Capital Expenditure, state whether City intends to pay for the Variation by way of lump sum payment or payments, adjustment to the Guaranteed Price, (and, if applicable, with a request for DB Co to obtain financing for all or part of the Variation), or a combination thereof; and
 - (iii) provide a preliminary indication of any provisions of this Project Agreement (including the Output Specifications or the DB Co Proposal Extracts) that will be affected by the proposed Variation, as well as the amendments to this Project Agreement (including the Output Specifications or the DB Co Proposal Extracts) that may be necessary to accommodate the Variation.

1.4 Delivery of Estimate

- (a) As soon as practicable and in any event within 15 Business Days after receipt of a Variation Enquiry, or such longer period as the Parties agree acting reasonably, DB Co shall deliver its detailed breakdown, estimate and other information (an “**Estimate**”) prepared in accordance with and meeting the requirements of Section 1.6.

1.5 DB Co Grounds for Objection

- (a) DB Co may only refuse to deliver an Estimate if DB Co can demonstrate to City’s satisfaction, acting reasonably, within the period for delivery of an Estimate specified or agreed pursuant to Section 1.4(a), that:
 - (i) the implementation of the Variation would materially and adversely affect the health and safety of any person;
 - (ii) the implementation of the Variation would:
 - (A) infringe Applicable Law;
 - (B) cause to be revoked any of the existing Permits, Licences, Approvals or Agreements required by DB Co to perform the Works, and any such Permit, Licence, Approval or Agreement is not, using commercially reasonable efforts, capable of amendment or renewal; or
 - (C) require any new Permits, Licences, Approvals or Agreements for DB Co to

perform the Works, any of which will not, using commercially reasonable efforts by DB Co or City, as applicable, be obtainable;

- (iii) the proposed Variation would have a material and adverse effect on performance of the Works (except those Works which have been specified as requiring amendment in the Variation Enquiry) in a manner not compensated pursuant to this Schedule 22;
 - (iv) the implementation of the Variation would be a departure from Good Industry Practice;
 - (v) City does not have the legal power or capacity to require the Variation to be implemented or to do anything envisaged by this Schedule 22 in respect of or in connection with the Variation;
 - (vi) the Variation would, if implemented, result in a change in the essential nature of the Project;
 - (vii) the Variation Enquiry does not comply with the requirements of Section 1.3 (including a failure to include adequate information therein to enable DB Co to prepare an Estimate in respect thereof); or
 - (viii) in the case of a Variation relating to the Works, the time specified for commencement and/or completion of such Variation cannot be achieved by DB Co despite commercially reasonable efforts.
- (b) If DB Co refuses to provide an Estimate on the grounds set out in Section 1.5(a), DB Co shall, within the period for delivery of an Estimate specified or agreed pursuant to Section 1.4(a), deliver to City a written notice specifying the grounds upon which DB Co rejects the Variation and the details thereof.

1.6 Estimate Requirements

- (a) Unless City in a Variation Enquiry requires only specified limited information, each Estimate shall include the following information, sufficient to demonstrate to City's reasonable satisfaction:
- (i) the steps DB Co will take to implement the Variation, in such detail as is reasonable and appropriate in the circumstances;
 - (ii) any impact on Scheduled Substantial Completion Dates, and any other schedule impact on Project and completion of the Works (including for certainty, any impact of the proposed Variation after taking into consideration other Variations);
 - (iii) any impact on the performance of the Works and any other impact on this Project Agreement (including for certainty, any impact of the proposed Variation after taking into consideration other Variations);
 - (iv) any amendments to this Project Agreement or any Project Document required as a consequence of the Variation, the objective of such amendments being to ensure

that (save for the obligation of City to make payments or altered payments in respect of the Variation) the Parties are in no better and no worse position in relation to the Project than they would have been in if the Variation had not been implemented and, in particular, that there will be no material adverse change to the risk profile of the Project as a result of the Variation;

- (v) any impact on the Direct Costs of DB Co and the Subcontractors, including:
 - (A) any Capital Expenditure that will be incurred, reduced or avoided and the impact on DB Co's cash flows from incurring, reducing or avoiding such costs (whether financed by DB Co or City); and
 - (B) any other costs that will be incurred, reduced or avoided and the impact on DB Co's cash flows from incurring, reducing or avoiding such costs;
- (vi) either, subject to Section 1.9:
 - (A) a confirmation that the proposed Variation will not affect DB Co's existing financing or that DB Co's existing financing is adequate to implement the Variation; or
 - (B) if new or additional financing is required to implement the Variation, an indication as to the availability of such new or additional financing and the cost and terms of such new or additional financing;
- (vii) DB Co's preliminary indication of the potential increase or decrease, if any, to the Guaranteed Price;
- (viii) any Permits, Licences, Approvals and Agreements that must be obtained or amended for the Variation to be implemented, and the latest date by which DB Co must receive a Variation Confirmation and obtain or amend such Permits, Licences, Approvals and Agreements for the Estimate to remain valid; and
- (ix) the proposed methods of certification of any aspect of the Works required by the Variation if not covered by the provisions of this Project Agreement,

in each case, together with such supporting information and justification as is reasonably required.

- (b) In preparing its Estimate, DB Co shall include sufficient information to demonstrate to City's satisfaction, acting reasonably, that:
 - (i) DB Co has used or has obliged each Subcontractor (or will oblige any Subcontractor not yet selected) to use commercially reasonable efforts, including the use of competitive quotes or tenders (if appropriate or required by Sections 1.6(c) and 1.6(e)), to minimize any increase in costs and to maximize any reduction in costs;
 - (ii) except as otherwise set out herein, all costs of DB Co and the Subcontractors are limited to Direct Costs;

- (iii) DB Co and the Construction Contractor shall charge only the margins for overhead and profit as set out in Appendix B hereto (such margins each calculated on the basis of the applicable Direct Costs so that no margin of DB Co or the Construction Contractor is calculated on any other margin of DB Co or the Construction Contractor), and no other margins or mark-ups;
 - (iv) the margins for overheads and profit as set out in Appendix B hereto as applicable to DB Co's Direct Costs shall only be chargeable on Direct Costs of DB Co, such that DB Co shall not charge any margins on any amounts charged by the Construction Contractor;
 - (v) all costs of providing Works, including Capital Expenditures, reflect:
 - (A) labour rates applying in the open market to providers of services similar to those required by the Variation;
 - (B) any and all changes in the Output Specifications arising out of the proposed Variation; and
 - (C) any and all changes in risk allocation;
 - (vi) the full amount of any and all expenditures that have been reduced or avoided (including for any Capital Expenditure) and that all such expenditures, including all applicable margins for overhead and profit anticipated to be incurred but for the Variation, have been taken into account and applied in total to reduce the amount of all costs; and
 - (vii) DB Co has mitigated or will mitigate the impact of the Variation, including on the Works Schedule, the performance of the Works, the expected usage of utilities, and the Direct Costs to be incurred.
- (c) DB Co will use commercially reasonable efforts to obtain the best value for money when procuring any work, services, supplies, materials or equipment required by the Variation and will comply with all Good Industry Practice in relation to any such procurement, to a standard no less than DB Co would apply if all costs incurred were to its own account without recourse to City, including using commercially reasonable efforts to mitigate such costs.
- (d) As soon as practicable, and in any event not more than 15 Business Days after City receives an Estimate, DB Co and City shall discuss and seek to agree on the Estimate, including any amendments to the Estimate agreed to by the Parties.
- (e) If City would be required by Applicable Law or any policy applicable to City to competitively tender any contract in relation to the proposed Variation, City may require DB Co to seek and evaluate competitive tenders for the proposed Variation in accordance with such Applicable Law or policy.
- (f) City may modify a Variation Enquiry in writing at any time for any matter relating to the Estimate or the discussions in relation thereto, in which case DB Co shall, as soon as

practicable and in any event not more than 10 Business Days after receipt of such modification, notify City in writing of any consequential changes to the Estimate.

- (g) If the Parties cannot agree on an Estimate pursuant to Section 1.6(d), then any Dispute will be determined in accordance with Schedule 27 - Dispute Resolution Procedure.

1.7 Variation Confirmation

- (a) As soon as practicable, and in any event within 15 Business Days after the later of the date the Estimate was delivered and the date the Estimate was either agreed to or any Dispute in respect thereof was determined in accordance with Schedule 27 - Dispute Resolution Procedure, City shall either:
 - (i) subject to Sections 1.2(b) and 1.7(e), withdraw the Variation Enquiry by written notice to DB Co; or
 - (ii) issue a written confirmation (the “**Variation Confirmation**”) of the Estimate, including any agreed modifications thereto or any modifications resulting for the determination of a Dispute in respect thereof, which Variation Confirmation may be subject to DB Co obtaining financing pursuant to Section 1.8.
- (b) If City does not issue a Variation Confirmation within such 15 Business Days, then, subject to Sections 1.2(b) and 1.7(e), the Variation Enquiry shall be deemed to have been withdrawn.
- (c) Upon the Variation Confirmation being issued, and if applicable upon DB Co obtaining financing pursuant to Section 1.8:
 - (i) the Parties shall as soon as practicable thereafter do all acts and execute all documents to amend this Project Agreement necessary to implement the Variation, including in respect of any required extension of the Key Works Milestones and Work Schedules, and including provision for payment to DB Co as provided in Section 1.10;
 - (ii) DB Co shall implement the Variation as provided for in the Variation Confirmation, and subject to amendments pursuant to Section 1.7(c)(i), all provisions of this Project Agreement applicable to the Works shall apply to the Works as thereby changed and no additional claim with respect to the Variation or Variation Confirmation will be considered; and
 - (iii) payment in relation to the Variation shall be as provided for in Section 1.10 and pursuant to any amendments pursuant to Section 1.7(c)(i).
- (d) If a Variation Confirmation is subject to DB Co obtaining financing pursuant to Section 1.8, then the Variation Confirmation shall not be effective until:
 - (i) DB Co obtains such financing acceptable to City in its sole discretion; or
 - (ii) City in its sole discretion waives such requirement.

- (e) Except as hereinafter provided, until a Variation Confirmation has been issued:
 - (i) the determination of whether or not to proceed with a Variation shall at all times be at City's sole discretion, despite any Dispute or any other matter in relation to a Variation being referred to or determined by Schedule 27 - Dispute Resolution Procedure; and
 - (ii) City may at any time withdraw a Variation Enquiry and, subject to Section 1.7(f), City shall not be obligated to DB Co in respect of a Variation until such time as City in its sole discretion issues a Variation Confirmation and, if applicable, DB Co has obtained the financing requested by City or City has waived such requirement, provided that City may not withdraw (or be deemed to have withdrawn) a Variation Enquiry in circumstances where City is obligated pursuant to the terms of this Project Agreement to proceed with a Variation. In such circumstances Schedule 27 - Dispute Resolution Procedure shall be employed to finalize any aspects of the Variation which cannot otherwise be agreed to in accordance with the terms of this Schedule 22.
- (f) If a Variation Confirmation is not issued for any Variation Enquiry in respect of which DB Co has used commercially reasonable efforts to produce a fair and accurate Estimate, City shall reimburse DB Co for all Direct Costs reasonably and properly incurred by DB Co in connection with preparing the Estimate.

1.8 Financing

- (a) If DB Co in its Estimate confirms that existing financing is not available to pay for the proposed Variation and if City requests DB Co to obtain financing for a Variation, then a Variation Confirmation may be issued subject to DB Co obtaining financing. In such event, DB Co shall use commercially reasonable efforts to obtain the requested financing on terms satisfactory to DB Co, the Lenders and City, provided that, DB Co shall not be required to seek financing from any source other than the Lenders.
- (b) If DB Co has used commercially reasonable efforts to obtain the requested financing but has been unable to obtain an offer of financing on terms reasonably satisfactory to DB Co and City within 60 days of the date that City issues the Variation Confirmation, then DB Co shall have no further obligation to obtain financing for the Variation and any Variation Confirmation subject to financing shall no longer have any effect unless City, in its sole discretion, waives the requirement for financing or unless City is obligated to proceed with the Variation pursuant to the terms of this Project Agreement.
- (c) Subject to Section 1.9, if DB Co obtains an offer of financing on terms reasonably satisfactory to DB Co, DB Co shall provide City with details of such financing, and City shall, in its sole discretion, determine whether DB Co should proceed with such financing. If City determines that DB Co should not proceed with such financing, then DB Co shall have no further obligation to obtain financing for the Variation and any Variation Confirmation subject to financing shall no longer have any effect unless City, in its sole discretion, waives the requirement for financing or unless City is obligated to proceed with the Variation pursuant to the terms of this Project Agreement.
- (d) Subject to Section 1.9, City may at any time withdraw the requirement for DB Co to use

commercially reasonable efforts to obtain financing, after which DB Co shall have no further obligation to obtain financing for the Variation and any Variation Confirmation subject to financing shall no longer have any effect unless City in its sole discretion waives the requirement for financing or unless City is obligated to proceed with the Variation pursuant to the terms of this Project Agreement.

- (e) If City waives the requirement for financing or if DB Co has no further obligation to obtain financing for the Variation pursuant to Sections 1.8(b), 1.8(c) or 1.8(d), then DB Co shall proceed with the Variation as set out in the Variation Confirmation and City shall pay for the Variation as provided for in Section 1.10(a)(ii).

1.9 Increase or Decrease in the Cost of the Financing

- (a) If there is an increase or a decrease in the Cost of the Financing as a result of a Variation, the Guaranteed Price shall be increased or decreased by the increase or decrease to the Cost of the Financing. DB Co shall provide the calculation of the increase or decrease in the Cost of the Financing, together with a certificate of the Lenders' Agent verifying such calculation. Where the increase in the Cost of the Financing includes breakage costs, but the impact of the Variation on the Cost of the Financing could also be accommodated without incurring breakage costs, calculations for both options shall be provided to City, together with a certificate of the Lenders' Agent addressed to DB Co (which will expressly provide that the certificate may be relied upon by City) verifying such calculations. City shall, in its Sole Discretion, within 5 Business Days of receiving such certificate from the Lenders' Agent, select its preferred option by providing written notice to DB Co and the Lenders' Agent. For greater certainty, the increases or decreases in the Cost of the Financing shall be calculated in a commercially reasonable manner and in accordance with the Lenders standard banking practices and the Lending Agreements, and without regard to the identity of the party paying such costs and expenses and, with respect to any swap breakage costs or gains, such costs or gains shall be calculated in accordance with standard market practices.

1.10 Payment

- (a) If a Variation Confirmation has been issued and is not subject to financing, or if the requirement for financing has been satisfied by DB Co or has been waived by City, a price adjustment for the Variation, as set out in the Estimate and as adjusted and confirmed by the Variation Confirmation, shall be made as follows:
 - (i) the Guaranteed Price shall be adjusted as set out in the Variation Confirmation;
 - (ii) payment for Capital Expenditures as set out in the Variation Confirmation and not financed by DB Co shall be paid as follows:
 - (A) City shall pay such Capital Expenditures in lump sum payments based on a payment schedule agreed by City and DB Co, acting reasonably, to reflect the amount and timing of the Capital Expenditures to be incurred by DB Co in carrying out the Variation to the extent borne by City; and
 - (B) where payment for part of the Variation reflects the carrying out of, or specific progress towards, an element within the Variation, DB Co shall

provide satisfactory evidence confirming that the part of the Variation corresponding to each occasion when payment is due under the payment schedule has been duly carried out.

In the event City and DB Co fail to agree as to the terms of the payment schedule, the payment schedule shall be determined in accordance with Schedule 27 - Dispute Resolution Procedure, provided that, where all or any part of the Variation is being carried out by a third party under a contract with DB Co, subject to the terms of any contract between DB Co and that third party in relation to the implementation of the Variation having been approved by City (such approval not to be unreasonably withheld or delayed), the process under Schedule 27 - Dispute Resolution Procedure shall determine a payment schedule which would enable DB Co to be funded by City in time to make payments to that third party in accordance with its contract with DB Co.

- (b) City shall make payment to DB Co within 20 Business Days of receipt by City of invoices presented to City in accordance with the agreed payment schedule accompanied (where applicable) by the relevant evidence that the relevant part of the Variation has been carried out.
- (c) Payments by City in respect of a Variation shall be subject to applicable holdback provisions of the *Construction Act* (Ontario), as applicable.
- (d) DB Co shall not be entitled to any amount in excess of the amount of the Estimate confirmed in the Variation Confirmation.
- (e) Upon request by DB Co, City shall provide to DB Co copies of any consent or approval issued by City in connection with a proposed Variation.

1.11 Reduction in Works

- (a) If a Variation involves any reduction in Works which results in savings in Direct Costs to DB Co, such savings shall result in a reduction in the compensation payable to DB Co under this Project Agreement in an amount equal to such reduction in Direct Costs, and a Substantial Completion Payment or Substantial Completion Payments, or the balance of the Guaranteed Price, as applicable, shall be reduced accordingly.

1.12 Variation Directive

- (a) If an Estimate is not promptly agreed upon by City and DB Co or if there is a Dispute in relation thereto or if City, in its sole discretion, requires a Variation to be implemented prior to issuing a Variation Confirmation, then City may issue a Variation Directive and, following receipt of the Variation Directive:
 - (i) DB Co shall promptly proceed with the Variation;
 - (ii) the determination of the valuation and time extensions, if any, required in connection with such Variation, shall be made as soon as reasonably possible after commencement of the implementation of the Variation; and
 - (iii) pending final determination of the valuation and time extensions, if any, required in

connection with such Variation, the Independent Certifier, acting reasonably, shall determine the valuation in accordance with Appendices A and B hereto, with any Dispute to be determined in accordance with Schedule 27 - Dispute Resolution Procedure,

provided that, City shall fund all Variations implemented by way of a Variation Directive as provided for in Section 1.10(a)(ii).

2. DB CO VARIATIONS

2.1 General

- (a) DB Co shall deliver to City a written notice (a “**DB Co Variation Notice**”) for each Variation proposed by DB Co.

2.2 DB Co Variation Notice

- (a) A DB Co Variation Notice shall:
 - (i) set out details of the proposed Variation in sufficient detail to enable City to evaluate it in full;
 - (ii) specify DB Co’s reasons for proposing the Variation;
 - (iii) indicate all reasonably foreseeable implications of the Variation, including whether there are any costs or cost savings to City; and
 - (iv) indicate the latest date by which a Variation Enquiry must be issued.
- (b) If City, in its sole discretion, elects to consider the Variation proposed by DB Co, City may issue to DB Co a Variation Enquiry and the procedure set out in Section 1 will apply.

3. SMALL WORKS

3.1 General

- (a) DB Co shall carry out all Small Works requested by City.
- (b) If Small Works are requested by City, DB Co shall, within 10 Business Days of each such request and prior to carrying out the Small Works, provide City with a price for carrying out the Small Works.
- (c) If DB Co’s price is accepted by City, in its sole discretion, DB Co shall carry out the Small Works for such price.
- (d) City may at any time, in its sole discretion, including if City does not accept the price proposed by DB Co pursuant to Section 3.1(b), issue a Variation Enquiry or Variation Directive in respect of such Small Works, in which event the provisions of this Schedule 22, other than this Section 3, shall apply.
- (e) DB Co’s price shall include only its Direct Costs, as calculated in accordance with

Appendix A, together with applicable margins as set out in Appendix B.

3.2 DB Co to Minimize Inconvenience

- (a) DB Co shall notify City of the estimated duration of any Small Works so that City and DB Co can agree upon a convenient time for carrying out the same, so as to minimize and mitigate inconvenience and disruption to City. DB Co shall use commercially reasonable efforts to minimize the duration of any Small Works.

APPENDIX A

CALCULATION OF DIRECT COSTS

1. DIRECT COSTS

1.1 Subject to Section 1.2 of this Appendix A, the term “**Direct Cost**” means the cumulative total, without duplication, of only the following amounts, as paid or incurred by DB Co or the Subcontractors, as applicable, to the extent that they specifically relate to, and are attributable to, the Variation under which DB Co is expressly entitled to its Direct Cost and would not otherwise have been incurred:

- (i) wages and benefits paid for labour in the direct employ of DB Co or the Subcontractors while performing that part of the Works on Site;
- (ii) salaries, wages and benefits of DB Co’s or the Subcontractors’ personnel when stationed at the Site office in whatever capacity employed, or personnel engaged at shops or on the road, in expediting the production or transportation of materials or equipment;
- (iii) salaries, wages and benefits of DB Co’s or the Subcontractors’ office personnel engaged in a technical capacity;
- (iv) without limiting Sections 1.1(i), 1.1(ii) and 1.1(iii) of this Appendix A, contributions, assessments or taxes incurred for such items as employment insurance, provincial health insurance, workers’ compensation, and Canada Pension Plan, insofar as such costs are based on the wages, salaries, or other remuneration paid by DB Co or a DB Co Party to employees pursuant to Sections 1.1(i), 1.1(ii) and 1.1(iii) of this Appendix A, but excluding for certainty all income taxes on such wages, salaries and other remuneration;
- (v) travel and subsistence expenses of DB Co’s or the Subcontractors’ officers or employees referred to in Sections 1.1(i), 1.1(ii) and 1.1(iii) of this Appendix A;
- (vi) the cost of materials (including hand tools which have a retail value of \$[REDACTED] or less), products, supplies, equipment, temporary services and facilities, including transportation and maintenance thereof, which are consumed in the performance of the Variation;
- (vii) the rental costs of all tools (excluding hand tools which have a retail value of \$[REDACTED] or less), machinery, and equipment used in the performance of the Variation, whether rented from or provided by DB Co or others, including installation, minor repair and replacement, dismantling, removal, transportation and delivery costs thereof;
- (viii) deposits lost;
- (ix) the amount of all Subcontracts with the Subcontractors;

- (x) the amount paid for any design services;
- (xi) the cost of third party quality assurance required by City, such as independent inspection and testing services;
- (xii) charges levied by Governmental Authorities, but excluding fines or penalties not related to the implementation of the Variation;
- (xiii) subject to Section 1.1(iv) of this Appendix A and without limiting the obligation of City to pay HST under this Project Agreement, Taxes, but excluding:
 - (A) HST;
 - (B) taxes imposed on DB Co or a Subcontractor based on or measured by income or profit or otherwise imposed under the *Income Tax Act* (Canada), the *Income Tax Act* (Ontario) or any similar statute in any other jurisdiction;
 - (C) capital taxes based on or measured by the capital of DB Co or a Subcontractor;
 - (D) taxes relating to withholdings on any payments by DB Co or a Subcontractor; and
 - (E) taxes relating to any business or activity other than the business or activities related to, and conducted for, the purposes of the Works;
- (xiv) the cost of removal and disposal of contaminants, hazardous substances, waste products and debris for which DB Co is not responsible under this Project Agreement;
- (xv) termination payments which are required under Applicable Law to be made to employees of DB Co or Construction Contractor reasonably and properly incurred by DB Co or Construction Contractor arising as a direct result of any Variation reducing the scope of the Works, except to the extent that such termination payments are provided for in contracts of employment, agreements or arrangements that were not entered into in the ordinary course of business and on commercial arm's length terms;
- (xvi) the cost of financing as calculated pursuant to Section 1.9 of Schedule 22, including additional financing costs related to any delay caused by the implementation of the Variation;
- (xvii) the cost of competitively tendering any contract in relation to the proposed Variation which is required by Applicable Law or any policy applicable to City;
- (xviii) the cost of any additional insurance or performance security required or approved by City;
- (xix) the cost of obtaining all DB Co Permits, Licences, Approvals and Agreements; and

- (xx) except as specified in Section 1.2(vii), reasonable fees and disbursements of Project Co's legal advisors, reasonable fees and disbursements of DB Co's legal and technical advisors.

1.2 The Direct Cost otherwise payable shall be subject to and limited by the following:

- (i) the Direct Cost shall be net of all discounts, rebates and other price reductions and benefits, which relate to the Direct Cost incurred;
- (ii) the amount paid for materials, products, supplies and equipment incorporated into the Works as a result of the Variation shall not exceed commercially competitive rates available in the Province of Ontario for such materials, products, supplies and equipment from arms-length third party suppliers; provided this shall not restrict the cost of extending hire of equipment already in situ;
- (iii) the amount paid for any design services included in the Direct Cost, whether provided by DB Co's personnel, consultants, manufacturers or manufacturers' consultants, for hourly paid personnel shall not exceed **[REDACTED]** the actual salary received by those personnel (actual salary to be inclusive of all benefits, statutory remittances and holidays), and for salaried personnel, the actual salary per hour shall be calculated by dividing the annual salary (inclusive of all benefits, statutory remittances and holidays) by **[REDACTED]** hours;
- (iv) the amount paid for machinery and equipment rental costs shall not exceed the prevailing competitive commercial rate for which such equipment or machinery can be obtained in Ottawa, Ontario;
- (v) the Direct Cost shall not include any cost incurred due to the failure on the part of DB Co to exercise reasonable care and diligence in its attention to the prosecution of that part of the Works;
- (vi) the amount paid for salaries, wages and benefits of DB Co's or the Subcontractors' personnel shall reflect commercially competitive rates available in Ottawa; and
- (vii) the Direct Cost shall not include any reasonable fees and disbursements of Project Co's legal advisors incurred in connection with Small Works or the preparation of the Estimate.

APPENDIX B
APPLICABLE
MARGINS

| Party | Total Overhead and Profit Margin (as % of Direct Cost) | | |
|--|---|---|-----------------------------------|
| | For Projects under \$[REDACTED] | For Projects between \$[REDACTED] and \$[REDACTED] | For Projects over \$[REDACTED] |
| DB Co (Own Work) | [REDACTED]% | [REDACTED]% | [REDACTED]% |
| Construction Contractor (Own Work) | [REDACTED]% | [REDACTED]% | [REDACTED]% |
| Construction Contractor (Subcontracted Work) | [REDACTED]% | [REDACTED]% | [REDACTED]% |
| DB Co and Construction Contractor re: Cash Allowance Items | [REDACTED]% | [REDACTED]% | [REDACTED]% |

**SCHEDULE 23
COMPENSATION ON TERMINATION**

1 DEFINITIONS

1.1 Definitions

- (a) All capitalized terms not otherwise defined in this Schedule shall have the meanings ascribed to them in the Project Agreement and unless the context otherwise requires:
- (b) “**City Default Termination Sum**” has the meaning given in Section 3.1(c) of this Schedule 23.
- (c) “**DB Co Amount**” means any amount payable to DB Co as a return and/or profit to DB Co shown in the Financial Model, including for greater certainty in respect of any loans made or capital contributed to DB Co by any Affiliate of DB Co or a DB Co Party, prorated by a fraction, the numerator of which is the period between the date of commencement of the Works and the Termination Date, and the denominator of which is the period between the date of commencement of the Works and the latest Scheduled Substantial Completion Date.
- (d) “**DB Co Default Termination Sum**” has the meaning given in Section 2.1(b) of this Schedule 23.
- (e) “**Debt Amount**” means, at any time, the then outstanding principal amount of debt funded under the terms of the Lending Agreements by the Lenders to DB Co, together with all interest accrued thereon at that time, provided that at any time where any portion of the interest payable to the Lenders is subject to the Hedging Agreement(s), accrued interest in respect of such portion of the interest payable to the Lenders shall be calculated based on the fixed rate payable by DB Co under the Hedging Agreement(s) without regard to whether such fixed rate is payable directly to a Lender or to the Hedge Provider(s) under the Hedging Agreement(s) and all references to interest payable to the Lenders under the Project Agreement shall be construed accordingly. For greater certainty, the Debt Amount excludes the Debt Makewhole.
- (f) “**Debt Makewhole**” means, (i) at any time, any amount (other than the Debt Amount) then due and payable to the Lenders under the Lending Agreements with respect to the Debt Amount, including any “make whole” payments, breakage costs (less any breakage benefits) and all other fees, costs and expenses reasonably and properly incurred which DB Co is obligated to pay to the Lenders pursuant to the Lending Agreements with respect to the Debt Amount; and (ii) any swap breakage costs (less breakage benefits), if any, then due and payable to the Hedge Provider(s) under the Hedging Agreement(s) entered into with respect to the Debt Amount.
- (g) “**Demobilization Costs**” means all reasonable costs of DB Co associated with the demobilization of the Works as a result of the termination of the Project Agreement.
- (h) “**Employee Termination Payments**” means termination payments which are required under Applicable Law to be made to employees of DB Co or any DB Co Party as a direct result of terminating the Project Agreement (provided that DB Co or the relevant DB Co Party shall take commercially reasonable steps to mitigate its loss) and provided that, in

calculating such amount, no account should be taken of any liabilities and obligations of DB Co or the relevant DB Co Party arising out of:

- (i) contracts of employment or other agreements or arrangements entered into by DB Co or the relevant DB Co Party to the extent that such contracts of employment, agreements or arrangements were not entered into in connection with the Project; or
- (ii) contracts of employment or other agreements or arrangements entered into by DB Co or the relevant DB Co Party other than in the ordinary course of business and on commercial arm's length terms, save to the extent that amounts would have arisen if such contracts or other agreements or arrangements had been entered into in the ordinary course of business and on commercial arm's length terms.

(i) **"Invoice Date"** means the date that is the later of:

- (i) the date on which the City receives an invoice from DB Co for the Non-Default Termination Sum or City Default Termination Sum, as the case may be; and
- (ii) the date on which the City receives the supporting evidence required pursuant to Section 4.1(a) of this Schedule 23.

(j) **"Non-Default Termination Sum"** has the meaning given in Section 3.1(c) of this Schedule 23.

(k) **"Subcontractor Losses"** means, subject to DB Co's obligations under the Project Agreement to limit any compensation to Subcontractors, the amount reasonably and properly payable by DB Co to the Construction Contractor under the terms of the Design and Construction Contract as a direct result of the termination of the Project Agreement (including any reasonable commercial breakage fee), provided that such amount shall be reduced to the extent that DB Co or the Subcontractors fail to take commercially reasonable steps to mitigate such amount; provided that, no account should be taken of any liabilities and obligations of DB Co to the Subcontractors arising out of:

- (i) any loss of overhead or profit of such Subcontractor relating to any period or costs after the Termination Date (save to the extent the same are properly included in any reasonable commercial breakage fee set out in any of the Ancillary Documents);
- (ii) agreements or arrangements entered into by DB Co or the Subcontractors to the extent that such agreements or arrangements were not entered into in connection with those parties' obligations in relation to the Project; or
- (iii) agreements or arrangements entered into by DB Co or the Subcontractors other than in the ordinary course of business and on commercial arm's length terms, save to the extent that amounts would have arisen if such agreements or arrangements had been entered into in the ordinary course of business and on commercial arm's length terms.

2 COMPENSATION ON TERMINATION FOR DB CO DEFAULT

2.1 Compensation

- (a) If City terminates the Project Agreement pursuant to Section 36.3(a) of the Project Agreement, City shall pay the DB Co Default Termination Sum to DB Co.
- (b) The “**DB Co Default Termination Sum**” shall be an amount equal to the Guaranteed Price, as adjusted in accordance with the terms of the Project Agreement as of the Termination Date, less the aggregate, without duplication, of each of the following:
 - (i) all Construction Period Payments and Substantial Completion Payments paid by City on or before the Termination Date, plus all Construction Period Deductions and Lane Closure Adjustments (other than any Construction Period Deductions or Lane Closure Adjustments which, prior to the Termination Date, were set-off against a payment to DB Co by the City made on or before the Termination Date or which have otherwise been paid by or on behalf of DB Co on or before the Termination Date);
 - (ii) City’s estimate of the cost to complete the Works, including the cost to remedy any defective or deficient Works determined on a reasonable basis in consultation with the Independent Certifier and other consultants and including all reasonable and proper costs incurred by City in re-tendering the Works or any portion thereof;
 - (iii) City’s estimate of the aggregate of all Direct Losses suffered, sustained or incurred by City as a result of, in respect of, or arising out of the event or events which resulted in the termination of the Project Agreement and out of the termination together with all costs of entering into a new construction contract to complete the Works, including any warranty obligations for the Works in place and to be performed, on substantially the same terms and conditions as the Project Agreement;
 - (iv) any Completion Holdback as at the time the DB Co Default Termination Sum is required to be made; and
 - (v) the Legislative Holdback required to be maintained by City as at the time the DB Co Default Termination Sum is required to be made, which amount will be paid by City in accordance with the *Construction Act* (Ontario).
- (c) To the extent that any amounts that City has estimated or determined pursuant to Sections 2.1(b)(ii), 2.1(b)(iii) or 2.1(b)(iv) above, are in excess of what is required by City to complete the Works or compensate for Direct Losses, the Completion Holdback or the Legislative Holdback, as applicable the City shall promptly return such excess amounts to DB Co.
- (d) City shall pay the DB Co Default Termination Sum in accordance with Article 4 of this Schedule 23.

3 COMPENSATION ON NON-DEFAULT TERMINATION OR TERMINATION FOR CITY DEFAULT

3.1 Compensation

- (a) If DB Co terminates the Project Agreement pursuant to Sections 37.2(a)(ii) of the Project Agreement, the City shall pay to DB Co the City Default Termination Sum.
- (b) If the Project Agreement is terminated pursuant to Sections 38.1, 38.2 or 38.3 of the Project Agreement, the City shall pay to DB Co the Non-Default Termination Sum.
- (c) The “**Non-Default Termination Sum**” or “**City Default Termination Sum**”, as the case may be, shall be an amount equal to the aggregate, without duplication, of:
 - (i) all unpaid Construction Period Payments and Substantial Completion Payments properly due and payable under the Project Agreement to and including the Termination Date, any other amounts owing by the City to DB Co under the terms of the Project Agreement as of the Termination Date, and any Cost of the Financing directly related to such Construction Period Payments and Substantial Completion Payments, to the extent not funded under the Lending Agreements as part of the Debt Amount;
 - (ii) all Demobilization Costs, Employee Termination Payments and Subcontractor Losses;
 - (iii) the Debt Amount, plus the Debt Makewhole, each calculated as at the date of payment of the Non-Default Termination Sum or City Default Termination Sum, as the case may be;
 - (iv) the DB Co Amount calculated as at the date of payment of the Non-Default Termination Sum or City Default Termination Sum, as the case may be; and
 - (v) all other Direct Losses suffered, sustained or incurred by DB Co as a result of, or arising out of, the event or events which have resulted in the termination of the Project Agreement;less the aggregate of:
 - (vi) any Completion Holdback as at the time the Non-Default Termination Sum or City Default Termination Sum, as the case may be, is required to be made; and
 - (vii) any Legislative Holdback required to be maintained by City at the time the Non-Default Termination Sum or City Default Termination Sum, as the case may be, is required to be made.
- (d) To the extent that any amounts that City has determined pursuant to Section 3.1(c)(vi) or 3.1(c)(vii) above are in excess of what is required by City to holdback under the Project Agreement or maintain as Completion Holdback or Legislative Holdback, as applicable, City shall promptly return such excess amounts to DB Co.

- (e) City shall pay the Non-Default Termination Sum or City Default Termination Sum, as the case may be, in accordance with Article 4 of this Schedule 23.

4 GENERAL

4.1 Payment

- (a) In the event of a termination referred to in Section 3.1(a) or (b) of this Schedule 23, as soon as practicable, and in any event, within 60 days, after the Termination Date, DB Co shall give to City an invoice for the Non-Default Termination Sum or City Default Termination Sum, as the case may be, (reasonably estimated if not then known) and sufficient supporting evidence, reasonably satisfactory to City, justifying the amount of the Non-Default Termination Sum or City Default Termination Sum, as the case may be, including a detailed breakdown of each of the individual items comprising such sum. To the extent the Non-Default Termination Sum or City Default Termination Sum, as the case may be, is based on estimates of cost, the Parties will readjust as soon as such estimated costs can be determined.
- (b) City shall:
 - (i) pay to DB Co the Non-Default Termination Sum or City Default Termination Sum, as the case may be, within 60 days after the Invoice Date and so long as all demobilization of the Works has been completed; and
 - (ii) indemnify DB Co as provided in Section 46.2(c) of the Project Agreement in respect of any damages suffered or incurred as a result of the relevant termination sum (or any part of such sum that remains outstanding) not being received on the Termination Date:
 - (A) in an amount equivalent to the No Default Payment Compensation Amount for the period from (but excluding) the Termination Date to (and including) the date which is 60 days after the Invoice Date; and
 - (B) thereafter, in an amount equivalent to the Payment Compensation Amount until the date of payment.
- (c) In the event of a termination referred to in Section 2.1(a) of this Schedule 23, as soon as practicable, and in any event, within 120 days after the Termination Date, City shall calculate and notify DB Co of the DB Co Default Termination Sum under Section 2.1(b) of this Schedule 23, and shall deliver to DB Co sufficient supporting evidence reasonably satisfactory to DB Co.
- (d) City shall pay to DB Co the DB Co Default Termination Sum as soon as reasonably practicable, and in any event within 30 days after delivering the notice described in Section 4.1(c) of this Schedule 23.

4.2 Costs

The costs and expenses to be taken into account in the calculation of the Non-Default Termination Sum or City Default Termination Sum, as the case may be, due pursuant to this

Schedule 23 shall only be such costs and expenses that are reasonable and proper in quantum and that have been or will be reasonably and properly incurred.

4.3 Undisputed Amounts

Either City or DB Co may dispute the calculation of any Compensation Payment and in the event of a dispute, any undisputed amount shall be paid in accordance with this Schedule 23 and the disputed amount shall be dealt with in accordance with Schedule 27- Dispute Resolution Procedure.

4.4 Outstanding Debt Amount

- (a) Subject to Section 4.3 of this Schedule 23, the City shall be entitled to rely on a certificate of the Lenders' Agent as conclusive evidence as to the Debt Amount and Debt Makewhole, as applicable, outstanding at any relevant time.
- (b) If a receipt or other acknowledgement is given by the Lenders' Agent acknowledging or otherwise confirming receipt of payment or payments in respect of the Debt Amount or Debt Makewhole, as applicable, such receipt or other acknowledgement shall discharge City's obligation to pay such portion of compensation due to DB Co that is equal to the amount acknowledged or confirmed.

4.5 Set-off

City shall be entitled to set off against the Non-Default Termination Sum, the City Default Termination Sum, or the DB Co Default Termination Sum, such amounts not already taken into account in calculating the relevant Compensation Payment that City is entitled to set off or withhold pursuant to the Project Agreement, provided that the amount paid to DB Co on account of the Non-Default Termination Sum or City Default Termination Sum, as the case may be, shall never be less than the aggregate of the Debt Amount and the Debt Makewhole Amount.

4.6 Full and Final Settlement

- (a) Except as otherwise provided in Section 4.6(b) of this Schedule 23, any compensation paid pursuant to Section 2.1 or Section 3.1 of this Schedule 23 in the total amount owing thereunder shall be in full and final settlement of any claims, demands and proceedings of DB Co and the City and each shall be released from all liability to the other in relation to any breaches or other events leading to the termination of the Project Agreement and the circumstances leading to such breach or termination, and DB Co and the City shall be excluded from all other rights and remedies in respect of any such breach or termination, whether in contract, tort, restitution, statute, at common-law or otherwise.
- (b) Section 4.6(a) of this Schedule 23 shall be without prejudice to any liability, whether arising before, on or after the Termination Date, of either Party to the other, including under the indemnities contained in the Project Agreement that arose with respect to acts or omissions on or prior to the Termination Date (but not from termination itself or the events leading to such termination), to the extent such liability has not already been taken into account in calculating the relevant Compensation Payment under Section 4.5 of this Schedule 23.

(c) DB Co acknowledges that under the provisions of Section 4.5 of the Project Agreement, the City shall pay the Compensation Payment to DB Co and DB Co has irrevocably directed the City to make the Compensation Payment to the Lenders' Agent or as the Lenders' Agent may direct, as security for the Financing. The City acknowledges such direction and agrees to pay the Compensation Payment to the Lenders' Agent or as the Lenders' Agent may direct in accordance with such direction. DB Co acknowledges and agrees that payment by the City of the Compensation Payment in accordance with any such direction constitutes payment by the City to DB Co in satisfaction of the City's obligation to make:

- (i) the Compensation Payment under the Project Agreement; and
- (ii) any payment to DB Co under the Project Agreement, to the extent made in relation to the Guaranteed Price,

as the case may be, and in satisfaction of any trust obligation of the City in respect of such payments under Section 7 of the *Construction Act* (Ontario) pursuant to Section 10 of the *Construction Act* (Ontario).

SCHEDULE 24

INTELLECTUAL PROPERTY

1. INTERPRETATION

1.1 Definitions: In this Schedule 24 – Intellectual Property, unless the context indicates a contrary intention, terms which are defined in the Project Agreement (and not otherwise defined in this Schedule 24 – Intellectual Property) shall have meanings given to them in the Project Agreement and the following terms shall have the following meanings:

- (a) **“Assigned Intellectual Property”** has the meaning given in Section 2.5(a).
- (b) **“Assignee”** has the meaning given in Section 2.5(a).
- (c) **“Assignor”** has the meaning given in Section 2.5(a).
- (d) **“CBTC Intellectual Property”** means Subcontractor Intellectual Property of the Nominated Signalling Subcontractor.
- (e) **“City Intellectual Property”** means:
 - (i) Intellectual Property that is Owned, created, developed or acquired by City or any City Personnel:
 - (A) prior to the Project Term; or
 - (B) during the Project Term but outside the Project Scope; or
 - (C) during the Project Term and within the Project Scope, but which is not DB Co Intellectual Property, Subcontractor Intellectual Property or Third Party Intellectual Property;
 - (ii) the Developed Intellectual Property, excluding any Developed Intellectual Property that is specified in a Variation or by separate agreement of City and DB Co to be Owned by DB Co;
 - (iii) any other Project Data that is specified in a Variation or by separate agreement of City and DB Co to be Owned by City; and
 - (iv) subject to Section 41.4 of the Project Agreement, all Modifications to any of the foregoing, whether made by or on behalf of DB Co, City or any Subcontractor alone, jointly with each other or with any other person;

and which is used by City, or required to be used by DB Co or a Subcontractor, in the performance of their respective obligations in respect of the Project or under the Project Agreement.

- (f) **“City Personnel”** means persons acting on behalf of City or employed, engaged or retained by City in connection with the performance of City’s obligations in connection with the Project, including City’s consultants, contractors and subcontractors and the employees, officers,

directors, volunteers and agents of City and its direct and indirect consultants, contractors and subcontractors, excluding DB Co and any Subcontractor and their respective Personnel.

- (g) **“City Supplied Third Party Intellectual Property”** means Intellectual Property, Owned by a person other than City, DB Co, a Subcontractor or any of their respective Personnel that is delivered, supplied or otherwise provided by City to DB Co under the Project Agreement for the purpose of performing the Works and the Project, including any Background Information.
- (h) **“City Trade-Marks”** means the Trade-Marks Owned by City.
- (i) **“Copyleft Licence”** means any licence that requires, as a condition of use, modification and/or distribution of Copyleft Materials, that such Copyleft Materials, or other software or content incorporated into, derived from, used, or distributed with such Copyleft Materials: (i) in the case of software, be made available or distributed in a form other than binary (for example, source code form), (ii) be licenced for the purpose of preparing derivative works, (iii) be licenced under terms that allow the products or portions thereof or interfaces therefor to be reverse engineered, reverse assembled or disassembled (other than by operation of law), or (iv) be redistributable at no licence fee. Copyleft licences include the GNU General Public Licence, the GNU Lesser General Public Licence, the Mozilla Public Licence, the Common Development and Distribution Licence, the Eclipse Public Licence, and all Creative Commons “sharealike” licences.
- (j) **“Copyleft Materials”** means any software or content subject to a Copyleft Licence.
- (k) **“DB Co Embedded Software”** means computer software that is Owned by DB Co and that:
 - (i) is included, embedded or otherwise incorporated in Equipment;
 - (ii) is not licenced separately and apart from that Equipment; and
 - (iii) is not subject to a separate warranty, and is not subject to maintenance and repair separately from, that Equipment.
- (l) **“DB Co Intellectual Property”** means:
 - (i) Intellectual Property that is Owned, created, developed or acquired by DB Co or any DB Co Personnel:
 - (A) prior to the Project Term; or
 - (B) during the Project Term but outside the Project Scope; or
 - (C) during the Project Term and within the Project Scope, but which is not City Intellectual Property, City Supplied Third Party Intellectual Property, Subcontractor Intellectual Property, or Third Party Intellectual Property;
 - (ii) the DB Co Licenced Software;
 - (iii) the DB Co Embedded Software;
 - (iv) DB Co’s Technical Information;

- (v) the Project Intellectual Property;
 - (vi) the Project Data, excluding any other Project Data that are specified in a Variation or by separate agreement of City and DB Co to be Owned by City;
 - (vii) any Developed Intellectual Property that is specified in a Variation or by separate agreement of City and DB Co to be Owned by DB Co; and
 - (viii) Subject to Section 41.4 of the Project Agreement, all Modifications to any of the foregoing, whether made by or on behalf of DB Co, City, City Parties, or any Subcontractor alone, jointly with each other or with any other person.
- (m) **“DB Co Licenced Software”** means any computer software that is Owned by DB Co, is not DB Co Embedded Software and is delivered, supplied or otherwise provided by DB Co under the Project Agreement as or as part of any Deliverable.
- (n) **“DB Co Personnel”** means persons acting on behalf of DB Co or employed, engaged or retained by DB Co in connection with the performance of DB Co’s obligations under the Project Agreement, including DB Co’s consultants, contractors and Subcontractors and the employees, officers, directors, volunteers and agents of DB Co and its direct and indirect consultants, contractors and Subcontractors.
- (o) **“Deliverable”** means any item required to be supplied or delivered by DB Co to City within the Project Scope, including Equipment, Project Software, Project Data and all other deliverable requirements specified in Schedule 10 – Review Procedure.
- (p) **“Delivered”** means, with respect to any Intellectual Property, that such Intellectual Property is:
- (i) a Deliverable;
 - (ii) incorporated, embedded or otherwise included in any Deliverable, the Works or any part of the work delivered as part of the Works;
 - (iii) necessary for the undertaking, completion and performance of the Works or any Equivalent Activity; or
 - (iv) necessary for the Use by City or a subsequent Licensee of any Deliverable, the Works, or any part of the work delivered as part of the Works or any Intellectual Property in accordance with the rights granted to City hereunder;
- or that the Use of such Intellectual Property for any of the purposes set out in clause (iii) or (iv) above would infringe the Intellectual Property rights of any person.
- (q) **“Developed Intellectual Property”** means Intellectual Property that is:
- (i) created or developed, or Ownership of which is acquired, by DB Co, any Subcontractor or any DB Co Personnel, or Subcontractor Personnel, whether alone or together with each other or any other person, during the Project Term and within the Project Scope;

- (ii) created, developed or Ownership of which is acquired for the purposes of the Project, the Works; and
 - (iii) created or designed based on functional, design and performance specifications provided by City, or City Personnel, or City Parties;
- and, for greater certainty, Developed Intellectual Property does not include any DB Co Intellectual Property used to develop or create the Developed Intellectual Property.
- (r) **“Embedded Software”** means the DB Co Embedded Software, Subcontractor Embedded Software and Third Party Embedded Software.
 - (s) **“Equipment”** means all electrical and mechanical equipment, machinery, computer hardware and systems comprising or used in the Works.
 - (t) **“Equivalent Activity”** means any activity, undertaking or operation relating to the Works done by City, any permitted assignee of City pursuant to Section 49.2 of the Project Agreement and/or any other person acting on behalf of or under the authority of City, which activity, undertaking or operation if done by DB Co would be within the Project Scope, including the Works.
 - (u) **“Escrow Agent”** means a recognized provider of escrow services selected by DB Co and approved by City and having a location within the Province of Ontario with whom the Escrow Materials will be deposited in accordance with Section 3.11.
 - (v) **“Escrow Agreement”** means an escrow agreement that meets the requirements of Section 3.11 and pursuant to which Escrow Materials are held by the Escrow Agent and City are designated as a beneficiary party.
 - (w) **“Escrow Materials”** means:
 - (i) with respect to Software, the Source Materials for that Software; and
 - (ii) with respect to Embedded Software, the Source Materials for that Embedded Software.
 - (x) **“Escrow Provider”** means:
 - (i) DB Co in respect of the DB Co Licenced Software;
 - (ii) the applicable Subcontractor in respect of any Subcontractor Licenced Software;
 - (iii) the applicable third party licensor in respect of any Third Party Licenced Software;
 - (iv) DB Co in respect of the DB Co Embedded Software;
 - (v) the applicable Subcontractor in respect of any Subcontractor Embedded Software; and
 - (vi) the applicable third party licensor in respect of any Third Party Embedded Software.
 - (y) **“Expanded Purposes”** means (i) the Permitted Purposes; and (ii) for any other purpose of the City.

- (z) **“Licence”** means a non-exclusive licence or sub-licence, as applicable, granting the rights and subject to the restrictions and limitations set out in this Schedule 24.
- (aa) **“Licenced Intellectual Property”** means, with respect to any Licence, the Intellectual Property that is within the scope of that Licence as provided for in this Schedule 24.
- (bb) **“Licensee”** means, in respect of any Licence granted or required to be granted by DB Co pursuant to this Schedule 24, City or any permitted assignee under Section 49.2 of the Project Agreement that is the holder of that Licence at the relevant time.
- (cc) **“Licensor”** means DB Co in respect of the DB Co Licenced Software, the applicable Subcontractor in respect of any Subcontractor Licenced Software, or the applicable third party licensor in respect of any Third Party Licenced Software.
- (dd) **“Limited Modification Rights”** in respect of a Software or an Embedded Software, means the right to configure, customize or modify such Software or Embedded Software, without access to the Source Materials thereto, in order to have complete and unrestricted access to, or otherwise Use, all the functionalities within such Software or Embedded Software that is licenced to City under this Schedule 24.
- (ee) **“Modification”** means all corrections, modifications, changes, enhancements, improvements, supplements, customizations or derivative works, and includes the Limited Modification Rights, and **“Modify”** means to make a Modification.
- (ff) **“Open Source Licence”** means any licence meeting the Open Source Definition (as promulgated by the Open Source Initiative) or the Free Software Definition (as promulgated by the Free Software Foundation), or any substantially similar licence, including any licence approved by the Open Source Initiative, or any Creative Commons Licence. For the avoidance of doubt, Open Source Licences include Copyleft Licences.
- (gg) **“Open Source Materials”** means any software or content subject to an Open Source Licence.
- (hh) **“Ownership”** means, in respect of any Intellectual Property, ownership of all right, title and interest in and to that Intellectual Property and **“Own”**, **“Owned”** and **“Owner”** shall have corresponding meanings.
- (ii) **“Permitted Purposes”** means:
 - (i) during the Project Term, performance of City’s obligations and the exercise of City’s rights under the Project Agreement and any other agreements relating to the Project;
 - (ii) during the Project Term, City’s participation in the Works and any activity, undertaking or operation within the Project Scope, including its participation in the design and construction, operation, maintenance, repair, correction and renovation of the Works;
 - (iii) both during and after the Project Term, ongoing maintenance and lifecycle works related to the Works and the System Infrastructure, and any Equivalent Activity;
 - (iv) both during and after the Project Term, the use, integration and interoperation of the Works with:

- (A) any existing or other transit projects undertaken by or on behalf of City or interfacing with City projects, including any System Extension; and
 - (B) any existing or after-acquired systems, software, technology or equipment related to the use, operation, maintenance, repair, correction, and renovation of the Works and any System Extension;
- (v) both during and after the Project Term, and so long as the Licensee is City or other Governmental Authority:
 - (A) the provision of governmental services and the conduct of operations and activities provided in connection or otherwise associated with the Works and any System Extension and the Lands by City or any Governmental Authority or any emergency service provider; and
 - (B) the development of transportation standards, policies and procedures.
- (jj) **“Personnel”** means (i) in reference to DB Co, the DB Co Personnel, (ii) in reference to City, City Personnel, and (iii) in reference to any Subcontractor, such Subcontractor’s Personnel.
- (kk) **“Project Data”** means:
 - (i) all Design Data; and
 - (ii) any other materials, documents and/or data prepared by or on behalf of DB Co or Subcontractors in relation to the Works or the Project Agreement, excluding the Jointly Developed Materials, the Background Information and any Developed Intellectual Property.
- (ll) **“Project Intellectual Property”** means Intellectual Property that is created or developed, or Ownership of which is acquired, by DB Co, any Subcontractor or any DB Co Personnel or Subcontractor Personnel, whether alone or together with each other or any other person, during the Project Term and within the Project Scope, and which is created, developed or acquired for the purposes of the Project or the Works, but excluding Project Software, Embedded Software, Project Data, Developed Intellectual Property and Technical Information.
- (mm) **“Project Scope”** means the scope of the Project, including the performance of all Works, as defined by the terms of the Project Agreement.
- (nn) **“Project Software”** or **“Software”** means any DB Co Licenced Software, Subcontractor Licenced Software and Third Party Licenced Software, but does not include Embedded Software.
- (oo) **“Software Maintenance and Support”** means, with respect to any Software, the software maintenance and support services for that Software that are provided separately under a software maintenance and support agreement with the licensor of that Software.
- (pp) **“Software Tools”** means, with respect to any Software or Embedded Software, any routines, compilers, bootstraps, analyzers, monitors, toolkits and other software tools used by the licensor of such Software or Embedded Software in connection with the programming, compiling,

maintenance, debugging, analysis, configuration, customization, verification or monitoring of such Software or Embedded Software.

(qq) **“Source Materials”** means:

- (A) a complete source code version of the Software or Embedded Software, in machine-readable form which, when compiled, will produce the executable version of the Software or Embedded Software and in human-readable form with annotations in the English language or such other language as is acceptable to City, acting reasonably, in both cases on a storage medium suitable for long term archival storage;
- (B) a complete copy, in English or such other language as is acceptable to City, acting reasonably, in both electronic and paper form, suitable for long term archival storage, and appropriately labelled to describe the contents thereof, of all applicable documentation and other explanatory materials, including programmer’s notes, technical or otherwise, for the Software or Embedded Software as may be required for a person other than the licensor of the Software or Embedded Software, using a competent computer programmer possessing ordinary skills and experience, to further develop, maintain and operate the Software or Embedded Software without further recourse to the licensor, which will include, to the extent such items have been or are created for such Software or Embedded Software, general flow charts, input and output layouts, field descriptions, volumes and sort sequence, data dictionary, file layouts, processing requirements and calculation formulae, circuit diagrams and the details of all algorithms and which shall be deemed to include those materials, as revised from time to time; and
- (C) all Software Tools for such Software or Embedded Software, to the extent not previously delivered with the Software or Embedded Software.

(rr) **“Subcontractor Embedded Software”** means computer software that is Owned by a Subcontractor and that:

- (i) is included, embedded or otherwise incorporated in Equipment;
- (ii) is not licenced separately and apart from that Equipment; and
- (iii) is not subject to a separate warranty, and is not subject to maintenance and repair separately from, that Equipment.

(ss) **“Subcontractor Intellectual Property”** means, with respect to each Subcontractor:

- (i) Intellectual Property that is Owned, created, developed or acquired by that Subcontractor:
 - (A) prior to the Project Term; or
 - (B) during the Project Term but outside the Project Scope; or

- (C) during the Project Term and within the Project Scope, but which is not City Intellectual Property, City Supplied Third Party Intellectual Property, DB Co Intellectual Property, or Third Party Intellectual Property;
- (ii) the Subcontractor Licenced Software;
- (iii) the Subcontractor Embedded Software;
- (iv) the Subcontractor's Technical Information; and
- (v) subject to Section 41.4 of the Project Agreement, all Modifications to any of the foregoing, whether made by or on behalf of DB Co, City, City Parties, or any Subcontractor alone, jointly with each other or with any other person.
- (tt) **"Subcontractor Licenced Software"** means any computer software that is Owned by a Subcontractor, is not Subcontractor Embedded Software and is delivered, supplied or otherwise provided by the Subcontractor under the Project Agreement, the Subcontract as or as part of any Deliverable.
- (uu) **"Subcontractor Personnel"** means, with respect to any Subcontractor, persons acting on behalf of that Subcontractor or employed, engaged or retained by that Subcontractor in connection with the performance of that Subcontractor's obligations under the Project Agreement or the Subcontract, including the Subcontractor's consultants, contractors and subcontractors and the employees, officers, directors, volunteers and agents of the Subcontractor and its direct and indirect consultants, contractors and subcontractors.
- (vv) **"System Architecture and Look and Feel"** means any work product, including any Intellectual Property therein, Owned, created, developed, acquired or licenced whether by DB Co or any Subcontractor in respect of any aspect of the architecture or look and feel of the Works, including without limitation all designs, design details, drawings, specifications, prototypes, documentation, works and all instruments of architectural service that relate to the design identity, look and feel of any aspect of the architectural and landscape design whether in respect of the tunnel, landscape and urban design elements, fit and finish, or any other aspect of the Works.
- (ww) **"Technical Information"** means technical information relating to any Equipment supplied or Intellectual Property licenced under the Project Agreement, including software documentation, user and operating manuals, maintenance and repair manuals, parts lists and other materials relevant to the use, operation, maintenance or repair of such Equipment or Intellectual Property.
- (xx) **"Third Party Embedded Software"** means computer software that is not Owned by City, DB Co or a Subcontractor and that:
 - (i) is included, embedded or otherwise incorporated in Equipment;
 - (ii) is not licenced separately and apart from that Equipment; and
 - (iii) is not subject to a separate warranty, and is not subject to maintenance and repair separately from, that Equipment.

- (yy) **“Third Party Intellectual Property”** means Intellectual Property Owned by a person other than City, DB Co, a Subcontractor or any of their respective Personnel that is delivered, supplied or otherwise provided by DB Co or a Subcontractor under the Project Agreement as or as part of any Deliverable, including Third Party Licenced Software and Third Party Embedded Software.
- (zz) **“Third Party Licenced Software”** means any computer software that is not Owned by City, DB Co or a Subcontractor, is not Third Party Embedded Software and is delivered, supplied or otherwise provided by DB Co or a Subcontractor under the Project Agreement as or as part of any Deliverable.
- (aaa) **“Trade-Mark Licence Agreement”** means the trademark licence agreement entered into between DB Co and City providing for the licence by City of City Trade-Marks to DB Co, being substantially in the form of Appendix A attached to this Schedule 24.
- (bbb) **“Trust Rights”** has the meaning given in Section 2.5(b).
- (ccc) **“Use”** means, with respect to any Intellectual Property, to do any and all things with that Intellectual Property that the Owner of that Intellectual Property could do, including to load, transmit, access, execute, use, store, display, copy, adapt, translate, incorporate into other materials, practice, make and have made, but specifically excluding the right to Modify and subject to any limitations in the provision of this Schedule 24 pursuant to which a Licence is granted.

2. OWNERSHIP

- 2.1 **DB Co Intellectual Property:** DB Co shall be and remain the sole and exclusive Owner of the DB Co Intellectual Property. For certainty, nothing in this Schedule 24 shall transfer to DB Co any Ownership of, or grant to DB Co any right in respect of, City Intellectual Property used in the creation or development of or that is embodied, incorporated, embedded, otherwise included or illustrated in any DB Co Intellectual Property, except for the Licence granted under Section 3.1.
- 2.2 **City Intellectual Property:** City shall be and remain the sole and exclusive Owner of City Intellectual Property. For certainty, nothing in this Schedule 24 shall transfer to City any Ownership of, or grant to City any right in respect of, the DB Co Intellectual Property used in the creation or development of or that is embodied, incorporated, embedded, otherwise included or illustrated in any City Intellectual Property, except for the Licence granted under Section 3.2.

For greater clarity and without limiting City’s Ownership rights, DB Co acknowledges and agrees that City shall be entitled to Use and Modify the Developed Intellectual Property (other than any Developed Intellectual Property that is specified in a Variation or by separate agreement of City and DB Co to be Owned by DB Co) in any manner and for any purpose whatsoever, including without limitation in connection with the Expanded Purposes.

- 2.3 **Subcontractor Intellectual Property:** As between City and DB Co, but subject to any agreement to the contrary between DB Co and any Subcontractor, each Subcontractor shall be and remain the sole and exclusive Owner of its Subcontractor Intellectual Property.
- 2.4 **City Supplied Third Party Intellectual Property:** As between City and DB Co, but subject to any agreement to the contrary between City and the Owner of any City Supplied Third Party Intellectual Property, the Owner of any City Supplied Third Party Intellectual Property shall be

and remain the sole and exclusive Owner of any City Supplied Third Party Intellectual Property. For certainty, nothing in this Schedule 24 shall transfer to DB Co or any Subcontractor any Ownership of, or grant to DB Co or any Subcontractor any right in respect of, City Supplied Third Party Intellectual Property used in the creation or development of or that is embodied, incorporated, embedded, otherwise included or illustrated in any DB Co Intellectual Property or any City Intellectual Property or any Subcontractor Intellectual Property, except for the Licence granted under Section 3.1.

2.5 Assignments

- (a) If, notwithstanding Section 2.1, 2.2, 2.3, or 2.4 or Section 41.4 of the Project Agreement, either party (the “**Assignor**”) retains, acquires or owns any right, title or interest in or to any Intellectual Property that is to be Owned by another person (the “**Assignee**”) pursuant to Section 2.1, 2.2, 2.3, or 2.4 or Section 41.4 of the Project Agreement as applicable, (the “**Assigned Intellectual Property**”), then the Assignor will assign, and for no further consideration and without any further act or formality does hereby irrevocably assign, to the Assignee all of the Assignor’s worldwide right, title and interest in and to the Assigned Intellectual Property free and clear of all liens, claims, charges or encumbrances, but subject to any Licences granted or required to be granted by the Assignee to the Assignor pursuant to this Schedule 24.
- (b) If and to the extent that the assignment pursuant to Section 2.5(a) is not effective on the date hereof or on any future date, either generally or pursuant to the laws of any jurisdiction, then any and all right, title and interest in and to the Assigned Intellectual Property that is retained, acquired or owned by the Assignor (collectively, the “**Trust Rights**”), will be held by the Assignor in trust for the exclusive benefit and use of the Assignee, except for any Licences granted or required to be granted by the Assignee to the Assignor pursuant to this Schedule 24, and the Assignor will execute and deliver to the Assignee such transfers, assignments, documents and instruments as may be necessary to transfer and assign to the Assignee the Trust Rights, free and clear of all liens, claims, charges or encumbrances, promptly upon receipt thereof from the Assignee, and will otherwise cooperate with the Assignee to give effect to, record and register the Assignee’s ownership of the Trust Rights.
- (c) DB Co will include in each Subcontract provisions equivalent to Sections 2.5(a) or 2.5(b) with respect to: (i) City Intellectual Property, Jointly Developed Materials, Developed Intellectual Property, Project Data and any Modifications thereto, and shall enforce those provisions against each Subcontractor to the extent necessary to ensure that City remains at all times the sole and exclusive Owner of all such property; and (ii) City Supplied Third Party Intellectual Property and any Modifications thereto, and shall enforce those provisions against each Subcontractor to the extent necessary to ensure that the Licensor, as applicable, remains at all times the sole and exclusive Owner of all such property.

2.6 **Personnel:** City and DB Co shall, and DB Co shall include in each Subcontract an obligation of each Subcontractor to, ensure that their respective Personnel shall:

- (a) by duly executed written agreement or by operation of law, irrevocably and unconditionally sell, assign and transfer to that party all right, title and interest that its Personnel may have in or to any and all Intellectual Property referred to in this Schedule 24 and all Modifications thereto, such that agreements as to Ownership of Intellectual Property pursuant to Sections 2.1, 2.2, 2.3, or 2.4 and Section 41.4 of the Project Agreement and the assignment by that party pursuant to Section 2.5 include all right, title and interest of its Personnel; and

- (b) by duly executed written agreement, irrevocably waive all non-transferable rights, including moral rights, that they have or may have in any Intellectual Property assigned by such Personnel pursuant to Section 2.6(a) in favour of the assignee and its successors, assigns and licensees.

3. LICENCES

3.1 Licence by City to DB Co

- (a) Subject to Section 3.1(d), City hereby grants to DB Co:
 - (i) a royalty free, fully paid-up, limited Licence to Use and Modify City Intellectual Property for the sole purpose of and only to the extent necessary for the performance by DB Co of the Project Scope and its obligations under the Project Agreement;
 - (ii) a limited Licence to Use City Supplied Third Party Intellectual Property for the sole purpose of and only to the extent necessary for the performance by DB Co of the Project Scope and its obligations under the Project Agreement.
- (b) Subject to Section 3.1(d), DB Co may sublicense its rights under the Licence granted in Section 3.1(a) to any Subcontractor for the sole purpose of and only to the extent necessary for the performance by that Subcontractor of its obligations under its Subcontract.
- (c) Except as provided in Section 3.1(b), DB Co may not transfer, assign, sublicense or otherwise dispose of the Licence granted under Section 3.1(a) without the prior written consent of City, which consent may be given or refused by City in its absolute and unfettered discretion.
- (d) The Licence of any City Supplied Third Party Intellectual Property pursuant to Section 3.1(a) shall be subject to the terms and conditions of the licence agreement between City and the licensor of City Supplied Third Party Intellectual Property. The City will provide to DB Co a copy of any such third party licence agreement (which may be redacted as to financial and other terms not relevant to use of City Supplied Third Party Intellectual Property by DB Co and Subcontractors), or where prohibited from doing so by obligations of confidentiality to the third party licensor, a summary of the obligations, limitations and restrictions applicable to use of City Supplied Third Party Intellectual Property by DB Co and Subcontractors. DB Co will comply, and will require any Subcontractor to comply, with the terms and conditions of such third party licence agreement (as set out in the copy of the third party licence agreement or summary thereof provided by City to DB Co) to the extent applicable to DB Co and any Subcontractor in the performance of their respective obligations under the Project Agreement and any Subcontract. If requested by City, DB Co will, and will require any Subcontractor to, execute and deliver to City and the third party licensor an agreement that includes reasonable terms for the protection of the confidentiality of City Supplied Third Party Intellectual Property and an acknowledgement of the third party licensor's ownership thereof, unless DB Co disputes such ownership.
- (e) The Licence granted to DB Co under: Section 3.1(a)(i), and any sublicense granted by DB Co to a Subcontractor thereunder, will terminate upon the expiry or termination of DB Co's services and other obligations under the Project Agreement; Section 3.1(a)(ii) and any sublicense granted by DB Co to a Subcontractor thereunder, will terminate upon the earlier of: (A) expiry or termination of DB Co's services and other obligations under the Project Agreement; and (B) the termination of the contract in respect of the applicable City Supplied Third Party Intellectual Property or City's licence or sublicense rights thereunder.

- (f) The Licences granted to DB Co under Section 3 do not include licences to any City Trade-Marks. The use of any City Trade-Marks shall be governed by the terms of the Trade-Mark Licence Agreement.

3.2 Licence by DB Co to City

- (a) DB Co hereby grants to City a Licence to:
- (i) Use and Modify the DB Co Intellectual Property (excluding DB Co Licenced Software and DB Co Embedded Software) that is Delivered and the Subcontractor Intellectual Property (excluding the Subcontractor Licenced Software, the Subcontractor Embedded Software and excluding the right to Modify the CBTC Intellectual Property) that is Delivered;
 - (ii) Use, and have Limited Modification Rights to, the DB Co Licenced Software that is Delivered and the Subcontractor Licenced Software (excluding, for Limited Modification Rights, the Subcontractor Licenced Software comprising CBTC Intellectual Property) that is Delivered and only in respect of the modules that are Delivered; and
 - (iii) Use, and have Limited Modification Rights to, the DB Co Embedded Software and the Subcontractor Embedded Software (excluding, for Limited Modification Rights, the Subcontractor Embedded Software comprising CBTC Intellectual Property) as part of and for the Use of the Equipment in which such software is included, embedded or otherwise incorporated;

for the Permitted Purposes. Subject to Section 3.11, the Licences granted pursuant to this Section 3.2 in respect of Project Software and Embedded Software apply to only object code versions thereof and not the source code materials for any such Project Software or Embedded Software.

In addition and notwithstanding any other provision of this Schedule 24, DB Co hereby grants to City a Licence to Use and Modify any System Architecture and Look and Feel that is not owned by City pursuant to this Schedule 24, for the Expanded Purposes.

- (b) The Licence granted pursuant to this Section 3.2 will be irrevocable (except as provided in Section 3.2(d)), perpetual, royalty free, fully paid-up (upon payment of the fees specified in the Project Agreement for the Deliverable which consists of or incorporates the Licenced Intellectual Property in respect of which the Licence is granted), and permit Use by City on an enterprise basis without restriction or limitation as to users (whether by number, identity or otherwise), location, capacity, authorized system or otherwise, as part of or in connection with the Works, or in the case of the System Architecture and Look and Feel, in connection with the Expanded Purposes.
- (c) The Licence granted pursuant to this Section 3.2 may be transferred, assigned, sublicenced and otherwise disposed of by City subject to and in accordance with Section 49.2 of the Project Agreement, provided that the Licence in respect of DB Co Embedded Software and Subcontractor Embedded Software may only be transferred together with the Equipment in which such software is included, embedded or otherwise incorporated.
- (d) The Licence granted pursuant to this Section 3.2 may not be terminated except in the event of the failure of the Licensee to pay the applicable fees as provided for in the Project Agreement for the

specific Deliverable which consists of or incorporates the Licenced Intellectual Property, and such failure is not remedied by the Licensee within 60 days after notice by DB Co to the Licensee demanding that such failure be remedied, provided that any such termination shall apply only to the Licenced Intellectual Property to which such failure applied and not to any other Licenced Intellectual Property. Except as specifically provided in this Section 3.2(d), DB Co shall not be entitled to terminate or rescind the Licence granted under this Section 3.2, and if the Licensee commits any other breach of or default under this Schedule 24 or the Project Agreement, whether material or not and whether that breach or default is or is not capable of being remedied, DB Co's rights and remedies in respect of that breach or default shall be limited to such rights and remedies other than termination or rescission of the Licence granted under this Section 3.2 as may exist at law or in equity, it being acknowledged by DB Co that except as provided in this Section 3.2(d) the Licence granted under this Section 3.2 is perpetual and irrevocable. No breach of or default under this Schedule 24 by City shall constitute a repudiation of the Licence granted under this Section 3.2 by City.

- (e) The Licensee may provide and disclose the Licenced Intellectual Property to any employee, contractor, subcontractor, consultant, service provider, outsourcer or other person retained by the Licensee (including the Operator) in connection with the Permitted Purposes, except in respect of the System Architecture and Look and Feel in connection with the Expanded Purposes, and any such employee, contractor, subcontractor, service provider, outsourcer or other person may exercise all rights to Use and Modify the Licenced Intellectual Property as may be granted by the Licensee to such person within the scope of the Licence granted by DB Co to the Licensee pursuant to this Schedule 24, provided that the Licensee shall be responsible for anything done or failed to be done by any employee, contractor, subcontractor, service provider, outsourcer or other person to whom the Licensee provides and discloses the Licenced Intellectual Property, including a breach by any such person of City's obligations of confidentiality in respect of any Confidential Information that is or is part of Licenced Intellectual Property.
- (f) The Licensee may Use Project Software that is licenced pursuant to this Section 3.2 in multiple environments or instances, including for training, development, testing, staging, and disaster recovery and in a live, production or operating environment.
- (g) The Licensee may make copies of the Licenced Intellectual Property as may be reasonably necessary for Use and Modification of the Licenced Intellectual Property in accordance with the Licence granted pursuant to this Section 3.2 or otherwise this Schedule 24. All such copies shall be Owned by Owner of the original Licenced Intellectual Property and licenced to the Licensee pursuant to this Section 3.2. Except as permitted by this Schedule 24, the Licensee will not copy, Modify, disassemble, reverse engineer, decompile, translate or otherwise obtain or create the source code for any DB Co Intellectual Property, DB Co Licenced Software, DB Co Embedded Software, Subcontractor Intellectual Property, Subcontractor Licenced Software or Subcontractor Embedded Software.
- (h) The Licensee will not remove from any Licenced Intellectual Property any markings or notices with respect to the ownership thereof, Copyright therein or the confidentiality thereof.
- (i) Where City has the right to Modify any Licenced Intellectual Property, DB Co shall ensure that all authors of such Licenced Intellectual Property have waived all moral rights that such authors may have therein in favour of City and its successors, assigns and licensees.

3.3 Licences with Subcontractors

- (a) DB Co will be responsible to obtain from each Subcontractor the right to grant the Licence under Section 3.2 in respect of the Subcontractor Intellectual Property.
- (b) DB Co will be responsible to obtain from each Subcontractor the right to Use and Modify Subcontractor Intellectual Property (excluding the right to Modify the CBTC Intellectual Property) to the extent necessary for DB Co to perform its obligations under the Project Agreement, on such terms as are not in breach of or conflict with the Project Agreement.
- (c) DB Co will be responsible to grant to each Subcontractor the right to Use and Modify City Intellectual Property and DB Co Intellectual Property to the extent necessary for each Subcontractor to perform its obligations under its Subcontract, on such terms as are not in breach of or conflict with the Project Agreement.

3.4 Third Party Intellectual Property: DB Co will not, and will not permit any DB Co Personnel, Subcontractor or Subcontractor Personnel to, incorporate, embed or otherwise include in the Works or any Deliverable any Third Party Intellectual Property unless:

- (a) for Third Party Intellectual Property other than Third Party Embedded Software, such Third Party Intellectual Property is provided by the Owner thereof pursuant to a licence agreement that:
 - (i) grants to the Licensee rights equivalent to or better than the rights granted under the Licence in Section 3.2, including being assignable in accordance with Section 3.2(c), and, where the Third Party Intellectual Property is software or includes software, provides for the maintenance and support of that software on terms acceptable to City; or
 - (ii) has been approved by City in writing, which approval may be given or refused by City in its absolute and unfettered discretion;

and such licence agreement, if not entered into with City directly, has been assigned or is freely assignable to City;

- (b) for Third Party Embedded Software, either (i) such Third Party Embedded Software is embedded in Equipment and is not provided by the Owner thereof pursuant to a licence agreement, but may be used by City or any subsequent owner of the machine or equipment as part of and for the intended purposes of such machine or equipment upon the purchase thereof, or (ii) such Third Party Embedded Software is subject to a licence agreement that complies with Section 3.4(a).
- (c) If DB Co, DB Co Personnel, Subcontractor or Subcontractor Personnel incorporates, embeds or includes any Third Party Intellectual Property in the Works or any Deliverable other than in compliance with this Section 3.4, then in addition to any other rights and remedies City may have against DB Co, DB Co will at its sole cost and expense take all necessary steps to comply with this Section 3.4 or, if DB Co is unable to do so, to remove such Third Party Intellectual Property and replace it with DB Co Intellectual Property that provides the same functionality and performance as such Third Party Intellectual Property and which will operate within the Works without any degradation thereof or adverse effect thereon, and which will be included in the DB Co Intellectual Property for the purposes of the Licence granted pursuant to Section 3.2.

- 3.5 Non-Assertion:** DB Co agrees not to assert, and to cause its Subcontractors not to assert, any Intellectual Property right against City or any Licensee that would have the effect of diminishing the rights granted to City or any Licensee hereunder. Without limiting the generality of the foregoing, DB Co will not sue, and will cause its Subcontractors not to sue, City or any Licensee on the basis that any Equivalent Activity or the Ownership or Use of the Works or any Deliverable within the scope of the Permitted Purposes infringes any Intellectual Property right of DB Co or any Subcontractor.
- 3.6 Deliveries:** DB Co will deliver to City all Licenced Intellectual Property at the times specified in the Project Agreement, or where no time is specified, on or before the Final Completion Date or the Termination Date, whichever is first to occur. The media on which Project Software is delivered and tangible copies or embodiments of any Licenced Intellectual Property other than Project Software and will be the property of City, notwithstanding DB Co's, a Subcontractor's or a third party's Ownership of the Licenced Intellectual Property. If any Licenced Intellectual Property requires software in order to Use that Licenced Intellectual Property, DB Co will ensure that such software will be commercially available to City at a reasonable licence fee, or if such software is not commercially available, DB Co will at its cost provide such software and a licence therefor to City and City Parties, RTG and RTG Parties, on terms and conditions that do not result in any impairment of City's Use of the Licenced Intellectual Property in accordance with the Licence therefor.
- 3.7 Pass Through Obligations:** DB Co is responsible to include in all contracts with DB Co Personnel and in all Subcontracts with Subcontractors such terms and conditions as may be necessary for DB Co to grant, or obtain for City, the Ownership, Licences, rights and benefits provided for in this Schedule 24.
- 3.8 Conflicting Software Licences:** All software referenced in this Schedule 24 will be licenced in accordance with this Schedule 24, and any form of software licence agreement used or provided by a licensor in association with any such software will be of no force or effect and will not be binding on City or any other Licensee, even if by its terms such software licence agreement is stated to be accepted by the installation or use of the software, and regardless of any acceptance of such software licence agreement that is required in order to install or use the software.
- 3.9 Trade-Marks and Names:** Except as expressly set forth: (a) in the Trade-Mark Licence Agreement; (b) the Project Agreement; or (c) otherwise in a writing executed by each of City and DB Co, neither Party shall use any Trade-Marks owned by the other Party, or use the names or any identifying logos or otherwise of the other Party in any advertising or permit them so to be used.
- 3.10 Open Source.** DB Co shall not, and shall cause the Subcontractor not to, incorporate, embed or include any Open Source Materials in any Deliverables, City Intellectual Property, City Supplied Third Party Intellectual Property without the prior written consent of City.
- 3.11 Escrow Agreements**
- (a) If requested by City (which for the purposes of this Section 3.11 includes any permitted assignee under Section 49.2 of the Project Agreement), at any time during the Project Term, DB Co will, or will require the applicable Subcontractor or third party licensor to, enter into an Escrow Agreement for any Software or Embedded Software (an "**Escrowed Deliverable**") on terms that comply with this Section 3.11, or amend its existing Escrow Agreement for such Software or

Embedded Software to comply with this Section 3.11, and add City as a beneficiary under the Escrow Agreement.

- (b) The Escrow Provider will deposit with the Escrow Agent the Escrow Materials for the Escrowed Deliverable and all Modifications thereto provided by the Escrow Provider to City as part of the Works, Software Maintenance and Support (if purchased by or on behalf of City) or any other services performed by the Escrow Provider for City, and in the case of Software or the Embedded Software, the Escrow Provider will update the Escrow Materials to conform to the then-current version of the Software in use by City including all Modification thereto made for the benefit of City.
- (c) City will have the right, on reasonable notice to the Escrow Provider and the Escrow Agent, to verify that the Escrow Materials conform to the Escrowed Deliverable supplied to and in use by City to which the Escrow Materials relate. In addition, City may purchase such additional verification services as may be offered by the Escrow Agent and the Escrow Provider will cooperate with City and the Escrow Agent in the performance of those verification services.
- (d) City will have the right to obtain from the Escrow Agent a copy of the Escrow Materials upon any of the following events:
 - (i) the Escrow Provider is bankrupt;
 - (ii) a trustee, receiver, manager, receiver-manager, custodian or person having similar authority is appointed for the Escrow Provider or its business and assets and is not released or removed within 30 days after the appointment;
 - (iii) the Escrow Provider seeks protection from its creditors or undertakes any reorganization for the purpose of obtaining relief from its creditors;
 - (iv) the Escrow Provider ceases to carry on business; or
 - (v) in the case of Software, if City is purchasing Software Maintenance and Support for the Software in respect of which the Escrow Materials have been deposited, if the Escrow Provider has given City or any of its representatives notice that it will no longer provide Software Maintenance and Support or if the Escrow Provider defaults in the performance of Software Maintenance and Support and does not remedy that default within 30 days after receipt of notice from City demanding that the Escrow Provider do so.
- (e) DB Co shall ensure that the Escrow Agreement: (i) requires the Escrow Agent to release the Escrow Materials to City if any of the events listed in Section 3.11(d) occur; (ii) does not contain any provision placing any obligation on City, including without limitation, any indemnity obligation; and (iii) complies with and does not contradict any provision of this Section 3.11. Where this Section 3.11 places an obligation on the Escrow Agent, DB Co shall cause the Escrow Agent to comply with all such obligations.
- (f) DB Co hereby grants, and DB Co shall ensure that all Escrow Providers grant to City as of the date the applicable Software or the applicable Embedded Software is used in connection with the Project Scope, a Licence to:

- (i) Use the Escrow Materials to enable City to Use the Escrowed Deliverable to which the Escrow Materials relate for the Permitted Purposes, and where the Escrowed Deliverable is or contains Licenced Intellectual Property in accordance with the Licence applicable thereto;
 - (ii) make Modifications to the Escrow Materials notwithstanding any contradictory term or condition in the Licence applicable to the Escrowed Materials which Modifications are only used for the Permitted Purposes or the Expanded Purposes, as applicable, and are subject to confidentiality obligations under Section 3.11(f)(v);
 - (iii) recompile versions of the Software or Embedded Software from the Escrow Materials, which recompiled versions shall be deemed to form part of the Software or Embedded Software and be subject to the terms hereof;
 - (iv) make only those copies of the Escrow Materials that City reasonably requires for the purposes set out in Sections 3.11(f)(i), 3.11(f)(ii) and 3.11(f)(iii); and
 - (v) disclose the Escrow Materials, or any part thereof, only to agents, employees or contractors of City as reasonably required for the purposes set out in Sections 3.11(f)(i), 3.11(f)(ii) and 3.11(f)(iii), provided that such agents, employees and contractors are bound by obligations of confidentiality in respect of any Escrow Materials disclosed to them, the breach of which shall constitute a breach by City of its obligations of confidentiality in respect of the Escrow Materials.
- (g) The Licence granted pursuant to Section 3.11(f) will:
- (i) where the Escrow Provider is DB Co or a Subcontractor, form part of the Licence granted pursuant to Section 3.2; or
 - (ii) where the Escrow Provider is a third party, form part of the licence granted by such third party to City;
- and in either case remain in effect for so long as such licence remains in effect.
- (h) Except where City (i) terminates the Escrow Agreement, (ii) has a renewal right and fails to renew the Escrow Agreement, or (iii) fails to make payments as set out in Section 3.11(i), the Escrow Provider will not terminate or fail to renew the Escrow Agreement without entering into a new Escrow Agreement with a replacement escrow agent on terms and conditions substantially the same as the Escrow Agreement and this Section 3.11.
- (i) The City will pay all fees charged by the Escrow Agent in association with the deposit and maintenance of the Escrow Materials by the Escrow Agent under the Escrow Agreement for the benefit of City. The Escrow Provider shall have no responsibility or liability arising from any failure of City to pay fees when due in order to maintain the Escrow Materials with the Escrow Agent.
- (j) If City receives the Escrow Materials, then as between City and DB Co and notwithstanding any other provision of the Project Agreement, City will own all Modifications to the Escrow Materials made by or for City and all Intellectual Property in such Modifications.

3.12 Modifications: Notwithstanding the granting of any licence pursuant to this Schedule 24, where City has made any Modification to the DB Co Intellectual Property or the Subcontractor Intellectual Property other than (a) a Modification made by or on behalf of DB Co or a Subcontractor or otherwise authorized by DB Co or any Subcontractor, or (b) a Modification made through the Limited Modification Rights,

then,

- (i) any warranty provided by DB Co under the Project Agreement shall not apply solely in respect of such Modification;
- (ii) DB Co and the Subcontractors shall not be liable in respect of any Direct Losses arising in connection with such Modifications where such Modifications are the direct cause of such Direct Losses, and the Direct Losses would not have occurred but for the Modifications; and
- (iii) the indemnity obligations of DB Co set out in Section 46.1(f) of the Project Agreement shall not apply in respect of any such Modifications where the Modifications are the direct cause of such Direct Losses, and the Direct Losses would not have occurred but for the Modifications.

Appendix A

Form of Trade-Mark Licence Agreement

TRADE-MARK

LICENCE

AGREEMENT

THIS TRADE-MARK LICENCE AGREEMENT, effective as of [DATE] (the “**Agreement**”), is between City (the “**Licensor**”), and [•] (the “**Licensee**”), and Licensor and Licensee are referred to herein individually as a “**Party**” and collectively as the “**Parties**”.

WHEREAS:

1. Licensor and Licensee are parties to a Project Agreement dated [DATE] (the “**Project Agreement**”);
2. Capitalized terms used but not defined herein have the meanings assigned to them in the Project Agreement and this Schedule 24 thereto;
3. Licensor owns the trade-marks shown on Exhibit A (the “**Marks**”);
4. Licensee proposes to use the Marks in [Ontario] (the “**Territory**”) for the Limited Purpose set forth below; and
5. Subject to the terms and conditions set forth herein, Licensor is willing to grant to Licensee, and Licensee is willing to accept, a non-exclusive licence to use the Marks pursuant to the terms of this Agreement.

NOW THEREFORE in consideration of the covenants contained herein, the receipt and sufficiency of which are acknowledged, the Parties agree as follows:

1. **Grant:** Licensor grants to Licensee, and Licensee accepts, a limited, non-transferable, non-exclusive, royalty-free right and licence to use the Marks in the Territory for the sole purpose of and only to the extent necessary for the performance by Licensee of the Project Scope and its obligations under the Project Agreement (the “**Limited Purpose**”).
2. **No Right to Sublicence:** Licensee acknowledges and agrees that it does not have the right to sublicense the use of the Marks to any party without the express written consent of Licensor.
3. **Ownership:** Licensee acknowledges Licensor’s ownership of the Marks, and agrees that its use of the Marks shall enure to Licensor’s benefit.
4. **Licensee Covenants:** Licensee acknowledges that Licensor is the owner of all rights in the Marks, and, except as otherwise expressly permitted by this Agreement, Licensee shall not at any time do or suffer to be done any act or thing that will in any way impair the rights of Licensor in and to the Marks. Nothing in this Agreement grants, nor shall Licensee acquire, any right, title or interest in or to the Marks or any goodwill associated with the Marks, other than those rights expressly granted hereunder. Licensee shall affix to all materials that contain or bear one or more

of the Marks such legends and notices as Licensor may reasonably require. At Licensor's request, Licensee shall publish a public notice in the following form, or in any other form prescribed by Licensor from time to time, in appropriate publications addressed to the general public: "[MARK] is a trade-mark owned by [LICENSOR] used under licence by [LICENSEE]". Licensee undertakes to comply with all relevant laws and regulations pertaining to trade-marks and marking requirements. Licensee shall execute all documents and provide all assistance reasonably required by Licensor to apply for, obtain and maintain registrations for the Marks, and to enforce rights in, and defend any proceedings brought against applications or registrations for, the Marks.

5. **Restrictions On Use:** Notwithstanding anything contained in this Agreement or otherwise, Licensee shall use the Marks only in accordance with the design, description and/or appearance of the Marks as shown on Exhibit A. Licensee may not change or modify the Marks nor join the mark with any other words or designs. Licensee agrees to abide by any reasonable guidelines provided by Licensor from time to time in connection with the use of the Marks.
6. **Quality Standards and Control:** Licensee agrees that use of the Marks by Licensee in association with any products or services (the "**Products**" and "**Services**") will meet or surpass the standards set by Licensor and conveyed to Licensee from time to time for the character and quality of such Products and Services.
7. **Inspection:** At the request of the Licensor, the Licensee shall provide to Licensor for Licensor's review, comment and approval samples of the any Products and sample copies of materials associated with the Products or Services or used to advertise/promote the Products or Services.
8. **Breach of Licence:** Licensor may notify the Licensee if it objects to any proposed or actual use of the Marks if in Licensor's sole judgment (acting reasonably) Licensor believes that the Marks is being used or proposed to be used in a manner that erodes the goodwill associated with the Marks or otherwise reduces the value of the Marks. If Licensee is so notified, the Parties shall attempt to settle any dispute and Licensee shall, if directed by Licensor to do so, cease using or cease from using the Marks until the time such dispute has been settled between the Parties or otherwise finally determined.
9. **Infringement:** Licensee shall promptly notify Licensor upon becoming aware of any infringement or dilution of the Marks and shall cooperate fully with Licensor to stop such infringement or dilution. Licensor, in its sole discretion, will take any action that it deems necessary to protect the validity of the Marks, and Licensee hereby waives any rights that it may have pursuant to Section 50(3) of the *Trade-marks Act*.
10. **Indemnification:** Licensor does not assume any liability to Licensee, or third parties, for Licensee's goods or services, including the Products and Services, and Licensee shall defend, indemnify and hold harmless Licensor and its affiliates, successors and assigns, and their respective officers, directors, employees, agents, lawyers and representatives from and against any and all claims, causes of action, suits, damages, losses, liabilities, costs and expenses (including, but not limited to, reasonable lawyer fees and expenses), which may be sustained or suffered as a result of any such third party claims or arising from a breach of this Agreement by Licensee including, without limitation, any act or omission, which causes or is alleged to cause harm or a violation of any of the rights of any third party.

11. **Breach/Use Outside Limited Purpose:** In the event that Licensee breaches any of the terms of this Agreement, including use of the Marks outside the Limited Purpose or Territory as determined by Licensor in its sole discretion, but acting reasonably, Licensor shall have the option to terminate this Agreement immediately, and if so terminated, all subsequent use by Licensee will be unauthorized and subject to legal action. Upon the termination of this Agreement for any reason, all rights in the Marks granted to Licensee hereunder shall automatically revert to Licensor, Licensee shall have no further rights in the Marks, and Licensee shall immediately change its use of the Marks to uses that do not consist of or include the Marks or any words similar to the Marks. In the event of an unauthorized use of the Marks by Licensee, Licensee consents to the immediate entry of a court injunction preventing Licensee's further use of the Marks.
12. **Termination:** This licence granted to Licensee will terminate upon the expiry or termination of Licensee's services and other obligations under the Project Agreement.
13. **No Agency:** The Parties hereto are independent contractors with respect to each other, and nothing herein shall create any association, partnership, joint venture or agency relationship between them.
14. **Assignment:** Licensee may not convey, sublicense, assign, transfer, pledge, hypothecate, encumber or otherwise dispose of this Agreement without the prior written consent of Licensor, which consent may be unreasonably withheld.
15. **Headings:** The headings contained in this Agreement are for purposes of convenience only and shall not affect the meaning or interpretation of this Agreement.
16. **Notices:** All notices, requests, demands and other communications made in connection with this Agreement shall be made in the manner set out in the Project Agreement.
17. **Entire Agreement:** This Agreement constitutes the entire agreement between Licensor and Licensee with respect to the subject matter hereof and supersedes all prior agreements and understandings, whether oral, written, express or implied, between Licensor and Licensee.
18. **No Waiver:**
 - (a) No waiver made or given by a Party under or in connection with this Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Party. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
 - (b) Failure by either Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.
19. **Successors:** This Agreement shall be binding upon and shall enure to the benefit of the Parties and their respective successors and permitted assigns.

20. **Severability:** Each provision of this Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Agreement. If any such provision of this Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Agreement as near as possible to its original intent and effect.
21. **Governing Law:** This Agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles. Each of the Parties attorn to the jurisdiction of the courts of the Province of Ontario and all courts competent to hear appeals therefrom.
22. **Counterparts:** The Project Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any Party providing its signature in faxed form shall promptly forward to the other Party an original signed copy of the Project Agreement which was so faxed.

[Remainder of page intentionally blank – Next page is the signature page.]

IN WITNESS WHEREOF, the Parties have signed this Agreement effective as of the date set forth above.

[Note to Proponents: To be completed once trade-marks identified.]

SCHEDULE 25

INSURANCE AND PERFORMANCE SECURITY REQUIREMENTS

1. WORKS PHASE INSURANCE COVERAGE

1.1 Subject to Section 6, from and after execution of this Project Agreement and until the later of the (i) East Substantial Completion Date, or (ii) West Substantial Completion Date, DB Co shall, at its own expense, obtain and maintain, or cause to be obtained and maintained, exclusively through the City of Ottawa Construction Insurance Program (“COCIP”) the following insurances as further described in Appendix A to this Schedule 25:

- (a) “All Risks” Course of Construction Property, including Boiler and Machinery;
- (b) “Wrap-Up” Commercial General Liability and Non-Owned Automobile Liability;
- (c) Project Specific Professional Liability; and
- (d) Project Specific Pollution Liability (combined Contractors’ Pollution Liability and Pollution Legal Liability).

1.2 Subject to Section 6, from and after execution of this Project Agreement and until the later of the (i) East Substantial Completion Date, or (ii) West Substantial Completion Date, DB Co shall, at its own expense, obtain and maintain, or cause to be obtained and maintained, the following insurances as further described in Appendix A to this Schedule 25:

- (a) Automobile Liability;
- (b) Commercial General Liability and Non-Owned Automobile Liability (to be maintained by the Construction Contractor and each of the Subcontractors involved in the Works) with respect to off-site operations and activities;
- (c) Aircraft and Watercraft Liability (if any exposure);
- (d) “All Risks” Marine Cargo (if any exposure);
- (e) “All Risks” Contractors’ Equipment;
- (f) Comprehensive Crime; and
- (g) WSIB.

2. NO LIMIT ON RECOVERY

2.1 Notwithstanding any other provision of this Project Agreement, it is hereby agreed that the limits of liability specified in this Schedule 25 for insurance policies, whether such policies are required to be obtained by the City or by DB Co, shall in no way limit DB Co’s liability or obligations to the City or the City’s liability or obligations to DB Co, as applicable.

3. ADDITIONAL COVER

- 3.1 Without prejudice to the other provisions of this Schedule 25, the City and DB Co shall, at all relevant times and at their own expense, obtain and maintain those insurances which they are required to obtain and maintain by Applicable Law, or that they consider necessary.
- 3.2 The City reserves the right to require DB Co to purchase such additional insurance coverage as the City may reasonably require. The City also reserves the right to request such higher or lower limits of insurance or otherwise alter the types of coverage requirements, their minimum amounts and deductibles (taking into consideration such matters as the nature of the Works, contract value, industry standards and availability of insurance) as the City may reasonably require from time to time. Any additional costs of such additional and/or amended insurance shall be borne by the City and any cost savings resulting from the implementation of such additional and/or amended insurance shall be for the account of the City.

4. RESPONSIBILITY FOR DEDUCTIBLES

- 4.1 The Party responsible for the matter giving rise to a claim, to the extent responsible therefor, shall be responsible and liable for the payment of deductibles under any policy of insurance under which it is an insured party or under any policy of insurance DB Co is required to maintain under this Schedule 25. In the event that responsibility for the matter giving rise to the claim is indeterminable, the First Named Insured under the policy of insurance is responsible and liable for the payment of deductibles.

5. COOPERATION WITH INSURER'S CONSULTANT

- 5.1 If an insurer or an insurer's appointed consultant, for underwriting purposes or as a term of an insurance policy, needs to review any part of the performance of this Project Agreement, then the City and DB Co shall, and shall require the City Parties and the DB Co Parties, respectively, to:
- (a) cooperate with the insurer and its consultant, including providing them with such information and documentation as they may reasonably require; and
 - (b) allow the insurer and its consultant to attend meetings between DB Co and the City (or, as applicable, and if reasonably required by the insurer, between DB Co and those engaged by or through DB Co).

6. UNINSURABLE RISKS

- 6.1 The term "Uninsurable Risk" means a risk, or any component of a risk, against which DB Co is required to insure pursuant to this Schedule 25 and for which, at any time after the date of this Project Agreement, either:
- (a) the insurance required pursuant to this Schedule 25 (including the terms and conditions specified for such insurance herein) is not available in relation to that risk from insurers licensed in the Province of Ontario; or
 - (b) the insurance premium payable or the terms and conditions for insuring that risk are such that the risk is not generally being insured against in the Canadian insurance market.

DB Co has the onus of demonstrating, to the City's reasonable satisfaction that the foregoing definition applies to a particular risk.

- 6.2 DB Co shall notify the City as soon as possible and, in any event, within 15 Business Days of becoming aware of same, that a risk, or any component of a risk, has become an Uninsurable Risk, and shall provide the City with all relevant details in relation to such risk, including a copy of the relevant insurance policy.
- 6.3 DB Co and the City shall, as soon as possible following the provision of the notice referred to in Section 6.2, meet to discuss, in good faith, the appropriate means by which the Uninsurable Risk should be managed and, if DB Co and the City are able to agree to alternative arrangements, the Uninsurable Risk shall be managed in accordance with such alternative arrangements.
- 6.4 In the event that DB Co and the City, each acting in good faith, are unable to agree to alternative arrangements with respect to the management of an Uninsurable Risk within 15 Business Days of the expiry of the period referred to in Section 6.2, the City may, in its absolute discretion, either:
- (a) elect to assume responsibility for the Uninsurable Risk and, in respect of the year in which the relevant risk becomes an Uninsurable Risk and every year thereafter, withhold, in equal installments over the course of such year, from the payment or payments otherwise due to DB Co an amount equal to the annual premium (index linked) relating to the Uninsurable Risk as was current on the date immediately prior to the date on which the relevant risk became an Uninsurable Risk, in which case this Project Agreement shall continue in full force and effect; or
 - (b) terminate this Project Agreement in accordance with Section 38 of the Project Agreement as if such termination had occurred as a result of the Parties having failed to reach agreement in accordance with Section 38 of the Project Agreement following the occurrence of an event of Force Majeure, and, in accordance with the provisions of Schedule 23 – Compensation on Termination, pay to DB Co an amount equal to the Non-Default Termination Sum.
- 6.5 On the occurrence of an Uninsurable Risk, the City may, in its absolute discretion, either:
- (a) pay to DB Co an amount equal to the insurance proceeds that would have been payable to DB Co in connection with such Uninsurable Risk had the relevant insurance continued to be available, in which case this Project Agreement shall continue in full force and effect; or
 - (b) terminate this Project Agreement in accordance with Section 38 of the Project Agreement as if such termination had occurred as a result of the Parties having failed to reach agreement in accordance with Section 38 of the Project Agreement following the occurrence of an event of Force Majeure, and, in accordance with the provisions of Schedule 23 – Compensation on Termination, pay to DB Co an amount equal to the Non-Default Termination Sum.
- 6.6 With respect to any Uninsurable Risk:
- (a) DB Co shall continue to approach the insurance market on a regular basis and, in any event, at intervals of not less than 180 days and use reasonable efforts to

obtain insurance to cover as much or all of the Uninsurable Risk as can be insured in the available insurance market from time to time; and

- (b) Subject to Section 6.6(a), DB Co shall be relieved of its obligation to maintain insurance in respect of the Uninsurable Risk.

6.7 Where a risk which was previously an Uninsurable Risk ceases to be so, DB Co shall, at its own expense, obtain and maintain insurance in accordance with the requirements of this Schedule 25 in respect of the risk and the provisions of this Section 6 shall no longer apply to such risk.

7. TOTAL OR SUBSTANTIAL DESTRUCTION

7.1 In the event of damage to, or destruction of, all or substantially all of the Project for which there is coverage under an insurance policy, any insurance proceeds received by DB Co shall first be applied so as to ensure the performance by DB Co of its obligations under this Project Agreement, including, where appropriate, the reinstatement, restoration or replacement of the Project or any other assets, materials or goods necessary or desirable for the carrying out of the Works, all in accordance with the terms of the Insurance Trust Agreement.

8. SUBCONTRACTORS

8.1 DB Co shall require that all Subcontractors are covered by, or obtain, the insurance described in this Schedule 25, provided that DB Co shall determine the applicable limits to be obtained for such insurance. DB Co shall be solely responsible and liable for any damages which the City may suffer as a direct result of DB Co's failure to comply with the foregoing.

8.2 If DB Co receives notice that any Subcontractor employed by or through DB Co is not covered by any insurance required by this Schedule 25 to be obtained by DB Co, DB Co shall:

- (a) ensure that such insurance coverage is put in place;
- (b) remove the Subcontractor from the Site and ensure that such Subcontractor does not perform any further part of the Works until after such insurance coverage is put in place; or
- (c) if the Subcontractor cannot be covered by a particular policy as required by this Schedule 25, replace the Subcontractor with a new Subcontractor who can obtain the required insurance coverage; it being acknowledged by DB Co that the requirements and restrictions set forth in the Project Agreement regarding new and replaced Subcontractors shall be complied with.

9. RENEWAL

9.1 DB Co shall provide to the City, at least 5 Business Days prior to the expiry date of any policy of insurance required to be obtained by DB Co pursuant to this Schedule 25, evidence of the renewal of each such policy satisfactory to the City, acting reasonably.

10. NAMED AND ADDITIONAL INSURED AND WAIVER OF SUBROGATION

10.1 All insurance provided by DB Co, shall:

- (a) include DB Co, the City and Lenders as Named Insureds to the extent specified in Appendix A of this Schedule 25;
- (b) include the City, MOI, MTO, Province, Railway Company, RTG, Utility Company and Lenders as Additional Insureds, or loss payees with the Lenders' Agent as loss payee and as an Additional Insured, as their interests may appear, to the extent of their respective insurable interests to the extent specified in Appendix A of this Schedule 25;
- (c) except with respect to the Automobile Liability, Comprehensive Crime and WSIB specified in Appendix A to this Schedule 25, contain a waiver of subrogation as against the City and their respective shareholders, officials, directors, officers, employees, servants, consultants (other than Design Consultants) and agents;
- (d) contain a breach of warranty provision whereby a breach of a condition by DB Co will not eliminate or reduce coverage for any other insured; and
- (e) be primary insurance with respect to any similar coverage provided by any insurance obtained by or available to the City or Lenders, without any right of contribution of any insurance carried by the City or Lenders.

11. CERTIFICATES OF INSURANCE AND CERTIFIED COPIES OF POLICIES

- 11.1 Prior to the execution of the Project Agreement, DB Co will provide the City with certified copies of policies, confirming that the insurances specified in Section 1.1 have been obtained and are in full force and effect.
- 11.2 Prior to the execution of the Project Agreement, DB Co will provide the City with certificates of insurance or certified copies of policies, confirming that the insurances specified in Section 1.2 have been obtained and are in full force and effect. If certificates of insurance are provided, certified copies of the entire contents, exclusive of those contents that are not relevant to the Project, of all relevant insurance policies will be subsequently provided to the City no later than 90 days after execution of this Project Agreement.

12. FAILURE TO MEET INSURANCE REQUIREMENTS

- 12.1 If DB Co fails to obtain or maintain the insurance required by this Schedule 25, fails to furnish to the City a certified copy of each policy required to be obtained by this Schedule 25 or if, after furnishing such certified copy, the policy lapses, is cancelled, or is materially altered, then the City shall have the right, without obligation to do so, to obtain and maintain such insurance itself in the name of DB Co, and the cost thereof shall either, at the City's option, be payable by DB Co to the City on demand or be deducted by the City from the next payment or payments otherwise due to DB Co.
- 12.2 If coverage under any insurance policy required to be obtained by DB Co should lapse, be terminated or be cancelled, then, if directed by the City, all work by DB Co shall immediately cease until satisfactory evidence of renewal is produced.

13. MODIFICATION OR CANCELLATION OF POLICIES

- 13.1 Except as noted in Appendix A to this Schedule 25, all insurance provided by DB Co shall contain endorsements confirming that the policy will not be cancelled, adversely

reduced, adversely materially altered or adversely materially amended without the insurer(s) giving at least ninety (90) days prior written notice by registered mail, at the address specified, to the City and the Lenders' Agent. For greater certainty, the terms "adversely reduced", "adversely materially altered" and "adversely materially amended" as used in this provision shall mean any decrease or reduction in policy limits, aggregate limits or sub-limits (other than as a result of claims under the policy), any increase in any policy deductible or self-insured retention, any reduction in the policy coverage period, cancellation or suspension of coverage with respect to any insured parties from the time, the policy was issued for that policy period, addition of any exclusions or restrictions from the time the policy was issued for that policy period and any reduction or restriction in the scope of coverage provided under the policy, in all cases when such adverse reduction, adverse material alteration or adverse material amendment is initiated by the insurer.

- 13.2 All insurance provided by DB Co shall contain endorsements confirming that, in the event of cancellation for non-payment of premium, the insurer(s) will give at least fifteen (15) days prior written notice by registered mail, at the address specified, to the City and the Lenders' Agent.
- 13.3 With respect to insurances described in Section 1.1 (a), (b) and (c) and Section 1.2 (d), breach of any of the terms or conditions of the policies required to be provided by DB Co, or any negligence or wilful act or omission or false representation by an Insured under these policies, shall not invalidate the insurance with respect to the City, the Lenders or any other Insured, but only to the extent that such breach is not known to these parties.

14. INSURERS

- 14.1 All policies of insurance to be obtained by DB Co in accordance with this Schedule 25 shall be issued by financially sound Insurers acceptable to the City and Lenders, acting reasonably, and, where required by statute, be licensed to insure such risk in the Province of Ontario.
- 14.2 To be eligible to provide insurance, an Insurer must have the capacity to provide the particular insurance and shall have current ratings from time to time of either:
- (a) a Financial Strength Rating of not lower than "A-" for three out of the previous five years but not lower than "B" at any time during those five years, and a Financial Size Category not lower than VII, such ratings being those established by A.M. Best Company (**Best**); or
 - (b) a Long-Term Financial strength Rating of not lower than "A-" for three out of the past five years but not less than "BBB" at any time during those five years, a Short-Term Financial Strength Rating of not lower than "A-3" for three out of the previous five years and a Financial Enhancement Rating of not lower than "A-" for three out of the previous five years but not less than "BB+" at any time during those five years, such ratings being those established by Standard and Poor's (**S&P**); or
 - (c) if the Insurer is not rated by Best or S&P, an Insurer that is acceptable to the City and Lenders, acting reasonably, with respect to the insurances required by this Schedule 25.

15. POLICY TERMS AND CONDITIONS

- 15.1 All policies of insurance to be obtained by DB Co in accordance with this Schedule 25 shall be in form and substance satisfactory to the City, its insurance advisors and Lenders, acting reasonably.
- 15.2 To achieve the minimum limits for any type of insurance required under Appendix A, it is permissible to arrange the insurance under a single policy, or by a combination of primary, umbrella and/or excess policies.

16. FAILURE TO COMPLY

- 16.1 Neither failure to comply nor full compliance by DB Co with the insurance provisions of this Schedule 25 shall relieve DB Co of its liabilities and obligations under this Project Agreement.

17. PERFORMANCE SECURITY REQUIREMENTS

[REDACTED]

18. INSURANCE TRUST AGREEMENT

- 18.1 All losses under the “All Risks” Course of Construction Property Insurance policy, including Boiler & Machinery Insurance carried by DB Co prior to the later of (i) East Substantial Completion, or (ii) West Substantial Completion, which, in each case, relate to equipment purchased by the City, shall be payable solely to the City and shall not be payable to the Account Trustee or distributed pursuant to the Insurance Trust Agreement.

APPENDIX A TO SCHEDULE 25

SCHEDULE 26

RECORD PROVISIONS

1 General Requirements

- 1.1** DB Co shall prepare, retain and maintain, at its own expense, all the records (including superseded records) referred to in Section 2.1 of this Schedule 26, as follows:
- (a) in accordance with this Section 1 ;
 - (b) in accordance with the Project Agreement;
 - (c) in accordance with the requirements of Good Industry Practice;
 - (d) having due regard to the guidelines and policies of the Office of the Information and Privacy Commissioner of Ontario;
 - (e) in accordance with the most stringent of DB Co's and the Construction Contractor's normal business practices;
 - (f) in accordance with Canadian GAAP;
 - (g) in chronological order;
 - (h) in electronic format in accordance with the City's designated record keeping system;
 - (i) in sufficient detail, in appropriate categories and generally in such a manner as to enable DB Co to comply with DB Co's obligations under Section 26 of the Project Agreement; and
 - (j) in a form that is capable of audit.
- 1.2** DB Co shall retain and maintain all records on the Site in addition to retaining and maintaining records referred to in Section 2.1 in electronic format on the City's designated record keeping system.
- 1.3** Wherever practical, original records shall be retained and maintained in a hard copy form. DB Co may retain true copies of original records where it is not practical to retain original records.
- 1.4** Any drawings (including, without limitation, the As-Built Drawings and Record Drawings) required to be made or supplied pursuant to this Project Agreement on the most updated version of the applicable software and editable in updated base software format (native files in a standard format), and when printed, be of a size appropriate to show the detail to be depicted clearly without magnifying aids, shall be consistent in size and format to drawings previously submitted by DB Co to City, and shall conform to the Output Specifications, Good Industry Practice, and the CAD Standards. All drawings are to be submitted via City's electronic control management system, with one hard copy provided to the City. DB Co shall make or supply drawings and other documents in such form as has been agreed by the Parties

and shall include secure back up facilities. The City shall provide DB Co access to the City's electronic control management system.

- 1.5** Records shall be stored in electronic format within the City's electronic control management system where DB Co shall have access thereto and will continue to have access thereto, such that City will be able to read, copy, download, and search same without licence or payment.
- 1.6** Subject to Sections 1.7 and 1.8, DB Co shall retain and maintain in safe storage, at its expense, all records referred to in Section 2.1 of this Schedule 26 for a minimum period of at least 7 years or such longer period as required by Applicable Law.
- 1.7** DB Co shall notify City if DB Co wishes to destroy any records referred to in this Schedule 26, or in respect of which the required period Section 1.6 or under Applicable Law for their retention has expired. The Parties agree that:
- (a) within 60 days of such notice, City may elect to require DB Co to deliver such records to City, in which case DB Co shall, at the expense of City, deliver such records (with the exception of Sensitive Information) to City in the manner and to the location as City shall specify; or
 - (b) if City fails to notify DB Co of its election pursuant to Section 1.7(a) within such 60 day period, DB Co may, at its expense, destroy such records.
- 1.8** In the event of a termination of this Project Agreement in accordance with its terms, DB Co shall deliver all records that DB Co retains and maintains pursuant to this Schedule 26 to City in the manner and to the location that City shall reasonably specify. City shall make available to DB Co all the records DB Co delivers pursuant to this Section 1.8 subject to prior reasonable notice. DB Co may deliver true copies of original records required by:
- (a) statute to remain with DB Co;
 - (b) DB Co in connection with its fulfilment of any outstanding obligations under this Project Agreement; or
 - (c) DB Co in connection with its fulfilment of any outstanding obligations under the Lending Agreements.
- 1.9** Where the termination of this Project Agreement arises:
- (a) as a result of a City Event of Default or pursuant to Section 36.3 of the Project Agreement, then the costs of delivering the records and the costs for retaining such records in safe storage will be borne by City; or
 - (b) for any other cause, then the costs of delivering the records and the costs for retaining such records in safe storage for a period of at least six years following the Final Completion Date or the Termination Date, as applicable (unless a longer period is required by Applicable Law), shall be borne by DB Co.

1.10 Within 30 days after the end of each calendar year (or partial year for the first and last year) of the Project Term, DB Co shall deliver to City a report, as reasonably requested by City in connection with City's financial reporting, detailing to the best of DB Co's knowledge at the time of any such report any and all liabilities, claims and demands, including contingent liabilities, claims and demands, that DB Co has or may have against City or that may be owing by City to DB Co. The Parties acknowledge and agree that the contents of any such report or the failure to mention any matter in any such report shall not limit either Party's rights or remedies against the other Party as contemplated by this Project Agreement.

1.11 DB Co shall provide to the City:

- (a) as soon as available and, in any event, within 60 days after the end of the first three fiscal quarters in each fiscal year, the unaudited consolidated financial statements of DB Co, including an unaudited balance sheet and an unaudited statement of income, for each such fiscal quarter, all prepared in accordance with the Applicable Accounting Standards (as defined in the Lending Agreement); and
- (b) as soon as available and, in any event, no more than 120 days after the end of each fiscal year, the annual audited financial statements of DB Co, prepared in accordance with the Applicable Accounting Standards (of the relevant jurisdiction in which the statements are produced) applied on a basis consistent with that of the preceding year,

and all of which documents, whether or not marked or identified as confidential or proprietary but subject to the exceptions contained in Section 42 of the Project Agreement, shall be treated by the City as Confidential Information of DB Co.

2 Records To Be Kept

2.1 Without limiting any other requirement of this Project Agreement, DB Co shall prepare, retain and maintain at its own expense:

- (a) the Project Agreement and the Project Documents, including all amendments to such agreements;
- (b) all records relating to the appointment and replacement of the City Representative and the DB Co Representative;
- (c) any documents, drawings (including, without limitation, the As-Built Drawings) or submissions in accordance with Schedule 10 - Review Procedure;
- (d) any documents relating to Development Approvals and other DB Co Permits, Licences, Approvals and Agreements, including any refusals and appeals relating to any applications;
- (e) all records relating to any statutory inspections of the Project or the Site, including any roadways;
- (f) a complete record of construction, including:

- (i) Construction Access Management Plan and all sub-plans;
 - (ii) Traffic and Transit Management Plans and all sub-plans;
 - (iii) all records generated by the Geotechnical Instrumentation and Monitoring Plan (as described in Schedule 15 – Output Specifications), including (but not limited to) baseline readings, routine monitoring records, and tunnel construction monitoring records;
 - (iv) records of all pre-construction inspections and post-construction inspections (as described in Schedule 15 – Output Specifications), including a log identifying corrective actions;
 - (v) records of all geotechnical and environmental investigations performed by DB Co (as described in Schedule 15 – Output Specifications), including (but not limited to) records pertaining to the decommissioning of any monitoring wells and the location of any well casings;
 - (vi) Works progress photography;
 - (vii) construction notices or other communications with adjacent businesses, property owners or tenants;
 - (viii) planned and unplanned interruptions of Utility Infrastructure;
 - (ix) a complaints log including responses and any corrective action; and
 - (x) any other items as requested by the City from time to time.
- (g) any notices, reports, results and certificates relating to Substantial Completion and Final Completion and completion of the DB Co Commissioning;
- (h) all operation and maintenance manuals;
- (i) any documents relating to events of Force Majeure, Delay Events, Compensation Events, and Relief Events;
- (j) all documents submitted in accordance with Schedule 22 - Variation Procedure;
- (k) any documents related to decisions resulting from the Dispute Resolution Procedure;
- (l) any documents related to a DB Co Change in Ownership or Change in Control;
- (m) any documents relating to any Refinancing;
- (n) all accounts for Taxes and transactions relating to Taxes, including in relation to HST applicable to the Project, but excluding any records for:
- (i) DB Co's liabilities or payments under the *Income Tax Act* (Canada), the *Income Tax Act* (Ontario) or any similar statute in any other jurisdiction;

- (ii) DB Co's liabilities or payments for capital taxes based on or measured by the capital of DB Co;
 - (iii) the withholdings of any payments by DB Co; or
 - (iv) any business or activity in addition to the business or activities related to, and conducted for, the purpose of the Project;
- (o) the financial accounts of DB Co referred to in Section 1.11 above;
- (p) [not used];
- (q) all records required by Applicable Law (including in relation to health and safety matters) to be maintained by DB Co with respect to the Works;
- (r) any documents relating to insurance and insurance claims;
- (s) all Jointly Developed Materials; and
- (t) all other records, documents, information, notices or certificates expressly required to be produced or maintained by DB Co pursuant to this Project Agreement.

2.2 Either Party may review the documents required to be prepared, retained and maintained by DB Co pursuant to Section 2.1.

SCHEDULE 27
DISPUTE RESOLUTION PROCEDURE

1 General

- 1.1 All disputes, controversies, or claims arising out of or relating to any provision of this Project Agreement, or the alleged wrongful exercise or failure to exercise by a Party of a discretion or power given to that Party under this Project Agreement, or the interpretation, enforceability, performance, breach, termination, or validity of this Project Agreement, including, without limitation, this Schedule 27, or any matter referred to for resolution pursuant to this Schedule 27 (collectively and individually, a “**Dispute**”) shall be resolved in accordance with the provisions of this Schedule 27.
- 1.2 The Parties agree that at all times each of them will make bona fide efforts to:
- (a) resolve by amicable negotiations any and all Disputes arising between them on a without prejudice basis; and
 - (b) have all Disputes resolved at the lowest level of management before engaging the dispute resolution processes described in Sections 2 to 9 of this Schedule 27.
- 1.3 If the Parties are unable to resolve a Dispute at the lowest level of management pursuant to Section 1.2(b) of this Schedule 27, either Party may deliver to the City Representative or the DB Co Representative, as applicable, a written notice of dispute (the “**Notice of Dispute**”), which Notice of Dispute shall, subject to the terms of this Schedule 27 requiring resolution of a Dispute pursuant to a specific dispute resolution process set forth in this Schedule 27, initiate the dispute resolution process described in Sections 2 to 9 of this Schedule 27, as applicable, as more particularly described in this Schedule 27. To be effective, the Notice of Dispute must expressly state that it is a notice of dispute, set out the particulars of the matter in dispute, describe the remedy or resolution sought by the Party issuing the Notice of Dispute and be signed by the City Representative, if given by City, or by the DB Co Representative, if given by DB Co.
- 1.4 In the event of a Dispute in respect of any Critical Item set out in Section 12 of this Schedule 27, the provisions of that Section 12 shall solely govern the resolution of such Dispute and, except as set forth in Section 12.3 of this Schedule 27, the provisions of Sections 1.2 and 2 to 9 of this Schedule 27 shall not apply.

2 Amicable Resolution by Party Representatives

- 2.1 On receipt of a Notice of Dispute, the City Representative and the DB Co Representative (collectively “**Party Representatives**” and individually “**Party Representative**”) shall each promptly and diligently make all reasonable bona fide efforts to resolve the Dispute. Each Party Representative shall provide to the other, on a without prejudice basis, frank, candid and timely disclosure of relevant facts, information and documents (except such documentation that is subject to legal privilege) as may be required or reasonably requested by the other to facilitate the resolution of the Dispute.

3 Amicable Resolution by Senior Officers of each Party

- 3.1 If, following the process referred to in Section 2 of this Schedule 27 (or as otherwise agreed to in writing by the Parties pursuant to Section 13.6 of this Schedule 27), a Dispute is not resolved by

the Party Representatives within 10 Business Days after receipt by a Party of the applicable Notice of Dispute, or within such longer period of time as the Party Representatives may both expressly agree, then at any time after the expiry of such period of time either Party Representative may, by notice in writing to the other, refer the Dispute to an executive of a Party who:

- (a) is in a position of authority above that of the City Representative or the DB Co Representative, as the case may be; and
- (b) subject only to approval of the board of directors or similar governing body of the Party, has full authority to resolve and settle the Dispute.

3.2 Once a Dispute is referred to them, the executive of each Party shall promptly and diligently make all reasonable bona fide efforts to resolve the Dispute. All discussions and negotiations, and all documents exchanged, between them related to the Dispute shall be on a without prejudice basis to facilitate the resolution of the Dispute.

4 Independent Certifier

4.1 This Section 4 applies to all Disputes that fall within the description of Section 4.2 of this Schedule 27, if the Parties fail to resolve any Dispute through the process referred to in Sections 2 and 3 of this Schedule 27 within 15 Business Days following referral of the Dispute to an executive in accordance with Section 3.1 (or such other period as may be agreed or expressly stipulated in respect of the relevant matter), or as otherwise agreed to in writing by the Parties pursuant to Section 13.6 of this Schedule 27.

4.2 All Disputes (other than Systems Integration Disputes which shall be resolved in accordance with Section 5 below) related to the Works and that:

- (a) arise prior to, or otherwise in relation to, East Substantial Completion or West Substantial Completion;
- (b) relate to completion of Minor Deficiencies;
- (c) relate to whether any proposed work constitutes a Variation;
- (d) relate to a review of Estimates or any other matters relating to Variations as the Independent Certifier is entitled to review and determine pursuant to Section 31 of the Project Agreement and Schedule 22 - Variations;
- (e) are referred to in this Project Agreement for determination by the Independent Certifier; or
- (f) relate to the Certification Services or any Certification Service Variations (as those terms are defined in the Independent Certifier Agreement);

shall initially be submitted to the Independent Certifier for independent determination by the Independent Certifier within such period as may be specified in this Project Agreement, or if no period is specified, within 10 Business Days after submission to the Independent Certifier.

- 4.3 Without limiting any obligations of the Parties under the Independent Certifier Agreement, the Parties shall cooperate with the Independent Certifier and provide such information, records and documents as may be required by the Independent Certifier to make the determination within the period referred to in Section 4.2 of this Schedule 27.
- 4.4 The Independent Certifier's decision to issue or not to issue a Substantial Completion Certificate shall be final and binding on the Parties solely in respect of determining a Substantial Completion Payment Date, and a Dispute in relation to a Substantial Completion Payment Date shall not be subject to resolution pursuant to this Schedule 27. Save and except as aforesaid, the Independent Certifier's determinations are not binding on the Parties, and all Disputes in relation to the Independent Certifier's decisions shall be resolved pursuant to this Schedule 27, provided however that Section 6 of this Schedule 27 shall not apply unless otherwise agreed by the Parties on terms acceptable to the Parties.

5 System Integration Verifier

- 5.1 This Section 5 applies to all Systems Integration Disputes, if the Parties fail to resolve such Systems Integration Dispute through the process referred to in Sections 2 and 3 of this Schedule 27 within 15 Business Days following referral of the Dispute to an executive in accordance with Section 3.1 (or such other period as may be agreed or expressly stipulated in respect of the relevant matter), or as otherwise agreed to in writing by the Parties pursuant to Section 13.6 of this Schedule 27.
- 5.2 All Systems Integration Disputes shall initially be submitted to the Systems Integration Verifier for independent determination by the Systems Integration Verifier within 10 Business Days after submission to the Systems Integration Verifier, or such other period of time as may be agreed by the Parties, acting reasonably.
- 5.3 The Parties shall cooperate with the Systems Integration Verifier and provide such information, records and documents as may be required by the Systems Integration Verifier to make the determination within the period referred to in Section 5.2 of this Schedule 27.
- 5.4 Where it is determined by the Systems Integration Verifier that:
- (a) corrective measures must be taken by DB Co to resolve a Systems Integration Dispute, those measures must be implemented by DB Co as soon as reasonably practical, without payment by the City unless (i) the Systems Integration Verifier determines otherwise; or (ii) that determination is subsequently reversed by a binding and final determination made in a subsequent proceeding;
 - (b) corrective measures are not required to be taken by DB Co to resolve a Systems Integration Dispute, the City may, at its option, require corrective measures to be taken forthwith by DB Co, in which case those measures must be implemented by DB Co as soon as reasonably practical provided that the City undertakes to pay DB Co for Direct Costs, plus reasonable overhead and profit incurred by DB Co as such costs are so incurred; provided that no such costs should exceed the amount DB Co is entitled to receive pursuant to Schedule 22 – Variation Procedure thereby incurred upon completion of those corrective measures, but any such undertaking and payment shall be without prejudice to the City's right to contest the determination made by the Systems Integration Verifier in a subsequent proceeding. The City shall provide DB Co such reasonable

extensions of time in respect of DB Co's obligations under this Project Agreement necessary to allow DB Co to effect the corrective measures and such extension of time may be treated as a Delay Event if so determined by the Independent Certifier with input from the Systems Integration Verifier.

- 5.5 The Systems Integration Verifier's determinations are not binding on the Parties, and all Disputes in relation to the Systems Integration Verifier's determinations shall be resolved pursuant to this Schedule 27, provided however that Section 6 of this Schedule 27 shall not apply unless otherwise agreed by the Parties on terms acceptable to the Parties.

6 Adjudication

- 6.1 If the Parties fail to resolve any Dispute through the process referred to in Sections 2 and 3 of this Schedule 27 within 15 Business Days following referral of the Dispute to an executive in accordance with Section 3.1 (or such other period as may be agreed or expressly stipulated in respect of the relevant matter) and it is not a Dispute referred to in Section 4.2 of this Schedule 27, a Systems Integration Dispute, or a Dispute referred to arbitration or litigation pursuant this Schedule 27 (except as otherwise agreed to in writing by the Parties pursuant to Section 13.6 of this Schedule 27), either Party may, by written notice signed by their Party Representative and delivered to the other Party Representative, refer the Dispute to an adjudicator selected in accordance with Section 6.2 of this Schedule 27 (the "**Adjudicator**").
- 6.2 The Adjudicator nominated by the Party issuing the Notice of Dispute shall be agreed between the Parties within 5 Business Days after delivery of the notice requiring that the Dispute be resolved by an Adjudicator or, failing agreement within such 5 Business Days, either Party shall apply to the Ontario Superior Court of Justice for appointment of the Adjudicator, in which case the court shall appoint the Adjudicator at the earliest opportunity from the list of potential Adjudicators submitted by the Parties or, if either or both Parties fail to submit their list of potential Adjudicators within 7 Business Days, the court may appoint any person as the Adjudicator who meets the requirements set out in this Schedule 27 for qualifications and experience of the Adjudicator pursuant to the *Arbitration Act* (Ontario) as if the adjudicator was an arbitrator under the *Arbitration Act* (Ontario). The Adjudicator shall:
- (a) be independent of and at arm's length to DB Co, City, any Government Entity, RTG, and RTG Party, the Lenders and any other person having an interest in the Project or any of the Contract Documents;
 - (b) if the Dispute arises during the life of the Project Agreement, be familiar with design and construction of a project similar to the Project; and
 - (c) be a person who has the qualifications and experience with respect to the particular issues in Dispute.
- 6.3 The Adjudicator shall resolve the Dispute in accordance with the United Kingdom Construction Industry Council's *Model Adjudication Procedure: Fourth Edition* (the "**Model Adjudication Procedure**") the terms of which are incorporated herein by reference, subject to the following modifications:
- (a) notwithstanding paragraph 14 of the *Model Adjudication Procedure*, within 7 Business Days of appointment in relation to a particular Dispute, the Adjudicator shall require the Parties to submit in writing their respective arguments; provided that, where necessary,

the onus of proving that the Project was designed and constructed in accordance with all relevant specifications and requirements set forth in the Project Agreement is on DB Co. The Adjudicator shall, in his absolute discretion, determine the procedure of the adjudication proceedings including without limitation, whether a hearing is necessary in order to resolve the Dispute;

- (b) notwithstanding paragraphs 16 and 24 of the *Model Adjudication Procedure*, in any event, and subject to Section 6.4 of this Schedule 27, the Adjudicator shall provide to both Parties his written decision on the Dispute, within 10 Business Days of appointment (or within such other period as the Parties may agree after the reference). The Adjudicator shall give detailed reasons for the Adjudicator's decision. The Adjudicator shall be entitled to award compensation to a Party and shall be entitled to state the relief for such Party, which may include deeming the occurrence of any Relief Event, Delay Event and/or Compensation Event. Unless otherwise provided for in this Schedule 27, the Adjudicator's decision shall be binding on the Parties, but not final;
- (c) notwithstanding paragraphs 29 and 30 of the *Model Adjudication Procedure*, the Adjudicator's costs, including any legal fees, of any reference shall be borne as the Adjudicator shall specify or in default, equally by the Parties. In no circumstances shall the Adjudicator be entitled to order a successful or partially successful Party in an adjudication to pay more than one half of the Adjudicator's fees. Each Party shall bear its own costs arising out of the reference, including legal costs and the costs and expenses of any witnesses;
- (d) the Adjudicator shall be deemed not to be an arbitrator but shall render his decision as an expert and the provisions of the *Arbitration Act, 1991* (Ontario) and the law relating to arbitration shall not apply to the Adjudicator (other than as set out in Section 6.2) or his determination or the procedure by which he reached his determination;
- (e) notwithstanding paragraph 26 of the *Model Adjudication Procedure*, the Adjudicator shall act impartially and may take the initiative in ascertaining the facts and the law. Unless otherwise expressly provided in this Project Agreement, the Adjudicator shall have the power to open up, review and revise any opinion, certificate, instruction, determination or decision of whatever nature given under this Project Agreement. For greater certainty, the Independent Certifier's decision to issue or not to issue a Substantial Completion Certificate shall be final and binding solely in respect of determining a Substantial Completion Payment Date, and a Dispute in relation to a Substantial Completion Payment Date shall not be subject to resolution pursuant to this Schedule 27;
- (f) the Adjudicator shall execute a non-disclosure agreement (the "**Non-Disclosure Agreement**") in a form satisfactory to the Parties, providing that, among other things, all information, data and documentation disclosed or delivered by a Party to the Adjudicator in consequence of or in connection with his appointment as the Adjudicator shall be treated as confidential and without prejudice to any potential litigation proceedings. The Adjudicator shall not, save except as expressly permitted by the Non-Disclosure Agreement, disclose to any person any such information, data or documentation, and all such information, data or documentation shall remain the property of the Party disclosing or delivering the same and all copies shall be returned to such Party on completion of the Adjudicator's mandate with respect to the Dispute; and

- (g) notwithstanding paragraph 34 of the *Model Adjudication Procedure*, the Adjudicator shall not be liable for anything done or omitted to be done in the discharge or purported discharge of his functions as Adjudicator unless the act or omission is in bad faith. Any employee or agent of the Adjudicator is similarly protected from liability.

6.4 Where it is determined by the Adjudicator that:

- (a) corrective measures must be taken by DB Co to resolve a Dispute, those measures must be implemented by DB Co as soon as reasonably practical, without payment by City unless (i) the Adjudicator determines otherwise; or (ii) that determination is subsequently reversed by a binding and final determination made in a court proceeding;
- (b) corrective measures are not required to be taken by DB Co to resolve a Dispute, City may, at its option, require corrective measures to be taken forthwith by DB Co, in which case those measures must be implemented by DB Co as soon as reasonably practical provided that City undertakes to pay DB Co for Direct Costs, plus reasonable overhead and profit incurred by DB Co as such costs are so incurred; provided that no such costs should exceed the amount DB Co is entitled to receive pursuant to Schedule 22 – Variation Procedure thereby incurred upon completion of those corrective measures, but any such undertaking and payment shall be without prejudice to City's right to contest the determination made by the Adjudicator in a subsequent proceeding. City shall provide DB Co such reasonable extensions of time in respect of DB Co's obligations under this Project Agreement necessary to allow DB Co to effect the corrective measures and such extension of time may be treated as a Delay Event if so determined by the Adjudicator.

6.5 Subject to a right to require the Dispute to be arbitrated or litigated pursuant to Sections 7, 8 and 9 of this Schedule 27 by giving the required notices to arbitrate or litigate within the time periods specified therein, the Parties agree that the Adjudicator's determination is final and binding and not subject to appeal, arbitration, litigation or any other dispute resolution process, and both Parties expressly waive all rights of appeal in connection with the Adjudicator's determination.

7 Referral of Disputes to Arbitration or Litigation

7.1 If:

- (a) the amount awarded the Adjudicator pursuant to Section 6 of this Schedule 27 is more than \$[REDACTED] (index linked) in the aggregate or \$[REDACTED] (index linked) in any one year;
- (b) the Dispute involves issues other than monetary claims by one Party against the other Party and which a Party reasonably believes are material and significant to that Party;
- (c) a Notice of Dispute has been issued for a Dispute in relation to the Independent Certifier's decisions for which Section 4.4 of this Schedule 27 provides that Section 6 of this Schedule 27 shall not apply to resolve such Dispute; or
- (d) a Notice of Dispute has been issued for a Systems Integration Dispute in relation to the Systems Integration Verifier's decisions for which Section 5.5 of this Schedule 27 provides that Section 6 of this Schedule 27 shall not apply to resolve such Dispute,

then, subject to the right of a Party to require litigation of the Dispute pursuant to Section 9.1 of this Schedule 27 or a consolidation of proceedings pursuant to Section 11 of this Schedule 27, either Party may, by written notice signed by their Party Representative, request that the Dispute be resolved by arbitration pursuant to Section 8 of this Schedule 27 upon the written consent of the other Party. Such notice will not be effective unless it indicates it is a notice to arbitrate, is signed by the Party Representative and is delivered to the other Party Representative within 15 Business Days after receipt of the Adjudicator's decision or the Notice of Dispute referred to in Section 7.1(c) of this Schedule 27, as applicable, and provided further that such notice expressly identifies the specific Dispute and decision of the Adjudicator, the Independent Certifier, or the Systems Integration Verifier, as applicable, that is to be the subject of the arbitration.

- 7.2 If a Party is entitled to refer a Dispute to which Section 6 of this Schedule 27 apply to arbitration or litigation pursuant to Sections 7.1 or 9.1 of this Schedule 27 then, unless the Parties otherwise expressly agree in writing, all information, documents and submissions prepared by a Party for the Adjudicator which are not business records that would otherwise be kept in the normal course of business by the Party for its business purposes, and all decisions and determinations by the Adjudicator, shall be confidential and inadmissible in any arbitration or litigation proceeding. For greater certainty, the Adjudicator shall not be called as a witness by either party in any arbitration or litigation proceeding.

8 Resolution by Arbitration

- 8.1 Upon the mutual written consent of the parties,

- (a) where the Parties fail to resolve a Dispute through the process set out in Sections 2, 3, 4, 5 and 6 (to the extent required) of this Schedule 27, and
- (b) all other requirements set out in this Schedule 27 have been satisfied,

such Dispute may be referred to arbitration in accordance with the *Arbitration Act, 1991* (Ontario) and this Section.

- 8.2 Disputes referred to arbitration shall be resolved by a single arbitrator unless one of the Parties, by notice in writing delivered to the other Party within 5 Business Days after a notice to arbitrate pursuant to Section 7.1 of this Schedule 27 has been delivered, expressly requires that the Dispute that is the subject of that notice to arbitrate be resolved by a three person arbitration tribunal, in which case that particular Dispute shall be resolved by a three person arbitration tribunal.

- 8.3 If the arbitration tribunal is comprised of a single arbitrator, the arbitrator shall be appointed as follows:

- (a) if the Parties agree on the arbitrator, the Parties shall jointly appoint the arbitrator as soon as possible and in any event within 5 Business Days after delivery of the notice to arbitrate pursuant to Section 7 of this Schedule 27; and
- (b) if the Parties fail to agree or jointly appoint the arbitrator within such 5 Business Day period, either Party may apply to the Ontario Superior Court of Justice for appointment of the arbitrator, in which case the court shall appoint the arbitrator at the earliest opportunity in accordance with the following:

- (i) from the lists of potential arbitrators submitted to the court by the Parties, provided that potential arbitrators meeting the necessary qualifications and experience set out in this Schedule 27 are on the list; or
- (ii) if one Party fails to submit its list of potential arbitrators to the court within 5 Business Days of a request from the court to submit a list, from the list submitted by the other Party provided that potential arbitrators meeting the necessary qualifications and experience set out in this Schedule 27 are on the list of that other Party; or
- (iii) if no list is submitted by either Party, or if the list or lists submitted do not include potential arbitrators with the necessary qualifications and experience, the court shall be entitled at its sole discretion to appoint anyone who meets the requirements set out in this Schedule 27 for the qualifications and experience of the arbitrator.

8.4 If the arbitration tribunal is comprised of three arbitrators:

- (a) the arbitrators shall be appointed as follows:
 - (i) each Party shall appoint one arbitrator no later than 5 Business Days after delivery of the notice to arbitrate pursuant to Section 7 of this Schedule 27;
 - (ii) if a Party fails to appoint an arbitrator within 5 Business Days after delivery of the notice to arbitrate, the other Party is entitled to apply to the Ontario Superior Court of Justice to appoint that arbitrator, in which case the court shall appoint that arbitrator at the earliest opportunity using a comparable process to that described in Section 8.3(b) of this Schedule 27;
 - (iii) the arbitrators appointed in accordance with the foregoing shall, within 5 Business Days after their appointment, jointly appoint a third arbitrator who shall also act as the chair of the arbitration tribunal and who, in addition to all other required qualifications, shall have experience in arbitration or judicial processes and procedures; and
 - (iv) if the two arbitrators appointed by the Parties fail to appoint a third arbitrator within the required time, either of the other two arbitrators may apply to the Ontario Superior Court of Justice for appointment of the third arbitrator, in which case the court shall appoint the third arbitrator at the earliest opportunity using a comparable process to that described in Section 8.3(b) of this Schedule 27; and
- (b) the arbitrators appointed by the Parties shall at all times be neutral and act impartially and shall not act as advocates for the interests of the Party who appointed them.

8.5 All arbitrators must have qualifications and experience relevant to the issues in the Dispute and also have qualifications and experience as arbitrators.

8.6 No one shall be nominated or appointed to act as an arbitrator who is or was in any way interested, financially or otherwise, in the conduct of the Works or in the business affairs of City, DB Co, RTG, any RTG Party or any consultant, subconsultant or subcontractor of any of them.

- 8.7 The arbitrator(s) shall have the jurisdiction and power to:
- (a) amend or vary any and all rules under the *Arbitration Act, 1991* (Ontario), including rules relating to time limits, either by express agreement of the Parties or, failing such agreement, as the arbitrator(s) consider appropriate and necessary in the circumstances to resolve the Dispute and render an award;
 - (b) require some or all of the evidence to be provided by affidavit;
 - (c) hold a hearing at which evidence and submissions are presented by the Parties;
 - (d) direct either or both Parties to prepare and provide the arbitrator(s) with such documents, test results or other things as the arbitrator(s) may require to assist them in the resolution of the Dispute and rendering of an award;
 - (e) require either Party to supply or prepare for examination by the arbitrator(s) and the other Party, any document or information the arbitrator(s) considers necessary;
 - (f) inspect the Works, giving reasonable notice to each Party of the time when, and the place where, the arbitrator(s) intend(s) to conduct any inspections;
 - (g) award any remedy or relief that a court or judge of the Ontario Superior Court of Justice could order or grant subject to and in accordance with this Project Agreement, including, without limitation, interim orders, interim and permanent injunctions, and specific performance; and
 - (h) require either or both Parties to take and provide to the arbitrator(s) such measurements, perform such tests, perform such audits, or take any and all such other measures or steps as the arbitrator(s) consider necessary or desirable to aid them in making a fair and reasonable award.
- 8.8 The place of arbitration shall be Ottawa, Ontario. The language of the arbitration shall be English.
- 8.9 The costs of an arbitration are in the discretion of the arbitrator(s) who, in addition to any jurisdiction and authority under applicable law to award costs, has the jurisdiction and authority to make an order for costs on such basis as the arbitrator(s) considers appropriate in the circumstances, including to award actual legal fees and disbursements and expert witness fees, and to specify or order any or all of the following:
- (a) the Party entitled to costs;
 - (b) the Party who must pay the costs;
 - (c) the amount of the costs or how that amount is to be determined; and
 - (d) how all or part of the costs must be paid.
- 8.10 In exercising discretion to award costs, however, the arbitrator(s) will take into account the desire of the Parties that costs should generally be awarded to each Party in proportion to the relative success that each Party has in the arbitration.

- 8.11 The award of the arbitrator(s) shall be final and binding upon both Parties, and both Parties expressly waive all rights of appeal in connection with the award of the arbitrator(s). Judgment may be entered upon the award in accordance with Applicable Law in any court having jurisdiction.
- 8.12 The Parties agree to and shall co-operate fully with the arbitrator(s) and proceed with the arbitration expeditiously, including in respect of any hearing, in order that an award may be rendered as soon as practicable by the arbitrator(s), given the nature of the Dispute. The arbitrator(s) shall render a decision as soon as possible and, in any event, shall use all reasonable efforts to render a decision no later than 20 Business Days after the date of the hearing, or such longer period of time as agreed to in writing by the Parties. If the arbitration tribunal is comprised of three arbitrators, the decision of a majority of the arbitration tribunal shall be deemed to be the decision of the arbitration tribunal, and where there is no majority decision, the decision of the chair of the arbitration tribunal shall be deemed to be the decision of the arbitration tribunal.
- 8.13 This Project Agreement, including this Schedule 27, constitutes an agreement to arbitrate that shall be specifically enforceable.
- 8.14 Any arbitrator appointed pursuant to this Section 8 of this Schedule 27 shall keep all information about the Dispute confidential and shall not disclose such information to anyone other than the Parties.

9 Litigation

- 9.1 Notwithstanding that a notice to arbitrate has been delivered pursuant to Section 7.1 of this Schedule 27, following receipt of the Adjudicator's award or determination pursuant to Section 6 of this Schedule 27, or if applicable a Notice of Dispute has been issued following receipt of a decision of the Independent Certifier if the Dispute is a Dispute in relation to the Independent Certifier's decisions for which Section 4.4 of this Schedule 27 provides that Section 6 of this Schedule 27 shall not apply, or if applicable a Notice of Dispute has been issued following receipt of a determination of the Systems Integration Verifier if the Dispute is a Systems Integration Dispute in relation to the Systems Integration Verifier's determination for which Section 5.5 of this Schedule 27 provides that Section 6 of this Schedule 27 shall not apply, if one or more of the following apply then either Party may elect, by written notice signed by their Party Representative, to require that the Dispute be referred to and resolved solely by litigation in the Ontario Superior Court of Justice, and both Parties agree to attorn to the exclusive jurisdiction of the courts of the Province of Ontario in respect of the Dispute:
- (a) if the actual or potential total value or amount at issue in the Dispute (as determined by adding all claims and counterclaims) is more than \$[REDACTED] (index linked) in the aggregate or \$[REDACTED] (index linked) in any one year; or
 - (b) if the Dispute is considered by City to involve material issues of public health or safety.

Such notice will not be effective unless it indicates it is a notice to submit the Dispute to litigation, is signed by the Party Representative and is delivered to the other Party Representative within 15 Business Days after receipt of the Adjudicator's determination, or the Notice of Dispute referred to in Section 7.1(c) or (d) of this Schedule 27, as applicable, and provided further that such notice expressly identifies the specific Dispute and determination of the Adjudicator,

Independent Certifier, or Systems Integration Verifier, as applicable, that is to be the subject of the litigation.

9.2 If neither Party delivers a notice of election to resolve a particular Dispute by litigation in the manner and within the time specified in Section 9.1 of this Schedule 27, then:

(a) provided that one Party has, in the manner and within the time period specified in Section 7.1 of this Schedule 27, given notice to the other Party of election to resolve that Dispute by arbitration, and subject to a consolidation of proceedings pursuant to Section 11 of this Schedule 27, that Dispute shall be resolved only by arbitration pursuant to Sections 8.2 to 8.14 of this Schedule 27; and

(b) **[Intentionally Deleted].**

9.3 **[Intentionally Deleted].**

10 Consolidation of Project Agreement Adjudication, Arbitration and Litigation

10.1 For all Disputes that arise prior to East Substantial Completion, unless:

- (a) both Parties otherwise agree; or
- (b) the issue in a particular Dispute arises in connection with the Review Procedure; or
- (c) the issue in a particular Dispute is such that waiting until after East Substantial Completion to resolve that Dispute will cause irreparable harm to one of the Parties; or
- (d) the issue in a particular Dispute arises in connection with requirements of achieving or deficiencies in not achieving East Substantial Completion; or
- (e) in respect to a particular Dispute, the Dispute is consolidated with Third Party Arbitration or Third Party Litigation (as hereinafter defined) pursuant to Section 11 of this Schedule 27;

all adjudication, arbitral and litigation proceedings between the Parties prior to East Substantial Completion with respect to the East Works shall be stayed and consolidated into, as applicable, a single adjudication, arbitration and a single litigation proceeding, with the adjudication, arbitration and, if applicable, litigation, proceeding promptly and expeditiously after East Substantial Completion.

10.2 For all Disputes that arise prior to West Substantial Completion, unless:

- (a) both Parties otherwise agree; or
- (b) the issue in a particular Dispute arises in connection with the Review Procedure; or
- (c) the issue in a particular Dispute is such that waiting until after West Substantial Completion to resolve that Dispute will cause irreparable harm to one of the Parties; or
- (d) the issue in a particular Dispute arises in connection with requirements of achieving or deficiencies in not achieving West Substantial Completion; or

- (e) in respect to a particular Dispute, the Dispute is consolidated with Third Party Arbitration or Third Party Litigation (as hereinafter defined) pursuant to Section 11 of this Schedule 27;

all adjudication, arbitral and litigation proceedings between the Parties prior to West Substantial Completion with respect to the West Works shall be stayed and consolidated into, as applicable, a single adjudication, arbitration and a single litigation proceeding, with the adjudication, arbitration and, if applicable, litigation, proceeding promptly and expeditiously after West Substantial Completion.

11 Consolidation with Third Party Disputes

- 11.1 Subject to Section 11.4 of this Schedule 27, if either Party is involved in an arbitration in the Province of Ontario with a third party (“**Third Party Arbitration**”), and if such Third Party Arbitration involves common factual or legal issues (including common issues of damages) which are also the subject of a Dispute between the Parties for which a Notice of Dispute has been given, then any arbitration of the Dispute between the Parties which includes those common factual, legal or damages issues (“**Project Agreement Arbitration**”) shall be stayed, consolidated or joined with the Third Party Arbitration(s) but only if City, DB Co and the other Parties all agree or, failing their agreement, if a court in the Province of Ontario on application considers it just and convenient in all the circumstances that the Project Agreement Arbitration should be stayed or consolidated or joined with the Third Party Arbitration.

- 11.2 Subject to Section 11.4 of this Schedule 27, if either Party is involved in litigation in the Province of Ontario with a third party (“**Third Party Litigation**”) and if:

- (a) such Third Party Litigation involves common factual or legal issues (including common issues of damages) which are the subject of a Project Agreement Arbitration; and
- (b) one of the Parties is brought directly into the Third Party Litigation as a Party to that litigation,

then on the application of either Party to the court in the Province of Ontario having jurisdiction the court may, if it determines that it is just and convenient in all the circumstances, order a stay of either or both the Project Agreement Arbitration proceeding and Third Party Litigation, or order a joinder of the Project Agreement Arbitration and the Third Party Litigation. If such joinder is ordered, the Project Agreement Arbitration and the Third Party Litigation ordered to be joined by the court shall be determined by that court or by another court in Ontario such that the Project Agreement Arbitration and the Third Party Litigation shall be resolved in one forum. For purposes of the foregoing, joinder of the Project Agreement Arbitration and the Third Party Litigation shall be construed to include stays and conditional stays of issues in the Project Agreement Arbitration pending the commencement and completion of third party proceedings by one or both of the Parties in the Third Party Litigation.

- 11.3 In considering whether to order a stay, consolidation or joinder of a Project Agreement Arbitration with a Third Party Arbitration or Third Party Litigation, the court will be entitled to give substantial weight to the desire by the Parties that all Disputes which are related to Third Party Arbitration or Third Party Litigation be resolved in a single forum to avoid multiplicity of proceedings and the potential for contradictory findings of fact, liability and quantum, and to ensure the arbitrator or court has the advantage of obtaining full evidence and disclosure from the Parties and from the other Parties, as applicable and as required to resolve the Dispute and to

make findings of fact, liability and quantum of damages and awards or judgments binding on the Parties based on all available evidence.

11.4 Sections 11.1 and 11.2 of this Schedule 27 only apply:

- (a) if the Dispute between the Parties includes a claim by one Party against the other for contribution or indemnity for that Party's liability or potential liability to the third party where such liability results or will result from an award in the Third Party Arbitration or a judgment in the Third Party Litigation; and
- (b) to those specific issues that are common issues in the Project Agreement Arbitration, the Third Party Arbitration and the Third Party Litigation, such that all other issues in the Dispute shall continue to be resolved by Project Agreement Arbitration and shall not be consolidated with the Third Party Arbitration or Third Party Litigation.

12 Critical Items

12.1 In the event that a Dispute relates to one or more of the following elements, features or aspects of the Project (the "**Critical Items**"):

- (a) **[Not Applicable]**.

the effect of which is likely to materially impede the proper and timely completion of the Works, such Dispute shall be resolved in accordance with Section 12.2 of this Schedule 27.

12.2 Any Dispute with respect to any Critical Item shall be resolved in an expeditious manner and shall not be subject to the Dispute Resolution Procedure set forth in this Schedule 27 and must be resolved to the satisfaction of City and DB Co within two hours of being reported by DB Co or otherwise identified by City. For the purposes of this Section 12, "resolved" means a proposed solution must be agreed between the City Representative and DB Co within that two hour period, including a time frame for implementing a proposed solution. For greater certainty, it is understood that in some cases the nature or extent of a Critical Item may not permit that Critical Item to be solved or otherwise resolved within two hours.

12.3 In the event that:

- (a) there is a Dispute related to a Critical Item that cannot be resolved within the two hours set forth in Section 12.2 of this Schedule 27,
 - (i) as to the existence of a problem or its extent, or
 - (ii) with respect to the proposed solution, or
- (b) there is a Dispute concerning the effectiveness of any solution proposed in respect of a Critical Item

then that Dispute must be resolved by an Adjudicator in accordance with Section 6 of this Schedule 27 within one Business Day of such Adjudicator being asked to undertake such an adjudication. Decisions of the Adjudicator with respect to Disputes relating to Critical Items are final and binding with respect to the action being taken, but not with respect to fault or the cost or timing implications of the matter in dispute. Decisions of the Adjudicator with respect to fault or

the cost or timing implications shall be treated as a Dispute and determined in accordance with the provisions of this Schedule 27.

13 Miscellaneous

- 13.1 DB Co and City shall diligently carry out their respective obligations under this Project Agreement during the pendency of any Disputes, including, without limitation, adjudication proceedings, arbitration proceedings or litigation proceedings. If during the pendency of any Dispute it is considered necessary by either Party to proceed in respect of the matter that is in Dispute, then without prejudice to DB Co's rights in respect of the Dispute (including in respect of Delay Events, Compensation Events and Variations), DB Co shall proceed in accordance with the direction of City, and in the event the matter in dispute is determined in favour of DB Co, proceeding in accordance with City's position shall: (i) subject to and in accordance with Section 32 of this Project Agreement, be treated as a Delay Event; (ii) subject to and in accordance with Section 33 of this Project Agreement, be treated as a Compensation Event; and (iii) subject to and in accordance with Schedule 22 – Variation Procedure, result in a Variation. For greater certainty:
- (a) in respect of any Dispute relating to the Works referred to in Section 4.2 of this Schedule 27, the Independent Certifier shall be the decision maker of first instance and the Parties shall comply with the initial decision of the Independent Certifier unless and until it is overturned in a subsequent arbitration or litigation proceeding; and
 - (b) in respect of any Systems Integration Dispute, the Systems Integration Verifier shall be the decision maker of first instance and the Parties shall comply with the initial decision of the Systems Integration Verifier unless and until it is overturned in a subsequent arbitration or litigation proceeding.
- 13.2 Nothing contained in this Schedule 27 will prevent the Parties from seeking interim protection from the courts of the Province of Ontario, including seeking an interlocutory injunction, if necessary to prevent irreparable harm to a Party.
- 13.3 The Parties shall indemnify each other in respect of any damages suffered or incurred on amounts agreed to be paid pursuant to resolution of a Dispute by the Party Representatives or by the executives of the Parties pursuant to Sections 2 and 3 of this Schedule 27, and on the amount of any award or judgment as follows:
- (a) for amounts payable by DB Co to City, DB Co shall indemnify City as provided for at Section 46.1(e) of this Project Agreement from and against any damages suffered or incurred resulting from any overpayment to DB Co or, as applicable, any underpayment or non-payment by DB Co from the date of any overpayment to DB Co or, as applicable, from the date on which payment was due under this Project Agreement to City until the date of payment; or
 - (b) for amounts payable by City to DB Co, City shall indemnify DB Co as provided for at Section 46.2(c) of this Project Agreement from and against any damages suffered or incurred resulting from any overpayment to City or, as applicable, any underpayment or non-payment by City from the date of any overpayment to City or, as applicable, from the date on which payment was due under this Project Agreement to DB Co until the date of payment.

- 13.4 DB Co shall ensure that any and all documents and other information in the possession or control of any DB Co Party that are available to DB Co and that may be necessary for the resolution of a Dispute on an informed basis by the Party Representatives or by the executives of the Parties pursuant to Sections 2 and 3 of this Schedule 27, or by an expert, the Systems Integration Verifier, an adjudicator, an arbitrator or a court of competent jurisdiction, are made available in a timely manner to City and the City Representative.
- 13.5 City shall ensure that any and all documents and other information in the possession or control of any City Party that are available to City and that may be necessary for the resolution of a Dispute on an informed basis by the Party Representatives or by the executives of the Parties pursuant to Sections 2 and 3 of this Schedule 27, or be an expert, the Systems Integration Verifier, an adjudicator, an arbitrator or court of competent jurisdiction, are made available in a timely manner to DB Co and the DB Co Representative.
- 13.6 The Parties can, by written agreement, on a Dispute by Dispute basis:
- (a) extend any or all timelines set out in this Schedule 27;
 - (b) agree to waive or by-pass any one or more of the Dispute resolution processes in Sections 2, 3, 4, 5 and 6 of this Schedule 27 and, instead, proceed directly to resolution of the Dispute by arbitration or litigation pursuant to Sections 7, 8 and 9 of this Schedule 27;
 - (c) agree to (i) resolve a Dispute by litigation rather than adjudication or arbitration notwithstanding the requirements of Section 6 and Section 8 of this Schedule 27, or (ii) agree to resolve a Dispute by arbitration rather than adjudication or litigation notwithstanding the requirements of Section 6 and Section 9 of this Schedule 27, or (iii) agree to resolve a Dispute by adjudication rather than arbitration or litigation notwithstanding the requirements of Section 8 and Section 9 of this Schedule 27;
 - (d) **[Intentionally Deleted]**; and
 - (e) agree to resolve a Dispute relating to Critical Items by adjudication, arbitration or litigation notwithstanding the requirements of Section 12 of this Schedule 27.
- 13.7 This Schedule 27 shall survive the expiration or termination of this Project Agreement for any reason.

SCHEDULE 28

REFINANCING

1. DEFINITIONS

1.1 In this Schedule 28 – Refinancing, unless the context indicates a contrary intention, terms which are defined in the Project Agreement (and not otherwise defined in this Schedule 28 – Refinancing) shall have meanings given to them in the Project Agreement and the following terms shall have the following meanings:

(a) “**Exempt Refinancing**” means:

- (i) a change in taxation or change in accounting treatment pursuant to a Change in Law or change in Canadian GAAP;
- (ii) the exercise of any right, the grant of any amendment, waiver or consent or any similar action under the Lending Agreements by the Lenders that does not provide for a financial benefit to DB Co under those agreements;
- (iii) any Qualifying Bank Transaction;
- (iv) any Rescue Refinancing;
- (v) any Refinancing that was approved by the City prior to the execution of the Project Agreement and occurs during the first six months following the date of the Project Agreement;
- (vi) any amendment, variation or supplement of any agreement approved by the City as part of any Variation under the Project Agreement; or
- (vii) any Permitted Borrowing.

(b) “**Qualifying Bank**” means a lending institution that is:

- (i) a bank listed in Schedule I, II or III of the *Bank Act* (Canada); or
- (ii) a bank, life insurance company, pension fund or fund managed by a professional fund manager that controls, either directly or through its affiliates, funds in excess of \$[REDACTED],

provided such institution is not a Restricted Person or a person whose standing or activities compromise (i) the City’s reputation or integrity, or (ii) the nature of the public transit system in the City of Toronto or the Province of Ontario so as to affect public confidence in the public transit system in the City of Toronto, the Province of Ontario or the Project.

(c) “**Qualifying Bank Transaction**” means:

- (i) the disposition by a Lender of any of its rights or interests in the Lending Agreements to a Qualifying Bank;

- (ii) the grant by a Lender to a Qualifying Bank of any rights of participation in respect of the Lending Agreements; or
 - (iii) the disposition or grant by a Lender to a Qualifying Bank of any other form of benefit or interest in either the Lending Agreements or the revenues or assets of DB Co, whether by way of security or otherwise.
- (d) **“Qualifying Refinancing”** means any Refinancing that will give rise to a Refinancing Gain that is not an Exempt Refinancing.
- (e) **“Refinancing”** means:
 - (i) any amendment, variation, novation, supplement or replacement of any Lending Agreement;
 - (ii) the exercise of any right, or the grant of any waiver or consent, under any Lending Agreement;
 - (iii) the disposition of any rights or interests in, or the creation of any rights of participation in respect of, the Lending Agreements or the creation or granting of any other form of benefit or interest in either the Lending Agreements or the contracts, revenues or assets of DB Co whether by way of security or otherwise; or
 - (iv) any other arrangement put in place by DB Co or another person which has an effect which is similar to any of the foregoing provisions of this definition above or which has the effect of limiting DB Co’s ability to carry out any of the foregoing provisions of this definition.
- (f) **“Refinancing Financial Model”** means a comprehensive and detailed financial model satisfactory to the City, acting reasonably, prepared for the purpose of Section 2 of this Schedule 28, which financial model shall be similar in form and content to the Financial Model, suitable for the purposes for which it will be used in this Schedule 28, and shall take into account:
 - (i) cash flows for the entire Project Term;
 - (ii) any changes in structure and funding since the date of the Project Agreement;
 - (iii) the performance of the Works to the date of the Refinancing;
 - (iv) macroeconomic assumptions; and
 - (v) all other relevant factorshaving regard to any Exempt Financings previously undertaken in respect of which no Refinancing Gain is payable, and any Qualifying Financings in respect of which a Refinancing Gain has previously been paid.
- (g) **“Refinancing Gain”** means an amount equal to the greater of zero and $(A - B)$, where:

A = the total Cost of the Financing as calculated using the Refinancing Financial Model but without taking into account the effect of the Refinancing.

B = the total Cost of the Financing as calculated using the Refinancing Financial Model and taking into account the effect of the Refinancing.

- (h) “**Rescue Refinancing**” means any Refinancing which takes place due to the failure or prospective failure of DB Co to comply with any material financial obligation under the Lending Agreements, or any of them, which does not increase any liability of the City, whether actual or potential.

2. REFINANCING

2.1 DB Co shall not carry out:

- (a) any Qualifying Refinancing unless DB Co has obtained the prior written consent of the City, subject to Section 2.2; or
- (b) any Exempt Refinancing or any other Refinancing which does not result in a Refinancing Gain unless DB Co has delivered Notice of such Refinancing to the City before five Business Days of such Refinancing, except that such Notice shall not be required for a disposition by a Lender of its rights or participation in the Lending Agreements where such disposition is a trade of bonds issued as provided under a book-based system of a depository and pursuant to a trust indenture that comprises a portion of the Financing.

2.2 The City may withhold its consent to any Qualifying Refinancing, in its sole discretion:

- (a) where any person with whom DB Co proposes to carry out a Qualifying Refinancing is a Restricted Person;
- (b) if, at the time the Qualifying Refinancing is contemplated and effected, the Qualifying Refinancing will materially adversely affect the ability of DB Co to perform its obligations under the Project Documents or the Project Agreement; or
- (c) if, at the time the Qualifying Refinancing is contemplated and effected, the Qualifying Refinancing will have the effect of increasing any liability of the City, whether actual or contingent, present or future, known or unknown.

2.3 The City shall be entitled to receive:

- (a) a [REDACTED]% share of any Refinancing Gain arising from a Qualifying Refinancing, in respect of any Refinancing Gain up to (when considered in aggregate with all previous Qualifying Refinancings) a Refinancing Gain of \$[REDACTED];
- (b) a [REDACTED]% share of any further Refinancing Gain arising from a Qualifying Refinancing, in respect of any Refinancing Gain in excess of \$[REDACTED] and up to (when considered in aggregate with all previous Qualifying Refinancings) a Refinancing Gain of \$[REDACTED]; and
- (c) a [REDACTED]% share of any further Refinancing Gain arising from a Qualifying Refinancing.

- 2.4 DB Co shall promptly provide the City with full details of any proposed Qualifying Refinancing, including a copy of the proposed Refinancing Financial Model and the basis for the assumptions used in the proposed Refinancing Financial Model. The City shall (before, during and at any time after any Refinancing) have unrestricted rights of audit over the Refinancing Financial Model and any documentation (including any aspect of the calculation of the Refinancing Gain) used in connection with such Refinancing (whether or not such Refinancing is determined to be a Qualifying Refinancing). DB Co shall promptly, and, in any event, within five Business Days after receiving a written request from the City, provide any information in relation to a proposed Refinancing as the City may reasonably require. DB Co shall keep the City informed as to any changes to the terms of the Refinancing. Both the City and DB Co shall at all times act in good faith with respect to any Refinancing.
- 2.5 The City's share of the Refinancing Gain shall, subject to prior consent of DB Co, be received as a reduction in the amount of a Substantial Completion Payment and if such consent is not provided, shall be paid to the City from the net proceeds of the Qualifying Refinancing. Notwithstanding the preceding provisions, the City shall have the right to receive its share of the Refinancing Gain by way of a reduction to the latest Substantial Completion Payment irrespective of DB Co's prior consent.
- 2.6 The City and DB Co will negotiate in good faith to agree upon the basis and method of calculation of the Refinancing Gain. If the parties fail to agree upon the basis and method of calculation of the Refinancing Gain or the payment of the City's share, the Dispute shall be determined in accordance with Schedule 27 - Dispute Resolution Procedure. If applicable, both the City and DB Co shall work collaboratively to establish the rate setting process required to complete the Refinancing.
- 2.7 The Refinancing Gain shall be calculated after taking into account the reasonable out-of-pocket costs that each Party directly incurs in relation to the Qualifying Refinancing and on the basis that, within 15 Business Days following any Qualifying Refinancing, DB Co will reimburse the City for all such reasonable out-of-pocket costs incurred by the City.

SCHEDULE 29

FORM OF PERFORMANCE GUARANTEE OF CONSTRUCTION GUARANTOR

THIS GUARANTEE is made as of the [•] day of [•], 20[•]

BETWEEN:

THE CITY OF OTTAWA (“City”)

- AND -

EAST WEST CONNECTORS GP, [REDACTED] (“DB Co”)

- AND -

[•], a corporation incorporated under the laws of [•] (“**Construction Guarantor**”)

WHEREAS:

- A. City and DB Co have entered into a project agreement dated as of the [•] day of [•], 20[•] (which agreement, including the schedules thereto, as the same may be amended, modified, restated, supplemented or replaced, from time to time, is hereinafter called the “**Project Agreement**”).
- B. DB Co and [REDACTED] (“**Construction Contractor**”) have entered into a design and construction contract dated as of the [•] day of [•], 20[•] (which agreement, including the schedules thereto, as the same may be amended, modified, restated, supplemented or replaced, from time to time, is hereinafter called the “**Design and Construction Contract**”), which requires the Construction Guarantor to provide a guarantee of the obligations of Construction Contractor in favor of DB Co.
- C. As an inducement to City to enter the Project Agreement with DB Co, Construction Guarantor has agreed to absolutely, unconditionally and irrevocably guarantee to City, as a direct obligation, the full and prompt performance and observance by Construction Contractor of its obligations in the Design and Construction Contract, and in furtherance thereof has agreed to enter into this Guarantee.
- D. On or about the date hereof, (i) the City, DB Co and [REDACTED], acting as agent for and behalf of the Lenders (the “**Lenders’ Agent**”) intend to enter into a direct lender agreement (the “**Lenders’ Direct Agreement**”) to provide for, inter alia, certain rights in favor of the Lenders’ Agent with respect to the Project Agreement Design, and (ii) the Construction Contractor, the Lenders’ Agent and DB Co intend to enter into a direct lender agreement on or about the date hereof (the “**Construction Contractor Direct Agreement**”) to provide for, inter alia, certain rights in favor of the Lenders’ Agent with respect to the Design and Construction Contract.

NOW THEREFORE IN CONSIDERATION of the mutual covenants and agreements of the parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties covenant and agree as follows:

1. DEFINITIONS AND INTERPRETATION

1.1 Definitions

- (a) Unless otherwise defined herein, all capitalized terms will have the meanings ascribed to them in the Project Agreement.
- (b) Unless otherwise expressly provided herein, this Guarantee shall be interpreted in accordance with Schedule 1 – Definitions and Interpretation of the Project Agreement.
- (c) For the purpose of this Guarantee, the term “**Guaranteed Obligations**” has the meaning given in Section 2.1(a).

1.2 Survival and Term

This Guarantee shall survive the termination or other expiry of the Project Agreement. The obligations under this Guarantee shall commence on Financial Close and the liability of the Guarantor hereunder shall terminate concurrently with the expiration of the Latent Defect Warranty Period, except with respect to any claims existing and for which notice has been given prior to such expiry date, in which case this Guarantee shall not terminate with respect to such claims until such claims have been satisfied in full.

2. GUARANTEE

2.1 Guarantee

- (a) Construction Guarantor does hereby absolutely, unconditionally and irrevocably guarantee jointly to each of City and DB Co (each a “**Guaranteed Party**” and collectively, the “**Guaranteed Parties**”), as a direct obligation, the full and prompt performance and observance by Construction Contractor of each and every covenant, agreement, undertaking and obligation of Construction Contractor contained in the Design and Construction Contract (collectively, the “**Guaranteed Obligations**”),
- (b) Notwithstanding any other provision of this Guarantee:
 - (i) Construction Guarantor’s undertakings and obligations are derivative of and not in excess of Construction Contractor’s obligations under the Design and Construction Contract and Construction Guarantor retains all rights, claims, defences and limitations of liability possessed by Construction Contractor under the terms of the Design and Construction Contract or arising from the parties’ performance or failure to perform thereunder and shall be entitled to assert any contractual defences that would have been available to Construction Contractor, including, for greater certainty, that the alleged non-performance or non-observance by Construction Contractor of the Guaranteed Obligations arises out of or is a result of either a City Event of Default as set out in section 37.1(a) of the Project Agreement or a DB Co event of default under the Design and Construction Contract that is triggered by a City Event of Default; and
 - (ii) in no event shall the aggregate liability of the Construction Guarantor, and any of its affiliates, employees, officers and directors, under this Guarantee exceed an amount equal

to [REDACTED]% of the Contract Price, but this limit of liability shall not extend to interest and enforcement costs payable under this Guarantee.

2.2 General Provisions Relating to the Guarantee

- (a) Each and every default in performance or observance of any of the Guaranteed Obligations by Construction Contractor shall give rise to a separate claim and cause of action hereunder, and separate claims or suits may be made and brought, as the case may be, hereunder as each such default occurs.
- (b) The Guarantee herein provided for shall be a continuing, absolute and unconditional guarantee of performance and observance of the Guaranteed Obligations and shall remain in full force and effect until each and all of the Guaranteed Obligations shall have been fully and satisfactorily discharged in accordance with the terms and provisions of the Design and Construction Contract and Construction Guarantor shall have fully and satisfactorily discharged all of its obligations under this Guarantee.
- (c) The liability of Construction Guarantor hereunder shall remain in full force and effect irrespective of and shall in no way be affected or impaired by (and no notice to Construction Guarantor shall be required in respect of):
 - (i) any compromise, waiver, renewal, extension, indulgence, amendment, addition, deletion, change in, modification of, or release of any security (including any other guarantee, letter of credit or bond) for or in respect of any of the Guaranteed Obligations;
 - (ii) any amalgamation, merger or consolidation of Construction Contractor or Construction Guarantor or any sale, lease or transfer of any of the assets of DB Co or Construction Guarantor;
 - (iii) any Change in Ownership of Construction Contractor or Construction Guarantor;
 - (iv) the termination or other expiry of the Project Agreement or the Design and Construction Contract;
 - (v) any Delay Event (it being acknowledged, however, that the performance of the Guaranteed Obligations shall be extended accordingly);
 - (vi) any change in the financial condition of Construction Contractor or Construction Guarantor;
 - (vii) any DB Co Event of Default described in Section 36.1(a)(i) of the Project Agreement or the equivalent Construction Contractor event of default under the Design and Construction Contract, or any resulting release, stay or discharge of any Guaranteed Obligation;
 - (viii) any lack or limitation of power, incapacity or disability on the part of Construction Contractor or any other irregularity, defect or informality on the part of Construction Contractor with respect to the Guaranteed Obligations;

- (ix) any provision of any laws, statutes, rules or regulations of general application in relation to suretyship or any other circumstance that might constitute, under law generally applicable to suretyship, a defence available to, or a discharge of, Construction Guarantor in respect of the Guaranteed Obligations or this Guarantee;
- (x) the exercise of any rights under the Lending Agreements, including the right of Lenders (A) to cure either: (x) any DB Co Event of Default by or on behalf of DB Co under the Project Agreement or (y) any Construction Contractor event of default by or on behalf of Construction Contractor under the Design and Construction Contractor and/or (B) to assume the obligations of DB Co and complete the Guaranteed Obligations in the manner provided in the Design and Construction Contract;
- (xi) the assignment by City in accordance with the provisions of Section 49.2 of the Project Agreement; or
- (xii) any other occurrence or circumstance whatsoever, whether similar or dissimilar to the foregoing that, under law generally applicable to suretyship, might otherwise constitute a legal or equitable defence or discharge of the liabilities of a guarantor or surety that might otherwise limit recourse against Construction Guarantor.

For the avoidance of doubt, to the extent that the occurrence of any of the circumstances described in Section 2.2(c)(v), Section 2.2(c)(x) or Section 2.2(c)(xi) above results in a modification to the scope or extent of the Guaranteed Obligations, then the Guarantor's obligations under this Guarantee shall apply in relation to the Guaranteed Obligations as so modified.

- (d) The obligations and liabilities of Construction Guarantor hereunder shall not be impaired, diminished, abated or otherwise affected by the commencement by or against Construction Contractor or Construction Guarantor of any proceedings under any bankruptcy or insolvency law or laws relating to the relief of debtors, readjustment of indebtedness, reorganizations, arrangements, compositions or extension or other similar laws.
- (e) The Guaranteed Parties shall not be bound to exhaust their recourse against Construction Contractor or others or any securities or other guarantees either Guaranteed Party may at any time hold before being entitled to performance of the Guaranteed Obligations by the Construction Guarantor and Construction Guarantor renounces all benefits of discussion and division.
- (f) It is the intent and purpose hereof that Construction Guarantor shall not be entitled to and does hereby waive any and all defences which are, under law generally applicable to suretyship, available to a guarantor, sureties and other secondary parties at law or in equity. Without limiting the generality of the foregoing, Construction Guarantor hereby waives notice of acceptance of this Guarantee and of the non-performance by Construction Contractor, diligence, presentment, protest, dishonour, demand for performance from either Guaranteed Party and notice of non-performance or failure to perform on the part of Construction Contractor and all other notices whatsoever. The Guarantee hereunder is a guarantee of performance and compliance. In order to hold Construction Guarantor liable hereunder, there shall be no obligation on the part of either Guaranteed Party at any time to demand or resort for performance to Construction Contractor, its properties or assets or to any security, property or other rights or remedies whatsoever, nor shall there be any requirement that Construction Contractor be joined as a party to any proceeding for the enforcement of any provision of this Guarantee and each Guaranteed Party shall have the

right to enforce the provisions of this Guarantee irrespective of whether or not legal proceedings or other enforcement efforts against Construction Contractor are pending, seeking resort to or realization upon or from any of the foregoing. Without limiting the foregoing, it is understood that repeated and successive demands may be made and recoveries may be had hereunder as and when from time to time, Construction Contractor shall default under or with respect to any of the Guaranteed Obligations, and that, notwithstanding recovery hereunder for or in respect of any such default, the Guarantee herein shall remain in full force and effect unamended and shall apply to each and every subsequent default.

- (g) Without prejudice to and without releasing, discharging, limiting or otherwise affecting in whole or in part the obligations and liabilities of Construction Guarantor under this Guarantee and without in any way requiring the consent of or giving notice to Construction Guarantor, the Guaranteed Parties may grant time, renewals, extensions, indulgences, releases and discharges to and accept compositions from or otherwise deal with Construction Contractor and/or Construction Guarantor or others, including any other guarantor, as the Guaranteed Parties may see fit and the Guaranteed Parties may take, abstain from taking or perfecting, vary, exchange, renew, discharge, give up, realize on or otherwise deal with security and guarantees in such manner as the Guaranteed Parties may see fit.
- (h) Neither an action or proceeding brought under this Guarantee regarding the Guaranteed Obligations nor any judgment or recovery in consequence of that action or proceeding operates as a bar or defence action or defence to any further action that may be brought under this Guarantee. Construction Guarantor acknowledges that, if judgment is granted on an action or proceeding commenced under this Guarantee, the obligations of Construction Guarantor to City do not merge with or end Construction Guarantor's obligations hereunder.
- (i) The liability of Construction Guarantor under this Guarantee shall arise forthwith after demand has been made in writing on Construction Guarantor.

3. REPRESENTATIONS AND WARRANTIES

3.1 Construction Guarantor Representations and Warranties

- (a) Construction Guarantor represents and warrants to City that as of the date of this Guarantee: **[REPRESENTATIONS TO BE UPDATED PER GUARANTOR BASED ON JURISDICTION OF INCORPORATION]**
 - (i) Construction Guarantor is a corporation incorporated and validly existing under the laws of the jurisdiction of its organization, is in good standing with the Ministry of Government and Consumer Services of Ontario with respect to the filing of annual returns, and has all the requisite corporate power and authority to own, lease and operate its properties and assets, to carry on its business as it is currently being conducted, to enter into this Guarantee and the Ancillary Documents to which it is a party and to perform its obligations hereunder and thereunder;
 - (ii) Construction Guarantor has the requisite power, authority and capacity to execute and deliver and perform this Guarantee and the Ancillary Documents to which it is a party, and to do all acts and things, and execute, deliver and perform all other agreements, instruments, undertakings and documents as are required by this Guarantee and the Ancillary Documents to which it is a party to be done, executed, delivered or performed;

- (iii) no steps or proceedings have been taken or are pending to supersede, repeal or amend its constating documents, articles or by-laws or any shareholders agreement in a manner that would materially impair or limit its ability to perform its obligations under this Guarantee or any of the Ancillary Documents to which it is party and such documents and agreements are in full force and effect as of the date hereof;
- (iv) this Guarantee and the Ancillary Documents (when executed and delivered) to which Construction Guarantor is a party, have been duly authorized, executed, and delivered by Construction Guarantor and constitute legal, valid, and binding obligations of Construction Guarantor, enforceable against Construction Guarantor in accordance with their respective terms, subject only to:
 - (A) limitations with respect to the enforcement of remedies by bankruptcy, insolvency, moratorium, winding-up, arrangement, reorganization, fraudulent preference and conveyance and other laws of general application affecting the enforcement of creditors' rights generally; and
 - (B) general equitable principles and the fact that the availability of equitable remedies is in the discretion of a court and that a court may stay proceedings or the execution of judgments;
- (v) the authorization, execution, delivery and performance by Construction Guarantor of this Guarantee and the Ancillary Documents to which it is a party do not violate or conflict with, or constitute a default under:
 - (A) its constating or organizational documents or any unanimous shareholders agreement or similar rights agreement binding on Construction Guarantor;
 - (B) any Applicable Law; or
 - (C) any covenant, contract, instrument, agreement or understanding to which it is a party or by which it or any of its properties or assets is bound or affected;
- (vi) Construction Contractor is **[an indirect wholly-owned subsidiary]** of the Construction Guarantor;

[Note to Proponents: To be updated to reflect DB Co's final structure.]
- (vii) there are, to the knowledge of its senior management, no actions, suits, proceedings, or investigations pending or threatened against Construction Guarantor, at law or in equity, before any Governmental Authority or arbitral body (whether or not covered by insurance) that individually or in the aggregate could result in any material adverse effect on the business, properties, or assets, or the condition, financial or otherwise, of Construction Guarantor or in any impairment of its ability to perform its obligations under this Guarantee or any Ancillary Documents to which it is a party, and Construction Guarantor has no knowledge of any violation or default with respect to any order, writ, injunction or decree of any Governmental Authority or arbitral body that would result in any such material adverse effect or impairment; and
- (viii) Construction Guarantor is able to meet its obligations as they generally become due.

4. NOTICES

4.1 Notices to Parties

All notices, requests, demands, instructions, certificates, consents and other communications (each being a “**Notice**”) required or permitted under this Guarantee shall be in writing (whether or not “written notice” or “notice in writing” is specifically required by the applicable provision of this Guarantee). Notices shall be served by sending the same by registered mail, facsimile or by hand, (in each case, with a copy by electronic transmission) as follows:

If to City:

City of Ottawa
110 Laurier Ave West
Ottawa, Ontario K1P 1J1
Mail code: [REDACTED]

Attention: [REDACTED]
Email: [REDACTED]

If to DB Co:

Attn.: [•]

With a copy to:

[Address]

Fax No.: **[•]**

Attn.: **[•]**

4.2 Facsimile

Where any Notice is provided or submitted to a party via facsimile, an original of the Notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a party's failure to comply with this Section 4.2.

4.3 Change of Address

Any party to this Guarantee may, from time to time, change any of its contact information set forth in Section 4.1 by prior Notice to the other parties, and such change shall be effective on the Business Day that next follows the recipient parties' receipt of such Notice unless a later effective date is given in such Notice.

4.4 Deemed Receipt of Notices

(a) Subject to Sections 4.4(b), (c) and (d):

- (i) a Notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
- (ii) a Notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
- (iii) a Notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.

(b) If the party giving the Notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such Notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Article 4.

(c) If any Notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such Notice shall be deemed to have been received by such recipient on the next Business Day.

(d) A Notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such Notice was successful.

4.5 Service on City

Where any Notice is required to be served on the Guaranteed Parties, the obligation to serve such Notice shall be fulfilled by serving it on the Guaranteed Parties in accordance with the provisions of this Article 4.

5. GENERAL

5.1 Amendments

This Guarantee may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Guarantee.

5.2 No Double Recovery.

5.3 Neither the City, nor DB Co, nor the Lenders' Agent shall be entitled to recover compensation or make a claim pursuant to this Guarantee in respect of any loss that the City, DB Co or the Lenders' Agent has incurred, or any failure to perform on the part of the Construction Contractor or any other guarantor, or in respect of any interest or enforcement costs, in each case to the extent that the City, DB Co or the Lenders' Agent has already been compensated in respect of such loss, failure, interest or enforcement costs (including through insurance proceeds, application of any security held by the City, DB Co or the Lenders' Agent towards satisfaction of the Guaranteed Obligations or from any third party).

5.4 Waiver

- (a) No waiver made or given by a party under or in connection with this Guarantee shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the party giving such waiver, and delivered by such party to the other parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

5.5 Entire Agreement

Except where provided otherwise in this Guarantee, this Guarantee, together with the Project Agreement, and the Ancillary Documents to which it is party, constitute the entire agreement between the parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Guarantee, including the Request for Proposals.

5.6 Severability

Each provision of this Guarantee shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Guarantee is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Guarantee. If any such provision of this Guarantee is invalid, unenforceable or illegal, the parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Guarantee as near as possible to its original intent and effect.

5.7 Enurement

This Guarantee shall enure to the benefit of, and be binding on, the Guaranteed Parties and Construction Guarantor and their respective permitted successors and assigns. DB Co has concurrently with the execution and delivery of this Guarantee assigned to and in favour of the Lenders' Agent, and granted to the Lenders' Agent a security interest in (inter alia), all of its right, title and interest in and to this Guarantee. The Construction Guarantor acknowledges and, to the extent necessary, consents to such grant of a security interest and assignment and any further assignment or novation by the Lenders' Agent to a person who acquires any interest in the Design and Construction Contract from the Lenders' Agent. To the extent not already provided under the Lenders' Construction Contractor Direct Agreement, the Lenders' Agent shall provide notice thereof to the Guarantor. This Guarantee may not be assigned by the Construction Guarantor without the prior written consent of the Guaranteed Parties, such consent not to be unreasonably withheld.

5.8 Acknowledgement of Lenders' Construction Contractor Direct Agreement & Lender's Direct Agreement

The Construction Guarantor acknowledges the provisions of (i) the Lenders' Construction Contractor Agreement and agrees that the Lenders' Agent shall be entitled to the rights of DB Co under this Guarantee when and if the Lenders' Agent enforces the security interest referred to in Section 5.6 and (ii) the Lenders' Direct Agreement pursuant to which the City undertakes to exercise any and all rights it may have under this Guarantee only in accordance with the provisions of the Lenders' Direct Agreement.

5.9 Governing Law and Jurisdiction

- (a) This Guarantee shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) Subject to Section 5.9(c) below, both parties hereby irrevocably attorn to the exclusive jurisdiction of the courts of the Province of Ontario and all courts competent to hear appeals therefrom.
- (c) The Parties agree that the dispute resolution procedure provided for in Schedule 27 – Dispute Resolution Procedure to the Project Agreement shall apply to any dispute under this Guarantee.

5.10 Cumulative Remedies

Except as otherwise set forth in this Guarantee, the rights, powers and remedies of each party set forth in this Guarantee are cumulative and are in addition to and without prejudice to any other right, power or remedy that may be available to such party under this Guarantee or the Project Agreement, or Ancillary Documents.

5.11 Further Assurance

Each party shall do all reasonable things, from time to time, and execute all reasonable further documents necessary to give full effect to this Guarantee.

5.12 Costs

Each party shall be responsible for paying its own costs and expenses incurred in connection with the negotiation, preparation and execution and delivery of this Guarantee.

5.13 Language of Agreement

- (a) Each of the parties acknowledges having requested and being satisfied that this Guarantee and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en déclare satisfaite.
- (b) For greater certainty, all correspondence, notices, drawings, test reports, certificates, specifications, information, operating and maintenance instructions, name plates, identification labels, instructions and notices to the public and staff and all other written, printed or electronically readable matter required in accordance with, or for purposes envisaged by, this Guarantee shall be in English.

5.14 Proof of Authority

The Guaranteed Parties and Construction Guarantor each reserve the right to require any person executing this Guarantee on behalf of another party to provide proof, in a form acceptable to the Guaranteed Parties or Construction Guarantor, as applicable, that they have the requisite authority to execute this Guarantee on behalf of and to bind either Guaranteed Party or Construction Guarantor, as applicable.

5.15 Counterparts

This Guarantee may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by both parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any party providing its signature in faxed form shall promptly forward to the other party an original signed copy of this Guarantee which was so faxed.

5.16 Joint and Several

If Construction Guarantor is comprised of more than one person, then each such person shall be jointly and severally liable for the obligations and liabilities of Construction Guarantor hereunder.

[SIGNATURE PAGES IMMEDIATELY FOLLOW]

IN WITNESS WHEREOF the Parties have executed this Guarantee as of the date first above written.

SCHEDULE 30

INSURANCE TRUST AGREEMENT

THIS AGREEMENT is made as of the 24th day of April, 2019

AMONG:

THE CITY OF OTTAWA

(the “City”)

AND:

[REDACTED]

(the “Lenders’ Agent”)

AND:

EAST WEST CONNECTORS GP, [REDACTED]

(“DB Co”)

AND:

[REDACTED]

(the “Account Trustee”)

WHEREAS:

- (A) The City and DB Co have entered into the Project Agreement.
- (B) The City, the Lenders’ Agent and DB Co have entered into the Lenders’ Direct Agreement.
- (C) The City, the Lenders’ Agent and DB Co have agreed that all amounts from time to time contained in the Insurance Trust Account are to be held in trust by the Account Trustee in accordance with the terms of this Insurance Trust Agreement, and that no releases, distributions or transfers of any funds from the Insurance Trust Account shall be made other than in accordance with the terms of this Insurance Trust Agreement.

NOW THEREFORE in consideration of the mutual covenants and agreements of the Parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties covenant and agree as follows:

1. DEFINITIONS

In this Insurance Trust Agreement, unless the context otherwise requires:

- (a) “**Account Trustee**” has the meaning given on the first page of this Insurance Trust Agreement.
- (b) “**Appointed Representative**” has the meaning given in the Lenders’ Direct Agreement.
- (c) “**Bank**” means [REDACTED].
- (d) “**Business Day**” has the meaning given in the Project Agreement.
- (e) “**Change of Authorization Event**” has the meaning given in Section 8(a)(ii) of this Insurance Trust Agreement.
- (f) “**Change of Authorization Notice**” has the meaning given in Section 8(b)(ii) of this Insurance Trust Agreement.
- (g) “**Default Notice**” means a written notice given by the Lenders’ Agent to the Account Trustee and the City that an event of default under the Lending Agreements has occurred and is continuing.
- (h) “**Default Period**” means the period commencing on the date upon which the Account Trustee and the City receives a Default Notice and ending on the date upon which the Account Trustee and the City receives written notice from the Lenders’ Agent that the event of default which was the subject matter of the applicable Default Notice has been cured.
- (i) “**Governmental Authority**” has the meaning given in the Project Agreement.
- (j) “**Insurance Policies**” has the meaning given in Section 4 of this Insurance Trust Agreement.
- (k) “**Insurance Proceeds**” has the meaning given in Section 5(a) of this Insurance Trust Agreement.
- (l) “**Insurance Trust Account**” means [REDACTED].
- (m) “**Insurance Trust Agreement**” means this Insurance Trust Agreement.
- (n) “**City**” has the meaning given in the Project Agreement.
- (o) “**Lenders**” has the meaning given in the Project Agreement.
- (p) “**Lenders’ Agent**” has the meaning given on the first page of this Insurance Trust Agreement.
- (q) “**Lenders’ Direct Agreement**” means the Lenders’ Direct Agreement made on or about the date hereof between the City, DB Co and the Lenders’ Agent.
- (r) “**Lending Agreements**” has the meaning given in the Project Agreement.
- (s) “**Notice Period**” has the meaning given in the Lenders’ Direct Agreement.

- (t) **“Order”** has the meaning given in Section 7(k) of this Insurance Trust Agreement.
- (u) **“Party”** means any of the City, DB Co, the Lenders’ Agent or the Account Trustee, and **“Parties”** means all of the City, DB Co, the Lenders’ Agent and the Account Trustee.
- (v) **“person”** has the meaning given in the Project Agreement.
- (w) **“Project”** has the meaning given in the Project Agreement.
- (x) **“Project Agreement”** means the project agreement made on or about the date hereof between the City and DB Co.
- (y) **“DB Co”** has the meaning given on the first page of this Insurance Agreement.
- (z) **“DB Co Event of Default”** has the meaning given in the Project Agreement.
- (aa) **“Replacement Project Agreement”** has the meaning given in the Lenders’ Direct Agreement.
- (bb) **“Replacement DB Co”** has the meaning given in the Lenders’ Direct Agreement.
- (cc) **“Step-In Notice”** has the meaning given in the Lenders’ Direct Agreement.
- (dd) **“Step-In Period”** has the meaning given in the Lenders’ Direct Agreement.
- (ee) **“Trust Property”** means all of the property held in trust by the Account Trustee pursuant to this Insurance Trust Agreement, including, without limitation, the Insurance Trust Account, and all amounts from time to time contained therein, the Insurance Policies and the Insurance Proceeds.

2. INTERPRETATION

This Insurance Trust Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings in this Insurance Trust Agreement are for convenience of reference only, shall not constitute a part of this Insurance Trust Agreement, and shall not be taken into consideration in the interpretation of, or affect the meaning of, this Insurance Trust Agreement.
- (b) Unless the context otherwise requires, references to specific Sections, Clauses, Paragraphs, Subparagraphs, and other divisions are references to such Sections, Clauses, Paragraphs, Subparagraphs, or divisions of this Insurance Trust Agreement and the terms **“Section”** and **“Clause”** are used interchangeably and are synonymous.
- (c) Words importing persons or parties are to be broadly interpreted and include an individual, corporation, limited liability company, joint stock company, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.

- (d) Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.
- (e) References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of this Insurance Trust Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- (f) The words in this Insurance Trust Agreement shall bear their natural meaning.
- (g) References containing terms such as:
 - (i) “hereof”, “herein”, “hereto”, “hereinafter”, and other terms of like import are not limited in applicability to the specific provision within which such references are set forth but instead refer to this Insurance Trust Agreement taken as a whole; and
 - (ii) “includes” and “including”, whether or not used with the words “without limitation” or “but not limited to”, shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean “includes without limitation” and “including without limitation”.
- (h) In construing this Insurance Trust Agreement, the rule known as the ejusdem generis rule shall not apply nor shall any similar rule or approach to the construction of this Insurance Trust Agreement and, accordingly, general words introduced or followed by the word “other” or “including” or “in particular” shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (i) Where this Insurance Trust Agreement states that an obligation shall be performed “no later than” or “within” or “by” a stipulated date or event which is a prescribed number of days after a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (j) Where this Insurance Trust Agreement states that an obligation shall be performed “on” a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (k) Any reference to time of day or date means the local time or date in Ottawa, Ontario.
- (l) Unless otherwise indicated, time periods will be strictly construed and time shall be of the essence hereof.
- (m) Whenever the terms “will” or “shall” are used in this Insurance Trust Agreement they shall be construed and interpreted as synonymous and to read “shall”.
- (n) The City, the Lenders’ Agent and DB Co covenant and agree to observe and perform their respective covenants, agreements and obligations under the provisions of the

Lenders' Direct Agreement and further covenant and agree as between them, that if there is any conflict or inconsistency between the provisions of the Lenders' Direct Agreement and this Insurance Trust Agreement, the provisions of the Lenders' Direct Agreement shall govern and prevail to the extent of such conflict or inconsistency.

3. INSURANCE TRUST ACCOUNT

- (a) Prior to the commencement of a Default Period, the Insurance Trust Account and all amounts from time to time contained therein, including interest thereon, shall be held in trust by the Account Trustee for the benefit of DB Co. During a Default Period, the Insurance Trust Account, and all amounts from time to time contained therein, shall be held in trust by the Account Trustee for the benefit of the Lenders' Agent and the Lenders, provided that, upon receipt by the Account Trustee of a Change of Authorization Notice, the Insurance Trust Account, and all amounts from time to time contained therein, shall be held in trust by the Account Trustee for the benefit of the City.
- (b) The Account Trustee shall not distribute or transfer any funds from the Insurance Trust Account other than in accordance with the terms of this Insurance Trust Agreement.
- (c) Notwithstanding any other provision of this Insurance Trust Agreement and subject to Section 3(d), the Lenders' Agent, the City, and DB Co agree that if any of them either receives any Insurance Proceeds from the Insurance Trust Account or has the right to direct the Account Trustee to advance funds in respect of any Insurance Proceeds from the Insurance Trust Account to third parties, such funds shall be directed, used or advanced only for one of the following purposes:
 - (i) the repair, reinstatement, restoration or replacement of the Confederation Line Phase 2 Project or any other assets, materials or goods necessary or desirable for the carrying out of the Works in respect of which such Insurance Proceeds have been paid;
 - (ii) the completion of the Project; or
 - (iii) indemnification for any the City loss for which the subject Insurance Proceeds were paid under the Insurance Policies (as defined below).

For greater certainty, use of any Insurance Proceeds received in respect of a claim by DB Co for delay in start-up, soft costs or business interruption may be applied in accordance with the terms of the Lending Agreements so as to enable DB Co to carry out the Works.

- (d) Notwithstanding anything in this Insurance Trust Agreement, if the City is entitled to indemnification under the Insurance Policies in respect of any loss incurred by the City, such related insurance proceeds are to be paid directly to the City by the Insurer or the Account Trustee and shall not be Insurance Proceeds subject to Section 3(c)(i) or (ii) of this Insurance Trust Agreement. For greater certainty it is understood and agreed that the City shall be required to use such proceeds for carrying out the purposes referred to in Sections 3(c)(i) and (ii) in respect of which such proceeds have been paid.

4. DELIVERY OF ORIGINAL INSURANCE POLICIES

- (a) DB Co shall deliver, or cause to be delivered, to the Account Trustee originals of all property and asset related insurance policies that DB Co is required to maintain under the Project Agreement (collectively, the “Insurance Policies”), and the Account Trustee shall hold the original copy of the Insurance Policies in trust for the benefit of each of the beneficiaries and loss payees, as the case may be, thereunder.

5. INSURANCE PROCEEDS

- (a) Subject to Section 3(d), the Account Trustee shall distribute any proceeds of any Insurance Policy that are paid over to it by any insurer, DB Co, the Lenders’ Agent or the City (the “Insurance Proceeds”) as follows:
 - (i) in the case of any property builders’ risk “All Risk” insurance, boiler and machinery insurance or property insurance policies that DB Co is required to maintain under the Project Agreement:
 - (A) if the Account Trustee has not received a Default Notice and:
 - (1) if the amount of such Insurance Proceeds, together with the aggregate of all Insurance Proceeds in respect of the assets in respect of which such Insurance Proceeds have been paid in the same calendar month, is less than \$[REDACTED], to DB Co to repair, restore or replace the assets in respect of which such Insurance Proceeds have been paid; or
 - (2) if the amount of such Insurance Proceeds, together with the aggregate of all Insurance Proceeds in respect of the assets in respect of which such Insurance Proceeds have been paid in the same calendar month, is equal to or greater than \$[REDACTED], to the Lenders’ Agent to reimburse DB Co for the costs of repairing, restoring or replacing the assets in respect of which such Insurance Proceeds have been paid; or
 - (B) if the Account Trustee has received a Default Notice, to the Insurance Trust Account to be distributed by the Account Trustee in such amounts and to such persons as the Lenders’ Agent may at any time or from time to time direct in writing, provided that, if the Account Trustee has received a Change of Authorization Notice, the Account Trustee shall release such Insurance Proceeds from the Insurance Trust Account in such amounts and to such parties as the City may at any time or from time to time direct in writing, in each case, to repair, restore or replace the assets in respect of which such Insurance Proceeds have been paid.
- (b) The Account Trustee shall distribute any excess Insurance Proceeds remaining after the distributions contemplated in Section 5(a) have been made, including, without limitation, any Insurance Proceeds held in the Insurance Trust Account:
 - (i) if the Account Trustee has not received a Default Notice, to DB Co; and

- (ii) if the Account Trustee has received a Default Notice, to such persons as the Lenders' Agent, or, following receipt by the Account Trustee of a Change of Authorization Notice, the City, may at any time or from time to time direct in writing.
- (c) Each of DB Co, the Lenders' Agent and the City shall forthwith deliver, or cause to be delivered, to the Account Trustee, any and all Insurance Proceeds it received from time to time and is not otherwise entitled to in accordance with the terms of this Insurance Trust Agreement.
- (d) The Account Trustee shall deposit to the Insurance Trust Account all amounts that are paid over to it pursuant to the Insurance Policies or otherwise by DB Co, the City or the Lenders' Agent and shall not transfer, release or distribute any such proceeds other than in accordance with this Insurance Trust Agreement.

6. ACCOUNT AGREEMENT

- (a) The Account Trustee hereby agrees to promptly provide to the Lenders' Agent all monthly statements and other information with respect to the Insurance Trust Account provided to the Account Trustee by the Bank pursuant to the relevant account agreement. The Account Trustee further agrees that it shall make such requests to the Bank for additional information with respect to the Insurance Trust Account as the Lenders' Agent may from time to time request in writing.
- (b) The Account Trustee hereby agrees to promptly provide to the City all monthly statements and other information with respect to the Insurance Trust Account provided to the Account Trustee by the Bank pursuant to the relevant account agreement. The Account Trustee further agrees that it shall make such requests to the Bank for additional information with respect to the Insurance Trust Account as the City may from time to time request in writing.

7. THE ACCOUNT TRUSTEE

- (a) The Account Trustee shall not have any duty or obligation to manage, control, use, make any payment in respect of, register, record, insure, inspect, sell, dispose of or otherwise deal with any part of the Trust Property except as expressly provided by the terms of this Insurance Trust Agreement. The Account Trustee shall carry out all written directions given by the Lenders' Agent, the City or DB Co, as applicable, in accordance with this Insurance Trust Agreement and shall not be required to exercise any discretion in exercising any of its duties under this Insurance Trust Agreement in pursuance of such written directions. The Account Trustee shall not be bound to do or take any act, action or proceeding by virtue of the powers conferred on it hereby unless and until it shall have been required to do so under the terms hereof and has received instruction, advice or direction from the Lenders' Agent, the City or DB Co, as applicable, as to the action to be taken (except with respect to actions specifically set out herein to be performed by the Account Trustee).
- (b) The Account Trustee will exercise its powers and carry out its obligations hereunder as account trustee honestly, in good faith and in the best interests of the beneficiaries hereunder and in connection therewith will exercise that degree of care, diligence, and

skill that a reasonably prudent professional trustee would exercise in comparable circumstances. Unless otherwise required by law, the Account Trustee will not be required to give bond surety or security in any jurisdiction for the performance of any duties or obligations hereunder. No provision of this Insurance Trust Agreement shall be construed to relieve the Account Trustee from liability for its own dishonesty, fraud, negligence (including, without limitation, negligence in the handling of funds), wilful misconduct, bad faith or reckless disregard of any duty hereunder.

- (c) The Account Trustee will not be subject to any liability whatsoever, in tort, contract or otherwise in connection with the Trust Property or the carrying out of its duties under this Insurance Trust Agreement to the Lenders' Agent, the Lenders, the City, DB Co or any other person for any action taken or permitted by it to be taken, or for its failure to take any action, or for not performing any act or fulfilling any duty, obligation or responsibility hereunder by reason of any occurrence beyond the control of the Account Trustee (including, but not limited to, any act or provision of any present or future law or of any Governmental Authority, any act of God or war, or the unavailability of any wire or communication facility), provided that the foregoing limitation will not apply in respect of any action or failure to act arising from or in connection with wilful misconduct, negligence or reckless disregard of duty by the Account Trustee. The Account Trustee in doing anything or permitting anything to be done in respect of the Trust Property or the carrying out of its duties under this Insurance Trust Agreement is, and will be conclusively deemed to be, acting as trustee for the beneficiaries hereunder and not in any other capacity. Except to the extent provided in this Section 7(c), the Account Trustee will not be subject to any liability for debts, liabilities, obligations, claims, demands, judgments, costs, charges or expenses against or with respect to the Trust Property, arising out of anything done or permitted by it to be done or its failure to take any action in respect of the execution of its duties hereunder and resort will be had solely to the Trust Property for the payment or performance thereof, and no other property or assets of the Account Trustee, whether owned in its personal capacity or otherwise, will be subject to levy, execution or other enforcement procedure with regard to any obligation under this Insurance Trust Agreement.
- (d) The Account Trustee shall not be required to expend or risk its own funds or otherwise incur financial liability in the performance of any of its duties hereunder, or in the exercise of any of its rights or powers hereunder, or in acting at the request or direction of the Lenders' Agent on behalf of the Lenders or of the City or of DB Co, unless it shall have received adequate indemnity or security against such risk or liability satisfactory to it.
- (e) Notwithstanding the foregoing, the Account Trustee shall be liable for any action or failure to act arising from or in connection with the dishonesty, fraud, negligence (including, without limitation, negligence in the handling of funds), wilful misconduct, bad faith or reckless disregard of any duty hereunder by the Account Trustee or any of its directors, officers or employees, or the failure to comply with the standard of care referred to in Section 7(b).
- (f) Except as otherwise provided in Sections 7(c), 7(d) and 7(e):
 - (i) the Account Trustee may rely and shall be protected in acting or refraining from acting upon any signature, resolution, certificate, statement, instrument, opinion,

report, notice, request, direction, consent, order or other paper or document reasonably believed by it in good faith to be genuine and to have been signed or presented by the proper party or parties; and

- (ii) the Account Trustee may exercise its powers and perform its duties by or through such attorneys, representatives, agents and employees as it shall appoint; and may consult with counsel, accountants and other skilled persons selected and employed or retained by it, and the Account Trustee shall not be liable for anything done, suffered or omitted in good faith by it in accordance with the written advice of such counsel, accountants or other skilled persons (provided that such advice pertains to such matters as the Account Trustee may reasonably presume to be within the scope of such person's area of competency) and not contrary to any express provision in this Insurance Trust Agreement.
- (g) DB Co hereby agrees to pay, indemnify and hold harmless the Account Trustee from and against any and all loss, liability, cost, claim and expense incurred by the Account Trustee with respect to the performance of this Insurance Trust Agreement by the Account Trustee or any of the Account Trustee's directors, officers or employees, unless arising from its or their own dishonesty, fraud, negligence (including, without limitation, negligence in the handling of funds), wilful misconduct, bad faith or reckless disregard of any duty hereunder.
- (h) Subject to the terms and conditions set forth in the Account Trustee fee letter, the Account Trustee shall receive from the Trust Property reasonable compensation for its services hereunder and shall be reimbursed by DB Co for its reasonable fees and expenses (including the disbursements and reasonable fees of counsel).
- (i) The Account Trustee agrees to look solely to DB Co, and not, except as expressly set forth herein, to the Lenders' Agent, the Lenders or the City for any claim for indemnification which may arise under this Insurance Trust Agreement.
- (j) The Account Trustee shall be responsible for keeping all appropriate books and records relating to the receipt and disbursement of all money which it receives hereunder.
- (k) If at any time the Account Trustee is served with any judicial or administrative order, judgment, decree, writ or other form of judicial or administrative process which in any way affects the Trust Property held by it hereunder (including, but not limited to, orders of attachment or garnishment or other forms of levies or injunctions or stays relating to the transfer of Trust Property) (each, an "Order"), the Account Trustee is authorized to comply therewith in any manner as it or legal counsel of its own choosing deems appropriate. The Account Trustee shall in no way be bound to call for further evidence (whether as to due execution validity or effectiveness, or the jurisdiction of any court, or as to the truth of any fact), and shall not be responsible for any loss that may be occasioned by its failing to do so. If the Account Trustee complies with any Order, the Account Trustee shall not be liable to any of the parties hereto or to any other person or entity even though such Order may be subsequently modified or vacated or otherwise determined to have been without legal force or effect. If the Account Trustee is served with any Order, it shall forthwith and, in any event, within three (3) Business Days, deliver a copy of such Order to each of the Lenders' Agent, the City and DB Co.

- (l) Unless otherwise specifically set forth herein, the Account Trustee shall proceed as soon as practicable to collect any cheques or other collection items at any time deposited hereunder. All such collections shall be subject to the Account Trustee's usual collection practices or terms regarding items received by the Account Trustee for deposit or collection. Except and to the extent provided herein, the Account Trustee shall not be required, or have any duty, to notify any person of any payment or maturity under the terms of any instrument deposited hereunder, nor to take any legal action to enforce payment of any cheque, note or security deposited hereunder, or to exercise any right or privilege which may be afforded to the holder of any such security.
- (m) In the event that the Account Trustee determines that any direction, instruction, notice or other communication given under this Insurance Trust Agreement by the Lenders' Agent or, where the Account Trustee has received a Change of Authorization Notice, the City, is ambiguous or uncertain, the Account Trustee may, in its sole discretion, refrain from taking any action other than retaining possession of the Trust Property, unless the Account Trustee has received written instructions, signed by the Lenders' Agent or, if the Account Trustee has received a Change of Authorization Notice, the City, which resolve such ambiguity or uncertainty, provided that the Account Trustee shall, forthwith upon determining that such direction, instruction, notice or other communication is ambiguous or uncertain, seek clarification from the Lenders' Agent, or where the Account Trustee has received a Change of Authorization Notice, the City, to resolve such ambiguity or uncertainty.
- (n) Prior to receipt of a Change of Authorization Notice by the Account Trustee, any instruction, notice or other communication delivered to the Account Trustee by the Lenders' Agent shall be paramount to and supersede any direction, instruction, notice or other communication from any other party to this Insurance Trust Agreement, and the Account Trustee shall comply with such direction, instruction, notice or other communication from the Lenders' Agent. After the Account Trustee has received a Change of Authorization Notice, any instruction, notice or other communication delivered to the Account Trustee by the City shall be paramount to and supersede any direction, instruction, notice or other communication from any other party to this Insurance Trust Agreement, and the Account Trustee shall comply with such direction, instruction, notice or other communication from the City.
- (o) Each of the Lenders' Agent and the City shall provide to the Account Trustee an incumbency certificate setting out the names and sample signatures of individuals authorized to give instructions to the Account Trustee hereunder. The Account Trustee shall be entitled to rely on each such incumbency certificate until a revised or replacement incumbency certificate is provided to the Account Trustee by the Lenders' Agent or the City, as applicable. The Account Trustee shall refuse to act upon any instruction given by the Lenders' Agent or the City which is signed by any person other than an individual named in the incumbency certificate provided to the Account Trustee by the Lenders' Agent or the City, as applicable, pursuant to this Section 7(o), as any such incumbency certificate may be amended, supplemented or replaced from time to time.
- (p) The Account Trustee shall be entitled to rely on, and act upon, any direction, instruction, notice or other communication provided to it hereunder which is sent to it by facsimile transmission, provided that any such direction, instruction, notice or other

communication is signed by an individual named in the incumbency certificate delivered to the Account Trustee by the Lenders' Agent or the City, as applicable, pursuant to Section 7(o).

- (q) The Account Trustee shall retain the right not to act and shall not be liable for refusing to act if, due to a lack of information or for any other reason whatsoever, the Account Trustee, in its sole judgment, determines that such act might cause it to be in non-compliance with any applicable anti-money laundering or anti-terrorist legislation, regulation or guideline. Further, should the Account Trustee, in its sole judgment, determine at any time that its acting under this Insurance Trust Agreement has resulted in its being in non-compliance with any applicable anti-money laundering or anti-terrorist legislation, regulation or guideline, then it shall have the right to resign on 10 days' written notice to DB Co and the City, or any shorter period of time as agreed to by DB Co and the City, notwithstanding the provisions of Section 7(a) of this Insurance Trust Agreement, provided that (i) the Account Trustee's written notice shall describe the circumstances of such non-compliance; and (ii) if such circumstances are rectified to the Account Trustee's satisfaction within such 10 day period, then such resignation shall not be effective.

8. LENDER'S AGENT AND CITY RIGHTS TO DIRECT

- (a) Until the first to occur of:
 - (i) the expiry of the Notice Period under the Lenders' Direct Agreement where no Step-In Notice has been delivered thereunder;
 - (ii) the expiry of the Step-In Period under the Lenders' Direct Agreement where:
 - (A) there has been no assignment to a Replacement DB Co;
 - (B) no Replacement Project Agreement has been entered into; or
 - (C) the Appointed Representative has not cured the DB Co Event of Default,

(each, a "Change of Authorization Event"), the Lenders' Agent shall, subject to Sections 3 and 4 of this Insurance Trust Agreement, have the exclusive right to direct the Account Trustee with respect to the Insurance Trust Account, the Insurance Policies and the Insurance Proceeds.
- (b) Upon the occurrence of a Change of Authorization Event:
 - (i) the Lenders' Agent shall cease to be entitled, and the City shall thenceforth be entitled, to direct the Account Trustee with respect to the Insurance Trust Account, the Insurance Policies and the Insurance Proceeds; and
 - (ii) the Lenders' Agent and the City shall jointly provide notice to the Account Trustee (a "Change of Authorization Notice") that the City shall, as of the date of such Change of Authorization Event, have the exclusive right to direct the Account Trustee with respect to the Insurance Trust Account, the Insurance Policies and the Insurance Proceeds.

9. TERMINATION

- (a) Subject to the provisions of Section 9(b), this Insurance Trust Agreement shall remain in full force and effect and be binding in accordance with and to the extent of its terms until:
 - (i) the obligations of DB Co to the Lenders' Agent and the Lenders under the Lending Agreements have been paid and performed in full and the Lenders have no further obligation to make any further advances or other credit accommodations under the Lending Agreements; and
 - (ii) the obligations of DB Co to the City have been paid and performed in full.
- (b) The Account Trustee may terminate this Insurance Trust Agreement at any time upon 60 days prior written notice to the other parties hereto, provided that no termination of this Insurance Trust Agreement by the Account Trustee shall be effective until such time as the Lenders' Agent, the City, and DB Co have entered into a replacement Insurance Trust Agreement on the same terms and conditions as this Insurance Trust Agreement with a replacement account trustee satisfactory to the Lenders' Agent, the Lenders and the City.

10. ASSIGNMENT

- (a) The Account Trustee shall not assign, transfer or otherwise dispose of any of its rights or obligations under this Insurance Trust Agreement without the prior written consent of the Lenders' Agent, the City and DB Co.

11. NOTICES

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Insurance Trust Agreement shall be in writing (whether or not "written notice" or "notice in writing" is specifically required by the applicable provision of this Insurance Trust Agreement) and served by sending the same by registered mail, facsimile or by hand, as follows:

If to City:

City of Ottawa
110 Laurier Ave West
Ottawa, Ontario K1P 1J1

- (b) Where any notice is provided or submitted to a Party via facsimile, an original of the notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a Party's failure to comply with this Section 11(b).
- (c) Any Party to this Insurance Trust Agreement may, from time to time, change any of its contact information set forth in Section 11(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows the recipient Party's receipt of such notice unless a later effective date is given in such notice.
- (d) Subject to Sections 11(e), 11(f) and 11(g):
 - (i) a Notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
 - (ii) a Notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
 - (iii) a Notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.

- (e) If the Party giving the Notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such Notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 11.
- (f) If any Notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such Notice shall be deemed to have been received by such recipient on the next Business Day.
- (g) A Notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such Notice was successful.

12. AMENDMENTS

This Insurance Trust Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Insurance Trust Agreement.

13. WAIVER

- (a) No waiver made or given by a Party under or in connection with this Insurance Trust Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

14. FORCE MAJEURE

No party shall be liable to any other party, or held in breach of this Insurance Trust Agreement, if prevented, hindered, or delayed in the performance or observance of any provision contained herein by reason of acts of God, riots, terrorism, acts of war, epidemics, earthquakes, or any other similar causes beyond the affected party's reasonable control and where such failure in performance is not caused directly or indirectly by the affected party (including but not limited to, mechanical, electronic or communication interruptions, disruptions or failures, unless caused by the negligent or willful misconduct of the affected party). Performance times under this Insurance Trust Agreement shall be extended for a period of time equivalent to the time lost because of any delay that is excusable under this Section, provided that the affected party shall take commercially reasonable steps to mitigate or remedy the event giving rise to the delay.

15. RELATIONSHIP BETWEEN THE PARTIES

The Parties are independent contractors. This Insurance Trust Agreement is not intended to and does not create or establish between the Parties any relationship as partners, joint venturers, employer and employee, master and servant, or, except as provided in this Insurance Trust Agreement, of principal and agent.

16. ENTIRE AGREEMENT

Except where provided otherwise in this Insurance Trust Agreement, this Insurance Trust Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Insurance Trust Agreement.

17. SEVERABILITY

Each provision of this Insurance Trust Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Insurance Trust Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Insurance Trust Agreement. If any such provision of this Insurance Trust Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Insurance Trust Agreement as near as possible to its original intent and effect.

18. ENUREMENT

This Insurance Trust Agreement shall enure to the benefit of, and be binding on, each of the Parties and their respective successors and permitted transferees and assigns.

19. GOVERNING LAW AND JURISDICTION

- (a) This Insurance Trust Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The Parties agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Insurance Trust Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.
- (c) [Intentionally Deleted].

20. FURTHER ASSURANCE

Each Party shall do all things, from time to time, and execute all reasonable further documents necessary to give full effect to this Insurance Trust Agreement.

21. LANGUAGE OF AGREEMENT

Each Party acknowledges having requested and being satisfied that this Insurance Trust Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en declare satisfaite.

22. COUNTERPARTS

This Insurance Trust Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any Party providing its signature in faxed form shall promptly forward to such Party an original signed copy of this Insurance Trust Agreement which was so faxed.

[EXECUTION PAGES IMMEDIATELY FOLLOW]

SCHEDULE 31

DB CO INFORMATION

[REDACTED]

SCHEDULE 32

[REDACTED]

**SCHEDULE 33
WORKS REPORTS**

PART 1 CURRENT PBS UPDATE Each month following Financial Close, within ten (10) Business Days following the prior month's end, DB Co shall submit a PBS Update, which shall include the following:

- (a) actual start and finish dates for completed Activities;
- (b) actual start dates, physical percent complete and remaining duration for Activities in progress;
- (c) projected sequences of Activities for future work;
- (d) revised relationships and durations for unfinished Activities, if warranted;
- (e) identify the Critical Path(s) in a Critical Path report;
- (f) show Near-Critical Path Activities; and
- (g) a PBS Update table, which shall include the following:
 - (i) added and deleted activities;
 - (ii) changes to original durations;
 - (iii) changes to constraints;
 - (iv) changes to lags;
 - (v) changes to calendar assignments; and
 - (vi) logic changes.

All changes included in the PBS Update table shall include reasoning for the change.

- 1.2 The Earned Value in a Payment Period shall match the amount eligible for claiming in the applicable Construction Period Payment Application in accordance with Schedule 21 – Construction Period Payments.
- 1.3 The PBS Update shall use the Current PBS baseline. The PBS Update shall not be used to re-baseline the Schedule. All re-baselines shall be performed in accordance with Schedule 12 – Works Scheduling Requirements.
- 1.4 The PBS Update shall remain in compliance with Table 1 of Schedule 12 – Works Scheduling Requirements.
- 1.5 DB Co shall revise the Activities within the Current PBS as appropriate to identify the current sequence of Works. If this revision causes impact on the Critical Path(s), or creates a new Critical Path(s), DB Co shall summarise the changes in the Monthly Progress Report.

- 1.6 Where Activities are divided due to changes in maximum duration, the parent activity dollar value shall be preserved across the new children.
- 1.7 The PBS Update shall at all times remain in compliance with the requirements of Schedule 12 – Works Scheduling Requirements.
- 1.8 The PBS Update shall be submitted in two electronic file formats. The first format shall be in the native file format of the software used to generate and manage the Works Schedules, which shall be the exported .XER file for the latest version of Primavera Professional Project Management (PPM). The second format shall be a word-searchable high resolution colour PDF version. Upon City's request, DB Co shall provide the details of the software and any additional software plug-ins used by DB Co, a copy of any templates, and the details for any software settings it has used in its scheduling software, such as calendar settings, user and administrative preferences, schedule settings, and any other information required to enable the City to replicate the Works Schedules submitted by DB Co using the native file formats provided by DB Co.

PART 2 MONTHLY PROGRESS REPORT The provisions of this Schedule 33 shall apply to the Monthly Progress Reports.

- 2.2 All information included in the Monthly Progress Reports related to Works Schedules shall be in accordance with the requirements of Schedule 12 – Works Scheduling Requirements.
- 2.3 Each month following Financial Close, DB Co shall submit to the City the Monthly Progress Report. DB Co shall submit the Monthly Progress Report within 10 Business Days following the prior month's end.
- 2.4 The Monthly Progress Report shall be divided by Division and shall contain a narrative with the following items:
 - (a) an executive summary describing the general status of the Works, including design, construction, and testing and commissioning activities;
 - (b) description of progress for each Division and the Project as a whole, including all phases of Works. Identify start date and completion dates on major areas of Works.
 - (c) For the requirements from 2.4(d) to 2.4(l), where there are no current actions or concerns, DB Co shall withhold the heading.
 - (d) Identification of tasks or activities which are causing delay, or may cause delay to, the Works Schedule. The Identification of tasks shall be grouped by:
 - (i) System Infrastructure;
 - (A) facilities;
 - (B) structures;
 - (C) Systems;
 - (D) tunnels;

- (E) guideway;
 - (F) LMSF; and
 - (G) roadways.
- (ii) progress of design and review (until complete); and
- (iii) progress and issues for:
 - (A) communications and public engagement;
 - (B) traffic and transit management (including upcoming road closures);
 - (C) progress for Utility Work;
 - (D) demolitions and removals;
 - (E) safety, security, and emergency management;
 - (F) property access;
 - (G) status update of all Permits, Licences, Approvals and Agreements;
 - (H) environmental monitoring and compliance status;
 - (I) status of warranty work;
 - (J) operations training in accordance with Schedule 15.2 Part 1 Article 17; and
 - (K) all testing and commissioning.
- (e) contemplated innovations, where applicable;
- (f) outstanding contractual decisions;
- (g) listing of any Variation Directive or Variation Confirmations that were identified or executed during the period from the submission of the previous month's Monthly Progress Report to the submission of the current Monthly Progress Report, including their status;
- (h) identification of problems and issues that are causing delay or may cause delay to the works schedule that arose during the current reporting period, outstanding problems and issues, and summary of resolved problems and issues;
- (i) identification of requested and/or required City actions for the next month;
- (j) advance notice of requested and/or required City actions for the next six months;
- (k) any other information specifically requested by the City on the progress of the applicable Works;

- (l) description and associated metrics to demonstrate compliance on Project elements as appropriate;
- (m) selected digital progress photographs that summarise key achievements of Project progress as outlined in the Monthly Progress Report narrative;
- (n) general summary of Works planned for the upcoming period;
- (o) summary quality assurance/quality control findings; and
- (p) a table of “Near-Critical Activities” for all Works Activities with a float of less than 10 Business Days.

2.5 The Monthly Progress Report shall also include, the following:

- (a) sustainability compliance status;
- (b) summarised quality assurance and quality control data, including:
 - (i) status until approval of each management plan. Once the relevant plan is reported as “Complete”, the plan can be removed from the following Monthly Progress Report; and
 - (ii) status until approval of Design Certificates and Construction Certificates. Once the relevant certificate is reported as “Complete”, the certificate can be removed from the following monthly report.
- (c) IMS metrics, including:
 - (i) results of monthly Integrated Management System reports, IMS Audit reports and information from the Non-Conformance Tracking System (as described in Schedule 11 - Integrated Management System Requirements), status of Internal IMS Audits and External IMS Audits;
 - (ii) identified Non-Conformances and deficiencies in ongoing Works as identified by the City or DB Co or both; and
 - (iii) threat and vulnerability actions (with summary).
- (d) health, safety, and environmental metrics, including:
 - (i) lost time injuries;
 - (ii) restricted work cases;
 - (iii) medical treatment injuries;
 - (iv) fatalities;
 - (v) near misses;

- (vi) all reportable incidents; and
 - (vii) accidents with no lost time.
- (e) community metrics, including:
 - (i) received and resolved complaints;
 - (ii) community outreach events; and
 - (iii) community involvement.
- (f) management staffing changes, deletions, and additions for DB Co (if applicable);
- (g) status of Proceeding At Risk Matters (if applicable);
- (h) status of all Submittals pursuant to the requirements of the Project Agreement;
- (i) Subcontract status, including:
 - (i) consultants;
 - (ii) Subcontracts awarded;
 - (iii) tenders;
 - (iv) involvement of social enterprises;
 - (v) apprenticeships;
 - (vi) labour report (average workforce); and
 - (vii) contracts terminated and for what cause.
- (j) DB Co shall use the data to develop, and provide to the City in an acceptable format, the following tabulated data on a monthly basis from the Financial Close date until the latest Final Completion:
 - (i) if applicable, the revised forecast cash flow in accordance with a Recovery Schedule;
 - (ii) the actual Earned Value (EV) as equal to the Activities at [REDACTED]% completion in the Current PBS;
 - (iii) the revised forecast cash flow to complete the Works in accordance with the Current PBS;
 - (iv) the overall progress expressed as a percentage of the physical work completed; and
 - (v) DB Co shall use the data to calculate the following performance indicators for inclusion in the Monthly Progress Report:

- (A) Planned Value curve from PBS-1;
 - (B) Planned Value (PV) as calculated up to the Current PBS status date;
 - (C) Earned Value (EV) as calculated up to the Current PBS status date; and
 - (D) Schedule Performance Index (SPI) = Earned Value (EV)/ Planned Value (PV), expressed as a percentage.
- (k) risk management summary, which shall include the following where applicable:
- (i) updated risk register;
 - (ii) risk response plans requiring action from the City;
 - (iii) claims;
 - (iv) liens;
 - (v) environmental issues;
 - (vi) labour;
 - (vii) outstanding disputes;
 - (viii) safety and security;
 - (ix) operational risks;
 - (x) Stakeholder risks; and
 - (xi) other risks.

2.6 The Monthly Progress Report shall include a variance section that contains:

- (a) the information provided in Section 1.1(g) in a tabular format; and
- (b) a summarized narrative that provides justification for the changes.

PART 3 MISCELLANEOUS SUBMISSIONS Where the following deliverables are submitted separately to the Monthly Progress Report, DB Co shall submit following deliverables in accordance with the timing identified in Schedule 12:

- (a) Short Duration Schedule: Micro Works Schedule
- (b) Short Duration Schedule: Testing and Commissioning Schedule
- (c) Short Duration Schedule: Schedule to Complete

3.2 The Short Duration Schedules can be provided in either hard copy or .pdf, as agreed in discussions with the City.

- 3.3 DB Co shall prepare and submit a Testing and Commissioning schedule narrative.
- 3.4 This narrative shall be provided six months prior to commencement of testing and commissioning activities, and updated following any detailed revision to the strategy.
- 3.5 DB Co shall prepare and submit a Testing & Commissioning Schedule narrative to identify the strategy to achieve:
- (a) East Substantial Completion;
 - (b) West Substantial Completion;
 - (c) East Final Completion; and
 - (d) West Final Completion (including completion of Remaining Works).
- 3.6 The Testing and Commissioning Schedule narrative shall contain:
- (a) Description of the testing philosophy and process;
 - (b) Description of the interrelationships and system interfaces within the Confederation Line East Extension and Confederation Line West Extension, and between the Confederation Line East Extension and Confederation Line West Extension and the Existing Confederation Line;
 - (c) Description of testing and commissioning sequencing to achieve each Substantial Completion and Final Completion (including completion of Remaining Works); and
 - (d) Identification of potential conflicts and challenges to achieve each Substantial Completion and Final Completion (including completion of Remaining Works).

PART A MOBILITY MATTERS – BUS RAPID TRANSIT LANE CLOSURES

1. DEFINITIONS

In this Schedule 34, the following definitions shall have the following meanings:

- 1.1 **“Aggregate Actual Bus Rapid Transit Lane Closures”** or **“AABRTLCC”** means the actual number of BRT lanes, measured in hours per hour type (“Peak”, “Off Peak”, “Night”), or portions thereof that are closed for each monthly period.
- 1.2 **“Aggregate Actual Bus Rapid Transit Lane Closures Cost”** or **“AABRTLCC”** means the total cost of BRT Lane Closures, calculated to be the multiplication of number of hours of AABRTLCC and the relevant Unit Rate Price.
- 1.3 **“Aggregate Bus Rapid Transit Target Lane Closures”** or **“ABRTLCC”** means the total BRT target Lane Closures, measured in hours per hour type (“Peak”, “Off Peak”, “Night”), which,
 - (a) are set forth in the BRT Lane Closure Target Letter submitted by DB Co at Commercial Close and which has been accepted by the City; and
 - (b) include and account for all requirements of Schedule 15 - Output Specifications.
- 1.4 **“Aggregate Bus Rapid Transit Target Lane Closure Cost”** or **“ABRTLCC”** means the total cost of the target Lane Closures, calculated to be the multiplication of number of hours of ABRTLCC and the relevant Unit Rate Price, as set forth in the BRT Lane Closure Target Letter submitted by DB Co at Commercial Close and which has been accepted by the City.
- 1.5 **“BRT Lane”**, means any lane within the City of Ottawa reserved for use by buses only.
- 1.6 **“BRT Lane Closure”** means any reduction in width, obstruction, or closure of a BRT Lane to bus traffic along any segment, as a result of DB Co’s construction activities, as described below. All partial width reductions, obstructions, or closures along a segment will be considered a full Lane Closure, with the exception of localized lane shifts as described in Section 1.6 (d) below. Lane closures will be measured on a per segment, per hour basis. A maximum of one (1) BRT Lane Closure in each direction will be assessed at any given segment. **“Peak”** means Monday through Friday between the hours of 0600h – 0930h, or 1500h – 1830h. **“Night”** means the hours between 2200h – 0500h. **“Off Peak”** means all other hours not defined as “Peak” or “Night”. BRT Lane Closures will no longer be in effect once West Substantial Completion has been achieved.
 - (a) Bus rapid transit segments
 - (i) Tunney’s Pasture Station to Dominion Station (BRT-W-1);
 - (ii) Dominion Station to Sir John A MacDonald Parkway 400m west of Dominion Station (BRT-W-2);

- (iii) Sir John A MacDonald Parkway 400m west of Dominion Station to 550m north of Lincoln Fields Station (BRT-W-3); note, this segment does not have any dedicated BRT lanes;
- (iv) Sir John A MacDonald Parkway 550m north of Lincoln Fields Station to Lincoln Fields Station (BRT-W-4);
- (v) Lincoln Fields Station to Queensway Station (BRT-W-5);
 - A. Portions of this segment are common to BRT-SW-2. BRT-W-5 shall consist only of those elements that are unique to the connection between Lincoln Fields Station and Queensway Station; common elements shall be part of segment BRT-SW-2.
- (vi) Lincoln Fields Station to Iris Station (BRT-SW-2);
- (vii) Iris Station to Baseline Station (BRT-SW-1);
- (viii) Queensway Station to Pinecrest Station (BRT-W-6);
- (ix) Pinecrest Station to Bayshore Station (BRT-W-7);
- (x) Bayshore Station to Holly Acres Road (BRT-W-8);
- (xi) Holly Acres Road to Moodie LMSF (BRT-W-9)
- (xii) Blair Station to OR 174 500m east of Transitway overpass (BRT-E-1);
- (xiii) OR 174 500m east of Transitway overpass to 800m east of Montreal Road (BRT-E-2);
- (xiv) OR 174 800m east of Montreal Road to 800m east of Jeanne d’Arc (BRT-E-3); and
- (xv) OR 174 800m east of Jeanne d’Arc to Place d’Orleans Station (BRT-E-4).
- (xvi) OR 174 Place d’Orleans Station to Trim Station (BRT-E-5); note, this segment does not have any dedicated BRT lanes
- (b) DB Co shall include as a BRT Segment any BRT Lane not defined in this Schedule 34 where a need for the closure of a BRT Lane has been identified.
- (c) BRT Lane Closures will no longer be in effect for segments BRT-E-1, BRT-E-2, BRT-E-3 and BRT-E-4 once East Substantial Completion has been achieved.
- (d) Localized deviations of Transitway lanes, that do not result in an increase in travel times greater than [REDACTED] within a given BRT segment, and only where a minimum of one travel lane is provided in each direction of travel, shall not be considered “BRT Lane Closures” for the purposes of Schedule 34 - Mobility Matters.

- (i) The combined total increase in travel times due to localized deviations shall not exceed [REDACTED] simultaneously in the following combinations of BRT segments:
 - (A) BRT-W-1, BRT-W-2, BRT-W-3, BRT-W-4, BRT-W-5, BRT-W-6, BRT-W-7, BRT-W-8, BRT-W-9;
 - (B) BRT-W-1, BRT-W-2, BRT-W-3, BRT-W-4, BRT-SW-1, BRT-SW-2;
 - (C) BRT-E-1, BRT-E-2, BRT-E-3, BRT-E-4, BRT-E-5.
 - (ii) Any localized deviation causing the travel time increase to exceed [REDACTED] in any of the combinations of BRT segments noted in (i) above shall be considered as a BRT Lane Closure for the purposes of Schedule 34 – Mobility Matters.
 - (A) The combinations of BRT segments noted in (i) above shall not include BRT segments that have been permanently closed.
- 1.7 **“Bus Rapid Transit Lane Closure Adjustment” or “BRTLCA”** means the deduction which may be made by the City from DB Co (which amount will be deducted from the West Substantial Completion Payment) as calculated pursuant to Section 5 of this Part A of this Schedule 34.
- 1.8 **“Bus Rapid Transit Lane Closure Adjustment Offset” or “BRTLCAO”** means the amount of money that DB Co can use to reduce the BRTLCA, if applicable, as calculated pursuant to Section 5 of this Part A of this Schedule 34.
- 1.9 **“Bus Rapid Transit Lane Closure Analysis Report”** has the meaning given to it in Section 2.3.
- 1.10 **“Bus Rapid Transit Lane Closure Measurement and Verification Plan”** has the meaning given to it in Article 6.2 (k) of Part 7 – Traffic and Transit Management and Construction Access to Schedule 15-2 – Design and Construction Requirements of the Project Agreement. This plan shall outline the means by which the Independent Certifier shall perform their review of the lane closures as described in Section 3.5.
- 1.11 **“Bus Rapid Transit Lane Closure Target Letter”** means the letter set out in Appendix C.
- 1.12 **“Mobility Matters Review Meeting”** has the meaning given in Section 3.6.
- 1.13 **“Monthly Bus Rapid Transit Lane Closure Adjustment Contribution”** means the value for any given month that shall contribute to the Bus Rapid Transit Lane Closure Adjustment as calculated pursuant to Section 5.
- 1.14 **“Monthly Peak Hour BRT Lane Interruption Report”** means a report to be submitted on a monthly basis (at the same time as the BRT Lane Closure Analysis report) outlining all Peak Hour Bus Rapid Transit Interruptions and their costs, as defined in Section 6.
- 1.15 **“Peak Hour Bus Rapid Transit Interruptions”** means unplanned interruptions to the operation of the BRT during Peak periods by either an unplanned event or a planned event exceeding the

time restrictions granted. For further clarity, Peak Hour BRT Interruptions would only be for interruptions caused by the actions of DB Co or their subcontractors. Peak Hour BRT Interruptions as defined above are not included in AABRTLCC.

- 1.16 “**Unit Rate Price**” means the price for each BRT Segment of BRT Lane Closure as set in Appendix B. The prices are hourly rates, based on time of day.

2. CONTENT AND FORMAT OF THE LANE CLOSURE ANALYSIS REPORT

- 2.1 DB Co shall quantify its projected occupation of BRT Lanes on City roadways on the basis of the formulae and procedures contained in this Schedule 34. DB Co shall monitor its occupation of the BRT lanes on a monthly basis.
- 2.2 BRT Lane Closures on Highway 417 shall not be considered as part of this Schedule 34, except for Peak Hour Bus Rapid Transit Interruptions as described in Section 6.
- 2.3 DB Co shall deliver to the City a report summarizing the findings of AABRTLCC (the “**BRT Lane Closure Analysis Report**”), on a monthly basis, no later than 5 Business Days after the end of each month.
- 2.4 DB Co shall include copies of all documents required to fully support the BRT Lane Closure Analysis Report.
- 2.5 The BRT Lane Closure Analysis Report shall, at a minimum, include the following information for the relevant month:
- (a) using the template shown in Appendix A to this Schedule, a summary of target and actual BRT Lane Closures by BRT Segment, time, date and duration, indicating Peak, Off Peak or Night, including any exceptional changes forecasted for the upcoming monthly period (being changes of plus or minus [REDACTED]% in any BRT segment, for Peak, Off Peak or Night periods);
 - (b) projected BRT Lane Closures for the remaining duration of the Construction Period along with trends and potential risks associated with these BRT Lane Closures;
 - (c) accurate and precise data in support of the items set out in Sections 2.5(a) and 2.5(b);
 - (d) presentation of AABRTLCC and the AABRTLCC for the applicable month, and on a cumulative basis as of the applicable month;
 - (e) establishment of a basis for continued monitoring of BRT Lane Closures and adjustments to the AABRTLCC;
 - (f) outline of any outstanding issues from any previous BRT Lane Closure Analysis Reports and mitigating strategies to address those issues;
 - (g) adjustments to the AABRTLCC and the AABRTLCC for the applicable month, and on a cumulative basis as of the applicable month;

- (h) DB Co's estimate of the Monthly BRT Lane Closure Adjustment Contribution;
- (i) measurement and verification of BRT Lane Closures in accordance with Lane Closure Measurements and Verification Plan in Section 3.5; and
- (j) summary tables from all previous BRT Lane Closure Analysis Reports delivered by DB Co to the City.

2.6 Following the review and acceptance of the final BRT Lane Closure Analysis Report by the City Representative, the data set out in the BRT Lane Closure Analysis Report will be used by the City to determine the Monthly BRT Lane Closure Adjustment Contribution.

3. PROCEDURES FOR DETERMINING MONTHLY BRT LANE CLOSURE ADJUSTMENT CONTRIBUTIONS

- 3.1 The City shall not consider the following closures of BRT Lanes to be BRT Lane Closures for the purposes of this Schedule 34, and such closures of lanes shall not contribute to the Monthly Lane Closure Adjustment Contribution:
- a) where an existing BRT Lane width is less than the minimum lane width requirements during construction, specified Schedule 15-2 Part 7 Table 7-1.3, maintaining the lane as open for BRT operations at its existing width.
- 3.2 The City shall assess DB Co for the cost of BRT Lane Closures based on the total BRT Lane Closures that occur during Peak, Off Peak, and Night hours. All BRT Lane Closures shall be included in the calculation of the Monthly BRT Lane Closure Adjustment Contribution as provided in Section 5.
- 3.3 The ABRTTLC shall form the benchmark for calculating the BRT Lane Closure cost with respect to the AABRTLCC. The AABRTLCC shall be used to calculate the Monthly BRT Lane Closure Adjustment Contribution. The ABRTTLC shall not be amended, altered or adjusted except by the process described in Section 4.
- 3.4 [Not used]
- 3.5 The measurement and verification of BRT Lane Closure shall be performed by the Independent Certifier. No later than 30 days prior to the initial planned BRT Lane Closure within any BRT Segment, DB Co shall provide the City with a BRT Lane Closure Measurement and Verification Plan. All subsequent BRT Lane Closure Analysis Reports are to be based on this plan.
- 3.6 No later than 5 Business Days following the submission of the BRT Lane Closure Analysis Report (or as agreed to between the Parties), DB Co and the City shall convene a review meeting (the “**Mobility Matters Review Meeting**”) to be attended by the DB Co Representative and the City Representative. At the Mobility Matters Review Meeting, DB Co shall present the BRT Lane Closure Analysis Report to the City. The City and DB Co shall discuss the Aggregate Actual BRT Lane Closure for the preceding period, as well as review any proposed “localized deviations” as described in Section 1.6 (d). DB Co’s measurement and verification of BRT Lane Closure(s) shall be reviewed and confirmed by the City Representative.
- 3.7 DB Co shall assist the City Representative by providing information with respect to BRT Lane Closures and access to the BRT Lane Closure records, and by other means as may reasonably be required to confirm the information in the BRT Lane Closure Analysis Report. The City shall promptly give Notice to DB Co of the details of any disagreement with respect to all or any aspect of the BRT Lane Closure Analysis Report, and the Parties shall then seek to agree to any matters in dispute. The process shall be as follows:
- (a) AABRTLCC and AABRTLCC shall be determined at the Mobility Matters Review Meeting;

- (b) No later than 20 Business Days following each Mobility Matters Review Meeting, or within such period as may be otherwise agreed between the City Representative and the DB Co Representative, acting reasonably:
 - (i) The City shall confirm their acceptance of all or any aspect of the BRT Lane Closure Analysis Report; and
 - (ii) Subject to Section 4, DB Co and the City shall agree to any adjustments to the ABRTTLC and ABRTTLCC.
 - (c) If the City disputes DB Co's estimate of the Monthly BRT Lane Closure Adjustment Contribution in the BRT Lane Closure Analysis Report, the City shall, no later than 10 Business Days following receipt of the BRT Lane Closure Analysis Report, or within such other period as may be agreed by the City Representative and DB Co, acting reasonably, submit an account to DB Co indicating the difference in calculation between the City's estimate and DB Co's estimate of the Monthly BRT Lane Closure Adjustment Contribution. If either DB Co or the City wish to dispute any account presented pursuant this Section 3.7(c), they must do so by written Notice to the other Party no later than 10 Business Days following receipt of such account. The City Representative and the DB Co Representative shall use reasonable efforts to resolve the dispute for an additional 10 Business Days. If there is no agreement within such 10 Business Days, then either Party may refer the matter to the Dispute Resolution Procedure.
 - (d) If neither Party objects in accordance with Section 3.7(c), or, following final determination of the disputed account in accordance with Section 3.7(c), DB Co shall use the relevant Monthly BRT Lane Closure Adjustment Contribution to determine the BRT Lane Closure Adjustment. The BRT Lane Closure Adjustment shall be shown as a separate item within the invoice for the West Substantial Completion Payment.
- 3.8 For the purpose of calculating the BRT Lane Closure Adjustment, the calculation shall be completed no later than 60 days prior to the Scheduled West Substantial Completion Date (or at a later date as mutually agreed to by the City Representative and DB Co), comparing the total AABRTLCC of each BRT Segment for the entire Construction Period to the total ABRTTLCC for that same road BRT segment for the entire Construction Period. If, subsequent to this calculation being completed, there is a change to the Scheduled West Substantial Completion Date, DB Co shall amend their Lane Closure Target (in accordance with Section 4 of this Schedule 34) and the BRT Lane Closure Adjustment. For clarity, over-performance of any one BRT Segment cannot be added to underperformance of any other, with the exception of the BRT Lane Closure Adjustment Offset, as outlined in Section 5.2 below.

4. PROCESS FOR AMENDING THE AGGREGATE TARGET LANE CLOSURE AND ASSOCIATED COST

- 4.1 In all cases, changes to the ABRTTLC and ABRTTLCC must be consistent with the principles outlined in the TTMP. Changes proposed must provide reference to the TTMP or a site-specific Traffic Control Plan (as defined in Schedule 15-2 Part 7).
- 4.2 DB Co and the City shall, acting reasonably, agree to make any adjustments to the ABRTTLC, ABRTTLCC, AABRTLCC and AABRTLCC, but only in the event of changes implemented due to

an amendment of the Project Agreement, a Relief Event that is also a Delay Event pursuant to Section 32.1 (a) (xi) of the Project Agreement, or a Variation that would cause BRT Lane Closure changes. The City, at its discretion, may allow a revision to the Target Letters to reflect an agreed-upon change in Project Schedule, in the absence of an amendment of the Project Agreement or a Variation.

- 4.3 The Party requesting an amendment to the ABRTTLC in accordance with Section 4.2 shall initiate a Variation in accordance with Schedule 22 – Variation Procedure. The amended TTMP shall include a detailed analysis of the impacts to traffic and transit services, including an analysis of BRT Lane Closure requirements. The amended TTMP shall include a recommendation regarding amendments to the ABRTTLC. Both the City and DB Co shall agree to the amended ABRTTLC no later than 20 Business Days following receipt of amended TTMP. If there is no agreement within a further 10 Business Day period, then either Party may refer the matter to the Dispute Resolution Procedure.

5. CALCULATION OF MONTHLY BRT LANE CLOSURE ADJUSTMENT CONTRIBUTION AND LANE CLOSURE ADJUSTMENT

5.1 Comparing AABRTLCC to ABRTTLCC:

- (a) After the acceptance of the final BRT Lane Closure Analysis Report described in Section 2 and prior to the Scheduled West Substantial Completion Date, DB Co shall compare the total AABRTLCC for each BRT Segment to the total ABRTTLCC for each BRT Segment, and if the AABRTLCC is more than [REDACTED]% greater than the ABRTTLCC, for any BRT Segment, then DB Co shall calculate the Monthly BRT Lane Closure Adjustment Contribution set out in Section 5.3 and deduct the amount of the BRT Lane Closure Adjustment from the West Substantial Completion Payment to be made in accordance with the Project Agreement. For clarity, the Lane Closure Adjustment deduction from the West Substantial Completion Payment shall not be subject to the limitations set out in Article 47.4 of the Project Agreement.
- (b) If the AABRTLCC is greater than [REDACTED]% of the ABRTTLCC for any monthly period for any BRT Segment, then DB Co shall submit a detailed remediation plan no later than 10 Business Days following the end of the month to explain how it will reduce the AABRTLCC for the BRT Segment in subsequent period(s), such that the variance will not exceed the [REDACTED]% for the subsequent periods. DB Co shall present progress and achievements of the remediation plan at subsequent Mobility Matters Review Meeting(s).

5.2 The formula to calculate the BRT Lane Closure Adjustment Offset is set out in this Section 5.2.

- (a) For the purposes of Section 5.2 (b), in respect of all BRT Segments for all months:

A = the summation of the AABRTLCC for all segments and all months

T = the summation of the ABRTTLCC for all segments and all months

- (b) The BRT Lane Closure Adjustment Offset for the entire project shall be calculated as follows:

- (i) $BRTLCAO = \$[REDACTED]$;
- (ii) $BRTLCAO$ must be greater than or equal to $\$[REDACTED]$;
- (iii) If $A > T$, then $BRTLCAO$ is $\$[REDACTED]$.

5.3 The formulae to calculate the Monthly BRT Lane Closure Adjustment Contribution are set out in this Section 5.3.

- (a) For the purposes of Section 5.3(b), in respect of each BRT Segment:

$A =$ the AABRTLCC for each BRT Segment in the relevant month

$T =$ the ABRTTLCC for each BRT Segment in the relevant month

- (b) In respect of any given month during the period leading up to West Substantial Completion for each BRT Segment:

(i) If $A > [REDACTED]T$, then Monthly BRT Lane Closure Adjustment Contribution = $[REDACTED]$;

(ii) If $A < T$, then Monthly BRT Lane Closure Adjustment Contribution = $[REDACTED]$

(iii) If $[REDACTED]T \geq A \geq T$, then Monthly BRT Lane Closure Adjustment Contribution = $\$[REDACTED]$

(iv) if the sum of all Monthly BRT Lane Closure Adjustment Contributions in each month prior to West Substantial Completion $< \$[REDACTED]$, then BRT Lane Closure Adjustment for that BRT Segment = $\$[REDACTED]$; and

(v) if the sum of all Monthly BRT Lane Closure Adjustment Contributions in each month prior to West Substantial Completion $> \$[REDACTED]$, then BRT Lane Closure Adjustment for that BRT Segment = the sum of all Monthly BRT Lane Closure Adjustment Contributions in each month prior to West Substantial Completion.

- (c) The BRT Lane Closure Adjustment for the project shall be equal to the sum of the BRT Lane Closure Adjustment for each segment, minus the BRT Lane Closure Adjustment Offset. If the calculated BRT Lane Closure Adjustment for the project is less than $\$[REDACTED]$, then it shall equal $\$[REDACTED]$.

6. PEAK HOUR BRT LANE INTERRUPTIONS

6.1 The City will assess DB Co for Peak Hour BRT Lane Interruptions at a cost of $\$[REDACTED]$ per minute.

6.2 Any time assessed in the cost associated with Peak Hour BRT Lane Interruptions will not be included in calculations of BRT Lane Closure Adjustments.

- 6.3 The City shall assess DB Co for the cost of Peak Hour BRT Lane Interruptions. All Peak Hour BRT Lane Interruptions shall be formulated into a Monthly Peak Hour BRT Lane Interruption Report to be submitted by DB Co with the BRT Lane Closure Analysis Report.
- 6.4 Peak Hour BRT Lane Interruptions shall not be applicable after a BRT segment has been permanently closed.
- 6.5 DB Co shall calculate the cost of Peak Hour BRT Interruptions and deduct this amount from the Construction Period Payment or West Substantial Completion Payment, as applicable, following the most recent Monthly Peak Hour BRT Lane Interruption report in accordance with Project Agreement Article 4 – Payment, and Schedule 21 – Construction Period Payments.
- 7. BRT CLOSURES FOR CONVERSION TO LRT**
- 7.1 When the full BRT Lane Closures occurs for conversion to LRT, only two (2) BRT Lane Closures (one in each direction) will be applied for each segment that is closed.
- 8. APPLICATION**
- 8.1 The Lane Closure provisions of this Schedule 34 will no longer be in effect once West Substantial Completion has been achieved.

PART B MOBILITY MATTERS – LANE CLOSURES

1. DEFINITIONS

In this Schedule 34, the following definitions shall have the following meanings:

- 1.1 “**Aggregate Actual Lane Closures**” or “**AALC**” means the actual number of lanes, or portions thereof that are closed for each monthly period, measured in hours per hour type (“Peak”, “Off Peak”, “Night”).
- 1.2 “**Aggregate Actual Lane Closures Cost**” or “**AALCC**” means the total cost of Lane Closures.
- 1.3 “**Aggregate Target Lane Closures**” or “**ATLC**” means the total target Lane Closures, measured in hours per hour type (“Peak”, “Off Peak”, “Night”), which,
 - (a) are set forth in the Lane Closure Target Letter; and
 - (b) include and account for all requirements of Schedule 15 - Output Specifications.
- 1.4 “**Aggregate Target Lane Closure Cost**” or “**ATLCC**” means the total cost of the target Lane Closures, as set forth in the Lane Closure Target Letter submitted by DB Co at Commercial Close and which has been accepted by the City.
- 1.5 “**Arterial**” has the meaning given in the City of Ottawa’s Road Classification System (City of Ottawa).
- 1.6 “**Blocks**” are the physical units upon which Lane Closure costs are to be calculated for the purposes of this Schedule 34, and
 - (a) for any streets proposed to be occupied by DB Co are delineated between two adjacent intersections, irrespective of whether the intersections are signalized or unsignalized.
 - (b) a block will start and end at the start and end of the intersections on either side of it, but not include the intersections themselves.
 - (c) On OR 174, blocks are delineated between adjacent interchanges, at the mid-point of the road crossing OR 174, and shall include mainline lanes and ramps.

For clarity, a laneway opening shall not constitute an intersection for the purposes of this Section 1.6.
- 1.7 “**Collector**” has the meaning given in the City of Ottawa’s Road Classification System (City of Ottawa).
- 1.8 “**Federal Roadways**” means roadways under the ownership and operation of the Federal Government or the National Capital Commission).
- 1.9 “**High Cost Measures**” means, in respect of a monthly period, discrete Lane Closure saving measures that incur capital expenditure greater than [REDACTED]% of the discrete Lane Closure savings cost.

1.11 **“Lane Closure” or “Lane Closures”** means any reduction in width, obstruction, or closure of a lane in any Block, as a result of the Works, to bus or vehicular traffic or parking and loading between two intersecting streets, including tapers, with the exception of where an equivalent facility to the one that has been closed has been provided, in accordance with Section 1.11 (g) below. All partial width reductions, obstructions, or closures within any Block will be considered as a full Lane Closure. Lane Closures will be measured on a per Block, per hour basis. **“Peak”** means Monday through Friday between the hours of 0630h – 0930h, or 1500h – 1830h. **“Night”** means the hours between 2200h – 0500h. **“Off Peak”** means all other hours not defined as “Peak” or “Night”. Travel lanes shall be classified as Arterial, Major Collector, Collector, Local, City Freeway (OR 174), or Federal, based on the City’s Transportation Master Plan, or if they are federally owned. The following rules apply to Lane Closures:

- (a) Lane Closures will no longer be in effect once East or West Substantial Completion (as applicable) has been achieved, or once closed lanes have been reopened in their ultimate configuration;
- (b) lanes that have limited openings such as “local traffic only” shall be considered not available for use for the purpose of this Section 1.11;
- (c) any reduction in width, obstruction, or closure of a lane, taking place before West Substantial Completion, that is solely as a result of a Utility Company carrying out activities with respect to its own new Utility Company Infrastructure following the handback of the applicable new Utility Company Infrastructure to such Utility Company shall be deemed not to constitute a Lane Closure or contribute to any Lane Closure for the purposes of this Schedule 34;
- (d) any reduction in width, obstruction, or closure of a lane that is solely the result of self-performed Utility Work by a Category 1 Utility Company shall not contribute to any Lane Closure for the purposes of this Schedule 34;
- (e) reduction in width, obstruction, or closure of an on-street bicycle lane shall not constitute a “Lane Closure” for the purposes of this Schedule 34, provided that the traffic lane adjacent to the closed bicycle lane meets the required width for a “shared lane” as outlined in Schedule 15-2 Part 7 Table 7-1.3;
- (f) Lane Closures shall not apply to open travel lanes that are reduced in width from their existing width where such reduced widths are specifically prescribed in Schedule 15-2 Part 2 Article 6 or Schedule 15-2 Part 7;
- (g) where the traffic management associated with a lane closure provides an equivalent facility to the one closed with respect to a) vehicular level of service, b) truck level of service, c) transit level of service, d) lane width, e) posted speed, and f) on-road cycling facilities, such a lane closure shall not be considered a “Lane Closure” for the purposes of this Schedule 34; and
- (h) where a roadway’s ultimate configuration has fewer total lanes than its configuration at Financial Close, the affected road segments shall consider the difference in number of lanes as “closed” until East or West Substantial Completion (as applicable), even if the roadway’s ultimate configuration is achieved prior to East or West Substantial Completion.

- 1.12 **“Lane Closure Adjustment”** or **“LCA”** means the deduction which may be made by The City from DB Co (which amount will be deducted from the West Substantial Completion Payment) as calculated pursuant to Section 5.
- 1.13 **“Lane Closure Analysis Report”** has the meaning given to it in Section 2.3.
- 1.14 **“Lane Closure Measurement and Verification Plan”** has the meaning given to it in Section 6.2 (j) of Part 7 – Traffic and Transit Management and Construction Access to Schedule 15-2 – Design and Construction Requirements. This plan shall outline the means by which the Independent Certifier shall perform their review of the lane closures as described in Section 3.6.
- 1.15 **“Lane Closure Target Letter”** means the letter set out in Appendix F.
- 1.16 **“Left Turn Lane Closure”** means any reduction in width, obstruction, or closure of an exclusive left turn lane within the Road Sections, of Arterial or Collector road classification, at the Site, such that the lane is not available for use by the public due to the Works. For clarity, lanes that have limited openings such as “local traffic only” shall be considered not available for use by the public for the purposes of this Section 1.14.
- 1.17 **“Local”** has the meaning given in City of Ottawa’s Road Classification System (City of Ottawa).
- 1.18 **“Major Collector”** has the meaning given in the City of Ottawa’s Road Classification System (City of Ottawa).
- 1.19 **“Mobility Matters Review Meeting”** has the meaning given in Section 3.7.
- 1.20 **“Monthly Lane Closure Adjustment Contribution”** means the value for any given month that shall contribute to the Lane Closure Adjustment as calculated pursuant to Section 5.
- 1.21 **“Monthly Peak Hour Lane Interruption Report”** means a report to be submitted on a monthly basis (at the same time as the Lane Closure Analysis report) outlining all Peak Hour Lane Interruptions and their costs, as defined in Section 6.
- 1.22 **“Peak Hour Lane Interruptions”** means unplanned interruptions to the operation of roadway lanes, excluding BRT lanes, during Peak periods by either an unplanned event or a planned event exceeding the time restrictions granted. For further clarity, Peak Hour Lane Interruptions would only be for interruptions caused by the actions of DB Co or their subcontractors. Peak Hour Lane Interruptions as defined above are not included in AALC.
- 1.23 **“Right Turn Lane Closure”** means any reduction in width, obstruction, or closure of an exclusive right turn lane within the Road Sections, of Arterial or Collector road classification, at the Site, such that it is not available for use by the public due to the Works. For clarity, lanes that have limited openings such as “local traffic only” shall be considered “not available for use by the public” for the purposes of this Section 1.23.
- 1.24 **“Road Sections”** means the defined portions of the Site where Works are to be undertaken in which the Unit Rate Prices for Lane Closure are to be applied for any Lane Closure, Left Turn Lane Closure or Right Turn Lane Closure. Each of the Road Sections has a Unit Price structure for Lane Closure costs per Block, defined in Appendix E to this Schedule, and based on the

City's roadway classification. Any portion of an individual roadway requiring Lane Closures shall be considered to be a Road Section. A Road Section can be a single isolated block, or a continuous stretch of adjacent blocks having the same roadway classification. All Road Sections are to be identified in the monthly Lane Closure Analysis Reports.

1.25 “**Traffic and Transit Management Plan**” or “**TTMP**” means the plan for the manner in which traffic and transit will be managed during construction activities and the method used to determine the magnitude of the impacts.

1.26 “**Unit Rate Price**” for each Lane Closure, Left Turn Lane Closure or Right Turn Lane Closure means the prices for each Block of each Road Section, and for each type of lane, as set out in Appendix E. The prices are hourly rates.

2. CONTENT AND FORMAT OF THE LANE CLOSURE ANALYSIS REPORT

2.1 DB Co shall quantify its projected occupation of lanes on City roadways on the basis of the formulae and procedures contained in this Schedule 34. DB Co shall monitor its occupation of the lanes on a monthly basis.

2.2 Lane closures on Highway 417 and its interchange ramps shall not be considered as part of this Schedule 34.

2.3 DB Co shall deliver to the City a report summarizing the findings of AALC (the “**Lane Closure Analysis Report**”), on a monthly basis, no later than 5 Business Days after the end of each month.

2.4 DB Co shall include copies of all documents required to fully support the Lane Closure Analysis Report.

2.5 The Lane Closure Analysis Report shall, at a minimum, include the following information for the relevant month:

- (a) using the template shown in Appendix D to this Schedule, a summary of target and actual Lane Closures by Road Section and breakdown by road classification (Arterial, Major Collector, Collector, Local), location, time, date and duration, indicating Peak, Off Peak or Night, including any exceptional changes forecasted for the upcoming monthly period (being changes of plus or minus [REDACTED]% in any Road Section, for Peak, Off Peak or Night periods);
- (b) projected Lane Closures for the remaining duration of the Construction Period along with trends and potential risks associated with these Lane Closures;
- (c) accurate and precise data in support of the items set out in Sections 2.5(a) and 2.5(b);
- (d) presentation of AALC and the AALCC for the applicable month, and on a cumulative basis as of the applicable month;
- (e) establishment of a basis for continued monitoring of Lane Closures and adjustments to the AALC;

- (f) outline of any outstanding issues from any previous Lane Closure Analysis Reports and mitigating strategies to address those issues;
- (g) adjustments to the ATLC and the ATLCC for the applicable month, and on a cumulative basis as of the applicable month;
- (h) DB Co's estimate of the Monthly Lane Closure Adjustment Contribution;
- (i) measurement and verification of Lane Closures in accordance with Lane Closure Measurements and Verification Plan in Section 3.6; and
- (j) summary tables from all previous Lane Closure Analysis Reports delivered by DB Co to the City.

2.6 Following the review and acceptance of the final Lane Closure Analysis Report by the City Representative, the data set out in the Lane Closure Analysis Report will be used by the City to determine the Monthly Lane Closure Adjustment Contribution.

3. PROCEDURES FOR DETERMINING MONTHLY LANE CLOSURE ADJUSTMENT CONTRIBUTIONS

- 3.1 The City shall not consider the following closures of lanes to be Lane Closures for the purposes of this Schedule 34, and such closures of lanes shall not contribute to the Monthly Lane Closure Adjustment Contribution:
- a) where an existing lane width is less than the minimum lane width requirements during construction, specified in Schedule 15-2 Part 7 Table 7-1.3, maintaining the lane as open for traffic operations at its existing width.
- 3.2 DB Co shall not use lane configurations that will remain after West Substantial Completion to determine Lane Closures. For clarity, the lane configuration of each roadway as of Financial Close shall be the configuration used to calculate Lane Closures.
- 3.3 The City shall assess DB Co for the cost of Lane Closures based on the total Lane Closures that occur during Peak, Off Peak, and Night hours. All Lane Closures shall be included in the calculation of the Monthly Lane Closure Adjustment Contribution as provided in Section 5.
- 3.4 The ATLC shall form the benchmark for calculating the Lane Closure cost with respect to the AALC. The AALCC shall be used to calculate the Monthly Lane Closure Adjustment Contribution. The Lane Closure Target shall not be amended, altered or adjusted except by the process described in Section 4.
- 3.5 [Not used]
- 3.6 The measurement and verification of Lane Closure shall be performed by the Independent Certifier. No later than 30 days prior to the initial Lane Closure within any Road Section, DB Co shall provide the City with a Lane Closure Measurement and Verification Plan. All subsequent Lane Closure Analysis Reports are to be based on this plan.

- 3.7 No later than 5 Business Days following the submission of the Lane Closure Analysis Report (or as agreed to between the Parties), DB Co and the City shall convene a review meeting (the “**Mobility Matters Review Meeting**”) to be attended by the DB Co Representative and the City Representative. At the Mobility Matters Review Meeting, DB Co shall present the Lane Closure Analysis Report to the City. The City and DB Co shall discuss the Aggregate Actual Lane Closure for the preceding period, as well as review any proposed “equivalent facilities” as described in Section 1.11(g). DB Co’s measurement and verification of Lane Closure(s) shall be reviewed and confirmed by the City Representative.
- 3.8 DB Co shall assist the City Representative by providing information with respect to Lane Closures and access to the Lane Closure records, and by other means as may reasonably be required to confirm the information in the Lane Closure Analysis Report. The City shall promptly give Notice to DB Co of the details of any disagreement with respect to all or any aspect of the Lane Closure Analysis Report, and the Parties shall then seek to agree to any matters in dispute. The process shall be as follows:
- (a) AALC and AALCC shall be determined at the Mobility Matters Review Meeting;
 - (b) No later than 20 Business Days following each Mobility Matters Review Meeting, or within such period as may be otherwise agreed between the City Representative and the DB Co Representative, acting reasonably:
 - (i) The City shall confirm their acceptance of all or any aspect of the Lane Closure Analysis Report; and
 - (ii) Subject to Section 4, DB Co and the City shall agree to any adjustments to the ATLC and ATLCC.
 - (c) If the City disputes DB Co’s estimate of the Monthly Lane Closure Adjustment Contribution in the Lane Closure Analysis Report, the City shall, no later than 10 Business Days following receipt of the Lane Closure Analysis Report, or within such other period as may be agreed by the City Representative and DB Co, acting reasonably, submit an account to DB Co indicating the difference in calculation between the City’s estimate and DB Co’s estimate of the Monthly Lane Closure Adjustment Contribution. If either DB Co or the City wish to dispute any account presented pursuant this Section 3.8(c), they must do so by written Notice to the other Party no later than 10 Business Days following receipt of such account. The City Representative and the DB Co Representative shall use reasonable efforts to resolve the dispute for an additional 10 Business Days. If there is no agreement within such 10 Business Days, then either Party may refer the matter to the Dispute Resolution Procedure;
 - (d) If neither Party objects in accordance with Section 3.8(c), or, following final determination of the disputed account in accordance with Section 3.8(c), DB Co shall use the relevant Monthly Lane Closure Adjustment Contribution to determine the Lane Closure Adjustment. The Lane Closure Adjustment shall be shown as a separate item within the invoice for the West Substantial Completion Payment;
- 3.9 For the purpose of calculating the Lane Closure Adjustment, the calculation shall be completed no later than 60 days prior to the Scheduled West Substantial Completion Date (or at a later date as mutually agreed to by the City Representative and DB Co), comparing the total AALCC of

each Road Section for the entire Construction Period to the total ALTCC for that same Road Section for the entire Construction Period. If, subsequent to this calculation being completed, there is a change to the Scheduled West Substantial Completion Date, DB Co shall amend their Lane Closure Target (in accordance with Section 4) and the Lane Closure Adjustment. For clarity, over-performance of any one Road Section cannot be added to underperformance of any other.

4. PROCESS FOR AMENDING THE AGGREGATE TARGET LANE CLOSURE AND ASSOCIATED COST

- 4.1 In all cases, changes to the ATLC and ATLCC must be consistent with the principles outlined in the TTMP. Changes proposed must provide reference to the TTMP or a site-specific Traffic Control Plan (as defined in Schedule 15-2 Part 7).
- 4.2 DB Co and the City shall, acting reasonably, agree to make any adjustments to the ATLC, ATLCC, AALC and AALCC, but only in the event of changes implemented due to an amendment of the Project Agreement, a Relief Event that is also a Delay Event pursuant to Section 32.1 (a) (xi) of the Project Agreement, or a Variation that would cause Lane Closure changes. The City, at its discretion, may allow a revision to the Target Letters to reflect an agreed-upon change in Project Schedule, in the absence of an amendment of the Project Agreement or a Variation.
- 4.3 The Party requesting an amendment to the ATLC in accordance with Section 4.2 shall initiate a Variation in accordance with Schedule 22 – Variation Procedure. The amended TTMP shall include a detailed analysis of the impacts to traffic and transit services, including an analysis of Lane Closure requirements. The amended TTMP shall include a recommendation regarding amendments to the ATLC. Both the City and DB Co shall agree to the amended ATLC no later than 20 Business Days following receipt of amended TTMP. If there is no agreement within a further 10 Business Day period, then either Party may refer the matter to the Dispute Resolution Procedure.

5. CALCULATION OF MONTHLY LANE CLOSURE ADJUSTMENT CONTRIBUTION AND LANE CLOSURE ADJUSTMENT

- 5.1 Comparing Aggregate Actual Lane Closures Costs to Aggregate Target Lane Closure Costs:
 - (a) After the acceptance of the final Lane Closure Analysis Report described in Section 2 and prior to the West Scheduled Substantial Completion Date, DB Co shall compare the total AALCC for each Road Section to the total ATLCC for each Road Section, and if the AALCC is more than [REDACTED]% greater than the ATLCC, for any Road Section, then DB Co shall calculate the Monthly Lane Closure Adjustment Contribution set out in Section 5.2 and deduct the amount of the Lane Closure Adjustment from the West Substantial Completion Payment to be made in accordance with the Project Agreement. For clarity, the Lane Closure Adjustment deduction from the West Substantial Completion Payment shall not be subject to the limitations set out in Article 47.4 of the Project Agreement;
 - (b) If the AALCC is greater than [REDACTED]% of the ATLCC for any monthly period for any Road Section, then DB Co shall submit a detailed remediation plan no later than

10 Business Days following the end of the month to explain how it will reduce the AALCC for the Road Section in subsequent period(s), such that the variance will not exceed the [REDACTED]% for the subsequent periods. DB Co shall present progress and achievements of the remediation plan at subsequent Mobility Matters Review Meeting(s).

5.2 The formulae to calculate the Monthly Lane Closure Adjustment Contribution are set out in this Section 5.2.

(a) For the purposes of Section 5.3(b), in respect of each Road Section:

A = the AALCC for each Road Section in the relevant month

T = the ATLCC for each Road Section in the relevant month

(b) In respect of any given month during the period leading up to West Substantial Completion for each Road Section:

(i) If $A > [\text{REDACTED}]T$, then Monthly Lane Closure Adjustment Contribution = $(A - [\text{REDACTED}])$;

(ii) If $A < T$, then Monthly Lane Closure Adjustment Contribution = $[\text{REDACTED}]$

(iii) If $[\text{REDACTED}]T \geq A \geq T$, then Monthly Lane Closure Adjustment Contribution = $[\text{REDACTED}]$

(iv) if the sum of all Monthly Lane Closure Adjustment Contributions in each month prior to West Substantial Completion $< [\text{REDACTED}]$, then Lane Closure Adjustment for that Road Section = $[\text{REDACTED}]$; and

(v) if the sum of all Monthly Lane Closure Adjustment Contributions in each month prior to West Substantial Completion $> [\text{REDACTED}]$, then Lane Closure Adjustment for that Road Section = the sum of all Monthly Lane Closure Adjustment Contributions in each month prior to West Substantial Completion.

6. PEAK HOUR LANE INTERRUPTIONS

6.1 The City will assess DB Co for Peak Hour Lane Interruptions in accordance with Table 6.1 for the following non-performance measures per lane that is not open.

Table 6.1 - Peak Hour Lane Interruption Costs

| Road Classification* INCLUDING Transit Routes and Lanes | Initial value to be assessed if lane is not open as required | Additional value to be assessed at the end of each additional 10-minute period that the lane is not open. |
|---|--|---|
| Federal Roadways | \$(REDACTED) | \$(REDACTED) |

6.2 Any time assessed in the cost associated with Peak Hour Lane Interruptions will not be included in calculations of Lane Closure Adjustments.

6.3 The City shall assess DB Co for the cost of Peak Hour Lane Interruptions. All Peak Hour Lane Interruptions shall be formulated into a Monthly Peak Hour Lane Interruption Report to be submitted by DB Co with the Lane Closure Analysis Report.

6.4 DB Co shall calculate the cost of Peak Hour Lane Interruptions and deduct this amount from the Construction Period Payment or West Substantial Completion Payment, as applicable, following the most recent Monthly Peak Hour Lane Interruption Report in accordance with Project Agreement Article 4 – Payment, and Schedule 21 – Construction Period Payments.

7. APPLICATION

7.1 The Lane Closure provisions of this Schedule 34 will no longer be in effect once West Substantial Completion has been achieved.

APPENDIX A

BRT LANE CLOSURE REPORT SUBMITTAL REQUIREMENTS

| Total BRT Lane Closure Summary | Lane Closure Unit Rate | BRT Lane Closure Target | | Actual BRT Lane Closures | | Percent Variance between columns v and iii of this table | Monthly BRT Lane Closure Adjustment Contribution |
|--------------------------------|---|-----------------------------------|---|--------------------------|--|--|--|
| | Unit Rate based on roadway classification and time of day | Number of Target Closures (hours) | Cost of BRT Lane Closure for monthly period (calculated based on number of closures multiplied by Unit Price Rate, multiplied by number of hours) | Usage | Cost of BRT Lane Closures for monthly period (calculated based on number of closures multiplied by Unit Price Rate, multiplied by number of hours) | | |

[See Attached]

SCHEDULE 35**PERMITS, LICENCES, APPROVALS AND AGREEMENTS**

- a) The Permits, Licences, Approvals and Agreements may include, but are not limited to those included in the tables below.
- b) The following Responsibility Tables will be updated by addendum, if applicable, upon receipt of further information.
- c) The following Responsibility Tables are for the purpose of the performance of the Works.
- d) If, for any permit, licence, approval or authorization listed in this Schedule 35, where there is a legislative requirement for the applicant to be the City, then DB Co shall act as the City's agent and will be responsible for all aspects of the application preparation and submittal process at DB Co's own cost and expense. If required, the City will sign off on the application.
- e) All other Permits, Licences, Approvals and Agreements not listed herein or otherwise noted, are the responsibility of DB Co.

[NOTE to PROPONENTS: the Ontario Ministry of the Environment and Climate Change (MOECC) has changed to the Ontario Ministry of the Environment, Conservation and Parks (MECP). For the purpose of this Schedule they are considered to be the same.]

Stage 2 LRT PLAA (Draft)

| Permits, Licenses and Approvals | Issuing Agency | Status | Responsibility of: City of Ottawa or DB Co. or Other |
|---|----------------|--|--|
| Site Plan Control – Development Outside of the Public Transit System Right-of-Way | City of Ottawa | Not started. Necessary where required under specific circumstances such as infrastructure not part of the LRT infrastructure, e.g. parking lot redesign and over-build of stations. Consultation with the City will be required. | DB Co |
| Building and Demolition Permits – Stations and MSF | City of Ottawa | Not started. | DB Co |
| Noise By-law Exemption | City of Ottawa | Not started. | DB Co |
| Approval under Sewer Use By-law to discharge waste water | City of Ottawa | Not started. | DB Co |
| Road Cut Permit (utility circulation) | City of Ottawa | Not started. | DB Co |
| Temporary Construction-Related Encroachment Permit | City of Ottawa | Not started. | DB Co |
| Temporary Construction Easements | City of Ottawa | Not started. | DB Co |
| Street or Lane Closing/Opening | City of Ottawa | Not started. | DB Co |
| Zoning By-Law Amendment | City of Ottawa | Not started. Necessary where required under specific circumstances , e.g. station related development. | DB Co |

| Permits, Licenses and Approvals | Issuing Agency | Status | Responsibility of: City of Ottawa or DB Co. or Other |
|--|-----------------------------|--|--|
| | | Consultation with the City will be required. Where associated with station related development and | |
| Sign Permit | City of Ottawa | Not started. | DB Co |
| Permit under Ontario Heritage Act | City of Ottawa | Not started. May be necessary if heritage resources affected. | DB Co |
| Emergency Services Approval – Fire and Life Safety | City of Ottawa | Not started. | DB Co |
| Offer to Connect (“OTC”) | TBD | Not started. | The City will execute the Offers To Connect (“OTC”) with Hydro Ottawa; however, DB Co, at its sole cost and expense, to complete all work required to secure and fulfill OTC agreements including PA Schedule 15-2 – Design and Construction Requirements.c”) with Hydro Ottawa; however, DB Co, at its sole cost and expense, to complete all work required to secure and fulfill OTC agreements including PA Schedule 15-2 – Design and Construction Requirements. |
| Electrical Plan Review | Electrical Safety Authority | Not started. | DB Co |

| Permits, Licenses and Approvals | Issuing Agency | Status | Responsibility of: City of Ottawa or DB Co. or Other |
|--|--|--------------|--|
| Construction Registration Permit | Electrical Safety Authority | Not started. | DB Co |
| Notice of Project as per <i>Occupational Health and Safety Act</i> (Ontario) | Ministry of Labour | Not started. | DB Co |
| Registration of Constructors and Employers Engaged in Construction | Ministry of Labour | Not started. | DB Co |
| Permit to Take Water | Ontario Ministry of the Environment and Climate Change | Not started. | DB Co |
| Environmental Compliance Approval (ECA)– SWM Facilities | Ontario Ministry of the Environment and Climate Change | Not started. | DB Co |
| ECA – Water and Sanitary Sewer | Ontario Ministry of the Environment and Climate Change (In certain instances the City of Ottawa has delegated authority from MOECC for review) | Not started. | DB Co |

| Permits, Licenses and Approvals | Issuing Agency | Status | Responsibility of: City of Ottawa or DB Co. or Other |
|--|--|--|--|
| ECA – Air and Noise | Ontario Ministry of the Environment and Climate Change | Not started. | DB Co |
| Environmental Activity and Sector Registry (EASR) | Ontario Ministry of the Environment and Climate Change | Not started. | DB Co |
| Approvals from MOECC under Ontario Environmental Assessment Act O. Reg 231/08 for the LRT Confederation Line West Extension and Confederation Line East Extension. | Ontario Ministry of the Environment and Climate Change | Separate approvals have been received from the MOECC Minister for the Environmental Project Reports for Confederation Line West Extension and Confederation Line East Extension. The EPR reports and approvals are available in the data room. | City |

| Permits, Licenses and Approvals | Issuing Agency | Status | Responsibility of: City of Ottawa or DB Co. or Other |
|--|--|--|---|
| Approvals from MOECC under Ontario Environmental Assessment Act O. Reg 231/08 for the Bayshore to Moodie Bus Rapid Transit (BRT) Conversion to Light Rail Transit (LRT) | Ontario Ministry of the Environment and Climate Change | Approvals have been received from the MOECC Minister for the Environmental Project Report for the Bayshore to Moodie Bus Rapid Transit (BRT) Conversion to Light Rail Transit (LRT) The EPR reports and approvals are available in the data room. | City |
| Approval from MOECC under Ontario Environmental Assessment Act through the Class EA for Provincial Transportation Facilities - Highway 417 Expansion preliminary design. | Ontario Ministry of the Environment and Climate Change | MTO has completed the Highway 417 (Ottawa Queensway) from Highway 416 to Easterly to Anderson Road, Preliminary Design and Environmental Assessment, GWP 663-93-00, Transportation Environmental Study Report (TESR) in accordance with their Class EA process for Provincial Transportation Facilities. | MTO |
| Approval from MOECC under Ontario Environmental Assessment Act through the Class EA for Provincial Transportation Facilities - Highway 417 Expansion detail design. | Ontario Ministry of the Environment and Climate Change | A [REDACTED]% design has been undertaken by WSP for the MTO DB Co will be required to complete a detail design documented in a Design and Construction Report (DCR) for MTO Highway 417 components | DB Co |
| Amendments to the approvals of MOECC under Ontario Environmental Assessment | Ontario Ministry of the | An addendum to the Confederation Line West Extension Environmental | DB Co is responsible for any other addendums to the approved to the |

| Permits, Licenses and Approvals | Issuing Agency | Status | Responsibility of: City of Ottawa or DB Co. or Other |
|---|--|---|--|
| Act O. Reg 231/08 | Environment and Climate Change | Project Report is being prepared by the City and for the Bayshore terminal bus station and lay-by area and will be provided to DB Co in the data room. | Environmental Project Reports that are required following Financial Close. |
| Amendments to the approvals of MOECC under Ontario Environmental Assessment Act – Highway 417 Expansion | | The City of Ottawa has completed the Municipal Class Environmental Assessment (EA) Study for the Maitland Avenue Highway 417 Bridge Cycling Improvements. The 30 day review period will be complete on June 8, 2018. No Part II Order Requests were received and the MTO Clearance letter has been posted | DB Co responsible to incorporate these changes into the DCR as required. |
| Endangered Species Act Permits | Ontario Ministry of Natural Resources and Forestry | City has identified Species at Risk for which permitting under ESA will be required. The City has initiated the permits. | The City of Ottawa will submit all approval documentation with DB Co as an agent for the implementation of the permits conditions related to design and construction activities. The City of Ottawa will be responsible for the monitoring portion of the permit conditions. Permits that have been received prior to financial close will be provided. Pending permit applications will also be provided with the understanding the proposed mitigation measures are conditional until the permit is |

| | | Confederation East Extension Alignment. Functional Design Approval in Principle received from NCC on June 20, 2018 for Moodie extension. | |
| NCC Concept Design Approval | NCC | ~ May 2018 | City based on DB Co's proposal design |
| NCC Property Transaction Approval | NCC | ~ May 2018 | City |
| NCC Federal Land Use, Design and Transaction Approval | NCC | January 1 2019 – December 31 2021 | City |
| Transport Canada approval to build a SWM pond in the airport's restricted zone | Transport Canada | Letter of conditions from Transport Canada received on August 29, 2017. | DB Co to implement mitigation measures described in July 17, 2017 letter from NCC to Transport Canada except for the baseline bird monitoring program reporting to Transport Canada (August 2017 to December 2018) to be completed by the City. |

| Permits, Licenses and Approvals | Issuing Agency | Status | Responsibility of: City of Ottawa or DB Co. or Other |
|---|--------------------------------|--|---|
| Ontario <i>Invasive Species Act</i> obligations regarding propagation of restricted species | MOECC | Presence of dog strangling vine has been noted by the City during 2017 field surveys in the Pinecrest creek corridor. | DB Co to complete restricted invasive species surveys before project is carry out and to incorporatated mitigation measures into the Environmental Management Plan to ensure legal obligations are met. |
| Provincial Secondary Land Use Program – Real Estate transaction management review and approval process. | Hydro One Networks Inc. (HONI) | City is currently working with HONI and HONI have issued an approval in principle based on RCD. HONI will require well-advanced detail design prior to a final approval of all proposed SI / NMI real estate transaction within the transmission corridor. Final approval from HONI will require DB Co to work closely with HONI during detail design phase. | City |

APPENDIX A – LISTED DB Co PLAAs

| Listed DB Co PLAA's | Timeline for Final Determination by the City |
|---|--|
| Site Plan Control - Development Outside of the Public Transit System Right-of-Way | [REDACTED] |
| Building and Demolition Permits - Stations and MSF | [REDACTED] |
| Noise By-law Exemption * If approved by ward councillor | [REDACTED] |
| Approval discharge waste water - Under Sewer Use By-law | [REDACTED] |
| Road Cut Permit Utility Circulation | [REDACTED] |
| Temporary Construction-Related Encroachment Permit ROW/Property | [REDACTED] |

| Listed DB Co PLAA's | Timeline for Final Determination by the City |
|--|--|
| Street or Lane Closing/Opening | [REDACTED] |
| Zoning By-Law Amendment | [REDACTED] |
| Sign Permit | [REDACTED] |
| Permit Under Ontario Heritage Act | [REDACTED] |
| Emergency Services Approval - Fire and Life Safety | [REDACTED] |

APPENDIX B – INDICATIVE MTO RESPONSE TIMES

- a) The following table identifies indicative MTO response times for certain DB Co Permits, Licences, Approvals and Agreements for which the MTO is the issuing Governmental Authority. The indicative MTO response times stated below are provided for information only and shall not be binding on the MTO, the City or any City Party. DB Co shall not be entitled to any relief from its obligations under the Project Agreement or additional time or compensation as a result of a failure of the MTO to approve or respond within such indicative response times.

| Deliverable | Indicative MTO Response Times |
|--|--------------------------------------|
| Addenda to MTO Design Criteria | [REDACTED] |
| Proposal for use of products not on DSM (including samples, justification, etc. as applicable) | [REDACTED] |
| Final Eligibility Letter for EA Clearance and comments/responses | [REDACTED] |
| Designation of Construction Zone Associated speed reductions | [REDACTED] |
| Temporary PHM-125 | [REDACTED] |
| Permanent PHM-125 | [REDACTED] |
| Variations to Permitted Periods | [REDACTED] |
| Application(s) for extended closure | [REDACTED] |
| Application(s) for full closure | [REDACTED] |

| | |
|---|------------|
| Ontario Regulation (for dedicated bus lane) | [REDACTED] |
| Closures (outside Permitted Periods, Sundays, Full Closure) | [REDACTED] |
| Encroachment Permits | [REDACTED] |

SCHEDULE 36
INTERFACE AGREEMENT
[REDACTED]

**SCHEDULE 37
EXTENSION AND ADDITIONAL PHASES**

**ARTICLE I
DEFINITIONS**

1.1 Definitions

In this Schedule 37, unless the context otherwise requires:

- (a) **“City Extension Requirements”** means the proposal delivered by the City pursuant to Section 2.2(c).
- (b) **“DB Co Extension Proposal”** means the proposal delivered by DB Co pursuant to Sections 2.2(d) and (e).
- (c) **“Extension Contractor”** means a Person engaged by the City to perform any part of a System Extension, which Person may or may not be DB Co.
- (d) **“Extension Lenders”** means any Person or Persons who provide financing to an Extension Contractor or to DB Co in respect of a System Extension, and, where the context so permits, prospective financiers or lenders.
- (e) **“Extension Notice Response”** means the response delivered by the DB Co pursuant to Section 2.2(b).
- (f) **“Extension Permits, Licences and Approvals”** means all permissions, consents, approvals, certificates, permits, licences, statutory agreements and authorizations needed to complete a System Extension described in the City Extension Requirements in accordance with Applicable Law.
- (g) **“Extension Work”** means the design, construction, installation, testing, commissioning and completion of a System Extension, including rectification of any Extension Work Minor Deficiencies.
- (h) **“Extension Work Minor Deficiencies”** means any defects, deficiencies and items of outstanding work which would not materially impair the City’s use and enjoyment of the System Extension.
- (i) **“Integrated System Extension”** means the development, testing, commissioning and certification of additional facilities, infrastructure, electrical and mechanical equipment, computer hardware and systems, including communication and control systems, extending, and connected with, the Existing Confederation Line, Confederation Line East Extension, and/or Confederation Line West Extension, such that all components of the System Infrastructure, as so extended, function together as one coherent fully integrated system.
- (j) **“Notice of Extension”** means the notice delivered by the City pursuant to Section 2.2(a).
- (k) **“Non-Integrated System Extension”** means the development, testing, commissioning and certification of additional facilities, infrastructure, electrical and mechanical equipment, computer hardware and systems, including communication and control systems, in order to form a transit system that connects with the Existing Confederation Line, Confederation Line East Extension or

Confederation Line West Extension, at a single interchange point such that the other components of the Existing Confederation Line, Confederation Line East Extension and Confederation Line West Extension do not form part of a coherent integrated system with such extended transit system.

- (l) **“DB Co Extension Proposal”** means the proposal delivered by DB Co pursuant to Section 2.2(d).
- (m) **“Reciprocal Agreement”** means the agreement to be executed in the event of a Non-Integrated System Extension as described in further detail in Section 3.1(e).
- (n) **“System Extension”** means either an Integrated System Extension or a Non-Integrated System Extension.

ARTICLE II SYSTEM EXTENSION

2.1 System Extension

- (a) The City and DB Co acknowledge that the City may, in its Discretion, elect to pursue one or more System Extensions during the Project Term. The City may pursue any System Extension through an Extension Contractor or through a negotiated agreement with DB Co in accordance with this Schedule 37. In the event the City elects to engage an Extension Contractor, the City may decide which Persons are eligible for consideration, and such persons may or may not include DB Co or any DB Co Party, in the City’s discretion, and the City may use any form of competitive procurement, sole-source contract, lease or transaction structure that the City in its Discretion decides. If the City elects to negotiate an agreement with DB Co, the Parties shall follow the process set out in Section 2.2. Notwithstanding the foregoing, the City shall not implement a System Extension in accordance with this Schedule 37 through a negotiated agreement with DB Co for any System Extension in respect of which capital costs are reasonably anticipated to exceed \$[REDACTED].
- (b) The City may in its Discretion elect to implement a System Extension by way of a Variation in which case Section 31.1 of the Project Agreement and the provisions of Schedule 22 – Variation Procedure shall apply in respect of such System Extension.
- (c) The City may in its Discretion elect to procure or negotiate, as the case may be, the performance of Extension Work in respect of a System Extension through consolidated or separate procurements or negotiations.
- (d) For clarity, the City may pursue a System Extension at any time or times pursuant to any of the alternatives set out in this Section 2.1 in its Discretion. In the event the City has elected to pursue a System Extension in accordance with this Section 2.1, the City may, at any time prior to entering into a binding agreement in respect of the System Extension, in its Discretion, elect to cease pursuing the System Extension under the chosen alternative and pursue the same System Extension under a different alternative process.

2.2 Negotiation between the City and DB Co of Extension Work

- (a) If the City notifies DB Co that it wishes to negotiate with DB Co to perform Extension Work, the City shall provide DB Co with a Notice of Extension which will include information respecting the project, including:
 - (i) a description of the scope of the Extension Work;
 - (ii) preliminary “term sheet level” output specifications for the Extension Work, including: details with respect to alignment, number of stations, length of track (in kilometres), modelling results and performance expectations with respect to the System Extension, as-builts for Existing Infrastructure and utilities, condition reports, results of environmental assessments, development plans, stakeholder engagement information, location and capacity requirements of any maintenance and storage facilities, and
 - (iii) a preliminary schedule and required timelines for completion of the Extension Work.
- (b) Within a period of 30 days after the date of receipt of the Notice of Extension, DB Co shall deliver to the City its Extension Notice Response advising the City whether or not DB Co desires to proceed to the next stage of negotiation with the City in respect of the System Extension. In the event DB Co desires to proceed, DB Co shall, within a period of 60 days after the delivery of its Extension Notice Response, deliver to the City a preliminary cost estimate and schedule for the Extension Work.
- (c) If the City elects, in its Discretion, to continue to consider DB Co for the Extension Work, the City shall within a period of 120 days after the date of receipt of DB Co’s Extension Notice Response, deliver its City Extension Requirements. The City Extension Requirements (which shall be non-binding on the City) shall include:
 - (i) a draft heads of terms agreement for the Extension Work;
 - (ii) draft output specifications and commissioning processes for the System Extension;
 - (iii) draft “term sheet level” parameters of the payment mechanism to be used in respect of the Extension Work; and
 - (iv) guidelines with respect to the structure of construction or permanent financing to be secured by DB Co;
- (d) Within a period of 150 days after the date of receipt of the City Extension Requirements, DB Co shall deliver to the City the DB Co Extension Proposal which shall be non-binding on DB Co. The DB Co Extension Proposal shall include:
 - (i) a detailed cost estimate and construction schedule in respect of the Extension Work;
 - (ii) any impact the Extension Work, would have on DB Co’s activities under the Project Agreement;

- (iii) any contemplated amendments to the Project Agreement to coordinate the Extension Work;
- (iv) the expected Direct Costs of DB Co and each Subcontractor that will be incurred in respect of the Extension Work, including:
 - (A) any Capital Expenditure that will be incurred; and
 - (B) any other costs that will be incurred, reduced or avoided and the impact on DB Co's cash flows from incurring, reducing or avoiding such costs;
- (v) preliminary terms of the financing structure specified in the City Extension Requirements;
- (vi) any Extension Permits, Licences and Approvals that must be obtained or any Permits, Licences and Approvals amended for the Extension Work, to be implemented;

in each case, together with such supporting information and justification as is reasonably required.

- (e) In preparing the DB Co Extension Proposal, DB Co shall include sufficient information to demonstrate to the City's satisfaction, acting reasonably, that:
 - (i) DB Co has used or has obliged each Subcontractor (or will oblige any Subcontractor not yet selected) to use commercially reasonable efforts, including the use of competitive quotes or tenders to minimize costs in respect of the System Extension;
 - (ii) except as otherwise set out herein, all costs of DB Co and each Subcontractor are limited to Direct Costs;
 - (iii) DB Co and any Subcontractor shall charge only the margins for overhead and profit as set out in Appendix B to Schedule 22 – Variation Procedure (such margins each calculated on the basis of the applicable Direct Costs so that no margin of DB Co or any Subcontractor is calculated on any other margin under the Project Agreement of DB Co or any Subcontractor), and no other margins or mark ups;
 - (iv) the margins for overheads and profit as set out in Appendix B to Schedule 22 – Variation Procedure as applicable to DB Co's Direct Costs shall only be chargeable on Direct Costs of DB Co, such that DB Co shall not charge any margins on any amounts charged by any Subcontractors;
 - (v) all costs of completing the Extension Work, including Capital Expenditures, reflect labour rates applying in the open market to providers of services similar to those required for the Extension Work;
 - (vi) DB Co has mitigated or will mitigate the impact of the Extension Work on DB Co's obligations under the Project Agreement, including on the Works Schedule, the expected usage of utilities, and the Direct Costs to be incurred; and

- (vii) DB Co will use commercially reasonable efforts to obtain the best value for money when procuring any work, services, supplies, materials or equipment required in respect of the Extension Work, and will comply with all Good Industry Practice in relation to any such procurement, to a standard no less than DB Co would apply if all costs incurred were to its own account without recourse to the City, including using commercially reasonable efforts to mitigate such costs.
- (f) Subject to Section 2.2(g), as soon as practicable after the receipt of the DB Co Extension Proposal, the City and DB Co shall, in good faith and acting reasonably, negotiate the terms of the binding agreement for the performance of the Extension Work, as well as any necessary amendments to the Project Agreement, based on the contents of the City Extension Requirements and the DB Co Extension Proposal.
- (g) Notwithstanding anything contained in this Schedule 37, except as may be the subject matter of a competitive procurement process, no agreement relating to the subject matter of this Schedule 37 shall be effective unless entered into in writing by each of the Parties and the entering into of same shall be subject to each Party's Discretion. Either Party may in its Discretion elect to cease negotiations at any time in the process set out in this Section 2.2 prior to the signing of such written agreement.

ARTICLE III DB CO COOPERATION

3.1 DB Co Cooperation with the City and Interface with an Extension Contractor

- (a) In the event the City pursues a System Extension with an Extension Contractor that is not DB Co, subject to Section 3.1(b) DB Co shall use commercially reasonable efforts to provide such assistance to the City as the City may request, acting reasonably. Such assistance shall include but is not limited to:
 - (i) the development of technical specifications in respect to the Extension Work, and the evaluation of designs proposed by prospective Extension Contractors to ensure compatibility with the deliverables under the Project Agreement and other items as specified by the City;
 - (ii) permitting the City access to relevant information respecting the LMSF and other items as specified by the City;
 - (iii) advising the City on potential modifications to the Extension Work, that could result in cost savings or other benefits to the City; and
 - (iv) the development of an interface protocol between the City, DB Co and the Extension Contractor.

The City and DB Co's obligations under this Section 3.1(a) shall be subject to and in accordance with the provisions of Schedule 24 – Intellectual Property.

- (b) The City shall pay DB Co reasonable consulting fees in respect of the assistance DB Co provides pursuant to this Section 3.1. Such consulting fees shall be agreed by the parties prior to DB Co providing assistance to the City and shall be invoiced on a monthly basis

(or such other period as the parties may agree) and shall be paid within 30 days of receipt of an invoice from DB Co. Each DB Co invoice shall set out in reasonable detail, the nature of assistance provided in the invoice period, the personnel involved and the time committed by DB Co personnel in respect of such assistance.

- (c) As soon as practicable after the City provides notice to DB Co that the City has reached a binding agreement with an Extension Contractor, the City and DB Co shall meet with the Extension Contractor and, in good faith and acting reasonably, negotiate and execute an interface agreement and/or construction procedures agreement to govern matters relating to the coordination of DB Co's activities in respect of the Project Operations and the Extension Contractor's activities relating to the Extension Work. The City shall also include, in its agreement with any Extension Contractor, an obligation on the Extension Contractor to negotiate with the City and DB Co in the terms of the interface agreement and/or construction procedures agreement in good faith and acting reasonably.
- (d) In the event of an Integrated System Extension, the agreement to be negotiated between the City, DB Co and the Extension Contractor pursuant to Section 3.1(c) shall include provisions related to:
 - (i) the rights and obligations of the City, DB Co and the Extension Contractor in respect of the physical linking, testing and commissioning, safety and system certification of the System and the Integrated System Extension;
 - (ii) commissioning requirements with respect to the extended lines; and
 - (iii) a protocol with respect to the testing of the entire Integrated System Extension to ensure integration and ability for the operation of the entire line as contemplated in the Output Specifications and the final output specifications developed in respect of the Integrated System Extension.
- (e) In the event of a Non-Integrated System Extension, the City, DB Co, the Extension Contractor, and the Extension Lenders shall execute a reciprocal agreement in a form to be agreed to between the parties acting reasonably and negotiating in good faith (the "**Reciprocal Agreement**"). The Reciprocal Agreement shall govern the rights of the parties in respect of the station, infrastructure or other location on the System Infrastructure which has an interchange point with the Non-Integrated System Extension and shall govern matters such as:
 - (i) reciprocal easements or other rights-of-access;
 - (ii) appropriate cost sharing arrangements;
 - (iii) sharing of information;
 - (iv) decision making process regarding matters affecting the interchange between the System Infrastructure and the Non-Integrated System Extension; and
 - (v) mutual repair obligations of structural or other elements in common between the System Infrastructure and the Non-Integrated System Extension.
