THIS PROJECT AGREEMENT is made as of the [•] day of [•], 20[•]

BETWEEN:

THE CITY OF OTTAWA

(the “City”)

AND:

EAST WEST CONNECTORS GP, [REDACTED]

(“DB Co”)

WHEREAS:

- A. A new light rail transit system is currently under construction in Ottawa, Ontario, being an approximately 12.5 kilometer line along the City’s Bus Rapid Transit corridor from Blair station in the east to Tunney’s Pasture station in the west (the “**Existing Confederation Line**”), which is scheduled to be completed in 2018.
- B. Pursuant to the City’s 2013 Transportation Master Plan, the City wishes to procure the design, construction, installation, testing, commissioning and completion of extensions to the Existing Confederation Line, including (i) extensions west from the Tunney’s Pasture station to the Baseline and Moodie stations (the “**Confederation Line West Extension**”), and (ii) an extension east from the Blair station to the Trim station (the “**Confederation Line East Extension**”), together with certain other Works in relation thereto as described herein (collectively, the “**Project**”).
- C. DB Co will carry out and perform all Works necessary to complete the Project.
- D. The City and DB Co wish to enter into this project agreement (the “**Project Agreement**”), which sets out the terms and conditions upon which DB Co shall perform the Works and complete the Project.
- E. The construction and completion of the Project will provide an overall improvement to the quality of life of the citizens of Ottawa and its outlying regions as well as to visitors to the City.
- F. Public ownership and control of the Existing Confederation Line and the Project will be preserved.
- G. With a view to ensuring that both Parties are able to properly and effectively discharge their respective duties, functions and responsibilities under Applicable Law, it is the intent that the City and DB Co work collaboratively, responsibly and cooperatively throughout the Project Term.

NOW THEREFORE in consideration of the mutual covenants and agreements of the Parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties covenant and agree as follows:

1. DEFINITIONS AND INTERPRETATION

1.1 Definitions and Interpretation

- (a) This Project Agreement shall be interpreted in accordance with Schedule 1 – Definitions and Interpretation.
- (b) This Project Agreement is comprised of this executed agreement and the following documents, all of which are hereby incorporated by reference into and form part of this Project Agreement:

| Schedule No. | Description |
|---------------------|---|
| Schedule 1 | - Definitions and Interpretation |
| Schedule 2 | - Completion Documents |
| Schedule 3 | - Subcontractor's Direct Agreement |
| Schedule 4 | - Lenders' Direct Agreement |
| Schedule 5 | - Construction Contractor's Direct Agreement |
| Schedule 6 | - Independent Certifier Agreement |
| Schedule 7 | - Letters of Credit |
| Schedule 8 | - DB Co Parties |
| Schedule 9 | - Key Individuals |
| Schedule 10 | - Review Procedure |
| Schedule 11 | - Integrated Management System Requirements |
| Schedule 12 | - Works Scheduling Requirements |
| Schedule 13 | - DB Co Proposal Extracts |
| Schedule 14 | - Testing & Commissioning |
| Schedule 15 | - Output Specifications |
| Schedule 16 | - Encumbrances |
| Schedule 17 | - Environmental Obligations |
| Schedule 18 | - Communication and Stakeholder Engagement Obligations |
| Schedule 19 | - Procurement Monitoring and Implementation Plan |
| Schedule 20 | - Lands |
| Schedule 21 | - Construction Period Payments |
| Schedule 22 | - Variation Procedure |
| Schedule 23 | - Compensation on Termination |
| Schedule 24 | - Intellectual Property |
| Schedule 25 | - Insurance and Performance Security Requirements |
| Schedule 26 | - Record Provisions |
| Schedule 27 | - Dispute Resolution Procedure |
| Schedule 28 | - Refinancing |
| Schedule 29 | - Form of Performance Guarantee of Construction Guarantor |
| Schedule 30 | - Insurance Trust Agreement |
| Schedule 31 | - DB Co Information |
| Schedule 32 | - [REDACTED] |
| Schedule 33 | - Works Report Requirements |
| Schedule 34 | - Mobility Matters |
| Schedule 35 | - Permits, Licenses, Approvals and Agreements |
| Schedule 36 | - Interface Agreement |
| Schedule 37 | - Extension and Additional Phases |
| Schedule 38 | - Utility Baseline Report |

- (c) The documents comprising this Project Agreement are complementary and what is called for by any one of them shall be interpreted as if called for by all, except in the event of ambiguities, conflicts or inconsistencies, in which case Section 1.2 shall apply.
- (d) Except for those parts of DB Co's proposal which are incorporated by explicit reference into this Project Agreement by the DB Co Proposal Extracts, on Financial Close the Request for Proposals and DB Co's proposal shall be superseded entirely by this Project Agreement and rendered null and void, and shall not be relied upon or used by DB Co, the City or anyone else (including anyone pursuant to Schedule 27 – Dispute Resolution Procedure or any arbitral body or any court) in any way to interpret or qualify the scope of the Works, any obligations or liabilities of DB Co, or anything else contained in this Project Agreement.
- (e) Unless it is specifically provided that a consent, approval or satisfaction is in the sole discretion of the City, no consent, approval or satisfaction of the City or the City Representative shall be unreasonably withheld or delayed.
- (f) Unless it is specifically provided that a consent, approval or satisfaction is in the sole discretion of DB Co, no consent, approval or satisfaction of DB Co or the DB Co Representative shall be unreasonably withheld or delayed.
- (g) The organization of the Output Specifications into divisions, sections and parts shall not control DB Co in dividing the Works among the DB Co Parties or in establishing the extent of the Works to be performed by a trade.

1.2 Conflict of Terms

- (a) In the event of ambiguities, conflicts or inconsistencies between or among any of the provisions of this Project Agreement, the provisions shall govern in the following order of precedence with each taking precedence over those listed subsequently:
 - (i) the provisions of amendments in writing to this Project Agreement signed by the Parties and Variation Confirmations shall govern and take precedence only over those specific provisions of this Project Agreement expressly amended thereby;
 - (ii) any provision establishing a higher standard of safety, reliability, durability, performance or service shall take precedence over a provision establishing a lower standard of safety, reliability, durability, performance or service;
 - (iii) the body of this Project Agreement;
 - (iv) Schedule 1 – Definitions and Interpretation;
 - (v) Schedule 35 – Permits, Licences, Approvals and Agreements;
 - (vi) Schedule 20 – Lands;
 - (vii) Schedule 27 – Dispute Resolution Procedure;
 - (viii) Schedule 21 – Construction Period Payments;

- (ix) Schedule 15 – Output Specifications;
 - (x) Schedule 17 – Environmental Obligations;
 - (xi) Schedule 25 – Insurance and Performance Security Requirements;
 - (xii) Schedule 22 – Variation Procedure;
 - (xiii) Schedule 10 – Review Procedure;
 - (xiv) Schedule 14 – Testing & Commissioning;
 - (xv) Schedule 11 – Integrated Management System Requirements;
 - (xvi) Schedule 28 – Refinancing;
 - (xvii) Schedule 23 – Compensation on Termination;
 - (xviii) Schedule 26 – Record Provisions;
 - (xix) the other Schedules in the order in which they are listed in Section 1.1(b);
 - (xx) Schedule 13 – DB Co Proposal Extracts.
- (b) Subject to Section 1.2(a), if the ambiguity, conflict or inconsistency is between a provision of general application and a provision that applies only to a specific part of the Works, the provision that applies to the specific part of the Works shall govern for that specific part of the Works.
- (c) If any ambiguity, conflict or inconsistency is not readily resolved by the foregoing provisions of this Section 1.2, then DB Co or the City, upon discovery of same, shall immediately give Notice to the City Representative. The City Representative shall, within 10 Business Days after such Notice, make a determination of which provision governs and give Notice of such determination, in writing, to DB Co.
- (d) The City and DB Co shall comply with the determination of the City Representative pursuant to this Section 1.2 unless DB Co disputes the decision of the City Representative in which event such Dispute may be referred for resolution in accordance with Schedule 27 – Dispute Resolution Procedure.

1.3 Conflict of Documents

- (a) In the event of any ambiguity, conflict or inconsistency between the provisions of this Project Agreement and the Lenders' Direct Agreement, the provisions of the Lenders' Direct Agreement shall prevail and govern to the extent of such ambiguity, conflict or inconsistency. Notwithstanding the foregoing, if there is any right or remedy in favour of the City set out in the Lenders' Direct Agreement or any part thereof which is not set out or provided for in the Project Agreement, such additional right or remedy shall not constitute an ambiguity, conflict or inconsistency.

1.4 Legal Requirements

- (a) Whenever standards of Applicable Law differ, the most stringent standards shall govern.

1.5 Interface Agreement and Interface with RTG

- (a) On the execution and delivery of this Project Agreement, the parties shall, and the City shall cause RTG to, execute and deliver the Interface Agreement, provided that the Interface Agreement shall be held in escrow until released by notice delivered by the City to DB Co.
- (b) DB Co hereby agrees as follows:
- (i) without prejudice to DB Co's right to claim Delay Events and Compensation Events hereunder from the City, including pursuant to Sections 18.5 and 18.7 relating to defects, errors or inaccuracies in the Stage 1 Connection Infrastructure and Stage 1 Systems Infrastructure, neither RTG nor any RTG Party shall be liable to DB Co or any DB Co Party for, and DB Co shall not and shall ensure that no DB Co Party shall seek to recover from RTG or any RTG Party, any damages, losses, costs, liabilities or expenses which may arise or be suffered, sustained or incurred by, or brought against, any of them (whether in contract, tort, for breach of statutory duty or otherwise) arising, directly or indirectly, out of, or in consequence of, or involving or relating to, the performance or any breach of the PS Services or the PS Services Variation by RTG, or the performance or any breach of the RTG Interface and Design Management Works or the variation to the Stage 1 Project Agreement governing the RTG Interface and Design Management Works by RTG, or any act or omission of RTG or any RTG Party in connection therewith;
 - (ii) RTG's obligations and liability to DB Co are limited to those obligations and liabilities of RTG arising under the Interface Agreement, and nothing herein shall be applied or construed so as to modify or limit such obligations and liabilities, or impose additional obligations or liabilities on RTG or any RTG Party;
 - (iii) the rights of DB Co against the City in relation to the agreements, terms, conditions, scope of Works, standards or other obligations to be performed by DB Co under this Project Agreement shall not be limited by anything in the Interface Agreement; and
 - (iv) in the event that any amount is agreed or determined to be due and payable by DB Co to RTG under the Interface Agreement and RTG has exhausted any rights against DB Co under the Interface Agreement, then the City shall be entitled to recover such amount in the same way as any other liability owing from DB Co to the City hereunder, including by way of set-off or through any performance security provided under this Project Agreement, but subject to the same restrictions or limitations set out hereunder, under the Interface Agreement, or in such performance security as if the underlying obligations had formed part of this Project Agreement. Notwithstanding the foregoing, in no event shall a failure to make payment under the Interface Agreement or any other breach by DB Co thereunder constitute a DB Co Event of Default under this Project Agreement or give rise to any right in favour of the City against DB Co under this Project Agreement, at law or in equity other than the set off right or right to draw on performance security as referred to above. The City shall, and shall procure that RTG shall, comply with the prohibition on duplication of claims under Section 1.4(b) of the Interface Agreement. For greater

certainty, any amounts settled by DB Co with RTG whether through cash payment or otherwise with respect to any obligation under the Interface Agreement shall reduce the City's right to recover such amount on behalf of RTG on a dollar-for-dollar basis. DB Co shall be entitled to settle any obligation under the Interface Agreement directly with RTG without any regard for any agreements, liabilities, obligations or any equities which may otherwise exist between RTG and the City. In the event of a dispute in respect of such amounts, such dispute shall be settled in accordance with the dispute resolution procedure under the Interface Agreement.

(c) DB Co acknowledges and agrees that:

- (i) the City has delegated certain responsibilities to RTG in respect of the construction and maintenance of the Existing Confederation Line and the maintenance of the Confederation Line East Extension and the Confederation Line West Extension under the Stage 1 Project Agreement. Accordingly, and notwithstanding any direct rights of recourse that RTG may have against DB Co under the Interface Agreement, the City shall be entitled, upon the release of the Interface Agreement from escrow as contemplated in Section 1.5(a), to enforce any term of this Project Agreement against DB Co on behalf of RTG or any RTG Party (or any other party to whom the City has delegated any such functions), provided that, for the avoidance of doubt, DB Co shall owe no greater obligations to the City in this regard than if the delegated responsibilities had been performed by the City in its own name;
- (ii) DB Co's liability to the City under this Project Agreement shall not be affected by the existence of any arrangements between the City and RTG whereby the City's liability to RTG is limited to the liability which the City can establish against DB Co.

1.6 Early Works Agreement

- (a) Upon achievement of Financial Close, this Project Agreement shall supersede and replace the early works agreement in respect of the Project executed by the Parties on or about March 15, 2019 (the "**Early Works Agreement**"). Without prejudice to the generality of the foregoing, any part of the Works performed by DB Co under and in accordance with the Early Works Agreement shall be treated as having been performed under and in accordance with this Project Agreement, and the City's payment obligations related to that part of the Early Works will be those under this Project Agreement and not under this Early Works Agreement, and shall be accounted for and paid for as part of the Mobilization Credit in accordance with Schedule 21 – Construction Period Payments of the Project Agreement.

2. COMMERCIAL CLOSE AND FINANCIAL CLOSE

2.1 Effective Date

- (a) The provisions of Sections 1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 3.1, 4.11 to 4.17, 5 to 15, 16.5, 17 to 22, 26 to 31, and 41 to 53 and Schedules 1, 2, 7 – 13, 16 – 18, 20 – 22, 24 – 27, 32 and 35 of this Project Agreement will come into effect on the date of this Project Agreement ("**Commercial Close**"). All other provisions and schedules will come into effect only on Financial Close.

2.2 Standby Letter of Credit

- (a) If DB Co has provided the City with multiple standby letters of credit in accordance with Section 9.1(2) of the RFP, for purposes of this Section 2.2 each of the multiple irrevocable standby letters of credit is referred to as a Standby Letter of Credit for purposes of this Project Agreement.
- (b) Unless a Standby Letter of Credit is drawn by the City in accordance with the provisions of this Project Agreement, the City shall release and deliver the Standby Letter(s) of Credit to DB Co on Financial Close.
- (c) DB Co shall ensure that the Standby Letter(s) of Credit (and any replacement therefor) is renewed prior to its expiry date if, as at such date, Financial Close will not, or may reasonably be expected not to, have occurred.
- (d) If there are multiple Standby Letters of Credit, DB Co acknowledges and agrees that:
 - (i) the City may draw upon any Standby Letter of Credit provided by any Letter of Credit Provider in any specified ratable amount;
 - (ii) the City may draw on any Standby Letter of Credit provided by any Letter of Credit Provider in a disproportionate amount to such Letter of Credit Provider's contribution to security;
 - (iii) the City may draw upon any Standby Letter of Credit provided by any Letter of Credit Provider even in the event that such Letter of Credit Provider is no longer a DB Co Party; and
 - (iv) the provision of multiple Standby Letters of Credit shall not in any way prejudice or adversely affect the rights of the City to draw on the Standby Letter(s) of Credit in accordance with this Project Agreement, including in a circumstance where the default giving rise to the City's right to draw on the Standby Letter(s) of Credit is not the result of any act or omission of the Letter of Credit Provider(s) whose Standby Letter of Credit is drawn upon.

2.3 Financial Close

- (a) No later than 30 days prior to the Financial Close Target Date, DB Co will deliver to the City drafts of all documents referred to in Section 1 of Schedule 2 - Completion Documents.
- (b) On or before the Financial Close Target Date:
 - (i) DB Co shall deliver to the City the documents referred to in Section 1 of Schedule 2 - Completion Documents; and
 - (ii) the City shall deliver to DB Co the documents referred to in Section 2 of Schedule 2 - Completion Documents.
- (c) If DB Co fails to deliver to the City any of the documents referred to in Section 1 of Schedule 2 - Completion Documents by the Financial Close Target Date (other than as a direct result of a

breach by the City of its obligations under Section 2.3(b)(ii)) and the City does not waive such requirement, the City will be entitled to:

- (i) draw on the Standby Letter of Credit immediately and to retain the lesser of (A) the full amount of the Standby Letter of Credit, and (B) the difference between the Guaranteed Price and the price that Contracting Authority is able to obtain from another contractor for the Works, together with all costs reasonably incurred by Contracting Authority to enter into binding agreements with such other contractor, and such amount shall be retained as liquidated damages; and
- (ii) terminate this Project Agreement in its entirety by written Notice having immediate effect.

The Parties agree that such liquidated damages are not a penalty but represent a genuine and reasonable pre-estimate of the damages that the City will suffer as a result of the happening of the specified event. Such payment shall constitute full and final settlement of any and all damages that may be claimed by the City as a result of DB Co not achieving Financial Close. The Parties agree that such liquidated damages shall be payable whether or not the City incurs or mitigates its damages, and that the City shall not have any obligation to mitigate any such damages.

- (d) If the City fails to deliver to DB Co any of the documents referred to in Section 2 of Schedule 2 - Completion Documents by the Financial Close Target Date (other than as a direct result of a breach by DB Co of its obligations under Section 2.3(b)(i)) and DB Co does not waive such requirement, DB Co will be entitled to the return of the Standby Letter of Credit and to terminate this Project Agreement in its entirety by written Notice having immediate effect.
- (e) The following documents will be delivered by DB Co to the City no later than forty-five (45) days following the earliest date such documents are available from the Workplace Safety and Insurance Board: in respect of the Construction Contractor, a CAD-7 and a Workplace Injury Summary Report.

2.4 Disruption in Financial Markets

- (a) If Financial Close cannot be achieved by the Financial Close Target Date by reason solely of a Severe Market Disruption, subject to DB Co's obligation to renew the Standby Letter of Credit pursuant to Section 2.2, the Financial Close Target Date will be extended until the date falling 10 Business Days (or such other period as the Parties agree, acting reasonably) after the date on which such Severe Market Disruption ceases.
- (b) If a Severe Market Disruption exists, then, at any time before such Severe Market Disruption ceases and prior to Financial Close, the City may in its sole discretion either:
 - (i) terminate this Project Agreement in its entirety by written Notice having immediate effect; or
 - (ii) direct DB Co to assign to a designee of the City which has agreed to assume:
 - (A) the Project Agreement, and all of DB Co's right, title and interest in the Project Data, the Intellectual Property Rights and the DB Co Permits, Licences, Approvals and Agreements; and

- (B) those contracts between DB Co and any DB Co Party which the City elects to be assigned.
- (c) If the City exercises its rights pursuant to Section 2.4(b), and, provided DB Co has, if directed, delivered the assignments provided for in Section 2.4(b)(ii)(A) and (B) above, DB Co will be entitled to the return of its Standby Letter of Credit and to payment of an amount equal to the Design and Bid Fee pursuant to Section 10.3.2 of the Request for Proposals plus [REDACTED]% of such fee. The City's obligation to return the Standby Letter of Credit and to pay such fee shall be contingent on the receipt of a waiver, in form and substance satisfactory to the City, that such fee represents full and final satisfaction of any obligation or liability of the City and any other Government Entity to DB Co and any DB Co Parties in connection with the Project Agreement and the Request for Proposals process.

3. GUARANTEED PRICE

3.1 Guaranteed Price and Adjustments

- (a) The Guaranteed Price, exclusive of HST, is \$[REDACTED], and is equal to the sum of the Cost of the Works and the Cost of the Financing. The Cost of the Works and the expected Cost of the Financing as of the date hereof are as set out in the Financial Model.
- (b) DB Co represents and warrants that the Project Debt Interest Cost is based upon the Interest Reference Rate. The Project Debt Interest Cost will be adjusted once on, or within the 2 Business Days immediately prior to, Financial Close on the basis of the actual increase or decrease in the Project Debt Interest Cost resulting directly from any change upward or downward in the Interest Reference Rate as compared to the Interest Reference Rate as at the RFP Financial Submission Deadline.
- (c) The Parties:
 - (i) acknowledge that the Project Debt Interest Cost is a component of the Cost of the Financing and that the Project Debt Interest Cost is subject to adjustment under Section 3.1(b) as at the date set out in Section 3.1(b); and
 - (ii) acknowledge and agree that subject to adjustments made in accordance with the provisions of this Project Agreement, the final Guaranteed Price shall be determined on the basis of such final adjusted Cost of the Financing and the final adjusted Cost of the Works as of the date set out in Section 3.1(b).
- (d) Subject to the provisions of Section 3.1(c) and without prejudice to express provisions in this Project Agreement requiring, or entitling DB Co to, an adjustment to monetary compensation, the Parties agree that the Guaranteed Price will not be subject to adjustment despite changes in the Works, unless such changes in the Works arise pursuant to a Variation Confirmation. The Parties further agree that the Guaranteed Price will only be adjusted where the Project Agreement specifically and expressly refers to an adjustment to the Guaranteed Price, and no claim for an adjustment to the Guaranteed Price on any legal or equitable basis outside of the specific and express rights to an adjustment of the Guaranteed Price set out in the Project Agreement will be allowed. In order to be effective, any permitted adjustment to the Guaranteed Price must be provided for in a Variation Confirmation under Schedule 22 – Variation Procedure, but without

prejudice to express provisions in this Project Agreement requiring or entitling DB Co to an adjustment to monetary compensation.

- (e) DB Co acknowledges and agrees that, subject to the provisions of Section 3.1(c) and without prejudice to express provisions in this Project Agreement requiring, or entitling DB Co to, an adjustment to monetary compensation,
 - (i) DB Co has satisfied itself as to the correctness and sufficiency of the Guaranteed Price, and has based the Guaranteed Price on the data, interpretations, necessary information, examinations and satisfaction as to all relevant matters and any further data relevant to the design;
 - (ii) the Guaranteed Price covers all of DB Co's obligations under the Project Agreement; and
 - (iii) the Guaranteed Price includes all premium time and overtime that may be required to perform the Works in accordance with this Project Agreement and Good Industry Practice.

4. PAYMENT

4.1 General

- (a) Subject to the provisions of the Project Agreement (including, for clarity Section 3.1(d)) and in accordance with and subject to Applicable Law respecting holdbacks, the City shall make the payments set out in this Section 4.
- (b) For the purpose of this Project Agreement, payments made by electronic transfer shall be deemed to have been made on the day and at the time the electronic transfer is initiated, as confirmed by the initiating bank by a confirmation setting out the transfer number and the other details of the transfer.

4.2 Construction Period Payments

- (a) The City shall pay to DB Co the Construction Period Payments, plus, for clarity, applicable HST in accordance with Schedule 21 – Construction Period Payments and this Project Agreement.
- (b) The City shall pay to DB Co:
 - (i) the East Substantial Completion Payment, plus, for clarity, applicable HST, on the East Substantial Completion Payment Date; and
 - (ii) the West Substantial Completion Payment together with any Unpaid Construction Period Payments as of the West Substantial Completion Payment Date, plus, for clarity, applicable HST, on the West Substantial Completion Payment Date,

each in accordance with Schedule 21 – Construction Period Payments and this Project Agreement.

- (c) Notwithstanding Section 4.2(b),

- (i) if the East Warranty Letter of Credit has not been delivered to the City by the East Substantial Completion Payment Date, the City may withhold from the East Substantial Completion Payment a holdback amount of \$[REDACTED] (the “**East Warranty Cash Amount**”); and
 - (ii) if the West Warranty Letter of Credit has not been delivered to the City by the West Substantial Completion Payment Date, the City may withhold from the West Substantial Completion Payment a holdback amount of \$[REDACTED] (the “**West Warranty Cash Amount**”).
- (d) In the event of Section 4.2(c)(i) above, the East Warranty Cash Amount may be withheld by the City, subject to reduction in value in accordance with Section 11.18(a), until the earlier of (i) the date that is two Business Days following the date that the East Warranty Letter of Credit has been delivered to the City, or (ii) the date that is two Business Days following the expiry of the East Warranty Period, and, in either case, the East Warranty Cash Amount shall be paid by the City to DB Co upon such second Business Day, less any amounts as would otherwise have been drawn down against the East Warranty Letter of Credit in accordance with Sections 11.17 and 11.17A. Until receipt of the East Warranty Letter of Credit, the City may use the East Warranty Cash Amount in the place of, in the same manner as and for the same purpose as the East Warranty Letter of Credit. The withholding of the East Warranty Cash Amount in accordance with this Section 4.2(d) until DB Co’s delivery of the East Warranty Letter of Credit to the City shall be the City’s sole remedy for failure on the part of DB Co to deliver the East Warranty Letter of Credit by the East Substantial Completion Payment Date and, for greater certainty, the City shall not be entitled to withhold payment of the balance of the East Substantial Completion Payment as a result of any such failure on the part of DB Co.
- (e) In the event of Section 4.2(c)(ii) above, the West Warranty Cash Amount may be withheld by the City, subject to reduction in value in accordance with Section 11.18(a), until the earlier of (i) the date that is two Business Days following the date that the West Warranty Letter of Credit has been delivered to the City, or (ii) the date that is two Business Days following the expiry of the West Warranty Period, and, in either case, the West Warranty Cash Amount shall be paid by the City to DB Co upon such second Business Day, less any amounts as would otherwise have been drawn down against the West Warranty Letter of Credit in accordance with Sections 11.17 and 11.17A. Until receipt of the West Warranty Letter of Credit, the City may use the West Warranty Cash Amount in the place of, in the same manner as and for the same purpose as the West Warranty Letter of Credit. The withholding of the West Warranty Cash Amount in accordance with this Section 4.2(e) until DB Co’s delivery of the West Warranty Letter of Credit to the City shall be the City’s sole remedy for failure on the part of DB Co to deliver the West Warranty Letter of Credit by the West Substantial Completion Payment Date and, for greater certainty, the City shall not be entitled to withhold payment of the balance of the West Substantial Completion Payment as a result of any such failure on the part of DB Co.
- (f) [Not used]
- (g) Notwithstanding Section 4.2(b), if the Remaining Works Letter of Credit has not been delivered to the City by the West Substantial Completion Payment Date, the City may withhold from the West Substantial Completion Payment a holdback amount of \$[REDACTED] (the “**Remaining Works Cash Amount**”);

- (h) In the event of Section 4.2(g) above, the Remaining Works Cash Amount may be withheld by the City until the earlier of (i) the date that is two Business Days following the date that the Remaining Works Letter of Credit has been delivered to the City, or (ii) the date when the Remaining Works Letter of Credit would have been returned to DB Co if it had been provided in accordance with Section 11.18A, and, in either case, upon such date, the Remaining Works Cash Amount shall be paid by the City to DB Co, less any amounts as would otherwise have been drawn down against the Remaining Works Letter of Credit in accordance with Section 11.18A. Until receipt of the Remaining Works Letter of Credit, the City may use the Remaining Works Cash Amount in the place of, in the same manner as and for the same purpose as the Remaining Works Letter of Credit. The withholding of the Remaining Works Cash Amount in accordance with this Section 4.2(h) until DB Co's delivery of the Remaining Works Letter of Credit to the City shall be the City's sole remedy for failure on the part of DB Co to deliver the Remaining Works Letter of Credit by the West Substantial Completion Payment Date and, for greater certainty, the City shall not be entitled to withhold payment of the balance of the West Substantial Completion Payment as a result of any such failure on the part of DB Co.

4.3 [Not Used]

4.4 [Not Used]

4.5 Compensation on Termination

- (a) If this Project Agreement is terminated pursuant to Sections 36.3(a), 37.2(a)(ii), 38.1, 38.2 or 38.3, then:
- (i) Schedule 23 – Compensation on Termination shall apply and the City shall pay DB Co any applicable compensation on termination; and
 - (ii) the provisions of Section 4.2 shall no longer apply.
- (b) DB Co hereby irrevocably directs the City to make any Compensation Payment to the Lenders' Agent, or as the Lenders' Agent may direct. The City shall pay the Compensation Payment as directed by the Lenders' Agent and shall not accept any redirection without the consent of Lenders' Agent. The City will pay the Compensation Payment in accordance with the provisions of Schedule 23 – Compensation on Termination. DB Co acknowledges and agrees that payment by the City of the Compensation Payment to the Lenders' Agent in accordance with this Section 4.5(b) constitutes payment by the City to DB Co in satisfaction of the City's obligation to pay the Compensation Payment to DB Co under this Project Agreement and in satisfaction of any trust obligation of the City with respect to such payments under section 7 of the CA pursuant to section 10 of the CA.

4.6 Payment Due under Insurance Policies

- (a) In the event of loss or damage occurring where payment becomes due under the property and boiler insurance policies, payments shall be made in accordance with the provisions of the Insurance Trust Agreement.

4.7 HST

- (a) The City covenants and agrees to pay to DB Co the HST that may be exigible with respect to any payments made by the City to DB Co hereunder.

4.8 Set-Off

- (a) The Parties agree that their rights of set-off at law or in equity are limited to the right of:
 - (i) the City, to set off against any amounts otherwise due to DB Co pursuant to the terms of this Project Agreement, any amounts (including, without limitation, any amounts payable in accordance with Section 46, or any amounts payable as liquidated damages) that are due and owed to the City from or by DB Co pursuant to the terms of this Project Agreement; and
 - (ii) DB Co to set off against any amounts otherwise due to the City pursuant to the terms of this Project Agreement, any amounts (including, without limitation, any amounts payable in accordance with Section 46) that are due and owed to DB Co from or by the City pursuant to the terms of this Project Agreement.
- (b) For clarity, the City is entitled to exercise its rights in accordance with Section 4.8(a)(i) immediately upon an amount becoming due and owed to the City by DB Co pursuant to the terms of this Project Agreement.

4.9 Effect of Payment

- (a) Subject to Section 40.2, no payment hereunder shall be construed as an acceptance or approval of incomplete, defective or improper performance by DB Co of any of its obligations under this Project Agreement, nor shall it operate to relieve DB Co from the performance of any of its obligations under this Project Agreement which have not been performed.

4.10 No Other Entitlement

- (a) DB Co shall not be entitled to any payments, compensation, rights, remedies, benefits or entitlements under or in connection with this Project Agreement, except as specifically and expressly set out in this Project Agreement.

4.11 Taxes

- (a) All amounts specified in this Project Agreement, including, for clarity, any compensation payable on termination, are expressed exclusive of HST, but inclusive of all other Taxes payable pursuant to Applicable Law. For clarity, the City shall not be required to pay any interest and/or penalties that are imposed on or assessed against DB Co or any DB Co Party for non-compliance with Applicable Law. If DB Co is required by Applicable Law to collect any such HST from the City, the City shall pay such HST to DB Co simultaneously with the amount to which such applicable HST relates or applies.
- (b) The City shall pay when due and payable, all property taxes or payments in lieu of property taxes that are assessed in respect of ownership or use of the Lands, the New City Infrastructure, the Existing Infrastructure and the New MTO Infrastructure.

- (c) The City shall pay all applicable HST properly payable in accordance with the *Excise Tax Act* (Canada) by the City upon and in connection with payments by the City to DB Co under this Project Agreement.

4.12 Changes in Scope of Taxation

- (a) If, as a result of a Change in Law, the application of Taxes under Part IX of the *Excise Tax Act* (Canada) or any provincial sales tax legislation changes with respect to the provision of any goods or services by DB Co in connection with the performance of the Works, the City and DB Co agree to co-operate to determine how such change affects their respective obligations under this Project Agreement to the extent not already addressed in this Project Agreement.

4.13 Changes in Recoverability of Tax Credits

- (a) The City will pay to DB Co from time to time, as the same is incurred by DB Co, amounts equal to any Irrecoverable Tax to the extent such Irrecoverable Tax results from a Change in Law. DB Co will pay to the City from time to time, as the same is incurred by DB Co, amounts equal to any Recoverable Tax to the extent such Recoverable Tax results from a Change in Law.
- (b) For the purposes of this Section 4.13, the term “**Irrecoverable Tax**” means HST or an irrecoverable sales tax levied by the Province in lieu of all or a portion of HST incurred by DB Co in respect of the supply of any good or service to the City which is consumed, used or supplied, or to be consumed, used or supplied, exclusively by DB Co in the course of carrying out the Works to the extent that DB Co is unable to recover or be credited with input tax credits, refunds, rebates or exemptions for such HST.
- (c) For the purposes of this Section 4.13, the term “**Recoverable Tax**” means HST incurred by DB Co in respect of the supply of any good or service to the City which is consumed, used or supplied, or to be consumed, used or supplied, exclusively by DB Co in the course of carrying out the Works to the extent that DB Co is able to recover or be credited with input tax credits, refunds, rebates or exemptions for such HST.

4.14 Information and Assistance Provided by DB Co

- (a) DB Co shall, at the City’s request and cost, assist the City in applying for and obtaining all remissions and credits of Taxes to which the City is entitled.
- (b) The City may apply for a global or general exemption, waiver, remission, or refund of some or all Taxes which may otherwise be applicable in relation to this Project Agreement. DB Co shall, at the City’s cost, assist the City in making any applications for such global or general exemption, waiver, remission or refund and shall provide the City with such documentation as the City may reasonably require to support such application and, in any event, shall provide such consent as the City may require. Any exemption, waiver, remission, refund or other recovery of Taxes obtained by the City through such application shall accrue to the sole benefit of the City.
- (c) DB Co will provide the City with any information reasonably requested by the City from time to time in relation to any Taxes chargeable in accordance with this Project Agreement and payable by the City to DB Co from time to time.

4.15 Residency – Income Tax Act (Canada)

- (a) DB Co shall not undertake any action or transaction that, if undertaken, would cause or result in DB Co becoming a Non-Resident without the City's prior written consent, which consent may be withheld in the City's sole discretion.

4.16 Taxes – General

- (a) DB Co shall not, without the prior written consent of the City (which consent may be withheld in its sole discretion), undertake any action or transaction that, if undertaken, would cause the City to have (or result in the City having) any obligation to deduct, withhold or remit any Taxes that are required by Applicable Law to be deducted, withheld or remitted from any amounts paid or credited to DB Co or any DB Co Party under this Project Agreement or under any other Ancillary Document.

4.17 Taxes – Indemnity

- (a) If (i) DB Co becomes a Non-Resident, or (ii) the City is or becomes required by Applicable Law to deduct or withhold any amount in respect of Taxes on or in respect of any amounts paid or credited to DB Co or a DB Co Party by the City under the Project Agreement or under any of the Project Documents, then the City shall be entitled to make any applicable deductions or withholdings required by Applicable Law from any amount paid or credited or to be paid or credited to DB Co or a DB Co Party on or after the date on which (A) DB Co or the DB Co Party becomes a Non-Resident and at all times while it remains a Non-Resident; or (B) the City is required by Applicable Law to deduct or withhold amounts in respect of any such amounts, in each case, in respect of all Taxes that are required by Applicable Law to be deducted or withheld from amounts paid or credited to a Non-Resident or otherwise as required by Applicable Law; and all amounts paid or credited by the City under this Project Agreement or under any other Ancillary Document to DB Co or a DB Co Party shall be paid or credited net of such deductions or withholdings.
- (b) If (i) DB Co becomes a Non-Resident, or (ii) the City is or becomes required by Applicable Law to deduct and withhold any amount in respect of Taxes on or in respect of any amounts paid or credited to DB Co or a DB Co Party by the City under the Project Agreement or under any of the Project Documents, DB Co shall, in each case, indemnify and hold harmless the City for (A) the full amount of all Taxes ("**Indemnifiable Taxes**") that arise, are imposed on or are required to be paid by the City in respect of any amounts paid or credited by the City to DB Co or any DB Co Party under this Project Agreement or under any other Ancillary Document as a result of either of the foregoing items less any amount withheld or deducted by the City in respect of such Taxes, and (B) any liability payable or incurred in connection with Indemnifiable Taxes (including penalties, interest and reasonable expenses associated with Tax compliance, reporting and contesting such liability for Indemnifiable Taxes, including reasonable professional expenses payable or incurred in connection therewith) arising from or with respect to Indemnifiable Taxes, whether or not they were correctly or legally asserted ("**Associated Liabilities**"). Payment under this indemnification shall be made within 30 days after the date the City makes written demand for it. A certificate containing reasonable detail as to the amount of Indemnifiable Taxes and Associated Liabilities submitted to DB Co by the City shall be conclusive evidence, absent manifest error, of the amount due from DB Co to the City. The City shall be entitled to exercise its rights of set off under Section 4.8 against any amounts owing under this indemnification. In the event that it is finally determined that such Indemnifiable Taxes were not correctly or legally

asserted or remitted, then such Indemnifiable Taxes shall be reimbursed to DB Co following such final determination.

5. SCOPE OF AGREEMENT

5.1 Scope of Agreement

- (a) DB Co shall undertake the Project and perform the Works in accordance with and subject to the provisions of this Project Agreement.
- (b) DB Co shall exercise its rights and perform its obligations at its own cost and risk without recourse to the City, except as otherwise provided in this Project Agreement. Except as provided in the Interface Agreement, DB Co's sole recourse with respect to the subject matter of this Project Agreement shall be to the City.

6. REPRESENTATIONS AND WARRANTIES

6.1 DB Co Representations and Warranties

- (a) DB Co represents and warrants to the City that as of Commercial Close:
 - (i) DB Co is [REDACTED] and is formed and validly existing under the laws of the Province of Ontario, and has all the requisite corporate power and authority to own its properties and assets, to carry on its business as it is currently being conducted, and to enter into this Project Agreement and to perform its obligations hereunder;
 - (ii) [REDACTED] under the laws of the Province of British Columbia, is in good standing with the Registrar of Companies in the Province of British Columbia with respect to the filing of annual reports, and has all the requisite corporate power and authority to own its properties and assets, to carry on its business as it is currently being conducted, and to enter into this Project Agreement and to perform its obligations hereunder in its capacity as a partner of DB Co;
 - (iii) [REDACTED] under the laws of the Province of Ontario, is in good standing with the Ministry of Government Services of Ontario with respect to the filing of annual reports, and has all the requisite corporate power and authority to own its properties and assets, to carry on its business as it is currently being conducted, and to enter into this Project Agreement and to perform its obligations hereunder in its capacity as a partner of DB Co;
 - (iv) [REDACTED] under the laws of the Province of Ontario, is in good standing with the Ministry of Government Services of Ontario with respect to the filing of annual reports, and has all the requisite corporate power and authority to own its properties and assets, to carry on its business as it is currently being conducted, and to enter into this Project Agreement and to perform its obligations hereunder in its capacity as a partner of DB Co;
 - (v) [REDACTED] under the laws of the Province of Ontario, is in good standing with the Ministry of Government Services of Ontario with respect to the filing of annual reports, and has all the requisite corporate power and authority to own its properties and assets, to carry on its business as it is currently being conducted, and to enter into this Project Agreement and to perform its obligations hereunder in its capacity as a partner of DB Co;

- (vi) all partnership interests in DB Co as of Commercial Close have been disclosed to the City;
- (vii) DB Co and the DB Co Parties, collectively, have extensive experience and are knowledgeable in the design and construction of infrastructure and facilities similar to the those included in the scope of the Project in scale, scope, type and complexity, and have the required ability, experience, skill and capacity to perform the Works in a timely and professional manner as set out in this Project Agreement;
- (viii) DB Co, and [REDACTED] have the requisite power, authority and capacity to execute, deliver and perform this Project Agreement, and to do all acts and things, and execute, deliver and perform all other agreements, instruments, undertakings and documents as are required by this Project Agreement to be done, executed, delivered or performed by DB Co or by [REDACTED] in its capacity as a partner of DB Co;
- (ix) no steps or proceedings have been taken or are pending to supersede or amend:
 - (A) the constating or formation documents of DB Co, including the partnership agreement governing DB Co; or
 - (B) the constating or formation documents, articles or by-laws of [REDACTED]

in each case, in a manner that would impair or limit its ability to perform the obligations of DB Co under this Project Agreement;

- (x) this Project Agreement has been duly authorized, executed, and delivered by DB Co, and constitutes a legal, valid, and binding obligation of DB Co, [REDACTED] enforceable against each of them in accordance with its terms, subject only to:
 - (A) limitations with respect to the enforcement of remedies by bankruptcy, insolvency, moratorium, winding-up, arrangement, reorganization, fraudulent preference and conveyance and other laws of general application affecting the enforcement of creditors' rights generally; and
 - (B) general equitable principles and the fact that the availability of equitable remedies is in the discretion of a court and that a court may stay proceedings or the execution of judgments;
- (xi) the execution delivery, and performance by DB Co, and performance by [REDACTED] in its capacity as a partner of DB Co, of this Project Agreement does not and will not violate or conflict with, or constitute a default under:
 - (A) its constating, formation or organizational documents, including any by-laws;
 - (B) any Applicable Law; or
 - (C) any covenant, contract, agreement, or understanding to which it is a party or by which it or any of its properties or assets is bound or affected;

- (xii) no DB Co Event of Default has occurred and is continuing;
- (xiii) all of the information regarding DB Co, [REDACTED] set out in Schedule 31 – DB Co Information is true and correct in all material respects;
- (xiv) there are no actions, suits, proceedings, or investigations pending or threatened against DB Co, [REDACTED] or, to DB Co's knowledge, any DB Co Party at law or in equity before any Governmental Authority or arbitral body (whether or not covered by insurance) that individually or in the aggregate could result in any material adverse effect on the business, properties, or assets, or the condition, financial or otherwise, of DB Co or in any impairment of its ability to perform its obligations under this Project Agreement, and DB Co has no knowledge of any violation or default with respect to any order, writ, injunction, or decree of any Governmental Authority or arbitral body that could result in any such material adverse effect or impairment;
- (xv) DB Co has conducted its own documentary investigations and has carefully reviewed the whole of this Project Agreement, and all other documents made available to DB Co by or on behalf of the City, and, to DB Co's knowledge, nothing contained herein or therein inhibits or prevents DB Co from completing the Works or performing the Works in accordance with this Project Agreement in a good and safe manner so as to achieve and satisfy the requirements of this Project Agreement;
- (xvi) DB Co, and [REDACTED] in its capacity as a partner of DB Co, is able to meet its obligations as they generally become due;
- (xvii) DB Co is registered under Division V of Part IX of the *Excise Tax Act* (Canada) and its HST registration number is [REDACTED];
- (xviii) [Intentionally Deleted];
- (xix) each Scheduled Substantial Completion Date is a realistic date and is achievable by DB Co performing the Works in accordance with this Project Agreement;
- (xx) DB Co, and [REDACTED] is not a Non-Resident;
- (xxi) DB Co has obtained all necessary DB Co Permits, Licences, Approvals and Agreements required to commence the Works;
- (xxii) the manager or supervisory personnel DB Co has assigned to the Project are highly experienced;
- (xxiii) DB Co has a sufficient staff of qualified and competent personnel to replace its designated supervisors, subject to the City's approval, in the event of death, incapacity or resignation;
- (xxiv) DB Co and the Construction Contractor have conducted inspections of the Lands prior to Commercial Close and an investigation and examination of the Project Agreement, the Background Information and any other documents made available to DB Co by the City so as to ascertain the nature or location of the Works and the Lands, the physical conditions of the Lands and the Existing Infrastructure on which Works will be

performed, and protocols, rules and regulations if any, possible delays in commencing the Works, conditions relating to the transportation, handling and storage of materials and availability of labour and the character and availability of equipment, materials and facilities needed to perform the Works;

- (xxv) DB Co has secured the Financing and is in a position to complete the Financing on or before the Financial Close Target Date, subject to the satisfaction of reasonable conditions that are customary in closing financing for projects similar to the Project;
- (xxvi) no Restricted Person has Direct or Indirect Power or Control over any member of the DB Co Group in relation to the decisions, management, actions or policies of DB Co or in relation to the operation, management and ownership of the Project;
- (xxvii) to the knowledge of DB Co, no Restricted Person has directly or indirectly, an Economic Interest in DB Co or the Project;
- (xxviii) either:
 - (A) the COR-Certified Construction DB Co Party is in possession of its COR Certification in good standing as required under this Project Agreement and has the ability to maintain such COR Certification at all times during the performance of the Works in accordance with its terms, provisions and conditions; or
 - (B) the COR-Qualified Construction DB Co Party:
 - (I) is in possession of its OHSAS 18001 Accreditation which remains in good standing and has the ability to maintain such OHSAS 18001 Accreditation in good standing at all times during the performance of the Works until such COR-Qualified Construction DB Co Party receives its COR Certification as required under this Project Agreement, and
 - (II) has made an application to the IHSA for its COR Certification as required under this Project Agreement; and
- (xxix) Prior to or concurrently with execution of this Project Agreement, DB Co has executed the Nominated Signalling Subcontract with the Nominated Signalling Subcontractor or has caused the Construction Contractor to execute the Nominated Signalling Subcontract with the Nominated Signalling Subcontractor.

6.2 City Representations and Warranties

- (a) The City represents and warrants to DB Co that as of Commercial Close:
 - (i) the City is a municipal corporation duly and validly constituted and subsisting under the laws of the Province of Ontario and has the requisite power, authority and capacity to execute and deliver this Project Agreement and perform its obligations under this Project Agreement and to do all acts and things, and execute, deliver and perform all other agreements, instruments, undertakings and documents as are required by this Project Agreement to be done, executed, delivered or performed;

- (ii) this Project Agreement has been duly authorized, executed, and delivered by the City and constitutes a legal, valid, and binding obligation of the City, enforceable against the City in accordance with its terms, subject only to:
 - (A) limitations with respect to the enforcement of remedies by bankruptcy, insolvency, moratorium, winding-up, arrangement, reorganization, fraudulent preference and conveyance and other laws of general application affecting the enforcement of creditors' rights generally;
 - (B) general equitable principles and the fact that the availability of equitable remedies such as specific performance and injunction are in the discretion of a court;
 - (C) the special jurisdiction and power of the Ontario Municipal Board over defaulting municipalities under the *Municipal Affairs Act* (Ontario);
- (iii) the execution, delivery, and performance by the City of this Project Agreement does not and will not violate or conflict with, or constitute a default under:
 - (A) any Applicable Law (including, for greater certainty, the *City of Ottawa Act 1999* (Ontario) and any by-laws issued in accordance therewith); or
 - (B) any covenant, contract, agreement, or understanding relating to the Project or the Lands to which it is a party or by which it or any of its properties or assets is bound or affected;
- (iv) the City has obtained all necessary consents and approvals required for the execution by the City of, and performance of its obligations under, this Project Agreement;
- (v) other than any proceeding under the *Expropriations Act* (Ontario) which could delay the acquisition by the City of the Lands, there are, to the knowledge of the City, no actions, suits, proceedings, or investigations pending or threatened (in writing) against the City, MTO or, to the City's knowledge, any City Party at law or in equity before any Governmental Authority or arbitral body (whether or not covered by insurance) of which the City or MTO has received written notice, and that individually or in the aggregate could result in any material adverse effect on the Project, or in any impairment of the City's, MTO's or DB Co's ability to perform their respective obligations under this Project Agreement, and the City has no knowledge of any violation or default with respect to any order, writ, injunction, or decree of any Governmental Authority or arbitral body that could result in any such material adverse effect or impairment;
- (vi) the City is able to meet its obligations as they generally become due;
- (vii) the City has rights of use and access to, on and over the Lands, or has the requisite power to obtain such rights, that are sufficient to enable the City to grant or to cause to be granted to DB Co the licence rights contemplated in Section 16.1;
- (viii) the Project is permitted by the existing official plan, zoning and other land use restrictions applicable to the City and the Project.

- (b) The City represents and warrants to DB Co that as of Commercial Close, no City Event of Default has occurred and is continuing.

7. BACKGROUND INFORMATION

7.1 No Liability

- (a) Except as expressly provided in Sections 1.5(b)7.4, 18.1(b), 18.2, 18.3, 18.4, 18.5, 18.6, 18.7 and 18.8 none of the City, any City Party, RTG or any RTG Party, or any Government Entity shall be liable to DB Co or any DB Co Party for, and DB Co or any DB Co Party shall not seek to recover from the City, any City Party, RTG or any RTG Party, or any Government Entity, any damages, losses, costs, liabilities or expenses which may arise (whether in contract, tort or otherwise) from the adoption, use or application of the Background Information by, or on behalf of, DB Co or any DB Co Party.

7.2 No Warranty

- (a) Except as expressly provided in Sections 7.4, 18.1(b), 18.2, 18.3, 18.4, 18.5, 18.6, 18.7 and 18.8:
 - (i) neither the City nor any City Party, nor RTG nor any RTG Party, nor any Government Entity gives any warranty or undertaking of whatever nature in respect of the Background Information and, specifically (but without limitation), neither the City nor any City Party, nor RTG nor any RTG Party, or Government Entity warrants that the Background Information represents all of the information in its possession or power (either during the conduct of the procurement process for the Project or at the time of execution and delivery of this Project Agreement) relevant or material to or in connection with the Project or the obligations of DB Co under this Project Agreement or under any of the Project Documents; and
 - (ii) neither the City nor any City Party, nor RTG nor any RTG Party, nor any Government Entity shall be liable to DB Co or any DB Co Party in respect of any failure, whether before, on or after the execution and delivery of this Project Agreement:
 - (A) to disclose or make available to DB Co or any DB Co Party any information, documents or data;
 - (B) to review or update the Background Information; or
 - (C) to inform DB Co or any DB Co Party of any inaccuracy, error, omission, defect or inadequacy in the Background Information.

7.3 No Claims

- (a) DB Co acknowledges and confirms that:
 - (i) it has conducted its own analysis and review of the Background Information and has, before the execution and delivery of this Project Agreement, satisfied itself as to the accuracy, completeness and fitness for purpose of any such Background Information upon which it places reliance; and

- (ii) except as expressly provided in Sections 7.4, 18.1(b), 18.2, 18.3, 18.4, 18.5, 18.6, 18.7 and 18.8, it shall not be entitled to and shall not, and shall ensure that no DB Co Party shall, make any claim against the City, or any City Party, RTG or any RTG Party, or Government Entity (whether in contract, tort or otherwise), including, without limitation, any claim in damages, for extensions of time or for additional payments under this Project Agreement on the grounds:

- (A) of any misunderstanding or misapprehension in respect of the Background Information; or

- (B) that the Background Information was incorrect or insufficient,

nor shall DB Co be relieved from any of its obligations under this Project Agreement on any such ground.

7.4 Technical Reports

- (a) The City agrees that, if at the date of this Project Agreement, except as disclosed in any Background Information (other than Technical Reports) or as otherwise disclosed by the City or any City Party or known by DB Co or any DB Co Party, in each case prior to the date that is 30 days prior to the RFP Technical Submission Deadline, any of the information in:

- (i) the Technical Reports (other than the Geotechnical Reliant Reports) is, to the actual knowledge of the City, incorrect, or there is relevant information in the possession or control of the City that would make any of the information in such Technical Reports incorrect, or

- (ii) the Geotechnical Reliant Reports is incorrect,

then, to the extent that such incorrect information materially adversely interferes with DB Co's ability to perform the Works or materially adversely affects DB Co's cost of, or schedule for, performing the Works, such incorrect information shall, subject to and in accordance with Schedule 22 – Variation Procedure, result in a Variation.

8. PROJECT DOCUMENTS

8.1 Project Documents

- (a) DB Co shall perform its obligations under, and observe all of the provisions of, each of the Project Documents to which it is a party, and shall ensure that each DB Co Party shall perform its obligations under, and observe all of the provisions of, each of the Project Documents to which such DB Co Party is a party, so as to ensure that other parties to such Project Documents shall not be entitled to terminate same. In the event that DB Co receives a Notice of default under any of the Project Documents, it shall promptly, and, in any event, no later than 2 Business Days after receipt thereof, deliver a copy of such Notice of default to the City.

8.2 Ancillary Documents

- (a) DB Co shall not:

- (i) terminate or agree to the termination of all or part of any Ancillary Document, except pursuant to Sections 27.3, 49.3 and 50.2 or otherwise to prevent or cure a DB Co Event of Default (provided that commercially reasonable alternative measures would not prevent or cure such DB Co Event of Default);
- (ii) subject to Section 8.2(a)(i) above, make or agree to any amendment, restatement or other modification or exercise any of its rights under any Ancillary Document that materially adversely affects DB Co's ability to perform its obligations under this Project Agreement or that has the effect of increasing any liability of the City, whether actual or potential;
- (iii) breach its obligations (or waive or allow to lapse any rights it may have) or permit others to breach their obligations (or waive or allow to lapse any rights they may have) under any Ancillary Document, if any such breach (or waiver or lapse) would materially adversely affect DB Co's ability to perform its obligations under this Project Agreement or that have the effect of increasing any liability of the City, whether actual or potential; or
- (iv) enter into, or permit the entry into by any other person of, any agreement replacing all or part of any Ancillary Document, except in the circumstances referenced in Section 8.2(a)(i),

without the prior written consent of the City, provided that, where consent is requested pursuant to Section 8.2(a)(i) or 8.2(a)(iv), such consent shall not be withheld, and shall be provided within a reasonable time, where the relevant matter referred to in Section 8.2(a)(i) or 8.2(a)(iv) will not materially adversely affect DB Co's ability to perform its obligations under this Project Agreement or have the effect of increasing any liability of the City, whether actual or potential. In the event of termination or agreement to the termination of all or part of any Ancillary Document as described in Section 8.2(a)(i), or the entering into of any agreement replacing all or part of any Ancillary Document as described in Section 8.2(a)(iv), DB Co shall, to the extent applicable, comply with all provisions herein relating to changes in Subcontractors, including Section 49.3.

- (b) Upon the written request of the City or the City Representative, DB Co will deliver or cause to be delivered to the City or the City Representative a copy of any notices delivered or received by DB Co under any of the Ancillary Documents.

8.3 Changes to Lending Agreements and Refinancing

- (a) Subject to the terms of the Lenders' Direct Agreement, DB Co shall not terminate, amend or otherwise modify the Lending Agreements, or waive or exercise any of its rights under the Lending Agreements, if at the time such action is contemplated and effected, it would materially adversely affect DB Co's ability to perform its obligations under this Project Agreement or the Project Documents or have the effect of increasing the liability of the City whether actual or potential, unless such action is a Permitted Borrowing or a Refinancing effected in accordance with the provisions of Schedule 28 – Refinancing.

8.4 Compliance with Lending Agreements

- (a) DB Co shall keep the Lending Agreements in good standing to the extent necessary to perform its obligations under this Project Agreement and the Project Documents, and shall ensure that none

of the terms and conditions of the Lending Agreements shall prevent DB Co from performing its obligations under this Project Agreement or the Project Documents.

9. THE CITY RESPONSIBILITIES

9.1 General

- (a) The City shall, at its own cost and risk:
 - (i) perform all of its obligations under, and observe all provisions of, this Project Agreement in compliance with Applicable Law;
 - (ii) obtain, maintain, and, as applicable, renew the City Permits, Licences, Approvals and Agreements which may be required for the performance of the Works;
 - (iii) comply with all City Permits, Licences, Approvals and Agreements, in accordance with their terms, and other Permits, Licences, Approvals and Authorizations to the extent obligations thereunder attributable to the City are within the actual knowledge of the City, and are not otherwise required be undertaken or assumed by DB Co hereunder; and
 - (iv) cooperate with DB Co in the fulfillment of the purposes and intent of this Project Agreement, provided, however, that the City shall not be under any obligation to perform any of DB Co's obligations under this Project Agreement.
- (b) The City shall, and shall cause all City Parties and MTO to, take reasonable steps to minimize undue interference with the provision of the Works by DB Co or any DB Co Party.
- (c) Nothing in this Project Agreement shall in any way fetter the right, authority and discretion of the City or any City Party or Government Entity in fulfilling its statutory or other functions under Applicable Law, and DB Co understands and agrees that nothing in this Project Agreement shall preclude the City from performing, discharging or exercising its duties, responsibilities, and powers under Applicable Law. DB Co further agrees that it shall comply, and shall cause all relevant DB Co Parties to comply, with all written directions issued by or on behalf of the City (or any respective designate appointed) from time to time, subject to Section 31.1(b).
- (d) The City may, acting in its sole discretion, without legal obligation to do so and at the expense of DB Co, take such commercially reasonable steps as DB Co may request to facilitate access for DB Co to Highway Corridor Lands to the extent DB Co may reasonably require to perform the Construction Activities provided that DB Co has demonstrated to the reasonable satisfaction of the City, that it has not been able to gain such access through the use of its own commercially reasonable efforts.
- (e) Notwithstanding the provisions of Section 11.8(a)(i), the City shall be responsible for all designations, assumptions, road closures, transfers and any other applicable requirements relating to any DB Co Permits, Licences, Approvals and Agreements which can only be effected by the City pursuant to the *Municipal Act, 2001* (Ontario), subject to receipt by the City of any required consent(s) from the Crown in right of Canada and subject to DB Co having, at its own cost, provided or caused to be provided such information, documentation, and technical or administrative assistance, as the City may request and as DB Co may reasonably be able to provide to enable the City to effect such requirements.

10. DB CO RESPONSIBILITIES – GENERAL

10.1 Other Business

- (a) DB Co shall not engage in any activities which are not specifically related to, required by and conducted for the purpose of the Project without the prior written consent of the City, in its sole discretion.

10.2 Complete and Operational New City Infrastructure and New MTO Infrastructure

- (a) DB Co shall design, engineer, construct and commission the New City Infrastructure and the New MTO Infrastructure so as to provide the City with complete and operational New City Infrastructure and New MTO Infrastructure in accordance with the Output Specifications, and the DB Co Proposal Extracts, all in accordance with and subject to the terms of this Project Agreement.

10.3 General Responsibilities and Standards

- (a) DB Co shall, at its own cost and risk, perform and complete the Works:
 - (i) in accordance with the Works Schedules and, in this regard, shall commence the Works no later than the day following Financial Close and, subject to adjustment as provided for in the Project Agreement, achieve:
 - (A) East Substantial Completion by the East Scheduled Substantial Completion Date;
 - (B) East Final Completion by the East Scheduled Final Completion Date;
 - (C) West Substantial Completion by the West Scheduled Substantial Completion Date; and
 - (D) West Final Completion by the West Scheduled Final Completion Date;
 - (ii) in compliance with Applicable Law;
 - (iii) so as to satisfy the Output Specifications;
 - (iv) in compliance with all Permits, Licences, Approvals and Agreements and so as to preserve the existence and continued effectiveness of any such Permits, Licences, Approvals and Agreements;
 - (v) in accordance with Good Industry Practice and to meet the standards followed by professionals, manufacturers, contractors and trades who are experienced in work on infrastructure that is comparable to the New City Infrastructure and the New MTO Infrastructure;
 - (vi) in a manner consistent with the Integrated Management System and Integrated Management Plans, and the DB Co Proposal Extracts;

- (vii) in a timely and professional manner;
 - (viii) with due regard to the health and safety of persons and property;
 - (ix) subject to the other provisions of this Project Agreement, in a manner which will not impair the ability of the City, any City Party or any Government Entity to comply with Applicable Law; and
 - (x) subject to the other provisions of this Project Agreement, in a manner which will not impair the performance of the Governmental Activities; and
 - (xi) in accordance with all other terms of this Project Agreement.
- (b) DB Co shall cooperate with the City in the fulfillment of the purposes and intent of this Project Agreement, provided however that DB Co shall not be under any obligation to perform any of the City's obligations under this Project Agreement.
- (c) DB Co shall, at its own cost and risk:
 - (i) without prejudice to the City's obligations under Sections 9 and 16.1, coordinate with the City all Construction Activities relating to Existing Infrastructure and Stage 1 Connection Infrastructure owned by the City or MTO and the New MTO Infrastructure, including the provision of the Works Schedules, and any updates to the Works Schedules relating to such infrastructure, so as to minimize the impact of Construction Activities on City or MTO operations and services provided by the City or MTO to the public; and
 - (ii) subject to Section 11.29, enter into any Utility Agreements that may be required by Utility Companies to complete the Works;
- (d) [Not used]
- (e) DB Co shall, at its own cost and risk, as soon as possible, and in any event within twenty-four (24) hours of its receipt or notice, notify the City of receipt or notice of (and provide the City with copies of any correspondence received in relation to) any incident report, investigation report or similar correspondence (in each case, whether in draft or final form) issued by the MOL or any other Governmental Authority in respect of the Works.
- (f) If the City has executed an agreement with MTO in relation to this Project (a "**Stakeholder Agreement**"), then the following shall apply:
 - (i) the City shall provide a copy of the Stakeholder Agreement to DB Co, and DB Co shall not, and shall ensure that the DB Co Parties do not, in any way whatsoever, contravene or cause the City to contravene the Stakeholder Agreement; and
 - (ii) to the extent that DB Co's performance of its obligations set out in Section 10.3(f)(i) would result in a material change to the Works, or materially adversely affects DB Co's cost of, or schedule for, performing the Works, and would not otherwise be required of DB Co under the Project Agreement, then such change shall, subject and in accordance with Schedule 22 – Variation Procedure, result in a Variation.

11. DB CO RESPONSIBILITIES – DESIGN AND CONSTRUCTION

11.1 Development of Design

- (a) DB Co shall, at its own cost, develop and complete the design of the New City Infrastructure and the New MTO Infrastructure and all Design Data in accordance with the requirements of this Project Agreement, including Schedule 10 – Review Procedure and this Section 11.1.
- (b) In order to develop the detailed design of the New City Infrastructure and New MTO Infrastructure, DB Co shall consult with the Stakeholders (which consultation requirements pursuant to the Environmental Assessments are further described in Schedule 17 – Environmental Obligations), the City Representative and the City Design Team in an interactive process. If the result of any consultation with Stakeholders is a change to the scope, configuration or size of any New City Infrastructure or New MTO Infrastructure or a change in the Works, then such change shall, subject to and in accordance with Schedule 22 – Variation Procedure, result in a Variation.
- (c) The further development of the design of the New City Infrastructure and New MTO Infrastructure and the process by which it is progressed must fully comply with the requirements of this Project Agreement.
- (d) The Parties agree that Appendix A to Schedule 10 – Review Procedure is an initial list of Design Data and other items that will require design review, which Design Data and other items shall include design and construction documentation (to a scale required by the City Design Team) for each of the following:
 - (i) design development drawings, reports, schedules and specifications progressed from the date of this Project Agreement with extensive user group input, showing all architectural, engineering and landscape design information sufficient to allow for the development of working drawings, submitted at,
 - (A) Pre-Final Design Development (PFDD); and
 - (B) Final Design Development (FDD);(collectively, the “**Design Development Submittals**”);
 - (ii) working drawing documentation, being construction drawings, reports, schedules and specifications progressed from the Design Development Submittals, showing all architectural, engineering and landscape design information in accordance with the requirements of this Project Agreement, submitted upon completion thereof and as required in accordance with Schedule 10 – Review Procedure (the “**Construction Document Submittals**”);
 - (iii) Permit, Licence, Approval and Agreement drawings (phased, if applicable); and
 - (iv) all other reports, studies, plans and documentation required pursuant to Schedule 10 – Review Procedure or otherwise identified in the Project Agreement.
- (e) DB Co shall submit to the City Representative for review in accordance with Schedule 10 – Review Procedure all Design Data and other items listed in Section 11.1(d).

- (f) The Design Data and other items listed in Section 11.1(d) must contain, at a minimum, the information required pursuant to Article 3 of Schedule 10 – Review Procedure.
- (g) The Design Data and other items listed in Section 11.1(d) must contain, at a minimum, the following additional information:
 - (i) identification of the stage of design or construction to which the documentation relates;
 - (ii) all design or construction drawings and specifications necessary to enable the City Representative to make an informed decision as to whether DB Co is permitted to proceed pursuant to Schedule 10 – Review Procedure;
 - (iii) for each stage of the design or construction documentation, a schedule identifying all changes to the relevant documentation that has occurred from the previous stage of design or construction documentation; and
 - (iv) where changes have been submitted, an indication of how the changes meet the requirements of this Project Agreement.
- (h) All design review meetings held by DB Co pursuant to the Review Procedure which the City wishes to attend shall be held in Ottawa, Ontario unless the City otherwise agrees in writing.
- (i) If DB Co commences or permits the commencement of the next level of design or construction of any part or parts of the New City Infrastructure prior to being entitled to proceed in accordance with Schedule 10 – Review Procedure and it is subsequently determined in accordance with Schedule 10 – Review Procedure or Schedule 27 – Dispute Resolution Procedure that the design or construction does not comply with this Project Agreement, then DB Co shall forthwith, at its own cost and risk, undo, remove from the New City Infrastructure and/or Lands, replace and restore, as applicable, any parts of the design or construction that do not comply with this Project Agreement.
- (j) Subject to Sections 18.5 and 18.7, neither the City nor any City Party will have any liability:
 - (i) if a document submitted by DB Co and reviewed by the City, the City Representative or the City Design Team results in non-compliance with this Project Agreement by DB Co or a breach by DB Co of Applicable Law; or
 - (ii) for any loss or claim arising due to some defect in any documents, drawings, specifications or certificates submitted by DB Co.
- (k) DB Co and the City will cooperate with each other in the design review process. Notwithstanding such cooperation by the City, such review shall not constitute acceptance of the Works, and DB Co shall remain solely responsible for compliance in full with all requirements of this Project Agreement.
- (l) DB Co shall allow the City Design Team, at any time, a reasonable opportunity to view any items of Design Data, which shall be made available to the City Representative as soon as practicable following receipt of a written request from the City Representative.

- (m) DB Co shall cause the Construction Contractor to establish and maintain a computerized design database and a web based Review Procedure Activities Register, which DB Co and the City may access remotely by computer to:
 - (i) view drawings comprised within the Design Data;
 - (ii) electronically store and print copies of such Design Data; and
 - (iii) track the status of each Works Submittal, pursuant to Article 3 of Schedule 10 – Review Procedure.

11.2 Start-Up Meeting

- (a) Within 10 Business Days after the date of this Project Agreement, DB Co and the Design Team shall attend a start-up meeting (the “**Start-Up Meeting**”) with the City to set out the design development process in greater detail.
- (b) The agenda for the Start-Up Meeting shall include the following:
 - (i) DB Co’s plan to develop a successful partnership with the City for the purpose of supporting the City in achieving its vision, mission and core values;
 - (ii) DB Co’s plan to ensure that the Works are completed in accordance with the requirements set forth in this Project Agreement;
 - (iii) DB Co’s process to ensure optimum design quality;
 - (iv) DB Co’s approach to ensure that all DB Co Parties perform the Works, as applicable, as a fully integrated team;
 - (v) DB Co’s approach to a fully integrated interior design process that includes every element of interior finishes, furniture, fixtures, equipment, occupant signage and wayfinding;
 - (vi) a proposed schedule of Works Submittals which is consistent with the Proposed Works Schedule and which provides for a progressive and orderly flow of Works Submittals from DB Co to the City Representative to allow sufficient time for review of each Works Submittal by the City Design Team, taking into account both the resources available to the City Design Team to conduct such review and whether delay in the review of the subject matter of the Works Submittal will have a material impact on DB Co’s ability to progress future anticipated Works Submittals and the Works in accordance with the Works Schedule;
 - (vii) DB Co’s plan to successfully integrate feedback from consultations with Stakeholders and the City Design Team, in accordance with, and subject to, the Review Procedure;
 - (viii) any issues related to Schedule 34 – Mobility Matters;
 - (ix) DB Co’s approach to timing, construction, adjustment and user feedback on required mock-ups; and

- (x) a communication process that includes an electronic data room and the use of a computerized document tracking system that has the capacity to report, on request, the status of all design and construction documentation.

11.3 [Not Used]

11.4 Performance of Design Obligations

- (a) In the design and engineering of the Project, DB Co, its consultants and the DB Co Parties shall, at a minimum, exercise the standard of care normally exercised by licensed or registered professional architectural and engineering personnel having specialized knowledge and experience in performing design activities of a similar nature, scope and complexity.
- (b) DB Co shall ensure that all parts of the Works shall, as required by Applicable Law, be performed or reviewed by licensed or registered professional engineers and architects registered to practice in the Province of Ontario. Such architects and engineers shall certify and, if required by Applicable Law, sign and seal, all designs, drawings and technical reports confirming that they comply with all prevailing design standards and design practices for such work in the Province of Ontario, all other applicable standards, Output Specifications and codes, and as otherwise required by Applicable Law.

11.5 Works Submittals

- (a) Any and all items, documents and anything else required or specified by this Project Agreement in respect of the,
 - (i) East Works to be submitted to, reviewed or otherwise processed by the City prior to East Substantial Completion; and
 - (ii) West Works to be submitted to, reviewed or otherwise processed by the City prior to West Substantial Completion,

including any and all subsequent revisions, amendments and changes thereto, shall be subject to review by the City pursuant to Schedule 10 – Review Procedure. The first document to be submitted by DB Co for review by the City pursuant to Schedule 10 – Review Procedure shall be the draft document control and security protocol described in Section 42.5(f).

11.6 Documents

- (a) DB Co shall keep one copy of the current digital files of the Project Agreement, Project Documents, Works Schedule, submittals, reports, Variation Confirmations, DB Co Variation Notices, Variation Directives, partnering documents, records of meetings and all other documents necessary for the administration of the Project, all in good order and readily accessible and available to the City, Lenders' Consultant and the City Representative.
- (b) DB Co shall, where practical, keep one copy of current standards and manufacturers' literature specified in the Project Documents in good order and readily accessible and available to the City Representative and Lenders' Consultant and their representatives for the duration of the Works.

11.7 General Construction Obligations

- (a) Without limiting Section 10.3:
- (i) DB Co is solely responsible for all construction means, methods and techniques used to undertake the Works and must provide everything (including labour, plant, equipment and materials) necessary for the construction and commissioning of the New City Infrastructure and the New MTO Infrastructure, and all other performance of the Works, save to the extent such equipment and materials are to be provided by the City or RTG as specified in Schedule 15-2 Part 3, Appendix A.
 - (ii) DB Co shall in a timely and professional manner and in accordance with the requirements of this Project Agreement:
 - (A) construct the Works diligently, expeditiously and in a thorough and workman-like manner consistent with Schedule 11 – Integrated Management System Requirements;
 - (B) ensure that
 - (I) no works other than the Works under this Project Agreement are constructed on the Lands, the New City Infrastructure, the New MTO Infrastructure, the Existing Infrastructure or the Stage 1 Connection Infrastructure by DB Co, any DB Co Party or any person for whom DB Co is responsible at law; and
 - (II) the New City Infrastructure is constructed only on the Lands in accordance with Schedule 15 – Output Specifications;
 - (C) protect the Works from all of the elements, casualty and damage;
 - (D) in respect of plant, equipment, Products and materials incorporated in the Works, use plant, equipment, Products and materials that:
 - (I) are of a kind that are consistent with the Output Specifications;
 - (II) are new, of good quality and are used, handled, stored and installed in accordance with Applicable Law and Good Industry Practice, including, with respect to health and safety, so as not to be hazardous or dangerous; and
 - (III) where they differ from the Output Specifications, have been substituted with the City's prior written consent in accordance with Section 11.20.
 - (iii) Without limiting DB Co's obligations pursuant to Section 11.11 or DB Co's indemnity pursuant to Section 46.1, DB Co shall, from commencement of the Works until East Substantial Completion in respect of the System Infrastructure comprising the East Works, West Substantial Completion in respect of the System Infrastructure comprising the West Works, the applicable Handover in respect of the New MTO Infrastructure, and the applicable New Municipal Infrastructure Component Acceptance Date in respect of

the New Municipal Infrastructure, be responsible for maintaining and securing the Site to prevent access onto the Site, the New City Infrastructure, the New MTO Infrastructure and the elements of the Existing Infrastructure on which Works will be performed (during such times as it has care and custody of such Existing Infrastructure) of any persons not entitled to be there, and the licence granted to DB Co pursuant to Section 16.1 shall include rights for DB Co to do so.

- (iv) DB Co shall not, and DB Co shall ensure that the DB Co Parties do not, in any way whatsoever, contravene or cause a contravention of any labour-related contractual obligation or agreement, to the extent that DB Co has been notified of the same, or any provision of any disclosed collective agreement to which the City or MTO is a party that is applicable to the New MTO Infrastructure or New City Infrastructure and constructed pursuant to the Project Agreement, as such disclosed collective agreements or labour-related agreements may be amended from time to time. To the extent that compliance with any amendments made to any such disclosed collective agreements or labour-related agreements, or to the extent any such disclosed collective agreements or labour-related agreements entered into or disclosed to DB Co after Financial Close, adversely interferes with DB Co's ability to perform the Works or materially adversely affects DB Co's cost of, or schedule for, performing the Works, the same shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.
- (b) DB Co shall provide a new construction site office for use by the City at each location specified in Schedule 15 – Output Specifications, upon DB Co's mobilization to the Site at such location, and in accordance with the requirements set out in Schedule 15 – Output Specifications.

11.8 Permits, Licences, Approvals and Agreements

- (a) DB Co shall, at its own cost and risk:
 - (i) obtain, maintain, and, as applicable, renew all DB Co Permits, Licences, Approvals and Agreements which may be required for the performance of the Works;
 - (ii) except for those obligations which are identified as the City obligations in Schedule 35 – Permits, Licences, Approvals and Agreements, assume all of the obligations of the City under the City Permits, Licences, Approvals and Agreements (and for greater certainty, the Development Approvals);
 - (iii) comply with all Permits, Licences, Approvals and Agreements in accordance with their terms; and
 - (iv) provide all security, including all letters of credit, that may be required in connection with any DB Co Permits, Licences, Approvals and Agreements, provided that, if the City is able to obtain an exemption from such security on behalf of DB Co and with respect to the Project,
 - (A) DB Co shall provide to the City an accurate accounting of the costs and expenses avoided by DB Co as a result of any such exemption; and

- (B) the City shall be permitted to deduct an amount equal to all costs and expenses that were avoided by DB Co as a result of any such exemption from a Substantial Completion Payment.
- (b) Where any DB Co Permits, Licences, Approvals and Agreements have requirements that may impose any conditions, liabilities or obligations on the City or any City Party or RTG or any RTG Party, DB Co shall not obtain, amend or renew (other than upon the same terms and conditions) such DB Co Permits, Licences, Approvals and Agreements without the prior written consent of the City, such consent not to be unreasonably withheld or delayed, provided that none of the City, any City Party, RTG or any RTG Party shall be responsible for obtaining or for the failure of DB Co to obtain any DB Co Permit, Licence, Approval and Agreement. The City shall comply, or shall require compliance, with any conditions, liabilities or obligations as are imposed on the City or any City Party or RTG or any RTG Party by the requirements of any DB Co Permit, Licence, Approval and Agreement obtained with the City's consent under this Section 11.8(b).
- (c) The City shall provide DB Co with such information and administrative assistance as DB Co may reasonably require in relation to the Permits, Licences, Approvals and Agreements. In respect of Section 11.8(a)(ii), the City shall,
- (i) provide DB Co with relevant information and copies of notices received under the applicable City Permits, Licences, Approvals and Agreements; and
- (ii) execute any documents under the applicable City Permits, Licences, Approvals and Agreements which Applicable Law dictates that only the City can execute.
- (d) DB Co shall, at its own cost, provide or cause to be provided such information, documentation, and administrative assistance as the City may request and as DB Co may reasonably be able to provide, and shall execute such applications as are required to be in its name, to enable the City to obtain, maintain or renew any of the City Permits, Licences, Approvals and Agreements or to demonstrate compliance with any Permits, Licences, Approvals and Agreements, provided that DB Co shall not be responsible for obtaining or for any delay in obtaining or for the failure of the City to obtain any of the City Permits, Licences, Approvals and Agreements, unless such delay or failure is caused by any act or omission of DB Co, any DB Co Party or any other person for whom DB Co is responsible at law.
- (e) If, prior to the applicable Scheduled Substantial Completion Date, the City fails to issue to DB Co a final determination (a granting, conditional granting, or refusal) in respect of a Listed DB Co PLAA prior to the expiration of [REDACTED] per cent of the number of Business Days (rounding up to Business Days if such calculation results in a certain number of Business Days plus a fraction of a Business Day) designated for a final determination by the City in Appendix A to Schedule 35 – Permits, Licences, Approvals and Agreements for the applicable Listed DB Co PLAA (the “**City PLAA Deadline**”), then any delay in the Works or additional costs in respect of the Works caused by the failure to make a final determination by the City PLAA Deadline shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event, provided that:
- (i) the applicable DB Co Permit, Licence, Approval or Agreement is a Listed DB Co PLAA;
- (ii) DB Co has fulfilled all obligations pursuant to the Applicable Law, in accordance with any deadline applicable to the Listed DB Co PLAA imposed by this Project Agreement

- or the City, including providing timely and thorough responses to questions or concerns posed by the City in respect of the Listed DB Co PLAA;
- (iii) DB Co submitted the applicable Listed DB Co PLAA in accordance with the timing for such submission in the Works Schedule or Recovery Schedule, as applicable (in each case, as such submission date may be extended on account of any Delay Event); and
 - (iv) DB Co's application for the Listed DB Co PLAA and DB Co's responses to all questions or concerns posed by the City were in accordance with Good Industry Practice.
- (f) For clarity, Section 11.8(e) does not entitle DB Co to a Delay Event or a Compensation Event,
- (i) in the event that the City's final determination on a Listed DB Co PLAA is made in a timely way, pursuant to the applicable City PLAA Deadline, but is not favourable to DB Co or DB Co disagrees with the substance of the final determination;
 - (ii) in the event that the City fails to issue to DB Co a final determination in respect of a Permit, Licence, Approval or Agreement that is not explicitly listed as a Listed DB Co PLAA; or
 - (iii) with respect to,
 - (A) Permits, Licences, Approvals or Agreements that are related to, but not explicitly included on, the Listed DB Co PLAAs; or
 - (B) the Traffic and Transit Management Plan.
- (g) DB Co shall, at its own cost and risk, provide to the City a system to track the status of each Listed DB Co PLAA through every stage of preparation, submission and approval. More specifically, such system shall:
- (i) be kept updated on a daily basis and be available to the City in real time during normal business hours through a web-based interface which would include functionality to provide automated email alerts to a customizable frequency and set of email addresses;
 - (ii) be operational no later than the date upon which the first Listed DB Co PLAA application is submitted; and
 - (iii) include a feature that highlights to the City each outstanding applicable Listed DB Co PLAA when it reaches the following milestone triggers:
 - (A) [REDACTED]% of the number of Business Days designated for a final determination by the City in Appendix A to Schedule 35 – Permits, Licences, Approvals and Agreements for the applicable Listed DB Co PLAA;
 - (B) [REDACTED]% of the number of Business Days designated for a final determination by the City in Appendix A to Schedule 35 – Permits, Licences, Approvals and Agreements for the applicable Listed DB Co PLAA; and

- (C) 5 Business Days prior to the expiration of the City PLAA Deadline.
- (h) DB Co shall submit documentation on the proposed design, functionality, and usage of the system to the City Representative in accordance with Schedule 10 – Review Procedure no later than 60 days after Financial Close.
- (i) In addition, DB Co shall provide written notice to the City Representative with respect to any outstanding Listed DB Co PLAA when it reaches the milestone triggers outlined in Section 11.8(g)(iii) above.
- (j) With respect to any failure to issue to DB Co a final determination in respect of a Listed DB Co PLAA prior to the expiration of the relevant City PLAA Deadline, DB Co shall not be entitled to the Delay Event or Compensation Event pursuant to Section 32.1(a)(xv) unless the tracking system as described in Section 11.8(g) is functional and available to the City, provides notice to the City of the milestone described in Section 11.8(g)(iii), and contains accurate information as to the status of the applicable Listed DB Co PLAA at all material times.
- (k) With respect to the NCC FLUDTA:
 - (i) the City shall obtain the NCC FLUDTA, but can only do so with DB Co's performance of the obligations set out in Section 11.8(k)(ii);
 - (ii) DB Co shall use commercially reasonable efforts to assist the City in obtaining the NCC FLUDTA as required from time to time including, without limitation:
 - (A) the preparation and delivery of all Design Data in respect of the NCC FLUDTA pursuant to Schedule 10 – Review Procedure;
 - (B) the preparation and delivery of Design Development Submittals and/or Construction Document Submittals pursuant to Section 11.1 that are reasonably necessary to obtain the NCC FLUDTA;
 - (C) the preparation and delivery of such other plans, specifications, agreements, documents and instruments in respect of Works and amendments thereto that are reasonably necessary to obtain the NCC FLUDTA; and
 - (D) DB Co shall make changes to the Design Data as required by NCC to further assist the City in obtaining the NCC FLUDTA and DB Co shall take such other actions as may be reasonably directed by the City from time to time with respect thereto; and
 - (iii) if, following Commercial Close:
 - (A) NCC requires a change to the Design Data or any other additional obligation to be assumed in respect of the NCC FLUDTA pursuant to Section 11.8(a); and
 - (B) the City, in a timely manner, requires DB Co to make such change or to assume such additional obligation,

provided the change or other obligation is not otherwise a responsibility or obligation of DB Co under this Project Agreement, then such change or obligation shall result in a Variation subject to and in accordance with Schedule 22 – Variation Procedure.

11.9 Protection of Work and Property

- (a) DB Co shall protect (i) the Works and the property of the City on the Site, the New City Infrastructure, the New MTO Infrastructure, and (ii) the Existing Infrastructure and Stage 1 Connection Infrastructure (while the same is in DB Co's possession or at any time such Existing Infrastructure or Stage 1 Connection Infrastructure is the subject of ongoing Works), from damage or destruction caused by DB Co's operations under this Project Agreement, and DB Co shall, in accordance with Section 11.9(b), be responsible for such damage or destruction, except for any damage or destruction which occurs as a result of acts or omissions by the City or any City Party.
- (b) Unless this Project Agreement is terminated in accordance with its terms, and except to the extent a Relief Event or Force Majeure Event occurs in respect of which the policies required to be procured pursuant to Section 1 of Schedule 25 do not respond, if all or any part of the Works is damaged or destroyed prior to the applicable Substantial Completion Date in respect of the System Infrastructure, or prior to the applicable New Municipal Infrastructure Component Acceptance Date in respect of the New Municipal Infrastructure, or prior to the applicable Handover in respect of the New MTO Infrastructure, DB Co shall, at its own cost and expense, Make Good the Works, or any part thereof, as applicable, (the "**Reinstatement Work**") promptly and in any event as soon as practicable in the circumstances. Except as otherwise expressly provided in this Project Agreement, damage to or destruction of all or any part of the Works shall not terminate this Project Agreement or relieve DB Co of any of its obligations hereunder or entitle DB Co to any compensation from the City.
- (c) DB Co shall not undertake to repair and/or replace any damage or destruction whatsoever to adjacent property or any Existing Infrastructure owned by third parties other than MTO without first consulting the City, and in the case of Existing Infrastructure owned by MTO, without first consulting MTO and, in each case, receiving written instructions as to the course of action to be followed.
- (d) Without derogating from any obligations which DB Co may have under any Encroachment Permit, DB Co acknowledges and agrees that the timely performance of Reinstatement Work relating to damage or destruction to Existing Infrastructure owned by MTO or New MTO Infrastructure (but in all cases subject to the time period limitations provided in Sections 11.9(b)) is critical to the ability of MTO to maintain effective operations of such infrastructure. DB Co will respond to any requirement by MTO to perform Reinstatement Work within the time periods required by MTO, acting reasonably having regard to the nature of the Reinstatement Work. DB Co acknowledges and agrees that if MTO is unable to contact DB Co and/or obtain the Reinstatement Work within the time specified by MTO, MTO may take such emergency steps as are reasonable and appropriate to correct any damage or destruction or failures to comply with the Project Agreement, at DB Co's sole risk, cost and expense. Except in the case of damage caused by MTO's own forces, such emergency steps taken by MTO shall not invalidate any DB Co warranties in respect of the Works.

- (e) Notwithstanding Sections 11.9(b) and 11.9(f), Reinstatement Work carried out by DB Co in respect of New MTO Infrastructure that is not owned by MTO shall be planned and implemented by DB Co in consultation with the applicable third party.
- (f) If the Reinstatement Work is reasonably estimated to cost more than \$[REDACTED] (index linked) or in any other case where the City Representative, having regard to the nature of the damage or destruction, notifies DB Co that a Reinstatement Plan is required (excluding where the damage or destruction occurs before the applicable time periods provided in Section 11.9(b) and the City Representative acting reasonably considers that the continued application of the Design and Construction Certification Procedure would be able to adequately address the Reinstatement Work without the need for a separate Reinstatement Plan), DB Co shall, as soon as practicable and in any event within 20 Business Days after the occurrence of the damage or destruction or receipt of notification from the City Representative, as the case may be, or, if such Reinstatement Work is in respect of Highway Works, such period of time as may be required to comply with directions of MTO, (or if, with the exercise of all due diligence more than 20 Business Days is reasonably required for such purposes, then within such longer period of time after the occurrence of such damage or destruction or receipt of notification from the City Representative, as the case may be, as may be reasonably required with the exercise of all due diligence, provided DB Co exercises and continues to exercise all such due diligence) submit to the City Representative pursuant to Schedule 10 - Review Procedure a plan (a “**Reinstatement Plan**”) prepared by DB Co for carrying out the Reinstatement Work setting out, in reasonable detail, *inter alia*:
 - (i) a description of the Reinstatement Work required to restore, replace and reinstate the damage or destruction;
 - (ii) DB Co’s proposed schedule for the execution of the Reinstatement Work; and
 - (iii) the information required pursuant to Schedule 22 – Variation Procedure as if such plan were an Estimate,

and the Reinstatement Work must not be commenced until the City Representative consents thereto in accordance with Schedule 10 - Review Procedure except (A) where such Reinstatement Work relates to Existing Infrastructure owned by MTO or New MTO Infrastructure and MTO requires performance of such Reinstatement Work on an expedited basis, or (B) to the extent necessary to address any Emergency, public safety needs. Notwithstanding Sections 11.9(c), (e) and (f), where there is danger to life or property which arises out of or in connection with the performance of the Works, either Party may, but DB Co shall, immediately take such emergency action as is necessary to remove the danger.

- (g) DB Co shall cause the Reinstatement Work to be carried out in accordance with the Output Specifications and all other applicable requirements under this Project Agreement and, where applicable, in accordance with the Reinstatement Plan consented to by the City Representative in accordance with Schedule 10 - Review Procedure. All designs, plans and specifications in respect of the Reinstatement Work shall be subject to the Design and Construction Certification Procedure. If requested by the City Representative, the persons (and if applicable, a suitable parent entity thereof acceptable to the City) retained by DB Co to design and carry out any Reinstatement Work shall, as a condition to their retainer and prior to commencing any Reinstatement Work or design work in connection therewith, enter into a construction contract with DB Co and a direct agreement with the City in substantially the same forms as the Design and Construction Contract and the Construction Contractor’s Direct Agreement.

- (h) In the event any Insurance Proceeds under Insurance Policies as referred to in Schedule 30 - Insurance Trust Agreement are available to carry out the Reinstatement Work, such Insurance Proceeds shall be paid into the Insurance Trust Account and shall be dispensed in accordance with the provisions of the Insurance Trust Agreement to carry out the Reinstatement Work.

- (i) [Not used]

11.10 Liability Unaffected

- (a) DB Co shall not be relieved of any liability or obligation under this Project Agreement by the retainer or appointment of any DB Co Party, and DB Co shall cause each DB Co Party, to the extent such DB Co Party performs, or is specified hereunder to perform, the Works, to comply with the obligations of DB Co to the City in the same manner and to the same extent as DB Co.
- (b) No inspection, review, comment, approval, verification, confirmation, certification, acknowledgement or audit pursuant to the provisions of this Project Agreement by the City, the City Representative, Lenders' Consultant, MTO, RTG, or anyone on their behalf, nor any failure of any of them to do so, shall relieve DB Co from performing or fulfilling any of its obligations under this Project Agreement or be construed as an acceptance of the Works or any part thereof.

11.11 Safety

- (a) DB Co shall, from Financial Close until the East Substantial Completion in respect of the System Infrastructure comprising the East Works, West Substantial Completion in respect of the System Infrastructure comprising the West Works, the applicable New Municipal Infrastructure Component Acceptance Date in respect of the New Municipal Infrastructure, the applicable Handover in respect of the New MTO Infrastructure, and West Final Completion in respect of the Remaining Works:
 - (i) comply with the health and safety requirements in Schedule 11 – Integrated Management System Requirements of the Project Agreement, its Integrated Management System, and the Construction Safety Management Plan;
 - (ii) keep the Site (including Existing Infrastructure on the Site), the Works, the New City Infrastructure and the New MTO Infrastructure in a safe and orderly state, as appropriate in accordance with Good Industry Practice, to avoid danger to persons on the Site (including Existing Infrastructure on the Site), the New City Infrastructure and the New MTO Infrastructure and in the immediate vicinity of the Site (including Existing Infrastructure on the Site), the New City Infrastructure and the New MTO Infrastructure;
 - (iii) take such measures as are reasonable in accordance with Good Industry Practice to prevent access to the Site (including Existing Infrastructure on the Site), the New City Infrastructure and the New MTO Infrastructure of any persons or creatures not entitled to be there;
 - (iv) comply, and cause each DB Co Party to comply,
 - (A) with Applicable Law relating to health and safety, including without limitation the *Occupational Health and Safety Act* (Ontario) and all regulations thereto;

- (B) with the Construction Access Management Plan, the Traffic and Transit Management Plan and all rules, requirements and restrictions relating to access, rail safety and operations and track protection, and road safety and operations, as set out in Schedule 15 – Output Specifications; and
 - (C) with any direction or instruction from Transport Canada pursuant to any contractual arrangement or board order involving Transport Canada and MTO with respect to the System Infrastructure corridor and facilitate and provide cooperation with respect to any inspections by Transport Canada on the Lands.
 - (v) register the Project with the MOL by way of a Notice of Project, pursuant to the Applicable Law, with the purpose of designating DB Co as the “constructor” for all Works on the Site;
 - (vi) with respect to the Works, cause a COR-Certified Construction DB Co Party or, prior to receipt of COR Certification, a COR-Qualified Construction DB Co Party, to perform, all of the obligations of the “constructor”, and indemnify the City, each City Party and each Government Entity against any and all of the liabilities of the “constructor”, under the *Occupational Health and Safety Act* (Ontario) and all regulations thereto;
 - (vii) provide the City with a certificate of good standing from WSIB or any successor thereto once every 90 days; and
 - (viii) facilitate and provide cooperation with respect to any inquiry or investigation of the MOL with respect to the Project.
- (b) New MTO Infrastructure and New City Infrastructure shall, for the all purposes of this Project Agreement, become Existing Infrastructure upon the earlier of, in the case of,
- (A) New MTO Infrastructure, the applicable Handover; and
 - (B) System Infrastructure comprising the East Works, East Substantial Completion;
 - (C) System Infrastructure comprising the West Works, West Substantial Completion; and
 - (D) New Municipal Infrastructure, the applicable New Municipal Infrastructure Component Acceptance Date.
- (c) At any time that the Works are being carried out in or around the Existing Infrastructure or Stage 1 Connection Infrastructure, DB Co shall at all times:
- (i) ensure that it complies with all safety requirements set out in the Project Agreement, including those set out in Section 11.11(a) above; and
 - (ii) keep the Existing Infrastructure or Stage 1 Connection Infrastructure in a safe and orderly state, as appropriate and in accordance with Good Industry Practice, to avoid any danger

to the System Users, employees, visitors and other persons attending the Existing Infrastructure or Stage 1 Connection Infrastructure.

- (d) If the MOL determines pursuant to the *Occupational Health and Safety Act* (Ontario) that DB Co is not the “constructor” for the Site or any portion thereof, then the following shall apply:
 - (i) DB Co shall comply with the instructions of the “constructor” relating to matters of health and safety on the Site, or such portion thereof, methods and manner of construction, and coordination and scheduling of the “constructor’s” works with the Works.
 - (ii) If DB Co’s activity or presence on the Site causes the City to be named “constructor” by MOL, DB Co will immediately take any necessary remedial action, including vacating the Site, to ensure that the MOL determines that DB Co is the “constructor”.
 - (iii) If a third party is named “constructor” by MOL, DB Co shall not interfere with or delay the third party’s work, and shall not do anything whatsoever that causes the third party to be in contravention of its obligations under the *Occupational Health and Safety Act* (Ontario). DB Co shall immediately cease and desist any activity that results or has a likelihood of resulting in such interference with or delay of the work of the third party.
 - (iv) DB Co shall indemnify the City, each City Party and each Government Entity against any and all of the liabilities arising from a determination by the MOL that the City, or both the City and a third party contractor has been designated as the “constructor”, under the *Occupational Health and Safety Act* (Ontario).
- (e) In the event that an act or omission of DB Co causes or contributes to an MOL determination that DB Co is not the “constructor” for its work, or if DB Co is denied access to the Site pursuant to Section 11.11(d)(iii), DB Co will not be eligible for a Delay Event or a Compensation Event.

11.12 Additional Works, Third Party Works and RTG Works

- (a) DB Co shall, having regard to DB Co’s obligations set out in Section 17, arrange and carry out all coordination of the Works with the Third Party Works directly with the applicable Third Party Contractor.
- (b) The City may, in its sole discretion, carry out Additional Works.
- (c) From Financial Close until the Substantial Completion Date for the Works affected by such Additional Works, the City may assign the responsibility for directing methods and manner of construction (where applicable) of the Additional Works, the coordination and scheduling of the Additional Works and the safety training in respect of the Additional Works to DB Co. For clarity, the City may, in its sole discretion, assign such responsibilities to DB Co, subject to Section 11.12(h).
- (d) In connection with the Additional Works, the City shall,
 - (i) cause Additional Contractors to comply with the instructions of DB Co relating to matters of health and safety on the Site, methods and manner of construction (where applicable), and coordination and scheduling of the Additional Works with the Works;

- (ii) enter into separate contracts with Additional Contractors,
 - (A) under conditions of contract which are compatible with the conditions of this Project Agreement;
 - (B) that require Additional Contractors to comply with Section 11.12(e) and all directions of DB Co in respect of any matter regarding health and safety on the Site, and methods and manner of construction (where applicable); and
 - (C) that require Additional Contractors to comply with DB Co's coordination and scheduling of the Additional Works; and
- (iii) ensure that insurance coverage is provided by each Additional Contractor as would be required by a prudent owner similarly situated and coordinate such insurance with the insurance coverage of DB Co and in any event, such insurance shall provide for liability insurance of not less than \$[REDACTED].
- (e) In connection with the Additional Works, if the City has assigned responsibilities to DB Co pursuant to Section 11.12(c), DB Co shall,
 - (i) provide for the methods and manner of construction (where applicable) of the Additional Works and the coordination and scheduling of the Additional Works with the Works to be performed under this Project Agreement;
 - (ii) for each of the East Works, West Works and Highway Works, assume overall responsibility for compliance with all aspects of Applicable Law relating to health and safety at the Site, including all the responsibilities of the "constructor" under the Occupational Health and Safety Act (Ontario), prior to the applicable Substantial Completion Date and, exercised in a manner consistent with the *Occupational Health and Safety Act* (Ontario), at any time that DB Co is acting as a "constructor" on the Site, or the applicable portion thereof, following the applicable Substantial Completion Date;
 - (iii) provide Additional Contractors reasonable opportunity to introduce and store their products and use their construction machinery and equipment to execute the Additional Works, as applicable;
 - (iv) participate with the City and Additional Contractors in reviewing the construction schedules of Additional Contractors, when directed to do so by the City; and
 - (v) if part of the Works is affected by or depends upon, for its proper execution, the Additional Works, promptly report to the City in writing and prior to proceeding with that part of the Works any readily apparent deficiencies in the Additional Works. Failure by DB Co to so report shall invalidate any claims against the City by reason of such readily apparent deficiencies.
- (f) In the case of Additional Works carried out prior to the last Substantial Completion, if:
 - (i) any Additional Contractors cause any damage to the Works;

- (ii) DB Co incurs any additional costs or there is any delay in the Works Schedule as a result of any Additional Contractors not complying with the coordination, scheduling and safety instructions of DB Co; or
- (iii) subject to the performance by DB Co of its obligations under this Section 11.12, if DB Co incurs any additional costs or there is any delay in the Works Schedule as a result of any such Additional Works,

then any such delay in the Works Schedule or additional costs in respect of the Works shall, subject to and in accordance with Section 32 be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.

- (g) Claims, disputes, and other matters in question between DB Co and Additional Contractors shall be dealt with in substantially the same manner as contemplated in Schedule 27 – Dispute Resolution Procedure provided the Additional Contractors are subject to reciprocal dispute resolution obligations in the contracts between the City and the Additional Contractors. DB Co shall be deemed to have consented to arbitration of any dispute with any Additional Contractor whose contract with the City contains a reciprocal agreement to arbitrate.
- (h) In connection with the Additional Works, DB Co may request a Variation as follows:
 - (i) DB Co shall have a period of 10 Business Days following Notice from the City of the City's intention to carry out such Additional Works, including a reasonable description of such Additional Works, to request a Variation if such Additional Works are
 - (A) reasonably expected to make void a warranty made in favour of DB Co from a DB Co Party or equipment supplier and given in accordance with Good Industry Practice; or
 - (B) reasonably expected to have a material negative consequence on DB Co's ability to perform any of the Works, including a material delay in performance of the Works, or material additional costs in respect of the Works;
 - (ii) If DB Co has made a request for a Variation in accordance with Section 11.12(h)(i), the City shall, within 10 Business Days after such request, either issue a Variation Enquiry or give Notice to DB Co that it does not agree that a Variation is required;
 - (iii) Either Party may refer the question of whether a Variation is required for resolution in accordance with Schedule 27 – Dispute Resolution Procedure; and
 - (iv) If the City has, under Section 11.12(h)(ii), given Notice to DB Co that it does not agree that a Variation is required, the City shall, within 10 Business Days after a subsequent agreement or of a determination that a Variation is required, issue a Variation Enquiry and the relevant provisions of Schedule 22 – Variation Procedure shall apply except that:
 - (A) the City shall not be entitled to withdraw any such Variation Enquiry unless the City determines not to proceed with the Additional Works or to proceed only in a manner that the Additional Works will not result in a warranty becoming void or will not result in any material negative consequence on

DB Co's ability to perform any of the Works and DB Co has agreed with such conclusion, or the Parties otherwise agree; and

- (B) the Parties shall, without prejudice to their respective general obligations to comply with the terms of this Project Agreement, use commercially reasonable efforts to mitigate the adverse effects with respect to any void or voidable warranty and take commercially reasonable steps to minimize any increase in costs arising from any void warranty.
- (i) Placing, installing, applying or connecting the Additional Works performed by Additional Contractors on and to the Works performed by DB Co shall not relieve DB Co from its obligations under the Project Agreement with respect to the Works, except to the extent expressly described in any Variation Confirmation.
- (j) In connection with the RTG Stage 1 PA Works and RTG City Party Works, the City shall enter into and/or maintain contractual terms with RTG, including the Stage 1 Project Agreement and variations thereto,
 - (i) which are compatible with the conditions of this Project Agreement;
 - (ii) that require RTG and RTG Parties to comply with directions of DB Co in respect of any matter regarding health and safety on the Site;
 - (iii) that require RTG and RTG Parties to take reasonable steps to minimize undue interference with the provision of the Works by DB Co or any DB Co Party; and
 - (iv) in respect of the RTG Systems Integration Works, that require RTG and RTG Parties to comply with the Systems Integration Management Plan.
- (k) In the case of RTG Stage 1 PA Works and RTG City Party Works, if:
 - (i) RTG or any RTG Party causes any damage to the Works; or
 - (ii) DB Co incurs any additional costs or there is any delay in the Works Schedule as a result of any act or omission of RTG or any RTG Party, including due to non-compliance with the Systems Integration Management Plan by RTG or any RTG Party in the performance of the RTG Systems Integration Works or RTG Stage 1 PA Works,then any such delay in the Works Schedule or additional costs in respect of the Works shall, subject to and in accordance with Section 32 be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.
- (l) To the extent that any City Party or Additional Contractor (other than RTG or an RTG Party) undertakes Remaining System Integration Work or any of the activities outlined in Section 5.2(m) of Schedule 15-2 Part 1, then the City shall be subject to the same obligations in respect of such City Party or Additional Contractor as set out in Section 11.12(j) and (k) as if such City Party or Additional Contractor were RTG or an RTG Party, *mutatis mutandis*.
- (m) Claims, disputes, and other matters in question between DB Co and RTG shall be dealt with (i) in respect of matters governed by the Interface Agreement, in accordance with the dispute resolution

procedure in the Interface Agreement, and (ii) in respect of all other matters involving the City, in substantially the same manner as contemplated in Schedule 27 – Dispute Resolution Procedure and the City shall ensure RTG is subject to reciprocal dispute resolution obligations in the Stage 1 Project Agreement and variations thereto, including in respect of Systems Integration Disputes which shall be referred at first instance to the Systems Integration Verifier in accordance with Schedule 27 – Dispute Resolution Procedure. DB Co shall be deemed to have consented to arbitration of any dispute with RTG.

11.13 Protest and Trespass

- (a) Except as otherwise provided in this Project Agreement, the City shall not be responsible for the presence of any persons participating in civil disobedience, demonstration or protest action (“**Protesters**”) or any other persons otherwise not entitled to be on or around the Lands (“**Trespassers**”). For greater certainty, the presence of, or interference by, any Protesters or Trespassers on or around the Lands shall not be a breach of the obligation of the City to grant licence rights of use and access to DB Co on and over the Lands pursuant to Section 16 nor a breach of any other obligation, representation or warranty under this Project Agreement.
- (b) Prior to the applicable Substantial Completion Date, the management of any Protesters or Trespassers shall be the responsibility of DB Co in respect of the Site (including Existing Infrastructure on the Site), to the extent such management is not otherwise the responsibility of the Police Service.
- (c) If, prior to the applicable Substantial Completion Date, Protesters or Trespassers occupy the Site, facilities or infrastructure referred to in Section 11.13(b), or access to such Site, facilities, or infrastructure is prevented or interfered with by Protesters or Trespassers, DB Co shall use all appropriate measures reasonable in the circumstances to manage such Protesters or Trespassers and promptly notify the City Representative of such occurrence and of the action which DB Co proposes to take in respect thereof. DB Co may exercise any legal remedy available to it to remove Protesters or Trespassers from the Site, facilities or infrastructure referred to in Section 11.13(b), provided that if DB Co does elect to exercise any such legal remedy, DB Co shall give the City Representative at least 24 hours’ Notice prior to commencing any such legal proceeding (except in a case of Emergency, danger to persons or material destruction or material damage to property where, in such circumstances, such Notice may be given to the City less than 24 hours prior to the commencement of such legal proceeding) and shall continually update the City Representative as to the status of any such legal proceeding in reasonable detail and at reasonable intervals, and provided further that:
 - (i) DB Co shall not give directly or indirectly to any Protester or Trespasser any inducement, monetary or otherwise, with a view to avoiding, limiting or influencing the manner of protest activities by that Protester or Trespasser or by other Protesters or Trespassers; and
 - (ii) DB Co shall not by virtue of this Section 11.13(c) be prevented from entering into *bona fide* settlements of claims brought against it by Protesters or Trespassers which provide for reasonable payments in satisfaction of such claims or agreeing to any reasonable cost orders in any proceedings.
- (d) DB Co may request the assistance of the City (at the cost of DB Co) to remove Protesters or Trespassers from the Site, Lands, facilities or infrastructure set out in Section 11.13(b), if DB Co demonstrates to the City’s reasonable satisfaction that:

- (i) DB Co is pursuing legal remedies available to it to remove the Protesters or Trespassers (provided that for this purpose DB Co may, but shall not be obligated to, prosecute injunctive or other judicial remedies beyond the court of first instance); and
- (ii) the continued presence of the Protesters or Trespassers is having a material adverse effect on the conduct of the Works that DB Co is unable to mitigate.

Following such request, the City shall notify DB Co whether the City can lawfully provide any assistance in relation to the removal of the Protesters or Trespassers that is not independently available to DB Co and, to the extent that such assistance can be lawfully provided, the City shall provide such assistance (at the cost of DB Co) to the extent it is, in the discretion of the City, reasonable and appropriate in the circumstances to do so.

11.14 Adjacent Developments

- (a) DB Co shall,
 - (i) having regard to this Section 11.14, review all planning and development applications received from the City in connection with proposed Adjacent Developments;
 - (ii) as required by the City, provide all commercially reasonable assistance to,
 - (A) facilitate the discussion, agreement and any implementation of proposals with respect to Adjacent Developments; and
 - (B) avoid or mitigate any adverse impact of an Adjacent Development on the Works and the New City Infrastructure;
 - (iii) subject to DB Co's reasonable operational and health and safety requirements, permit the developer of the Adjacent Development to post or affix signage in respect of the Adjacent Development, which signage may identify the Adjacent Development project architect, engineer and lender, and other members of the developer's project team;
 - (iv) subject to DB Co's reasonable operational and health and safety requirements, permit the developer of the Adjacent Development to post or affix, at one location on the Lands, signage, as required in connection with a development application; and
 - (v) at the City's request, provide to the developer of an Adjacent Development, all Project documentation in respect of the design and construction of elements of the New City Infrastructure that are relevant to the Adjacent Development, subject to the developer of the Adjacent Development, executing a confidentiality agreement and a waiver of liability, each in a form and substance satisfactory to the City and DB Co, each acting reasonably.
- (b) The City shall ensure that any contract entered into by the City with the developer of an Adjacent Development, in respect of which Section 11.14(a) is reasonably expected to apply, will contain a reciprocal provision to Section 11.14(a) for the benefit of DB Co.
- (c) All work and activities undertaken by DB Co or any DB Co Party pursuant to this Section 11.14 shall be at DB Co's own cost, provided that in the event that more than [REDACTED] Adjacent

Development applications are referred to DB Co by the City in a calendar year, then DB Co shall be entitled to a Variation in respect of the review of such development applications in excess of [REDACTED] applications per calendar year referred to them.

11.15 Defective Works

- (a) Prior to East Substantial Completion and save with respect to possible East Minor Deficiencies identified in accordance with Section 25.10(a), DB Co shall promptly Make Good any Construction Defects in respect of the East Works (an “**East Construction Defect**”) whether or not such East Construction Defect has been incorporated into the New City Infrastructure and whether or not the East Construction Defect is the result of poor workmanship, use of defective Products or equipment or damage through carelessness or other act or omission of DB Co. The correction of East Construction Defects shall be at DB Co’s sole cost and expense. DB Co shall Make Good, in a manner acceptable to the Independent Certifier, or, in the case of New Municipal Infrastructure, the City Engineer, all East Construction Defects, whether or not they are specifically identified by the Independent Certifier or the City Engineer, as the case may be, and DB Co shall prioritize the correction of any East Construction Defects so as not to interfere with or derogate from the Works Schedule, provided that DB Co shall prioritize the correction of any East Construction Defects that in the sole discretion of the City is determined to adversely affect the day to day operation of the City.
- (b) Prior to West Substantial Completion and save with respect to possible West Minor Deficiencies identified in accordance with Section 25.10(b), DB Co shall promptly Make Good any Construction Defect (other than Highway Construction Defects which shall be addressed in accordance with Section 11.15(c)) in respect of the West Works (a “**West Construction Defect**”) whether or not such West Construction Defect has been incorporated into the New City Infrastructure and whether or not the West Construction Defect is the result of poor workmanship, use of defective Products or equipment or damage through carelessness or other act or omission of DB Co. The correction of West Construction Defects shall be at DB Co’s sole cost and expense. DB Co shall Make Good, in a manner acceptable to the Independent Certifier, or, in the case of New Municipal Infrastructure, the City Engineer, all West Construction Defects, whether or not they are specifically identified by the Independent Certifier or the City Engineer, as the case may be, and DB Co shall prioritize the correction of any West Construction Defects so as not to interfere with or derogate from the Works Schedule, provided that DB Co shall prioritize the correction of any West Construction Defects that in the sole discretion of the City is determined to adversely affect the day to day operation of the City.
- (c) Prior to the applicable Handover, DB Co shall promptly Make Good any Construction Defect in respect of the Highway Works (a “**Highway Construction Defect**”) whether or not such Highway Construction Defect has been incorporated into the New MTO Infrastructure and whether or not the Highway Construction Defect is the result of poor workmanship, use of defective Products or equipment or damage through carelessness or other act or omission of DB Co. The correction of Highway Construction Defects shall be at DB Co’s sole cost and expense. DB Co shall Make Good, in a manner acceptable to the Independent Certifier, all Highway Construction Defects, whether or not they are specifically identified by the Independent Certifier, and DB Co shall prioritize the correction of any Highway Construction Defects so as not to interfere with or derogate from the Works Schedule, provided that DB Co shall prioritize the correction of any Highway Construction Defects that in the sole discretion of the City is determined to adversely affect the day to day operation of the City.

- (d) Prior to West Final Completion and save with respect to possible Remaining Works Minor Deficiencies identified in accordance with Section 25.12A(a), DB Co shall promptly Make Good any Construction Defect in respect of the Remaining Works (a “**Remaining Works Construction Defect**”) whether or not such Remaining Works Construction Defect has been incorporated into the New City Infrastructure or the New MTO Infrastructure and whether or not the Remaining Works Construction Defect is the result of poor workmanship, use of defective Products or equipment or damage through carelessness or other act or omission of DB Co. The correction of Remaining Works Construction Defects shall be at DB Co’s sole cost and expense. DB Co shall Make Good, in a manner acceptable to the Independent Certifier, all Remaining Works Construction Defects, whether or not they are specifically identified by the Independent Certifier, and DB Co shall prioritize the correction of any Remaining Works Construction Defects so as not to interfere with or derogate from the Works Schedule, provided that DB Co shall prioritize the correction of any Remaining Works Construction Defects that in the sole discretion of the City is determined to adversely affect the day to day operation of the City.
- (e) In the event DB Co is required to correct a Construction Defect pursuant to this Section 11.15, DB Co shall promptly Make Good other contractors’ work destroyed or damaged by such rectifications at DB Co’s expense.

11.16 Warranty Obligations

- (a) DB Co represents, warrants and covenants that:
 - (i) the East Works, including the New City Infrastructure and all Products, parts and workmanship provided by DB Co and DB Co Parties, including those replaced during the East Warranty Period;
 - (ii) the West Works, including the New City Infrastructure, the New MTO Infrastructure, and all Products, parts and workmanship provided by DB Co and DB Co Parties, including those replaced during the West Warranty Period; and
 - (iii) the Remaining Works, including all Products, parts and workmanship provided by DB Co and DB Co Parties, including those replaced during the Remaining Works Warranty Period,

shall conform to the requirements and specifications set out in this Project Agreement, Good Industry Practice, Applicable Law and all professional engineering principles generally accepted as standards of the industry in the Province of Ontario; be free of defects, including design defects, errors and omissions; be new, of good quality material, of merchantable quality; and all materials and equipment supplied by DB Co and DB Co Parties shall be of good quality, and in compliance with this Project Agreement and fit for their intended purpose as described in the Project Agreement.

- (b) Subject to Section 11.16(l), DB Co shall promptly, at its sole cost and expense,
 - (i) during the
 - (A) East Warranty Period correct and Make Good all East Construction Defects arising in respect of the East Works;

- (B) West Warranty Period correct and Make Good all West Construction Defects and Highway Construction Defects arising in respect of the West Works; and
 - (C) Remaining Works Warranty Period correct and Make Good all Remaining Works Construction Defects arising in respect of the Remaining Works,
 - (ii) for greater certainty, DB Co is required to correct and Make Good any Construction Defects related to any Product provided by DB Co and DB Co Parties, and any equipment supplied by DB Co and DB Co Parties during the applicable Warranty Period despite DB Co having obtained on the City's behalf industry-standard or other equipment warranties in accordance with Section 11.16(e);
 - (iii) correct and Make Good any Construction Defects that could not reasonably have been ascertained by a competent person in accordance with Good Industry Practice during a visual inspection of the Works ("**Construction Latent Defect**"), provided the City gives DB Co written Notice of the Construction Latent Defect within the time frame applicable to such Construction Latent Defect pursuant to the *Limitations Act*, 2002 (Ontario) and provided further Construction Latent Defects shall exclude:
 - (A) all electrical and mechanical components of the Works still in service beyond the supplier's recommended useful life, with such recommended useful life being consistent with Good Industry Practice; and
 - (B) any Construction Defects resulting from the effects of corrosion, erosion (other than corrosion or erosion due to Construction Defects in design and /or construction) or normal wear and tear upon any portion of the System Infrastructure or failure of the any portion of the System Infrastructure due to faulty maintenance by RTG or RTG Parties;
 - (iv) comply with the Warranty Protocol.
- (c) The warranties set out in Section 11.16(b) shall each cover labour and material, including, the costs of removal and replacement of covering materials. None of the warranties shall limit extended warranties on any Product or any item of equipment called for elsewhere in Schedule 15 - Output Specifications or otherwise provided by any manufacturer of such Product or item of equipment. DB Co shall ensure that all extended warranties specified in the Project Agreement are provided and shall, in the case of the System Infrastructure, assign to the City or such entity as the City may direct, all such extended warranties as the City or its designate may direct, and in the case of the New MTO Infrastructure, assign to the MTO, all such extended warranties the MTO may direct.
- (d) [Intentionally Deleted]
- (e) DB Co shall obtain warranties from the manufacturers of each of the Products and items of equipment for the duration(s) and in accordance with the applicable requirements specified in Schedule 15 - Output Specifications in the name of and to the benefit of DB Co, the City in the case of New City Infrastructure, and the MTO in the case of New MTO Infrastructure. Where, in respect of a Product warranty or equipment warranty, the Output Specifications do not specify a specific duration and/or other requirements, DB Co shall obtain industry-standard warranties

from the applicable manufacturers in the name of and to the benefit of DB Co and the City and shall use commercially reasonable efforts to ensure that such Product warranties and equipment warranties extend for as long a period as possible.

- (f) In respect of the East Works, each Product warranty and equipment warranty shall be issued by the applicable manufacturer and delivered to DB Co no later than 30 days prior to the East Substantial Completion Date. DB Co shall ensure that each Product warranty and equipment warranty, including any Product warranty or equipment warranty extended under Section 11.16(e), is fully assigned to the City, at no cost or expense to the City, at the end of the East Warranty Period, as such East Warranty Period may be extended in accordance with Section 11.16(b).
- (g) In respect of the West Works other than Highway Works, each Product warranty and equipment warranty shall be issued by the applicable manufacturer and delivered to DB Co no later than 30 days prior to the West Substantial Completion Date. DB Co shall ensure that each Product warranty and equipment warranty, including any Product warranty or equipment warranty extended under Section 11.16(e), is fully assigned to the City, at no cost or expense to the City, at the end of the West Warranty Period, as such West Warranty Period may be extended in accordance with Section 11.16(b).
- (h) In respect of the Highway Works, each Product warranty and equipment warranty shall be issued by the applicable manufacturer and delivered to DB Co no later than 30 days prior to the applicable Handover. DB Co shall ensure that each Product warranty and equipment warranty, including any Product warranty or equipment warranty extended under Section 11.16(e), is fully assigned to the City or the MTO, as applicable, at no cost or expense to the City or the MTO, at the end of the West Warranty Period, as such West Warranty Period may be extended in accordance with Section 11.16(b).
- (i) In respect of the Remaining Works, each Product warranty and equipment warranty shall be issued by the applicable manufacturer and delivered to DB Co no later than 30 days prior to, the West Final Completion Date. DB Co shall ensure that each Product warranty and equipment warranty, including any Product warranty or equipment warranty extended under Section 11.16(e), is fully assigned to the City, at no cost or expense to the City, at the end of the Remaining Works Warranty Period, as such Remaining Works Warranty Period may be extended in accordance with Section 11.16(b).
- (j) The City may, in its sole discretion, assign the DB Co warranties set out in Section 11.16(b) that relate to the Highway Works to the MTO, and shall provide Notice to DB Co of any such assignment of DB Co warranties. On the commencement of the first Warranty Period for each of the New City Infrastructure and the New MTO Infrastructure or any component thereof, DB Co shall provide at least two copies of each of the compilations of warranty certificates, one compilation for the New City Infrastructure and one compilation for the New MTO Infrastructure. DB Co shall update all copies of each of the compilations from time to time as each Warranty Period commences. Each of the compilations shall indicate the start and completion date of each DB Co warranty.
- (k) Subject to Section 11.12, DB Co acknowledges that,
 - (i) with respect to the New City Infrastructure, the City may, in its sole discretion; and

- (ii) with respect to the New MTO Infrastructure, the MTO may, in its sole discretion,

maintain, repair and/or alter any part or parts of the Works during the applicable Warranty Period and DB Co agrees that such work shall not impact any of the warranties provided by DB Co hereunder, provided that such work is carried out in accordance with Good Industry Practice and, if applicable, the Maintenance Instructions and that such work does not materially alter the affected part or parts of the Works.

- (l) For greater certainty, DB Co shall have no obligation under this Section 11.16 to procure, assign or enforce any manufacturer's warranties in respect of any Product or equipment which is procured or obtained by the City, any City Party, RTG or any RTG Party or Make Good any defect of deficiency in respect of the same; provided that DB Co shall not knowingly or negligently undertake any course of action that has the effect of nullifying or materially diminishing the enforceability of any such manufacturer's warranty.

11.17 Warranty Work and Prompt Repair of Warranty Work

- (a) DB Co shall carry out all Warranty Work,
 - (i) in respect of the East Works (such work, the "**East Warranty Work**");
 - (ii) in respect of the West Works (such work, the "**West Warranty Work**"); and
 - (iii) in respect of the Remaining Works (such work, the "**Remaining Works Warranty Work**").

All Warranty Work shall be carried out and completed at DB Co's sole cost and expense and Warranty Work shall not be the basis of a claim for a Delay Event, a Compensation Event, a Variation, additional compensation or damages. The applicable Warranty Period shall be extended for a further one year in respect of Remaining Works Warranty Work, and two years in respect of all other Warranty Work, in each case from the date of such Warranty Work is completed and accepted by the City in respect of the New City Infrastructure or any component thereof, and by the MTO in respect of the New MTO Infrastructure or any component thereof. For clarity, any extension of a Warranty Period for the purposes of a correction shall only apply to the relevant Warranty Work and not the Works as a whole, and in no event shall a Warranty Period be extended for a period in excess of two years following the expiry of the initial Warranty Period.

- (b) DB Co acknowledges and agrees that, the timely performance of Warranty Work is critical to the ability of the City to maintain effective operations of the New City Infrastructure, and to the ability of the MTO to maintain effective operations of the New MTO Infrastructure. DB Co shall use commercially reasonable efforts to respond to any requirement by the City or the MTO to perform Warranty Work within the reasonable time periods required by the City or the MTO to perform the Warranty Work for the New City Infrastructure or the New MTO Infrastructure, or, where applicable, within such time periods as required in a Warranty Request under the Warranty Protocol. Except where the Warranty Protocol imposes a specific additional obligation, DB Co shall commence and complete Warranty Work as expeditiously as possible and at times convenient to the City or MTO, as applicable, which may require work outside normal working hours at DB Co's expense. Any extraordinary measures required to complete such Warranty Work, as reasonably directed by the City or the MTO to accommodate the operation of the New

City Infrastructure, the New MTO Infrastructure, the Existing Infrastructure, the Stage 1 Connection Infrastructure or other aspects of the Project as constructed, shall be at DB Co's sole cost and expense. In relation to critical areas required for effective operations, DB Co shall commence, carry out and complete all Warranty Work on an urgent basis, as is reasonable having regard to the nature of the Warranty Work, taking into account the circumstances and any timelines for commencement and completion as may be communicated by the City, with respect to the New City Infrastructure, or the MTO, with respect to the New MTO Infrastructure, to DB Co.

(c) DB Co acknowledges and agrees that if,

- (i) subject to the Warranty Protocol, the City with respect to the New City Infrastructure; or
- (ii) the MTO with respect to the New MTO Infrastructure,

is unable to contact DB Co and/or obtain Warranty Work promptly, or, in the case of urgent Warranty Work within the time period specified in accordance with Section 11.17(b), the City and the MTO, as applicable, may take such emergency steps as are reasonable and appropriate to correct any defects, deficiencies or failures to comply with the Project Agreement, at DB Co's sole cost and expense. Except in the case of damage caused by the City's or the MTO's own forces, or where such emergency steps are not performed in accordance with Good Industry Practice or applicable Maintenance Instructions, such emergency steps taken by the City's or the MTO's own forces, as applicable, shall not invalidate any DB Co warranties in respect of the Works.

(d) If DB Co fails to carry out Warranty Work in accordance with Section 11.16(b), and in the time specified in Section 11.17(b) or subsequently agreed upon, without prejudice to any other right or remedy the City may have, the City and the MTO, as applicable, may perform such Warranty Work at the sole risk, cost and expense of DB Co and may draw down on the relevant Warranty Letter of Credit to fund or as reimbursement for such costs and expenses.

(e) DB Co acknowledges and agrees that all rules, requirements and restrictions relating to access, rail safety and operations and track protection, as set out in Schedule 15 – Output Specifications, apply to DB Co's performance of its obligations in accordance with Sections 11.16(b) and 11.17.

(f) DB Co shall be solely responsible for obtaining access from MTO for the purpose of carrying out Warranty Work. DB Co acknowledges that such access to the New MTO Infrastructure may be subject to such limitations as may be imposed by MTO, and that DB Co may be required to obtain a Permit, Licence, Approval or Agreement to access the New MTO Infrastructure for the purpose of carrying out Warranty Work. If, after making commercially reasonable efforts and otherwise complying with its obligations pursuant to this Project Agreement, DB Co is unable to obtain access to the New MTO Infrastructure, DB Co shall refer the matter to the City, and if City is unable to facilitate access to the New MTO Infrastructure in a timely manner, DB Co shall be excused from its obligations to carry out such Warranty Work.

(g) The warranties set out in Sections 11.16(b) and 11.17 shall not deprive the City or the MTO of any action, right or remedy otherwise available to the City or the MTO at law or in equity, and the periods referred to in this Section 11.17 shall not be construed as a limitation on the time in which the City or the MTO may pursue such other action, right or remedy.

- (h) Neither test results, nor selection or approval by the City or the City Representative of testing entities, nor any other thing in the Project Agreement shall have the effect of limiting or shortening or otherwise affecting in any way whatsoever the duration, effectiveness or content of any guarantee or warranty set forth in any other document or material forming part of the Project Agreement.
- (i) DB Co's aggregate maximum liability in respect of or relating to Warranty Work (including Remaining Works Warranty Work) shall be limited to the amount of the limitation on liability under the Performance Guarantee of Construction Contractor. This limitation on liability shall include, and be applicable to, (i) all costs incurred by or on behalf of the City or MTO to perform the Warranty Work, (ii) all liquidated damages payable by DB Co to the City pursuant to Section 11.17A, (iii) all Defect Rectification Costs and Direct Losses payable by DB Co to RTG under the Interface Agreement.

11.17A Liquidated Damages for Failure to Perform Warranty Work

- (a) The City shall provide Notice to DB Co of whether a Construction Defect is anticipated to be a Minor Construction Defect, Medium Construction Defect, Major Construction Defect or Critical Construction Defect, as soon as reasonably practicable after becoming aware of such Construction Defect, and shall thereafter notify DB Co as soon as reasonably practicable after becoming aware of any change in categorization of such Construction Defect.
- (b) Without prejudice to the City's other rights and remedies under Section 11.17, but subject to Section 11.17A(f), if DB Co has been provided with access to the System Infrastructure reasonably required to undertake Warranty Work in accordance with Section 11.17, but fails or refuses to perform Warranty Work required to rectify any Construction Defect in respect of the System Infrastructure within the reasonable time period required by the City in accordance with Section 11.17(b), or such time period set out in a Warranty Request in respect of such Construction Defect, as applicable, then DB Co shall:
 - (i) if the applicable Construction Defect is a Minor Construction Defect, pay to the City the sum of \$[REDACTED] per calendar day after the expiry of such time period until such Warranty Work is completed, as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure or refusal to perform such Warranty Work within such time period;
 - (ii) if the applicable Construction Defect is a Medium Construction Defect, pay to the City the sum of \$[REDACTED] per calendar day after the expiry of such time period until such Warranty Work is completed, as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure or refusal to perform such Warranty Work within such time period; or
 - (iii) if the applicable Construction Defect is a Major Construction Defect, pay to the City the sum of \$[REDACTED] per calendar day after the expiry of such time period until such Warranty Work is completed, as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure or refusal to perform such Warranty Work within such time period;

provided that, except as otherwise set forth in Step 1.8(d) of the Warranty Protocol, in no event shall such liquidated damages commence to accrue until the later of (A) seven (7) calendar days

after DB Co's receipt of either (i) Notice from the City of such Construction Defect or (ii) the applicable Warranty Request under the Warranty Protocol, whichever is earlier or (B) the lapse of the applicable DB Co Response Period.

- (c) Without prejudice to the City's other rights and remedies under Section 11.17, but subject to Section 11.17A(f), if the applicable Construction Defect is a Critical Construction Defect, provided DB Co has been provided with access to the System Infrastructure reasonably required to undertake Warranty Work in accordance with Section 11.17, DB Co shall pay to the City the sum of \$[REDACTED] per calendar day for each day after receipt of Notice of such Critical Construction Defect or receipt of the applicable Warranty Request, as the case may be, until Warranty Work is completed, as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure or refusal to promptly perform such Warranty Work; provided that, except as otherwise specified in Step 1.8(d) of the Warranty Protocol, in no event shall such liquidated damages commence to accrue until the later of (A) three (3) calendar days after DB Co's receipt of either (i) Notice from the City of such Construction Defect or (ii) the applicable Warranty Request under the Warranty Protocol, whichever is earlier, or (B) the lapse of the applicable DB Co Response Period.
- (d) Notwithstanding Section 11.17A(a), in the event such Warranty Work is undertaken by the City in accordance with 11.17(d), liquidated damages under section 11.17A(b) and (c) shall only accrue for that period of time in excess of the time period required by the City in accordance with Section 11.17(b) or set out in the applicable Warranty Request, as the case may be, until such Warranty Work is completed by the City or RTG. Where such Warranty Work is undertaken by RTG in accordance with the Warranty Protocol, liquidated damages shall only accrue for that period specified in Step 1.8(d) of the Warranty Protocol.
- (e) The Parties agree that the liquidated damages set out in this Section 11.17A are not a penalty but represent a genuine and reasonable pre-estimate of the damages that will be suffered by the City or any City Party related to DB Co's failure to timely perform Warranty Work in accordance with this Project Agreement, including, as applicable, the Warranty Protocol. DB Co further agrees that it is, and shall be, estopped from alleging that any liquidated damages set out in this Section 11.17A are a penalty and not liquidated damages, or are otherwise unenforceable for any reason, including that such damages were not incurred.
- (f) Subject to Section 11.17A(g) and subject to an aggregate maximum liability of DB Co for liquidated damages under this Section 11.17A equal to \$[REDACTED], unless otherwise specified herein, liquidated damages that accrue under this Section 11.17A shall become due and payable from time to time upon the City giving Notice to DB Co. Any such Notice shall specify the amount of liquidated damages that have accrued and are payable by DB Co to the City as of the date of such Notice. If such liquidated damages are not paid by DB Co within 10 Business Days from the date of such Notice, the City may recover any such liquidated damages due by DB Co by setting off such amounts from any amounts due or owing by the City to DB Co hereunder, or by drawing down the corresponding amount from the applicable Warranty Letter of Credit, in each case as required by the City, acting in its discretion. Failure by the City to provide a Notice to DB Co under this Section 11.17A(f) shall not constitute a waiver of the City's right to claim, or otherwise release DB Co from liability for, all liquidated damages under this Section 11.17A at any time.
- (g) In the event that there is a Dispute concerning whether or not a defect constitutes a Construction Defect or the required time period for performance of the required Warranty Work, and such

Dispute is ongoing, the City shall not be entitled to payment of related liquidated damages pursuant to this Section 11.17A unless and until such Dispute is resolved in accordance with either the Dispute Resolution Procedure, or the procedure in Appendix 6 of the Interface Agreement, as applicable, and, if resolved in favour of the City, the provisions respecting liquidated damages contained in this Section 11.17A shall apply with retroactive effect, except that there shall be added to the amount payable by DB Co on account of liquidated damages, interest at the rate of [REDACTED] percent per annum from the date the liquidated damages were required to be paid in the absence of the Dispute to the date of payment.

- (h) Notwithstanding the forgoing provisions of this Section 11.17A, provided DB Co has complied with, and exercised all commercially reasonable efforts to enforce, the warranty provisions in the Nominated Signalling Subcontract, liquidated damages shall not accrue under this Section 11.17A for a period of delay in completion of Warranty Work to the extent such delay is attributable to a delay or failure of the Nominated Signalling Subcontractor in undertaking Warranty Work in respect of the Nominated Signalling Subcontractor Works pursuant to the Nominated Signalling Subcontract.

11.18 Warranty Letter of Credit

- (a) DB Co shall deliver, or cause to be delivered, to the City unconditional and irrevocable letters of credit from any one or more of the Schedule I Canadian chartered banks or any other financial institutions approved by the City in the City's sole and absolute discretion, in each case, whose current long-term issuer rating is at least "A" by Standard & Poor's and "A2" by Moody's Investor Services or an equivalent rating by another party acceptable to the City, in its sole and absolute discretion, in favour and for the direct and exclusive benefit of the City, in the form set out in Schedule 7B – Warranty Letter of Credit (each, a "**Warranty Letter of Credit**"), on or before the following dates:
 - (i) the East Substantial Completion Date, in respect of the East Warranty Work (the "**East Warranty Letter of Credit**"); and
 - (ii) the West Substantial Completion Date, in respect of the West Warranty Work (the "**West Warranty Letter of Credit**").

If no warranty claims are made pursuant to Sections 11.16 and 11.17 within the first year of the any Warranty Period, the value of the applicable Warranty Letter of Credit shall be reduced by [REDACTED]% for the remainder of the initial two year term of such Warranty Period. If a Warranty Period is extended in accordance with Section 11.17(a) in respect of Warranty Work, the value of the applicable Warranty Letter of Credit shall, for the duration of the extension beyond the initial two year term of such Warranty Period, be reduced to an amount equal to [REDACTED]% of the value of such Warranty Work.

- (b) Unless a Warranty Letter of Credit is drawn by the City in accordance with the provisions of this Project Agreement, the City shall release and deliver the,
 - (i) East Warranty Letter of Credit to DB Co on the day following the expiry of the East Warranty Period; and
 - (ii) West Warranty Letter of Credit to DB Co on the day following the expiry of the West Warranty Period,

each Warranty Period as may be extended pursuant to Section 11.17(a).

- (c) If an East Warranty Letter of Credit is drawn by the City, the City shall release and deliver the full amount of the East Warranty Letter of Credit, less,
 - (i) the amount of any warranty claims then outstanding, if any; and
 - (ii) the amount of claims previously satisfied by a draw by the City on the East Warranty Letter of Credit, if any,

on the day following the expiry of the East Warranty Period, and as it may be extended pursuant to Section 11.17(a).

- (d) If a West Warranty Letter of Credit is drawn by the City, the City shall release and deliver the full amount of the West Warranty Letter of Credit, less,
 - (i) the amount of any warranty claims then outstanding, if any; and
 - (ii) the amount of claims previously satisfied by a draw by the City on the West Warranty Letter of Credit, if any,

on the day following the expiry of the West Warranty Period, and as it may be extended pursuant to Section 11.17(a).

- (e) [Not used]
- (f) The City shall be entitled to draw on a Warranty Letter of Credit:
 - (i) in accordance with Sections 11.17(d) and 1.5(b)(iv); and/or
 - (ii) to satisfy any amounts that are due and have remained outstanding for 30 days by DB Co pursuant to the terms of this Project Agreement or the Interface Agreement.
- (g) The City may make multiple calls on the East Warranty Letter of Credit and West Warranty Letter of Credit.
- (h) DB Co shall continuously maintain, replace or renew a Warranty Letter of Credit (or shall cause the continuous maintenance, replacement or renewal of a Warranty Letter of Credit) until such Warranty Letter of Credit is released and delivered to DB Co pursuant to Section 11.18(b), (c), or (d), as the case may be, provided that for clarity, in the event of any draw on a Warranty Letter of Credit, DB Co shall not be required to replenish the Warranty Letter of Credit to the extent so drawn.
- (i) In the event that DB Co does not renew (or does not cause the renewal of) a Warranty Letter of Credit (a “**Non-Renewed Warranty Letter of Credit**”) and does not provide (or cause the provision of) proof of such renewal to the City before the date that is 20 calendar days before the Warranty Letter of Credit’s expiry date then, at any time during such 20 calendar day period and upon providing prior written Notice to DB Co, the City may draw upon the full amount of the Non-Renewed Warranty Letter of Credit and deposit the cash proceeds thereof in a segregated bank account selected by DB Co (provided that such bank account must be at a bank that meets

the thresholds described in Section 11.18(a)) and if DB Co does not promptly select such bank account then such bank account may be selected by the City in its absolute discretion, and such cash proceeds shall thereupon stand in place of the Non-Renewed Warranty Letter of Credit until DB Co delivers (or causes the delivery of) a replacement Warranty Letter of Credit to the City. All interest earned on such cash proceeds shall be for the benefit of DB Co. The City shall be entitled to withdraw such cash proceeds in the same manner that it is permitted to draw upon a Warranty Letter of Credit under Section 11.18(f). Upon the delivery of a replacement Warranty Letter of Credit by DB Co to the City, all remaining cash proceeds and all accrued interest thereon from such segregated bank account shall be returned to DB Co or as DB Co may direct within five Business Days after the delivery of such replacement Warranty Letter of Credit by DB Co to the City.

11.18A Remaining Works Letter of Credit

- (a) On or before the West Substantial Completion Date, DB Co shall deliver, or cause to be delivered, to the City an unconditional and irrevocable letter of credit from any one or more of the Schedule I Canadian chartered banks or any other financial institutions approved by the City in the City's sole and absolute discretion, in each case, whose current long-term issuer rating is at least "A" by Standard & Poor's and "A2" by Moody's Investor Services or an equivalent rating by another party acceptable to the City, in its sole and absolute discretion, in favour and for the direct and exclusive benefit of the City, in the form set out in Schedule 7C – Remaining Works Letter of Credit (the "**Remaining Works Letter of Credit**").
- (b) Unless the Remaining Works Letter of Credit is drawn by the City in accordance with the provisions of this Project Agreement, the City shall release and deliver the Remaining Works Letter of Credit to DB Co within five Business Days following the West Final Completion Date.
- (c) If the Remaining Works Letter of Credit is drawn by the City, the City shall release and deliver the full amount of the Remaining Works Letter of Credit, less, any amounts drawn by the City on the Remaining Works Letter of Credit, to DB Co within five Business Days following the West Final Completion Date.
- (d) In the event that the Remaining Works, other than in respect of any Remaining Works Minor Deficiencies, have not been completed by the West Scheduled Final Completion Date, the City may, upon the delivery of written notice to DB Co at any time following the West Scheduled Final Completion Date, engage others to perform the work necessary to complete the Remaining Works at the risk and cost of DB Co and the City may, at any time and from time to time, fund the cost of completing such work by drawing against the Remaining Works Letter of Credit.
- (e) If, by the time specified in 25.12B(a) DB Co has failed to complete and rectify any of the Remaining Works Minor Deficiencies specified in the Remaining Works Minor Deficiencies List, the City may, upon the delivery of written notice to DB Co at any time following such date, engage others to perform the work necessary to complete and rectify such Remaining Works Minor Deficiencies, at the risk and cost of DB Co and the City may, at any time and from time to time, fund the cost of completing such work by drawing against the Remaining Works Letter of Credit.
- (f) Following the West Substantial Completion Date, in the event that:

- (i) a claim for a lien is registered against the Lands, or against the City or the holdback under the CA relating to the performance of the Remaining Works, or
- (ii) the City receives any written notice of a lien under the CA arising in relation to the performance of the Remaining Works,

and, in each case, unless DB Co makes alternative arrangements to bond or otherwise secure the amount of such lien claim and the costs associated therewith satisfactory to the City, acting reasonably, the City shall be entitled to draw down from the Remaining Works Letter of Credit, an amount the City reasonably determines would be required to satisfy the applicable lien claimant and any costs and expenses incurred by the City in connection therewith, including such amount on account of costs of the lien claimant such that the City may, upon payment of the amount of the lien claim together with such costs into court, obtain an order vacating such lien pursuant to the CA, until such time as such claim has been dealt with in accordance with the applicable provisions of Section 17.3.

- (g) The City may make multiple calls on the Remaining Works Letter of Credit.
- (h) DB Co shall continuously maintain, replace or renew the Remaining Works Letter of Credit (or shall cause the continuous maintenance, replacement or renewal of the Remaining Works Letter of Credit) until the Remaining Works Letter of Credit is released and delivered to DB Co pursuant to Section 11.18A(b), provided that, for clarity, in the event of any draw on the Remaining Works Letter of Credit, DB Co shall not be required to replenish the Remaining Works Letter of Credit to the extent so drawn.
- (i) In the event that DB Co does not renew (or does not cause the renewal of) the Remaining Works Letter of Credit and does not provide (or cause the provision of) proof of such renewal to the City before the date that is 20 calendar days before the Remaining Works Letter of Credit's expiry date, then at any time during such 20 calendar day period and then at any time and upon providing prior written Notice to DB Co, the City may draw upon the full amount of the Remaining Works Letter of Credit and deposit the cash proceeds thereof in a segregated bank account selected by DB Co (provided that such bank account must be at a bank that meets the thresholds described in Section 11.18A(a) and if DB Co does not promptly select such bank account then such bank account may be selected by the City in its sole and absolute discretion) and such cash proceeds shall thereupon stand in place of the Remaining Works Letter of Credit until DB Co delivers (or causes the delivery of) a replacement Remaining Works Letter of Credit to the City. All interest earned on such cash proceeds shall be for the benefit of DB Co. The City shall be entitled to withdraw such cash proceeds in the same manner that it is permitted to draw upon the Remaining Works Letter of Credit under Section 11.18A(d). Upon the delivery of a replacement Remaining Works Letter of Credit by DB Co to the City, all remaining cash proceeds and all accrued interest thereon from such segregated bank account shall be returned to DB Co or as DB Co may direct within five Business Days after the delivery of such replacement Remaining Works Letter of Credit by DB Co to the City.

11.18B Intentionally Deleted

11.18C Intentionally Deleted

11.18D Return of Draw Amount

- (a) In the event that the City obtains funds (the "**Draw Amount**") as a result of the City's call on any Warranty Letter of Credit or Remaining Works Letter of Credit and it is subsequently determined pursuant to the Dispute Resolution Procedure that such call was in breach of this Project Agreement or the amount of such call was in excess of the amount that the City was entitled to draw under this Project Agreement, the City shall repay such Draw Amount or excess amount, as applicable, and the Direct Losses of DB Co resulting from such wrongful or excess draw, within five (5) Business Days of such final determination; provided that, such repayment shall be conditional upon (and take place concurrently with) the restoration of such Warranty Letter of Credit or Remaining Works Letter of Credit, as applicable (if and to the extent that the applicable Warranty Letter of Credit or Remaining Works Letter of Credit has not been released by such date in accordance with this Project Agreement) by a face amount equal to the Draw Amount or excess amount, as applicable.
- (b) Notwithstanding anything to the contrary contained in this Project Agreement, the City shall only be permitted to draw on any Letter of Credit to the extent that the City's or MTO's, as applicable, entitlement to perform any Warranty Work or the Construction Defect giving rise thereto is not the subject of ongoing Dispute.

11.19 Coordination and Minimization of Disruption and Interference

- (a) DB Co shall perform the Works so as to coordinate with,
 - (i) the operations of, and the performance of any services by, the City, any City Party, any Governmental Authority, any Other Contractor, any Railway Company, any Utility Company, MTO, any Transit System and any railway system, including the performance of the Governmental Activities and the Other Works;
 - (ii) the operations of, and the performance of any RTG Works, by RTG and any RTG Party, including in accordance with the Interface Agreement (and subject to any specific coordination arrangements agreed therein);
 - (iii) the construction of the interface, connection or inter-connection between the New City Infrastructure, the New MTO Infrastructure, and any existing transit systems, highway systems, railway systems, Transit Systems, railway networks and any other Ontario or City of Ottawa road or roadway.
- (b) DB Co acknowledges and agrees that,
 - (i) DB Co has familiarized itself with all operations and activities associated with the Lands, the Existing Infrastructure and the existing transit systems, highway systems and railway systems, including the Existing Confederation Line, to the extent pertinent to or affected by the Works, and will perform the Works in accordance with, and subject to,
 - (A) this Project Agreement, including all rules, requirements and restrictions relating to access, rail safety and operations and track protection, as set out in Schedule 15 – Output Specifications;

- (B) the Traffic and Transit Management Plan and the Construction Access Management Plan; and
 - (C) the requirements of the City and the MTO,

in order to maintain normal operations and activities associated with the Lands, the Existing Infrastructure and the existing transit systems, highway systems and railway systems, including the Existing Confederation Line;
 - (ii) the carrying on of the City Activities during construction is a priority for the City, and DB Co has reviewed the Project Documents with respect to this; and
 - (iii) DB Co shall use all methods required to comply with the instructions set out in this Project Agreement during the performance of the Works, DB Co shall fully cooperate with the City in complying with such instructions during the performance of the Works. Any costs incurred by DB Co in complying with said instructions shall be part of the Guaranteed Price, except in circumstances where DB Co is otherwise entitled to additional compensation in accordance with this Project Agreement.
- (c) Except as explicitly permitted by the City or this Project Agreement, and subject to DB Co's compliance with all applicable Permits, Licences, Approvals and Agreements,
- (i) DB Co shall minimize disturbance to and interference with,
 - (A) the existing transit systems, highway systems, railway systems, and the Existing Infrastructure and Stage 1 Connection Infrastructure in accordance with this Project Agreement, including with respect to noise, dust control, access to the Lands and the particular requirements in respect of those portions of the Works which are to be carried out within the Existing Infrastructure or Stage 1 Connection Infrastructure and in respect of those portions of the Works where connections are being made to the Existing Infrastructure or Stage 1 Connection Infrastructure;
 - (B) the construction, operations or maintenance activities of the City, any Governmental Authority, any Other Contractor, any Railway Company, any Utility Company, MTO, RTG and RTG Parties in accordance with the Interface Agreement (and subject to any specific coordination arrangements agreed therein), any Transit System and any railway system, and with respect to any road or roadway, including the performance of the Governmental Activities, RTG Works and the Other Works;
 - (C) the convenience of the public in respect of, and the access of the public to and use of, any public or private roads or highways or other transportation infrastructure including the Existing Infrastructure (other than the New City Infrastructure and the New MTO Infrastructure), whether under the control or in the possession of the City or any other person, and DB Co shall minimize any lane or ramp closures or diversions, track closures or diversions and traffic diversions or restrictions.

- (d) To the extent that the Project necessitates interference, in any way, with the operation of the existing transit systems, existing highway systems, existing railway systems or Existing Infrastructure, including the imposition of any closures or detours on the existing highway systems, railway systems or Existing Infrastructure, DB Co shall use commercially reasonable efforts to cooperate with the City, Governmental Authorities, Other Contractors, Railway Companies, Utility Companies, MTO, RTG and RTG Parties in accordance with the Interface Agreement (and subject to any specific requirements therein), Transit Systems, railway systems and other relevant third parties to ensure the continued operation of the existing transit systems, highway systems, rail systems and Existing Infrastructure.
- (e) DB Co shall develop and implement protocols in furtherance of its obligations as set out in this Section 11.19 in accordance with the Traffic and Transit Management Plan, the Construction Access Management Plan and the Output Specifications.

11.20 Substitutions

- (a) Whenever equipment, components, materials, supplies, tools, and other items are specified or otherwise described in this Project Agreement by using the name or catalogue or model number of a particular manufacturer, fabricator, vendor or distributor, or any other material name or description, the naming or identification of the item is intended to establish the type and the minimum function and quality required, and equipment, components, materials, supplies, tools, and other items of other manufacturers, fabricators, vendors or distributors shall not be substituted without the prior written consent of the City, in its sole discretion. Notwithstanding the foregoing, in the case of obsolescence of an item or in any other circumstances where the relevant prescribed item is unavailable through no fault of DB Co or any DB Co Party, to the extent the replacement item is more expensive to purchase or install than the prescribed item, or increases the costs of Works, or causes delay in the Works, such change shall, subject to and in accordance with Section 32 be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event. To the extent the replacement item is less expensive to purchase or install than the prescribed item, or reduces the costs of Works, such change shall be addressed as a Variation.

11.21 Change in Standards

- (a) Where this Project Agreement requires DB Co to comply with a technical standard in respect of the design and construction of the Utility Works, New City Infrastructure and the New MTO Infrastructure, and that standard has changed between the date of this Project Agreement and the date that such compliance is required, then DB Co shall give Notice to the City of such change. If, after such Notice, the City requires compliance with the changed standard (rather than the standard applicable as of the date of this Project Agreement), then, to the extent such change impacts the Works and would not have otherwise been taken into account by compliance with Good Industry Practice, such changed standard shall, subject to and in accordance with Schedule 22 – Variation Procedure, result in a Variation. If the City does not require compliance with the changed standard, then DB Co shall continue to comply with the standard applicable as of the date of this Project Agreement, without a Variation therefor. This Section 11.21 shall not apply where a change in a technical standard is also a Change in Law, in which case Article 30 shall govern.

11.22 Subcontractors and Suppliers

- (a) DB Co shall preserve and protect the rights of the Parties under this Project Agreement with respect to the works to be performed under Subcontract, and shall:
 - (i) enter into Subcontracts or written agreements with DB Co Parties to require them to perform their work as provided in the Project Agreement;
 - (ii) incorporate the relevant terms and conditions of the Project Agreement into all contracts or written agreements with DB Co Parties; and
 - (iii) be as fully responsible to the City for acts and omissions of the DB Co Parties as for acts and omissions of persons directly employed by DB Co.
- (b) Attached in Part 1 of Schedule 8 – DB Co Parties is a list of all DB Co Parties that DB Co has engaged or caused to be engaged for the performance of the Work as of the date of execution of this Project Agreement. DB Co agrees to update such list (and including, for greater clarity, Part 2 of Schedule 8) from time to time as additional DB Co Parties are engaged. Any of these named DB Co Parties listed by DB Co may be changed by DB Co upon prior Notice to (but without the approval of) the City Representative, provided however, that if the City Representative reasonably objects to any change to a Prequalified Subcontractor (other than the Nominated Signaling Subcontractor) that is a DB Co Party, then DB Co shall select an alternative replacement Prequalified Subcontractor to which the City Representative does not reasonably object.
- (c) DB Co hereby agrees to contractually obligate the Construction Contractor to enter into the Construction Contractor's Direct Agreement and, subject to Section 11.22(d), to cause the Construction Contractor to cause each of the other DB Co Parties, including Suppliers leasing any construction machinery and equipment, to enter into the Subcontractor's Direct Agreement, to evidence, among other things, that the City shall have the right to cure any default by the Construction Contractor under the Subcontract.
- (d) With the exception of the Subcontracts specifically listed in item 1 in Part 2 of Schedule 8 – DB Co Parties, none of DB Co, the Construction Contractor or the applicable DB Co Party are obliged to enter into a Subcontractor's Direct Agreement in respect of Subcontracts having a total estimated cost of \$[REDACTED] or less.
- (e) Subject to Section 11.22(d), DB Co agrees to deliver to the City the Subcontractor's Direct Agreements by the applicable due dates set out in Part 2 of Schedule 8 – DB Co Parties. If, following the date that [REDACTED]% (and issued for construction) Construction Document Submittals are submitted to the City in accordance with Schedule 10 – Review Procedure, DB Co is required to enter into any additional Subcontractor's Direct Agreement pursuant to this Section 11.22, DB Co shall deliver such Subcontractor's Direct Agreements to the City within 30 days after execution.

11.23 Apprenticeship Plan and Program

- (a) No later than six months after Financial Close, DB Co shall provide a plan setting out DB Co's Project-specific approach to maximizing apprenticeship opportunities on the Project (the

“**Apprenticeship Plan**”) for review and approval by the City. The Apprenticeship Plan shall include,

- (i) specific objectives for apprenticeship opportunities for the Project on a trade-by-trade basis;
 - (ii) apprenticeship opportunities for each trade required on the Project;
 - (iii) a confirmation that apprenticeships will be registered with the Ministry of Advanced Education and Skills Development and the Ontario College of Trades, as applicable;
 - (iv) a program to ensure the required supply of apprentices to meet DB Co’s Apprenticeship Plan targets and requirements; and
 - (v) a program to support apprentices on the Project, to complete their apprenticeships during the Project Term and, for those whose apprenticeships are not complete by the end of the Project Term a program to support apprentices to complete their apprenticeships after the end of the Project Term.
- (b) DB Co shall implement the approved Apprenticeship Plan.
- (c) DB Co shall provide an annual report to the City on the implementation of the Apprenticeship Plan which report shall include,
- (i) statistics on the number of apprentices involved in the Project relative to the number of journeypersons, for each month of the Project; and
 - (ii) detailed information setting out DB Co’s progress toward achieving the objectives set out in the Apprenticeship Plan, including an identification of barriers that prevented DB Co from achieving its objectives.
- (d) The City may require DB Co to amend its Apprenticeship Plan if, in its opinion, acting reasonably, DB Co is failing to maximize apprenticeship opportunities on the Project pursuant to the then current Apprenticeship Plan.
- (e) The City may, in its sole discretion, release DB Co’s Apprenticeship Plan to the public. DB Co’s Apprenticeship Plan shall not be Confidential Information.

11.24 Procurement Monitoring and Implementation Plan

- (a) DB Co shall implement the procurement monitoring and implementation plan (the “**Procurement Monitoring and Implementation Plan**”) attached as Schedule 19 – Procurement Monitoring and Implementation Plan to this Project Agreement.
- (b) A director of DB Co shall submit, annually, on each anniversary of Commercial Close, a completed and executed declaration in the form attached as Appendix 1 to Schedule 19 – Procurement Monitoring and Implementation Plan that DB Co has made the proper inquiries and has determined that the requirements of the Procurement Monitoring and Implementation Plan have been complied with by DB Co and its Subcontractors in the immediately previous year.

11.25 Health and Safety Certification

- (a) DB Co shall, at its own cost and risk, at all times during the performance of the Works cause a COR-Qualified Construction DB Co Party or COR-Certified Construction DB Co Party, as the case may be, to:
 - (i) to the extent a COR-Qualified Construction DB Co Party has not obtained its COR Certification prior to Financial Close,
 - (A) use best efforts to obtain its COR Certification no later than 18 months following Financial Close. In the event that the City is satisfied, in its sole discretion, that the COR-Qualified Construction DB Co Party has used best efforts to obtain its COR Certification in accordance with this Section 11.25 and the COR-Qualified Construction DB Co Party has not obtained COR Certification by the end of such 18 month period, then the City shall establish a time period during which the COR-Qualified Construction DB Co Party shall obtain its COR Certification, which time period shall not be less than 30 days; and
 - (B) maintain in good standing and, as applicable, renew its ISO 45001 Accreditation or OHSAS 18001 Accreditation until such time as the COR-Qualified Construction DB Co Party has obtained its COR Certification, and
 - (ii) once the COR-Qualified Construction DB Co Party is certified (thereafter referred to as a **“COR-Certified Construction DB Co Party”**), maintain in good standing, and, as applicable, renew its COR Certification; and
 - (iii) comply with all requirements of its ISO 45001 Accreditation or OHSAS 18001 Accreditation (if a COR-Qualified Construction DB Co Party) or COR Certification (if a COR-Certified Construction DB Co Party), in accordance with its terms.
- (b) Without limiting any other provision of this Project Agreement, if at any time during the performance of the Works:
 - (i) a COR-Qualified Construction DB Co Party fails to obtain its COR Certification in accordance with this Project Agreement and the City determines that the failure to obtain the COR Certification is as a result of such COR-Qualified Construction DB Co Party not using best efforts to obtain such certification and the City delivers a Notice to DB Co indicating that a COR-Qualified Construction DB Co Party has failed to obtain its COR Certification in accordance with this Project Agreement;
 - (ii) a COR-Qualified Construction DB Co Party fails to maintain its ISO 45001 Accreditation or OHSAS 18001 Accreditation in good standing in accordance with its terms or in accordance with this Project Agreement;
 - (iii) a COR-Certified Construction DB Co Party fails to maintain its COR Certification in good standing in accordance with its terms or in accordance with this Project Agreement,(each a **“H&S Certification Default Event”**);

- (iv) the City delivers a Notice to DB Co indicating that the City is of the opinion that a COR-Qualified Construction DB Co Party will fail to maintain its ISO 45001 Accreditation or OHSAS 18001 Accreditation in good standing in accordance with its terms or in accordance with this Project Agreement; or
- (v) the City delivers a Notice to DB Co indicating that the City is of the opinion that a COR-Certified Construction DB Co Party will fail to maintain its COR Certification in good standing in accordance with its terms or in accordance with this Project Agreement,

DB Co shall:

- (vi) immediately upon the occurrence of a H&S Certification Default Event, notify the City that a H&S Certification Default Event has occurred, and:
 - (A) produce and deliver to the City a report identifying the reasons for the failure to obtain or maintain in good standing the COR Certification, ISO 45001 Accreditation or OHSAS 18001 Accreditation, as the case may be;
 - (B) produce and deliver to the City a plan showing the steps that are to be taken to have the COR Certification, ISO 45001 Accreditation or OHSAS 18001 Accreditation, as the case may be, obtained or reinstated in good standing within a period of not more than 30 days (the “**H&S Certification Reinstatement Plan**”), which H&S Certification Reinstatement Plan shall be subject to review and approval by the City and, to the extent the City requires any amendments or revisions to be made to the H&S Certification Reinstatement Plan, DB Co shall take, and shall cause the COR-Qualified Construction DB Co Party or the COR-Certified Construction DB Co Party, as the case may be, to take, all reasonable steps as may be necessary to make all such required amendments and revisions and deliver to the City an amended H&S Certification Reinstatement Plan not more than five Business Days from the date on which such request is made by the City;
 - (C) no later than five Business Days after the H&S Certification Default Event occurs, arrange to have conducted a complete H&S Construction Inspection in accordance with Section 15.2; and
 - (D) arrange to have conducted an H&S Construction Re-Inspection in accordance with Section 15.2(c), if required; or
- (vii) within five Business Days after receipt of the Notice from the City under Section 11.25(b)(iv) or 11.25(b)(v):
 - (A) produce and deliver to the City Representative a report identifying the manner in which the COR Certification, ISO 45001 Accreditation or OHSAS 18001 Accreditation, as the case may be, shall be maintained in good standing or obtained, as applicable;
 - (B) produce and deliver to the City Representative a plan showing the steps that are to be taken to ensure that the COR Certification, ISO 45001 Accreditation or OHSAS 18001 Accreditation, as the case may be, will be

maintained in good standing without interruption (the “**H&S Certification Maintenance Plan**”), which H&S Certification Maintenance Plan shall be subject to review and approval by the City and, to the extent the City requires any amendments or revisions to be made to the H&S Certification Maintenance Plan, DB Co shall take all reasonable steps as may be necessary to make all such required amendments and revisions and deliver to the City an amended and H&S Certification Maintenance Plan not more than five Business Days from the date on which such request is made by the City;

- (C) arrange to have conducted a complete H&S Construction Inspection in accordance with Section 15.2, and
- (D) arrange to have conducted an H&S Construction Re-Inspection in accordance with Section 15.2(c), if required.

11.26 Demolition Requirements

- (a) Without limiting DB Co’s obligation to perform the Works at all times in accordance with Applicable Law, in respect of any Demolition, DB Co shall, and shall cause each applicable DB Co Party that is performing any part of the Demolition to, at such person’s own cost and risk and at all times during the performance of the Works:
 - (i) conduct all work in connection with any Demolition at all times in compliance with section 3 of the Performance Standards Regulation and the Building Code;
 - (ii) ensure that all DB Co Parties having responsibility for the supervision of any such Demolition are qualified as either a professional engineer, limited license holder or provisional license holder (as such terms are used in the Performance Standards Regulation) (such person is hereinafter referred to as a “**Demolition Supervisor**”);
 - (iii) observe and perform the Demolition in a manner that is consistent with the recommendations set forth in the Demolition Guidelines in all material respects; and
 - (iv) in respect of any Complex Structure Demolition to be conducted by DB Co or any DB Co Party:
 - (A) prepare detailed specifications relating to such Complex Structure Demolition which specifications will include, without limitation, a detailed risk assessment and risk mitigation plan assessing all apparent or inferable risks that might be associated with the Demolition, colour-coded Load-Path Diagrams (which will include a description of the Demolition Requirements set forth herein) to supplement the Site work plans and blueprints relating to the Demolition and all other technical requirements relating to the Complex Structure Demolition (the “**Demolition Specifications**”);
 - (B) at all times when a Complex Structure Demolition is being performed that the Demolition Specifications, Demolition work plans and Load-Path Diagram, be present and available at the Site at which such Complex Structure Demolition is being performed; and

- (C) ensure at all times when a Complex Structure Demolition is being performed that a Demolition Supervisor will be on the Site at which such Complex Structure Demolition is being performed and actively supervising all activities in respect of the Complex Structure Demolition,

(collectively the “**Demolition Requirements**”).

- (b) If at any time while any Demolition is being performed pursuant to this Project Agreement, DB Co or any DB Co Party that is performing any part of any Demolition receives Notice from the City or any City Party or Governmental Authority that the Demolition is being conducted in a manner that is either not in compliance with the Demolition Requirements or not otherwise in accordance with this Project Agreement (such event referred to as a “**Demolition Default Event**”), DB Co shall and shall cause any applicable DB Co Party to:
 - (i) be required immediately upon the occurrence of a Demolition Default Event, to notify the City that a Demolition Default Event has occurred, unless the City was the person that provided Notice of the Demolition Default Event;
 - (ii) cease all work in respect of such Demolition; and
 - (iii) within five Business Days after receipt of a Notice of a Demolition Default Event produce and deliver to the City Representative:
 - (A) a report identifying the reasons for the occurrence of the Demolition Default Event; and
 - (B) a Demolition Plan showing the steps that are to be taken to rectify the Demolition Default Event within a period of not more than 30 days from the occurrence of the Demolition Default Event, which Demolition Plan shall be subject to review and approval by the City and, to the extent the City requires any amendments or revisions to be made to such Demolition Plan, DB Co and the applicable DB Co Parties shall take all reasonable steps as may be necessary to make all such required amendments and revisions and deliver to the City an amended and revised Demolition Plan not more than five Business Days from the date on which such request is made by the City.
- (c) No Demolition shall be recommenced at the Site that was the subject of the Demolition Default Event until:
 - (i) the City is satisfied that DB Co or the applicable DB Co Party has taken all necessary steps to remediate such Demolition Default Event in accordance with Demolition Plan; and
 - (ii) the City has received a report, in form and substance satisfactory to the City, prepared by a professional engineer that the Demolition Default Event has been remediated and the Site has been properly prepared for the Demolition to proceed in accordance with the Demolition Plan.

- (d) For clarity, DB Co shall not be eligible for a Delay Event or a Compensation Event in connection with a Demolition Default Event or the recommencement of a Demolition pursuant to Section 11.26(c).

11.27 New Municipal Infrastructure Works

- (a) DB Co shall achieve all New Municipal Infrastructure Works Acceptance by the Scheduled West Substantial Completion Date.
- (b) The City Engineer shall (i) receive and monitor all drawings, specifications, plans and documents related to the design and development of the New Municipal Infrastructure Works; (ii) receive and monitor all progress reports as necessary for the City Engineer to be in a position to confirm progress and extent of completion of the New Municipal Infrastructure Works; (iii) review and monitor the tests described in Schedule 15 – Output Specifications in respect of the New Municipal Infrastructure Works; (iv) prior to any certification and/or acceptance of New Municipal Infrastructure Works, consider the views and comments of both DB Co and the City in relation to the satisfaction of the conditions for such certification and/or acceptance; (v) conduct inspections and reviews of the New Municipal Infrastructure Works as necessary for the City Engineer to be satisfied that the New Municipal Infrastructure Works are proceeding in accordance with the requirements of the Project Agreement; (vi) review relevant documentation, including the Design Development Submittals relating to New Municipal Infrastructure Works, certificates and approvals, Permits, Licences, Approvals, and Agreements, certifications, test results, quality assurance audits, letters of assurance from professionals, schedules of equipment and staff profile schedules, in each case, relating to New Municipal Infrastructure Works provided to the City Engineer pursuant to this Project Agreement and within the timeframes contemplated for such review within Schedule 10 – Review Procedure; and (vii) provide all other services set forth in Schedule 15 – Output Specifications as it relates to the New Municipal Infrastructure Works, in each case, for purposes of enabling the City Engineer to confirm satisfaction of the conditions for issuance of the New Municipal Infrastructure Component Acceptance Certificate for each New Municipal Infrastructure Component and the Final New Municipal Infrastructure Works Acceptance Certificate in relation to all of the New Municipal Infrastructure.
- (c) DB Co shall deliver a notice (a “**New Municipal Infrastructure Works Component Countdown Notice**”) to the City and the City Engineer specifying the date on which DB Co anticipates that New Municipal Infrastructure Component Acceptance will be achieved in respect of such New Municipal Infrastructure Component (the “**Anticipated New Municipal Infrastructure Component Acceptance Date**”). The New Municipal Infrastructure Works Component Countdown Notice shall be delivered not less than 90 days prior to the Anticipated New Municipal Infrastructure Component Acceptance Date. DB Co shall give the City Engineer and the City Representative at least 10 Business Days’ notice prior to the date upon which DB Co anticipates all requirements for New Municipal Infrastructure Component Acceptance shall be satisfied.
- (d) DB Co shall give the City Engineer and the City Representative notice (the “**New Municipal Infrastructure Component Acceptance Notice**”) upon the satisfaction of all requirements of the New Municipal Infrastructure Component Acceptance, together with DB Co’s opinion as to whether the conditions for issuance of the New Municipal Infrastructure Component Acceptance Certificate have been satisfied, and each of the following:

- (i) to the extent transferable and without prejudice to the City's rights pursuant to Section 41 and Schedule 24 – Intellectual Property, all copyright licences for computer programs, or licences to use the same, used in connection with the applicable New Municipal Infrastructure Components together with all technical drawings and data, supplier agreements and contracts, utilities consumption information, environmental and technical reports, leases, licence and subletting data and contracts, asset conditions data, standard operating procedures processes and manuals, and all other information related to the New Municipal Infrastructure Works in respect of the applicable New Municipal Infrastructure Component accumulated up until the New Municipal Infrastructure Component Acceptance Date, in each case, in electronic format acceptable to the City, acting reasonably, where it exists in electronic format, and in original format, when not in electronic format;
- (ii) the most recent Record Drawings relating to the New Municipal Infrastructure Works in the format that the City, acting reasonably, considers most appropriate at the time;
- (iii) copies of all test results performed and test reports prepared in accordance with Schedule 15, together with all DB Co Permits, Licences, Approvals and Agreements obtained and/or entered into in connection with the New Municipal Infrastructure Works;
- (iv) all Project Data and Intellectual Property relating to the design, construction and completion of the New Municipal Infrastructure Component; and
- (v) all information, reports, documents, records and the like referred to in the Project Agreement as it relates to New Municipal Infrastructure Works including as referred to in Schedule 26 – Record Provisions, in each case as it relates to New Municipal Infrastructure and New Municipal Infrastructure Works only,

(collectively, the “**New Municipal Infrastructure Component Works Requirements**”).

Within 10 Business Days after receipt of a New Municipal Infrastructure Component Acceptance Notice the City Engineer shall determine whether the conditions for issuance of the New Municipal Infrastructure Component Acceptance Certificate have been satisfied and to issue to the City and DB Co either:

- (A) the New Municipal Infrastructure Component Acceptance Certificate, setting out in such certificate the New Municipal Infrastructure Component Acceptance Date; or
 - (B) a report detailing the matters that the City Engineer considers are required to be performed by DB Co to satisfy the conditions for issuance of the New Municipal Infrastructure Component Acceptance Certificate.
- (c) Where the City Engineer has issued a report in accordance with Section 11.27(d)(v)(B) above, DB Co shall, within 5 Business Days after receipt of such report, provide the City Engineer and the City Representative with:
 - (i) a detailed list indicating the rectification actions proposed for all matters raised in such report;

- (ii) the schedule for completion of all such rectification actions; and
- (iii) any additional tests that need to be undertaken in respect of the New Municipal Infrastructure Works as a result of the rectification actions,

and DB Co shall perform all such additional rectification actions and testing in a timely manner. Upon completion thereof, DB Co may give a further New Municipal Infrastructure Component Acceptance Notice and Section 11.27(c) to (e) inclusive shall be repeated until the New Municipal Infrastructure Component Acceptance Certificate has been issued.

- (f) On each New Municipal Infrastructure Component Acceptance Date in respect of each New Municipal Infrastructure Component:
 - (i) DB Co shall cooperate fully with the City and any persons providing services on or at the New Municipal Infrastructure Components in order to avoid or mitigate, insofar as reasonably practicable, any inconvenience or any risk to the health and safety of any person at, on or under the Lands on which the New Municipal Infrastructure Works are or were performed, including those areas where any warranty work is or has been performed;
 - (ii) insofar as title to the New Municipal Infrastructure Components shall not have already passed to the City pursuant to Section 45.1, DB Co shall transfer to, and there shall vest in the City, free from all Encumbrances (other than the Encumbrances caused or consented to by the City), the New Municipal Infrastructure Components;
 - (iii) DB Co shall use commercially reasonable efforts to assign, or otherwise transfer, to the City, free from all Encumbrances (other than any Encumbrances caused or consented to by the City), the benefit of all manufacturers' warranties, including all documentation in respect thereof, in respect of mechanical and electrical plant and equipment used or made available by DB Co under this Project Agreement which is included in the New Municipal Infrastructure Components; and
 - (iv) subject to Section 41 and Schedule 24 - Intellectual Property, all information obtained by DB Co in connection with the New Municipal Infrastructure Works relating to the applicable New Municipal Infrastructure Components, including Record Drawings and other technical drawings and data, supplier agreements and contracts, utilities consumption information, environmental and technical reports, lease, licence and subletting data and contracts, asset conditions data, standard operating procedure, processes and manuals, and all other information directly related to the New Municipal Infrastructure Works relating to the applicable New Municipal Infrastructure Component accumulated over the course of the Project Term shall be the property of the City.
- (g) Subject to the warranty obligations described herein, the issuance by the City Engineer in accordance with Section 11.27(d) of the New Municipal Infrastructure Component Acceptance Certificate in respect of any New Municipal Infrastructure Component shall result in the responsibility for traffic management, maintenance, repair of the New Municipal Infrastructure Component described in such New Municipal Infrastructure Component Acceptance Certificate reverting back to the City.

- (h) After New Municipal Infrastructure Component Acceptance Certificates for all New Municipal Infrastructure Components have been delivered by the City Engineer to DB Co, DB Co shall deliver a notice to the City Engineer requesting delivery of the Final New Municipal Infrastructure Works Acceptance Certificate. Upon satisfaction of all conditions to complete the New Municipal Infrastructure Works and achievement of New Municipal Infrastructure Works Acceptance, the City Engineer shall deliver to DB Co the Final New Municipal Infrastructure Works Acceptance Certificate.
- (i) DB Co shall deliver to the City and the City Engineer the following, in each case, in form and substance satisfactory to the City and the City Engineer, acting reasonably, in order to be eligible to receive the Final New Municipal Infrastructure Works Acceptance Certificate one complete set of the New Municipal Infrastructure Component Works Requirements divided up in separate packages for each New Municipal Infrastructure Component (i) showing all alterations made to the New Municipal Infrastructure Works since the New Municipal Infrastructure Component Acceptance Date in respect of each New Municipal Infrastructure Component and (ii) including updates and additions to any of the New Municipal Infrastructure Works Requirements since the New Municipal Infrastructure Component Acceptance Date (the “**Final New Municipal Infrastructure Works Requirements**”).

11.28 Works, Goods, Equipment, Consumables and Materials

- (a) Without expanding its obligations under Section 11.16, DB Co shall cause the goods, equipment, consumables and materials used or supplied by it or any contractor or Subcontractor in connection with the Works to be:
 - (i) of good quality, fit for their intended purpose and maintained in a safe, serviceable and clean condition in accordance with the Output Specifications and Good Industry Practice;
 - (ii) of the type specified in the Output Specifications, if applicable; and
 - (iii) in compliance with all Applicable Law,and shall, as soon as practicable after receiving a request from the City Representative, supply to the City Representative evidence to demonstrate its compliance with this Section 11.28(a).
- (b) DB Co shall cause sufficient stocks of goods, equipment, consumables and materials to be held in compliance with its obligations under this Project Agreement.

11.29 Utility Works – Cash Allowance

- (a) DB Co shall perform and complete, the DB Co Utility Works, and shall procure and coordinate the performance and completion of the Utility Company Self-Performed Works by the applicable Utility Company pursuant to Utility Agreements:
 - (i) so as to satisfy the Output Specifications;
 - (ii) in accordance with the Works Schedule; and
 - (iii) in accordance with the other terms and conditions of this Project Agreement.

- (b) DB Co shall complete or cause the completion of the Utility Works, comprising part of, or required for:
 - (i) the East Works, as a precondition to achieving East Final Completion;
 - (ii) the West Works other than Highway Works, as a precondition to achieving West Final Completion;
 - (iii) the Highway Works, as a precondition to achieving the applicable Handover; and
 - (iv) the Remaining Works, as a precondition to achieving West Final Completion.
- (c) DB Co shall be solely responsible for coordinating the Utility Works with its activities in respect of the Project Operations and shall not be entitled to an extension of time or additional compensation in respect of the remainder of the Works as a result of the Utility Works or any matter relating thereto, except as provided for in this Section 11.29, Section 18.6, Section 32.1(a)(xxiv) and Section 33.6.
- (d) The DB Co Utility Works shall be reviewed, certified, financed and paid for as part of Earned Value in accordance with Schedule 21 – Construction Period Payments. The Utility Company Self-Performed Works shall be reviewed, certified, financed and paid for in accordance with this Section 11.29. DB Co shall not be required to obtain financing for the costs of the Utility Company Self-Performed Works.
- (e) Prior to entering into a Utility Agreement for the performance of Utility Company Self-Performed Work, DB Co shall submit to the City Representative a draft of such agreement setting out the scope and pricing proposed by the Utility Company for the performance of the Utility Company Self-Performed Work for review by the City. The City may, in conjunction with DB Co, for a period not to exceed 10 Business Days from receipt of the draft agreement, engage with the Utility Company to negotiate pricing for inclusion in the Utility Agreement based upon preferential pricing arrangements which the City may have with the applicable Utility Company and may also raise comments on proposed scope which DB Co shall consider acting reasonably and both Parties may seek to negotiate with the Utility Company. The City shall notify DB Co by the end of such 10 Business Day period of the results of such price discussions and the draft Utility Agreement will be updated for (i) any pricing amendments mutually agreed by the Utility Company and the City and (ii) any scope amendments mutually agreed by the Parties and the Utility Company. DB Co shall enter into the updated Utility Agreement. The City will only pay the Utility Company Works Cash Allowance and Utility Works Fee in respect of Utility Agreements which have been approved by the City in accordance with this Section 11.29(e).
- (f) The estimated cost of the Utility Company Self-Performed Works is \$[REDACTED] (the “**Utility Company Works Cash Allowance**”) plus applicable HST, and shall be paid for by the City on a monthly progress basis as the Utility Company Self-Performed Works are progressed and invoiced by the applicable Utility Company to DB Co. In the event that the actual costs of the Utility Company Self-Performed Works as evidenced by invoices rendered by the applicable Utility Company exceeds the estimated Utility Company Works Cash Allowance for any cause other than the negligence, default or willful misconduct of DB Co or any DB Co Party, the City shall pay such additional cost, plus applicable HST and the applicable Utility Works Fee applicable to such additional cost.

- (g) The City shall also pay DB Co a fee of [REDACTED]% of the Utility Works Cost (the “**Utility Works Fee**”), plus applicable HST, for the management, coordination and administration of the completion of the Utility Company Self-Performed Works.
- (h) DB Co may, on a monthly basis, provide to the City Representative and the Independent Certifier a request for payment (each, a “**Request for Utility Works Payment**”) that includes (i) an itemized breakdown of the applicable Utility Company Self-Performed Works invoiced in the previous month by a Utility Company, (ii) the Utility Works Fee applicable to the costs of the Utility Company Self-Performed Works included in such invoice, and (iii) applicable HST in respect of the amounts specified in (i) and (ii) above. Such Request for Utility Works Payment may be delivered concurrently with an application for progress payments on account of Earned Value achieved in respect of DB Co Utility Works in accordance with Schedule 21 – Construction Period Payments, but shall be presented separately for processing and payment by the City.
- (i) DB Co shall include with each Request for Utility Works Payment the certification of the Independent Certifier that the relevant Utility Company Self-Performed Works described in such Request for Utility Works Payment is eligible for payment by the City in accordance with this Section 11.29.
- (j) DB Co shall include with each Request for Utility Works Payment such additional supporting documentation as the City Representative may reasonably require in connection with the claimed base progress payments, the estimated cost to complete the Utility Company Self-Performed Works, any cumulative projected variance from the estimated Utility Company Works Cash Allowance and any discounts, rebates, refunds, chargebacks, credits, price adjustments and other allowances available to DB Co in connection with the Utility Company Self-Performed Works. Each Request for Utility Works Payment submitted to the City shall be in a form stipulated by the City, acting reasonably, and shall support an “open-book” pricing approach for the completion of the Utility Company Self-Performed Works.
- (k) Within 10 Business Days of receipt of a Request for Utility Works Payment, the City shall, in consultation with the Independent Certifier, advise DB Co, in writing, whether or not it agrees with the particulars set out in the Request for Utility Works Payment. The City shall only be permitted to withhold its approval if the Independent Certifier determines that the Request for Utility Works Payment does not contain the information that the Independent Certifier requires, acting reasonably, to discharge their obligations under this Section 11.29. If the Independent Certifier withholds its approval pursuant to this Section 11.29(k) and subsequently receives the information that the Independent Certifier requires, acting reasonably, to discharge its obligations under this Section 11.29, it shall, within 10 Business Days of its receipt of such information, make payment of the amount set out in the aforementioned Request for Utility Works Payment. Any Disputes with respect to determinations made under this Section 11.29 shall be resolved in accordance with Schedule 27 – Dispute Resolution Procedure.
- (l) If the City approves in writing the payment of the amount set out in a Request for Utility Works Payment, it shall make payment of the amount set out in the approved Request for Utility Works Payment within 10 Business Days of receipt of the Request for Utility Works Payment.
- (m) DB Co acknowledges and agrees that:

- (i) all costs and expenses related to the administration and scheduling of the Utility Company Self-Performed Works, including, without limitation, the preparation of Requests for Utility Works Payment and any required reporting, shall be compensated solely by the Utility Works Fee; and,
- (ii) all discounts, rebates, refunds, chargebacks, credits, price adjustments and other allowances available to DB Co or any Subcontractor in connection with the Utility Company Self-Performed Works shall be to the credit of the City.

11.30 Art Cash Allowance

- (a) DB Co shall procure and coordinate the performance and completion of the Art Cash Allowance Items:
 - (i) so as to satisfy the Output Specifications;
 - (ii) in accordance with the Works Schedule; and
 - (iii) in accordance with the other terms and conditions of this Project Agreement.
- (b) DB Co shall complete or cause the completion of the Art Cash Allowance Items, comprising part of, or required for:
 - (i) the East Works, as a precondition to achieving East Substantial Completion;
 - (ii) the West Works, as a precondition to achieving West Substantial Completion; and
 - (iii) the Remaining Works, as a precondition to achieving West Final Completion.
- (c) DB Co shall be solely responsible for coordinating the completion of the Art Cash Allowance Items with its activities in respect of the Project Operations and shall not be entitled to an extension of time or additional compensation in respect of the remainder of the Works as a result of the Art Cash Allowance Items or any matter relating thereto, except as provided for in this Section 11.30.
- (d) The Art Cash Allowance Items shall be reviewed, certified, financed and paid for in accordance with this Section 11.30. DB Co shall not be required to obtain financing for the costs of the Art Cash Allowance Items.
- (e) The City and DB Co shall comply with the processes and requirements set forth in Article 12 of Part 1 of Schedule 15-2 of the Output Specifications in respect of the procurement of Art Cash Allowance Items. The City will only pay the Art Cash Allowance in respect of Art Cash Allowance Items which have been procured in accordance with this Section 11.30 and the processes and requirements set forth in Article 12 of Part 1 of Schedule 15-2 of the Output Specifications.
- (f) The estimated cost of the Art Cash Allowance Items is \$[REDACTED] (the “**Art Cash Allowance**”) plus applicable HST, and shall be paid for by the City on a monthly progress basis as the Art Cash Allowance Items are progressed and invoiced to DB Co. In the event that the actual costs of the Art Cash Allowance Items exceed the estimated Art Cash Allowance for any

cause other than the negligence, default or willful misconduct of DB Co or any DB Co Party, the City shall pay such additional cost, plus applicable HST.

- (g) DB Co may, on a monthly basis, provide to the City Representative and the Independent Certifier a request for payment (each, a “**Request for Art Payment**”) that includes (i) an itemized breakdown of the applicable Art Cash Allowance Items invoiced to DB Co in the previous month, and (ii) applicable HST in respect of the amounts specified in (i) above. Such Request for Art Payment may be delivered concurrently with an application for progress payments on account of Earned Value achieved in accordance with Schedule 21 – Construction Period Payments, but shall be presented separately for processing and payment by the City.
- (h) DB Co shall include with each Request for Art Payment the certification of the Independent Certifier that the relevant Art Cash Allowance Items described in such Request for Art Payment is eligible for payment by the City in accordance with this Section 11.30.
- (i) DB Co shall include with each Request for Art Payment such additional supporting documentation as the City Representative may reasonably require in connection with the claimed base progress payments, the estimated cost to complete the Art Cash Allowance Items, any cumulative projected variance from the estimated Art Cash Allowance and any discounts, rebates, refunds, chargebacks, credits, price adjustments and other allowances available to DB Co in connection with the Art Cash Allowance Items. Each Request for Art Payment submitted to the City shall be in a form stipulated by the City, acting reasonably, and shall support an “open-book” pricing approach for the completion of the Art Cash Allowance Items.
- (j) Within 10 Business Days of receipt of a Request for Art Payment, the City shall, in consultation with the Independent Certifier, advise DB Co, in writing, whether or not it agrees with the particulars set out in the Request for Art Payment. The City shall only be permitted to withhold its approval if either the Independent Certifier determines that the Request for Art Payment does not contain the information that the Independent Certifier requires, acting reasonably, to discharge their obligations under this Section 11.30. If the Independent Certifier withholds its approval pursuant to this Section 11.30(j) and subsequently receives the information that the Independent Certifier requires, acting reasonably, to discharge its obligations under this Section 11.30, it shall, within 10 Business Days of its receipt of such information, make payment of the amount set out in the aforementioned Request for Art Payment. Any Disputes with respect to determinations made under this Section 11.30 shall be resolved in accordance with Schedule 27 – Dispute Resolution Procedure.
- (k) If the City approves in writing the payment of the amount set out in a Request for Art Payment, it shall make payment of the amount set out in the approved Request for Art Payment within 10 Business Days of receipt of the Request for Art Payment.
- (l) DB Co acknowledges and agrees that:
 - (i) all costs and expenses related to the procurement, administration and scheduling of the Art Cash Allowance Items, including, without limitation, the preparation of Requests for Art Payment and any required reporting, shall be financed and paid for as part of Earned Value in accordance with Schedule 21 – Construction Period Payments; and

- (ii) all discounts, rebates, refunds, chargebacks, credits, price adjustments and other allowances available to DB Co or any Subcontractor in connection with the Art Cash Allowance Items shall be to the credit of the City.

11.31 Nominated Signalling Subcontractor Cash Allowance

- (a) DB Co shall, in accordance with Nominated Signalling Subcontract, be responsible for the Nominated Signalling Subcontractor Works as part of the Works hereunder.
- (b) The Nominated Signalling Subcontractor Works shall be reviewed, certified, financed and paid for in accordance with this Section 11.31, and not as part of the Earned Value in accordance with Schedule 21 – Construction Period Payments. DB Co shall not be required to obtain financing for the costs of the Nominated Signalling Subcontractor Works.
- (c) The agreed cost of the Nominated Signalling Subcontractor Works to be reimbursed by the City is \$[REDACTED] as of Commercial Close (the “**Nominated Signalling Subcontractor Works Cash Allowance**”), plus applicable HST. The Nominated Signalling Subcontractor Works Cash Allowance shall only be amended pursuant to a Variation Confirmation or Variation Directive issued in accordance with Schedule 22 – Variation Procedure, or, subject to and in accordance with Section 33, upon the occurrence of a Compensation Event.
- (d) The City shall open the Nominated Signalling Subcontract Cash Allowance Account on or before Financial Close and shall manage the Nominated Signalling Subcontract Cash Allowance Account in accordance with this Section 11.31.
- (e) The cash flow process applicable to the Nominated Signalling Subcontract Cash Allowance Account will be as follows:
 - (i) the City will deposit the applicable portion of the Nominated Signalling Subcontractor Works Cash Allowance relating to each particular Nominated Signalling Subcontract Milestone into the Nominated Signalling Subcontract Cash Allowance Account five (5) Business Days prior to the date and in the amount set out in Schedule B of the Nominated Signalling Subcontract in respect of such applicable Nominated Signalling Subcontract Milestone (subject to adjustment in accordance with Section 11.31(c));
 - (ii) the City will hold and manage all monies in the Nominated Signalling Subcontract Cash Allowance Account; and
 - (iii) the Parties, together with the Construction Contractor and the Nominated Signalling Subcontractor shall review the operation of the Nominated Signalling Subcontract Cash Allowance Account on a regular basis and make any appropriate modifications to ensure its efficient operation.
- (f) Upon achievement of any Nominated Signalling Subcontract Milestone, DB Co shall provide to the City Representative and the Independent Certifier a request for payment (each, a “**Request for Nominated Signalling Subcontractor Works Payment**”) that includes (i) an itemized breakdown of the completed Nominated Signalling Subcontractor Works comprising the achieved Nominated Signalling Subcontract Milestone, and the invoice for services and materials rendered by the Nominated Signalling Subcontractor in respect thereof, and (ii) applicable HST. DB Co shall include with each Request for Nominated Signalling Subcontractor Works Payment such

additional supporting documentation as the Independent Certifier may reasonably require to confirm achievement of the applicable Nominated Signalling Subcontract Milestone. Such Request for Nominated Signalling Subcontractor Works Payment may be delivered concurrently with an application for progress payments on account of Earned Value in accordance with Schedule 21 – Construction Period Payments, but shall be presented separately for processing and payment by the City.

- (g) The Independent Certifier shall, within five (5) Business Days of receipt of a Request for Nominated Signalling Subcontractor Works Payment, advise DB Co, in writing, whether or not the applicable Nominated Signalling Subcontract Milestone as described in such Request for Nominated Signalling Subcontractor Works Payment is achieved and eligible for payment in accordance with this Section 11.31 and the payment terms of the Nominated Signalling Subcontract.
- (h) The Independent Certifier shall only be permitted to withhold its approval if the Independent Certifier determines that the Request for Nominated Signalling Subcontractor Works Payment does not contain the information that the Independent Certifier requires, acting reasonably, to discharge their obligations under this Section 11.31. If the Independent Certifier withholds its approval pursuant to this Section 11.31(h) and subsequently receives the information that the Independent Certifier requires, acting reasonably, to discharge its obligations under this Section 11.31, the Independent Certifier shall, within five (5) Business Days of its receipt of such information, provide to DB Co, in writing, the Independent Certifier's approval of the applicable Request for Nominated Signalling Subcontractor Works Payment. Any Disputes with respect to determinations made under this Section 11.31 shall be resolved in accordance with Schedule 27 – Dispute Resolution Procedure.
- (i) If the Independent Certifier approves the payment set out in a Request for Nominated Signalling Subcontractor Works Payment, the City shall release the applicable portion of the Nominated Signalling Subcontractor Works Cash Allowance from the Nominated Signalling Subcontract Cash Allowance Account for payment to the Nominated Signalling Subcontractor in accordance with the Nominated Signalling Subcontract.
- (j) In addition to payment of the Nominated Signalling Subcontractor Works Cash Allowance, the City shall also pay to DB Co:
 - (i) an amount equal to **[REDACTED]**% of the Nominated Signalling Subcontractor Works Gainshare, if any, plus applicable HST, on the East Substantial Completion Payment Date; and
 - (ii) an amount equal to **[REDACTED]**% of the Nominated Signalling Subcontractor Works Gainshare, if any, plus applicable HST, on the West Substantial Completion Payment Date.

11.32 Category 1 Utility Company Tracking System

- (a) DB Co shall, at its own cost and risk, provide to the City a system to track the progress made by the Category 1 Utility Companies in performing the activities described in the Utility Baseline Report. More specifically, such system shall:

- (i) be kept updated on a daily basis and be available to the City in real time during normal business hours through a web-based interface which would include functionality to provide automated email alerts to a customizable frequency and set of email addresses;
- (ii) be operational no later than the date upon which the first Category 1 Utility Company activity described in the Utility Baseline Report is commenced;
- (iii) include a feature that highlights to the City and the applicable Category 1 Utility Company each outstanding applicable activity described in the Utility Baseline Report when it reaches the following milestone triggers:
 - (A) [REDACTED]% of the number of Business Days designated for completion by the Category 1 Utility Company in the Utility Baseline Report for the applicable activity described in the Utility Baseline Report; and
 - (B) [REDACTED]% of the number of Business Days designated for completion by the Category 1 Utility Company in the Utility Baseline Report for the applicable activity described in the Utility Baseline Report.
- (b) DB Co shall provide written notice to the City Representative with respect to any outstanding Category 1 Utility Company activity described in the Utility Baseline Report when it reaches the milestone triggers outlined in Section 11.32(a)(iii)(A) and Section 11.32(a)(iii)(B).
- (c) With respect to any failure by a Category 1 Utility Company to perform the obligations set out in the Utility Baseline Report, DB Co shall not be entitled to the Delay Event or Compensation Amount pursuant to Section 32.1(a)(xxiv) unless the tracking system as described in this Section 11.32(a) is functional and available to the City, provides notice to the City of the milestones described in Section 11.32(a)(iii), and contains accurate information as to the progress made by the Category 1 Utility Companies in performing the activities described in the Utility Baseline Report at all material times.

12. REPRESENTATIVES

12.1 The City Representative

- (a) Subject to the limitations set out in Section 12.1(d), the City Representative shall exercise the functions and powers identified in this Project Agreement as functions or powers to be performed by the City Representative and such other functions and powers of the City under this Project Agreement as the City may notify DB Co from time to time.
- (b) The City may, from time to time by written Notice to DB Co, change the City Representative. Such change shall have effect on the later of the date of delivery of such Notice and the date specified in such Notice.
- (c) During any period when no City Representative has been appointed, or when the City Representative is unable, through illness, incapacity or any other reason whatsoever, to perform the City Representative's functions under this Project Agreement, the City shall perform or may, by written Notice to DB Co, promptly appoint an alternative City Representative to perform the functions which would otherwise be performed by the City Representative. Upon receipt of such written Notice, DB Co and the DB Co Representative shall be entitled to treat any act of such

alternative City Representative which is permitted by this Project Agreement as being authorized by the City, and DB Co and the DB Co Representative shall not be required to determine whether authority has in fact been given.

- (d) The City Representative shall not, except as otherwise provided in this Project Agreement, be entitled to modify or waive any provision of this Project Agreement or to authorize a Variation.
- (e) Subject to the limitations set out in Sections 12.1(d), unless otherwise notified in writing, DB Co and the DB Co Representative shall be entitled to treat any act of the City Representative which is explicitly authorized by this Project Agreement as being authorized by the City, and DB Co and the DB Co Representative shall not be required to determine whether authority has in fact been given.

12.2 The DB Co Representative

- (a) Subject to the limitations set out in Section 12.2(d), the DB Co Representative shall have full authority to act on behalf of DB Co for all purposes of this Project Agreement.
- (b) DB Co may change the DB Co Representative with the prior written consent of the City.
- (c) During any period when the DB Co Representative is unable, through illness, incapacity or any other reason whatsoever, to perform the DB Co Representative's functions under this Project Agreement, DB Co shall perform or may, by written Notice to the City, promptly appoint an alternative DB Co Representative to perform the functions which would otherwise be performed by the DB Co Representative, provided that, DB Co must seek the City's consent in accordance with Section 12.2(b) if such alternative DB Co Representative is in place for more than 180 days. Upon receipt of such written Notice, the City and the City Representative shall be entitled to treat any act of such alternative DB Co Representative which is permitted by this Project Agreement as being authorized by DB Co, and the City and the City Representative shall not be required to determine whether authority has in fact been given.
- (d) The DB Co Representative shall not, except as otherwise provided in this Project Agreement, be entitled to modify or waive any provision of this Project Agreement.
- (e) Subject to the limitations set out in Section 12.2(d), unless otherwise notified in writing, the City and the City Representative shall be entitled to treat any act of the DB Co Representative which is explicitly authorized by this Project Agreement as being authorized by DB Co, and the City and the City Representative shall not be required to determine whether authority has in fact been given.

12.3 Communications to Representatives

- (a) At the time that a Party appoints or changes the appointment of the City Representative or the DB Co Representative, as applicable, that Party shall also provide the other Party with contact information for delivery of communications to such representative. Communications to such representative shall not constitute Notices to the Party appointing such representative.

12.4 Key Individuals

- (a) The individuals who are critical to the performance of the Works are identified in Schedule 9 – Key Individuals. DB Co shall use commercially reasonable efforts to ensure that such persons remain involved in the Works in the capacity set out in Schedule 9 – Key Individuals (unless such Key Individuals are not available for reasons beyond the control of DB Co or a DB Co Party). DB Co or a DB Co Party shall not, for the duration of the Works, require or request any such person to be involved in any other project, if, in the reasonable opinion of the City such involvement would have a material adverse effect on the Works. If DB Co fails to comply with this Section 12.4(a), DB Co shall pay to the City the liquidated damages amount, if any, ascribed for such Key Individual in Schedule 9 – Key Individuals. For clarity, DB Co and the DB Co Parties' reasonable commercial efforts, in accordance with this Section 12.4(a), shall include the denial of promotions or relocations of a Key Individual, to the extent such denial is permitted by the Applicable Law. For the purposes of this Section 12.4(a), only the following reasons will be considered beyond the control of DB Co or a DB Co Party: death, short term disability, long term disability or any other reason in the opinion of the City, acting reasonably (DB Co shall provide to the City any further documentation as may be reasonably requested by the City to assess any reason beyond the control of DB Co).
- (b) Subject to DB Co's obligations to ensure that Key Individuals remain involved in the Works as set out in Section 12.4(a), if it becomes necessary for DB Co to replace any individual identified in Schedule 9 - Key Individuals, DB Co shall nominate a competent suitably qualified and experienced permanent replacement or replacements as soon as practicable and provide the City with relevant information on the proposed replacement and shall consult with the City before finalizing the appointment of such replacement. DB Co shall not replace any of the individuals identified in Schedule 9 - Key Individuals without the prior written consent of the City, which consent shall not be withheld or delayed where DB Co is compliant with Sections 12.4(a) and 12.4(c) and the proposed replacement is suitably qualified and experienced. For those Key Individual's in respect of whom liquidated damages amounts are ascribed in Schedule 9 – Key Individuals, in the event DB Co fails to nominate a competent suitably qualified and experienced permanent replacement or replacements for a period of greater than 60 days from the date it became necessary for DB Co to replace any such Key Individual, DB Co shall pay to the City the liquidated damages ascribed in Schedule 9 – Key Individuals. The Parties agree that the liquidated damages set out in this Section 12.4(b) are not a penalty but represent a genuine and reasonable pre-estimate of the damages that the City will suffer as a result of DB Co's failure to provide the applicable Key Individual.
- (c) If the City determines, acting reasonably, that it is in the best interests of the City that any individual identified in Schedule 9 - Key Individuals be replaced, the City shall notify DB Co (including a detailed explanation of the reasons for such determination), and, within 60 days after receipt by DB Co of such Notice, DB Co shall provide the City with relevant information on the proposed replacement and shall consult with the City before finalizing the appointment of such replacement.

13. WORKS SCHEDULE AND WORKS REPORT

13.1 Completion of the Works

- (a) DB Co shall complete the Works in accordance with this Project Agreement and achieve:

- (i) East Substantial Completion by the East Scheduled Substantial Completion Date;
- (ii) East Final Completion by the East Scheduled Final Completion Date;
- (iii) West Substantial Completion by the West Scheduled Substantial Completion Date; and
- (iv) West Final Completion, including all Remaining Works, by the West Scheduled Final Completion Date.

13.2 The Works Schedule

- (a) From Financial Close until PBS-2 becomes the Current PBS, PBS-1 shall be deemed to be the Current PBS and, until such time, the following provisions of the Project Agreement applicable to the Current PBS shall be applicable to PBS-1: Sections 10.3(a)(i), 11.12(f)(ii), 11.12(f)(iii), 14.2(b), 14.2(d), and 26.2(a)(i) of the Project Agreement; Section 1.8(c) of Schedule 10 – Review Procedure; and Section 1.6(b)(vii) of Schedule 22 – Variation Procedure;
- (b) DB Co shall, in accordance with Schedule 12 – Works Scheduling Requirements, prepare and submit to the City and the Independent Certifier:
 - (i) within 180 days after Financial Close, PBS-2 and a schedule narrative in accordance with Section 2.2 of Schedule 12 - Works Scheduling Requirements indicating the differences between PBS-1 and PBS-2;
 - (ii) every month, within 10 Business Days after the end of each calendar month from Financial Close, the Monthly Progress Report and PBS Update in accordance with Schedule 33 – Works Reports;
 - (iii) after receipt of written request from the City, acting reasonably, a Micro-Schedule for any specific area in accordance with Schedule 12 – Works Scheduling Requirements, to be provided no later than the end of subsequent reporting period; and
 - (iv) Recovery Schedules, PBS Re-baselines, Short Duration Schedules, As-built Schedules and Informal Implementation Schedules in accordance with Schedule 12 – Works Scheduling Requirements,each meeting the requirements of Schedule 12 – Works Scheduling Requirements to the reasonable satisfaction of the City that support the completion of the Works in accordance with Section 13.1.
- (c) The City shall review all submissions in accordance with Schedule 12 – Works Scheduling Requirements and, as applicable, Schedule 10 – Review Procedure.
- (d) At the request of the City Representative, the DB Co Representative shall review the Works Schedules with the City Representative to explain to the City Representative’s reasonable satisfaction:
 - (i) the activity logic and planning assumptions contained in the Works Schedule;
 - (ii) any proposed changes to the Critical Path of the Works; and

- (iii) any other matter raised by the City Representative concerning the Works Schedules.
- (e) DB Co and the City shall comply with the provisions of Schedule 12 – Works Scheduling Requirements.
- (f) Any comment or lack of comment by the City in regard to any Works Schedule indicating potential Delay Events pursuant to Section 32.2(a) of the Project Agreement shall not constitute any acknowledgement or acceptance of the potential delay.

14. WORKS COMMITTEE

14.1 Establishment

- (a) The Parties shall, within 30 days after Financial Close, establish a committee (the “**Works Committee**”) consisting of:
 - (i) six representatives appointed by the City from time to time, one of whom shall be the City Representative; and
 - (ii) five representatives appointed by DB Co, including the DB Co Representative, the Design Build Director, the Testing and Commissioning Coordinator, the Director of Communications and Stakeholder Engagement, and a representative of the Construction Contractor.
- (b) The Independent Certifier shall be entitled, but not required, to attend meetings as non-voting members of the Works Committee. Members of the Works Committee may invite, on prior Notice to all members, such advisors and consultants as they require from time to time to attend meetings and to provide briefings to the Works Committee members.
- (c) The City Representative shall be the chairperson of the Works Committee.

14.2 Function and Role

- (a) The Works Committee shall assist the Parties by promoting cooperative and effective communication with respect to matters related to the Works.
- (b) The Works Committee shall be responsible for receiving and reviewing all matters related to the Works, including:
 - (i) any design, construction and commissioning issues;
 - (ii) the Works Schedules;
 - (iii) any issues arising from reports or documents provided by DB Co or the Independent Certifier;
 - (iv) any quality assurance and safety and security issues, including any design, configuration control, interfacing, training, testing, operational impact and other matters creating or giving rise to a safety or security issue or otherwise requiring attention and oversight;

- (v) the Works Reports;
 - (vi) any special matters referred to the Works Committee by the City or DB Co;
 - (vii) any Proceeding At Risk Matters referred to the Works Committee in accordance with Section 14.6;
 - (viii) any community and media relations issues in accordance with Schedule 18 – Communication and Stakeholder Engagement Obligations;
 - (ix) any issues related to the Construction Access Management Plan and the Traffic and Transit Management Plan and any issues related to the rules, requirements and restrictions relating to access, rail safety and operations and track protection, as set out in Schedule 15 – Output Specifications;
 - (x) monitoring the Testing & Commissioning Program; and
 - (xi) any other issues pertaining to the Works.
- (c) Subject to Section 14.2(d), any unanimous decision of the Works Committee shall be final and binding on the Parties. If the Works Committee is unable to reach a unanimous decision, either Party may refer the matter for resolution in accordance with Schedule 27 – Dispute Resolution Procedure.
- (d) The Works Committee shall not have authority to make decisions with respect to or approve:
- (i) any amendment to or waiver of any provision of this Project Agreement;
 - (ii) any change to a Key Work Milestones set out in the Works Schedules, any Scheduled Substantial Completion Date or any Scheduled Final Completion Date;
 - (iii) any Variation;
 - (iv) any change that may materially adversely affect DB Co’s ability to achieve the East Substantial Completion by the East Scheduled Substantial Completion Date or East Final Completion by the East Scheduled Final Completion Date;
 - (v) any change that may materially adversely affect DB Co’s ability to achieve the West Substantial Completion by the West Scheduled Substantial Completion Date or West Final Completion by the West Scheduled Final Completion Date; or
 - (vi) any matter with respect to which the City has a right of consent or in respect of which the City may exercise discretion pursuant to this Project Agreement.

14.3 Term of Works Committee

- (a) Unless otherwise agreed by the Parties, the Works Committee shall operate only until the later of the East Final Completion Date and West Final Completion Date (the “**Works Committee End Date**”).

14.4 Replacement of Committee Members

- (a) The City shall be entitled to replace any of its respective representatives on the Works Committee by written Notice to DB Co. The City will use commercially reasonable efforts to deliver prior written Notice of any such replacement to DB Co. DB Co may replace any of its representatives on the Works Committee with the prior written consent of the City.

14.5 Procedures and Practices

- (a) The members of the Works Committee may:
 - (i) adopt such procedures and practices for the conduct of the activities of the Works Committee as they consider appropriate from time to time;
 - (ii) invite to any meeting of the Works Committee such other persons as the members of the Works Committee may agree;
 - (iii) exclude from any meeting of the Works Committee such persons as the members of the Works Committee may agree; and
 - (iv) receive and review reports from any person or organization agreed to by the members of the Works Committee.
- (b) Once established, the Works Committee shall meet at least once each month from Financial Close until the Works Committee End Date, unless otherwise agreed by the members of the Works Committee or the Parties.
- (c) Any one of the DB Co Representatives or the City Representatives on the Works Committee may convene a special meeting of the Works Committee at any time. Special meetings of the Works Committee may be convened on not less than 5 Business Days' Notice to all members of the Works Committee identifying the agenda items to be discussed at the special meeting, provided that, in an Emergency, a meeting may be called at any time on such Notice as may be reasonable in the circumstances.
- (d) Unless otherwise agreed by the members of the Works Committee, the Works Committee shall meet in the City of Ottawa, Ontario. Meetings of the Works Committee may be held by means of such telephonic, electronic or other communication facilities as permit all persons participating in the meeting to communicate with each other simultaneously and instantaneously. A person participating in a meeting by such means will be deemed to be present at such meeting, provided that each member of the Works Committee must attend in person at least once each calendar quarter.
- (e) Four representatives appointed by the City (one of whom shall be the City Representative) and three representatives appointed by DB Co (one of whom shall be the DB Co Representative) shall constitute a quorum at any meeting of the Works Committee. A quorum of members may exercise all the powers of the Works Committee. The members shall not transact business at a meeting of the Works Committee unless a quorum is present.
- (f) Minutes of all meetings, recommendations and decisions of the Works Committee, including those made by telephone or other form of communication, shall be recorded and maintained by

DB Co. DB Co shall circulate copies of such minutes within 5 Business Days after the holding of the meeting or the making of the recommendation or decision. Unless the City notifies DB Co within 5 Business Days after receipt of the minutes that the City disagrees with the contents of the minutes, DB Co and the City shall be deemed to have approved such minutes. DB Co shall maintain a complete set of all minutes of the meetings of the Works Committee and shall make such minutes available for inspection by the City during regular business hours.

14.6 Proceeding At Risk

- (a) If at any time the City Representative has noted a Works Submittal as “CRITICAL COMMENT” in accordance with Schedule 10 – Review Procedure (a “**Proceeding At Risk Matter**”), then the City may issue to DB Co (with a copy to the Independent Certifier) a Notice (the “**Proceeding At Risk Notice**”) identifying the City’s reasons for issuing the Proceeding At Risk Notice and requesting DB Co to deliver any relevant Design Data and any other information reasonably required by the City from DB Co to review the Proceeding At Risk Matter.
- (b) Following the issuance of a Proceeding At Risk Notice, the City Representative and the DB Co Representative, together with the other members of the Works Committee, shall each promptly and diligently make a reasonable *bona fide* effort to resolve the Proceeding At Risk Matter. The Independent Certifier shall be required to attend all meetings and deliberations of the Works Committee at which the Proceeding At Risk Matter is considered, but shall not be entitled to participate in any decisions of the Works Committee.
- (c) Within 10 Business Days after receipt by DB Co of a Proceeding At Risk Notice, DB Co shall deliver a response to the City, each member of the Works Committee and the Independent Certifier, which shall include:
 - (i) the Design Data and any other information requested by the City in the Proceeding At Risk Notice;
 - (ii) DB Co’s opinion confirming agreement with, or disputing the opinion of, the City regarding the Proceeding At Risk Matter;
 - (iii) any additional Design Data and other information in support of DB Co’s opinion regarding the Proceeding At Risk Matter; and
 - (iv) DB Co’s proposal to rectify the Proceeding at Risk Matter.
- (d) Within five Business Days after receipt by the City of the response from DB Co pursuant to Section 14.6(c), the City shall notify DB Co if the City requires any additional information from DB Co. DB Co shall provide such additional information to the City and each member of the Works Committee and the Independent Certifier within 5 Business Days after receipt of such Notice.
- (e) The Independent Certifier shall within 30 Business Days after the Proceeding At Risk Notice, deliver to each of the City and DB Co its written opinion as to whether the City acted reasonably in delivering the Proceeding At Risk Notice.
- (f) Within 15 Business Days after receipt by the City of all deliverables contemplated by Section 14.6(c) and, if applicable, Section 14.6(d), and in any event, no later than 35 Business Days after

receipt by DB Co of the Proceeding At Risk Notice, the Works Committee shall meet in person (the “**PAR Meeting**”) to attempt to resolve the Proceeding At Risk Matter.

- (g) Within five Business Days after the PAR Meeting and, in any event, no later than 40 Business Days after receipt by DB Co of the Proceeding At Risk Notice (“**PAR Meeting Expiry Date**”), the Works Committee shall attempt to reach a final decision with respect to the Proceeding At Risk Matter. If the Works Committee is unable to reach a final decision, and the Independent Certifier’s opinion delivered pursuant to Section 14.6(e) confirms that the City acted reasonably in delivering the Proceeding At Risk Notice, DB Co shall be deemed to be “**Proceeding At Risk**” and the City may, in its sole discretion, give notice to the Lenders’ Agent pursuant to Section 15 of the Lenders’ Direct Agreement, that DB Co is Proceeding At Risk, together with the relevant information supporting the City’s opinion that DB Co is Proceeding at Risk.
- (h) Regardless of the Independent Certifier’s opinion, if the Works Committee fails to reach a final decision with respect to the Proceeding At Risk Matter by the PAR Meeting Expiry Date, either Party may refer the Proceeding At Risk Matter for resolution in accordance with Schedule 27 – Dispute Resolution Procedure.
- (i) The Proceeding At Risk Notice, review, and comments made during the process set out in this Section 14.6 are for general conformity to the obligations and requirements of this Project Agreement, and any such Notice, review and comment shall not relieve DB Co of the risk and responsibility for the Works and for meeting all of its obligations under and satisfying all requirements of this Project Agreement, and shall not create any new or additional obligations or liabilities for the City.
- (j) If it is determined in accordance with Schedule 27 – Dispute Resolution Procedure that DB Co should not have been deemed to be Proceeding at Risk under Section 14.6(g), the City shall (i) promptly notify the Lender’s Agent that it is withdrawing its notice given pursuant to Section 14.6(g), if applicable, and (ii) reimburse DB Co for its reasonable costs incurred in connection with responding to a Proceeding at Risk Notice and for its participation in the Proceeding at Risk Matter.

15. INTEGRATED MANAGEMENT SYSTEM

15.1 Integrated Management System

- (a) DB Co shall comply with the provisions of Schedule 11 – Integrated Management System Requirements.

15.2 Safety Management

- (a) DB Co shall cause the Construction Contractor, at its sole cost and expense, to conduct an inspection of its facilities and of its health and safety management systems on an annual basis until Final Completion or as otherwise required in accordance with Sections 11.25(b)(vi)(C) or 11.25(b)(vii)(C) (each, an “**H&S Construction Inspection**”), which H&S Construction Inspections shall:
 - (i) be conducted by a Certified H&S Inspector, and
 - (ii) during the performance of the Works, include, at a minimum,

- (A) a review of general compliance with all applicable Occupational Health and Safety Act (Ontario) requirements, compliance with all safety manuals applicable to the Site at which the Works are being conducted; and
 - (B) a review of the Construction Contractor's job hazard analysis documentation on any portion of the Lands which could endanger or put at risk the safety of any person working on any portion of the Lands;
- (b) DB Co shall cause the results of each H&S Construction Inspection (such results referred to as the “**H&S Construction Inspection Report**”) to be delivered to the City and the Works Committee not more than five Business Days from the date on which a H&S Construction Inspection is completed. An H&S Construction Inspection Report arising from an H&S Construction Inspection shall be tabled and presented by DB Co for discussion by the Works Committee at the next meeting of the Works Committee that follows the date on which such H&S Construction Inspection Report was issued.
- (c) To the extent an H&S Construction Inspection Report discloses any non-compliance by the COR-Qualified Construction DB Co Party or the COR-Certified Construction DB Co Party, as the case may be, with the terms of the COR Certification or OHSAS 18001 Accreditation, as the case may be, the City shall have the right to require DB Co to cause the COR-Qualified Construction DB Co Party or the COR-Certified Construction DB Co Party, as the case may be, at its sole cost and expense:
 - (i) to take any corrective and remedial action required by the H&S Construction Inspection Report to correct any such non-compliance and DB Co shall cause the COR-Qualified Construction DB Co Party or the COR-Certified Construction DB Co Party, as the case may be, to comply with all instructions given by the Certified H&S Inspector in respect of actions required to be taken to correct any such non-compliance;
 - (ii) to arrange to have conducted by a Certified H&S Inspector such follow-up H&S Construction Inspections of those facilities and health management systems associated with the non-compliances identified in the relevant H&S Construction Inspection Report (each, an “**H&S Construction Re-Inspection**”) within three Business Days from the date on which any such request is made by the City, until any and all corrective and remedial actions required by the Certified H&S Inspector with respect to the correction of each identified non-compliance is completed to the satisfaction of the Certified H&S Inspector; and
 - (iii) to cause the results of each H&S Construction Re-Inspection (such results referred to as the “**H&S Construction Re-Inspection Report**”) to be delivered to the City and the Works Committee not more than three Business Days from the date on which a H&S Construction Re-Inspection is completed. An H&S Construction Re-Inspection Report arising from an H&S Construction Re-Inspection shall be tabled and presented by DB Co for discussion by the Works Committee at the next meeting of the Works Committee that follows the date on which such H&S Construction Re-Inspection Report was issued.

16. ACCESS TO THE LANDS

16.1 Access to Lands

- (a) Subject to this Section 16 and the provisions of Schedule 20 – Lands, including any restrictions on the use and access to the Lands set out Schedule 20 – Lands, the City shall grant or have caused to be granted, and shall continuously grant or cause to be granted, to DB Co and all DB Co Parties non-exclusive licence rights of use and access to, on and over the Lands, except such rights set out as a DB Co responsibility to obtain under the Permits, Licences, Approvals and Agreements tables attached as Schedule 35 – Permits, Licences, Approvals and Agreements, as are required by DB Co and such DB Co Parties and sufficient (subject to DB Co performing its obligations described in the Permits, Licences, Approvals and Agreements tables attached as Schedule 35 – Permits, Licences, Approvals and Agreements and subject to the timing and extent of the grant of use and access to the Lands set out in Schedule 20 – Lands) to allow DB Co and such DB Co Parties to perform that part of the Works to be performed on Lands. The rights granted to DB Co pursuant to this Section 16.1(a) shall be effective on the later of,
- (i) the date of Financial Close; and
 - (ii) the commencement date for access to individual parcels of lands that comprise the Lands as set out in Schedule 20 – Lands.
- (b) Subject to DB Co's obligation to comply with the other terms and conditions set forth in this Project Agreement and the other Project Documents, DB Co shall ensure that each DB Co Party shall at all times, when entering the Lands, act in a manner consistent with the obligations of DB Co under the Project Agreement.
- (c) In consideration for the use and access rights granted pursuant to Section 16.1(a), DB Co shall provide the Works subject to and in accordance with this Project Agreement.
- (d) Without derogating from any of the City's rights hereunder, in particular, and subject to any restrictions set out in Schedule 20 – Lands, the City acknowledges that, in respect of the Works, DB Co and the DB Co Parties require, and the City shall provide, access to the Lands in accordance with Section 16.1(a) without material interference by the City, any City Party, MTO, RTG or any RTG Party (except as provided in the Interface Agreement). DB Co further acknowledges that following Substantial Completion, DB Co's access to the applicable Lands shall be subject to the City Activities.
- (e) Subject to Section 16.1(a), none of the rights granted pursuant to this Section 16.1 shall grant access to,
- (i) any lands beyond the boundaries of the Lands, or to any lands other than the Lands, other than easements and similar interests of the City which benefit the Lands, obtained after the date of this Project Agreement, to the extent the same are necessary for the Works or exceed any restrictions set out in Schedule 20 – Lands; or
 - (ii) any facilities or infrastructure of the City, Utility Companies, Railway Companies, MTO or any other third parties, except as set out in Schedule 20 – Lands (which access, if any, is subject to Section 16.1(b)).

- (f) The use and access rights provided in this Section 16.1 shall automatically terminate as of the Termination Date, save and except for any earlier termination of the use and access rights specified in Schedule 20 – Lands.
- (g) For greater certainty, the use and access rights provided in this Section 16.1 shall not entitle DB Co or any DB Co Party to extract any mineral from the Lands for use in the Works.
- (h) The City shall acquire use of and access to the Lands described in Schedule 20 – Lands on or prior to the applicable commencement date for access set out in Schedule 20 – Lands. The City shall provide Notice to DB Co of the commencement of access rights to the Lands as such access is obtained by the City.

16.2 Non-Exclusive Rights to Lands and Development of Lands

- (a) Without prejudice to Section 11.12, DB Co acknowledges and agrees that the rights granted to DB Co and the DB Co Parties hereunder to the Lands shall be non-exclusive and that the City and any person authorized by the City may occupy and possess the Lands, the New City Infrastructure, the New MTO Infrastructure and the Existing Infrastructure (in each case, on the Lands) without the prior consent of DB Co, including for the purposes of carrying out the Governmental Activities, the Other Works or RTG Works. In exercising its rights DB Co shall not, and shall require that the DB Co Parties shall not, except as permitted under this Project Agreement, disrupt the performance of the Governmental Activities, the Other Works or RTG City Party Works.
- (b) Without limiting Section 16.2(a), DB Co acknowledges that the City may from time to time use or develop (including by way of subdivision or expansion), or permit the use or development of, or dispose of, portions of the Lands, other than those portions of the Lands (or interests in the Lands) necessary for the performance of the Works. To the extent that such use, development or disposition materially adversely interferes with DB Co's licence rights hereunder or materially adversely interferes with DB Co's ability to perform the Works, such use, development or disposition shall, subject to and in accordance with Schedule 22 – Variation Procedure, result in a Variation. For greater certainty, but without limiting the generality of the foregoing, DB Co acknowledges and agrees that certain of the Lands shall be subject to the restrictions set out in Schedule 20 – Lands and Schedule 15 – Output Specifications.
- (c) Access to Existing Infrastructure shall be provided for in accordance with Schedule 20 – Lands and any Permits, Licences, Approvals and Agreements.
- (d) Except as otherwise specified in the Output Specifications or elsewhere in this Project Agreement, DB Co acknowledges and agrees with the City that the City has no authority to grant use and access to the Third Party Lands, which use and access must be sought from MTO in accordance with the Applicable Law and any Permit, License, Approval or Agreement or other requirements imposed by MTO. DB Co shall be solely responsible to obtain permission from applicable third parties access to the Existing Infrastructure or any component thereof owned by third parties.

16.3 [Not Used]

16.4 Naming and Signage

- (a) DB Co acknowledges that the City and the applicable owners of the New MTO Infrastructure and the Existing Infrastructure reserve and retain,
 - (i) all rights to designate the name for the New City Infrastructure, the New MTO Infrastructure and the Existing Infrastructure, and any part thereof and to retain all revenues derived from the sponsorship of such names;
 - (ii) all rights to signage in relation to the Lands and any part of the New City Infrastructure, the New MTO Infrastructure and the Existing Infrastructure; and
 - (iii) all rights, Trade-Marks, naming or branding regarding any part of the New City Infrastructure, the New MTO Infrastructure and the Existing Infrastructure.
- (b) Without limiting the City's rights pursuant to Section 16.4(a), with the prior written consent of the City, which may take into consideration,
 - (i) any applicable governmental or other guidelines, including the guidelines set out in Schedule 15 – Output Specifications or Schedule 18 – Communication and Stakeholder Engagement Obligations; and
 - (ii) any provision or restriction set out in Schedule 20 – Lands,

DB Co, the DB Co Parties and the Lenders may, for the period prior to Substantial Completion, erect and maintain signage (which may include such parties' logos and trade names) at or on the Lands identifying their respective roles in connection with the development and construction of the Project, provided that such signage is erected and maintained in accordance with the requirements and restrictions set out in this Project Agreement, including Schedule 15 – Output Specifications and Schedule 18 – Communication and Stakeholder Engagement Obligations.

16.5 No Interest in Land, Facilities or Infrastructure

- (a) DB Co acknowledges and agrees that neither DB Co nor the Lenders shall acquire any estate, right, title or ownership interest in the Lands or any part of the New City Infrastructure, the New MTO Infrastructure or the Existing Infrastructure, or any other interest in land, facilities or infrastructure pursuant to this Project Agreement, the Project Documents or otherwise. Notwithstanding any provision herein or in any of the Project Documents to the contrary, all fee simple interest in and freehold title to the Lands, or any part thereof, and the Project, shall at all times remain unencumbered by any interest of DB Co or the Lenders. DB Co and the Lenders shall have access to the Lands and the New City Infrastructure under and subject to the licences and access rights granted under this Section 16 and the Lenders' Direct Agreement, respectively.

16.6 Non-Disturbance Agreement

- (a) If the City mortgages, charges or otherwise encumbers the Lands, the City shall notify DB Co and, at the request of DB Co, provide DB Co with an agreement, in form satisfactory to DB Co, acting reasonably, executed by the mortgagee of the Lands permitting DB Co and the Lenders'

Agent to access and use the Lands under the use and access granted pursuant to this Section 16 and the Lenders' Direct Agreement, respectively, free from interference from the mortgagee or any person claiming by or through the mortgagee. This Section 16.6 shall not apply in respect of any portion of the Lands used or developed pursuant to Section 16.2(b) if neither the licence granted pursuant to this Section 16 nor the Works pertain to such portion of the Lands.

16.7 Adjustments to Lands Available to DB Co

- (a) [REDACTED]
- (b) [REDACTED]
- (c) DB Co shall be entitled to obtain any properties (or obtain temporary access to any properties) at its own cost and expense, however, such properties shall not, for the purposes of this Project Agreement, be Lands and no New City Infrastructure shall be located on, or rely in any way upon, any properties which DB Co acquires pursuant to this Section 16.7(b).

17. ENCUMBRANCES

17.1 DB Co Shall Perform Obligations Under Encumbrances

- (a) DB Co's access to and use of the Lands or any part thereof granted in Section 16 shall be subject to the Encumbrances.
- (b) Subject to Section 17.2, DB Co shall perform all obligations of the City under all Encumbrances for or on behalf of the City, other than:
 - (i) obligations which DB Co is not legally capable of performing for or on behalf of the City; and
 - (ii) obligations which the applicable counterparty to such Encumbrance formally relieves or waives DB Co from performing, with the consent of the City, in its sole discretion (and if such relief or waiver is not consented to by the City, and subject to Section 17.1(b)(i), DB Co shall perform such obligations in accordance with this Section 17).
- (c) DB Co, whether before, during or after the completion of the Works, shall not in any manner breach the Encumbrances.

17.2 No Encumbrances

- (a) DB Co shall not create, incur, permit or suffer to exist any Encumbrance to be created, filed, issued or registered upon or against the Lands or any part of them or any interest therein (i) due to an act or omission of DB Co or any DB Co Party, or (ii) arising in relation to the Works.
- (b) DB Co does not have title to the Lands or any interest therein, and no act or omission by DB Co or any DB Co Party shall give rise to a right for any person to obtain title to or any interest in the Lands or any part thereof, except:
 - (i) as may be expressly agreed to in writing by the City or the applicable third party owner of the Lands;

- (ii) as may be expressly permitted by the terms of this Project Agreement; or
 - (iii) as may be permitted under Applicable Law, but without limiting DB Co's obligations under Sections 17.2(c)(i) and 17.3(a).
- (c) In the event that the Lands or any part thereof or any interest therein becomes subject to any Encumbrance following Financial Close,
 - (i) due to an act or omission of DB Co or any DB Co Party (which has not been consented to in writing by the City), or arising in relation to the Works, DB Co shall immediately take all steps necessary to terminate, remove, vacate or discharge such Encumbrance. If such Encumbrance is not terminated, removed, vacated or discharged within 10 Business Days after DB Co becoming aware of the creation, filing, issuance or registration of such Encumbrance, then, without prejudice to any other rights or remedies it may have, the City may take whatever steps it deems necessary and appropriate, in its sole discretion, to terminate, remove, vacate or discharge the Encumbrance, including payment of any amount owing or claimed thereunder, and seek immediate recovery from DB Co of the amount of any such payment and any associated costs, including legal costs (on a full indemnity basis), all of which shall be payable on demand, and DB Co hereby appoints the City as DB Co's attorney to execute any termination or discharge of an Encumbrance referred to in this Section 17.2(c)(i) which appointment is coupled with an interest and shall be irrevocable for the Project Term and thereafter so long as any of DB Co's obligations under this Section 17.2(c)(i) are outstanding;
 - (ii) due to an act or omission of DB Co or any DB Co Party (which has been consented to in writing by the City), or arising in relation to the Works, DB Co shall perform all obligations under such Encumbrance in accordance with Sections 17.1 and 17.3 (as is applicable) and at its sole cost and expense; or
 - (iii) which is not due to an act or omission of DB Co or any DB Co Party, or which has not arisen in relation to the Works, prior to performing obligations under any such Encumbrance, DB Co shall promptly notify the City of any such Encumbrance and the City may elect, in its sole discretion, to:
 - (A) have such Encumbrance be removed, vacated or discharged at the City's sole cost and expense;
 - (B) perform the required obligations thereunder; or
 - (C) instruct DB Co to perform the required obligations thereunder.
- (d) For the purposes of this Section 17, if,
 - (i) an encumbrance otherwise identified in Sections (b)(viii), (ix) or (x) of Schedule 16 – Encumbrances has not been complied with (excluding non-compliance by DB Co and DB Co Parties) and such non-compliance materially interferes with the use of the Lands for the purposes of the Works; or
 - (ii) an encumbrance otherwise identified in Sections (b)(vii), (viii), (ix) or (x) of Schedule 16 – Encumbrances was not disclosed to DB Co and was not ascertainable through

commercially standard off-title searches, and such encumbrance materially interferes with the use of the Lands for the purposes of the Works,

the City shall be entitled to the same election as set out in Section 17.2(c)(iii), subject to Section 17.2(e). DB Co shall promptly notify the City of any such encumbrance upon DB Co becoming aware of such encumbrance.

- (e) If DB Co is instructed to perform obligations under an Encumbrance pursuant to Section 17.2(c)(iii) or Section 17.2(d), which performance imposes costs or delays in the performance of Works, such performance shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.

17.3 Construction Act (Ontario)

- (a) The Parties acknowledge that Section 17.2 shall apply to claims for liens made against the Lands pursuant to the CA and shall also apply to claims made against the City or the holdback under the CA as though such a claim were an Encumbrance against the Lands as referred to therein. For clarity, Section 17.2 shall not apply to claims for lien that do not relate to the Work provided or performed by or on behalf of DB Co and DB Co Parties.
- (b) DB Co shall withhold from each Subcontractor the holdbacks required under the CA and shall deal with such holdbacks in accordance with the CA.
- (c) DB Co shall, as a condition of final payment under any Subcontract for which lien rights or rights in respect of the holdback may be claimed under the CA, require that a certificate of completion under section 33(1) of the CA for such Subcontract be issued and the relevant Subcontractor provide statutory declarations or other assurances confirming that all those engaged by the Subcontractor have been paid in accordance with Applicable Law.
- (d) DB Co shall follow the requirements of the CA and Good Industry Practice for posting and advertising certificates of completion when issued.
- (e) DB Co shall promptly provide the City with a copy of any materials which are provided to the Lenders to evidence compliance with the CA.
- (f) Upon request by the City, DB Co shall perform and deliver to the City a sub-search of title on the Lands or any part thereof. The City shall pay the reasonable costs of any such search except (i) a search that reveals Encumbrances that are not permitted by this Project Agreement, (ii) a search requested based on a reasonable suspicion that an Encumbrance that is not permitted by this Project Agreement has been registered on title to the Lands, and (iii) a search requested for the purpose of confirming that an Encumbrance that is not permitted by this Project Agreement has been discharged from title to the Lands.
- (g) DB Co shall cause a Payment Certifier to be appointed under the Design and Construction Contract and shall cause such Payment Certifier to certify the substantial performance of the Design and Construction Contract in accordance with the CA.

- (h) The City shall, and shall cause MTO to, provide DB Co with any notice of lien that is delivered to the City or MTO in connection with the Works promptly (and in any event within 5 Business Days) following receipt thereof.

18. SITE CONDITIONS AND RELIANT INFORMATION

18.1 Acceptance of Site Conditions

- (a) Subject to Sections 7.4, 18.1(b), 18.2, 18.3, 18.4, 18.5, 18.6, 18.7 and 18.8 DB Co acknowledges and agrees that it has inspected or investigated the Lands, the Existing Infrastructure (including the surroundings thereof) on which Works will be performed, and the Site Conditions in accordance with Good Industry Practice taking into account all matters relating to the Lands (including the buildings, structures and works, on, over and under the Lands existing on the date hereof and the Background Information), the Existing Infrastructure on which Works will be performed, and the Site Conditions prior to executing this Project Agreement and agrees to accept the Lands, the Existing Infrastructure on which Works will be performed, and the Site Conditions on an “as is, where is” basis. Without limiting the generality of the foregoing, but subject to Sections 7.4, 18.1(b), 18.2, 18.3, 18.4, 18.5, 18.6, 18.7 and 18.8, DB Co shall not be entitled to make any claim of any nature whatsoever against the City or any City Party, or RTG or any RTG Party, on any grounds relating to the Lands, the Existing Infrastructure on which Works will be performed, or the Site Conditions, including the fact that incorrect or insufficient information on any matter relating to the Lands, the Existing Infrastructure on which Works will be performed, or the Site Conditions was given to it by any person, whether or not the City or a City Party, RTG or any RTG Party.
- (b) Section 18.1(a) is not intended to prohibit DB Co from relying upon information that has been provided by a person who has given DB Co an express written entitlement to rely on that information, provided however, subject to Sections 7.4, 18.2, 18.3, 18.4, 18.5, 18.6, 18.7 and 18.8, DB Co shall not be entitled to make any claim of any nature whatsoever against the City or any City Party, RTG or any RTG Party, on any grounds relating to the information provided by that person. For clarity, subject to Sections 7.4, 18.2, 18.3, 18.4, 18.5, 18.6, 18.7 and 18.8, DB Co’s legal recourse shall be against the person who provided the express written entitlement to rely on the information and not the City or any City Party, or RTG or any RTG Party.
- (c) Subject to Sections 7.4, 18.1(b), 18.2, 18.3, 18.4, 18.5, 18.6, 18.7 and 18.8, DB Co acknowledges and agrees that it has and shall be deemed to have:
 - (i) performed all necessary due diligence and investigations or inspections on the Lands, and examined the Lands and its surroundings and any existing works on, over or under the Lands in accordance with Good Industry Practice, taking into account all matters relating to the Lands, including any Existing Infrastructure, and any other buildings, structures and works, on, over and under the Lands existing on the date hereof;
 - (ii) performed all necessary due diligence and investigation or inspection on the Existing Infrastructure in accordance with Good Industry Practice on which Works will be performed and satisfied itself prior to executing this Project Agreement as to the structural, environmental and general condition of such Existing Infrastructure;
 - (iii) in accordance with Good Industry Practice, taking into account all matters relating to the Lands, including any Existing Infrastructure, and any other buildings, structures and

works, on, over and under the Lands existing on the date hereof, satisfied itself as to the nature of the Site Conditions, the ground and the subsoil, the level and quantity of groundwater, the form and nature of the Lands, the loadbearing and other relevant properties of the Lands, the risk of injury or damage to property affecting the Lands, the nature of the materials (whether natural or otherwise) to be excavated and the nature of the design, work and materials necessary for the execution and delivery of the Works;

- (iv) satisfied itself as to the presence of any Contamination on, in or under the Lands, in accordance with Good Industry Practice, taking into account all matters relating to the Lands, including any Existing Infrastructure, and any other buildings, structures and works, on, over and under the Lands existing on the date hereof;
 - (v) satisfied itself as to the adequacy of the Lands, rights of access to, from and through the Lands and any accommodation it may require for the purposes of fulfilling its obligations under this Project Agreement;
 - (vi) satisfied itself as to the possibility of interference by persons of any description whatsoever with access to or use of, or rights in respect of, the Lands; and
 - (vii) satisfied itself as to the precautions, times and methods of working necessary to prevent any nuisance or interference, whether public or private, being caused to any third parties.
- (d) DB Co further acknowledges and agrees that, other than as referred to or contained in this Project Agreement, no representations or warranties have been made, nor documentation delivered to DB Co or any DB Co Party, which would indicate that DB Co would be unable to perform the Works in a lawful manner.

18.2 Contamination

- (a) At all times prior to the applicable Substantial Completion Date, DB Co shall be responsible for managing, remediating and/or removing, in accordance with Section 4.5 of Schedule 17 – Environmental Obligations, any Contamination located on, in or under the Site which was described in, or was properly inferable, readily apparent or readily discoverable from, the Environmental Reports or the Geotechnical Reports made available to DB Co at least 30 days prior to the RFP Technical Submission Deadline (“**Existing Contamination**”). Notwithstanding the forgoing or anything else to the contrary contained in this Agreement, DB Co shall have no responsibility for any Contamination that is migrating to or from the Lands, except (I) to the extent that DB Co or any DB Co Party Released such Contamination in a manner which does not comply with Applicable Law or (II) DB Co or any DB Co party is causing the migration of Existing Contamination.
- (b) DB Co shall be responsible for managing, removing or remediating, in accordance with Section 4.5 of Schedule 17 – Environmental Obligations:
 - (i) any Contamination on, in or under the Lands which DB Co or any DB Co Party has brought onto the Lands or lands adjacent to the Lands and caused to be Released in a manner which does not comply with Applicable Law; and

- (ii) any Existing Contamination which was harmless or stored, contained or otherwise dealt with in accordance with Applicable Law which DB Co or any DB Co Party causes to be Released in a manner which does not comply with Applicable Law.

In addition, and without limiting any other obligation of DB Co under the Project Agreement, DB Co shall be responsible for all Direct Losses associated with the Releases of Contamination or Existing Contamination described in Sections 18.2(b)(i) and 18.2(b)(ii) above and, to the extent of DB Co's responsibility for Contamination that is migrating to or from the Site, Section 18.2(a).

- (c) Contamination which is not the responsibility of DB Co pursuant to Sections 18.2(a) and 18.2(b) shall be the responsibility of the City.
- (d) Upon the discovery of any Contamination, DB Co shall immediately inform the City Representative and shall comply, and ensure compliance by all DB Co Parties, with all Applicable Law and Schedule 17 - Environmental Obligations in respect thereof:
 - (i) at the City's cost pursuant to Section 18.2(g), in respect of Contamination for which the City is responsible pursuant to Section 18.2(c); and
 - (ii) at its own cost in respect of Contamination for which it is responsible pursuant to Section 18.2(a) or 18.2(b).
- (e) Except to the extent required to prevent or mitigate an Emergency or to comply with Applicable Law, DB Co shall not undertake any significant work pursuant to Section 18.2(d) in respect of Contamination for which the City is responsible pursuant to Section 18.2(c) until the City Representative has been given a reasonable opportunity to review the nature and extent of the Contamination and has instructed DB Co to proceed with such work.
- (f) In the event that the City wishes DB Co to perform actions in respect of any Contamination which are in addition to any required pursuant to Section 18.2(d), then the City shall issue an instruction to DB Co specifying what action the City requires DB Co to take and DB Co shall promptly and diligently comply with all such instructions at the City's cost pursuant to Section 18.2(g).
- (g) If Sections 18.2(d)(i), 18.2(e) or 18.2(f) require DB Co to perform any alteration, addition, Demolition, extension or variation in the Works as a result of Contamination for which the City is responsible pursuant to Section 18.2(c) or as a result of any instructions given by the City pursuant to Section 18.2(f) and which would not otherwise be required under this Project Agreement, then any such alteration, addition, Demolition, extension or variation in the Works shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.
- (h) In the event that the City and DB Co do not agree as to the nature or extent of Contamination, or in the event of a disagreement as to whether DB Co is responsible for Contamination pursuant to either Sections 18.2(a) or 18.2(b), or the actions to be performed by DB Co pursuant to Section 18.2(d) or Schedule 17 – Environmental Obligations, such disagreement shall be referred for determination to a panel of 3 independent and suitably qualified and experienced persons, 1 appointed by the City, 1 appointed by DB Co, and a third appointed jointly by the appointees of the City and DB Co. If either Party fails to appoint such appointee within 10 Business Days of delivery Notice of such disagreement, or if the appointees of the City and DB Co fail to appoint

the third appointee within 10 Business Days of the later of their respective appointments, then the Superior Court of Justice of Ontario shall appoint such appointee. The costs and expenses of retaining such appointees shall be borne by the unsuccessful Party. Such panel shall endeavour to deliver a decision within 15 Business Days of any such disagreement being referred to such panel. Such panel's decision shall be determined by majority and shall be final and binding on the Parties only in respect of the nature of the Contamination and any action to be performed by DB Co pursuant to Section 18.2(d), except to the extent that either Party alleges that such decision would result in non-compliance with Applicable Law or this Project Agreement, in which event either Party may refer the disagreement for resolution in accordance with Schedule 27 - Dispute Resolution Procedure.

18.3 Items of Geological, Historical or Archaeological Interest or Value

- (a) As between the Parties, all fossils, artifacts and other objects having artistic, historic, archaeological or monetary value, including human remains and burial sites, which may be found on or at the Lands are or shall be the sole and absolute property of the City or the owner of the relevant property, as applicable.
- (b) The City shall be responsible for items referred to in Section 18.3(a) except for any such items that were described in, or were properly inferable, readily apparent or readily discoverable from any Archaeological Reports or any Cultural Heritage Reports.
- (c) Upon the discovery of any item referred to in Section 18.3(a), DB Co shall:
 - (i) immediately inform the City Representative of such discovery; and
 - (ii) take all steps not to disturb the item and, if necessary, cease any Works in so far as performing such Works would endanger the item or prevent or impede its excavation, take all necessary steps to preserve and ensure the preservation of the item in the same position and condition in which it was found, and comply, and ensure that all DB Co Parties comply, with Applicable Law and all requirements of Governmental Authorities with respect to such discovery, including the *Funeral, Burial and Cremations Services Act, 2002* (Ontario) and the *Standards & Guidelines for Conservation of Provincial Heritage Properties issued under the Ontario Heritage Act* (Ontario):
 - (A) subject to and in accordance with Section 18.3(e), at the City's cost, in respect of any such discovery for which the City is responsible pursuant to Section 18.3(b); and
 - (B) at its own cost in respect of any such discovery for which it is responsible pursuant to Section 18.3(b).
- (d) In the event that the City wishes DB Co to perform actions in respect of any discovery of any item referred to in Section 18.3(a) which are in addition to any required pursuant to Section 18.3(c), then the City shall issue an instruction to DB Co specifying what action the City requires DB Co to take and DB Co shall promptly and diligently comply with all such instructions at the City's cost subject to and in accordance with Section 18.3(e).
- (e) If Section 18.3(c) or Section 18.3(d) require DB Co to perform any alteration, addition, Demolition, extension or variation in the Works as a result of any such discovery for which the

City is responsible pursuant to Section 18.3(b) or as a result of any instructions given by the City pursuant to Section 18.3(d) and which would not otherwise be required under this Project Agreement, then any such alteration, addition, Demolition, extension or variation shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.

- (f) In the event that the City and DB Co do not agree as to the nature or extent of the actions required to be performed by DB Co pursuant to Section 18.3(c)(ii), such disagreement shall be referred for determination to an independent and suitably qualified and experienced person, acceptable to DB Co and the City, each acting reasonably (and the costs and expenses of retaining such person shall be borne by the unsuccessful Party). Such person's decision shall be final and binding on the Parties except to the extent that either Party alleges that such decision would result in non-compliance with Applicable Law or this Project Agreement, in which event either Party may refer the disagreement for resolution in accordance with Schedule 27 – Dispute Resolution Procedure.

18.4 Species-at-Risk

- (a) DB Co shall be responsible for any Species-at-Risk which may be found on, in or at the Site, the occurrence of which, in the location in which it is found, was described in the Environmental Assessments. The City shall be responsible for any Species-at-Risk which may be found on, in or at the Site, except for any Species-at-Risk the occurrence of which, in the location in which it is found, was described in the Environmental Assessments.
- (b) In respect of Species-at-Risk for which DB Co is responsible pursuant to Section 18.4(a), DB Co shall, at its own cost, comply, and ensure compliance by all DB Co Parties, with all Applicable Law and the provisions of Schedule 17 – Environmental Obligations. Upon the discovery of any Species-at-Risk for which the City are responsible pursuant to Section 18.4(a), DB Co shall:
 - (i) immediately inform the City Representative of such discovery; and
 - (ii) comply, and ensure compliance by all DB Co Parties, with all Applicable Law and the provisions of Schedule 17 - Environmental Obligations in respect thereof, including taking all necessary steps to preserve the respective habitat and relocate the Species-at-Risk at the City's cost pursuant to Section 18.4(d).
- (c) In the event that the City wishes DB Co to perform actions which are in addition to any required pursuant to Section 18.4(b), then the City shall issue an instruction to DB Co specifying what action the City requires DB Co to take and DB Co shall promptly and diligently comply with all such instructions at the City's cost pursuant to Section 18.4(d).
- (d) If Sections 18.4(b) or 18.4(c) require DB Co to perform any alteration, addition, demolition, extension or variation in the Works as a result of the discovery of any Species-at-Risk for which the City is responsible pursuant to Section 18.4(a) or as a result of any instructions given by the City pursuant to Section 18.4(c) and which would not otherwise be required under this Project Agreement, then any such alteration, addition, demolition, extension or variation:
 - (i) prior to Substantial Completion shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event; and

- (ii) following Substantial Completion shall, subject to and in accordance with Schedule 22 - Variation Procedure, result in a Variation.

18.5 Stage 1 Connection Infrastructure

- (a) DB Co has reviewed the Stage 1 Connection Infrastructure Preliminary Report, and shall, subject to terms of this Section 18.5, undertake the design and Construction Activities related to the interface and interconnection of the Confederation Line East Extension and Confederation Line West Extension with the Existing Confederation Line in accordance with this Project Agreement. DB Co shall be entitled to assume and rely on the fact that the actual specifications and conditions of the Stage 1 Connection Infrastructure, upon completion of construction and commissioning such Stage 1 Connection Infrastructure, will be as described in the Stage 1 Connection Infrastructure Preliminary Report.
- (b) After Financial Close, and no later than June 25, 2019 the City will provide updated information, to the extent available, relating to the Stage 1 Connection Infrastructure Preliminary Report. No later than December 31, 2019, the City shall provide to DB Co a Stage 1 Connection Infrastructure Final Report.
- (c) If the Stage 1 Connection Infrastructure, or the Stage 1 Connection Infrastructure Final Report, demonstrates a deviation from the Stage 1 Connection Infrastructure Preliminary Report or the requirements in the Output Specifications, unless such deviation:
 - (i) was within the actual knowledge of DB Co or a DB Co Party, as of the date which is 30 days prior to the RFP Technical Submission Deadline;
 - (ii) was disclosed as such by the City to DB Co at least 30 days prior to the RFP Technical Submission Date (either in the Stage 1 Connection Infrastructure Preliminary Report or otherwise); or
 - (iii) has been, or is reasonably capable of being fully mitigated by DB Co without (A) incurring additional expenses which, when aggregated with all such other expenses incurred by DB Co and DB Co Parties in mitigating other such deviations from the Stage 1 Connection Infrastructure Preliminary Report or requirements in the Output Specifications, exceed \$[REDACTED], or (B) delaying the Critical Path,

to the extent that such deviation requires DB Co to perform any alteration, addition, demolition, extension, re-performance or variation in the Works, which would not otherwise be required under this Project Agreement, or otherwise delays DB Co's performance of the Works, any such alteration, addition, demolition, extension, variation or delay shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.

- (d) For the purposes of Section 18.5(c)(i), "actual knowledge of DB Co" shall mean knowledge that is actually held by the person who was identified as the project manager (or analogous position) for the Project in DB Co's proposal in response to the Request for Proposals.

18.6 Mislocated or Unknown Utilities

- (a) DB Co shall be responsible for Utility Infrastructure on the Site pursuant to Schedule 15 – Output Specifications, except for any Utility Infrastructure that is:
 - (i) Mislocated Utility Infrastructure; or
 - (ii) is Utility Infrastructure that:
 - (A) was not within the actual knowledge of DB Co or a DB Co Party, as of the date which is 30 days prior to the RFP Technical Submission Deadline; and
 - (B) was not referenced or described in, or was not inferable, readily apparent or readily discoverable, from the Background Information.
- (b) For the purposes of Section 18.6(a)(ii)(A), “actual knowledge of DB Co” shall mean knowledge that is actually held by the person who was identified as the project manager (or analogous position) for the Project in DB Co’s proposal in response to the Request for Proposals.
- (c) If Utility Infrastructure on the Site that is not the responsibility of DB Co pursuant to Section 18.6(a) delays DB Co’s performance of the Works then any such delay or additional costs in respect of the Works shall, subject to and in accordance with Section 32 be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.
- (d) DB Co shall not be eligible for the Delay Event or Compensation Event set out in this Section 18.6 in respect of:
 - (i) any Utility Infrastructure that is a service connection;
 - (ii) any Utility Infrastructure that is above-ground, aerial, or at-grade;
 - (iii) any of the following Utility Infrastructure that is owned by the City or MTO:
 - (A) watermains of nominal diameter less than 150mm;
 - (B) combined sewers or storm sewers of nominal diameter less than 300mm;
 - (C) sanitary sewers of nominal diameter less than 225mm; and
 - (D) street lighting and traffic signal cables;
 - (iv) any Utility Infrastructure relocations carried out at the Site within the study area limits represented by the Subsurface Utility Engineering (SUE) Reports subsequent to Commercial Close, or within the study area limits represented by the Roll Plans subsequent to the City obtaining such subsurface utility engineering information, in either case including with respect to,
 - (A) the Works; and
 - (B) Third Party Works and Additional Works.

- (e) Any Dispute as to whether Utilities encountered by DB Co are or not Mislocated Utility Infrastructure or Utility Infrastructure described in clause (i) or (ii) of Section 18.6(a) shall initially be submitted to the Independent Certifier for independent determination in accordance with Section 4 of Schedule 27 – Dispute Resolution Procedure.

18.7 Stage 1 Systems Information

- (a) DB Co shall be entitled to rely upon the accuracy of the Stage 1 Systems Information for purposes of the Works and shall be entitled to rely on the fact that the Existing Confederation Line systems have been built in accordance with the Stage 1 Systems Information and Stage 1 Project Agreement.
- (b) In the event of any defect, omission, error or inaccuracy in the Stage 1 Systems Information (including if the Stage 1 System Information is not compliant with the Stage 1 Project Agreement or demonstrates a deviation from the requirements in the Output Specifications), unless such defect, omission, error or inaccuracy:
 - (i) was within the actual knowledge of DB Co or a DB Co Party, as of the as of the date which is 30 days prior to the RFP Technical Submission Deadline; or
 - (ii) was disclosed as such by the City to DB Co at least 30 days prior to the RFP Technical Submission Date (either in the Stage 1 Systems Information or otherwise),and provided compliance with the requirements of this Project Agreement reasonably requires DB Co to perform any alteration, addition, demolition, extension or variation in the Works which would not otherwise be required under this Project Agreement, or if such defect, error or inaccuracy otherwise delays DB Co's performance of the Works, any such alteration, addition, demolition, extension, variation or delay shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.
- (c) For the purposes of Section 18.7(b)(i), "actual knowledge of DB Co" shall mean knowledge that is actually held by the person who was identified as the project manager (or analogous position) for the Project in DB Co's proposal in response to the Request for Proposals.

18.8 Defects – Major Existing Third Party Infrastructure

- (a) The City shall be responsible for defects in Major Existing Third Party Infrastructure provided that the defect,
 - (i) was not within the actual knowledge of DB Co or a DB Co Party, as of the date which is 30 days prior to the RFP Technical Submission Deadline;
 - (ii) was not referenced or described in, or was not properly inferable, readily apparent or readily discoverable from, the Background Information;
 - (iii) was not properly attributable to the result of the aging of the Major Existing Third Party Infrastructure; or
 - (iv) was not caused or contributed to by DB Co or a DB Co Party.

- (b) For the purposes of Section 18.8(a)(i), “actual knowledge of DB Co” shall mean knowledge that is actually held by the person who was identified as the project manager (or analogous position) for the Project in DB Co’s proposal in response to the Request for Proposals.
- (c) If a defect in Major Existing Third Party Infrastructure that is the responsibility of the City pursuant to Section 18.8(a), delays DB Co’s performance of the Works, then any such delay in the Works Schedule or additional costs in respect of the Works shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.

19. GOVERNMENTAL AND THIRD PARTY FINANCIAL OBLIGATIONS

19.1 Governmental and Third Party Financial Obligations

- (a) DB Co shall be responsible for,
 - (i) all Financial Obligations under or in respect of all DB Co Permits, Licences, Approvals and Agreements, including,
 - (A) any engineering, administration and inspection fees required in respect of works or services to be performed;
 - (B) any security deposits required under any DB Co Permits, Licences, Approvals and Agreements; and
 - (C) any other amounts payable under any DB Co Permits, Licences, Approvals and Agreements; and
 - (ii) all Financial Obligations in respect of the City Permits, Licences, Approvals and Agreements that are set out as being DB Co’s responsibility in Schedule 15 – Output Specifications, Schedule 17 – Environmental Obligations or Schedule 35 – Permits, Licences, Approvals and Agreements, including any engineering, administration and inspection fees required in respect of works or services to be performed.
- (b) For clarity, and notwithstanding Section 19.1(a), DB Co shall not be responsible for payment of any development charges relating to the Works, the New City Infrastructure, the New MTO Infrastructure or the Lands.
- (c) Subject to Section 19.1(a)(ii), the City shall be responsible for all Financial Obligations under or in respect of all the City Permits, Licences, Approvals and Agreements including such Financial Obligations, as applicable in either case, to the City of Ottawa, any Utility Company, any Railway Company, any Governmental Authority or any other third party in respect of the Works, including:
 - (i) any engineering administration and inspection fees required in respect of works or services required to be performed;
 - (ii) any security deposits required under any City Permits, Licences, Approvals and Agreements; and

- (iii) any other amounts payable under any City Permits, Licences, Approvals and Agreements.
- (d) The Parties agree that any refund, partial rebate or credit granted by the City, any applicable Utility Company, any applicable Railway Company, or any applicable Governmental Authority or any other third party relating to the Financial Obligations referred to in Sections 19.1(a), 19.1(b) and 19.1(c) shall be for the benefit of the City to the extent such Financial Obligations were paid by the City (including pursuant to Section 11.29) and shall be for the benefit of DB Co to the extent such Financial Obligations were paid by DB Co. Without limiting the generality of the foregoing, to the extent that the City enters into any cost sharing arrangements with any Utility Company, any Railway Company, any Governmental Authority or any third party, DB Co acknowledges and agrees that the City shall be the sole beneficiary of any such cost sharing arrangements and DB Co shall have no entitlement whatsoever to any benefit arising from any such cost sharing arrangements.

20. CITY ACCESS AND MONITORING

20.1 City Access During the Works

- (a) Subject to Section 20.1(b) but without limiting any of the City's rights in respect of the Lands, the New City Infrastructure, the New MTO Infrastructure or the right of any third party in relation to that third party's portion of the Lands or New MTO Infrastructure, DB Co acknowledges and agrees that DB Co shall not restrict the access of the City, and the Government Entities and their respective representatives, to,
 - (i) the Lands, the New City Infrastructure, the New MTO Infrastructure or any workshop where materials, plant or equipment are being manufactured, prepared or stored at all reasonable times during normal working hours, including for the purposes of general inspection or audit, or of attending any test or study being carried out in respect of the Works, or to fulfill any statutory, public or other duties or functions; or
 - (ii) the Lands, the New City Infrastructure, the Existing Infrastructure for the purpose of operating the Existing Confederation Line.

For clarity, nothing in this Section 20.1 shall restrict or impede the City's or any other third party owner's right to use and access the Existing Infrastructure or any part of the Lands not required at that time for DB Co's performance of the Works in accordance with the terms hereof.

- (b) In exercising their access rights under Section 20.1(a) in respect of the Lands, the City shall, and shall cause the Government Entities, and their respective representatives, to:
 - (i) provide reasonable prior Notice appropriate to the circumstances (other than for any offices or other facilities provided for the use of the City and/or Government Entities);
 - (ii) comply with all relevant safety procedures and any reasonable directions with regard to site safety that may be issued by or on behalf of the DB Co Representative from time to time; and
 - (iii) if required by DB Co, be accompanied by a representative of DB Co or a DB Co Party.

20.2 Increased Monitoring

- (a) If, at any stage, the City is of the opinion, acting reasonably, that there are defects in the Works or that DB Co has failed to comply, in any material respect, with the requirements of this Project Agreement, the City may, without prejudice to any other right or remedy available to it, by Notice to DB Co, increase the level of monitoring of DB Co from that set out in this Project Agreement to such level as the City considers reasonable taking into account the nature of the relevant defect or failure until such time as DB Co shall have demonstrated, to the City's satisfaction, that it is capable of performing and will perform, in all material respects, its obligations related to the Works under this Project Agreement. DB Co will compensate the City for any reasonable costs incurred as a result of such increased monitoring.

20.3 Right to Uncover

- (a) DB Co shall ensure that the City is afforded advance Notice of, and that the City is afforded a full opportunity to witness, all inspection and test activity in accordance with the Inspection and Test Plan. If DB Co does not provide such Notice and opportunity, DB Co shall at the request of the City uncover any relevant part of the Works which have been covered up or otherwise put out of view or remove any relevant part of the Works that have been proceeded with in order to permit the City to witness the relevant inspection or test activity. DB Co shall bear all costs of any such uncovering or removal, regardless of whether or not any defect is discovered in the relevant Works.
- (b) The City shall have the right, at any time prior to the East Final Completion Date, to request DB Co to uncover or open up and inspect (or allow the City to inspect) any part or parts of the East Works, or to require testing of any part or parts of the East Works, where the City reasonably believes that such part or parts of the East Works is or are defective or that DB Co has failed to comply with the requirements of this Project Agreement (including the Design Data) relevant to such part or parts of the East Works, and DB Co shall comply with such request. When the City makes such a request, the City shall include reasonably detailed reasons with such request.
- (c) The City shall have the right, at any time prior to the West Final Completion Date, to request DB Co to uncover or open up and inspect (or allow the City to inspect) any part or parts of the West Works, or to require testing of any part or parts of the West Works (other than Highway Works in respect of which Section 20.3(d) shall apply), where the City reasonably believes that such part or parts of the West Works is or are defective or that DB Co has failed to comply with the requirements of this Project Agreement (including the Design Data) relevant to such part or parts of the West Works, and DB Co shall comply with such request. When the City makes such a request, the City shall include reasonably detailed reasons with such request.
- (d) The City shall have the right, at any time prior to the applicable Handover, to request DB Co to uncover or open up and inspect (or allow the City to inspect) any part or parts of the Highway Works, or to require testing of any part or parts of the Highway Works, where the City reasonably believes that such part or parts of the Highway Works is or are defective or that DB Co has failed to comply with the requirements of this Project Agreement (including the Design Data) relevant to such part or parts of the Highway Works, and DB Co shall comply with such request. When the City makes such a request, the City shall include reasonably detailed reasons with such request.

- (e) If an inspection shows that the relevant part or parts of the Works is or are defective or that DB Co has failed to comply with the requirements of this Project Agreement (including the Design Data) relevant to such part or parts of the Works, DB Co shall rectify all such defects and non-compliance diligently and at no cost to the City and DB Co shall not be entitled to any additional compensation or extension of time in relation thereto.
- (f) If an inspection shows that the relevant part or parts of the Works is not or are not defective and that DB Co has complied with the requirements of this Project Agreement (including the Design Data) relevant to such part or parts of the Works, the exercise by the City of its rights pursuant to this Section 20.3 shall, subject to and in accordance with Section 32, be treated as a Delay Event and, subject to and in accordance with Section 33, be treated as a Compensation Event.

20.4 No Relief from Obligations

- (a) The Parties acknowledge that the exercise by the City or the City Representative of the rights under this Section 20 shall in no way affect the obligations of DB Co under this Project Agreement except as set out in this Section 20.

20.5 Access by Others

- (a) Subject to Section 20.5(b) and subject to and in accordance with Section 11.12 (to the extent applicable), DB Co shall ensure that throughout the Project Term, without prejudice to any access rights of any such person as a member of the general public or pursuant to Applicable Law, that it does not restrict access to the Lands, New City Infrastructure, Existing Infrastructure, Stage 1 Connection Infrastructure or New MTO Infrastructure for:
 - (i) the Independent Certifier to the extent required to perform its obligations pursuant to Schedule 6 - Independent Certifier Agreement;
 - (ii) inspectors and other persons authorized to act on behalf of the City and owners of New MTO Infrastructure and Existing Infrastructure, for inspection and/or acceptance purposes;
 - (iii) all Other Contractors, including the owners or operators of any Third Party Facilities and their agents at all reasonable times to exercise any right or power or perform any duty or obligation under any Applicable Law or the Utility Agreements, Railway Orders or Encroachment Permits, provided that, wherever consistent with the requirements of Applicable Law and the requirements of this Project Agreement, DB Co may limit such access so as to not unnecessarily impede or restrict traffic flows, the operation of the Existing Infrastructure or any Works;
 - (iv) all Governmental Authorities and Emergency Service Providers in order to carry out any work (including surveys and inspections) in accordance with or to exercise any right or power or perform any duty or obligation under any Applicable Law and provided that, whenever consistent with the applicable requirements of such Governmental Authority, Emergency Service Providers or Applicable Law and the requirements of this Project Agreement (as the case may be), DB Co may limit such access so as to not unnecessarily impede or restrict traffic flows, the operation of the Existing Infrastructure or any Works;

- (v) any Other Contractors, owners or operators of Third Party Facilities, Governmental Authorities, MTO, Emergency Service Providers, Utility Companies, Railway Companies, Transit Systems and railway systems for the purposes of access to and from any other lands and/or facilities adjacent to or in proximity to the Lands, the New City Infrastructure, the New MTO Infrastructure and Existing Infrastructure owned or operated by such person or in which such person has any interest, provided that, whenever consistent with the requirements of Applicable Law and the requirements of this Project Agreement, DB Co may limit such access so as to not unnecessarily impede or restrict traffic flows, the operation of the Existing Infrastructure or any Works;
 - (vi) any City Party to undertake emergency training in relation to the New City Infrastructure;
 - (vii) any City Party to undertake and perform Systems Integration Works in accordance with the Systems Integration Management Plan, or RTG or RTG Parties in accordance with the provisions of the Interface Agreement.
- (b) Subject to Section 20.5(c), the City shall require persons accessing Site(s) on the Lands in accordance with access rights under Section 20.5(a) to:
 - (i) provide reasonable prior Notice to DB Co appropriate to the circumstances;
 - (ii) comply with all relevant health and safety procedures and any reasonable directions with regard to health and safety that may be issued by or on behalf of the DB Co Representative from time to time; and
 - (iii) if reasonably required by DB Co, be accompanied by a representative of DB Co or a DB Co Party.
- (c) Section 20.5(b) shall not apply,
 - (i) to Additional Contractors, who shall instead comply with any instructions or procedures made by DB Co pursuant to Section 11.12;
 - (ii) in the case of access rights described in Section 20.5(a) for the purpose of responding to an Emergency ;
 - (iii) for the purposes of responding to an emergency declared by the City or by a Governmental Authority; and
 - (iv) in circumstance where the requirements of Section 20.5(b) are inconsistent with the requirements of the applicable Governmental Authority or Emergency Service Provider.

20.6 Public Use

- (a) DB Co shall have no right to grant to the general public the right to use either the New City Infrastructure or the New MTO Infrastructure. It shall be the right of the City to grant the right of use to the general public to the New City Infrastructure. It shall be the right of the MTO to grant the right of use to the general public to the New MTO Infrastructure.

- (b) Except as otherwise expressly provided in this Project Agreement, DB Co shall not have any claim whatsoever against the City, any City Party, any Emergency Service Providers or any other Governmental Authority for, or in respect of any lane or ramp closure or diversion or any track closure or diversion, including any such closure or diversion as a result of the exercise of any other rights or powers or the discharge of any other duties or functions by any such authority, affecting all or any part of the Lands, the New City Infrastructure or the New MTO Infrastructure, at any time.

21. ENVIRONMENTAL REQUIREMENTS

21.1 [Intentionally Deleted]

21.2 Environmental Requirements

- (a) DB Co and the City shall comply with the provisions of Schedule 17 – Environmental Obligations.

21.3 [Intentionally Deleted]

22. INDEPENDENT CERTIFIER

22.1 Appointment

- (a) On or prior to Financial Close, the Parties shall appoint an independent and suitably qualified and experienced consultant to act as the Independent Certifier for the purposes of this Project Agreement and shall enter into an agreement with the Independent Certifier substantially in the form of Schedule 6 – Independent Certifier Agreement. If the Parties are unable to agree upon the Independent Certifier within such period of time, then the determination of the Independent Certifier shall be made in the same manner as the identification of a replacement Independent Certifier under Section 22.7(b).
- (b) Neither Party shall, without the prior written consent of the other Party, enter into any agreement with the Independent Certifier in connection with the Project other than the Independent Certifier Agreement, and DB Co shall ensure that no DB Co Party enters into any separate agreement with the Independent Certifier in connection with the Project.

22.2 Role of Independent Certifier

- (a) The general role, obligations and functions of the Independent Certifier are described in Schedule 6 – Independent Certifier Agreement.

22.3 Changes to Terms of Appointment

- (a) Neither the City nor DB Co shall without the other's prior written approval:
 - (i) waive, settle, compromise or otherwise prejudice any rights or claims which the other may from time to time have against the Independent Certifier; or
 - (ii) vary the terms of the Independent Certifier Agreement or the services performed or to be performed by the Independent Certifier.

- (b) The Parties shall perform their respective obligations arising under or in connection with the Independent Certifier Agreement.

22.4 Right to Change Appointment

- (a) The Parties agree that the Independent Certifier shall not provide any services or reports or other information to DB Co, the Lenders, the DB Co Parties or any other person other than pursuant to the performance of the functions of the Independent Certifier under this Project Agreement unless agreed to in writing by the Parties. The Parties may agree to terminate the Independent Certifier Agreement upon 30 days' Notice to the Independent Certifier. If such Notice is given, then, pursuant to Section 22.7, a new Independent Certifier will be appointed. The Parties agree that, notwithstanding the 30 days' Notice of termination, the Independent Certifier shall continue on a day-to-day basis thereafter until a new Independent Certifier is appointed.

22.5 Cooperation

- (a) The Parties agree to cooperate with each other generally in relation to all matters within the scope of or in connection with the Independent Certifier Agreement. All instructions and representations issued or made by either of the Parties to the Independent Certifier shall be simultaneously copied to the other and the Parties shall be entitled to attend all inspections performed by or meetings involving the Independent Certifier.

22.6 Payment of Independent Certifier and Systems Integration Verifier

- (a) DB Co and the City shall share equally the responsibility for the payment of all fees and costs of the Independent Certifier.
- (b) DB Co and the City shall share equally the responsibility for the payment of all fees and costs of the Systems Integration Verifier.

22.7 Replacement

- (a) In the event of the Independent Certifier's engagement being terminated otherwise than for full performance, the Parties shall liaise and cooperate with each other in order to appoint a replacement consultant to act as the Independent Certifier as soon as reasonably practicable. The identity of any such replacement shall be as agreed by the Parties and the terms of his/her appointment shall, unless otherwise agreed by the Parties, be as set out in the Independent Certifier Agreement.
- (b) In the event the Parties fail to agree upon the identity of a replacement Independent Certifier within five Business Days after the termination of the original Independent Certifier's appointment, then a replacement Independent Certifier shall be chosen as follows:
 - (i) each Party shall, within five Business Days thereafter, select three suitably qualified and experienced replacements that would be acceptable to that Party, and shall provide Notice thereof to the other Party, with a ranking of preference for replacements;
 - (ii) if the Parties have both selected a common replacement, then such common replacement shall be the Independent Certifier, and if there is more than one common replacement, then the common replacement with the highest overall ranking (calculated by adding

together the ordinal rank assigned by the Parties) shall be selected, and in the event of a tie, the lowest-cost of such tied replacements shall be selected; and

- (iii) if the Parties have not selected a common replacement, then the determination of the new replacement may be referred for resolution in accordance with Schedule 27 – Dispute Resolution Procedure.

23. INTENTIONALLY DELETED

24. INTENTIONALLY DELETED

25. COMMISSIONING AND COMPLETION

25.1 Commissioning Activities

- (a) DB Co shall perform all,
 - (i) East DB Co Commissioning pursuant to the East Testing & Commissioning Plan;
 - (ii) West DB Co Commissioning pursuant to the West Testing & Commissioning Plan;
 - (iii) Highway DB Co Commissioning pursuant to the Highway Testing & Commissioning Plan; and
 - (iv) Remaining Works DB Co Commissioning pursuant to the Remaining Works Testing & Commissioning Plan.

25.2 Testing & Commissioning Program

- (a) [Not used]
- (b) The Testing & Commissioning Program shall, at a minimum:
 - (i) describe the requirements, and the timing and sequence of such requirements, necessary for, as applicable:
 - (A) the East DB Co Commissioning to achieve East Substantial Completion on or before the East Scheduled Substantial Completion Date, and East Final Completion on or before the East Scheduled Final Completion Date;
 - (B) the West DB Co Commissioning to achieve West Substantial Completion on or before the West Scheduled Substantial Completion Date, and West Final Completion on or before the West Scheduled Final Completion Date;
 - (C) the Highway DB Co Commissioning to achieve each Handover on or before the West Scheduled Substantial Completion Date; and
 - (D) the Remaining Works DB Co Commissioning to achieve completion of the Remaining Works on or before the West Final Completion Date,

as the case may be;

- (ii) comply with all requirements of the Schedule 14 – Testing & Commissioning;
 - (iii) include the names of the individuals or companies proposed to perform the applicable DB Co Commissioning;
 - (iv) include a schedule of each of the applicable DB Co Commissioning Tests proposed to be performed and the timeframe for completion, with start and end dates;
 - (v) include a schedule of meetings to be held between the Parties to coordinate the performance of the applicable DB Co Commissioning; and
 - (vi) list the approvals required from any Governmental Authority, manufacturer or other person that are necessary to meet the requirements of the Testing & Commissioning Program or Applicable Law.
- (c) The City shall provide DB Co with comments on each draft Testing & Commissioning Program in accordance with the procedures contemplated by Schedule 10 – Review Procedure, and DB Co shall revise each draft Testing & Commissioning Program to the extent contemplated by Schedule 10 – Review Procedure within 30 days after receipt of any comments from the City.

25.3 DB Co Commissioning

- (a) DB Co shall, in accordance with Schedule 14 – Testing & Commissioning, invite the Independent Certifier and the City Representative to witness, and to comment on, each aspect of each DB Co Commissioning and DB Co shall provide all information that the Independent Certifier and the City Representative may reasonably require in relation thereto, including:
- (i) tests proposed;
 - (ii) test methodology; and
 - (iii) expected test results.

25.4 Substantial Completion Certificate

- (a) DB Co shall give the Independent Certifier and the City Representative at least 10 Business Days' Notice prior to the date upon which DB Co anticipates delivering each of the East Substantial Completion Notice and West Substantial Completion Notice.
- (b) DB Co shall give the Independent Certifier and the City Representative Notice upon the satisfaction of all requirements for,
- (i) East Substantial Completion (the “**East Substantial Completion Notice**”), describing, in reasonable detail, the satisfaction of the requirements for East Substantial Completion, together with DB Co’s opinion as to whether the conditions for issuance of the East Substantial Completion Certificate have been satisfied; and

- (ii) West Substantial Completion (the “**West Substantial Completion Notice**”), describing, in reasonable detail, the satisfaction of the requirements for West Substantial Completion, together with DB Co’s opinion as to whether the conditions for issuance of the West Substantial Completion Certificate have been satisfied,

(each a “**Substantial Completion Notice**”).

- (c) For the purposes of determining each applicable Substantial Completion, and for the purposes of determining substantial performance in accordance with Section 2(2) of the CA, the Parties have agreed not to expeditiously complete any Remaining Works until after West Substantial Completion.

The Parties have agreed that the price of the services or materials to be supplied, and required, to complete any Remaining Works shall be deducted from the total Cost of Works in determining substantial performance. For greater certainty, completion of the Remaining Works shall be a requirement for achieving West Final Completion.

- (d) The City shall, within five Business Days after receipt of a,
 - (i) East Substantial Completion Notice, provide the Independent Certifier and DB Co with the City’s opinion as to whether the conditions for issuance of an East Substantial Completion Certificate has been satisfied and, if applicable, any reasons as to why they consider that the East Substantial Completion Certificate should not be issued; and
 - (ii) West Substantial Completion Notice, provide the Independent Certifier and DB Co with the City’s opinion as to whether the conditions for issuance of an West Substantial Completion Certificate has been satisfied and, if applicable, any reasons as to why they consider that the West Substantial Completion Certificate should not be issued.
- (e) Within five Business Days after DB Co’s receipt of the City’s opinion pursuant to Section 25.4(d), the Parties shall cause the Independent Certifier to determine whether the conditions for issuance of each Substantial Completion Certificate have been satisfied, having regard for the opinions of both DB Co and the City, to determine whether any Minor Deficiencies exist, and to issue to the City and to DB Co either:
 - (i) the relevant Substantial Completion Certificate confirming the date of issue as the Substantial Completion Date and setting out the Minor Deficiencies List (if applicable) in accordance with Section 25.10; or
 - (ii) a report detailing the matters that the Independent Certifier considers are required to be performed by DB Co to satisfy the conditions for issuance of a Substantial Completion Certificate.
- (f) Where the Independent Certifier has issued a report in accordance with Section 25.4(e)(ii) and DB Co has not referred a Dispute in relation thereto for resolution in accordance with Schedule 27 – Dispute Resolution Procedure, DB Co shall, within 5 Business Days after receipt of such report, provide the Independent Certifier and the City Representative with:
 - (i) a detailed list indicating the rectification actions proposed for all matters raised in such report;

- (ii) the schedule for completion of all such rectification actions; and
- (iii) any additional DB Co Commissioning that needs to be undertaken as a result of the rectification actions,

and DB Co shall perform all such additional rectification actions and DB Co Commissioning in a timely manner. Upon completion thereof, DB Co may give a further Substantial Completion Notice and Sections 25.4(c) to (f), inclusive, shall be repeated until the relevant Substantial Completion Certificate has been issued.

- (g) The Independent Certifier's decision to issue or not to issue a Substantial Completion Certificate shall be final and binding on the Parties solely in respect of determining the applicable Substantial Completion Payment Date, and a Dispute in relation to such Substantial Completion Payment Date shall not be subject to resolution pursuant to the Dispute Resolution Procedure, provided, however, that any other Dispute in relation to the Independent Certifier's decision to issue or not to issue the Substantial Completion Certificate may be referred for resolution pursuant to the Schedule 27 – Dispute Resolution Procedure.
- (h) In respect of the East Works, DB Co shall provide As-Built Drawings, Record Drawings and specifications, Design Data and Shop Drawings as soon as possible and in any event no later than 60 days after the East Substantial Completion Date.
- (i) In respect of the West Works other than Highway Works, DB Co shall provide As-Built Drawings, Record Drawings and specifications, Design Data and Shop Drawings as soon as possible and in any event no later than 60 days after the West Substantial Completion Date.
- (j) In respect of the Highway Works, DB Co shall provide As-Built Drawings, Record Drawings and specifications, Design Data and Shop Drawings as soon as possible and in any event no later than 60 days after the applicable Handover.

25.5 Countdown Notices, Failure to Achieve Substantial Completion and Liquidated Damages

- (a) DB Co shall deliver a Notice (each, a “**Initial Countdown Notice**”) to the City and the Independent Certifier specifying the date on which DB Co anticipates that,
 - (i) East Substantial Completion will be achieved (the “**East Anticipated Substantial Completion Date**”, such Countdown Notice, an “**East Initial Countdown Notice**”); and
 - (ii) West Substantial Completion will be achieved (the “**West Anticipated Substantial Completion Date**”, such Countdown Notice, a “**West Initial Countdown Notice**”).

An Initial Countdown Notice shall be delivered not less than 180 days prior to the applicable Anticipated Substantial Completion Date.

- (b) In accordance with Section 7 of Schedule 12 – Works Schedule Requirements, the:
 - (i) East Anticipated Substantial Completion Date shall not be earlier than the East Scheduled Substantial Completion Date; and

- (ii) West Anticipated Substantial Completion Date shall not be earlier than the West Scheduled Substantial Completion Date,

without the prior written consent of the City, in its sole discretion.
- (c) [Not used]
- (d) In the event that DB Co has not delivered an East Initial Countdown Notice to the City in accordance with the requirements of Section 25.5(a), then DB Co shall,
 - (i) within 3 Business Days after the date that the East Initial Countdown Notice was to have been delivered to the City, pay to the City the sum of \$[REDACTED] as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure to deliver the East Initial Countdown Notice in a timely manner; and
 - (ii) pay to the City the additional sum of \$[REDACTED] per calendar day as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure to deliver such Notice for each day after the date that the East Initial Countdown Notice was to have been delivered to the City in accordance with the requirements of Section 25.5(a), until and including the date such Notice is delivered.
- (e) In the event that DB Co has not provided a West Initial Countdown Notice to the City in accordance with the requirements of Section 25.5(a), then DB Co shall,
 - (i) within 3 Business Days after the date that the West Initial Countdown Notice was to have been delivered to the City, pay to the City the sum of \$[REDACTED] as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure to deliver the West Initial Countdown Notice in a timely manner; and
 - (ii) pay to the City the additional sum of \$[REDACTED] per calendar day as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure to deliver such Notice for each day after the date that the West Initial Countdown Notice was to have been delivered to the City in accordance with the requirements of Section 25.5(a) until and including the date such Notice is delivered.
- (f) [Not used]
- (g) If an East Initial Countdown Notice has been delivered to the City and DB Co subsequently determines that East Substantial Completion will not be achieved on or before the East Anticipated Substantial Completion Date established by such East Initial Countdown Notice, DB Co shall:
 - (i) forthwith issue a subsequent Notice (an "**East Subsequent Notice**") to the City establishing a revised date by which DB Co expects to achieve East Substantial Completion (the "**East Revised Substantial Completion Date**"), which East Revised Substantial Completion Date shall be no earlier than,
 - (A) the East Anticipated Substantial Completion Date established by the East Initial Countdown Notice, and

- (B) 15 days after the delivery of such East Subsequent Notice;
- (ii) pay to the City, as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure to achieve East Substantial Completion by the East Anticipated Substantial Completion Date established as aforesaid, the following amount:
 - (A) if the East Subsequent Notice is delivered between 1 and 29 days after the delivery of the East Initial Countdown Notice, the sum of \$[REDACTED];
 - (B) if the East Subsequent Notice is delivered between 30 and 59 days after the delivery of the East Initial Countdown Notice, the sum of \$[REDACTED];
 - (C) if the East Subsequent Notice is delivered between 60 and 89 days after the delivery of the East Initial Countdown Notice, the sum of \$[REDACTED];
 - (D) if the East Subsequent Notice is delivered between 90 and 119 days after the delivery of the East Initial Countdown Notice, the sum of \$[REDACTED];
 - (E) if the East Subsequent Notice is delivered between 120 and 149 days after the delivery of the East Initial Countdown Notice, the sum of \$[REDACTED]; or
 - (F) if the East Subsequent Notice is delivered later than 149 days after the delivery of the East Initial Countdown Notice, the sum of \$[REDACTED].
- (h) If a West Initial Countdown Notice has been delivered to the City and DB Co subsequently determines that West Substantial Completion will not be achieved on or before the West Anticipated Substantial Completion Date established by such West Initial Countdown Notice, DB Co shall:
 - (i) forthwith issue a subsequent Notice (a "**West Subsequent Notice**") to the City establishing a revised date by which DB Co expects to achieve West Substantial Completion (the "**West Revised Substantial Completion Date**"), which West Revised Substantial Completion Date shall be no earlier than,
 - (A) the West Anticipated Substantial Completion Date established by the West Initial Countdown Notice, and
 - (B) 15 days after the delivery of such West Subsequent Notice;
 - (ii) pay to the City, as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co's failure to achieve West Substantial Completion by the West Anticipated Substantial Completion Date established as aforesaid, the following amount:
 - (A) if the West Subsequent Notice is delivered between 1 and 29 days after the delivery of the West Initial Countdown Notice, the sum of \$[REDACTED];
 - (B) if the West Subsequent Notice is delivered between 30 and 59 days after the delivery of the West Initial Countdown Notice, the sum of \$[REDACTED];

- (C) if the West Subsequent Notice is delivered between 60 and 89 days after the delivery of the West Initial Countdown Notice, the sum of \$[REDACTED];
 - (D) if the West Subsequent Notice is delivered between 90 and 119 days after the delivery of the West Initial Countdown Notice, the sum of \$[REDACTED];
 - (E) if the West Subsequent Notice is delivered between 120 and 149 days after the delivery of the West Initial Countdown Notice, the sum of \$[REDACTED]; or
 - (F) if the West Subsequent Notice is delivered later than 149 days after the delivery of the West Initial Countdown Notice, the sum of \$[REDACTED].
- (i) [Not used]
- (j) In the event that DB Co fails to achieve East Substantial Completion by the East Anticipated Substantial Completion Date without having delivered to the City an East Subsequent Notice, or in the event that DB Co has delivered to the City an East Subsequent Notice establishing an East Revised Substantial Completion Date and DB Co fails to achieve East Substantial Completion by such East Revised Substantial Completion Date, without having delivered a further East Subsequent Notice, in either case, DB Co shall:
- (i) forthwith issue an East Subsequent Notice to the City establishing a further revised date by which DB Co expects to achieve East Substantial Completion (the “**East Further Revised Substantial Completion Date**”), which East Further Revised Substantial Completion Date shall be no earlier than 15 days after the delivery of such East Subsequent Notice;
 - (ii) within 3 Business Days after the East Anticipated Substantial Completion Date or the East Revised Substantial Completion Date, as the case may be, pay to the City the amount of \$[REDACTED] as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co’s failure to achieve East Substantial Completion and deliver notice thereof in a timely manner;
 - (iii) if the East Subsequent Notice in subparagraph 25.5(j)(i) has not been delivered by DB Co, pay to the City the additional sum of \$[REDACTED] per calendar day for each day after the East Anticipated Substantial Completion Date or the East Revised Substantial Completion Date, as the case may be, that such East Subsequent Notice in respect of the East Further Revised Substantial Completion Date has not been delivered to the City, as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co’s failure to deliver such notice.
- (k) In the event that DB Co fails to achieve West Substantial Completion by the West Anticipated Substantial Completion Date without having delivered to the City a West Subsequent Notice, or in the event that DB Co has delivered to the City a West Subsequent Notice establishing a West Revised Substantial Completion Date and DB Co fails to achieve West Substantial Completion by such West Revised Substantial Completion Date, without having delivered a further West Subsequent Notice, in either case, DB Co shall:

- (i) forthwith issue a West Subsequent Notice to the City establishing a further revised date by which DB Co expects to achieve West Substantial Completion (the “**West Further Revised Substantial Completion Date**”), which West Further Revised Substantial Completion Date shall be no earlier than 15 days after the delivery of such West Subsequent Notice;
 - (ii) within 3 Business Days after the West Anticipated Substantial Completion Date or the West Revised Substantial Completion Date, as the case may be, pay to the City the amount of \$[REDACTED] as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co’s failure to achieve West Substantial Completion and deliver notice thereof in a timely manner;
 - (iii) if the West Subsequent Notice in subparagraph 25.5(k)(j)(i) has not been delivered by DB Co, pay to the City the additional sum of \$[REDACTED] per calendar day for each day after the West Anticipated Substantial Completion Date or the West Revised Substantial Completion Date, as the case may be, that such West Subsequent Notice in respect of the West Further Revised Substantial Completion Date has not been delivered to the City, as liquidated damages in respect of damages suffered and costs incurred by the City related to DB Co’s failure to deliver such notice.
- (l) Notwithstanding the forgoing provisions of this Section 25.5, provided DB Co has complied with, and exercised all commercially reasonable efforts to enforce, the scheduling and completion provisions in the Nominated Signalling Subcontract, liquidated damages shall not accrue under this Section 25.5 with respect to any failure to achieve Substantial Completion by the Anticipated Substantial Completion Date or Revised Substantial Completion Date, as the case may be, that is caused solely by the failure of the Nominated Signalling Subcontractor to perform the Nominated Signalling Subcontractor Works in accordance with the Works Schedules to the extent such failure delays the Critical Path.
- (m) The Parties agree that the liquidated damages set out in this Section 25.5 are not a penalty but represent a genuine and reasonable pre-estimate of the damages that will be suffered by the City related to DB Co’s failure to comply with and observe the provisions of this Section 25.5.
- (n) DB Co acknowledges and agrees that all liquidated damages set out in this Section 25.5 shall be payable whether or not the City incurs or mitigates these damages, and that the City shall have no obligation to mitigate these damages. DB Co further agrees that it is, and shall be, estopped from alleging that any liquidated damages set out in this Section 25.5 are a penalty and not liquidated damages, or are otherwise unenforceable for any reason, including that such damages were not incurred.
- (o) Subject to Section 25.5(p), unless otherwise specified herein, liquidated damages that accrue under this Section 25.5 shall become due and payable from time to time upon the City giving Notice to DB Co. Any such Notice shall specify the amount of liquidated damages that have accrued and are payable by DB Co to the City as of the date of such Notice. If such liquidated damages are not paid by DB Co within 10 Business Days from the date of such Notice, the City may recover any such liquidated damages due by DB Co by setting off such amounts from any amounts due or owing by the City to DB Co hereunder, or by drawing down the corresponding amount from any outstanding letters of credit, as applicable, in each case as required by the City, acting in its discretion. Failure by the City to provide a Notice to DB Co under this Section

25.5(o) shall not constitute a waiver of the City's right to claim, or otherwise release DB Co from liability for, all liquidated damages under this Section 25.5 at any time.

- (p) In the event that there is a Dispute concerning Substantial Completion and such Dispute is ongoing, the City shall not be entitled to payment of related liquidated damages pursuant to this Section 25.5 unless and until such Dispute is resolved in accordance with the Dispute Resolution Procedure outlined in Schedule 27 – Dispute Resolution Procedure and, if resolved in favour of the City, the provisions respecting liquidated damages contained in this Section 25.5 shall apply with retroactive effect, except that there shall be added to the amount payable by DB Co on account of liquidated damages, interest at the rate of [REDACTED] percent per annum from the date the liquidated damages were required to be paid in the absence of the Dispute to the date of payment.

25.6 Operations & Maintenance Manuals

- (a) DB Co shall prepare and deliver to the City draft copies of all necessary operations & maintenance manuals for the New City Infrastructure and the New MTO Infrastructure in the format set out in the Output Specifications no later than 6 months prior to each of the East Substantial Completion Date and West Substantial Completion Date, as applicable.

25.7 Maintenance Instructions

- (a) No later than 30 days prior to each Substantial Completion Date, DB Co shall prepare and deliver to the City maintenance data in the format set out in the Output Specifications which is compatible with the City's computerized maintenance management system (CMMS). The maintenance data shall detail all required planned activities for the applicable portion of the Works prescribed by the applicable operation and maintenance manuals and Good Industry Practice, including:
 - (i) structural inspection procedures, identifying all components of the Works to be inspected on a regular basis and the recommended frequency of such inspections; and
 - (ii) preventative maintenance activities.
- (b) The provided maintenance data shall be subject to the review and approval of the City, acting reasonably. Following the City's approval of such maintenance data, the City shall upload it into the CMMS.

25.8 [Intentionally Deleted]

25.9 [Intentionally Deleted]

25.10 Minor Deficiencies

- (a) In the event that any Minor Deficiencies exist when DB Co gives an East Substantial Completion Notice, the Independent Certifier, in consultation with DB Co and the City, shall prepare a list of all Minor Deficiencies (the "**East Minor Deficiencies List**") in respect of the East Works (such Minor Deficiencies, the "**East Minor Deficiencies**") identified at that time and an estimate of the cost for the City and the time for DB Co, to complete and rectify such East Minor Deficiencies. The City may withhold from the East Substantial Completion Payment a holdback amount that is

[REDACTED]% of the amount estimated by the Independent Certifier for the City, to complete and rectify all such East Minor Deficiencies identified on the East Minor Deficiencies List (the “**East Completion Holdback**”), which holdback shall be held in an interest bearing account.

- (b) In the event that any Minor Deficiencies exist when DB Co gives a West Substantial Completion Notice, the Independent Certifier, in consultation with DB Co and the City, shall prepare a list of all Minor Deficiencies (the “**West Minor Deficiencies List**”) in respect of the West Works (such Minor Deficiencies, the “**West Minor Deficiencies**”) identified at that time and an estimate of the cost for the City and the time for DB Co, to complete and rectify such West Minor Deficiencies. The City may withhold from the West Substantial Completion Payment a holdback amount that is [REDACTED]% of the amount estimated by the Independent Certifier for the City, to complete and rectify all such West Minor Deficiencies identified on the West Minor Deficiencies List (the “**West Completion Holdback**”), which holdback shall be held in an interest bearing account.
- (c) [Not used]
- (d) Each Minor Deficiencies List will contain the schedule for the completion and rectification of the relevant Minor Deficiencies. In determining the relevant time for rectifying such Minor Deficiencies, DB Co shall schedule the completion and rectification of Minor Deficiencies so as to,
 - (i) comply with the Traffic and Transit Management Plan, the Construction Access Management Plan and all rules, requirements and restrictions relating to access, rail safety and operations and track protection, and road safety and operations, as set out in Schedule 15 – Output Specifications; and
 - (ii) minimize, to the greatest extent reasonably possible,
 - (A) any disruption of the Works or restrictions or other impairment of the public’s use and enjoyment of the New City Infrastructure, the New MTO Infrastructure, the Existing Infrastructure, the Stage 1 Connection Infrastructure, or any portion thereof; and
 - (B) any disruption of the operations of the City, any City Party, any Governmental Authority, any Other Contractor, RTG and RTG Parties, including the performance of the Governmental Activities, the Other Works, and RTG Works.
- (e) The Independent Certifier must prepare the East Minor Deficiencies List in relation to the East Substantial Completion Notice as soon as reasonably practicable, and, in any event, before the East Substantial Completion Certificate is issued, but shall not withhold the East Substantial Completion Certificate by reason solely that there are East Minor Deficiencies.
- (f) The Independent Certifier must prepare the West Minor Deficiencies List in relation to the West Substantial Completion Notice as soon as reasonably practicable, and, in any event, before the West Substantial Completion Certificate is issued, but shall not withhold the West Substantial Completion Certificate by reason solely that there are West Minor Deficiencies.
- (g) [Not used]

- (h) No later than 20 Business Days prior to the Anticipated Final Completion Date, the City may direct the Independent Certifier to amend, in consultation with DB Co and the City, a Minor Deficiencies List to include a list of any and all Minor Deficiencies that were identified after the preparation of, or not included in, a Minor Deficiencies List pursuant to Section 25.10(a) to 25.10(b). The Independent Certifier shall prepare the amended Minor Deficiencies List as soon as reasonably practicable and, in any event, within 10 Business Days after such direction given by the City. The amended Minor Deficiencies List shall, following its preparation, be deemed to be the Minor Deficiencies List for the purposes of this Project Agreement, including, without limitation, for the purposes of Sections 25.10 to 25.11 inclusive. For clarity, the amount of the East Completion Holdback or West Completion Holdback, as the case may be, shall not be affected by an amended Minor Deficiencies List.
- (i) Where the Independent Certifier has been directed by the City to amend a Minor Deficiencies List pursuant to Section 25.10(e) to 25.10(f), the Independent Certifier shall specify a commercially reasonable completion and rectification time for any newly added Minor Deficiencies.
- (j) The City may, in its sole discretion, waive any requirement for East Substantial Completion or West Substantial Completion, as the case may be, and the failure to meet any such requirement shall constitute a Minor Deficiency.
- (k) As an alternative to and in substitution for the withholding permitted by each of Sections 25.10(a) and 25.10(b), DB Co may, on or prior to the date on which each relevant Substantial Completion Payment is to be made to DB Co, provide a bond or letter of credit in favour of the City in an amount equal to the relevant Completion Holdback, in a form and from a surety or bank, as applicable, acceptable to the City, which letter of credit will be returned by the City to DB Co on the date that the relevant Completion Holdback would otherwise have been finally released to DB Co by the City. The City shall be entitled to draw against such letters of credit any such amounts as would otherwise be deducted from the applicable Completion Holdback in accordance with Section 25.12(a).
- (l) The Independent Certifier, in consultation with DB Co and the City, shall prepare a list of all Minor Deficiencies Nominated Signalling Subcontractor Works and an estimate of the cost for the City and the time for DB Co, to complete and rectify such Minor Deficiencies Nominated Signalling Subcontractor Works and such Minor Deficiencies Nominated Signalling Subcontractor Works shall be managed in accordance with the Nominated Signalling Subcontract.

25.11 Completion and Rectification of Minor Deficiencies

- (a) DB Co shall, in consultation with the City Representative and so as to,
 - (i) comply with the Traffic and Transit Management Plan, the Construction Access Management Plan and all rules, requirements and restrictions relating to access, rail safety and operations and track protection, and road safety and operations, as set out in Schedule 15 – Output Specifications; and
 - (ii) minimize, to the greatest extent reasonably possible,

- (A) any disruption of the Works or restrictions or other impairment of the public's use and enjoyment of the New City Infrastructure, the New MTO Infrastructure, or any portion thereof; and
- (B) any disruption of the operations of the City, any City Party, any Governmental Authority, any Other Contractor, RTG and RTG Parties, including the performance of the Governmental Activities, the Other Works, and RTG Works,

complete and rectify all Minor Deficiencies:

- (iii) within 120 days after the issuance of a Minor Deficiencies List pursuant to Section 25.10 for all Minor Deficiencies where no time for completion and rectification has been specified by the Independent Certifier; or
 - (iv) within the time for completion and rectification of a Minor Deficiency where such a time was specified by the Independent Certifier in the Minor Deficiencies List.
- (b) DB Co acknowledges and agrees that the completion and rectification of Minor Deficiencies may require work outside of normal working hours in order to accommodate the efficient operation of the New City Infrastructure, the New MTO Infrastructure, the Existing Infrastructure, the Stage 1 Connection Infrastructure, or any portion thereof and to ensure compliance with the Construction Access Management Plan, the Traffic and Transit Management Plan and all rules, requirements and restrictions relating to access, rail safety and operations and track protection, and road safety and operations, as set out in Schedule 15 – Output Specifications.
 - (c) Upon completion and rectification of East Minor Deficiencies, as confirmed by the Independent Certifier in consultation with the City and DB Co for each calendar month after East Substantial Completion (including the month in which East Substantial Completion is achieved) until completion of all East Minor Deficiencies, the City shall release the amount of the East Completion Holdback related to such completed and rectified East Minor Deficiencies during such calendar month, within 5 Business Days of the conclusion of such calendar month. Notwithstanding the forgoing, payment of the final remaining amount of the East Completion Holdback shall be governed by Section 25.11(d).
 - (d) After the completion and rectification of all East Minor Deficiencies, as confirmed by the Independent Certifier in consultation with the City and DB Co:
 - (i) DB Co shall submit to the City the following documentation,
 - (A) DB Co's written request for the release of the remaining amount of East Completion Holdback, including a declaration that no written notice of lien arising in relation to the performance of the East Works has been received by it that has not been withdrawn by the lien claimant, or otherwise duly released, discharged or vacated in accordance with the CA;
 - (B) DB Co's Statutory Declaration CCDC 9A(2001); and
 - (C) DB Co's WSIB Certificate of Clearance; and

- (ii) Within two Business Days of DB Co submitting such documentation, the City shall release to DB Co the remaining amount of the East Completion Holdback (less any amounts deducted in accordance with Section 25.12(a), together with all interest accrued thereon and applicable HST). Where the City exercises its rights pursuant to 25.12(a), if the cost of such completion and rectification exceeds the amount of the East Completion Holdback and interest, then DB Co shall reimburse the City for all such excess cost.
- (e) Upon completion and rectification of West Minor Deficiencies, as confirmed by the Independent Certifier in consultation with the City and DB Co for each calendar month after West Substantial Completion (including the month in which West Substantial Completion is achieved) until completion of all West Minor Deficiencies, the City shall release the amount of the West Completion Holdback related to such completed and rectified West Minor Deficiencies during such calendar month, within 5 Business Days of the conclusion of such calendar month. Notwithstanding the forgoing, payment of the final remaining amount of the West Completion Holdback shall be governed by Section 25.11(f).
- (f) After the completion and rectification of all West Minor Deficiencies, as confirmed by the Independent Certifier in consultation with the City and DB Co:
 - (i) DB Co shall submit to the City the following documentation,
 - (A) DB Co's written request for the release of the remaining amount of West Completion Holdback, including a declaration that no written notice of lien arising in relation to the performance of the West Works has been received by it that has not been withdrawn by the lien claimant or otherwise duly released, discharged or vacated in accordance with the CA;
 - (B) DB Co's Statutory Declaration CCDC 9A(2001); and
 - (C) DB Co's WSIB Certificate of Clearance; and
 - (ii) Within two Business Days of DB Co submitting such documentation, the City shall release to DB Co the remaining amount of the West Completion Holdback (less any amounts deducted in accordance with Section 25.12(a), together with all interest accrued thereon and applicable HST). Where the City exercises its rights pursuant to 25.12(a), if the cost of such completion and rectification exceeds the amount of the West Completion Holdback and interest, then DB Co shall reimburse the City for all such excess cost.
- (g) [Not used]
- (h) [Not used]

25.12 Failure to Rectify Minor Deficiencies

- (a) If DB Co fails to complete and rectify any Minor Deficiency within the time for its completion and rectification specified in Section 25.11, the City may engage others to perform the work necessary to complete and rectify such Minor Deficiency at the risk and cost of DB Co, and the City may deduct such cost,

- (i) in respect of an East Minor Deficiency, from the East Completion Holdback and interest accrued thereon; and
- (ii) in respect of a West Minor Deficiency, from the West Completion Holdback and interest accrued thereon.

25.12A Remaining Works Minor Deficiencies

- (a) DB Co shall request the Independent Certifier to prepare a list of all Remaining Works Minor Deficiencies (the “**Remaining Works Minor Deficiencies List**”) by delivery of a written request (the “**Remaining Works Minor Deficiency Inspection Request**”) to the Independent Certifier. The Remaining Works Minor Deficiency Inspection Request shall be delivered not less than 60 days prior to the West Anticipated Final Completion Date. The Independent Certifier, in consultation with DB Co and the City, shall, within 10 Business Days of DB Co’s delivery of the Remaining Works Minor Deficiency Inspection Request prepare the Remaining Works Minor Deficiencies List which shall include an estimate of the time for completing and rectifying all Remaining Works Minor Deficiencies.
- (b) The Remaining Works Minor Deficiencies List will contain the schedule for the completion and rectification of all relevant Remaining Works Minor Deficiencies. In determining the relevant time for rectifying Minor Deficiencies, DB Co shall schedule the completion and rectification of any Remaining Works Minor Deficiencies so as to:
 - (i) comply with the Traffic and Transit Management Plan, the Construction Access Management Plan and all rules, requirements and restrictions relating to access, rail safety and operations and track protection, and road safety and operations, as set out in Schedule 15 – Output Specifications; and
 - (ii) minimize, to the greatest extent reasonably possible,
 - (A) any disruption of the applicable Works or restrictions or other impairment of the public’s use and enjoyment of the New City Infrastructure, the New MTO Infrastructure, the Existing Infrastructure, or any portion thereof; and
 - (B) any disruption of the operations of the City, any City Party, any Governmental Authority, any Other Contractor, RTG and RTG Parties, including the performance of the Governmental Activities, the Other Works, and RTG Works.

25.12B Rectification of Remaining Works Minor Deficiencies

- (a) DB Co shall, in consultation with the City Representative and so as to,
 - (i) comply with the Traffic and Transit Management Plan, the Construction Access Management Plan and all rules, requirements and restrictions relating to access, rail safety and operations and track protection, and road safety and operations, as set out in Schedule 15 – Output Specifications; and
 - (ii) minimize, to the greatest extent reasonably possible,

- (A) any disruption of the Works or restrictions or other impairment of the public's use and enjoyment of the New City Infrastructure, the New MTO Infrastructure, or any portion thereof; and
- (B) any disruption of the operations of the City, any City Party, any Governmental Authority, any Other Contractor, RTG and RTG Parties, including the performance of the Governmental Activities, the Other Works, and RTG Works,

complete and rectify all Remaining Works Minor Deficiencies within 60 days after the issuance of a Remaining Works Minor Deficiencies List or such other period as the Independent Certifier may specify in such Remaining Works Minor Deficiencies List, and in any event by no later than the West Scheduled Final Completion Date.

- (b) DB Co acknowledges and agrees that the completion and rectification of any Remaining Works Minor Deficiencies may require work outside of normal working hours in order to accommodate the efficient operation of the New City Infrastructure, the New MTO Infrastructure, the Existing Infrastructure or any portion thereof and to ensure compliance with the Construction Access Management Plan, the Traffic and Transit Management Plan and all rules, requirements and restrictions relating to access, rail safety and operations and track protection, and road safety and operations, as set out in Schedule 15 – Output Specifications.

25.13 Final Completion Countdown Notice

- (a) DB Co shall deliver a Notice (each, a “**Final Completion Countdown Notice**”), to the City and the Independent Certifier specifying the:
 - (i) East Anticipated Final Completion Date (the “**East Final Completion Countdown Notice**”); and
 - (ii) West Anticipated Final Completion Date (the “**West Final Completion Countdown Notice**”).
- (b) Each Final Completion Countdown Notice shall be delivered not less than 60 days prior to the relevant Anticipated Final Completion Date pursuant to Section 25.13(a) above. For clarity, if DB Co fails to deliver the,
 - (i) East Final Completion Countdown Notice not less than 60 days prior to the East Scheduled Final Completion Date, the East Anticipated Final Completion Date shall be deemed to be the same date as the East Scheduled Final Completion Date; and
 - (ii) West Final Completion Countdown Notice not less than 60 days prior to the West Scheduled Final Completion Date, the West Anticipated Final Completion Date shall be deemed to be the same date as the West Scheduled Final Completion Date.

25.14 Final Completion Certificate

- (a) DB Co shall give the Independent Certifier and the City Representative at least 10 Business Days' Notice prior to the date upon which DB Co anticipates delivering a Final Completion Notice.

- (b) DB Co shall give the Independent Certifier and the City Representative Notice (the “**East Final Completion Notice**”) upon the satisfaction of all requirements for East Final Completion, which East Final Completion Notice shall describe, in reasonable detail, the satisfaction of the requirements for East Final Completion, including the completion and rectification of all Minor Deficiencies, together with DB Co’s opinion as to whether the conditions for issuance of the East Final Completion Certificate have been satisfied.
- (c) DB Co shall give the Independent Certifier and the City Representative Notice (the “**West Final Completion Notice**”) upon the satisfaction of all requirements for West Final Completion, which West Final Completion Notice shall describe, in reasonable detail, the satisfaction of the requirements for West Final Completion, including the completion and rectification of all Minor Deficiencies, together with DB Co’s opinion as to whether the conditions for issuance of the West Final Completion Certificate have been satisfied.
- (d) [Not used]
- (e) Each Final Completion Notice shall also include the following documentation:
 - (i) a declaration that no written notice of lien arising in relation to the performance of the applicable Works has been received by it that has not been withdrawn by the lien claimant or otherwise duly released, discharged or vacated in accordance with the CA;
 - (ii) DB Co’s Statutory Declaration CCDC 9A (2001);
 - (iii) DB Co’s WSIB Certificate of Clearance;
 - (iv) a written statement that the applicable Works have been performed to the requirements of the Ancillary Documents, itemizing approved changes in such Works, the Independent Certifier’s written instructions, and modifications required by Governmental Authorities; and
 - (v) a written description of the correction of Minor Deficiencies and, for the West Final Completion Notice, Remaining Works Minor Deficiencies, that are seasonal in nature and cannot be completed prior to the applicable Final Completion Date, if any, and the time for completion of such work as agreed between the City and DB Co, each acting reasonably.
- (f) The City shall, within five Business Days after receipt of a Final Completion Notice, provide the Independent Certifier and DB Co with the City’s opinion as to whether the conditions for issuance of a Final Completion Certificate have been satisfied and, if applicable, any reasons as to why they consider that the Final Completion Certificate should not be issued.
- (g) Within five Business Days after DB Co’s receipt of the City’s opinion pursuant to Section 25.14(f), the Parties shall cause the Independent Certifier to determine whether the conditions for issuance of a Final Completion Certificate have been satisfied, having regard for the opinions of both DB Co and the City, and to issue to the City and to DB Co either:
 - (i) such Final Completion Certificate confirming the date of issue as a Final Completion Date; or

- (ii) a report detailing the matters that the Independent Certifier considers are required to be performed by DB Co to satisfy the conditions for issuance of a Final Completion Certificate, including any items on the Minor Deficiencies List and, in respect of West Final Completion, items on the Remaining Works Minor Deficiencies List, which remain outstanding.
- (h) Where the Independent Certifier has issued a report in accordance with Section 25.14(g)(ii) and DB Co has not referred a Dispute in relation thereto for resolution in accordance with Schedule 27 – Dispute Resolution Procedure, DB Co shall, within five Business Days after receipt of such report, provide the Independent Certifier and the City Representative with:
 - (i) a detailed list indicating the rectification actions proposed for all matters raised in such report;
 - (ii) the schedule for completion of all such rectification actions; and
 - (iii) any additional DB Co Commissioning that needs to be undertaken as a result of the rectification actions,and DB Co shall perform all such additional rectification actions and DB Co Commissioning in a timely manner. Upon completion thereof, DB Co may give a further Final Completion Notice and Sections 25.14(f) to 25.14(h), inclusive, shall be repeated until a Final Completion Certificate has been issued.
- (i) Any Dispute in relation to the Independent Certifier's decision to issue or not to issue a Final Completion Certificate may be referred for resolution in accordance with Schedule 27 – Dispute Resolution Procedure.

25.15 Effect of Certificates/Use

- (a) The issue of a Substantial Completion Certificate or Final Completion Certificate, the commencement of use by the City or the public of any part of the New City Infrastructure or New MTO Infrastructure under the terms of this Project Agreement or the commencement of any Governmental Activities, shall, in no way:
 - (i) limit the obligations of DB Co under this Project Agreement including in respect of any defects, deficiencies or items of outstanding work existing or discovered prior to or after the date of any of such certificates or the date of the Minor Deficiencies List or of the amended Minor Deficiencies List described in Section 25.10(e) to 25.10(h); or
 - (ii) be construed as an approval by the City of the Works or the way in which they have been carried out.

25.16 Inspection, Commissioning and Handover of New MTO Infrastructure

- (a) DB Co acknowledges and agrees that New MTO Infrastructure will be inspected, commissioned and handed over to the MTO on a component by component basis and from time to time during the Construction Period.

- (b) For the purposes of this Section 25.16, the City may delegate the responsibility for carrying out interim inspections, final inspections, warranty inspections, and commissioning and Handover activities, on behalf of the City, to MTO, in respect of the New MTO Infrastructure by providing Notice to DB Co of any such delegation (any such notice referred to as a “**Notice of Delegation**”), and the City may, in its sole discretion, and at any time revise such delegation by Notice to DB Co. For clarity, the City may delegate the foregoing responsibility in respect of all or any component of any New MTO Infrastructure. DB Co acknowledges and agrees that, for the purposes of this Section 25.16, DB Co shall Handover all New MTO Infrastructure directly to the City unless the City has delivered to DB Co a Notice of Delegation in respect of New MTO Infrastructure, in which case, DB Co shall Handover such New MTO Infrastructure directly to MTO.
- (c) No later than 5 days prior to the anticipated completion of New MTO Infrastructure, DB Co shall provide Notice to the City or, where a Notice of Delegation has been provided to DB Co, DB Co shall provide Notice to MTO, of the date on which the New MTO Infrastructure will be completed and ready for inspection and testing. DB Co and the City, or DB Co and MTO (where a Notice of Delegation has been provided) shall carry out a joint inspection of such New MTO Infrastructure. Such joint inspection shall occur no later than 90 days after the date of completion of the New MTO Infrastructure. The inspection and testing of New MTO Infrastructure pursuant to this Section 25.16(c) shall follow the inspection and testing requirements set out in the Inspection and Test Plan. Such inspection, shall be for the purposes of:
 - (i) assessing whether the New MTO Infrastructure has been constructed in accordance with the Output Specifications and is otherwise in compliance with the requirements in the Project Agreement; and
 - (ii) identifying any defects or deficiencies to the New MTO Infrastructure that DB Co must correct, repair or restore before DB Co completes the commissioning of the New MTO Infrastructure before the Handover of the New MTO Infrastructure.
- (d) Prior to final inspection of New MTO Infrastructure, DB Co shall:
 - (i) prepare a record of the following, and submit it to the City for review in accordance with Schedule 10 – Review Procedure at least 30 Business Days before the final inspection:
 - (A) a list of the New MTO Infrastructure to be inspected;
 - (B) the tests, inspection methods and procedures to be used and performed and the standards that apply in respect of tests, inspection methods and procedures, which test and inspection shall follow the inspection and testing requirements set out in the Inspection and Test Plan;
 - (C) the scheduled date for testing and inspection of the applicable New MTO Infrastructure;
 - (D) a list of the names and employers of persons to represent DB Co and the City or, if a Notice of Delegation has been issued in respect of the relevant New MTO Infrastructure, a list of the names and employers of persons to represent DB Co and MTO, as the case may be, at the inspection; and

- (E) a list of existing systems that may be impacted by the tests and inspection.
- (ii) Ensure that:
 - (A) all defects and deficiencies that have been identified by the City or MTO, as applicable, during any interim inspections, have been rectified; and
 - (B) any damage to New MTO Infrastructure is repaired by DB Co in accordance with this Project Agreement.
- (e) DB Co shall prepare a record of each inspection carried out pursuant to Section 25.16(c) in inspection report format including: (i) a list of defects or deficiencies to New MTO Infrastructure identified during the inspection; and (ii) actions to be taken by DB Co to correct each defect or deficiency and to rectify the damage. DB Co shall submit the inspection reports to the City within three Business Days of each inspection for review in accordance with Schedule 10 – Review Procedure.
- (f) After the inspection of the New MTO Infrastructure pursuant to Section 25.16(c), DB Co shall make all arrangements in respect of the applicable New MTO Infrastructure to:
 - (i) correct all defects and deficiencies to the applicable New MTO Infrastructure and repair any damage to the applicable New MTO Infrastructure;
 - (ii) complete commissioning of the applicable New MTO Infrastructure in accordance with Schedule 14 – Testing & Commissioning;
 - (iii) comply with all requirements in respect of New MTO Infrastructure (set out in Schedule 14 – Testing & Commissioning) prior to, and as a pre-condition of Handover of New MTO Infrastructure;
 - (iv) complete Handover of the New MTO Infrastructure to the City or, where the City has delivered to DB Co a Notice of Delegation in respect of New MTO Infrastructure, complete Handover to MTO; and
 - (v) seek, receive, and document confirmation from the City or, where the City has delivered to DB Co a Notice of Delegation in respect of the applicable New MTO Infrastructure, seek, receive, and document confirmation from MTO, that such commissioning and Handover has been completed.
- (g) DB Co shall provide Notice to the City when any New MTO Infrastructure has been commissioned and has achieved Handover to the MTO. Such Notice to the City shall include the following:
 - (i) a clear identification of that portion or component of the New MTO Infrastructure that is the subject of the Notice;
 - (ii) the date of Handover of the applicable New MTO Infrastructure (as set out in the written confirmation required by Section 25.16(g)(iii)); and

- (iii) a written confirmation, signed by an authorized representative of the MTO that commissioning and Handover of the New MTO Infrastructure has been completed, including the confirmed date of Handover.
- (h) MTO and the City may, at any time and from time to time prior to West Final Completion, on providing 30 Business Days' Notice to DB Co, require a joint interim inspection of the New MTO Infrastructure to be carried out for the purposes of:
 - (i) assessing whether the New MTO Infrastructure has been constructed in accordance with the Output Specifications and is otherwise in compliance with the requirements of the Project Agreement; and
 - (ii) identifying any defects or deficiencies to the applicable New MTO Infrastructure.
- (i) Prior to any interim inspection of New MTO Infrastructure, DB Co shall prepare and submit to the City, a record of the following at least 20 Business Days before the applicable interim inspection, as the case may be:
 - (i) a list of the New MTO Infrastructure to be inspected;
 - (ii) the tests, inspection methods and procedures to be used and performed and the standards that apply in respect of tests, inspection methods and procedures, which tests and inspections shall follow the inspection and testing requirements set out in the Inspection and Test Plan;
 - (iii) the date for testing and inspection of the applicable New MTO Infrastructure which shall be no later than 45 Business Days after the Notice has been provided to DB Co pursuant to Section 25.16(h).
 - (iv) a list of the names and employers of persons to represent DB Co and the City or, if a Notice of Delegation has been issued in respect of the relevant New MTO Infrastructure, a list of the names and employers of persons to represent DB Co and MTO, at the inspection; and
 - (v) a list of existing systems that may be impacted by the tests and inspection.
- (j) DB Co shall prepare a record of each interim inspection carried out pursuant to Section 25.16(h) in inspection report format including: (i) a list of defects or deficiencies to the New MTO Infrastructure identified during the inspection, and (ii) actions to be taken by DB Co to correct each defect or deficiency and to rectify the damage. DB Co shall submit the inspection reports to the City for review within 3 Business Days of the inspection for review in accordance with Schedule 10 – Review Procedure.
- (k) DB Co shall arrange, schedule, and facilitate all inspections, and commissioning and Handover activities, in respect of the New MTO Infrastructure directly with the City, except where the City has provided Notice of Delegation to DB Co in respect of any of the New MTO Infrastructure, in which case the City and DB Co shall arrange, schedule, and facilitate all inspections, and commissioning and Handover activities with MTO. DB Co acknowledges and agrees that no joint inspection shall proceed unless, where a Notice of Delegation has been provided, the MTO is in attendance at such inspection, and DB Co shall, with such reasonable assistance from the

City as may be requested by DB Co, coordinate with and ensure MTO is in attendance at all joint inspections contemplated under this Section 25.16. DB Co shall report to the City on the status of all inspections, commissioning and Handover carried out in accordance with this Section 25.16 as part of the Works Report.

26. HUMAN RESOURCES

26.1 Admittance of Personnel

- (a) The City shall have the right to order the removal from the Lands, the New City Infrastructure or the New MTO Infrastructure of any person employed by (or acting on behalf of) DB Co, or any DB Co Party, whose presence, in the reasonable opinion of the City is likely to have an adverse effect on the Other Works or the Governmental Activities or who, in the reasonable opinion of the City is not a fit and proper person to be on the Lands, the New City Infrastructure or the New MTO Infrastructure for any reason, including a failure to comply with any the City policy or any immediate obligation of the City to ensure the safety and well-being of persons on the Lands, the New City Infrastructure and the New MTO Infrastructure.
- (b) Any action taken under this Section 26.1 shall promptly be confirmed by the City to DB Co and, for greater certainty, shall not relieve DB Co of any of its obligations under this Project Agreement.
- (c) Any decision of the City made pursuant to this Section 26.1 shall be final and conclusive.

26.2 Staff Competency

- (a) DB Co shall ensure that:
 - (i) there shall at all times be a sufficient number of persons employed or engaged by DB Co or any DB Co Party (including all relevant grades of supervisory staff) engaged in the performance of the Works with the requisite level of skill and experience to perform the Works in accordance with this Project Agreement. For greater certainty, this obligation shall include ensuring that there are a sufficient number of such skilled and experienced persons employed or engaged by DB Co or any DB Co Party to complete the Works in accordance with the Works Schedule;
 - (ii) all persons employed or engaged by DB Co or any DB Co Party (including all relevant grades of supervisory staff) engaged in the performance of the Works receive such training and supervision as is necessary to ensure the proper performance of this Project Agreement and compliance with all health and safety rules, procedures and requirements, Authority Requirements and the City HR Policy; and
 - (iii) it creates and maintains, and causes all DB Co Parties to create and maintain, a process which allows it to assess, monitor and correct, on an ongoing basis, the competency of persons employed or engaged by DB Co or any DB Co Party (including all relevant grades of supervisory staff) engaged in the performance of the Works to ensure the proper performance of this Project Agreement.

26.3 Notification of Convictions

- (a) DB Co (to the extent permitted by Applicable Law) shall, and shall cause such DB Co Party to, ensure that all potential employees (including, for greater certainty, permanent, temporary, full time and part time employees) and persons who may otherwise perform the Works:
 - (i) are questioned concerning Relevant Convictions; and
 - (ii) are required to complete and deliver to DB Co a criminal records search form.
- (b) To the extent permitted by Applicable Law, DB Co shall, and shall cause each DB Co Party to, ensure that no person who discloses any Relevant Conviction, or who is found to have any Relevant Conviction following the completion of a criminal records search, in either case of which DB Co or a DB Co Party is aware or ought to be aware, is allowed access to the Lands, the New City Infrastructure or the New MTO Infrastructure to perform any Works, without the prior written consent of the City, in its sole discretion.
- (c) To the extent permitted by Applicable Law, DB Co shall ensure that the City is notified as soon as possible, and kept advised at all times of, any person employed or engaged by DB Co or any DB Co Party in the provision of any of the Works who, subsequent to the commencement of such employment or engagement, (i) has been arrested or detained; (ii) receives a Relevant Conviction; or (iii) is charged with an offence that could lead to a Relevant Conviction (of which DB Co or a DB Co Party becomes aware or whose previous Relevant Convictions become known to DB Co or a DB Co Party). DB Co shall use commercially reasonable efforts to obtain, or to cause all DB Co Parties to obtain, all consents as may be required by Applicable Law or otherwise authorizing the disclosure of such information to the City as contemplated in this Section 26.3.

26.4 Disciplinary Action

- (a) The City, acting reasonably, may notify DB Co of any DB Co or DB Co Party employee who engages in misconduct or is incompetent or negligent in the performance of duties or whose presence or conduct on the Lands or at work is otherwise considered by the City to be undesirable, to constitute a threat to the health and/or safety of any of the users of the Lands and/or System Users or which the City considers may potentially compromise (i) the City's reputation or integrity, or (ii) the nature of the public transit system in the City of Ottawa or the Province of Ontario so as to affect public confidence in the public transit system in one or more of the City of Ottawa, the Province of Ontario or the Project. Upon investigation, DB Co may institute, or cause the relevant DB Co Party to institute, disciplinary proceedings, which shall be in accordance with the requirements of Applicable Law, and shall advise the City in writing of the outcome of any disciplinary action taken in respect of such person.

26.5 Human Resources Policies

- (a) DB Co shall ensure that there are set up and maintained by it and by all DB Co Parties, human resources policies and procedures covering all relevant matters relating to the Works (including, for example, health and safety). DB Co shall ensure that the terms and the implementation of such policies and procedures comply with Applicable Law, Authority Requirements, and Good Industry Practice and that they are published in written form and that copies of them (and any revisions and amendments to them) are directly issued to the City and all DB Co Parties.

26.6 Management Organizations

- (a) DB Co shall provide, and shall ensure that all DB Co Parties provide, to the City, as required to keep such information current, the names of the management teams responsible for the provision of the Works.

26.7 Governmental Authority

- (a) DB Co shall ensure that it and all DB Co Parties comply at all times with any regulations, policies or directions set by any Governmental Authority related to labour, employment and/or human resources.

27. THE CITY'S REMEDIAL RIGHTS

27.1 Exercise of Remedial Rights

- (a) The City may exercise all rights set out in this Section 27 at any time and from time to time if:
 - (i) the City, acting reasonably, considers that a breach by DB Co of any obligation under this Project Agreement, or any act or omission on the part of DB Co or any DB Co Party:
 - (A) does or can reasonably be expected to create a serious threat to the health, safety or security of any person, including any System Users or City Party;
or
 - (B) does or can reasonably be expected to materially prejudice the performance of any Governmental Activities;
 - (C) may potentially compromise the City's reputation or integrity, or the nature of the public transit system in the City of Ottawa or the Province of Ontario, so as to affect public confidence in that system or the Project,

provided that:

- (D) in respect of a breach by DB Co of any obligation under this Project Agreement or any act or omission on the part of DB Co or any DB Co Party which can reasonably be expected to cause any of the consequences set out in Sections 27.1(a)(i)(A) and 27.1(a)(i)(B), the City shall not exercise its rights under this Section 27 unless DB Co has failed to cure the relevant breach, act or omission within 5 Business Days after Notice from the City or, if such breach, act or omission cannot reasonably be cured within such 5 Business Day period, DB Co thereafter fails to diligently and continuously pursue such cure and to cure such breach, act or omission within a reasonable period thereafter, provided that DB Co shall not be entitled to a cure period if any of the consequences set out in Sections 27.1(a)(i)(A) and 27.1(a)(i)(B) actually occur; and
- (E) in respect of Section 27.1(a)(i)(C), the City shall not exercise its rights under this Section 27 unless DB Co has failed to cure the relevant breach, act or omission within 5 Business Days after Notice from the City or, if such

breach, act or omission cannot reasonably be cured within such 5 Business Day period, DB Co thereafter fails to diligently and continuously pursue such cure and to cure such breach, act or omission within a reasonable period thereafter;

- (ii) DB Co has not caused the COR-Qualified Construction DB Co Party or the COR-Certified Construction DB Co Party, as the case may be, to perform its obligations with respect to its COR Certification or OHSAS 18001 Accreditation, as the case may be, in accordance with Section 11.25, or DB Co has not caused the COR-Qualified Construction DB Co Party or the COR-Certified Construction DB Co Party, as the case may be, to perform its obligations with respect to H&S Construction Inspections in accordance with Section 15.2, or to perform its obligations to rectify any non-compliance noted in any H&S Construction Inspection Report in accordance with Section 15.2(c);
- (iii) DB Co has not performed or is not performing its obligations in respect of the Demolition Requirements in accordance with Section 11.26 or DB Co has not performed or is not performing its obligations to rectify any Demolition Default Event in accordance with Section 11.26;
- (iv) DB Co has failed to comply with any written direction issued by or on behalf of the City in accordance with this Project Agreement.

27.2 Emergency

- (a) Notwithstanding that DB Co is not in breach of its obligations under this Project Agreement, the City may exercise all of the rights set out in this Section 27 at any time and from time to time if the City, acting reasonably, considers the circumstances to constitute an Emergency.

27.3 Rectification

- (a) Without prejudice to the City's rights under Section 36 and any other rights under this Project Agreement, in any of the circumstances set out in Sections 27.1 or 27.2, the City may, by written Notice, require DB Co to take such steps as the City, acting reasonably, considers necessary or expedient to mitigate, rectify or protect against such circumstance, including, if applicable, the termination and replacement of Subcontractors or a limited suspension of the performance of the Works, and DB Co shall use commercially reasonable efforts to comply with the City's requirements as soon as reasonably practicable.
- (b) If the City gives Notice to DB Co pursuant to Section 27.3(a) and either:
 - (i) DB Co does not either confirm, within 5 Business Days after such Notice or such shorter period as is appropriate in the case of an Emergency that it is willing to take the steps required in such Notice or present an alternative plan to the City to mitigate, rectify and protect against such circumstances that the City may accept or reject acting reasonably; or
 - (ii) DB Co fails to take the steps required in such Notice or accepted alternative plan within such time as set out in such Notice or accepted alternative plan or within such longer time as the City, acting reasonably, shall think fit,

then the City may take such steps as it considers to be appropriate, acting reasonably, requiring the termination and replacement of Subcontractors, either themselves or by engaging others (including a third party) to take any such steps.

- (c) Notwithstanding the foregoing provisions of this Section 27.3, in the event of an Emergency, the Notice under Section 27.3(a) shall be given as promptly as possible having regard to the nature of the Emergency and the City may, prior to DB Co's confirmation under Section 27.3(b)(i), take such steps as are appropriate having regard to the nature of the Emergency.

27.4 Costs and Expenses

- (a) Subject to the City's obligations pursuant to Sections 27.5 and 27.6:
 - (i) DB Co shall bear all costs and expenses incurred by DB Co in relation to the exercise of the City's rights pursuant to this Section 27; and
 - (ii) DB Co shall reimburse the City for all reasonable costs and expenses incurred by the City in relation to the exercise of the City's rights pursuant to this Section 27, including in relation to the City taking such steps, either itself or by engaging others (including a third party) to take any such steps as the City considers appropriate and as are in accordance with this Section 27.

27.5 Reimbursement Events

- (a) In this Section 27.5, a "**Reimbursement Event**" means:
 - (i) an act or omission of DB Co or any DB Co Party or a breach by DB Co or any DB Co Party of any obligation under this Project Agreement, but only to the extent such act, omission or breach is caused by the City or a the City Party; or
 - (ii) an Emergency that is not caused or contributed to by an act or omission of DB Co or any DB Co Party or a breach by DB Co or any DB Co Party of any obligation under this Project Agreement.
- (b) If the City either takes steps itself or requires DB Co to take steps in accordance with this Section 27 as a result of a Reimbursement Event:
 - (i) the City shall reimburse DB Co for the reasonable costs and expenses incurred by DB Co in relation to the exercise of the City's rights pursuant to this Section 27 that would not otherwise have been incurred by DB Co in the proper performance of its obligations under this Project Agreement; and
 - (ii) the City shall bear all costs and expenses incurred by the City in relation to the exercise of the City's rights pursuant to this Section 27.

27.6 Reimbursement if Improper Exercise of Rights

- (a) If the City exercises its rights pursuant to this Section 27, but the City was not entitled to do so, the City shall reimburse DB Co for the reasonable costs and expenses directly incurred by DB Co over and above those that would otherwise have been incurred by DB Co in the proper

performance of its obligations under this Project Agreement and that are directly and reasonably incurred by DB Co in complying with those written requirements of the City issued as a result of the City having exercised such rights.

- (b) DB Co acknowledges and agrees that DB Co has no right to require a determination of whether or not the City is entitled to exercise its rights pursuant to this Section 27 before taking any such action that the City may require and DB Co shall comply with all of the City's requirements. Only concurrently with or after complying with the City's requirements shall DB Co be entitled to refer any Dispute for resolution in accordance with Schedule 27 – Dispute Resolution Procedure. No action taken by DB Co pursuant to any direction issued by the City under this Section 27 shall be considered an acceptance or affirmation of the City's entitlement to exercise its rights under this Section 27, and such action shall be without prejudice to DB Co's rights under this Project Agreement or under the Dispute Resolution Procedure.

28. RECORDS, INFORMATION AND AUDIT

28.1 Records Provisions

- (a) DB Co shall comply with Schedule 26 – Record Provisions.

28.2 Information and General Audit Rights

- (a) DB Co shall provide, and shall cause each Subcontractor to provide, to the City all information, reports, documents, records and the like, including as referred to in Schedule 26 – Record Provisions, in the possession of, or available to, DB Co as the City may reasonably require from time to time for any purpose in connection with this Project Agreement, other than Sensitive Information. DB Co shall use commercially reasonable efforts to ensure that, for such purpose, all such information, reports, documents, records and the like in the possession of, or available to, the Construction Contractor shall be available to DB Co and DB Co shall include relevant terms in all Subcontracts to this effect.
- (b) DB Co shall also provide to the City, and shall require each Subcontractor, including the Construction Contractor, to provide to the City (at the City's reasonable cost), all information, reports, documents, records and the like required to be provided pursuant to Section 28.2(a) which subsequently come into the possession of, or become available to, DB Co or each Subcontractor, as the City may reasonably require from time to time to enable the City to provide reports, notices, returns and the like pursuant to Applicable Law, including information and documentation pertaining to the physical condition of the Lands, the New City Infrastructure and the New MTO Infrastructure, security, health and safety, fire safety, emergency preparedness, environmental matters, employees and human resources related matters, other than Sensitive Information.
- (c) DB Co shall promptly after receipt provide the City with a copy of any material notice, order, direction, requirement or other similar communication received by it or by any Subcontractor from any Governmental Authority in relation to any of the Works, the Lands, the New City Infrastructure and the New MTO Infrastructure, and DB Co shall include relevant terms in all Subcontracts to this effect.
- (d) DB Co shall promptly notify the City of any actions, suits, proceedings, or investigations commenced, pending or threatened against DB Co or, to DB Co's knowledge, any Subcontractor

at law or in equity before any Governmental Authority or arbitral body (whether or not covered by insurance) that individually or in the aggregate could result in any material adverse effect on the business, properties, or assets or the condition, financial or otherwise, of DB Co or in any impairment of its ability to perform its obligations under this Project Agreement.

- (e) All information, reports, documents and records in the possession of, or available to, DB Co, including as referred to in Schedule 26 – Record Provisions, which are required to be provided to or available to the City hereunder, shall be subject and open to inspection and audit by the City at any time and from time to time, which inspection and audit shall take place during normal business hours and at DB Co's normal places of business unless the City and DB Co otherwise agree. The City shall also have the right to monitor and audit the performance of any and all parts of the Works wherever located, and DB Co shall cooperate with, and shall require each Subcontractor to cooperate with, and provide access to the representatives of the City monitoring and auditing such parts of the Works, including providing them with access and copies (at the City's reasonable cost) of all relevant information, reports, documents and records pertaining to the performance of such parts of the Works. Except as otherwise provided herein, all of the City's costs for the inspections, audits and monitoring shall be borne by the City.
- (f) In conducting an audit of DB Co under Section 28.2(e) or as otherwise provided under this Project Agreement, the City shall have all rights necessary or incidental to conducting an audit, including the right to have access to and inspect and take copies (at the City's reasonable cost) of all books and records of DB Co required to be provided to or available to the City hereunder, upon reasonable Notice and at reasonable times. DB Co shall fully cooperate with the City and its auditors in the conduct of any audits, including by making available all such records and accounts (other than Sensitive Information) in existence at that time as they may require to perform a full and detailed audit, and DB Co further agrees to promptly review and settle with the City all matters arising from such audits, including the refunding of monies to the City where applicable. At the reasonable request of the City's auditors, DB Co shall provide such information, reports, documents and records as the City's auditors may reasonably require, other than Sensitive Information.
- (g) The City's rights pursuant to this Section 28.2 shall be in addition to, and shall not limit, any other audit, information, inspection or similar rights under this Project Agreement.
- (h) The City's rights pursuant to this Section 28.2 shall not limit or restrict any Governmental Authority's right of review, audit, information or inspection under Applicable Law. The City's right pursuant to this Section 28.2 may also be exercised by the Auditor General of Ontario, Her Majesty the Queen in right of Canada and the Auditor General of Canada without the requirement for further action on the part of the City.
- (i) Without limiting the generality of Section 28.2(a) and subject to Sections 42.1(a) and 42.3, in the event that the City is required to provide information, including financial information, in relation to the Project, to the Province for corporate or financial reporting purposes, DB Co shall provide such information to the City as the City may reasonably require in order to comply with its corporate or financial reporting obligations. DB Co acknowledges and agrees that such information may include Sensitive Information.

28.3 Lenders' Consultant Reports

- (a) DB Co shall cause the Lenders' Agent to cause, in accordance with Section 5(j) of Schedule 4 – Lenders' Direct Agreement, the Lenders' Consultant to provide the City a copy of any written assessment or report of the Works under the Design and Construction Contract, including but not limited to, any certificate of payment, concurrently with its delivery to the Lenders' Agent.

29. COMMUNICATIONS

29.1 Communications

- (a) Each of the Parties shall comply with Schedule 18 – Communication and Stakeholder Engagement Obligations.

30. CHANGES IN LAW

30.1 Performance after Change in Law

- (a) Following any and all Changes in Law, DB Co shall perform the Works in accordance with the terms of this Project Agreement, including in compliance with Applicable Law.

30.2 Works Change in Law

- (a) On the occurrence of a Works Change in Law:
 - (i) either Party may give Notice to the other of the need for a Variation as a result of such Works Change in Law;
 - (ii) the Parties shall meet within 10 Business Days after such Notice to consult with respect to the effect of the Works Change in Law and to reach an agreement on whether a Variation is required as a result of such Works Change in Law, and, if the Parties have not, within 10 Business Days after this meeting, reached an agreement, either Party may refer the question of whether a Works Change in Law has occurred or the effect of any Works Change in Law for resolution in accordance with Schedule 27 – Dispute Resolution Procedure; and
 - (iii) the City shall, within 10 Business Days after agreement or determination that a Variation is required, issue a Variation Enquiry and the relevant provisions of Schedule 22 – Variation Procedure shall apply except that:
 - (A) DB Co may only object to any such Variation Enquiry on the grounds that the implementation of the Variation would not enable it to comply with the Works Change in Law;
 - (B) DB Co shall be responsible for obtaining all Development Approvals and DB Co Permits, Licences, Approvals and Agreements required in respect of the Variation;
 - (C) the City shall not be entitled to withdraw any such Variation Enquiry unless the Parties otherwise agree;

- (D) DB Co shall proceed to implement the Variation within such period as will enable it to comply with the Works Change in Law as soon as reasonably practicable; and
- (E) DB Co shall not be entitled to any payment or other compensation or relief from performance of its obligations under this Project Agreement in respect of any Works Change in Law or associated Variation other than as established pursuant to Schedule 22 – Variation Procedure.

30.3 Relevant Change in Law

- (a) On the occurrence of a Relevant Change in Law, either Party shall be entitled to seek compensation for any increase or decrease (as the case may be) in the net cost to DB Co of performing the Works so as to put such Party in no better and no worse position than it would have been in had the Relevant Change in Law not occurred. Any such compensation shall be calculated in accordance with this Section 30.3.
- (b) On the occurrence of a Relevant Change in Law:
 - (i) either Party may give Notice to the other of the need for a Variation as a result of such Relevant Change in Law;
 - (ii) the Parties shall meet within 10 Business Days after such Notice to consult with respect to the effect of the Relevant Change in Law and to reach an agreement on whether a Variation is required as a result of such Relevant Change in Law, and, if the Parties have not, within 10 Business Days after this meeting, reached an agreement, either Party may refer the question of whether a Relevant Change in Law has occurred or the effect of any Relevant Change in Law for resolution in accordance with Schedule 27 – Dispute Resolution Procedure; and
 - (iii) the City shall, within 10 Business Days after agreement or determination that a Variation is required, issue a Variation Enquiry and the relevant provisions of Schedule 22 – Variation Procedure shall apply except that:
 - (A) DB Co may only object to any such Variation Enquiry on the grounds that the implementation of the Variation would not enable it to comply with the Relevant Change in Law;
 - (B) DB Co shall be responsible for obtaining all Development Approvals and DB Co Permits, Licences, Approvals and Agreements required in respect of the Variation;
 - (C) the City shall not be entitled to withdraw any such Variation Enquiry unless the Parties otherwise agree;
 - (D) DB Co shall proceed to implement the Variation within such period as will enable it to comply with the Relevant Change in Law as soon as reasonably practicable;

- (E) the Parties shall, without prejudice to their respective general obligations to comply with the terms of this Project Agreement:
 - (I) use commercially reasonable efforts to mitigate the adverse effects of any Relevant Change in Law and take commercially reasonable steps to minimize any increase in costs arising from such Relevant Change in Law; and
 - (II) use commercially reasonable efforts to take advantage of any positive or beneficial effects of any Relevant Change in Law and take commercially reasonable steps to maximize any reduction in costs arising from such Relevant Change in Law; and
- (F) any entitlement to compensation payable shall be in accordance with this Section 30.3, and any calculation of compensation shall take into consideration, inter alia:
 - (I) any failure by a Party to comply with Section 30.3(b)(iii)(E);
 - (II) any increase or decrease in its costs resulting from such Relevant Change in Law; and
 - (III) any amount which DB Co recovers under any insurance policy (or would recover if it complied with its obligations to insure under this Project Agreement or the terms of any policy of insurance required under this Project Agreement) which amount, for greater certainty, shall not include the amount of any excess or deductibles or any amount above the maximum insured amount applicable to any such insurance policy.
- (c) DB Co shall not be entitled to any payment or compensation or, except as provided in Section 32 or otherwise in this Project Agreement, relief in respect of any Relevant Change in Law, or the consequences thereof, other than in accordance with this Section 30.3, and Section 33 shall be construed accordingly.

31. VARIATIONS

31.1 Variation Procedure

- (a) Except as otherwise expressly provided in this Project Agreement, Schedule 22 – Variation Procedure shall apply in respect of Variations and any Small Works.
- (b) For greater certainty, DB Co shall, subject to and in accordance with Schedule 22 – Variation Procedure, be entitled to a Variation if a written direction issued by or on behalf of the City to DB Co or any DB Co Party results in a variation, addition, reduction, substitution, omission, modification, deletion, removal or other change to the whole or any part of the Works.
- (c) Without limiting DB Co's obligations pursuant to Section 11.10(a) and Schedule 22 – Variation Procedure, DB Co shall include in each Subcontract, and shall cause each DB Co Party to comply with, the Variation Procedure, to the extent that the Variation Procedure requires DB Co to minimize the cost and impact of Variations.

31.2 Innovation and Value Engineering

- (a) DB Co acknowledges that the City at all times desires to reduce the overall cost to the City of the Project, and DB Co agrees to cooperate, explore and work with the City in investigating and considering innovation and value engineering and other cost saving measures.
- (b) If an innovation and value engineering proposal is at any time and from time to time originated and initiated solely by DB Co, DB Co may make a proposal (the “**Innovation Proposal**”) by Notice to the City.
- (c) The Parties agree that the subject of an Innovation Proposal shall not include:
 - (i) any Variation Enquiry initiated by the City;
 - (ii) any Variation resulting from a Change in Law; or
 - (iii) any change to the City Activities.
- (d) The Innovation Proposal must:
 - (i) set out sufficient detail to enable the City to evaluate the Innovation Proposal in full;
 - (ii) specify DB Co’s reasons and justification for proposing the Innovation Proposal;
 - (iii) request the City to consult with DB Co with a view to deciding whether to agree to the Innovation Proposal and, if so, what consequential changes the City requires as a result;
 - (iv) indicate any implications of the Innovation Proposal, including a difference between the existing and the proposed requirements of this Project Agreement, and the comparative advantages of each to DB Co and the City;
 - (v) indicate if there are any dates by which a decision by the City must be made;
 - (vi) indicate the capital cost of the Innovation Proposal, including the cost of financing; and
 - (vii) include such other information and documentation as may be reasonably requested by the City to fully evaluate and consider the Innovation Proposal.
- (e) The City shall, acting in good faith, evaluate the Innovation Proposal, taking into account all relevant issues, including whether:
 - (i) the Innovation Proposal affects the quality of the Works, the New City Infrastructure, the New MTO Infrastructure, or the likelihood of successful completion of the Works;
 - (ii) the Innovation Proposal will benefit or interfere with the efficient operation of the New City Infrastructure, the New MTO Infrastructure or the performance of the City Activities;
 - (iii) the Innovation Proposal will interfere with the relationship between the City and third parties;

- (iv) the financial strength of DB Co is sufficient to deliver the changed Works;
 - (v) the residual value of the New City Infrastructure, or the New MTO Infrastructure is affected;
 - (vi) the Innovation Proposal materially affects the risks or costs to which the City is exposed; or
 - (vii) any other matter the City considers relevant.
- (f) The City may request clarification or additional information regarding the Innovation Proposal, and may request modifications to the Innovation Proposal.
- (g) The City may, in its sole discretion, accept or reject any Innovation Proposal.
- (h) If the City accepts the Innovation Proposal, with or without modification, the relevant Innovation Proposal shall be documented and evidenced by a written Variation Confirmation, together with any other documents necessary to amend this Project Agreement or any relevant Project Documents to give effect to the Innovation Proposal.
- (i) If, after taking into account the agreed implementation and reasonably allocated development costs incurred by DB Co in connection with the Innovation Proposal and any other uses of the Innovation Proposal by DB Co, the Innovation Proposal causes or will cause the costs of DB Co and/or of a Subcontractor to decrease, the net savings in the costs of DB Co and/or the Subcontractor will be shared equally by DB Co and the City, and the City's share of the net savings shall, if the Parties agree, be reflected in a lump sum payment.
- (j) If an Innovation Proposal causes or will cause the costs of the City to decrease, the net savings in the costs of the City will be shared:
- (i) equally by DB Co and the City following the implementation of the Innovation Proposal until the Termination Date; and
 - (ii) thereafter, the City shall be entitled to the full benefit of the net savings in costs (if applicable),
- and DB Co's share of the net savings shall be reflected in a lump sum payment.

32. DELAY EVENTS

32.1 Definition

- (a) For the purposes of this Project Agreement, "**Delay Event**" means any of the following events or circumstances only to the extent, in each case, that it affects the Works so as to cause a delay in achieving any Substantial Completion by the applicable Scheduled Substantial Completion Date, or a delay in achieving any Final Completion by the applicable Scheduled Final Completion Date:
- (i) the implementation of a Variation to the extent DB Co has identified such delay in its Estimate and such delay has been documented in the Variation Confirmation;

- (ii) subject to compliance by DB Co with the provisions of Section 11.12, damage, costs or delays from the execution of Additional Works on the Lands by Additional Contractors, as applicable, in the circumstances described in Section 11.12(f);
- (iii) a requirement that DB Co perform obligations under an Encumbrance pursuant to Section 17.2(c)(iii) or Section 17.2(d), which performance imposes costs or delays in the performance of the Works;
- (iv) any breach by the City of any of the City's obligations under this Project Agreement (including, subject to Section 32.2(o), any delay by the City in giving access to the Lands pursuant to Section 16.1, any obstruction of the rights afforded to DB Co under Section 16.1 or any delay by the City in carrying out its obligations set forth in Schedule 10 – Review Procedure), except to the extent that any such breach is caused, or contributed to, by DB Co or any DB Co Party;
- (v) a requirement pursuant to Section 18.2(g) for DB Co to perform any alteration, addition, Demolition, extension or variation in the Works, or to suspend or delay performance of the Works, upon the discovery of Contamination, which alteration, addition, Demolition, extension or variation in the Works, or suspension or delay in the performance of the Works, would not otherwise be required under this Project Agreement;
- (vi) a requirement pursuant to Section 18.3(c)(ii)(A) or Section 18.3(d) for DB Co to perform any alteration, addition, Demolition, extension or variation in the Works, or to suspend or delay performance of the Works, upon the discovery of any fossils, artifacts or other objects having artistic, historic, archaeological or monetary value, including human remains and burial sites, which alteration, addition, Demolition, extension or variation in the Works, would not otherwise be required under this Project Agreement;
- (vii) a requirement pursuant to Sections 18.4(b) or 18.4(c) for DB Co to perform any alteration, addition, demolition, extension or variation in the Works, or to suspend or delay performance of the Works, upon the discovery of Species-at-Risk for which the City is responsible, which alteration, addition, demolition, extension or variation in the Works, or suspension or delay in the performance of the Works, would not otherwise be required under this Project Agreement;
- (viii) subject to and in accordance with Section 18.5(b), a requirement for DB Co to perform any alteration, addition, demolition, extension or variation in the Works, or other delay in performance of the Works, due to a deviation from the Stage 1 Connection Infrastructure Preliminary Report;
- (ix) an uncovering of the Works pursuant to Section 20.3 where such Works are not subsequently found to be defective or not in compliance with the requirements of this Project Agreement (including the Output Specifications, the DB Co Proposal Extracts and the Design Data), unless such opening up of the Works was reasonable in the light of other defects or non-compliance previously discovered by the City in respect of the same or a similar component of the Works or subset of the Works;
- (x) a requirement pursuant to Section 13.1 of Schedule 27 – Dispute Resolution Procedure for DB Co to proceed in accordance with the direction of the City during the pendency of a Dispute, which Dispute is subsequently determined in DB Co's favour;

- (xi) a Relief Event;
- (xii) an event of Force Majeure;
- (xiii) a Relevant Change in Law;
- (xiv) a requirement for DB Co to perform any alteration, addition, demolition, extension or variation in the Works, or to suspend or delay performance of the Works, upon the discovery of unknown Utility Infrastructure or Mislocated Utility Infrastructure pursuant to Section 18.6, which alteration, addition, demolition, extension or variation in the Works, or suspension or delay in the performance of the Works, would not otherwise be required under this Project Agreement; or
- (xv) subject to compliance with Section 11.8(g), the City's failure to issue to DB Co a final determination in respect of a Listed DB Co PLAA as set out in and subject to Section 11.8(e),
- (xvi) damage, costs or delays caused by an act or omission of RTG or any RTG Party in the execution of the RTG Stage 1 PA Works or RTG City Party Works, in the circumstances described in Section 11.12(k);
- (xvii) changes to the terms, conditions or requirements of the Environmental Assessments (except to the extent resulting from any change by DB Co to the design of the Project or any act, omission or fault of DB Co or a DB Co Party);
- (xviii) a stop work order issued by a Governmental Authority in respect of the Works, provided that such order was not issued as a result of a Relief Event, an act of Force Majeure, or as a result of an act, omission or fault of DB Co or a DB Co Party;
- (xix) a Delay Event determined by the Adjudicator pursuant to Section 6.4(b) of Schedule 27 – Dispute Resolution Procedure;
- (xx) pursuant to an explicit provision in a permit, licence or approval granted by the City to a third party developer in respect of an Adjacent Property, that third party developer,
 - (A) constructs a physical barrier that prevents DB Co from carrying out the Works; or
 - (B) creates a significant physical impediment that prevents DB Co from carrying out the Works for a period greater than or equal to 30 consecutive days;
- (xxi) replacement or substitution of a prescribed item in accordance with Section 11.20 causes delay in the Works or increases the costs of the Works; or
- (xxii) in accordance with Section 11.7(a)(iv), compliance with any amendments made to any disclosed collective agreements or labour-related agreements, or any disclosed collective agreements or labour-related agreements entered into or disclosed to DB Co after Financial Close, adversely interferes with DB Co's ability to perform the Works or materially adversely affects DB Co's schedule for performing the Works,

- (xxiii) subject to and in accordance with Section 18.7, a requirement for DB Co to perform any alteration, addition, demolition, extension or variation in the Works, or other delay in performance of the Works, due to a defect, error or inaccuracy in the Stage 1 Systems Information;
- (xxiv) failure by a Category 1 Utility Company to perform its obligations, as set out in the Utility Baseline Report within the applicable time periods set out in the Utility Baseline Report, to the extent that such event does not arise (directly or indirectly) as a result of any act or omission of the DB Co or any DB Co Party. For clarity, for the purposes of determining whether a failure of a Category 1 Utility Company described in this Section 32.1(a)(xxiv) has caused a delay in achieving any Substantial Completion by the applicable Scheduled Substantial Completion Date, or a delay in achieving any Final Completion by the applicable Scheduled Final Completion Date, the Parties shall have regard to the cumulative effect of all failures by the Category 1 Utility Companies in accordance with this Section 32.1(a)(xxiv);
- (xxv) a defect in Major Existing Third Party Infrastructure that is the responsibility of the City pursuant to Section 18.8(a);
- (xxvi) subject to Section 3.1(a) of Part A of Schedule 34 – Mobility Matters and Section 3.1(a) of Part B of Schedule 34 – Mobility Matters, the City’s issuance of a DB Co Permit, Licence, Approval and Agreement that requires DB Co to meet more onerous lane opening or lane width requirements than those explicitly set out in Schedule 15-2 Part 7 Table 7-1.3; and
- (xxvii) any of the following event occurs in respect of the Nominated Signalling Subcontractor:
 - (A) any arrangement or composition with or for the benefit of creditors being entered into by or in relation to the Nominated Signalling Subcontractor pursuant to any insolvency law;
 - (B) a trustee, receiver, receiver and manager, interim receiver, liquidator, administrator or other custodian or other encumbrance holder taking possession of or being appointed over, or any distress, attachment, execution or other process being levied or enforced upon, the whole or any material part of the assets of the Nominated Signalling Subcontractor;
 - (C) the Nominated Signalling Subcontractor ceases to carry on business in the normal course or fails to maintain or breaches any franchise, licence, authorisation or right necessary to conduct its business;
 - (D) the Nominated Signalling Subcontractor making an assignment for the benefit of its creditors, being declared bankrupt or committing an act of bankruptcy, becoming insolvent, making a proposal or otherwise taking advantage of provisions for relief under the *Bankruptcy and Insolvency Act* (Canada), the *Companies’ Creditors Arrangement Act* (Canada), the *Winding Up and Restructuring Act* (Canada) or any other applicable insolvency legislation or similar legislation in any jurisdiction (“Insolvency Legislation”), or any other type of insolvency proceedings being commenced by or against the Nominated Signalling Subcontractor under any insolvency

- legislation and, if commenced against the Nominated Signalling Subcontractor, not stayed, dismissed or otherwise remedied within thirty (30) days of its commencement;
- (E) a petition being filed (and not being contested in good faith using all reasonable efforts), or a resolution being passed or an order being made for the winding-up, liquidation, administration, dissolution or other similar proceeding of the Nominated Signalling Subcontractor;
 - (F) any legal proceedings are taken by any person (and not stayed within thirty (30) days of commencement) with a view to proposing (under any enactment or otherwise) any kind of composition, scheme of arrangement, compromise or arrangement involving the Nominated Signalling Subcontractor and its creditors generally (or any class of them); or
 - (G) any Governmental Authority or any person or entity acting or purporting to act under any Governmental Authority takes any action in order to condemn, seize or appropriate, or to assume custody or control of, the Nominated Signalling Subcontractor or of all or any substantial part of the assets of the Nominated Signalling Subcontractor or takes action to curtail the Nominated Signalling Subcontractor's authority in the overall conduct of its business or operations.
- (b) For clarity, in respect of Section 32.1(a)(xxiv), a failure by a Category 1 Utility Company to perform its obligations as set out in the Utility Baseline Report within the applicable time periods set out in the Utility Baseline Report shall not, in any event, be cause for a Delay Event unless DB Co has,
- (i) fully complied with its obligations pursuant to the applicable Utility Agreement and the Baseline Utility Report;
 - (ii) properly coordinated the work being performed by the applicable Category 1 Utility Company with the Works; and
 - (iii) provided sufficient access to Site to the applicable Category 1 Utility Company for the purposes of carrying out the Category 1 Utility Company's work.
- (c) For further clarity, Section 32.1(a)(xxiv) does not apply in respect of,
- (i) Category 1 Utility Companies in circumstances other than those specifically set out in the Utility Baseline Report;
 - (ii) failures of any Utility Companies that are not Category 1 Utility Companies including failures of such Utility Companies to perform in accordance with the applicable Utility Agreement; or
 - (iii) Works carried out by DB Co or DB Co Parties or goods or services provided by DB Co or DB Co Parties to the Utility Companies.

32.2 Consequences of a Delay Event

- (a) DB Co shall provide written Notice to the City Representative and the Independent Certifier within five Business Days after becoming aware of the occurrence of any event or circumstances described in Section 32.1(a)(ii), Section 32.1(a)(iii), Section 32.1(a)(iv), Section 32.1(a)(v), Section 32.1(a)(vi), Section 32.1(a)(vii), Section 32.1(a)(viii), Section 32.1(a)(ix), Section 32.1(a)(xiv), Section 32.1(a)(xv), Section 32.1(a)(xvi), Section 32.1(a)(xvii), Section 32.1(a)(xviii), Section 32.1(a)(xix), Section 32.1(a)(xx), Section 32.1(a)(xxi), Section 32.1(a)(xxii), Section 32.1(a)(xxiii), Section 32.1(a)(xxiv), Section 32.1(a)(xxv), Section 32.1(a)(xxvi) or Section 32.1(a)(xxvii) which, at the time of its occurrence, has caused, or is reasonably likely to cause, an entitlement under this Section 32, which Notice shall identify such event or circumstances and, to the extent of DB Co's knowledge at the time of such Notice, summarize the consequences and the nature of DB Co's claim.
- (b) DB Co shall, within 10 Business Days (or such longer period of time as the Parties may agree) after delivering such Notice under Section 32.2(a), provide further written details to the City Representative and the Independent Certifier which shall include, to the extent of DB Co's knowledge at such time:
 - (i) identification of the category of Delay Event on which DB Co's claim for relief is based;
 - (ii) details of the event or circumstances forming the basis of DB Co's notification under Section 32.2(a);
 - (iii) details of the contemporary records which DB Co shall thereafter maintain to substantiate any claim for extra time;
 - (iv) details of the consequences (whether direct or indirect, financial or non-financial) that such event or circumstances may have upon Scheduled Substantial Completion Dates or Scheduled Final Completion Dates, including a Critical Path analysis of the event or circumstances indicating the impact upon Scheduled Substantial Completion Dates or Scheduled Final Completion Dates; and
 - (v) details of any measures that DB Co has adopted or proposes to adopt to mitigate the consequences of such claimed Delay Event.
- (c) As soon as possible but in any event within three Business Days after DB Co receiving, or becoming aware of, any supplemental information pertaining to the event or circumstances disclosed in Section 32.2(a), DB Co shall submit further particulars based on such information to the City Representative and the Independent Certifier.
- (d) The City Representative shall, after receipt of written details under Section 32.2(b), or of further particulars under Section 32.2(c), be entitled by written Notice to require DB Co to provide such further supporting particulars as the City Representative may reasonably consider necessary. DB Co shall afford the City Representative and the Independent Certifier reasonable facilities for their investigations, including, without limitation, on-site inspection.
- (e) [Not used]
- (f) [Not used]

- (g) [Not used]
- (h) Subject to the provisions of this Section 32, the City Representative shall allow DB Co an extension of time equal to the delay caused by the Delay Event and shall fix (A) revised Scheduled Substantial Completion Date(s), or (B) revised Scheduled Final Completion Date(s), as applicable, as soon as reasonably practicable and in any event within 10 Business Days following the later of:
 - (i) the date of receipt by the City Representative of DB Co's Notice given in accordance with Section 32.2(b) and the date of receipt of any further particulars (if such are required under Section 32.2(c), whichever is later; and
 - (ii) the date of receipt by the City Representative of any supplemental information supplied by DB Co in accordance with Section 32.2(c) and the date of receipt of any further particulars (if such are required under Section 32.2(d)), whichever is later.
- (i) For the sake of clarity, where the City issues a revised Scheduled Substantial Completion Date in accordance with Section 32.2(h), if the applicable Initial Countdown Notice has been delivered, DB Co shall be deemed to have delivered a Subsequent Notice referred to in Section 25.5 effecting such a new date.
- (j) If:
 - (i) the City Representative declines to fix (A) revised Scheduled Substantial Completion Date(s); or (B) a revised Scheduled Final Completion Date(s), as applicable;
 - (ii) DB Co considers that different (A) Scheduled Substantial Completion Date(s), or (B) Scheduled Final Completion Date(s) should be fixed; or
 - (iii) there is a dispute as to whether a Delay Event has occurred,then DB Co shall be entitled to refer the matter for determination by the Independent Certifier. The decision of the Independent Certifier may be disputed by either Party and referred for resolution in accordance with Schedule 27 – Dispute Resolution Procedure.
- (k) DB Co shall be relieved from liability for liquidated damages that would otherwise accrue under Section 25.5 for the period of extension resulting from a Delay Event determined in accordance with Sections 32.2(h) or (j).
- (l) If DB Co does not provide the Notice, details or further particulars required by Sections 32.2(a), (b), (c) or (d) to the City Representative and the Independent Certifier in respect of any Delay Event in accordance with the time periods specified herein, DB Co will not be entitled to any additional compensation, extension of time or other relief from its obligations under this Project Agreement to the extent the amount thereof was increased or the ability to mitigate was adversely affected as a result of such delay in providing such Notice, details or further particulars. If the period of delay in providing such Notice, details or further particulars is 6 months or more, the rights of DB Co with respect to such Delay Event will be of no further force or effect.
- (m) If the Works are behind schedule for a reason other than a Delay Event, or if a DB Co Party delays the progress of any portion of the Works necessary to complete the Works on schedule,

DB Co shall use all reasonable measures to bring the Works back on schedule. DB Co shall exercise all means within its discretion, such as directing any DB Co Party that is creating delays to increase their labour forces and equipment, to improve the organization and expediting of the Works, or to work overtime as may be necessary. DB Co shall provide any additional supervision, coordination and expediting, including overtime by its own personnel as may be required to achieve this end. The costs and expenses incurred by the use of such measures and overtime shall be borne by DB Co and/or the DB Co Parties and there shall be no adjustment to the Guaranteed Price as a result of such costs and expenses and for clarity, no extension to any Scheduled Substantial Completion Date.

- (n) Where there are Concurrent Delays, some of which are Delay Events for which DB Co would otherwise be entitled to schedule relief hereunder, and some of which are not Delay Events for which DB Co would otherwise be entitled to schedule relief hereunder, then DB Co shall not be entitled to:
 - (i) an extension in any Scheduled Substantial Completion Date, or Scheduled Final Completion Date, to the extent of such Concurrent Delays; or
 - (ii) any compensation for Concurrent Delay Direct Costs attributable to such Concurrent Delays,

except to the extent that one of the events that occurs as part of the Concurrent Delay is a Delay Event referred to in Section 32.1(a)(i), 32.1(a)(ii), 32.1(a)(iv), 32.1(a)(ix), 32.1(a)(xv) or 32.1(a)(xvi) in which case DB Co shall be entitled to schedule relief and compensation in accordance with Sections 32 (without regard to this Section 32.2(n)) and 33 of this Project Agreement. For greater certainty, the compensation payable by the City to DB Co pursuant to Section 33 of this Project Agreement with respect to all other Compensation Events by reason of such event being a Compensation Event (as opposed to being both a Compensation Event and a Delay Event) shall be payable in full without regard to the terms of this Section 32.2(n).

- (o) Subject to Sections 11.19, the City shall provide DB Co with access to and use of the Lands as required pursuant to Section 16 of this Project Agreement in a manner consistent with the Works Schedule and in accordance with the notification requirements and restrictions set out in the Project Agreement, provided that DB Co agrees that the inability of the City to provide DB Co with access to an area for construction activities not on the Critical Path for reasons set out in Section 11.19 will not result in the occurrence of a Delay Event (and, for greater certainty, there shall not be a resulting change to a Scheduled Substantial Completion Date) or a Compensation Event (and, for certainty, there shall not be any resulting change to the Guaranteed Price).
- (p) In no event shall the extension of time for a Delay Event be more than the necessary extension of the Critical Path as a result of the delay caused by the Delay Event.
- (q) Subject to DB Co meeting the obligations set out in Section 32.2 and Section 32.3, if, (i) a Lane Closure or Bus Rapid Transit Lane Closure is directly caused or extended by one or more of the events set out in Section 32.1(a), whether or not such event constitutes a Delay Event, such Lane Closure or Bus Rapid Transit Lane Closure or extension thereof shall not be included in the Aggregate Actual Lane Closures, or Aggregate Actual Bus Rapid Transit Lane Closures, or the Aggregate Actual Lane Closures Cost, or the Aggregate Actual Bus Rapid Transit Lane Closures Cost for the relevant Road Section for the purposes of calculating the Lane Closure Adjustment in accordance with the process set out in Schedule 34 – Mobility Matters.

- (r) Subject to DB Co meeting the obligations set out in Section 32.2 and Section 32.3, if (i) a date or duration in the Systems Integration Management Plan, or a Commencement Date or duration for use of the Lands identified in Schedule 20 – Lands, is delayed by one or more events set out in Section 32.1(a), whether or not such event constitutes a Delay Event, such date or extension of the applicable duration shall be amended in the Systems Integration Management Plan, and/or the City shall use commercially reasonable efforts to amend such Commencement Date or duration in Schedule 20 – Lands, as applicable.

32.3 Mitigation

- (a) If DB Co is (or claims to be) affected by a Delay Event, DB Co shall, and shall require all DB Co Parties to, take and continue to take commercially reasonable steps:
 - (i) to eliminate or mitigate the consequences of such event upon the performance of its obligations under this Project Agreement;
 - (ii) to continue to perform its obligations under this Project Agreement to the extent possible notwithstanding the Delay Event; and
 - (iii) to resume performance of its obligations under this Project Agreement affected by the Delay Event as soon as practicable.
- (b) To the extent that DB Co does not comply with its obligations under this Section 32.3, such failure shall be taken into account in determining DB Co's entitlement to an extension of time pursuant to this Section 32.

32.4 Change in Sequence of Scheduled Substantial Completion Dates

- (a) If, as a result of one or more Delay Events, the East Scheduled Substantial Completion Date is scheduled to occur after the West Scheduled Substantial Completion Date, the Parties hereby undertake to promptly negotiate in good faith any necessary amendments to this Project Agreement to effect such change in the sequence of Scheduled Substantial Completion Dates, with a view to ensuring that, subject to the obligations and rights to relief arising hereunder from such Delay Event(s), neither Party is in any worse position than it would have been had the East Scheduled Substantial Completion Date remained scheduled to occur prior to the West Scheduled Substantial Completion Date.

33. COMPENSATION EVENTS

33.1 Definition

- (a) For the purposes of this Project Agreement, “**Compensation Event**” means any event referred to in Sections 32.1(a)(ii), 32.1(a)(iii), 32.1(a)(iv) (subject to Section 32.2(o)), 32.1(a)(v), 32.1(a)(vi), 32.1(a)(vii), 32.1(a)(viii), 32.1(a)(ix), 32.1(a)(x), 32.1(a)(xiv), 32.1(a)(xv), 32.1(a)(xvi), 32.1(a)(xvii), 32.1(a)(xviii), 32.1(a)(xix), 32.1(a)(xx), 32.1(a)(xxi), 32.1(a)(xxii) and 32.1(a)(xxiii), 32.1(a)(xxv), 32.1(a)(xxvi) and 32.1(a)(xxvii) as a direct result of which DB Co has incurred loss or expense, whether or not any of these events has also caused a delay, and the procedure described in Section 32.2 shall apply, *mutatis mutandis*, to such events as Compensation Events (including, for certainty, Section 32.2(l)).

33.2 Consequences of a Compensation Event

- (a) If a Compensation Event occurs, DB Co's sole right to compensation shall be as set out in this Section 33. For greater certainty, except as aforesaid, no other Delay Event shall entitle DB Co to receive any compensation, except as otherwise provided in:
 - (i) Schedule 22 – Variation Procedure, in the case of a Delay Event referred to in Section 32.1(a)(i);
 - (ii) Section 35, in the case of a Delay Event referred to in Section 32.1(a)(xii);
 - (iii) Section 33.6, in the case of a Delay Event referred to in Section 32.1(a)(xi);
 - (iv) Section 30, in the case of a Delay Event referred to in Section 32.1(a)(xiii); and
 - (v) Section 33.6, in the case of a Delay Event referred to in Section 32.1(a)(xxiv).
- (b) Subject to Sections 33.2(c), 33.3, 33.4 and 33.5, if it is agreed, or determined in accordance with Schedule 27 – Dispute Resolution Procedure, that there has been a Compensation Event, DB Co shall be entitled to such compensation as would place DB Co in no better and no worse position than it would have been in had the relevant Compensation Event not occurred. For greater certainty, in respect of a Compensation Event that is also a Delay Event, such compensation will include amounts which, but for the Delay Event, would have been paid by the City to DB Co. DB Co shall promptly provide the City Representative with any information the City Representative may require in order to determine the amount of such compensation.
- (c) If the City is required to compensate DB Co pursuant to this Section 33.2, then the City may either pay such compensation as a lump sum payment or payments at times and in a manner to be agreed with DB Co, acting reasonably.
- (d) To the extent DB Co does not comply with its obligations under Sections 32.2(a), (b), (c), (d), (e) or (l), and subject to Section 32.2(l), such failure shall be taken into account in determining DB Co's entitlement to relief pursuant to this Section 33.

33.3 Mitigation

- (a) If DB Co is (or claims to be) affected by a Compensation Event, DB Co shall, and shall require all DB Co Parties to, take and continue to take commercially reasonable steps to minimize the amount of compensation due in accordance with this Section 33 in relation to any Compensation Event.
- (b) To the extent that DB Co does not comply with its obligations under this Section 33.3, such failure shall be taken into account in determining DB Co's entitlement to relief pursuant to this Section 33.

33.4 Insured Exposure

- (a) The compensation payable to DB Co pursuant to this Section 33 shall be reduced by any amount which DB Co or a DB Co Party recovers, or is entitled to recover, under any insurance policy, or would have recovered if it had complied with the requirements of this Project Agreement in

respect of insurance or the terms of any policy of insurance required under this Project Agreement, which amount, for greater certainty, shall not include any excess or deductibles or any amount over the maximum amount insured under any such insurance policy.

33.5 Delivery of PBS-2

- (a) If an event referred to in Section 32.1(a)(ii), Section 32.1(a)(iii), Section 32.1(a)(v), Section 32.1(a)(vi), Section 32.1(a)(vii), Section 32.1(a)(ix), Section 32.1(a)(x), 32.1(a)(xiv), Section 32.1(a)(xx), Section 32.1(a)(xxi), Section 32.1(a)(xxii), Section 32.1(a)(xxiii) or Section 32.1(a)(xxiv) occurs after the 240th day following Financial Close (provided that in the event that the City failed to comply with the time periods stipulated in Schedule 10 – Review Procedure in respect of PBS-2 such 240 day time period shall be automatically extended on a day-for-day basis) and prior to the City assigning the comment “NO COMMENT” or “MINOR COMMENT” to PBS-2 in accordance with Schedule 12 – Works Scheduling Requirements, DB Co shall not be entitled to receive any compensation under this Section 33 in respect of such Compensation Event, unless such Compensation Event is also a Delay Event, in which case DB Co shall be entitled to compensation in an amount equal to the lesser of:
- (i) the Debt Service Amount accrued and paid or that became payable in accordance with the Lending Agreements during the period of delay; and
 - (ii) the compensation which, but for the application of this Section 33.5, DB Co would have been entitled to receive pursuant to Section 33.2(b).

33.6 Special Compensation Regarding Category 1 Utility Company

- (a) For the purposes of the special compensation regarding Category 1 Utility Companies, the following shall apply:
- (i) Sections 33.3 and 33.4 shall apply to the compensation set out in this Section 33.6 notwithstanding that the Delay Event referred to in Section 32.1(a)(xxiv) is not a Compensation Event.
- (b) If it is agreed, or determined in accordance with Schedule 27 - Dispute Resolution Procedure, that there has been a Delay Event referred to in Section 32.1(a)(xxiv), DB Co shall be entitled to the following:
- (i) an amount calculated in accordance with the following:
 - (A) For the purpose of this Section 33.6(b)(i) “**Non-Debt Compensation Amount**” means an amount that would place DB Co in no better and no worse position than it would have been in had the applicable Delay Event referred to in Section 32.1(a)(xxiv) not occurred but excluding, any interest or financing costs accrued and paid or which became payable in accordance with the Lending Agreements during the period of the applicable Delay Event (such excluded amount, the “**Special Utility Debt Compensation Amount**”).
 - (B) If the applicable Delay Event delays any Substantial Completion for 30 or fewer days, the City shall pay to DB Co an amount equal to [REDACTED]

per cent of the Non-Debt Compensation Amount and [REDACTED] per cent of the Special Utility Debt Compensation Amount for the period of the delay.

- (C) If the applicable Delay Event delays any Substantial Completion for 60 or fewer days, the City shall pay to DB Co an amount equal to,
 - (I) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the first 30 days of the delay, plus,
 - (II) [REDACTED] per cent of the Non-Debt Compensation Amount for the number of days of delay exceeding 30 days of delay; plus
 - (III) [REDACTED] per cent of the Special Utility Debt Compensation Amount for the period of the delay.
- (D) If the applicable Delay Event delays any Substantial Completion for 180 or fewer days, the City shall pay to DB Co an amount equal to,
 - (I) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the first 30 days of delay, plus,
 - (II) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the next 30 days of delay, plus,
 - (III) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the number of days exceeding 60 days of delay; plus
 - (IV) [REDACTED] per cent of the Special Utility Debt Compensation Amount for the period of the delay.
- (E) If the applicable Delay Event delays any Substantial Completion for more than 180 days, the City shall pay to DB Co an amount equal to,
 - (I) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the first 30 days of delay, plus,
 - (II) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the next 30 days of delay, plus,
 - (III) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the next 120 days of delay, plus,
 - (IV) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the number of days exceeding 180 days of delay, plus
 - (V) [REDACTED] per cent of the Special Utility Debt Compensation Amount for the period of the delay.

34. RELIEF EVENTS

34.1 Definition

(a) For the purposes of this Project Agreement, “**Relief Event**” means any of the following events or circumstances to the extent, in each case, that it causes any failure by a Party to perform any of its obligations under this Project Agreement:

- (i) fire, explosion, lightning, storm, tempest, hurricane, tornado, flood, bursting or overflowing of water tanks, apparatus or pipes, ionizing radiation (to the extent it does not constitute Force Majeure), earthquake, riot or civil commotion;
- (ii) failure by any Utility Company, local authority or other like body to perform works or provide services (solely in its role as utility service provider or similar service provider to the Project), provided, however, that such a failure shall not, in any event, be cause for a Relief Event, unless DB Co:
 - (A) has performed its obligations under any applicable agreement with the Utility Company with respect to the provision of such services and the relevant Utility Company has failed to meet its obligations thereunder; and
 - (B) has made all, and is continuing to make all, commercially reasonable efforts to diligently enforce its legal rights under any applicable agreement in respect of such services and otherwise cause the Utility Company to perform those works or services.

For clarity, Section 34.1(a)(ii) shall apply only in circumstances where the Utility Company is providing services to DB Co of the type provided by the Utility Company in the normal course of its business. For further clarity, Section 34.1(a)(ii) shall not apply in circumstances where DB Co has entered into an agreement for the design and construction of Utility Infrastructure and the applicable Utility Company has failed to comply with its obligations under such an agreement;

- (iii) accidental loss or damage to the Works and/or the New City Infrastructure or any roads servicing the Lands;
- (iv) without prejudice to any obligation of DB Co to provide stand-by power facilities in accordance with this Project Agreement, failure or shortage of power, fuel or transport;
- (v) blockade or embargo falling short of Force Majeure;
- (vi) any official or unofficial strike, lockout, work to rule or other labour-related action generally affecting the New City Infrastructure, the New MTO Infrastructure or construction industry (or a significant sector of that industry) in the Province of Ontario; or
- (vii) any civil disobedience or protest action, including any action taken by any person or persons protesting or demonstrating against the carrying out of any part of the Works or the construction and/or operation of transit systems in general, provided, however, that a

civil disobedience or protest action shall not, in any event, be cause for a Relief Event unless DB Co has fully complied with Section 11.13,

provided, in each case, that such event does not arise (directly or indirectly) as a result of any act or omission of the Party claiming relief and/or (i) in the case of DB Co claiming relief, as a result of any act or omission of any DB Co Party and (ii) in the case of the City claiming relief, as a result of any act or omission of any City Party.

34.2 Consequences of a Relief Event

- (a) Subject to Section 34.3, no right of termination, other than either Party's right to terminate this Project Agreement pursuant to Section 38.1, shall arise under this Project Agreement by reason of any failure by a Party to perform any of its obligations under this Project Agreement, but only to the extent that such failure to perform is caused by the occurrence of a Relief Event (it being acknowledged and agreed by the Parties that all other rights and obligations of the Parties under this Project Agreement remain unaffected by the occurrence of a Relief Event).
- (b) In respect of a Relief Event that is also a Delay Event pursuant to Section 32.1(a)(xi):
 - (i) DB Co shall only be relieved of its obligations under this Project Agreement to the extent, if any, provided for in Section 32, and, to the extent such Relief Event causes any Lane Closure or Bus Rapid Transit Lane Closure, DB Co shall be relieved from any Lane Closure Adjustment, Bus Rapid Transit Lane Closure Adjustment or Peak Hour Lane Interruption that would otherwise result therefrom; and
 - (ii) in respect of a Relief Event referred to in Sections 34.1(a)(ii) (but only in respect of failure by a Utility Company to perform works or provide services), 34.1(a)(v), 34.1(a)(vi) or 34.1(a)(vii), on the earlier of (A) the affected Substantial Completion Date and (B) the date of payment of the City Default Termination Sum or Non-Default Termination Sum (and as a part thereof) in accordance with Schedule 23 – Compensation on Termination, the City shall pay to DB Co an amount equal to the Debt Service Amount accrued and paid or that became payable in accordance with the Lending Agreements during the period of delay by DB Co or any DB Co Party to the Lenders up to and including the applicable Scheduled Substantial Completion Date or the date of payment of the City Default Termination Sum or Non-Default Termination Sum, as applicable, together with interest thereon at the rate payable on the principal amount funded under the Lending Agreements, which, but for the Delay Event, would not have been paid by DB Co to the Lenders.
- (c) If a Relief Event occurs, DB Co shall not be entitled to receive any compensation other than as expressly provided in Sections 34.2(b)(ii) and 40.
- (d) Subject to Section 40, DB Co's sole right to payment or otherwise in relation to the occurrence of a Relief Event shall be as provided in this Section 34.

34.3 Mitigation and Process

- (a) Where a Party is (or claims to be) affected by a Relief Event, such Party shall take commercially reasonable steps to mitigate the consequences of the Relief Event upon the performance of its obligations under this Project Agreement, shall resume performance of its obligations affected by

the Relief Event as soon as practicable and shall use commercially reasonable efforts to remedy its failure to perform.

- (b) To the extent that the Party claiming relief does not comply with its obligations under this Section 34.3, such failure shall be taken into account in determining such Party's entitlement to relief pursuant to this Section 34.
- (c) The Party claiming relief shall give written Notice to the other Party within 5 Business Days after such Party becoming aware of the relevant Relief Event. Such initial Notice shall give sufficient details to identify the particular event claimed to be a Relief Event.
- (d) A subsequent written Notice shall be given by the Party claiming relief to the other Party within a further 5 Business Days of the initial Notice, which Notice shall contain such relevant information relating to the failure to perform (or delay in performing) as is available, including, without limitation, the effect of the Relief Event on the ability of the Party to perform, the action being taken in accordance with Section 34.3(a), the date of the occurrence of the Relief Event, and an estimate of the period of time required to overcome the Relief Event and/or its effects.
- (e) The Party claiming relief shall notify the other as soon as the consequences of the Relief Event have ceased and of when performance of its affected obligations can be resumed.
- (f) If, following the issue of any Notice referred to in Section 34.3(d), the Party claiming relief receives or becomes aware of any further information relating to the Relief Event and/or any failure to perform, such Party shall submit such further information to the other Party as soon as reasonably possible.

34.4 Insured Exposure

- (a) The compensation payable to DB Co pursuant to this Section 34 shall be reduced by any amount which DB Co or a DB Co Party recovers, or is entitled to recover, under any insurance policy, or would have recovered if it had complied with the requirements of this Project Agreement in respect of insurance or the terms of any policy of insurance required under this Project Agreement, which amount, for greater certainty, shall not include any excess or deductibles or any amount over the maximum amount insured under any such insurance policy.

35. FORCE MAJEURE

35.1 Definition

- (a) For the purposes of this Project Agreement, "**Force Majeure**" means any of the following events or circumstances which directly causes either Party to be unable to perform all or a material part of its obligations under this Project Agreement:
 - (i) war, civil war, armed conflict, terrorism, acts of foreign enemies or hostilities;
 - (ii) nuclear or radioactive contamination of the Works, the New City Infrastructure and/or the Lands, unless DB Co or any DB Co Party is the source or cause of the contamination;
 - (iii) chemical or biological contamination of the Works, the New City Infrastructure and/or the Lands from any event referred to in Section 35.1(a)(i);

- (iv) pressure waves caused by devices traveling at supersonic speeds; or
- (v) the discovery of any Species-at-Risk, fossils, artefacts and other objects having artistic, historic, archaeological or monetary value, including human remains and burial sites, which, as a result of Applicable Law, require the Works to be abandoned.

35.2 Consequences of Force Majeure

- (a) Subject to Section 35.3, the Party claiming relief shall be relieved from liability under this Project Agreement to the extent that, by reason of the Force Majeure, it is not able to perform its obligations under this Project Agreement.
- (b) In respect of an event of Force Majeure that is also a Delay Event pursuant to Section 32.1(a)(xii):
 - (i) DB Co shall only be relieved of its obligations under this Project Agreement to the extent, if any, provided for in Section 32; and
 - (ii) on the earlier of (A) the affected Substantial Completion Date(s) and (B) the date of payment of the City Default Termination Sum or Non-Default Termination Sum (and as a part thereof) in accordance with Schedule 23 – Compensation on Termination, the City shall pay to DB Co an amount equal to the Debt Service Amount accrued and paid or that accrued in accordance with the Lending Agreements during the period of delay by DB Co or any DB Co Party to the Lenders up to and including the applicable Scheduled Substantial Completion Date(s) or the date of payment of the City Default Termination Sum or Non-Default Termination Sum, as applicable, together with interest thereon at the rate payable on the principal amount of debt funded under the Lending Agreements, which, but for the Delay Event, would not have been paid by DB Co to the Lenders.
- (c) If an event of Force Majeure occurs prior to the affected Substantial Completion Date(s), DB Co shall not be entitled to receive any compensation other than as expressly provided in Sections 35.2(b)(ii) and 40.
- (d) Subject to Section 40, DB Co's sole right to payment or otherwise in relation to the occurrence of an event of Force Majeure shall be as provided in this Section 35.
- (e) Subject to the provisions of this Section 35, and with respect to an event of Force Majeure that is not a Delay Event and that arises prior to the affected Substantial Completion Date(s), (i) a Lane Closure that is directly caused or extended by the occurrence of an event of Force Majeure shall not be included in the Aggregate Actual Lane Closures or the Aggregate Actual Lane Closure Cost for the relevant Road Section for the purposes of calculating the Lane Closure Adjustment in accordance with the process set out in Schedule 34 – Mobility Matters.

35.3 Mitigation and Process

- (a) Where a Party is (or claims to be) affected by an event of Force Majeure, such Party shall take commercially reasonable steps to mitigate the consequences of such event of Force Majeure upon the performance of its obligations under this Project Agreement, shall resume performance of its obligations affected by the event of Force Majeure as soon as practicable and shall use

commercially reasonable efforts to remedy its failure to perform, including efforts to minimize any negative impact of the event of Force Majeure on the Works Schedule.

- (b) To the extent that the Party claiming relief does not comply with its obligations under this Section 35.3, such failure shall be taken into account in determining such Party's entitlement to relief pursuant to this Section 35.
- (c) The Party claiming relief shall give written Notice to the other Party within 5 Business Days after such Party becoming aware of the relevant event of Force Majeure. Such initial Notice shall give sufficient details to identify the particular event claimed to be an event of Force Majeure.
- (d) A subsequent written Notice shall be given by the Party claiming relief to the other Party within a further 5 Business Days of the initial Notice, which Notice shall contain such relevant information relating to the failure to perform (or delay in performing) as is available, including, without limitation, the effect of the event of Force Majeure on the ability of the Party to perform, the action being taken in accordance with Section 35.3(a), the date of the occurrence of the event of Force Majeure, and an estimate of the period of time required to overcome the event of Force Majeure and its effects.
- (e) The Party claiming relief shall notify the other as soon as the consequences of the event of Force Majeure have ceased and of when performance of its affected obligations can be resumed.
- (f) If, following the issue of any Notice referred to in Section 35.3(d), the Party claiming relief receives or becomes aware of any further information relating to the event of Force Majeure and/or any failure to perform, such Party shall submit such further information to the other Party as soon as reasonably possible.

35.4 Insured Exposure

- (a) The compensation payable to DB Co pursuant to this Section 35 shall be reduced by any amount which DB Co or a DB Co Party recovers, or is entitled to recover, under any insurance policy, or would have recovered if it had complied with the requirements of this Project Agreement in respect of insurance or the terms of any policy of insurance required under this Project Agreement, which amount, for greater certainty, shall not include any excess or deductibles or any amount over the maximum amount insured under any such insurance policy.

35.5 Modifications

- (a) The Parties shall use commercially reasonable efforts to agree to any modifications to this Project Agreement which may be equitable having regard to the nature of an event or events of Force Majeure. Schedule 27 – Dispute Resolution Procedure shall not apply to a failure of the City and DB Co to reach agreement pursuant to this Section 35.5.

36. DB CO DEFAULT

36.1 DB Co Events of Default

- (a) For the purposes of this Project Agreement, “**DB Co Event of Default**” means any one or more of the following events or circumstances:

- (i) the occurrence of any of the following events other than as a consequence of a breach by the City of its payment obligations hereunder:
 - (A) DB Co admits in writing its inability to pay its debts generally as they become due, or makes a general assignment for the benefit of creditors, or a receiver, manager, administrator, administrative receiver, receiver and manager, trustee, custodian or other similar official or any other like person is appointed by or on behalf of or at the instance of a creditor of DB Co with respect to DB Co or any of the property, assets or undertaking of DB Co, or any creditor of DB Co takes control, or takes steps to take control, of DB Co or any of DB Co's assets, or any proceedings are instituted against DB Co that result in DB Co being declared or ordered bankrupt or in administration, liquidation, winding-up, reorganization, compromise, arrangement, adjustment, protection, relief or composition of it or with respect to it or its debts or obligations, or any such proceedings are instituted by DB Co seeking any such result, or any such proceedings are instituted by a person other than DB Co, the City, a City Party or a person related to any of them seeking such result and such proceedings have or will have a material adverse effect on the performance of the Works or of the City Activities (where such proceedings have not been withdrawn, stayed, discharged, or are otherwise of no further effect, within 90 days after being instituted), under any Applicable Law (including the *Bankruptcy and Insolvency Act* (Canada) and the *Companies' Creditors Arrangement Act* (Canada)) relating to bankruptcy, insolvency or reorganization of or relief with respect to debtors or debtors' obligations or assets or other similar matters, or seeking the appointment of a receiver, manager, administrator, administrative receiver, receiver and manager, trustee, custodian or other similar official or like person for it or with respect to any of its assets, or any resolutions are passed or other corporate actions of DB Co are taken to authorize any of the actions set forth in this Section 36.1(a)(i);
 - (B) DB Co ceases performing a substantial portion of its business, or a substantial portion of such business is suspended or is not being performed, whether voluntarily or involuntarily, that has or will have a material adverse effect on DB Co's ability to perform its obligations under this Project Agreement;
 - (C) if any execution, sequestration, extent, garnishment or other process of or order by any court becomes enforceable against DB Co or if a distress or analogous process is levied against any property of DB Co that materially adversely affects DB Co's ability to perform its obligations hereunder; or
 - (D) DB Co suffers any event, or any event or set of circumstances occurs or comes about, analogous to the foregoing events or sets of circumstances set out in this Section 36.1(a)(i) in any jurisdiction in which it is incorporated or resident and such event or set of circumstances would, if set out in Section 36.1(a)(i)(A), (B) or (C), constitute a DB Co Event of Default;

- (ii) DB Co failing to achieve East Substantial Completion or West Substantial Completion within 365 days after the West Scheduled Substantial Completion Date (the “**Longstop Date**”);
- (iii) [Not used];
- (iv) [Not used];
- (v) DB Co either:
 - (A) failing to deliver a Recovery Schedule under Section 2.4 of Schedule 12 – Works Scheduling Requirements;
 - (B) delivering a Recovery Schedule under Section 2.4 of Schedule 12 – Works Scheduling Requirements which indicates that DB Co will not achieve East Substantial Completion or West Substantial Completion by the Longstop Date;
 - (C) delivering a Recovery Schedule under Section 2.4 of Schedule 12 – Works Scheduling Requirements that is not acceptable to the Independent Certifier, acting reasonably, as to the matters set out in Section 2.4 of Schedule 12 – Works Scheduling Requirements.
- (vi) DB Co making any representation or warranty herein that is false or misleading when made, and that has or will have at any time a material adverse effect on the performance of Works, or the Governmental Activities, or that may compromise (A) the City’s reputation or integrity, or (B) the nature of the public transit system in the City of Ottawa or the Province of Ontario so as to affect public confidence in the public transit system in the City of Ottawa or the Province of Ontario or the Project, and, in the case of a false or misleading representation or warranty that is capable of being remedied, such breach is not remedied within 10 Business Days after receipt of Notice of the same from the City;
- (vii) DB Co committing a breach of Sections 42 or 43;
- (viii) DB Co committing a breach of its obligations under this Project Agreement which has or will have a material adverse effect on the performance of the City Activities (other than a breach that is otherwise referred to in Sections 36.1(a)(i) to (vii) inclusive or (ix) to (xviii) inclusive) other than where such breach is a consequence of a breach by the City of its obligations under this Project Agreement or the result of any circumstance described in Section 11.12(k), and upon becoming aware of such breach DB Co failing to remedy such breach in accordance with all of the following:
 - (A) DB Co shall:
 - (I) immediately commence and thereafter diligently continue to remedy the breach and to mitigate any adverse effects on the City and the performance of the City’s operations and the City Activities;
 - (II) put forward, within 5 Business Days after receipt of Notice of such breach from the City, a reasonable plan and schedule for diligently

remedying the breach and mitigating its effect, which plan and schedule shall specify in reasonable detail the manner in which, and the latest date by which, such breach is proposed to be remedied, which latest date shall in any event be within 60 days after Notice of such breach, or if such breach is not capable of being rectified in such period then such longer period as is reasonable in the circumstances; and

- (III) thereafter perform its obligations to achieve all elements of such plan and schedule in accordance with its terms within the time for the performance of its obligations thereunder;
- (ix) DB Co wholly abandoning the Works for a period which exceeds three Business Days from receipt by DB Co of a written request to return to the Site, other than as a consequence of a breach by the City of its obligations under this Project Agreement;
- (x) DB Co failing to comply with Sections 49.1 or 49.3;
- (xi) the occurrence of any Change in Ownership or Change in Control which is prohibited by Section 49.4;
- (xii) DB Co failing to remove an Encumbrance that arose due to an act or omission of DB Co or any DB Co Party (other than any Encumbrance derived through the City) within 45 days following the earlier of:
 - (A) the registration of such Encumbrance against title to the Lands or any part thereof; and
 - (B) the date on which DB Co or any DB Co Party knew, or ought to have known, about the existence of the Encumbrance;
- (xiii) DB Co failing to pay any sum or sums due to the City under this Project Agreement, which sum or sums are not being disputed by DB Co in accordance with Schedule 27 – Dispute Resolution Procedure or have not been set off by DB Co pursuant to Section 4.8(a)(ii), and which sum or sums, either singly or in aggregate, exceed(s) \$[REDACTED] (index linked), and such failure continues for 30 days from receipt by DB Co of a Notice of non-payment from the City;
- (xiv) DB Co failing to comply with Section 50;
- (xv) DB Co failing to comply with Section 8.3 or Schedule 28 – Refinancing;
- (xvi) DB Co failing to obtain any bond, security or insurance required to be obtained by or on behalf of DB Co pursuant to this Project Agreement or any such bond, security or insurance being vitiated or otherwise ceasing to be in full force and effect or in material compliance with the requirements set out in this Project Agreement, other than
 - (A) as a consequence of a breach by the City of its obligations under this Project Agreement; or

- (B) the failure to deliver the East Warranty Letter of Credit, West Warranty Letter of Credit, and/or the Remaining Works Letter of Credit (in respect of which failure the City will have the rights set out in Section 4.2(d), (e) and (h), respectively); or
 - (C) the failure to replace a Non-Renewed Warranty Letter of Credit, or renew the Remaining Works Letter of Credit (in respect of which failure the City will have the rights set out in Section 11.18(i) and 11.18A(i) respectively),
- and,
- (D) in respect of insurance, such breach by DB Co is not remedied within 10 Business Days after the occurrence of the breach; and
 - (E) in respect of a bond or security, such breach by DB Co is not remedied within 5 Business Days after DB Co becoming aware of such breach;
- (xvii) DB Co failing to comply with any determination, order or award made against DB Co in accordance with Schedule 27 – Dispute Resolution Procedure;
- (xviii) A default by DB Co or any DB Co Party under any of the Ancillary Documents following the expiry of any applicable notice and cure periods thereunder.

36.2 Notification of Occurrence

- (a) DB Co shall, promptly upon DB Co becoming aware of the occurrence, notify the City of the occurrence, and details, of any DB Co Event of Default and of any event or circumstance which is likely, with the passage of time, giving of Notice, determination of any condition, or otherwise, to constitute or give rise to a DB Co Event of Default.

36.3 Right to Termination

- (a) On the occurrence of a DB Co Event of Default, or at any time after the City becomes aware of a DB Co Event of Default, and, if the occurrence of a DB Co Event of Default is disputed by DB Co in good faith, then following confirmation in accordance with Schedule 27 – Dispute Resolution Procedure that a DB Co Event of Default has occurred, the City may, subject to Section 36.4 and 36.3(b), terminate this Project Agreement in its entirety by written Notice having immediate effect, such Notice to be given to DB Co, and to any person specified in the Lenders' Direct Agreement to receive such Notice.
- (b) In the event a DB Co Event of Default was caused solely by the Nominated Signalling Subcontractor, the City's rights to terminate this Project Agreement for such DB Co Event of Default shall be stayed for a period of 180 days after a Notice of default to DB Co for such DB Co Event of Default. In the event that during such 180 day period the City and DB Co mutually agree that the Nominated Signalling Contractor will not be able to perform the Nominated Signalling Subcontractor Works in accordance with the Current PBS, then subject to and in accordance with Schedule 22 – Variation Procedure, any consequential alteration, extension or variation in the Works shall result in a Variation.

36.4 Remedy Provisions

- (a) In the case of a DB Co Event of Default referred to in Sections 36.1(a)(i)(B), 36.1(a)(i)(C), 36.1(a)(i)(D) (where the DB Co Event of Default referred to in Section 36.1(a)(i)(D) is analogous to a DB Co Event of Default referred to in Section 36.1(a)(i)(B) or 36.1(a)(i)(C)), 36.1(a)(v), 36.1(a)(vi), 36.1(a)(vii), 36.1(a)(ix), 36.1(a)(x), 36.1(a)(xi), (where the DB Co Event of Default referred to in Section 36.1(a)(xi) is capable of being remedied), 36.1(a)(xiii), 36.1(a)(xv), 36.1(a)(xvi) (where the DB Co Event of Default referred to in Section 36.1(a)(xvi)) is not in respect of insurance), 36.1(a)(xvii), or 36.1(a)(xviii), the City shall, prior to being entitled to terminate this Project Agreement, give Notice of default to DB Co, and to any person specified in the Lenders' Direct Agreement to receive such Notice, and DB Co shall:
 - (i) within five Business Days after such Notice of default, put forward a reasonable plan and schedule for diligently remedying the DB Co Event of Default, which schedule shall specify in reasonable detail the manner in, and the latest date by which, such DB Co Event of Default is proposed to be remedied, which latest date shall, in any event, be within 30 days after the Notice of default, or if such breach is not capable of being remedied in such period then such longer period as is acceptable to the City, acting reasonably; and
 - (ii) thereafter, perform its obligations to achieve all elements of such plan and schedule in accordance with its terms within the time for the performance of its obligations thereunder.
- (b) Where DB Co puts forward a plan and schedule in accordance with Section 36.4(a)(i) that has a date for the DB Co Event of Default to be remedied that is beyond 30 days from the Notice of default, the City shall have 5 Business Days from receipt of the same within which to notify DB Co that the City does not accept such longer period in the plan and schedule and that the 30 day limit will apply, failing which the City shall be deemed to have accepted the longer period in the plan and schedule.
- (c) If a DB Co Event of Default, of which a Notice of default was given under Section 36.4(a), occurs and:
 - (i) DB Co fails to immediately commence and thereafter diligently continue to remedy the DB Co Event of Default and to mitigate any adverse effects on the City and the Governmental Activities; or
 - (ii) DB Co fails to put forward a plan and schedule pursuant to Section 36.4(a)(i); or
 - (iii) such DB Co Event of Default is not remedied within 30 days after such Notice of default or such longer period as is established pursuant to the plan and schedule established pursuant to Sections 36.4(a) and (b); or
 - (iv) where DB Co puts forward a plan and schedule pursuant to Section 36.4(a)(i) and DB Co fails to perform its obligations thereunder necessary to achieve all elements of such plan and schedule in accordance with its terms within the time for the performance of its obligations,

then the City may terminate this Project Agreement in its entirety by written Notice with immediate effect, such Notice to be given to DB Co, and to any person specified in the Lenders' Direct Agreement to receive such Notice.

- (d) Notwithstanding that the City may give the Notice referred to in Section 36.4(a), and without prejudice to the other rights of the City in this Section 36.4, at any time during which a DB Co Event of Default is continuing, the City may, at DB Co's risk and expense, take such steps as the City considers appropriate, either themselves or by engaging others (including a third party) to take such steps, to perform or obtain the performance of DB Co's obligations under this Project Agreement or to remedy such DB Co Event of Default.
- (e) Upon the occurrence of a DB Co Event of Default that DB Co has remedied pursuant to this Section 36.4, such occurrence of a DB Co Event of Default shall thereafter cease to be a DB Co Event of Default and the City shall not be entitled to terminate this Project Agreement for that occurrence of a DB Co Event of Default.

36.5 City Costs

- (a) DB Co shall reimburse the City for all reasonable costs (including all applicable Taxes and all legal or professional services, legal costs being on a full indemnity basis) properly incurred by the City in exercising its rights under this Section 36, including any relevant increased administrative expenses. The City shall take commercially reasonable steps to mitigate such costs.

36.6 No Other Rights to Terminate

- (a) The City shall have no right or entitlement to terminate this Project Agreement, or to accept any repudiation of this Project Agreement, and shall not purport to exercise any such right or entitlement except as set forth in Sections 36 and 38.

37. CITY DEFAULT

37.1 City Events of Default

- (a) For the purposes of this Project Agreement, "**City Event of Default**" means any one or more of the following events or circumstances:
 - (i) the City failing to pay any sum or sums due to DB Co under this Project Agreement, which sum or sums are not being disputed by the City in accordance with Schedule 27 – Dispute Resolution Procedure or have not been set off by the City pursuant to Section 4.8(a)(i), and which sum or sums, either singly or in aggregate, exceed(s) **[\$[REDACTED]]** (index linked), and:
 - (A) in respect of a Substantial Completion Payment or Construction Period Payment, such failure continues for a period of 10 Business Days; or
 - (B) in respect of any other payment due and payable by the City to DB Co under this Project Agreement, such failure continues for a period of 90 days,
- in any such case, from receipt by the City of a Notice of non-payment from or on behalf of DB Co;

- (ii) the City committing a material breach of its obligations under Section 16 (other than as a consequence of a breach by DB Co of its obligations under this Project Agreement), which breach materially adversely affects the ability of DB Co to perform its obligations under this Project Agreement for a continuous period of not less than 60 days; or
- (iii) an act of any Governmental Authority which renders it impossible for DB Co to perform all or substantially all of its obligations under this Project Agreement (other than as a consequence of a breach by DB Co of its obligations under this Project Agreement) for a continuous period of not less than 60 days, provided that, for greater certainty, the non-issuance of, or the imposition of any conditions or limitations in, any of the DB Co Permits, Licences, Approvals and Agreements shall not constitute an “act of any Governmental Authority”.

37.2 DB Co’s Options

- (a) On the occurrence of a City Event of Default and while the same is continuing, DB Co may give Notice to the City of the occurrence of such City Event of Default, which Notice will specify the details thereof, and, at DB Co’s option and without prejudice to its other rights and remedies under this Project Agreement, DB Co may:
 - (i) suspend performance of the Works until such time as the City has remedied such City Event of Default; or
 - (ii) if such City Event of Default has not been remedied within 30 days after receipt by the City of Notice of the occurrence of such City Event of Default, terminate this Project Agreement in its entirety by Notice in writing having immediate effect.

37.3 DB Co’s Costs

- (a) The City shall reimburse DB Co for all reasonable costs (including all applicable Taxes and all legal or professional services, legal costs being on a full indemnity basis) properly incurred by DB Co in exercising its rights under this Section 37, including any relevant increased administrative expenses. DB Co shall take commercially reasonable steps to mitigate such costs.

37.4 No Other Rights to Terminate

- (a) DB Co shall have no right or entitlement to terminate this Project Agreement, nor to accept any repudiation of this Project Agreement, and shall not exercise, nor purport to exercise, any such right or entitlement except as expressly set forth in this Project Agreement.

38. RELIEF EVENT AND NON DEFAULT TERMINATION

38.1 Termination for Relief Event

- (a) If a Relief Event occurs and the effects of the Relief Event continue for 180 days from the date on which the Party affected gives Notice to the other Party pursuant to Section 34.3(c), either Party may, at any time thereafter, terminate this Project Agreement by written Notice to the other Party having immediate effect, provided that the effects of the Relief Event continue during such period to prevent either Party from performing a material part of its obligations under this Project Agreement.

38.2 Termination for Force Majeure

- (a) If an event of Force Majeure occurs and the Parties, having used commercially reasonable efforts, have failed to reach agreement on any modification to this Project Agreement pursuant to Section 35.5 within 180 days after the date on which the Party affected gives Notice to the other Party as set out therein, either Party may, at any time thereafter, terminate this Project Agreement by written Notice to the other Party having immediate effect, provided that the effects of the event of Force Majeure continue during such period to prevent either Party from performing a material part of its obligations under this Project Agreement.

38.3 Termination for Convenience

- (a) The City shall, in its sole discretion and for any reason whatsoever, be entitled to terminate this Project Agreement at any time on 180 days written Notice to DB Co.
- (b) In the event of Notice being given by the City in accordance with this Section 38.3, the City shall, at any time before the expiration of such Notice, be entitled to direct DB Co to refrain from commencing, or allowing any third party to commence, the Works, or any part or parts of the Works where such Works have not yet been commenced.

38.4 Automatic Expiry on Expiry Date

- (a) This Project Agreement shall terminate automatically on the Expiry Date.
- (b) DB Co shall not be entitled to any compensation due to termination of this Project Agreement on expiry of the Project Term on the Expiry Date.

39. EFFECT OF TERMINATION

39.1 Termination

- (a) Notwithstanding any provision of this Project Agreement, upon the service of a Notice of termination or termination on the Expiry Date pursuant to Section 38.4, this Section 39 shall apply in respect of such termination.

39.2 Continued Effect – No Waiver

- (a) Notwithstanding any breach of this Project Agreement by a Party, the other Party may elect to continue to treat this Project Agreement as being in full force and effect and to enforce its rights under this Project Agreement without prejudice to any other rights which such other Party may have in relation to such breach. The failure of either Party to exercise any right under this Project Agreement, including any right to terminate this Project Agreement and any right to claim damages, shall not be deemed to be a waiver of such right for any continuing or subsequent breach.

39.3 Continuing Performance

- (a) Subject to any exercise by the City of its rights to perform, or to seek, pursuant to this Project Agreement, a third party to perform, the obligations of DB Co, and subject to the rights of DB Co pursuant to Section 37.2, the Parties shall continue to perform their obligations under this Project

Agreement (including, if applicable, pursuant to Schedule 23 – Compensation on Termination) notwithstanding the giving of any Notice of default or Notice of termination, until the termination of this Project Agreement becomes effective in accordance with this Section 39.

39.4 Effect of Notice of Termination

- (a) On the service of a Notice of termination, or termination on the Expiry Date pursuant to Section 38.4:
- (i) if termination is prior to any Substantial Completion Date(s), in so far as any transfer shall be necessary to fully and effectively transfer such property to the City as shall not already have been transferred to the City pursuant to Section 45.1, DB Co shall transfer to, and there shall vest in, the City, free from all Encumbrances (other than the Encumbrances caused or consented to by the City), such part of the Works, the New City Infrastructure, and the New MTO Infrastructure as shall have been constructed and such items of the plant, infrastructure and equipment as shall have been procured by DB Co, and, if the City so elects:
 - (A) all plant, equipment and materials (other than those referred to in Section 39.4(a)(i)(B)) on or near to the Lands shall remain available to the City for the purposes of completing the Works; and
 - (B) all construction plant and equipment shall remain available to the City for the purposes of completing the Works, subject to payment by the City of the Construction Contractor's reasonable charges;
 - (ii) if termination is prior to any Substantial Completion Date(s), DB Co shall deliver to the City (to the extent such items have not already been delivered to the City) one complete set of all Project Data and Intellectual Property relating to the design, construction and completion of the Works, the New City Infrastructure, and the New MTO Infrastructure, as applicable, comprising the Works that are the subject of such Substantial Completion Date(s);
 - (iii) in so far as title shall not have already passed to the City pursuant to Section 45.1 or Section 39.4(a)(i), DB Co shall hand over to, and there shall vest in, the City, free from all Encumbrances (other than any Encumbrances caused or consented to by the City), the New City Infrastructure and the New MTO Infrastructure together with all other assets and rights capable of being transferred that are necessary for the performance of the Project and the Works and all facilities and equipment, and to the extent that any such assets or rights are not capable of being transferred by DB Co to the City, DB Co shall enter into agreements or make other arrangements in order to permit the use of the assets or rights by the City in order to enable them, or their designated agents or subcontractors, to continue to perform the activities which would have otherwise been performed by DB Co if this Project Agreement had not been terminated;
 - (iv) if the City so elects, DB Co shall ensure that any of the Subcontracts between DB Co and a Subcontractor (including the Design and Construction Contract), any other instrument entered into between any such Subcontractor and DB Co for securing the performance by such Subcontractor of its obligations in respect of the Works or to protect the interests of DB Co, shall be novated or assigned to the City or its nominee, provided that where

termination occurs other than as a result of a DB Co Event of Default, the consent of the relevant Subcontractor shall be required, and further provided that any such novation or assignment of the Design and Construction Contract with the Construction Contractor shall be made by the City pursuant to, and subject to, the terms of the Construction Contractor's Direct Agreement;

- (v) DB Co shall, or shall ensure that any DB Co Party shall, offer to sell (and if the City so elects, execute such sale) to the City at a fair value (determined as between a willing vendor and willing purchaser, with any Disputes as to such fair value being resolved in accordance with Schedule 27 – Dispute Resolution Procedure), free from all Encumbrances (other than any Encumbrances caused or consented to by the City), all or any part of the stocks of material and other assets, road vehicles, construction equipment, spare parts and other moveable property owned by DB Co or any DB Co Parties and dedicated to or predominantly used in respect of the New City Infrastructure, and reasonably required by the City in connection with the operation of the New City Infrastructure;
- (vi) DB Co shall use commercially reasonable efforts to assign, or otherwise transfer, to the City, free from all Encumbrances (other than any Encumbrances caused or consented to by the City), the benefit of all manufacturers' warranties, including all documentation in respect thereof, in respect of mechanical and electrical plant and equipment used or made available by DB Co under this Project Agreement and included in the New City Infrastructure and the New MTO Infrastructure; and
- (vii) DB Co shall deliver to the City all information, reports, documents, records and the like referred to in Section 28, including as referred to in Schedule 26 – Record Provisions, except where such are required by Applicable Law to be retained by DB Co or the DB Co Parties (in which case complete copies shall be delivered to the City).

39.5 Ownership of Information

- (a) Subject to Section 41, all information obtained by DB Co, including the As-Built Drawings, Record Drawings, and other technical drawings and data, supplier agreements and contracts, utilities consumption information, environmental and technical reports, static building information, lease, licence and subletting data and contracts, asset condition data, standard operating procedures, processes and manuals and all other information directly related to the Works accumulated over the course of the Project Term shall be the property of the City and upon termination of this Project Agreement shall be provided or returned to the City, as applicable, in electronic format acceptable to the City, acting reasonably, where it exists in electronic format, and in its original format, when not in electronic format.

39.6 Provision in Subcontracts

- (a) DB Co shall make provision in all Subcontracts to which it is a party (including requiring the relevant DB Co Parties to make such provision and to require other DB Co Parties to make such provision) to ensure that the City shall be in a position to exercise its rights, and DB Co shall be in a position to perform its obligations, under this Section 39.

39.7 Transitional Arrangements

- (a) On the termination of this Project Agreement for any reason, for a reasonable period both before and after any such termination, DB Co shall:
 - (i) as soon as practicable remove from the Lands all property belonging to DB Co or any DB Co Party that is not acquired by the City pursuant to Section 39.4 or otherwise, and, if DB Co has not done so within 60 days after any Notice from the City requiring it to do so, the City may, without being responsible for any loss, damage, costs or expenses, remove and sell any such property and shall hold any proceeds, less all costs incurred to the credit of DB Co;
 - (ii) forthwith deliver to the City Representative:
 - (A) all keys to, and any pass cards and other devices used to gain access to any part of the New City Infrastructure; and
 - (B) to the extent transferable and without prejudice to the City's rights pursuant to Section 41, any copyright licences for any computer programs, or licences to use the same, used in connection with the operation of the New City Infrastructure; and
 - (iii) as soon as practicable vacate the Lands and shall leave the Lands and the New City Infrastructure in a safe, clean and orderly condition.

39.8 Termination upon Aforesaid Transfer

- (a) On completion of DB Co's obligations pursuant to this Section 39, this Project Agreement shall terminate and, except as provided in Section 39.9, all rights and obligations of the City and DB Co under this Project Agreement shall cease and be of no further force and effect.

39.9 Survival

- (a) Except as otherwise provided in this Project Agreement, termination of this Project Agreement shall be without prejudice to, and shall not affect:
 - (i) all representations, warranties and indemnities under this Project Agreement; and
 - (ii) Sections 1.2, 1.3, 1.5, 4.8, 4.9, 4.11, 6, 7, 8, 11.15(b), 11.16(a), 11.17, 11.17A, 11.18, 11.18A, 17.2, 17.3, 18.1, 18.2, 18.3(a), 18.4(a), 22.6, 25.15, 27, 28, 36.5, 37.3, 38.4, 39, 40, 41 (with the exception of 41.4(b)), 42, 43, 44.3, 45, 46, 47, 48, 50.3, 51.1, 53.2, 53.3, 53.4, 53.8, 53.9, 53.10, 53.11, 53.12 of this Project Agreement, Schedule 7B – Warranty Letters of Credit, Schedule 7C – Remaining Works Letter of Credit, Schedule 14 – Testing & Commissioning, Schedule 23 – Compensation on Termination, Schedule 32 – Financial Model, Sections 1.2 – 1.8 of Schedule 26 – Record Provisions, Schedule 27 – Dispute Resolution Procedure, Sections 2.1 – 2.6 and 3.2-3.9 of Schedule 24 – Intellectual Property, Schedule 34 – Mobility Matters, and any other provisions of this Project Agreement which are expressed to survive termination or which are required to give effect to such provisions which survive termination or to such termination or the consequences of such termination,

all of which shall survive the termination of this Project Agreement, including for termination on the Expiry Date pursuant to Section 38.4. For clarity, any termination of this Project Agreement shall be without prejudice to, and shall not affect, the Performance Guarantee of Construction Guarantor, which shall survive the termination of this Project Agreement, including termination on the Expiry Date pursuant to Section 38.4, in respect of any and all of such surviving provisions of the Project Agreement.

40. COMPENSATION ON TERMINATION

40.1 Compensation on Termination

- (a) If this Project Agreement is terminated in accordance with the terms hereof, then Schedule 23 – Compensation on Termination shall apply and the City shall pay DB Co any applicable compensation on termination.

40.2 Full and Final Settlement

- (a) Except as otherwise provided in Section 40.2(b), any compensation paid pursuant to this Section 40, including pursuant to Schedule 23 – Compensation on Termination in the total amount owing thereunder, shall be in full and final settlement of any claims, demands and proceedings of DB Co and the City, and each shall be released from all liability to the other in relation to any breaches or other events leading to such termination of this Project Agreement, and the circumstances leading to such breach or termination, and DB Co and the City shall be precluded from exercising all other rights and remedies in respect of any such breach or termination whether in contract, tort, restitution, statute, at common law or otherwise.
- (b) Section 40.2(a) shall be without prejudice to:
 - (i) any liability of either Party to the other, including under the indemnities contained in this Project Agreement, that arose prior to the Termination Date (but not from the termination itself or the events leading to such termination) to the extent such liability has not already been set off pursuant to Section 4.8 or taken into account pursuant to Schedule 23 – Compensation on Termination in determining or agreeing upon the City Default Termination Sum, Non-Default Termination Sum, DB Co Default Termination Sum or any other termination sum, as the case may be; and
 - (ii) any liabilities arising under or in respect of any breach by either Party of their obligations surviving termination of this Project Agreement pursuant to Section 39.9, or the Sections referred to therein, which did not lead to such termination and which arises or continues after the Termination Date.

41. INTELLECTUAL PROPERTY

41.1 Ownership of Intellectual Property

- (a) Subject to Section 41.3(a), the Ownership of Intellectual Property shall be as set out in Schedule 24 – Intellectual Property. DB Co and the City shall each comply with the requirements of Schedule 24 – Intellectual Property.

41.2 Licenses to Intellectual Property

- (a) Schedule 24 – Intellectual Property sets out the terms on which Intellectual Property used or supplied in connection with the Project will be licenced.

41.3 Representation and Warranty

- (a) DB Co represents, warrants and covenants to the City that:
 - (i) DB Co has and shall have the full and unencumbered right to provide all rights and licenses granted to the City in this Project Agreement and to make all assignments of Intellectual Property as contemplated in this Project Agreement and to otherwise fully comply with the terms and requirements of Schedule 24 – Intellectual Property and its obligations therein;
 - (ii) any Intellectual Property licenses to the City pursuant to this Project Agreement does not and shall not infringe, and is not and shall not be misappropriation of, any third party Intellectual Property rights;
 - (iii) as of Commercial Close:
 - (A) DB Co has not received any alleged infringement or misappropriation notices from third parties regarding any such Intellectual Property; and
 - (B) no fact is known to DB Co (including in respect of any actual, pending or threatened disputes, claims, suits, actions or proceedings or any other circumstance or event) that will, or could reasonably, effect, limit or prevent DB Co from fully complying with this Section 41.3(a).

41.4 Jointly Developed Materials

- (a) To the extent any data, documents, drawings, reports, plans, software, formulae, calculations or designs or any other materials or Intellectual Property are developed jointly by,
 - (i) DB Co or any Subcontractor and the City to the exclusion of any other party pursuant to this Project Agreement or in relation to the New City Infrastructure, the Lands or Works (the “**City Jointly Developed Materials**”); and
 - (ii) DB Co or any Subcontractor and MTO to the exclusion of any other party in relation to the New MTO Infrastructure that will be owned by MTO (the “**MTO Jointly Developed Materials**”),(together, the “**Jointly Developed Materials**”), then the Parties hereby acknowledge and agree that,
 - (iii) the City shall be the sole and exclusive owner of all right, title and interest in and to the City Jointly Developed Materials, any Intellectual Property associated therewith and any and all Modifications thereto and DB Co shall, at the request of the City, execute such further agreements and cause the Subcontractors to execute any and all assignments,

waivers of moral rights and other documents as may be reasonably required to fulfill the intent of this provision; and

- (iv) MTO shall be the sole and exclusive owner of all right, title and interest in and to the MTO Jointly Developed Materials, any Intellectual Property associated therewith and any and all Modifications thereto and that DB Co shall, at the request of MTO, execute such further agreements and cause the Subcontractors to execute any and all assignments, waivers of moral rights and other documents as may be reasonably required to fulfill the intent of this provision.
- (b) The City hereby grants DB Co, and shall procure that MTO grants DB Co, a royalty free, non-exclusive and non-transferable licence, with a right to grant sub-licences to each Subcontractor, to use the Jointly Developed Materials during the Project Term for the sole purposes of DB Co or any Subcontractor performing its obligations under this Project Agreement or its Subcontract, as applicable.
- (c) Upon termination of this Project Agreement, all rights and licences whatsoever granted to DB Co in the Jointly Developed Materials shall automatically terminate, and DB Co shall return any and all Jointly Developed Materials in the custody or possession of DB Co to,
 - (i) the City, in the case of the City Jointly Developed Materials; and
 - (ii) MTO, in the case of the MTO Jointly Developed Materials.
- (d) In the event of any inconsistency between this Section 41 and any provision of Schedule 24 – Intellectual Property, the wording of this Section 41 shall prevail.

41.5 Maintenance of Data

- (a) To the extent that any of the data, materials and documents referred to in this Section 41 or Schedule 24 – Intellectual Property are generated by, or maintained on, a computer or similar system, DB Co shall procure for the benefit of the City, either at no charge or at the lowest reasonable fee, the grant of a licence or sub-licence for any relevant software to enable the City or its nominee to access and otherwise use (subject to the payment by the City of any relevant fee) such data, materials and documents in accordance with rights granted pursuant to Schedule 24 – Intellectual Property.
- (b) For the purposes of Section 41.5(a), “use” has the meaning set out in Schedule 24 – Intellectual Property, and includes the Limited Modification Rights.
- (c) Without limiting the obligations of DB Co under Section 41.5(a), DB Co shall ensure the back-up and storage in safe custody of the data, materials and documents referred to in this Section 41 in accordance with Good Industry Practice. DB Co shall submit to the City Representative DB Co’s proposals for the back-up and storage in safe custody of such data, materials and documents and the City shall be entitled to object if the same is not in accordance with Good Industry Practice. DB Co shall comply, and shall cause all DB Co Parties to comply, with all procedures to which the City Representative has not objected. DB Co may vary its procedures for such back-up and storage subject to submitting its proposals for change to the City Representative, who shall be entitled to object on the basis set out above. Any Disputes in connection with the provisions of

this Section 41.5(c) may be referred for resolution in accordance with Schedule 27 – Dispute Resolution Procedure with reference to Good Industry Practice.

41.6 City Trade-Marks

- (a) DB Co shall not:
 - (i) use any City Trade-Marks without obtaining a trade-mark licence on terms and conditions mutually satisfactory to the City and DB Co, each acting reasonably;
 - (ii) use the names or any identifying logos or otherwise of the City or the City Representative in any advertising or permit them so to be used except with the prior written consent of the City; or
 - (iii) use any Trade-Marks of RTG or any RTG Party without obtaining a trade-mark licence on terms and conditions satisfactory to the RTG or such RTG Party.

41.7 Confidential Information

- (a) It is expressly acknowledged and agreed that nothing in this Section 41 shall be deemed to create or convey to a Party any right, title, or interest in and/or to the Confidential Information of the other Party.

41.8 Government Use of Documents

- (a) DB Co hereby disclaims any right, title or interest of any nature whatsoever it may have in or to this Project Agreement that might prohibit or otherwise interfere with the City's ability to use this Project Agreement in any manner desired by the City.
- (b) DB Co hereby consents to the use by the City of this Project Agreement, and any portion thereof, subject to compliance with FIPPA and to the removal by the City (in consultation with DB Co) of any information supplied in confidence to the City by DB Co in circumstances where disclosure may be refused under section 17(1) of FIPPA.

41.9 Restrictions

- (a) The Parties hereby agree that either Party may use the Project Know-How for any purpose, provided, however, that neither DB Co nor any Subcontractor shall use the Project Know-How to the extent that such Project Know-How incorporates, references or is otherwise based on the Project Data, the Intellectual Property Rights, the Jointly Developed Material, the Intellectual Property of the City, the Intellectual Property of any City Party or any third party provided by the City, the Confidential Information of the City, or the Confidential Information of any City Party or any third party provided by the City, including the Output Specifications unless such use is otherwise permitted pursuant to this Project Agreement in order to enable DB Co and the DB Co Parties to meet DB Co's obligations under this Project Agreement.
- (b) DB Co hereby covenants and agrees that it will not make any commercial use, including use in any other request for proposal or similar procurement process, of the Project Data, the Intellectual Property Rights, the Jointly Developed Material, the Intellectual Property of the City, the Intellectual Property of any City Party or any third party provided by the City, the Confidential

Information of the City, or the Confidential Information of any City Party or any third party provided by the City, including the Output Specifications, or any other drawings, reports, documents, plans, formulae, calculations, manuals, or other data that was created specifically for the Project or was based upon the Project Data, the Intellectual Property Rights, the Jointly Developed Material, the Intellectual Property of the City, the Intellectual Property of any City Party provided by the City, the Confidential Information of the City, or the Confidential Information of any City Party provided by the City, including the Output Specifications.

- (c) Nothing in this Section 41.9 shall be deemed to grant to any party (including any Subcontractor or any personnel thereof) any right or license in respect of any other party's or other persons' Intellectual Property.

42. CONFIDENTIALITY

42.1 Disclosure

- (a) Subject to Sections 42.1(b), 42.1(c) and 42.2, but notwithstanding anything else in this Project Agreement to the contrary, DB Co acknowledges and agrees that the City has a right to disclose or publish (including on websites) this Project Agreement, any or all terms hereof, including any or all contractual submissions and other records kept in accordance with this Project Agreement, any information related to the performance of DB Co (or any DB Co Party) or any information derived from this Project Agreement or the information related to the performance of DB Co (or any DB Co Party) as the City, in its sole discretion, may consider appropriate. In exercising its discretion, the City will be guided by the principles set out in Sections 42.1(b) and 42.1(c).
- (b) The City will not disclose portions of this Project Agreement, any terms hereof, including any contractual submissions or other records kept in accordance with this Project Agreement, any information related to the performance of DB Co (or any DB Co Party) or any information derived from this Project Agreement or the information related to the performance of DB Co (or any DB Co Party) which would be exempt from disclosure under section 17(1) of FIPPA.
- (c) Notwithstanding Section 42.1(b), but subject to Section 42.2, where a compelling public interest in the disclosure of the information clearly outweighs the public interest in limiting the disclosure of the information supplied by DB Co (or any DB Co Party), the City may disclose such information.
- (d) Except as otherwise specified herein or in the Interface Agreement, or as otherwise reasonably required to be disclosed to RTG in respect of any bona fide dispute between RTG and DB Co or RTG and the City arising from or related to this Project Agreement or the Interface Agreement to substantiate any claim or defence thereto, the City shall not, DB Co shall not be required to, and the City shall have no right to compel DB Co to, disclose any commercially sensitive information of DB Co to RTG or any RTG Party. Without limiting the generality of the foregoing, commercially sensitive information shall include any information identified to the City as such by DB Co and shall include, the Lending Agreements, the Financial Model, any cost or draw schedules prepared in connection with this Project Agreement (including any fully-loaded cost schedule), any draw request or information submitted to the City in accordance with Schedule 21 – Construction Period Payments, any financial statements of DB Co, the Construction Contractor, the Construction Guarantors or any Affiliates thereof, and any pricing information obtained by the City, including any such information submitted in connection with any Variation or claim pursuant to Section 33, Section 33.6 or Section 35.

42.2 Redaction

- (a) Prior to disclosing or publishing this Project Agreement, any terms hereof, including any contractual submissions or other records kept in accordance with this Project Agreement, any information related to the performance of DB Co (or any DB Co Party) or any information derived from this Project Agreement or the information related to the performance of DB Co (or any DB Co Party), the City shall provide to DB Co a redacted version of this Project Agreement or other documents or information to be disclosed or published, on the basis that the information so redacted constitutes information which should not be disclosed pursuant to Section 42.1(b). The Parties acknowledge and agree that the Guaranteed Price, but not any breakdown thereof, may be disclosed.
- (b) If DB Co, acting in good faith, contends that any of the information not redacted constitutes information that falls within the scope of Section 42.1(b) and, accordingly, would be exempt from disclosure under FIPPA, the dispute may be referred for resolution in accordance with Schedule 27 – Dispute Resolution Procedure, and the City shall not disclose any information in dispute until a determination is made. Any such determination shall be made with reference to the text and principles of FIPPA.

42.3 Disclosure to Government

- (a) DB Co acknowledges and agrees that subject to compliance with FIPPA, the City will be free to use, disclose or publish (including on websites) any information, including Confidential Information, on such terms and in such manner as the City see fit.
- (b) For greater certainty, DB Co acknowledges and agrees that, subject only to the removal of any information which DB Co is (or would be) entitled to refuse to disclose pursuant to section 17(1) of FIPPA, this Project Agreement, any contractual submissions or other records kept in accordance with this Project Agreement, any information related to the performance of DB Co (or any DB Co Party) or any information derived from this Project Agreement or the information related to the performance of DB Co (or any DB Co Party) are public documents and information and, as such, may be disclosed by the City.

42.4 *Freedom of Information and Protection of Privacy Acts*

- (a) The Parties acknowledge and agree that,
 - (i) MFIPPA applies to the City, and that the City is required to fully comply with MFIPPA; and
 - (ii) FIPPA applies to the MTO, and that the MTO is required to fully comply with FIPPA.
- (b) The City shall, within the time periods provided in MFIPPA for a party to exercise rights to prevent disclosure of information, advise DB Co of any request for Confidential Information that relates to DB Co (or any DB Co Party) or of the City's intention to voluntarily release any information or documents which contain Confidential Information that relates to DB Co (or any DB Co Party).

42.5 Use and Disclosure of Confidential Information

- (a) Except as authorized hereunder, each Party shall hold in confidence, not disclose and not permit any person any manner of access to, whether directly or indirectly, any Confidential Information of the other Party, provided that this Section 42 shall not restrict either Party from disclosing such Confidential Information to its professional advisors, to the extent necessary, to enable that Party to perform, to cause to be performed, or to enforce, its rights or obligations under this Project Agreement.
- (b) DB Co may:
 - (i) disclose in confidence to the Lenders and prospective Lenders, including any trustee or agent of the Lenders and the Lenders' Agent, and their respective professional advisors such Confidential Information as is reasonably required by the Lenders in connection with the raising or syndication of the financing or any sub-participation in the financing of the Works or which DB Co is obliged to supply by the terms of the Lending Agreements; and
 - (ii) disclose in confidence to any DB Co Party and their professional advisors, such Confidential Information as is necessary for the performance by that DB Co Party of that DB Co Party's obligations under this Project Agreement.
- (c) DB Co acknowledges that the City may use the Confidential Information of DB Co for purposes not specific to the Project, but for other general governmental purposes, such as development of the City's alternate procurement and financing policies and framework. The City will advise DB Co prior to using any Confidential Information of DB Co for non-Project purposes.
- (d) Subject to the foregoing, neither Party shall use, or directly or indirectly cause, authorize or permit any other person to use, any Confidential Information of the other Party except for the purposes of this Project Agreement, as permitted by this Project Agreement or as authorized by the disclosing Party in writing.
- (e) Each Party shall,
 - (i) protect all Confidential Information of the disclosing Party with the same degree of care as it uses to prevent the unauthorized use, disclosure, publication, or dissemination of its own confidential information of a similar nature or character, but in no event with less than a reasonable degree of care;
 - (ii) if legally compelled to disclose any Confidential Information,
 - (A) provide the disclosing Party with prompt Notice to that effect to allow the disclosing Party to seek any appropriate remedies and cooperate with the disclosing Party and its legal counsel; and
 - (B) disclose only that portion of the Confidential Information that it is legally required to disclose; and
 - (iii) provide Confidential Information to the disclosing Party upon demand by the disclosing Party.

Section 42.5(e)(iii) shall not apply to Confidential Information in relation to which a Party has been provided a licence pursuant to Schedule 24 – Intellectual Property provided that the use of such Confidential Information is in accordance with Schedule 24 – Intellectual Property.

- (f) Without limiting the generality of this Section 42.5, DB Co shall comply with the document control and security protocol submitted by DB Co pursuant to Section 11.5 and approved by the City, which protocol shall prescribe limitations on the use, disclosure and storage of this Project Agreement and any other Confidential Information specified by the City.

42.6 Exceptions

- (a) Information of a Party (the “**Proprietor**”), other than Government Sensitive Information and other than Personal Information, will not be considered to be Confidential Information in the following circumstances:
- (i) the Proprietor advises the other Party to whom the information has been disclosed (the “**Confidant**”) that the information is not required to be treated as Confidential Information;
 - (ii) the information is as of the date of this Project Agreement, or becomes at any time thereafter, generally available to or accessible by the public through no fault or wrongdoing of the Confidant;
 - (iii) the information is a matter of public record or in the public domain;
 - (iv) the information was in the possession of the Confidant prior to its disclosure and the Confidant came into possession of such information without being in breach of this Project Agreement;
 - (v) the information is received by the Confidant on a non-confidential basis from a source other than the Proprietor, provided that to the best of the Confidant’s knowledge such source is not bound by a confidentiality agreement with the Proprietor or otherwise prohibited from disclosing the information to the Confidant by a contractual, legal or fiduciary obligation;
 - (vi) the information was independently developed by the Confidant without access to the Confidential Information, as evidenced by written records;
 - (vii) the information is required to be disclosed pursuant to Applicable Law, provided that the Confidant provides the Proprietor with reasonable notification and an opportunity to contest such requirement prior to disclosure;
 - (viii) the information is disclosed to the City upon a termination of this Project Agreement, pursuant to Section 38 or is otherwise required by the City for the purposes of performing (or having performed) the Works, including the design or construction of the New City Infrastructure, or any other operations or services the same as, or similar to, the Works; or
 - (ix) the information would not be exempt from disclosure under FIPPA.

42.7 Survival of Confidentiality

- (a) The obligations in Section 42.1 to Section 42.6 will cease on the date that is three years after the Termination Date and accordingly shall survive the termination of the Project Agreement.

42.8 Confidentiality of Intellectual Property

- (a) Nothing in this Section 42 shall prevent the City from exercising any right granted to the City pursuant to Schedule 24 – Intellectual Property. The City shall have the right to disclose Confidential Information of DB Co Parties when exercising the rights granted pursuant to Schedule 24 – Intellectual Property in accordance therewith.

43. PERSONAL INFORMATION

43.1 General

- (a) DB Co acknowledges the importance of maintaining the confidentiality and privacy of Personal Information.
- (b) DB Co shall, and shall require each DB Co Party to, only collect, hold, process, use, store and disclose Personal Information with the prior consent of the City and: (i) shall not collect, hold, process, use or store Personal Information except to the extent necessary to perform DB Co's obligations under this Project Agreement; and (ii) shall not disclose Personal Information or otherwise permit access to or make Personal Information available to any person except as expressly permitted or instructed by the City.
- (c) DB Co shall, and shall require each DB Co Party to, at all times treat Personal Information as strictly confidential and shall comply with all applicable requirements of the Output Specifications and the requirements of Applicable Law, including *FIPPA*, the *Personal Information Protection and Electronic Documents Act* (Canada), and any other Canadian federal or provincial legislation now in force or that may in the future come into force governing the collection, use, disclosure and protection of personal information applicable to DB Co, each DB Co Party or to the Works.
- (d) DB Co shall take all necessary and appropriate action, and shall require each DB Co Party to take all necessary and appropriate action, against any person who fails to comply with this Section 43.1.
- (e) DB Co shall allow the City on reasonable Notice to inspect any Personal Information in the custody or possession of DB Co or a DB Co Party and to audit DB Co and each DB Co Party's compliance with this Section 43 including the measures used by DB Co and each DB Co Party to protect Personal Information, and otherwise promptly and properly respond to all reasonable inquiries of the City with respect to DB Co or each DB Co Party's handling of Personal Information.
- (f) DB Co shall not subcontract or delegate to any third party any of the Works that involve or may involve the collection, use, storage, processing or any other handling of Personal Information without the express consent of the City and without obtaining written contractual commitments of such third party substantially the same as those of this Section 43.

43.2 Protection of Personal Information

- (a) DB Co shall implement and use, and shall require each DB Co Party to implement and use, appropriate technical, organizational and physical security measures to protect Personal Information against loss, theft and unauthorized access, disclosure, copying, use, modification or disposal, and shall otherwise ensure that DB Co, the DB Co Parties, and its and their staff shall protect, secure and keep confidential any Personal Information.
- (b) DB Co shall and shall cause each DB Co Party to restrict access to Personal Information to only those authorized employees and permitted DB Co Parties that require access to such Personal Information to fulfil their job requirements in connection with the Works and that are subject to obligations of confidentiality and Personal Information protection no less stringent than those of this Section 43.
- (c) Upon termination of this Project Agreement or upon request of the City, whichever comes first, DB Co shall immediately cease all use of and return to the City or, at the direction of the City, dispose of, destroy or render permanently anonymous all Personal Information, in each case using appropriate technical, organizational and physical security measures to protect Personal Information against loss, theft and unauthorized access, disclosure, copying, use or modification.
- (d) To the extent that any of the Works involve or may involve destruction or disposal of Personal Information, including any disposal or destruction pursuant to Section 43.2(c), such activities shall include, at a minimum, irreversible destruction, shredding or pulverizing of all documents, records or media containing Personal Information to a size or state that ensures that the document, record or other medium is permanently destroyed and that no information contained therein can be read, reconstructed or deciphered.
- (e) DB Co shall immediately inform the City of any actual or suspected loss, theft or accidental or unauthorized access, disclosure, copying, use, modification or destruction of Personal Information by DB Co or any DB Co Party or any other breach of this Section 43.
- (f) The City may from time to time require that DB Co and any DB Co Party or member of its or their staff execute and deliver within two Business Days after such request an agreement satisfactory to the City, acting reasonably, requiring such person to keep Personal Information confidential.

43.3 Personal Information

- (a) DB Co shall provide, and shall cause each DB Co Party to provide, in a timely manner, all necessary and reasonable information and co-operation to the City and to any regulatory or other governmental bodies or authorities with jurisdiction or oversight over Applicable Law governing the collection, use, disclosure and protection of personal information in connection with any investigations, audits or inquiries made by any such bodies or authorities under such legislation.
- (b) To the extent of any conflict or inconsistency between this Section 43 and any other provision of the Project Agreement, this Section 43 shall prevail.
- (c) The obligations in this Section 43.3 shall survive the termination of this Project Agreement.

44. INSURANCE AND PERFORMANCE SECURITY

44.1 General Requirements

- (a) DB Co and the City shall comply with the provisions of Schedule 25 – Insurance and Performance Security Requirements.

44.2 No Relief from Liabilities and Obligations

- (a) Neither compliance nor failure to comply with the insurance provisions of this Project Agreement shall relieve DB Co or the City of their respective liabilities and obligations under this Project Agreement.

44.3 Performance Guarantee of Construction Guarantor

- (a) At all times during the Project Term and, in respect of the provisions described in Section 39.9, following the Project Term, DB Co shall ensure that a valid and binding Performance Guarantee of the Construction Guarantor in favour of DB Co and the City from the Construction Guarantor (or a party of comparable financial strength, capacity and stability, as determined by the City acting in its sole discretion) of the obligations of the Construction Contractor under the Design and Construction Contract and in the form of guarantee attached as Schedule 29 – Form of Performance Guarantee of Construction Guarantor, is in place and enforceable by the City. The Performance Guarantee of the Construction Guarantor will be delivered to, and held by, the Account Trustee.

45. TITLE

45.1 Title

- (a) Title to each item and part of the New City Infrastructure or the New MTO Infrastructure, including any materials, supplies, equipment, facilities, parts and any other deliverable or component items, but not the risk of loss or damage or destruction thereto or thereof, shall pass to the City (or as the City may direct) upon the receipt of such item on the Lands, provided however that title to items of tangible personal property (personal property that can be seen, weighed, measured, felt or touched or that is in any way perceptible to the senses and includes computer programs, natural gas and manufactured gas) that comprise the New City Infrastructure and the New MTO Infrastructure or are to be affixed or attached to the New City Infrastructure and the New MTO Infrastructure prior to Substantial Completion shall pass to the City (or as the City may direct) at the time that such items are included in the New City Infrastructure and the New MTO Infrastructure or are to be affixed or attached to the New City Infrastructure and the New MTO Infrastructure.

46. INDEMNITIES

46.1 DB Co Indemnities to the City

- (a) DB Co shall indemnify and save harmless the City and its directors, officers, employees, agents and representatives and, in respect of (iii) and (iv) below, City Parties and each of their respective directors, officers, employees, agents and representatives, from and against any and all Direct

Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any one or more of the following:

- (i) [Intentionally Deleted]
- (ii) a failure by DB Co to achieve,
 - (A) East Substantial Completion by the East Scheduled Substantial Completion Date; or
 - (B) West Substantial Completion by the West Scheduled Substantial Completion Date;
- (iii) any physical loss of or damage to all or any part of the Lands, lands that are adjacent to the Lands (but that are not Lands), the New City Infrastructure, the New MTO Infrastructure, the Existing Infrastructure, the Stage 1 Connection Infrastructure, the RTG Works, or to any equipment, assets or other property related thereto;
- (iv) the death or personal injury of any person;
- (v) any physical loss of or damage to property or assets of any third party, including, for clarity, any physical loss of or damage to Existing Infrastructure, or New MTO Infrastructure;
- (vi) any other loss or damage of any third party;
- (vii) Injurious Affection claims made by third parties,

in the case of Sections 46.1(a)(ii) to 46.1(a)(vi), arising, directly or indirectly, out of, or in consequence of, or involving or relating to, the performance or any breach of this Project Agreement by DB Co or any act or omission of DB Co or any DB Co Party, and in the case of Section 46.1(a)(vii), arising, directly or indirectly, out of, or in consequence of, or involving or relating to, any breach of this Project Agreement by DB Co or any DB Co Party, except to the extent caused, or contributed to, by:
 - (viii) the breach of this Project Agreement by the City; or
 - (ix) in respect of Section 46.1(a)(ii), any deliberate or negligent act or omission of the City, any City Party or, to the extent related to Highway Works, MTO; or
 - (x) in respect of Sections 46.1(a)(iii), 46.1(a)(iv), 46.1(a)(v), 46.1(a)(vi) or 46.1(a)(vii), any act or omission of the City, any City Party or, to the extent related to Highway Works, MTO.
- (b) DB Co shall indemnify and save harmless the City and its directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any breach of a representation or warranty by DB Co set out in Section 6.1.

- (c) DB Co shall indemnify and save harmless the City and its directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, arising out of, or involving or relating to any one or more of the following:
- (i) the performance by DB Co of this Project Agreement not in accordance with or in breach of the requirements of any Permits, Licences, Approvals and Agreements, Applicable Law or requirements of Governmental Authorities, or the failure of DB Co to obtain all necessary DB Co Permits, Licences, Approvals and Agreements in accordance with this Project Agreement;
 - (ii) any Contamination for which DB Co is responsible pursuant to Sections 18.2(a) or 18.2(b); or
 - (iii) the provision of assistance by the City to DB Co pursuant to Section 11.13(d),
- except to the extent that such Direct Losses are caused, or contributed to, by the breach of this Project Agreement by the City or by any act or omission of the City, any City Party or, to the extent related to Highway Works, MTO.
- (d) Without prejudice to the City's rights under Section 36 and any other rights under this Project Agreement, if the City exercises its step-in rights under the Construction Contractor's Direct Agreement, DB Co shall indemnify the City for all obligations of DB Co assumed by the City under the Design and Construction Contract, as the case may be, and for all reasonable costs and expenses incurred by the City in relation to the exercise of the City's rights.
- (e) DB Co shall indemnify the City for damages suffered or incurred on account of (i) any payment not duly made by DB Co pursuant to the terms of this Project Agreement on the due date; (ii) any overpayment to or underpayment by DB Co; or (iii) an amount determined as payable by DB Co to the City under Schedule 27 – Dispute Resolution Procedure, by payment of an amount equal to the Payment Compensation Amount calculated from day to day at a rate per annum from the day after the date on which payment was due, the day on which overpayment was made by the City, or from the date identified (if any) applicable to an amount determined as payable by DB Co to the City under Schedule 27 – Dispute Resolution Procedure, up to and including the date of payment.
- (f) DB Co shall defend, in accordance with the procedures of Section 46.3, and indemnify and save harmless the City, the City Parties, and any Governmental Authorities and each of their respective directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any one or more of the following:
- (i) any breach of Section 41.3;
 - (ii) any claim, suit, action or proceeding by a person alleging that (x) any Intellectual Property licensed or assigned to and used by the City, any City Party, RTG, any RTG Party, or any Governmental Authority pursuant to this Project Agreement; or (y) any Intellectual Property or other materials used by DB Co or any DB Co Party or any Subcontractor in the performance of the Works and the Project, infringes or

misappropriates any Intellectual Property rights of that person, other than where such claim, suit, action or proceeding is directly caused by,

- (A) the use of such Intellectual Property by the City not in accordance with this Project Agreement or the applicable Technical Information; or
 - (B) the use of such Intellectual Property by the City in combination with other products, software or equipment not supplied by or on behalf of DB Co or the Subcontractors and not authorized by any of them;
- (iii) any claim, suit, action or proceeding arising out of the alleged infringement or misappropriation of any rights in or to any Project Data or Intellectual Property Rights or the use thereof by any City Party, RTG, any RTG Party, or any Governmental Authority or due to the use of any materials, machinery or equipment in connection with the Works infringes any rights in or to any Intellectual Property of a third party unless such infringement has arisen out of the use of any Project Data or Intellectual Property Rights by the relevant City Party, RTG, any RTG Party, otherwise than in accordance with the terms of this Project Agreement or the applicable Technical Information; and
- (iv) any claim, suit, action or proceeding by any Licensor alleging that DB Co or any DB Co Party or any Subcontractor has used any City Supplied Third Party Intellectual Property in breach of Sections 3.1(a)(ii), 3.1(b), 3.1(c) or 3.1(d) of Schedule 24 – Intellectual Property.
- (g) Without limiting and in addition to the obligations in Section 46.1(f), if, as a result of a claim under Section 46.1(f)(i) or Section 46.1(f)(ii), all or any part of any Intellectual Property licensed or assigned to and used by the City pursuant to this Project Agreement; or any Intellectual Property or other materials used by DB Co or any Subcontractor in the performance of the Works and the Project (any or all of the foregoing the “**Infringing Material**”) becomes, or in DB Co’s opinion is likely to be, enjoined from use, DB Co will:
 - (i) give Notice to the City of the same; and
 - (ii) at its sole option and expense, either:
 - (A) procure for itself and the City, to the extent required, the right to continue to use the infringing element or component of the Infringing Material as contemplated in this Project Agreement; or
 - (B) modify the infringing element or component of the Infringing Material so that it is non-infringing without materially affecting the quality, performance and functionality of such infringing element or component, or replace the infringing element or component with a substitute of materially equivalent quality, performance and functionality.

46.2 City Indemnities to DB Co

- (a) The City shall indemnify and save harmless DB Co and the DB Co Parties and each of their respective directors, officers, employees, agents and representatives from and against any and all

Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any one or more of the following:

- (i) the death or personal injury of any person arising, directly or indirectly, out of, or in consequence of, or involving or relating to, the performance or breach of this Project Agreement by the City or any act or omission of any City Party, except to the extent caused, or contributed to, by the breach of this Project Agreement by DB Co or by any act or omission of DB Co or any DB Co Party;
- (ii) any physical loss of or damage to all or any part of any property or assets of DB Co or any DB Co Party, arising, directly or indirectly, out of, or in consequence of, or involving or relating to, breach of this Project Agreement by the City or any deliberate or negligent act or omission of any City Party, except to the extent caused, or contributed to, by the breach of this Project Agreement by DB Co or by any act or omission of DB Co or any DB Co Party;
- (iii) any physical loss of or damage to property or assets of any third party, or any other loss or damage of any third party, arising, directly or indirectly, out of, or in consequence of, or involving or relating to, breach of this Project Agreement by the City or any deliberate or negligent act or omission of any City Party, except to the extent caused, or contributed to, by the breach of this Project Agreement by DB Co or by any act or omission of DB Co or any DB Co Party; and
- (iv) Contamination for which the City is responsible pursuant to Section 18.2(c),

provided that there shall be excluded from the indemnity given by the City any liability for the occurrence of risks against which DB Co is required to insure under this Project Agreement to the extent of the proceeds available or that should have been available but for a failure by DB Co to comply with its obligations to properly insure under this Project Agreement.

- (b) The City shall indemnify and save harmless DB Co and its directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any breach of a representation or warranty by the City set out in Section 6.2(a).
- (c) The City shall indemnify DB Co for damages suffered or incurred on account of (i) any payment not duly made by the City pursuant to the terms of this Project Agreement on the due date; (ii) any overpayment to or underpayment by the City; or (iii) an amount determined as payable by the City to DB Co under Schedule 27 – Dispute Resolution Procedure, by payment of an amount equal to the Payment Compensation Amount calculated from day to day at a rate per annum from the day after the date on which payment was due, the day on which overpayment was made by DB Co, or from the date identified (if any) applicable to an amount determined as payable by the City to DB Co under Schedule 27 – Dispute Resolution Procedure, up to and including the date of payment.

46.3 Conduct of Claims

- (a) This Section 46.3 shall apply to the conduct of claims, made by a third person against a Party having, or claiming to have, the benefit of an indemnity pursuant to this Project Agreement. The

Party having, or claiming to have, the benefit of the indemnity is referred to as the “**Beneficiary**” and the Party giving the indemnity is referred to as the “**Indemnifier**”.

- (b) If the Beneficiary receives any Notice, demand, letter or other document concerning any claim for which it appears that the Beneficiary is, or may become entitled to, indemnification under this Section 46, the Beneficiary shall give written Notice to the Indemnifier as soon as reasonably practicable and in any event within 10 Business Days after receipt of the same. Such Notice shall specify with reasonable particularity, to the extent that information is available, the factual basis for the claim and the amount of the claim.
- (c) Subject to Sections 46.3(d), 46.3(e) and 46.3(f), on the giving of such Notice by the Beneficiary, where it appears that the Beneficiary is or may be entitled to indemnification from the Indemnifier in respect of all, but not part only, of the liability arising out of the claim, the Indemnifier shall (subject to providing the Beneficiary with a secured indemnity to the Beneficiary’s reasonable satisfaction against all costs and expenses that the Beneficiary may incur by reason of such action) be entitled to dispute the claim in the name of the Beneficiary at the Indemnifier’s own expense and take conduct of any defence, dispute, compromise, or appeal of the claim and of any incidental negotiations. The Beneficiary shall give the Indemnifier all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. The Beneficiary shall have the right to employ separate counsel in respect of such claim and the reasonable fees and expenses of such counsel shall be to the account of the Indemnifier only where representation of both the Indemnifier and Beneficiary by common counsel would be inappropriate due to any actual or potential conflicting interests between the Indemnifier and Beneficiary.
- (d) With respect to any claim conducted by the Indemnifier:
 - (i) the Indemnifier shall keep the Beneficiary fully informed and consult with it about material elements of the conduct of the claim;
 - (ii) the Indemnifier shall not bring the name or reputation of the Beneficiary into disrepute;
 - (iii) the Indemnifier shall not pay, compromise or settle such claims without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed;
 - (iv) the Indemnifier shall not admit liability or fault to any third party without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed; and
 - (v) the Indemnifier shall use commercially reasonable efforts to have the Beneficiary named as a beneficiary under any release given by the persons bringing the claim to which this Section 46.3 relates.
- (e) The Beneficiary shall be free to pay or settle any such claim on such terms as it thinks fit and without prejudice to its rights and remedies under this Project Agreement if:
 - (i) the Indemnifier is not entitled to take conduct of the claim in accordance with Section 46.3(c);
 - (ii) the Indemnifier fails to notify the Beneficiary of its intention to take conduct of the relevant claim as soon as reasonably practicable and in any event within 10 Business

Days following the Indemnifier's receipt of the Notice from the Beneficiary under Section 46.3(b) or notifies the Beneficiary that the Indemnifier does not intend to take conduct of the claim; or

- (iii) the Indemnifier fails to comply in any material respect with Section 46.3(d).
- (f) The Beneficiary shall be free at any time to give Notice to the Indemnifier that the Beneficiary is retaining or taking over, as the case may be, the conduct of any defence, dispute, compromise or appeal of any claim, or of any incidental negotiations, to which Section 46.3(c) applies. For greater certainty, DB Co acknowledges and agrees that where the City is the Beneficiary, the City may retain or take over such conduct in any matter involving Personal Information or any matter involving public policy. On receipt of such Notice the Indemnifier shall promptly take all steps necessary to transfer the conduct of such claim to the Beneficiary, and shall provide to the Beneficiary all relevant documentation and all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. If the Beneficiary gives any Notice pursuant to this Section 46.3(f), then the Indemnifier shall be released from any liabilities arising under the applicable indemnity hereunder in respect of the applicable claim.
- (g) If the Indemnifier pays to the Beneficiary an amount in respect of an indemnity and the Beneficiary subsequently recovers, whether by payment, discount, credit, saving, relief or other benefit or otherwise, a sum or anything else of value (the "**Recovery Amount**") which is directly referable to the fact, matter, event or circumstances giving rise to the claim under the indemnity, the Beneficiary shall forthwith repay to the Indemnifier whichever is the lesser of:
 - (i) an amount equal to the Recovery Amount less any out-of-pocket costs and expenses properly incurred by the Beneficiary in recovering the same; and
 - (ii) the amount paid to the Beneficiary by the Indemnifier in respect of the claim under the relevant indemnity,

provided that there shall be no obligation on the Beneficiary to pursue any Recovery Amount and that the Indemnifier is repaid only to the extent that the Recovery Amount, aggregated with any sum recovered from the Indemnifier, exceeds the loss sustained by the Beneficiary except, however, that if the Beneficiary elects not to pursue a Recovery Amount, the Indemnifier shall be entitled to require an assignment to it of the right to do so.

- (h) Any person taking any of the steps contemplated by this Section 46.3 shall comply with the requirements of any insurer who may have an obligation to provide an indemnity in respect of any liability arising under this Project Agreement.

46.4 Mitigation – Indemnity Claims

- (a) For greater certainty, Section 53.4 applies to any indemnity given under this Project Agreement and any such indemnity shall not extend to Direct Losses which could have been reduced or avoided by the Beneficiary complying with such Section.

47. LIMITS ON LIABILITY

47.1 Indirect Losses

- (a) Subject to Section 47.1(b) and without prejudice to the Parties' rights in respect of payments provided for herein, the indemnities under this Project Agreement shall not apply and there shall be no right to claim damages for breach of this Project Agreement, in tort or on any other basis whatsoever, to the extent that any loss claimed by either Party is:
- (i) for punitive, exemplary or aggravated damages;
 - (ii) for loss of profits, loss of use, loss of production, loss of business or loss of business opportunity; or
 - (iii) a claim for consequential loss or for indirect loss of any nature suffered or allegedly suffered by either Party,
- (collectively, "**Indirect Losses**").
- (b) With respect to the indemnity in Section 46.1(a)(ii) only, the exceptions for loss of use and loss of production in Section 47.1(a)(ii) and the exceptions in Section 47.1(a)(iii) shall not apply as a result of, or in relation to, the City's loss of use of the New City Infrastructure or a portion thereof, which for the purposes of Section 47.1(a)(ii), shall be Direct Losses.

47.2 No Liability in Tort

- (a) Subject to the indemnities provided herein, the City shall not be liable in tort to DB Co or any DB Co Party, and neither DB Co nor any DB Co Party shall be liable in tort to the City, any City Party or MTO in respect of any negligent act or omission of any such person relating to or in connection with this Project Agreement and no such person shall bring such a claim.

47.3 Sole Remedy

- (a) Nothing in this Project Agreement shall prevent or restrict the right of the City to seek injunctive relief or a decree of specific performance or other discretionary remedies of a court of competent jurisdiction.
- (b) Notwithstanding any other provision of this Project Agreement, and except to the extent recovered under any of the insurances required pursuant to Schedule 25 – Insurance and Performance Security Requirements, neither Party shall be entitled to recover compensation or make a claim under this Project Agreement, or any other agreement in relation to the Project, in respect of any loss that it has incurred (or any failure of the other Party) to the extent that the Party has already been compensated in respect of that loss or failure pursuant to this Project Agreement, or otherwise.
- (c) For clarity, the following shall apply with respect to the remedies and damages set out in the Project Agreement:
- (i) the amounts deducted from the Substantial Completion Payment pursuant to Schedule 34 – Mobility Matters shall be the City's sole remedy with respect to exceedances in Lane

Closures, or Bus Rapid Transit Lane Closures, which exceedances are contemplated in Schedule 34 – Mobility Matters;

- (ii) the liquidated damages paid by DB Co pursuant to Section 25.5 and the indemnity provided in Section 46.1(a)(ii) shall be the sole remedy in respect of the City's mobilization costs and other costs incurred by the City in accordance with of DB Co's failure to achieve East Substantial Completion by the East Scheduled Substantial Completion Date, and West Substantial Completion by the West Scheduled Substantial Completion Date, but, for clarity, shall not limit the City's rights otherwise provided for in Schedule 12 – Works Scheduling Requirements, or herein in connection with a termination pursuant to Section 36.1(a)(ii);
- (iii) the liquidated damages paid by DB Co pursuant to Section 12.4 shall be the sole remedy in respect of failure by DB Co to provide the Key Individuals named in Schedule 9 – Key Individuals immediately after Commercial Close;
- (iv) the right to withhold the East Warranty Cash Amount, the West Warranty Cash Amount and the Remaining Works Cash Amount, in each case, in accordance with Section 4.2, shall be the sole remedy of the City in respect of the failure by DB Co to deliver the East Warranty Letter of Credit, West Warranty Letter of Credit and/or the Remaining Works Letter of Credit, as applicable; and
- (v) the liquidated damages paid by DB Co pursuant to Section 11.17A shall be the City's sole remedy for the costs related to Minor Construction Defect, Medium Construction Defect, Major Construction Defect or Critical Construction Defect, but shall not otherwise diminish DB Co's obligation to perform the Warranty Work nor DB Co's obligations under the Interface Agreement.

47.4 Maximum Liability

- (a) Subject to Section 47.4(b), the maximum aggregate liability of each Party in respect of all claims under Section 46 shall not exceed \$[REDACTED]. This limit shall be index linked and shall be exclusive of any insurance or performance security proceeds received or which will be received pursuant to policies or performance security maintained in accordance with Schedule 25 – Insurance and Performance Security Requirements. This limit shall not apply in cases of wilful misconduct or deliberate acts of wrongdoing. This maximum aggregate liability of DB Co shall be reduced by the amount of any liability of DB Co to RTG that is subject to the aggregate limit of liability under Section 2.4(b) of the Interface Agreement. Notwithstanding the foregoing, the City acknowledges that all liability of DB Co to RTG or the City under the Interface Agreement, whether incurred directly to RTG or indirectly through the City pursuant to Section 1.5(b)(iv), shall be treated as obligations of DB Co to the City for the purpose of the limitation of liability set out in the Performance Guarantee of Construction Contractor. Under no circumstance shall the City be entitled, whether under an indemnity listed in Section 46.1 or Section 1.5(b)(iv), to recover from DB Co any amounts or liability that is in duplication of amounts due and owing by DB Co under the Interface Agreement pursuant to a claim that has been made under the Interface Agreement.
- (b) DB Co's maximum aggregate liability in respect of all claims under Sections 46.1(a)(ii) and 25.5 shall not exceed \$[REDACTED]. This limit shall be index linked and shall be exclusive of any insurance or performance security proceeds received or which will be received pursuant to

policies or performance security maintained in accordance with Schedule 25 – Insurance and Performance Security Requirements. This limit shall not apply in cases of wilful misconduct or deliberate acts of wrongdoing. For certainty, this limit shall be included in the limit of liability under Section 47.4(a).

- (c) Nothing in this Section 47.4 shall restrict, limit, prejudice or in any other way impair the rights and/or remedies of the Parties under any other provision of this Project Agreement.

48. DISPUTE RESOLUTION PROCEDURE

- (a) All Disputes shall be resolved in accordance with, and the Parties shall comply with, Schedule 27 – Dispute Resolution Procedure.

49. ASSIGNMENT, SUBCONTRACTING AND CHANGES IN CONTROL

49.1 DB Co Assignment

- (a) DB Co shall not sell, assign, transfer, charge, mortgage, encumber, dispose of or otherwise alienate all or any part of any interest, whether legal or beneficial, in this Project Agreement or any Ancillary Document without the prior written consent of the City, provided however that no assignment, transfer, charge, disposition or other alienation shall be permitted to a person where that person or its Affiliate is a Restricted Person or a person whose standing or activities may compromise (i) the City's reputation or integrity, or (ii) the nature of the public transit system in the City of Ottawa or the Province of Ontario, so as to affect public confidence in the public transit system in one or more of the City of Ottawa, the Province of Ontario or the Project.
- (b) Section 49.1(a) shall not apply to the grant of any security for any loan made to DB Co under the Lending Agreements provided that any grantee of such security shall enter into the Lenders' Direct Agreement in relation to the exercise of its rights, if the City so requires.

49.2 City Assignment

- (a) The City may assign, transfer, dispose of or otherwise alienate any interest in this Project Agreement or any agreement in connection with this Project Agreement to which DB Co and the City are parties:
 - (i) as may be required to comply with Applicable Law;
 - (ii) in circumstances other than those described in Section 49.2(a)(i) with the prior written consent of DB Co; provided that the person to whom any such assignment, transfer, disposition or other alienation is made has the capacity to perform, and confirms in writing to DB Co that it will perform all the obligations of the City hereunder and under any agreement in connection with this Project Agreement to which DB Co and the City are parties in respect of the period from and after the assignment.
- (b) The City shall not be released of any of its obligations under this Project Agreement except upon an assignment, transfer, disposition or other alienation of their interest in this Project Agreement in accordance with this Section 49.2.

49.3 Subcontracting

- (a) DB Co shall not subcontract any interest in this Project Agreement or the Design and Construction Contract, and shall not permit the Construction Contractor to subcontract any interest in the Design and Construction Contract, to a Restricted Person, or any Affiliate thereof, or a person whose standing or activities may compromise (i) the City's reputation or integrity, or (ii) the nature of the public transit system in the City of Ottawa or the Province of Ontario so as to affect public confidence in the public transit system in one or more of the City of Ottawa, the Province of Ontario or the Project.
- (b) DB Co shall not terminate, agree to the termination of or replace the Construction Contractor unless DB Co has complied with Sections 8.2(a), 49.3(c) and 49.3(d) or received the prior written consent of the City.
- (c) Subject to Section 49.3(d), if the Design and Construction Contract shall at any time lapse, terminate or otherwise cease to be in full force and effect, whether by reason of expiry, default or otherwise, with the effect that the Construction Contractor shall cease to act in relation to the Project, DB Co shall forthwith appoint a replacement, subject to the City's prior written consent, acting reasonably, as to the suitability of the replacement.
- (d) It is a condition of replacement of the Construction Contractor, and DB Co shall require, that any replacement enter into a contract upon the same or substantially similar terms as the person so replaced and into a direct agreement on the same terms as the Construction Contractor's Direct Agreement entered into by the person so replaced, unless any material variations are approved by the City, acting reasonably.

49.4 Changes in Ownership and Control

- (a) No Restricted Person or a person whose standing or activities are inconsistent with the City's reputation or integrity shall be permitted to have at any time or acquire, Direct or Indirect Power or Control over any member of the DB Co Group in relation to the decisions, management, actions or policies of DB Co or in relation to the operation, management and ownership of the Project.
- (b) No Change in Ownership of DB Co, or of any Control Party, shall be permitted:
 - (i) where the person acquiring the ownership interest is a Restricted Person or a person whose standing or activities may compromise (A) the City's reputation or integrity, or (B) the nature of the public transit system in the City of Ottawa or the Province of Ontario so as to affect public confidence in the public transit system in one or more of the City of Ottawa, the Province of Ontario or the Project; or
 - (ii) if such Change in Ownership would have a material adverse effect on the performance of the Works or the Governmental Activities.
- (c) In the event that a person having Direct or Indirect Power or Control over any member of the DB Co Group in relation to the decisions, management, actions or policies of DB Co or in relation to the operation, management and ownership of the Project becomes a Restricted Person, the City may:

- (i) in the case of an individual who becomes a Restricted Person, require that such Restricted Person be divested of his or her Direct or Indirect Power or Control; or
- (ii) in any other circumstance, require a Change in Ownership so that the Restricted Person shall be divested of its Direct or Indirect Power or Control,

in each case, on such terms as are satisfactory to the City, in its discretion.

- (d) DB Co shall provide Notice to the City of any Change in Ownership of DB Co or of any Control Party, as the case may be, that is not a Change in Control within 5 Business Days after such Change in Ownership, and such Notice shall include a statement identifying all persons with an ownership interest in DB Co or the relevant Control Party, as the case may be, and their respective holdings of such ownership interests, in each case prior to and following such Change in Ownership.
- (e) Subject to Sections 49.4(b), 49.4(c) and 49.4(d), no Change in Control of DB Co, or of any Control Party, shall be permitted without the prior written consent of the City.
- (f) DB Co shall provide Notice to the City of any proposed Change in Control of DB Co or of any Control Party, as the case may be, not less than 20 Business Days prior to such proposed Change in Control, and such Notice shall include:
 - (i) a statement identifying all persons with an ownership interest in DB Co or the relevant Control Party, as the case may be, and their respective holdings of such ownership interests in each case prior to and following any such proposed Change in Control; and
 - (ii) as applicable, the legal name, registered address, directors and officers of, and nature of the business and activities carried on by, the person who would acquire control over DB Co or the relevant Control Party pursuant to such Change in Control.

Following the delivery to the City of the Notice referred to in this Section 49.4(f), DB Co shall provide the City with such other information pertaining to the proposed Change in Control as the City may reasonably request.

- (g) Upon request by DB Co and delivery of the information required by the City, the City shall advise DB Co whether the person described in such particulars is a Restricted Person or a person whose standing or activities may compromise (i) the City's reputation or integrity, or (ii) the nature of the public transit system in the City of Ottawa or the Province of Ontario so as to affect public confidence in the public transit system in one or more of the City of Ottawa, the Province of Ontario or the Project.
- (h) Notwithstanding the definition of "Control Parties" set out Schedule 1 – Definitions and Interpretation, this Section 49.4 shall not apply to a Change in Ownership or Change in Control of persons whose equity securities or units evidencing ownership or any other ownership interests are listed on a recognized stock exchange.

49.5 The City's Due Diligence

- (a) DB Co shall promptly reimburse the City for the City's reasonable due diligence costs (including fees of professional advisors) in connection with any consent required of the City pursuant to, or

the City's determination of DB Co's compliance with, Sections 49.1, 49.3 or 49.4, whether or not such consent is granted.

50. PROHIBITED ACTS

50.1 Definition

(a) The term "**Prohibited Act**" means:

- (i) offering, giving or agreeing to give to the City or any public body (or anyone employed by or acting on their behalf), or to any family member of such person, any gift or consideration of any kind as an inducement or reward:
 - (A) for doing or not doing, or for having done or not having done, any act in relation to the obtaining or performance of this Project Agreement or any other agreement with the City or any public body in connection with the Project; or
 - (B) for showing or not showing favour or disfavour to any person in relation to this Project Agreement or any other agreement with the City or any public body in connection with the Project,

provided that this Section 50.1(a)(i) shall not apply to DB Co or any DB Co Party (or anyone employed by or acting on their behalf) providing consideration to the City or any public body in the ordinary course, or as reasonably necessary, to fulfill or comply with the obligations and liabilities of DB Co under this Project Agreement or any other agreement with the City or any public body in connection with the Project;

- (ii) entering into this Project Agreement or any other agreement with the City or any public body in connection with the Project if a commission or a fee has been paid or has been agreed to be paid by DB Co, or on its behalf or to its knowledge, the City or any public body (or anyone employed by or acting on their behalf), or to any family member of such person, unless, before the relevant agreement is entered into, particulars of any such commission or fee have been disclosed in writing to the City, provided that this Section 50.1(a)(ii) shall not apply to a fee or commission paid by DB Co or any DB Co Party (or anyone employed by or acting on their behalf) to the City or any public body pursuant to an agreement where such fee or commission is paid in the ordinary course, or as reasonably necessary, to fulfill or comply with the obligations and liabilities of DB Co under this Project Agreement or any other agreement with the City or any public body in connection with the Project without contravening the intent of this Section 50;
- (iii) breaching or committing any offence under Applicable Law in respect of corrupt or fraudulent acts in relation to this Project Agreement or any other agreement with the City or any public body in connection with the Project; or
- (iv) defrauding or attempting to defraud or conspiring to defraud the City or any other public body.

50.2 Remedies

- (a) If DB Co or any DB Co Party (or anyone employed by or acting on their behalf) commits any Prohibited Act, then the City shall be entitled to act in accordance with the following:
 - (i) if the Prohibited Act is committed by DB Co or by an employee acting under the direction of a director or officer of DB Co, then the City may give written Notice to DB Co and Section 36 shall apply;
 - (ii) if the Prohibited Act is committed by an employee of DB Co acting independently of a direction of a director or officer of DB Co, then the City may give written Notice to DB Co and Section 36 shall apply, unless, within 30 days after receipt of such Notice, DB Co terminates the employee's employment and ensures that the relevant part of the Works shall be performed by another person;
 - (iii) if a Prohibited Act is committed by a DB Co Party or by an employee of that DB Co Party not acting independently of a direction of a director or officer of that DB Co Party, then the City may give written Notice to DB Co and Section 36 shall apply, unless, within 30 days after receipt of such Notice, DB Co terminates the relevant Subcontract and ensures that the relevant part of the Works shall be performed by another person, where relevant, in accordance with Section 49.3;
 - (iv) if the Prohibited Act is committed by an employee of a DB Co Party acting independently of a direction of a director or officer of that DB Co Party, then the City may give Notice to DB Co and Section 36 shall apply, unless, within 30 days after receipt of such Notice, DB Co causes the termination of the employee's employment and ensures that the relevant part of the Works shall be performed by another person; and
 - (v) if the Prohibited Act is committed on behalf of DB Co or a DB Co Party by a person not specified in Sections 50.2(a)(i) to 50.2(a)(iv), then the City may give Notice to DB Co and Section 36 shall apply, unless, within 30 days after receipt of such Notice, DB Co causes the termination of such person's employment or the appointment of their employer and, if necessary, ensures that the relevant part of the Works shall be performed by another person.
- (b) Any Notice of termination under this Section 50.2 shall specify:
 - (i) the nature of the Prohibited Act;
 - (ii) the identity of the person whom the City believes has committed the Prohibited Act; and
 - (iii) the date of termination in accordance with the applicable provisions of this Project Agreement.
- (c) Without prejudice to its other rights or remedies under this Section 50.2, the City shall be entitled to recover from DB Co any Direct Loss sustained in consequence of any breach of this Section 50.

50.3 Permitted Payments

- (a) Nothing contained in this Section 50 shall prevent DB Co or any other person from paying any proper commission, fee or bonus whether to its employees within the agreed terms of their employment or otherwise, and such commission fee or bonus shall not constitute a Prohibited Act.

50.4 Notification

- (a) DB Co shall notify the City of the occurrence and details of any Prohibited Act promptly on DB Co becoming aware of its occurrence.

50.5 Replacement of DB Co Party

- (a) Where DB Co is required to replace any DB Co Party pursuant to this Section 50, the party replacing such DB Co Party shall from the time of the replacement be deemed to be a DB Co Party and the provisions of this Project Agreement shall be construed accordingly.

51. NOTICES

51.1 Notices to Parties

- (a) All notices, requests, demands, instructions, certificates, consents and other communications (each being a “**Notice**”) required or permitted under this Project Agreement shall be in writing (whether or not “written notice” or “notice in writing” is specifically required by the applicable provision of this Project Agreement) and served by sending the same by registered mail, email, facsimile or by hand, as follows:

If to DB Co:

East West Connectors GP
[REDACTED]

Attn.: [REDACTED]
Email: [REDACTED]

with a copy to:

[REDACTED]

Attn.: [REDACTED]
Email: [REDACTED]

If to the City:

City of Ottawa
110 Laurier Ave West
Ottawa, Ontario K1P 1J1
Mail code: [REDACTED]

Attn.: [REDACTED]

With an electronic copy, for information purposes only, to: [REDACTED]

51.2 Notices to Representatives

- (a) In addition to the notice requirements set out in Section 51.1, where any Notice is to be provided or submitted to the City Representative or the DB Co Representative it shall be provided or submitted by sending the same by registered mail, email, facsimile or by hand, as follows:

If to the DB Co Representative:

[REDACTED]

Attn.: **[REDACTED]**

Email: **[REDACTED]**

If to the City Representative:

City of Ottawa

110 Laurier Ave West

Ottawa, Ontario K1P 1J1

Mail code: **[REDACTED]**

Attn.: **[REDACTED]**

With an electronic copy, for information purposes only, to: **[REDACTED]**

51.3 Facsimile and Email

- (a) Where any Notice is provided or submitted to a Party via facsimile or email, an original of the Notice sent via facsimile or email shall promptly be sent by regular mail, registered mail or hand delivered. For greater certainty, a Notice given via facsimile or email shall not be invalid by reason only of a Party's failure to comply with this Section 51.3.

51.4 Change of Address

- (a) Either Party to this Project Agreement may, from time to time, change any of its contact information set forth in Sections 51.1 or 51.2 by prior Notice to the other Party, and such change shall be effective on the Business Day that next follows the recipient Party's receipt of such Notice unless a later effective date is given in such Notice.

51.5 Deemed Receipt of Notices

- (a) Subject to Sections 51.5(b), 51.5(c) and 51.5(d):
- (i) a Notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
 - (ii) a Notice given by hand delivery shall be deemed to have been received on the day it is delivered;
 - (iii) a Notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile; and

- (iv) a Notice given by email shall be deemed to have been received on the day it is transmitted by email.
- (b) If the Party giving the Notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such Notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 51.
- (c) If any Notice delivered by hand, email, or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such Notice shall be deemed to have been received by such recipient on the next Business Day.
- (d) A Notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such Notice was successful.
- (e) A Notice given by email shall be deemed to have been received by the recipient on the day it is transmitted only if the sender's email "Sent" folder indicated that the transmission of such Notice was delivered.
- (f) In addition to the above methods of delivery for a Notice, each Notice shall be delivered via the secure document-sharing site approved by the City.

51.6 Service on the City

- (a) Where any Notice is required to be served on the City, the obligation to serve such Notice shall be fulfilled by serving it on the City in accordance with the provisions of this Section 51.

52. EMERGENCY MATTERS

52.1 Emergency

- (a) From Financial Close until the last Substantial Completion Date, upon the occurrence of an Emergency, DB Co shall comply with the Construction Safety Management Plan.
- (b) From and after each Substantial Completion Date, upon the occurrence of an Emergency, DB Co shall comply with its Construction Safety Management Plan in accordance with the Output Specifications.
- (c) If, in respect of any Emergency, the City notifies DB Co that it requires compliance with any additional or overriding procedures as may be determined by the City or any other statutory body, then DB Co shall, subject to Schedule 22 – Variation Procedure (if compliance with such procedures constitutes a Variation), comply with such procedures (whether such procedures are specific to the particular Emergency or of general application and on the basis that such procedures shall take precedence to the extent that they overlap with the procedures mentioned in Sections 52.1(a) or 52.1(b)).

53. GENERAL

53.1 Amendments

- (a) This Project Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Project Agreement.

53.2 Waiver

- (a) No waiver made or given by a Party under or in connection with this Project Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by either Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

53.3 Relationship Between the Parties

- (a) The Parties are independent contractors. This Project Agreement is not intended to and does not create or establish between the Parties, or between the City and any DB Co Party, any relationship as partners, joint venturers, employer and employee, master and servant, or (except as provided in this Project Agreement), of principal and agent, and does not create or establish any relationship whatsoever between the City and any representative or employee of DB Co or the DB Co Parties.
- (b) The Parties further agree that:
 - (i) except as expressly provided in this Project Agreement, neither Party shall be, or be deemed to be, an agent of the other Party, and neither Party shall have authority hereunder to represent that it is an agent of the other Party, or to accept any order, or enter into any contract or agreement, or make any representations or warranties of any kind to any person, or to assume or create any obligation, express or deemed, on behalf of or binding, or purportedly binding upon, the other Party;
 - (ii) neither Party shall be required to make or pay employment benefits, contributions for Employment Insurance, Canada Pension Plan, Workers' Compensation Board or other similar levies with respect to any persons employed or engaged by the other Party;
 - (iii) except as otherwise expressly provided in this Project Agreement, each Party shall be free from the control of the other Party as to the manner in which it shall perform its obligations, or cause same to be performed, under this Project Agreement; and

- (iv) any person which a Party may engage as an agent, employee, subcontractor or otherwise, to perform such Party's obligations under this Project Agreement, as permitted hereby, shall, unless the Parties otherwise agree in writing, be engaged by such Party to act solely on behalf of such Party, and such person shall not act, or be deemed to act, on behalf of the Party that did not engage its services.

53.4 General Duty to Mitigate

- (a) The City and DB Co shall at all times take commercially reasonable steps to minimize and mitigate any loss for which the relevant Party is entitled to bring a claim against the other Party pursuant to this Project Agreement.

53.5 Actual Knowledge

- (a) Except where limited to actual knowledge and/or such knowledge which they, at law, may from time to time, be deemed to have, DB Co and the City shall, for all purposes of this Project Agreement, be deemed to have such knowledge in respect of the Project as is actually held (or ought reasonably to be held) by the directors, officers and senior management of DB Co and in the case of the City, its directors, officers and senior management, and the City Representative or the DB Co Representative, as applicable. For clarity, except as expressly set out to the contrary, a reference in this Project Agreement to the "knowledge" of DB Co or of the City shall be construed in a manner consistent with the foregoing sentence.

53.6 Entire Agreement

- (a) Except where provided otherwise in this Project Agreement, this Project Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Project Agreement.

53.7 No Reliance

- (a) Each of the Parties acknowledge that:
 - (i) it has not entered into this Project Agreement on the basis of and does not rely, and has not relied, upon any statement or representation, whether negligent or innocent, or warranty or other provision, whether oral, written, express or implied, made or agreed to by any person, whether a Party to this Project Agreement or not, except those expressly made, given or repeated in this Project Agreement and the only remedy or remedies available in respect of any misrepresentation or untrue statement made to it shall be those expressly provided for in this Project Agreement; and
 - (ii) this Section 53.7 shall not apply to any statement, representation or warranty made fraudulently, or to any provision of this Project Agreement which was induced by fraud, for which the remedies available shall be all those available under the law governing this Project Agreement.

53.8 Severability

- (a) Each provision of this Project Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Project Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Project Agreement. If any such provision of this Project Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Project Agreement as near as possible to its original intent and effect.

53.9 Enurement

- (a) This Project Agreement and any other agreement entered into in connection with the Project to which both the City and DB Co are parties shall enure to the benefit of, and be binding on, the City and DB Co and their respective successors and permitted transferees and assigns.

53.10 Governing Law and Jurisdiction

- (a) This Project Agreement, and each of the documents contemplated by or delivered under or in connection with this Project Agreement, shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) Subject to Schedule 27 – Dispute Resolution Procedure, both Parties hereby irrevocably attorn to the exclusive jurisdiction of the courts of the Province of Ontario and all courts competent to hear appeals therefrom.
- (c) Nothing in this Project Agreement affects the rights, protections and immunities of the Crown under the *Proceedings Against the Crown Act* (Ontario).

53.11 Cumulative Remedies

- (a) Except as otherwise set forth in this Project Agreement, the rights, powers and remedies of each Party set forth in this Project Agreement are cumulative and are in addition to and without prejudice to any other right, power or remedy that may be available to such Party under this Project Agreement.

53.12 Further Assurance

- (a) Each Party shall do all things, from time to time, and execute all further documents necessary to give full effect to this Project Agreement.

53.13 Costs

- (a) Each Party shall be responsible for paying its own costs and expenses incurred in connection with the negotiation, preparation and execution and delivery of this Project Agreement.

53.14 Language of Agreement

- (a) Each of the parties acknowledges having requested and being satisfied that this Project Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en déclare satisfaite.
- (b) For greater certainty, all correspondence, Notices, drawings, test reports, certificates, specifications, information, operation and maintenance instructions, name plates, identification labels, instructions and notices to the public and staff and all other written, printed or electronically readable matter required in accordance with, or for purposes envisaged by, this Project Agreement shall be in English

53.15 Proof of Authority

- (a) The City and DB Co each reserve the right to require any person executing this Project Agreement on behalf of the other Party to provide proof, in a form acceptable to the City or DB Co, as applicable, that they have the requisite authority to execute this Project Agreement on behalf of and to bind the City or DB Co, as applicable.

53.16 Counterparts

- (a) This Project Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any Party providing its signature in faxed form shall promptly forward to the other Party an original signed copy of this Project Agreement which was so faxed.

53.17 Time is of the Essence

- (a) Time is of the essence in this Project Agreement.

SCHEDULE 1

DEFINITIONS AND INTERPRETATION

1. **Definitions.** In the Project Agreement, unless the context otherwise requires:
 - 1.1 “**Account Trustee**” has the meaning given in Schedule 30 - Insurance Trust Agreement.
 - 1.2 “**Activity**” or “**Activity Id**” shall mean an element of the Works performed during the course of the Project. An Activity has an expected duration and cost requirements, and shall be the lowest level of any Works Schedule.
 - 1.3 “**Additional Contractor**” means any independent contractor (not being, for the avoidance of doubt, any of the Third Party Contractors, DB Co or any DB Co Party, or RTG or any RTG Party) or the City’s own forces, engaged by the City to carry out the Additional Works.
 - 1.4 “**Additional Works**” means those works or services, in relation to any of the New City Infrastructure, New MTO Infrastructure, or any Existing Infrastructure owned by the City or MTO, which are not Works and which are to be carried out by an Additional Contractor, including works or services to be performed either before or after Substantial Completion.
 - 1.5 “**Adjacent Developments**” means any development works or like activity carried out during the Project Term by or on behalf of any third party adjacent to the Lands, New City Infrastructure or New MTO Infrastructure and which otherwise affects or may potentially affect any part of the Works, the Lands or the New City Infrastructure or New MTO Infrastructure.
 - 1.6 “**Adjudicator**” has the meaning given in Section 6.1 of Schedule 27 – Dispute Resolution Procedure.
 - 1.7 “**Affiliate**” means an “**affiliate**” as that term is used in the *Business Corporations Act* (Ontario) and any successor legislation thereto, and, in the case of DB Co, shall include each of the unitholders, shareholders, partners or owners of DB Co, as applicable, and any person or entity controlling, controlled by or under common control with DB Co where “control” of any person or entity shall mean the ownership, directly or indirectly, of securities of such person or entity having the power to elect a majority of directors or similar authority or to otherwise control the decisions made on behalf of such person or entity.
 - 1.8 “**Aggregate Actual Bus Rapid Transit Lane Closures**” has the meaning given in Schedule 34 – Mobility Matters.
 - 1.9 “**Aggregate Actual Bus Rapid Transit Lane Closures Cost**” has the meaning given in Schedule 34 – Mobility Matters.
 - 1.10 “**Aggregate Actual Lane Closures**” has the meaning given in Schedule 34 – Mobility Matters.
 - 1.11 “**Aggregate Actual Lane Closures Cost**” has the meaning given in Schedule 34 – Mobility Matters.
 - 1.1 “**Aggregate Vehicle Kilometres Availability Ratio**” for any period *n* means the total Revenue Service Vehicle Kilometres in period *n* plus the number of Scheduled Revenue Service Vehicle Kilometres which were “missed” or not achieved during period *n* due to causes or factors other

than a Construction Defect, divided by the total Scheduled Revenue Service Vehicle Kilometres for period n . For clarity, the formula is provided below:

$$AVKR_n = \frac{Rkm_n + NPCCKm_n}{Sk m_n}$$

Where:

- $AVKR_n$ Means the Aggregate Vehicle Kilometres Availability Ratio for the relevant period n ;
- Rkm_n Means the total amount of Revenue Service Vehicle Kilometres for period n ;
- $NPCCKm_n$ Means the number of Scheduled Revenue Service Vehicle Kilometres which were “missed” or not achieved during period n due to causes or factors other than a Construction Defect; and
- $Sk m_n$ Means the total Scheduled Revenue Service Vehicle Kilometres for period n .

- 1.12 “**Ancillary Documents**” means the Design and Construction Contract.
- 1.13 “**Anticipated Final Completion Date**” means either the East Anticipated Final Completion Date or West Anticipated Final Completion Date.
- 1.14 “**Anticipated Substantial Completion Date**” means either the East Anticipated Substantial Completion Date or West Anticipated Substantial Completion Date.
- 1.15 “**Applicable Law**” means:
- (a) any statute or proclamation or any delegated or subordinate legislation including regulations and by-laws;
 - (b) any Authority Requirement; and
 - (c) any judgment of a relevant court of law, board, arbitrator or administrative agency which is a binding precedent in the Province of Ontario,
- in each case, in force in the Province of Ontario, or otherwise binding on DB Co, any DB Co Party, the City, or any City Party.
- 1.16 “**Appointed Representative**” has the meaning given in Schedule 4 – Lenders’ Direct Agreement.
- 1.17 “**Appointed Representative Notice**” has the meaning given in Schedule 4 – Lenders’ Direct Agreement.
- 1.18 “**Apprenticeship Plan**” has the meaning given in Section 11.23(a) of the Project Agreement.
- 1.19 “**Archaeological Reports**” means, collectively, the following reports:
- (a) [REDACTED];
 - (b) [REDACTED];

- (c) [REDACTED];
 - (d) [REDACTED];
 - (e) [REDACTED];
 - (f) [REDACTED];
 - (g) [REDACTED];
 - (h) [REDACTED];
 - (i) [REDACTED]; and
 - (j) [REDACTED].
- 1.20 “**Architect**” means an architect licensed by the Ontario Association of Architects to practice in the Province of Ontario.
- 1.21 “**Art Cash Allowance**” has the meaning given in Section 11.30(f) of the Project Agreement.
- 1.22 “**Art Cash Allowance Items**” means the work and activities identified as being subject to the Art Cash Allowance, to be performed by DB Co pursuant to Article 12 of Part 1 of Schedule 15-2 of the Output Specifications.
- 1.23 “**As-built Drawings**” means drawings prepared by DB Co to reflect the installed, constructed or commissioned conditions of the Works, in a format and with content and details that the City (with respect to As-built Drawings related to the East Works and West Works) or MTO (with respect to As-built Drawings related to the Highway Works), acting reasonably, consider appropriate.
- 1.24 “**As-built Works Schedule**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.25 “**Associated Liabilities**” has the meaning given in Section 4.17(b) of the Project Agreement.
- 1.26 “**Authority Requirements**” means any order, direction, directive, request for information, policy, administrative interpretation, guideline or rule of or by any Governmental Authority and includes, for clarity, any direction or instruction from Transport Canada arising from any contractual arrangement or board orders involving Transport Canada with respect to the System Infrastructure corridor.
- 1.27 “**Background Information**” means any and all drawings, reports (including the Environmental Reports, the Archaeological Reports, the Geotechnical Reports, the Cultural Heritage Reports, and the Environmental Assessments and any other report given or otherwise referred to in the Output Specifications), studies, plans, data, documents, or other information, given or made available to DB Co or any DB Co Party by the City or any City Party, or which was obtained from or through any other sources prior to the date of the Project Agreement.
- 1.28 “**Bank**” has the meaning given in Schedule 30 – Insurance Trust Agreement.

- 1.29 “**Bankruptcy and Insolvency Act (Canada)**” means the *Bankruptcy and Insolvency Act*, R.S.C. 1985, c. B-3, as amended from time to time.
- 1.30 “**Beneficiary**” has the meaning given in Section 46.3(a) of the Project Agreement.
- 1.31 “**Building Code**” means the regulations made under Section 34 of the *Building Code Act*, S.O. 1992, c.23 (Ontario), as amended from time to time.
- 1.32 “**Bus Rapid Transit**” or “**BRT**” means the existing network of transit traffic lanes including those segments identified in Section 1.6 of Schedule 34 – Mobility Matters.
- 1.33 “**Bus Rapid Transit Lane Closure**” has the meaning given in Schedule 34 – Mobility Matters.
- 1.34 “**Bus Rapid Transit Lane Closure Adjustment**” has the meaning given in Schedule 34 – Mobility Matters.
- 1.35 “**Business Corporations Act (Ontario)**” means the *Business Corporations Act*, R.S.O. 1990, c. B.16, as amended from time to time.
- 1.36 “**Business Day**” means any day other than a Saturday, a Sunday, a statutory holiday in the Province of Ontario or any day on which banks are not open for business in the City of Ottawa, Ontario.
- 1.37 “**Canadian and Industry Standards**” means, at the applicable time, those standards, practices, methods and procedures applicable to Good Industry Practice.
- 1.38 “**Canadian GAAP**” shall be deemed to be the generally accepted accounting principles from time to time approved by the Canadian Institute of Chartered Accountants, or any successor institute, applicable as at the date on which such calculation is made or required to be made in accordance with generally accepted accounting principles, as such principles may be amended or varied by International Financial Reporting Standards then in effect in Canada, in any case consistently applied from one period to the next.
- 1.39 “**Capital Expenditure**” means capital expenditure as interpreted in accordance with Canadian GAAP.
- 1.40 “**Cash Allowance**” means either the Utility Company Works Cash Allowance or the Art Cash Allowance, as the case may be.
- 1.41 “**Category 1 Utility Company**” means any one of:
- (a) [REDACTED];
 - (b) [REDACTED];
 - (c) [REDACTED];
 - (d) [REDACTED]; and
 - (e) [REDACTED].

- 1.42 “**Certificate of Recognition**” means the certification issued by IHSA to a person confirming that the health and safety management systems of such person comply with the terms, provisions and conditions of the COR Program.
- 1.43 “**Certification Services**” has the meaning given in Schedule 6 – Independent Certifier Agreement.
- 1.44 “**Certification Services Variation**” has the meaning given in Schedule 6 – Independent Certifier Agreement.
- 1.45 “**Certified H&S Inspector**” means an individual who is an employee or contractor of the IHSA and has the necessary credentials recognized by the COR Program for the purpose of such individual performing any inspections as may be required to be performed in accordance with Section 15.2 of the Project Agreement.
- 1.46 “**Change in Control**” means, with respect to a person:
- (a) any Change in Ownership, where the effect of such change is to result in control of the decisions made by or on behalf of such person subsequently being with a different entity or entities than prior to such change;
 - (b) any other change in respect of the power to elect a majority of the directors of the person or otherwise control the decisions made on behalf of such person; or
 - (c) any other change of direct or indirect power or authority through any contractual right or other power or interest with or over a person to influence, direct, cause to change or prevent from changing the approval of a decision, direction of the management, actions or policies of such person, to direct or cause the direction of the management, actions or policies of such person.
- 1.47 “**Change in Law**” means the coming into effect or repeal (without re-enactment or consolidation) in Ontario of any Applicable Law, or any amendment or variation of any Applicable Law, including any judgment of a relevant court of law which changes binding precedent in Ontario in each case after the date of the Project Agreement.
- 1.48 “**Change in Ownership**” means, with respect to a person, any change in ownership, whether beneficial or otherwise, of any of the shares or units of ownership of such person, or in the direct or indirect power to vote or transfer any of the shares or units of ownership of such person.
- 1.49 “**City**” has the meaning given in the introductory paragraph of the Project Agreement.
- 1.50 “**City Activities**” means the provision of all governmental services and the conduct of all activities provided in connection or otherwise associated with rail transit and other similar services, including the operation and maintenance of a live rail transit system on the System Infrastructure corridor and Existing Confederation Line.
- 1.51 “**City Default Termination Sum**” has the meaning given in Schedule 23 – Compensation on Termination.
- 1.52 “**City Design Team**” means any of the City, its agents, contractors and subcontractors of any tier and its or their directors, officers and employees, and other persons engaged in respect of design

- reviews, design evaluation, or design consultation processes with respect to the New City Infrastructure or the New MTO Infrastructure or the City Activities, but excluding DB Co and any DB Co Party.
- 1.53 “**City Engineer**” means the engineer appointed by the City in connection with, among other things, acceptance of the New Municipal Infrastructure Works.
- 1.54 “**City Event of Default**” has the meaning given in Section 37.1(a) of the Project Agreement.
- 1.55 “**City HR Policy**” means the City’s human resources policies and guidelines, as they may be amended from time to time and provided to DB Co in writing.
- 1.56 “**City Jointly Developed Materials**” has the meaning given in Section 41.4(a)(i) of the Project Agreement.
- 1.57 “**City Party**” means any of the City and its respective agents, contractors and subcontractors of any tier and its or their directors, officers and employees, and other persons engaged by any of the foregoing in respect of the City Activities, including RTG and RTG Parties in performance of the RTG City Party Works, but excluding RTG and RTG Parties in performance of the RTG Stage 1 PA Works notwithstanding the definition of City Activities, and excluding DB Co and any DB Co Party, and the “the City Parties” shall be construed accordingly.
- 1.58 “**City Permits, Licences, Approvals and Agreements**” means only those the City permits, licences, approvals and agreements which are the responsibility of the City to obtain as set out in Schedule 35 - Permits, Licences, Approvals and Agreements, but for greater certainty shall not include any permission, consent, approval, certificate, permit, licence, agreement or authorization not set out in Schedule 35 - Permits, Licences, Approvals and Agreements but required by the terms of any such item set out in such Appendix.
- 1.59 “**City PLAA Deadline**” has the meaning given in Section 11.8(e) of the Project Agreement
- 1.60 “**City Representative**” means the person designated as such by the City on or prior to the date of the Project Agreement and any permitted replacement.
- 1.61 “**City Supplied Third Party Intellectual Property**” has the meaning given in Schedule 24 – Intellectual Property.
- 1.62 “**City Taxes**” means taxes, or payments in lieu of taxes, imposed on the City and HST and property taxes for which the City is responsible pursuant to Section 4.11 of the Project Agreement.
- 1.63 “**City Trade-Marks**” means any and all Trade-Marks used by the City in any manner whatsoever.
- 1.64 “**CA**” means the *Construction Act*, R.S.O. 1990, c. C.30, as amended from time to time.
- 1.65 “**CMMS**” has the meaning given in Section 25.7(a) of the Project Agreement.
- 1.66 “**Commercial Close**” means the date of the Project Agreement.

- 1.67 “**Commissioning Submittals**” means the commissioning submittals described in Section 1.6 of Schedule 14 – Testing & Commissioning.
- 1.68 “**Commissioning Tests**” means all commissioning tests:
- (a) described in Schedule 14 – Testing & Commissioning;
 - (b) required by Applicable Law, Canadian and Industry Standards or CSA Standards;
 - (c) recommended by the manufacturer of any part of the New City Infrastructure or the New MTO Infrastructure; and
 - (d) required to be included in a Testing & Commissioning Program by the Independent Certifier or the City Representative during its development pursuant to Section 25.2 of the Project Agreement.
- 1.69 “**Companies’ Creditors Arrangement Act (Canada)**” means the *Companies’ Creditors Arrangement Act*, R.S.C. 1985, c. C-36, as amended from time to time.
- 1.70 “**Compensation Event**” has the meaning given in Section 33.1(a) of the Project Agreement.
- 1.71 “**Compensation Payment**” means the City Default Termination Sum, the DB Co Default Termination Sum or the Non-Default Termination Sum.
- 1.72 “**Completion Holdback**” means either the East Completion Holdback or West Completion Holdback, as the case may be.
- 1.73 “**Complex Structure**” means any post-tensioned or pre-tensioned structure that has undergone significant structural alteration making it difficult for personnel at the Site to predict the direction of forces or likely collapse mechanism to be experienced by such structure in connection with any Demolition of all or any part of such structure.
- 1.74 “**Complex Structure Demolition**” means any Demolition where any one or more of the following is applicable:
- (a) significant structural elements, such as girders, columns, shearwalls or slabs, or Complex Structures are being removed, de-stressed, altered or removed;
 - (b) large penetrations are being created through slabs;
 - (c) any Demolition may cause the collapse of any building or structure (or any portion thereof) and such collapse may directly impact adjacent occupied areas of a building or structure and potentially jeopardize the safety of workers, staff or the general public using such building or structure;
 - (d) the Demolition of any building or structure (or any portion thereof) has the potential to result in any materials collapsing onto or interfering with any pedestrian right-of-way or into an occupied part of any building or structure; and
 - (e) any apparent or inferable risk associated with the Demolition poses a significant risk to workers, the public or adjacent property.

- 1.75 “**Concurrent Delays**” means delays to the critical path caused by two or more independent which (a) occur at the same time and continue for the same period of time, and (b) which affect a Scheduled Substantial Completion Date, or Scheduled Final Completion Date.
- 1.76 “**Concurrent Delay Direct Costs**” mean the Direct Costs associated with so Concurrent Delays and referred to in clauses 1.1(i) through (x), inclusive, of Appendix A to Schedule 22 of this Project Agreement.
- 1.77 “**Condition Assessment**” means a close-up visual inspection of all structure elements to confirm and record severity and extent of material defects and suspected performance deficiencies of the various components in accordance with Ontario Structure Inspection Manual (OSIM).
- 1.78 “**Condition Assessment and Recommendations Report**” means a report documenting the findings of the Condition Assessment and providing the details of the recommended rehabilitation, repair or replacement method.
- 1.79 “**Confederation Line East Extension**” has the meaning given in the recitals to the Project Agreement.
- 1.80 “**Confederation Line West Extension**” has the meaning given in the recitals to the Project Agreement.
- 1.81 “**Confidant**” has the meaning given in Section 42.6(a)(i) of the Project Agreement.
- 1.82 “**Confidential Information**” means all confidential and proprietary information which is supplied by or on behalf of a Party, whether before or after the date of the Project Agreement.
- 1.83 “**Construction Access Management Plan**” means DB Co’s plan to manage construction and Site access in accordance with the requirements in Part 7 of Schedule 15-2.
- 1.84 “**Construction Activities**” means construction, rehabilitation, Reinstatement Work, rectification work, and any other aspect of the Works that:
- (a) comprises the alteration, augmenting, upgrading, construction, completion, inspection, calibration, testing or commissioning of any part of the New City Infrastructure and the New MTO Infrastructure;
 - (b) comprises the assessment of any New City Infrastructure or New MTO Infrastructure;
 - (c) may affect the structural integrity of any New City Infrastructure or New MTO Infrastructure, and including any such aspect of the Works carried out as part of any Force Majeure event, Relief Event, Variation, or Innovation Proposal accepted by the City; or
 - (d) comprises Construction Clearing and Grubbing.
- 1.85 “**Construction Certificate**” means a certificate with contents described in Attachment 2 to Appendix A of Schedule 10 – Review Procedure.

- 1.86 “**Construction Clearing and Grubbing**” means the stage of the Works in which vegetation and debris is cleared from the Lands (clearing) and a root rake or similar device is employed to remove roots remaining in the soil (grubbing).
- 1.87 “**Construction Contractor**” means [REDACTED] engaged by DB Co to perform the Works and any substitute construction contractor engaged by DB Co as may be permitted by the Project Agreement.
- 1.88 “**Construction Contractor’s Direct Agreement**” means the direct agreement between the City, DB Co, the Construction Contractor and the Construction Guarantor in the form set out in Schedule 5 – Construction Contractor’s Direct Agreement.
- 1.89 “**Construction Defect**” means any deficiency, defect or error in the Works or failure of the Works to conform to the Project Agreement (including for clarity any defect in the Existing Infrastructure which has been fully incorporated into the Works to the extent such defect was patent at the time of incorporation into the Works, but without prejudice to the risk allocation set out in Section 18.8 of the Project Agreement), or any deficiency, defect or error in relation to any Product procured by DB Co or any DB Co Party, in each case, arising from a non-compliance by DB Co or any DB Co Party with the requirements of the Project Agreement.
- 1.90 “**Construction Document Submittals**” has the meaning given in Section 11.1(d)(ii) of the Project Agreement.
- 1.91 “**Construction Guarantor**” means [REDACTED].
- 1.92 “**Construction Latent Defect**” has the meaning given in Section 11.16(b)(iii) of the Project Agreement.
- 1.93 “**Construction Period**” means that period of time commencing on Financial Close and ending on the earlier of (i) the Termination Date, or (ii) the latest Final Completion Date.
- 1.94 “**Construction Period Payments**” has the meaning given in Schedule 21 – Construction Period Payments.
- 1.95 “**Construction Period Payment Application**” has the meaning given in Schedule 21 – Construction Period Payments
- 1.96 “**Construction Period Quality Failures**” has the meaning given in Schedule 21 – Construction Period Payments.
- 1.97 “**Construction Period Performance Criteria**” has the meaning given in Schedule 21 – Construction Period Payments.
- 1.98 “**Construction Management Plan**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.99 “**Construction Safety Management Plan**” means the plans to be prepared by DB Co to manage the safety of the Works, as described in Schedule 11 – Integrated Management System Requirements.

- 1.100 “**Contamination**” means the presence of any Hazardous Substance in the environment, except Hazardous Substances present in the environment in concentrations below applicable standards as set by Applicable Laws. If Contamination is present in soil, surface water or groundwater, then the soil, surface water or groundwater, as applicable, containing the Contamination shall also be deemed to be Contamination for the purposes of the Project Agreement.
- 1.101 “**Control Party**” means:
- (a) any person with any form of direct ownership interest in DB Co; and
 - (b) [REDACTED].
- 1.102 “**Copyrights**” means all copyrights (registered or otherwise) and registrations and applications for registration thereof, and all rights therein provided by multinational treaties or conventions.
- 1.103 “**COR Certification**” means, in respect of a person, receipt by such person of its (i) Certificate of Recognition; and (ii) Letter of Good Standing.
- 1.104 “**COR Program**” means the national safety program known as “The Certificate of Recognition (COR™)”, being a safety program that enables persons to assess their health and safety management systems to manage risks, establish controls, and minimize the incidence of injury and illness to their workers, and being nationally trademarked and endorsed by participating members of the Canadian Federation of Construction Safety Associations, or such other national safety program approved by the City.
- 1.105 “**COR-Certified Construction DB Co Party**” has the meaning given in Section 11.25(a)(ii) of the Project Agreement.
- 1.106 “**COR-Qualified Construction DB Co Party**” means:
- (a) where the Construction Contractor is a single legal entity, the Construction Contractor;
 - (b) where the Construction Contractor is a joint venture, all members of the joint venture;
 - (c) where the Construction Contractor is a partnership, all partners of the partnership; or
 - (d) the parent(s) of the entity or entities in (a), (b) or (c) above, as applicable,
- provided that each such person has current OHSAS 18001 Accreditation in good standing.
- 1.107 “**Cost of the Financing**” means all costs and expenses incurred in connection with the Financing pursuant to the Lending Agreements, including all interest, fees, expense reimbursements, pre-payment and breakage costs and all other costs and expenses, as set out in Schedule 32 – Financial Model.
- 1.108 “**Cost of the Works**” means the cost to DB Co of performing the Works as set out in Schedule 32 – Financial Model and shall include all amounts to be included in the Cost of the Works set out in the Project Agreement.
- 1.109 “**CN**” means the Canadian National Railway Company, and its successors.

- 1.110 “**CPI**” means, as at the date of the Project Agreement, CPI XFET and, thereafter, the latest available Consumer Price Index Canada (all items) as published by Statistics Canada from time to time (whether preliminary or final), or failing such publication, such other index as the Parties may agree, or as may be determined in accordance with Schedule 27 - Dispute Resolution Procedure, most closely resembles such index.
- 1.111 “**CPI XFET**” means the Consumer Price Index excluding food, energy and the effect of changes in indirect taxes.
- 1.112 “**CPI_{in}**” is the value of CPI on January 1 of the relevant year, to be determined by reference to the relevant index in the month immediately preceding the indexation date.
- 1.113 “**CPI_o**” is the value of CPI at Financial Close, to be determined by reference to the relevant index in the month immediately preceding Financial Close.
- 1.114 “**Critical Construction Defect**” means a Construction Defect in respect of the System Infrastructure which (a) results in a material disruption to operation of Confederation Line East or Confederation Line West which has caused the Aggregate Vehicle Kilometer Availability Ratio in relevant period prior to rectification to be lower than the Aggregate Vehicle Kilometer Availability Ratio constituting a Major Construction Defect or (b) results in a material disruption to access to any Station (including by System Users, understanding, however, that failure of any escalator or elevator shall not be deemed to be a material disruption provided there is a least one elevator is operational).
- 1.115 “**Critical Construction Period Quality Failure**” has the meaning given in Schedule 21 – Construction Period Payments.
- 1.116 “**Critical Items**” has the meaning given in Section 12.1 of Schedule 27 – Dispute Resolution Procedure.
- 1.117 “**Critical Non-Conformance**” means any Non-Conformance, or combination of Medium Non-Conformances, that:
- (a) is persistent, ongoing and repeated; or
 - (b) in the reasonable opinion of the City, by its continued existence or through the process of rectification, would:
 - (i) result or is reasonably expected to result in material disruption to the public or a materially adverse disruption to vehicular or rail traffic flow;
 - (ii) prejudice or is reasonably expected to materially prejudice the performance of any City Activities;
 - (iii) create or is reasonably expected to create a serious threat to the health, safety or security of any person, including any user of any part of or the whole of the New City Infrastructure, New MTO Infrastructure, Existing Infrastructure, and / or Stage 1 Connection Infrastructure, including System Users, volunteers and visitors to the New City Infrastructure, New MTO Infrastructure, Existing Infrastructure and/or Stage 1 Connection Infrastructure, and members of the public;

- (iv) materially increase the City’s risk or transfer risk to the City or any City Party;
 - (v) materially adversely affect the ability of any the City Party to perform their activities as permitted or contemplated by the Project Agreement;
 - (vi) materially adversely affect or change the critical path of the Project as defined in the Works Schedule, adversely affect DB Co’s ability to achieve Substantial Completion by a Scheduled Substantial Completion Date, require a material resequencing of the Works or cause any delay in achieving any Substantial Completion; or
 - (vii) potentially compromise the reputation or integrity of the City and/or any City Party or the nature of the public transit system in one or more of the City of Ottawa or the Province of Ontario so as to affect public confidence in the public transit system in the City of Ottawa, the Province of Ontario or the Project.
- 1.118 “**Critical Path(s)**” means the sequence of Activities determining the minimum time needed to complete the Works
- 1.119 “**Crown**” means Her Majesty the Queen in right of Ontario.
- 1.120 “**Crown Agency Act (Ontario)**” means the *Crown Agency Act*, R.S.O. 1990, c. 48, as amended from time to time.
- 1.121 “**CSA Standards**” means, at the applicable time, the Canadian Standards Association standards.
- 1.122 “**Cultural Heritage Reports**” means, collectively, the following reports:
- (a) [REDACTED];
 - (b) [REDACTED]; and
 - (c) [REDACTED].
- 1.123 “**Current PBS**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.124 “**Cut and Cover**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.125 “**DB Co**” has the meaning given in the introductory paragraph of the Project Agreement.
- 1.126 “**DB Co Amount**” has the meaning given in Schedule 23 – Compensation on Termination.
- 1.127 “**DB Co Commissioning**” means the commissioning activities to be carried out by DB Co prior to the issuance of the relevant Substantial Completion Certificate (in the case of New City Infrastructure and New MTO Infrastructure, other than the Remaining Works), and prior to the issuance of the West Final Completion Certificate (in the case of the Remaining Works) in accordance with the Testing & Commissioning Program.
- 1.128 “**DB Co Commissioning Tests**” means all Commissioning Tests required to be performed by DB Co pursuant to a Testing & Commissioning Program.

- 1.129 **“DB Co Construction Event of Default”** means a DB Co Event of Default relating to a failure or breach by DB Co to perform, observe or comply with any covenants, agreements, obligations or liabilities with respect to the Works, excluding a default by the Construction Guarantor under the Performance Guarantee of Construction Guarantor.
- 1.130 **“DB Co Construction Period Payment Documentation”** has the meaning given in Schedule 21 – Construction Period Payments.
- 1.131 **“DB Co Default Termination Sum”** has the meaning given in Schedule 23 – Compensation on Termination.
- 1.132 **“DB Co Event of Default”** has the meaning given in Section 36.1(a) of the Project Agreement.
- 1.133 **“DB Co Group”** means DB Co together with any person or group of persons, who, either individually or collectively, have Direct or Indirect Power or Control of DB Co.
- 1.134 **“DB Co Party”** means:
- (a) the Construction Contractor;
 - (b) any person engaged by DB Co and/or the Construction Contractor from time to time as may be permitted by the Project Agreement to procure or manage the provision of the Works (or any of them); and
 - (c) in respect of each of the above, their subcontractors of any tier, agents, employees, officers and directors,
- and **“DB Co Parties”** shall be construed accordingly.
- 1.135 **“DB Co Permits, Licences, Approvals and Agreements”** means all permissions, consents, approvals, certificates, permits, licences, agreements and authorizations required to perform the Works in accordance with the Project Agreement and as required by Applicable Law, and including those permissions, consents, approvals, certificates, permits, licences, agreements and authorizations which are the responsibility of DB Co to obtain as set out in Schedule 35 – Permits, Licences, Approvals and Agreements or which is the responsibility of DB Co to perform or fulfill as set out in Schedule 35 – Permits, Licences, Approvals and Agreements and the Output Specifications and all necessary consents, approvals, certificates, permits, licences, agreements and authorizations from and with any third parties (including, to the extent applicable, all Development Approvals, Railway Approvals and Utility Agreements, the Encroachment Permits, and the approval of the Fire Marshal of Ontario), needed to perform the Works in accordance with the Project Agreement and as required by Applicable Law, but other than the City Permits, Licences, Approvals and Agreements.
- 1.136 **“DB Co Proposal Extracts”** means the documents attached as Schedule 13 – DB Co Proposal Extracts.
- 1.137 **“DB Co Representative”** means the person designated as such by DB Co on or prior to Commercial Close and any permitted replacement.
- 1.138 **“DB Co Response Period”** has the meaning given in Schedule 36 – Interface Agreement.

- 1.139 “**DB Co Utility Works**” means the works relating to Utility Infrastructure carried out by DB Co in connection with or as part of the Project Operations, including design, construction, installation, commissioning, protection, removal and relocation of duct banks, poles, pole lines, conduits, gas pipes, oil pipes, sewers and telephone and telecommunication lines, and related and ancillary works.
- 1.140 “**DB Co Variation Notice**” has the meaning given in Schedule 22 - Variation Procedure.
- 1.141 “**Debt Amount**” has the meaning given in Schedule 23 – Compensation on Termination.
- 1.142 “**Debt Service Amount**” means, for any period, the principal and interest payable by DB Co or any DB Co Party to the Lenders in the normal course under the Lending Agreements, provided that at any time where any portion of the interest payable to the Lenders is subject to a Hedging Agreement between DB Co and a Hedge Provider, interest payable on account of such portion of interest payable to the Lenders shall be calculated based on the fixed rate payable by DB Co under such Hedging Agreement without regard to whether such fixed rate is payable directly to a Lender or to the Hedge Provider under the relevant Hedging Agreement and all references to interest payable to the Lenders under this Project Agreement shall be construed accordingly.
- 1.143 “**Delay Event**” has the meaning given in Section 32.1(a) of the Project Agreement.
- 1.144 “**Demolition**” means the removal of a building or structure, as the case may be, or of any material part of a building or structure.
- 1.145 “**Demolition Default Event**” has the meaning given in Section 11.26(b) of the Project Agreement.
- 1.146 “**Demolition Guidelines**” means those guidelines set forth in the document entitled “Professional Engineers Providing Services for Demolition of Buildings and other Structures” published by the Professional Standards Committee established by the Professional Engineers of Ontario and having a publication date of April, 2011.
- 1.147 “**Demolition Plan**” means a plan or other document prepared by a professional engineer, limited licence holder or provisional licence holder in accordance with subsection (3) of the Performance Standards Regulation with respect to the Demolition of a building or structure, and includes any changes to the plan or other document that are made by a professional engineer, limited licence holder or provisional licence holder.
- 1.148 “**Demolition Requirements**” has the meaning given in Section 11.26(a) of the Project Agreement.
- 1.149 “**Demolition Specifications**” means those specifications relating to any Demolition prepared by DB Co in accordance with Section 11.26(a)(iv)(A) of the Project Agreement.
- 1.150 “**Demolition Supervisor**” has the meaning given in Section 11.26(a)(ii) of the Project Agreement.
- 1.151 “**Design and Bid Fee**” has the meaning given in the Request for Proposals.
- 1.152 “**Design and Construction Contract**” means the design and construction contract between DB Co and the Construction Contractor dated on or about the date of Financial Close.

- 1.153 “**Design and Construction Certification Procedure**” means the process for review and issuance of Design Certificates and Construction Certificates in accordance with Schedule 10 – Review Procedure.
- 1.154 “**Design and Construction Report**” has the meaning given in Schedule 17 – Environmental Obligations.
- 1.155 “**Design Certificate**” means a certificate with contents described in Attachment 1 to Appendix A of Schedule 10 – Review Procedure.
- 1.156 “**Design Data**” means all drawings, reports, documents, plans, software, formulae, calculations, and other data prepared or obtained by DB Co relating to the design, construction, testing or monitoring of the New City Infrastructure and the New MTO Infrastructure, but excluding Intellectual Property Rights of third parties, such as CAD software, that is used only in the process of design and construction.
- 1.157 “**Design Development**” means that process for DB Co’s development of design for the Project described in Section 11.1 of the Project Agreement.
- 1.158 “**Design Development Submittal**” has the meaning given in Section 11.1(d)(i) of the Project Agreement.
- 1.159 “**Design Life**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.160 “**Design Management Plan**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.161 “**Design Manager**” means the DB Co Key Individual with the functions described in Schedule 9 – Key Individuals.
- 1.162 “**Design Report(s)**” means reports written to document engineering designs by providing parameters, conditions, needs and requirements to be taken into account in the design of the element in discussion and document the design process and describe the completed design.
- 1.163 “**Design Team**” means [REDACTED] engaged by DB Co to design the New City Infrastructure and the New MTO Infrastructure and any substitute design team engaged by DB Co as may be permitted by the Project Agreement.
- 1.164 “**Design Workshops**” means those workshops undertaken in accordance with Section 1.8 of Schedule 10 – Review Procedure.
- 1.165 “**Development Approvals**” means development permits, building permits, zoning approvals and any other planning or development permit, consent or applicable Permits, Licences, Approvals and Agreements, required from time to time for construction of the New City Infrastructure and the New MTO Infrastructure.
- 1.166 “**Direct Cost**” has the meaning given in Schedule 22 – Variation Procedure.
- 1.167 “**Direct Losses**” means all damage, losses, liabilities, penalties, fines, assessments, claims, actions, costs, expenses (including the cost of legal or professional services, legal costs being on a

substantial indemnity basis), proceedings, demands and charges whether arising under statute, contract or at common law, except Indirect Losses. For clarity, Direct Losses shall not include any "Deductions" (as such term is defined in the Stage 1 Project Agreement) made from any payment to RTG under the Stage 1 Project Agreement.

1.168 **“Direct or Indirect Power or Control”** means the direct or indirect power or control over the decisions, management, actions or policies of a person, including through the direct or indirect power or control over the decisions, management, actions or policies of any persons having direct or indirect power or control over the decisions, management, actions or policies of any other person, whether through:

- (a) ownership, beneficial or otherwise, of greater than [REDACTED] percent of any of the shares, units or equity interests of a person;
- (b) the direct or indirect power to vote any of the shares, units or equity interests of a person where an individual’s ownership, beneficial or otherwise, is equal to or exceeds [REDACTED] percent of the voting securities, units or equity interests of such person; or
- (c) the direct or indirect power or authority to influence or direct the approval of a decision, the management, actions or policies of a person or to prevent the approval of a decision, the management, actions or policies of a person through any contractual right or other power or interest with or over a person.

1.169 **“Discriminatory Change in Law”** means any Change in Law the effect of which is to discriminate directly against or impose additional Taxes which apply specifically to:

- (a) transit systems, roads or highways, including rail transit systems, roads or highways, whose design, construction, and financing are procured by a contract similar to the Project Agreement in relation to other similar transit systems;
- (b) the New City Infrastructure or New MTO Infrastructure in relation to other transit systems, including rail transit systems, roads or highways;
- (c) DB Co in relation to other persons; or
- (d) persons undertaking projects for design, construction, and financing that are procured by a contract similar to the Project Agreement in relation to other persons undertaking similar projects procured on a different basis,

except that such Change in Law shall not be a Discriminatory Change in Law:

- (e) where it is in response to any act or omission on the part of DB Co which contravenes Applicable Law (other than an act or omission rendered illegal by virtue of the Discriminatory Change in Law itself);
- (f) solely on the basis that its effect on DB Co is greater than its effect on other companies; or
- (g) where such Change in Law is a change in Taxes that affects companies generally.

- 1.170 “**Dispute**” has the meaning given in Schedule 27 - Dispute Resolution Procedure.
- 1.171 “**Dispute Resolution Procedure**” means the procedure set out in Schedule 27 – Dispute Resolution Procedure.
- 1.172 “**Division**” means one of the following: East Works, West Works, Highway Works, or Remaining Works.
- 1.173 “**Drainage**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.174 “**Draw Amount**” has the meaning given in Section 11.18D of the Project Agreement.
- 1.175 “**Earlier Scheduled Substantial Completion Date**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.176 “**Earned Value**” has the meaning given in Schedule 21 – Construction Period Payments.
- 1.177 “**East Anticipated Final Completion Date**” means the date (which, for greater certainty, will be on or before the East Scheduled Final Completion Date) on which DB Co anticipates that East Final Completion will be achieved.
- 1.178 “**East Anticipated Substantial Completion Date**” has the meaning given in Section 25.5(a)(i) of the Project Agreement.
- 1.179 “**East Completion Holdback**” has the meaning given in Section 25.10(a) of the Project Agreement.
- 1.180 “**East Construction Defect**” has the meaning given in Section 11.15(a) of the Project Agreement.
- 1.181 “**East DB Co Commissioning**” means the DB Co Commissioning in respect of the East Works other than the Highway Works.
- 1.182 “**East Final Completion**” means the completion of the East Works in accordance with the Project Agreement, including completion of all East Minor Deficiencies.
- 1.183 “**East Final Completion Countdown Notice**” has the meaning given in Section 25.13(a)(i) of the Project Agreement.
- 1.184 “**East Final Completion Certificate**” means the certificate to be issued by the Independent Certifier in accordance with Section 25.14(g) of the Project Agreement in respect of East Final Completion.
- 1.185 “**East Final Completion Date**” means the date on which East Final Completion is achieved as evidenced by the East Final Completion Certificate, as such date shall be stated therein.
- 1.186 “**East Final Completion Notice**” has the meaning given in Section 25.14(b) of the Project Agreement.
- 1.187 “**East Further Revised Substantial Completion Date**” has the meaning given in Section 25.5(j) of the Project Agreement.

- 1.188 “**East Initial Countdown Notice**” has the meaning given in Section 25.5(a)(i) of the Project Agreement.
- 1.189 “**East Look-ahead Schedule**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.190 “**East Minor Deficiencies**” has the meaning given in Section 25.10(a) of the Project Agreement.
- 1.191 “**East Minor Deficiencies List**” has the meaning given in Section 25.10(a) of the Project Agreement.
- 1.192 “**East Revised Substantial Completion Date**” has the meaning given in Section 25.5(g)(i) of the Project Agreement.
- 1.193 “**East Scheduled Final Completion Date**” means the date that is March 14, 2025 following the East Substantial Completion Date.
- 1.194 “**East Scheduled Substantial Completion Date**” means November 26, 2024, as such date may be amended pursuant to Section 32 of the Project Agreement.
- 1.195 “**East Subsequent Notice**” has the meaning given in Section 25.5(g)(i) of the Project Agreement.
- 1.196 “**East Substantial Completion**” means the point at which, in respect of the East Works, (i) the New City Infrastructure, other than the Remaining Works, have been completed in accordance with the Project Agreement; and (ii) all requirements for East Substantial Completion described in the East Testing & Commissioning Plan, other than in respect of East Minor Deficiencies, the Remaining Works, the Remaining Works Minor Deficiencies, and Trial Running have been satisfied.
- 1.197 “**East Substantial Completion Certificate**” means the certificate to be issued by the Independent Certifier in accordance with Section 25.4(d) of the Project Agreement.
- 1.198 “**East Substantial Completion Date**” means the date on which East Substantial Completion is achieved as evidenced by the East Substantial Completion Certificate, as such date shall be stated therein.
- 1.199 “**East Substantial Completion Notice**” has the meaning given in Section 25.4(b)(i) of the Project Agreement.
- 1.200 “**East Substantial Completion Payment**” means the amount of \$[REDACTED], less the East Completion Holdback as at the East Substantial Completion Payment Date.
- 1.201 “**East Substantial Completion Payment Date**” means the date that is 2 Business Days after the East Substantial Completion Date.
- 1.202 “**East Testing & Commissioning Plan**” means the Testing & Commissioning Plan for the East Works included in the Testing & Commissioning Program.
- 1.203 “**East Warranty Letter of Credit**” has the meaning given in Section 11.18(a)(i) of the Project Agreement.

- 1.204 **“East Warranty Cash Amount”** has the meaning given in Section 4.2(c)(i) of the Project Agreement.
- 1.205 **“East Warranty Period”** means:
- (a) in respect of the East Works other than New Municipal Infrastructure, a period beginning on the East Substantial Completion Date and expiring on the date 2 years after such East Substantial Completion Date; and
 - (b) in respect of each New Municipal Construction Component comprising part of the East Works, a period beginning on the New Municipal Infrastructure Component Acceptance Date for such New Municipal Construction Component, and expiring on the date 2 years after such New Municipal Infrastructure Component Acceptance Date.
- 1.206 **“East Warranty Work”** has the meaning given in Section 11.17(a)(i) of the Project Agreement.
- 1.207 **“East Works”** means the Works as it relates to the Confederation Line East Extension, as generally described in Article 19 of Part 1 of Schedule 15-2.
- 1.208 **“Electronic Data Management System”** or **“EDMS”** means a management system as described in Article 3 of Schedule 10 – Review Procedure.
- 1.209 **“Economic Interest”** means any right to receive, directly or indirectly and whether in cash or in kind, a payment, repayment, fee, interest, dividend, distribution, redemption or any other consideration of benefit or value to the recipient of any nature whatsoever, but excluding wages, salaries or other employment-related benefits.
- 1.210 **“Encroachment Permits”** means the encroachment permits which DB Co is required to obtain from MTO to enable and authorize, among other things, DB Co to perform the Works.
- 1.211 **“Emergency”** means any situation, event, occurrence, multiple occurrences or circumstances:
- (a) that:
 - (i) constitutes or may constitute a hazard to or jeopardizes or may jeopardize or pose a threat to health and safety of any persons (including System Users and City Parties) or any part of or the whole of the New City Infrastructure, the New MTO Infrastructure, the Existing Infrastructure or the Stage 1 Connection Infrastructure;
 - (ii) causes or may cause damage or harm to property, buildings and/or equipment;
 - (iii) constitutes a hostage situation or state of emergency declared as such by the City Representative or the City (acting reasonably);
 - (iv) materially interferes with or prejudices or may materially interfere with or prejudice the safe operation of the New City Infrastructure or New MTO Infrastructure, any part of the Lands, the conduct of Works, or the conduct of Governmental Activities; or
 - (v) constitutes a period of transition to or from war,

and which, in the opinion of the City, requires immediate action to prevent and/or mitigate the occurrence (or risk of the occurrence) of the foregoing; or

- (b) which gives rise to an emergency, as determined by any statutory body including (notwithstanding the generality of the foregoing) an Emergency Service Provider.

1.212 **“Emergency Response Plan”** means the existing City of Ottawa Emergency Response Plan for the existing LRT system as amended and modified by the Emergency Management provisions in Schedule 15-2 Part 1.

1.213 **“Emergency Service Providers”** means any Police Service, firefighting service, ambulance service, armed forces or other authority with emergency service authority pursuant to Applicable Law which may require access to the New City Infrastructure or New MTO Infrastructure from time to time.

1.214 **“Encumbrances”** means the Encumbrances listed in Schedule 16 - Encumbrances and any other encumbrances deemed to be Encumbrances as described in and for the purposes set out in Section 17.2(d) of the Project Agreement.

1.215 **“Environmental Assessments”** has the meaning given in Schedule 17 – Environmental Obligations.

1.216 **“Environmental Protection Act (Ontario)”** means the *Environmental Protection Act*, R.S.O. 1990, c. E. 19, as amended from time to time.

1.217 **“Environmental Management Plan”** means has the meaning given in Schedule 17 – Environmental Obligations.

1.218 **[Not used]**

1.219 **“Environmental Reports”** means, collectively, the following reports:

- (a) [REDACTED];
- (b) [REDACTED];
- (c) [REDACTED];
- (d) [REDACTED];
- (e) [REDACTED];
- (f) [REDACTED];
- (g) [REDACTED];
- (h) [REDACTED];
- (i) [REDACTED];
- (j) [REDACTED];

- (k) [REDACTED];
- (l) [REDACTED];
- (m) [REDACTED];
- (n) [REDACTED];
- (o) [REDACTED];
- (p) [REDACTED];
- (q) [REDACTED];
- (r) [REDACTED];
- (s) [REDACTED];
- (t) [REDACTED];
- (u) [REDACTED];
- (v) [REDACTED];
- (w) [REDACTED];
- (x) [REDACTED];
- (y) [REDACTED];
- (z) [REDACTED];
- (aa) [REDACTED];
- (bb) [REDACTED];
- (cc) [REDACTED];
- (dd) [REDACTED];
- (ee) [REDACTED];
- (ff) [REDACTED];
- (gg) [REDACTED];
- (hh) [REDACTED];
- (ii) [REDACTED];
- (jj) [REDACTED];

- (kk) [REDACTED];
- (ll) [REDACTED];
- (mm) [REDACTED];
- (nn) [REDACTED];
- (oo) [REDACTED];
- (pp) [REDACTED];
- (qq) [REDACTED];
- (rr) [REDACTED];
- (ss) [REDACTED];
- (tt) [REDACTED];
- (uu) [REDACTED];
- (vv) [REDACTED];
- (ww) [REDACTED];
- (xx) [REDACTED];
- (yy) [REDACTED];
- (zz) [REDACTED];
- (aaa) [REDACTED];
- (bbb) [REDACTED];
- (ccc) [REDACTED];
- (ddd) [REDACTED];
- (eee) [REDACTED];
- (fff) [REDACTED];
- (ggg) [REDACTED];
- (hhh) [REDACTED]; and
- (iii) [REDACTED].

1.220 “**Erosion and Sediment Control Plan**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.

- 1.221 “ESA” means the *Endangered Species Act*, 2007 (Ontario).
- 1.222 “Estimate” has the meaning given in Schedule 22 - Variation Procedure.
- 1.223 “Excise Tax Act (Canada)” means the *Excise Tax Act*, R.S.C. 1985, c. E-15, as amended from time to time.
- 1.224 “Executive Council Act (Ontario)” means the *Executive Council Act*, R.S.O. 1990, c. E. 25, as amended from time to time.
- 1.225 “Existing Adjacent Structures” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.226 “Existing Confederation Line” has the meaning given in the recitals to the Project Agreement.
- 1.227 “Existing Contamination” has the meaning given in Section 18.2(a) of the Project Agreement.
- 1.228 “Existing Infrastructure” means existing public realm, road, highway, Utility Infrastructure, railway infrastructure, drainage works, landscaping, infrastructure situated on the Lands, owned by the MTO, the City, Utility Companies, Railway Companies, or any other third party, but excluding the Stage 1 Connection Infrastructure.
- 1.229 “Expiry Date” means the first anniversary of the latest Final Completion Date.
- 1.230 “External IMS Audit” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.231 “Facilities” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.232 “Factory Acceptance Test” or “FAT” has the meaning given in Schedule 14 – Testing & Commissioning.
- 1.233 “Federal Lands” means:
- (a) lands that belong to Her Majesty in right of Canada, or that Her Majesty in right of Canada has the power to dispose of, and all waters on and airspace above those lands, other than lands under the administration and control of the Commissioner of Yukon, the Northwest Territories or Nunavut;
 - (b) the following lands and areas:
 - (i) the internal waters of Canada, in any area of the sea not within a province,
 - (ii) the territorial sea of Canada, in any area of the sea not within a province,
 - (iii) the exclusive economic zone of Canada, and
 - (iv) the continental shelf of Canada;

- (c) reserves, surrendered lands and any other lands that are set apart for the use and benefit of a band and that are subject to the Indian Act, and all waters on and airspace above those reserves or lands.
- 1.234 “**Final Completion**” means either East Final Completion or West Final Completion, as applicable.
- 1.235 “**Final Completion Certificate**” means a certificate to be issued by the Independent Certifier in accordance with Section 25.14 of the Project Agreement.
- 1.236 “**Final Completion Countdown Notice**” means either the East Final Completion Countdown Notice or West Final Completion Countdown Notice, as applicable.
- 1.237 “**Final Completion Date**” means either the East Final Completion Date or West Final Completion Date, as applicable.
- 1.238 “**Final Completion Notice**” means either the East Final Completion Notice or West Final Completion Notice, as applicable.
- 1.239 “**Final Design Development**” or “**FDD**” has the meaning given in Schedule 10 – Review Procedure.
- 1.240 “**Final New Municipal Infrastructure Works Acceptance Certificate**” means the certificate issued by the City Engineer to DB Co confirming New Municipal Infrastructure Works Acceptance.
- 1.241 “**Final New Municipal Infrastructure Works Requirements**” has the meaning given in Section 11.27(h) of the Project Agreement.
- 1.242 “**Financial Administration Act (Ontario)**” means the *Financial Administration Act*, R.S.O. 1990, c. F.12, as amended from time to time.
- 1.243 “**Financial Close**” means the first date that funding is available under the Lending Agreements.
- 1.244 “**Financial Close Target Date**” means April 25, 2019, as such date may be extended in accordance with the provisions of the Project Agreement.
- 1.245 “**Financial Model**” means the computer spreadsheet [REDACTED] for the Project incorporating statements of DB Co’s cashflows including all expenditure, revenues, financing and taxation of the Works together with, if applicable, the profit and loss accounts and balance sheets for DB Co throughout the Project Term accompanied by details of all assumptions, calculations and methodology used in their compilation and any other documentation necessary or desirable to operate the model.
- 1.246 “**Financial Obligations**” means the obligation to pay any application fees, third party fees, costs or charges (including all applicable Taxes thereon), the provision of any letters of credit, instruments of guarantee, bonds or security deposits, or any other financial security obligations.
- 1.247 “**Financing**” means the financing with the Lenders, that is consistent in all material respects with Schedule 32 - Financial Model and the Project Agreement, to finance the Project.

- 1.248 “FIPPA” means the *Freedom of Information and Protection of Privacy Act* (Ontario), R.S.O. 1990, c. F.31, as amended from time to time.
- 1.249 “Float” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.250 “Force Majeure” has the meaning given in Section 35.1(a) of the Project Agreement.
- 1.251 “*Funeral, Burial and Cremations Services Act (Ontario)*” means the *Funeral, Burial and Cremations Services Act*, S.O. 2002, c.33, as amended from time to time.
- 1.252 “Geotechnical Reliant Reports” means:
- (a) those reports listed in the definition of “Geotechnical Reports” as items (a) – (c), (g) – (m), (p), and (s) – (z); and
 - (b) in respect of those reports listed in the definition of “Geotechnical Reports” as items (d) – (f), (n) and (aa), the geotechnical borehole data included in such reports, excluding any data interpretation or extrapolation expressed therein, as clarified in the reliance letters included the Background Information pertaining to such reports.
- 1.253 “Geotechnical Instrumentation and Monitoring Plan” has the meaning given in Schedule 15 – Output Specifications.
- 1.254 “Geotechnical Reports” means, collectively, the following geotechnical reports:
- (a) [REDACTED];
 - (b) [REDACTED];
 - (c) [REDACTED];
 - (d) [REDACTED];
 - (e) [REDACTED];
 - (f) [REDACTED];
 - (g) [REDACTED];
 - (h) [REDACTED];
 - (i) [REDACTED];
 - (j) [REDACTED];
 - (k) [REDACTED];
 - (l) [REDACTED];
 - (m) [REDACTED];
 - (n) [REDACTED];

- (o) [REDACTED];
- (p) [REDACTED];
- (q) [REDACTED];
- (r) [REDACTED];
- (s) [REDACTED];
- (t) [REDACTED];
- (u) [REDACTED];
- (v) [REDACTED];
- (w) [REDACTED];
- (x) [REDACTED];
- (y) [REDACTED];
- (z) [REDACTED]; and
- (aa) [REDACTED].

- 1.255 “**Good Industry Practice**” means using standards, practices, methods and procedures to a good commercial and rail safety standard, conforming to Applicable Law and exercising that degree of skill and care, diligence, prudence and foresight which would reasonably and ordinarily be expected from a qualified, skilled and experienced person engaged in a similar type of undertaking under the same or similar circumstances.
- 1.256 “**Government Entity**” means any one or more of the Province and MOI.
- 1.257 “**Government Sensitive Information**” means any information which is designated as such by the City from time to time, or which a reasonable person having regard to the circumstances, would regard as sensitive, including (i) all confidential information that is designated as such by Applicable Law, and (ii) any record, the disclosure of which could be injurious to the interests of the City.
- 1.258 “**Governmental Activities**” means the provision of all governmental services and the conduct of all activities provided in connection or otherwise associated with the Lands, New City Infrastructure and New MTO Infrastructure by any Governmental Authority or Emergency Service Provider, and includes the City Activities.
- 1.259 “**Governmental Authority**” means any federal, provincial, territorial, regional, municipal or local governmental authority, quasi-governmental authority, court, government or self-regulatory organization, commission, board, tribunal, organization, or any regulatory, administrative or other agency, or any political or other subdivision, department, or branch of any of the foregoing, having legal jurisdiction in any way over the City, any aspect of the performance of the Project Agreement, the operation of the System or the Governmental Activities, in each case to the extent

- it has or performs legislative, judicial, regulatory, administrative or other functions within its jurisdiction.
- 1.260 **“Guaranteed Price”** is the amount referred to in Section 3.1(a) of the Project Agreement.
- 1.261 **“Guideway”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents
- 1.262 **“Handover”** has the meaning given in Appendix B of Schedule 10 – Review Procedure
- 1.263 **“H&S Certification Default Event”** has the meaning given in Section 11.25(b) of the Project Agreement.
- 1.264 **“H&S Certification Maintenance Plan”** has the meaning given in Section 11.25(b)(vii)(B) of the Project Agreement.
- 1.265 **“H&S Certification Reinstatement Plan”** has the meaning given in Section 11.25(b)(vi)(B) of the Project Agreement.
- 1.266 **“H&S Construction Inspection”** has the meaning given in Section 15.2(a) of the Project Agreement.
- 1.267 **“H&S Construction Inspection Report”** has the meaning given in Section 15.1(b) of the Project Agreement.
- 1.268 **“H&S Construction Re-Inspection”** has the meaning given in Section 15.1(c)(ii) of the Project Agreement.
- 1.269 **“H&S Construction Re-Inspection Report”** has the meaning given in Section 15.1(c)(iii) of the Project Agreement.
- 1.270 **“Hazardous Substances”** means any contaminant, pollutant, mould, dangerous substance, toxic substance, liquid waste, industrial waste, gaseous waste, hauled liquid waste, hazardous material, or hazardous substance as defined in or identified pursuant to any Applicable Law.
- 1.271 **“Hedge Provider”** means a person that has entered into a Hedging Agreement with DB Co pursuant to the Lending Agreements, together with their successors and permitted assigns.
- 1.272 **“Hedging Agreement”** means an agreement relating to the hedging of interest rate risk entered into by DB Co and the Hedge Provider(s) pursuant to the Lending Agreements.
- 1.273 **“Highway Construction Defect”** has the meaning given in Section 11.15(c) of the Project Agreement.
- 1.274 **“Highway Corridor Lands”** has the meaning given in Schedule 20 – Lands.
- 1.275 **“Highway DB Co Commissioning”** means the DB Co Commissioning in respect of the Highway Works.
- 1.276 **“Highway Testing & Commissioning Plan”** means the Testing & Commissioning Plan for the Highway Works included in the Testing & Commissioning Program.

- 1.277 “**Highway Traffic Act (Ontario)**” means the *Highway Traffic Act*, R.S.O. 1990, c. H.8, as amended from time to time.
- 1.278 “**Highway Works**” means the Works as it relates to the New MTO Infrastructure, as generally described in Article 19 of Part 1 of Schedule 15-2.
- 1.279 “**Hold Points**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.280 “**HST**” means the value-added tax imposed pursuant to Part IX of the *Excise Tax Act* (Canada), and any successor legislation thereto.
- 1.281 “**IHSA**” means Infrastructure Health and Safety Association, a not-for-profit occupational safety organization formed on January 1, 2010 that provides health and safety training material and services to Ontario construction, electrical utilities and transportation industries, and is accredited in Ontario to issue and grant Certificates of Recognition and Letters of Good Standing, or such other person so accredited in Ontario to issue and grant Certificates of Recognition and Letters of Good Standing.
- 1.282 “**IMS Audit**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.283 “**IMS Director**” means that individual identified as such in Schedule 9 – Key Individuals, and such replacements or substitutes as may be permitted from time to time in accordance with this Project Agreement.
- 1.284 “**Income Tax Act (Canada)**” means the *Income Tax Act*, R.S.C., 1985, c. 1, as amended from time to time.
- 1.285 “**Indemnifiable Taxes**” has the meaning given in Section 4.17(b) of the Project Agreement.
- 1.286 “**Indemnifier**” has the meaning given in Section 46.3(a) of the Project Agreement.
- 1.287 “**Independent Certifier**” means the person appointed as the Independent Certifier pursuant to the Independent Certifier Agreement and as may be permitted pursuant to the Project Agreement.
- 1.288 “**Independent Certifier Agreement**” means the contract entered into between DB Co, the City and the Independent Certifier in substantially the form attached hereto as Schedule 6 – Independent Certifier Agreement.
- 1.289 “**Independent Safety Assessor**” means an independent party appointed by DB Co to assess:
- (a) the safety and security of the Works prior to Substantial Completion; and
 - (b) changes to the New City Infrastructure following Substantial Completion, if any.
- 1.290 “**Indirect Losses**” has the meaning given in Section 47.1(a) of the Project Agreement.
- 1.291 “**Infringing Material**” has the meaning given in Section 46.1(g) of the Project Agreement.
- 1.292 “**Initial Capital Investment Amount**” has the meaning given in Schedule 21 – Construction Period Payments.

- 1.293 “**Initial Countdown Notice**” has the meaning given in Section 25.5(a) of the Project Agreement.
- 1.294 “**Injurious Affection**” has the meaning given in the *Expropriations Act*, R.S.O. 1990, c. E. 26, as amended from time to time.
- 1.295 “**Innovation Proposal**” has the meaning given in Section 31.2(b) of the Project Agreement.
- 1.296 “**Internal IMS Audit**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.297 “**Intrusion and Access Control System**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.298 “**Inspection and Test Plan**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.299 “**Insurance**” means the insurance contemplated in Schedule 25 – Insurance and Performance Security Requirements.
- 1.300 “**Insurance Policies**” has the meaning given in Schedule 30 – Insurance Trust Agreement.
- 1.301 “**Insurance Proceeds**” has the meaning given in Schedule 30 – Insurance Trust Agreement.
- 1.302 “**Insurance Trust Account**” means [REDACTED] at [REDACTED].
- 1.303 “**Insurance Trust Agreement**” means the insurance trust agreement to be entered into between the City, the Lenders’ Agent, DB Co and the Account Trustee in the form set out in Schedule 30 - Insurance Trust Agreement.
- 1.304 “**Integrated Management Plans**” or “**IMP**” have the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.305 “**Integrated Management System**” and “**IMS**” have the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.306 “**Intellectual Property**” means all intellectual and industrial property, including without limitation: (i) Trade-Marks; (ii) patents; (iii) copyrights; (iv) inventions, whether or not patentable, whether or not reduced to practice or whether or not yet made the subject of a pending patent application or applications; (v) ideas and conceptions of potentially patentable subject matter, including, without limitation, any patent disclosures, whether or not reduced to practice and whether or not yet made the subject of a pending patent application or applications; (vi) trade secrets and confidential, technical or business information (including ideas, formulas, compositions, designs, inventions, and conceptions of inventions whether patentable or unpatentable and whether or not reduced to practice); (vii) whether or not confidential, technology (including know-how and show-how), manufacturing and production processes and techniques, methodologies, research and development information, drawings, specifications, designs, plans, proposals, technical data, copyrightable works, marketing and business data, pricing and cost information, business and marketing plans; (xiv) copies and tangible embodiments of all the foregoing, in whatever form or medium; (ix) all rights to obtain and rights to apply for any of the foregoing and all rights therein provided by multinational treaties or conventions; (x) all rights under any agreements or instruments with respect to items in (i) to (ix)

above; and (xi) all rights to sue and recover and retain damages and costs and attorneys' fees for present and past infringement or other violation of any of the intellectual property rights hereinabove set out.

- 1.307 **“Intellectual Property Rights”** means all right, title and interest in, to and under the Intellectual Property in or associated with the Project Data and all Intellectual Property which, or the subject matter of which, is at any time before or after Commercial Close created, brought into existence, acquired, used or intended to be used by DB Co, any Subcontractor or by other third parties (for such third parties' use by or on behalf of or for the benefit of DB Co) for any or all of the purposes of:
- (a) the Works, including the design and construction of the New City Infrastructure and the New MTO Infrastructure (excluding Intellectual Property Rights of third parties, such as CAD software, that is used only in the process of design and construction); or
 - (b) the Project Agreement.
- 1.308 **“Interest Reference Rate”** means the reference benchmark rate of interest identified in the Financial Model and used in the calculation of the Project Debt Interest Cost, and for greater clarity, is the base rate of interest exclusive of any stated or imbedded spread, (including credit, swap or other types of spread) or fees.
- 1.309 **“Interface Agreement”** means that interface agreement entered into by DB Co, the City and RTG upon the execution and delivery of this Project Agreement, in the form attached hereto as Schedule 36 – Interface Agreement.
- 1.310 **“Irrecoverable Tax”** has the meaning given in Section 4.13(b) of the Project Agreement.
- 1.311 **“Issued For Construction”** has the meaning given in Section 3.12 of Schedule 10 – Review Procedure.
- 1.312 **“Jointly Developed Materials”** has the meaning given in Section 41.4(a) of the Project Agreement.
- 1.313 **“Key Individuals”** means those DB Co Parties listed in Schedule 9 - Key Individuals.
- 1.314 **“Key Works Milestones”** has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.315 **“Lands”** has the meaning given in Schedule 20 – Lands.
- 1.316 **“Lane Closure”** has the meaning given in Schedule 34 – Mobility Matters.
- 1.317 **“Lane Closure Adjustment”** has the meaning given in Schedule 34 – Mobility Matters.
- 1.318 **“Latent Defect Warranty Period”** means the balance of the period after a Warranty Period during which DB Co remains responsible for correcting and Making Good of any Construction Latent Defect in accordance with Section 11.16(b)(iii) of the Project Agreement.
- 1.319 **“Legislative Holdback”** means the basic holdback to be retained pursuant to section 22(1) of the CA. For greater certainty, the amount of the holdback required by Part IV of the CA may be

- reduced by the amount of the holdback which has been paid by DB Co or the Construction Contractor in respect of Subcontracts certified complete under Section 33 of the CA in accordance with Section 25 of the CA.
- 1.320 “**Lenders**” means any or all of the persons acting arm’s length to DB Co and each DB Co Party who provide the Financing, and for greater clarity, excludes the Hedge Provider(s) or any other hedge providers and their respective permitted successors and assigns and any Affiliate of DB Co or a DB Co Party.
- 1.321 “**Lenders’ Agent**” has the meaning given in Schedule 4 – Lenders’ Direct Agreement.
- 1.322 “**Lenders’ Consultant**” means any consultant appointed from time to time by the Lenders. Nothing contained in the Project Documents and no action taken by the Lenders’ Consultant in connection with the Works or the Project Documents shall constitute direction and/or control by the City, DB Co or the Lenders.
- 1.323 “**Lenders’ Direct Agreement**” means the direct agreement to be entered into between the City, the Lenders’ Agent and DB Co in the form set out in Schedule 4 - Lenders’ Direct Agreement.
- 1.324 “**Lending Agreements**” means any or all of the agreements or instruments to be entered into by DB Co or any of its Affiliates relating to the Financing, including, for greater certainty, the Security Documents and the Hedging Agreements.
- 1.325 “**Letter of Credit Provider**” means the provider of a Standby Letter of Credit, and “**Letter of Credit Provider(s)**” means all providers of the Standby Letter(s) of Credit.
- 1.326 “**Letter of Good Standing**” means the document issued by IHSA to a person confirming that the internal maintenance audit performed by such person regarding its health and safety management systems has been approved by IHSA, and that such person has successfully completed such internal audit pursuant to the terms and conditions of the COR Program.
- 1.327 “**Licensor**” has the meaning given in Schedule 24 – Intellectual Property.
- 1.328 “**Limitations Act, 2002 (Ontario)**” means the *Limitations Act, 2002*, S.O. 2002, c.24, as amended from time to time.
- 1.329 “**Limited Modification Rights**” has the meaning given in Schedule 24 – Intellectual Property.
- 1.330 “**Listed DB Co PLAA**” means those DB Co Permits, Licences, Approvals and Agreements listed in Appendix A to Schedule 35 – Permits, Licences, Approvals and Agreements.
- 1.331 “**LMSF**” means the light maintenance storage facility further described in Schedule 15 – Output Specifications.
- 1.332 “**Load-Path Diagram**” means a graphically illustrated diagram that indicates in all relevant detail (including by use of colour-coded arrows indicating the directions of forces caused by dead loads, live loads, vertical loads and lateral loads) how the structural loads are transferred throughout a building or structure that is to be the subject of a Demolition.
- 1.333 “**Longstop Date**” has the meaning given in Section 36.1(a)(ii) of the Project Agreement.

- 1.334 **“Look-ahead Schedule”** has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.335 **“Maintenance Instructions”** means the maintenance data prepared and delivered by DB Co to the City pursuant to Section 25.7 of the Project Agreement.
- 1.336 **“Major Construction Defect”** means any Construction Defect in respect of the System Infrastructure which, when measuring its most severe consequences during the period prior to rectification of such Construction Defect, causes an Aggregate Vehicle Kilometres Availability Ratio of (i) between [REDACTED]% and [REDACTED]% during Peak Period(s), or (ii) between [REDACTED]% and [REDACTED]84% on a full day basis.
- 1.337 **“Major Existing Third Party Infrastructure”** means the following infrastructure:
- (a) [REDACTED];
 - (b) [REDACTED];
 - (c) [REDACTED];
 - (d) [REDACTED];
 - (e) [REDACTED];
 - (f) [REDACTED];
 - (g) [REDACTED];
 - (h) [REDACTED];
 - (i) [REDACTED];
 - (j) [REDACTED];
 - (k) [REDACTED];
 - (l) [REDACTED];
 - (m) [REDACTED];
 - (n) [REDACTED];
 - (o) [REDACTED];
 - (p) [REDACTED];
 - (q) [REDACTED];
 - (r) [REDACTED];
 - (s) [REDACTED];

- (t) [REDACTED];
- (u) [REDACTED];
- (v) [REDACTED];
- (w) [REDACTED];
- (x) [REDACTED];
- (y) [REDACTED];
- (z) [REDACTED];
- (aa) [REDACTED];
- (bb) [REDACTED];
- (cc) [REDACTED];
- (dd) [REDACTED];
- (ee) [REDACTED];
- (ff) [REDACTED];
- (gg) [REDACTED];
- (hh) [REDACTED];
- (ii) [REDACTED];
- (jj) [REDACTED];
- (kk) [REDACTED];
- (ll) [REDACTED];
- (mm) [REDACTED];
- (nn) [REDACTED];
- (oo) [REDACTED];
- (pp) [REDACTED];
- (qq) [REDACTED]; and
- (rr) [REDACTED].

1.338 “**Make Good**”, “**Made Good**”, “**Making Good**” and derivatives thereof, means, as applicable, repairing, restoring, refurbishing, rehabilitating, removing and replacing or performing filling

operation on: (a) the Works as required under the Project Agreement; or (b) any existing components disturbed (including Existing Infrastructure and Stage 1 Connection Infrastructure) due to the Works, to at least the condition existing at the commencement of the Works, in terms of construction integrity, finishes, alignment with existing adjoining surfaces, compatibility of materials, sound attenuation criteria, exfiltration/infiltration requirements, air/vapour barrier and thermal continuity.

- 1.339 **“Medium Construction Defect”** means any Construction Defect in respect of the System Infrastructure which, when measuring its most severe consequences during the period prior to rectification of such Construction Defect, causes an Aggregate Vehicle Kilometres Availability Ratio of (i) between [REDACTED]% and [REDACTED]% during Peak Period(s), or (ii) between [REDACTED]% and [REDACTED]% on a full day basis.
- 1.340 **“Medium Non-Conformance”** means any Non-Conformance, or combination of Minor Non-Conformances, that:
- (a) contains significant deficiencies or does not generally conform with the requirements of the Project Agreement; or
 - (b) the continued existence of which is reasonably expected to result in DB Co becoming unable to satisfy the requirements of Substantial Completion.
- 1.341 **“MFIPPA”** means the *Municipal Freedom of Information and Protection of Privacy Act* (Ontario), R.S.O. 1990, c. M.56, as amended from time to time.
- 1.342 **“Milestone”** has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.343 **“Minor Construction Defect”** means any Construction Defect that is not a Medium Construction Defect, Major Construction Defect or Critical Construction Defect.
- 1.344 **“Minor Deficiencies”** means any defects, deficiencies and items of outstanding work (including in relation to seasonal work) arising from or related to the work required to achieve Substantial Completion, and that would not materially impair:
- (a) the public’s, System Users’, or the City’s use, normal operation, and enjoyment of the New City Infrastructure or any third parties use and enjoyment of the New MTO Infrastructure;
 - (b) the performance of the Governmental Activities;
 - (c) safety, security, or traffic or track flow on the New City Infrastructure or New MTO Infrastructure in any relevant respect; or
 - (d) the performance of maintenance services in respect of the System Infrastructure by RTG.
- For greater certainty Minor Deficiencies shall not be applicable to nor shall Minor Deficiencies include Minor Deficiency Nominated Signalling Subcontractor Works.
- 1.345 **“Minor Deficiency Nominated Signalling Subcontractor Works”** means defects, deficiencies and items of outstanding work arising from or related to the Nominated Signalling Subcontractor Works.

1.346 “**Minor Deficiencies List**” has the meaning given in Section 25.10 of the Project Agreement.

1.347 “**Minor Non-Conformance**” means any Non-Conformance that:

- (a) generally conforms to the requirements of the Project Agreement, but in which immaterial deficiencies have been found that require correction in order to bring the Works fully into compliance with the Project Agreement; or
- (b) the continued existence of which is not reasonably expected to result in DB Co becoming unable to satisfy the requirements for Substantial Completion but may result in a Minor Deficiency.

1.348 “**Mislocated Utility Infrastructure**” means:

- (i) Utility Infrastructure that is discovered more than 200mm horizontally from the provided surveyed point via any Quality Level A investigation in the Subsurface Utility Engineering (SUE) Report;
- (ii) Utility Infrastructure that is discovered more than 150mm vertically from the provided surveyed point via any Quality Level A investigation in a Subsurface Utility Engineering (SUE) Report;
- (iii) Utility Infrastructure that is discovered more than 1500mm horizontally from the location provided via any Quality Level B investigation in a Subsurface Utility Engineering (SUE) Report;
- (iv) Utility Infrastructure that is discovered more than 2000mm horizontally from the location provided in the Quality Level C investigation in a Subsurface Utility Engineering (SUE) Report;
- (v) Utility Infrastructure that is discovered more than 3000mm horizontally from the location provided in the Quality Level D investigation in a Subsurface Utility Engineering (SUE) Report;
- (vi) Utility Infrastructure that is owned by the City that is discovered more than 600mm vertically from the location provided in a Subsurface Utility Engineering (SUE) Report; and
- (vii) Utility Infrastructure that is discovered more than 3000mm horizontally from the location provided in the Roll Plans.

1.349 “**Modification**” has the meaning given in Schedule 24 – Intellectual Property.

1.350 “**MOECC**” means the Ontario Ministry of the Environment and Climate Change, and any successor ministry thereto.

1.351 “**MOI**” means Her Majesty the Queen in right of Ontario as represented by the Minister of Infrastructure, and includes any successors thereto or persons exercising delegated power under the Minister’s authority.

- 1.352 “**MOL**” means Her Majesty the Queen in right of Ontario as represented by the Minister of Labour, and includes any successors thereto or persons exercising delegated power under the Minister’s authority.
- 1.353 “**Monthly Progress Report**” means a monthly progress report submitted by DB Co in accordance with Part 2 of Schedule 33 – Works Reports
- 1.354 “**MTO**” means Her Majesty the Queen in right of Ontario, as represented by the Minister of Transportation, and includes any successors thereto or persons exercising delegate power and such Minister’s authority.
- 1.355 “**MTO Jointly Developed Materials**” has the meaning given in Section 41.4(a)(ii) of the Project Agreement.
- 1.356 “**MTO Standards**” means the standards of MTO set out in Schedule 15 – Output Specifications.
- 1.357 “**Navigation Protection Act (Canada)**” means the *Navigation Protection Act*, R.S.C., 1985, c. N-22, as amended from time to time.
- 1.358 “**NCC**” means the National Capital Commission.
- 1.359 “**NCC Act**” means the *National Capital Act (Canada)*.
- 1.360 “**NCC Agreement In Principle**” means the agreement made between the City and the NCC on the 10th of May, 2016.
- 1.361 “**NCC Approval In Principle**” means the approval issued to the City by the NCC under the *National Capital Act* for the Western Light Rail Train (WLRT) project on January 23, 2017.
- 1.362 “**NCC FLUDTA**” means the federal land use, design and transaction approval of the NCC under the NCC Act required in respect of the change of use of, or erection, alteration, extension or demolition of a building or other work on, Crown Lands which are “public lands” within the “National Capital Region” (as such terms are defined in the NCC Act), as indicated in Schedule 35 – Permits, Licenses, Approvals and Agreements, which approval may include and be subject to conditions.
- 1.363 “**Near-Critical Activity(s)**” or “**Near Critical Path(s)**” means those Activities with a Float of less than 10 calendar days.
- 1.364 “**New City Infrastructure**” means the System Infrastructure and the New Municipal Infrastructure.
- 1.365 “**New MTO Infrastructure**” means the new, modified or improved infrastructure, as described in Schedule 15 - Output Specifications, to be installed, relocated, upgraded, reinstated, restored, downsized, designed and/or built by DB Co for MTO in accordance with the Project Agreement and in accordance with the applicable MTO Standards.
- 1.366 “**New Municipal Infrastructure**” means the new, modified or improved infrastructure described as such in Schedule 15 – Output Specifications, including as generally described in Section 2.3 of Part 1 Schedule 15-2, and all associated data, records, drawings, plans, reports and systems related thereto, all as described in the Project Agreement.

- 1.367 **“New Municipal Infrastructure Component”** means a component or element of the New Municipal Infrastructure, as set out in the Works Schedule.
- 1.368 **“New Municipal Infrastructure Component Acceptance”** means the point in time at which the City Engineer determines that an individual New Municipal Infrastructure Component has been completed in accordance with the Project Agreement and all requirements for New Municipal Infrastructure Component Acceptance described in the Output Specifications in respect of New Municipal Infrastructure Works have been satisfied; the New Municipal Infrastructure Component Works Requirements have been satisfied; and the issuance by the City Engineer of a New Municipal Infrastructure Component Acceptance Certificate.
- 1.369 **“New Municipal Infrastructure Component Acceptance Certificate”** means, in respect of an individual New Municipal Infrastructure Component, the certificate issued by the City Engineer to DB Co confirming acceptance of the applicable New Municipal Infrastructure Component.
- 1.370 **“New Municipal Infrastructure Component Acceptance Date”** means, in respect of an individual New Municipal Infrastructure Component, the date on which the City Engineer has issued a New Municipal Infrastructure Component Acceptance Certificate in respect of such New Municipal Infrastructure Component.
- 1.371 **“New Municipal Infrastructure Component Acceptance Notice”** has the meaning given in Section 11.27(d) of this Project Agreement.
- 1.372 **“New Municipal Infrastructure Component Works Requirements”** has the meaning given in Section 11.27(d) of this Project Agreement.
- 1.373 **“New Municipal Infrastructure Works”** means the design, construction, installation, testing and completion of the New Municipal Infrastructure as set out in the Output Specifications.
- 1.374 **“New Municipal Infrastructure Works Acceptance”** means the receipt by DB Co of New Municipal Infrastructure Component Acceptance Certificates for all New Municipal Infrastructure Components and completion and satisfaction of all Final New Municipal Infrastructure Works Requirements.
- 1.375 **“New Municipal Infrastructure Works Acceptance Date”** means the date in which New Municipal Infrastructure Works Acceptance is achieved.
- 1.376 **“New Municipal Infrastructure Works Component Countdown Notice”** has the meaning given in Section 11.27(c) of this Project Agreement.
- 1.377 **“No Default Payment Compensation Amount”** means, with respect to an amount and a specified period of time, such amount multiplied by (i) such period of time in days divided by the actual number of days in the current year multiplied by (ii) the rate of interest per annum in effect on each such day quoted by [REDACTED] from time to time as its reference rate for Canadian Dollar demand loans made to its commercial customers in Canada and which it refers to as its “prime rate”, as such rate may be changed by it from time to time.
- 1.378 **“Nominated Signalling Subcontract”** means that executed Subcontract between Construction Contractor and the Nominated Signalling Subcontractor substantially in the form attached as Schedule 13 – Nominated Signalling Subcontract to the RFP.

- 1.379 “**Nominated Signalling Subcontract Cash Allowance Account**” means the account established by the City in accordance with Section 11.31 of the Project Agreement for reimbursement of the costs of the Nominated Signalling Subcontractor Works.
- 1.380 “**Nominated Signalling Subcontract Milestone**” means a “Payment Milestone” (as defined in the Nominated Signalling Subcontract) set out in Schedule B – Subcontract Price and Payment Milestones of the Nominated Signalling Subcontract.
- 1.381 “**Nominated Signalling Subcontractor**” means [REDACTED].
- 1.382 “**Nominated Signalling Subcontractor Works**” means the scope of works to be undertaken by the Nominated Signalling Subcontractor in accordance with the Nominated Signalling Subcontract.
- 1.383 “**Nominated Signalling Contractor Works Cash Allowance**” has the meaning given in Section 11.31(c) of the Project Agreement.
- 1.384 “**Nominated Signalling Subcontractor Works Gainshare**” means the amount of \$[REDACTED].
- 1.385 “**Non-Conformance**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.386 “**Non-Conformance Tracking System**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.387 “**Non-Debt Compensation Amount**” has the meaning given in Section 33.6(b)(i)(A) of the Project Agreement.
- 1.388 “**Non-Default Termination Sum**” has the meaning given in Schedule 23 – Compensation on Termination.
- 1.389 “**Non-Disclosure Agreement**” has the meaning given in Section 6.3(f) of Schedule 27 – Dispute Resolution Procedure.
- 1.390 “**Non-Renewed Warranty Letter of Credit**” has the meaning given in Section 11.18(i) of the Project Agreement.
- 1.391 “**Non-Resident**” means a person that is, at the relevant time, a non-resident of Canada for the purposes of the *Income Tax Act* (Canada).
- 1.392 “**Notice**” has the meaning given in Section 51.1(a) of the Project Agreement.
- 1.393 “**Notice of Delegation**” has the meaning given in Section 25.16(b) of the Project Agreement.
- 1.394 “**Notice of Dispute**” has the meaning given in Section 1.3 of Schedule 27 – Dispute Resolution Procedure.
- 1.395 “**Notice of Project**” means a notice of project filed with the Ministry of Labour in compliance with O. Reg 213/91 under the *Occupational Health and Safety Act* (Ontario).

- 1.396 “**Occupational Health and Safety Act (Ontario)**” means the *Occupational Health and Safety Act*, R.S.O. 1990, C. o.1, as amended from time to time.
- 1.397 “**OHSAS 18001**” means the international standard for occupational health and safety management systems developed by the Occupational Health and Safety Advisory Services Project Group, a British body formed to develop the standard.
- 1.398 “**OHSAS 18001 Accreditation**” means, in respect of a person, such person having received certification in respect of its health and safety management systems that such systems comply with the requirements of OHSAS 18001.
- 1.399 “**Ontario Heritage Act (Ontario)**” means the *Ontario Heritage Act*, R.S.O. 1990, c. O.18, as amended from time to time.
- 1.400 “**Ontario Infrastructure and Lands Corporation Act, 2011, S.O. 2011**” means the *Ontario Infrastructure and Lands Corporation Act, 2011*, S.O. 2011, c. 9, Sch. 32, as amended from time to time.
- 1.401 “**Order**” has the meaning given in Schedule 30 - Insurance Trust Agreement.
- 1.402 “**Other Contractor**” means an Additional Contractor or a Third Party Contractor.
- 1.403 “**Other Works**” means the Additional Works and the Third Party Works.
- 1.404 “**Output Specifications**” means Schedule 15 – Output Specifications.
- 1.405 “**Overhead Contact System**” sometimes referred to as “Overhead Catenary System” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.406 “**Ownership**” has the meaning given in Schedule 24 – Intellectual Property.
- 1.407 “**PAR Meeting**” has the meaning given in Section 14.6(f) of the Project Agreement.
- 1.408 “**PAR Meeting Expiry Date**” has the meaning given in Section 14.6(g) of the Project Agreement.
- 1.409 “**Party**” means either the City or DB Co, and “**Parties**” means collectively the City and DB Co.
- 1.410 “**Party Representative**” has the meaning given in Section 2.1 of Schedule 27 – Dispute Resolution Procedure.
- 1.411 “**Patents**” includes all national (including the United States and Canada), regional and multinational statutory invention registrations, patents, patent registrations, patent applications, provisional patent applications, industrial designs, industrial models, including all reissues, divisions, continuations, continuations-in-part, extensions and re-examinations, and all rights therein provided by multinational treaties or conventions and all improvements to the inventions disclosed in each such registration, patent or application.
- 1.412 “**Pavement Design Report**” means a report prepared for the purpose of providing recommendations for removal, resurfacing, and/or reconstruction of existing or new pavement structure based on collected pavement and subsurface data.

- 1.413 **“Payment Certifier”** means the professional architect of record or the engineer of record for the Project.
- 1.414 **“Payment Compensation Amount”** means, with respect to an amount and a specified period of time, (i) such amount multiplied by (ii) such period of time in days divided by the actual number of days in the current year multiplied by (iii) the rate of interest per annum in effect on each such day equal to [REDACTED]% over the rate of interest per annum quoted by [REDACTED] from time to time as its reference rate for Canadian Dollar demand loans made to its commercial customers in Canada and which it refers to as its “prime rate”, as such rate may be changed by it from time to time.
- 1.415 **“Payment Period”** has the meaning given in Schedule 21 – Construction Period Payments.
- 1.416 **“PBS”** has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.417 **“PBS Update”** has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.418 **“PBS Submittal”** has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.419 **“Peak Period”** means:
- (a) between the hours of 06:30 and 9:00 on each weekday which is not a statutory holiday in the Province of Ontario; and
 - (b) between the hours of 14:45 and 18:00 on each weekday which is not a statutory holiday in the Province of Ontario.
- 1.420 **“Performance Guarantee of Construction Guarantor”** means each performance guarantee given by the Construction Guarantors in the form set out in Schedule 29 – Form of Performance Guarantee of Construction Guarantor.
- 1.421 **“Performance Standards Regulation”** means Ontario Regulation 260/08 made under the *Professional Engineers Act* (Ontario).
- 1.422 **“Permits, Licences, Approvals and Agreements”** means the City Permits, Licences, Approvals and Agreements and the DB Co Permits, Licences, Approvals and Agreements, and **“Permits, Licences, Approvals or Agreements”** means any of the foregoing.
- 1.423 **“Permitted Borrowing”** means:
- (a) any advance to DB Co under the Lending Agreements;
 - (b) any additional financing approved by the City in accordance with Section 1.9 of Schedule 22 - Variation Procedure to the Project Agreement; and
 - (c) any amendment, waiver or exercise of a right under the Lending Agreements made during the Step-in Period that does not increase the City’s liabilities under the Project Agreement whether actual or contingent, present or future, known or unknown.
- 1.424 **“Personal Information”** means all personal information (as the term “personal information” is defined in the *Personal Information Protection and Electronic Documents Act* (Canada)) in the

- custody or control of DB Co or any DB Co Party other than personal information of the employees of DB Co or the DB Co Parties and other than personal information that is wholly unrelated to the Works and not derived directly or indirectly from the City in respect of the Project.
- 1.425 **“Personal Information Protection and Electronic Documents Act (Canada)”** means the *Personal Information Protection and Electronic Documents Act*, S.C. 2000, c. 5, as amended from time to time.
- 1.426 **“Planned Value”** has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.427 **“Police Service”** means the Royal Canadian Mounted Police, the Ontario Provincial Police, the Ottawa Police Service and any other law enforcement agency with jurisdiction pursuant to Applicable Law, as applicable.
- 1.428 **“Post-Installation Checkout”** or **“PICO”** has the meaning given in Schedule 14 – Testing & Commissioning.
- 1.429 **“Pre-Final Design Development”** or **“PFDD”** has the meaning given in Schedule 10 – Review Procedure.
- 1.430 **“Prequalification Submission”** means DB Co’s response to the request for qualifications issued in respect of the Project on September 13, 2016.
- 1.431 **“Prequalified Subcontractor”** means any Subcontractor that was identified in the list of subcontractors submitted as part of DB Co’s Prequalification Submission, as amended pursuant to the process set out in the Request for Proposals.
- 1.432 **“Proceeding At Risk”** has the meaning given in Section 14.6(g) of the Project Agreement.
- 1.433 **“Proceeding At Risk Matter”** has the meaning given in Section 14.6(a) of the Project Agreement.
- 1.434 **“Proceeding At Risk Notice”** has the meaning given in Section 14.6(a) of the Project Agreement.
- 1.435 **“Proceedings Against the Crown Act (Ontario)”** means the *Proceedings Against the Crown Act*, R.S.O. 1990, c. P.27, as amended from time to time.
- 1.436 **“Procurement Monitoring and Implementation Plan”** has the meaning given in Section 11.24(a) of the Project Agreement.
- 1.437 **“Product”** means or **“Products”** mean material, machinery, equipment and fixtures forming the Works but does not include equipment or machinery used to prepare, fabricate, convey or erect the Works, which is referred to as construction machinery and equipment.
- 1.438 **“Professional Engineer”** means a professional engineer licensed by Professional Engineers Ontario to practice in the Province of Ontario.
- 1.439 **“Prohibited Act”** has the meaning given in Section 50.1(a) of the Project Agreement.

- 1.440 “**Project**” has the meaning given in the recitals to the Project Agreement.
- 1.441 “**Project Agreement**” has the meaning given in the recitals to the Project Agreement.
- 1.442 “**Project Agreement Arbitration**” has the meaning given in Section 11.1 of Schedule 27 – Dispute Resolution Procedure.
- 1.443 “**Project Co**” has the same meaning as “RTG”.
- 1.444 “**Project Co Party**” has the same meaning as “RTG Party”; and “**Project Co Parties**” has the same meaning as “RTG Parties”.
- 1.445 “**Project Data**” has the meaning given in Schedule 24 – Intellectual Property.
- 1.446 “**Project Debt Interest Cost**” means the budgeted amount of aggregate interest charges in respect of the Debt Amount used to calculate the Cost of the Financing portion of the Guaranteed Price.
- 1.447 “**Project Documents**” means the Ancillary Documents and the Lending Agreements.
- 1.448 “**Project Know-How**” means all ideas, concepts, alternatives, methodologies, processes, recommendations and suggestions developed by or through DB Co or any DB Co Party and revealed to or discovered by the City, whether before or after Commercial Close, which may be connected in any way to:
- (a) the Works, including the design and construction of the New City Infrastructure and the New MTO Infrastructure; or
 - (b) the Project Agreement.
- 1.449 “**Project Operations**” means the performance of the Works and the performance of all other obligations of DB Co under the Project Agreement.
- 1.450 “**Project Term**” means the period commencing on the date of the Project Agreement and expiring at midnight on the earlier of the Termination Date or latest Final Completion Date.
- 1.451 “**Project Zone of Influence**” has the meaning described in Part 3-7 (Instrumentation and Monitoring) of Schedule 15 – Output Specification.
- 1.452 “**Proprietor**” has the meaning given in Section 42.6(a) of the Project Agreement.
- 1.453 “**Protesters**” has the meaning given in Section 11.13(a) of the Project Agreement.
- 1.454 “**Province**” means Her Majesty the Queen in right of Ontario.
- 1.455 “**PS Services**” means those procurement support services performed by RTG in accordance with the PS Services Variation in respect of the scope, planning and administration of the City’s procurement of the Works pursuant to this Project Agreement.
- 1.456 “**PS Services Variation**” means that contract variation effective April 19, 2017, under the Stage 1 Project Agreement, governing performance of the PS Services under such project agreement.

- 1.457 **“Rail Transit Specific Change in Law”** means any Change in Law which principally affects or principally relates only to the design or construction of rail transit systems.
- 1.458 **“Railway Approvals”** means all consents, approvals, permissions and agreements, and amendments thereto, required to be obtained from a Railway Company pursuant to a Railway Order or Applicable Laws, for the carrying out of Works on land or improvements of a Railway Company, but does not include any Railway Orders.
- 1.459 **“Railway Company”** means CN, VIA Rail and any other railway company that owns or operates a rail service, any part of which is on any part of the Lands during the Project Term and **“Railway Companies”** means all of them.
- 1.460 **“Railway Order”** means any order of the Canadian Transportation Agency:
- (a) granted in favour of the City allowing or providing for:
 - (i) infrastructure comprising or to comprise New City Infrastructure or New MTO Infrastructure to be located upon and across land or improvements of a Railway Company; and
 - (ii) the construction, maintenance and use of such infrastructure upon and across such land or improvements; or
 - (b) for the carrying out of any Works on land or improvements of a Railway Company, and all amendments thereto.
- 1.461 **“Record Drawings”** means signed and sealed drawings prepared by the Professional Engineer or Architect, using As Built Drawings, after verifying the process in which the actual conditions of the completed project or applicable components as they are constructed, including any changes that were initiated due to site conditions or other causes and where all such changes are clearly identified through redlines in the As Built Drawings or by means of any other format agreed by the City.
- 1.462 **“Recoverable Tax”** has the meaning given in Section 4.13(c) of the Project Agreement.
- 1.463 **“Recovery Amount”** has the meaning given in Section 46.3(g) of the Project Agreement.
- 1.464 **“Recovery Schedule”** has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.465 **“Recovery Schedule Report”** has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.466 **“Refinancing”** has the meaning given in Schedule 28 – Refinancing.
- 1.467 **“Reference Documents”** means those documents identified as such in Article 3 of Schedule 15-1.
- 1.468 **“Reimbursement Event”** has the meaning given in Section 27.5(a) of the Project Agreement.
- 1.469 **“Reinstatement Plan”** has the meaning given in Section 11.9(f) of the Project Agreement.

- 1.470 “**Reinstatement Work**” has the meaning given in Section 11.9(b) of the Project Agreement.
- 1.471 “**Release**” has the meaning given in Schedule 17 – Environmental Obligations.
- 1.472 “**Relevant Change in Law**” means a Discriminatory Change in Law or a Rail Transit Specific Change in Law.
- 1.473 “**Relevant Conviction**” means a charge or conviction, at any time within the previous 6 years, of any offense: (i) of moral turpitude in Canada or elsewhere; (ii) for which records exist under the *Criminal Records Act*; or (iii) otherwise designated as a Relevant Conviction by the City from time to time, and that conviction remains in effect at that time and is one for which a pardon has not been granted.
- 1.474 “**Relief Event**” has the meaning given in Section 34.1(a) of the Project Agreement.
- 1.475 “**Remaining Systems Integration Works**” means those Systems Integration Works to be performed by City Parties in respect of integration of the Confederation Line East Extension and Confederation Line West Extension with the Existing Confederation Line, as described in Schedule 14 – Testing & Commissioning.
- 1.476 “**Remaining Works**” means those Works described in Article 18 of Part 1 of Schedule 15-2.
- 1.477 “**Remaining Works Cash Amount**” has the meaning given in Section 4.2(g) of the Project Agreement.
- 1.478 “**Remaining Works DB Co Commissioning**” means the DB Co Commissioning in respect of the Remaining Works.
- 1.479 “**Remaining Works Letter of Credit**” has the meaning given in Section 11.18A(a) of the Project Agreement.
- 1.480 “**Remaining Works Minor Deficiencies**” means any defect, deficiencies and items of outstanding work arising from or related to the Remaining Works, including any Minor Deficiencies.
- 1.481 “**Remaining Works Minor Deficiency Inspection Request**” has the meaning given in Section 25.12A(a) of the Project Agreement.
- 1.482 “**Remaining Works Minor Deficiencies List**” has the meaning given in Section 25.12A(a) of the Project Agreement.
- 1.483 “**Remaining Works Testing & Commissioning Plan**” means the Testing & Commissioning Plan for the Remaining Works included in the Testing & Commissioning Program.
- 1.484 “**Remaining Works Warranty Letter of Credit**” has the meaning given in Section 11.18B(a) of the Project Agreement.
- 1.485 “**Remaining Works Warranty Period**” means a period beginning on the West Final Completion Date and expiring on the date 2 years after such West Final Completion Date.

- 1.486 **“Remaining Works Warranty Works”** has the meaning given in Section 11.17(a)(iii) of the Project Agreement.
- 1.487 **“Request for Art Payment”** has the meaning given in Section 11.30(g) of the Project Agreement.
- 1.488 **“Request for Nominated Signalling Contractor Works Payment”** has the meaning given in Section 11.31(f) of the Project Agreement.
- 1.489 **“Request for Utility Works Payment”** has the meaning given in Section 11.29(h) of the Project Agreement.
- 1.490 **“Request for Proposals”** or **“RFP”** means the request for proposals issued in respect of the Project on June 26, 2017, as amended from time to time.
- 1.491 **“Restricted Person”** means any person who, or any member of a group of persons acting together, any one of which:
- (a) has, directly or indirectly, its principal or controlling office in a country that is subject to any economic or political sanctions imposed by Canada or Ontario;
 - (b) has as its primary business the illegal manufacture, sale, distribution or promotion of narcotics substances or arms, or is or has been involved in terrorism;
 - (c) in the case of an individual, (i) he or she has been convicted of any indictable offence less than five years prior to the date at which the consideration of whether such individual is a “Restricted Person” is made hereunder, whether or not such person received a custodial sentence; or (ii) he or she has been sentenced to a custodial sentence, other than a suspended sentence, for any regulatory offence other than under the *Highway Traffic Act* (Ontario) or corresponding legislation in any other jurisdiction less than five years prior to the date at which the consideration of whether such individual is a “Restricted Person” is made hereunder;
 - (d) in the case of a person other than an individual, (i) it or any of the members of its (or its general partner’s) board of directors or its senior executive managers has been convicted of any indictable offence less than five years prior to the date at which the consideration of whether such person is a “Restricted Person” is made hereunder, whether or not such person received a custodial sentence; or (ii) any of the members of its (or its general partner’s) board of directors or its senior executive managers has been sentenced to a custodial sentence, other than a suspended sentence, for any regulatory offence other than under the *Highway Traffic Act* (Ontario) or corresponding legislation in any other jurisdiction less than five years prior to the date at which the consideration of whether such person is a “Restricted Person” is made hereunder;
 - (e) has as its primary business the acquisition of distressed assets or investments in companies or organizations which are or are believed to be insolvent or in a financial standstill situation or potentially insolvent;
 - (f) is subject to a material claim of the City under any proceedings (including regulatory proceedings) which have been concluded or are pending at the time at which the consideration of whether such person is a “Restricted Person” is made hereunder, and

which (in respect of any such pending claim, if it were to be successful) would, in the City's view, in either case, be reasonably likely materially to affect the ability of DB Co to perform its obligations under the Project Agreement; or

- (g) has a material interest in the production of tobacco products.
- 1.492 **“Revenue Service Vehicle Kilometres”** means the total distance travelled by Vehicles in revenue service during a specified period, measured in Kilometres and reported to the City by RTG in RTG's monthly performance monitoring reports under the Stage 1 Project Agreement.
- 1.493 **“Review Procedure”** means the procedure set out in Schedule 10 - Review Procedure.
- 1.494 **“Review Procedure Activities”** means:
- (a) performance of the requirements of Schedule 10 – Review Procedure for all Works Submittals required to be delivered prior to Substantial Completion, including:
 - (i) all Submittals by DB Co;
 - (ii) City review periods and responses regarding Works Submittals;
 - (iii) amendment by DB Co, if required; and
 - (iv) re-submission by DB Co, if required;
 - (b) any other submission activities required by DB Co pursuant to the Project Agreement
- 1.495 **“Review Procedure Activities Register”** means a register of Review Procedure Activities which shall include the submission dates and review periods for all Works Submittals required under Schedule 10 – Review Procedure, Schedule 12 – Work Scheduling Requirements, and elsewhere in the Project Agreement.
- 1.496 **“RFP Financial Submission Deadline”** means October 22, 2018.
- 1.497 **“RFP Technical Submission Deadline”** means September 28, 2018.
- 1.498 **“Road Cut Permit”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.499 **“Road Safety Audit Certificate”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.500 **“Road Section”** has the meaning given in Part B of Schedule 34 – Mobility Matters.
- 1.501 **“Roadway”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.502 **“Roadway Works”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.503 **“Roll Plans”** means the following documents included in the Background Information:

- (a) [REDACTED]; and
 - (b) [REDACTED].
- 1.504 “RTG” means Rideau Transit Group General Partnership, a general partnership established under the laws of Ontario [REDACTED] and each of their permitted successors and assigns.
- 1.505 “RTG City Party Works” the RTG Systems Integration Works and the RTG Interface and Design Management Works.
- 1.506 “RTG Interface and Design Management Works” means the work and activities performed, or required to be performed by RTG or any RTG Party to assist with the design review, quality control management and testing and commissioning oversight, from a System Infrastructure maintenance and life cycle perspective pursuant to that contract variation effective April 24, 2019, under the Stage 1 Project Agreement, governing performance of such work and activities but excluding for clarity any RTG System Integration Work.
- 1.507 “RTG Party” means:
- (a) [REDACTED] (collectively the “RTG CC”)
 - (b) [REDACTED] (collectively the “RTG MC”);
 - (c) any person engaged by RTG, RTG CC or RTG MC from time to time as may be to procure or manage the provision of the scope of work under the project agreement dated February 12, 2013 between the City and RTG, as permitted by such project agreement; and
 - (d) in respect of each of the above, their subcontractors of any tier, agents, employees, officers and directors,
- and “RTG Parties” shall be construed accordingly
- 1.508 “RTG Stage 1 PA Works” means any work and activities performed, or required to be performed by RTG or any RTG Party pursuant to the Stage 1 Project Agreement, and the contract variations executed thereunder, but excluding the RTG City Party Works.
- 1.509 “RTG Systems Integration Works” means those Remaining Systems Integration Works performed, or required to be performed by RTG or any RTG Party in respect of integration of the Confederation Line East Extension and Confederation Line West Extension with the Existing Confederation Line, as described in Schedule 14 – Testing & Commissioning.
- 1.510 “RTG Works” means the RTG Stage 1 PA Works and RTG City Party Works.
- 1.511 “S&TCS” means signalling and train control system.
- 1.512 “Safety” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.513 “Schedule” means a schedule to the Project Agreement.
- 1.514 “Scheduled Final Completion Date” means either the East Scheduled Final Completion Date or West Scheduled Final Completion Date, as applicable.

- 1.515 **“Scheduled Revenue Service Vehicle Kilometres”** means the total revenue service vehicle kilometres required in a specified period by the City through the booking process set out in Article 3.3 of Appendix A to Schedule 15-3 of the Stage 1 Project Agreement, measured in kilometres and reported by RTG in RTG’s monthly performance monitoring reports under the Stage 1 Project Agreement.
- 1.516 **“Scheduled Substantial Completion Date”** means either the East Scheduled Substantial Completion Date or West Scheduled Substantial Completion Date, as applicable.
- 1.517 **“Security”** has the meaning given in Schedule 4 – Lenders’ Direct Agreement.
- 1.518 **“Security Documents”** has the meaning given in Schedule 4 – Lenders’ Direct Agreement.
- 1.519 **“Sensitive Information”** means financial or commercial information which would, if disclosed to a competitor of DB Co or any DB Co Party, give that competitor a competitive advantage over DB Co or such DB Co Party and thereby prejudice the business of DB Co or such DB Co Party.
- 1.520 **“Severe Market Disruption”** means any occurrence of exceptional circumstances in financial markets in Europe, the United States of America and/or Canada which:
- (a) results in the suspension or cessation of all or substantially all lending activity in national or relevant international capital or interbank markets; and
 - (b) adversely affects access by DB Co to such markets.
- 1.521 **“Shop Drawings”** means drawings, diagrams, illustrations, schedules, performance charts, brochures and other data which are to be provided by DB Co to illustrate details of a portion of the Works, indicating materials, methods of construction and attachment or anchorage, erection diagrams, connections, explanatory notes and other information necessary for completion of the Works.
- 1.522 **“Site”** means, at any time and from time to time, that portion of the Lands:
- (a) on which DB Co or any DB Co Party is engaged in any Construction Activities or Demolition activities or is otherwise engaged in completing the Works;
 - (b) on which any of the Works have been commenced but not completed in their entirety;
 - (c) that are hoarded, cordoned, or otherwise fenced off by DB Co, and any Lands immediately surrounding such hoarding, cordons or fencing; or
 - (d) within the active construction footprint of the Works.
- 1.523 **“Site Acceptance Test”** or **“SAT”** has the meaning given in Schedule 14 – Testing & Commissioning.
- 1.524 **“Site Conditions”** means the condition of the Lands; including the physical, geophysical, climatic, ecological, environmental, geotechnical and archaeological conditions.
- 1.525 **“Small Works”** means any works, including facilities and equipment, of a minor nature that are requested by the City to be performed having an individual cost or aggregate cost with other

- linked works, including facilities and equipment, of a minor nature, not exceeding \$[REDACTED] (index linked), or as otherwise agreed from time to time, but excluding any works, including facilities and equipment, which will increase the likelihood of a Construction Period Quality Failure, or will increase the cost to DB Co of carrying out the Works.
- 1.526 “**Special Utility Debt Compensation Amount**” has the meaning given in Section 33.6(b)(i)(A) of the Project Agreement.
- 1.527 “**Species-at-Risk**” means any member of a species, subspecies, variety or genetically or geographically distinct population of animal, plant or other organism that is listed in the Species at Risk in Ontario List maintained pursuant to the ESA and any analogous federal list under the *Species at Risk Act* (Canada), and any other species that has been classified as being threatened or endangered under Applicable Law.
- 1.528 “**Stage 1 Connection Infrastructure**” means that portion of the Existing Confederation Line, to which the System Infrastructure is be directly connected, including in respect of the East Works, rail, drainage, OCS, traction power, CTS and train control at the Existing Confederation Line’s termination point at Blair station and, in respect of the West Works, rail, drainage, OCS, traction power, CTS and train control at the Existing Confederation Line’s termination point at Tunney’s Pasture.
- 1.529 “**Stage 1 Connection Infrastructure Final Report**” means a report to be issued to DB Co following RTG’s completion of construction and commissioning of such Stage 1 Connection Infrastructure, describing the specifications and actual as-built condition of the Stage 1 Connection Infrastructure.
- 1.530 “**Stage 1 Connection Infrastructure Preliminary Report**” means the documentation provided to DB Co in the folder titled “Stage 1 Connection Infrastructure Preliminary Report” in the electronic data room established in accordance with the RFP, describing the specifications for, and anticipated as-built condition of, the Stage 1 Connection Infrastructure.
- 1.531 “**Stage 1 Project Agreement**” means that project agreement between the City and RTG dated February 12, 2013, as varied and amended from time to time.
- 1.532 “**Stage 1 Systems Information**” means the documentation provided to DB Co in the folder titled “Stage 1 Systems Integration” in the electronic data room established in accordance with the RFP.
- 1.533 “**Stakeholders**” means individuals and organizations with an interest in the Project, including those listed in Schedule 15 - Output Specifications, but excluding the City.
- 1.534 “**Stakeholder Agreement**” has the meaning given in Section 10.3(f) of the Project Agreement.
- 1.535 “**Standards & Guidelines for Conservation of Provincial Heritage Properties**” means the Standards & Guidelines for Conservation of Provincial Heritage Properties issued under the *Ontario Heritage Act* (Ontario) on April 28, 2010, as amended from time to time.
- 1.536 “**Standby Letter of Credit**” means a letter of credit attached as Schedule 7A – Standby Letter(s) of Credit, and “**Standby Letter(s) of Credit or Standby Letters of Credit**” means all letters of credit attached as Schedule 7A – Standby Letter(s) of Credit.

- 1.537 “**Start-Up Meeting**” has the meaning given in Section 11.2(a) of the Project Agreement.
- 1.538 “**Station**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents
- 1.539 “**Step-in Period**” has the meaning given in Schedule 4 – Lenders’ Direct Agreement.
- 1.540 “**Stormwater management**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.541 “**Structure**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.542 “**Subcontract**” or “**Subcontracts**” means the contracts entered into by or between DB Co and any Subcontractor or between any Subcontractor at any tier, including the Construction Contractor, and any other Subcontractor at any tier in relation to any aspect of the Works.
- 1.543 “**Subcontractor**” means any subcontractor of DB Co engaged by or through DB Co to perform any of the Works, including the Construction Contractor, any Supplier or consultant, and any subcontractor of any other subcontractor at any tier.
- 1.544 “**Subcontractor’s Direct Agreement**” means the agreement to be entered into among the City, DB Co, the Construction Contractor and certain Subcontractors determined in accordance with the terms of the Project Agreement in the form set out in Schedule 3 – Subcontractor’s Direct Agreement.
- 1.545 “**Submittal(s)**” means a Works Submittal.
- 1.546 “**Subsequent Notice**” means any East Subsequent Notice or West Subsequent Notice.
- 1.547 “**Substantial Completion**” means either East Substantial Completion or West Substantial Completion, as applicable.
- 1.548 “**Substantial Completion Certificate**” means either the East Substantial Completion Certificate or West Substantial Completion Certificate, as applicable.
- 1.549 “**Substantial Completion Date**” means either the East Substantial Completion Date or West Substantial Completion Date, as applicable.
- 1.550 “**Substantial Completion Notice**” has the meaning given in Section 25.4(b) of the Project Agreement.
- 1.551 “**Substantial Completion Payment**” means either the East Substantial Completion Payment or West Substantial Completion Payment, as applicable.
- 1.552 “**Substantial Completion Payment Date**” means either the East Substantial Completion Payment Date or West Substantial Completion Payment Date, as applicable.
- 1.553 “**Subsurface Utility Engineering (SUE) Reports**” means:
- (a) [REDACTED]; and
 - (b) [REDACTED].

- 1.554 “**Supplier**” means a person who supplies to DB Co, or to any Subcontractor, any equipment, materials, supplies or services as part of, or for, the Works.
- 1.555 “**Systems**” has the meaning given in Schedule 15-1.
- 1.556 “**System Extension**” has the meaning given in Schedule 37 – Extension and Additional Phases.
- 1.557 “**System Infrastructure**” means the new, modified or improved infrastructure described as such in Schedule 15 – Output Specifications, including as generally described in Section 2.2 of Part 1 of Schedule 15-2, and all associated data, records, drawings, plans, reports and systems related thereto, all as described in the Project Agreement.
- 1.558 “**Systems Integration Dispute**” has the meaning given in Section 1.1(n) of Schedule 14 – Testing & Commissioning.
- 1.559 “**Systems Integration Management Plan**” or “**SIMP**” has the meaning given in Schedule 15-2, Part 1, Article 11 – Systems Integration Program.
- 1.560 “**Systems Integration Test**” or “**SIT**” has the meaning given in Schedule 14 – Testing & Commissioning.
- 1.561 “**Systems Integration Verifier**” has the meaning given in Section 1.1(n) of Schedule 14 – Testing & Commissioning.
- 1.562 “**Systems Integration Works**” means the overall sequential integration of each of the Confederation Line East Extension and the Confederation Line West Extension with the Existing Confederation Line and the integration of each with the Existing Confederation Line system such that the Confederation Line East Extension, Confederation Line West Extension and the Existing Confederation Line function together as one coherent working rail transit system as envisaged by Schedule 15 – 2 Part 1 and Schedule 15 – 2 Part 3 and Schedule 14 – Testing & Commissioning.
- 1.563 “**System Integrator**” means the role performed by DB Co in relation to Systems Integration as described in Schedule 14 – Testing & Commissioning.
- 1.564 “**System User**” means any member of the public, any City Party and any other person that is on or about the New City Infrastructure or is otherwise making use of the New City Infrastructure for any purpose, including customers, employees, consultants or contractors of the City.
- 1.565 “**Tax**” or “**Taxes**” means any and all taxes, levies, imposts, duties, fees, withholdings, assessments, deductions or charges whatsoever, imposed, assessed, levied or collected by any Governmental Authority, together with interest thereon and penalties with respect thereto, and includes all HST except where stated to the contrary, provided however that “**Taxes**” shall not include the City Taxes.
- 1.566 “**Technical Information**” has the meaning given in Schedule 24 – Intellectual Property.
- 1.567 “**Technical Reports**” means the Environmental Reports, the Geotechnical Reports, the Archaeological Reports, and the Cultural Heritage Reports.
- 1.568 “**Termination Date**” means the earlier of the Expiry Date and such other date, if any, on which termination of the Project Agreement takes effect in accordance with its terms.

- 1.569 **“Testing & Commissioning Coordinator”** has the meaning given in Section 1.2 of Schedule 14 – Testing & Commissioning.
- 1.570 **“Testing & Commissioning Plan”** means the testing and commissioning plan developed by DB Co in accordance with Schedule 14 – Testing & Commissioning for any of the East Works, West Works, Highway Works or Remaining Works, comprising part of the Testing & Commissioning Program.
- 1.571 **“Testing & Commissioning Program”** means the program, comprised of DB Co’s Testing & Commissioning Plans for each of the East Works, West Works, Highway Works or Remaining Works, submitted by DB Co in accordance with Schedule 14 – Testing and Commissioning and the Review Procedure, and assigned either “NO COMMENT” or “MINOR COMMENT”.
- 1.572 **“Testing & Commissioning Schedule”** has the meaning given in Section 8 of Schedule 12 – Works Scheduling Requirements.
- 1.573 **“Testing & Commissioning Team”** has the meaning given in Section 1.4 of Schedule 14 – Testing & Commissioning.
- 1.574 **“Third Party Arbitration”** has the meaning given in Section 11.1 of Schedule 27 – Dispute Resolution Procedure.
- 1.575 **“Third Party Contractors”** means any person (not being, for the avoidance of doubt, DB Co or any DB Co Party, Additional Contractors, RTG or any RTG Party) that carries out any Third Party Works.
- 1.576 **“Third Party Facilities”** means telephone facilities, infrastructure and other property of Utility Companies and Railway Companies and other public facilities and associated equipment, plant, materials and apparatus installed and operated or to be installed and operated on the Lands by any transit authority, communications provider, Utility Company, Railway Company or other third party (not including, for the avoidance of doubt, DB Co or any DB Co Party).
- 1.577 **“Third Party Lands”** means the Highway Corridor Lands.
- 1.578 **“Third Party Litigation”** has the meaning given in Section 11.2 of Schedule 27 – Dispute Resolution Procedure.
- 1.579 **“Third Party Works”** means any work performed by a Third Party Contractor on the Lands, including works in relation to,
- (a) an Encumbrance;
 - (b) Existing Infrastructure (other than Existing Infrastructure owned by the City or MTO);
 - (c) Third Party Facilities; and
 - (d) Utility Work and work pursuant to a Utility Agreement, Railway Order or an encroachment permit or other permitting authority of any Governmental Authority under Applicable Law.
- 1.580 **“TOCC”** means transit operations control centre.

- 1.581 **“Total Capital Cost Incurred to Date”** has the meaning given in Schedule 21 – Construction Period Payments.
- 1.582 **“Track”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.583 **“Traction Power”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.584 **“Traction Power Load Flow Study”** means a study that determines the number, locations and ratings of the traction power (TP) substations needed to support train operations. Determines the configuration and conductor sizes of the along-track dc distribution system. Sizes the major traction power equipment, such as substations’ dc circuit breakers and dc feeders.
- 1.585 **“Trade-Marks”** means all trademarks, service marks, trade dress, logos, distinguishing guises and indicia, trade names, corporate names, business names, domain names, whether or not registered, including all common law rights, and registrations, applications for registration and renewals thereof, including, but not limited to, all marks registered in the Canadian Intellectual Property Office and the trademark offices of other nations throughout the world, and all rights therein provided by multinational treaties or conventions.
- 1.586 **“Traffic and Transit Management Plan”** or **“TTMP”** has the meaning given in Schedule 15-1.
- 1.587 **“Transitway”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.588 **“Transit System”** means any operating transit system that DB Co may encounter during the performance of its obligations under this Project Agreement.
- 1.589 **“Tree Compensation Plan”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.590 **“Tree Mitigation Plan”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.591 **“Trespassers”** has the meaning given in Section 11.13(a) of the Project Agreement.
- 1.592 **“Trial Running”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.593 **“Tunnel”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents
- 1.594 **“Underground Structures”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.595 **“Universal Design”** has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
- 1.596 **“Unpaid Construction Period Payment”** has the meaning given in Schedule 21 – Construction Period Payments.

- 1.597 “**Utilities**” means energy/power supplies, communications, data transmission and waste recovery, including electricity, natural gas/fuel oil, water, sanitary waste and storm water.
- 1.598 “**Utility Baseline Report**” means the utility baseline report included herein as Schedule 38 – Utility Baseline Report, as may be amended in accordance with its terms.
- 1.599 “**Utility Agreement**” means any agreement entered into by DB Co with a Utility Company in connection with the design removal, construction, installation, repair, preservation, relocation or maintenance of Utility Infrastructure in, on, under, over or adjacent to the Lands, and includes any site or other permits issued thereunder or pursuant thereto, all as amended, supplemented or replaced from time to time.
- 1.600 “**Utility Company**” means the owner or operator of any Utility Infrastructure or any company or companies designated by DB Co to provide Utilities.
- 1.601 “**Utility Company Self-Performed Works**” means the temporary and permanent installation, protection, removal, relocation, upgrading, reinstatement, restoration, downsizing, designing, and/or building works relating to Utility Infrastructure carried out by a Utility Company under a Utility Agreement in connection with or as part of the Project Operations, and identified as being subject to a Cash Allowance in Article 8 of Part 2 of Schedule 15-2 of the Output Specifications.
- 1.602 “**Utility Company Works Cash Allowance**” has the meaning given in Section 11.29(f) of the Project Agreement.
- 1.603 “**Utility Infrastructure**” means privately, publicly or cooperatively owned lines, facilities or systems for transmitting or distributing electricity, lighting, data, communications, gas, oil and petroleum products, water, storm water or sewage, wireless, or other similar commodity or substance which serve the public directly or indirectly, including underground, surface and overhead facilities as well as facilities which use common poles, ducts or conduits on a shared basis, and all related infrastructure.
- 1.604 “**Utility Works**” means the DB Co Utility Works and the Utility Company Self-Performed Works.
- 1.605 “**Utility Works Cost**” means the actual cost of performing the Utility Company Self Performed Works.
- 1.606 “**Utility Works Fee**” has the meaning given in Section 11.29(g) of the Project Agreement.
- 1.607 “**Variation**” has the meaning given in Schedule 22 - Variation Procedure.
- 1.608 “**Variation Confirmation**” has the meaning given in Schedule 22 - Variation Procedure.
- 1.609 “**Variation Directive**” has the meaning given in Schedule 22 - Variation Procedure.
- 1.610 “**Variation Enquiry**” has the meaning given in Schedule 22 - Variation Procedure.
- 1.611 “**Variation Procedure**” means the procedure set out in Schedule 22 - Variation Procedure.
- 1.612 “**Vehicles**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.

- 1.613 “**VIA**” means Via Rail Canada and its successors.
- 1.614 “**Warranty Cash Amount**” means either the East Warranty Cash Amount or West Warranty Cash Amount.
- 1.615 “**Warranty Letter of Credit**” has the meaning given in Section 11.18(a) of the Project Agreement.
- 1.616 “**Warranty Period**” means each of the East Warranty Period, West Warranty Period and Remaining Works Warranty Period, as applicable.
- 1.617 “**Warranty Protocol**” has the meaning given in Schedule 36 – Interface Agreement.
- 1.618 “**Warranty Request**” has the meaning given in Schedule 36 – Interface Agreement.
- 1.619 “**Warranty Work**” means all work, including any work to correct Construction Defects and Construction Latent Defects to satisfy the warranties provided pursuant to Section 11.16, and in accordance with the applicable Warranty Period. For clarity, this shall include all work required to Make Good any damage to other works caused by the repairing of such defects, deficiencies or failures to comply to the Project Agreement.
- 1.620 “**Weekday**” means Monday, Tuesday, Wednesday, Thursday, or Friday.
- 1.621 “**West Anticipated Final Completion Date**” means the date (which, for greater certainty, will be on or before the West Scheduled Final Completion Date) on which DB Co anticipates that West Final Completion will be achieved.
- 1.622 “**West Anticipated Substantial Completion Date**” has the meaning given in Section 25.5(a)(ii) of the Project Agreement.
- 1.623 “**West Completion Holdback**” has the meaning given in Section 25.10(b) of the Project Agreement.
- 1.624 “**West Construction Defect**” has the meaning given in Section 11.15(b) of the Project Agreement.
- 1.625 “**West DB Co Commissioning**” means the DB Co Commissioning in respect of the West Works other than the Highway Works.
- 1.626 “**West Final Completion**” means the completion of the West Works in accordance with the Project Agreement, including completion of all West Minor Deficiencies, Remaining Works, Remaining Works Minor Deficiencies.
- 1.627 “**West Final Completion Countdown Notice**” has the meaning given in Section 25.13(a)(ii) of the Project Agreement.
- 1.628 “**West Final Completion Certificate**” means the certificate to be issued by the Independent Certifier in accordance with Section 25.14(g) of the Project Agreement in respect of West Final Completion.

- 1.629 “**West Final Completion Date**” means the date on which West Final Completion is achieved as evidenced by the West Final Completion Certificate, as such date shall be stated therein.
- 1.630 “**West Final Completion Notice**” has the meaning given in Section 25.14(c) of the Project Agreement.
- 1.631 “**West Further Revised Substantial Completion Date**” has the meaning given in Section 25.5(k) of the Project Agreement.
- 1.632 “**West Initial Countdown Notice**” has the meaning given in Section 25.5(a)(ii) of the Project Agreement.
- 1.633 “**West Minor Deficiencies**” has the meaning given in Section 25.10(b) of the Project Agreement.
- 1.634 “**West Minor Deficiencies List**” has the meaning given in Section 25.10(b) of the Project Agreement.
- 1.635 “**West Revised Substantial Completion Date**” has the meaning given in Section 25.5(h) of the Project Agreement.
- 1.636 “**West Scheduled Substantial Completion Date**” means May 25, 2025, as such date may be amended pursuant to Section 32 of the Project Agreement.
- 1.637 “**West Scheduled Final Completion Date**” means the date that is two years following the West Substantial Completion Date.
- 1.638 “**West Subsequent Notice**” has the meaning given in Section 25.5(h) of the Project Agreement.
- 1.639 “**West Substantial Completion**” means the point at which, in respect of the West Works, (i) the New City Infrastructure and New MTO Infrastructure comprising the West Works, other than the Remaining Works, have been completed in accordance with the Project Agreement; (ii) the Payment Certifier appointed pursuant to Section 17.3(g) of the Project Agreement has certified the substantial performance of the Design and Construction Contract and the related certificate of substantial performance has been published, each in accordance with the CA; and (iii) all requirements for West Substantial Completion described in the West Testing & Commissioning Plan and Highway Testing & Commissioning Plan, other than in respect of West Minor Deficiencies, the Remaining Works, the Remaining Works Minor Deficiencies and Trial Running have been satisfied in respect of the New City Infrastructure as a whole.
- 1.640 “**West Substantial Completion Certificate**” means the certificate to be issued by the Independent Certifier in accordance with Section 25.4(d) of the Project Agreement.
- 1.641 “**West Substantial Completion Date**” means the date on which West Substantial Completion is achieved as evidenced by the West Substantial Completion Certificate, as such date shall be stated therein.
- 1.642 “**West Substantial Completion Notice**” has the meaning given in Section 25.4(b)(ii) of the Project Agreement.
- 1.643 “**West Substantial Completion Payment**” means the amount of \$[REDACTED], less the West Completion Holdback as at the West Substantial Completion Payment Date.

- 1.644 “**West Substantial Completion Payment Date**” means the date that is 2 Business Days after the West Substantial Completion Date.
- 1.645 “**West Testing & Commissioning Plan**” means the Testing & Commissioning Plan for the West Works (other than Highway Works) included in the Testing & Commissioning Program.
- 1.646 “**West Warranty Cash Amount**” has the meaning given in Section 4.2(c)(ii) of the Project Agreement.
- 1.647 “**West Warranty Letter of Credit**” has the meaning given in Section 11.18(a)(ii) of the Project Agreement.
- 1.648 “**West Warranty Period**” means:
- (a) in respect of the West Works other than in respect of New Municipal Infrastructure and New MTO Infrastructure, a period beginning on the West Substantial Completion Date and expiring on the date 2 years after such West Substantial Completion Date;
 - (b) in respect of each New Municipal Construction Component comprising part of the West Works, a period beginning on the New Municipal Infrastructure Component Acceptance Date for such New Municipal Construction Component, and expiring on the date 2 years after such New Municipal Infrastructure Component Acceptance Date; and
 - (c) in respect of New MTO Infrastructure, a period beginning on the applicable Handover for such New MTO Infrastructure, and expiring on the date 2 years after such Handover.
- 1.649 “**West Warranty Work**” has the meaning given in Section 11.17(a)(ii) of the Project Agreement.
- 1.650 “**West Works**” means the Works as it relates to the Confederation Line West Extension, as generally described in Article 19 of Part 1 of Schedule 15-2, and all Highway Works related thereto.
- 1.651 “**Witness Point**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.652 “**Works**” means the design, construction, installation, testing, commissioning and completion of the New City Infrastructure and the New MTO Infrastructure, and the rectification of any Minor Deficiencies, Remaining Works Minor Deficiencies, Warranty Work, all other work under the Permits, Licences, Approvals and Agreements, and all work which is implied by the Project Agreement and that is necessary for the stability or safe and proper design, construction, installation, testing, commissioning and completion of the New City Infrastructure and the New MTO Infrastructure, except for all work which is expressly described in this Project Agreement, including Schedule 35 – Permits, Licences, Approvals and Agreements, as being the responsibility of the City.
- 1.653 “**Works Area Micro-Schedule**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.654 “**Works Change in Law**” means any Change in Law that:
- (a) is not a Relevant Change in Law;

- (b) occurs after the date that is 30 days prior to the RFP Technical Submission Deadline;
 - (c) requires DB Co to perform any work of alteration, addition, Demolition, extension or variation in the quality or function of the New City Infrastructure or the New MTO Infrastructure which is similar in nature to the Works but is not Works or capital replacement work which DB Co would otherwise be required to perform in order to comply with its obligations under the Project Agreement; and
 - (d) was not reasonably foreseeable at the RFP Technical Submission Deadline by an experienced contractor carrying out activities and/or performing design and/or other operations similar to those to be carried out and/or performed by any DB Co Party in relation to the Project.
- 1.655 “**Works Committee**” has the meaning given in Section 14.1(a) of the Project Agreement.
- 1.656 “**Works Committee End Date**” has the meaning given in Section 14.3(a) of the Project Agreement.
- 1.657 “**Works Report**” means those updates and reports to be issued by DB Co in accordance with Schedule 33 – Works Reports.
- 1.658 “**Works Schedules**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.659 “**Works Submittals**” has the meaning given in Section 1.1 of Schedule 10 - Review Procedure.
- 1.660 “**WSIB**” means the Ontario Workplace Safety and Insurance Board that is responsible for administering the *Workplace Safety and Insurance Act*, 1997, S.O. ch.16, Sch. A (Ontario).
- 1.661 “**Zone of Influence**” has the meaning given in Schedule 15-1 - Technical Terms and Reference Documents.
2. **Interpretation.** The Project Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:
- 2.1 The tables of contents, headings, marginal notes and references to them in the Project Agreement are for convenience of reference only, shall not constitute a part of the Project Agreement, and shall not be taken into consideration in the interpretation of, or affect the meaning of, the Project Agreement.
- 2.2 Except where the context requires otherwise (irrespective of whether some, but not all, references in a Schedule specifically refer to that Schedule or to other portions of the Project Agreement) references to specific Sections, Articles, Clauses, Paragraphs, Subparagraphs, Schedules, and other divisions of the Project Agreement are references to such Sections, Articles, Clauses, Paragraphs, or Subparagraphs of, Schedules to, or divisions of the Project Agreement and the terms “Section”, “Article” and “Clause” are used interchangeably and are synonymous.
- 2.3 Except where the context requires otherwise, references to specific Sections, Articles, Clauses, Paragraphs, Subparagraphs, Schedules, and other divisions of the Project Agreement followed by a number are references to the whole of the Section, Article, Clause, Paragraph, Subparagraphs, Schedule or other division of the Project Agreement as applicable, bearing that number, including all subsidiary provisions containing that same number as a prefix.

- 2.4 Except where the context requires otherwise, references in the Output Specifications to specific Parts, Sections, Articles, Clauses, Paragraphs, Subparagraphs, Schedules, and other divisions of the Output Specifications shall be construed such that each such reference on a page of the Output Specifications will be read to be preceded by and to include the prefix Section number or other reference at the top of the applicable page, and all cross-references to any Section in Schedule 15 – Output Specifications shall be interpreted to include the applicable prefix Section number or other reference.
- 2.5 The Schedules to the Project Agreement are an integral part of the Project Agreement and a reference to the Project Agreement includes a reference to the Schedules.
- 2.6 All references in the Project Agreement to a Schedule shall be to a Schedule of the Project Agreement.
- 2.7 All capitalized terms used in a Schedule shall have the meanings given to such terms in Schedule 1, unless stated otherwise in a particular Schedule in which case such definition shall have the meaning given to it in that Schedule solely for the purposes of that Schedule.
- 2.8 The language of the Output Specifications and other documents comprising the Project Agreement is in many cases written in the imperative for brevity. Clauses containing instructions, directions or obligations are directed to DB Co and shall be construed and interpreted as if the words “DB Co shall” immediately preceded the instructions, directions or obligations.
- 2.9 Words importing persons or parties are to be broadly interpreted and include an individual, corporation, limited liability company, joint stock company, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.
- 2.10 Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.
- 2.11 Unless otherwise provided in the Project Agreement, all accounting and financial terms used in the Project Agreement shall be interpreted and applied in accordance with Canadian GAAP.
- 2.12 References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of the Project Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- 2.13 References to any Applicable Law, including any statutes or other Applicable Law specifically referred to herein, whether or not amendments or successors to such Applicable Law are referred to herein, are to be construed as references to that Applicable Law as from time to time amended or to any Applicable Law covering the same or similar subject matter from time to time replacing, extending, consolidating or amending the same.
- 2.14 References to a statute shall include all regulations, by-laws, ordinances and orders made under or pursuant to the statute.

- 2.15 References to persons shall include their successors and assigns. References to a public organization shall include their successors and assigns, and if a public organization ceases to exist or ceases to perform its functions without a successor or assign, references to such public organization shall be deemed to include a reference to any public organization or any organization or entity which has taken over either or both the functions and responsibilities of such public organization.
- 2.16 A reference in the Project Agreement or in any Project Document to any right, power, obligation or responsibility of any Governmental Authority shall be deemed to be a reference to the Governmental Authority that, pursuant to Applicable Laws has such right, power, obligation or responsibility at the relevant time.
- 2.17 References to a deliberate act or omission or deliberate or negligent act or omission of any City Party shall be construed having regard to the interactive nature of the activities of the City Party and DB Co and further having regard to:
- (a) acts contemplated by the Output Specifications; or
 - (b) acts otherwise provided for in the Project Agreement.
- 2.18 The words in the Project Agreement shall bear their natural meaning.
- 2.19 Each of DB Co's and the City's respective obligations shall be construed as separate obligations owed to the other.
- 2.20 References containing terms such as:
- (a) "hereof", "herein", "hereto", "hereinafter", and other terms of like import are not limited in applicability to the specific provision within which such references are set forth but instead refer to the Project Agreement taken as a whole; and
 - (b) "includes" and "including", whether or not used with the words "without limitation" or "but not limited to", shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean "includes without limitation" and "including without limitation".
- 2.21 In construing the Project Agreement, the rule known as the *ejusdem generis* rule shall not apply nor shall any similar rule or approach apply to the construction of the Project Agreement and, accordingly, general words introduced or followed by the word "other" or "including" or "such as" or "in particular" shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- 2.22 Where the Project Agreement states that an obligation shall be performed "no later than" or "within" or "by" a stipulated date or event which is a prescribed number of days after a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- 2.23 Where the Project Agreement states that an obligation shall be performed "no later than" or "by" a prescribed number of days before a stipulated date or event or "by" a date which is a prescribed

- number of days before a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- 2.24 Where the Project Agreement states that an obligation shall be performed “on” a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- 2.25 Any reference to time of day or date means the local time or date in Ottawa, Ontario. Any reference to a stipulated “day” which is not specifically referred to as a “Business Day” shall be deemed to be a calendar day measured from midnight to midnight.
- 2.26 Unless otherwise indicated, time periods will be strictly construed.
- 2.27 Whenever the terms “will” or “shall” are used in the Project Agreement in relation to DB Co or the City they shall be construed and interpreted as synonymous and to read “DB Co shall” or “the City shall” as the case may be.
- 2.28 Any reference to currency is to Canadian currency and any amount advanced, paid or calculated is to be advanced, paid or calculated in Canadian currency.
- 2.29 Unless otherwise identified in the Project Agreement, all units of measurement in any documents submitted by DB Co to the City shall be in accordance with the SI system of units.
- 2.30 Terms not defined herein and used in the Project Agreement which have a technical meaning commonly understood by the transit system and railway system construction industry will be construed as having that meaning unless the context otherwise requires.
- 2.31 Save where expressly stated otherwise, references to amounts or sums expressed to be “indexed” or “index linked” are references to amounts or sums which require adjustment to reflect the effects of inflation. Such adjustment shall be calculated in accordance with the following formula:
- $$\text{Adjusted amount or sum} = \text{Amount or sum} \times \frac{\text{CPI}_n}{\text{CPI}_o}$$
- 2.32 The terms “properly inferable”, “readily apparent” and “readily discoverable” as used in this Project Agreement, shall be interpreted by taking into consideration DB Co’s and any DB Co Party’s experience and the investigations, inspections and examinations of the Background Information and in respect of the Lands, including the Existing Infrastructure and Stage 1 Connection Infrastructure, carried out by DB Co or by any DB Co Party during the Request for Proposals process or other due diligence; and by taking into consideration reasonable, normal course and industry standard investigations, inspections or other due diligence; in each case in accordance with Good Industry Practice.

SCHEDULE 2

COMPLETION DOCUMENTS

In this Schedule 2, “certified” shall mean that the relevant document is certified as a true and complete copy in full force and effect and unamended as of the date of the relevant certificate by an officer or director of the relevant corporation.

1. DOCUMENTS TO BE DELIVERED BY DB CO

Unless an original document is specifically required, a certified copy of each of the following documents (in each case, executed by the parties to such agreement other than City, RTG and the Independent Certifier) and in form and substance satisfactory to City, acting reasonably, is to be delivered by DB Co to City on or prior to the Financial Close Target Date:

- 1.1 an original of this Project Agreement;
- 1.2 an original of the Lenders’ Direct Agreement;
- 1.3 an original of the Independent Certifier Agreement;
- 1.4 an original of the Insurance Trust Agreement;
- 1.5 an original notice of appointment of the DB Co Representative;
- 1.6 the Lending Agreements;
- 1.7 the Design and Construction Contract;
- 1.8 an original of the Performance Guarantee of Construction Guarantor;
- 1.9 an original of the Construction Contractor’s Direct Agreement;
- 1.10 an original of the Interface Agreement
- 1.11 those assignable subcontracts and Subcontractor’s Direct Agreements designated by City in accordance with the Project Agreement;
- 1.12 one printed copy of the Financial Model and two copies on universal serial bus (USB) flash drive;
- 1.13 the PBS-1, in form and substance satisfactory to City;
- 1.14 original Letter of Credit required in accordance with the Project Agreement or as the City may direct in accordance with the Insurance Trust Agreement;
- 1.15 a certificate of insurance and draft policies of insurance for the insurances required to be taken out by the Construction Contractor in accordance with this Project Agreement;
- 1.16 [Intentionally Deleted];

- 1.17 a certificate of an officer of DB Co substantially in the form attached as Appendix B to this Schedule 2;
- 1.18 a certificate of an officer of the Construction Contractor substantially in the form attached as Appendix B to this Schedule 2;
- 1.19 a certificate of an officer of the Construction Guarantor substantially in the form attached as Appendix B to this Schedule 2;
- 1.20 an original of the opinion from counsel to DB Co, the Construction Contractor, the Construction Guarantor, and such other DB Co Parties as City may reasonably require substantially in the form attached as Appendix C to this Schedule 2 and otherwise acceptable to City and its counsel;
- 1.21 [not used];
- 1.22 evidence that the COR-Certified Construction DB Co Party has its COR Certification in good standing (or to the extent that the COR-Qualified Construction DB Co Party does not have its COR Certification by Financial Close, evidence that the COR-Qualified Construction DB Co Party has its current OHSAS 18001 Accreditation in good standing and has made an application to IHSA for its COR Certification);
- 1.23 in respect of each partner of the Construction Contractor, a WSIB clearance certificate, or if a WSIB clearance certificate is not available, equivalent documentation from another jurisdiction, current to the date of Commercial Close;
- 1.24 in respect of each partner of the Construction Contractor, a CAD-7, or, if a CAD-7 is not available, equivalent documentation from another jurisdiction, current to the date of Commercial Close;
- 1.25 in respect of each partner of the Construction Contractor, a Workplace Injury Summary Report (WISR) or, if a WISR is not available, equivalent documentation from another jurisdiction, current to the date of Commercial Close;
- 1.26 the executed Nominated Signalling Subcontract; and
- 1.27 such other documents as the parties may agree, each acting reasonably.

2. DOCUMENTS TO BE DELIVERED BY CITY

Unless an original document is specifically required, a certified copy of each of the following documents (in each case, where City is a party to such document, executed by City) is to be delivered by City to DB Co on or prior to the Financial Close Target Date:

- 2.1 an original of this Project Agreement;
- 2.2 an original of the Lenders' Direct Agreement;

- 2.3 an original of the Independent Certifier Agreement (executed by the City and the Independent Certifier);
- 2.4 an original of the Insurance Trust Agreement;
- 2.5 an original of the Subcontractor's Direct Agreements designated by City in accordance with the Project Agreement;
- 2.6 an original notice of appointment of the City Representative;
- 2.7 a certificate of an officer of City substantially in the form attached as Appendix D to this Schedule 2;
- 2.8 an original of the Interface Agreement (executed by the City and RTG);
- 2.9 an original of the Performance Guarantee of Construction Guarantor;
- 2.10 an original of the Construction Contractor's Direct Agreement;
- 2.11 any reliance letters addressed to the Lenders and DB Co in respect of the geotechnical data reports, etc.;
- 2.12 an original opinion from counsel to the City in respect of customary corporate and enforceability matters and otherwise acceptable to DB Co and its counsel, addressed to DB Co, the Construction Contractor, the Lenders' Agent and the Lender; and
- 2.13 such other documents as the parties may agree, each acting reasonably.

**APPENDIX A
[INTENTIONALLY DELETED]**

APPENDIX B
FORM OF DB CO/DB CO PARTY OFFICER'S CERTIFICATE

Certificate of an Officer of

[●]

(the “Corporation”)

TO: THE CITY OF OTTAWA

AND TO: NORTON ROSE FULBRIGHT CANADA LLP

AND TO: [_____]

I, [●], being the [●] of the Corporation and an authorized signatory of the Corporation and being duly authorized by the Corporation to deliver this certificate, hereby make the following certifications and confirmations for and on behalf of the Corporation and without incurring personal liability and that the same may be relied upon by you without further inquiry:

1. Constatting Documents

- (a) The Corporation is a subsisting corporation duly incorporated under the laws of [the **Province of Ontario**].
- (b) Attached hereto as **Schedule “A”** are true and complete copies of the articles, together with all amendments thereto, of the Corporation (the “Articles”). The Articles are in full force and effect on the date hereof and no other articles have been issued and no proceeding has been taken or is contemplated to the date hereof to authorize the Corporation to amend, surrender or cancel the Articles.
- (c) Attached hereto as **Schedule “B”** are true and complete copies of the by-laws of the Corporation (the “**By-laws**”) enacted on or before the date hereof. The By-laws have been in full force and effect from and after the date thereof as set out therein and are in full force and effect, unamended as of the date hereof. No proceeding has been taken to the date hereof to authorize the Corporation to amend the By-laws and neither the directors nor the shareholders of the Corporation have passed, confirmed or consented to any resolutions amending or varying the By-laws.
- (d) Attached hereto as **Schedule “C”** is a true and complete copy of a unanimous shareholders’ agreement between the shareholders of the Corporation and the Corporation (the “**Unanimous Shareholders’ Agreement**”) executed on or before the date hereof. The Unanimous Shareholders’ Agreement has been in full force and effect from and after the date thereof as set out therein and is in full force and effect, unamended as of the date hereof.
- (e) The minute books and corporate records of the Corporation made available to [●] are the original minute books and corporate records of the Corporation and contain all minutes of meetings, resolutions and proceedings of the shareholders and directors of the Corporation to the date hereof and there have been no meetings, resolutions or

proceedings authorized or passed by the shareholders or directors of the Corporation to the date hereof not reflected in such minute books and corporate records. Such minute books and corporate records are true, complete and correct in all material respects and there are no changes, additions or alterations necessary to be made thereto to make such minute books and corporate records true, complete and correct in all material respects.

- (f) At the date hereof, no winding-up, liquidation, dissolution, insolvency, bankruptcy, amalgamation, arrangement, reorganization or continuation proceedings in respect of the Corporation have been commenced or are being contemplated by the Corporation, and the Corporation has no knowledge of any such proceedings having been commenced or contemplated in respect of the Corporation by any other party.
- (g) At the date hereof, the Corporation is up-to-date in the filing of all returns and other documents required to be filed by it by governmental authorities, including under corporate, securities and tax legislation, and no notice of any proceedings to cancel its certificate of incorporation or otherwise to terminate its existence has been received by the Corporation.
- (h) Pursuant to the Unanimous Shareholders' Agreement, the powers of the directors of the Corporation to manage the business and affairs of the Corporation, whether such powers arise from the [Business Corporations Act (Ontario) (the "Act")], the Articles or the By-laws of the Corporation, or otherwise, are restricted to the fullest extent permitted by law, and, in accordance with the Act and the Unanimous Shareholders' Agreement, the shareholders of the Corporation have and enjoy and may exercise and perform all the rights, powers, and duties of the directors of the Corporation to manage the business and affairs of the Corporation.
- (i) There are no provisions in the Articles, By-laws, Unanimous Shareholders' Agreement or in any other agreement binding on the Corporation which:
 - (i) restrict or limit the powers of the Corporation to enter into:
 - (A) a certain project agreement with City made as of [●], 201[●] (as the same may be amended, supplemented, restated or otherwise modified from time to time, the "Project Agreement") pursuant to which the Corporation will design, build and finance the Confederation Line Extension Project;
 - (B) a lenders' direct agreement between the Corporation, City and the Lenders' Agent;
 - (C) a design and construction contract between the Corporation and [] (the "Construction Contractor");
 - (D) an insurance trust agreement between the Corporation, City, the Lenders' Agent and [REDACTED];

(E) [NTD: List other documents delivered at Financial Close.],
(collectively, the “Documents”); or

- (ii) restrict or limit the authority of the directors or shareholders of the Corporation by resolution to delegate the powers set out in subparagraph (i) to a director or an officer of the Corporation.

2. Resolutions

- (a) Annexed hereto, forming part hereof and marked as **Schedule “D”** are true and complete copies of the resolutions of the [directors/shareholders] of the Corporation (the “**Resolutions**”), which have been duly and validly passed in accordance with applicable law, constituting authority and approval for the Corporation, inter alia, to enter into the Documents. The Resolutions are the only resolutions of the Corporation pertaining to the subject matter thereof and the same are in full force and effect, unamended as of the date hereof.
- (b) The authorization, execution and delivery of each Document contemplated in the Resolutions, and the performance by the Corporation of its obligations thereunder, do not constitute or result in a violation or breach or default under:
- (i) the Articles, By-laws or the Unanimous Shareholders’ Agreement;
- (ii) to the best of my knowledge and belief after due diligence, any order of any Canadian or [Ontario] governmental body by which it is bound;
- (iii) to the best of my knowledge and belief after due diligence, the terms of any agreement or instrument under which any of its property or assets is bound; or
- (iv) to the best of my knowledge and belief after due diligence, any writ, judgment, injunction, determination or award which is binding on the Corporation or any of its properties.
- (c) To the best of my knowledge and belief after due diligence, there is no claim, action, suit, proceedings, arbitration, investigation or inquiry before any governmental agency, court or tribunal, foreign or domestic, or before any private arbitration tribunal, pending or threatened against the Corporation, or involving its properties or business. To the best of my knowledge and belief after due diligence, no administrative or court decree is outstanding in respect of the Corporation or its assets.
- (d) To the best of my knowledge and belief after due diligence, no consent, approval or other order of any Canadian or [Ontario] governmental authority which has not been obtained is required to permit the Corporation to execute and deliver the Documents.

3. No Breach or Default

Neither the execution and delivery by the Corporation of the Documents nor the consummation of the transactions therein contemplated nor the fulfilment or compliance with the terms thereof will

contravene or result in a breach of any of the terms, conditions or provisions of, or constitute a default under the Articles, By-laws, Unanimous Shareholders’ Agreement or under any other agreement binding on the Corporation.

4. Specimen Signatures

The persons whose names are set forth below are, at the date hereof, officers and/or directors of the Corporation, duly elected or appointed to the office or offices set forth opposite their respective names and authorized to execute the Documents on behalf of the Corporation. The signatures set forth opposite their respective names are the true signatures of those persons:

| NAME | POSITION | SIGNATURE |
|------|----------|-----------|
| | | _____ |
| | | _____ |
| | | _____ |
| | | _____ |

5. Capital

Listed below are all of the issued and outstanding shares in the capital of the Corporation and the registered owner of such shares:

| ISSUED SHARES | REGISTERED OWNER |
|---------------|------------------|
| | |
| | |
| | |

Attached hereto as **Schedule “E”** are true copies of all certificates in respect of such issued and outstanding shares. The Corporation has issued no securities, including (without limitation) securities convertible or exchangeable into shares and/or securities in respect of debt, other than such issued and outstanding shares as are listed above.

DATED this _____ day of _____, 201[●].

APPENDIX C
FORM OF DB CO/DB CO PARTY OPINION

[INSERT DATE]

The City of Ottawa

Norton Rose Fulbright Canada LLP

We have acted as counsel to [] (“DB Co”), [] (the “Construction Contractor”) and [•] (the “Construction Guarantor”) in connection with the alternative financing and procurement transaction whereby DB Co has agreed to enter into a design, build and finance agreement for the new Confederation Line Extension Project in Ottawa, Ontario. [NTD: Additional parties to be added depending on consortium structure and/or the financing package.]

This opinion is being delivered pursuant to Section 1 of Schedule 2 to the project agreement made as of [•], 201[•] between City and DB Co (as the same may be amended, supplemented, restated or otherwise modified from time to time, the “Project Agreement”).

All capitalized terms used but not otherwise defined in this opinion shall have the respective meanings ascribed thereto in the Project Agreement.

In our capacity as counsel to DB Co, the Construction Contractor and the Construction Guarantor, we have participated in the preparation and negotiation, and have examined an executed copy, of each of the following documents (unless otherwise indicated, all documents are dated as of [•], 201[•]):

1. the Project Agreement; and
2. the following project documents (collectively, the “Implementation Documents”):
 - (a) the Design and Construction Contract;
 - (b) the Lenders’ Direct Agreement;
 - (c) the Construction Contractor’s Direct Agreement;
 - (d) the Subcontractor’s Direct Agreements designated by City in accordance with the Project Agreement;
 - (e) the Lending Agreements
 - (f) the Insurance Trust Agreement; and

(g) the Performance Guarantee of Construction Guarantor.

The Project Agreement and the Implementation Documents are hereinafter collectively referred to as the “**Documents**”, and each is individually referred to as a “**Document**”. **[NTD: Additional documents to be added depending on consortium structure and/or the financing package.]**

We are qualified to practise law in the Province of Ontario. We have made no investigation of the laws of any jurisdiction other than Ontario, and the opinions expressed below are confined to the laws of Ontario and the federal laws of Canada applicable therein as at the date hereof.

We do not act as corporate counsel to **[DB Co, the Construction Contractor or the Construction Guarantor]**, nor have we participated in the general maintenance of their corporate records and corporate proceedings. Therefore, in expressing certain of the opinions below, we have, where indicated, relied exclusively, and without any independent investigation or enquiry, on certificates of public officials and a certificate of an officer of each of DB Co, the Construction Contractor and the Construction Guarantor dated as of the date hereof (the “**Officer’s Certificates**”) as to certain factual matters.

Searches and Reliance

We have conducted, or have caused to be conducted, the searches identified in Schedule “A” (the “**Searches**”) for filings or registrations made in those offices of public record listed in Schedule “A”. The Searches were conducted against the current name and all former names of DB Co and the Construction Contractor (including, in each case, both the English and French versions, if any). The results of the Searches are set out in Schedule “A”.

We have also made such investigations and examined originals or copies, certified or otherwise identified to our satisfaction, of such certificates of public officials and of such other certificates, documents and records as we have considered necessary or relevant for purposes of the opinions expressed below, including, without limitation, the Officer’s Certificates.

We have relied exclusively, and without any independent investigation or enquiry, on the Officer’s Certificates and the certificates of public officials with respect to certain factual matters.

In connection with the opinions set forth in paragraphs 1, 2 and 3 below, we have relied exclusively on Certificates of Status issued by the **[Ministry of Government Services (Ontario)]** of even date, copies of which are attached as Schedule “B”.

In connection with the opinions set forth in paragraphs **[5, 8, 11, 17 and 20]** below, we have relied exclusively, and without any independent investigation or enquiry, upon the opinion of **[●]** dated **[●]**, 20**[●]** (the “**CC Opinion**”), a copy of which has been delivered to you. To the extent that the CC Opinion contains assumptions, qualifications, limitations or definitions, or is expressed as relying on any certificate(s) or other documents identified therein, the opinions herein expressed in reliance on the CC Opinion should be read as incorporating the identical assumptions, qualifications, limitations, definitions and reliances. In connection with the opinions set forth in paragraphs 6, 9, 12, 15, 18 and 21 below, we have relied exclusively, and without any independent investigation or enquiry, upon the opinion of **[•]** dated **[•]**, 20**[•]** (the “**CG Opinion**”), a copy of which has been delivered to you. To the extent that the CG Opinion contains assumptions, qualifications, limitations or definitions, or is expressed as relying on any certificate(s) or other documents identified therein,

the opinions herein expressed in reliance on the CG Opinion should be read as incorporating the identical assumptions, qualifications, limitations, definitions and reliances.

Assumptions

For the purposes of the opinions expressed herein, we have assumed:

1. The genuineness of all signatures, the authenticity of all documents submitted to us as originals, the conformity to originals of all documents submitted to us as certified, true, conformed, photostatic or notarial copies or facsimiles thereof and the authenticity of the originals of such certified, true, conformed, photostatic or notarial copies or facsimiles.
2. Each of the parties (other than DB Co, the Construction Contractor and the Construction Guarantor) to each of the Documents is and was, at all relevant times, a subsisting corporation, partnership, limited partnership, limited liability company or trust, as applicable, under the laws of its jurisdiction of formation.
3. Each of the parties (other than DB Co, the Construction Contractor and the Construction Guarantor) has (and had) the corporate power, authority and capacity to own its property and assets and to carry on its business as such business is now (or as was then) being carried on by it, has (or had) all requisite corporate power, authority and capacity to execute and deliver each Document to which it is party and to perform its obligations thereunder, has taken all necessary corporate action, as applicable, to authorize the execution and delivery of each Document to which it is a party and the performance of its obligations thereunder, and has duly executed and delivered each Document to which it is a party and each Document to which it is a party is a legal, valid and binding obligation of such party enforceable against it in accordance with its terms.
4. The completeness, truth and accuracy of all facts set forth in the Officer's Certificates.
5. The completeness, truth and accuracy of all facts set forth in official public records and certificates and other documents supplied by public officials.
6. Value has been given by each of the parties (other than DB Co, the Construction Contractor and the Construction Guarantor) to DB Co, the Construction Contractor and the Construction Guarantor.

Opinions

Based upon and subject to the foregoing, and to the qualifications, exceptions and limitations hereinafter expressed, we are of the opinion that, as of the date hereof:

Incorporation and Existence

1. DB Co is a corporation incorporated under the laws of [the Province of Ontario] and has not been dissolved.
2. The Construction Contractor is a corporation incorporated under the laws of [the Province of Ontario] and has not been dissolved.

3. The Construction Guarantor is a corporation incorporated under the laws of [the Province of Ontario] and has not been dissolved.

Corporate Power and Capacity

4. DB Co has the corporate power and capacity to own or lease its properties and assets, to carry on its business as it is currently being conducted and as it is contemplated to be conducted under the Project Agreement, and to enter into and perform its obligations under each of the Documents to which it is a party.
5. The Construction Contractor has the corporate power and capacity to own or lease its properties and assets, to carry on its business as it is currently being conducted and as it is contemplated to be conducted under the Documents, and to enter into and perform its obligations under each of the Documents to which it is a party.
6. The Construction Guarantor has the corporate power and capacity to own or lease its properties and assets, to carry on its business as it is currently being conducted and as it is contemplated to be conducted under the Documents, and to enter into and perform its obligations under each of the Documents to which it is a party.

Corporate Authorization

7. DB Co has taken all necessary corporate action to authorize the execution and delivery of, and the performance of its obligations under, each of the Documents to which it is a party.
8. The Construction Contractor has taken all necessary corporate action to authorize the execution and delivery of, and the performance of its obligations under, each of the Documents to which it is a party.
9. The Construction Guarantor has taken all necessary corporate action to authorize the execution and delivery of, and the performance of its obligations under, each of the Documents to which it is a party.

Execution and Delivery

10. DB Co has duly executed and delivered each of the Documents to which it is a party.
11. The Construction Contractor has duly executed and delivered each of the Documents to which it is a party.
12. The Construction Guarantor has duly executed and delivered each of the Documents to which it is a party.

Enforceability

13. Each of the Documents to which DB Co is a party constitutes a legal, valid and binding obligation of DB Co, enforceable against it in accordance with its terms.

14. Each of the Documents to which the Construction Contractor is a party constitutes a legal, valid and binding obligation of the Construction Contractor, enforceable against it in accordance with its terms.
15. Each of the Documents to which the Construction Guarantor is a party constitutes a legal, valid and binding obligation of the Construction Guarantor, enforceable against it in accordance with its terms.

No Breach or Default

16. The execution and delivery by DB Co of the Documents to which it is a party does not, and the performance by DB Co of its obligations under each such Document in accordance with its terms will not, breach or constitute a default under (i) its articles, by-laws or unanimous shareholders' agreement, or (ii) the provisions of any law, statute, rule or regulation to which DB Co is subject.
17. The execution and delivery by the Construction Contractor of the Documents to which it is a party does not, and the performance by the Construction Contractor of its obligations under each such Document in accordance with its terms will not, breach or constitute a default under (i) its articles, by-laws or unanimous shareholders' agreement, or (ii) the provisions of any law, statute, rule or regulation to which the Construction Contractor is subject.
18. The execution and delivery by the Construction Guarantor of the Documents to which it is a party does not, and the performance by the Construction Guarantor of its obligations under each such Document in accordance with its terms will not, breach or constitute a default under (i) its articles, by-laws or unanimous shareholders' agreement, or (ii) the provisions of any law, statute, rule or regulation to which the Construction Guarantor is subject.

Regulatory Approvals

19. No authorization, consent, permit or approval of, or other action by, or filing with or notice to, any governmental agency or authority, regulatory body, court, tribunal or other similar entity having jurisdiction is required in connection with the execution and delivery by DB Co of the Documents to which it is a party and the performance of its obligations thereunder.
20. No authorization, consent, permit or approval of, or other action by, or filing with or notice to, any governmental agency or authority, regulatory body, court, tribunal or other similar entity having jurisdiction is required in connection with the execution and delivery by the Construction Contractor of the Documents to which it is a party and the performance of its obligations thereunder.
21. No authorization, consent, permit or approval of, or other action by, or filing with or notice to, any governmental agency or authority, regulatory body, court, tribunal or other similar entity having jurisdiction is required in connection with the execution and delivery by the Construction Guarantor of the Documents to which it is a party and the performance of its obligations thereunder.

Qualifications

Our opinions herein are subject to the following qualifications and reservations, namely:

1. The enforceability of any Document and the rights and remedies set out therein or any judgment arising out of or in connection therewith is subject to and may be limited by any applicable bankruptcy, reorganization, winding-up, insolvency, moratorium or other laws of general application affecting creditors' rights from time to time in effect.
2. The enforceability of each of the Documents and the rights and remedies set out therein is subject to and may be limited by general principles of equity, and no opinion is given as to any specific remedy that may be granted, imposed or rendered, including equitable remedies such as those of specific performance and injunction, or the availability of equitable defences.
3. The enforceability of any Document will be subject to the limitations contained in the *Limitations Act, 2002* (Ontario), and we express no opinion as to whether a court may find any provision of any Document to be unenforceable as an attempt to vary or exclude a limitation period under that *Act*.
4. Pursuant to the *Currency Act* (Canada), a judgment in money rendered by a Court in the Province of Ontario must be awarded in Canadian currency and such judgment may be based on a rate of exchange in effect other than the day of payment of the judgment.
5. To the extent that a particular contractual provision is characterized by a Court as a penalty and not as a genuine pre-estimate of damages, it will not be enforceable.
6. A Court may not treat as conclusive those certificates and determinations which the Documents state are to be so treated.
7. A receiver or receiver and manager appointed pursuant to the provisions of any Document, for certain purposes, may not be treated by a Court as being solely the agent of DB Co notwithstanding any agreement to the contrary.
8. The ability to recover or claim for certain costs or expenses may be subject to judicial discretion.
9. With respect to any provisions of the Documents pursuant to which the parties to such Documents are permitted or required to submit a dispute arising out of such Documents to arbitration, we express no opinion as to the enforceability of such arbitration provisions in all circumstances since under the *Arbitration Act, 1991* (Ontario) a court of competent jurisdiction in Ontario may, in its discretion and upon certain grounds, refuse to stay judicial proceedings in which event an arbitration under such arbitration provisions may not be commenced or continued. In addition, the *Arbitration Act, 1991* (Ontario) provides that a court may hear an appeal of an arbitration award on a question of law, or set aside an arbitration award or declare it invalid, in each case on certain prescribed grounds.
10. Any requirement in any of the Documents that interest be paid at a higher rate after than before default may not be enforceable.

11. The effectiveness of provisions which purport to relieve a person from a liability or duty otherwise owed may be limited by law, and provisions requiring indemnification or reimbursement may not be enforced by a Court, to the extent that they relate to the failure of such person to perform such duty or liability.
12. No opinion is expressed as to the enforceability of any provision contained in any Document which purports to sever from the Document any provision therein which is prohibited or unenforceable under applicable law without affecting the enforceability or validity of the remainder of the document.
13. No opinion is expressed regarding any waiver of service of process, presentment, demand, protest or notice of dishonour which may be contained in any of the Documents.
14. Any award of costs is in the discretion of a Court of competent jurisdiction.
15. The enforceability of rights of indemnity set out in the Documents may be limited under applicable law to the extent that they directly or indirectly relate to liabilities imposed by law on City for which it would be contrary to public policy to require DB Co to indemnify City or to the extent that they constitute the indirect enforcement of a foreign revenue or penal law.
16. We express no opinion as to the enforceability by any person who is not a party to the Documents of any provision therein that purports to bind or affect or confer a benefit on such person.

This opinion is being delivered solely in connection with the transaction addressed herein and may not be relied upon by any person other than the addressees, and their successors and permitted assigns, or for any purpose other than the transaction addressed herein.

Yours very truly,

FORM OF CERTIFICATE OF AN OFFICER OF
[City]
(the “Corporation”)

TO: [_____]

AND TO: [_____]

AND TO: [_____]

AND TO: [_____]

RE: Project agreement (as amended, supplemented or modified from time to time, the “**Project Agreement**”) dated the [●] day of [●], 201[●] between **THE CITY OF OTTAWA** (“City”), and [_____] (“**DB Co**”)

I, [●], the [●] of the Corporation and an authorized signatory of the Corporation and being duly authorized by the Corporation to deliver this certificate, hereby make the following certifications and confirmations for and on behalf of the Corporation and without incurring personal liability and that the same may be relied upon by you without further inquiry:

1. Attached hereto as [●] is a true and complete copy of (i) the resolutions of the directors of the Corporation regarding the execution of public works projects assigned to the Corporation and certain other matters set forth therein; and (ii) an excerpt of the resolutions of the directors of the Corporation relating to delegation of signing authority (collectively, the “[●]”), which have been duly and validly passed in accordance with applicable law. The Execution Resolutions are the only resolutions of the Corporation pertaining to the subject matter thereof and the same is in full force and effect, unamended as of the date hereof.
2. Attached hereto as **Schedule “B”** is a true and complete copy of the resolutions of the directors the Corporation approving the selection of DB Co as the designated proponent for the Confederation Line Phase 2 Project (the “**Project Resolutions**”). The Project Resolutions are the only resolutions of the Corporation pertaining to the subject matter thereof and the same is in full force and effect, unamended as of the date hereof.
3. The following named persons, on or as of the date hereof, are duly elected or appointed officers of the Corporation, as evidenced by the holding of the office or offices set forth opposite their names, are proper signing officers of the Corporation and are authorized to execute and deliver Contracts Documents (as such a term is defined in the Execution Resolutions referenced in Item 1(i) above) relating to the Project (as defined in the Project Agreement) on behalf of the Corporation.

The signatures set forth opposite their respective names are the true signatures of those persons.

Title:

**SCHEDULE 3-1
SUBCONTRACTOR'S DIRECT AGREEMENT**

THIS AGREEMENT is made as of the 24th day of April, 2019

BETWEEN:

THE CITY OF OTTAWA

(“City”)

– AND –

EAST WEST CONNECTORS GP, [REDACTED]

(“DB Co”)

– AND –

[REDACTED]

(the “Construction Contractor”)

– AND –

[REDACTED]

(the “Subcontractor”)

WHEREAS:

- A. City and DB Co have entered into the Project Agreement, which requires DB Co to enter into, and to cause the Construction Contractor and the Subcontractor to enter into, this Subcontractor's Direct Agreement with City.
- B. DB Co and the Construction Contractor have entered into the Design and Construction Contract, which requires the Construction Contractor to enter into, and cause the Subcontractor to enter into, this Subcontractor's Direct Agreement with City.

NOW THEREFORE in consideration of the mutual covenants and agreements of the Parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties covenant and agree as follows:

1. DEFINITIONS

In this Schedule 3 – Subcontractor's Direct Agreement, unless the context indicates a contrary intention, terms which are defined in the Project Agreement (and not otherwise defined in this Schedule 3 – Subcontractor's Direct Agreement) shall have meanings given to them in the Project Agreement and the following terms shall have the following meanings:

- (a) “Default Notice” has the meaning given in Section 5(a).

- (b) “**Novation Notice**” has the meaning given in Section 6(b).
- (c) “**Party**” means City, DB Co, the Construction Contractor or the Subcontractor, and “**Parties**” means, collectively, City, DB Co, the Construction Contractor and the Subcontractor.
- (d) “**Subcontract**” means the design subcontract entered into by and between DB Co and the Subcontractor on December 12, 2018.
- (e) “**Substitute**” has the meaning given in Section 6(b).

2. INTERPRETATION

This Subcontractor’s Direct Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings in this Subcontractor’s Direct Agreement are for convenience of reference only, shall not constitute a part of this Subcontractor’s Direct Agreement, and shall not be taken into consideration in the interpretation of, or affect the meaning of, this Subcontractor’s Direct Agreement.
- (b) Unless the context otherwise requires, references to specific Sections, Clauses, Paragraphs, Subparagraphs, and other divisions are references to such Sections, Clauses, Paragraphs, Subparagraphs, or divisions of this Subcontractor’s Direct Agreement and the terms “Section” and “Clause” are used interchangeably and are synonymous.
- (c) Words importing persons or parties are to be broadly interpreted and include an individual, corporation, limited liability company, joint stock company, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.
- (d) Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.
- (e) References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of this Subcontractor’s Direct Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- (f) The words in this Subcontractor’s Direct Agreement shall bear their natural meaning.
- (g) References containing terms such as:
 - (i) “hereof”, “herein”, “hereto”, “hereinafter”, and other terms of like import are not limited in applicability to the specific provision within which such references are set forth but instead refer to this Subcontractor’s Direct Agreement taken as a whole; and

- (ii) “includes” and “including”, whether or not used with the words “without limitation” or “but not limited to”, shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean “includes without limitation” and “including without limitation”.
- (h) In construing this Subcontractor’s Direct Agreement, the rule known as the *ejusdem generis rule* shall not apply nor shall any similar rule or approach to the construction of this Subcontractor’s Direct Agreement and, accordingly, general words introduced or followed by the word “other” or “including” or “in particular” shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (i) Where this Subcontractor’s Direct Agreement states that an obligation shall be performed “no later than” or “within” or “by” a stipulated date or event which is a prescribed number of days after a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (j) Where this Subcontractor’s Direct Agreement states that an obligation shall be performed “on” a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (k) Any reference to time of day or date means the local time or date in Toronto, Ontario.
- (l) Unless otherwise indicated, time periods will be strictly construed.
- (m) Whenever the terms “will” or “shall” are used in this Subcontractor’s Direct Agreement they shall be construed and interpreted as synonymous and to read “shall”.

3. CONFLICT IN DOCUMENTS

- (a) In the event of ambiguities, conflicts or inconsistencies between or among this Subcontractor’s Direct Agreement, the Construction Contractor’s Direct Agreement, the Project Agreement and the Design and Construction Contract, this Subcontractor’s Direct Agreement shall prevail.
- (b) In the event of ambiguities, conflicts or inconsistencies between or among this Subcontractor’s Direct Agreement and the Lenders’ Direct Agreement, the Lenders’ Direct Agreement shall prevail.

4. AGREEMENTS

- (a) If the Subcontractor gives the Construction Contractor any notice of any default(s) under the Subcontract that may give the Subcontractor a right to terminate the Subcontract or to treat it as having been repudiated by the Construction Contractor or to discontinue the Subcontractor’s performance thereunder, then the Subcontractor shall concurrently provide DB Co and City with a copy of such notice, an executed copy of the Subcontract and set out in reasonable detail the default(s).

5. NO TERMINATION BY SUBCONTRACTOR WITHOUT DEFAULT NOTICE

The Subcontractor shall not exercise any right it may have to terminate the Subcontract or to treat it as having been repudiated by the Construction Contractor or to discontinue the Subcontractor's performance thereunder unless:

- (a) the Subcontractor first delivers an executed copy of the Subcontract and a written notice (a "Default Notice") to City setting out in reasonable detail the default(s) on which the Subcontractor intends to rely in terminating the Subcontract or to treat it as having been repudiated by the Construction Contractor or to discontinue the Subcontractor's performance thereunder; and
- (b) within a period of 5 Business Days of City receiving the Default Notice the default(s) on which the Subcontractor intends to rely in terminating the Subcontract or to treat it as having been repudiated by the Construction Contractor or to discontinue the Subcontractor's performance thereunder have not been remedied; and provided that if, within such period of 5 Business Days, City agrees to pay the Subcontractor's reasonable costs of continued performance, such period of 5 Business Days shall be extended to 45 days.

6. NOVATION OF THE SUBCONTRACT

- (a) The Subcontractor acknowledges and agrees that where the Design and Construction Contract has been terminated:
 - (i) by DB Co;
 - (ii) as a result of the termination of the Project Agreement; or
 - (iii) due to the insolvency of the Construction Contractor,

the Subcontract shall not terminate solely by reason of the termination of the Design and Construction Contract unless City shall have failed to request a novation of the Subcontract pursuant to Section 6(b) within 20 days following the date of such termination.

- (b) City may at any time, if the Project Agreement and the Design and Construction Contract have been terminated, deliver a notice (a "**Novation Notice**") electing to novate the Subcontract either to City or a third party designated by City in the Novation Notice (the "**Substitute**"), provided that City can demonstrate to the Subcontractor, acting reasonably, that the Substitute shall have sufficient financial resources, or shall be supported by a satisfactory guarantee, to carry out the obligations of the Substitute under the Subcontract.
- (c) Subject to Section 6(d), upon receipt by the Subcontractor of a Novation Notice:
 - (i) the Construction Contractor and the Subcontractor will be deemed to be released from their existing and future obligations under the Subcontract to each other (except with respect to any and all indemnities from the Construction Contractor or the Subcontractor to the other in respect of the period prior to the receipt of the Novation Notice), and City or the Substitute, as applicable, and the Subcontractor

will be deemed to assume those same existing and future obligations towards each other (except in respect of the aforesaid indemnities);

- (ii) the existing and future rights of the Construction Contractor against the Subcontractor under the Subcontract and vice versa will be deemed to be cancelled (except with respect to any and all indemnities from the Construction Contractor or the Subcontractor to the other in respect of the period prior to the receipt of the Novation Notice), and City or the Substitute, as applicable, and the Subcontractor will be deemed to acquire those same existing and future rights against each other (except in respect of the aforesaid indemnities), subject to any applicable credit from the Subcontractor to City if City pays for the Subcontractor's reasonable costs of continued performance pursuant to Section 5;
 - (iii) any guarantee, bond or covenant in favour of the Construction Contractor from any third party in respect of any term, provision, condition, obligation, undertaking or agreement on the part of the Subcontractor to be performed, observed or carried out by the Subcontractor as contained in, referred to, or inferred from the Subcontract shall be assigned, novated or granted, as required by City or the Substitute, as applicable, each acting reasonably, to City or the Substitute, as applicable, and the Subcontractor shall cause such assignment, novation or grant on substantially the same terms and conditions as the original guarantee, bond or covenant, provided, however, that where Construction Contractor shall continue to hold, or shall continue to be entitled to or have rights under, such guarantee, bond or covenant as security for any obligations of the Subcontractor, the assignment, novation or grant of the guarantee, bond or covenant to the extent of any such obligations to Construction Contractor shall be conditional on the satisfaction of those obligations to Construction Contractor; and
 - (iv) at City's request, the Subcontractor shall enter into, and shall cause any guarantor, covenantor or surety under any guarantee, bond or covenant referred to in Section 6(c)(iii) to enter into, and City shall or shall cause the Substitute to enter into, as applicable, all such agreements or other documents as reasonably necessary to give effect to the foregoing, including, without limitation, an agreement between City or the Substitute, as applicable, and the Subcontractor, acceptable to City and the Subcontractor, each acting reasonably, on substantially the same terms as the Subcontract.
- (d) The Construction Contractor shall, at its own cost, cooperate fully with City and the Substitute in order to achieve a smooth transfer of the Subcontract to City or the Substitute, as applicable, and to avoid or mitigate in so far as reasonably practicable any inconvenience, including the administration of the Subcontract, ongoing supervisory activities and scheduling.
- (e) The rights granted by Section 6(b) shall be of no force or effect if, at any time the Subcontractor receives a Novation Notice, the Subcontractor has already received notice in writing from another entity entitled to the benefit of step-in rights relating to the Subcontract that it is or has validly exercised those step-in rights. If the Subcontractor receives any such notice on the same day as a Novation Notice, the Novation Notice shall be effective, except where the other notice is given by the Lenders, in which case such other notice and not the Novation Notice shall be effective.

- (f) If City gives a Novation Notice within the time provided hereunder at any time after the Subcontractor has terminated the Subcontract or treated it as having been repudiated by Construction Contractor or discontinued the Subcontractor's performance thereunder in accordance with the terms of this Subcontractor's Direct Agreement, the Subcontractor agrees that the Subcontract shall be reinstated and deemed to have continued despite any termination or treatment as having been repudiated, and City shall pay the Subcontractor's reasonable costs for re-commencing the obligations it has under the Subcontract and the Subcontractor shall be entitled to reasonable compensation and/or relief for re-commencing such obligations, having regard to the additional costs and delays incurred as a result of having terminated the Subcontract or having treated it as being repudiated by Construction Contractor or having discontinued its performance thereunder.
- (g) The Subcontractor acknowledges that if City novates the Subcontract to itself pursuant to Section 6(b), City shall have the right to further novate the Subcontract to a Substitute in accordance with and otherwise on, and subject to, the terms and conditions of this Subcontractor's Direct Agreement.

7. SUBCONTRACTOR LIABILITY

- (a) The liability of the Subcontractor hereunder shall not be modified, released, diminished or in any way affected by:
 - (i) any independent inspection, investigation or enquiry into any matter which may be made or carried out by or for City, or by any failure or omission to carry out any such inspection, investigation or enquiry; or
 - (ii) the appointment by City of any other person to review the progress of or otherwise report to City in respect of the Project, or by any action or omission of such person whether or not such action or omission might give rise to any independent liability of such person to City,

provided always that nothing in this Section 7 shall modify or affect any rights which the Subcontractor might have otherwise had to claim contribution from any other person whether under statute or common law.

- (b) In the event City delivers a Novation Notice, the Subcontractor shall have no greater liability to City or any Substitute than it would have had to Construction Contractor under the Subcontract, and the Subcontractor shall be entitled in any proceedings by City or any Substitute to rely on any liability limitations in the Subcontract.

8. DB CO AND CONSTRUCTION CONTRACTOR AS PARTY

- (a) DB Co acknowledges and agrees that the Construction Contractor shall not be in breach of the Design and Construction Contract by complying with its obligations hereunder.
- (b) Construction Contractor acknowledges and agrees that the Subcontractor shall not be in breach of the Subcontract by complying with its obligations hereunder.

9. ASSIGNMENT

- (a) Construction Contractor shall not, without the prior written consent of City, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Subcontractor's Direct Agreement except to the extent entitled to do so under the Design and Construction Contract.
- (b) City may assign or otherwise dispose of the benefit of the whole or part of this Subcontractor's Direct Agreement to any person to whom City may assign or otherwise dispose of its interest in the Project Agreement pursuant to Section 49.2 of the Project Agreement but only in conjunction therewith, and shall provide written notice to DB Co, the Construction Contractor and the Subcontractor of such assignment or disposition.
- (c) The Construction Contractor shall not, without the prior written consent of City and DB Co, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Subcontractor's Direct Agreement except as may be permitted under the Design and Construction Contract.
- (d) The Subcontractor shall not, without the prior written consent of City and DB Co, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Subcontractor's Direct Agreement except as may be permitted under the Subcontract.

10. NOTICES

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Subcontractor's Direct Agreement shall be in writing (whether or not "written notice" or "notice in writing" is specifically required by the applicable provision of this Subcontractor's Direct Agreement) and served by sending the same by registered mail, facsimile or by hand (in each case, with a copy by electronic submission), as follows:

If to City:

City of Ottawa
110 Laurier Ave West
Ottawa, Ontario K1P 1J1
Mail code: [REDACTED]

Attn.: [REDACTED]
With an electronic copy, for information purposes only, to:
[REDACTED]

If to DB Co:

East West Connectors GP
[REDACTED]

Attn: [REDACTED]

Email: [REDACTED]

with a copy to:

[REDACTED]

Attn.: [REDACTED]

Email: [REDACTED]

If to the Construction Contractor:

[REDACTED]

Attn: [REDACTED]

Email: [REDACTED]

If to the Subcontractor:

[REDACTED]

Attn.: [REDACTED]

Email: [REDACTED]

- (b) Where any notice is provided or submitted to a Party via facsimile, an original of the notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a Party's failure to comply with this Section 10(b).
- (c) Any Party to this Subcontractor's Direct Agreement may, from time to time, change any of its contact information set forth in Section 10(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows the recipient Party's receipt of such notice unless a later effective date is given in such notice.
- (d) Subject to Sections 10(e), 10(f) and 10(g):
 - (i) a notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
 - (ii) a notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
 - (iii) a notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.
- (e) If the Party giving the notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 10.

- (f) If any notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such notice shall be deemed to have been received by such recipient on the next Business Day.
- (g) A notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such notice was successful.

11. AMENDMENTS

- (a) This Subcontractor's Direct Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Subcontractor's Direct Agreement.

12. WAIVER

- (a) No waiver made or given by a Party under or in connection with this Subcontractor's Direct Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

13. RELATIONSHIP BETWEEN THE PARTIES

The Parties are independent contractors. This Subcontractor's Direct Agreement is not intended to and does not create or establish between the Parties any relationship as partners, joint venturers, employer and employee, master and servant, or, except as provided in this Subcontractor's Direct Agreement, of principal and agent.

14. ENTIRE AGREEMENT

Except where provided otherwise in this Subcontractor's Direct Agreement, this Subcontractor's Direct Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Subcontractor's Direct Agreement.

15. SEVERABILITY

Each provision of this Subcontractor's Direct Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Subcontractor's Direct Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed

and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Subcontractor's Direct Agreement. If any such provision of this Subcontractor's Direct Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Subcontractor's Direct Agreement as near as possible to its original intent and effect.

16. ENUREMENT

This Subcontractor's Direct Agreement shall enure to the benefit of, and be binding on, each of the Parties and their respective successors and permitted transferees and assigns.

17. GOVERNING LAW AND JURISDICTION

- (a) This Subcontractor's Direct Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The Parties agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Subcontractor's Direct Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.
- (c) Nothing in this Subcontractor's Direct Agreement affects the rights, protections and immunities of the Crown under the *Proceedings Against the Crown Act* (Ontario).

18. FURTHER ASSURANCE

Each Party shall do all things, from time to time, and execute all further documents necessary to give full effect to this Subcontractor's Direct Agreement.

19. LANGUAGE OF AGREEMENT

Each Party acknowledges having requested and being satisfied that this Subcontractor's Direct Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en déclare satisfaite.

20. COUNTERPARTS

This Subcontractor's Direct Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or electronic form provided that any Party providing its signature in electronic form shall promptly forward to such Party an original signed copy of this Subcontractor's Direct Agreement which was so faxed.

[SIGNATURE PAGES IMMEDIATELY FOLLOW]

IN WITNESS WHEREOF the Parties have executed this Subcontractor's Direct Agreement as of the date first above written.

SCHEDULE 3-2

SUBCONTRACTOR'S DIRECT AGREEMENT

THIS AGREEMENT is made as of the 24th day of April, 2019

BETWEEN:

THE CITY OF OTTAWA

(“City”)

– AND –

EAST WEST CONNECTORS GP, [REDACTED]

(“DB Co”)

– AND –

[REDACTED]

(the “Construction Contractor”)

– AND –

[REDACTED]

(the “Subcontractor”)

WHEREAS:

- A. City and DB Co have entered into the Project Agreement, which requires DB Co to enter into, and to cause the Construction Contractor and the Subcontractor to enter into, this Subcontractor's Direct Agreement with City.
- B. DB Co and the Construction Contractor have entered into the Design and Construction Contract, which requires the Construction Contractor to enter into, and cause the Subcontractor to enter into, this Subcontractor's Direct Agreement with City.

NOW THEREFORE in consideration of the mutual covenants and agreements of the Parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties covenant and agree as follows:

21. DEFINITIONS

In this Schedule 3 – Subcontractor's Direct Agreement, unless the context indicates a contrary intention, terms which are defined in the Project Agreement (and not otherwise defined in this Schedule 3 – Subcontractor's Direct Agreement) shall have meanings given to them in the Project Agreement and the following terms shall have the following meanings:

- (a) “Default Notice” has the meaning given in Section 5(a).

- (b) “**Novation Notice**” has the meaning given in Section 6(b).
- (c) “**Party**” means City, DB Co, the Construction Contractor or the Subcontractor, and “**Parties**” means, collectively, City, DB Co, the Construction Contractor and the Subcontractor.
- (d) “**Subcontract**” means the Nominated Signalling Subcontract.
- (e) “**Substitute**” has the meaning given in Section 6(b).

22. INTERPRETATION

This Subcontractor’s Direct Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings in this Subcontractor’s Direct Agreement are for convenience of reference only, shall not constitute a part of this Subcontractor’s Direct Agreement, and shall not be taken into consideration in the interpretation of, or affect the meaning of, this Subcontractor’s Direct Agreement.
- (b) Unless the context otherwise requires, references to specific Sections, Clauses, Paragraphs, Subparagraphs, and other divisions are references to such Sections, Clauses, Paragraphs, Subparagraphs, or divisions of this Subcontractor’s Direct Agreement and the terms “Section” and “Clause” are used interchangeably and are synonymous.
- (c) Words importing persons or parties are to be broadly interpreted and include an individual, corporation, limited liability company, joint stock company, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.
- (d) Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.
- (e) References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of this Subcontractor’s Direct Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- (f) The words in this Subcontractor’s Direct Agreement shall bear their natural meaning.
- (g) References containing terms such as:
 - (i) “hereof”, “herein”, “hereto”, “hereinafter”, and other terms of like import are not limited in applicability to the specific provision within which such references are set forth but instead refer to this Subcontractor’s Direct Agreement taken as a whole; and

- (ii) “includes” and “including”, whether or not used with the words “without limitation” or “but not limited to”, shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean “includes without limitation” and “including without limitation”.
- (h) In construing this Subcontractor’s Direct Agreement, the rule known as the *ejusdem generis rule* shall not apply nor shall any similar rule or approach to the construction of this Subcontractor’s Direct Agreement and, accordingly, general words introduced or followed by the word “other” or “including” or “in particular” shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (i) Where this Subcontractor’s Direct Agreement states that an obligation shall be performed “no later than” or “within” or “by” a stipulated date or event which is a prescribed number of days after a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (j) Where this Subcontractor’s Direct Agreement states that an obligation shall be performed “on” a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (k) Any reference to time of day or date means the local time or date in Toronto, Ontario.
- (l) Unless otherwise indicated, time periods will be strictly construed.
- (m) Whenever the terms “will” or “shall” are used in this Subcontractor’s Direct Agreement they shall be construed and interpreted as synonymous and to read “shall”.

23. CONFLICT IN DOCUMENTS

- (a) In the event of ambiguities, conflicts or inconsistencies between or among this Subcontractor’s Direct Agreement, the Construction Contractor’s Direct Agreement, the Project Agreement and the Design and Construction Contract, this Subcontractor’s Direct Agreement shall prevail.
- (b) In the event of ambiguities, conflicts or inconsistencies between or among this Subcontractor’s Direct Agreement and the Lenders’ Direct Agreement, the Lenders’ Direct Agreement shall prevail.

24. AGREEMENTS

- (a) If the Subcontractor gives the Construction Contractor any notice of any default(s) under the Subcontract that may give the Subcontractor a right to terminate the Subcontract or to treat it as having been repudiated by the Construction Contractor or to discontinue the Subcontractor’s performance thereunder, then the Subcontractor shall concurrently provide DB Co and City with a copy of such notice, an executed copy of the Subcontract and set out in reasonable detail the default(s).

25. NO TERMINATION BY SUBCONTRACTOR WITHOUT DEFAULT NOTICE

The Subcontractor shall not exercise any right it may have to terminate the Subcontract or to treat it as having been repudiated by the Construction Contractor or to discontinue the Subcontractor's performance thereunder unless:

- (a) the Subcontractor first delivers an executed copy of the Subcontract and a written notice (a "Default Notice") to City setting out in reasonable detail the default(s) on which the Subcontractor intends to rely in terminating the Subcontract or to treat it as having been repudiated by the Construction Contractor or to discontinue the Subcontractor's performance thereunder; and
- (b) within a period of 5 Business Days of City receiving the Default Notice the default(s) on which the Subcontractor intends to rely in terminating the Subcontract or to treat it as having been repudiated by the Construction Contractor or to discontinue the Subcontractor's performance thereunder have not been remedied; and provided that if, within such period of 5 Business Days, City agrees to pay the Subcontractor's reasonable costs of continued performance, such period of 5 Business Days shall be extended to 45 days.

26. NOVATION OF THE SUBCONTRACT

- (a) The Subcontractor acknowledges and agrees that where the Design and Construction Contract has been terminated:
 - (i) by DB Co;
 - (ii) as a result of the termination of the Project Agreement; or
 - (iii) due to the insolvency of the Construction Contractor,

the Subcontract shall not terminate solely by reason of the termination of the Design and Construction Contract unless City shall have failed to request a novation of the Subcontract pursuant to Section 6(b) within 20 days following the date of such termination.

- (b) City may at any time, if the Project Agreement and the Design and Construction Contract have been terminated, deliver a notice (a "**Novation Notice**") electing to novate the Subcontract either to City or a third party designated by City in the Novation Notice (the "**Substitute**"), provided that City can demonstrate to the Subcontractor, acting reasonably, that the Substitute shall have sufficient financial resources, or shall be supported by a satisfactory guarantee, to carry out the obligations of the Substitute under the Subcontract.
- (c) Subject to Section 6(d), upon receipt by the Subcontractor of a Novation Notice:
 - (i) the Construction Contractor and the Subcontractor will be deemed to be released from their existing and future obligations under the Subcontract to each other (except with respect to any and all indemnities from the Construction Contractor or the Subcontractor to the other in respect of the period prior to the receipt of the Novation Notice), and City or the Substitute, as applicable, and the Subcontractor

will be deemed to assume those same existing and future obligations towards each other (except in respect of the aforesaid indemnities);

- (ii) the existing and future rights of the Construction Contractor against the Subcontractor under the Subcontract and vice versa will be deemed to be cancelled (except with respect to any and all indemnities from the Construction Contractor or the Subcontractor to the other in respect of the period prior to the receipt of the Novation Notice), and City or the Substitute, as applicable, and the Subcontractor will be deemed to acquire those same existing and future rights against each other (except in respect of the aforesaid indemnities), subject to any applicable credit from the Subcontractor to City if City pays for the Subcontractor's reasonable costs of continued performance pursuant to Section 5;
 - (iii) any guarantee, bond or covenant in favour of the Construction Contractor from any third party in respect of any term, provision, condition, obligation, undertaking or agreement on the part of the Subcontractor to be performed, observed or carried out by the Subcontractor as contained in, referred to, or inferred from the Subcontract shall be assigned, novated or granted, as required by City or the Substitute, as applicable, each acting reasonably, to City or the Substitute, as applicable, and the Subcontractor shall cause such assignment, novation or grant on substantially the same terms and conditions as the original guarantee, bond or covenant, provided, however, that where Construction Contractor shall continue to hold, or shall continue to be entitled to or have rights under, such guarantee, bond or covenant as security for any obligations of the Subcontractor, the assignment, novation or grant of the guarantee, bond or covenant to the extent of any such obligations to Construction Contractor shall be conditional on the satisfaction of those obligations to Construction Contractor; and
 - (iv) at City's request, the Subcontractor shall enter into, and shall cause any guarantor, covenantor or surety under any guarantee, bond or covenant referred to in Section 6(c)(iii) to enter into, and City shall or shall cause the Substitute to enter into, as applicable, all such agreements or other documents as reasonably necessary to give effect to the foregoing, including, without limitation, an agreement between City or the Substitute, as applicable, and the Subcontractor, acceptable to City and the Subcontractor, each acting reasonably, on substantially the same terms as the Subcontract.
- (d) The Construction Contractor shall, at its own cost, cooperate fully with City and the Substitute in order to achieve a smooth transfer of the Subcontract to City or the Substitute, as applicable, and to avoid or mitigate in so far as reasonably practicable any inconvenience, including the administration of the Subcontract, ongoing supervisory activities and scheduling.
- (e) The rights granted by Section 6(b) shall be of no force or effect if, at any time the Subcontractor receives a Novation Notice, the Subcontractor has already received notice in writing from another entity entitled to the benefit of step-in rights relating to the Subcontract that it is or has validly exercised those step-in rights. If the Subcontractor receives any such notice on the same day as a Novation Notice, the Novation Notice shall be effective, except where the other notice is given by the Lenders, in which case such other notice and not the Novation Notice shall be effective.

- (f) If City gives a Novation Notice within the time provided hereunder at any time after the Subcontractor has terminated the Subcontract or treated it as having been repudiated by Construction Contractor or discontinued the Subcontractor's performance thereunder in accordance with the terms of this Subcontractor's Direct Agreement, the Subcontractor agrees that the Subcontract shall be reinstated and deemed to have continued despite any termination or treatment as having been repudiated, and City shall pay the Subcontractor's reasonable costs for re-commencing the obligations it has under the Subcontract and the Subcontractor shall be entitled to reasonable compensation and/or relief for re-commencing such obligations, having regard to the additional costs and delays incurred as a result of having terminated the Subcontract or having treated it as being repudiated by Construction Contractor or having discontinued its performance thereunder.
- (g) The Subcontractor acknowledges that if City novates the Subcontract to itself pursuant to Section 6(b), City shall have the right to further novate the Subcontract to a Substitute in accordance with and otherwise on, and subject to, the terms and conditions of this Subcontractor's Direct Agreement.

27. SUBCONTRACTOR LIABILITY

- (a) The liability of the Subcontractor hereunder shall not be modified, released, diminished or in any way affected by:
 - (i) any independent inspection, investigation or enquiry into any matter which may be made or carried out by or for City, or by any failure or omission to carry out any such inspection, investigation or enquiry; or
 - (ii) the appointment by City of any other person to review the progress of or otherwise report to City in respect of the Project, or by any action or omission of such person whether or not such action or omission might give rise to any independent liability of such person to City,

provided always that nothing in this Section 7 shall modify or affect any rights which the Subcontractor might have otherwise had to claim contribution from any other person whether under statute or common law.

- (b) In the event City delivers a Novation Notice, the Subcontractor shall have no greater liability to City or any Substitute than it would have had to Construction Contractor under the Subcontract, and the Subcontractor shall be entitled in any proceedings by City or any Substitute to rely on any liability limitations in the Subcontract.

28. DB CO AND CONSTRUCTION CONTRACTOR AS PARTY

- (a) DB Co acknowledges and agrees that the Construction Contractor shall not be in breach of the Design and Construction Contract by complying with its obligations hereunder.
- (b) Construction Contractor acknowledges and agrees that the Subcontractor shall not be in breach of the Subcontract by complying with its obligations hereunder.

29. ASSIGNMENT

- (a) Construction Contractor shall not, without the prior written consent of City, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Subcontractor's Direct Agreement except to the extent entitled to do so under the Design and Construction Contract.
- (b) City may assign or otherwise dispose of the benefit of the whole or part of this Subcontractor's Direct Agreement to any person to whom City may assign or otherwise dispose of its interest in the Project Agreement pursuant to Section 49.2 of the Project Agreement but only in conjunction therewith, and shall provide written notice to DB Co, the Construction Contractor and the Subcontractor of such assignment or disposition.
- (c) The Construction Contractor shall not, without the prior written consent of City and DB Co, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Subcontractor's Direct Agreement except as may be permitted under the Design and Construction Contract.
- (d) The Subcontractor shall not, without the prior written consent of City and DB Co, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Subcontractor's Direct Agreement except as may be permitted under the Subcontract.

30. NOTICES

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Subcontractor's Direct Agreement shall be in writing (whether or not "written notice" or "notice in writing" is specifically required by the applicable provision of this Subcontractor's Direct Agreement) and served by sending the same by registered mail, facsimile or by hand (in each case, with a copy by electronic submission), as follows:

If to City:

City of Ottawa
110 Laurier Ave West
Ottawa, Ontario K1P 1J1
Mail code: [REDACTED]

Attn.: [REDACTED]

Email: [REDACTED]

- (b) Where any notice is provided or submitted to a Party via facsimile, an original of the notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a Party's failure to comply with this Section 10(b).
- (c) Any Party to this Subcontractor's Direct Agreement may, from time to time, change any of its contact information set forth in Section 10(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows the recipient Party's receipt of such notice unless a later effective date is given in such notice.
- (d) Subject to Sections 10(e), 10(f) and 10(g):
 - (iv) a notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
 - (v) a notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
 - (vi) a notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.
- (e) If the Party giving the notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 10.

- (f) If any notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such notice shall be deemed to have been received by such recipient on the next Business Day.
- (g) A notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such notice was successful.

31. AMENDMENTS

- (a) This Subcontractor's Direct Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Subcontractor's Direct Agreement.

32. WAIVER

- (a) No waiver made or given by a Party under or in connection with this Subcontractor's Direct Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

33. RELATIONSHIP BETWEEN THE PARTIES

The Parties are independent contractors. This Subcontractor's Direct Agreement is not intended to and does not create or establish between the Parties any relationship as partners, joint venturers, employer and employee, master and servant, or, except as provided in this Subcontractor's Direct Agreement, of principal and agent.

34. ENTIRE AGREEMENT

Except where provided otherwise in this Subcontractor's Direct Agreement, this Subcontractor's Direct Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Subcontractor's Direct Agreement.

35. SEVERABILITY

Each provision of this Subcontractor's Direct Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Subcontractor's Direct Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed

and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Subcontractor's Direct Agreement. If any such provision of this Subcontractor's Direct Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Subcontractor's Direct Agreement as near as possible to its original intent and effect.

36. ENUREMENT

This Subcontractor's Direct Agreement shall enure to the benefit of, and be binding on, each of the Parties and their respective successors and permitted transferees and assigns.

37. GOVERNING LAW AND JURISDICTION

- (a) This Subcontractor's Direct Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The Parties agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Subcontractor's Direct Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.
- (c) Nothing in this Subcontractor's Direct Agreement affects the rights, protections and immunities of the Crown under the *Proceedings Against the Crown Act* (Ontario).

38. FURTHER ASSURANCE

Each Party shall do all things, from time to time, and execute all further documents necessary to give full effect to this Subcontractor's Direct Agreement.

39. LANGUAGE OF AGREEMENT

Each Party acknowledges having requested and being satisfied that this Subcontractor's Direct Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en déclare satisfaite.

40. COUNTERPARTS

This Subcontractor's Direct Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or electronic form provided that any Party providing its signature in electronic form shall promptly forward to such Party an original signed copy of this Subcontractor's Direct Agreement which was so faxed.

[SIGNATURE PAGES IMMEDIATELY FOLLOW]

IN WITNESS WHEREOF the Parties have executed this Subcontractor's Direct Agreement as of the date first above written.

SCHEDULE 4

LENDERS' DIRECT AGREEMENT

THIS LENDERS' DIRECT AGREEMENT is made as of the 24th day of April, 2019.

BETWEEN:

THE CITY OF OTTAWA (“City”)

AND:

[REDACTED]

(the “**Lenders’ Agent**”)

AND:

EAST WEST CONNECTORS GP [REDACTED]

(“**DB Co**”)

WHEREAS:

- A. City and DB Co have entered into the Project Agreement.
- B. Under the Lending Agreements, the Financing is to be provided to DB Co by the Lenders to partially finance the Works under the Project Agreement, conditional, among other things, on DB Co executing and delivering the Lending Agreements.
- C. The Lenders’ Agent has agreed to enter into this Lenders’ Direct Agreement with City and DB Co in relation to the Lending Agreements, the exercise of its rights under the Lending Agreements and the remedying of breaches by DB Co under the Project Agreement.
- D. With a view to ensuring that City is able to properly and effectively discharge its duties, functions and responsibilities under Applicable Law, DB Co, the Lenders’ Agent and the Lenders commit to working collaboratively, responsibly and cooperatively with City throughout the duration of the Project Agreement.

NOW THEREFORE in consideration of the mutual covenants and agreements of the Parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties covenant and agree as follows:

1 DEFINITIONS AND INTERPRETATION

- 1.1** In this Schedule 4 - Lenders’ Direct Agreement, all capitalized terms not otherwise defined in this Schedule 4 - Lenders’ Direct Agreement shall have the meanings ascribed to them in the Project Agreement and unless the context otherwise requires:

- (a) **“Appointed Representative”** means any of the following to the extent so identified in an Appointed Representative Notice:
 - (i) the Lenders’ Agent, the Lenders or any Affiliate of either of them;
 - (ii) a receiver or receiver and manager or any permutation thereof of DB Co appointed under the Security Documents;
 - (iii) a trustee in bankruptcy or court appointed receiver of DB Co;
 - (iv) an administrator of DB Co;
 - (v) a person directly or indirectly owned or controlled by the Lenders’ Agent or the Lenders; or
 - (vi) any other person approved by City (such approval not to be unreasonably withheld or delayed).
- (b) **“Appointed Representative Notice”** has the meaning given in Section 8(b).
- (c) **“City Project Documents”** means the Project Agreement and all other documents to which both the City and DB Co are parties pursuant to or in connection with the Project Agreement.
- (d) **“Default Notice”** has the meaning given in Section 7(b)(i).
- (e) **“Enforcement Action”** means any acceleration of amounts due and owing to the Lenders under any of the Lending Agreements and/or any enforcement proceeding or enforcement action commenced or taken under any of the Security Documents.
- (f) **“Enforcement Event”** means an event of default as defined in the Lending Agreements, or any other event which permits an Enforcement Action.
- (g) **“Exercise Date”** has the meaning given in Section 12(b).
- (h) **“Indebtedness Notice”** has the meaning given in Section 7(b)(ii).
- (i) **“Lender Representative”** means a representative (which may be the Lenders’ Agent) acting as agent or trustee for and on behalf of all of the lenders lending to a Suitable Substitute.
- (j) **“Lenders’ Agent”** means [REDACTED] acting as agent for and on behalf of the Lenders.
- (k) **“Lenders’ Construction Contractor Direct Agreement”** means the direct agreement among the Lenders’ Agent, the Construction Contractor and DB Co.
- (l) **“Lenders’ Direct Agreement”** means this lenders’ direct agreement.

- (m) “**Notice Period**” means the period starting on the date of delivery of a Default Notice and ending 120 days later.
- (n) “**Novation Date**” has the meaning given in Section 10(a).
- (o) “**Novation Notice**” has the meaning given in Section 10(a).
- (p) “**Party**” means the City, DB Co or the Lenders’ Agent, and “**Parties**” means collectively, the City, DB Co and the Lenders’ Agent.
- (q) “**Security**” means the Insurance and any other security interests granted to the Lenders’ Agent pursuant to the Security Documents.
- (r) “**Security Documents**” means all security granted by DB Co to the Lenders (or any trustee or agent thereof, including the Lenders’ Agent) pursuant to or in connection with the Lending Agreements, including but not limited to:
 - (i) the Lenders’ Construction Contractor Direct Agreement;
 - (ii) general security agreement between DB Co, [REDACTED] and the Lenders’ Agent dated the date of the Project Agreement;
 - (iii) limited recourse guarantee and pledge between [REDACTED] and the Lenders’ Agent dated the date of the Project Agreement;
 - (iv) limited recourse guarantee and pledge between [REDACTED] and the Lenders’ Agent dated the date of the Project Agreement;
 - (v) limited recourse guarantee and pledge between [REDACTED] and the Lenders’ Agent dated the date of the Project Agreement;
 - (vi) limited recourse guarantee and pledge between [REDACTED] and the Lenders’ Agent dated the date of the Project Agreement;
 - (vii) general blocked account agreement between DB Co, the Lenders’ Agent and [REDACTED] dated the date of the Project Agreement;
 - (viii) springing blocked account agreement between DB Co, the Lenders’ Agent and [REDACTED], dated the date of the Project Agreement;
 - (ix) Performance Guarantee of Construction Guarantor entered into by the Construction Guarantor in favour of DB Co dated the date of the Project Agreement; and
 - (x) assignment of insurances by DB Co, subject to the terms of the Insurance Trust Agreement.
- (s) “**Step-In Date**” means the date on which the City receives a Step-In Notice from the Lenders’ Agent.

- (t) **“Step-In Notice”** means the notice given by the Lenders’ Agent to the City pursuant to Section 8(a) stating that the Lenders’ Agent is exercising its step-in rights under this Lenders’ Direct Agreement.
- (u) **“Step-In Period”** means the period from the Step-In Date up to and including the earlier of:
 - (i) the Step-Out Date;
 - (ii) the Termination Date (provided that the City has complied with its obligations in Section 7 of this Lenders’ Direct Agreement);
 - (iii) the date that a transfer of DB Co’s rights and obligations under the City Project Documents to a Suitable Substitute pursuant to Section 10 becomes effective; and
 - (iv) if the Step-In Date occurs prior to the latest Substantial Completion Date, the earlier of:
 - (A) the date falling 180 days after the Longstop Date; or
 - (B) the date falling 2 years after the Step-In Date.
- (v) **“Step-Out Date”** means the date falling 30 days after the date on which the City receives a Step-Out Notice.
- (w) **“Step-Out Notice”** has the meaning given in Section 9(a).
- (x) **“Subsequent Indebtedness Notice”** has the meaning given in Section 7(c).
- (y) **“Suitable Substitute”** means a person, approved in writing by the City in accordance with Sections 10(b) and 10(c), which:
 - (i) has the legal capacity, power and authority to become a party to and perform the obligations of DB Co under the City Project Documents; and
 - (ii) employs individuals having the appropriate qualifications, experience and technical competence, and having the resources available to it (including committed financial resources and subcontracts) that are sufficient to enable it to perform the obligations of DB Co under the City Project Documents.

2 INTERPRETATION

This Lenders’ Direct Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings in this Lenders’ Direct Agreement are for convenience of reference only, shall not constitute a part of this Lenders’ Direct Agreement, and shall not be taken into

consideration in the interpretation of, or affect the meaning of, this Lenders' Direct Agreement.

- (b) Unless the context otherwise requires, references to specific Sections, Clauses, Paragraphs, Subparagraphs, and other divisions are references to such Sections, Clauses, Paragraphs, Subparagraphs, or divisions of this Lenders' Direct Agreement and the terms "Section" and "Clause" are used interchangeably and are synonymous.
- (c) Words importing persons or parties are to be broadly interpreted and include an individual, corporation, limited liability company, joint stock company, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.
- (d) Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.
- (e) References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of this Lenders' Direct Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- (f) The words in this Lenders' Direct Agreement shall bear their natural meaning.
- (g) References containing terms such as:
 - (i) "hereof", "herein", "hereto", "hereinafter", and other terms of like import are not limited in applicability to the specific provision within which such references are set forth but instead refer to this Lenders' Direct Agreement taken as a whole; and
 - (ii) "includes" and "including", whether or not used with the words "without limitation" or "but not limited to", shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean "includes without limitation" and "including without limitation".
- (h) In construing this Lenders' Direct Agreement, the rule known as the *ejusdem generis rule* shall not apply nor shall any similar rule or approach to the construction of this Lenders' Direct Agreement and, accordingly, general words introduced or followed by the word "other" or "including" or "in particular" shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (i) Where this Lenders' Direct Agreement states that an obligation shall be performed "no later than" or "within" or "by" a stipulated date or event which is a prescribed number of days after a stipulated date or event, the latest time for performance shall be 5:00 p.m. on

the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.

- (j) Where this Lenders' Direct Agreement states that an obligation shall be performed "on" a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (k) Any reference to time of day or date means the local time or date in Ottawa, Ontario.
- (l) Unless otherwise indicated, time periods will be strictly construed.
- (m) Whenever the terms "will" or "shall" are used in this Lenders' Direct Agreement they shall be construed and interpreted as synonymous and to read "shall".

3 CONFLICT OF DOCUMENTS

In the event of any ambiguity, conflict or inconsistency between the provisions of this Lenders' Direct Agreement, the Project Agreement and the Construction Contractor's Direct Agreement, the provisions of this Lenders' Direct Agreement shall prevail and govern to the extent of such ambiguity, conflict or inconsistency.

4 TERM

- (a) This Lenders' Direct Agreement shall terminate automatically on the earliest of:
 - (i) the date on which all amounts which may be or become owing to the Lenders under the Lending Agreements have been irrevocably paid in full;
 - (ii) the Termination Date (provided that the City has complied with its obligations in Section 7 of this Lenders' Direct Agreement); and
 - (iii) the date that any transfer of DB Co's rights and obligations under the City Project Documents to a Suitable Substitute pursuant to Section 10 becomes effective and the agreements contemplated in Section 10(e)(iii) are executed and delivered by the parties thereto.
- (b) Within 30 days following its occurrence, the Lenders' Agent shall provide notice to the City of the date referred to in Section 4(a)(i).

5 AGREEMENTS AND SECURITY

- (a) DB Co and the Lenders' Agent shall not amend or modify the Lending Agreements, or any of them, except where DB Co is permitted to do so pursuant to Section 8.3 of the Project Agreement.
- (b) DB Co shall not, prior to the latest Substantial Completion Date, exercise any rights of voluntary prepayment, voluntary redemption, or other voluntary repayment of loan, as applicable, under the Lending Agreements without the prior written consent of the City, acting in its sole discretion. In exercising its sole discretion to grant consent, the City

shall be entitled to request and consider, and DB Co shall be required to provide within 10 Business Days following a request by the City, amongst other things and not limited to, the following:

- (i) written certification by an officer of DB Co of the remaining Project Costs (as defined in the Lending Agreements) accrued and unpaid or expected to be incurred to achieve all remaining Substantial Completions and to fund any Project Accounts (as defined in the Lending Agreements) then not funded and required to be funded at or prior to the then anticipated prepayment and/or redemption (as approved by [REDACTED] (as defined in the Lending Agreements)) by the latest Substantial Completion Date;
 - (ii) written certification by an officer of DB Co that no Funding Shortfall (as defined in the Lending Agreements) would reasonably be expected to arise as a consequence of such prepayment and/or redemption, including any related cancellation of unutilized commitments, if applicable, under the Lending Agreements;
 - (iii) written confirmation from the Lenders' Consultant, addressed to the City, that the DB Co's calculation in Section 5(b)(i) and DB Co's certification in Section 5(b)(ii) is, in the opinion of the Lenders' Consultant, correct;
 - (iv) written confirmation from the Lenders' Consultant, addressed to the City, that no incremental delay in achieving the any Substantial Completion Date (beyond the applicable Scheduled Substantial Completion Date) would reasonably be expected as a consequence of such prepayment and/or redemption and related cancellation of unutilized commitments, if applicable, under the Lending Agreements; and
 - (v) written confirmation from the Lenders' Consultant, addressed to the City, that the remaining Substantial Completion Dates are likely to occur on or prior to the then Scheduled Substantial Completion Dates.
- (c) DB Co and the City shall not amend or modify the City Project Documents (other than in accordance with the terms of those agreements) without the prior written consent of the Lenders' Agent, not to be unreasonably withheld or delayed, which consent shall not be withheld if the relevant amendment or modification shall not (i) materially adversely affect the ability of the Lenders to exercise their rights under the Security, (ii) materially adversely affect the value of the Security, or (iii) increase the liability of the Lenders or DB Co under the relevant agreement. The Lenders' Agent shall respond to any request for consent under this Section 5(c) within 30 days following receipt thereof.
- (d) DB Co acknowledges and consents to the arrangements set out in this Lenders' Direct Agreement, and agrees not to do or omit to do anything that may prevent any other Party from enforcing its rights under this Lenders' Direct Agreement.
- (e) The Lenders' Agent acknowledges having received a copy of the Project Agreement.

- (f) The City acknowledges having received copies of the Lending Agreements, and confirm that they are in form and substance satisfactory to the City as at the date of Financial Close.
- (g) The City acknowledges notice of and consents to the Security, and confirm that they have not received notice of any other security interest granted over DB Co's rights under any of the City Project Documents.
- (h) DB Co and the City agree that upon the occurrence of an Enforcement Event, if so directed in writing by the Lenders' Agent upon giving reasonable notice, the City shall pay any sum which they are obliged to pay to DB Co under the Project Agreement to a bank account specified by the Lenders' Agent.
- (i) Prior to the irrevocable payment in full of all amounts owing to the Lenders under the Lending Agreements, the City shall not take any action to wind-up, liquidate, dissolve or appoint a receiver or receiver and manager of DB Co or to institute or sanction a voluntary arrangement or any other bankruptcy or insolvency proceedings in relation to DB Co.
- (j) The Lenders' Agent shall cause the Lenders' Consultant to provide the City with a copy of any written assessment or report prepared by the Lenders' Consultant in relation to the status or progress of the Works under the Design and Construction Contract, including but not limited to, any certificate of payment, concurrently with its delivery to the Lenders' Agent. The Lenders' Agent acknowledges and agrees that this Section 5(j) shall constitute sufficient authority for the Lenders' Consultant to provide, without delay, a copy of any and all of its written assessments and reports to the City.
- (k) The City shall provide the Lenders' Agent with copies of any notice of default given to DB Co under the Project Agreement at the same time such notice is given to DB Co.

6 ENFORCEMENT OF SECURITY BY LENDERS' AGENT

- (a) The Lenders' Agent shall promptly notify the City of any Enforcement Event, any Enforcement Action, any notice from the Lenders to DB Co to accelerate the maturity of any amounts owing by DB Co to the Lenders under the Lending Agreements or any notice from the Lenders to DB Co to demand repayment of any amounts owing by DB Co to the Lenders under the Lending Agreements.
- (b) The Lenders' Agent may assign, transfer or otherwise dispose of any right, title or interest it may have in, or rights or obligations it may have pursuant to, the Security Documents to a successor agent in accordance with the terms of the Lending Agreements except where:
 - (i) such assignment, transfer or other disposition would constitute a Refinancing and the provisions of Schedule 28 - Refinancing to the Project Agreement have not been complied with in connection therewith; or
 - (ii) the person to whom such assignment, transfer or other disposition is to be made, or an Affiliate of such person, is a Restricted Person or a person whose standing

or activities may compromise (i) the City's reputation or integrity, or (ii) the nature of the public transit system in the City of Ottawa or the Province of Ontario so as to affect public confidence in the public transit system in the City of Ottawa, the Province of Ontario or the Project.

- (c) Any Lender may assign, transfer or otherwise dispose of any right, title or interest it may have in, or rights or obligations it may have pursuant to, the Lending Agreements in accordance with the terms of the Lending Agreements.

7 TERMINATION OF PROJECT AGREEMENT BY THE CITY

- (a) Subject only to the rights expressly afforded to the Lenders' Agent pursuant to, and the restrictions set forth in, this Section 7, the City may, at any time, serve notice terminating the Project Agreement if it is entitled to do so under the terms of the Project Agreement.
- (b) At any time other than during the Step-In Period (with the restriction on termination during the Step-In Period set out in Section 7(d)), the City shall not exercise any right it may have to terminate or serve notice terminating the Project Agreement for a DB Co Event of Default unless:
 - (i) the City promptly delivers written notice (a **"Default Notice"**) to the Lenders' Agent setting out the DB Co Event of Default in reasonable detail;
 - (ii) not later than 30 days after the date of a Default Notice, the City delivers written notice (an **"Indebtedness Notice"**) to the Lenders' Agent setting out:
 - (A) all amounts owed by DB Co to the City and any other existing liabilities and unperformed obligations of DB Co to the City of which the City is aware (having made reasonable enquiry), in each case, as of the date on which the City sent the Default Notice; and
 - (B) all amounts which will become owing by DB Co to the City and any other liabilities and obligations of DB Co to the City of which the City is aware (having made reasonable enquiry), in each case, on or before the end of the Notice Period; and
 - (iii) the Notice Period has expired and the Lenders' Agent has not delivered a Step-In Notice.
- (c) At any time after the City sends an Indebtedness Notice but before the City receives a Step-In Notice, if the City discovers amounts that have become owing by DB Co to the City or any other liabilities or obligations of DB Co to the City that have come due but which were not included in the Indebtedness Notice, the City shall deliver written notice (a **"Subsequent Indebtedness Notice"**) to the Lenders' Agent setting out those amounts, liabilities or obligations.
- (d) During the Step-In Period, the City shall not terminate the Project Agreement on grounds:

- (i) that the Lenders' Agent has served a Step-In Notice or enforced any Security Document; or
 - (ii) arising prior to the Step-In Date of which the City was aware (having made due inquiry) and whether or not continuing at the Step-In Date unless:
 - (A) the grounds arose prior to the latest Substantial Completion Date, and the latest Substantial Completion Date does not occur on or before the date falling 180 days after the Longstop Date; or
 - (B) the grounds (whenever they first arose) did not give rise to any right to terminate the Project Agreement until after the Step-In Date; or
 - (iii) arising solely in relation to DB Co.
- (e) The City shall be entitled to terminate the Project Agreement by written notice to DB Co and the Appointed Representative:
- (i) if any amount referred to in Section 7(b)(ii)(A) has not been paid to the City on or before the Step-In Date;
 - (ii) if any amount referred to in Section 7(b)(ii)(B) has not been paid on or before the last day of the Notice Period;
 - (iii) if amounts included in a Subsequent Indebtedness Notice have not been paid on or before the date falling 30 days after the date on which the Subsequent Indebtedness Notice is delivered to the Lenders' Agent; or
 - (iv) on grounds arising after the Step-In Date in accordance with the terms of the Project Agreement.

8 STEP-IN RIGHTS

- (a) Subject to Section 8(b) and without prejudice to rights of the Lenders' Agent to enforce the Security, the Lenders' Agent may give the City a Step-In Notice at any time:
- (i) during which a DB Co Event of Default is subsisting (whether or not a Default Notice has been served); or
 - (ii) during the Notice Period;
 - (iii) during which an Enforcement Event is subsisting.
- (b) At least 5 Business Days before the Lenders' Agent delivers a Step-In Notice, the Lenders' Agent shall deliver written notice (an "**Appointed Representative Notice**") to the City of:
- (i) its intention to deliver a Step-In Notice; and

- (ii) the identity of its proposed Appointed Representative.
- (c) Upon issuance of a Step-In Notice, the Appointed Representative shall assume, jointly with DB Co, all of DB Co's rights under the City Project Documents.
- (d) During the Step-In Period, the City shall deal with the Appointed Representative instead of DB Co in connection with all matters related to the City Project Documents. DB Co agrees to be bound by all such dealings between the City and the Appointed Representative to the same extent as if they had been between the City and DB Co.

9 STEP-OUT RIGHTS

- (a) The Appointed Representative may, at any time during the Step-In Period, deliver written notice (a "**Step-Out Notice**") to the City to terminate the Step-In Period on the Step-Out Date.
- (b) On expiry of the Step-In Period:
 - (i) the rights and obligations of the Appointed Representative in relation to the City under the City Project Documents arising prior to the expiry of the Step-In Period will be assumed by DB Co to the exclusion of the Appointed Representative;
 - (ii) the City will no longer deal with the Appointed Representative and will deal with DB Co in connection with all matters related to the City Project Documents; and
 - (iii) the Appointed Representative and the City shall be and hereby are released from all obligations and liabilities to one another under the City Project Documents.
- (c) There will not be more than one Step-In Period in respect of any one Default Notice.

10 NOVATION TO SUITABLE SUBSTITUTE

- (a) Subject to Section 10(b), at any time:
 - (i) after an Enforcement Event has occurred;
 - (ii) during the Notice Period; or
 - (iii) during the Step-In Period,

the Lenders' Agent may deliver to the City and any Appointed Representative written notice (a "**Novation Notice**") that it wishes to transfer DB Co's rights and obligations under the City Project Documents to a proposed transferee, together with all information reasonably necessary for the City to decide whether the proposed transferee is a Suitable Substitute. The Novation Notice shall specify a Business Day not less than 30 days from the date on which the City receives the Novation Notice ("**Novation Date**") for the transfer of DB Co's rights and obligations under the City Project Documents to the proposed transferee in accordance with the provisions of Section 10(e).

- (b) The City shall promptly notify the Lenders' Agent of any additional information it requires in order to assess whether the proposed transferee is a Suitable Substitute. The City shall notify the Lenders' Agent, in writing, as to whether the person to whom the Lenders' Agent proposes to transfer DB Co's rights and liabilities under the City Project Documents is approved by the City as a Suitable Substitute, on or before the date falling 30 days after the later of the date of receipt by the City of the Novation Notice and the date of receipt of any additional information requested by the City. For greater certainty, if the City fails to respond within such period, the City shall be deemed not to have approved the proposed transferee.
- (c) The City shall not unreasonably withhold or delay its approval of a proposed transferee as a Suitable Substitute, but it shall, without limitation, be reasonable for the City to withhold its approval if:
 - (i) there are unremedied breaches under the Project Agreement which are capable of being remedied by the Appointed Representative or the Suitable Substitute and there is no rectification plan acceptable to the City, acting reasonably, in respect of such breaches;
 - (ii) the proposed transferee is a Restricted Person or other person who is not permitted to be a DB Co Party pursuant to the Project Agreement; or
 - (iii) the proposed security interests to be granted by the Suitable Substitute to the Lender Representative are materially different from the Security, materially adversely affect the ability of the Suitable Substitute to perform under the City Project Documents or have the effect of increasing any liability of the City, whether actual or potential.
- (d) If the City withholds its approval of a proposed transferee as a Suitable Substitute in accordance with Section 10(c), the Lenders' Agent may give one or more subsequent Novation Notices pursuant to the provisions of Section 10(a) containing changed particulars relating to the same proposed transferee or particulars relating to another proposed transferee which the Lenders' Agent has good cause to believe will be acceptable to the City, acting reasonably, provided that only one Novation Notice may be outstanding at any one time.
- (e) On the Novation Date:
 - (i) DB Co and the City will be released from their obligations under the City Project Documents to each other, and the Suitable Substitute and the City will assume those same obligations towards each other;
 - (ii) each of the rights of DB Co against the City under the City Project Documents and the rights of the City against DB Co under the City Project Documents will be cancelled, and the Suitable Substitute and the City will acquire those same rights against each other;
 - (iii) the Parties will enter into, and the Lenders' Agent shall cause the Suitable Substitute and the Lender Representative to enter into, all such agreements or

other documents as are reasonably necessary to give effect to the foregoing, including:

- (A) an agreement between the City and the Suitable Substitute, on substantially the same terms as the Project Agreement; and
 - (B) an agreement among the City, the Suitable Substitute and the Lender Representative on substantially the same terms as this Lenders' Direct Agreement;
- (iv) any subsisting ground for termination by the City of the Project Agreement will be deemed to have no effect and any subsisting Default Notice will be automatically revoked.

11 TRANSFERS

The City shall, at DB Co's cost and expense, take whatever action the Lenders' Agent, the Appointed Representative or a Suitable Substitute may reasonably require for perfecting any assumption or transfer of or release pursuant to Sections 8, 9 or 10, including the execution of any transfer or assignment, and the giving of any notice, order or direction and the making of any registration which, in each case, the Lenders' Agent, the Appointed Representative or the Suitable Substitute reasonably requires.

12 CONSTRUCTION CONTRACTOR'S DIRECT AGREEMENT

- (a) Notwithstanding any provision in the Construction Contractor's Direct Agreement, the City hereby undertakes that it will not exercise any rights they may have under or arising out of any of the Construction Contractor's Direct Agreement, except as provided in Sections 12(b) to 12(f) inclusive.
- (b) Following termination of the Project Agreement (other than as a result of a novation pursuant to this Lenders' Direct Agreement) in accordance with this Lenders' Direct Agreement, the City shall from such date (the "**Exercise Date**") be entitled to exercise its rights under the Construction Contractor's Direct Agreement to step in to and/or novate the Design and Construction Contract in accordance with the Construction Contractor's Direct Agreement.
- (c) Following the Exercise Date, the City shall not do anything to prejudice the rights which are not transferred to them pursuant to the Construction Contractor's Direct Agreement.
- (d) Where all amounts which may be or become owing by DB Co to the Lenders under the Lending Agreements have been irrevocably paid in full, the Lenders' Agent shall promptly release and discharge all Security in respect of the Design and Construction Contract assumed or novated by the City pursuant to the Construction Contractor's Direct Agreement.
- (e) Notwithstanding the terms of the Construction Contractor's Direct Agreement and any other provisions of this Section 12, the Construction Contractor (and any guarantor thereof) shall remain responsible, and be liable, to DB Co in respect of all costs, claims,

damages, losses and liabilities which shall have arisen out of or in connection with the Design and Construction Contract in respect of the period prior to the Exercise Date.

- (f) Without prejudice to Sections 12(a) to 12(e) inclusive, the City shall not, prior to the date on which this Lenders' Direct Agreement terminates:
- (i) claim, recover, retain or receive (or seek to claim, recover, retain or receive) any amount under the Construction Contractor's Direct Agreement (and/or the Design and Construction Contract) from the Construction Contractor;
 - (ii) take any action to wind-up, liquidate, dissolve or appoint a receiver or receiver and manager of the Construction Contractor or to institute or sanction a voluntary arrangement or any other bankruptcy or insolvency proceedings in relation to the Construction Contractor; or
 - (iii) compete with the rights of the Lenders' Agent on a winding-up or other insolvency or bankruptcy of the Construction Contractor, nor claim to be subrogated to any rights of the Lenders' Agent or any Lender.

The City agrees and undertakes that if it receives any amount in contravention of the provisions of this Section 12(f), it will immediately turn the same over to the Lenders' Agent for the account of the Lenders' Agent and the Lenders and, pending such payment, hold the same in trust for the Lenders' Agent and the Lenders.

13 SUBCONTRACTOR'S DIRECT AGREEMENT

Notwithstanding any provision in a Subcontractor's Direct Agreement, the City hereby undertakes that it will not exercise any rights they may have under or arising out of any Subcontractor's Direct Agreement unless:

- (a) the Project Agreement and the Design and Construction Contract have been terminated;
- (b) the City is entitled to terminate the Project Agreement pursuant to the terms thereof and of this Lender's Direct Agreement; or
- (c) the City is entitled to exercise its rights under the Construction Contractor's Direct Agreement pursuant to Section 12(b).

14 PERFORMANCE GUARANTEE OF CONSTRUCTION GUARANTOR

Notwithstanding any provision in the Performance Guarantee of Construction Guarantor, the City hereby undertakes that it will not exercise any rights it may have under or arising out of the Performance Guarantee of Construction Guarantor unless:

- (a) the Project Agreement has been terminated; or
- (b) the City is entitled to terminate the Project Agreement pursuant to the terms thereof and of this Lenders' Direct Agreement.

15 NOTICE OF DB CO DELAY OR PROCEEDING AT RISK

- (a) The Parties acknowledge that, if DB Co is deemed to be failing to maintain the schedule pursuant to Schedule 12 – Works Scheduling Requirements, or Proceeding At Risk pursuant to Section 14.6(g) of the Project Agreement, the City may, in its sole discretion, give notice to the Lenders' Agent that DB Co is failing to maintain the schedule or Proceeding At Risk, together with the relevant information supporting the City's opinion that DB Co is failing to maintain the schedule or Proceeding At Risk.

16 ASSIGNMENT

- (a) No Party to this Lenders' Direct Agreement may assign, transfer or otherwise dispose of any part of its rights or obligations under this Lenders' Direct Agreement save as provided in this Section 16.
- (b) DB Co may assign, transfer or otherwise dispose of the benefit of this Lenders' Direct Agreement to any person to whom DB Co assigns, transfers or otherwise disposes of its interest in the Project Agreement pursuant to Section 49.1 of the Project Agreement and the provisions of the Lending Agreements, and shall provide written notice to the City and the Lenders' Agent of such assignment, transfer or other disposition. Such assignee, as a condition precedent to any such assignment, transfer or other disposition, shall assume the obligations and acquire the rights of DB Co under this Lenders' Direct Agreement pursuant to an assumption agreement with, and in form and substance satisfactory to, the City and the Lenders' Agent, each acting reasonably. The City and the Lenders' Agent shall, at DB Co's cost and expense, do all things and execute all further documents as may be necessary in connection therewith.
- (c) The City may assign, transfer or otherwise dispose of the benefit of the whole or part of this Lenders' Direct Agreement to any person to whom the City assigns, transfers or otherwise disposes of its interest in the Project Agreement pursuant to Section 49.2 of the Project Agreement, and shall provide written notice to DB Co and the Lenders' Agent of such assignment, transfer or other disposition. Such assignee, as a condition precedent to any such assignment, transfer or other disposition, shall assume the obligations and acquire the rights of the City under this Lenders' Direct Agreement pursuant to an assumption agreement with, and in form and substance satisfactory to, DB Co and the Lenders' Agent, each acting reasonably. DB Co and the Lenders' Agent shall, at the City's cost and expense, do all things and execute all further documents as may be necessary in connection therewith.
- (d) The Lenders' Agent may only assign, transfer or otherwise dispose of any interest in this Lenders' Direct Agreement as permitted by the Lending Agreements, and shall provide written notice to DB Co and the City of such assignment, transfer or other disposition; provided that, notwithstanding any provision to the contrary in the Lending Agreements, the Lenders' Agent may not assign, transfer or otherwise dispose of any interest in this Lenders' Direct Agreement to a Restricted Person. The Lenders' Agent, as a condition precedent to any such assignment, transfer or other disposition, shall cause the assignee to enter into a new agreement with DB Co and the City on substantially the same terms as this Lenders' Direct Agreement and DB Co and the City shall enter into such new agreement with the assignee. DB Co and the City shall, at the Lenders' Agent's cost and

expense, do all things and execute all further documents as may be necessary in connection therewith.

17 NOTICES

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Lenders' Direct Agreement shall be in writing (whether or not "written notice" or "notice in writing" is specifically required by the applicable provision of this Lenders' Direct Agreement) and served by sending the same by registered mail or by hand (in each case, with a copy by electronic submission), as follows:

If to the City:

- (b) Any Party to this Lenders' Direct Agreement may, from time to time, change any of its contact information set forth in Section 17(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows the recipient Party's receipt of such notice unless a later effective date is given in such notice.
- (c) Subject to Sections 17(d) and 17(e):
 - (i) a notice given by registered mail shall be deemed to have been received on the third Business Day after mailing; and
 - (ii) a notice given by hand delivery shall be deemed to have been received on the day it is delivered.
- (d) If the Party giving the notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such notice shall not be mailed but shall be made by personal delivery in accordance with this Section 17.
- (e) If any notice delivered by hand or transmitted by facsimile is so delivered or transmitted either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such notice shall be deemed to have been received by such recipient on the next following Business Day.

18 AMENDMENTS

This Lenders' Direct Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Lenders' Direct Agreement.

19 WAIVER

- (a) No waiver made or given by a Party under or in connection with this Lenders' Direct Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

20 RELATIONSHIP BETWEEN THE PARTIES

The Parties are independent contractors. This Lenders' Direct Agreement is not intended to and does not create or establish between the Parties any relationship as partners, joint venturers, employer and employee, master and servant, or, except as provided in this Lenders' Direct Agreement, of principal and agent.

21 ENTIRE AGREEMENT

Except where provided otherwise in this Lenders' Direct Agreement, this Lenders' Direct Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Lenders' Direct Agreement.

22 SEVERABILITY

Each provision of this Lenders' Direct Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Lenders' Direct Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Lenders' Direct Agreement. If any such provision of this Lenders' Direct Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Lenders' Direct Agreement as near as possible to its original intent and effect.

23 ENUREMENT

This Lenders' Direct Agreement shall enure to the benefit of, and be binding on, each of the Parties and their respective successors and permitted transferees and assigns.

24 GOVERNING LAW AND JURISDICTION

- (a) This Lenders' Direct Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The Parties agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Lenders' Direct Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.
- (c) Nothing in this Lenders' Direct Agreement affects the rights, protections and immunities of the Crown under the *Proceedings Against the Crown Act* (Ontario).

25 DISPUTE RESOLUTION PROCEDURE

The Parties agree that the dispute resolution procedure provided for in Schedule 27 - Dispute Resolution Procedure to the Project Agreement shall not apply to any dispute under this Lenders' Direct Agreement.

26 FURTHER ASSURANCE

Each Party shall do all things, from time to time, and execute all further documents necessary to give full effect to this Lenders' Direct Agreement.

27 LANGUAGE OF AGREEMENT

Each Party acknowledges having requested and being satisfied that this Lenders' Direct Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en déclare satisfaite.

28 COUNTERPARTS

This Lenders' Direct Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any Party providing its signature in faxed form shall promptly forward to such Party an original signed copy of this Lenders' Direct Agreement which was so faxed.

29 CONFIDENTIALITY

The Lenders' Agent agrees to comply with the obligations imposed on DB Co by the provisions of Section 42 of the Project Agreement, *mutatis mutandis*, provided that the Lenders' Agent will be

permitted to disclose to any relevant regulatory authority only such Confidential Information (as defined in the Project Agreement) as is necessary for the Lenders' Agent to comply with Applicable Law.

[SIGNATURE PAGES IMMEDIATELY FOLLOW]

IN WITNESS WHEREOF the Parties have executed this Lenders' Direct Agreement as of the date first above written.

SCHEDULE 5

CONSTRUCTION CONTRACTOR'S DIRECT AGREEMENT

THIS AGREEMENT is made as of the 24th day of April, 2019

BETWEEN:

THE CITY OF OTTAWA

(the “City”)

- AND -

EAST WEST CONNECTORS GP, [REDACTED]

(“DB Co”)

- AND -

[REDACTED]

(the “Construction Contractor”)

- AND -

[REDACTED]

(each a “Construction Guarantor”, collectively the “Construction Guarantors”)

WHEREAS:

- A. The City and DB Co have entered into the Project Agreement, which requires DB Co to enter into, and to cause the Construction Contractor and the Construction Guarantors to enter into, this Construction Contractor's Direct Agreement with the City.
- B. DB Co and the Construction Contractor have entered into the Design and Construction Contract, which requires the Construction Contractor and the Construction Guarantor to enter into this Construction Contractor's Direct Agreement with the City.

NOW THEREFORE in consideration of the mutual covenants and agreements of the Parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties covenant and agree as follows:

1. DEFINITIONS

In this Schedule 5 – Construction Contractor's Direct Agreement, unless the context indicates a contrary intention, terms which are defined in the Project Agreement (and not otherwise defined in this in this Schedule 5 – Construction Contractor's Direct Agreement) shall have meanings given to them in the Project Agreement and the following terms shall have the following meanings:

- (a) “**Default Notice**” has the meaning given in Section 5(a).
- (b) “**Party**” means the City, the Construction Contractor, each of the Construction Guarantors or DB Co, and “**Parties**” means, collectively, the City, the Construction Contractor, the Construction Guarantors and DB Co.
- (c) “**Step-In Notice**” has the meaning given in Section 6(a).
- (d) “**Substitute**” has the meaning given in Section 6(a).

2. INTERPRETATION

This Construction Contractor’s Direct Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings in this Construction Contractor’s Direct Agreement are for convenience of reference only, shall not constitute a part of this Construction Contractor’s Direct Agreement, and shall not be taken into consideration in the interpretation of, or affect the meaning of, this Construction Contractor’s Direct Agreement.
- (b) Unless the context otherwise requires, references to specific Sections, Clauses, Paragraphs, Subparagraphs, and other divisions are references to such Sections, Clauses, Paragraphs, Subparagraphs, or divisions of this Construction Contractor’s Direct Agreement and the terms “Section” and “Clause” are used interchangeably and are synonymous.
- (c) Words importing persons or parties are to be broadly interpreted and include an individual, corporation, limited liability company, joint stock company, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.
- (d) Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.
- (e) References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of this Construction Contractor’s Direct Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- (f) The words in this Construction Contractor’s Direct Agreement shall bear their natural meaning.
- (g) References containing terms such as:
 - (i) “hereof”, “herein”, “hereto”, “hereinafter”, and other terms of like import are not limited in applicability to the specific provision within which such references are

set forth but instead refer to this Construction Contractor's Direct Agreement taken as a whole; and

- (ii) “includes” and “including”, whether or not used with the words “without limitation” or “but not limited to”, shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean “includes without limitation” and “including without limitation”.
- (h) In construing this Construction Contractor's Direct Agreement, the rule known as the *ejusdem generis rule* shall not apply nor shall any similar rule or approach to the construction of this Construction Contractor's Direct Agreement and, accordingly, general words introduced or followed by the word “other” or “including” or “in particular” shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (i) Where this Construction Contractor's Direct Agreement states that an obligation shall be performed “no later than” or “within” or “by” a stipulated date or event which is a prescribed number of days after a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (j) Where this Construction Contractor's Direct Agreement states that an obligation shall be performed “on” a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (k) Any reference to time of day or date means the local time or date in Ottawa, Ontario.
- (l) Unless otherwise indicated, time periods will be strictly construed.
- (m) Whenever the terms “will” or “shall” are used in this Construction Contractor's Direct Agreement they shall be construed and interpreted as synonymous and to read “shall”.

3. CONFLICT IN DOCUMENTS

- (a) In the event of ambiguities, conflicts or inconsistencies between or among this Construction Contractor's Direct Agreement, the Project Agreement and the Design and Construction Contract, this Construction Contractor's Direct Agreement shall prevail.
- (b) In the event of ambiguities, conflicts or inconsistencies between or among this Construction Contractor's Direct Agreement and the Lenders' Direct Agreement, the Lenders' Direct Agreement shall prevail.

4. AGREEMENTS

- (a) DB Co and the Construction Contractor shall not amend, modify, or depart from the terms of the Design and Construction Contract without the prior written consent of the City, acting reasonably, which consent shall not be withheld or delayed where such amendment, modification or departure does not materially and adversely affect the ability

of DB Co or the Construction Contractor to perform its obligations under this Construction Contractor's Direct Agreement and does not have the effect of increasing any liability of the City, whether actual or potential. The City shall respond to any request for consent under this Section 4(a) within 30 days following its receipt thereof. DB Co and the Construction Contractor shall provide to the City a written copy of all such amendments, modifications or departures. The Parties acknowledge and agree that this Section 4(a) shall not apply to Variations provided for under the Project Agreement.

- (b) Each of the Parties acknowledges having received a copy of the Project Agreement and the Design and Construction Contract.
- (c) If the Construction Contractor gives DB Co any notice of any default(s) under the Design and Construction Contract that may give the Construction Contractor a right to terminate the Design and Construction Contract or to treat it as having been repudiated by DB Co or to discontinue the Construction Contractor's performance thereunder, then the Construction Contractor shall concurrently provide the City with a copy of such notice and set out in reasonable detail the default(s).

5. NO TERMINATION BY CONSTRUCTION CONTRACTOR WITHOUT DEFAULT NOTICE

The Construction Contractor shall not exercise any right it may have to terminate the Design and Construction Contract or to treat it as having been repudiated by DB Co or to discontinue the Construction Contractor's performance thereunder unless:

- (a) the Construction Contractor first delivers a written notice (a "**Default Notice**") to the City setting out in reasonable detail the default(s) on which the Construction Contractor intends to rely in terminating the Design and Construction Contract or to treat it as having been repudiated by DB Co or to discontinue the Construction Contractor's performance thereunder; and
- (b) within a period of ten Business Days of the City receiving the Default Notice:
 - (i) the default(s) on which the Construction Contractor intends to rely in terminating the Design and Construction Contract or to treat it as having been repudiated by DB Co or to discontinue the Construction Contractor's performance thereunder have not been remedied; and
 - (ii) the Construction Contractor has not received a Step-In Notice from the City,

provided that if, within such period of ten Business Days, the City agrees to pay the Construction Contractor's reasonable costs of continued performance, such period of five Business Days shall be extended to 45 days.

6. STEP-IN RIGHTS

- (a) The City may at any time:
 - (i) within five Business Days or, if such period has been extended in accordance with Section 5, 45 days of the City receiving a Default Notice; or

- (ii) if the City has not received a Default Notice and if the City's right to terminate the Project Agreement has arisen and is continuing,

deliver a notice (a "**Step-In Notice**") electing to replace DB Co under the Design and Construction Contract either with the City or a third party designated by the City in the Step-In Notice (the "**Substitute**"), provided that the City can demonstrate to the Construction Contractor, acting reasonably, that the Substitute shall have sufficient financial resources, or shall be supported by a satisfactory guarantee, and have the legal capacity, power and authority, to carry out the obligations of the Substitute under the Design and Construction Contract.

- (b) Subject to Section 6(d), upon receipt by the Construction Contractor of a Step-In Notice:
 - (i) DB Co and the Construction Contractor will be deemed to be released from their existing and future obligations under the Design and Construction Contract to each other (except with respect to any and all indemnities from DB Co or the Construction Contractor to the other in respect of the period prior to the receipt of the Step-In Notice), and the City or the Substitute, as applicable, and the Construction Contractor will be deemed to assume those same existing and future obligations towards each other (except in respect of the aforesaid indemnities);
 - (ii) the existing and future rights of DB Co against the Construction Contractor under the Design and Construction Contract and vice versa will be deemed to be cancelled (except with respect to any and all indemnities from DB Co or the Construction Contractor to the other in respect of the period prior to the receipt of the Step-In Notice), and the City or the Substitute, as applicable, and the Construction Contractor will be deemed to acquire those same existing and future rights against each other (except in respect of the aforesaid indemnities), subject to any applicable credit from the Construction Contractor to the City if the City pays for the Construction Contractor's reasonable costs of continued performance pursuant to Section 5;
 - (iii) any guarantee, bond, covenant, letter of credit or similar performance security in favour of DB Co from any third party in respect of any term, provision, condition, obligation, undertaking or agreement on the part of the Construction Contractor to be performed, observed or carried out by the Construction Contractor as contained in, referred to, or inferred from the Design and Construction Contract shall be assigned, novated or granted, as required by the City or the Substitute, as applicable, each acting reasonably, to the City or the Substitute, as applicable, and the Construction Contractor shall cause such assignment, novation or grant on substantially the same terms and conditions as the original guarantee, bond, covenant, letter of credit or similar performance security, provided however that where DB Co shall continue to hold, or shall continue to be entitled to or have rights under, such guarantee, bond, covenant, letter of credit or similar performance security, as security for any obligations of the Construction Contractor, the assignment, novation or grant of the guarantee, bond or covenant, letter of credit or similar performance security to the extent of any such obligations to DB Co shall be conditional on the satisfaction of those obligations to DB Co; and

- (iv) at the City's request, the Construction Contractor shall enter into, and shall cause the Construction Guarantors and any other guarantor, covenantor or surety under any guarantee, bond or covenant referred to in Section 6(b)(iii) to enter into, and the City shall or shall cause the Substitute to enter into, as applicable, all such agreements or other documents as reasonably necessary to give effect to the foregoing, including, without limitation, an agreement between the City or the Substitute, as applicable, and the Construction Contractor, acceptable to the City and the Construction Contractor, each acting reasonably, on substantially the same terms as the Design and Construction Contract.
- (c) Subject to Section 6(d), DB Co shall, at its own cost, cooperate fully with the City and the Substitute in order to achieve a smooth transfer of the Design and Construction Contract to the City or the Substitute, as applicable, and to avoid or mitigate in so far as reasonably practicable any inconvenience, including the administration of the Design and Construction Contract, ongoing supervisory activities and scheduling.
- (d) The rights granted by Sections 6(b) and 6(c) shall be of no force or effect if, at any time the Construction Contractor receives a Step-In Notice, the Construction Contractor has already received notice in writing from another entity entitled to the benefit of step-in rights relating to the Design and Construction Contract that it is or has validly exercised those step-in rights. If the Construction Contractor receives any such notice on the same day as a Step-In Notice, the Step-In Notice shall be effective, except where the other notice is given by the Lenders, in which case such other notice and not the Step-In Notice shall be effective.
- (e) If the City gives a Step-In Notice within 60 days after the Construction Contractor has terminated the Design and Construction Contract or treated it as having been repudiated by DB Co or discontinued the Construction Contractor's performance thereunder in accordance with the terms of this Construction Contractor's Direct Agreement, the Construction Contractor agrees that the Design and Construction Contract shall be reinstated and deemed to have continued despite any termination or treatment as having been repudiated, and the City shall pay the Construction Contractor's reasonable costs for re-commencing the obligations it has under the Design and Construction Contract and the Construction Contractor shall be entitled to reasonable compensation and/or relief for re-commencing such obligations, having regard to the additional costs and delays incurred as a result of having terminated the Design and Construction Contract or having treated it as being repudiated by DB Co or having discontinued its performance thereunder.

7. CONSTRUCTION CONTRACTOR LIABILITY

- (a) The liability of the Construction Contractor hereunder shall not be modified, released, diminished or in any way affected by:
 - (i) any independent inspection, investigation or enquiry into any matter which may be made or carried out by or for the City, or by any failure or omission to carry out any such inspection, investigation or enquiry; or
 - (ii) the appointment by the City of any other person to review the progress of or otherwise report to the City in respect of the Project, or by any action or omission

of such person whether or not such action or omission might give rise to any independent liability of such person to the City,

provided always that nothing in this Section 7 shall modify or affect any rights which the Construction Contractor might have otherwise had to claim contribution from any other person whether under statute or common law.

- (b) In the event the City delivers a Step-In Notice, the City or any Substitute rights shall be subject to all of the rights and remedies available to the Construction Contractor under the Design and Construction Contract and the Construction Contractor shall have no greater liability to the City or any Substitute than it would have had to DB Co under the Design and Construction Contract, and the Construction Contractor shall be entitled in any dispute or proceedings involving the City or any Substitute to raise, enforce or rely on any defenses, conditions and liability limitations in the Design and Construction Contract.

8. DB CO AS PARTY

DB Co acknowledges and agrees that the Construction Contractor shall not be in breach of the Design and Construction Contract by complying with its obligations hereunder.

9. CONSTRUCTION GUARANTORS AS PARTY

The Construction Guarantors agree with the City that the Construction Guarantors have entered into a guarantee or covenant referred to in Section 6(b)(iii) and, subject to Sections 6(a) and (d), hereby consents to the assignment, novation or grant (including any conditional assignment, novation or grant) as provided herein immediately upon receipt by the Construction Contractor of a Step-In Notice and without the requirement of any further action on the part of the City, and agree that the Construction Guarantors shall in accordance with Section 6 enter into all such agreements or other documents as reasonably necessary to give effect to the foregoing. The Construction Guarantors enter into this Construction Contractor's Direct Agreement solely for the purposes of this Section 9.

10. ASSIGNMENT

- (a) DB Co shall not, without the prior written consent of the City, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Construction Contractor's Direct Agreement except to the extent entitled to do so under the Project Agreement. Any permitted assignee of DB Co, as a condition precedent to any such assignment, transfer or other disposition, shall assume the obligations and acquire the rights of DB Co under this Construction Contractor's Direct Agreement pursuant to an assumption agreement with, and in a form and substance satisfactory to City and the Construction Contractor, each acting reasonably. City and the Construction Contractor shall, at DB Co's cost and expense, do all things and execute all further documents as may be necessary in connection therewith.
- (b) The City may assign or otherwise dispose of the benefit of the whole or part of this Construction Contractor's Direct Agreement to any person to whom the City may assign or otherwise dispose of their interest in the Project Agreement pursuant to Section 49.2 of the Project Agreement but only in conjunction therewith, and shall provide written notice to DB Co and the Construction Contractor of such assignment or disposition. Such

assignee, as a condition precedent to any such assignment or other disposition, shall assume the obligations and acquire the rights of City under this Construction Contractor's Direct Agreement pursuant to an assumption agreement with, and in form and substance satisfactory to, DB Co and the Construction Contractor, each acting reasonably. DB Co and the Construction Contractor shall, at City's cost and expense, do all things and execute all further documents as may be necessary in connection therewith.

- (c) The Construction Contractor shall not, without the prior written consent of the City and DB Co, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Construction Contractor's Direct Agreement except as may be permitted under the Design and Construction Contract. Such assignee, as a condition precedent to any such assignment, transfer, charge, subcontract, subparticipate or other disposition, shall assume the obligations and acquire the rights of the Construction Contractor under this Construction Contractor's Direct Agreement pursuant to an assumption agreement with, and in a form and substance satisfactory to the City and DB Co, each acting reasonably. The City and DB Co shall, at the Construction Contractor's cost and expense, do all things and execute all further documents as may be necessary in connection therewith.

11. NOTICES

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Construction Contractor's Direct Agreement shall be in writing (whether or not "written notice" or "notice in writing" is specifically required by the applicable provision of this Construction Contractor's Direct Agreement) and served by sending the same by registered mail, facsimile or by hand (in each case, with a copy by electronic transmission), as follows:

If to the City :

City of Ottawa
110 Laurier Ave West

- (b) Where any notice is provided or submitted to a Party via facsimile an original of the notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a Party's failure to comply with this Section 11(b).
- (c) Any Party to this Construction Contractor's Direct Agreement may, from time to time, change any of its contact information set forth in Section 11(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows

the recipient Party's receipt of such notice unless a later effective date is given in such notice.

- (d) Subject to Sections 11(e), 11(f) and 11(g):
 - (i) a notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
 - (ii) a notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
 - (iii) a notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.
- (e) If the Party giving the notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 11.
- (f) If any notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such notice shall be deemed to have been received by such recipient on the next Business Day.
- (g) A notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such notice was successful.

12. AMENDMENTS

This Construction Contractor's Direct Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Construction Contractor's Direct Agreement.

13. WAIVER

- (a) No waiver made or given by a Party under or in connection with this Construction Contractor's Direct Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

14. RELATIONSHIP BETWEEN THE PARTIES

The Parties are independent contractors. This Construction Contractor's Direct Agreement is not intended to and does not create or establish between the Parties any relationship as partners, joint venturers, employer and employee, master and servant, or, except as provided in this Construction Contractor's Direct Agreement, of principal and agent.

15. ENTIRE AGREEMENT

Except where provided otherwise in this Construction Contractor's Direct Agreement, this Construction Contractor's Direct Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Construction Contractor's Direct Agreement.

16. SEVERABILITY

Each provision of this Construction Contractor's Direct Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Construction Contractor's Direct Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Construction Contractor's Direct Agreement. If any such provision of this Construction Contractor's Direct Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Construction Contractor's Direct Agreement as near as possible to its original intent and effect.

17. ENUREMENT

This Construction Contractor's Direct Agreement shall enure to the benefit of, and be binding on, each of the Parties and their respective successors and permitted transferees and assigns.

18. GOVERNING LAW AND JURISDICTION

- (a) This Construction Contractor's Direct Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The Parties agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Construction Contractor's Direct Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.
- (c) Nothing in this Construction Contractor's Direct Agreement affects the rights, protections and immunities of the Crown under the *Proceedings Against the Crown Act* (Ontario).

19. FURTHER ASSURANCE

Each Party shall do all things, from time to time, and execute all further documents necessary to give full effect to this Construction Contractor's Direct Agreement.

20. LANGUAGE OF AGREEMENT

Each Party acknowledges having requested and being satisfied that this Construction Contractor's Direct Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en déclare satisfaite.

21. COUNTERPARTS

This Construction Contractor's Direct Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or electronic form provided that any Party providing its signature in electronic form shall promptly forward to such Party an original signed copy of this Construction Contractor's Direct Agreement which was so faxed.

[SIGNATURE PAGES IMMEDIATELY FOLLOW]

IN WITNESS WHEREOF the Parties have executed this Construction Contractor's Direct Agreement as of the date first above written.

**SCHEDULE 6
INDEPENDENT CERTIFIER AGREEMENT**

THIS AGREEMENT is made as of the 25th day of April, 2019

BETWEEN:

THE CITY OF OTTAWA

(“City”)

- and -

EAST WEST CONNECTORS GP, [REDACTED]

(“DB Co”)

- and -

[REDACTED]

(the “Independent Certifier”)

WHEREAS:

- (A) The City and DB Co (collectively, the “**PA Parties**” and each, a “**PA Party**”) have entered into the Project Agreement.
- (B) Pursuant to the terms of the Project Agreement, the PA Parties wish to appoint the Independent Certifier, and the Independent Certifier wishes to accept such appointment, to perform certain services in connection with the Project Agreement.
- (C) The PA Parties and the Independent Certifier wish to enter into this Independent Certifier Agreement in order to record the terms by which the Independent Certifier shall perform such services.

NOW THEREFORE in consideration of the mutual covenants and agreements of the PA Parties and the Independent Certifier herein contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the PA Parties and the Independent Certifier covenant and agree as follows:

1 DEFINITIONS

1.1 Definitions

- (a) In this Independent Certifier Agreement, including the recitals and appendices, unless the context indicates a contrary intention, terms which are defined in the Project Agreement

(and not otherwise defined in this Independent Certifier Agreement) shall have meanings given to them in the Project Agreement and the following terms shall have the following meanings:

- (i) **“Certification Services”** means:
 - (A) all of the functions and obligations described in the Project Agreement as being the responsibility of the Independent Certifier;
 - (B) all of the functions and obligations conferred on the Independent Certifier under this Independent Certifier Agreement, including the functions described in Appendix A to this Independent Certifier Agreement; and
 - (C) all other functions or tasks which the Independent Certifier must do to comply with its obligations under this Independent Certifier Agreement.
- (ii) **“Certification Services Variation”** is any change to the Certification Services.
- (iii) **“Contract Material”** means all material:
 - (A) provided to the Independent Certifier or created or required to be created by either PA Party; and
 - (B) provided by or created or required to be created by the Independent Certifier as part of, or for the purpose of, performing the Certification Services, including documents, equipment, reports, technical information, plans, charts, drawings, calculations, tables, schedules and data (stored and recorded by any means).
- (iv) **“Contribution Agreement”** means either the agreement entered into by the City and the Government of Canada, represented by the Ministry of Infrastructure and Communities, or the agreement entered into by the City and the Government of Ontario, represented by the Ministry of Transportation, for the contribution of funding for the Project, and **“Contribution Agreements”** means both.
- (v) **“Contribution Agreement Party”** means either the Government of Canada, represented by the Ministry of Infrastructure and Communities, or the Government of Ontario, represented by the Ministry of Transportation, and **“Contribution Agreement Parties”** means both.
- (vi) **“Earned Value Measurement Techniques”** means the techniques used to measure Earned Value established by DB Co and agreed with the Independent Certifier in accordance with the “Practice Standard for Earned Value Management” (2nd Edition, published in 2011 by the Project Management Institute, Inc.).

- (vii) **“Fee”** means the fees payable by the City and DB Co to the Independent Certifier for the Certification Services, as such fees are specified and made payable in accordance with Appendix B to this Independent Certifier Agreement.
- (viii) **“IC Monthly Report”** has the meaning given in Appendix A to this Independent Certifier Agreement.
- (ix) **“IC Quarterly Report”** has the meaning given in Appendix A to this Independent Certifier Agreement.
- (x) **“Intellectual Property”** means any and all intellectual property rights, whether subsisting now or in the future, including rights of any kind in inventions, patents, copyright, trademarks, service marks, industrial designs, integrated circuit topography rights, applications for registration of any of the foregoing, and know- how, trade secrets, confidential information and trade or business names.
- (xi) **“PA Parties”** means both the City and DB Co, and **“PA Party”** means either the City or DB Co, as the context requires.
- (xii) **“Project Agreement”** means that certain project agreement made on or about the date hereof between the City and DB Co with respect to the design, construction and financing of the Confederation Line Extension Project.

2 INTERPRETATION

2.1 Interpretation

- (a) In this Independent Certifier Agreement, unless the context indicates a contrary intention:
 - (i) words denoting the singular number include the plural and vice versa;
 - (ii) words denoting individuals include corporations and vice versa;
 - (iii) headings are for convenience only and do not affect interpretation;
 - (iv) references to Clauses, Sections or Parts are references to Clauses, Sections or Parts of this Independent Certifier Agreement;
 - (v) references to this Independent Certifier Agreement or any contract, agreement or instrument are deemed to include references to this Independent Certifier Agreement or such other contract, agreement or instrument as amended, novated, supplemented, varied or replaced from time to time;
 - (vi) references to any party to this Independent Certifier Agreement includes its successors or permitted assigns;
 - (vii) words denoting any gender include all genders;

- (viii) references to any legislation or to any section or provision of any legislation include any statutory modification or re-enactment of any statutory provision substituted for legislation, section or provision, and ordinances, by laws, regulations and other statutory instruments issued under that legislation, section or provision;
- (ix) a reference to “\$” is to Canadian currency;
- (x) the terms “including” and “include” mean “including” or “include” (as applicable) without limitation;
- (xi) if a word or phrase is defined, then other parts of speech and grammatical forms of that word or phrase have a corresponding meaning; and
- (xii) unless otherwise indicated, all time periods will be strictly construed.

2.2 Obligations and Exercise of Rights by PA Parties

- (a) The obligations of the PA Parties under this Independent Certifier Agreement shall be several.
- (b) Except as specifically provided for in this Independent Certifier Agreement or the Project Agreement, the rights of the PA Parties under this Independent Certifier Agreement shall be jointly exercised by the PA Parties.

3 ROLE OF THE INDEPENDENT CERTIFIER

3.1 Engagement

- (a) The PA Parties hereby appoint the Independent Certifier, and the Independent Certifier hereby accepts such appointment, to carry out the Certification Services in accordance with this Independent Certifier Agreement. The Independent Certifier shall perform the Certification Services in accordance with this Independent Certifier Agreement.
- (b) Nothing in this Independent Certifier Agreement will be interpreted as giving the Independent Certifier any responsibility for performance of the design or construction, or for the certifications of the professionals of record.
- (c) Neither PA Party shall, without the prior written consent of the other PA Party, enter into any separate agreement with the Independent Certifier in connection with the Project, and DB Co shall ensure that no DB Co Party enters into any separate agreement with the Independent Certifier in connection with the Project. The Independent Certifier shall not enter into any separate agreement with either PA Party in connection with the Project without the prior written consent of the other PA Party.
- (d) The Independent Certifier shall make such observations and evaluations of any Works pursuant to a Variation in order to certify any monthly progress payment to DB Co of the value of work performed, provided the Independent Certifier shall be entitled to a Certification Services Variation Order pursuant to Sections 9.4 and 9.5 of this Independent Certifier Agreement.

- (e) The PA Parties acknowledge and agree that the Independent Certifier may rely on the assessment report prepared by the Independent Safety Assessor with respect to the safety certification of the System Infrastructure. The Independent Certifier acknowledges and agrees that, in carrying out the Certification Services, it shall be bound to the assessment report and shall consider the Independent Safety Assessor's views with respect to the safety of the System Infrastructure in making its determination as to whether Project Co has satisfied the conditions of Substantial Completion.
- (f) The PA Parties acknowledge and agree that notwithstanding anything to the contrary in this Agreement the Certification Services described in paragraph (bb) of Appendix A do not, nor shall such Certification Services be construed so as to, change, modify or have any impact whatsoever on the PA Parties' respective rights, entitlements and obligations as against each other pursuant to the provisions of the Project Agreement.
- (g) In carrying out the Certification Services, the Independent Certifier may rely upon the reports, findings and determination of the Systems Integration Verifier, pertaining to the Systems Integration Works, provided in accordance with the terms of the Project Agreement.

3.2 Acknowledgement of Independent Certifier

- (a) The Independent Certifier hereby acknowledges in favour of the PA Parties that it has received a copy of the Project Agreement.

3.3 Standard of Care

- (a) The Independent Certifier must exercise the standard and skill, care and diligence in the performance of the Certification Services that would be expected of an expert professional experienced in providing services in the nature of the Certification Services for projects similar to the Project.

3.4 Duty of Independent Judgment

- (a) In exercising its Certification Services, the Independent Certifier must:
 - (i) act impartially, honestly and independently in representing the interests of both PA Parties in accordance with the terms of the Project Agreement and this Independent Certifier Agreement;
 - (ii) act reasonably and professionally;
 - (iii) act in a timely manner:
 - (A) in accordance with the times prescribed in this Independent Certifier Agreement and the Project Agreement; or
 - (B) where no times are prescribed, within 10 days or such earlier time so as to enable the PA Parties to perform their respective obligations under the Project Agreement; and

- (iv) act in accordance with the joint directions of the PA Parties provided that the directions are not inconsistent with the other terms of this Independent Certifier Agreement or the terms of the Project Agreement and do not vary or prejudice the Independent Certifier's authority or responsibilities or the exercise by the Independent Certifier of its professional judgment under this Independent Certifier Agreement.
- (b) Although the Independent Certifier may take account of any opinions or representations made by the PA Parties, the Independent Certifier shall not be bound to comply with any opinions or representations made by either of them in connection with any matter on which the Independent Certifier is required to exercise its professional judgment.
- (c) The Independent Certifier acknowledges that the PA Parties may rely on the Certification Services, including determinations, findings and certifications made by the Independent Certifier, and accordingly, the Independent Certifier represents and warrants that will use its best skill and judgment in providing the Certification Services, and that information provided and/or submitted to the PA Parties in accordance with this Independent Certifier Agreement is true and accurate, and prepared in good faith to the best of the Independent Certifier's skill, judgment and knowledge.
- (d) The Independent Certifier acknowledges that all Certification Services, Contract Material and all determinations, findings, reports, certificates and other information delivered by the Independent Certifier to the City pursuant to the Project Agreement may be relied upon by the Contribution Agreement Parties, and that the Independent Certifier shall owe each an equal duty of care as is owed to the City hereunder, notwithstanding the fact that the Contribution Agreement Parties are not parties to this Independent Certifier Agreement or the Project Agreement. The Independent Certifier will confirm the foregoing directly to either Contribution Agreement Party, if requested by the City.

3.5 Authority to Act

- (a) The Independent Certifier:
 - (i) is an independent consultant and is not, and must not purport to be, a partner, joint venturer or agent of either PA Party;
 - (ii) other than as expressly set out in this Independent Certifier Agreement or the Project Agreement, has no authority to give any directions to a PA Party or its officers, directors, members, employees, contractors, consultants or agents; and
 - (iii) has no authority to waive or alter any terms of the Project Agreement, nor to discharge or release a party from any of its obligations under the Project Agreement unless jointly agreed by the PA Parties in writing.
- (b) The Independent Certifier will confirm the foregoing directly to either Contribution Agreement Party, if requested by the City.

3.6 Knowledge of the PA Parties' Requirements

- (a) The Independent Certifier warrants that:

- (i) it has informed and will be deemed to have informed itself fully of the requirements of the Project Agreement;
- (ii) it will inform itself fully of the requirements of such other documents and materials as may become relevant from time to time to the performance of the Certification Services;
- (iii) without limiting Sections 3.6(a)(i) or 3.6(a)(ii), it has and will be deemed to have informed itself fully of all time limits and other requirements for any Certification Service which the Independent Certifier carries out under the Project Agreement and this Independent Certifier Agreement;
- (iv) it has and will be deemed to have informed itself completely of the nature of the work necessary for the performance of the Certification Services and the means of access to and facilities at or on the Lands and Site including restrictions on any such access or protocols that are required; and
- (v) it has satisfied itself as to the correctness and sufficiency of its proposal for the Certification Services and that the Fee covers the cost of complying with all of the obligations under this Independent Certifier Agreement and of all matters and things necessary for the due and proper performance and completion of the Certification Services.

3.7 Co-ordination and Information by Independent Certifier

- (a) The Independent Certifier must:
 - (i) fully cooperate with the PA Parties and their consultants and advisors;
 - (ii) carefully co-ordinate the Certification Services with the work and services performed by the PA Parties;
 - (iii) carefully co-ordinate the Certification Services with the safety assessment performed by the Independent Safety Assessor;
 - (iv) without limiting its obligations under Sections 3.4 and 3.7(a)(ii), perform the Certification Services so as to avoid unreasonably interfering with, disrupting or delaying the work and services performed by the PA Parties;
 - (v) include both PA Parties in all discussions, meetings, or any other communications regarding the Project;
 - (vi) provide copies to the PA Parties of all reports, communications, certificates and other documentation that it provides to either PA Party; and
 - (vii) provide a copy of the Contract Material to each of the Contribution Agreement Parties at the same time as it is provided to the PA Parties. In respect of such Contract Material, either Contribution Agreement Party may make inquiries of the Independent Certifier and request further investigation or clarification in connection with, and subject to, its contribution agreement.

3.8 Conflict of Interest

- (a) The Independent Certifier warrants that:
 - (i) at the date of this Independent Certifier Agreement, no conflict of interest exists or is likely to arise in the performance of its obligations under this Independent Certifier Agreement, and the Independent Certifier further warrants that it has not been retained as a technical advisor to the Lenders or as an advisor to either of the PA Parties or any of their respective related entities in respect of the Project Agreement (including, but not limited to, acting as a transaction advisor to either PA Party); and
 - (ii) if, during the term of this Independent Certifier Agreement, any such conflict or risk of conflict of interest arises, the Independent Certifier will notify the PA Parties immediately in writing of that conflict or risk of conflict and take such steps as may be required by either of the PA Parties to avoid or mitigate that conflict or risk.

3.9 Independent Certifier Personnel

- (a) The Independent Certifier shall make reasonable efforts to ensure that the individuals listed in Appendix C remain involved in the performance of the Certification Services and, in particular, will not, for the duration of this Independent Certifier Agreement, require or request any such person to be involved in any other project on behalf of the Independent Certifier if, in the reasonable opinion of the PA Parties, such involvement would have a material adverse effect on the performance of the Certification Services.
- (b) Any replacement of the individuals listed in Appendix C is subject to the PA Parties' prior written approval.
- (c) The Independent Certifier shall ensure that its personnel providing the Certification Services in respect of the Commissioning Tests, and the Testing & Commissioning Program shall:
 - (i) possess a current professional designation of not less than membership in Professional Engineers Ontario, The Ontario Association of Certified Engineering Technicians and Technologists or such similar professional designation recognized in North America;
 - (ii) have demonstrated competence in the commissioning of comparable facilities and in having completed or monitored the commissioning of a comparable light rail transit system;
 - (iii) have an understanding of the appropriate standards, guidelines and policies related to commissioning for light rail transit systems, as well as other applicable transit commissioning standards; and
 - (iv) have an understanding of the commissioning process and the reports to be provided pursuant to this Independent Certifier Agreement and the Project Agreement, including not only the start-up procedures but the pre-commissioning and post- commissioning activities.

- (d) The Independent Certifier shall furnish City with evidence satisfactory to City of any such personnel's compliance with the foregoing requirements within a reasonable time prior to the proposed commencement of the Certification Services in respect of the Commissioning Tests, the Outline Commissioning Program and the Final Commissioning Program.
- (e) The Independent Certifier shall ensure that its personnel who will prepare and evaluate construction and development information for Works measurements for payment possess a current professional designation of not less than Professional Quantity Surveyors (PQS).

3.10 Minimize Interference

- (a) The Independent Certifier shall perform the Certification Services in such a way as to minimize any undue interference with the progress of the Works.

4 ROLE OF THE PA PARTIES

4.1 Assistance

- (a) The PA Parties agree to cooperate with and provide reasonable assistance to the Independent Certifier to familiarize the Independent Certifier with all necessary aspects of the Project to enable the Independent Certifier to carry out its obligations under this Independent Certifier Agreement.

4.2 Instructions in Writing

- (a) Unless otherwise provided in this Independent Certifier Agreement or the Project Agreement, all instructions to the Independent Certifier by the PA Parties shall be given in writing and accepted or endorsed by both of the PA Parties.

4.3 Information and Services

- (a) The PA Parties shall make available to the Independent Certifier, as soon as practicable from time to time, all information, documents and particulars necessary for the Independent Certifier to carry out the Certification Services, including such information, documents and particulars required in order for the Independent Certifier to certify Construction Period Payments and to determine whether any Substantial Completion and any Final Completion have occurred, and shall provide copies of all such information, documents and particulars to the other party hereto.

4.4 Additional Information

- (a) If any information, documents or particulars are reasonably required to enable the Independent Certifier to perform the Certification Services and have not been provided by the PA Parties, then:
 - (i) the Independent Certifier must give notice in writing to the DB Co Representative or the City Representative, as the case may be, of the details of

the information, documents or particulars demonstrating the need and the reasons why they are required; and

- (ii) DB Co or the City, as the case may be, must arrange the provision of the required information, documents or particulars.

4.5 Right to Enter and Inspect

- (a) Upon giving reasonable notice to the DB Co Representative, the Independent Certifier (and any person authorized by it) may enter and inspect the Lands, the New City Infrastructure, the New MTO Infrastructure or Works at any reasonable time in connection with the exercise or proposed exercise of rights under this Independent Certifier Agreement, subject to:
 - (i) observance of the reasonable rules of DB Co as to safety and security for the Lands, the New City Infrastructure, the New MTO Infrastructure or Works;
 - (ii) not causing unreasonable delay to the carrying out of the Works by reason of its presence at the Lands, the New City Infrastructure, the New MTO Infrastructure or Works; and
 - (iii) not causing any damage to the Lands, the New City Infrastructure, the New MTO Infrastructure or Works.

4.6 PA Parties Not Relieved

- (a) Neither PA Party shall be relieved from performing or observing its obligations, or from any other liabilities, under the Project Agreement as a result of either the appointment of, or any act or omission by, the Independent Certifier.

4.7 PA Parties not Liable

- (a) On no account will a PA Party be liable to another PA Party for any act or omission by the Independent Certifier whether under or purportedly under a provision of the Project Agreement, this Independent Certifier Agreement or otherwise, provided that any such act or omission shall not extinguish, relieve, limit or qualify the nature or extent of any right or remedy of either PA Party against or any obligation or liability of either PA Party to the other PA Party which would have existed regardless of such act or omission.

5 CERTIFICATION QUALITY PLAN

5.1 Certification Quality Plan

- (a) The Independent Certifier must:
 - (i) develop and implement a certification quality plan identifying the processes and outcomes of the Certification Services, including but not limited to timelines, deliverables and input required from the PA Parties, that complies with all requirements of the Independent Certifier's quality assurance accreditation, and is otherwise satisfactory to each of the City Representative and the DB Co Representative;

- (ii) within 14 days after the date of this Independent Certifier Agreement, provide such certification quality plan to each of the City Representative and the DB Co Representative;
- (iii) if satisfactory to each of the City Representative and the DB Co Representative, implement such certification quality plan; and
- (iv) if not satisfactory to each of the City Representative and the DB Co Representative, within 7 days after receiving notice thereof from either PA Party to that effect, revise and resubmit the certification quality plan to each of the City Representative and the DB Co Representative, and implement it if satisfactory to each of the City Representative and the DB Co Representative.

5.2 Certification Quality Plan not to Relieve Independent Certifier

- (a) The Independent Certifier will not be relieved of any responsibilities or obligations in respect of the performance of the Certification Services and will remain solely responsible for them notwithstanding:
 - (i) the obligation of the Independent Certifier to develop and implement a certification quality plan; or
 - (ii) any comment or direction upon, review or acceptance of, approval to proceed with or request to vary any part of the certification quality plan by either the City Representative or the DB Co Representative.

6 SUSPENSION

6.1 Notice

- (a) The Certification Services (or any part) may be suspended at any time by the PA Parties:
 - (i) if the Independent Certifier fails to comply with its obligations under this Independent Certifier Agreement, immediately by the PA Parties giving joint notice in writing to the Independent Certifier; or
 - (ii) in any other case, by the PA Parties giving 7 days joint notice in writing to the Independent Certifier.

6.2 Costs of Suspension

- (a) The Independent Certifier will:
 - (i) subject to the Independent Certifier complying with Article 9, be entitled to recover the extra costs incurred by the Independent Certifier by reason of a suspension directed under Section 6.1(a)(ii) valued as a Certification Services Variation under Article 9; and
 - (ii) have no entitlement to be paid any costs, expenses, losses or damages arising from a suspension under Sections 6.1(a)(i).

6.3 Recommencement

The Independent Certifier must immediately recommence the carrying out of the Certification Services (or any part) on receipt of a joint written notice from the PA Parties requiring it to do so.

7 INSURANCE AND LIABILITY

7.1 Independent Certifier's Professional Indemnity Insurance

- (a) The Independent Certifier must have in place at all times during the term of this Independent Certifier Agreement:
 - (i) professional liability insurance:
 - (A) in the amount of \$[REDACTED] per claim and \$[REDACTED] in the aggregate, a deductible of not more than \$[REDACTED] per claim and from an insurer and on terms satisfactory to each of the PA Parties; and
 - (B) covering liability which the Independent Certifier might incur as a result of a breach by it of its obligations owed by the Independent Certifier in a professional capacity to the PA Parties, or either of them, under or in connection with this Independent Certifier Agreement or the provision of the Certification Services; and
 - (ii) comprehensive general liability insurance in the amount of \$[REDACTED] per claim and in the aggregate, no deductible for personal injury or bodily injury, a deductible of not more than \$[REDACTED] per occurrence for property damage and from an insurer and on terms satisfactory to each of the PA Parties.
- (b) The Independent Certifier must provide copies of its insurance policies to each of the PA Parties upon execution of this Independent Certifier Agreement, and, at least 5 Business Days prior to the expiry date of any such insurance policy, the Independent Certifier must provide evidence of the renewal of any such insurance policy satisfactory to the PA Parties, acting reasonably.

7.2 Workers' Compensation Insurance

- (a) The Independent Certifier must, at its own cost and at all times during the term of this Independent Certifier Agreement, insure its liability (including its common law liability) as required under any applicable workers compensation statute or regulation in relation to its employees engaged in the Certification Services.

8 PAYMENT FOR SERVICES

8.1 Payment of Fee

- (a) In consideration of the Independent Certifier performing the Certification Services in accordance with this Independent Certifier Agreement, each PA Party shall pay [REDACTED] of the Fee to the Independent Certifier in accordance with the payment schedule specified in Appendix B.

- (b) The obligation of each PA Party to pay [REDACTED] of the Fee to the Independent Certifier is a several obligation, and neither PA Party shall have any liability in respect of the non- payment by the other PA Party of any fees or costs payable by such other PA Party under this Independent Certifier Agreement.
- (c) The Fee includes all taxes (except for HST), overheads and profit, all labour and materials, insurance costs, travel, hospitality, food and incidental expenses, and all other overhead including any fees or other charges required by law, to perform the Certification Services.
- (d) The PA Parties acknowledge and agree that if any approved amount due and payable by the PA Parties to the Independent Certifier in excess of \$[REDACTED] is outstanding for more than 60 days, the Independent Certifier shall not have any obligation to make any certification under the Project Agreement.

9 CERTIFICATION SERVICES VARIATIONS

9.1 Notice of Certification Services Variation

- (a) If the Independent Certifier believes, other than a “Certification Services Variation Order” under Section 9.4(c), that any direction by the PA Parties constitutes or involves a Certification Services Variation it must:
 - (i) within 7 days after receiving the direction and before commencing work on the subject matter of the direction, give notice to the PA Parties that it considers the direction constitutes or involves a Certification Services Variation; and
 - (ii) within 21 days after giving the notice under Section 9.1(a)(i), submit a written claim to each of the City Representative and the DB Co Representative which includes detailed particulars of the claim, the amount of the claim and how it was calculated.
- (b) Regardless of whether the Independent Certifier considers that such a direction constitutes or involves a Certification Services Variation, the Independent Certifier must continue to perform the Certification Services in accordance with this Independent Certifier Agreement and all directions, including any direction in respect of which notice has been given under this Section 9.1.

9.2 No Adjustment

- (a) If the Independent Certifier fails to comply with Section 9.1, the Fee will not be adjusted as a result of the relevant direction.

9.3 External Services

- (a) In the event that external personnel or consultants are required for expert opinion with respect to a Certification Services Variation, then, with the prior written approval of the PA Parties, any additional fees relating to such external personnel or consultants will be payable by the PA Parties at the agreed upon amount.

9.4 Certification Services Variation Procedure

- (a) The City Representative and the DB Co Representative may jointly issue a document titled “Certification Services Variation Price Request” to the Independent Certifier which will set out details of a proposed Certification Services Variation which the PA Parties are considering.
- (b) Within 7 days after the receipt of a “Certification Services Variation Price Request”, the Independent Certifier must provide each of the City Representative and the DB Co Representative with a written notice in which the Independent Certifier sets out the effect which the proposed Certification Services Variation will have on the Fee.
- (c) Each of the City Representative and the DB Co Representative may then jointly direct the Independent Certifier to carry out a Certification Services Variation by written document titled “Certification Services Variation Order” which will state either that:
 - (i) the Fee is adjusted as set out in the Independent Certifier’s notice; or
 - (ii) the adjustment (if any) to the Fee will be determined under Section 9.5.

9.5 Cost of Certification Services Variation

- (a) Subject to Section 9.2, the Fee will be adjusted for all Certification Services Variations or suspensions under Section 6.1(a)(ii) carried out by the Independent Certifier by:
 - (i) the amount (if any) stated in the “Certification Services Variation Order” in accordance with Section 9.4(c);
 - (ii) if Section 9.5(a)(i) is not applicable, an amount determined pursuant to the fee schedule in Appendix B; or
 - (iii) where such rates or prices are not applicable, a reasonable amount to be agreed between the PA Parties and the Independent Certifier or, failing agreement, determined by the City Representative and the DB Co Representative jointly.
- (b) Any reductions in the Fee shall be calculated on the same basis as any increases.

10 TERM AND TERMINATION

10.1 Term

- (a) Subject to earlier termination, this Independent Certifier Agreement will commence on the date of the Project Agreement and continue in full force until:
 - (i) the latest Final Completion Date; or
 - (ii) such other date as may be mutually agreed between the PA Parties and the Independent Certifier.

10.2 Notice of Breach

- (a) If the Independent Certifier commits a breach of this Independent Certifier Agreement, the PA Parties may give written notice to the Independent Certifier:
 - (i) specifying the breach; and
 - (ii) directing its rectification in the period specified in the notice being a period not less than 7 days from the date of service of the notice.

10.3 Termination for Breach

- (a) If the Independent Certifier fails to rectify the breach within the period specified in the notice issued under Section 10.2, the PA Parties may, without prejudice to any other rights of the PA Parties or either of them, immediately terminate this Independent Certifier Agreement.

10.4 Termination for Financial Difficulty or Change in Control

- (a) The PA Parties may, without prejudice to any other rights which the PA Parties or either of them may have, terminate this Independent Certifier Agreement immediately if:
 - (i) events have occurred or circumstances exist which, in the opinion of the PA Parties, may result in or have resulted in an insolvency or a Change in Control of the Independent Certifier; or
 - (ii) the Independent Certifier has communications with its creditors with a view to entering into, or enters into, any form of compromise, arrangement or moratorium of any debts whether formal or informal, with its creditors.

10.5 Termination for Convenience

- (a) Notwithstanding anything to the contrary in this Independent Certifier Agreement, the PA Parties may, at any time, jointly terminate this Independent Certifier Agreement upon 30 days written notice to the Independent Certifier. The PA Parties and the Independent Certifier agree that, notwithstanding the 30 days' notice of termination, the Independent Certifier shall continue on a day-to-day basis thereafter until a new Independent Certifier is appointed.

10.6 Independent Certifier's Rights upon Termination for Convenience

- (a) Upon a termination under Section 10.5, the Independent Certifier will:
 - (i) be entitled to be reimbursed by the PA Parties for the value of the Certification Services performed by it to the date of termination; and
 - (ii) not be entitled to any damages or other compensation in respect of the termination and (without limitation) any amount in respect of:
 - (A) the lost opportunity to earn a profit in respect of the Certification Services not performed at the date of termination; and

- (B) any lost opportunity to recover overheads from the turnover which would have been generated under this Independent Certifier Agreement but for it being terminated.

10.7 Procedure upon Termination

- (a) Upon completion of the Independent Certifier's engagement under this Independent Certifier Agreement or earlier termination of this Independent Certifier Agreement (whether under Section 10.3, 10.4 or 10.5 or otherwise), the Independent Certifier must:
 - (i) cooperate with the PA Parties with respect to the transition of the Certification Services to a replacement certifier;
 - (ii) deliver to the PA Parties all Contract Material and all other information concerning the Project held or prepared by the Independent Certifier during the execution of work under this Independent Certifier Agreement; and
 - (iii) as and when required by the PA Parties, meet with them and such other persons nominated by them with a view to providing them with sufficient information to enable the PA Parties to execute the Project or the persons nominated to provide the Certification Services.

10.8 Effect of Termination

- (a) Except as otherwise expressly provided in this Independent Certifier Agreement, termination of this Independent Certifier Agreement shall be without prejudice to any accrued rights and obligations under this Independent Certifier Agreement as at the date of termination (including the right of the PA Parties to recover damages from the Independent Certifier).

10.9 Survival

- (a) Termination of this Independent Certifier Agreement shall not affect the continuing rights and obligations of the PA Parties and the Independent Certifier under Sections 7, 8, 10.6, 10.7, 10.8, 11, 12.7, 12.8 and this Section 10.9 or under any other provision which is expressed to survive termination or which is required to give effect to such termination or the consequences of such termination.

11 INDEMNITY

11.1 PA Parties to Save Independent Certifier Harmless

- (a) The PA Parties hereby indemnify and save the Independent Certifier completely harmless from any actions, causes of action, suits, debts, costs, damages, expenses, claims and demands whatsoever, at law or in equity, arising directly or indirectly in whole or in part out of any action taken by the Independent Certifier within the scope of its duties or authority hereunder.
- (b) The indemnity provided under this Section 11.1 shall not extend:

- (i) to any breach of this Independent Certifier Agreement, or any part or parts hereof, by the Independent Certifier, its employees, servants, agents or persons for whom it is in law responsible, or any negligent or unlawful act or omission or willful misconduct of the Independent Certifier, its employees, servants or persons for whom it is in law responsible (in respect of which the Independent Certifier shall indemnify the PA Parties, as referred to in Section 11.2);
 - (ii) to any action taken by the Independent Certifier outside the scope of authority set forth in this Independent Certifier Agreement, or any part or parts hereof; or
 - (iii) to any debt, cost, expense, claim or demand for which insurance proceeds are recoverable by the Independent Certifier.
- (c) This indemnity shall survive the termination of this Independent Certifier Agreement.

11.2 Independent Certifier to Save PA Parties Harmless

- (a) The Independent Certifier hereby indemnifies and saves the PA Parties, and their affiliated entities, subsidiaries and their respective directors, officers, employees, agents, permitted successors and assigns, completely harmless from any actions, causes of action, suits, debts, costs, damages, expenses, claims and demands whatsoever, at law or in equity, arising directly or indirectly in whole or in part out of any breach of this Independent Certifier Agreement, or any part or parts hereof, by the Independent Certifier, its employees, servants, agents or persons for whom it is in law responsible, or any negligent or unlawful act or omission or willful misconduct of the Independent Certifier, its employees, servants or persons for whom it is in law responsible.
- (b) The indemnity provided under this Section 11.2 to a PA Party shall not apply to the extent:
- (i) any negligent or unlawful act or omission or willful misconduct of such PA Party, its employees, servants or persons for whom it is in law responsible (in respect of which such PA Parties shall indemnify the Independent Certifier, as referred to in Section 11.1) directly caused the losses described in Section 11.2(a); or
 - (ii) any insurance proceeds are recoverable by such PA Party in respect of the losses described in Section 11.2(a).
- (c) This indemnity shall survive the termination of this Independent Certifier Agreement.

11.3 Conduct of Claims

- (a) Claims made by a third person against a party having, or claiming to have, the benefit of an indemnity pursuant to this Independent Certifier Agreement shall be conducted in accordance with the conduct of claims procedure described in Appendix D – Conduct of Claims to this Independent Certifier Agreement.

12 GENERAL

12.1 Entire Agreement

- (a) Except where provided otherwise in this Independent Certifier Agreement, this Independent Certifier Agreement constitutes the entire agreement between the parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Independent Certifier Agreement.

12.2 Negation of Employment

- (a) The Independent Certifier, its officers, directors, members, employees, servants and agents and any other persons engaged by the Independent Certifier in the performance of the Certification Services will not by virtue of this Independent Certifier Agreement or the performance of the Certification Services become in the service or employment of the PA Parties for any purpose.
- (b) The Independent Certifier will be responsible for all matters requisite as employer or otherwise in relation to such officers, directors, members, employees, servants and agents and other persons who are engaged by the Independent Certifier.

12.3 Waiver

- (a) No waiver made or given by a party under or in connection with this Independent Certifier Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the party giving such waiver, and delivered by such party to the other parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

12.4 Notices

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Independent Certifier Agreement shall be in writing (whether or not “written notice” or “notice in writing” is specifically required by the applicable provision of this Independent Certifier Agreement) and served by sending the same by registered mail, facsimile or by hand, as follows:

If to City:

City of Ottawa

110 Laurier Ave West

Ottawa, Ontario

K1P 1J1

Mail code: [REDACTED]

Attn: [REDACTED]

Email: [REDACTED]

If to DB Co: East West Connectors GP

Attn.: **[REDACTED]**
Email: **[REDACTED]**

with a copy to: **[REDACTED]**

[REDACTED]

Attn.: **[REDACTED]**
Email: **[REDACTED]**

If to Independent Certifier: **[REDACTED]**

[REDACTED]

Fax: **[REDACTED]**
Attn.: **[REDACTED]**
Email: **[REDACTED]**

- (b) Where any notice is provided or submitted to a party via facsimile, an original of the notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a party's failure to comply with this Section 12.4(b).
- (c) Any party to this Independent Certifier Agreement may, from time to time, change any of its contact information set forth in Section 12.4(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows the recipient party's receipt of such notice unless a later effective date is given in such notice.
- (d) Subject to Sections 12.4(e), 12.4(f) and 12.4(g):
 - (i) a notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
 - (ii) a notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
 - (iii) a notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.
- (e) If the party giving the notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 12.4.
- (f) If any notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after

4:00 p.m. (recipient's local time), then such notice shall be deemed to have been received by such recipient on the next Business Day.

- (g) A notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such notice was successful.

12.5 Transfer and Assignment

- (a) The Independent Certifier:
 - (i) must not assign, transfer, mortgage, charge or encumber any right or obligation under this Independent Certifier Agreement without the prior written consent of the PA Parties, which each PA Party may give or withhold in its absolute discretion (including, in respect of the City, if so required pursuant to a Contribution Agreement); and
 - (ii) agrees that any assignment, transfer, mortgage, charge or encumbrance will not operate to release or discharge the Independent Certifier from any obligation or liability under this Independent Certifier Agreement.
- (b) For the purposes of this Section 12.5, an assignment will be deemed to have occurred where there is a Change in Control of the Independent Certifier after the date of this Independent Certifier Agreement.
- (c) Each of the PA Parties may assign, transfer, mortgage, charge or encumber any right or obligation under this Independent Certifier Agreement in accordance with the terms of the Project Agreement.

12.6 Governing Laws and Jurisdictions

- (a) This Independent Certifier Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The PA Parties and the Independent Certifier agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Independent Certifier Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.
- (c) Nothing in this Independent Certifier Agreement affects the rights, protections and immunities of the Crown under the *Proceedings Against the Crown Act* (Ontario).

12.7 Confidentiality

- (a) The Independent Certifier must ensure that:
 - (i) neither it nor any of its officers, directors, members, employees, servants and agents disclose, or otherwise make public, any Contract Material or any other

information or material acquired in connection with or during the performance of the Certification Services without prior written approval of the PA Parties; and

- (ii) no Contract Material is used, copied, supplied or reproduced for any purpose other than for the performance of the Certification Services under this Independent Certifier Agreement.
- (b) The PA Parties may at any time require the Independent Certifier to give and to arrange for its officers, directors, members, employees, servants and agents engaged in the performance of the Certification Services to give written undertakings, in the form of confidentiality agreements on terms required by the PA Parties, relating to the non-disclosure of confidential information, in which case the Independent Certifier must promptly arrange for such agreements to be made.

12.8 Contract Material

- (a) The PA Parties and the Independent Certifier agree that the Independent Certifier does not and will not have any rights, including any Intellectual Property, in any Contract Material provided to the Independent Certifier or created or required to be created by either PA Party.
- (b) As between the PA Parties and the Independent Certifier, all title and ownership, including all Intellectual Property, in and to the Contract Material created or required to be created by the Independent Certifier as part of, or for the purposes of performing the Certification Services, is hereby assigned jointly to the PA Parties on creation, or where such title, ownership and Intellectual Property cannot be assigned before creation of the Contract Material, it will be assigned to the PA Parties on creation. In addition, to the extent that copyright may subsist in such Contract Material so created by the Independent Certifier, the Independent Certifier hereby waives all past, present and future moral rights therein and the Independent Certifier shall ensure that any agent or employee of Independent Certifier shall have waived all such moral rights. The PA Parties acknowledge and agree that as between the PA Parties, title, ownership and other rights to the foregoing shall be governed by the Project Agreement.
- (c) The Independent Certifier will do all such things and execute all such documents as reasonably requested by either of the PA Parties in order to confirm or perfect the assignment of Intellectual Property in the Contract Material referred to in Section 12.8(b).

12.9 Amendment

- (a) This Independent Certifier Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the PA Parties (provided that, in respect of the City, such agreement may be subject to its obligations under a Contribution Agreement and require the consent of a Contribution Agreement Party) and the Independent Certifier and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Independent Certifier Agreement.

12.10 Severability

- (a) Each provision of this Independent Certifier Agreement shall be valid and enforceable to the fullest extent permitted by law. If the courts of a competent jurisdiction shall declare any provision of this Independent Certifier Agreement invalid, unenforceable or illegal, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Independent Certifier Agreement. If any such provision of this Independent Certifier Agreement is invalid, unenforceable or illegal, the parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Independent Certifier Agreement as near as possible to its original intent and effect.

12.11 Enurement

- (a) This Independent Certifier Agreement shall enure to the benefit of, and be binding on, each of the parties and their respective successors and permitted transferees and assigns.

12.12 Counterparts

- (a) This Independent Certifier Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any party providing its signature in faxed form shall promptly forward to such party an original signed copy of this Independent Certifier Agreement which was so faxed.

12.13 Maintenance of Records

- (a) The Independent Certifier shall retain and maintain in safe storage, at its expense, complete and accurate records related to all work performed under this Independent Certifier Agreement (i) for a minimum period of 7 years or such longer period as required by Applicable Law, or (ii) until delivery of such Contract Material to the PA Parties in accordance with Section 10.7(a)(ii), and such records will be made available to the PA Parties and/or Contribution Agreement Parties upon request.

APPENDIX A

CERTIFICATION SERVICES

Without limiting the other provisions of this Independent Certifier Agreement and the Project Agreement, the Independent Certifier shall provide the following:

- (a) Receive and monitor drawings and documents related to the development of the design as necessary for the Independent Certifier to be informed as to the progress of the Works and to provide an opinion in the event of a Dispute related to the development of the design.
- (b) Receive and monitor progress reports as necessary for the Independent Certifier to be informed as to the progress of the Works, including review of the Works Reports.
- (c) Review information relating to Construction Period Quality Failures, Delay Events and Compensation Events.
- (d) Review information relating to Variation Enquiries, DB Co Variation Notices, Variations, Estimates, claims for extension of time and compensation and consult with the relevant party.
- (e) In accordance with Section 14.1(b) of the Project Agreement, attend meetings and participate, as necessary, in the activities of the Works Committee.
- (f) In accordance with Section 11.15 of the Project Agreement, determine whether the manner in which DB Co Makes Good any Construction Defects is acceptable.
- (g) In accordance with Section 11.15 of the Project Agreement, identify when it is not expedient for DB Co to correct any Construction Defects, and, where the City and DB Co do not agree on the amount to be deducted from the amount of the Guaranteed Price, being the difference in value between the Works as performed and that called for by the Project Agreement, the Independent Certifier shall determine such amount.
- (h) Review the draft Testing & Commissioning Program and the detailed tests, test methodology and expected test results proposed by DB Co and provide comments, including to report on the effectiveness of the Testing & Commissioning Program, to identify any errors or omissions, and to report any risks.
- (i) Monitor the Commissioning Tests (as indicatively described in Schedule 14 – Testing & Commissioning to the Project Agreement) and other tests, including re-tests, to be performed as set out in the Final Commissioning Program or as otherwise required for DB Co to achieve any Substantial Completion and any Final Completion.
- (j) Monitor and report on, at a minimum on a monthly basis as part of the IC Monthly Report or more regularly as deemed necessary, the requirements, progress and results of all commissioning.
- (k) Prior to any certification, consider the views and comments of both DB Co and the City in relation to the satisfaction of the conditions for certification.

- (l) Conduct and report inspections of the Works as necessary for the Independent Certifier to be satisfied that the Works are proceeding in accordance with the requirements of the Project Agreement. Report on the observations, findings and potential risks to certification as a result of the regular inspections as part of the IC Monthly Report.
- (m) Review relevant documentation, including the final Design Development Submittals, Construction Document Submittals, design certificates, construction certificates and approvals, Permits, Licences and Approvals, certifications, third party acceptance, shop drawings, site instructions, mock ups, Record Drawings, all quality management plans, sustainability requirements, certifications, test results, quality assurance audits, letters of assurance from professionals, schedules (including the Works Schedule) and reports (including the Works Report) provided to the Independent Certifier pursuant to the Project Agreement.
- (n) Monitor the requirements, progress and results of all DB Co Commissioning.
- (o) [Intentionally Deleted].
- (p) Identify any errors or omissions made during the conduct of any such Commissioning Tests referenced in item (i) above and to advise DB Co and City with respect to the implications of those errors and omissions, to the extent that the Independent Certifier may reasonably be aware.
- (q) Upon receipt of notice from DB Co requesting the issuance of the Substantial Completion Certificates or the Final Completion Certificates, as applicable, consider such request and, within the time period set out in the Project Agreement and in accordance with the Project Agreement, either:
 - (i) issue the applicable certificate; or
 - (ii) issue a report detailing the matters that the Independent Certifier considers are required to be performed prior to issuing the applicable certificate.
- (r) Upon notice from DB Co that the matters required to be performed prior to issuing the applicable certificate have been completed, re-inspect the Works or re-consider the matters specified to be performed.
- (s) Prepare, in consultation with DB Co and City, as soon as reasonably practicable and, in any event within, the time period specified in Sections 25.10(e) to 25.10(f) and 25.12A of the Project Agreement, the Minor Deficiencies Lists, and Remaining Works Minor Deficiencies Lists, which Minor Deficiencies Lists and Remaining Works Minor Deficiencies List will include an estimate of the cost and the time for rectifying the Minor Deficiencies or Remaining Works Minor Deficiencies, as applicable, and a schedule for the completion and rectification of the Minor Deficiencies or Remaining Works Minor Deficiencies, as applicable.
- (t) Certify completion of:
 - (i) Utility Company Self-Performed Works that are the subject of a Request for Utility Works Payment in accordance with Section 11.29 the Project Agreement;

- (ii) Art Cash Allowance Items that are the subject of a Request for Art Payment in accordance with Section 11.30 the Project Agreement; and
 - (iii) Nominated Signalling Subcontractor Works that are the subject of a Request for Nominated Signalling Subcontractor Works Payment in accordance with Section 11.31 the Project Agreement.
- (u) Prior to any Substantial Completion, review DB Co cash allowance expenditures against the installations in respect of the:
 - (i) Utility Company Self-Performed Works and the Utility Company Works Cash Allowance;
 - (ii) Art Cash Allowance Items and the Art Cash Allowance; and
 - (iii) Nominated Signalling Subcontractor Works and the Nominated Signalling Subcontractor Works Cash Allowance.
- (v) After any Substantial Completion, reconcile DB Co invoices for expenditure recovery against City budgets and the Utility Company Works Cash Allowance, Art Cash Allowance, and Nominated Signalling Subcontractor Works Cash Allowance.
- (w) Review and observe installation of all equipment, furniture, fixtures, information technology, communication equipment, telephone equipment and anything similar to the foregoing (collectively, the “**Installed Equipment**”) into or onto the Project by the City or any agent or contractor of the City either before or after any Substantial Completion and provide a report to the City and DB Co identifying any damage to the Project which has been caused as a result of the installation of such Installed Equipment into or onto the Project by City, its contractors and/or agents.
- (x) Provide any determinations contemplated in the Project Agreement, which determinations may be subject to final resolution between the PA Parties pursuant to Schedule 27 - Dispute Resolution Procedure to the Project Agreement.
- (y) Participate in and give the PA Parties and their counsel reasonable cooperation, access and assistance (including providing or making available documents, information and witnesses for attendance at hearings and other proceedings) in connection with any proceedings between the PA Parties that relate to the Certification Services.
- (z) Provide periodic reports to the PA Parties, as follows:
 - (i) a progress report on the progress of the Works no later than fifteen Business Days following the end of each month of the Construction Period in respect of the previous month or as otherwise agreed by the PA Parties (the “**IC Monthly Report**”); Commencing no less than 180 days prior to each Scheduled Substantial Completion Date, the IC Monthly Report shall contain specific reference to and listing of the work that needs to be done before such Substantial Completion Certificate or Final Completion Certificate can be issued; and,

- (ii) accompanying the IC Monthly Reports delivered for the months of May, August, November and February, a quarterly report (the “**IC Quarterly Report**”) for the quarters ending March 31st, June 30th, September 30th and December 31st respectively, that contains the following information certified in accordance with the standard of care set out in Section 3.3 of the Independent Certifier Agreement:
 - (A) the extent (expressed as a percentage) of completion of the Works as of the last day of the applicable quarter;
 - (B) the value of the Works completed as of the last day of the applicable quarter;
 - (C) the forecasted extent (expressed as a percentage) of completion of the Works as of the last day of the applicable quarter and for the next four quarters; and
 - (D) the forecasted value of the Works anticipated to be completed as of the last day of the applicable quarter and for the next four quarters.
- (aa) Provide the Certification Services with respect to Construction Period Payments set out in Schedule 21 – Construction Period Payments of the Project Agreement including cooperating with PA Parties (including their consultants and advisors) to establish the Earned Value Measurement Techniques to be used in the Certification Services, including review of the measurement methods proposed by DB Co for the purposes of measuring Earned Value, and agreement of any proposed changes to the Credit Rules, in accordance with Appendix E hereto (Attachment F to Schedule 21 of the Project Agreement).
- (bb) Provide advice on other matters that may arise that both PA Parties may jointly require.
- (cc) Review the reports and plans prepared by DB Co, and provide the determinations required from the Independent Certifier, pursuant to Article 13 of the Project Agreement.
- (dd) In implementing the Certification Services, identify any risks that may impede the issuance of a Substantial Completion Certificate or a Final Completion Certificate and inform the PA Parties thereof. Following the identification of any risks, monitor and report to the PA Parties on the progress as part of the IC Monthly Report until such risks are fully resolved.
- (ee) Develop and implement a certification quality plan identifying the processes and outcomes of the Certification Services including timelines, deliverables and a description of the input required from the PA Parties to carry out the Certification Services.
- (ff) Provide written opinions to the City and DB Co as to whether the City acted reasonably in delivering the Proceeding At Risk Notice pursuant to Section 14.6 of the Project Agreement.
- (gg) To the extent not already contemplated in the other Certification Services or otherwise in this Independent Certifier Agreement, review and certify the

determination of eligible costs under the Contribution Agreements to the Contribution Agreement Parties, including:

- (i) conducting a due diligence assessment of the schedule and cash flow forecast and certifying that this schedule and cash flow forecast is achievable, reviewing and certifying that eligible costs are reasonable and meet the eligible cost criteria in a Contribution Agreement, and reviewing and certifying the percentage of a Contribution Agreement Party's eligible costs of the total eligible costs under a Contribution Agreement;
- (ii) reviewing and certifying for each claim by the City under a Contribution Agreement, including interim claims, that all costs are eligible costs and that the work has been constructed and completed in accordance with the terms and conditions of the Contribution Agreement;
- (iii) confirming to the Contribution Agreement Parties that all information provided and/or submitted to the PA Parties and/or the Contribution Agreement Parties in accordance with this Agreement is true and accurate and prepared in good faith to the best of its skill, judgement and knowledge;
- (iv) Executing and delivering certificates in the form attached hereto as Appendix F when requested by the City.

APPENDIX B

INDEPENDENT CERTIFIER FEE

The Fee shall be invoiced by the Independent Certifier to each PA Party in accordance with Section 8 of this Agreement, using invoices in form and substance acceptable to the PA Parties, acting reasonably, on a monthly basis. The total fixed fee for all Certification Services described in Appendix A (other than item (bb) in Appendix A), shall be in the amount of \$[REDACTED], plus HST. Such fixed fee shall not be subject to escalation or adjustment except by Certification Services Variation. Each monthly invoice shall also include, and separately identify, any amounts claimed for services performed pursuant to any Certification Services Variation, and/or Certification Services jointly required by the PA Parties in accordance with item (bb) in Appendix A, for such payment period, and shall set out as a separate line item the HST payable. Each PA Party shall pay its respective portion of the Fee within 30 days of receipt of a complete and valid invoice.

The following hourly rates shall apply for Certification Services jointly required by the PA Parties in accordance with item (bb) in Appendix A, and may apply to Certification Services Variations in accordance with Sections 9.4 and 9.5 of the Independent Certifier Agreement. Hourly rates set out below are all inclusive and include applicable taxes (other than HST), all labour and materials, insurance costs, disbursements (examples: duplicating, delivery and communications) and all other overhead including any fees or other charges required by law. The PA Parties will not reimburse the Independent Certifier for any costs or expenses for hospitality, food or other incidental expenses.

| [REDACTED] | Lead Mechanical & Commissioning |
| [REDACTED] | Back-up Electrical & Commissioning |
| [REDACTED] | Project Coordinator & Document Control |
| [REDACTED] | Project Coordinator & Document Control |
| [REDACTED] | Back-up Mechanical & Commissioning |
| [REDACTED] | Engineering Advisory and Support |
| [REDACTED] | Document Control |

APPENDIX D

CONDUCT OF CLAIMS

This Appendix D shall apply to the conduct of claims, made by a third person against a party having, or claiming to have, the benefit of an indemnity pursuant to this Independent Certifier Agreement. The party having, or claiming to have, the benefit of the indemnity is referred to as the “**Beneficiary**” and a party giving the indemnity is referred to as an “**Indemnifier**”.

- (1) If the Beneficiary receives any notice, demand, letter or other document concerning any claim for which it appears that the Beneficiary is, or may become entitled to, indemnification under Section 11 of the Independent Certifier Agreement, the Beneficiary shall give written notice to each Indemnifier potentially obligated in respect thereof, as soon as reasonably practicable and in any event within 10 Business Days of receipt of the same. Such notice shall specify with reasonable particularity, to the extent that information is available, the factual basis for the claim and the amount of the claim.
- (2) Subject to Sections (3), (4) and (5) of this Appendix D, on the giving of such notice by the Beneficiary, where it appears that the Beneficiary is or may be entitled to indemnification from an Indemnifier in respect of all, but not part only, of the liability arising out of the claim, such Indemnifier shall (subject to providing the Beneficiary with a secured indemnity to the Beneficiary’s reasonable satisfaction against all costs and expenses that the Beneficiary may incur by reason of such action) be entitled to dispute the claim in the name of the Beneficiary at the Indemnifier’s own expense and take conduct of any defence, dispute, compromise, or appeal of the claim and of any incidental negotiations. The Beneficiary shall give such Indemnifier all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. The Beneficiary shall have the right to employ separate counsel in respect of such claim and the reasonable fees and expenses of such counsel shall be to the account of the Indemnifier only where representation of both the Indemnifier and the Beneficiary by common counsel would be inappropriate due to any actual or potential conflicting interests between the Indemnifier and the Beneficiary. If and to the extent that both City and DB Co are given notice in respect of the same claim, they shall cooperate in the conduct of the claim and give each other such reasonable access and assistance as may be necessary or desirable for purposes of considering, resisting and defending such claim.
- (3) With respect to any claim conducted by an Indemnifier:
 - (i) the Indemnifier shall keep the Beneficiary fully informed and consult with it about material elements of the conduct of the claim;
 - (ii) the Indemnifier shall not bring the name or reputation of the Beneficiary into disrepute;
 - (iii) the Indemnifier shall not pay, compromise or settle such claims without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed;
 - (iv) the Indemnifier shall not admit liability or fault to any third party without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed; and

- (v) the Indemnifier shall use commercially reasonable efforts to have the Beneficiary named as a beneficiary under any release given by the persons bringing the claim to which this Section (3) relates.
- (4) The Beneficiary shall be free to pay or settle any such claim on such terms as it thinks fit and without prejudice to its rights and remedies under this Independent Certifier Agreement if:
 - (i) none of the Indemnifiers is entitled to take conduct of the claim in accordance with Section (2);
 - (ii) none of the Indemnifiers notifies the Beneficiary of its intention to take conduct of the relevant claim as soon as reasonably practicable and in any event within 10 Business Days of the notice from the Beneficiary under Section (1) or each of the Indemnifiers notifies the Beneficiary that it does not intend to take conduct of the claim; or
 - (iii) none of the Indemnifiers complies in any material respect with Section (3).
- (5) The Beneficiary shall be free at any time to give notice to the applicable Indemnifier that the Beneficiary is retaining or taking over, as the case may be, the conduct of any defence, dispute, compromise or appeal of any claim, or of any incidental negotiations, to which Section (2) applies. For greater certainty, the Independent Certifier acknowledges and agrees that where City is the Beneficiary, City may retain or take over such conduct in any matter involving Personal Information (as it is defined in the Project Agreement) or any matter involving public policy. On receipt of such notice the applicable Indemnifier shall promptly take all steps necessary to transfer the conduct of such claim to the Beneficiary, and shall provide to the Beneficiary all relevant documentation and all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. If the Beneficiary gives any notice pursuant to this Section (5), then the applicable Indemnifier shall be released from any liabilities arising under the applicable indemnity hereunder in respect of the applicable claim.
- (6) If an Indemnifier pays to the Beneficiary an amount in respect of an indemnity and the Beneficiary subsequently recovers, whether by payment, discount, credit, saving, relief or other benefit or otherwise, a sum or anything else of value (the “Recovery Amount”) which is directly referable to the fact, matter, event or circumstances giving rise to the claim under the indemnity, the Beneficiary shall forthwith repay to that Indemnifier whichever is the lesser of:
 - (i) an amount equal to the Recovery Amount less any out-of-pocket costs and expenses properly incurred by the Beneficiary in recovering the same; and
 - (ii) the amount paid to the Beneficiary by such Indemnifier in respect of the claim under the relevant indemnity,

provided that there shall be no obligation on the Beneficiary to pursue any Recovery Amount and that the Indemnifier shall be repaid only to the extent that the Recovery Amount, aggregated with any sum recovered from the Indemnifier, exceeds the loss sustained by the Beneficiary except, however, that if the Beneficiary elects not to pursue a Recovery Amount, the Indemnifier shall be entitled to require an assignment to it of the right to do so.

- (7) Any person taking any of the steps contemplated by this Appendix D shall comply with the requirements of any insurer who may have an obligation to provide an indemnity in respect of any liability arising under this Independent Certifier Agreement.

APPENDIX E

CREDIT RULES

1. CREDIT RULES FOR THE EVALUATION OF EARNED VALUE

1.1 Purpose of Credit Rules

- (a) The Credit Rules set out requirements agreed between the City and DB Co for use and interpretation of the Earned Value Measurement Techniques, pursuant to Schedule 21 of the Project Agreement.

1.2 Change of Credit Rules

- (a) In the event that DB Co or the City propose a change to the Credit Rules, the Independent Certifier may agree to such proposed change to the Credit Rule, provided that:
 - (i) any proposed change to the Credit Rules will result in revised Credit Rules that:
 - (A) continue to meet the Earned Value Measurement Techniques; and
 - (B) follow the principles, guidance, and intent of the Credit Rules set out in this Attachment F, wherever possible;
 - (ii) any proposed change to the Credit Rules is subject to consultation with the City and DB Co at least three months prior to the first Construction Period that uses those revised Credit Rules;
 - (iii) the Independent Certifier considers any responses made by the City and DB Co to a proposed change to the Credit Rules and the Independent Certifier provides a report justifying its decision regarding acceptance or rejection of any proposal to change the Credit Rules; and
 - (iv) prior to the start of the first Construction Period that is to use the revised Credit Rules for the evaluation of Earned Value:
 - (A) the proposed changes to the Credit Rules are agreed to by the Independent Certifier; and
 - (B) both the City and DB Co receive the revised Credit Rules from the Independent Certifier.

1.3 Selection of Measurement Methods

- (a) In principle, when selecting the appropriate measurement methods from the Earned Value Measurement Techniques, the following principles shall be applied:
 - (i) for tangible work or tasks taking three Construction Period Months or more to perform, the measurement methods shall be considered in the following decreasing order of preference:

- (A) firstly, activity completion and physical measurement using the fixed formula 0/100 method; and
 - (B) secondly, weighted milestone;
- (ii) for tangible work or tasks taking one or two Construction Period Months to perform, the measurement methods shall be considered in the following decreasing order of preference:
 - (A) activity completion and physical measurement using the fixed formula 0/100 method; and
- (iii) for intangible work or tasks, the measurement methods shall be considered in the following decreasing order of preference:
 - (A) firstly, apportioned effort; and
 - (B) secondly, only where apportioned effort is not possible, level of effort.
- (b) Table 1 sets out the measurement methods that shall be used from the Earned Value Measurement Techniques for specific cost categories, unless there are technical reasons preventing these measurement methods from being used. The specific cost categories in Table 1 are set out in ‘Standard Cost Codes for Capital Projects – Definitions’, US Federal Transportation Administration.

| Table 1: Earned Value measurement methods for specific cost categories | | |
|---|---|---|
| Standard Cost Code | Description | Measurement Method from the Earned Value Measurement Techniques |
| 10 | Guideway | |
| 10.01 | Guideway: at-grade exclusive right-of-way (including trackwork) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.04 | Guideway: aerial structure (including trackwork) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.05 | Guideway: Built-up fill | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.06 | Guideway: underground cut & cover (including trackwork) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.07 | Guideway: underground tunnel (including trackwork) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.09 | Track: Direct fixation | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.10 | Track: Embedded | Activity completion and physical measurement using the fixed formula 0/100 method |
| 10.11 | Track: Ballasted | Activity completion and physical measurement using the fixed formula 0/100 method |

| Table 1: Earned Value measurement methods for specific cost categories | | |
|---|---|---|
| Standard Cost Code | Description | Measurement Method from the Earned Value Measurement Techniques |
| 10.12 | Track: Special (switches, turnouts) | Activity completion and physical measurement using the fixed formula 0/100 method |
| 20 | Stations, Stops, Terminals, Intermodals | |
| 20.01 | At-grade station; stop; shelter; mall; terminal; platform | Activity completion and physical measurement using the fixed formula 0/100 method |
| 20.03 | Underground station; stop; shelter; mall; terminal; platform | Activity completion and physical measurement using the fixed formula 0/100 method |
| 20.05 | Joint development | Activity completion and physical measurement using the fixed formula 0/100 method |
| 30 | Support Facilities: Yards, Shops and Admin Buildings | |
| 30.01 | Administration Building: Office, sales, storage, revenue counting | Activity completion and physical measurement using the fixed formula 0/100 method |
| 30.03 | Heavy maintenance facility | Activity completion and physical measurement using the fixed formula 0/100 method |
| 30.05 | Yard and Yard Track | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40 | Sitework and Special Conditions | |
| 40.01 | Demolition; clearing; earthwork | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.02 | Site utilities; utility relocation | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.03 | Hazardous material; contaminated soil mitigation; ground water treatments | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.04 | Environmental mitigation, e.g. wetlands, historic/archeologic, parks | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.05 | Site structures including retaining walls; sound walls and other structures | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.06 | Pedestrian and bike access and accommodation; landscaping | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.07 | Automobile; bus; van access ways including roads; parking lots | Activity completion and physical measurement using the fixed formula 0/100 method |
| 40.08 | Temporary facilities | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50 | Systems | |
| 50.01 | Train control and signals | Activity completion and physical measurement using the fixed formula 0/100 method |

| Table 1: Earned Value measurement methods for specific cost categories | | |
|--|---|---|
| Standard Cost Code | Description | Measurement Method from the Earned Value Measurement Techniques |
| 50.02 | Traffic signals and crossing protection | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.03 | Traction power supply and substations | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.04 | Traction power distribution and catenary | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.05 | Communications | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.06 | Fare collection system and equipment | Activity completion and physical measurement using the fixed formula 0/100 method |
| 50.07 | Central control | Activity completion and physical measurement using the fixed formula 0/100 method |
| 80 | Professional Services and Agency Costs | |
| 80.01 | Preliminary design | Weighted milestone |
| 80.02 | Final design | Weighted milestone |
| 80.03 | Project management for design and construction | Apportioned effort |
| 80.04 | Construction administration and management | Apportioned effort |
| 80.05 | Professional liability and other insurance costs | Weighted milestone |
| 80.06 | Legal; permits; review fees by other agencies, cities, etc; | Weighted milestone |
| 80.07 | Surveys, testing (quality related), investigation, inspection | Weighted milestone or apportioned effort |
| 80.08 | Start up; testing and commissioning | Weighted milestone or apportioned effort |

- (c) The measurement methods associated with procurement of materials shall be in accordance with the following principles:
- (i) except as set out in Section 1.3(c)(ii), the costs of materials used in construction shall be included in the cost of each construction task and shall be evaluated for the purposes of Earned Value as part of each construction task using physical measurement; and
 - (ii) the costs of rail and large long-lead equipment manufactured off-site before installation, such as transformers and packaged air conditioning units, shall be evaluated for the purposes of Earned Value using the fixed formula measurement method, based on the payment terms of the supply contract, except that [REDACTED]% of any payments made by DB Co to the supplier will not be credited for the purposes of Earned Value until the rail or large equipment manufactured off-site is delivered to the Lands or a bonded warehouse.
- (d) The measurement methods associated with procurement of plant, such as cranes and road vehicles, shall be in accordance with the following principles:

- (i) the costs of plant, such as cranes and road vehicles, shall be evaluated for the purposes of Earned Value using the fixed formula measurement method, based on the payment terms of the supply contract, except that [REDACTED]% of any payments made by DB Co to the supplier will not be credited for the purposes of Earned Value until the plant is delivered to the Lands or a bonded warehouse.
- (e) In order to make the measurement of Earned Value more efficient during mobilization, DB Co may choose to identify a tranche of its mobilization cost, the amount of which will be equal to the mobilization cost agreed to between DB Co and the Lenders or Lenders' Consultant of the Cost of the Works that shall be automatically credited for the purposes of measuring Earned Value at Financial Close (the "**Mobilization Credit**"), where:
 - (i) the sum of the costs identified to the Mobilization Credit and the costs identified to the cost codes from Table 1 shall remain equal to the Cost of the Works;
 - (ii) the scope of activity associated with the Mobilization Credit shall be documented by DB Co to the satisfaction of the Independent Certifier before the end of the second Construction Period Month in order to avoid double counting with the Earned Value for activities that are not included within the Mobilization Credit; and
 - (iii) the Earned Value for the activities included within the Mobilization Credit shall be credited as Earned Value without using a measurement method from the Earned Value Management Techniques.

CONTRIBUTION AGREEMENT CERTIFICATES

[Federal and Provincial certificates to be appended.]

SCHEDULE 7A
STANDBY LETTER OF CREDIT

[See Attached]

SCHEDULE 7B

(East Warranty Letter of Credit and West Warranty Letter of Credit are attached)

[REDACTED]

EAST WARRANTY LETTER OF CREDIT

Letter of Credit: #[•]

Date: [•]

City of Ottawa
[•]

Attn: [•]

Dear Sirs/Madams:

RE: Confederation Line Extension

At the request of our client, [•] (“**DB Co**”), we, [insert name and address of issuing bank], hereby issue in favour of the City of Ottawa (the “**City**”), an irrevocable standby letter of credit (the “**Letter of Credit**”) in the amount of [REDACTED].

The amount available under this Letter of Credit is payable to the City at any time, and from time to time, upon (a) receipt by us of a written demand for payment, accompanied by a certificate signed by an officer of the City certifying that the City is entitled to draw on this Letter of Credit pursuant to Section 11.18 of a project agreement dated [•] (as amended from time to time, the “**Project Agreement**”) and (b) presentation of the original of this Letter of Credit.

This Letter of Credit will expire at 5:00 p.m. on [insert expiry date] (the “**Expiry Date**”), and the City may call for payment of any amount outstanding under this Letter of Credit at any time up to 5:00 p.m. on that date should this Letter of Credit not be extended.

It is a condition of this Letter of Credit that it shall be automatically extended, without amendment, for one year from the expiration date hereof, or any future expiration date, unless, at least 30 days prior to any expiration date, we notify you, in writing, by courier, that we elect not to consider this Letter of Credit renewed for any such additional period. Upon receipt by you of such notice, you may draw the full amount hereunder by means of your demand in accordance with the preceding paragraph.

Partial drawings are permitted.

We hereby agree that demands delivered under this Letter of Credit will be duly honoured upon presentation provided that all terms and conditions herein have been complied with.

Written demands drawn under this Letter of Credit shall state on their face that they are drawn under Letter of Credit #[•].

It is understood that [insert name of issuing bank] is obligated under this Letter of Credit for payments of monies only.

The Project Agreement is referred to herein for reference purposes only and does not form part of the terms of this Letter of Credit.

This Letter of Credit is subject to the Uniform Customs and Practice for Documentary Credits (2007 Revision) of the International Chamber of Commerce (ICC Publication No. 600) (the “UCP”) with the exception of Articles 18-30 inclusive (other than Article 29a, which shall apply) and Articles 31b, 31c and 32 except to the extent, if any, inconsistent with the express terms of this Letter of Credit.

Notwithstanding Article 36 of the UCP, if this Letter of Credit expires during an interruption of business as contemplated in such Article 36, we shall honour any demand made under this Letter of Credit prior to the Expiry Date, within 30 days after the date on which such interruption of business ends (and we shall notify you promptly when it does so end). For matters not covered by such publication, this Letter of Credit shall be governed by and construed in accordance with the laws of the Province of Ontario.

Yours very truly,

SCHEDULE 7C
REMAINING WORKS LETTER OF CREDIT
[REDACTED]

Letter of Credit: #[•]

Date: [•]

City of Ottawa
[•]

Attn: [President and Chief Executive Officer]

Dear Sir/Madam:

RE: Confederation Line Extension

At the request of our client, [•] (“DB Co”), we, [insert name and address of issuing bank], hereby issue in favour of the City of Ottawa (the “City”), as beneficiary, an irrevocable standby letter of credit (the “Letter of Credit”) in the amount of [REDACTED].

The amount available under this Letter of Credit is payable to the City, at any time and from time to time, upon (a) receipt by us of a written demand for payment, accompanied by a certificate signed by an officer of the City certifying the City is entitled to draw on this Letter of Credit pursuant to Section 11.18A of a project agreement dated [•] (as amended from time to time, the “Project Agreement”), and (b) presentation of the original of this Letter of Credit.

This Letter of Credit will expire at 5:00 p.m. on [insert expiry date] (the “Expiry Date”), and the City may call for payment of any amount outstanding under this Letter of Credit at any time up to 5:00 p.m. on that date should this Letter of Credit not be extended.

It is a condition of this Letter of Credit that it shall be automatically extended, without amendment, for one year from the expiration date hereof, or any future expiration date, unless, at least 30 days prior to any expiration date, we notify you, in writing, by courier, that we elect not to consider this Letter of Credit renewed for any such additional period. Upon receipt by you of such notice, you may draw the full amount hereunder by means of your demand.

Partial drawings are permitted.

We hereby agree that demands delivered under this Letter of Credit will be duly honoured upon presentation provided that all terms and conditions herein have been complied with.

Written demands drawn under this Letter of Credit shall state on their face that they are drawn under Letter of Credit #[•].

It is understood that **[insert name of issuing bank]** is obligated under this Letter of Credit for payments of monies only.

The Project Agreement is referred to herein for reference purposes only and does not form part of the terms of this Letter of Credit.

This Letter of Credit is subject to the Uniform Customs and Practice for Documentary Credits (2007 Revision) of the International Chamber of Commerce (ICC Publication No. 600) (the “UCP”) with the exception of Articles 18-30 inclusive (other than Article 29a, which shall apply) and Articles 31b, 31c and 32 except to the extent, if any, inconsistent with the express terms of this Letter of Credit. Notwithstanding Article 36 of the UCP, if this Letter of Credit expires during an interruption of business as contemplated in such Article 36, we shall honour any demand made under this Letter of Credit prior to the Expiry Date, within 30 days after the date on which such interruption of business ends (and we shall notify you promptly when it does so end). For matters not covered by such publication, this Letter of Credit shall be governed by and construed in accordance with the laws of the Province of Ontario.

Yours very truly,

SCHEDULE 8

LIST OF DB CO PARTIES

[REDACTED]

SCHEDULE 9

KEY INDIVIDUALS

At Commercial Close, DB Co shall notify the City of the status of the accreditations, including licences, courses and certifications, required to be obtained by the Key Individuals, as defined under the “Qualifications” column in the table below. For those accreditations not yet obtained at Commercial Close, DB Co shall notify the City of the status of such accreditations upon six months after Commercial Close. If such accreditations have not been granted by the applicable licencing or accreditation entities within six months of Commercial Close, the City, at its discretion, may exercise its right in accordance Section 12.4(c) of the Project Agreement to require replacement of the applicable Key Individual with an individual possessing the required accreditations.

A. Key Individuals – Works

| Position | Function | Qualifications | Name and Contact Information | Liquidated Damages Amount |
|-----------------------|--|---|-------------------------------------|--|
| DB Co Representative | The DB Co Representative shall have full authority to act on behalf of DB Co, and shall be responsible for overall authority and leadership of DB Co, and all DB Co parties, in accordance with the Project Agreement. | The DB Co Representative shall have a minimum of 10 years’ experience. This shall include executive and P3 experience. *RFQ, Project Executive | [REDACTED] | <ul style="list-style-type: none">- \$[REDACTED] pursuant to Section 12.4 (a) of the Project Agreement- \$[REDACTED] per day, pursuant to Section 12.4 (b) of the Project Agreement |
| Design Build Director | The Design Build Director shall be responsible for ensuring that all activities with respect to the Works are fully integrated with each other. | The Design Build Director shall have a minimum of 15 years’ experience. This shall include design, construction and P3 or Design-Build experience, on projects of similar scope and complexity. | [REDACTED] | <ul style="list-style-type: none">- \$[REDACTED] pursuant to Section 12.4 (a) of the Project Agreement- \$[REDACTED] per day, pursuant to Section 12.4 (b) of the Project Agreement |

SCHEDULE 10

REVIEW PROCEDURE

ARTICLE 1 WORKS SUBMITTALS

- 1.1 The provisions of this Schedule 10 shall apply to the Design Development Submittals, the Construction Document Submittals, the Design Data and any and all items, documents and anything else required or specified by the Project Agreement, including all Works Submittals listed in Appendices A and B to this Schedule 10, in respect of:
- (a) the East Works to be submitted to, reviewed or otherwise processed by the City in accordance with the Review Procedure prior to East Substantial Completion, or after East Substantial Completion in respect of the completion of East Minor Deficiencies, including any and all subsequent revisions, amendments and changes thereto; and
 - (b) the West Works to be submitted to, reviewed or otherwise processed by the City in accordance with the Review Procedure prior to West Substantial Completion, or after West Substantial Completion in respect of the completion of West Minor Deficiencies, including any and all subsequent revisions, amendments and changes thereto.
- (collectively and individually, “Works Submittal” or “Works Submittals” as applicable in this Schedule 10).
- 1.2 For clarity, the provisions of this Schedule 10, including any deadlines for submission or review set out herein, shall not apply to any processing or review of any Permits, Licences, Approvals and Agreements.
- 1.3 Subject to Article 1.2, if the City fails to meet the timelines set out in this Schedule 10 with respect to its review of any Submittals, including due to delay caused by the City Design Team, RTG, NCC or MTO, such failure shall be deemed to be a failure by the City to comply with the timelines set out in this Schedule 10.
- 1.4 In general, Works Submittals shall consist of the following. Specific requirements for each of these Work Submittals are detailed further in Appendices A and B.
- (a) Design Development Submittals:
 - (i) Prior to the preparation of each Pre-Final Design Development Submission, DB Co shall develop a basis of design report for each discipline, based on the Project Agreement and PSOS requirements. The basis of design report shall describe the technical approach planned for the Project as well as the technical requirements, security mitigation and measures to be employed, design codes and parameters to be used;
 - (ii) Pre-Final Design Development (PFDD), which is the stage of design development where the design details of the relevant Works Submittal are established and drawings and specifications for construction have been

developed but are not yet fully finalised;

- (iii) Final Design Development (FDD), which is the stage of design development where the design details of the relevant Works Submittal are finalised and the construction drawings and construction specifications for the designed element are also finalised.
 - (b) Construction Document Submittals;
 - (c) other reports, studies, matrices and plans listed in this Schedule 10 and in Appendices A and B to this Schedule 10;
 - (d) other reports, studies and plans identified in the relevant sections of the Project Agreement; and
 - (e) Works Schedules in accordance with Schedule 12 – Works Scheduling Requirements and as per Article 3.13.
- 1.5 DB Co shall be responsible for determining any and all necessary Works Submittals, as specified in the relevant sections of the Project Agreement.
- 1.6 Other reports, studies and plans shall be submitted as follows:
- (a) DB Co shall be responsible for determining the timing of the preparation of reports, studies and plans required in the preparation of the PFDD, FDD and Construction Document Submittals, unless timing of these reports, studies and plans are identified in this Schedule 10 or in other relevant sections of the Project Agreement. DB Co shall include the timing and submission sequence of all reports, studies and plans which will inform the Design Development Submittals in the schedule of Works Submittals pursuant to Section 11.2(b)(vi) of the Project Agreement. DB Co shall prepare a minimum of one hard copy and one electronic upload of submissions of reports, studies and plans for review by the City as follows:
 - (i) Draft format; and
 - (ii) Final format (signed and sealed).
 - (b) DB Co shall be responsible for preparing and submitting additional updated submissions of reports, studies and plans, if the validity of such is altered due to design changes or if more frequent submissions are identified in this Schedule 10 or in other relevant sections of the Project Agreement.
- 1.7 Compliance Verification & Validation Matrix:
- (a) DB Co shall use the Requirements Management tool to report on compliance with the Output Specifications and other requirements in the form of a Compliance Verification & Validation Matrix. The Compliance Verification & Validation Matrix shall provide line-by-line reporting of all applicable requirements and provide full traceability between requirements and compliance demonstration, including preliminary and final design references, quality assurance & control, testing &

commissioning (including but not limited to FAT, PICO, SAT, SIT, and system-wide testing); and

- (b) DB Co shall submit the Compliance Verification & Validation Matrix in accordance with this Schedule 10 as part of the Basis for Design submittal, at the Pre-Final Design Development stage, the Final Design Development stage, after system-wide testing, prior to trial running and at final completion.

1.8 Design review workshops

- (a) DB Co shall schedule and coordinate design review workshops in advance of issuing Pre-Final Design Development Submittals;
- (b) The DB Co Representative shall arrange the design review workshops in consultation with the City Representative;
- (c) The Parties shall cooperate to develop a reasonable schedule for the design review workshops and shall incorporate such schedule into the Current PBS;
- (d) DB Co shall circulate to the City Representative an agenda for each of the design review workshops no later than 5 Business Days prior to the relevant design review workshop;
- (e) The design review workshops shall be held in person in the City of Ottawa, Ontario, except where otherwise agreed by the Parties, acting reasonably; and
- (f) In advance of a design review workshop, DB Co may submit to the City Design Team for comment any interim drafts of any designs or plans required under this Project Agreement, which submissions shall be used to inform the City on the development of New City Infrastructure and New MTO Infrastructure design and provide an opportunity for dialog on compliance with the requirements of the Project Agreement. For greater certainty, interim submissions shall be informal and shall not be reviewed in accordance with Schedule 10 - Review Procedure.

1.9 Design working groups

- (a) In order to discuss and obtain input to the design development, DB Co and the Design Team shall hold design working groups with the City and the City Design Team upon the following terms:
 - (i) DB Co shall propose, in consultation with the City Representative, a logical breakdown of design disciplines or submittals that should each be the subject of individual monthly or biweekly design working groups as mutually agreed;
 - (ii) the City and DB Co shall mutually agree if multiple design disciplines or submittals should be discussed in a particular design working group to benefit a wholesome discussion on overlapping design matters;

- (iii) each design working group shall be held monthly or biweekly, in the City of Ottawa, unless the City agrees otherwise in writing;
- (iv) the Parties shall cooperate to develop a reasonable schedule for the design working groups and shall incorporate such schedule into the Current PBS;
- (v) DB Co shall circulate to the City and the City Design Team an agenda for each of the design working groups no later than 10 Business Days prior to the relevant design working groups held on a monthly basis and 5 Business Days for prior to the relevant design working groups held on a biweekly basis;
- (vi) in advance of a design working groups, DB Co may submit to the City Design Team any interim drafts of any designs or plans required under this Project Agreement, which submissions shall be used to inform the City on the development of New City Infrastructure and New MTO Infrastructure design and provide an opportunity for dialog on compliance with the requirements of the Project Agreement. For clarity, these submissions shall be informal and shall not be reviewed in accordance with Schedule 10 - Review Procedure;
- (vii) the design working groups shall be held in person, with attendance from the relevant DB Co and City subject matter experts, except where otherwise agreed by the Parties, acting reasonably;
- (viii) DB Co shall maintain minutes of the design working groups and, within 5 Business Days after each design working group, DB Co shall provide to the City and the City Design Team a copy of the minutes, together with a copy of any notes, drawings, or diagrams relevant to the design working group; and
- (ix) the City and DB Co agree that the subject matter of the design working groups shall not be regarded as Submittals to which Schedule 10 - Review Procedure applies, and that the City shall not be bound by the input provided in connection with the design working group.

ARTICLE 2 SCHEDULE FOR WORKS SUBMITTALS

- 2.1 DB Co shall schedule the Review Procedure Activities, including the submission dates for all Works Submittals and the City review period in accordance with this Schedule 10.
- 2.2 The Works Schedule and any amendment to the Works Schedule shall allow:
 - (a) a period of 15 Business Days (or such longer period as the Parties may agree) from the date of receipt for the City's review of and response to each Works Submittal for all Works;
 - (b) a period of 20 Business Days (or such longer period as the Parties may agree) from the date of receipt for the City's review of and response to each Works Submittal

containing elements of the Works to be constructed within or adjacent to NCC Lands. Refer to the Lands Table in Schedule 20 – Lands for the extent of these Lands; or

- (c) a period of 20 Business Days (or such longer period as the Parties may agree) from the date of receipt for the City's review of and response to each Works Submittal containing elements of New MTO Infrastructure,

which period of time may be subject to adjustment, as agreed upon with the City.

- 2.3 DB Co shall submit all Works Submittals no later than the dates identified in the Current PBS, as defined in Schedule 12 – Works Scheduling Requirements. The City Representative shall review and respond to each Works Submittal in accordance with the review periods set forth in Article 2.2 of this Schedule 10 – Review Procedure or as otherwise agreed to between the Parties.

- 2.4 If, at any time:

- (a) a Revised PBS is under review by the City, then the City shall be afforded an additional period of time, not to exceed an additional ten Business Days, for processing such Works Submittals;
- (b) DB Co submits a volume of Works Submittals not contemplated by the Current PBS, then the City Representative shall, within five Business Days of receipt of such Works Submittal or Works Submittals, provide DB Co with a reasonable estimate of the time necessary for processing such Works Submittal or Works Submittals which estimate DB Co shall take into account for the purposes of Schedule 12 – Works Scheduling Requirements; or
- (c) a Works Submittal was, or Works Submittals were, received for review later than indicated in the Current PBS, such that the City Representative cannot review the Works Submittal or Works Submittals within the time permitted in the Current PBS, then the City shall be afforded an additional period of time, not to exceed an additional five Business Days, for processing such Works Submittals.

- 2.5 Documentation or data that has been submitted, deemed compliant, and service proven for the Existing Confederation Line may be reused and shall be resubmitted for the purposes of the Confederation Line Extension project, and will be considered compliant, except for such changes as may be necessary to satisfy the requirements of the Confederation Line Extension.

ARTICLE 3 GENERAL REQUIREMENTS FOR WORKS SUBMITTALS

- 3.1 Unless otherwise specified by the City Representative, DB Co shall issue all Works Submittals to the City in the format described in Appendices A and B, and one printed copy of each Works Submittal to the Independent Certifier.
- 3.2 DB Co shall be responsible for creating and maintaining an Electronic Data Management System (EDMS), as a tracking log to monitor, as a minimum, the approval of submittals and the resolution of comments. This system shall:

- (a) be used as a repository for all electronic submittal uploads and document control;
 - (b) be in place and operational within 30 days after Financial Close;
 - (c) be deemed reasonably acceptable to the City prior to implementation;
 - (d) follow the City IT policy and address cyber security issues with supporting mitigation;
 - (e) as a minimum comprise the following:
 - (i) a cloud-based single platform, compatible with City technology security policies for cloud storage, which provides an easily configurable solution;
 - (ii) user group security and restricted authorization function;
 - (iii) browsing by project, folder or file name with drag and drop function;
 - (iv) collaboration functions with the ability to electronically approve and stamp documents;
 - (v) text searchable functions for PDF and native files;
 - (vi) seamless integration;
 - (vii) audit trail;
 - (viii) pre-defined workflow & quality management systems;
 - (ix) read-only, real-time access for the City Representative and their nominated personnel;
 - (x) version control and notification capability;
 - (xi) analytics and reporting function; and
 - (xii) a review function with customizable mark-up tools.
 - (f) undergo routine system shutdowns and/or maintenance outside working hours, if necessary;
- 3.3 DB Co shall, at its own cost and risk, compile and maintain a Review Procedure Activities Register, to be uploaded to the EDMS as detailed in Appendix A, to track the status of each Works Submittal through every stage of preparation, submission, and review by the City, and approval by the applicable third party. DB Co shall submit documentation on the proposed design, functionality, and usage of the Review Procedure Activities Register to the City Representative in accordance with Schedule 10 – Review Procedure no later than Financial Close. The Review Procedure Activities Register shall:
- (a) be updated on a daily basis by DB Co and be accessible in real time by the City, any

- other entity as requested by the City and DB Co, through the EDMS, unless otherwise permitted by the City;
- (b) be operational no later than 30 days after Financial Close;
 - (c) include identification of the following:
 - (i) the submittal date and contents of all Works Submittals;
 - (ii) the date of receipt and content of all returned Works Submittals;
 - (iii) status of comments on all Work Submittals in accordance with Article 4.1;
 - (iv) vulnerability or security breaches;
 - (v) tracking ID's (in a format reasonably acceptable to the City) supporting the requirements of Article 3.8.
 - (d) include a tracking log to monitor the resolution of comments.
- 3.4 All Works Submittals shall be in English.
- 3.5 All Works Submittals required by the Project Agreement and/or by Applicable Law to be signed or sealed by persons with professional designations, registered in the Province of Ontario (including, where applicable, by registered professional engineers, professional geoscientists, architects or landscape architects) shall be so signed and sealed, unless the Works Submittal is being submitted in Draft format in accordance with Article 1.6(a)(i) of this Schedule 10, or as an Interim submission in accordance with Article 1.8(f) of this Schedule 10.
- 3.6 All Works Submittals shall:
- (a) include copies of all documents to be reviewed;
 - (b) be uploaded to the EDMS and include an electronic file-naming convention reasonably acceptable to the City; and
 - (c) clearly identify the purpose of the Works Submittal, DB Co's proposed course of action relating to the Works Submittal and the Project Operations that are the subject of the Works Submittal.
- 3.7 All Works Submittals shall, where applicable, refer to and be in accordance with the relevant provisions of the Output Specifications, any other applicable Schedule to the Project Agreement, and to any Design Data that has previously been subject to review.
- 3.8 Each Works Submittal shall be clearly identified as a Works Submittal and shall be delivered with appropriate covering documentation, which shall include:
- (a) a summary table which lists all revisions or changes from previous Works Submittals; and

- (b) a list of all attached Works Submittals and for each Works Submittal;
 - (i) identification of whether the Works Submittal contains System Infrastructure, New Municipal Infrastructure, New MTO Infrastructure, and elements of Works on or adjacent to NCC Lands.
 - (ii) the document number(s) or drawing number(s);
 - (iii) revision numbers (if applicable);
 - (iv) document or drawing title(s);
 - (v) name of entity that prepared the Works Submittal;
 - (vi) name and signature of the Design Manager and other Key Individual(s) responsible for content of the Works Submittal;
 - (vii) quality control documentation in accordance with Schedule 11 – Integrated Management System Requirements;
 - (viii) the Works Submittal history, including reviewer and checker initials, date and delivery information, log number of all previous submissions of that Works Submittal, Project Agreement provisions, comments from reviewers from the previous Works Submittal, all outstanding comments, and responses to addressing those comments, all submitted in a format reasonably acceptable to the City; and
 - (ix) identification of any previous Works Submittal superseded by the current Works Submittal.
- 3.9 To facilitate the City’s distribution of Works Submittals to the NCC and the MTO, all Works Submittals that are to be reviewed by the NCC, or MTO shall be separated accordingly and submitted individually.
- 3.10 Each Works Submittal shall be organized into relevant sections. Each Work Submittal shall contain pertinent correspondence, shall be arranged by subject matter in chronological order, and shall include the final calculations, reports and backup information. All Works Submittals shall include, without limitation, copies of all final approvals, design reports, correspondence and calculations, in both electronic and hard copy.
- 3.11 [Not used].
- 3.12 Issued For Construction Works Submittals
 - (a) Construction Document Submittals submitted in accordance with this Schedule 10 – Review Procedure and assigned comments “NO COMMENT” or “MINOR COMMENT” with all of the comments resolved, shall become Issued For Construction and DB Co shall stamp them as “Issued For Construction”. Works Submittals used for the construction of any part or parts of the Project prior to being entitled to proceed, as noted above, shall not be stamped as Issued For Construction.

- (b) DB Co shall submit copies of all drawings that are Issued For Construction, together with manuals and instructions, to the City Representative and to the Independent Certifier.
- (c) Major revisions to Issued For Construction documents shall be submitted for review as Construction Document Submittals, being stamped “Issued For Construction” upon being entitled to proceed in accordance with this Section 10 – Review Procedure. For minor revisions to Issued For Construction documents, DB Co shall notify the City (which notice shall include appropriate drawings/revisions) but is not required to submit re-issued plans or reports, provided the City reserves the right to treat minor revisions as a major revision and require submission at any time several minor revisions have been made, or if the City determines in its sole discretion that a minor revision is a major revision. Issued For Construction documents are required for the certification of construction detailed in Appendices A and B of this Schedule 10.
- (d) In the case of artwork supply and fabrication, DB Co shall, prior to issuance, submit all related tender packages for review of compliance by the City.

3.13 Works Schedule Re-baseline Submittals

- (a) DB Co shall prepare Works Schedules re-baselines in accordance with Schedule 12 – Works Scheduling Requirements. DB Co shall submit the Works Schedules re-baselines for review in accordance with this Schedule 10.
- (b) All non-draft submissions shall include DB Co Representative’s dated signature on the front cover of each document.
- (c) All Works Schedules submitted to the City shall be submitted in two electronic file formats. The first format shall be in the native file format of the software used to generate and manage the Works Schedules, which shall be the exported .XER file for the latest version of Primavera Professional Project Management (PPM). The second format shall be a word-searchable high resolution colour PDF version. Upon City’s request, DB Co shall provide the details of the software and any additional software plug-ins used by DB Co, a copy of any templates, and the details for any software settings it has used in its scheduling software, such as calendar settings, user and administrative preferences, schedule settings, and any other information required to enable the City to replicate the Works Schedules submitted by DB Co using the native file formats provided by DB Co.
- (d) At each submission, DB Co shall provide at least two hardcopies of the PBS printed in colour in a reasonable scale and on an appropriate paper size. DB Co shall submit one .XER file used to generate the Works Schedule re-baseline and the resultant PDF.
- (e) All tabular information including numerical data or calculations shall be submitted in two electronic file formats. The first format shall be in the Microsoft Excel file format that would allow the City to review formulas and manipulate the data for the purpose of evaluation and the second format shall be a high resolution PDF version.

- (f) The filename of each of the electronic files submitted shall indicate the project name acronym, schedule type, revision number and the schedule status date in the format ‘YYYYMMDD’ - e.g. PBS-4 for Confederation Line East shall be named “CLE PBS-4 – 20180731”.
- (g) The requirements of Article 4 shall apply to all PBS Submittals.

ARTICLE 4 COMMENTS

- 4.1 The City Representative shall review and respond to each Works Submittal in accordance with the time periods specified in Article 2.2. The City Representative shall return Works Submittals to DB Co with a copy to the Independent Certifier and assign one of the following four comments:
 - (a) “NO COMMENT”;
 - (b) “MINOR COMMENT”;
 - (c) “MAJOR COMMENT”; or
 - (d) “CRITICAL COMMENT”.
- 4.2 The comment “NO COMMENT” will be assigned to those Works Submittals that, in the opinion of the City Representative, generally conform to the requirements of the Project Agreement, recognising the degree of design development. DB Co shall comply with and implement such Works Submittals.
- 4.3 The comment “MINOR COMMENT” will be assigned to those Works Submittals that, in the opinion of the City Representative, generally conform to the requirements of the Project Agreement, recognising the degree of design development, but in which non-material deficiencies have been found by the City Representative’s review. DB Co shall correct these Works Submittals in the submission immediately subsequent, and shall comply with and implement such Works Submittals after correction, including in accordance with the comments. If the City Representative assigns to a Works Submittal the additional comment “RE-SUBMIT”, then,
 - (a) DB Co shall correct and re-submit such Works Submittal, in its entirety and at its own cost, to the City Representative no later than 20 Business Days after the comment has been provided to DB Co, or as agreed between DB Co and the City Representative and as set out in writing.
 - (b) If at any time it is discovered that DB Co has not corrected the deficiencies on Works Submittals stamped “MINOR COMMENT”, then DB Co will be required to modify the Works Submittals and Project Operations as required to ensure that the Works comply with the Output Specifications, any other applicable Schedule to the Project Agreement, and the DB Co Proposal Extracts and DB Co may be required, at the City Representative’s discretion, to resubmit the relevant Works Submittals.
 - (c) In such circumstances the City Representative shall act promptly in considering

whether such deficiencies have been corrected. At the City Representative's discretion, comments addressed as "MINOR COMMENT" that have not been addressed in the subsequent submission may be escalated to "MAJOR COMMENT" or "CRITICAL COMMENT".

- (d) No extension of time will be given or additional compensation paid in respect of any such modification or re-submittal.
- 4.4 The comment "MAJOR COMMENT" or "CRITICAL COMMENT" will be assigned to those Works Submittals that, in the opinion of the City Representative, contain significant deficiencies or do not generally conform to the requirements of the Project Agreement, including this Schedule 10.
 - (a) DB Co shall correct and re-submit these Works Submittals within 20 Business Days after the comment has been provided to DB Co, or such other time period, as agreed between DB Co and the City Representative and as set out in writing.
 - (b) The City Representative will then review such re-submitted Works Submittals and assign a comment to the corrected Works Submittal. The Works Submittals shall be corrected, revised and resubmitted, in their entirety, as often as may be required to obtain a comment that permits DB Co to proceed.
 - (c) No extension of time will be given or additional compensation paid in respect of any such modification or re-submittal. In addition to the above, a Works Submittal with a "CRITICAL COMMENT" comment will be a Proceeding At Risk Matter in accordance with Section 14.6(a) of the Project Agreement.
- 4.5 Where the City Representative issues the comment "MINOR COMMENT", "MAJOR COMMENT" or "CRITICAL COMMENT", the City Representative shall provide reasons for the comment, referencing the particulars of the Section(s) of the Project Agreement that the Works Submittal fails to satisfy. DB Co shall schedule a meeting between the DB Co Representative and the City Representative to discuss the resolution of "MAJOR COMMENT" and "CRITICAL COMMENT" comments. At the City Representative's discretion, a meeting may be requested to resolve "MINOR COMMENT" comments. The City Representative shall not address the following in their comments:
 - (a) spelling and/or grammar unless the design intent could be misinterpreted through such matters; and
 - (b) personal preferences regarding (i) design approach, (ii) construction methodology and/or (iii) selection of materials.
- 4.6 If, at any time after assigning any comment to a Works Submittal, the City Representative or DB Co discovers any significant deficiencies or any failure to conform to the requirements of the Project Agreement, the City Representative may revise the comment assigned to any Works Submittal. If the Parties agree or it is determined in accordance with Article 5 of this Schedule that the revised comment is correct, DB Co shall make all such corrections to the Works Submittals and the Project Operations. No extension of time will be given or additional compensation paid in respect of any such modification or re-submittal.

- 4.7 For the purpose of facilitating and expediting the review and correction of Works Submittals, the City Representative and the DB Co Representative shall meet, as may be mutually agreed, to discuss and review any outstanding Works Submittals and any comments thereon.
- 4.8 Where a Works Submittal is voluminous, the City Representative at his or her discretion may elect to stamp only the cover page or first sheet of the Works Submittal with the appropriate comment, if any, and return to DB Co the cover page or first page together with individual pages or sheets on which comments are made, together with an explanation of the status of all pages not returned to DB Co. Any pages returned without such an explanation as to their status shall be deemed to be “NO COMMENT” by the City.
- 4.9 In lieu of returning a Works Submittal, the City Representative may, by letter, notify DB Co of the comment assigned to the Works Submittal and if such comment is “MINOR COMMENT”, “MAJOR COMMENT” or “CRITICAL COMMENT”, then the notification shall contain comments in sufficient detail for DB Co to identify the correction sought.
- 4.10 At the City Representative’s discretion, DB Co may be requested to attend a meeting to discuss the resolution of any unresolved comments.

ARTICLE 5 DISPUTES

- 5.1 If DB Co disputes any act of the City or the City Representative in respect of a Works Submittal under this Schedule 10, DB Co shall promptly notify the City Representative and the Independent Certifier of the details of such Dispute and shall submit the reasons why DB Co believes a different comment should be assigned, together with appropriate supporting documentation. The City Representative shall review the Works Submittal, the reasons and supporting documentation and within five Business Days after receipt thereof shall either confirm the original comment or notify DB Co of a revised comment. If the City Representative confirms the original comment, DB Co may request that the Independent Certifier resolve the Dispute and render a decision within five Business Days of such request.
- 5.2 If either Party is not satisfied, acting reasonably, with the resolution of the Independent Certifier, subject to Article 10.2, either Party may refer the matter for determination in accordance with Schedule 27 - Dispute Resolution Procedure.
- 5.3 Notwithstanding the provisions of Articles 5.1 and 5.2, the City Representative may direct that DB Co revise the Works Submittals in accordance with the comments of the City Representative and proceed to perform and complete the Works on the basis of such revised Works Submittals. For clarity, such direction shall be considered a Dispute and DB Co may proceed in accordance with this Article 5 and Schedule 27 – Dispute Resolution Procedure.

ARTICLE 6 EFFECT OF REVIEW

- 6.1 Subject to Section 11.1(j) of the Project Agreement, any review and comment by the City or the City Representative of any Works Submittals are for general conformity to the obligations and requirements of the Project Agreement, and any such review and comment shall not relieve DB Co of the risk and responsibility for the Project Operations and for meeting all of DB Co’s obligations under and requirements of the Project Agreement, and shall not create any new or additional obligations or liabilities for the City. Without limiting the generality of

the foregoing, any and all errors or omissions in Works Submittals or of any review and comment shall not exclude or limit DB Co's obligations or liabilities in respect of the Works under the Project Agreement or exclude or limit the City's rights in respect of the Works under the Project Agreement.

ARTICLE 7 WORKS SUBMITTAL EXPLANATION

- 7.1 At any time, the City Representative may, acting reasonably, require DB Co or any DB Co Parties, including DB Co's consultants and any other relevant personnel, at no additional cost to the City, to explain to the City Representative and the City advisors the intent of DB Co's Works Submittals, including in relation to any design and any associated documentation and as to its satisfaction of the Output Specifications or any other Schedule to the Project Agreement, as applicable. DB Co shall provide the explanation to the City Representative within five Business Days (or such longer period as the Parties may agree) from the date of receipt of the request from the City Representative.

ARTICLE 8 REVISIONS

- 8.1 DB Co shall ensure that each Works Submittal keeps the same unique reference number throughout the review process, and that subsequent revisions of the same Works Submittal are identified by a sequential revision number. Correspondence related to such Works Submittal shall reference the reference number and revision number.
- 8.2 Re-submittals shall clearly show all revisions from the previous Works Submittal. Bound documents, including reports and manuals, shall contain a preface that clearly states how revisions are marked and the previous revision number against which the revisions have been marked. A consistent format for mark-ups of documents shall be used (e.g. deletions struck out and additions underscored). Revised portions of drawings shall be clearly marked (with appropriate means to visually distinguish between the parts of the drawing that are revised and the parts that are not revised) and the revision number and description of the revision shall be included on the drawing. Drawings produced during Design Development shall be exempt from requirements in Article 8.2.
- 8.3 All revisions must be able to be integrated into the As-built Drawings and the Record Drawings.
- 8.4 DB Co shall keep all Design Data current. If any Design Data is revised as part of a Works Submittal, all other Design Data relying on or based on that Design Data shall also be revised accordingly. All such revised Design Data shall also be submitted with the Works Submittal to which it relates.
- 8.5 [Not Used]

ARTICLE 9 AUDIT BY THE CITY REPRESENTATIVE

- 9.1 Without limiting any other right under the Project Agreement, the City Representative shall have the right to audit all Works Submittals, including comparing all Works Submittals to previous Works Submittals.

- 9.2 If during an audit or at any other time it is discovered by the City or DB Co (or resolved pursuant to Article 9.3) that any Works Submittals were not correctly implemented, DB Co shall at its sole cost immediately take all necessary steps to correct and modify the applicable Works Submittals and the Project Operations to which they relate and shall advise the City Representative of all such corrections and modifications.
- 9.3 Any Dispute concerning the implementation of a Works Submittal, subject to Article 5.1, shall be referred in the first instance to the Independent Certifier for resolution.

ARTICLE 10 VARIATIONS

- 10.1 [Not used].
- 10.2 If, having received comments from the City Representative on any Works Submittal, DB Co considers that compliance with those comments would amount to a Variation, DB Co shall, within ten (10) Business Days of receipt of and before complying with the comments, provide written Notice to the City of the same and, if it is agreed by the Parties that a Variation would arise if the comments were complied with, the City may, at their election, issue a Variation Enquiry (which shall be dealt with in accordance with Schedule 22 - Variation Procedure) or amend their comment on the Works Submittal. If the Parties do not agree that a Variation would arise if the comments were complied with, either party may proceed to resolve the matter in accordance with Article 5.3, including for clarity, the exercise by the City of their rights under Article 5.3. Subject to the foregoing sentence, any failure by DB Co to notify the City in accordance with this Article 10.2 that DB Co considers that compliance with any comments of the City Representative would amount to a Variation shall constitute an irrevocable acceptance by DB Co that any compliance with the City Representative's comments shall be without cost to the City and without any extension of time.

ARTICLE 11 GENERAL

- 11.1 Any capitalized terms used in the appendices to this Schedule 10 – Review Procedure, that are not defined in this Schedule 10 – Review Procedure or in Schedule 1 – Definitions and Interpretation, shall have the meanings given to them in Schedule 15-1 – Technical Terms and Reference Documents.

ARTICLE 12 COMPLIANCE WITH MTO MINIMUM DESIGN AND CONSTRUCTION CERTIFICATION REQUIREMENTS

- 12.1 In respect of the New MTO Infrastructure, DB Co shall comply with all of the obligations set forth in Appendix B.

APPENDIX A – MINIMUM WORKS SUBMITTAL REQUIREMENTS

ARTICLE 1 FORMAT FOR WORKS SUBMITTALS

1.1 All Works Submittals shall be submitted to the City in hardcopy and electronic format as follows:

- (a) Hardcopy requirements:
 - (i) one set of all Work Submittals shall be submitted in reduced format drawings (11” x 17”) and design briefs; and
 - (ii) one set of Works Submittals which are not drawings shall be submitted in 8.5” x 11” format, unless otherwise specified.
- (b) Electronic copy requirements:
 - (i) an electronic copy in the format set out in this Appendix A, together with its native file in standard format, or as prescribed by the City acting reasonably;
 - (ii) CAD drawings shall be provided in accordance with the City of Ottawa’s CADD Standards Manual, or otherwise in accordance with MTO CADD standards, for New MTO Infrastructure. DB shall confirm drawing conventions and standards, including AutoCAD and InRoads standards, title block and stationing convention, with the City prior to commencing design drawing production; and
- (c) All Works Submittals (or as otherwise agreed upon by the Parties) shall be uploaded to the EDMS. All other Submittals not otherwise specified shall be uploaded to the EDMS.

ARTICLE 2 SUBMITTALS

- 2.1 The following is a detailed list of the Works Submittals that DB Co is required to provide to the City for review and comment in accordance with this Schedule 10.
 - 2.2 Additional Works Submittals may be requested by the City Representative at any time in order to understand the Works, and DB Co shall be required to provide same to the City for review in accordance with this Schedule 10. A description of the minimum content of each Work Submittal provided is set out in the following sections.
 - 2.3 Works Submittal deliverables which are applicable to satisfying the requirements of multiple Works Submittal sections are permitted to be
-

reused, granted they meet all the requirements of each Works Submittal section they are applied to.

2.4 Submission Requirements

(a) The Works Submittal Requirements are detailed in the tables below.

DESIGN CERTIFICATE (GENERAL)

In respect of :

(Provide submittal details)

Project Agreement between the City and DB Co dated XX XX, XXXX (“the Project Agreement”) relating to the Project. Defined terms and expressions used in the Project Agreement have the same meanings in this Certificate.

Form of Certificate to be used by the Design Team for certifying the design of the Works to the extent that such Works components have been constructed, installed, altered, upgraded, and/or augmented, in accordance with Schedule 15-2 – Design and Construction Requirements.

1. We certify that we have the requisite professional qualifications, skill and experience to prepare the Design Data referred to herein in accordance with the requirements of the Project Agreement and all relevant Output Specifications.
2. We certify that we have prepared the Design Data for [.....] listed in the Schedule hereto in accordance with all applicable requirements contained in the Design Management Plan and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking the preparation of such Design Data, and that in our professional opinion such Design Data:
 - a. complies with all applicable Output Specifications, as amended by the following:
 - (i) **[List, if any, the changes made by the issue of Variation(s)];**
 - b. complies with all applicable design requirements of the Project Agreement;

- c. complies with all applicable standards, codes and current Good Industry Practice; and
- d. accurately describes and depicts the Works to be undertaken.

DESIGN CERTIFICATE (ENVIRONMENTAL)

In respect of :

(Provide submittal details)

Project Agreement between the City and DB Co dated XX XX, XXXX (“the Project Agreement”) relating to the Project. Defined terms and expressions used in the Project Agreement have the same meanings in this Certificate.

Form of certificate to be used by the Design Team and the Environmental Director for certifying the design of environmental works incorporated in the Works in accordance with the Project Agreement.

1. We certify that we have the requisite professional qualifications, skill and experience to prepare the Design Data referred to herein in accordance with the requirements of the Project Agreement and all relevant Output Specifications.
2. We certify that we have prepared the Design Data for [.....] [Name and list of all elements of the environmental works] in the Schedule hereto in accordance with all applicable requirements contained in the Design Management Plan and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking the preparation of such Design Data, and that in our professional opinion:
 - a) the said Design Data complies with all applicable Output Specifications, including Technical Appraisal Form No. [.....] dated [.....], as amended by the following:
 - i) **[List, if any, the changes made by the issue of Variation(s), and any Addenda to the foregoing Technical Appraisal Form];**
 - b) the said Design Data complies with all applicable design requirements of the Project Agreement;
 - c) the said Design Data complies with all applicable standards, codes, environmental permits licences approvals and authorizations, and current Good Industry Practice; and
 - d) the said Design Data accurately describes and depicts the Works to be undertaken.

Sample Construction Certificate

Certificate Ref. No. []

CONSTRUCTION CERTIFICATE

In respect of :

(Provide submittal details)

Project Agreement between the City and DB Co dated XX XX, XXXX (“the Project Agreement”) relating to the Project. Defined terms and expressions used in the Project Agreement have the same meanings in this Certificate.

Form of Certificate to be used by the Design Team for certifying, as applicable:

- a) the substantial completion of construction activities in respect of those components of the [East][West] Works set out in paragraph 1 of this Construction Certificate;
- b) the Total Completion of construction activities in respect of the [East][West] Works, including Minor Deficiencies; or
- c) the total completion of construction activities in respect of any Reinstatement Work carried out by the Construction Contractor pursuant to Section 30 **[Damage and Destruction]** in accordance with a Reinstatement Plan.

in accordance with Schedule 15-2 – Design and Construction Requirements.

Construction Contractor’s Statement

We certify that [name and element of the Works in respect of the [East][West] Substantial Completion Certificate][the Works in respect of the [East][West] Final Completion Certificate][the [East][West] Works in respect of the Final Completion Certificate

(Reinstatement Work)] has been designed, constructed, **[substantially completed], [totally completed],** commissioned and tested in all respects in accordance with: **[Note to Proponents: Inapplicable language to be deleted.]**

- a) the relevant Design Data and Design Certificates in each case to which there has been no objection under the Review Procedure; and
- b) the provisions of the Project Agreement, including all applicable Output Specifications, as amended by the following Variation(s):
 - (i) **[List, if any, the changes made by the issue of Variation(s), and any Addenda to the foregoing Technical Appraisal Form];**

APPENDIX B

MINIMUM DESIGN AND CONSTRUCTION

SUBMITTAL AND CERTIFICATION REQUIREMENTS FOR NEW MTO INFRASTRUCTURE

1. DEFINITIONS

- 1.1 “**Appropriate Person**” has the meaning given in Article 3.1 (b) (iii)
- 1.2 “**Bluetooth Reader**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 – Highway Works.
- 1.3 “**Checking Team**” has the meaning given in Article 2.9 of Part A of Schedule 15-2, Part 9 – Highway Works.
- 1.4 “**Deck**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.5 “**Design Criteria**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.6 “**Design Manager**” has the meaning given in Schedule 9 – Key Individuals.
- 1.7 “**Foundation**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.8 “**Handover**” means, as applicable, the successful handover, by DB Co of, the New MTO Infrastructure, or a component thereof, to City or, where Notice of Delegation has been provided by City in respect of New MTO Infrastructure, to MTO, in accordance with Section 25.16 of the Project Agreement including, for clarity, the receipt of City’s or MTO’s (as the case may be) confirmation that Handover has been successfully achieved and the provision of the Notice to the City in accordance with Section 25.16(g) of the Project Agreement.
- 1.9 “**Highway**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.10 “**Independent Checking Team**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.11 “**Independent Structural Design Check Certificate**” means the form provided as Attachment 4 to this Appendix B.
- 1.12 “**MTO Design Management Plan**” has the meaning given in Section 2.1(a) of this Appendix B.

- 1.13** “**Overhead Sign Support Structure**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.14** “**Pavement**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.15** “**Pavement Markings**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.16** “**Regulatory Sign**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.17** “**Retaining Wall**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.18** “**Roads**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.19** “**Road Safety Audit**” has the meaning given in Article 10 of Part B of Schedule 15-2, Part 9 - Highway Works.
- 1.20** “**Road Safety Audit Certificate**” has the meaning given in Article 10.8(a) of Part B of Schedule 15-2, Part 9 - Highway Works.
- 1.21** “**Significant and Complex Structures**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.22** “**Structure**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.23** “**Substructure**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.24** “**Superstructure**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.25** “**Technical Appraisal Form**” or “**TAF**” means a form substantially in the format attached as Attachment 1 - Sample Contents for a Structural TAF to Appendix B of Schedule 10 - Review Procedure.
- 1.26** “**Temporary Works**” means works that are performed to serve a specific temporary function in the execution of the Works and in respect of which any resulting infrastructure is removed at such time when its temporary use is no longer required”
- 1.27** “**VDS**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.
- 1.28** “**VMS**” has the meaning given in Article 1.6 of Part A of Schedule 15-2, Part 9 - Highway Works.

2. MTO DESIGN MANAGEMENT PLAN AND TECHNICAL APPRAISAL FORMS

2.1 Submission of MTO Design Management Plan

- (a) Within 90 days following Financial Close, DB Co shall submit a Design Management Plan in respect of New MTO Infrastructure (the “**MTO Design Management Plan**”) to the City in accordance with Schedule 10 - Review Procedure. The MTO Design Management Plan shall include:
 - (i) the organization chart, including the Design Manager and Highway Works Manager, for all design activities;
 - (ii) the procedures to be used for designing and checking each of the designs;
 - (iii) the identification of the Checking Team and Independent Checking Team;
 - (iv) the contents and format of Design Development Submittals, as well as the Construction Document Submittals;
 - (v) a design review and audit schedule, indicating dates that DB Co plans to:
 - (A) conduct internal audits of the design verification process;
 - (B) submit Design Development Submittals and Construction Document Submittals; and
 - (C) undertake design review workshops in accordance with Section 1.8 of this Schedule 10. MTO shall be included as an invitee.
 - (vi) the process and schedule for Road Safety Audits;
 - (vii) a work breakdown structure for design indicating the Design Team and associated designers;
 - (viii) a drawing tree indicating the organization and hierarchy of DB Co’s drawings;
 - (ix) appropriate metrics to measure the progress of the design for each discipline;
 - (x) the process for certifying construction including the identification and organization of the personnel responsible for verifying construction compliance with the Design Data and the provisions of the Project Agreement to enable the Design Team representative to sign and seal the Construction Certificates; and

- (xi) the Review Procedure Activities Register (as also referenced in Schedule 12 – Works Scheduling Requirements), including plans for weekly or bi-weekly updates of this register and common platform where such register is shared with the City.
- (b) Any subsequent amendments or updates to the MTO Design Management Plan shall be submitted by DB Co to the City in accordance with Schedule 10 - Review Procedure.

2.2 Compliance with MTO Design Management Plan

- (a) DB Co shall implement and comply with the initial MTO Design Management Plan which has been reviewed by the City in accordance with Schedule 10 - Review Procedure, and any subsequent amendments or updates to the initial MTO Design Management Plan made following a review by the City in accordance with Schedule 10 - Review Procedure, in connection with all Design Data prepared or adopted in connection with the Output Specifications, the Environmental Obligations, and any other design or Construction Activities in the Project Agreement within the Highway Corridor Lands.

2.3 TAF Submission Requirements

- (a) Each Final Design Development Submittal package submitted by DB Co shall be accompanied by a completed Technical Appraisal Form (TAF).
- (b) In any case where submitted Design Data involves any mechanical, electrical and/or intelligent transportation system functions, or similar specialization, DB Co shall submit to the City in accordance with Schedule 10 - Review Procedure a TAF in respect of such data and functions.
- (c) In any case where the New MTO Infrastructure involves the complete or partial demolition of an existing Structure, DB Co shall submit to the City in accordance with Schedule 10 - Review Procedure a TAF in respect of such complete or partial demolition.

2.4 TAF Form and Content

- (a) Each TAF submitted by DB Co pursuant to Section 2.3 of this Appendix B shall be in the format shown in Attachment 1 - Sample Contents for a Structural TAF to this Schedule 10 and shall:
 - (i) for Final Design Development Submittals, include the relevant Design Criteria, environmental and ground considerations, and interface requirements, together with a listing of the design documentation included in the design package; and
 - (ii) be signed by:

- (A) the DB Co Representative; and
- (B) the Design Manager or Appropriate Person as necessary.

2.5 TAF Variation

- (a) Any variation to a TAF which has been subject to the Review Procedure during design, assessment or any Construction Activity shall be submitted in accordance with Schedule 10 - Review Procedure as an addendum to the TAF.

3. DESIGN AND CONSTRUCTION SUBMISSIONS, REVIEW AND REPORTS

3.1 MTO Design and Construction Certification

- (a) The following terms shall have the following meanings:
- (i) **“MTO Construction Certificate (Interim)”** means the certificate(s) entitled “MTO Construction Certificate (Interim)” in the form set out in Attachment 3 to this Appendix B to be issued by DB Co pursuant to Section 3.1(d) of this Appendix B of Schedule 10 – Review Procedure;
 - (ii) **“MTO Construction Certificate (Completion)”** means the certificate(s) entitled “MTO Construction Certificate (Completion)” in the form set out in Attachment 3 to this Appendix B to be issued by DB Co pursuant to Section 3.1(d) of this Appendix B of Schedule 10 – Review Procedure;
 - (iii) **“MTO Construction Certificates”** means the MTO Construction Certificate (Interim) and the MTO Construction Certificate (Completion) and **“MTO Construction Certificate”** means any one of them.
 - (iv) **“MTO Design Certificate (Environmental)”** means the certificate(s) entitled “MTO Design Certificate (Environmental)” in the form set out in Attachment 2 to this Appendix B to be issued by DB Co pursuant to Section 3.1(c) of Appendix F of Schedule 10 – Review Procedure;
 - (v) **“MTO Design Certificate (General)”** means the certificate(s) entitled “MTO Design Certificate (General)” in the form set out in Attachment 2 to this Appendix B to be issued by DB Co pursuant to Section 3.1(c) of this Appendix B of Schedule 10 – Review Procedure;
 - (vi) **“MTO Design Certificates”** means the MTO Design Certificate (General) and the MTO Design Certificate (Environmental) and **“MTO Design Certificate”** means any one of them.
- (b) MTO Design and Construction Certification Procedure
- (i) DB Co shall implement and ensure compliance with the procedure set out in this Section 3.1 (the **“MTO Design and Construction Certification Procedure”**) until Handover of the New MTO Infrastructure.
 - (ii) The MTO Design and Construction Certification Procedure shall apply to all Design Data prepared or adopted in connection with the New MTO Infrastructure, including any further design development or changes to a design once a TAF has been subjected to the Review Procedure.

- (iii) DB Co shall ensure that all certification procedures referred to in the Design and Construction Certification Procedure are complied with by the appropriate persons referred to therein, including the Design Team, and any independent team or engineer within the Design Team, as the case may be (together, the “Appropriate Persons”) and that all Appropriate Persons are at all relevant times duly authorized and qualified to carry out such procedures and to sign the relevant certificates. Any failure by any Appropriate Person to fulfill the obligations required of them under the MTO Design and Certification Procedure shall be a breach of the DB Co’s obligations under the Project Agreement.
 - (iv) DB Co shall submit all MTO Design Certificates and MTO Construction Certificates, together with the supporting documentation, to the City for review, acting reasonably, in accordance with Schedule 10 - Review Procedure. The submitted MTO Design Certificates and MTO Construction Certificates shall have original signatures, seals and registration numbers (as required in the form provided in Attachment 2 and 3 to Appendix B of Schedule 10 – Review Procedure).
- (c) MTO Design Certificates
 - (i) DB Co shall prepare and issue a separate MTO Design Certificate (in the form as provided in Attachment 2 of Appendix B) for New MTO Infrastructure for each submitted Construction Document Submittal review package, to the City for review in accordance with the Review Procedure. All MTO Design Certificates prepared and issued by DB Co shall be:
 - (A) either the MTO Design Certificate (General) or MTO Design Certificate (Environmental), as applicable;
 - (B) signed and sealed by a principal of the Design Team, and the responsible professional, who shall be a Professional Engineer or a registered Architect;
 - (C) signed by the DB Co Representative; and
 - (D) in the case only of MTO Design Certificates (Environmental), signed by the Environmental Director.
 - (ii) Any person who signs a MTO Design Certificate shall clearly print his or her name and the position held in his or her organization on the MTO Design Certificate.
- (d) MTO Construction Certificates
 - (i) DB Co shall prepare and issue MTO Construction Certificates (in the form as provided in Attachment 3 to Appendix B of Schedule 10 –

Review Procedure) for New MTO Infrastructure to the City for review in accordance with the Review Procedure:

- (A) in the case of MTO Construction Certificate (Interim), within 15 Business Days following the end of each calendar month (for that calendar month), from Financial Close until the date of delivery of written confirmation of completion of Handover of the New MTO Infrastructure pursuant to Article 25.16(f)(v) of the Project Agreement;
 - (B) in the case of MTO Construction Certificate (Completion) at least 10 Business Days prior to the delivery of written confirmation of completion of Handover of the New MTO Infrastructure pursuant to Article 25.16(f)(v) of the Project Agreement.
- (ii) All MTO Construction Certificates prepared and issued by DB Co shall be:
- (A) signed by the Construction Contractor representative;
 - (B) signed and sealed by the responsible professional who shall be a Professional Engineer or a registered Architect, and a principal of the Design Team;
 - (C) signed by the DB Co Representative; and
 - (D) for each MTO Construction Certificate (Completion) issued between Financial Close to Handover of the New MTO Infrastructure, signed by the Independent Certifier acknowledging receipt.
- (iii) Any person who signs a MTO Construction Certificate shall clearly print his or her name and the position held in his or her organization on the MTO Construction Certificate.

3.2 Format of Design and Construction Submissions

- (a) DB Co shall provide all Submittals in the format detailed in Appendix A of this Schedule 10 – Review Procedure.
- (b) [Intentionally deleted]
- (c) [Intentionally deleted]
- (d) For greater clarity, drawings for DB Co System Infrastructure, New City Infrastructure and New Utility Company Infrastructure to be constructed by DB Co within the Highway Corridor Lands shall be in accordance with the applicable standards of the City and Utility Companies, respectively.

- (e) [Intentionally deleted]

3.3 Design and Construction Submission Review

- (a) The Design Development Submittals and Construction Document Submittals from all design disciplines shall be submitted to the City in accordance with Schedule 10 - Review Procedure. The Pre-Final Design Development, Final Design Development and Construction Document Submittals shall consist of the relevant TAF(s) together with all final design drawings, supporting Design Data and calculations required in accordance with the design requirements outlined in the Project Agreement, in particular and including Schedule 15-2, Part 9 - Highway Works, and this Appendix B.
- (b) Each Design Development Submittal and Construction Document Submittal package shall cover a specific geographic segment of the Highway Works and shall include the submission requirements pertaining to all disciplines, as identified in this Appendix B. DB Co may subdivide the Highway Works into the submission of a maximum of three Design Development Submittal packages (maximum of two for Highway 417, and maximum of one for Highway 416).
- (c) DB Co shall not submit any Construction Document Submittal until Pre-Final Design Development Submittals have been submitted and reviewed pursuant to this Schedule 10 for all aspects of Highway Works.

3.4 Temporary Works

- (a) As a minimum, design submissions for Temporary Works shall include those items intended for public use and/or potentially affecting public safety. Final designs for these Temporary Works shall be submitted to the City in accordance with Schedule 10 - Review Procedure.
- (b) Design Data relating to any Temporary Works shall be checked as follows:
 - (i) any such Design Data prepared by or on behalf of the Construction Contractor requires an independent check by the Design Team; and
 - (ii) any such Design Data prepared by the designer requires an independent check by a Checking Team which may be from the designer but shall be independent of the Design Team.
- (c) In performing the check referred to in paragraph (b) above, the designer shall satisfy itself that:
 - (i) the Design Data meets the project requirements and otherwise complies with the requirements of the Project Agreement;

- (ii) the Temporary Works (as a whole and the constituent parts) are satisfactory for the safe and proper discharge of DB Co's relevant obligations; and
 - (iii) the Design Data reflects the requirements of the relevant governmental authorities for all affected Highways or other Roads or areas used by or accessible to the public other than the New MTO Infrastructure.
- (d) Where any Temporary Works may endanger public safety on other road or area used by or accessible to the public other than the New MTO Infrastructure, DB Co shall consult the relevant Governmental Authority and the Design Data shall reflect the requirements of such Governmental Authority.
- (e) Road Safety Audit Certificate shall be submitted as part of the Submittals in respect of Temporary Works in accordance with Article 10 (Road Safety Audit) of Part B of Schedule 15-2, Part 9 - Highway Works.

4. DESIGN DEVELOPMENT SUBMITTALS

4.1 General

- (a) In accordance with the MTO Design Management Plan and requirements of the Design and Construction Certification Procedure, DB Co and the City shall agree on the design information to be submitted for review in the Design Development Submittals, the schedule of such submissions and the scope of the review. The minimum requirements for the Design Development Submittals are outlined in this Appendix B.
- (b) The content of such interim design submissions shall be appropriate to the subject and discipline. The information provided shall be adequate to show that the design is proceeding in compliance with the Project Agreement for all disciplines and is taking into consideration the relevant construction activities.
- (c) Design Development Submittals shall be prepared and shall have indices and sectional dividers. The design folders shall contain pertinent correspondence, shall be arranged by subject matter in chronological order, and shall include the design criteria, design development calculations and backup information. Design submissions shall include copies of all approvals, design reports, correspondence and calculations.
- (d) The Road Safety Audit Certificate shall be submitted as part of Design Development Submittals in accordance with Schedule 15-2, Part 9, Part B, Article 10 (Road Safety Audit).

4.2 Pre-Final Design Development Submission

(a) General

- (i) DB Co shall prepare and submit any necessary draft addenda to the MTO Design Criteria (as described in MTO Directive PHM-B-021) based on DB Co's design.

(b) Roadway Design

- (i) The Pre-Final Design Development Submittals shall contain the following:
 - (A) all design drawings, including complete removals, new construction, laning and geometrics, profiles, typical and template cross-sections, and drainage;
 - (B) all staging drawings that include traffic management requirements to complete the work as well as any operational constraints related to construction operations and/or traffic management;

- (C) Explicit Safety Analysis Report;
- (D) Ball Bank Indicator Report;
- (E) Road Safety Audit Reports;
- (F) a detailed summary of critical constructability considerations;
- (G) fencing plan and design; and
- (H) ramp gate location plan and design.

(c) **Drainage Design**

- (i) The Pre-Final Design Development Submittals shall:
 - (A) address both temporary and permanent drainage design;
- (ii) The Pre-Final Design Development Submittals shall contain the following:
 - (A) all design parameters and requirements in accordance with Article 7 (Drainage and Erosion Control Design Criteria) of Part B of Schedule 15-2, Part 9 - Highway Works;
 - (B) the technical analysis and application documentation for a Permit to Take Water or EASR registration (if required);
 - (C) all drawings of drainage systems including storm sewer design sheets;
 - (D) updated floodplain mapping;
 - (E) detail drawings of water course realignments, drainage conveyance systems, and stormwater management facilities;
 - (F) Erosion and Sediment Control Plan; and
 - (G) Drainage and Stormwater Management Report, including digital modelling files.

(d) **Structures, Culvert, Submerged Culverts, High Mast Lighting Footings and Overhead Sign Support Structure**

- (i) The Pre-Final Design Development Submittals shall contain the following:
 - (A) Structural Design Reports for any Underpass or Overpass Structures and Graham Creek Culvert being rehabilitated or

replaced as part of Highway Works (calculations need not be provided at this stage);

(B) Structure Survey Reports; and

(C) Movement Plans.

(e) Retaining Wall and Noise Barrier Design

(i) The Pre-Final Design Development Submittals shall contain the following:

(A) geotechnical foundation report or reference to the applicable section of the Geotechnical Report;

(B) descriptions of maintenance considerations; and

(C) all design drawings.

(f) Geotechnical Foundation Design

(i) The Pre-Final Design Development Submittals shall contain the following:

(A) Geotechnical Report;

(B) Geotechnical Instrumentation and Monitoring Plan; and

(C) Plans and procedures for groundwater control.

(g) Pavement Design

(i) The Pre-Final Design Development Submittals shall contain the following:

(A) Pavement Design Report; and

(B) proposed Pavement design, depicted as cross-section drawings.

(h) Electrical, Signing and Pavement Markings Design

(i) The Pre-Final Design Development Submittals shall include electrical (including signals, lighting and telecommunications), signing and pavement marking plans in accordance with the requirements of Schedule 15-2, Part 9 - Highway Works, Part B, Article 6 and Schedule 15-2, Part 9 - Highway Works, Part B, Article 8.

(ii) The Pre-Final Design Development Submittals shall contain the following:

- (A) Design drawings for all electrical systems shall contain the following:
 - (I) electrical equipment and all associated support structure locations;
 - (II) lighting calculations where appropriate;
 - (III) service locations;
 - (IV) layout drawings showing electrical lighting poles, ducts, chambers, power distribution and/or supply cabinets; and
 - (V) wiring diagrams depicting low voltage power distribution as well as high voltage wiring where applicable.
- (B) Design drawings for the telecommunications conduit network, if applicable, shall contain the following:
 - (I) network diagram showing conduit locations; and
 - (II) design drawings showing the locations for all interconnection points.
- (C) Signage submissions shall contain the following:
 - (I) overhead Sign Support Structures and extruded ground-mounted Signs structure details and design calculations;
 - (II) sign design sheets for all custom guide signs;
 - (III) sign details and shop drawings for all support structures and footings; and
 - (IV) note all cantilever and sign bridge Structures submissions shall be undertaken in accordance with the MTO Sign Support Manual.
- (D) PHM-125 signal drawings shall be submitted for all temporary and permanent signals and shall contain the following:
 - (I) all Regulatory Signs that assist in the signal operations (to be included on drawing and in a legend);
 - (II) Signal hardware excluding underground provisions and electrical wiring;

- (III) Vehicle detection and nearby accesses;
 - (IV) Pavement Markings including lanes, crosswalks, stopbars and through/turning arrows;
 - (V) active transportation accommodations;
 - (VI) MTO PHM-125 standard template;
 - (VII) Hard copies in 1:500 scale; and
 - (VIII) Electronic copies in AutoCAD format.
- (E) The Temporary Signing Plan, Permanent Signing Plan, Temporary Pavement Marking Plan, and Permanent Pavement Marking Plan.
- (i) **Landscaping and Site Restoration**
- (i) The Pre-Final Design Development Submittals shall contain the following:
- (A) detailed landscape drawings that reflect any design changes, and document public consultation conducted as part of the development of the landscape drawings (drawings shall be of a suitable scale for legibility, and provide enlarged detailing where needed);
 - (B) a report detailing how the Highway Works design adheres to Context Sensitive Design requirements; and,
 - (C) tree removal and mitigation plan drawings.
- (j) **Advanced Traffic Management Systems**
- (i) The Pre-Final Design Development Submittals shall contain the following:
- (A) all design parameters and requirements in accordance with Article 11 (Advanced Traffic Management Systems Civil Requirements) of Part B of Schedule 15-2, Part 9 - Highway Works.
 - (B) design drawings that contain the following:
 - (I) layout drawings detailing the CCTV camera, VMS, Bluetooth Reader, communication system, and cabinet locations including all conduit and electrical chambers with device labelling;

- (II) detector input file connections;
- (III) communication schematics and fibre allocation table;
- (IV) electrical wiring diagrams;
- (V) civil infrastructure associated with ATMS;
- (VI) any modified MTOD including OPSD, and installation drawings; and
- (VII) temporary and removals drawings.

(k) **Traffic Engineering**

- (i) The Pre-Final Design Development Submittals shall contain the following:
 - (A) Traffic Analysis Report, which shall include comprehensive traffic analysis along with all supporting documentation and calculations;
 - (B) a detailed summary of critical traffic management considerations;
 - (C) signal timing sheets and phasing diagrams associated with the design of signalized intersections; and
 - (D) the Haul Route Plan.

(l) **Environmental Design**

- (i) The Pre-Final Design Development Submittals shall contain the following:
 - (A) applicable drawings that include:
 - (I) ecological restoration areas including Species-at-Risk and any environmentally sensitive areas, and all restoration areas;
 - (II) all fisheries compensation plan areas to secure Fisheries Act Authorizations from Fisheries and Oceans Canada;
 - (III) all drainage and stormwater management pond areas; and
 - (IV) erosion and sediment control measures.

- (B) riparian restoration and terrestrial reclamation/revegetation drawings that, as a minimum, describe timing requirements, seed mixes and applications rates of hydroseeding and site specific restoration plans, including species type, size and spacing for riparian areas, areas of higher sensitivity, and areas prone to erosion or shallow slope movement;
 - (C) environmental design drawings that show environmental mitigation and compensation features and any environmental features to be constructed;
 - (D) environmental design documentation including:
 - (I) regulatory agency review and acceptance documentation for the Environmental Management System specific to the Highway Works;
 - (II) all licenses, notifications, permits, authorisations and approvals specific to the Highway Works; and
 - (III) all assessments, studies, surveys, monitoring reports, and plans specific to the Highway Works.
 - (E) an environmental design criteria checklist that lists general environmental commitments and assurances, environmental design commitments, site specific environmental features and environmental mitigation/compensation plans including all commitments, assurances and plans relating to archaeological features; and
 - (F) stakeholder issues, environmental issues and mitigation plans.
- (m) **Utility Design**
- (i) The Pre-Final Design Development Submittals shall contain the following:
 - (A) Utility Infrastructure Relocation Plans, as generally described in Schedule 10, Article 2, and including the additional requirements identified in Schedule 15-2, Part 9; and
 - (B) Protection measures for Utilities to be protected in place during the Highway Works.

4.3 Final Design Development Submission

(a) General

- (i) All Final Design Development Submittals shall address any comments of the City from the Design Workshops, internal design reviews, quality control, and design reports.
- (ii) Quantity Sheets shall be provided by DB Co and shall be prepared using the latest version of the MTO's Contract Preparation System (CPS).
- (iii) DB Co shall prepare and submit any necessary addenda to the MTO Design Criteria (as described in MTO Directive PHM-B-021) based on DB Co's design. This will be the final submittal for approval by MTO.
- (iv) The Final Design Development Submittals shall contain all specifications, special provisions and operational constraints for the Works.

(b) Roadway Design

- (i) The Final Design Development Submittals shall contain the following:
 - (A) updated information from the Pre-Final Design Development Submittals; and
 - (B) Cross-section drawings.

(c) Drainage Design

- (i) The Final Design Development Submittals shall contain the following:
 - (A) updated information from the Pre-Final Design Development Submittals.

(d) Structures, Culvert, Submerged Culverts, High Mast Lighting Footings and Overhead Sign Support Structure

- (i) The Final Design Development Submittals shall contain the following:
 - (A) updated information from the Pre-Final Design Development Submittals.

(e) Retaining Wall and Noise Barrier Design

- (i) The Final Design Development Submittals shall contain the following:
 - (A) updated information from the Pre-Final Design Development Submittals; and
 - (B) a neat, bound, indexed set of design calculations for the walls initialled by the responsible engineer, who shall be a duly experienced Professional Engineer of the appropriate discipline.

(f) **Geotechnical Foundation Design**

(i) The Final Design Development Submittals shall contain the following:

(A) updated information from the Pre-Final Design Development Submittals.

(g) **Pavement Design**

(i) The Final Design Development Submittals shall contain the following :

(A) updated information from the Pre-Final Design Development Submittals.

(h) **Electrical, Signing and Pavement Markings Design**

(i) The Final Design Development Submittals shall contain the following:

(A) updated information from the Pre-Final Design Development Submittals.

(i) **Landscaping and Site Restoration**

(i) The Final Design Development Submittals shall contain the following:

(A) updated information from the Pre-Final Design Development Submittals.

(j) **Advanced Traffic Management Systems**

(i) The Final Design Development Submittals shall contain the following:

(A) updated information from the Pre-Final Design Development Submittals; and

(B) Pre-Installation Test Plan (PIT), Proof of Performance Test Plan (POP), and System Integration Test Plan (SIT).

(k) **Traffic Engineering**

(i) The Final Design Development Submittals shall contain the following:

(A) updated information from the Pre-Final Design Development Submittals.

(l) **Environmental Design**

(i) The Final Design Development Submittals shall contain the following:

- (A) updated information from the Pre-Final Design Development Submittals; and
 - (B) draft Design and Construction Report (DCR).
- (m) **Utility Design**
 - (i) The Final Design Development Submittals shall contain the following:
 - (A) Updated information from the Final Design Development Submittals, including all draft materials required for an Encroachment Permit application.

5. CONSTRUCTION DOCUMENT SUBMISSION

5.1 General

- (a) Construction Document Submittals shall be prepared and shall have indexes and sectional dividers. The design folders shall contain pertinent correspondence, shall be arranged by subject matter in chronological order, and shall include the design criteria, design calculations and backup information. Design submissions shall include copies of all approvals, design reports, correspondence and calculations.
- (b) Final design drawings and reports shall be developed to a stage that is ready to be signed and sealed by the responsible Engineer, who shall be a duly experienced Professional Engineer of an appropriate discipline.
- (c) The Road Safety Audit Certificate shall be submitted as part of Construction Document Submittals in accordance with Schedule 15-2, Part 9 - Highway Works, Part B, Article 10 (Road Safety Audit).
- (d) DB Co shall document changes and describe the design work that has been developed since the Design Development Submittals or previous design stage of Construction Document Submittals.
- (e) All Construction Document Submittals shall address any comments of the City from Design Review Workshops, internal design reviews, quality control, and design reports.
- (f) The Construction Document Submittals shall contain resolution of all issues identified during Design Development Submittal reviews.
- (g) Quantity Sheets shall be provided by DB Co and shall be prepared using the latest version of the MTO's Contract Preparation System (CPS).
- (h) The Construction Document Submittals shall contain all specifications, special provisions and operational constraints for the Works.

5.2 Roadway Design

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals.

5.3 Drainage Design

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals.

5.4 Structures, Culvert, Submerged Culverts, High Mast Lighting Footings and Overhead Sign Support Structure

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals.

5.5 Retaining Wall and Noise Barrier Design

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals;
 - (b) For proprietary Retaining Walls, the responsible engineer, who shall be a duly experienced Professional Engineer of the appropriate discipline, shall certify the design and construction of the Retaining Walls.

5.6 Geotechnical Foundation Design

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals.

5.7 Pavement Design

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals.

5.8 Electrical, Signing and Pavement Markings Design

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals.

5.9 Landscaping and Site Restoration

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals.

5.10 Intelligent Transportation Systems

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals.

5.11 Traffic Engineering

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals.

5.12 Environmental Design

- (a) The Construction Document Submittals shall contain the following:
 - (i) updated information from the Final Design Development Submittals;
 - (ii) Design and Construction Report;
 - (iii) Final Eligibility Letter for EA Clearance / Environmental Clearance Letter, and comments and responses during the completed 30 day review period; and
 - (iv) Contract drawings as required and in conformity to Design and Construction Reports (DCR).

5.13 Utility Design

- (a) The Construction Document Submittals shall contain the following:
 - (i) Updated information from the Final Design Development Submittals, including all draft materials required for an Encroachment Permit application (or a copy of the application if already submitted to MTO).

5.14 Issued for Construction Drawings

- (a) DB Co shall submit signed and sealed copies of all drawings and specifications that are “Issued for Construction”, together with manuals, instructions to the Construction Contractor and other relevant information as requested by the City Representative, to the City Representative and to the Independent Certifier.
- (b) Issued for Construction documents shall be signed and sealed by the responsible engineer, who shall be a Professional Engineer.

5.15 Record Drawings

- (a) DB Co shall provide a detailed log (spreadsheet format) identifying all Record Drawings. The detailed log shall include, as a minimum, the drawing number for all Record Drawings with a summary of the changes made during the Construction Period.

6. CHECKING OF STRUCTURAL DESIGN

- 6.1** In accordance with Article 4.2 (General Requirements) of Part B of Schedule 15-2, Part 9 - Highway Works, for relevant design submissions submitted in accordance with the Review Procedure, DB Co shall submit an Independent Structural Design Check Certificate, in the form provided as Attachment 4 to this Appendix B.

ATTACHMENT 1

Sample Contents for a Structural TAF

SAMPLE CONTENTS FOR A STRUCTURAL TAF

Ref. No:

1. PROJECT DESCRIPTION

- 1.1 Name and location of structure
- 1.2 Permitted traffic speed (for a Bridge give over and/or under)

2. PROPOSED STRUCTURE

- 2.1 Description of Structure
- 2.2 Structural type *(Include reasons for choice)*
- 2.3 Foundation type *(Include reasons for choice)*
- 2.4 Span arrangements *(Include reasons for choice)*
- 2.5 Barrier type
- 2.6 Proposed arrangements for inspection and maintenance
- 2.7 Materials and finishes

3. DESIGN/ASSESSMENT CRITERIA

- 3.1 Live Loading, Clearances
 - 3.1.1 Bridge code loading
 - 3.1.2 Design vehicle
 - 3.1.3 Other live loading
 - 3.1.4 Provision for exceptional abnormal loads:
 - 3.1.4.1 Gross weight
 - 3.1.4.2 Axle load and spacing
 - 3.1.4.3 Location of vehicle track on deck cross-section
 - 3.1.5 Any special loading not covered above
 - 3.1.6 Minimum clearances provided (vertical and horizontal)
 - 3.1.7 Authorities consulted and any special conditions required

- 3.2 List of relevant design documents

4. STRUCTURAL ANALYSIS

- 4.1 Methods of analysis proposed for Superstructure, Substructure and Foundations
- 4.2 Description and diagram of structure to be used for analysis
- 4.3 Assumptions intended for calculation of structural element property and stiffness
- 4.4 Proposed earth pressure coefficients (k_a , k_o , or k_p) to be used in design of earth retaining elements

5. GROUND CONDITIONS

- 5.1 Acceptance of interpretative recommendations of the soils report to be used in the design and reasons for any proposed departures
- 5.2 Describe Foundations fully including the reasons for adoption of allowable and proposed bearing pressures/pile loads, strata in which Foundations are located, provision for skin friction effects on piles and for lateral pressures due to compression of underlying strata, etc.
- 5.3 Differential settlement to be allowed for in design of structure
- 5.4 Anticipated ground movements or settlement due to embankment loading, flowing water, and measures proposed to deal with these defects as far as they affect the structure
- 5.5 Results of tests of ground water (e.g. pH value, chloride or sulphate content) and any counteracting measures proposed (as applicable)
- 5.6 Anticipated ground movements or settlement due to seismic loading, measures proposed to deal with these impacts as far as they affect the structure

6. CHECKING

- 6.1 Name of proposed Checking Team

7. DRAWINGS AND DOCUMENTS

- 7.1 List of drawings (including numbers) and documents accompanying the submission. To include:
 - 7.1.1 a location plan;
 - 7.1.2 a preliminary general arrangement drawing; and

7.1.3 relevant parts of the ground investigation report.

8. THE ABOVE DESIGN AND CONSTRUCTION PROPOSALS ARE SUBMITTED FOR REVIEW.

Form of MTO Design Certificates

Certificate Ref No. []

MTO DESIGN CERTIFICATE (GENERAL)

In respect of :..... (Provide
submittal details e.g. Roadway, Structures, Drainage, Geotechnical, etc.)

*Project Agreement between the City and DB Co dated [●] (“the Project Agreement”)
relating to the Project. Defined terms and expressions used in this certificate have the meanings
given in the Project Agreement.*

*This form of certificate is to be used by the Design Team and DB Co for certifying the
design of the New MTO Infrastructure to the extent that such New MTO Infrastructure
components have been constructed, installed, altered, upgraded, and/or augmented, in
accordance with Schedule 15-2 – Output Specifications - Design and Construction.*

1. We certify that we have the requisite professional qualifications, skill and
experience to prepare the Design Data referred to herein in accordance with the requirements of
the Project Agreement and all relevant Output Specifications.

2. We certify that we have prepared the Design Data for [.....] listed
in the schedule hereto in accordance with all applicable requirements contained in the [MTO
Design Management Plan] [Design Quality Management Plan] and utilizing the standards of
care, skill and diligence that, in accordance with the standards of our profession, are required of
experienced professionals undertaking the preparation of such Design Data, and that in our
professional opinion such Design Data [Note to Proponents: Inapplicable language to be
deleted/]:

i. complies with all applicable [Output Specifications], including Technical
Appraisal Form No. [.....] dated [.....] as amended by the following [Note to
Proponents: Inapplicable language to be deleted.]:

**[List, if any, the changes made by the issue of Variation(s) and any addenda
to the foregoing Technical Appraisal Form];**

ii. complies with all applicable design requirements of the Project Agreement;

iii. complies with Applicable Law and Good Industry Practice; and

iv. accurately describes and depicts the New MTO Infrastructure to be undertaken.

MTO DESIGN CERTIFICATE (ENVIRONMENTAL)

Project Agreement between the City and DB Co dated [●] (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this certificate have the meanings given in the Project Agreement.

This form of certificate is to be used by the Design Team, Environmental Director and DB Co for certifying the design of environmental works incorporated in the New MTO Infrastructure in accordance with the Project Agreement.

1. We certify that we have the requisite professional qualifications, skill and experience to prepare the Design Data referred to herein in accordance with the requirements of the Project Agreement and all relevant Design and Construction Specifications.
2. We certify that we have prepared the Design Data for [.....] [Name and list of all elements of the environmental works] in the schedule hereto in accordance with all applicable requirements contained in the Design Quality Management Plan and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking the preparation of such Design Data, and that in our professional opinion such Design Data:
 - i. complies with all applicable [Design and Construction Specifications], including Technical Appraisal Form No. [.....] dated [.....], as amended by the following [Note to Proponents: Inapplicable language to be deleted.]:

[List, if any, the changes made by the issue of Variation(s), and any addenda to the foregoing Technical Appraisal Form];
 - ii. complies with all applicable requirements of Schedule 17 - Environmental Obligations;
 - iii. complies with all applicable design requirements of the Project Agreement;
 - iv. complies with Applicable Law and Good Industry Practice; and
 - iv. accurately describes and depicts the New MTO Infrastructure to be undertaken.

Form of MTO Construction Certificates

Certificate Ref. No. []

MTO CONSTRUCTION CERTIFICATE (INTERIM)

Project Agreement between the City and DB Co dated [●] (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this certificate have the meanings given in the Project Agreement.

This form of certificate is to be used by the Design Team, Construction Contractor and DB Co for certifying in accordance with Section 3.1(d) of this Appendix B to Schedule 10 – Review Procedure, the Construction Activities in accordance with Schedule 15 – Output Specifications to the Project Agreement. This certificate is effective as of [date].

Construction Contractor’s Statement

1. We certify that all the New MTO Infrastructure up to the effective date of this certificate has been designed, constructed, tested, and if applicable commissioned, and is in accordance with:

- i. the relevant Design Data and any Design Certificates issued to date in each case to which there has been no objection under the Review Procedure;
- ii. Applicable Law and Good Industry Practice; and
- iii. the provisions of the Project Agreement, including all applicable Design and Construction Specifications [as amended by the following Variation(s): [.....]].

with the exception of:

- i **[Non-Conformance Report(s) in “open” status]**

Design Team's Statement

2. We certify that we have examined the New MTO Infrastructure up to the effective date of this certificate in accordance with the requirements for examination of the Works contained in the Design Quality Management Plan and the Construction Quality Management Plan and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking such examinations, and that in our professional opinion the New MTO Infrastructure and exception(s) stated in the Construction Contractor's Statement above has been designed, constructed, tested and commissioned, as applicable, and is in accordance with:

- i. the relevant Design Data and any Design Certificates issued to date in each case to which there has been no objection under the Review Procedure;
- ii. Applicable Law and Good Industry Practice; and
- iii. the provisions of the Project Agreement, including all applicable Design and Construction Specifications [as amended by the following Variation(s): [.....]].

MTO CONSTRUCTION CERTIFICATE (COMPLETION)

Project Agreement between the City and DB Co dated [●] (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this certificate have the meanings given in the Project Agreement.

This form of certificate is to be used by the Design Team, Construction Contractor and DB Co for certifying in accordance with Section 3.1(d) of this Appendix B to Schedule 10 – Review Procedure, the Construction Activities in accordance with Schedule 15 – Output Specifications to the Project Agreement.

Construction Contractor’s Statement

1. We certify that [name(s) and element(s) of the New MTO Infrastructure] [the New MTO Infrastructure in respect of Handover] has been designed, constructed, [commissioned and tested] and has met the requirements for [Handover] in accordance with: *[Note to Proponents: Inapplicable language to be deleted.]*

- i. the relevant Design Data and Design Certificates in each case to which there has been no objection under the Review Procedure;
- ii. Applicable Law and Good Industry Practice; and
- iii. the provisions of the Project Agreement, including all applicable Design and Construction Specifications [as amended by the following Variation(s): [.....]].

Design Team's Statement

2. We certify that we have examined the [name(s) and element(s) of the New MTO Infrastructure] [the New MTO Infrastructure in respect of Handover] in accordance with the requirements for examination of the Works contained in the Design Quality Management Plan and the Construction Quality Management Plan and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking such examinations, and that in our professional opinion [the said element of the New MTO Infrastructure][the New MTO Infrastructure] has been designed, constructed, [commissioned and tested] and has met the requirements for [Handover] in accordance with: *[Note to Proponents: Inapplicable language to be deleted.]*

- i. the relevant Design Data and Design Certificates in each case to which there has been no objection under the Review Procedure;
- ii. Applicable Law and Good Industry Practice; and
- iii. the provisions of the Project Agreement, including all applicable Design and Construction Specifications [as amended by the Variation(s) listed in paragraph 1.(iii) above].

Certificate Form

Certificate Ref. No []

INDEPENDENT STRUCTURAL DESIGN CHECK CERTIFICATE

Defined terms and expressions used in this certificate have the meanings given in the agreement between the City and DB Co dated [●] (“the Project Agreement”) relating to the Project.

This form of certificate is to be used by the Independent Checking Team for certifying the design of structures incorporated in the New MTO Infrastructure, in accordance with Part B of Schedule 15-2 Schedule 15-2, Part 9 - Highway Works to the Project Agreement.

1. We certify that we have the requisite professional qualifications, skill and experience to perform an independent check of the Design Data referred to herein in accordance with the requirements of the Project Agreement.

2. We certify that we have performed an independent check (as required by the Project Agreement for Significant and Complex Structures) of the Design Data for [.....] **[Name of the Structure and list of all elements of the Structure included in the Design Data]** listed in the Schedule hereto and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking such an independent check, and that in our professional opinion:

- i. the said Design Data meets performance expectations outlined in the Project Agreement, **[including Technical Appraisal Form]** No. [.....] dated [.....], as amended by the following:

[List, if any, the changes made and any addenda to the foregoing Technical Appraisal Form]; and

- ii. the design, methodologies and assumptions are consistent with Good Industry Practice.

SCHEDULE 11

INTEGRATED MANAGEMENT SYSTEM REQUIREMENTS

[REDACTED]

**SCHEDULE 12
WORKS SCHEDULING REQUIREMENTS**

[REDACTED]

SCHEDULE 13

DB CO PROPOSAL EXTRACTS

[REDACTED]

SCHEDULE 14

TESTING & COMMISSIONING

1. SYSTEM TESTING & COMMISSIONING

1.1 General

- (a) DB Co shall plan, schedule, coordinate and execute an overall system Testing & Commissioning Program for the Works.
- (b) Remaining Systems Integration Works shall include:
 - (i) updating and testing the existing head end management platform at the TOCC and BCC, excluding S&TCS as set out in more detail in Schedule 15;
 - (ii) updating and testing the on-board CBTC system; and
 - (iii) such other design, construction and activities specified in the System Integration Management Plan or this Project Agreement to be the responsibility of either the City or RTG.
- (c) DB Co shall ensure that the Works comply with the requirements of this Schedule 14 as follows:
 - (i) The East Works, West Works, and Remaining Works testing and commissioning activities shall comply with the requirements of Section 1 through Section 1.7;
 - (ii) DB Co Trial Running participation shall comply with section 1.8
 - (iii) The Highway Works testing and commissioning activities shall comply with the requirements of this Schedule 14, and Appendix A.
- (d) DB Co shall perform testing and commissioning of the Works in four phases:
 - (i) East Works;
 - (ii) West Works;
 - (iii) Highway Works; and
 - (iv) Remaining Works.
- (e) DB Co shall develop, and the Testing & Commissioning Program shall be comprised of, distinct Testing & Commissioning Plans for each of the four testing and commissioning phases referred to in Section 1.1(d) above.
- (f) The timing of the Testing & Commissioning Program shall support a minimum of 90 days between East Substantial Completion and West Substantial Completion.

- (g) DB Co shall submit the four-part Testing & Commissioning Program within the following timeframes in accordance with Schedule 10 – Review Procedure;
 - (i) Preliminary - within 12 months of Financial Close
 - (ii) Final – no later than 180 days prior to the start of testing and commissioning activities.
 - (iii) IFC – no later than 60 days prior to start of testing and commissioning activities
- (h) DB Co’s Testing & Commissioning Plans will identify FAT, SAT, SIT and the testing and commissioning requirements pursuant to this Schedule 14, Schedule 15-2, Part 1 Article 11 - Systems Integration Program, and Schedule 15-2 Part 3 - Systems.
- (i) [Intentionally deleted]
- (j) Without prejudice to Sections 11.12(j), (k), 18.5 and 18.7 of the Project Agreement, DB Co shall provide all required resources, work processes and management authority to exercise control over the planning, scheduling, co-ordination, prioritization, and delivery of the Works in order to mitigate in accordance with Good Industry Practice, systems integration risks and secure successful project completion (collectively the “**Systems Integrator**” role).
- (k) DB Co shall comply with Good Industry Practice for all required testing and commissioning activities set out in this Schedule 14, Schedule 15-2 Part 1 Article 11- Systems Integration Program, and Schedule 15-2 Part 3 - Systems. DB Co shall provide all of the documentation to the City in accordance with the requirements of Schedule 10 - Review Procedure.
- (l) In order for DB Co to achieve East Substantial Completion and West Substantial Completion, DB Co, in its role as Systems Integrator, shall be responsible for the integration testing of the systems elements described in SIT below and as outlined under this Schedule 14 – Testing & Commissioning.
- (m) DB Co shall develop the Systems Integration Management Plan (SIMP) as referenced in 15-2 Part 1 Article 11 – Systems Integration Program. The Systems Integration Management Plan (SIMP) shall include the SIT to be executed as part of the Testing & Commissioning Program.
- (n) The City and DB Co shall jointly appoint an arm’s length independent third party expert (the “**Systems Integration Verifier**”) to:
 - (i) provide a fast track dispute resolution process for the Parties for disputes related to the integration and function of the communications systems (“**Systems Integration Disputes**”) as outlined in Schedule 27 – Dispute Resolution Procedure;
 - (ii) during the installation, testing, and commissioning phases, review and comment for compliance and clarity on all Submittals related to communications and Train Control;

- (iii) receive upon request any documents that pertain to: (A) integration, testing and commissioning plans, (B) traceability documents, and (C) test and commissioning procedures;
- (iv) review and provide confirmation of successful completion of the Remaining Systems Integration Works; and
- (v) either: (A) issue a report confirming successful completion of Systems Integration Works; or (B) issue a report detailing the matters that the Systems Integration Verifier considers are required to be performed prior to the successful completion of the Systems Integration Works.

1.2 Testing & Commissioning Coordinator

- (a) DB Co shall appoint a testing and commissioning coordinator (the “**Testing & Commissioning Coordinator**”) to perform the obligations of DB Co as set out in this Schedule 14.
- (b) The Testing & Commissioning Coordinator shall have the qualifications as outlined in Schedule 9 – Key Individuals.

1.3 Testing & Commissioning Responsibilities

- (a) DB Co shall be responsible for preparing and executing the Testing & Commissioning Plans required to successfully demonstrate that the New City Infrastructure has been designed, constructed and functions in accordance with the Project Agreement. The Testing & Commissioning Plans shall outline the methods and procedures to be utilized to verify compliance with the technical requirements of the Project. The Testing & Commissioning Plans shall be structured to ensure a systematic and thorough evaluation of all individual subsystem components.
- (b) The Testing & Commissioning Coordinator shall be responsible for directing the efforts of DB Co’s Testing & Commissioning Plans and the Testing & Commissioning Team, all aspects of the testing and commissioning process, including coordinating access to test locations, support requirements, test efforts and test activities, and providing overall monitoring of testing and commissioning activities. Additionally, the DB Co Testing & Commissioning Coordinator shall be responsible for coordinating the systems integration testing and system commissioning activities as identified in this Schedule 14, Schedule 15-2, Part 1 Article 11- Systems Integration Program, and Schedule 15-2 Part 3 - Systems.
- (c) DB Co’s Testing & Commissioning Program shall include the following:
 - (i) relationship to safety and security management and other related safety and security requirements;
 - (ii) organization chart of the Testing & Commissioning Team, as per Section 1.4, and their discipline responsibilities including preparation of test plans, procedures, reports, recording of test data, review of test data, reporting and resolution of test failures and anomalies, and coordination of each test effort;

- (iii) resumes of key personnel involved detailing years of experience;
 - (iv) planned resources;
 - (v) specific requirements for the City or other third party interfaces;
 - (vi) testing and commissioning procedures as per Section 1.5; and
 - (vii) testing requirements, sequencing and estimated durations for each test, as defined in Section 1.6 and in accordance with Schedule 12 – Works Scheduling Requirements.
- (d) The Testing & Commissioning Program shall demonstrate how DB Co intends to validate and verify that the functional and technical requirements, performance criteria, quality and safety aspects of the System Infrastructure have been met and that the System Infrastructure has been designed and constructed in conformance with the Project Agreement.
- (e) The Testing & Commissioning Program shall be developed and modified as required to address the evolution of the Project, provided that any amendment to the Testing & Commissioning Program shall be submitted to the City in accordance with Schedule 10 – Review Procedure.
- (f) DB Co shall be responsible for implementing or directing through the SIMP all testing and commissioning activities required to achieve East Substantial Completion, West Substantial Completion, East Final Completion, or West Final Completion (including completion of Remaining Works), , as applicable. Testing and commissioning activities shall include but are not limited to:
- (i) Pre-delivery Tests
 - A. **DB Co Component Testing** – components manufactured by DB Co suppliers shall be inspected and tested in the factory. Component testing shall be undertaken by all DB Co equipment suppliers. The results of all DB Co component testing shall be available for inspection or audit by the City;
 - B. **First Article Testing** – shall be conducted on the first production unit of any DB Co supplied equipment prior to first shipment from the factory to ensure the units are suitable in all respects for the purpose intended;
 - C. **Qualification Testing or Type Testing**– one or more samples of critical DB Co supplied components, which are newly designed and developed and, where prior qualification cannot be demonstrated in a similar and representative environment, shall be subject to qualifications testing. Qualifications testing shall be performed to show compliance of the DB Co supplied equipment with standards as required by the Project Agreement; and
 - D. **Factory Acceptance Test (FAT)** – where appropriate and reasonably practical, DB Co supplied components that will be brought together to

provide subsystems and systems, that have not previously been demonstrated in service on the Existing Confederation Line, shall first be tested in the factory in a representative operating environment against an agreed upon set of factory acceptance or factory integration test procedures. Once successfully completed, the DB Co supplied system can be deployed to site for installation/verification tests; and,

(ii) Post Installation Checkout (**PICO**).

Post Installation Checkout tests, audits and inspections shall form part of the scope of East Works and West Works to be performed by DB Co in connection with obligations under Schedule 14 – Testing & Commissioning to achieve both East Substantial Completion and West Substantial Completion. Once the deployed component, subsystem, or system has been installed, it shall be verified against the installation drawings to ensure correct installation and that no damage has been sustained in the installation process. Installation of equipment, cabinets, power, grounding, cabling and other equipment shall be compared against installation drawings for correct locations, routing, connectivity, etc. In terms of sequencing these audits/inspections shall be performed as a pre-requisite to the start of the Site Acceptance Testing regime described below.

The Systems Integration Verifier will be notified 21 days in advance of specified PICO, witness PICO and sign-off on all specified PICO verification documentation, related to integration to the extent the same required attendance and sign-off by the System Integration Verifier, as specified in the SIMP

(iii) Site Acceptance Tests (**SAT**)

Site Acceptance tests, audits and inspections shall form part of the scope of East Works and West Works to be performed by DB Co in connection with obligations under Schedule 14 – Testing and Commissioning to achieve both East Substantial Completion and West Substantial Completion. In terms of sequencing these tests shall be conducted following PICO and in accordance with DB Co's Testing & Commissioning Schedule (as defined in Section 1.6 below). Following successful completion of PICO (with no major deficiencies), the components, subsystems or systems installed by DB Co shall undergo start-up tests and then be tested against an agreed upon set of SAT procedures. SAT testing of a system may include some level of integration but is intended to test subsystems independently. The Systems Integration Verifier will be notified 21 days in advance of SAT, witness SAT and sign-off on all SAT reports. The Systems Integration Verifier will be notified in advance of any SAT regression test intended to re-test any equipment that failed the initial SAT, witness SAT regression test and sign-off on all SAT regression test reports. The Systems Integration Verifier will provide written confirmation that DB Co has successfully completed SAT.

Where power, including Traction Power, shall be applied during SAT, site safety procedures will be prepared to reflect this new hazard on the testing and commissioning site.

(iv) Systems Integration Testing (**SIT**)

- A. Once two or more systems have completed SAT, they will be brought together to commence SIT. SIT will also reflect that some system suppliers are expected to be unable to demonstrate all technical requirements without integration with other supplier systems. SIT shall therefore concentrate on intersystem functionality and performance under normal, abnormal, and emergency scenarios. The Systems Integration Verifier will be notified in advance of any SIT regression test intended to re-test any equipment that failed the initial SIT, witness SIT regression test and sign-off on all SIT regression test reports. The Systems Integration Verifier will provide written confirmation that DB Co has successfully completed SIT.
- B. SIT shall include but not be limited to the following tests:
- i. SCADA & Power Supply & Distribution System Integration Tests
 - ii. Vehicle and Infrastructure Integration Tests
 - iii. SCADA and Tunnel Ventilation System Integration Tests
 - iv. BMS and Station Systems Integration Tests
 - v. LMSF and Mainline Integration Tests
 - vi. Vehicle and CBTC System Integration Tests
 - vii. Vehicle and Communications Systems Integration Tests
 - viii. P25 Radio Tests
 - ix. General Integration Tests
- C. SIT shall include but not be limited to the following demonstrations of operational performance requirements, based on the Vehicles achieving the performance characteristics provided by the City:
- i. DB Co shall confirm their SI design is capable of supporting the required minimum headway of two minutes.
 - ii. DB Co shall demonstrate the maximum travel times specified in Schedule 15-2 Part 1 Clause 3.4 (d), while respecting the minimum dwell times specified in Schedule 15-2 Part 1 Clause 3.4 (f);
 - iii. DB Co shall demonstrate other operational capabilities of the SI that can be tested independently of the Existing Confederation Line, including operations in normal, abnormal, and emergency scenarios.

- D. The City shall provide vehicles and Operators as needed by DB Co to successfully complete SIT based on the resource requirements documented in the City-approved test plans and test procedures.
- (g) System Testing & Commissioning Verification
- (i) The following commissioning checklist items shall be verified by the Systems Integration Verifier as has having been performed or provided as part of the East Works and West Works in connection with obligations under this Schedule 14 – Testing & Commissioning as conditions to achieving East Substantial Completion and West Substantial Completion:
 - A. all System Infrastructure has been installed, tested and certified pursuant to Schedule 15 – Output Specifications;
 - B. all required static and dynamic testing has been completed;
 - C. successful completion of SIT of the East Works, or West Works, as the case may be, to demonstrate that the systems operate in accordance with the requirements of this Project Agreement;
 - D. all specified contractual documentation has been delivered by DB Co;
 - E. all tools and test equipment to maintain the System Infrastructure have been delivered by DB Co;
 - F. DB Co’s required training of operations and maintenance staff has been successfully completed in accordance with Schedule 15-2 Part 1;
 - G. all documentation including drawings and User and Maintenance Manuals have been submitted to the City in accordance with Schedule 10 – Review Procedure;
 - H. DB Co has identified specialized tools and test equipment necessary to maintain the system and all specialized tools and test equipment have been delivered to the City in accordance with Schedule 15 – Output Specifications;
 - I. all New Municipal Infrastructure is installed, tested and certified pursuant to the contractual obligations;
 - J. the Compliance Verification and Validation Matrix has been completed;
 - K. there are no outstanding defects affecting rail systems functionality, including track, signals and communications;
 - L. there are no major safety defects in the System Infrastructure that could affect the safety of personnel or equipment or the safe running of the Systems Infrastructure;

- M. all Stations are substantially complete with only Minor Deficiencies remaining; and
 - N. all hardware, software and licenses for DB Co scope necessary to operate and maintain the System Infrastructure have been delivered by DB Co.
- (h) The Testing & Commissioning Program shall provide for the oversight and monitoring of testing and commissioning activities for the duration of the Project Operations by the City and System Integration Verifier as outlined in 1.3 (g). The City reserves the right to witness any test, audit or inspection.
- (i) In addition to the tests specified in Schedule 15-2 and this Schedule 14 the City and the System Integration Verifier shall have the right, when acting reasonably, to identify specific testing requirements that shall require validation.
- (j) DB Co shall prepare and submit individual test plans and procedures, in accordance with Schedule 10 – Review Procedure for all tests of New City Infrastructure a minimum of 30 days in advance of such tests. DB Co shall provide the City with a minimum of 21 days advance notice of such tests. .
- (k) The DB Co Testing & Commissioning Coordinator shall convene a meeting of the Testing & Commissioning Team to review the Testing & Commissioning Program, set testing and commissioning parameters, designate the responsibilities of the various parties and establish the documentation requirements for each stage of the Works and the commissioning process.
- (l) The DB Co Testing & Commissioning Coordinator shall submit monthly reports to the City and the Systems Integration Verifier detailing the progress of testing and commissioning activities.
- (m) DB Co, in implementing the Testing & Commissioning Program, shall verify that all requirements of the Testing & Commissioning Program have been met, including that:
 - (i) the New City Infrastructure has been installed and is operating in accordance with the requirements of this Project Agreement;
 - (ii) the performance of the New City Infrastructure meets the requirements of the Output Specifications and this Project Agreement;
 - (iii) As-built Drawings, Record Drawings, Design Certificates, Construction Certificates, LEED Certification for Moodie LMSF, and operating and maintenance manuals have been provided in accordance with this Project Agreement.
- (n) The City shall provide orientation to the System Infrastructure constructed by DB Co to the Ottawa Emergency Services, including; the Fire Departments, Paramedics, and Police pursuant to Schedule 15-2, Part 1.

1.4 Testing & Commissioning Team

- (a) The Testing & Commissioning Team shall be comprised of:

- (i) DB Co Testing & Commissioning Coordinator;
 - (ii) DB Co Testing & Verification Manager;
 - (iii) Systems Integration Verifier
 - (iv) representatives of the City;
 - (v) Independent Certifier; and
 - (vi) where applicable, Subcontractors and representatives of the equipment manufacturers.
- (b) DB Co and each of its Subcontractors shall assign, where applicable, individuals from each relevant trade to the Testing & Commissioning Team and shall ensure that representatives of the City and relevant Systems and equipment manufacturers and testing agencies are present during the DB Co Testing & Commissioning Team meetings.
- (c) DB Co shall provide all necessary labour, materials, equipment, testing apparatus and incidentals necessary to verify performance test of each item of New City Infrastructure provided as part of the Works.
- (d) After Financial Close, the Testing & Commissioning Team shall, when applicable, meet monthly to review the progress of the development of the Testing & Commissioning Program. 60 days prior to the commencement of testing, the Testing & Commissioning Team shall, when applicable, meet weekly to review the progress and schedule of testing and commissioning activities.

1.5 Testing and Commissioning Procedures

- (a) DB Co shall ensure that all regulation and code references in the Reference Documents, in addition to the provisions of Schedule 15 – Output Specifications have been fully complied with.
- (b) The DB Co Testing & Commissioning Coordinator shall plan, prepare documentation and execute the Testing & Commissioning Program process and procedures. Specifically, the DB CO Testing & Commissioning Coordinator or DB Co Testing & Verification Manager shall:
 - (i) prepare test plans, schedules and resource requirements;
 - (ii) prepare test procedures;
 - (iii) oversee the performance of tests and documentation of test results;
 - (iv) oversee re-testing, if necessary; and
 - (v) submit certified test reports.
- (c) DB Co shall ensure that each of the requirements set out in this Schedule 14 and those identified in Schedule 15 – Output Specifications are met.

- (d) Training:
 - (i) DB Co shall provide operational and maintenance training and manuals for all System Infrastructure including, but not limited to:
 - A. Traction Power/OCS
 - B. S&TCS;
 - C. Communications;
 - D. Fire/life safety and safety and security systems;
 - E. Track and right of way;
 - F. Station facilities equipment and systems;
 - G. LMSF facilities equipment and systems; and
 - H. Tunnel and guideway facilities equipment and systems.
 - (ii) DB Co shall provide a training schedule, training plans and agenda for each training session to the City, submitted in accordance with Schedule 10 - Review Procedure.
 - (iii) The DB Co Testing & Commissioning Coordinator or designated delegate shall attend a sample of every training session to ensure the agenda is maintained and that quality training is provided. One training session for each category shall be video recorded in digital format. The video shall be submitted to the City on appropriate media for City viewing and labelled accordingly.
 - (iv) Training shall be conducted at the operating station for Systems or such DB Co supplied equipment.
 - (v) All training sessions shall be logged and personnel shall be recorded as receiving training. Further refreshers shall be scheduled in line with safety, quality and training requirements.
 - (vi) Operational and maintenance training shall be completed prior to achievement of Substantial Completion.
 - (vii) RTG/City Party shall be responsible for providing training related to Remaining Systems Integration Works.

1.6 DB Co Testing & Commissioning Submittals

- (a) DB Co shall prepare and submit to the City, test plans and procedures and test forms, verification forms and performance test forms for all equipment and Systems. Test plans and procedures should provide full traceability to the requirements of Schedule 15 – Output Specifications. Test procedures should include but not be limited to the following:

- (i) test objectives including compliance matrices identifying the relevant Project Agreement clauses that are being verified and validated;
 - (ii) required safety methods and prerequisite training required;
 - (iii) associated tests and pass/fail criteria;
 - (iv) reference specifications/standards and supporting literature;
 - (v) staffing requirements including requirements from the City or other third parties;
 - (vi) test methods;
 - (vii) required instrumentation, equipment, facilities and supporting systems;
 - (viii) test location;
 - (ix) pass/fail criteria;
 - (x) identification of professional personnel and resumes of those responsible for sign-off; and
 - (xi) test results and recommendations.
- (b) DB Co shall submit test plans and procedures to the City for review and approval a minimum of 60 days prior to the respective test.
- (c) DB Co shall create the Testing & Commissioning Schedule as specified in Schedule 12 – Works Scheduling Requirements. The Testing & Commissioning Schedule shall include: RTG’s static and dynamic testing; SIT activities related to the Remaining Systems Integration Works; SIT of Vehicle/S&TCS integration; and the SIT demonstrations of operational performance requirements.
- (d) DB Co shall clearly identify all upcoming testing and commission activities in Informal Implementation Schedules, as defined in Schedule 12- Works Scheduling Requirements.
- (e) DB Co shall prepare and submit monthly updates on the progress of testing and commissioning activities in accordance with Schedule 33 – Works Report Requirements.
- (f) DB Co shall prepare and submit to the City detailed commissioning manuals for each item of New City Infrastructure provided as part of the East Works, West Works, Highway Works and Remaining Works, as applicable (the “**Manuals**”) in accordance with Schedule 10 – Review Procedure.
- (g) The Manuals shall include:
- (i) name and logo as directed by the City;
 - (ii) name of the Project;
 - (iii) Project number;

- (iv) identification of each item of System Infrastructure, New Municipal Infrastructure or Highway Works, as applicable;
 - (v) the date that each system item was tested/verified;
 - (vi) the signature of the DB Co Testing & Commissioning Coordinator;
 - (vii) issue and date;
 - (viii) document version control;
 - (ix) document amendments table;
 - (x) test reports;
 - (xi) configuration control records;
 - (xii) equipment check sheets (start-up, verification and performance) for each item of the System Infrastructure, New Municipal Infrastructure or Highway Works, as applicable, provided as part of the Works; and
 - (xiii) interim and final acceptance check sheets for each item of the System Infrastructure, New Municipal Infrastructure or Highway Works, as applicable.
- (h) DB Co shall prepare and submit operations and maintenance manuals in accordance with the requirements of Schedule 10 - Review Procedure.
 - (i) DB Co shall prepare and submit configuration control records in the format provided by the City and in accordance with the requirements of Schedule 10 - Review Procedure.
 - (j) DB Co shall provide a minimum of two years' worth of consumables for all elements of the System Infrastructure in accordance with the manufacturers' recommendations for maintenance for each element, in addition to the spare parts requirements under the Interface Agreement.

1.7 Coordination with the City and Independent Certifier

- (a) The DB Co Testing & Commissioning Coordinator shall co-ordinate with the City and Independent Certifier throughout the testing and commissioning process. This co-ordination shall include:
 - (i) review of test, verification and performance test forms;
 - (ii) review of testing progress management forms and performance testing;
 - (iii) review of the DB Co Testing & Commissioning Program;
 - (iv) review of the Testing & Commissioning Schedule;
 - (v) witnessing of installation and performance testing;

- (vi) review of the training curriculum and materials as outlined in Schedule 15-2, Part 1, Article 17 – Operations Training, and scheduling;
 - (vii) review of the operations and maintenance manuals;
 - (viii) sample witnessing of seasonal performance testing as applicable;
 - (ix) review of the test reports;
 - (x) attendance at Testing & Commissioning Team meetings; and
 - (xi) reporting progress of the Testing & Commissioning Program.
- (b) The Independent Certifier shall review compliance matrices to ensure traceability between testing requirements and testing procedures.

1.8 Trial Running

- (a) After Substantial Completion the City will undertake Trial Running of the System Infrastructure on the East Works and West Works to validate that the fully integrated system functions in accordance with the requirements of this Project Agreement. Without prejudice to Sections 11.12(j), (k), 18.5 and 18.7 of the Project Agreement, Trial Running for the East Works, and West Works shall demonstrate that the specified travel times, headways and operational performance requirements outlined in Schedule 15-2, Part 1, Article 3 can be achieved, based on the Vehicles achieving the performance characteristics provided by the City. Trial Running shall be integrated with regular revenue service on the Existing Confederation Line operating segment and extended along the East Works, or West Works, as the case may be. Passengers shall not be carried on the new operating segments during the Trial Running period. The Trial Running shall simulate the operation of the full regular scheduled service on the System Infrastructure for a minimum 21 day period. For the purposes of this Project Agreement, Trial Running shall be deemed completed upon completion of the minimum 21 days of Trial Running without an interruption due to warranty work for at least 14 consecutive days. Completion of Trial Running shall be a condition of East Final Completion and West Final Completion, as the case may be, provided that Trial Running completion has not been achieved within 90 days of the relevant Substantial Completion Date for reasons other than due to the fault of DB Co or any DB Co Party, Trial Running shall be deemed to have been completed for the purposes of the Final Completion under this Project Agreement.
- (i) The fundamental objective of Trial Running is to test and exercise the respective System Infrastructure, including all subsystems, that comprise the relevant works, operating personnel and operating procedures to demonstrate the East Works and West Works can reliably implement passenger service without interruptions. This can be subdivided into the following key objectives:
 - (A) to validate the performance of the East and West System Infrastructure with operating and maintenance staff who are trained on the operation

and maintenance of the System Infrastructure and Standard Operating Procedures;

- (ii) The following are DB Co's responsibility during Trial Running
 - (A) DB Co's Testing and Commissioning Team shall participate on a day to day basis. DB Co shall actively participate with the City Representative in the daily meetings to; review performance, service availability and delay issues as they relate to East Works or West Works and review any maintenance and rehabilitation services on the East Works or West Works for the System Infrastructure that could potentially affect System Infrastructure operation or public safety.
 - (B) DB Co shall use the Trial Running period to review the operating data and evaluate system reliability, availability, and maintainability performance for the East Works and West Works. Using prescribed procedures, data on service deviations will be collected and assigned against the specific subsystems down to the Line Replaceable Unit (LRU) level. The database shall provide verification of system reliability to the LRU level.

APPENDIX A INSPECTION, COMMISSIONING AND HANDOVER

NEW MTO INFRASTRUCTURE

For clarity, the obligations of DB Co in this Appendix A are in addition to and not in substitution of any other requirements for commissioning of the Works and/or any other requirements in respect of the New MTO Infrastructure contained in the Project Agreement or this Schedule 14, including, for clarity, the process and requirements set out in Section 25 of the Project Agreement. The obligations in this Appendix A are in respect of New MTO Infrastructure only.

1. INSPECTION, COMMISSIONING AND HANDOVER

1.1 Interim Inspection of New MTO Infrastructure

- (a) DB Co shall comply with all requirements set out in this Schedule 14 – Testing & Commissioning (including, for clarity, this Appendix A) as well as all requirements set out in Section 25.16 of the Project Agreement in connection with interim inspections of New MTO Infrastructure.
- (b) DB Co shall notify the City of achievement of all milestones set out in the Inspection and Test Plan in respect of New MTO Infrastructure as well as all Witness Points and Hold Points in respect of New MTO Infrastructure.

1.2 Final Inspection of New MTO Infrastructure

- (b) DB Co shall comply with all requirements set out in this Schedule 14 – Testing & Commissioning (including this Appendix A) as well as all requirements set out in Section 25.16 of the Project Agreement in connection with final inspections of New MTO Infrastructure.
- (c) Prior to final inspection of New MTO Infrastructure, DB Co shall, in addition to all other requirements set out in Section 25.16 of the Project Agreement:
 - (i) remove all temporary work no longer required from the site subject to final inspection, including but not limited to fencing, sign board, samples, and any other items not considered to be part of New City Infrastructure or New MTO Infrastructure, except for those items required for ongoing Works; and
 - (ii) clean all New MTO Infrastructure prior to Handover following final inspection of such New MTO Infrastructure including:
 - (A) sweeping/spraying of roads, boulevards and sidewalks;
 - (B) flushing of sewers; and
 - (C) cleaning out of catch basins, maintenance holes, and valve chambers, all taking into account ongoing Works.
- (d) The final inspection of New MTO Infrastructure shall be completed pursuant to Section 25.16 of the Project Agreement. The Final Inspection Checklist included in Exhibit 1 to this Appendix shall be signed off by all representatives completing the final inspection.

1.3 Pre-Conditions to Handover of New MTO Infrastructure

In addition to any other requirements in the Project Agreement, DB Co shall complete the following activities prior to, and as a condition of, Handover of New MTO Infrastructure:

- (a) paving of all road surfaces;
- (b) completion of all structures and drainage systems;
- (c) full operation of all traffic lighting and signalization;
- (d) completion of all permanent pavement markings at all intersections and on all major roads;
- (e) installation of all regulatory, warning and guide signing;
- (f) installation of all median and roadside barrier and other safety devices;
- (g) installation of all illumination;
- (h) installation of all ITS/ATMS equipment and civil infrastructure;
- (i) installation of all safety devices;
- (j) signing of the New MTO Infrastructure in accordance with PHM-125;
- (k) return of all construction staging areas located on the MTO Lands to their original condition or a condition otherwise acceptable to City;
- (l) issuance of a completed and signed Stage 4 Road Safety Audit Certificate in respect of the Highway Work to the City Representative;
- (m) clearing and removal of all debris, superfluous materials and equipment from Highway Corridor Lands, as defined in Schedule 20 - Lands;
- (n) submission to the City Representative of all MTO Construction Certificates in respect of Handover, in accordance with Appendix B of Schedule 10 – Review Procedure; and
- (o) submission to the City Representative of a complete set of As-built Drawings, and Record Drawings in accordance with the requirements of Article 16 of Schedule 15-2 Part 1.

EXHIBIT 1 TO APPENDIX A – NEW MTO INFRASTRUCTURE

Commissioning Requirements and Sign Off

| Item | Comments | Sign-Off |
|--|--|--|
| Final Inspection of the Highway Works representation from <ul style="list-style-type: none"> • Independent Certifier • DB Co | <p>The Project Agreement is intended to allow the Independent Certifier to review the completed Highway Work and ensure that there are no safety issues and that correct signing is in place.</p> <p>It is also important to confirm that all legislative and regulatory requirements are in place such as regulations for stop signs or speed limit signs.</p> <p>Items for review include <u>but are not limited to</u>:</p> <ul style="list-style-type: none"> • Signs (correct and supported by required regulations) • Pavement markings Alignment • Signals- temporary removals and permanent in place • Bike Lanes/Ped sidewalks in conformance with contract • Utility company sign offs Traffic signal operations • Illumination • PHM-125 signed • Commercial and private entrances • Any safety devices are correctly located and operational i.e. guide rail, illumination, active advance warning signs etc. • Final electrical inspection • All contractor testing documentation available and submitted to City Zone painting restored • Maintenance activities completed • All guiderail installed and verification of mounting heights • Signs restored and replaced if damaged by contractor • Erosion control temporary devices removed • All claims resolved | <p>No obvious safety issues are present on this section of highway and all legislative and regulatory requirements are in place.</p> <hr/> <p>DB Co, P.Eng.</p> <hr/> <p>Independent Certifier</p> |

SCHEDULE 15
OUTPUT SPECIFICATIONS
[REDACTED]

SCHEDULE 15-1

TECHNICAL TERMS AND REFERENCE DOCUMENTS

PART 1 TECHNICAL TERMS AND REFERENCE DOCUMENTS..... 1

 ARTICLE 1 DEFINITIONS..... 1

 ARTICLE 2 ACRONYMS..... 24

 ARTICLE 3 REFERENCE DOCUMENTS..... 41

PART 1
TECHNICAL TERMS AND REFERENCE DOCUMENTS

ARTICLE 1 DEFINITIONS

100-Year Storm means a storm event with a return period of one hundred (100) years (1-percent annual exceedance probability), as described in the City of Ottawa Sewer Design Guidelines.

100-Year Plus 20% Storm means a 100-Year Storm calculated on the basis of a 20% increase of the City's Intensity Duration Frequency (IDF) curves.

Access Point means radio transceivers connected to the CBTC network that allow network communications between trains and wayside CBTC equipment.

Accident means an unforeseen event or occurrence which causes death, injury or property damage. Any event involving the revenue service operation of a rail fixed guideway system if as a result:

- An individual dies;
- An individual suffers bodily injury and immediately receives medical treatment away from the scene of the accident; or
- A collision, derailment, or fire causes substantial property damage.

Alert Level has the meaning given in Schedule 15-2, Part 2, Article 7 – Geotechnical Design Criteria and Requirements.

Ancillary Facilities means those facilities, buildings, or structures adjacent to or directly linked to Stations. They can also be standalone facilities or structures located within or adjacent to the alignment. They include the following elements:

- Pedestrian overpass or underpass structures;
- Passenger shelter structures;
- Structures containing mechanical, electrical, communications or other service equipment;
- TPSS Buildings;
- Signal equipment enclosures;
- Parking areas;
- Entrances;
- PPUDO;
- Public washrooms;

- Bus terminals;
- Bus layby areas; and
- Bus Operations support building (including bus supervisor office).

Applicable Codes has the meaning ascribed to “Applicable Law” in Schedule 1 – Definitions and Interpretation.

Art Consultant means the person or persons responsible for the administration of the Art Program on behalf of the City.

Art Program includes both temporary and permanent artwork projects that may be linked, permanently affixed to and / or integrated into the architectural and / or landscape Design along the streets, Guideway, park land, or on the exterior or within the interior of the Stations.

Authorities Having Jurisdiction has the meaning given in NFPA 130.

Automatic Train Control means a vital system for controlling train movement.

Automatic Train Operation means a non-vital overlay for controlling train speed and operation within the limits allowed by the ATP system. Automatic Train Operation provides automatic station stopping, door opening and closing and automatic operation between stations.

Automatic Train Operation Mode means an LRV Train operation mode in which CBTC Automatic Train Operation capabilities are enabled on top of ATP.

Automatic Train Protection means a vital system for enforcing safe train movement and speeds.

Automatic Train Protection Only Mode means a mode of LRV train operation in which only CBTC ATP functions are enabled.

Automatic Train Supervision means a non-vital system providing supervisory commands to adjust train speeds and station dwell times and to request interlocking systems to set up and cancel routes.

Availability means the probability that a system or system element will be operational when required. Mathematically, the ratio of the mean time between failure and the sum of the mean time between failure and the mean down time.

Backup Control Centre means an emergency control center facility providing a remote location complete with the basic functioning systems to dispatch, monitor, and control operations of the OLRT in case the TOCC at 875 Belfast is unavailable.

Baseline Storm Sewer Outfall means the outfall of the 3.0m x 1.8m storm sewer to Pinecrest Creek, located immediately north of the property at [REDACTED].

Basic Day Demand is as defined in Schedule 15-2, Part 2, Article 8 – Utility Infrastructure Design Criteria.

Blast Assessment Report is as defined in Schedule 15-2, Part 2, Article 7 – Geotechnical Design Criteria and Requirements.

Bridge means a structure that provides a Roadway, railway or walkway for the passage of vehicles, pedestrians or cyclists (or other similar forms of transportation) across an obstruction, gap or facility that is greater than 3 metres in span.

Central Instrument House means a wayside control room housing all the controls for an interlocking or group of interlockings.

Certifiable Elements Lists has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Certification Program Representative has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Checked Redundancy Principle has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Civil Works means the installation or relocation of duct banks, manholes, hand wells, vaults, transformer bases, and pads, or underground support structures in speciality structures.

Closed Circuit Television means a video transmission system monitoring a location, recording images and presenting the images to a central location.

Commissioning means the inspection of all components to verify that they are designed, installed, tested, operated and maintained according to the operational requirements of the owner or final client, including Utility Companies.

Communication and Stakeholder Engagement Plan has the meaning given in Schedule 18 – Communications and Stakeholder Engagement Obligations.

Communication Based Train Control means a system of tracking train movement and safely controlling that movement based upon communications between trains and wayside controllers.

Compensating Construction has the meaning given to that term in the OBC.

Complete Streets means the incorporation of physical elements that allow a street to offer safety, comfort and mobility for all users of the street regardless of their age, ability, or mode of transportation.

Concourse Level means the intermediate level of a Station that connects Platform Level and entry level.

Confederation Line means all of the Existing Confederation Line, the Confederation Line East Extension and the Confederation Line West Extension.

Confederation Line Extension means both the Confederation Line East Extension and the Confederation Line West Extension.

Confederation Line Regulations means the bylaws, guidelines, policies, regulations, rules, standards, safety management system requirements and Security management system requirements, or similar instruments or requirements, adopted by the City from time to time in relation to the regulation of the design, construction, operation, maintenance, Safety and Security of, as well as the rates and conditions of service of, the Confederation Line, including the System Infrastructure.

Connaught Tunnel has the meaning given in Schedule 15-2, Part 1 – General Requirements.

Connecting Track has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

Construction Safety Management Plan has the meaning given in Schedule 15-2, Part 1, Article 10 – Construction Safety Management.

Controller means a City employee that will be assigned to the TOCC and will be responsible for all dispatching functions for the system.

Corrosion Control and Stray Current Mitigation Coordination Management Plan has the meaning given in Schedule 15-2, Part 3, Article 12 – Corrosion Control.

Counting Stations and Loops is as defined in Schedule 15-2, Part 9 – Highway Works.

Crime Prevention through Environmental Design means the design, maintenance, and use of the built environment in order to reduce both the incidence and fear of crime. It involves the application of these three core principles: natural surveillance, natural access control, and territorial reinforcement.

Cross-Acceptance means the status achieved by a product that has been accepted by one authority to the relevant Standards and is acceptable to other authorities without the necessity for further assessment.

Crossride means a crosswalk for bikes that allow cyclists to remain on their bikes and safely cross through intersections, identified with thick painted blocks on either side, sometimes enhanced with arrowed bicycle stencils and/or green paint.

Culvert means a structure that forms an opening through soil to allow the passage of surface water, wildlife or pedestrians under a Roadway, railway or roadside entrance.

Cut-and-Cover means a construction method for Underground Structures where the structure is constructed in an excavated trench or pit from the bottom up or the top down and covered with backfill. Underground Structures to be constructed by Cut-and-Cover methods are Tunnels, Underground Station Boxes, portals, shafts and Tunnel pump stations.

Daily Lane Closure Report has the meaning given in Schedule 15-2, Part 7, Appendix D – Daily Lane Closure Report.

Daily Traffic Management Site Record has the meaning given in Schedule 15-2, Part 7, Appendix B – Daily Traffic Management Site Record.

Daily Traffic Monitoring Report has the meaning given in Schedule 15-2, Part 7, Appendix C – Daily Traffic Monitoring Report.

Data Management Protocol (DMP) has the meaning given in Schedule 15-2, Part 2, Article 7, Geotechnical Design Criteria and Requirements.

Deadhead Bus means a bus carrying no passengers and generating no revenue, usually travelling to/from the garage or to/from the start of a bus route.

Demolition Plan has the meaning given in Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal.

Design Criteria means established parameters used during design.

Design Life means the period of time specified by the Owner during which an asset is intended to remain in service.

Design Safety means safety achieved by the integration of safety features into the system design characteristics to prevent or minimize the probability of operation in an unsafe manner.

Designated Waiting Area means TSA used in Schedule 15-2, Part 4, Appendix B and C.

Developer's Guide has the meaning given in Schedule 15-2, Part 2, Article 9 – Protection of Existing Adjacent Structures.

Drainage means the interception and removal of surface water or groundwater by constructed or natural means.

Dwell Time means the amount of time a Train resides at a Station measured from the time the Train wheels come to a stop to the time the Train wheels start moving.

Earth Borrow means a loose soil, sand, silt, or clay stratum that is capable of sustaining the growth of proposed trees and shrubs.

East Portal has the meaning given in Schedule 15-2, Part 1, Article 2 – Physical Layout.

Electromagnetic Interference/Compatibility Control Plan has the meaning given in Schedule 15-2, Part 3 – Systems.

Elements of Continuity has the meaning given in Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.

Elements of Variability has the meaning given in Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.

Elevated Guideway means a Guideway elevated above grade by means of a Structure.

Emergency Guard Rail (Steel Inner) is intended to contain and guard a derailed truck, keeping the Vehicle upright and on the Track structure.

Emergency Response Plan has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

Emergency Services means Emergency Services Provider as defined in Schedule 1 – Definitions and Interpretation.

Emergency Stop Buttons has the meaning given in Schedule 15-2, Part 3, Article 10 – Signalling and Train Control System.

Emergency Stop Devices has the meaning given in Schedule 15-2, Part 3, Article 10 – Signalling and Train Control System.

Emergency Stop Key Switches has the meaning given in Schedule 15-2, Part 3, Article 10 – Signalling and Train Control System.

Emergency Traffic Plan has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Engineering Safety and Assurance Case means the final safety case, providing documented safety evidence demonstrating that the product (i.e. a System, sub-system or equipment) complies with the specified safety requirements and demonstrating that the System is safe for revenue operation.

Environmental Management Plan has the meaning given in Schedule 17 – Environmental Obligations.

Erosion and Sediment Control Plan means the approach, techniques and measures used to prevent erosion during the construction process, to deal with suspended sediment at the source and minimize sediment transport from leaving the construction site, as per Schedule 15-2, Part 2 – Civil and Guideway, and Schedule 17 – Environmental Obligations.

Excavated and Imported Materials Management Plan has the meaning given in Schedule 17 – Environmental Obligations.

Existing Adjacent Structures means existing property, building, Bridge, retaining structure, Foundation, existing and under-construction Structure, railway, road surface, Drainage Culvert, Tunnel, excavations, Utility, temporary construction Utility, and man-made features of interest or other Structures located within the Project ZOI.

Existing Confederation Line means that portion of the Confederation Line located between and including Blair Station in the east and Tunney's Pasture Station in the west, including all associated Trackwork, which was the subject of a previous procurement by the City.

Existing Tree Protection/Monitoring Plan has the meaning given in Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.

Facilities means the above-grade structures, at-grade structures, below-grade structures, mechanical elements, electrical elements, interior areas, and exterior areas described in Schedule 15-2, Part 4 – Stations, Part 5 – LMSF, and Part 6 – Urban Design, Landscape Architecture and Connectivity, including but not limited to: Stations, LMSF and Associated Facilities.

Failure means the event, or inoperable state, in which any item or part of an item does not, or would not perform as previously specified, regardless of the operational state of the subsystem.

Failure Review Board has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Fail Safe means a characteristic of a system and its elements, the object of which is to ensure that any fault or malfunction will not result in an unsafe condition.

Fail Safe Principle has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Fare Paid Zone means the area within transit stations in which Passengers shall have paid a fare and allows customers to transfer between modes of transit without passing through fare control barriers, revalidating fare payment on either the bus or when entering a train station, or passing in and out of a proof of payment zone.

Fault Tree Analysis means a systematic analysis of single and multiple events used for identifying the probability of occurrence of an undesired event using AND gates, OR gates, and Boolean algebra. FTA's produce graphic representations of failures and events which may result in a pre-selected top-level event to occur.

Federal Lands mean all lands owned and managed by all federal government departments.

Federally Mandated Stations means those stations within the project that are subject to Federal Land Use Agreement letters.

Fire Life Safety means those aspects of safety specifically related to the prevention, detection and response to fire, smoke and toxicity hazards.

Fire Life Safety and Security Committee means the committee that acts as a review board of the activities, analyses, and reports generated on fire/life safety issues.

Fire Life Safety System means: (a) emergency exit buildings, emergency pathways, emergency walkways, Tunnel cross passages, emergency stairs, emergency doors and emergency way-finding signage any other elements provided for the purposes of emergency egress; and (b) fire alarms, fire sprinkler systems, fire extinguishers, fire standpipe, emergency ventilation systems, fire fighter telephones, emergency lighting, emergency and standby power sources, and emergency response vehicles; and (c) any other assets provided for the purposes of fire/life safety and evacuation.

First Article Inspection means a design verification and design history file and a formal method of providing a reported measurement for a given manufacturing process.

Fitups means infrastructure required to operate a bus stop or a bus station, such as, but not limited to, shelters, benches, signage, garbage cans, lighting, PIDS, and power and communications necessary to support the elements.

Flooding means overflowing or ponding of water at the surface in areas that are not intended to be submerged.

Flyover Structure means the Guideway Structure to be constructed for the purposes of carrying the Guideway from the north side of OR174 to the median of OR174.

Foundation means a structure that transfers loads to the earth.

Generic Product means a product independent of applications, fulfilling predefined boundary conditions, interfaces and functionality.

Generic Application means a generic application can be re-used for a class/type of application with common functions.

Geotechnical Instrumentation and Monitoring Plan has the meaning given in Schedule 15-2 Part 2, Article 7 – Geotechnical Design Criteria and Requirements.

Greenfield has the meaning given in the City of Ottawa Sewer Design Guidelines.

Ground Movement means the movement of ground directly or indirectly caused by construction activities. Ground Movement may manifest itself in such ways as surface settlement, ground settlement, the movement of retained excavation systems, the movement of slopes, and the ground vibrations arising from construction activities.

Grounding and Bonding Plan has the meaning given in Schedule 15-2, Part 3, Article 1 – Introduction.

Guideway means the part of a passenger LRT system on which the Track is located, with a boundary marked by right-of-way fences, curbs and parapets or in a Tunnel; Guideway shall include the areas of intersections with City roads formed if the Guideway's curb-line had been continued over the City road.

Haul Route Plan has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Hazard means any real or potential condition that can cause injury, death, or damage to or loss of equipment or property.

Hazard Analysis means any analysis performed to identify hazardous conditions for the purpose of their elimination or control.

Hazard Log has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Hazard Resolution means the analysis and subsequent actions taken to reduce, to the lowest level practical, the risk associated with an identified Hazard.

HWY 417 E-N/S Pinecrest Rd Ramp Tunnel has the meaning given in Schedule 15-2, Part 1 – General Requirements.

Incident Control Panel means a restricted access panel which permits the Emergency Services to gain fire telephone contact with the TOCC and other fire telephones. The ICP shall contain the fire alarm annunciation panel, required safety documentation and maps, and a PA microphone. Additionally, only at Underground Stations, the ICP shall include a ventilation control panel, telephone dial pad access to the Station's nominated area of refuge, and video feed monitoring.

Infill has the meaning given in the City of Ottawa Sewer Design Guidelines.

Initial Works means the Works undertaken by DB Co in the first 120 days following Commercial Close.

Interface Hazard Analysis means a process of identifying hazards and analysing their causes at System or equipment boundaries, and the derivation of requirements to limit the likelihood and consequences of hazards to a tolerable level.

Intermittent Period means a period time that occurs at irregular intervals. (Ex: changing traffic patterns for peak hours versus non-peak hours, day versus night, weekday versus weekend).

Intrusion Access Control System has the meaning given in Schedule 15-2, Part 3 – Systems.

Landscape Plan has the meaning given in Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity.

Lane Closure Measurement and Verification Plan has the meaning given in Schedule 15-2, Traffic and Transit Management and Construction Access.

Lane Shift means a transfer of traffic along lane(s) of the same route and which, using existing Roadway lanes or surfaces, guides traffic around the work zone.

Lead Track has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

Legal Survey means a survey that is prepared by an Ontario Land Surveyor for the Registration or Deposit in the Provincial Land Registry Office to facilitate a conveyance by providing a Registerable description, effect an expropriation or to confirm the location of a property boundary.

Level of Service has the meaning as described in the City of Ottawa's Transportation Impact Assessment Guidelines, when used in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Light Rail Vehicles means a form of urban rail public transportation that generally has a lower capacity and lower speed than heavy rail and metro systems, but higher capacity and higher speed than traditional street-running tram systems. The term is typically used to refer to rail systems with rapid transit-style features that usually use electric rail cars operating mostly in private rights-of-way. LRVs are typically powered by a pantograph collecting power from an overhead catenary.

Long Term Lane Closure means a closure of any vehicular lane, including but not limited to traffic, transit and cycling lanes, for a period of longer than two weeks.

Low Impact Development means a SWM strategy that seeks to mitigate the impacts of increased runoff and stormwater pollution by managing runoff as close to its source as possible.

Mainline Track has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

Mainline Storage Track or Storage Track has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

Maintainability means the quality of the combined features of equipment design and installation that facilitates the accomplishment of inspection, test, checkout, servicing, repair, and overhaul with a minimum of time, skill, and resources in the planned maintenance environments.

Maintainability Program Plan has the meaning given in Schedule 15-2, Part 1, Article 7 - System Safety Certification.

Maintenance Vehicles means vehicles that are capable of being rail-mounted and used by staff in the performance of maintenance duties on System Infrastructure.

Major Municipal Roads means a City freeway, Arterial Roadway or Major Collector Road as defined in the latest City of Ottawa Transportation Master Plan.

Manual Release Mode means a latched mode of train operation for moving trains at restricted speeds when communications with the wayside CBTC systems has failed.

Maximum Daily Demands is as defined in Schedule 15-2, Part 2, Article 8 – Utility Infrastructure Design Criteria.

Mechanical and Electrical Design Philosophy means the overall concept describing how the mechanical and electrical subsystems that make up the Tunnel Ventilation System should work and thus driving the TVS design.

Minor Municipal Roads means a Collector Road or Local Road as defined in the latest City of Ottawa Transportation Master Plan.

Moodie Yard Control Centre means a facility within the LMSF established to monitor and control yard and shop operations of Train movements, video observation of maintenance functions, intrusion control, IAC Security, and BMS system monitoring from one location.

Movement Authority means the limit of train movement allowed to a Train by the Zone Controller.

Multi-Use Path means a formalized travel surface intended for a wide variety of non-motorized travelers that is physically separated from motorized vehicular traffic, with the exception of bridges, sidewalks and walkways.

Natural Channel Design means an approach to channel design and management using naturally occurring stream processes such that new or reconstructed stream channels and their associated floodplain riparian systems are designed to be functional, stable, healthy, productive, and sustainable, in a way that restores or replicates natural channel system form and functions.

Night Period means the period of time between 22:00 and 5:00 hrs, when used in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access, and Part C of Schedule 15-2, Part 9 – Highway Works.

Noise and Vibration Control Plan has the meaning given in Schedule 17 – Environmental Obligations.

Non-Revenue Vehicles means vehicles that are used by staff in the performance of maintenance and operational duties on the OLRT and its related facilities.

Non-Station Entrance refers to any openings of adjacent buildings where air/smoke may penetrate.

OC Transpo Trainers means City employee(s) or contractor who has been trained and certified to instruct OC Transpo employees in certain classifications who are assigned to or have any duties and responsibilities on the system. These classifications include but are not limited to Operator, Station attendant, customer service staff, Controllers, supervisors and superintendents, and security personnel.

Off Peak Period means any period of time which is not a Peak Period or Night Period, when used in Schedule 15-2, Part 7 – Traffic Transit Management and Construction Access, and Part C of Schedule 15-2, Part 9 – Highway Works.

Onboard Computer means a Communications Based Train Control computer located on a rail vehicle that calculates train location and enforces Movement Authorities and Speed Restrictions based on communication with wayside CBTC systems and its own Track Database.

Operations and Maintenance Conformance Checklist has the meaning given in Schedule 15-2, Part 1, Article 7 – Safety Certification.

Operator means the driver of a Revenue Vehicle, which is a City employee who has been trained and certified to operate on the Confederation Line.

Operator Training means a program of Operator training a City employee must attend prior to becoming a certified Operator.

O-Train means the rail system operated by OC Transpo, including both the Confederation Line and the Trillium Line.

Ottawa Traffic Operations Centre means the MTO's traffic management centre (TMC) for coordinated highway management systems. It is at this TMC that the data from the highway system is collected and processed, fused with other operational and control data, synthesized to produce "information", and distributed to stakeholders such as the media, other agencies, and the traveling public.

Over-Dimensional Vehicle is as defined under the City of Ottawa By-law No. 2003-497.

Overhead means a structure where a roadway goes over the railway when used in Schedule 15-2, Part 2, Article 4 – Structural Design Criteria and Requirements.

Overhead Contact System sometimes referred to as **Overhead Catenary System** means a system that distributes DC power from the Traction Power System to the Vehicle via a pantograph on the Vehicle. The OCS consists of a conductive messenger wire suspending a contact wire between poles and/or attachments along the OLRT to provide the DC propulsion power requirements of the Vehicle to the train consist maintaining continuous contact between the pantograph and the contact wire.

Overpass means a structure where the major road goes over a lower category road when used in Schedule 15-2, Part 2, Article 4 – Structural Design Criteria and Requirements.

Park and Ride means parking lots located adjacent to Transitway stations or important transit nodes that are readily accessible by the public from the nearest major roadway.

Parkway Tunnel has the meaning given in Schedule 15-2, Part 1 – General Requirements.

Passengers means passengers and users of the Confederation Line and System Infrastructure.

Passenger Pick-Up and Drop-Off means a designated pick-up and drop-off area for Passengers from private vehicles adjacent to a Station.

Pavement means all structural elements or layers including granular, above the subgrade of a road and shoulders, such as a road, shoulder, sidewalk, plaza or other artificially-covered thoroughfare.

Peak Period means the AM and PM periods each weekday as determined by the City, which encompasses 6:30 to 9:30 hrs and 15:00 to 18:30 hrs, when used in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access, and Part C of Schedule 15-2, Part 9 – Highway Works.

Pedestrian Access Plan means a plan that outlines and shows the pedestrian flow, directions, route, volumes to and from and around all facilities, Guideway and Stations, as per Schedule 15-2, Part 1 – General, Part 6 – Urban Design, Landscape Architecture and Connectivity, and Part 7 – Traffic and Transit Management and Construction Access.

Pedestrian Control Plan has the meaning given in Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity, and Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Pedestrian Walkway means any facility that is intended for use by pedestrians, including pedestrian pathways, sidewalks and MUPs.

Permit to Take Water required for any taking of more than a total of 50,000 litres of water in a day under the *Ontario Water Resources Act*.

Permitted Periods for Closures means the periods during which DB Co may implement closures, full closures, detour routes, Lane Shifts and diversions in respect of the various Roadways, as set forth in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Physical Constraints means existing Structures (Bridges, Tunnels, buildings, retaining walls), existing Stations, environmentally protected elements (water bodies, SAR, archeological sites, etc) and the Lands. Physical Constraints shall be at the sole discretion of the City.

Platform means that portion of the Station where Trains and or buses stop to load and unload Passengers. There are two basic types of O-Train Platform configuration: centre loading which has the Platform located between each set of Tracks, and side loading, which has the Platforms located on the outside of each set of Tracks. Both Platform types are in use on the system.

Platform Level means the level of a Station with Platform(s) used by Passengers to board and alight from Trains.

Pocket Track has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

Pre-delivery Test has the meaning given in Schedule 14 – Commissioning.

Preventive Maintenance Plan means the plan establishing the preventive maintenance which is required for the system, as per Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Private Approach Permit has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Project means the Confederation Line Extension Project, which consists of the Design and Construction Works for the extension to the Existing Confederation Line system.

Property Access and Business Continuity Plan has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Protected Intersection has the meaning given in Schedule 15-2, Part 2, Article 6, Clause 6.19(h)(ix) and Appendix F of Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Provincial Highways means Highway 416 and Highway 417.

Public Art Plan has the meaning given in Schedule 15-2, Part 1, Article 12 – Artwork.

RAM Prediction Report means a report outlining the System's RAM targets, calculation methodologies and the supporting analysis demonstrating the ability of the proposed solution to meet the System's RAM targets based on prescribed Standards.

Reference Concept means the plans, drawings, reports and other information prepared during the preliminary design for the Project and which reside in the Project Data Room.

Reference Documents means the references, codes, standards, specifications, guidelines, policies, reports, publications, manuals, bulletins and other such documents listed throughout the Output Specification.

Reference Plan is defined in Ontario Regulation 43/96 Part I as a plan deposited under section 150 of the Land Titles Act or section 80 or 81 of the Registry Act and includes any other plan deposited as a reference plan. Part IV describes the requirements, contents, and procedures to be followed for a Reference Plan.

Relevant Authority means any applicable Governmental Authority.

Reliability means the probability that the system or subsystem will perform satisfactorily for a given period of time when used under stated conditions.

Reliability/Availability Program Plan has the meaning given in Schedule 15-2, Part 1, Article 7– System Safety Certification.

Remedial Action Plan has the meaning given in Schedule 17 – Environmental Obligations.

Replacement-In-Kind means replacement of identical or similar nature that satisfies the original design specification.

Requirements Management Plan has the meaning given in Schedule 15-2, Part 3, Article 1 – Introduction.

Response Action Plan has the meaning given in Schedule 15-2, Part 2 – Civil and Guideway.

Restraining Rail is an additional rail installed alongside of the gauge side of the low (inner) rail of a sharp radius curve which share with the running rails the lateral forces generated while the Train is traversing the curve. Restraining rail is to enhance safety by providing additional Vehicle truck guidance, divide lateral wheel forces between two rails, reducing forces on the rail fastening system and divide rail wear over two rail surfaces increasing the time between running rail replacements.

Revenue Vehicles or **Vehicles** are the Light Rail Vehicles which operate on the Confederation Line.

Review Level has the meaning given in Schedule 15-2, Part 2, Article 9 – Protection of Existing Adjacent Structures.

Risk means exposure to the chance of an event resulting in injury or loss.

Risk Assessment has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

Risk Log has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

Road Close Permit has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Road Cut Permit has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Road Safety Design Reviews means Design safety reviews that are to be carried out in accordance with Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

Road Safety Audit means an audit carried out in accordance Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

Road Safety Audit Team means a group of individuals appointed by DB Co from time to time to carry out Road Safety Audits in respect of the Works.

Road Safety Auditor has the meaning given in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

Road Safety Audit Certificates has the meaning given in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

Roadway means the driving surfaces including travelled lanes, auxiliary lanes, ramps, shoulders and shoulder rounding.

Roadway Works is defined as the design and construction of all temporary or permanent Roadway modifications, improvements or new construction of municipal or federal Roadway infrastructure, including but not limited to travelled lanes, auxiliary lanes, bike lanes, shoulders, boulevards, accesses, intersections, interchanges and the associated ramps, related to the scope of Stage 2 Project.

Safety means freedom from harm resulting from unintentional acts or circumstances.

Safety Case means the submission of Safety evidence at prescribed intervals in the Project lifecycle. It has the meaning outlined in EN 50129.

Safety Certification Manager means a position that is responsible for developing and implementing the safety certification program.

Safety Certification Report has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Safety Critical means a designation placed on a system, subsystem, element, component, device or function denoting that satisfactory operation of such is mandatory to safety assurance of patrons, personnel, equipment, or facilities. Such a designation dictates incorporation of special safety design features.

Safety Integrity Level means a relative level of risk-reduction provided by a safety function, or to specify a target level of risk reduction. The requirements for a given SIL are not consistent among all of the functional safety standards. In the functional safety standards based on the IEC 61508 standard, four SILs are defined, with SIL 4 the most dependable and SIL 1 the least. A SIL is determined based on a number of quantitative factors in combination with qualitative factors such as development process and safety life cycle management.

Safety Management System means the Safety protocol (including without limitation the activities, resources, procedures, methodologies, responsibilities and organizational structure) which DB Co shall establish in consultation with the City, taking into account the Design and Construction Specifications and is implemented to ensure the Safety of the system and compliance with the Safety Standards, and which is authorized by the City Manager and filed with the City Manager, adherence to which Safety protocol shall be mandatory in all operations and maintenance activities.

Safety Requirements Traceability Matrix is a means of tracking all Project Safety requirements identified by the PA or DB Co to ensure Safety elements are captured and fulfilled for the System with a direct link to the source of the Safety requirement.

Safety Verification Matrix has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Seasonal Load Restriction regulations are applicable to commercial vehicles or trailers with a gross vehicle weight in excess of 5 tonnes or 11,000 lbs per axle that are prohibited on roads where restriction signage is posted or on all truck routes identified on the most current City of Ottawa Urban and Rural Truck Route Maps.

Security means freedom from harm resulting from intentional acts or circumstances.

Security Management System means the Security protocol (including without limitation the activities, resources, procedures, methodologies, responsibilities and organizational structure) which DB Co shall establish in consultation with the City, taking into account the Design and Construction Specifications and the initial Threat and Vulnerability Assessment, and implement to ensure the Security of the system and compliance with the Safety standards, and which is authorized by the City Manager and filed with the City Manager, adherence to which Security protocol shall be mandatory in all operations and maintenance activities.

Security Requirements Traceability Matrix has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management. For clarity, the Security Requirement Traceability Matrix is a matrix format document used to verify and certify that the Security requirements have been incorporated in the design and certify that all Security requirements of the design are constructed and/or installed in accordance with the Project Agreement.

Security Verification Matrix has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

Service Life means the actual period of time during which a Structure performs its design function without unforeseen costs for maintenance and repair.

Signalling and Train Control System has the meaning given in Schedule 15-2, Part 3 – Systems.

Site Office has the meaning given in Schedule 15-2, Part 1, Article 9 – Project Office.

Site Specific Safety Plan(s) is a component of the CSMP and has the meaning given in Schedule 15-2, Part 1, Article 10 – Construction Safety Management.

Special Trackwork refers to all rail installations where Tracks converge, diverge or cross. Standard Trackwork is made simply from rolled rails of a constant cross-section, while rails in several special Trackwork components are cast or machined and have cross-sections that vary along their length.

Stage 1 Road Safety Audit means a Pre-Final Design Road Safety Audit as described in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

Stage 2 Road Safety Audit means a Final Design Road Safety Audit as described in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

Stage 3a Road Safety Audit means a Temporary Traffic Control On-site Road Safety Audit as described in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

Stage 3b Road Safety Audit means a Construction Road Safety Audit as described in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

Stage 4 Road Safety Audit means a Post Construction Road Safety Audit as described in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

Station means a Facility where Trains and or buses stop to pick up or drop off customers. The Station primarily consists of Platform areas for Passenger loading/unloading, fare control equipment, and Passenger information. Other related components include; service rooms, stairs, ramps, escalators, elevators, advertising, public art, and Train and bus Operator support Facilities, customer amenities, etc. On the Ottawa system, Confederation Line stations are classified, and are not mutually exclusive as follows:

- **At Grade Station:** A Station at which the platform is at grade, above grade, below grade, and meets the criteria for an open station as defined in NFPA 130
- **Transfer Station:** Station with the incorporation of Facilities to support the transfer of Passengers between modes of transportation or between the O-Train Lines within a Fare Paid Zone.

- **Underground Station:** An enclosed Station as defined by NFPA 130 in which the platform is constructed fully underground or enclosed within a building.
- **Terminal Station:** A Station that is located at the terminus of a line.
- **Line Station:** Station that is located along the alignment providing service in both directions of the line.

Stormwater Management means the integrated process of capturing, treating and/or controlling of stormwater runoff to maintain the natural hydrologic cycle, prevent undesirable stream erosion, prevent an increased risk of flooding, and protect water quality of receiving waters.

Stormwater Management Practice means the combination of strategies, techniques and measures used on or off-site for Stormwater Management.

Stray Current Monitoring Plan has the meaning given in Schedule 15-2, Part 3, Article 13 – Traction Power System.

Structure means any building, Bridge, Tunnel, structural Culvert, or retaining wall.

Subsystem means a major functional subassembly or grouping of items or equipment which is essential to operational completeness of a system.

Supervisory Control and Data Acquisition means the system that allows the supervision and control of wayside and Station Equipment and devices from TOCC. SCADA collects alarm and indication functions for transmission and implements control commands initiated from TOCC and other control locations. The SCADA functions are an addition to local control, alarm, and indications associated with each equipment or system.

Supply Point is defined in the [REDACTED] Conditions of Service.

Sustainability Plan has the meaning given in Schedule 17 – Environmental Obligations.

System Assurance Program has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

System RAMS Program has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification

System Safety means the application of operating, technical, and management techniques and principles to the safety aspects of a system throughout its life to reduce hazards to the lowest practical level through the most effective use of available resources.

System Safety and Assurance Program has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

System Safety Certification means the process of verifying compliance with a set of formal safety requirements. The requirements are defined by a safety certification plan, design criteria and technical specifications and applicable codes and industry standards. Specifically, certifiable elements need to be identified, verification activities need to be performed and documented, and certificates of conformance need to be signed and issued by the responsible and accountable parties as described in Schedule 15-2, Part 1, Article 7 - System Safety Certification.

System Safety Program Plan means the implementation details of how the safety program and requirements of the Project will be achieved.

System Security Certification means the process of verifying compliance with a set of formal Security requirements. The requirements are defined by a System Security Certification Plan, design criteria and technical specifications and applicable codes and industry standards. Specifically, certifiable elements need to be identified, verification activities need to be performed and documented, and certificates of conformance need to be signed and issued by the responsible and accountable parties as described in Schedule 15-2, Part 1, Article 8 - Security and Emergency Management.

Systems means the combination of mechanical elements, hardware elements and software elements connected with a passenger LRT system as described in Clause 1.1 of Schedule 15-2, Part 3 – Systems.

Systems Engineering means an interdisciplinary field of engineering and engineering management that focuses on how to design and manage complex systems over their life cycles.

Systems Engineering Management Plan has the meaning given in Schedule 15-2, Part 3, Article 1 – Introduction.

Systems Integration Management means managing the process of bringing together the component sub-systems into one system (an aggregation of subsystems cooperating so that the system is able to deliver the overarching functionality) and ensuring that the subsystems function together as a system.

Systems Integration Management Plan has the meaning given in Schedule 15-2, Part 1, Article 11 – Systems Integration Program.

Systems Integrator has the meaning given in Schedule 14 – Commissioning.

Tail Track has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

Temperature Rise Test has the meaning given in Schedule 15-2, Part 3, Article 13 – Traction Power System.

Threat and Vulnerability Assessment has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Threat Log has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

Ticket Machine means a piece of City supplied and installed equipment where customers purchase tickets for OCT services.

Track means the system of ballast, rails, ties and fastenings composing the track structure.

Track Database means a database containing all station, switch, curve and end of track locations, all grades, and all civil and temporary speed restriction zones, and all work zones and all speed limits through these zones and over all switches in either position. The Track Database is used by the Onboard Computer to calculate a safe speed profile and station stopping braking profiles.

Track Design and Construction Test Plan has the meaning given in Schedule 15-2, Part 2 – Civil and Guideway.

Trackwork means all work related to the construction of a complete LRT Passenger system track structure from subgrade to top of rail including the design, supply, installation and Quality Control of ballast and sub-ballast, ballast curbs, ties, rails, guardrails, fastenings, subdrains, Special Trackwork, end of Track devices, Track drains, rail welds, rail insulated joints, direct-fixation baseplates as well as concrete slab inserts, and other Track materials.

Traction Power or **Traction Power System** means an electrical network of power conversion substations receiving MV electrical power from the Utility, transforming the power to a lower usable voltage, and converting the power from AC to DC power to supply the Train consists operating along the Confederation Line.

Traffic Advisory Temporary Signage Plan is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic and Transit Management Communications Plan is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic and Transit Management Monitoring Plan is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic and Transit Management Plan means a written plan, and a series of sub-plans, describing all direct and indirect impacts on all road users, including pedestrians, cyclists, transit vehicles and private vehicles of all types, at each stage of DB Co's construction sequencing plan, and outlining DB Co's measures and strategies to manage the impacts on road user traffic, parking, access for Emergency Services, as well as access to businesses and properties during construction. A Traffic and Transit Management Plan shall comply with the relevant standards, guidelines, policies and procedures of the City, OC Transpo, NCC and MTO as applicable. Further requirements are found in Schedule 15-2, Part 7, Article 6 – Traffic and Transit Management Plan.

Traffic Control Device(s) is a term used to describe any person, sign, signal, marking or device placed upon, over or adjacent to a roadway by or at the direction of a Relevant Authority or their designate, for the purpose of regulating, warning, guiding or informing a vehicle operator or pedestrian of an existing condition or hazard.

Traffic Control Persons/Personnel means a person duly trained and authorized to direct traffic at a Work zone through the use of the Traffic Control Sign (STOP/SLOW Paddle).

Traffic Control Plan has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic Control Supervisor(s) has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic Engineer has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic Incident Management Plan has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic Management Committee has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic Management Implementation Plan has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic Manager has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Traffic Risk Assessment Plan is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Train means a 2-car consist of Vehicles.

Train Control or **Train Control System** means a Safety Critical computer based control system for Vehicle identification, Vehicle location control and monitoring, maintaining safe headway between vehicles, Vehicle speed control, maintaining safe brake rates, Vehicle route selection and fleet management, interlocking control and power consumption optimization.

Transit Information Panel has the meaning given in Schedule 15-2, Part 4 – Stations.

Transit Management Plan is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Transit Priority Lanes is as defined by the City of Ottawa.

Transit Priority Signal means a traffic signal used to assign right-of-way to public transit vehicles over all other vehicular and pedestrian traffic movements within a signalized intersection.

Transitway is a dedicated road network system that is open only to OC Transpo and emergency vehicles, which includes physically separated right of way from mixed traffic and on-street bus lanes.

Transitway Lane Closure Measurement and Verification Plan has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Transportation Services Control Centre is the communications control center responsible for all dispatching, supervision, and monitoring of all functions within the OLRT system.

Tree Compensation Plan has the meaning given in Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.

Tree Mitigation Plan means a plan to audit, monitor, protect, and preserve trees to comply with City regulations, as per Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.

Trial Running means a twenty-one (21) consecutive day period that may commence upon the successful completion of testing and commissioning. Upon successful completion of trial running, the integrated system will be ready for revenue service.

Tunnels means Structures located below finished grade containing the Guideway, but excluding Underground Station Boxes.

Underground Station Boxes means Stations that are located below finished grade.

Underground Structures means Tunnels and Underground Station Boxes constructed using Cut and Cover methods excluding buried pipes and utilities, bridge foundations and above ground station foundations.

Underpass means a structure where the major road goes under the lower category road when used in Schedule 15-2, Part 2, Article 4 – Structural Design Criteria and Requirements.

Universal Design means the design of products and environments to be usable by all people, to the greatest extent possible, without the need for adaptation or specialized design.

Utility Infrastructure Relocation Plan has the meaning given in Schedule 15-2, Part 2, Article 8 - Utility Infrastructure Design Criteria.

Vital Microprocessor Interlocking System means a vital microprocessor based system for controlling switches and signals at an interlocking. This system may also be known as a CBI controller.

Voice/Data Radio System has the meaning given in Schedule 15-2, Part 3 – Systems.

Weekend Period(s) means the period of time from a Saturday at 0:00 hrs to Sunday at 23:59 hrs.

West Portal has the meaning given in Schedule 15-2, Part 1, Article 2 – Physical Layout.

Winter Season means the period from November 14 in any calendar year, until April 15 the following calendar year, inclusive of these dates.

Winter Season Plan has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

Yard Control Centre means a facility within the MSF established to monitor and control yard and shop operations of train movements, video observation of maintenance functions, intrusion control, IAC Security, and BMS system monitoring from one location.

Yard Track has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

Zone Controller means a microprocessor based system which tracks train location, signal and switch positions and which provide Movement Authority limits to trains.

Zone of Influence means the area within the subsurface and surface boundaries where Ground Movement arising from DB Co construction activities is expected to occur.

ARTICLE 1 ACRONYMS

AADT means annual average daily traffic.

AAMA means American Architectural Manufacturers Association.

AAR means Association of American Railroads.

AASHTO means American Association of State Highway and Transportation Officials.

AC means alternating current.

ACI means American Concrete Institute.

ACP means access control panels.

ADA means *Americans with Disabilities Act*.

AESS means Architecturally Exposed Structural Steel.

AHJ means Authority Having Jurisdiction.

AHRI means Air-conditioning, Heating, and Refrigeration Institute.

AIC means Amp Interrupting Capacity.

AISC means American Institute of Steel Construction.

AISI means American Iron and Steel Institute.

ALCTV means Automotive Lifts – Safety Requirements for Construction, Testing and Validation.

ALI means Automotive Lift Institute.

AMCA means Air Movement and Control Association.

AMS means Aerospace Material Specifications.

ANSI means American National Standards Institute.

AODA means *Accessibility for Ontarians with Disabilities Act*.

AP means Access Point.

APTA means American Public Transportation Association.

AREMA means American Railway Engineering Maintenance-of-Way Association.

ASCE means American Society of Civil Engineers.

ASHRAE means American Society of Heating, Refrigerating and Air-Conditioning Engineers.

ASL means anticipated service life.

ASME means American Society of Mechanical Engineers.

ASSE means American Society of Safety Engineers.

ASTM means American Society for Testing and Materials.

ATC means Automatic Train Control.

ATM means automatic teller machine (bank machine).

ATMS means advanced traffic management system.

ATO means Automatic Train Operation.

ATP means Automatic Train Protection.

ATS means Automatic Train Supervision or automatic transfer switch.

AWG means American Wire Gauge.

AWMAC means Architectural Woodwork Manufacturers Association of Canada.

AWS means American Welding Society.

AWS BRH means American Welding Society Brazing Handbook.

AWS WHB means American Welding Society Welding Handbook.

AWWA means American Water Works Association.

G&B means grounding and bonding.

BAR means Blast Assessment Report.

BAS means building automation system.

BCC means Backup Control Centre.

BCI means bridge condition index, in accordance with MTO's bridge condition rating procedure.

BDA means bi-directional amplifier.

BHN means brinell hardness number.

BIA means business improvement association.

BIL means basic impulse level.

BMS means building management system.

BNC means Bayonet Neill-Concelman connector.

BRT means bus Rapid Transit.

BSS means British Standards Society.

BTS means base transceiver station.

BYCC means Belfast Yard Control Centre

CADD means computer aided design and drafting.

CaGBC means Canadian Green Building Council.

CALA means Canadian Association for Laboratory Accreditation.

CBI means computer based interlocking.

CBTC means Communication Based Train Control.

CCIL means Canadian Council of Independent Laboratories.

CCIP means Cement and Concrete Industry Publications.

CCOHS means Canadian Centre for Occupational Health and Safety.

CCTV means Closed Circuit Television.

CEAA means Canadian Environmental Assessment Agency.

CEC means Canadian Electrical Code.

CEL means Certifiable Elements Lists.

CFD means computational fluid dynamics.

CFEM means Canadian Foundation Engineering Manual.

CFR means Code of Federal Regulations.

[REDACTED]

CGSB means Canadian General Standards Board.

CHBDC means Canadian Highway Bridge Design Code ((CHBDC) CAN/CSA S6-06).

CIAR means Construction Impact Assessment Report.

CIAR-1 means Level 1 Construction Impact Assessment Report.

CIAR-2 means Level 2 Construction Impact Assessment Report.

CIH means Central Instrument House(s).

CIL means central instrument location.

CISC means Canadian Institute of Steel Construction.

CMAA means Crane Manufacturers Association of America.

CMMS means computerized maintenance management system.

[REDACTED]

CNLA means Canadian Nursery Landscape Association.

COADS means City of Ottawa Accessibility Design Standards.

COMAP means City of Ottawa Municipal Accessibility Plan.

CPCI means Canadian Precast/Prestressed Concrete Institute.

CPR means cardiopulmonary resuscitation.

CPTED means Crime Prevention through Environmental Design.

[REDACTED]

CPR means cardiac pulmonary respiration.

CRCA means Canadian Roofing Contractors Association.

CRI means colour rendering index.

CSA means Canadian Standards Association.

CSMP means Construction Safety Management Plan.

CSRS means Canadian Spatial Reference System.

CSSBI means Canadian Sheet Steel Building Institute.

CTS means communications transmission system.

CWB means Canadian Welding Bureau.

CWR means continuous welded rail.

DAQ means delivered audio quality.

DAS means distributed antenna system.

DC means direct current.

DCS means data communications system.

DF(F) means direct fixation (fastener).

DFO means Department of Fisheries and Oceans (Canada).

DLA means dynamic load allowance.

DMP means Data Management Protocol.

DOORS means dynamic object oriented requirements systems.

DOT means U.S. Department of Transportation.

DSD means Decision Sight Distance.

DSS means designated substance survey.

DTFM means dual toner multi-frequency.

DVD means digital versatile disk.

DWA means TSA used in Schedule 15-2, Part 4, Appendix B and C.

E&M means electrical and mechanical.

EA means Environmental Assessment.

EAS means existing adjacent structure(s).

EB means an eastbound direction or emergency brake (depending upon context).

ECA means Environmental Compliance Approval.

ECL means Existing Confederation Line.

EEB means emergency exit building.

EEMAC means Electrical Equipment Manufacturers Association of Canada.

EGFP means equipment ground fault protection.

EHFI means elevator hands free intercom.

EIA means Electronic Industry Association.

EMC means electromagnetic compatibility.

EMI means electromagnetic interference.

ERP means Emergency Response Plan or Emergency Response Providers.

ESA means Electrical Standards Association or Electrical Safety Authority.

ESB means Emergency Stop Buttons.

ESC means Erosion and Sediment Control (part of Erosion and Sediment Control Plan).

ESP means Emergency Service Providers.

ESS means Emergency Stop Key Switches.

ETEL means emergency telephones.

FAI means First Article Inspection.

FAT means Factory Acceptance Test as defined in Schedule 14 – Commissioning.

FCC means U.S. Federal Communications Commission.

FDAS means fire detection and alarm system.

FHWA means Federal Highway Administration.

FLS means Fire Life Safety.

FLSSC means Fire Life Safety and Security Committee.

FLUDTA means Federal Land Use, Design and Transaction Approval.

FMEA means Failure Mode and Effects Analysis.

FMECA means Failure Mode, Effect, and Criticality Analysis.

FODF means fiber optic distribution frame.

FRACAS means Failure Reporting and Corrective Action System.

FRP means fibre reinforced plastic.

FTA means Federal Transit Administration or Fault Tree Analysis.

FTEL means firefighters' telephones.

GANNA means Glass Association of North America.

GBC means Green Building Council.

GDSOH means Geometric Design Standards for Ontario Highways (Ministry of Transportation).

GDGCR means Geometric Design Guide for Canadian Roads (Transportation Association of Canada).

GFI means ground fault interrupter.

GFRP means glass fibre reinforced polymer.

GIDS means Guideway intrusion detection system.

GIMP means Geotechnical Instrumentation and Monitoring Plan.

GSC means geological survey of Canada.

GUI means graphic user interface.

HINT means elevator help intercoms.

HFI means yard intercoms.

HMI means Hoist Manufacturers Institute or Human Machine Interface.

[REDACTED]

[REDACTED]

HOV means high-occupancy vehicle.

HSDR means high speed data radio.

HV means high voltage.

HVAC means heating, ventilation and air conditioning system.

I/O means input/output.

IAC means intrusion access control.

IBC means International Building Code.

ICD means interface control documents.

ICEA means Insulated Cable Engineers Association.

ICES means Interference-Causing Equipment Standards (Industry Canada).

ICNIRP means International Commission on Non-Ionizing Radiation Protection.

ICP means Incident Control Panel.

IEC means International Electrotechnical Commission.

IED means intelligent electronic device.

IEEE means Institute of Electrical and Electronics Engineers.

IES and **IESNA** means Illuminating Engineering Society of North America.

IFC means issued for construction.

IP means internet protocol.

IPI means In-Place-Inclinometers.

ISD means Intersection Sight Distance.

ISFP means City of Ottawa Integrated Street Furniture Policy and Design Guidelines.

ISO means International Standards Organization.

ITA means International Tunnelling Association.

ITEL means passenger assistance information telephones.

ITS means intelligent transportation system.

JHSC means joint health and safety committee.

LAN means local area network.

LCD means liquid-crystal display.

LED means light emitting diode.

LEED means Leadership in Energy and Environmental Design.

LID means Low Impact Development.

LKI means landmark kilometre inventory.

LMSF means Light Maintenance and Storage Facility.

LOS means Level of Service.

LRT means light rail transit.

LRV means Light Rail Vehicle.

LSD means limits state design

LV means low voltage.

LVC means length of vertical curve.

LSZH means low smoke zero halogen.

MA means Movement Authority.

MCC means motor control centre.

MDE means Maximum Design Earthquake.

MERV means Minimum Efficiency Reporting Value.

MEMS means micro-electro-mechanical systems.

MHIA means Materials Handling Industry of America.

MIL means U.S Military Standard.

MNECB means Model National Energy Code for Buildings.

MNR means Ontario Ministry of Natural Resources.

MOECC means Ontario Ministry of the Environment and Climate Change.

MOL means Ministry of Labour.

MOW means maintenance of way

MSE means mechanically stabilized earth.

MTBF means mean time between failures.

MTBSAF means mean time between service affecting failures.

MTEL means maintenance telephones

MTM means Modified Transverse Mercator.

MTO means Ontario Ministry of Transportation.

MTTR means mean time to repair.

MUP means Multi-Use Pathway.

MUTCD means Manual for Uniform Traffic Control Device.

MV means medium voltage.

MW means megawatts.

MYCC means the Moodie Yard Control Centre.

NACE means National Association of Corrosion Engineers.

NAD means North American Datum.

NB means a northbound direction.

NBC means National Building Code of Canada.

NC means Noise Level Criteria.

NCC means National Capital Commission.

NCMA means National Concrete Masonry Association.

NECA means National Electrical Contractors Association.

NEMA means National Electrical Manufacturer's Association.

NESC means National Electrical and Safety Code.

NETA means InterNational Electrical Testing Association.

NFCC means National Fire Code of Canada.

NFPA means National Fire Protection Association.

NGD means negative grounding device.

NHI means National Highway Institute.

NICD means network interface control document.

NMI means New Municipal Infrastructure.

NPA means National Particleboard Association.

NPCC means Northeast Power Coordinating Council.

NRCA means National Roofing Contractors Association.

NSF means National Sanitation Foundation.

NTP means notice to proceed.

NVR means Network Video Recorder.

OBC means Ontario Building Code.

OCS means Overhead Contact System and Overhead Catenary System.

ODE means Operating Design Earthquake.

ODV means Over-Dimensional Vehicle.

OEC means Ontario Electrical Code.

OESC means Ontario Electrical Safety Code.

OFC means Ontario Fire Code.

OGDL means open graded drainage layer

OGS means oil/grit separators

OHA means operating hazard analysis.

OHS means the *Occupational Health and Safety Act* (Ontario).

OLRT means Ottawa Light Rail Transit.

ON and **ONT** mean Ontario.

ONVIF means open network video interface forum.

OPP means Ontario Provincial Police.

OPS means Ontario Provincial Standard or Ottawa Police Services.

OPSD means Ontario Provincial Standard Drawings.

OPSS means Ontario Provincial Standard Specifications.

OR means Ottawa Road.

ORPP means the Ottawa River Parkway pipe.

OSIM means Ontario Structure Inspection Manual.

OSIMS means Ontario Structure Inspection Management Systems.

OTOC means Ottawa Traffic Operations Centre.

OTM means Ontario Traffic Manual.

OWS means operation work station.

PA means Public Address.

PABX means private automatic branch exchange.

PAU means power alarm unit.

PBD means performance based design.

PBX means Private Branch Exchange.

PDI means Plumbing and Drainage Institute.

PED means platform edge door.

PEO means Professional Engineers of Ontario.

PERP means Ontario Provincial Emergency Response Plan.

PGFP means personal ground fault protection.

PHA means Preliminary Hazard Analysis.

PHL means Preliminary Hazard List.

PIC means public information centre.

PICO means Post Installation Checkout as defined in Schedule 14 – Commissioning.

PID(S) means Passenger Information Display (Systems).

PIS means public information system.

PIU means power interface unit.

PLC means Programmable Logic Controller.

PPHPD means passenger per hour per direction.

PPUDO means Passenger Pick-Up and Drop-Off.

PRP means Property Request Plan.

PSPC means Public Services and Procurement Canada.

PTTW means Permit to Take Water.

PTZ means Pan Tilt Zoom.

PVC means polyvinyl chloride.

PVDF means polyvinylidene fluoride.

PVI means point of vertical intersection.

PVMS means portable variable-message signs.

PXO means pedestrian crossover(s).

RAM means Reliability, Availability and Maintainability.

RCMP means Royal Canadian Mounted Police.

RFID means Radio Frequency Identification.

RFQ means request for qualifications.

RH means relative humidity.

RMA means Roadway Modification Approval.

RMP means Requirements Management Plan.

RMS means root mean square.

ROW means right-of-way.

RRFB means rectangular rapid flashing beacon.

RSS means radio standards specification in Schedule 15-2, Part 3 – Systems.

RSS means retained soil system in Schedule 15-2, Part 2 – Civil and Guideway.

RTM means requirements traceability matrix.

RTSB means real time streaming protocol.

RTU means remote terminal units.

RU means remote unit.

RVCA means Rideau Valley Conservation Authority.

S&I means service and inspection.

S&TCS means Signalling and Train Control System.

SAE means Society of Automotive Engineers.

SAP means System Assurance Program.

SAR means species at risk.

SAT means Site Acceptance Test as defined in Schedule 14 – Commissioning.

SB means a southbound direction.

SCADA means Supervisory Control and Data Acquisition.

SCIL means Safety Critical items list.

SCM means Safety Certification Manager.

SCR means Silicon Controlled Rectifier.

SeCM means Security Certification Manager

SEMP means System Engineering Management Plan.

SER means signal equipment room.

SES means “Subway Environment Simulation” software, originally referenced in the “Subway Environmental Design Handbook” (US Department of Transportation, Washington, DC, USA).

SeVM means Security Verification Matrix.

SI means System Infrastructure.

SIA means Security Industry Association.

SIMP means systems integration management plan.

SINAD means signal-to-noise and distortion ratio.

SIT means Systems Integration Test as defined in Schedule 14 – Commissioning.

SJAM means Sir John A MacDonald.

SLR means Seasonal Load Restriction.

SLS means Serviceability Limit State.

SMACNA means Sheet Metal and Air-conditioning Contractors’ National Association.

SNCA means South Nation Conservation Authority.

SNMP means simple network management protocol.

SOE means support of excavation.

SOP means standard operating practice/procedure.

SPL means sound pressure level.

SRAC means Safety related application conditions.

SSAP means System Safety and Security Assurance Plan.

SSCP means System Safety Certification Plan.

SSCRT means Safety and Security Certification Review Team.

SSD means Stopping Sight Distance.

SSeCP means System Security Certification Plan.

SSePP means System Security Program Plan.

SeRTM means Security Requirement Traceability Matrix.

SSORC means Safety and Security Operations Review Committee.

SSPC means Society for Protective Coatings.

SSPP means System Safety Program Plan.

SRTM means Security Requirement Traceability Matrix.

SSVM means System Safety Verification Matrix.

STD means standard.

STEL means staff telephones.

STI means speech transmission index.

STO means Société de transport de l'Outaouais or semi-automatic Train operation.

SVM means Safety Verification Matrix.

SWGR means switch gear.

SWM means stormwater management.

SWMP means Stormwater Management Practice.

T&DI means Transportation and Development Institute.

TAC means Transportation Association of Canada.

TC means Transport Canada.

TCB means temporary concrete barrier.

TCD means Traffic Control Device.

TCP means Traffic Control Plan or Traffic Control Person or Transmission Control Protocol (depending upon context).

TCRP means Transit Cooperative Research Program.

TFTP means Trivial File Transfer Protocol.

THR means Tolerable Hazard Rate.

TIA means Transportation Impact Assessment (City of Ottawa).

TIAC means Thermal Insulation Association of Canada.

TIMP means Traffic Incident Management Plan.

TIP means Transit Information Panel.

TMIP means Traffic Management Implementation Plan.

TOCC means Transit Operations Control Centre.

TOD means Transit-Oriented Development.

TOR means Top of Rail.

TPRU means Traction Power Rectifier Unit.

TPS means Traction Power System.

TPSS means Traction Power substation(s).

TSA means transsecure area.

TSS means total suspended solids.

TTEL means Tunnel telephones.

TTMP means Traffic and Transit Management Plan.

TVA means Threat and Vulnerability Analysis.

TVS means Tunnel Ventilation System.

TWSI means tactile walking strip indicators.

UAD means Urban Arterial Divided.

UDP means user datagram protocol.

UIC means International Union of Railways.

ULC means Underwriter's Laboratories of Canada.

ULS means Ultimate Limit State.

UPS means uninterruptible power supply.

VFD means Variable-Frequency Drive.

VISSIM means the microscopic multi-modal traffic flow simulation software package used to develop traffic models.

VLAN means virtual local area network.

VMIS means Vital Microprocessor Interlocking System.

VMS means Vehicle Monitoring System or variable message sign.

VOBC means Vehicle on-board controller.

VOC means volatile organic compound.

VoIP means Voice over Internet Protocol.

WAN means Wide Area Network.

WB means a westbound direction.

WNC means West Nepean Collector

WSD means Working Stress Design.

ZOI means Zone of Influence.

ARTICLE 2 REFERENCE DOCUMENTS

1.1 General

- (a) Codes, standards, manuals, installation, application and maintenance instructions, and other reference documents referred to in the Project Specific Output Specifications, unless otherwise specified and unless otherwise stated in governing legislation, shall be the latest published editions at the date of Commercial Close.
- (b) DB Co shall conform to codes, standards, manuals, installation, application and maintenance instructions, and other Reference Documents referred to in the Output Specification.
- (c) If there is a question regarding whether any product, material, component, assembly or system is in conformance with applicable requirements, the City reserves the right to have such products, materials, components, assemblies or systems tested at DB Co's cost to prove or disprove conformance. The cost for testing will be borne by the City in the event of conformance with the Output Specification, or by DB Co in the event of non-conformance.
- (d) Refer to the Project Agreement and the Ontario Building Code for definitions applicable to the Project.

1.2 Reference Documents

**SCHEDULE 15-2
DESIGN AND CONSTRUCTION REQUIREMENTS**

**PART 1
GENERAL REQUIREMENTS**

ARTICLE 1 REFERENCE DOCUMENTS AND SUBMITTALS

1.1 Application of the Reference Documents, Standards and Procedures, City Standards, Ontario Provincial Standards for Roads and Public Works and Other Manuals, Codes and Standards

- (a) The Works shall be performed in accordance with the applicable Reference Documents, and with the following amendments:
- (i) Requirements related to design and submission requirements and quality assurance in the Reference Documents do not apply; rather, the Output Specifications and express requirements of this Project Agreement, including Schedule 11 – Integrated Management System Requirements, respectively shall apply;
 - (ii) Requirements and specifications in the Reference Documents related to equipment for performing the Works do not apply;
 - (iii) Sections within the Reference Documents that are not applicable to this form of agreement, such as payment terms, do not apply;
 - (iv) Any and all references to “approval by the Contract Administrator” or other such reference in the Reference Documents, in terms of acceptance of materials, permission to proceed, work methodology or end product, shall be construed as being the responsibility of DB Co, but each such instance shall be in consultation with applicable Governmental Authorities;
 - (v) DB Co shall consult with the City to determine which Reference Documents submissions are to be submitted under Schedule 10 – Review Procedure;
 - (vi) DB Co shall, when required in the Reference Documents to submit for approval samples of any products proposed by DB Co, submit such samples with supporting documentation to the City in accordance with Schedule 10 – Review Procedure; and
 - (vii) The OPS specifications that apply to the Work shall only include the municipal and provincial common standards in OPS Volumes 1 through 4 and the municipal-oriented specifications in OPS Volumes 7 and 8, unless specified otherwise in Schedule 15 – Output Specifications.

1.2 Reference Documents

- (a) Without limiting any other provision in this Project Agreement, the Reference Documents shall apply to the Works as described in Schedule 15-2 – Design and Construction Requirements.

1.3 Order of Precedence

- (a) Unless otherwise expressly provided in Schedule 15-2 – Design and Construction Requirements, if there is any conflict between any of the provisions of this Project Agreement and any of the Reference Documents, the following shall apply in descending order of precedence:
 - (i) Applicable laws and regulations;
 - (ii) the provisions of this Project Agreement;
 - (iii) City Standards and Procedures;
 - (iv) OPS; and,
 - (v) any other applicable Reference Documents.

1.4 Reference Concept

- (a) Any use by DB Co of any or all aspects of the Reference Concept in performing the design and construction Works shall be entirely at DB Co's own risk. Use of the Reference Concept as a basis for DB Co's design for any part of the Project does not guarantee the City approval of DB Co's design.

1.5 Submittals

- (a) DB Co shall be responsible for determining any and all necessary Works Submittals, as specified in the relevant sections of this Schedule 15-2 – Design and Construction Requirements, whether or not a specific reference to Schedule 10 – Review Procedure is specifically mentioned.

ARTICLE 2 PHYSICAL LAYOUT

2.1 Existing Infrastructure

- (a) Existing Infrastructure is comprised of, but not limited to, the following major components;
- (i) Nine Transitway Stations which are being converted to LRT Stations
 - A. Westboro Station;
 - B. Dominion Station;
 - C. Lincoln Fields Station;
 - D. Iris Station;
 - E. Pinecrest Station;
 - F. Baseline Station;
 - G. Bayshore Station;
 - H. Place D'Orléans Station; and
 - I. Trim Road Station.
 - (ii) Culvert Structures
 - A. Bilberry Creek Culvert under Highway OR174 (SN224510);
 - B. Box Culvert under Highway OR174 (SN894040);
 - C. Taylor Creek Culvert under Highway OR174 (SN894050);
 - D. Box Culvert under West Guideway (SN018230);
 - E. ORPP under Carling Avenue (STM69595, STM69596, STM69600, STM69601, STM69602, STM65654);
 - F. Graham Creek Culvert;
 - G. Stillwater Creek Culvert;
 - H. Southwest Transitway – Pinecrest Creek Kenson Park Culvert (SN018360); and,
 - I. Southwest Transitway – Pinecrest Creek Baseline Road Culvert (SN018370).

2.2 System Infrastructure

- (a) The Project shall generally include the following SI:
 - (i) Approximately 28.1 km of Track consisting of at grade surface Track, Elevated Guideway Track and three below-grade Track sections.
 - (ii) Sixteen Stations, with 2 new Underground Stations and 14 new At Grade Stations, 3 of which are Terminal Stations. Of these 16 Stations, 8 of them are existing Transitway Stations which are being converted to LRT Stations.
 - (iii) LMSF located west of Moodie Drive, including maintenance building, storage building and Trackwork.
 - (iv) Existing Structures to be incorporated into the alignment as described in Clause 2.9 (b) of this Part 1.
 - (v) Modifications at Existing Confederation Line Terminal Stations including Tunney's Pasture Station and Blair Station.
- (b) For clarity, SI includes the entire extent of the infrastructure constructed in, on, over or under any part of the Lands as part of the Works, but excluding NMI and New MTO Infrastructure.
- (c) SI includes all aspect of the Works required for the operation of the system, including, but not limited to:
 - (i) All Stations and associated Facilities;
 - (ii) LMSF and associated Facilities;
 - (iii) Systems;
 - (iv) Guideway;
 - (v) Utilities associated with Guideway.

2.3 New Municipal Infrastructure

- (a) The project shall include NMI Structures as identified in Schedule 15-2, Part 2, Appendix E – Confederation Line Extension Structures.
- (b) The Project includes other NMI as outlined in Clause 15.4 of this Part 1 and generally includes infrastructure associated with Roadways, City Utilities, and bus Stations.

2.4 General Alignment Requirements

- (a) The alignment falls within existing City ROW and the permanent takings as shown on the PRP drawings. DB Co shall design the alignment within the Lands as prescribed in Schedule 20 – Lands.
- (b) A portion of the design and construction of the Project shall be comprised of the conversion of the existing Transitway into the proposed LRT alignment at the following locations: from Blair Road Station to the new proposed Flyover Structure along OR174, from Tunney's Pasture Station to Dominion Station, from Lincoln Fields Station to Baseline Station, and from Pinecrest Station to Moodie Station.
- (c) The alignment shall be underground for the following sections:
 - (i) The Parkway Tunnel, with the East Portal located anywhere north of Rochester Field but no further west than the point with coordinates of easting: 362486.106 and northing: 5028002.223 using Modified Transverse Mercator (MTM) Zone 9 horizontal datum referenced to WGS84 (NAD 83), through NCC lands and the Richmond Road/Byron Linear Park Corridor, to the West Portal which shall daylight to the south of Richmond Road and to the north of Lincoln Fields Station. The distance from the south sidewalk of Richmond Road to the West Portal opening shall accommodate MUP connections with the south Richmond Road sidewalk over the roof of the Tunnel. Two stations shall be located in the Parkway Tunnel underground section, Cleary and New Orchard Stations which shall be below grade and open at the surface as defined in Schedule 15-2, Part 4 – Stations. The Parkway Tunnel alignment shall be located to maximize horizontal separation with the building foundations at [REDACTED] and [REDACTED] with the objective of providing similar length horizontal offset distances between the alignment and these two buildings. The vertical and horizontal alignment of the Tunnel in the vicinity of Cleary Avenue and Richmond Road shall be located such that the Tunnel can be designed and constructed without interfering with the existing West Nepean Collector underground utility. Refer to Schedule 15-2, Part 8 – Underground Structures for Tunnel design and construction requirements for the segment of the alignment crossing the WNC.
 - (ii) The Connaught Tunnel – a Tunnel that traverses under Connaught Ave; the portals shall be located such that the length of the Tunnel is minimized and the noise and vibration criteria specified in Section 17 for Project Operations is met with the additional requirement that the east portal be located no further west than the point with coordinates of easting 361139 and northing 5024493 using Modified Transverse Mercator (MTM) Zone 9 horizontal datum referenced to WGS84 (NAD 83). To provide some flexibility to DB Co for alignment optimization the above east portal westernmost coordinates may be modified to allow for a maximum 10m shift to the west on an axis parallel to the alignment with the design intent to maximize park space and pedestrian connectivity over the Tunnel. Shaft openings from the Tunnel to grade shall only be permitted for Tunnel ventilation and shall be located for the length of Connaught Tunnel

between the southern shoulder of Connaught Ave and the OC Transpo Storage Garage building and parking area located at 2550 Queensview Drive.

- (iii) The Baseline Tunnel – an existing tunnel that is located beneath the existing Baseline Station between Navajo Drive to the north and College Avenue to the south. This is a terminus of the LRT with two Tracks for the revenue operation and two additional Tracks for Non-Revenue Vehicles and temporary storage of Revenue Vehicles.
- (iv) The HWY 417 E-N/S Pinecrest Rd Ramp Tunnel – a Tunnel that traverses under HWY 417 E-N/S Pinecrest Rd Ramp with open trench Guideway and underpass structures for the HWY 417 S-W and Pinecrest Rd Ramp.
- (d) The remaining alignment consists of new at grade Guideway Construction, open trench depressed Guideway Construction and the Construction of new elevated Structures.
- (e) Six Transfer Stations shall be constructed – one at each of the alignment Terminal Stations – Trim Road Station, Moodie Station and Baseline Station and at three Line Stations at Bayshore, Place d'Orléans, and Lincoln Fields. Provisions for fare paid bus transfer Platforms, bus layby berths and circulation shall be designed and constructed at these locations.
- (f) Guideway Requirements
 - (i) The Guideway shall be completely fenced and segregated from any pedestrian and vehicular traffic. Fencing location, type and height shall be as outlined in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - (ii) See Schedule 15-2, Part 2, Clause 1.3 for Emergency egress and access requirements.
 - (iii) High rail vehicle access locations shall be provided at the following locations:
 - A. Trim Station;
 - B. Blair Station (the current Existing Confederation Line access);
 - C. Baseline Station; and,
 - D. Moodie LMSF.

2.5 Tunnel Requirements

- (a) DB Co shall be responsible for the complete design and construction of the Underground Structures using Cut-and-Cover methods, including but not limited to Tunnels, the access and ventilation shafts; Underground Station boxes; any required underground Facilities; mechanical and electrical facilities; and any other requirements for design and construction of the Tunnels.

- (b) The upper limit of the Cut-and-Cover Tunnels shall include clearances for required Utility crossings and appurtenant mechanical, electrical and systems facilities to the following limits:
 - (i) within Federal Lands between Cleary Station and Dominion Station the upper limit of the Tunnel roof shall be no less than 2.5m below final grade;
 - (ii) located under City roadways the upper limit of the Tunnel roof shall be no less than 2m below the top of final grade; and,
 - (iii) Reduced cover shall also be permitted where it is necessary for the Cut-and-Cover Tunnel alignment to ascend to the portals.
- (c) Rock bolts and/or tie backs shall remain within the lateral and upper limits of the alignment envelope and within the boundaries of property forming part of the Lands and identified as System Infrastructure Lands in Schedule 20 – Lands. Notwithstanding the foregoing, DB Co may install excavation support elements such as rock bolts and tie-backs not forming part of any permanent structure outside of property designated as System Infrastructure Lands to the extent that a right to undertake such installation has been secured and granted to DB Co pursuant to either Schedule 20 – Lands or Section 16(7) of the Project Agreement.

2.6 Systems Requirements

- (a) DB Co shall be responsible for the design, construction and Subsystem testing of Systems required for the safe and efficient operation of the System.
- (b) Systems includes
 - (i) Traction Power;
 - (ii) Tunnel Ventilation
 - (iii) Communications;
 - (iv) OCS;
 - (v) EMI /EMC;
 - (vi) Corrosion Control/Stray Current; and,
 - (vii) Static/Sub-system Testing.
- (c) The City shall be responsible for the specification development, design, interface management, installation, integration and Commissioning of the following Systems required for safe and efficient operations:
 - (i) Revenue Vehicles;

- (ii) Non-revenue vehicles; and,
- (d) DB Co shall design the system such that the distance from the Train stop location on the Platform, to the start of the rail arrestor or buffer stop at Terminal Stations shall be a minimum of 30m for Baseline Station and a minimum of 50m for Trim Station, unless otherwise defined.
 - (i) DB Co shall ensure all SI including the S&TCS is designed to support these minimum dimensions while still meeting all requirements.
 - (ii) DB Co shall be fully responsible for any additional work, system modifications, and regulatory approvals that may be required to ensure these minimum dimensions are met.

2.7 Facilities Requirements – Stations

- (a) DB Co shall provide Stations and Facilities in accordance with the following:
 - (i) The Stations shall be designed to meet the functional, accessibility, aesthetics, environmental, Safety, Security, operational and technical requirements of the City as contained and described in the Project Agreement.
 - (ii) Stations shall be designed to include the following as described in the Project Agreement:
 - A. Park and Ride Facilities and PPUDOs;
 - B. Service parking and laneways;
 - C. Bicycle Facilities; and,
 - D. Bus Facilities.
 - (iii) All Underground and At Grade Stations shall be designed in accordance with all applicable standards regarding accessibility and FLS, including but not limited to, Emergency egress, lighting and ventilation.
 - (iv) The Stations shall be designed for a fare control system to be supplied and installed by the City. DB Co shall ensure that all fare gate equipment is fully protected from the weather, including rain and snow in accordance with Schedule 15-2, Part 4, Clause 2.7(b)(iii)Bi.
 - (v) All Stations shall be designed to accommodate the design requirements of the City's Vehicle as well as buses where required.
 - (vi) All Stations shall be designed and constructed with access for maintenance personnel and equipment as required in Schedule 15-2, Part 4 – Stations.

(vii) The Stations shall be located along the corridor as described below:

A. Confederation Line East Extension:

- i. Blair Station is an existing Station serving as the interim eastern terminus of the Existing Confederation Line. DB Co shall modify the existing bus terminal and access to accommodate the extension of the Track, Guideway and to satisfy the bus Facility requirements.
- ii. Montreal Road Station shall be a new Line Station located at the crossing of OR174 and Montreal Road. The Station entrances shall have fare controlled access from both the eastbound and westbound lanes of Montreal Road with the Platform located directly above.
- iii. Jeanne d'Arc Station shall be a new Station located at the crossing of OR174 and Jeanne d'Arc Boulevard. The Station shall be served by two fare controlled entrances located on Jeanne d'Arc Boulevard. One entrance shall serve the northbound lane one shall serve the south bound lane;
- iv. Orléans Boulevard Station shall be a new Station located at the crossing of OR174 and Orléans Boulevard. The Station shall be served by two fare controlled entrances located on Orléans Boulevard. One entrance shall serve the northbound lane one shall serve the south bound lane;
- v. Place d'Orléans Station is an existing Transitway Station that is located adjacent to Place d'Orléans Shopping Centre and OR174. The Station shall be converted to serve as a Transfer Station. A pedestrian bridge spanning OR174 connecting the Park and Ride, the bus terminal and Place d'Orléans Shopping Center shall remain as a non-fare controlled connection in the final configuration. The bus terminal shall be directly connected to the O-Train Platforms and shall be within the Fare Paid Zone. The Station shall be served by four fare controlled entrances, two from the pedestrian bridge, one from the existing shopping center parking lot and one from Champlain Street; and,
- vi. Trim Road Station is an existing Transitway Station that is currently located southeast of the intersection of Trim Road and OR174. The existing Station shall be converted to a Terminal Station serving as the eastern terminus of the System. The existing bus terminal and Park and Ride will be reconfigured and capacity expanded to meet the needs of the Project including additional surface parking. The Station shall be served by one fare controlled

entrance located adjacent to the new Park and Ride Facility; with provision for two additional entrances; one adjacent to the south bound lanes of future Trim Road overpass and one entrance from the northeast near the existing City works yard.

B. Confederation Line West Extension:

- i. Tunney's Pasture is an existing Transitway station serving as the interim western terminus of the Existing Confederation Line. DB Co shall modify the existing bus terminal to satisfy the reduced bus terminal requirements within the Lands;
- ii. Westboro Station is an existing Station along the Transitway. The new Westboro Station shall be located on Scott Street between Tweedsmuir and Athlone Avenues. Off street bus Platforms and bus layby Facilities shall be located north of the existing Transitway trench. One fare controlled entrance shall be located from Scott Street and one from the non-Fare Paid Zone from the north;
- iii. Dominion Station is an existing Station along the Transitway. The new Dominion Station Platform shall be located within the existing Transitway trench, the Station fare controlled entrance shall be located between Dominion and Berkley Avenues;
- iv. Cleary Station is a new Station located between Richmond Road and Byron Avenue, west of Cleary Avenue within Byron Park. The fare controlled entrance shall be located no less than 25m east of the east curb line of Sherbourne Road;
- v. New Orchard Station shall be a new Station located between Richmond Road and Byron Avenue, immediately east of New Orchard Avenue within Byron Park. The fare controlled entrance shall be located immediately east of New Orchard Avenue;
- vi. Lincoln Fields Station is an existing Station of the Transitway network. The new Station shall be located in the vicinity of the existing Transitway Facility north of Carling Avenue, and consist of three Tracks with related Platforms. The new Station shall be integrated with the new bus Facility and PPUDO. The bus Facility shall be within the Fare Paid Zone. There shall be three fare controlled entrances; one from Carling Avenue near the new pedestrian crosswalk; one from the west at the level of the existing Transitway; and one from Carling Avenue near the existing bus entrance driveway;

- vii. Iris Station is an existing Station on the Transitway network. The new Station shall be located below the new Iris Street Bridge, with access from Iris Street located on the south side of Iris Street and fare controlled entrances on both the east and west side of the guideway;
- viii. Baseline Station is an existing bus Station on the Transitway. The new LRT Station Platform shall be located between College Avenue and Navaho Drive beneath the landscaped plaza just west of [REDACTED]. A Station fare controlled entrance and bus Facilities within the Fare Paid Zone shall be located south of College Avenue and west of the existing Park and Ride with a new pedestrian bridge connecting to the [REDACTED]. A second entrance shall be provided in the plaza north of College Avenue.
- ix. Queensview Station shall be a new Station located to the north of Highway 417. DB Co shall design and construct the Station in a side Platform configuration. The Station shall be integrated with a new pedestrian bridge connecting the north and south side of Highway 417. The fare controlled entrance shall be located north of Highway 417;
- x. Pinecrest station is an existing Station along the Transitway. The new Pinecrest Station shall be located on the north side of Highway 417 west of Pinecrest Road. The fare controlled entrance shall be located west of Pinecrest Road and North of Highway 417;
- xi. Bayshore Station is an existing station along the Transitway that is currently located adjacent to Bayshore Shopping Centre and Highway 417. The Station shall be converted to serve as a Transfer Station with integrated fare controlled bus Facilities, within the Fare Paid Zone, and a future direct connection to Bayshore Mall. The Station shall have fare controlled entrances at the north side of the bus terminal, one at grade and one at the existing pedestrian level; and,
- xii. Moodie Station is an existing Transitway Station that is currently located southeast of the intersection of Moodie Drive and Corkstown Road. The existing Station shall be converted to a Terminal Station serving as the western terminus of the Confederation Line. The Station shall be served by a minimum of one fare controlled entrance.

2.8 Facilities Requirements – LMSF

- (a) The proposed LMSF shall be located in the vicinity of Moodie Station.

- (b) LMSF shall be designed to meet the functional, accessibility, aesthetic, environmental, Safety, operational, and technical requirements of the City as contained in this Project Agreement.
- (c) LMSF shall be constructed within the Lands.
- (d) LMSF shall be designed and constructed to assure Revenue Vehicles are service ready in accordance with the Revenue Service schedule.
- (e) The LMSF shall be designed in accordance with any applicable standards regarding accessibility and FLS, including but not limited to, Emergency egress, lighting and ventilation, as pertain to a vehicle storage facility.

2.9 Structure Requirements

- (a) New Structures
 - (i) DB Co shall be responsible for the complete demolition and removal, of any existing Structures that have been made redundant as a result of new Structures.
 - (ii) DB Co shall be responsible for any impacts to existing Structures as a result of new Structures.
 - (iii) New Structures located along the Confederation Line East Extension shall include:
 - A. Montreal Road Flyover;
 - B. Westbound OR174 Bridge over Montreal Road;
 - C. Montreal Road Station Bridge;
 - D. Eastbound OR174 Bridge over Montreal Road; and,
 - E. Pedestrian Bridge at Trim Station.
 - (iv) New Structures located along the Confederation Line West Extension are:
 - A. Goldenrod Bridge Structure at Tunney's Pasture;
 - B. Roosevelt Pedestrian Bridge;
 - C. U Approach – Depressed Guideway Parkway East Portal;
 - D. U Approach – Depressed Guideway Parkway West Portal;
 - E. SJAM Parkway at Churchill Avenue Pedestrian Overpass;
 - F. SJAM Parkway at Cleary Avenue Pedestrian Overpass;

- G. U Approach - Depressed Guideway Connaught East Portal;
- H. U Approach - Depressed Guideway Connaught West Portal;
- I. Carling Avenue Bridge;
- J. Pedestrian Bridge at [REDACTED];
- K. Lincoln Fields Split Structure;
- L. Pedestrian Bridge at Queensview Station;
- M. Highway 417 Westbound Off-Ramp at Pinecrest Road;
- N. Highway 417 Westbound On-Ramp at Pinecrest Road;
- O. Pinecrest Road Bridge;
- P. Holly Acres Bridge;
- Q. Highway 417 S-W On-Ramp at Moodie Drive;
- R. Moodie Drive Bridge;
- S. Highway 417 N-W On-Ramp at Moodie Drive;
- T. Iris Street Bridge;
- U. Pinecrest Creek Culvert under Iris;
- V. Pinecrest Creek Culvert under Alignment; and,
- W. Baseline Station Pedestrian Bridge.

(b) Existing Structures to be used for the Guideway:

- (i) DB Co shall perform such investigations and design as may be required to ensure that any existing Structure can be used to support the Guideway. The design check shall be completed in accordance with all Applicable Codes and standards.
- (ii) DB Co shall perform design checks and investigations on all existing Structures which are to become Vehicle carrying Structures. DB Co shall evaluate all SI Structures to ascertain the BCI number of each Structure. BCI shall be calculated in accordance with the procedure contained in the MTO report "Bridge Condition Index (BCI) An Overall Measure of Bridge Condition". DB Co shall perform all necessary construction work to ensure each SI Structure achieves a minimum BCI of 80 at substantial completion. Substructure and soffit deficiencies on all existing structures spanning the alignment shall be repaired in accordance with Schedule

15-2, Part 2, Article 4 – Structural Design Criteria and Requirements and all Applicable Codes and standards.

- (iii) DB Co shall design and construct such modifications and ensure that all Applicable Codes are met, should such design checks demonstrate that modification is required to any portion of the Structure.
- (iv) A detailed condition assessment report shall be submitted in accordance with Schedule 10 – Review Procedure for all existing Structures being modified or rehabilitated. The condition assessment shall include the details of the proposed modifications and/or rehabilitation.
- (v) Existing Structures to be used along Confederation Line East Extension shall be:
 - A. Bilberry Creek Culvert under Highway OR174 (SN224510);
 - B. Box Culvert under Highway OR174 (SN894040); and,
 - C. Taylor Creek Culvert under Highway OR174 (SN894050).
- (vi) Existing Structures to be used along Confederation Line West Extension are:
 - A. Box Culvert under West Guideway (SN018230);
 - B. Graham Creek Culvert;
 - C. Stillwater Creek Culvert;
 - D. Southwest Transitway – Pinecrest Creek Kenson Park Culvert (SN018360); and,
 - E. Southwest Transitway – Pinecrest Creek Baseline Road Culvert (SN018370).
- (c) Existing Structures to be removed, replaced, modified or rehabilitated
 - (i) DB Co shall be responsible for:
 - A. The complete planning, demolition and removal, of any existing Structures that have been identified for removal or replacement;
 - B. The complete planning, design and construction of any replacement of existing structures;
 - C. The complete planning, design, modification or rehabilitation of any existing Structures; and,

- D. The complete coordination with external agencies and stakeholders during demolition staging and construction staging.

2.10 Design and Construction Requirements to Accommodate Future Works

- (a) DB Co shall protect for, by not precluding, future work in the design and construction of certain elements of the Project.
- (b) These future works are described below:
- (i) Future western extension of the Confederation Line either from Bayshore/Moodie or Baseline Station including the necessary Bridge Structures to allow the Moodie LRT to be extended to the west as part of the Kanata LRT;
 - (ii) Future eastern extension from Trim Station;
 - (iii) Future Cumberland Transitway at Blair Road;
 - (iv) Future Station Platform extensions if necessary to achieve 24,000 pphpd;
 - (v) The future connection of the Trillium Line Track alignment at Bayview Station to the Confederation Line alignment connecting to eastbound and westbound Tracks between Bayview Station and Lebreton Station;
 - (vi) The future northerly interprovincial extension of the Trillium Line alignment at Bayview Station to the existing Prince of Wales Bridge over the Ottawa River;
 - (vii) Future expansion of the Baseline storage and cleaning facility to accommodate up to 22 Vehicles;
 - (viii) Future extension of the Confederation Line beyond Baseline to the south;
 - (ix) Future widening of OR 174 from Blair Rd to Trim Rd so that the future Roadway is contained within the existing OR174 ROW;
 - (x) The future development of the City works yard on the northeast quadrant of the OR174/Trim interchange including but not limited to a future entrance to Trim Station on the north side of OR 174;
 - (xi) Future bridge crossing of OR 174 at 10th Line Road;
 - (xii) New side Platform Stations at [REDACTED], 10th Line Road and Orléans Town Centre;
 - (xiii) Future widening of Jeanne D'Arc Blvd;
 - (xiv) Future expansion of Highway 417 to the north, west of Moodie Drive and outlined in Schedule 15-2, Part 5 – LMSF;

- (xv) Future Trim Road overpass (existing Trim Road alignment) and interchange with OR 174;
- (xvi) Future Baseline Station Transit priority project;
- (xvii) Future Baseline Station pedestrian bridges as outlined in the CentrepoinTE Development Plan;
- (xviii) Connection of the east end of Bayshore Station to Bayshore Shopping Centre; and,
- (xix) Future expansion of Highway 417 from Highway 416 to Maitland Avenue.

ARTICLE 3 OPERATIONAL PERFORMANCE REQUIREMENTS

3.1 Introduction

- (a) DB Co shall provide the System that is seamlessly integrated with the Existing Confederation Line infrastructure and capable of delivering public transit service in a safe, reliable and efficient manner, and in accordance with the following operational performance parameters.

3.2 General

- (a) Operation of rail service will be the responsibility of the City. DB Co shall meet the operational needs and the functionality of the new System through the design and construction Work and shall validate the operational capabilities of the final SI design through performance simulation and demonstrate the operational capabilities of the SI as part of testing and commissioning.
- (b) DB Co shall be responsible to demonstrate through simulations and operational testing, that the Confederation Line East Works and West Works meets the operational needs and required functionality of the Project Agreement.
- (c) DB Co shall be responsible for the Subsystem testing on the systems they have designed and installed. DB Co shall be responsible for Systems Integration and Commissioning and System Safety Certification and System Security Certification of new SI and NMI.
- (d) Meeting the high capacity operational needs of the City shall require design and construction of the Confederation Line East Extension and Confederation Line West Extension that is highly integrated with the Existing Confederation Line and highly reliable across all major rail Systems including: Vehicle, Train Control and Signalling, Traction Power and Overhead Contact System, Stations, Tunnel Ventilation Systems, Track and Special Trackwork.
- (e) DB Co shall also provide O&M manuals for any systems and equipment being supplied and installed by DB Co, and provide associated O&M training, as per a training plan and scheduled agreed to by the City. These manuals will provide operations and maintenance staff with written instructions and documentation regarding the operation of, and the maintenance procedures associated with, each new system and related piece of equipment.

3.3 Operational Design and Construction Requirements

- (a) Operational Headways
 - (i) DB Co shall design and construct the SI to reliably support the sustained operational Headways identified in Clause 3.4 (c). Notwithstanding the above, DB Co shall design and construct the SI to support a minimum design headway of

2 minutes or less in accordance with the requirements of Schedule 15-2, Part 3, Article 10 – Signalling and Train Control System.

- (ii) DB Co shall design and construct the SI to reliably support a sustained operational headway of 15 minutes during a single Track outage at any location throughout the SI to support maintenance activities and/or continued operation during unplanned outages. Terminal to terminal trip time shall not significantly increase during single tracking operations, other than as a result of speed reductions applied through maintenance work zones. For clarity, the Train Control design shall support full reverse running performance, and crossovers shall be sized to minimize any delays associated with crossover movements.
- (b) Train Consist and Platform Lengths:
 - (i) The maximum Train consist length and Platform length shall be consistent with the Existing Confederation Line and designed in accordance with Schedule 15-2, Part 4 – Stations.
 - (ii) DB Co shall be responsible to ensure that the first and last door locations of the Train consist, Station Platform lengths and Train Control system are fully integrated in a manner that provides reliable Train berthing under all operating conditions for safe detraining and entraining of Passengers, utilizing all doors without undue Train performance degradation. DB Co shall be responsible for the optimal integration of the CBTC system, Platform length and placement, and for considering the Vehicle parameters that minimize any Train performance degradation while achieving reliable and consistent Train berthing at each Station. DB Co shall define and implement the optimal speed profile for this purpose to be programmed and enforced in the Train Control System.
- (c) Operating Configurations
 - (i) DB Co shall design and construct the SI to support the specific operating configurations to be operated by the City, as follows:
 - A. Weekday peak periods service patterns
 - i. During weekday AM and PM peak periods, three service patterns will operate, as follows:
 - 1 Baseline Station to Trim Station;
 - 2 Moodie Station to Trim Station; and,
 - 3 Moodie Station to Blair Station.
 - ii. These three service patterns will operate with the following relative frequencies of service:

- 1 Two out of every four trips operating through the core will operate between Baseline Station and Trim Station;
 - 2 One out of every four trips operating through the core will operate between Moodie Station and Trim Station; and,
 - 3 One out of every four trips operating through the core will operate between Moodie Station and Blair Station.
- iii. These service patterns will operate at the headways detailed in the table below and in accordance with Appendix C of this Part 1.

| AM PEAK | 2031 (Service Level 6) | 2048 (Service Level 9) |
|---|---------------------------|---------------------------|
| Segment | Operating Headway m:ss | Operating Headway m:ss |
| System Core: Between Lincoln Fields and Blair | 2:45 | 2:30 |
| Between Moodie and Lincoln Fields | 5:30 | 5:00 |
| Between Baseline and Lincoln Fields | 5:30 | 5:00 |
| Between Blair and Trim | 3:38* | 3:20* |
| * These headways are average headways, reflecting that three of four trips operate to/from Trim during the peak periods. (16.5 trips per hour per direction in 2031; 18 trips per hour per direction in 2048) | | |

- B. Weekday Off-Peak Periods (before 11:00pm) and Weekends/Holidays:
- i. Half of Trains shall operate between Moodie Station and Trim Station; and,
 - ii. Half of Trains shall operate between Baseline Station and Trim Station.
- C. Weekday Evenings (after 11:00pm):
- i. Four Trains per hour shall operate between Baseline Station and Trim Station;
 - ii. Four Trains per hour shall operate between Moodie Station and Lincoln Fields Station; and,
 - iii. Coordinated transfers will be scheduled at Lincoln Fields Station.

(ii) Lincoln Fields Station

- A. The Transfer Station shall be a three Track Station with 2 centre Platforms or one centre Platform and one side Platform and a fare paid bus terminal. All three Tracks shall be utilized for the loading and unloading of Passengers.
- B. The SI in the area of Lincoln Fields shall be designed to allow for efficient movement of Trains into and out of the Lincoln Fields Pocket (center) Track to support the following Train movements:
- i. Eastbound:
 - 1 Moodie to Lincoln Fields.
 - 2 Baseline to Lincoln Fields.
 - 3 Lincoln Fields to Trim.
 - ii. Westbound:
 - 1 Lincoln Fields to Moodie.
 - 2 Lincoln Fields to Baseline.
 - 3 Trim to Lincoln Fields.
- C. Crossovers shall be designed to minimize diverging and conflicting movements.

(d) Maximum Trip Times

- (i) To ensure an efficient and effective service, the System shall support trip times that are no greater than the maximum segment trip times over the Confederation Line East Extension and Confederation Line West Extension during the peak period shown in Table 1-3.1. Segment trip times shall be demonstrated using stochastic operations simulation modeling of the proposed System under ATO operations in accordance with the parameters in this Clause 3.4.
- (ii) The maximum travel time over the identified segments during the peak period, from wheel start at the beginning Station to wheel stop at the ending Station, including intermediate Dwell Times, shall not exceed the following:

Table 1-3.1 Maximum Peak Period Trip Times by Segment

| From | To | EB Time | WB Time |
|----------------|----------------|---------|---------|
| Moodie | Lincoln Fields | 9.0 min | 8.8 min |
| Baseline | Lincoln Fields | 4.6 min | 4.7 min |
| Lincoln Fields | Tunney's | 8.8 min | 8.8 min |

| | | | |
|-------|---------|----------|----------|
| | Pasture | | |
| Blair | Trim | 14.4 min | 15.3 min |

(e) Simulation Requirements

- (i) DB Co shall verify compliance with the minimum design headway of 2 minutes, 2031 (Service Level 6) and 2048 (Service Level 9) headways shown in Clause 3.4 (c) and with maximum travel times contained in Table 1-3.1, through operations simulation of the proposed Confederation Line East Extension and Confederation Line West Extension reflecting DB Co's design according to the following requirements:

- A. For the purposes of simulation, operating performance factors (such as, but not limited to: acceleration, braking, maximum allowable speed adherence) shall be adjusted such that Station-to-Station travel times are 6% longer than the ideal Station-to-Station travel times (i.e. Station-to-Station travel times that could be achieved with full acceleration and braking rates; with perfect adherence to maximum allowable speeds; and perfect timing of brake application) to account for sub-optimal performance reflecting real-world conditions. DB Co shall adjust and calibrate the operating performance factors to achieve the 6% increase in run time and shall document the adjustments in the simulation report. For purposes of calibrating the operating performance factors, the Station-to-Station travel times on the Moodie to Lincoln Fields segment (excluding dwell times) shall be utilized. The adjusted operating performance factors shall be applied to all respective Trains on all segments in all simulations
- B. For purposes of simulations, stochastic variation of Dwell Times shall be applied in accordance with Clause 3.4(f) below.
- C. For clarity, the stochastic variation of Dwell Times, and a 6% adjustment of the performance factors shall be included in the simulated run time which shall comply with the maximum trip times in Table 1-3.1.

(ii) Infrastructure

- A. The simulation shall reflect DB Co's final design of the SI on the Confederation Line East Extension and Confederation Line West Extension (including Track alignment, special Trackwork, curvature, grades, and Station Platform limits).

(iii) Rolling Stock

- A. The simulation shall reflect the parameters of the [REDACTED] at AW2 loading.

- (iv) The simulation shall capture the influence of the CBTC signal system as outlined in Schedule 15-2, Part 3 - Systems.
- (f) Dwell Time
 - (i) For simulation analysis purposes, stochastic dwell time variation shall be simulated through stochastic variation in the form of a uniform distribution of plus and minus 5 seconds applied to the nominal dwell times at each Station in Table 1-3.2.

Table 1-3.2: Dwell Time Assumptions

| Dwell Time (sec) | | |
|------------------|-----------|-----------|
| Station | Eastbound | Westbound |
| Moodie | - | - |
| Bayshore | 27 | 20 |
| Pinecrest | 20 | 20 |
| Queensview | 20 | 20 |
| | | |
| Baseline | - | - |
| Iris | 20 | 20 |
| | | |
| Lincoln Fields | 23 | 20 |
| New Orchard | 20 | 20 |
| Cleary | 20 | 20 |
| Dominion | 20 | 20 |
| Westboro | 20 | 20 |
| Tunney's Pasture | 27 | 21 |
| Blair | 20 | 29 |
| Montreal | 20 | 20 |
| Jeanne d'Arc | 20 | 24 |
| Orléans Blvd | 20 | 20 |
| Place d'Orléans | 20 | 32 |
| Trim | - | - |

- (ii) Passenger loading and unloading time at terminal Stations shall be considered part of the terminal layover time, and shall not be included in the calculation of maximum travel time.
- (iii) If any randomized dwell times from the uniform probability distribution result in values less than 20 seconds, they shall be adjusted upward to a minimum of 20 seconds in the simulation.

3.4 Operational Testing

- (a) System Integration Testing

- (i) DB Co shall confirm their SI design is capable of supporting the required minimum headway of two minutes.
 - (ii) DB Co shall demonstrate the maximum travel times specified in Clause 3.4 (d), while respecting minimum dwell times specified in Clause 3.4 (f).
 - (iii) DB Co shall demonstrate other operational capabilities of the SI that can be tested independently of the Existing Confederation Line, including operations in normal, abnormal, and Emergency scenarios.
- (b) Trial Running
 - (i) DB Co shall demonstrate through Trial Running of the SI for the East Works, and West Works that the following planned operational parameters can be achieved;
 - A. Service Level 3A headways for the East Works and Service Level 4 for the West Works as specified in Appendix C of this Part 1;
 - B. the operational performance; and,
 - C. the reliability requirements specified in Schedule 14 – Testing and Commissioning.

ARTICLE 4 DESIGN AND CONSTRUCTION

4.1 General Construction Requirements

- (a) DB Co shall be responsible for the design and construction of the Project and all other Construction Activities, including completion, Commissioning and testing of the Project, which shall be performed in strict accordance with the design and construction requirements and in such a manner as to comply with all applicable Project Agreement requirements.
- (b) Limits of construction, occupation and all works, except for site access, construction of detours and associated Works, shall be within the Lands, Temporary Easements and Permanent Easements as shown hatched on the PRP's. See Schedule 20 – Lands for additional information.
- (c) DB Co shall only construct or implement Site access, detours and associated Works on existing City/public rights-of-way/property if those Site access, detours and associated Works have been approved by the City as part of DB Co's TTMP.
- (d) Construction Mobilization and Staging Areas
 - (i) The only Properties that can be utilized as Construction mobilization or staging areas, as defined in Schedule 20 – Lands are indicated on the property table located in Schedule 20, Part B – Lands Table.
- (e) DB Co shall restore or rehabilitate any disturbed areas within or extending beyond the limits of the Works, including but not limited to, road alignment, paving, Trackwork, monitoring wells, landscaped areas including plantings and /or sodding. These areas shall be cleaned of debris and have any temporary paving or structures removed and replaced with planting soil or restored to the same or better condition or as directed by the City in accordance with the requirements of Schedule 15-2, Part 6, Article 2 – Design Criteria. DB Co shall complete a review of the adjacent land uses and site development for these locations and shall select the most appropriate groundcover.
 - (i) DB Co shall protect all City and Third Party Facilities adjacent to the Works.
 - A. Protect and/or transplant existing fencing, trees, landscaping, natural features, bench marks, buildings, Pavement, monitoring wells, surface or underground utility lines which are to remain. If damaged, restore to original or better condition unless directed otherwise. DB Co shall make reference to Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - B. DB Co shall replace any damaged trees designated to remain in accordance with City Urban Forestry guidelines.

- C. DB Co shall be responsible for installing, maintaining and removing any temporary facilities necessary to access the site, including but not limited to fences, gates, constructions, granular, silt fences and TCD.
 - D. DB Co shall be responsible for the removal, safe storage, and restoration of furnishings and other assets of BIA as necessary for the Works.
- (f) DB Co shall perform the following for all Lands:
 - (i) Develop hoarding plans in accordance with the NCC hoarding specifications, and fencing plans shall be submitted in accordance with Schedule 10 – Review Procedure. The boundaries of the Construction sites shall be fenced. The boundaries of mobilization sites shall be hoarded. The hoarding/fencing plans shall include details on location, height, materials and expected timing of installation and removal.
 - (ii) In addition, for Lands subject to FLUDTA, hoarding plans shall be in accordance with the NCC hoarding specifications. No use or access to adjacent NCC lands shall be permitted without the express approval by the NCC.
 - (iii) Maintain the construction hoarding and fencing in a good condition of repair at all times.
 - (iv) DB Co shall install and maintain promotional and advertising materials to be provided by the City in accordance with Schedule 18 – Communications and Stakeholder Engagement Obligations.
- (g) Construction site camera systems:
 - (i) The City intends to provide a camera system to be installed by DB Co at each construction Site, at a location selected by the City. DB Co shall provide power and internet connectivity to each location selected by the City. The power shall be a hard wired connection, unless a specific arrangement is made between DB Co and the City for solar power to be used. The internet connectivity shall be high speed, through telephone or cable lines, unless a specific arrangement is made between DB Co and the City for an LTE cellular connection to be used.
 - A. The construction Sites shall be each of the Stations, as well as Tunney's Pasture Station (total of 18 locations).
 - B. The system being developed is closed, password protected, and not publicly accessible. Upon completion of the system, the City shall provide DB Co with live access to the system. The City shall own the system and the content, and reserves the right to utilize the system in order to create timelapse videos showing construction progress over time that may be shown to the public as a promotional tool. The system shall

adhere to the City of Ottawa's Surveillance System for Transit Network Access and Privacy Policy.

- (ii) In the event that, upon completion of the system, DB Co wishes to have an additional camera system at any Site beyond the one that the City shall provide, DB Co can purchase the unit from the City at cost, and install it on their site at their own cost.
- (iii) In the event that the City wishes to have an additional camera system at any Site, DB Co shall install it and provide power and internet connectivity as described in (i) above.

4.2 Surveys

(a) Control Survey

- (i) A control survey of the alignment has been completed by the City for this Project. Existing and new monuments were used in establishing the Project Control survey.
- (ii) DB Co shall evaluate its requirements for a control survey in order to perform the design and construction Work and determine if additional monuments are required. Any such additional monuments shall be of the same order as the control survey provided and shall be installed by DB Co and shall be surveyed to tie into the Project survey control coordinate system. DB Co shall prepare a survey report including field notes, measurements, adjustments, Station descriptions and reference tie drawing of each additional survey monument installed and provide a record to the City.
- (iii) DB Co shall be solely responsible for protecting and maintaining all existing survey control monuments. In the event that Project survey control monuments have been disturbed or destroyed during the Project, then DB Co shall re-establish the survey control at construction completion and provide a survey report to the City for approval at no cost to the City.
- (iv) The Project control survey shall be used as the basis for all Works.
- (v) Horizontal Control
 - A. Modified Transverse Mercator, MTM 3 degree, zone 9 central meridian 76 degrees 30 minutes West'; and,
 - B. NAD83 original as well as in NAD 83 CSRS format.

- C. The horizontal coordinates for control points are 2nd order as defined by the Specification and Recommendations for Control Surveys and Survey Markers 1978, Natural Resources Canada, Part 2 – Horizontal Control.
- D. All surveys made for the Project shall be referenced and adjusted to the Control Survey monuments in the DB Control network and shall be adjusted by holding these monuments fixed. The adjustments to the data shall be coordinated with the City. The accuracy of these surveys shall be second order.

(vi) Vertical Control

- A. The vertical control shall be based on the Canadian Geodetic Vertical Datum of CGCD1928 using HT2 Geoid Model.
- B. The vertical control survey shall be conducted in accordance with Specification and Recommendations for Control Surveys and Survey Markers 1978, Natural Resources Canada, Part 1 - Vertical Control, Levelling. Vertical Deep Benchmarks shall meet or exceed 1st Order Vertical levelling criteria. Non Deep Benchmarks typically set on sidewalks shall be verified for marker stability with a minimum of one adjacent marker prior to accepting the published elevations.

(b) Aerial Photo and Digital Mapping

- (i) Detailed topographic mapping was compiled for the Project based on 2012, 2013 or 2014, 6cm aerial imagery with an accuracy of 18cm or better 90% of the time with some possible errors up to 36cm 10% of the time. Additional aerial mapping is compiled by combining November 2015 6cm aerial imagery with high accuracy aerial LiDar, where appropriate. Accuracy is 12cm or better 90% of the time, with some possible errors up to 25cm, up to 10% of the time. The aerial mapping has been supplemented with field audit surveys for site specific locations.
- (ii) Aerial triangulation was based on the Project-specific control survey datum and the datum photo control points.
- (iii) DB Co shall evaluate their requirements for topographic mapping and augment the aerial triangulation adjustment with additional ground control, if required.
- (iv) In the event that DB Co requires additional or updated topographic mapping, then the orthophotos and digital vector mapping shall be performed in the Project control survey coordinate system.

(c) Legal Surveys

- (i) Legal surveys, in the form of a reference plan of survey, intended for fee simple, permanent or temporary easement acquisition to support the Project shall be performed by the City.
 - (ii) The entire corridor shall be surveyed in the form of parts on reference plans.
 - (iii) DB Co shall ensure that, in those areas where the proposed construction is to take place within 1m of a property limit, that a licensed Ontario Land Surveyor is engaged to stake out the property limit in the field and prepare field notes and sketches to document the fieldwork.
- (d) **Post Completion Survey**
 - (i) DB Co shall provide, at its own cost and expense, a post-completion survey, in the form of a topographic survey of the entire corridor accurate to a scale of 1:1000, in CADD format, georeferenced to the Project control not more than 90 days after the latest Final Completion Date.
 - (ii) DB Co shall be solely responsible for protecting and maintaining all existing legal survey reference monuments. In the event that Project survey monuments have been disturbed or destroyed during the Project, then DB Co shall re-establish the survey monuments at the time of the post-completion survey and provide a survey report to the City for approval at no cost to the City. The survey shall be submitted in accordance with Schedule 10 – Review Procedure.
- (e) DB Co shall complete a pre-construction condition survey of the Lands covered by Third Party Access Agreements (as defined in Schedule 20 – Lands) and adjacent lands and shall provide the report to the City, not less than eight calendar days prior to the commencement of the Works. Under no circumstances shall DB Co commence the Works until the pre-construction condition survey is provided to the City. DB Co shall complete a post-construction condition survey of the Lands covered by Third Party Access Agreements and adjacent lands and shall provide the report to the City not less than eight calendar days following the completion of the Works. The surveys shall record, by way of photographs, videos and written reports, the status, grading, fencing, monitoring wells, and visible condition of the Lands covered by Third Party Access Agreements and immediately adjacent property.

4.3 Design Requirements

- (a) **Design Components and Design Life**
 - (i) DB Co shall design the components of the Project to meet the requirements outlined in Table 1-4.1.

Table 1-4.1: Design Components and Design Life

| | Design Life Required (years) |
|---|------------------------------|
| New Bridge Structures | 75 |
| New Retaining Walls | 75 |
| New Culverts | 75 |
| New Flexible Pavement (including intervening rehabilitation with initial Design Life of minimum 20 years) | 40 |
| New Rigid or Composite Pavement (including intervening rehabilitation with initial Design Life of minimum 30 years) | 55 |
| Elevated Guideway | 75 |
| Stations – Finishes | 40 |
| Stations – At-Grade Station Structures | 50 |
| Stations – Underground Station Structures | 100 |

(b) Climate Data for Design

- (i) DB Co shall use the climate data presented in Table 1-4.2 where required for design, unless otherwise specified:

Table 1-4.2: Climate Data

| | |
|-----------------------------|------|
| Extreme Maximum Temperature | 38°C |
|-----------------------------|------|

| | |
|-----------------------------|---------|
| Extreme Minimum Temperature | -39°C |
| | |
| Extreme Daily Rainfall | 135mm |
| Extreme Daily Snowfall | 56cm |
| Extreme Daily Precipitation | 135mm |
| Extreme Snow Depth | 135cm |

| Maximum Hourly Wind Speed | 80km/h |
| Maximum Wind Gust Speed | 135km/h |
| | |

4.4 Site Work

(a) General

(i) Existing Conditions

- A. Existing conditions shall be verified and documented by DB Co.
- B. DB Co shall identify and document all underground and surface Utility lines and buried objects prior to any construction activities and/or excavation operations.

(ii) Backfill

- A. Backfill work completed by DB Co shall achieve a performance characteristic not less than the adjacent undisturbed soils and to the satisfaction of the property owner, when backfilling in areas that will not carry any load from the works and other areas other than areas regulated by any applicable standards.

(b) Conduit Drainage

(i) Underground

- A. All underground conduit, duct banks, and maintenance holes for electrical, communication, and systems shall be designed and constructed to prevent the accumulation of water and formation of ice in any component within the SI.

(ii) Non-Underground

- A. All conduit and raceways for electrical, communication, and systems shall be designed and constructed to prevent the accumulation of water to prevent moisture from entering any equipment within the SI.

ARTICLE 5 IMPLEMENTATION CONSTRAINTS

5.1 General Implementation Constraints

(a) General Requirements

- (i) The intent of this section is not to define or limit DB Co's approach to the construction or the means and methods that may be chosen but to bring awareness to the Project constraints that shall be adhered to in the planning and delivery of the Works.
- (ii) DB Co shall reinstate to original condition, unless otherwise indicated elsewhere in the documents and at DB Co expense, all Lands, Roadways, MUPs and assets affected by the implementation of the Confederation Line.
- (iii) The construction planning for this Project shall consider the existing operations of the City, and the impacts to the street network within the City, as well as considering adjacent residences and businesses, with respect to pedestrian and property access and other environmental impacts. The construction sequencing shall be performed in such a manner that the existing Transitway is maintained at a service level similar to existing conditions for the maximum amount of time.
- (iv) For all Lands and Lands subject to FLUDTA, DB Co shall maintain fencing at all times around the boundaries of the construction sites. No use or access will be permitted to adjacent NCC Lands without the express approval by the NCC.

(b) Access to Adjacent Properties

- (i) DB Co shall provide access to all adjacent properties, tenants, and residential drives and building entrances, including access points for fire department connections and for waste removal except as otherwise permitted. Fire department access shall be maintained to conform to all code requirements. Should an existing entrance or access have to be closed or reduced, DB Co shall coordinate with the impacted parties to provide an alternative solution to have continuous access.
- (ii) DB Co shall accommodate for pedestrian access throughout the Project providing safe passage for pedestrians impacted by the Work. Pedestrian access shall be in conformance with the AODA, CSA accessibility requirements, and the COADS, where applicable. DB Co shall prepare and implement a Pedestrian Access Plan detailing pathways, signage and Structures to accommodate pedestrian traffic nearby and through the Project site. The plan shall be submitted in accordance with Schedule 10 – Review Procedure.

(c) Work Hours Limitations

- (i) DB Co shall abide by all federal, provincial, and municipal statutes regarding hours of work, except for when working within the area around the proposed Cleary Work in the vicinity of the intersection of Cleary Avenue and Richmond Road) as detailed below, in which case DB Co shall not be permitted to work at any time on Sunday. Should DB Co need to work hours outside of the statutes or the exception provision detailed here, DB Co shall provide a plan describing the Work activities, construction equipment required, proposed hours of work and mitigation efforts with respect to noise and other environmental considerations potentially impacted with the increased work hours. This plan shall be approved by the applicable Governmental Authority with respect to the specific statute. Consultation with the affected community shall be conducted in accordance with the provisions of Schedule 18 – Communication and Stakeholder Engagement Obligations.
 - A. The area bounded by the Cleary work area limitation is defined by the intersection of the following:
 - i. To the south - Byron Avenue
 - ii. To the north - the existing SJAMP
 - iii. To the east – the eastern property boundary of [REDACTED]
 - iv. To the west – the western property boundary of [REDACTED]
- (ii) DB Co shall be aware of the local community and political public events that may impact the work on the Project.

5.2 Construction Planning and Constraints

- (a) NCC and City MUPs shall remain open to public use during construction. DB Co shall provide temporary detours and temporary signage indicating detours if pathway closures are required. See Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements for further information.
- (b) Rock excavation using drill and blast methods may be used for construction of the Underground Structures in accordance with the blasting requirements of Schedule 15-2, Part 2 – Civil and Guideway, Article 7- Geotechnical Design Criteria and Requirements, Article 9 – Protection of Existing Adjacent Structures and the following project constraints
 - (i) Blasting shall be permitted for rock excavation of the Parkway Tunnel including New Orchard Station and the east and west portal Structures with the exception that drill and blast shall not be permitted where the Tunnel runs parallel to the WNC utility. The approximate limits of the Parkway Tunnel no-blast zone run from the intersection of Cleary Avenue with Richmond Road to the intersection of Lockhart Avenue with Richmond

Road. A minimum stand-off distance of 15m shall be provided between the beginning of drill and blast work and the WNC outside of this no-blast zone with the final stand-off distance to be determined by DB Co based on the results of the blast design CIAR of Schedule 15-2, Part 2 - Civil and Guideway, Article 9 – Protection of Existing Adjacent Structures.

- (ii) Blasting shall not be permitted for rock excavation of the Connaught Tunnel and the depressed guideway west of Connaught Tunnel.
- (c) DB Co shall limit their material and equipment storage to within the construction boundaries and per Temporary Easement and Permanent Easement as shown hatched on the PRP's Schedule 20 – Lands for additional information.
- (d) Properties that can be utilized as construction staging areas are identified in Schedule 20 – Lands. Should DB Co require additional properties beyond those shown to be provided, it is the responsibility of DB Co to acquire any additional property as prescribed in Schedule 20 - Lands.
- (e) See Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access for restrictions associated with events and holidays.
- (f) Refer to Schedule 17 – Environmental Obligations for requirements for working around SARS.
- (g) MTO Constraints/Highway 417
 - (i) DB Co shall ensure that all work performed in the vicinity of and affecting the Highway 417 is as per MTO requirements. DB Co shall refer to Schedule 15-2, Part 9 – Highway 417 Works, and Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access, for MTO requirements.
 - (ii) DB Co shall ensure that there is coordination between the TTMP required for the West Works (as per Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access) and the Highway Works TTMP (as per Schedule 15-2, Part 9 – Highway Works) by contacting involved parties from both TTMPs, so that there is no conflict between the two TTMPs.
- (h) NCC/Linear Park/SJAM/Connaught Park – NCC work restrictions
 - (i) DB Co shall perform no work on Federal Lands without the plans and designs having first been approved by the NCC Board of Directors and a letter of approval signed by the NCC Executive Director, Capital Planning.
 - (ii) DB Co shall notify the NCC in writing of road closures during construction one week in advance.
 - (iii) DB Co shall maintain an open area between the EBL and WBL pedestrian underpass structures on the SJAM Parkway.

- (iv) DB Co shall ensure that when determining mobilization sites, access roads and SJAM Parkway detours from Dominion Station to Cleary Station, they respect the restrictions regarding tree removal identified in Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.
 - (v) Protected zones
 - A. DB Co shall install protective snow fence to secure the periphery of zones of tree preservation. Snow fence shall be kept in good condition at all times.
 - B. If any trees, other than those identified in the plans are to be cut, DB Co shall address a request to the staff responsible for this approval for review and, if acceptable, obtain all necessary permits.
 - (vi) DB Co shall complete the Work required for the installation of the site servicing for the Kitchissippi Lookout as outlined in Schedule 15-2, Part 2 – Appendix G by February 28, 2020, in order to permit NCC to begin construction on the planned pavilion.
 - (i) Systems Constraints
 - (i) Tie-in of systems with the Existing Confederation Line as identified below shall be subject to the work time restrictions identified so as to not negatively impact the operation of the Existing Confederation Line except as described below. Additional work hours may be available depending on the type of work, time of day and location. All requests for additional work time shall be submitted to the City in writing. The requests shall include a full and comprehensive plan for installation, testing, and certification subject to approval by the City. Formal engineering change management and software engineering change management processes to be implemented, subject to approval of the City, prior to any software changes, upgrades, or testing take place. Any changes that remain in place must be certified for safe operation.
 - A. Tracks at Tunney’s Pasture Station and Blair Station can be shut down a total of six times over 48 hour weekends for tie-in systems work as follows:
 - i. Both Tracks at each Station once;
 - ii. The eastbound Track only at each Station once;
 - iii. The westbound Track only at each Station once.
- The weekend shut downs shall not exceed 48 hours, must be scheduled six months in advance, and are subject to City approval pending a review of major events and holidays.

- B. Track: non-revenue hours;
 - C. Train Control: non-revenue hours;
 - D. Communications: non-revenue hours;
 - E. OCS: non-revenue hours;
 - F. Traction Power: non-revenue hours.
- (ii) Testing support requirements shall be coordinated with the City during the weekly maintenance coordination meetings.
 - (iii) A maintenance window or a series of maintenance windows (non-revenue hours) shall be scheduled to add new elements to the existing CMMS system, including Track, OCS, signaling apparatus, communications elements, etc.
 - (iv) A cutover/transition plan shall be developed for the upgrade of the CMMS – which will identify the pre-work/test configuration, all key staff, actions and constraints-- a failsafe/fall back plan shall be established in case of any system failures require DB Co to revert back to the pre-test system configuration.
 - (v) Communications systems elements to be added shall be implemented during revenue hours (SCADA, PA/PIDS, intrusion & access control, CCTV cameras, fire/life Safety devices, etc.) but overall systems field device tests and access control tests shall be done during non-revenue hours: a cutover plan shall be provided, and this shall be approved by OC Transpo before implementation.
 - (vi) Tunnel portal intrusion system installation and testing shall be coordinated in the field and at the TOCC during non-revenue hours.
- (j) Structures constraints:
 - (i) Green's Creek Culverts
 - A. DB Co shall comply with NCC, DFO, City and other Governmental Authorities' regulations before accessing work areas and commencing work at Green's Creek.
 - (ii) Pedestrian Bridge at [REDACTED]
 - A. DB Co shall ensure that the new Woodroffe Pedestrian Bridge is constructed and commissioned prior to the removal of the existing Woodroffe Pedestrian Bridge.
 - (k) Noise and Vibration Mitigation

- (i) DB Co shall abide by all federal, provincial and municipal statutes regarding noise levels, noise mitigation, and vibration mitigation. Prior to commencement of construction, DB Co shall prepare and implement a Noise and Vibration Control Plan in accordance with Schedule 17 – Environmental Obligations prepared by a Professional Engineer describing the predicted construction noise and mitigation measures required to meet the noise level limitations.
- (l) Transit system constraints:
 - (i) All construction work with the exception of bus stops, within 60m of any OC Transpo infrastructure, shall be subject to review and approval by OC Transpo with respect to existing or new OC Transpo infrastructure and shall receive OC Transpo's written approval prior to construction.
 - (ii) Preceding any full closure of any portion of the Transitway, DB Co shall complete all temporary Stations and associated facilities for that portion of the Transitway at least 48 hours prior to cutover. Refer to Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access. In addition, all associated detours for the City bus circulation shall be in service by the City before this portion of the Transitway is allowed to be closed.
 - (iii) The closure and removal of the exiting Transitway Bridge over OR174 shall not be permitted until the implementation of the detour routes for existing buses that utilize this Bridge is completed.
 - (iv) DB Co shall not close West Transitway Segment W-1 (Tunney's Pasture to Dominion), prior to December 19, 2021.
 - (v) DB Co shall ensure the pedestrian Bridge connecting the existing central Station building and the existing north Station buildings at and vertical circulation elements of each, inclusive of elevators and stairs, at Bayshore Station, remain available for bus service customers for the duration of the Project. Temporary off peak closures may be permitted with prior approval from the City.
- (m) Coordination with City Works
 - (i) Coordination with others
 - A. DB Co is notified that Third Party Contractors and City staff will need access to the construction Site at various times and locations during the course of the Work. Therefore, DB Co shall provide the following:
 - i. Coordinating their level of completeness to the City so that the City's coordination with Third Party Contractors can be performed at the appropriate time;
 - ii. Coordinate the timing of the access to minimize disturbances;

- iii. Provide Site access to the Third Party contractors and City staff;
- iv. Provide staging and storage areas to the Third Party Contractors and City staff for their work;
- v. Provide access for the City's delivery and set up of City equipment (furniture, appliances, computer equipment, etc.) in City spaces;
- vi. At the City's request, provide up to date as built drawings of the sites at the time of the coordination; and,
- vii. DB Co is required to provide the City with access to and storage space within the Moodie LMSF in accordance with the following requirements:
 - 1 Provide access to LMSF offices and general storage Facilities six months prior to Substantial Completion. Office and storage areas shall be available for access and storage.
 - 2 Provide access to LMSF maintenance Facilities three months prior to Substantial Completion. Maintenance Facilities shall be available for access and storage.
 - 3 Provide access to LMSF Vehicle Storage Tracks nine months prior to Substantial Completion. Vehicle storage area shall be available for occupation. At this time, the Track switches and OCS are not required to be powered.
 - 4 Provide full access to LMSF Vehicle Storage Tracks three months prior to Substantial Completion. At this time, the Track switches and OCS shall be operational and powered.
 - 5 Provide access to the MYCC six months prior to Substantial Completion.

B. Anticipated coordination issues are, but are not limited to, the following:

- i. Fare control equipment installation
 - 1 Installation by OC Transpo requires one month notice prior to the installation and one week per Station for the actual installation. Access shall be staggered so that installation can be performed one Station at a time. The installation shall be scheduled to begin no more than four months prior to Trial Running.
- ii. OC Transpo spaces

- 1 Access for fit out by OC Transpo shall be provided four months prior to Trial Running.
 - iii. Vendors within Stations
 - 1 Access to vendors and their contractors shall be provided three months prior to Trial Running.
 - iv. Various Communications issues including:
 - 1 Voice and Data Radio: Access for installation shall be provided two months prior to Train movements.
 - 2 Cellular telephone: Access for installation shall be provided two months prior to Trial Running.
 - 3 Nexus PIDS: Access for installation shall be provided two months prior to Trial Running.
 - 4 City Network IT: Access for installation shall be provided two months prior to Trial Running.
- (n) Lands Constraints
- (i) Bayshore Shopping Centre:
 - A. DB Co shall appoint a representative to co-ordinate and communicate the Work requirements on the Bayshore Shopping Centre Lands. Bayshore Shopping Centre will also provide a point of contact for such coordination.
 - B. DB Co shall provide 30 calendar days' notice to the City and the Bayshore Shopping Centre point of contact, prior to commencing any Work on the Shopping Centre Lands, as identified in Schedule 20 – Lands.
 - C. DB Co shall ensure that a minimum on one-lane of traffic is maintained on the Shopping Centre Lands during the Work.
 - i. Should DB Co require closure of a second lane, blocking access over the Shopping Centre Lands completely, DB Co shall obtain the approval from Bayshore Shopping Centre point of contact a minimum of 48 hours in advance of the date on which the closure of the second lane is to take place.
 - D. DB Co shall provide TCP to direct traffic, if requested by Bayshore Shopping Centre a minimum of 48 hours in advance of the date on which the TCP are required.

- E. DB Co shall erect appropriate signage directing pedestrian traffic to the appropriate mall entrance and vehicular traffic to the parking structure.
 - F. The Shopping Centre Lands shall not be available for use by DB Co between November 15 and January 1 of any calendar year. DB Co shall ensure that any reinstatement required to ensure that the internal roadways located on the Shopping Centre Lands are entirely available for use during this period and is completed to the satisfaction of the Bayshore Shopping Centre point of contact.
 - G. Additional constraints on the use of the Lands are provided in Schedule 20 – Lands.
- (ii) Place d’Orleans Shopping Centre
- A. DB Co shall ensure that delivery of any site office trailers to this location shall not block traffic to and from the shopping centre and shall be delivered during off peak hours.

ARTICLE 6 REGULATORY STRUCTURE AND OBLIGATIONS

6.1 General Requirements

- (a) DB Co acknowledges that the City has the authority under the Delegation Agreement to regulate any matters covered by Parts III and IV of the Canada Transportation Act and by the Railway Safety Act relating to the design, construction, operation, maintenance, Safety and Security, as well as the rates and conditions of service of the system.
- (b) DB Co shall comply with adopted Confederation Line Regulations as it relates to the design and construction and Safety and Security of the system
- (c) DB Co acknowledges that the Confederation Line Regulations are part of the definition of Applicable Laws in this Project Agreement as adopted by the City.
- (d) DB Co and the City acknowledge that the Confederation Line Regulations and support documentation may not be required to support or facilitate all aspects of, or all activities comprising, the Work, or the system. The appropriate scope, detail and timetable for adoption of modified or supplemental Confederation Line Regulations shall be based on the City's responsibility to regulate the design, construction, operation, maintenance, Safety and Security of the system in a prudent and timely manner generally consistent with other regulatory authorities of municipal light rail transit systems in Canada and elsewhere, having regard to; the Delegation Agreement; the design, technical features and anticipated operating conditions of the system; and the Safety and Security of the public.

6.2 Scope of Service

- (a) Modified or supplemental Confederation Line Regulations and support documentation will be consistent with the requirements of this Project Agreement, and based on generally recognized and/or adopted codes, standards, practices, design references, Safety and Security principles and guidelines for other light rail transit systems operating in comparable conditions.
- (b) DB Co shall provide to the City for review in accordance with Schedule 10 – Review Procedure and the City's Safety Certification Plan and Security Certification Plan, the following elements taking into considerations the Existing Confederation Line existing analysis and findings:
 - (i) System Safety Program Plan;
 - (ii) SSSeCP;
 - (iii) TVA; and,
 - (iv) PHA.

ARTICLE 7 SYSTEM SAFETY CERTIFICATION

7.1 General Requirements

- (a) The Work specified in this Article, as well as portions of Article 8 of this Part 1 that refer to Security, consists of DB Co's requirement to develop and implement a SSAP. The purpose of the SSAP is to ensure the Project systems and equipment are safe and secure including:
 - (i) Design and operating hazards and Security vulnerabilities are identified, evaluated, and properly controlled or mitigated, prior to the commencement of passenger service.
 - (ii) All critical system elements are evaluated for compliance with the identified Safety and Security requirements during the design, conform to the drawings and specification during construction/installation, and function as required during testing, and start-up phases of the Project.
 - (iii) The Project is operationally safe and secure for customers, employees, emergency response personnel, and the general public prior to entering revenue service.
 - (iv) All Project equipment, facilities, plans, procedures, and training programs are systematically reviewed for compliance with established system Safety and Security requirements, and so verified prior to implementation of revenue service.
- (b) Requirements for human factors are integral part of this program and shall be integrated into the development and implementation of the SSAP plans. The system Safety and assurance requirements shall apply to all DB Co functions during all phases of the Work including design, construction, installation, testing, pre-revenue operations, in-service support, warranty, retrofits and field modifications.
- (c) Objectives: The primary objective for DB Co is to deliver a Project that meets or exceeds Safety, Security and systems assurance related governmental rules, regulations, standards and industry best practices, and applicable requirements throughout the Project. Thus, leading to delivery of a safe and reliable system for the City, its employees, DB Co, customers and the public at large.
- (d) DB Co's design shall be compliant with Safety and Security criteria, codes, and regulations including Ontario Human Rights Commission Policy and Guidelines on Disability and the Duty to accommodate requirements, with Safety and Security of Passengers and employees as the most important requirement of the Project.
- (e) DB Co shall be responsible for compliance with the Project's SSCP developed by the City through strict conformance to contractual obligations. DB Co shall manage its Work and that of its Subcontractors' through design, construction and integrated testing in such a way as to support the overall success of the Safety and Security certification process and the ultimate acceptance by the City.

- (f) In the event that a subsystem or equipment being supplied by DB Co for the Confederation Line Extension has a Safety Case(s) (Generic Product, Generic Application) for the Existing Confederation Line that has been approved by the City, with no modifications to form, fit or function from the Existing Confederation Line, then DB Co may state in the respective Safety Case certified by similarity and append the previous approval and necessary documentation. The Project's SSCP shall be followed for Cross-Acceptance as described therein.
- (g) In the event that a Safety Case(s) has been provided for a subsystem or equipment that has been approved by the City for the Existing Confederation Line that is to be supplied for this Project, with minor modifications to form, fit or function from the Existing Confederation Line, then DB Co shall perform the respective Safety analyses on the respective change/modification to the design. These analyses along with the respective approved Safety Case and a description of the change/modification shall be submitted to the City for approval to proceed. DB Co shall ensure the Project's SSCP is followed for the change/modification with the respective Safety evidence as well as the Cross-Acceptance criteria.
- (h) DB Co shall be responsible for performing the Safety Certification tasks as specified herein and in accordance with EN 50126, EN 50128, EN 50129. These tasks shall be managed and performed in accordance with the Project SSCP.
- (i) DB Co shall provide a SCM to develop and implement the Safety Certification processes. The SCM shall develop and implement the Safety Certification program to verify the inclusion of Safety items in the design, construction, testing, and commissioning of the Project. The SCM shall oversee and manage all aspects of the Safety Certification effort. The SCM shall be a Professional Engineer.

7.2 References

- (a) Develop and implement the System Safety and Assurance Program Plans in accordance with the following guidelines and documents. Where the referenced documents provided below, conflict with these specifications, these specifications shall govern:

7.3 System Safety Requirements

- (a) General
 - (i) DB Co's Safety program shall establish the Safety requirements and verify Safety of the design through analyses and collaboration with the various disciplines. This approach helps assure that the Work provides for health and Safety provisions affecting maintenance and operations personnel that equal or exceed the requirements of the Ontario OHSA and AODA.

(b) Safety Technical Requirements for Systems Design

- (i) Safety shall be DB Co's primary design and performance requirement for the Project. The Confederation Line Extension shall operate in a safe manner under all operating conditions. Safety components shall be designed according to the Safety principles (see below), and shall incorporate high Reliability parts, selective redundancy, and warning and protective devices, as required, to contribute to the achievement of the specified requirements. In addition, Safety shall be provided for when elements fail or malfunction.
- (ii) The Safety of the Confederation Line Extension, when operating under normal conditions, shall preclude inadvertent/incorrect actions and/or procedures used by operating personnel. In no case shall procedures be substituted to accomplish any Safety functions provided by specific aspects, components, Subsystems and/or equipment. Frequent and/or infrequent use shall not be a reason to justify unsafe or marginally safe design. At all other times (when carrying out maintenance and/or failure recovery), there shall be minimum dependence on correctness of actions and/or procedures used by operating and maintenance personnel.
- (iii) Whenever any hazardous condition occurs, regardless of the cause, and the condition results in a conflicting concern between human Safety and equipment Safety; the conflict shall be resolved in favour of human Safety.
- (iv) DB Co shall be responsible for designing, supplying, constructing, installing, testing and verifying and certifying the system in accordance with the requirements of the Project Agreement and the Safety principles customarily recognized by the transit industry for light rail systems. DB Co shall be responsible throughout the course of the Project for bringing to the attention of the City, in writing, any change in Laws, rules, orders, Regulations and Codes, and any condition(s), whether caused by its design, any Project Agreement requirement, or any other basis, which it believes might result in, or has resulted in, an unsafe condition. DB Co shall remain fully responsible for rectifying any such condition.

(c) Safety Principles

- (i) The following Safety principles shall be incorporated into the Design and operations of systems, Subsystems, components, and parts.
 - A. Hazard control shall follow the order of precedence:
 - i. Design to eliminate Hazards;
 - ii. design to control Hazards;
 - iii. use Safety devices;

- iv. use warning devices;
 - v. implement special procedures;
 - vi. accept the Hazard; and,
 - vii. eliminate the system/ subsystem/equipment.
- B. DB Co shall eliminate Unacceptable Hazards through design.
- C. DB Co shall design and construct the system to eliminate single-point failures in the system that result in an unacceptable or undesirable Hazard condition.
- D. DB Co shall design and construct the system to eliminate unacceptable or undesirable Hazard conditions under normal operating conditions.
- E. The system design shall require positive actions to be taken in a prescribed manner to either begin or continue system operation.
- F. The Safety of the system in the normal automatic operating mode shall not depend on the correctness of actions or procedures used by operating personnel.
- G. If one failure combined with a second failure can cause an unacceptable or undesirable Hazard condition, the first failure shall be detected and the system shall achieve a known safe state before the second failure can occur.
- H. Software faults shall not cause an unacceptable or undesirable Hazard condition.
- I. A failure on Safety Critical equipment shall be detected and reported back to Central Control.
- J. The criteria for accepting a Hazard risk level shall be in accordance with the Hazard Log provided by the City from Stage 1 and the Safety Management System.
- K. Maintenance activities required to preserve or achieve acceptable risk levels shall be performed. Personnel qualifications required to adequately implement these activities shall also be identified.
- L. Consideration at all times to the Safety of workers, Passengers and staff of the DB Co and the City.

- (ii) Two principles of Safety, a Fail Safe Principle and a Checked Redundancy Principle, shall govern the design of Safety Critical components and Subsystems. One or both of these principles shall be used to provide a safe Confederation Line Extension system. These principles are defined as follows:
 - A. Fail Safe Principle - The Fail Safe Principle applies to both hardware and software configurations, and states the occurrence of any failure of Safety Critical hardware or software, or any combination thereof, shall not result in a condition known to be unsafe. The Fail Safe Principle shall be applied where a failure of any critical element is likely to occur more than once in 10^6 (one million) hours of active service on the Confederation Line. For hardware this shall include, as a minimum, failure modes.
 - B. Checked Redundancy Principle - The Checked Redundancy Principle applies to both Safety Critical hardware and software configurations, and states that the probability of any failure or combination of failures that would result in a condition known to be unsafe shall pose no greater risk than that associated with Fail Safe design. In the event of a Failure, the Failure shall be detected, reported/alarmed and negated (maintain fail-safe state). Each function of a component or Subsystem designed in accordance with the Checked Redundancy Principle shall provide a level of Safety equivalent to that provided by the same function designed in accordance with the Fail Safe Principle.
- (iii) The checked redundant control configuration, whether hardware or software, shall incorporate at least two parallel control units processing a common system characteristic, and means of comparing the output of the control units. If there is agreement from the comparison, the system may be allowed to respond in accordance with the output of the control units. If there is disagreement, the action resulting from that output shall not occur, and the system shall immediately revert to a safe state. For example, if a Vehicle is in motion, the brakes shall be applied, and if the Vehicle is not in motion, it shall not be allowed to move.
- (iv) The following characteristics shall be incorporated into the checked redundancy design.
 - A. The checking process shall, in itself, be Fail Safe or checked redundant; "agreement" shall not be indicated unless the control units output agree.
 - B. The checking process shall include the comparison of control units related to Safety.
 - C. Any failure of redundancy affecting the Safety of the system shall be detected. Where software is used; errors in programming shall be considered failures.

- D. All parallel control units shall be completely independent. No common environmental or power fluctuations, errors, faults, or other problems, shall cause related errors in the output of the control units. Common software modes of failure shall be prevented by the following methods, or by similar methods, if approved:
 - i. Independent, different programming in the parallel control units.
 - ii. The use of logically complemented programs for the parallel elements of functions involving the ATP Subsystem.
- E. The checking process shall be comprehensive and as frequent as the number of operations of the device or function, to provide a risk comparable to that of Fail Safe design.
- F. Unless a comparative agreement occurs in the checking process, timely action shall intervene to provide Safety.

(d) SCIL

- (i) DB Co shall develop a preliminary SCIL. This list shall include all equipment involved in performing a Safety Critical function as determined by a Failure Mode, Effects and Criticality Analysis or functional Fault Tree Analysis. The SCIL shall be submitted to the City for approval and updated as required throughout the Project lifecycle. Relays certified as "vital" or Safety type shall have failure characteristics as defined by the AAR.

(e) System Safety Design Approach

- (i) Hazard Analyses have been performed by the City for the Existing Confederation Line. DB Co shall review the Hazard Log and take into consideration as a PHL. The Hazard resolutions shall be submitted to the City in accordance with Schedule 10 – Review Procedure.
- (ii) Additionally the Safety program shall be developed by DB Co to identify Hazards through the preparation of formal Hazard analyses which have been identified in the systems requirements for the specific system elements. The Hazards identified in the various analyses and the mitigation measures proposed will be reviewed and analyzed by the City for acceptance.
- (iii) DB Co shall be provided the Hazard Log from the Existing Confederation Line by the City for review and continued development for this Project based on DB Co's Hazard Analyses. DB Co shall track all identified Hazards throughout the Project and have the capability to provide status reports to the City and SSCRT for review.

- (iv) DB Co shall identify all Safety Critical functions and allocate the respective Safety Integrity Level of each with supporting analyses.
- (v) PHA: DB Co shall be responsible for identifying Hazards that are specific to the Confederation Line Extension which shall be included and analyzed independently from the City's Hazard Log developed for the Existing Confederation Line. Additional Hazards identified and subsequent analysis shall be compiled into an independent Hazard Log and submitted to the City for its review. DB Co shall address and incorporate applicable mitigations from the Confederation Line PHA into the design of the Project.
 - A. Mitigations shall include design considerations, Safety devices, warning devices or recommendations for adopting special procedures or training. The resolution process shall verify but not be limited to the following:
 - i. That the resolution of a Hazard in one system does not create a new Hazard in another system;
 - ii. That Hazards involving interfaces between two or more systems have been analyzed and resolved;
 - iii. That all program participants are providing required analyses in a timely manner, and that determination is made where delinquent receipt is delaying Hazard Resolution; and,
 - iv. That proper resolutions are implemented for areas identified with Hazard Resolutions requiring a change in system design or development of special procedures.
 - B. Any subsequent Hazard Analysis that may be required shall be performed in accordance with EN 50126 and the Hazard Management Procedure.
 - C. Mitigations shall be compiled into an independent Hazard Log that identifies Hazards and, proposed mitigations to those Hazards. All references shall state document, revision number, section and paragraph number.
- (vi) Perform additional Hazard analysis as deemed necessary and agreed to, by the City for, but not limited to, the following system elements:
 - A. Signaling and Train Control
 - B. Traction Power
 - C. Communications
 - D. Special Trackwork

- E. Electrical
- F. Elevators/Escalators
- G. FLS (Systems, including ventilation)
- (vii) Safety analyses techniques shall include, but may not be limited to:
 - A. System/Sub-System Hazard Analysis/Interface Hazard Analysis
 - B. Software Hazard Analysis
 - C. Failure Mode, Effects and Criticality Analysis
 - D. Fault Tree Analysis
- (viii) OHA: DB Co shall perform an OHA to identify and analyze Hazards associated with personnel and procedures during production, installation, testing, training, and Emergencies. DB Co shall provide for corrective measures to be taken to minimize the possibility that a human error or procedure will result in injury or system damage.

7.4 Development of Safety Design Criteria

- (a) DB Co shall prepare Safety Design Criteria and submit in accordance with Schedule 10 – Review Procedure at the commencement of the design effort to provide applicable Safety and Security guidelines for proper design, construction, and testing, of the system. The purpose for separate Design Criteria documents involves the control or restriction of information that due to its sensitive and confidential nature or content that may, if disclosed or released, identify vulnerabilities to critical infrastructures or systems. The separation of these documents allows for one criterion to be updated without impact to the other.
 - (i) The Safety Design Criteria shall be submitted within 120 days of Financial Close.
- (b) The Design Criteria shall ensure that the Safety elements identified for the Project will become part of requirements that shall be addressed by DB Co through the development of specifications, drawings, design reviews, and final acceptance.

7.5 Safety and Security Certification

- (a) DB Co's management responsibilities shall include, but are not limited to, the following:
 - (i) DB Co shall implement a Safety and Security Certification Program which shall be compliant with the City's System Safety Certification Plan and System Security Certification Plan, which shall ensure by verifying the inclusion of all Safety and Security items in the design, construction, and testing of the

Confederation Line Extension. An SSCRT, independent of the design activities, shall oversee the certification effort.

- (ii) DB Co shall utilize the SSCP developed by the City that describes and outlines the Project's Safety and Security Certification process which will be compliant to the City's SSCP. The SSCP developed by the City will describe roles, responsibilities, staffing, schedule and a description of the process, at a minimum. DB Co will be responsible to develop a project specific SSCP to describe how they will be compliant to the City's SSCP and provide a deliverable timeline in-line with the Project schedule.
- (iii) DB Co shall participate in meetings with the SSCRT, FLSSC and SSORC.
 - A. SSCRT:
 - i. Shall oversee DB Co's SSCP and SSeCP;
 - ii. Shall conduct meetings at a minimum of quarterly to discuss Safety and Security concerns;
 - iii. Shall review DB Co's certification activities; and,
 - iv. Shall consist of DB Co's SCM and SeCM to liaise with the SSCRT to report status, open items and Hazard, Threat and Risk management/resolution.
 - B. FLSSC:
 - i. DB Co shall ensure the respective Emergency response agencies are involved including Fire, Police, Emergency Responders, etc.
 - ii. The FLSSC shall be a liaison with respective City representatives and local authorities as defined by DB Co.
 - iii. The FLSSC shall review standards and Safety and Security related designs, tests to verify compliance with FLS codes and Emergency preparedness.
 - C. SSORC:
 - i. The SSORC shall review plans, manuals, rules and procedures necessary for Revenue Service operation.
- (iv) Cooperation and facilitation of Safety and Security Certification audits of the Work shall include.
 - A. Coordinating, documenting and performing training as specified in the Project Agreement.

- B. Maintaining and updating files and submitting required documentation on a timely and sequential milestone schedule basis. Preparing Safety and Security Certification progress reports each month, which shall include submitting a record copy of Safety and Security Certification files to the City.
- (b) DB Co's responsibilities are defined in Table 1-7.1 below. DB Co shall be responsible for the performance of the task activity identified in the SSCP and Safety Management System shall be followed when conducting the tasks below. This Table also includes the RAM deliverables described in Clause 7.8.

Table 1-7.1 - DB Co Deliverable Requirements by Project Phase

| PROJECT PHASE | EN 50126 LIFECYCLE PHASE | DB CO RAM TASKS | DB CO SAFETY TASKS |
|---------------------------------|---|--|--|
| PRELIMINARY / CONCEPTUAL DESIGN | 1. Concept | Review Project Agreement RAM requirements Evaluate past RAM data and experience Preliminary RAM Allocation | Review and update the City's Safety Certification Plan |
| | 2. System definition and application conditions | RAM Program Plan Preliminary RAM Allocation Establish RAM Assurance Plan, can be part of SSAP RAM Audits (Internal and 3 rd party) | SSAP Safety Audits (Internal and 3 rd party) SSPP Review, update and continue to develop the City provided Hazard Log from Existing Confederation Line |
| | 3. Risk Analysis | Preliminary identification of reliability critical items | SSAP Update System Preliminary Hazard Analysis System Risk Analysis Interface Risk Analysis Review and update Hazard Log Software Safety Plan |

| PROJECT PHASE | EN 50126 LIFECYCLE PHASE | DB CO RAM TASKS | DB CO SAFETY TASKS |
|--|---|--|---|
| DETAILED / FINAL DESIGN | 4. System Requirements | Capture RAM requirements in SRTM | Hazard Log update |
| | | Update RAM Program Plan, as required | Allocation of THR →SIL Function Apportionment |
| | | Update RAM portion of SSAP, as required | Update SSPP |
| | | RAM Demonstration Plan | Safety Verification and Validation Plan |
| | 5. Apportionment of System Requirements | RAM Allocation Report FMECA (Can be same as Safety provided it includes all information) Reliability Critical Items List Provide Lifecycle Costing for Operations and Maintenance period | Review/Establish Non-Conformance Procedures and Reports |
| | | | Safety Audits (Internal and 3 rd party) |
| | | | SSAP update * as required |
| | | | SSPP update * as required |
| | | | Software Safety Plan update * as required |
| | | | PHA |
| System Risk Analysis / Subsystem Risk Analysis | | | |
| Interface Risk Analysis | | | |
| OHA | | | |
| FMECA | | | |
| FTA | | | |
| Develop Safety Critical Items List | | | |
| IMPLEMENTATION | 6. Design and Implementation | RAM Prediction Report | Integrated System Safety Case |
| | | Review and update RAM portion of SSAP, as required | Update Hazard Analysis (Subsystem/Interface), OHA |
| | | | FMECA |
| | | | Test Plans and Procedures |
| | | | SIL Safety Function Assignment |
| T AND MANUFACTURING | 7. Manufacturing | Review First Article Inspection | Hazard Log Update |
| | | Maintainability Demonstration | Verification and Validation Report(s) |
| | | FRACAS Procedure | Assess Safety Related Training |
| | | | Operation and Maintenance Manuals |
| CONSTRUCTION AND INSTALLATION | 8. Installation | Spares List (with separate section for Safety Critical and reliability critical items) | SSAP Update |
| | | | Validation Report(s) |

| PROJECT PHASE | EN 50126 LIFECYCLE PHASE | DB CO RAM TASKS | DB CO SAFETY TASKS |
|--|----------------------------------|---|---|
| TESTING & COMMISSIONING | 9. System Validation | Review and update RAM Demonstration Plan as required RAM Demonstration Report FRACAS Report | System Safety Case System Test Reports Update OHA SRAC, as required Safety Audits (Internal and 3rd party) |
| | 10. System Acceptance | RAM Demonstration Report Acceptance by City for Revenue Operation | Hazard Log Update Engineering Safety and Assurance Case |
| HANDING OVER OPERATIONS AND MAINTENANCE OBJECTIVES | 11. Operation and Maintenance | Review and confirm acceptance of RAM Demonstration Report during Warranty Period (Monthly Report) FRACAS Report | Warranty FRACAS Review and update Hazard Log Review and Update Engineering Safety and Assurance Case Transfer and Implement SSAP for Operations Safety Audits (Internal and 3rd party) |
| | 12. Performance Monitoring | RAM Demonstration Report until Warranty Expiry and Acceptance by City Maintain FRACAS Report | No Safety deliverables required unless assumptions found to be invalid. |
| | 13. Modification and Retrofit | Assess RAM implications as required | Hazard Log Update Engineering Safety and Assurance Case Update as appropriate Update Operations and Maintenance Manuals |

7.6 Safety Activities

- (a) DB Co shall follow the SSCP, and Safety Management System when conducting the Safety activities listed in Table 1-7.1 above, along with the respective standards listed therein:
- (b) Witness point: Witness point selection is a City responsibility with the purpose of defining selected points or locations where the City wishes to formally witness testing. DB Co shall be responsible for scheduling and performing the tests that include those City-selected points; and, for notifying the City at least fourteen (14) business days in advance of the date and time of the test. Notification procedures shall be established prior to witness point testing, scheduling or performance. Selected areas shall include items of high risk, where concerns of compliance have been raised, or those selected by random

sampling. The City shall have the right to attend and witness any and all testing that takes place.

- (c) Safety-related tests: DB Co shall verify that Subsystems and systems function safely as specified and do not contain or create unforeseen Hazards. Safety-related tests cover both intra-discipline and integrated tests. All Safety-related tests shall be included in the Test Program Plan contained within its own section. The respective Safety-related tests and results shall be documented within Test Reports to provide Safety evidence for the respective Safety Case. Safety tests shall include, at a minimum:
- (i) An initial Safety-related testing conformance checklist shall be prepared for the design level of the Project Agreement documents. DB Co shall update the Safety-related testing conformance checklist and submit it for review. DB Co shall verify that all Safety-related tests identified in the specifications and other Project Agreement documents are successfully performed and the completed tests have been verified within defined test parameters and the systems and Subsystems function safely as specified, do not contain or create unforeseen Hazards or vulnerabilities, and contain specified Safety or Security features. All requirements on the checklists shall be verified and submitted to the City for review;
 - (ii) At a minimum, each of the identified Safety requirements for a Safety Critical items (unit) and respective Safety function shall be simulated and tested to verify and certify performance in normal modes and associated sequences and the failure modes and effects, as applicable. These tests shall demonstrate the Safety requirements stated herein have been met. Should the Safety testing identify any Safety issue, they shall be listed in the Safety test reports, indicating remediation and corrective action necessary. All remediation and corrective actions required by DB Co shall be completed within fourteen calendar days and documented in a Non-Conformance Report to ensure traceability. All remediation and corrective actions shall be completed prior to the completion of the Work and pre-revenue testing and training. DB Co shall audit all tasks.
 - (iii) Safety Testing Documentation - Safety testing shall be separately identified to allow recognition of Safety tests. DB Co shall include a matrix in the SVM (output from the Hazard Log), addressing Safety tests only, which shall receive the concurrence by signature of the responsible person as defined by DB Co's organization chart. The matrix shall identify Safety parameters and/or other Safety considerations and a cross-reference to the test. This matrix shall be kept current throughout the Project lifecycle and shall include the identification of the test reports which confirm verification of the Safety requirements. The references to the Safety tests along with reports shall be checked before every Safety Case submission to ensure that there have been no revisions or modifications.
 - (iv) Notification - DB Co shall notify the City in writing thirty calendar days prior to the start of any Safety or Security test. If any of the data indicate conditions which could potentially result in lack of proper Safety or protection of operations; DB Co shall immediately indicate proposed remedies and/or corrective actions.

- (v) Scheduling - All Safety tests shall be successfully completed by DB Co prior to system or equipment acceptance.
- (vi) Safety Test Reports - DB Co shall ensure test reports which contain Safety verifications shall receive the concurrence, by signature, of the responsible person, defined by DB Co's organization chart. Safety Test Reports must be attached to the respective Safety Case and referenced within the SVM to demonstrate compliance.
 - A. DB Co shall report any noncompliance/non-conformance with Applicable Codes and regulatory requirements noted as a result of Safety-related testing. All non-compliances shall be rectified in accordance with Applicable Codes and regulations.
- (d) Safety training and drills: DB Co is responsible for proper coordination and successful completion of this task. They shall participate and provide support as defined herein. The purpose of the training and drills verification process is to verify that key Safety-related training on new equipment and procedures is adequate and appropriate for the tasks performed under typical and Emergency conditions. DB Co shall schedule, arrange, invite participants, provide equipment, and set up locations for drills to occur. Where indicated elsewhere herein, DB Co shall also provide instructors to assist performing the training in both Safety and Security.
- (i) Verifying safe system operation through drills and exercises is an integral part of a closed-loop, pro-active System Safety process. The methodology employed by the training/drill/exercise process is to obtain written verification from the City that:
 - A. Training and drills are adequate and appropriate for the assigned task, and contain instructions on Safety features for typical and Emergency conditions;
 - B. Lessons learned from training and drills performed, are reviewed and documented and that additional Hazards, vulnerabilities, or open Safety issues identified have been resolved; and,
 - C. Known issues concerning training and drills, which impact Safety, have been satisfactorily resolved.
- (ii) Safety information on conformed methods and procedures necessary to maintain safe conditions shall be generated by DB Co and included in a Safety Training Program, to be provided by DB Co, for Safety training consideration of construction, operations and maintenance personnel. At a minimum, each of the Safety training requirements disclosed by the PHA and OHA shall be included in the training program and associated documents.

- (e) DB Co shall be responsible for establishing and maintaining a Hazard Log to record and track Hazards for resolution as addressed in the Hazard Analysis. The Hazard Log shall describe all identified Hazards, the measures taken to resolve each Hazard (references citing document, revision, section number) and the results of reviews, comments and approvals by the City and other outside agencies. All Hazards shall be tracked through to resolution. DB Co shall submit the most current copy of Hazard Log to the City for review upon request. After all tracked Hazards are resolved, DB Co shall prepare a SVM document and submit in accordance with Schedule 10 – Review Procedure.
- (f) FLS – DB Co shall be responsible for compliance with FLS requirements included in federal, provincial, local codes and regulations, and the Project Agreement. DB Co shall incorporate these requirements into the design and construction of the Project and include all applicable FLS elements in the appropriate SeRTM.
- (g) DB Co shall support the approval process by participating in reviews, inspections and technical discussions between the City and local jurisdictional authorities and other Governmental Authorities, and incorporating the resulting agreements into the design and construction. DB Co shall be responsible for verifying that DB Co's completed design complies with the resolutions of FLS issues, and is acceptable to the applicable Governmental Authorities.
- (h) Safety Certification Report (Engineering Safety and Assurance Case)
 - (i) A signed report shall be prepared by DB Co, prior to Confederation Line East Extension or Confederation Line West Extension Substantial Completion, attesting to the overall Safety and Security of the Confederation Line for public use. This shall include resolution to all non-conformance Hazards and vulnerabilities previously identified through DB Co's detailed Safety Analysis. Upon completion of the Work and pre-revenue testing and training, DB Co shall issue to the City and the SSCRT a signed and sealed Final Safety Certificate.
 - (ii) The signed Safety Certification Report shall certify to the City that the Work has been designed and constructed in accordance with the Project Agreement Safety requirements, and DB Co has used the Safety and Security principles customarily applied in the transit industry for transit systems in North America and Canada. The report shall further certify the Confederation Line Extension either meets or exceeds all applicable Federal, Provincial, City, and local Laws, Ordinances, rules, Regulations, Statutes, industry Codes, and other standards and requirements, whichever are the more stringent requirements.
 - (iii) As a basis for making this formal certification, DB Co shall perform a detailed accounting of all correspondence and documentation to verify and certify all Safety and Security requirements, activities, tests, inspections, non-conformances, remediation's and actions have been completed and satisfied, documenting these results in a Safety and Security Certification Report which shall be submitted to the City in accordance with Schedule 10 – Review Procedure.

7.7 Format for SSVM

- (a) DB Co shall provide an SSVM in the following format, noting that this shall be an output from the Hazard Log
 - (i) Item Number;
 - (ii) Safety Requirement;
 - (iii) Document Reference:
 - A. Document Name; and
 - B. Article Number;
 - (iv) Evidence:
 - A. Method of Verification by DB Co;
 - B. Method of Validation by Audit Team;
 - C. Validated By (Name of Auditor);
 - D. Date; and
 - E. Remarks.
- (b) SSRTM
 - (i) DB Co shall develop SSRTM for the Project as an output from the Compliance Verification and Validation Matrix. It shall be used to verify and certify that the Safety requirements have been incorporated in the design and certify that all Safety requirements of the design are constructed and/or installed and tested in accordance with the Project Agreement.

7.8 Reliability, Availability, Maintainability

- (a) System Assurance
 - (i) Introduction
 - A. The SSAP shall encompass system RAM. The primary objectives of system assurance are to ensure RAM, Safety and Quality plans, processes and procedures are followed, implemented and in-line with the PA and applicable regulations and standards.
 - B. The general design concepts which shall be incorporated are, but not limited to: use of standards, proven designs; reliable equipment, use of

interchangeable, modular components; extensive and prominent labeling of parts, wires, etc.; use of standard, prewired harnesses; use of weatherproof seals and latches.

- C. The systems assurance requirements are specified for specific system elements contract specifications. The DB Co shall develop and implement a system RAM Program encompassing system RAM engineering and meet quantitative RAM goals and requirements, which shall be demonstrated through analysis and test. The RAM requirements shall apply to all systems, Subsystems and assemblies, software, hardware and firmware provided for the Confederation Line Extension. The requirements apply during all phases of the Works.

(b) RAM Approach

- (i) DB Co shall follow, implement and meet RAM Program requirements including qualitative and quantitative requirements contained in the specific system elements requirements.
- (ii) Quantitative RAM goals/requirements shall be apportioned by the DB Co for Subsystems/equipment/components comprising the system elements. In addition to the quantitative goals to be met, the DB Co shall meet requirements defined for RAM Program Plan, specific analyses, RAM prediction, and RAM demonstration tests.

(c) RAM Program Plan

- (i) DB Co shall prepare a detailed RAM Program Plan in general accordance with applicable provisions of EN 50126-3. It shall include, at a minimum the following:
 - A. Description of the System;
 - B. RAM Requirements and critical items;
 - C. Task listing and time phasing for each task, including RAM deliverables as stated in Table 1-7.1.
 - D. Organization and responsibilities of key personnel, including the formation of a Failure Review Board.
 - E. Techniques for allocation of quantitative requirements to lower level functional elements.
 - F. Interfaces between RAM and other closely related programs, and support to efforts such as:
 - i. Logistic support and maintenance planning;

- ii. Design;
 - iii. Quality assurance and quality control;
 - iv. Standardization;
 - v. Systems engineering; and
 - vi. Personnel Subsystem program (human engineering, life support, training, and personnel resources).
- G. Methods for assuring that sub-contractors' RAM efforts are consistent with overall system requirements.
- H. Provision for source selection, first article inspection, and surveillance of sub-contractor's' RAM activities.
- I. Analytical methods to be used during design and development for demonstrating compliance with RAM requirements and goals.
- J. Procedures and controls, including piece part selection and screening, manufacturing process controls, procurement controls, and test procedures, to be utilized during production to ensure achievement of RAM requirements.
- K. Provisions to evaluate design changes for possible effects upon Subsystem and functional level requirements and goals.
- L. Description of Failure management and collection.
- (ii) DB Co shall follow, implement and meet Maintainability requirements such that for each system element and its constituent equipment, it shall be designed to permit ease of access for maintenance. Maintenance personnel shall have access to perform all maintenance functions, including failure location and isolation, disassembly and reassembly, removal/replacement, and repair as well as routine inspection/testing. The installation, maintenance, removal and replacement accessibility requirements for all serviceable equipment shall be coordinated and demonstrated. Equipment access ways, lifting eyes and other needed equipment accessibility features shall be provided.
- (iii) Quantitative Maintainability goals/requirements shall be apportioned by the DB Co for system elements within its scope. In addition to the quantitative goals to be met, the RAM Program Plan shall address Maintainability analyses, predications, and demonstration tests.
- (iv) DB Co shall develop the design of the SI in a way that considers maintenance of the assets through industry-standard maintenance practice. DB Co shall ensure

that no design element shall result in a gross (non-industry-standard) inefficiency in the delivery of the maintenance services for the SI.

- (d) Maintenance Approach - Develop a maintenance concept as part of the Operation and Maintenance Manuals taking the following into considerations:
 - (i) System parameters as specified above.
 - (ii) Maintenance Assumptions:
 - A. Troubleshooting and repair shall be done by an individual with a high school graduation, and who has had 2 years of relevant qualifying technical school training and 2 years of experience; has attended the maintenance training programs at a minimum.
 - B. Spare parts recommended by the DB Co will be available.
 - C. Maintenance will be performed at three discrete levels: on-line, off-line, and bench.
 - i. On-line maintenance is that performed on an in-place and operational equipment element. Test points or built-in indicators shall facilitate identification of interfaces with other system elements. On-line maintenance shall not disrupt service.
 - ii. Off-line maintenance is that performed on in-place but out-of-service equipment elements.
 - iii. Bench maintenance is that which is performed on out-of-place and service equipment elements. This maintenance is to be performed in a shop area where standard test equipment and fixtures are available. Test equipment and procedures shall allow maintenance to the lowest pluggable component part level.
 - (iii) The maintenance concept shall define the repair, corrective, and preventive maintenance program plans, policies, and support requirements for all equipment supplied under this Contract. It shall:
 - A. Minimize each level of maintenance consistent with the specification requirements and system Reliability goals.
 - B. Recommend policies and practices which ensure that, at the time of a failure, qualified maintenance personnel will be promptly notified and will have the necessary documentation, tools, test equipment, and spare parts to affect the repair in a minimum of time.
 - (iv) The maintenance concept shall develop recommendations for:

- A. Depth and frequency of maintenance requirements at each level;
- B. Facilities required;
- C. Support equipment and tools required;
- D. Skill levels and numbers of personnel required;
- E. Subsystem, component, and piece part repair policy; and
- F. Detailed fault isolation and troubleshooting procedures, diagnostic equipment, and special test equipment.

(e) Maintainability Design Features

(i) The Subsystems and components shall incorporate the following design features:

- A. Accessibility: All routinely serviced Subsystems and components shall be readily accessible for service and inspection. Accessibility of components shall be proportional to frequency of maintenance and repair. No active electrical or mechanical components that can foreseeably require maintenance shall be structurally embedded to preclude convenient access for repair or replacement.
- B. Modular Design: Modular design principles shall be employed to the greatest extent practicable. Components shall be packaged together in replaceable subassemblies according to the logical function that they perform. Components or subassemblies requiring occasional removal shall preferably be plug-in units.
- C. Interchangeability: Assemblies or components that are functionally interchangeable shall be physically interchangeable. Assemblies or components that are not functionally interchangeable shall not be physically interchangeable.
- D. Adjustments: The need for adjustments shall be avoided. Where adjustment points cannot be avoided, they shall be readily accessible, adequately identified, and self-locking to prevent inadvertent adjustment or drift.
- E. Special Tools: The number of special tools required for maintenance and repair shall be minimized. However, if they are required, they shall be defined and furnished in a quantity determined as part of the Work of this Contract.
- F. Panels and Openings: Panels and openings shall be of sufficient quantity, size, and placement to permit ready access from normal work areas and positions. Adjustment controls, fittings, and such, shall be directly

accessible through panels and openings. Self-retaining fasteners shall be used wherever possible. Special access opening tools shall not be used unless considered necessary to prevent vandalism.

- G. Cable Connections: Cable connectors shall be spaced far enough apart so that they can be grasped firmly for connecting and disconnecting. Connectors shall be properly labeled and keyed so that they cannot be interchanged or improperly installed. Signal and power pins shall not be adjacent.
- H. Lifting Assists: Handles, lifting lugs, or reviewed functional equivalents shall be provided on components of 18 kg (40 lbs) or more.
- I. Visual Inspection: Visual inspection of equipment shall be unobstructed.
- J. Test Points: Built-in test points shall be provided and marked. Major components having test panels or test points shall be located for easy accessibility and shall permit external monitoring of critical functions. Test points shall be protected against environmental damage and human error.
- K. Fault Isolation: Failure indicators shall be provided and identified. Systematic fault isolation procedures shall be developed and included in the maintenance manuals.
- L. Labeling: All test points, fault indicators, modules, wire junctions, pipes, tubes, wires, etc., shall be identified by name plates, color coding, number coding, or other means to assist maintenance personnel. All ROMs, PROMs, and EPROMs shall be labeled with the version and date of stored software.
- M. Hardware: Standard, commercially available industrial components and hardware shall be used wherever possible.
- N. Vandalism: The use of vandal and damage resistant materials shall be used whenever possible.

(f) Preventive Maintenance Plan

- (i) DB Co shall develop and submit a detailed Preventive Maintenance Plan as part of each Operation and Maintenance Manual based upon the maintenance concepts and established Maintainability requirements. The Preventive Maintenance Plan shall provide all preventive maintenance tasks needed to maintain each Subsystem/equipment, supplied under this Contract, as close as possible to new condition. The preventive maintenance task analysis shall include all servicing, inspections, scheduled overhaul, or any task required on a scheduled basis. The elapsed time to perform specific

tasks shall be defined in the analysis, and in maintenance and servicing manuals. All tasks will be sorted and grouped by time interval (ex. daily, weekly, monthly, etc.), as well as by Subsystem.

- (ii) In addition to preventive maintenance tasks recommended by equipment manufacturers to enhance the Reliability/Availability of their equipment, many Safety Critical preventive maintenance tasks will be required as a means of detecting Safety-significant latent failures, which would otherwise remain latent until another subsequent failure resulted in a potentially hazardous event. The Safety Critical preventive maintenance tasks are a direct result of performing Safety analyses on all required Subsystems. The DB Co shall use a clear and deliberate method to identify all Safety Critical preventive maintenance tasks in the Preventive Maintenance Plan.
- (g) DB Co shall apportion and allocate availability, MTBF, MTBSAF and MTTR values as applicable to the various systems elements and Subsystems using a reliability block diagram model, which shall support and meet the top level RAM goals/requirements. DB Co may use the beneficial effects of redundancy and repair rate (repair rate= reciprocal of MTTR) to reduce the effective Failure frequency and thus increase the effective MTBF of system elements and Subsystems due to equipment redundancy, and the ability to repair one failed unit in time before the second (redundant) unit fails. DB Co shall demonstrate through analysis and testing that the apportioned Availability/MTBF values which support the top level inherent Reliability/Availability are achievable and the equipment shall demonstrate such Availability/MTBF through analysis and testing.
- (h) MTBF shall be calculated as the total number of equipment operating hours for the entire population of like items, divided by the number of failures requiring unscheduled corrective maintenance action anywhere within the said population of items during said total accrued operating hours by said population of items. A Failure, in redundant system, shall be defined as loss of function. The function shall not be deemed “lost” until all the redundant items in the “cut-set” of redundant items have failed. Thus the DB Co shall benefit from the effects of redundancy and repair rate to reduce the effective failure frequency of the system/Subsystems (i.e., increase the effective MTBF) due to redundancy in configuration. Also, scheduled preventive maintenance to inspect/ repair/ replace items during non-revenue-service hours, shall not be considered chargeable failure for MTBF calculation.
- (i) RAM Prediction Report
 - (i) DB Co shall submit a RAM Prediction Report to demonstrate its proposed equipment will meet RAM goals/requirements. DB Co shall not furnish any equipment until calculations or data is approved by the City.
 - (ii) Reliability calculations shall use reliability block diagram, reliability model, probability of success equation, and preventive maintenance strategies to achieve required MTBF. Substantiated field data, Electronic Parts Reliability Data – 2014,

Non-Electronic Parts Reliability Data – 2017 and RIAC Handbook 217Plus shall be used for reliability data in order of precedence. Any assumptions made shall be documented in the RAM Prediction Report, as a minimum shall include de-rating factors for environment, temperature, application and stress and redundancy configurations for MTBSAF calculations, as applicable

- (iii) DB Co may propose alternate method of calculating Reliability, such as providing service records for proven equipment, provided DB Co can demonstrate similar function and environmental conditions, for approval by the City.
 - (iv) DB Co shall conduct a Maintainability analysis to be included within the RAM Prediction Report to ensure the Maintainability requirements listed herein have been achieved. DB Co shall follow IEC 60706 in general accordance.
- (j) RAM Demonstration Plan and Report:
 - (i) DB Co shall develop a RAM Demonstration Plan outlining the equipment to be tested, acceptance criteria and test conditions to be applied. DB Co shall submit to the City for review and approval.
 - (ii) During testing and commissioning, DB Co shall provide the City a RAM Demonstration Report outlining the performance of the System in accordance to the RAM Demonstration Plan for review and acceptance.
 - (iii) DB Co shall review monthly reports throughout the Warranty Period to ensure the RAM requirements are being met.
- (k) FRACAS Procedure and Report
 - (i) DB Co shall develop a FRACAS program and submit to the City for review and approval. The program shall outline the organization in place to support the program and the approach taken by DB Co to detect, collect, diagnose and correct the respective failure as a minimum.
 - (ii) DB Co shall develop and submit to the City, on a monthly basis starting at testing and commissioning and ending upon receipt from the City the end of the Warranty Period, a detailed FRACAS Report, indicating all system element failures to the Lowest Line Replaceable Unit by subsystem, corrective actions to be implemented and work orders traced to the respective corrective action, identification of any pattern failures and a summary of the most frequent failing elements.
- (l) FMECA
 - (i) DB Co shall provide to the City for review and approval a FMECA following EN 60812. The FMECA shall identify each respective RAM Failure Category. DB Co

may submit a single FMECA for RAM and Safety provided the respective criticalities are defined for each.

(m) RAM Failure Category

- (i) Significant Failure: A failure that prevents Train movement or causes a delay to service greater than an operating headway in effect.
- (ii) Major Failure: A failure that must be rectified for the rolling stock to achieve its specified performance and does not cause a delay to service more than a headway in effect.
- (iii) Minor Failure: Any failure of equipment and that of which does not meet the criteria of Major or Significant.

(n) RAM Measurement Methodology

- (i) MTBF: All failures that are attributed to all RAM Failure Categories. Failures which involve No Fault Found and Nothing To Report shall be tracked via the FRACAS program.
 - A. MTBF (hours): $\text{Operating Hours in Period} / \Sigma \text{ All failures (Minor, Major, Significant)}$
- (ii) MTBSAF: applies to the RAM Failure Category of Significant.
 - A. MTBSAF (hours): $\text{Operating Hours in Period} / \Sigma \text{ Significant Failures}$
- (iii) MTTR: shall be calculated for equipment elements as defined as either an LRU or LLRU. All elements defined with the same part number or piece of equipment performing the same function within the failed unit shall be used for the calculation. Note the MTTR shall be calculated for all in-service corrective maintenance and out-of-service corrective maintenance
 - A. MTTR (hours): $\text{Cumulative Repair Time for the respective element over the sampling Period} / \text{Number of Work Orders for the respective element}$

(o) RAM Targets:

- (i) RAM Targets are defined in Schedule 15-2, Part 3 - Systems. The RAM targets specified therein shall be demonstrated by DB Co. If DB Co is not able to meet the specified RAM targets, justification and evidence shall be provided for approval by the City.

ARTICLE 8 SECURITY AND EMERGENCY MANAGEMENT

8.1 General Security and Emergency Management Requirements

- (a) The Work specified in this Article consists of the development and implementation of a Security and Emergency Management requirements. Requirements for physical and cyber security and Emergency preparedness of City ESP are integral part of this Project. These security and Emergency preparedness requirements shall apply to all DB Co functions during all phases of the Work including design, construction, installation, testing, pre-revenue operations, in-service support, warranty, retrofits and field modifications. As well, DB Co shall ensure Security is considered in the development and implementation of the plans, training and supporting documentation including the development and implementation of a SSAP. The purpose of the SSAP is to ensure the Project Facilities, systems and equipment are as secure as reasonably possible including:
- (i) Design and operating security vulnerabilities are identified, evaluated, and properly controlled or mitigated, prior to the commencement of Passenger service.
 - (ii) All Critical system elements are evaluated for compliance with the identified security requirements during the design, conform to the drawings and specification during construction/installation, and function as required during testing, and start-up phases of the Project.
 - (iii) The Project is operationally secure for customers, employees, ESP, and the general public prior to entering Revenue Service.
 - (iv) All Project equipment, Facilities, plans, procedures, and training programs are systematically reviewed for compliance with established system Security requirements, and so verified prior to implementation of Revenue Service.
- (b) Objectives: The primary mission of the Confederation Line Extension is to provide the City with a safe, secure, reliable, and attractive public rail transportation system. As such, the Confederation Line Extension shall incorporate security values that affect all levels of the Confederation Line Project activities including; the planning, design, procurement, construction, testing, commissioning, and operations and maintenance. The primary objective is to deliver a Project that meets or exceeds Security and Emergency preparedness-related governmental rules, regulations, standards and industry best practices, and applicable requirements throughout the Project. DB Co personnel, consultants, and contractors associated with the Project are charged with the responsibility to deliver a secure system for the City, its employees, customers, and public at large as well as ensuring ESP are ready to respond to Emergency events through formal training and documentation development.
- (c) The Work shall be accomplished by incorporating Security design features, facilitating Emergency response training drills (which will include on site (Guideway and Stations) and on-Train familiarization sessions, in classroom instructions, tabletop exercises and live exercises using Train, Stations, Guideway and maintenance Facilities) and

implementing contractual training for the safe and efficient handling of both normal and Emergency conditions. The design of the Project shall include provisions to enable safe and timely evacuation of Passengers and personnel from all fixed Structures, disabled Vehicles and Facilities. The provisions shall also include necessary safeguards to protect Passengers, personnel and ESP during evacuation and shall minimize exposure to all Hazards, including those due to moving Vehicles and potential falls, weather issues and vulnerabilities due to intentional acts.

- (d) The Project design shall be compliant with Security criteria, codes, and regulations and the Duty to accommodate security requirements of passengers and employees as the most important requirement of the Project.
- (e) DB Co shall be responsible for compliance with the Project's SSeCP developed by the City through strict conformance to contractual obligations. DB Co shall manage its Work and that of its Subcontractors' through design, construction and integrated testing in such a way as to support the overall success of the Security certification process and the ultimate acceptance by the City.
- (f) At the City's request, DB Co shall support the City in the review and update the current ERP to reflect elements of the new SI. DB Co's support to updating the ERP shall be timely and in accordance with the City's schedule.
- (g) The ERP shall be modified, revised or changed, as appropriate, to address specific issues, needs, threats, Hazards, vulnerabilities, or concerns, including those identified in the Threat Log, Risk Log, PHA, Risk Assessment, Hazard analysis and FMECA related to the new SI developed during the Project Term.
- (h) It is understood that the updated ERP shall be incorporated into the City of Ottawa Emergency Response Plan, and the Province of Ontario PERP.
- (i) DB Co shall be responsible for performing Security Certification tasks as specified herein in accordance with U.S. Department of Transportation, Federal Transit Administration's Handbook for Transit Safety and Security Certification, Final Report, November 2002; FTA-MA-90-5006-02-01. These tasks shall be managed and performed in accordance with the Project SSeCP.
- (j) DB Co shall provide a SeCM to develop and implement the Security Certification processes. The SeCM shall develop and implement the security certification program to verify the inclusion of Security items in the design, construction, testing, and Commissioning of the Project. The SeCM shall oversee and manage all aspects of the security certification effort.

8.2 References

- (a) Develop and implement the Security and Emergency Preparedness Plans, documentation and training in accordance with the following guidelines and documents. Where the

referenced documents provided below, conflict with these specifications, these specifications shall govern:

- (i) For Security: Handbook for Transit Safety and Security Certification, Final Report, November 2002; DOT, FTA-MA-90-5006-02-01.
- (ii) Public Transportation System Security and Emergency Preparedness Planning Guide, January 2003, Final Report, U.S. DOT, FTA, DOT-VNTSC-FTA-03-01.
- (iii) Transit Security Design Considerations, Final Report, November 2004, US DOT, FTA, DOT-VNTSC-FTA-05-02.
- (iv) CPTED principles, City of Ottawa, Urban Design, A Reference Guide to Creating Great Places and Great Spaces, Planning, Transit and the Environment, Publication #2103, Summer 2007.
- (v) NFPA 130.
- (vi) ASIS International security strategies and procedures.
- (vii) Transport Canada Rail Codes of Practice for Rail and Transit Operations.
- (viii) Pathway Lighting Policy, City of Ottawa Policy on Lighting Pathways.

8.3 Security and Emergency Response Principles

- (a) The following security and emergency response principles shall be followed in the Design and development of security plans and procedures, emergency responder training and overall Emergency Responder preparedness.
- (b) Security: The three fundamental principles of security are:
 - (i) Confidentiality: The principle of Confidentiality means that the System's operational and management control assets can be accessed only by authorized parties
 - (ii) Integrity: The principle of integrity means that the System's operational and management control assets can only be modified or changed by authorized parties in authorized ways
 - (iii) Availability: The principle of availability means that the System's operational and management control assets should be available to authorized parties at all times.
- (c) Emergency response principles include:
 - (i) Emergency response procedures shall be designed and developed to align with industry accepted principles and follow the current City emergency response protocols;

- (ii) Emergency Responder Systems training shall include access, familiarization sessions and tours, and operation of Safety, security and Emergency response systems;
 - (iii) Emergency response training and familiarization shall consider City Protocols for escalation of emergency events;
 - (iv) Emergency response procedures shall account for changes to the threat as outlined in the Threat Log and Risk Log; and,
 - (v) Emergency response shall be validated through tabletops and a full scale exercises.
- (d) Emergency response shall consider the Safety of City ESP at all times.

8.4 Development of Security Design Criteria

- (a) DB Co shall prepare Security Design Criteria at the commencement of the design effort to provide applicable Security guidelines for proper design including CPTED, construction, testing, and preparation of the operation of the security systems. The purpose for Design Criteria documents involves the control or restriction of information that due to its sensitive and confidential nature or content that may, if disclosed or released, identify vulnerabilities to critical infrastructures or systems. The separation of these documents allows for one criterion to be updated without impact to the other.
- (b) The Design Criteria shall ensure that the Security elements identified for the Project will become part of requirements that shall be addressed by DB Co through the development of specifications, drawings, design reviews, and final acceptance. These security elements include where appropriate, and to meet the requirements as identified in the Threat Log and Risk Log:
 - (i) Perimeter fencing;
 - (ii) Alarms;
 - (iii) Fare gates;
 - (iv) Security laminates;
 - (v) CCTV cameras
 - (vi) PA systems;
 - (vii) Security signage;
 - (viii) Intrusion detection;
 - (ix) Locks;

- (x) Key control;
 - (xi) Roll down coiling grills;
 - (xii) Blast mitigation;
 - (xiii) Vehicular barriers;
 - (xiv) Security lighting; and
 - (xv) Cyber protection for IT and SCADA systems.
- (c) The Security Design Criteria shall be submitted within 150 days of Financial Close.

8.5 Security Design Approach

- (a) DB Co shall follow the Security Management System when designing and developing the Security Plan and Procedures. As outlined Schedule 15-2, Part 1, Article 10, there is a requirement to develop and implement a systematic, explicit, and comprehensive process for managing security risks. DB Co will develop a System Security Plan to support security integration.
- (b) The Security Design Approach shall be founded in the TVA and Risk Assessment. As such, DB Co shall review, update and continue to develop the City-provided TVA from Existing Confederation Line. DB Co shall be responsible for identifying threats and vulnerabilities that are specific to the Confederation Line Extensions which shall be included and analyzed independently from the City's TVA and Threat Log and Risk Log. Throughout the Project, DB Co shall develop and maintain an updated TVA to identify, mitigate, and/or control threats and vulnerabilities that might arise from design and operational deficiencies associated with the Project. Additional threats and vulnerabilities identified and analyzed shall be submitted to the City in accordance with Schedule 10 – Review Procedure.
- (c) Specific Security requirements for Confederation Line Extension facilities or the supporting systems will be based on a Risk Assessment that is conducted by DB Co. during the earliest stages of the Project and documented within the Risk Log. DB Co shall address and incorporate applicable mitigations identified by the Confederation Line Extension TVA and Risk Assessment as outlined at Schedule 10 – Review Procedure. Mitigation of security physical and cyber threats are to apply to the following:
- (i) Train Control;
 - (ii) Maintenance Storage Facilities;
 - (iii) Confederation Line Extension Stations;
 - (iv) Guideway;

- (v) Tunnel;
 - (vi) Control centres;
 - (vii) Fare collection;
 - (viii) IAC;
 - (ix) CCTV System;
 - (x) OCS and
 - (xi) Vehicle.
- (d) Mitigations shall include design considerations, security devices, warning devices or recommendations for adopting special procedures or training. These mitigations shall consider an integrated security approach, CPTED principles and security defence in depth. The resolution process shall verify the following:
- (i) That the resolution of a threat or vulnerability in one system does not create a new one in another system;
 - (ii) That threats or vulnerabilities involving interfaces between two or more systems have been analyzed and resolved;
 - (iii) That all program participants provide required analyses results in a timely manner, and that determination is made where delinquent receipt is delaying vulnerability resolution; and,
 - (iv) That proper resolutions are implemented for areas identified with vulnerability mitigations requiring a change in system design or development of special procedures or additional training for ESP or City staff.
- (e) The TVA methodology and the Risk Assessment process of identifying the likelihood of occurrence and the severity of impact shall be applied and performed in accordance with Public Transportation System Security and Emergency Preparedness Planning Guide, January 2003, Final Report, U.S. DOT, FTA, DOT-VNTSC-FTA-03-01.
- (f) Mitigations shall be compiled into an independent Threat log and Risk Log that identifies threats, vulnerabilities and among other things, proposed mitigations to vulnerabilities.
- (g) The criteria for accepting a threat Risk level shall be in accordance with the TVA provided by the City from the Existing Confederation Line and the Security Management System
- (h) Document confidentiality and control. The TVA, the Threat Log, Risk Log and the information contained within the documents shall be confidential, restricted and controlled to only those people with the need to know and access the information therein.

DB Co shall establish controls and criteria for accessing the documents and information. When no longer necessary, the documents shall be destroyed beyond reconstruction or recognition.

8.6 Security Certification

- (a) DB Co's management responsibilities shall include, but are not limited to, the following:
- (i) DB Co shall implement a System Security Certification Program which shall be compliant with the City's SSCP, which shall ensure by verifying the inclusion of all Security items in the design, construction, and testing of the Confederation Line Extension. The SSCRT shall oversee the certification effort.
 - (ii) DB Co shall utilize the SSeCP developed by the City that describes and outlines the Project's Security Certification process which will be compliant to the City's SSeCP. The SSeCP developed by the City will describe roles, responsibilities, staffing, schedule, deliverables and a description of the process, at a minimum. DB Co will be responsible to develop a project specific SSeCP to describe how they will be complaint to the City's SSeCP and provide a deliverable timeline in-line with the Project schedule.
 - (iii) DB Co shall participate in meetings with the SSCRT, FLSSC and SSORC.
 - (iv) Cooperation and facilitation of Security Certification audits of the Work shall include.
 - A. Coordinating, documenting and performing training as specified in the Project Agreement.
 - B. Maintaining and updating files and submitting required documentation on a timely and sequential milestone schedule basis. Preparing Security Certification progress reports each month, which shall include submitting a record copy of Security Certification files to the City.
- (b) DB Co's responsibilities are defined in Table 1-8.1. DB Co shall be responsible for the performance of the task activity identified in Table 1-8.1. The SSeCP and Security Management System shall be followed when conducting tasks below:

Table 1-8.1

| PROJECT PHASE | EN 50126 LIFECYCLE PHASE | DB CO SECURITY TASKS |
|---------------------------------|--|--|
| PRELIMINARY / CONCEPTUAL DESIGN | 1. Concept | Review and update the City's Security Certification Plan |
| | 2. System definition and application conditions | SSAP |
| | | Security Audits (Internal and 3 rd party) |
| | | SSePP |
| | | Review, update and continue to develop the City-provided TVA from Existing Confederation Line |
| | 3. Risk Analysis | SSAP Update |
| | | System Risk Analysis |
| | | Interface Risk Analysis |
| | | Review and update TVA |
| | | Cybersecurity Assessment and Management |
| | | Review and update Threat Log and Risk Log |

| PROJECT PHASE | EN 50126 LIFECYCLE PHASE | DB CO SECURITY TASKS |
|-------------------------------|---|--|
| DETAILED / FINAL DESIGN | 4. System Requirements | Threat Log and Risk Log Review and Update Update SSeCP Security Audits (Internal and 3 rd party) |
| | 5. Apportionment of System Requirements | SSAP Update SSeCP update *as required System Risk Analysis / Subsystem Risk Analysis Threat Log and Risk Low Review and Update Cybersecurity Assessment and Management Review and Update |
| IMPLEMENTATION | 6. Design and Implementation | Emergency Preparedness (Preliminary) Test Plans and Procedures |
| TESTING AND MANUFACTURING | 7. Manufacturing | Threat Log and Risk log Review and Update Verification and Validation Report(s) Assess Security Related Training Operation and Maintenance Manuals |
| CONSTRUCTION AND INSTALLATION | 8. Installation | SSAP Update Validation Report(s) |
| TESTING & COMMISSIONING | 9. System Validation | Security Audits (Internal and 3rd party) |
| HANDING OVER | 10. System Acceptance | Threat Log and Risk Log Update Transfer and Implement SSAP for Operations |
| MAINTENANCE OR DEFECT | 11. Operation and Maintenance | Review and update Threat Log and Risk Log Update Operations and Maintenance Manuals Security Audits (Internal and 3rd party) |

8.7 Security Activities and System Testing

- (a) DB Co shall follow the Security Management System when conducting the Security activities, listed in Table 1-8.1 above, along with the respective standards listed therein. The agreed-upon design countermeasures identified within the 2013 Threat Vulnerability Assessment and the corresponding Threat Log and Risk Log shall be incorporated.
- (b) Security Review Documentation - DB Co shall include a matrix in the SeVM (output from the Threat Log and Risk Log) addressing Security tests, which shall receive the concurrence by signature of the responsible person as defined by DB Co's organization chart. The matrix shall identify Security parameters and/or other Security considerations and a cross-reference to the test following the Review Procedure outlined at Schedule 10. This matrix shall be kept current throughout the Project lifecycle and shall include the identification of the test reports which confirm verification of the Security requirements.
- (c) Security Systems - DB Co shall comply with the security requirements to support systems as outlined in the references below:
 - (i) LRT Systems Design Submission— Schedule 3 Part 1 Tech Sub Requirements;
 - (ii) PA system broadcast – Schedule 15-2, Part 3, Article 4;
 - (iii) CCTV System – Schedule 15-2, Part 3, Article 7;
 - (iv) Signaling and Control System – Schedule 15-2, Part 3, Article 10;
 - (v) Traction Power System – Schedule 15-2, Part 3, Article 13;
 - (vi) Overhead Contact System – Schedule 15-2, Part 3, Article 14.
- (d) System Security Certification Process – DB Co shall conduct system security certification process using a minimum of the five steps outlined below:
 - (i) Identification of Certifiable Elements and Sub-Elements;
 - (ii) Identification of Security Requirements for each Certifiable Element and Sub-Element;
 - (iii) Verification and/or validation of Security Requirements;
 - (iv) Tracking, review, update and documentation of certification tasks in Security Certification Checklists; and,
 - (v) Issuance of Certification for Certifiable Element or Sub- Element's conformance to all associated Security Requirements
- (e) Witness point: Witness point selection is a City responsibility with the purpose of defining selected points or locations where the City wishes to formally witness testing.

DB Co shall be responsible for scheduling and performing the tests that include those City-selected points; and, for notifying the City at least 14 Business Days in advance of the date and time of the test. Notification procedures shall be established prior to witness point testing, scheduling or performance. Selected areas shall include items of high risk, where concerns of compliance have been raised, or those selected by random sampling. The City shall have the right to attend and witness any and all testing that takes place.

- (f) Security systems tests: DB Co shall verify that Security systems function in accordance with promulgated specifications. All security systems tests shall be included in the Test Program Plan contained within its own section. The respective security systems tests and results shall be documented within Test Reports. Security systems tests shall include, at a minimum:
- (i) An initial security systems testing conformance checklist shall be prepared for the design level of the Project Agreement documents. DB Co shall update the security systems testing conformance checklist and submit it for review. DB Co shall verify that security systems tests identified in the specifications and other Project Agreement documents are successfully performed and the completed tests have been verified within defined test parameters and the systems and Subsystems function safely as specified, do not contain or create unforeseen vulnerabilities, and contain specified Security features. All requirements on the checklists shall be verified and submitted to the City for review;
 - (ii) At a minimum, each of the identified security requirements for a security system shall be simulated and tested to verify and certify performance in normal modes and associated sequences and the failure modes and effects, as applicable. These tests shall demonstrate the security systems requirements stated herein have been met. Should the security systems testing identify any issue, they shall be listed in the security systems test reports, indicating remediation and corrective action necessary. All remediation and corrective actions required by DB Co shall be completed within fourteen calendar days and documented in a Non-Conformance Report to ensure traceability. All remediation and corrective actions shall be completed prior to the completion of the Work and pre-revenue testing and training. DB Co shall audit all tasks.
 - (iii) Security Systems Testing Documentation - Security Systems testing shall be separately identified to allow recognition of security systems tests. DB Co shall include a matrix in the SeVM (output from the Threat Log and Risk Log), addressing security tests only, which shall receive the concurrence by signature of the responsible person as defined by DB Co's organization chart. The matrix shall identify security parameters and/or other considerations and a cross-reference to the test. This matrix shall be kept current throughout the Project lifecycle and shall include the identification of the test reports which confirm verification of the security requirements. The references to the Security Systems tests along with reports shall be checked before every submission to ensure that there have been no revisions or modifications.

- (iv) Notification - DB Co shall notify the City in writing thirty calendar days prior to the start of any security systems test. If any of the data indicate conditions which could potentially result in lack of proper protection of operations, DB Co shall immediately indicate proposed remedies and/or corrective actions.
- (v) Scheduling - All Security tests shall be successfully completed by DB Co prior to system or equipment acceptance.
- (vi) Security Test Reports - DB Co shall ensure test reports which contain verifications shall receive the concurrence, by signature, of the responsible person, defined by DB Co's organization chart. Security Systems Reports must be referenced within the SeVM to demonstrate compliance.
 - A. DB Co shall report any non-compliance/non-conformance with Applicable Codes and regulatory requirements noted as a result of security systems testing. All non-compliances shall be rectified in accordance with Applicable Codes and regulations.
- (g) Security training and drills: DB Co is responsible for proper coordination and successful completion of this task. They shall participate and provide support as defined herein. The purpose of the training and drills verification process is to verify that key security systems training on new equipment and procedures is adequate and appropriate for the tasks performed under typical and Emergency conditions. DB Co shall schedule, arrange, invite participants, provide equipment, and set up locations for drills to occur. Where indicated elsewhere herein, DB Co shall also provide instructors to assist performing the training in Security.
- (i) Verifying security system operation through drills and exercises is an integral part of the Security Systems process. The methodology employed by the training/drill/exercise process is to obtain written verification from the City that:
 - A. Training and drills are adequate and appropriate for the assigned task, and contain instructions on Security features for typical and Emergency conditions;
 - B. Lessons learned from training and drills are performed, reviewed and documented to identify threats, vulnerabilities, or open Security issues have been resolved; and,
 - C. Known issues concerning training and drills, which impact Security, have been satisfactorily resolved.
- (ii) Security information on conformed methods and procedures necessary to maintain security conditions shall be generated by DB Co and included in a Security Training Program, to be provided by DB Co, for Security training consideration of construction, operations and maintenance personnel. At a

minimum, each of the security training requirements shall be included in the training program and associated documents.

- (h) DB Co shall be responsible for establishing and maintaining a Threat Log and Risk Log to record and track Threats for resolution. The Threat Log and Risk Log shall describe all identified threats, the measures taken to resolve each threat (references citing document, revision, section number) and the results of reviews, comments and approvals by the City and other outside agencies. All Threats and Risks shall be tracked through to resolution. DB Co shall submit the most current copy of Threat Log and Risk Log to the City for review upon request. After all tracked Threats and Risks are resolved, DB Co shall prepare a Security Verification Matrix document and submit in accordance with Schedule 10 – Review Procedure.
- (i) FLS – DB Co shall be responsible for compliance with FLS requirements included in federal, provincial, local codes and regulations, and the Project Agreement. DB Co shall incorporate these requirements into the design and construction of the Project and include all applicable FLS elements in the appropriate SeRTM.
 - (i) DB Co shall support the approval process by participating in reviews, inspections and technical discussions between the City and local jurisdictional authorities and other Governmental Authorities, and incorporating the resulting agreements into the design and construction. DB Co shall be responsible for verifying that DB Co's completed design complies with the resolutions of FLS issues, and is acceptable to the applicable Governmental Authorities.
 - (ii) Certificates of Conformance will be signed as certified by the DB Co Security and signed as approved by the OLRT-C Technical Director, and submitted to the City as per Schedule 10 – Review Procedure.

8.8 Format for Security Verification Matrix

- (a) DB Co shall provide an SeVM in the following format, noting that this shall be an output from the Threat Log and Risk Log:
 - (i) Item Number;
 - (ii) Security Requirement;
 - (iii) Document Reference:
 - A. Document Name; and,
 - B. Article Number;
 - (iv) Evidence:
 - A. Method of Verification by DB Co;

- B. Method of Validation by Audit Team;
- C. Validated By (Name of Auditor);
- D. Date; and,
- E. Remarks.

(b) Security Requirement Traceability Matrix

- (i) DB Co shall develop SeRTM for the Project as an output from the Compliance Verification and Validation Matrix. It shall be used to verify and certify that the Security requirements have been incorporated in the design and certify that all Security requirements of the design are constructed and/or installed and tested in accordance with the Project Agreement.

8.9 Construction Site Security

- (a) The information provided in this section is intended to establish the minimum requirements to be satisfied in the development of a Construction Security Plan for this Project. DB Co's Construction Security Plan shall establish the procedures required to provide the security measures necessary to achieve site security.
- (b) The following issues shall be addressed in the Construction Security Plan and with the processes established by the DB Co, in consultations with City authorities:
 - (i) DB Co shall be responsible for providing security control capability for the physical sites throughout all phases of the Project. The physical security plan must incorporate identifiable elements of protection, detection, and response capabilities. The security measures must be aligned to ensure identifiable security perimeters are established and access controls to and monitoring of the secured areas are established and achievable for the life of the Project.
 - (ii) Adequate security safeguards shall be established to ensure the protection of the sites is provided on a continuous basis for the life of the Project. The measures will be sufficient to mitigate incursion to the sites.
 - (iii) Policies and procedures shall be developed and implemented to ensure that any site security force is appropriately trained and prepared to provide initial response to security incidents.
 - (iv) The Security Plan shall provide flexibility in the security approach to permit adjustments to the sites as the project develops. This is to allow DB Co to shift the site perimeters as needed to meet construction schedules.

8.10 Emergency Responder Preparedness

- (a) DB Co shall provide support to the City in the review and update of Emergency response procedures in a timely manner to enable ESP to be ready for Revenue Service. This support shall include:
 - (i) Review and update of current Emergency response procedures;
 - (ii) Development and delivery of up to four train the trainer sessions for up to 40 Emergency response trainers for each session(to be completed six months prior to Substantial Completion);
 - (iii) Provision familiarization training session and tours on stations, guideway, maintenance facilities, trains and systems for ESP and supporting teams(to be completed three months prior to Substantial Completion);
 - (iv) Development and delivery of up to five tabletops exercises of up to 50 ESP each to address specific topics and issues as designed by the City;
 - (v) Delivery of content to update the City of Ottawa Emergency Responder Application related to Confederation Line Extension; and,
 - (vi) Development and delivery of a full scale exercise to include all City ESP to validate Emergency response procedures.
- (b) DB Co shall provide support to the City for Familiarization Training of Emergency Responder Trainers on functionality of Emergency Responder Systems to include:
 - (i) CCTV;
 - (ii) ETELS;
 - (iii) FTELS;
 - (iv) AEDs;
 - (v) GIDs;
 - (vi) ICPs;
 - (vii) Train lifting equipment;
 - (viii) PA; and,
 - (ix) IAC.

8.11 Emergency Responder Training

- (a) DB Co shall provide training programs, with special emphasis on ESP, for all City ESP to enable a train the trainer Emergency response program.

ARTICLE 9 PROJECT OFFICE

9.1 General Requirements – City Offices

- (a) DB Co shall provide climate controlled offices (the “Site Offices”), at pre-determined, locations set out in Table 1.9-1 along the active construction sites of the Project alignment. The intent is that site offices will form the basis of the City compliance monitoring team.

TABLE 1.9.1: SITE OFFICE LOCATIONS AND SIZING

| Site Office Locations | Required Square footage (based on 17 m ² per person) |
|-------------------------------|--|
| Moodie LMSF | 46 m ² |
| Baseline Station | 46 m ² |
| Pinecrest Station | 46 m ² |
| Lincoln Fields | 46 m ² |
| Rochester Field/Richmond Road | 46 m ² |
| Montreal Road Station | 46 m ² |
| Trim Road Station | 46 m ² |

- (b) With reference to the above Table 1-9-1, unless otherwise specified, DB Co shall locate the site offices on mobilization sites as per Schedule 20 – Lands.
- (c) DB Co shall supply a trailer site for the City of Ottawa management staff at the following locations: [REDACTED]. References to PRP shall be the latest version.
- (d) DB Co shall ensure that Site Offices shall meet the requirements of AODA, have entrance/exit signs and lighting and meet the requirements of the Ontario Codes and Guides for Buildings; Fire; Sewage; Plumbing and Electrical and the Ontario Ministry of Labour and WSIB.
- (e) DB Co shall be responsible for providing site office including all maintenance and operational costs for a period lasting from 30 days prior to, until 30 days after DB Co construction Work in the area of each site office location.
- (f) The Site Offices shall include the following:
- (i) a secure climate controlled, site office area, including all improvements and fixturing costs and all required furniture as per the City standards.
 - (ii) one meeting room capable of holding 4-6 persons and 8-10 persons for larger site offices with 50” TV and required connections for laptop display; one restroom, one large heavy duty shredder and kitchen amenities including counter, sink and

under sink storage, small refrigerator, microwave, kettle, coffee machine, storage space for supplies and personal protective equipment.

- (iii) secure door with controlled access that is only accessible by the City. Signage at each site office identifying the occupant and indicate a telephone number in case of Emergency.
- (iv) cleaning service agreements and costs for daily services of Site Office including rubber entrance mats, commercial grade and bristled scraper type boot cleaners.
- (v) voice and data cabling evaluation and installation costs, with specific location for outlets and all other requirements to be agreed in consultation with the City IT Representative.
- (vi) equipment including computers, monitors, keyboards and mouse, phones, printers, copiers and fax machines, polycoms, will be provided and maintained by the City.
- (vii) selection and costs related to the provision of data and voice services will be provided by the City.
- (viii) office supplies and stationary will be provided by the City.
- (ix) temporary buildings and trailers will be removed upon Work completion and areas restored to match existing surrounding areas by DB Co.
- (x) Three reserved parking spaces for the City exclusive use at each site office and maintenance of parking spaces, sidewalks and paved areas at and adjacent to the site in a safe condition.

9.2 General Requirements – Contractor Offices

- (a) DB Co shall be permitted to provide local site offices for construction operations at each Station construction site including those not designated as mobilization site in Schedule 20 – Lands. Those Station locations not designated as mobilization sites shall have limited material and equipment storage restricted to material and equipment specific to that station location required to construct that specific Station.
- (b) DB Co shall ensure that site offices shall meet the requirements of AODA, have entrance/exit signs and lighting and meet the requirements of the OBC and OFC and other relevant codes and the MOL and WSIB.
- (c) DB Co shall be permitted to provide limited onsite parking spaces for DB Co employees and subcontractors at those Station locations not designated as mobilization sites.
- (d) DB Co shall be permitted to provide limited subcontractor trailer space at those Station locations not designated as mobilization sites

- (e) DB Co shall be responsible for all maintenance and operational costs in association with site offices identified in this Clause 9.2 for the duration of DB Co's occupancy of the Lands.
- (f) At those Station locations not designated as mobilization sites, temporary buildings and trailers shall be removed upon Station construction completion and areas restored to match existing surrounding areas by DB Co.

ARTICLE 10 CONSTRUCTION SAFETY MANAGEMENT

10.1 General Requirements

- (a) DB Co shall prepare the CSMP in accordance with the criteria contained in this Article and all Applicable Laws, and applicable standards.
- (b) The CSMP shall be prepared and submitted in accordance with Schedule 10 – Review Procedure. DB Co shall coordinate with applicable Governmental Authorities to ensure existing maintenance and Safety plans are not violated.
- (c) DB Co shall have an active WSIB account in good standing and shall make available a valid Clearance Certificate from the WSIB, upon request.
- (d) The construction planning for this Project shall consider the existing operations of the City and OC Transpo, and the impacts to the street network within the City, as well as considering adjacent residences, landowners and businesses, with respect to pedestrian and property access and other environmental impacts.

ARTICLE 11 SYSTEMS INTEGRATION PROGRAM

11.1 General Description

- (a) As the Systems Integrator on the Confederation Line, DB Co shall establish and maintain a systematic, documented, comprehensive, and verifiable systems integration process based on the IEC 15288 standard (Systems and software engineering -- System life cycle processes) to be applied throughout the duration of the Project beginning with requirements management, concept development, design, procurement, manufacture, implementation, integration and testing, through successful commissioning of both the Confederation Line East Extension and Confederation Line West Extension. This process shall ensure that interfaces and interaction between infrastructure, Facilities, subsystems, software, and operations and maintenance personnel have been identified and engineered to function together as a system. At a minimum, DB Co's system integration effort shall systematically identify and formally document all human interfaces with the elements of the system and all interfaces with external systems. External systems interfaces include Existing Confederation Line, other Facilities, existing systems, existing facilities, traffic, communities, and other agencies affected by the Project. DB Co shall define methods to confirm compatibility between system elements, and perform the necessary tests or other verification to demonstrate that every element functions and performs properly, both individually and as part of the complete system. As the Systems Integrator, DB Co shall provide all required resources, work processes and management authority to exercise control over the planning, scheduling, co-ordination, prioritization, and delivery of the Works in order to mitigate foreseen systems integration risks, secure successful Project completion and deliver an operationally resilient railway into Project service.
- (b) In the course of complying with the provisions of this Project Agreement, various physical and functional interfaces of DB Co's equipment may depend on facilities, equipment, or services of organizations not under DB Co's control for successful operation. The majority of interfaces exist within the DB Co Agreement between DB Co and its consultants, subcontractors and suppliers, while the remaining interfaces exist between new and existing facilities and equipment furnished by the City and with other third parties such as utilities and other contractors. It is necessary that all interfaces be identified and controlled by DB Co to assure the design at the interface is understood and agreed to by affected parties. Any changes to one side of the interface shall be accepted and accommodated by the opposing interface. DB Co shall include, in the Interface Control Document, the process by which interfaces are identified and controlled.
- (c) This Article addresses the interfaces between each of the system elements and the system elements with the infrastructure, facilities, services, system information, or other work being provided by DB Co or others. This Article is not a detailed description of all such interfaces; rather, it is a broad description focused on general interface areas and the systems integration needs of the project. DB Co shall inspect the related work, review the drawings and documentation to identify and successfully comply with all interface

and integration requirements in order to perform all of the work required to complete the Project as defined in broad terms throughout the Project Agreement.

- (d) DB Co, as the Systems Integrator shall develop the necessary Systems Engineering Management Plans, produce the SIMP, produce the SIT schedule, manage the interface working groups, identify and coordinate all necessary resources required to successfully execute SIT and commissioning of the upgraded head-end management platform for all of the Confederation Line East Extension and Confederation West Extension's communications systems. DB Co shall provide personnel to coordinate (between operators and field personnel) and witness the test execution from the TOCC, MYCC, BYCC and BCC.

11.2 Systems Engineering and Integration Submittals

- (a) DB Co shall produce a Systems Engineering Management Plan, a Requirements Management Plan, a Verification and Validation Plan, a SIMP, and a preliminary Systems Interface Matrix and submit each within 60 calendar days following Commercial Close in accordance with Schedule 10 – Review Procedure.
- (b) The SIMP shall address the interface of the system with itself, the right-of-way and any infrastructure contained therein; any adjoining facilities; electric, telephone, gas and other Utilities; the water and sewer systems; Fire and Police Departments; and any facility which is used by or for the SI. The SIMP shall provide the procedure by which each interface will be defined, agreed upon and controlled. The SIMP shall contain a responsibility matrix identifying what entity is responsible for controlling the specific elements of the project. Updates to the SIMP shall be provided by DB Co when significant schedule or Project changes are made.
- (c) DB Co shall manage requirements throughout the Project using an object orientated requirements tool (e.g. DOORS), to ensure traceability of requirements from the source through to closure. DB Co shall make available to the City the output of the Requirements Management tool at design reviews and throughout the Project upon request.
- (d) DB Co shall coordinate and integrate all System interfaces so that the system is properly integrated with itself and into the Project area, including the right-of-way, the surrounding communities, and all facilities, equipment, and systems provided by others. This integration effort is critical to allow public and commerce activities to continue with minimal interruption throughout the construction, installation, testing, and commissioning phase of the Project.
- (e) The SIMP shall list all major System elements and define which elements have a direct or indirect interface or interaction. The SIMP shall, as a minimum, define:
 - (i) The entity within DB Co's organization responsible for managing and engineering the integration or interface

- (ii) The agreed integration or interface arrangement (physical installation, power supply, signal levels, transfer characteristics, and other factors)
- (iii) The functional, performance, Reliability, Maintainability, and Safety requirements of the individual elements forming the integration or interface
- (iv) The proposed method and schedule for verifying the interface integrity, the individual element performance, and the combined integration or system performance, with appropriate pass/fail criteria for each.
- (v) The main elements that will be demonstrated through integrated testing.

11.3 Interface Control Document

- (a) ICDs shall be developed and managed by DB Co. Contents in these ICDs will expand as interfaces are identified but it shall be maintained current throughout the Project Agreement period and included as design data at all design reviews. ICDs shall be subject to Configuration Management. DB Co shall be responsible for coordinating all aspects of the system design and the integration of the SI with all other Confederation Line systems and Subsystems as required including vehicles. The civil infrastructure shall be inclusive of the design of the stations, stops, Guideway (elevated, at grade exclusive & semi exclusive ROW), Tunnels, Bridges, viaducts, overpasses, underpasses, MSF and the TOCC.
- (b) A systems interface register shall be used to track each interface identified within the interface matrix and their relationships, bringing forth the issues that are critical to proper systems integration. The interface register shall be updated throughout the Project. Periodic reports shall be processed from the systems interface matrix and distributed for information.
- (c) DB Co shall be responsible for identifying and resolving all system interfaces which contribute to successful achievement of the overall system performance requirements or other Project Agreement requirements. A preliminary list of interfaces to be addressed includes:
 - (i) Track/Vehicle; Wheel/Rail;
 - (ii) Vehicle/Facilities;
 - (iii) Vehicle/Station Platform;
 - (iv) Vehicle/Train Control/Signaling;
 - (v) Vehicle/Wayside Communications;
 - (vi) Vehicle/Traction Power Supply;
 - (vii) Stations/Traction Power;

- (viii) Stations/Signaling;
 - (ix) Stations/Power;
 - (x) Stations/SCADA;
 - (xi) Stations/Track;
 - (xii) Stations/Fire detection and suppression;
 - (xiii) Stations/Communications;
 - (xiv) TOCC/BCC/Traction Power;
 - (xv) TOCC/BCC/Signaling & Train Control;
 - (xvi) TOCC/BCC/Power;
 - (xvii) TOCC/BCC/SCADA;
 - (xviii) TOCC/BCC/Fire detection and suppression;
 - (xix) TOCC/BCC/Communications;
 - (xx) MYCC/LMSF/BYCC Traction Power
 - (xxi) MYCC/LMSF/BYCC Signaling & Train Control
 - (xxii) MYCC/LMSF/BYCC SCADA
 - (xxiii) MYCC/LMSF/BYCC Fire Detection & Suppression
 - (xxiv) MYCC/LMSF/BYCC Communications
 - (xxv) Existing Systems/New Systems;
 - (xxvi) Corrosion Control/Wheel/Rail;
 - (xxvii) Train Control/Tunnel systems; and,
 - (xxviii) Train Control/Tunnel systems.
- (d) DB Co shall add other integration or interfaces as the design and system integration advances.
- (e) The following provide additional requirements for the Systems Integration Program:
- (i) DB Co shall be responsible for all facility and equipment redesign and rework, whether the impacted facility and equipment are the responsibility of DB Co or

others, or for modifying its Work or any DB Co provided Subsystem to match the facility, or for modifying any facility, systems, or Subsystems to match systems or Subsystems provided by DB Co. DB Co shall also be responsible for any delay to others caused by delaying the furnishing of information, by furnishing incorrect information, or by subsequently changing information for which DB Co is responsible. DB Co shall notify the City and any affected parties as soon as any interface information changes or is found to be incorrect.

- (f) DB Co and its representatives shall develop and finalize all interfaces as required. Updates of the SIMP shall be provided whenever significant changes are made to the Work or the Project Schedule.
- (g) This article provides a listing of the systems elements, the coordination required between these elements and the SI elements.
- (h) Design of all elements of the various system designs shall be developed to operate reliably in the environment in which they are installed. DB Co shall design all systems elements to integrate with the environmental conditions for Ottawa including ambient temperature range, humidity, precipitation and other environmental factors that will impact operation.
- (i) Failure to list interfaces between systems does not absolve DB Co of their responsibility for integration of the system.

11.4 Design and Coordination Elements

- (a) Preliminary listing of design elements and required coordination are provided below
 - (i) Revenue Vehicles
 - A. Typical coordination elements between the SI and the Vehicle are:
 - i. Vehicle dimensions shall be coordinated with the Guideway design;
 - ii. Vehicle weight shall be coordinated with the Guideway design and selected Vehicle;
 - iii. Guideway and alignment design shall be developed to meet the requirements of the braking and propulsion system;
 - iv. The City, or City Party, shall coordinate with the Vehicle manufacturer to ensure that any limitations (thermal or other) are consistent with Vehicle needs;
 - v. the system Track infrastructure design shall be coordinated with the Vehicle wheel/rail interface criteria;

- vi. pantograph/contact wire interface criteria shall be coordinated with the Guideway design, the OCS design and selected Vehicle;
- vii. Vehicle dynamic and static envelopes for Guideway clearances shall be coordinated with the Guideway design, SI design and selected Vehicle;
- viii. Vehicle to Platform interface including;
 - 1 Vehicle door threshold height above top of rail to Platform edge; and
 - 2 Platform lateral gap to Vehicle door threshold shall be provided for accessibility as well as to maximize station pass through speed;
- ix. coordination and integration of Vehicle borne elements of the communications and signals systems with the Vehicle supplier;
- x. The City designed onboard elements including S&TCS hardware and communication systems shall be EMC/EMI compliant with the Vehicle; and
- xi. Track Design shall coordinate with the Vehicle to ensure that noise and vibration requirements are in conformance with the existing Vehicles;

(ii) Traction Power Supply System

- A. DB Co shall coordinate the cable routing from the TPSS to the Tunnels and other Guideway segments, and provide pullboxes, switches and SCADA monitoring and control as follows:
 - i. positive cable routing;
 - ii. negative cable routing;
 - iii. communication cable routing; and,
 - iv. suitable electromagnetic segregation of cables in the duct bank and conduits.
- B. DB Co shall coordinate the following Traction Power System elements:
 - i. Traction Power requirements shall be coordinated with the Vehicle;

- ii. TPSS shall be designed to integrate within the right-of-way and surroundings including minimizing visual impacts along the alignment;
 - iii. coordinate with the local utilities to provide the necessary power feeds to the TPSS; and,
 - iv. DB Co shall ensure that the location of Traction Power disconnects and sectionalizing requirements are developed to support operational needs of the system;
 - C. The City shall integrate new equipment into the existing head-end to accommodate the new Traction Power SCADA System equipment.
- (iii) OCS
 - A. DB Co shall coordinate the OCS wire support system hardware, messenger wire, contact wire, feeder wire termination points and appropriate switchboxes including:
 - i. OCS foundation integration along the ROW;
 - ii. OCS electrical clearance requirements according to regulatory and industry standards;
 - iii. OCS mounting and support integration into the right-of-way to minimize visual impact and with necessary restrictions for Tunnel installation;
 - iv. messenger wire installation arrangements;
 - v. contact wire installation arrangements;
 - vi. disconnect/ bypass or isolation switches;
 - vii. OCS to Vehicle interface to include contact wire stagger and sweep to achieve uniform pantograph wear;
 - viii. OCS to Vehicle interface to conform to Vehicle wire height requirements, rate of OCS height change to ensure good contact and current collection; and,
 - ix. protection device coordination to minimize service disruption whilst optimizing life and equipment protection.
- (iv) Signals and Train Control System

- A. The City shall coordinate between the Systems elements and the Vehicle supplier for the on-board Vehicle interface design, spacing, mounting and functioning of system elements within the Vehicle.
 - B. The City shall coordinate the system elements and the Vehicle supplier for installation and commissioning of on- board equipment.
 - C. DB Co shall coordinate the integrated testing of equipped Vehicles in all types of ROW throughout the system.
 - D. DB Co shall coordinate the complete design, installation and integrated testing of the S&TCS for all interfaces associated with S&TCS, except as noted in Clauses 11.4 (a)(iv)A and 11.4 (a)(iv)B above.
- (v) Communications Systems
- A. DB Co shall coordinate the location and mounting of elements noted below, routing of cabling to each element, termination of cabling to each element, and routing to the main communications equipment either in an equipment room or cabinet including:
 - i. locations of communication duct bank and conduit interfaces to communication rooms/cabinets throughout Confederation Line;
 - ii. quantity and sizing of ducts within communications duct banks and conduits;
 - iii. location and quantity of pull boxes, manholes, and hand holes;
 - iv. CTS;
 - v. SCADA system elements;
 - vi. Fare Collection equipment;
 - vii. PA/PIDS;
 - viii. CCTV elements;
 - ix. Telephone system;
 - x. all communication systems control equipment;
 - xi. IAC System elements;
 - xii. Fire system elements;
 - xiii. GIDS elements;

- xiv. Radio repeater system equipment
 - xv. Cell coverage system equipment
 - xvi. Wi-Fi system equipment, and
 - xvii. Blue light station equipment
 - xviii. Locations, equipment connectivity, conduit routing and power provisions for fare collection equipment and cables provided by others.
- (vi) Trackwork
- A. The City shall coordinate the integration of the Track to meet the needs of the Confederation Line with the existing and new interface as well as with other elements including:
- i. Track form shall be developed to adhere to the requirements of the Vehicles;
 - ii. Track form shall be developed to comply with the noise and vibration requirements set out in Schedule 17 – Environmental Obligations;
 - iii. Track form shall be developed to integrate along the right of way and to maintain required clearances along the right of way considering;
 - 1 use of ballasted, direct fixation, embedded and other Track forms shall ensure that no unsafe condition exists due to physical interferences with required Vehicle clearances and surrounding infrastructure; and
 - 2 Track form shall be integrated with the provisions for Structures and Underground Structures;
 - iv. Civil and Infrastructure system elements to provide corrosion control and stray current mitigation along the corridor;
 - v. OCS pole spacing and positioning shall be dependent on Track alignment, Special Trackwork layout, Track construction type, intersection and Emergency Services access locations;
 - vi. bonding, insulated joint requirements, and associated cables, conduit, and duct banks shall be identified in conjunction with the S&TCS as well as the communication systems;

- vii. electrical design related to the location of powered wayside Track equipment and electrical outlets along the ROW to support Track maintenance activities;
- viii. wayside Track equipment includes switch machines, switch element heaters, switch blowers, rail lubricators, and associated cables, wires, conduit, and duct banks;
- ix. operational requirements to identify Special Trackwork locations and configuration, high rail wear locations and superelevation;
- x. civil, structural and geotechnical disciplines to determine Track drainage interface with municipal sewers, Track, roadway requirements, rail expansion accommodation and Emergency guard rail requirements on elevated structures, reinforcing steel requirements, Track foundation type and characteristics; and,
- xi. provisions for protection where required in areas of Special Trackwork to allow for Operators of short-turn or stored Trains, to disembark and walk to opposite end of Train, without facing Hazards of adjacent traffic and Train flow in opposite direction.

(vii) Corrosion Control System

- A. DB Co shall be responsible for development of an overall approach to corrosion control. DB Co shall coordinate corrosion control designs with the following:
 - i. Traction Power and Track systems to identify the location and typical arrangement for any corrosion control mitigation equipment;
 - ii. Utility Companies to identify sensitive utilities that may require relocation and/or protection;
 - iii. locations of monitoring and measuring points; and,
 - iv. stray current monitoring plan and system.

(viii) Non-Revenue Vehicles

- A. The City shall coordinate all Non-Revenue Vehicles with the following:
 - i. Non-Revenue Vehicle dimensions shall be coordinated with the Guideway design and selected Non-Revenue Vehicle type;
 - ii. Non-Revenue Vehicle weight shall be coordinated with the Guideway design and selected Non-Revenue Vehicle type;

- iii. the wheel/rail interface criteria shall be coordinated with the Guideway design and selected Non-Revenue Vehicle type;
 - iv. the pantograph/contact wire interface criteria shall be coordinated with the Guideway design, the OCS Design and selected Non-Revenue Vehicles;
 - v. Non-Revenue Vehicle dynamic and static envelopes for Guideway clearances shall be coordinated with the Guideway Design; and,
 - vi. Tunnel ventilation to accommodate requirements related to Non-Revenue Vehicle exhaust emissions.
- B. DB Co shall ensure that any trackside element placed within the trackway is designed to withstand the worst case loading of an Emergency vehicle;
- (ix) Tunnel Ventilation System
- A. DB Co shall coordinate the designs of the S&TCS, Traction Power System, and Tunnel ventilation system to support the Tunnel ventilation vent zone requirements in accordance with NFPA 130.

11.5 Systems Integration Manager

- (a) DB Co shall appoint a Systems Integration Manager to perform the systems integration obligations of DB Co. The Systems Integration Manager shall have the qualifications as set out in Schedule 9 – Key Individuals.

ARTICLE 12 ARTWORK

12.1 General Requirements

- (a) This article describes artwork that shall become part of the SI and outlines the process for the implementation of the Art Program.
- (b) The primary objective of the Art Program is to make the transit experience user-friendly, aesthetically pleasing and reflective of the communities serviced while fostering opportunities for creative collaboration between the artists, designers and community groups, creating a sense of local ownership.
- (c) The mandate of the Art Program shall comply with the City of Ottawa's Public Art Policy. The City of Ottawa's Public Art Policy is overseen and administered by the City of Ottawa Public Art Program Office.
- (d) The Art Program budget for Confederation Line shall be administered as the Art Cash Allowance in accordance with Project Agreement Section 11.30.
- (e) The scope of the Art Program generally includes but is not limited to the following types of artwork:
 - (i) Permanent integrated public art projects that form part of a Structure or landscape that is part of the transit system and permanent, non-integrated projects that do not form a physical part of a Structure or landscape and includes stand-alone art projects which can be fabricated independently. DB Co shall provide appropriate means of fabricating (optional) affixing and/or supporting stand-alone, non-integrated projects to allow the projects to be periodically rotated or changed; and,;
 - (ii) Temporary public art projects are original artworks by an artist created for a specific occasion, timeframe or event situated at a particular site on a temporary basis and may be periodically rotated or changed.
- (f) DB Co shall consult with the Federal Department of Canadian Heritage for artwork proposed to be located on Federal Lands.
- (g) DB Co shall fully install all art projects prior to Final Completion for Confederation Line East Extension and Confederation Line West Extension.
- (h) DB Co shall protect existing artwork located along the Transitway west of Tunney's Pasture Station in conformance with Good Industry Practice for art handling and conservation, such as practices published by Canadian Conservation Institute.
- (i) Artwork shall not interfere with Passenger flow and shall be planned and implemented in accordance with CPTED principles. DB Co shall include artwork in all Schedule 10 – Review Procedure submissions for Stations and Ancillary Facilities including drawings and reports.

- (j) Artwork installations shall meet property and Station maintenance demands, and reasonably anticipated exposure to weather conditions including but not limited to use of de-icing materials in winter.
- (i) Requirements for Maintenance and access of the Artwork as prescribed by the Artist shall be taken into consideration when determining the Artwork installation location during the design phase of the Project

12.2 Art Program Responsibilities

- (a) City responsibilities;
 - (i) Provide an Art Consultant to provide guidance to DB Co to ensure the City Public Art Policy is adhered to.
 - A. Develop a Public Art Plan and consult with DB Co on the implementation of the Public Art Plan. The Public Art Plan will include proposed transit sites (including Stations) to receive artwork, potential opportunities for public art, scope management and resources, general scope of work, preliminary budget allocations and implementation timelines. The Public Art Plan will be used to develop a City procurement process including a Request for Qualifications and Request for Proposals and guide the selection and evaluation of artist teams in accordance with the City Public Art Policy.
 - B. As appropriate, consult with the Federal Department of Canadian Heritage on artwork that is proposed to be located on federally owned lands.
 - C. Within four months of Commercial Close, and based on an RFQ process, shortlist artists/artist teams and lead a juried selection of three artists/artist teams that will enter into contract with DB Co.
 - D. Lead a community art social engagement process for the Byron Linear Park and Richmond Rd Complete Streets Initiative and coordinate artwork locations and technical review with DB Co.
 - (ii) In co-ordination with DB Co, manage the competition and selection process for artist teams for the artwork.
 - A. Public Art related community consultation, outreach and communications.
 - B. At the end of Project transition, including transfer of the ownership of artwork to the City Art Collection.
- (b) DB Co responsibilities;
 - (i) Retain an Art Manager with a minimum of 5 years' experience managing complex urban development projects that included an artwork program. The Art

Manager shall be a member of DB Co's design team and shall liaise with the Art Consultant throughout the Project.

- (ii) recognize and champion the importance of artistic excellence consistent with the standards and guidelines outlined in the Public Art Plan.
- (iii) work collaboratively with the artist/artist teams and ensure that they are recognized as equal members of the DB Co design team.
- (iv) adhere to the responsibilities as detailed in the Public Art Plan that include but are not limited to:
 - A. Ensure compliance with the City of Ottawa's Public Art Policy and the Public Art Plan;
 - B. Co-ordinate all aspects of DB Co's participation and deliverables of the Project artwork;
 - C. Act as the single point of contact with the City of Ottawa Public Art Program Office and liaise with stakeholders;
 - D. Ensure fair and equitable involvement of the Project artist teams, consistence with Good Industry Practice and artwork copyright and artist moral rights and provide support to and coordination of artists teams at all stages including concept design, pre-final design, final design, tender and construction, fabrication and installation as detailed in the Public Art Plan;
 - E. Co-ordinate review process at each stage for the Project public art, including but not limited to concept design, pre-final design, final design, and tender design packages for artwork and,
 - F. Meet regularly with, and provide project managements reports and documents in a timely manner, including financial reports as required, to the City Public Art Program Office.
- (v) Identification of locations suitable for the artwork installations in consultation with the City and the City's Art Consultant. Placement of artwork installations shall provide an integrated approach with the placement of landscape architecture, Station architecture, signage and wayfinding, advertising and fare media that provides functionality for each element and promotes a positive customer experience.
 - A. Identification of locations suitable for artwork to be provided by the City within Byron Linear Park and Richmond Road Complete Streets. Provide technical review of the proposed installation.
- (vi) Develop integrated art strategies for each of the three Station groupings including one on the Confederation Line East Extension and two on the Confederation West

Extension, including a project management plan, with construction schedule at a WSB 4 level of detail consistent with the approved budget available and the City's recommendations. DB Co shall provide appropriate means of affixing and/or supporting, and lighting any temporary artwork. At least three sites for temporary artwork shall be identified for temporary art projects (two on Confederation West Extension and one on Confederation East Extension. DB Co shall consider their Final Design Development submission of each artwork package as a binding submission and shall work with the City to incorporate the cost and scope of the artwork project fully into the Project Agreement.

- (vii) Provide input to the City with respect to the development of the terms of reference and the preparation of the RFP documents including but not limited to;
 - A. Provision of general commercial terms and conditions in the form of a template contract to be included in artist team selection Request for Proposal;
 - B. Deliverable requirements required by DB Co to implement the Artwork Program;
 - C. Schedule dates for artwork deliverables that co-ordinate with the DB Co. design and construction schedules;
 - D. Work collaboratively with the City with respect to the process to select and assign artist teams to specific locations with the transit system;
 - E. Provision of technical information, drawings and Design Criteria; and,
 - F. Other support for the artist team selection.
- (viii) Participate in the final artist selection jury and provide general support to the City in the final artist selection process including the assignment of artist teams to specific locations.
- (ix) Support the City in outreach and consultation as it relates to the Artwork Program.
- (x) Execution of agreements to retain the individual selected artist teams under standard terms and conditions.
- (xi) Once individual artist contracts have been executed, in collaboration with the artist, develop integrated art concepts for each Station consistent with the budget available for the incremental cost of each integrated project.
- (xii) Co-ordinate, integrate, deliver and install the Confederation Line artwork into the Project through the Art Cash Allowance outlined in Clause 12.3 below.
- (xiii) Work collaboratively with the City, the Art Consultant and the Artist to resolve any contractual issues.

- (xiv) Prepare the site and provide utilities to receive the artwork.
- (xv) As required, provide safe and efficient access by the artist teams (or the artist's sub-contractor) to the site of the artwork for the installation of any artwork.
- (xvi) Develop and execute a review process at each step as outlined in the Public Art Plan that includes review of the Artist's concepts and provide comments on constructability, suitability of materials, Safety, security, Maintainability, compliance with specified material standards, and design and construction costs of the artwork concepts.
- (xvii) Address any implications of the Artwork Projects across all design disciplines during the design, construction and implementation of the Project.
- (xviii) Confirm, at time of submission, in accordance with Schedule 10 – Review Procedure, the scope, budget and cost breakdown of each art concept to be implemented as part of the Art Program.
- (xix) Co-ordinate and attend meetings for artists and DB Co during design and implementation phases.
- (xx) Facilitate the resolution of aesthetic issues between the Artists, DB Co, and the City.
- (xxi) The substitution of standard architectural finishes in Stations in favour of the specified art projects designed by the artist.
- (xxii) Coordinate the integration of the art projects into the overall Station architectural finishes to ensure complete integration from a design, specification, tendering, material selection and construction perspective.
- (xxiii) Collaborate with the City, with respect to any sustainability/maintenance issues related to the fabrication, construction or integration of the artwork.
- (xxiv) Install stand-alone (non-integrated) public artwork and temporary public artwork including but not limited to the necessary base support structures to install artwork.
- (xxv) Install lighting to properly illuminate integrated, stand-alone (non-integrated) and temporary artwork, working in collaboration with the artist.
- (xxvi) Co-ordinate and integrate artwork provided by the City for the Byron Linear Park and Richmond Road Complete Streets.
- (xxvii) Materials purchased by DB Co shall, in respect of the cost, installation and/or fabrication of integrated artwork be of the quality identified and agreed upon by the City and the artist, both acting reasonably.

(c) Artist team responsibilities

- (i) Once the artists' teams have been selected, they shall join the DB Co teams as an integral member of the design team in all phases in the implementation of the public art project for the artist teams.
- (ii) Artist teams shall adhere to the responsibilities as set out in the Public Art Plan that include but are not limited to the following:
 - A. Participate in meetings with DB Co design staff, community stakeholders and committees as required.
 - B. Develop integrated art concepts such as drawings, 3-D models/maquettes and cost estimates for the transit Station and/or landscape public artwork for approval by the City in coordination with DB Co.
 - C. Meet and present preliminary art concept(s) for review at the Pre-Final Design Submission as outlined in Schedule 10 – Review Procedure.
 - D. Participate in preparation of, and present preliminary designs for review including preliminary cost estimates, material samples, fabrication and installation plan, and maintenance plan that demonstrates that each individual artwork concept is compliant with architectural finish materials specified by the City, in particular for integrated artwork, and is maintainable over the life of the art installation.
 - E. Work with the DB Co design team to refine and finalize the approved preliminary design including approved cost estimates, materials, and fabrication, installation and maintenance plans and schedule. Prepare any final drawings depicting both the fabrication and installation of public artworks for each site/Station area identified. The design shall fully depict the attachment/integration details to any site/Station component as jointly developed with DB Co. Artist teams shall be responsible for obtaining all required information for the preparation of the design including site measurements.
 - F. Provide any technical expertise required to deliver the final concept package.
 - G. Provide plaque text to accompany the artwork including translation in up to three languages.
 - H. Provide artwork documentation (both written and photographic).
 - I. Provide artwork maintenance manual.
 - J. Inspect and oversee the fabrication. If DB Co or the City request to inspect the public artworks, the artist shall coordinate such inspections.

- K. Supervise the integration and/or installation of the work by DB Co and support DB Co in a review of artwork installation.

12.3 Implementation of Art Cash Allowance

- (a) The Art Cash Allowance is intended to cover the cost to implement the Artwork over and above any credits for architectural and landscape treatments that would otherwise have been required. DB Co, and not the artist, shall be responsible for the production, review, signing and sealing of any and all engineering drawings required to implement artwork.
- (i) The substitution of standard architectural finishes at the site in favour of the specified art projects designed by the artist and the resulting delta or cost credit shall be applied to the Project to augment the art budget, supported by appropriate documentation as detailed in the Public Art Plan.
- (b) DB Co shall be responsible for certain aspects of the Art Program that are not eligible to be funded out of the Art Cash Allowance as outlined above. For clarity, this includes participation in technical review of artworks during the competition for artists prior to the selection jury, the provision of lighting, communications and the support structures to install the artwork, as well as engineering drawing production, review and sealing of engineering drawings, inspection and oversight.
- (c) Budget for all aspects of the procurement processes for the Artists and selected artwork associated with the Art Program including the supply and installation of the finished pieces shall not exceed the Art Cash Allowance as outlined in the Project Agreement.
- (d) This Art Cash Allowance is comprised of the following incremental costs to implement art over and above credits for standard Station finishes:
- (i) The artists' fees including the necessary design and production work to understand, develop and implement the art concept, consistent with the Public Art Plan;
- (ii) Fabrication of the Artwork;
- (iii) Provision of plaques and/or didactic signage with artist team statements for each Artwork;
- (iv) The cost to implement and install the specified integrated and non-integrated permanent, art projects, above and beyond any required support structures for the artwork;
- (v) The cost for the artist teams to prepare artwork submittals, develop drawings/specifications and input to tender packages in cooperation with DB Co to implement the art projects;
- (vi) The cost for the artist teams (or a subcontractor agreed to by the artist teams) to produce any artwork as part of the Construction Documents or as part of the

fabrication/installation of the artwork including the production of any prototypes that may be required to demonstrate the art concept;

- (vii) Except for the cost to affix/support and light temporary artwork, the City is responsible for the costs associated with the procurement process and fabrication of temporary artwork.
- (e) The Art Cash Allowance excludes and may not be used toward:
 - (i) Legal, accounting, professional or administrative time that may be required in administering contracts with the artists or integrating the art projects into the design of the Works;
 - (ii) Preparation of reports for Art Cash Allowance submissions;
 - (iii) Increased artist design fees due to re-work requested by DB Co;
 - (iv) Station renderings that incorporate artwork; and,
 - (v) Cost to design and construct supporting structures that are part of Station design and construction.

ARTICLE 13 CITY BRANDING INTEGRATION

13.1 General

- (a) DB Co shall be responsible for the integration of the City branding requirements with their design solutions for the Project not limited to but in accordance with the 2016 edition of the OC Transpo Visual Design Standards.

ARTICLE 14 DEMOLITION, REMOVALS AND DISPOSAL

14.1 General

- (a) DB Co shall demolish any buildings or other Structures on the Lands as required for construction and obtain all Permits, Licenses and Approvals required for demolition. All Demolition refuse and materials shall be the property of DB Co and DB Co shall dispose of all such refuse and materials in accordance with Applicable Law and leave the Lands in a clean and tidy condition upon completion of the Work.
- (b) Performance Criteria
 - (i) DB Co shall remove obstructions encountered in the construction of the Project elements that hinder the installation of said elements. Obstructions may include but are not limited to – pipes, conduits, ductbanks, foundations, debris, poles and any other object.
 - (ii) DB Co shall remove existing roadway and sidewalk pavements obstructing the construction of the Project. Use equipment and methods of removal and hauling which protect underlying Pavement or existing Pavement not designated for removal.
 - (iii) DB Co shall remove or relocate existing Utilities connected to buildings or other Structures being demolished including but not limited to – pipes, conduits, ductbanks, and overhead wires as per City standards.
 - (iv) DB Co shall submit a Demolition Plan covering all Works required by this Article in accordance with Schedule 10 – Review Procedure.
- (c) Specific Requirements
 - (i) Existing Transitway
 - A. Demolition of Transitway facilities and Transitway shall be coordinated such that no interruption to service is incurred until temporary facilities and detours are functional.
 - B. The existing Queensway Transitway Station shall be removed as per the following:
 - i. Removal of all existing features currently located at the Highway 417 WB level and at the existing Transitway level including reinstatement of area to match surrounding areas. Removal shall not affect the structural integrity of surrounding structures. Removal shall not affect the existing MUP.
 - ii. Removal shall not affect the use of the 417 EB Station Platform as an Emergency access point. Including preserving and protecting

- the elevator, stairs, electric room and electric service, plumbing and drainage.
- iii. Removal of footings/foundations to below frost level.
 - iv. Remove all utility services on site. Utilities shall be removed to the point of connection to the utility service in the ROW and capped in accordance with Utility requirements.
 - v. Remove existing ramps used to access the Transitway from the Highway 417 level. The Pavement structure and bedding shall be removed, subgrade scarified and regraded to maintain one drainage swale on the interior of the Transitway ramp. A minimum of 600 mm earth material, that shall sustain plant materials as described in Schedule 15-2, Part 6, Article 2 – Design Criteria, shall be installed.
 - vi. Reinstatement of area to match surrounding areas.
- C. The following Transitway Stations shall be completely removed or demolished:
- i. Dominion Station;
 - ii. Lincoln Fields Station;
 - iii. Iris Station;
 - iv. Pinecrest Station;
 - v. Jeanne D’Arc Station; and,
 - vi. Trim Station.
- D. The following Stations shall be selectively demolished and rehabilitated or renovated:
- i. Tunney’s Pasture Station;
 - ii. Westboro Station;
 - iii. Baseline Station;
- 1 Two lanes of the existing Transitway shall remain and the rest shall be removed between College Avenue and Navaho, and the existing bus staging area. The Pavement structure and bedding shall be removed, subgrade scarified and regraded to maintain one drainage swale on the interior

of the Transitway ramp. A minimum of 600mm earth material, that shall sustain plant materials as described in Schedule 15-2, Part 6, Article 2 – Design Criteria, shall be installed.

- iv. Bayshore Station; and,
 - v. Blair Station.
 - E. The demolition, selective demolition and or removals shall be coordinated with City for any salvageable materials that City may want to reuse elsewhere.
 - F. To the fullest extent possible, materials shall be recycled.
 - G. The reuse and re-cycle of material will be reflected in the goals and objectives of the Project Sustainability Plan and reported in the Sustainability Annual Report Card as detailed in Schedule 17, Part 3 – Environmental Management and Sustainability.
- (ii) Other specific Project Lands:
- A. Private properties being used for development that contain existing structures include:
 - i. [REDACTED];
 - ii. [REDACTED];
 - iii. [REDACTED];
 - iv. [REDACTED]; and,
 - v. [REDACTED].
 - B. DB Co shall perform removals and demolition as follows:
 - i. Completely remove all existing internal roadway, parking lots sidewalks and Pavement;
 - ii. Completely remove all Structures located on the site;
 - iii. Removal of structures shall include complete removal of all building foundations;
 - iv. Remove all utility services on site. Utilities shall be removed to the point of connection to the utility service in the ROW and capped in accordance with Utility requirements; and

- v. All materials shall be recycled to the fullest extent possible.
 - C. Prior to the Commencement Date, as defined in Schedule 20 – Lands, for [REDACTED], the City will demolish the existing building, will decommission the existing gasoline service station and will remediate soil and groundwater to MOECC Table 3 standards. Specifically, the City will excavate all soil with contaminant concentrations above standards for Residential / Parkland / Institutional Land Use on Parcel 1 of 18689-PRP_018. To the extent possible without disturbing existing Utilities, the City will excavate contaminated soils on Parcel 2, and will delineate the south end of the excavation with polyethylene sheeting. DB Co shall extend the excavation for the Guideway Tunnel north to the polyethylene sheeting, thereby removing and disposing of all remaining contaminated soil on Parcel 2. References to the PRP shall be the latest version as provided in Schedule 20 – Lands.
 - D. DB Co shall develop and implement a Remedial Action Plan for [REDACTED], as noted in Schedule 17, Article 4.5 (d) and Schedule 20 - Lands. DB Co shall perform all removals of contaminated soil and groundwater at [REDACTED] to achieve compliance for the entire property with the Table 3 Soil Standards for Coarse Textured Soils and Residential/Parkland/Institutional Property Use and the Table 3 Ground Water Standards for Coarse Textured Soils and All Types of Property Use provided in “Soil, Ground Water and Sediment Standards for Use under Part XV.1 of the Environmental Protection Act” dated April 15, 2011. Where remedial excavations approach private property boundaries, shoring and other means shall be taken to maximize removals for the purpose of achieving these standards. DB Co shall be prepared to excavate vertical side slopes to 11m depth, if necessary. Where remedial excavations approach City of Ottawa Right-of-Way, DB Co shall consult with City staff to coordinate removals, also for the purpose of achieving these standards. Verification sampling of excavation walls and floor shall conform to the requirements of O. Reg. 153/04 (Record of Site Condition – Part XV.1 of the Act), and where concentrations of contaminants of concern in the verification samples exceed the Table 3 standards, DB Co shall construct measures to prevent re-contamination of the property.
- (iii) Existing East Transitway Bridge (SN224880)
- A. The existing Transitway bridge over OR174 shall be removed as per the following:
 - i. The entire Structure shall be removed to frost depth.
 - ii. Regrade surrounding area. A minimum of 600mm earth material, that shall sustain plant materials as described in Schedule 15-2, Part 6, Article 2 – Design Criteria, shall be installed.

- (iv) [REDACTED] Pedestrian Bridge (SN018380)
 - A. The entire Structure shall be removed to frost depth.
- (v) SJAM Parkway Improvements
 - A. There are existing utilities within the limits of the SJAM Parkway Improvements limits of construction that shall be addressed as follows:
 - i. DB Co shall remove and not just cap all utilities that once facilitated the Transitway;
 - ii. DB Co shall cap all connections to the ORPP that are no longer required with the removal of the Transitway within the Project limits of construction at the ORPP and shall completely remove the remaining segments of each connections from the Transitway to the ORPP;
 - iii. DB Co shall examine all existing utilities that once facilitated the Transitway and also facilitate an area to remain to determine if rehabilitation is required and if rehabilitation is required outside the Project limits of construction notify the NCC of the existing utility that requires rehabilitation. DB Co shall not be responsible for any rehabilitation that may be required.
 - B. DB Co shall manage excavated materials in accordance with Schedule 17, Part 4. Soil quality information for some parts of SJAM Parkway is provided in [REDACTED].
- (vi) OR174 Concrete Slab
 - A. There is an existing composite Pavement structure on OR174 between Blair Road and Green's Creek. DB Co shall remove the existing composite Pavement structure and replace with an appropriate flexible Pavement as per Schedule 15-2, Part 2, Clause 6.11.
- (vii) Transitway pavement removal
 - A. DB Co shall remove the roads and parking lots associated with the existing Transitway that are no longer being used and are within the Lands but not within the proposed Guideway limits. The Pavement structure and bedding shall be removed and replaced with fill material that shall sustain plant materials as described in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - B. The removal of the existing Transitway shall not be completed until Revenue Service is completed and the Transitway is no longer required to be utilized by bus traffic.

- (d) All demolition shall be completed in accordance with City of Ottawa Design Standards.
- (e) The demolition, selective demolition and or removals shall be coordinated with applicable Governmental Authorities and/or the City for any salvageable materials that they may want to reuse elsewhere.
- (f) Materials
 - (i) DB Co shall dispose of all materials removed in accordance with City of Ottawa Standards, OPSS and applicable regulations.
 - (ii) DB Co shall manage hazardous materials in accordance with City of Ottawa Standards, OPSS and applicable regulations. DB Co shall not store materials on site without precautions to prevent adverse effects of adjacent watercourses, groundwater, the migration of materials offsite, nor allowing the development of a nuisance condition.
 - (iii) DB Co shall properly stockpile the materials resulting from removals and/or demolition by using separate stockpiles for waste materials and reusable or recyclable materials.
 - (iv) DB Co shall manage excavated materials in accordance with Schedule 17 – Environmental Obligations.
 - (v) DSS reports have been prepared for structures/facilities/properties that have been identified for removal. Refer to Schedule 17 – Environmental Obligations.

ARTICLE 15 NEW MUNICIPAL INFRASTRUCTURE

15.1 Responsibility for New Municipal Infrastructure

- (a) DB Co is responsible for the design and construction, including completion, Commissioning and testing, of any NMI.
- (b) NMI includes new City of Ottawa Infrastructure.
- (c) All design and construction in connection with the NMI to be constructed by DB Co shall incorporate the applicable design and construction standards, of the City.
- (d) All design and construction in connection with the NMI to be constructed by DB Co shall be subject to the Review Procedure as outlined in Schedule 10 – Review Procedure of the Project Agreement.
- (e) NMI shall be turned over to the City after the completion of the construction and Commissioning of NMI. NMI shall be subject to the warranty provision of the City of Ottawa Standard Tender Documents for Unit Price Contracts, Volume 1 and 2, including inspection requirements.

15.2 Design Standard

- (a) In addition to the City Standards identified in Schedule 15-1 – Technical Terms and Reference Documents, NMI shall be designed in accordance with the City of Ottawa Standard Tender Documents for Unit Price Contracts, Volume 1 and 2.
- (b) Where the design and construction of NMI includes material types and product types that are covered by the material specifications included in Volume 2 of the City of Ottawa Standard Tender Documents for Unit Price Contracts, only specific materials and products that are listed therein as approved shall be utilized in the Works.
- (c) Pavement Design for NMI shall be in accordance with Schedule 15-2, Part 2, Article 6 - Roadways, Bus Terminals and Lay-bys.

15.3 Record Drawings and As-built Drawings

- (a) Record Drawings and As-built Drawings for NMI or Third Party Infrastructure shall be completed and submitted in accordance with Article 16 – Record Drawings, of this Part 1.

15.4 Scope of Work

- (a) In general, the following types of assets shall be considered NMI.
 - (i) New retaining walls required for road construction and grading, and not associated with the Guideway.

- (ii) New watermains.
 - (iii) New street lights and illumination.
 - (iv) New storm and sanitary sewers.
 - (v) New traffic signals.
 - (vi) New Utilities.
 - (vii) New Culverts.
 - (viii) New roadways (Local, Provincial, Federal).
 - (ix) New bus terminals and connections, operator facilities, and PPUDO areas.
 - (x) New pedestrian connections (bridges) to Stations that don't exclusively provide access to a Fare-Paid Zone of the Station.
- (b) Any proposed Culverts, storm or sanitary sewers that exclusively serve the system and falls entirely within the Lands shall be considered SI.
- (c) The specific items that shall be included in the Work as NMI are included in Table 1-15.1 below.

Table 1-15.1 – NMI/Third Party Infrastructure

| Asset Name / Structure Number (if applicable) |
|--|
| New Woodroffe (Pinecrest Creek) Stormwater Management Pond (SWP) |
| West Transitway South Rock Wall (SN019991) W of Tunney's Pasture Station |
| West Transitway North Rock Wall (SN019992) W of Tunney's Pasture Station |
| West Nepean Collector |
| Ottawa River Parkway Pipe (ORPP) |
| Signalized pedestrian crossing at Rochester Field, including concrete approach slabs and unit paving |
| SJAM Parkway modifications and new traffic control signals at Kitchissippi Lookout and street lighting system |
| Modifications to SJAM Parkway westbound overpass structure at Westboro Beach, including electrical ducts for street lighting |
| Construction of new access to the existing parking area north/west of SJAM Parkway and Kitchissippi Lookout intersection |
| Construction of a new 4-lane SJAM Parkway between north of 30 Cleary Avenue to Dominion |
| |
| |
| Goldenrod Bridge Structure at Tunney's Pasture (SN016255) |

| Asset Name / Structure Number (if applicable) |
|---|
| W Twy - Ross Av O/P Transitway (SN016260) |
| W Twy - Northwestern Av O/P (SN016270) |
| W Twy - Carleton Av O/P (SN016330) |
| W Twy - Island Park Dr O/P (SN016280) |
| W Twy - Lanark AV O/P Transitway (SN016290) |
| Utility Hydro Bridge @ McRae over W Transitway (SN019890) |
| W Twy - Tweedsmuir Av O/P Transitway (SN016300) |
| W Twy - Athlone Av O/P Transitway (SN016310) |
| W Twy - Churchill Av O/P (SN016320) |
| W Twy - Roosevelt Av Ped Bridge O/P W Tway (SN018220) |
| SJAM Parkway at Carleton Avenue Pedestrian Overpass (North/South bridges) (SN018620 / 018621)(349969) |
| SJAM Parkway at Lanark Avenue Pedestrian Overpass (North/South bridges) (SN018610 / 018611)(349972) |
| SJAM Parkway at Churchill Avenue Pedestrian Overpass (SN018920) |
| SJAM Parkway at Cleary Avenue Pedestrian Overpass (SN018910) |
| Carling Avenue Bridge at Lincoln Fields Station (SN016070) |
| Pedestrian Bridge at [REDACTED] (SN018470) |
| Highway 417 Westbound Off-Ramp at Pinecrest Road (SN015160) |
| Highway 417 Westbound On-Ramp at Pinecrest Road (SN015170) |

ARTICLE 16 RECORD DRAWINGS

16.1 General

- (a) The Design Team shall track and document all changes from the IFC drawings up to, and including, the preparation of the Record Drawings which shall be in accordance with Schedule 10 – Review Procedure. Record Drawings shall be prepared for all aspects of the Work, including SI, NMI and New MTO Infrastructure.
- (b) DB Co shall keep a record of the As-Built condition and the reasons for any changes from the IFC documents, including any necessary authorizations. Where the As-Built condition deviates from the IFC documents, but continues to meet the requirements of the Output Specifications, such that any changes fall within the design and specification tolerances and do not require engineering sign-off by the responsible engineer, DB Co shall ensure that the drawings are marked up with the relevant information required to represent the As-Built condition, highlighting the difference from the IFC documents. DB Co shall sign and seal the Record Drawings as required in Schedule 14 – Testing and Commissioning, and provide them as soon as possible and in any event no later than 60 calendar days after each applicable Substantial Completion.
- (c) Where changes in the As-Built condition mean that the constructed Works would no longer meet the specifications outlined in the Output Specifications or would require Design Data to demonstrate compliance with the Output Specifications, then the responsible engineer shall revise the IFC documents and submit the Design Data as a Construction Document Submittal in accordance with Schedule 10 – Review Procedure, and shall be subject to the requirements outlined in this Article 16.
- (d) DB Co shall provide Record Drawings for any NMI in accordance with the requirements of any third party owner of such New Municipal Infrastructure.
 - (i) In addition, for City water and sewer NMI, full scale copies of As-built Drawings shall be provided to the City at each New Municipal Infrastructure Component Acceptance Date.
- (e) Record Drawings for NMI shall be produced in accordance with the requirements of the CADD Standards Manual, prepared by the City.
- (f) Temporary Detour Routes/Work
 - (i) As constructed engineering design drawings prepared in accordance with City design standards for each closure, detour route, lane shift, and diversion, or modification thereof, carrying public traffic or transit vehicles and intended to be in service for longer than six months shall be submitted in accordance with Schedule 10 – Review Procedure prior to requesting authorization from the roadway authority for the closure and/or to utilize the detour route, lane shift or diversion or modified version thereof.

- (ii) As constructed engineering design drawings prepared in accordance with City design standards for each intersection with a new temporary or permanent traffic control signal, or modification to an existing temporary or permanent traffic control signal, shall be submitted in accordance with Schedule 10 – Review Procedure within 30 calendar days of the activation of the traffic control signal, or within 30 days of the modification being made.
- (g) DB Co shall provide Record Drawings for any SI in accordance with the requirements of this Part 1 and Schedule 14 – Testing and Commissioning. Record Drawings for SI shall be produced in accordance with the requirements of the [REDACTED] Confederation Line Drawing Standards.

ARTICLE 17 OPERATIONS TRAINING

17.1 Operations Training Curriculum and Materials

- (a) At the City's request, DB Co shall support the City in their review and update of operations training programs, including training curriculum and materials to ensure compatibility with any new SI. The review of the training curriculum and materials apply to programs currently in use by the City for the Existing Confederation Line or under development for the Confederation Line system. DB Co's support to updating the operations training programs shall be timely and in accordance with the City's schedule.
- (b) DB Co shall be responsible for submitting suggested modifications to the training programs to the City for review and approval a minimum 12 months prior to East Substantial Completion or West Substantial Completion, whichever is earliest. Any new technical systems which require training material shall be developed by DB Co, and be subject to the review provisions of this article.
- (c) During the 12 month interval between the submission of suggested modifications to existing training programs and East Substantial Completion or West Substantial Completion, whichever is earliest, the City shall review and incorporate accepted modifications into the respective training programs. In addition, DB Co shall abide by the provisions of Clause 1.5(d) of Schedule 14 – Testing and Commissioning. The review of the training curriculum and materials apply to programs provided by DB Co, in addition to those programs provided by OC Transpo Trainers.

17.2 Track Availability For Operator Training

- (a) Track access to the full Confederation Line Extension for Operator training and certification will be required in advance of Trial Running to ensure the requisite number of Operators are trained and certified on the System Infrastructure to support Trial Running and revenue service operation, as identified by the City. At a minimum:
 - (i) Confederation Line East Extension: Beginning 84 days prior to Substantial Completion, DB Co shall provide the City with a minimum of eight consecutive hours per day of full system access for Operator training and certification between 0600 and 2400 hrs (Monday – Saturday);
 - (ii) Confederation Line East Extension: Beginning 56 days prior to Substantial Completion, DB Co shall provide the City with a minimum 16 consecutive hours per day of full system access for Operator training and certification between 0700 and 2300 hrs (Monday – Saturday);
 - (iii) Confederation Line West Extension: Beginning 84 days prior to Substantial Completion, DB Co shall provide the City with a minimum of 10 consecutive hours per day of full system access for Operator training and certification between 0600 and 2400 hrs (Monday – Saturday);

- (iv) Confederation Line West Extension: Beginning 56 days prior to Substantial Completion, DB Co shall provide the City with a minimum 16 consecutive hours per day of full system access for operator training and certification between 0700 and 2300 hrs (Monday – Saturday);
 - (v) Operator training and certification shall be conducted utilizing a fully functional CBTC system on the Confederation Line Extension and fully upgraded and functional CBTC headend system in the TOCC/BCC, reflective of the new line segments for use by City Controllers; and,
 - (vi) The City shall require the use of up to eight Vehicles for Operator training and certification on both the Confederation Line East Extension and Confederation Line West Extension. Vehicles for Operator training and certification will be provided by the City/[REDACTED].
- (b) DB Co shall provide a minimum of three months' advance notice of when Track access will be available for commencement of Operator Training and certification on the Confederation Line Extension.
 - (c) DB Co shall develop a Track access permit process that allows the City access to the full Confederation Line Extension during referenced periods for Operator training and certification. DB Co shall work cooperatively with the City in the approval of Track access requests and issuance of Track access permits for Operator training and certification.

17.3 Operator Training Simulator

- (a) OC Transpo maintains an Operator training simulator for the Existing Confederation Line.
- (b) DB Co shall support the City in the update of the simulator for the Confederation Line East and West Extensions by collaboratively providing information requested by the City.
- (c) Requested Information may include, but is not limited to the following:
 - (i) Infrastructure-Related:
 - A. Tracks and ROW: drawings, Track charts, designs, maps;
 - B. Stations:
 - i. Design documents (2d/3d CAD maps / mass and sections);
 - ii. Accurate location of Platforms along the Tracks;
 - iii. Ground marks accurate location (if applicable);
 - iv. Furniture: design documentation; and,

- v. PID signs: accurate location along the Platforms.
 - (ii) Systems – Related:
 - A. Signals:
 - i. Accurate locations (along Tracks): signals, signs, other signaling elements.
 - B. TPSS:
 - i. Accurate locations.
- (d) For clarity, the City shall be responsible for updating the simulator. DB Co shall only responsible for providing the required information, working collaboratively and in good faith.
- (e) The requested information shall be provided nine months prior to the start of OC Transpo Operator Training.
- (f) DB Co shall be responsible for all costs associated with any translation from other Project documents, assembly, transfer of information, or any other efforts associated with supporting the City with the simulator update.

17.4 [REDACTED] Operational Training and Support Requirements

- (a) DB Co shall provide the following [REDACTED] operational training and support requirements:
 - (i) Update and provision of all [REDACTED] training material to support a rail controller train-the trainer model including: instructor notes, interim quizzes and tests; classroom presentation materials; key exercises for standard and degraded modes of operation; student reading materials and theory; and pool of final examination materials and questions;
 - (ii) One standard 80-hour [REDACTED] controller training course for pool of new rail controllers / superintendents;
 - (iii) One 40 hour [REDACTED] controller Train-the-trainer course to qualify the City's instructors with the ability to deliver the training;
 - (iv) [REDACTED] oversight of the City's instructor's first 80-hour training class of new rail controllers;
 - (v) Two weeks of on-site [REDACTED] control room support during launch of Confederation Line East: Monday – Friday, 04:00 – 12:00 (AM peak), and,

- (vi) Four weeks of on-site **[REDACTED]** control room support during launch of Confederation Line West: Monday – Friday, 04:00 – 12:00 (AM peak).

ARTICLE 18 REMAINING WORKS

- (a) The following items, detailed elsewhere in this Schedule 15-2 – Design and Construction Requirements, shall be considered Remaining Works and the completion date of these items shall be permitted to follow Substantial Completion of the Confederation Line East Extension and Confederation Line West Extension, as applicable.
 - (i) The full completion of the Richmond Road Complete Streets work as outlined in Schedule 15-2, Part 2 – Civil and Guideway and Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements.
 - (ii) Landscaping work at Dominion Station, Iris Station and the reinstatement of the existing Transitway in the vicinity of Lincoln Field Station, as outlined Article 14 – Demolition, Removals and Disposal, of this Part 1 and in Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements.
 - (iii) Work required for the implementation of the Tunney’s Pasture Station design solution as outlined in Schedule 15-2, Part 4, Clause 3.1 (a).
 - (iv) The reinstatement/removal of the infrastructure required for the implementation of the Transitway detours as outlined in Schedule 15-2, Part 7, Clauses 3.6 through 3.15.
 - (v) The reconfiguration of the traffic lanes on OR174 after the removal of buses from the bus only lanes and the layout of the planned traffic lanes as outlined in Schedule 15-2, Part 2, Clause 6.19 (a).

**ARTICLE 19 DESCRIPTION OF CONFEDERATION LINE WEST, CONFEDERATION
LINE EAST AND HIGHWAY WORKS**

19.1 Description of Confederation Line West Extension (West Works)

- (a) The West Works shall involve completion of all components and systems necessary to independently run Revenue Vehicles between Tunney's Pasture Station to Baseline Station and Moodie Station, excluding Train Control and final Systems Integration. These works shall include, but not be limited to, all Guideway, Track, grading, drainage, Structures, landscaping, SWM, Utilities, geotechnical works, electrical works, environmental works, facilities, Traction Power, communications, corrosion control, OCS, signaling, LMSF, Tunnels, Tunnel ventilation, retaining walls and roadworks.
- (b) As a minimum, West Works shall include all Works in respect of:
 - (i) Stations at the following locations:
 - A. Westboro Station;
 - B. Dominion Station;
 - C. Cleary Station;
 - D. New Orchard Station;
 - E. Lincoln Fields Station;
 - F. Queensview Station;
 - G. Pinecrest Station;
 - H. Bayshore Station;
 - I. Moodie Station;
 - J. Iris Station; and,
 - K. Baseline Station.
 - (ii) Structures at the following locations:
 - A. Goldenrod Bridge Structure at Tunney's Pasture;
 - B. U Approach – Depressed Guideway Parkway East Portal;
 - C. U Approach – Depressed Guideway Parkway West Portal;
 - D. SJAM Parkway at Churchill Avenue Pedestrian Overpass;

- E. SJAM Parkway at Cleary Avenue Pedestrian Overpass;
- F. U Approach - Depressed Guideway Connaught East Portal;
- G. U Approach - Depressed Guideway Connaught West Portal;
- H. Carling Avenue Bridge;
- I. Pedestrian Bridge at [REDACTED];
- J. Lincoln Fields Split Structure;
- K. Pedestrian Bridge at Queensview Station;
- L. Holly Acres Bridge;
- M. Iris Street Bridge;
- N. Pinecrest Creek Culvert under Iris;
- O. Pinecrest Creek Culvert under Alignment;
- P. Roosevelt Pedestrian Bridge; and,
- Q. Baseline Station Pedestrian Bridge.

(iii) Cut and cover tunnel elements at the following locations:

- A. SJAM Parkway & Richmond Tunnel – New LRT tunnel that commences at east portal adjacent to Rochester Field and emerges at west portal located between Richmond Road and Lincoln Fields Station. The tunnel traverses underneath the SJAM, Richmond Road and Byron Linear Park with direct connection to two underground stations; Cleary and New Orchard Station. Approximate length 2,900m
- B. Connaught Tunnel – New LRT tunnel that traverses under Connaught Avenue Approximate length 380m
- C. HWY 417 E-NS Pinecrest Road Ramp Tunnel – New LRT tunnel that traverses under HWY 417 E-NS Pinecrest Road Ramp. Approximate length 100m

(iv) Roadwork:

- A. Richmond Road – reconstruction of Richmond Road between Redwood Avenue and Edgeworth Avenue.

- B. Realignment of the SJAM Parkway between Dominion Station and Cleary Avenue.
- C. Reconfiguration of the Hwy 417/Pinecrest Road Interchange ramps including N-W, S-W and E-N/S.
- (v) Storm Water Management:
 - A. Pinecrest Stormwater Management Facility
- (vi) LMSF:
 - A. An LMSF for approximately 34 vehicles in 2023 on a site to be determined by the Moodie LRT EA currently underway.

19.2 Description of Confederation Line East Extension (East Works)

- (a) The East Works shall involve completion of all components and systems necessary to independently run Revenue Vehicles between Blair Station and Trim Station, excluding Train Control and final Systems Integration. These works shall include, but not be limited to, all Guideway, Track, grading, drainage, Structures, landscaping, SWM, Utilities, geotechnical works, electrical works, environmental works, facilities, Traction Power, communications, corrosion control, OCS, signaling, retaining walls and roadworks.
- (b) As a minimum, East Works shall include all Works in respect of:
 - (i) Stations at the following locations:
 - A. Montreal Road Station;
 - B. Jeanne d'Arc Station;
 - C. Orleans Boulevard Station;
 - D. Place d'Orléans Station;
 - E. Trim Road Station; and,
 - F. Protection for future stations Gloucester High School, Orléans Town Centre and Tenth Line Road.
 - (ii) Structures at the following locations:
 - A. Montreal Road Flyover;
 - B. Westbound OR174 Bridge over Montreal Road;
 - C. Montreal Road Station Bridge;

- D. Eastbound OR174 Bridge over Montreal Road;
 - E. Greens Creek structure under OR 174; and,
 - F. Pedestrian Bridge at Trim Station.
- (iii) Roadwork:
- A. Widening of OR174 at Montreal Road to accommodate new Montreal Road Station structure in median;
 - B. Reconfiguration of OR 174/Montreal Road interchange ramps to accommodate widening;
 - C. Reconfiguration of westbound ramps at Jeanne d'Arc Boulevard to accommodate station entrance requirements;
 - D. Widening of the OR174 median from east of Blair Road to east of Montreal Road to accommodate median LRT as well as some localized median widening at some station locations;
 - E. Construction of new Trim Road/OR174 interchange including localized road reconfigurations to accommodate; and,
 - F. Culvert replacements/rehabilitations along OR174 and ramps.

19.3 Description of Highway Works

- (a) Highway Works shall involve completion of the prescribed Highway Works at the prescribed locations below. Within the prescribed locations, these works shall include, but not be limited to, grading, drainage, Structures, landscaping, Utilities, geotechnical works, electrical works, environmental works, retaining walls, roadworks and signage.
- (b) As a minimum, Highway Works shall all include:
 - (i) Construct retaining walls within the limits of the Highway 417 ROW where deemed necessary, and to facilitate the reconfigured ramps N-W, S-W and E-N/S at Pinecrest Road and the reconfigured Holly Acres N/S-W ramp.
 - (ii) Replace and/or install new Drainage features, as required along the reconfigured ramps N-W, S-W, and E-N/S at Pinecrest Road and the reconfigured Holly Acres N/S-W ramp.
 - (iii) Replacement of existing or new overhead sign structures, signage and required appurtenances, deemed necessary for the reconfigured ramp E-N/S at Pinecrest Road, the reconfigured Holly Acres N/S-W ramp, and any that are in conflict with the new Pedestrian Bridge at Queensview Station.

- (iv) Replacement/and/or relocation of ramp light and illumination features and appurtenances, as required at the reconfigured ramps N-W, S-W and E-N/S at Pinecrest Road and the reconfigured Holly Acres N/S-W ramp.
- (v) Replacement of required highway signage and roadside Safety equipment, as required.
- (vi) Install new sidewalk and parapet wall on the west side of Moodie Drive including the sidewalk connections along the north and south approaches to the ramp terminals.
- (vii) Structures at the following locations:
 - A. Highway 417 Westbound Off-Ramp at Pinecrest Road;
 - B. Highway 417 Westbound On-Ramp at Pinecrest Road;
 - C. Pinecrest Road Bridge;
 - D. Graham Creek south extension to facilitate Temporary Transitway detour if warranted by Transitway operation performance specifications;
 - E. Highway 417 S-W On-Ramp at Moodie Drive;
 - F. Moodie Drive Bridge over Highway 417;
 - G. Highway 417 N-W On-Ramp at Moodie Drive; and,
 - H. Overhead Sign Supports where required.

APPENDIX A

Proposed Design Criteria for the Roadway Improvements in OLRT - Stage 2

| Table 1 - Confederation Line West Design Criteria | | | | | |

| Traffic Growth Rate Assumption ^{27, 28, 29} | 1% | 1% | 1% | | |

- ¹ Roadway classifications are identified in the City of Ottawa Official Plan – Schedule E. DB Co shall confirm all roadway classifications with the City of Ottawa.
- ² All posted speed limits and advisory speed signs shall be maintained for all design elements.
- ³ Minimum radius corresponds to maximum superelevation values for road classification and design speed.
- ⁴ The minimum radius and K factors (sag and crest) for the eastbound lanes shall be per the requirements of Schedule 15-2, Part 2, Appendix C. For the westbound lanes, the minimum radius shall be 220m, including associated spiral parameters as necessary, to feasibly tie into existing conditions at the limits of construction. The minimum K factors (sag and crest) for the westbound lane shall meet the requirements of the TAC GDGCR.
- ⁵ The minimum K factor for sag vertical curves shall meet the minimum comfort controls based on the presence of illumination.
- ⁶ Maximum longitudinal grade assumes a rolling terrain, unless otherwise specified.
- ⁷ NCC requirements for longitudinal grades shall not exceed 3%.
- ⁸ Maximum roadway superelevation corresponds to road classification (L – Local, C – Collector, A – Arterial, F – Freeway). NC denotes normal crown. RC denotes reverse crown.
- ⁹ The stopping sight distance parameters referenced as per TAC GDGCR, or MTO GDSOH, are minimum typical values. Additional sight distance may be required under certain constrained conditions. In all cases, DB Co's design shall meet the requirements of Schedule 15-2, Part 2, Clause 6.5.
- ¹⁰ Minimum decision sight distances shall be based on Avoidance Manoeuvre E, unless otherwise specified.
- ¹¹ General lane width requirements shall meet the minimum lane widths as prescribed in the Transportation Association of Canada (TAC) Geometric Design Guide for Canadian Roads based on the corresponding road classification. For Roadways with a design speed less than 60km/h or less, the median lane width shall be a minimum of 3.25m wide.
- ¹² Auxiliary lanes with high transit volumes shall be a minimum of 3.5m.
- ¹³ DB Co shall design and construct pedestrian facilities to have a standard width of 3.0m. Only under constrained conditions, where the available right-of-way limits the width of the pedestrian facilities (i.e. bus stop locations), may DB Co reduce the pedestrian facilities to a minimum width of 2.0m. DB Co's geometric design shall satisfy the minimum design criteria requirements for Richmond Road and maximize the space available for the Byron Linear Park improvements of Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements, such that the cross sectional elements, including but not limited to 3.0m sidewalk on the north side of Richmond Road, are not compromised for the inclusion of street furniture and other streetscaping features (trees, municipal infrastructure (i.e. hydrants)). Side streets sidewalk connections shall be between 1.8m – 2.0m wide.
- ¹⁴ DB Co shall provide a typical 300mm wide delineator strip to segregate adjacent pedestrian and cycling facilities. A 200mm wide delineator strip will be accepted only under constrained conditions, where the available right-of-way is limited.
- ¹⁵ The boulevard on the north and south side of Richmond Road shall be 0.75m and 0.60m wide, respectively. These represent the absolute minimum design values in constrained conditions. Typical boulevard widths shall be minimum 1.2m, where applicable.
- ¹⁶ All shoulders shall be paved to meet the City's Standard Tender Package Standard Detail Drawings and Specifications.
- ¹⁷ Cycling facilities shall be a minimum of 1.5m. The type of bike lane facility (on-road, shared, raised cycle track, paved shoulder) are to be confirmed by DB Co with the City of Ottawa.
- ¹⁸ Cycling facility for this roadway segment has been considered as a raised cycle track.
- ¹⁹ 3.0m wide cycling facilities shall accommodate bi-directional cycling lanes.
- ²⁰ The minimum 5.0m wide median was developed to accommodate a median bioswale.

-
- ²¹ The minimum 7.5m wide median width has been measured between opposing edge of inside (median) lanes.
- ²² For side slope/ back slopes steeper than 3:1, the warrant for roadside safety measures shall be assessed per the MTO Roadside Safety Manual.
- ²³ All A-Bus and B-12 design transit vehicles shall meet the dimensions and specifications per OC Transpo's transit vehicle fleet as per the requirements of Schedule 15-2, Part 2, Clause 6.9(c)(vi).
- ²⁴ Traffic information (AADT and Heavy Truck %) based on 8-hour turning movement counts provided by the City of Ottawa.
- ²⁵ For the purpose of pavement design of all Roadways, DB Co shall assume 2% as the minimum percentage of heavy vehicles to be applied on all non-truck routes even though a lower percentage is specified in the Design Criteria Table.
- ²⁶ The proposed SJAM corridors will not need to accommodate the bus rapid transit service ultimately, in the post construction or post commissioning stage. Buses only need to be accommodated on the SJAM corridor during the temporary conditions, or staged construction.
- ²⁷ Traffic growth rates are based on 'EMME' model outputs comparing 2011 and 2031 volumes provided by the City of Ottawa.
- ²⁸ Traffic projection horizon shall be year 2031 for all transportation impact assessments and traffic and transit analysis studies, unless otherwise noted.
- ²⁹ For the purpose of determining projected traffic volumes in traffic and transit analysis, DB Co shall reference the traffic growth rates specified in the design criteria, accordingly. Where the growth rates are used for the purpose of calculating pavement design requirements, DB Co shall use a minimum of 1.0% or the traffic growth rates specified in the design criteria, whichever is greater.
- ³⁰ Proposed Improvements on Scott Street involves widening the existing pavement to the north side so that Scott Street will have 3 basic lanes (2 travel lanes in the westbound and one a single lane in the eastbound direction of traffic) through the Goldenrod intersection, which transitions to 2 basic lanes (one travel lane in each direction of traffic) approaching Ross Avenue (Sir Frederick Banting Driveway) intersection.
- ³¹ DB Co's profile design shall meet the requirements of Schedule 15-2, Part 2, Article 6, Clause 6.19 (j).
- ³² DB Co shall design the vertical profile for Corkstown Road above the floodplain elevation of a 1:100 year flood event.
- ³³ DB Co shall design the realigned section of Corkstown Road to have a consistent reverse crown slope (2%).
- ³⁴ Lane widths shall match existing conditions.
- ³⁵ The westbound one-way general traffic lane on Corkstown Road shall be 4.8m wide, with the exception of where the lane is adjacent to another travel lane or bus lane, in which case the lane width can be reduced to 3.5m.
- ³⁶ The width of curbside pick-up and drop-off parking spaces on Iris Street shall be a minimum of 2.6m.
- ³⁷ A 0.3m wide buffer separates the cycle track from the roadway and the sidewalk from the cycle track.
- ³⁸ DB Co shall provide a 2.0m wide sidewalk on both sides of Iris Street. In addition to the sidewalk on the south side of Iris Street, DB Co shall provide a 3.0m wide multi-use pathway adjacent to the sidewalk separated by a 0.3m wide buffer.
- ³⁹ DB Co shall construct a 3.0m wide MUP on the north side of Corkstown Road to maintain the connection between Moodie Drive and the Watts Creek pathway.
- ⁴⁰ DB Co shall provide a 1.8m wide raised cycle track in the eastbound direction and a 1.8m wide bike lane in the westbound direction.
- ⁴¹ DB Co shall preserve a 4m space on the shoulder of the southbound lanes along Blair Road for a future cycling and pedestrian facility as per the requirements of Schedule 15-2, Part 7.
- ⁴² Along the section of realigned Trim Road south of the OR174, the roadway cross section shall have 2 northbound lanes and 1 southbound lane. Approaching the intersection of the realigned Trim Road and OR174 intersection, one of the northbound lanes shall transition into the northbound left turn auxiliary lanes, as required. For the section of realigned Trim Road north of the OR174, Trim Road shall have a single northbound and southbound travel lane.

- ⁴³ The minimum radius of 650m is for the tie-in of the Roadway Works associated with the OR174 to existing conditions, east of Trim Road where the design speed shall be 110 km/h with a posted speed of 90km/h. DB Co shall reference the requirements from the TAC GDGCR for the minimum radius for the Roadway Works west of Trim Road.
- ⁴⁴ Any deviations from the maximum grades on the OR174 profile shall meet the requirements of the MTO GDSOH Clause C4.2.1.
- ⁴⁵ Minimum decision sight distance for rural roadways shall be based on Manoeuvre C.
- ⁴⁶ Where there are only 2 general purpose lanes required along OR174 (+ speed change lanes, where applicable), the lane width of general purpose Lane No. 1 (next to the median) and Lane No. 2 (the outside general purpose lane) both shall be 3.75m typical. The width of speed change lane shall be 3.5m typical. The width of interchange ramps shall be 4.75m. Where provisions for the future High Occupancy Vehicle (HOV) lanes are to be considered in the Design and Construction of Stage 2 Works on OR174 from Blair Road to Montreal Road and under Trim Road new bridge structure, DB Co shall follow the following lane widths criteria:
- Median (left) shoulder shall be 3.0m wide typical.
 - Lane No. 1, next to the median shoulder, shall be 3.75m wide. Lane No. 1 will become the future HOV lane.
 - Lane No. 2, right of Lane No. 1, shall be 4.75m wide. The width of Lane No. 2 is sized to provide a 1.25m buffer between Lane No. 1 and Lane No. 2 and a 3.5m wide general purpose lane as future lane No. 2 upon conversion of Lane No. 1 to an HOV lane.
 - Lane No. 3, the outside general purpose lane, to be 3.75m wide.
 - Outside (right) shoulder to be 3.0m wide typical, except in the presence of 3.5m wide speed change lanes where the outside shoulder shall be 2.5m wide typical.
- ⁴⁷ The proposed sidewalk on Trim Road shall be raised by no more than 50mm in comparison to the adjacent cycle track in order to provide a physical separation. DB Co shall coordinate and develop the design for the raised treatment to the satisfaction of the City of Ottawa.
- ⁴⁸ A 3.0m wide asphalt MUP shall be provided adjacent to the outside northbound lane.
- ⁴⁹ The minimum median (left) and outside (right) shoulder width is 3.0m typical but may be reduced to an absolute minimum of 1.0m to accommodate Physical Constraints. Where physical constraints are less than 160m apart, DB Co is permitted to continue the minimum 1.0m shoulder between the physical constraints. Where physical constraints are more than 160m apart and less than 200m apart, the City may consider relaxing the requirement to restore a 3.0m shoulder between the physical constraints.
- ⁵⁰ The bike lanes on the existing Trim Road shall be raised cycle tracks adjacent to outside (curbside) lane on either side of the roadway, separated by a 0.6m wide boulevard, so that that total raised cycle track section including the boulevard is 2.4m wide. The proposed cycle track shall be raised by 150mm in comparison to the adjacent roadway.
- ⁵¹ DB Co shall design and construct raised concrete medians adjacent to auxiliary lanes.
- ⁵² Traffic projection horizon shall be year 2036 for all transportation impact assessments and traffic and transit analysis studies related to Trim Road/ OR174 Interchange, including Trim Park and Ride facility.
- ⁵³ The median lane shall be 3.75m wide and the curbside lane shall be 3.5m wide along Montreal Road.
- ⁵⁴ The median lane shall be 3.75m wide and the curbside lane shall be 3.5m wide along Montreal Road. Bus lanes shall be a minimum of 3.5m wide.
- ⁵⁵ The full width between abutment face to curb shall be 8.0m, consisting of a 2.0m sidewalk, 2.0m wide bus shelter (where applicable), 2m width for bus staging/access, 1.5m width for cycle track and 0.5m width for cycle track buffer. Cycle track shall be discontinued from the bus shelters to the station entrance.
- ⁵⁶ The bike lanes on Montreal Road shall be unidirectional raised cycle tracks adjacent to outside (curbside) lane one either side of the roadway, separated by a 0.5m wide hard surface boulevard, so that the total raised cycle track section including the boulevard is 2.0m wide.

| Table 2 – Confederation Line Left Turn Storage Length Requirements at Signalized Intersections | | | |
|--|----------------------|-----------------------|-----------------------|
| Primary Roadway | Intersecting Roadway | Intersection Approach | Storage Length (Min.) |
| Richmond Road | McEwen Avenue | Eastbound | 35m |
| | | All | N/A |
| | Woodroffe Avenue | Eastbound | 30m |
| | | Westbound | 70m |
| | | Northbound | 50m |
| | | Southbound | 30m |
| | Cleary Avenue | Southbound | 15m |
| Scott Street | Goldenrod Driveway | Eastbound | 20m |
| | | Westbound | 15m |
| | | Southbound | 60m |

| Table 3 – Confederation Line East: OR174 Lane Configuration | | |
|---|--|--|
| Roadway Segment | Westbound | Eastbound |
| From east of Blair Road to west of Montreal Road interchange | 3 general purpose lanes (+ speed change lanes, where applicable) ^A | 3 general purpose lanes (+ speed change lanes, where applicable) ^B |
| From west of Montreal Road interchange to west of Green's Creek | 3 general purpose lanes (+ speed change lanes, where applicable) ^B | 3 general purpose lanes (+ speed change lanes, where applicable) ^{B, C} |
| From west of Green's Creek to west of realigned Trim Road | 2 General Purpose Lanes (+ speed change lanes, where applicable) ^D | 2 General Purpose Lanes (+ speed change lanes, where applicable) ^D |
| From west of realigned Trim Road to east of realigned Trim Road | 1 General Purpose Lanes (+ speed change lanes, where applicable) ^{E, F} | 2 General Purpose Lanes (+ speed change lanes, where applicable) ^{E, G} |

- ^A Along the section from east of Blair Road through to west of Montreal Road interchange, DB Co shall maintain the existing lane configuration, which includes 3 general purpose lanes (and speed change lanes, where applicable). The width of general purpose Lane 1 (next to the median shoulder) is 3.75m, Lane 2 (right of Lane 1) is 3.75m, and Lane 3 (outside general purpose lane) is 3.5m.
- ^B DB Co shall construct the proposed pavement wide enough in this section so that it will accommodate the provision for a (High Occupancy Vehicle) HOV lane including a buffer and 2 general purpose lanes (and speed change lanes, where applicable) without a need for additional widening in the future when the HOV lane is implemented along OR174 corridor. For the width of general purpose Lane 1 (next to the median shoulder), Lane 2 (right of Lane 1), and Lane 3 (outside general purpose lane), see the endnote associated with OR174 lane width in this Design Criteria.
- ^C Lane 3 (outside general purpose lane) shall be constructed in the ultimate location but not open to traffic until HOV is implemented for the OR174. Related interchange on-ramps (i.e. N-E and S-E ramps) shall be constructed to their ultimate location considering future HOV widening requirements without the need to reconstruct the S-E ramp. In order to accommodate the improvements, it is acceptable to terminate the 3rd lane with appropriate line painting to tie-in with Lane 2 between the bullnose for the N-E ramp through to the bullnose of the S-E ramp.

-
- ^D For the width of general purpose lanes 1 and 2, see the endnote associated with OR174 lane width in this Design Criteria.
- ^E DB Co shall accommodate for the provision of a (High Occupancy Vehicle) HOV lane including a buffer and 1 general purpose lane (and speed change lanes, where applicable) and appropriate shoulder widths in the future when the HOV lane is implemented along the OR174 corridor. For the width of the HOV lane and general purpose lanes, see the endnote associated with OR174 lane widths in this Design Criteria.
- ^F The general purpose lane will be the continuation of the existing OR174 westbound general purpose lane that extends from the east to west of the realigned Trim Road and OR174 signalized intersection and constitutes one of the 2 continuous general purpose lanes in the section west of the intersection. On the westbound approach and departure of the proposed realigned Trim Road and OR174 signalized intersection, DB Co shall accommodate three westbound through lanes per Schedule 15-2, Part 2, Appendix B. DB Co shall design and construct appropriate diverging and merging transitions for the westbound through lanes from the east to west of the realigned Trim Road and OR174 signalized intersection as per the requirements of Schedule 15-2, Part 2, Article 6.19.
- ^G The general purpose Lane 1 (next to the median shoulder) will continue further east and tie into the existing general purpose lane east of the realigned Trim Road and OR174 signalized intersection and the Lane 2 (right of Lane 1 or outside lane) will terminate with an appropriate transition east of the realigned Trim Road and OR174 signalized intersection. For added clarity, when the HOV lane is implemented along OR174 corridor in the future, the pavement in this section will be widened by others to accommodate the provision for a (High Occupancy Vehicle) HOV lane including a buffer and 1 general purpose lane (and speed change lanes, where applicable).

Appendix H – Form of Road Safety Audit Certificates

1. Road Safety Audit Certificate (Stage 1)
2. Road Safety Audit Certificate (Stage 2)
3. Road Safety Audit Certificate (Stage 4)

Certificate Ref No. []

ROAD SAFETY AUDIT CERTIFICATE (STAGE 1)

This Certificate is being delivered pursuant to the agreement between the City of Ottawa and [DB Co] dated • (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this Certificate have the same meanings as ascribed thereto in the Project Agreement.

Form of Certificate to be used by the designer for certifying that a Stage 1 Road Safety Audit has been carried out in accordance with [Schedule 15-2, Part 2, Article 6] of the Design and Construction Specifications.

1. We certify that the Pre-Final Design Development of [.....] has been the subject of a Stage 1 Road Safety Audit in accordance with [Schedule 15-2, Part 2, Article 6] of the Design and Construction Specifications, the Design Quality Management Plan and all other relevant provisions of the Project Agreement.
2. The Road Safety Audit Team’s report and statement certifying the audit has been carried out are attached.

Signed:

Road Safety Audit Team (Principal)

Name:

Title:

Date:

Professional Registration Number:

Affix Professional Seal

3. We certify that the preliminary design of [.....] has been the subject of a Stage 1 Road Safety Audit in accordance with [Schedule 15-2, Part 2, Article 6] of the Design and Construction Specifications, the Design Quality Management Plan and all other relevant provisions of the Project Agreement and that all observations and recommendations in the Road Safety Audit Team’s report have been satisfactorily addressed and resolved.

ROAD SAFETY AUDIT CERTIFICATE (STAGE 2)

This Certificate is being delivered pursuant to the agreement between the City of Ottawa and [DB Co] dated • (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this Certificate have the same meanings as ascribed thereto in the Project Agreement.

Form of Certificate to be used by the designer for certifying that a Stage 2 Road Safety Audit has been carried out in accordance with [Schedule 15-2, Part 2, Article 6] of the Design and Construction Specifications.

1. We certify that the Final Design Development of [.....] has been the subject of a Stage 2 Road Safety Audit in accordance with [Schedule 15-2, Part 2, Article 6] of the Design and Construction Specifications, the Design Quality Management Plan and all other relevant provisions of the Project Agreement.
2. The Road Safety Audit Team’s report and statement certifying the audit has been carried out are attached.

ROAD SAFETY AUDIT CERTIFICATE (STAGE 4)

This Certificate is being delivered pursuant to the agreement between the City of Ottawa and [DB Co] dated • (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this Certificate have the same meanings as ascribed thereto in the Project Agreement.

Form of Certificate to be used by the designer for certifying that a Stage 4 Road Safety Audit has been carried out in accordance with [Schedule 15-2, Part 2, Article 6] of the Design and Construction Specifications.

1. We certify that the **[reference relevant works]** as constructed, tested and commissioned has been the subject of a Stage 4 Road Safety Audit in accordance with [Schedule 15-2, Part 2, Article 6] of the Design and Construction Specifications, the Design Quality Management Plan and all other relevant provisions of the Project Agreement.
2. The Road Safety Audit Team’s report and statement certifying the audit has been carried out are attached.

APPENDIX J2

[REDACTED]

APPENDIX K

Pedestrian Crossover Infrastructure Requirements

1.0 General

1.1 Scope

- a) This general specification identifies additional construction requirements specific to PXO facilities, including but not limited to, traffic infrastructure, street lighting, traffic signs, and pavement markings.

2.0 Reference Standards

- a) These are the primary references for the design and construction of a pedestrian crossover per Schedule 15-2, Part 2, Clause 6.1(a). DB Co shall reference, but not be limited to, the following reference material for the design and construction of a pedestrian crossover:
- RRFB Specification (Appendix K1 - below)
 - City of Ottawa Pedestrian Crossover (PXO) Program (Appendix K2 – separate document)
 - City of Ottawa Right-of-Way Lighting Policy
 - Ministry of Transportation of Ontario (MTO) Ontario Traffic Manual (OTM) Book 15
 - Ontario Regulation 402/15

3.0 Approval of Source

- a) DB Co shall coordinate and request approval from the City of Ottawa for their pedestrian crossover designs according to the requirements of Schedule 15-2, Part 2, Table 6-1 before proceeding to order, supply and install the pedestrian crossovers. For the permanent installation of pedestrian crossovers, DB Co shall only supply and install materials provided by manufacturers approved by the City of Ottawa or its agent. Only materials evaluated and approved will be accepted. Once the materials are approved, DB Co and the manufacturer shall not change the material type or component parts without prior approval, by the City of Ottawa or its agent, for subsequent orders.

4.0 Characteristics (Physical, Electrical, Environmental, Operational)

4.1 Physical Characteristics

4.1.1 Traffic Poles and Foundations

- a) DB Co shall supply and install the traffic infrastructure referenced from Table 1 below, based on the PXO Type and presence of street lighting, per the City of Ottawa Standard Detail Drawings.

Table 1: Pole Type and Foundation Detail for each PXO Type

| PXO Type | | City of Ottawa Standard Detail Drawing | | |
|----------|--------------------|--|--------|--------------------|
| | | Pole Type | | Foundation Details |
| Type B | w/ street lighting | Joint Use (32') | J-6-16 | As per T23 |
| | w/o street | Mast Pole | J-6-51 | As per T22 |

| | | | | |
|--------|---------------------|-----------------|------------------|--------------------------|
| | lighting | | | |
| Type C | w/ street lighting | Joint Use (32') | J-6-16 (w/o arm) | As per T23 |
| | w/o street lighting | Tubular Pole | J-6-49 (w/o arm) | As per T21 (or LID 002D) |

- a) DB Co shall refer to the attached design references for the placement and spacing of signs, push buttons, RRFB, etc. on the appropriate poles.

4.1.2 RRFB

- a) DB Co shall reference the City of Ottawa RRFB specification included with this Appendix. The City has pre-approved the following RRFB models:
- JSF RRFB Model AB 9207 (Single-sided)
 - JSF RRFB Model AB 9407 (Double-sided)
 - Carmanah SC 315 (Single-sided or double-sided)

4.2 Electrical Characteristics

- a) DB Co is to coordinate and provide sufficient notice to the City of Ottawa prior to making any electrical connections per Schedule 15-2, Part 2, Table 6-1. An authorized City of Ottawa electrical maintenance provider shall complete all final electrical connections.
- b) For the installation of the RRFBs, DB Co shall comply with the requirements of the RRFB specifications.

4.3 Environmental Characteristics

- a) For the installation of the RRFBs, DB Co shall comply with the requirements of the RRFB specifications.

4.4 Operational Characteristics

4.4.1 Illumination

- a) DB Co shall coordinate with the City of Ottawa Street Lighting Group to confirm if the proposed location of the PXO meets the required City of Ottawa lighting level criteria as per City of Ottawa ROW Lighting Policy. If the location does not meet the required lighting level criteria, DB Co shall design, obtain approvals, supply materials and labour, equipment, construct, provide inspection and testing associated with the City's requirements for street lighting standards and best practices, or upgrade the existing fixtures to meet the appropriate lighting levels.
- b) For the installation of new street lights, DB Co shall supply and install all luminaires and the associated traffic fixtures, or an equivalent approved material. The type/model of street light varies for each specific site. As such, DB Co shall confirm

with City of Ottawa Street Lighting Group for the appropriate type/model of each material required for new street lights.

- c) An authorized City of Ottawa Street Light maintenance provider shall complete all final electrical connections.

4.4.2 Traffic Signs

- a) DB Co shall design, supply and install all temporary and permanent traffic signs for a pedestrian crossover per the requirements of OTM Book 5 and Book 15.

4.4.3 Pavement Markings

- a) DB Co shall design, supply and install all temporary and permanent pavement markings for a pedestrian crossover per the requirements of OTM Book 11 and Book 15.
- b) The dimensions of the “shark tooth” pavement markings in the general traffic lanes shall be:
 - Height = 90 cm
 - Width = 60 cm
 - Spacing = 30 cm

Appendix K1 - RRFB Specification

1.0 General Requirements

- a) RRFB's are pedestrian-activated, high-intensity flashing beacons that warn drivers of the presence of a pedestrian in the crosswalk. RRFB's consist of two rectangular yellow indications with two tell-tale end indicators to let pedestrians know that the beacon is flashing. RRFB's must be activated manually by pushbuttons and are to flash in a rapid pattern for a pre-set time.
- b) The Ontario Traffic Manual (OTM) Book 15, outlines the components and installation layouts of RRFB's at pedestrian crossovers. All RRFB's supplied must be compliant with Book 15 applications and requirements and also be compliant with all certifications, as may be required by law.
- c) The RRFB must be widely distributed and have been on the market for more than two (2) years.

2.0 General Design

- a) The unit shall be available in two configurations, double-sided and single-sided. A RRFB unit shall consist of the RRFBs, associated enclosure, and a power supply consisting of a solar panel with rechargeable battery(s) and a push button for activation. The unit may have a separate controller and/or battery cabinet if so required.
- b) The RRFB's must be capable of being mounted on these poles above the Pedestrian Crossing sign and at a height between 3.0m and 4.0m from the base of the pole.

3.0 RRFB Specifications

- a) The enclosure in which the RRFBs are mounted must be yellow. The yellow colour must be similar to that used on warning signs in the Province of Ontario. Refer to the OTM Book 1B. Where a separate controller/battery cabinet is provided, the cabinet shall be grey.
- b) All RRFB enclosures (and controller/battery cabinet if applicable) shall be powder coated aluminum and shall be weather tight, secure and vandal resistant. All enclosures/cabinets shall have a minimum 5 year corrosion damage warranty.
- c) Each single-sided RRFB unit shall provide two (2) LED rectangular-shaped amber indications facing outward toward on-coming traffic. A double-sided unit shall provide an additional two (2) LED indications facing the opposite direction.
- d) Each LED indication shall be a minimum of 125mm wide by 50mm high. The two (2) RRFB indications shall be aligned horizontally, with the longer dimension horizontal and with a minimum space between the two indications of 175 mm, measured from inside edge of one indication to the inside edge of the other indication.

- e) The RRFBs shall provide a minimum of 20 degrees horizontal pivot. When set, the RRFB angle shall remain securely in place.
- f) Each RRFB unit shall provide two (2) yellow LED tell-tale end indicators, one facing inward toward the crossover the other facing outward. Each tell-tale indicator shall be a minimum of 5 sq. cm.

4.0 Power Specifications

- a) Each unit shall be powered by a rechargeable battery(s). The battery(s) shall be recharged by solar panels.
- b) Each unit must be capable of being connected directly to 120 volt AC power or to be capable of being modified to provide a direct AC connection. In the case where the supplied unit does not provide a direct AC connection, an “AC modification package” must be available from the manufacturer that would enable the unit to accept a direct AC connection. The “AC modification package” must be easily field installable. The cost of the “AC modification package” must be available at a cost of [REDACTED].
- c) The power supply must be capable of operating the RRFB unit (from full charge) for a minimum of 20 days without re-charging at an average usage rate of 200 cycles per day at 25 seconds of activation/per cycle.
- d) The solar panel and battery(s) must be of sufficient size and capacity to provide the necessary power as recommended by the manufacturer to achieve the rated usage, where installed in Ottawa, Ontario, Canada.
- e) The battery(s) shall be UL certified and field replaceable.
- f) The solar panel must be capable of being securely installed on the top and on the side of the J-6-49, J-6-51 or J-6-16 (side only) pole that the RRFB is mounted.
- g) All brackets and hardware required to mount the solar panels must be supplied with the unit. All brackets and mounting hardware are to be corrosion resistant. Brackets and mounting hardware must be supplied to enable 12 side-of-pole installations and 20 top-of-pole installations.
- h) All wiring connections for the RRFB unit components must be capable of being easily installed within the poles specified (J-6-49, J-6-51, J-6-16). All wiring and connections shall be weather tight, secure and vandal resistant.
- i) The unit is to be supplied with an accessible push button for pedestrians to activate the RRFB's. The push button is to be yellow and must be capable of being mounted on the same pole that the RRFB is mounted. Brackets and mounting hardware to attach the push button to the poles specified must be supplied.

- j) The pushbutton shall have a two-tone audible confirmation.
- k) The power supply, including battery and solar panel and all other components must be capable of operating at temperatures between -40°C and +40°C. Any upgrades to the power supply or other components recommended by the manufacturer required to ensure the unit operates at its rated usage, within this temperature range are to be included.

5.0 Operational Requirements

- a) The operation of the RRFB shall be as outlined in OTM Book 15.
- b) When activated by push button, the two (2) yellow indications in each RRFB unit (two in each direction for double sided units) shall flash in a rapidly alternating “wig-wag” flashing sequence (left light on, then right light on) with a duty cycle of 800 milliseconds (ms). The left LED flashes two times in a slow volley each time it is energized (125 ms on and 75 ms off per flash). This is followed by the right LED, which flashes four times in a rapid volley when energized (25 ms on and 25 ms off per flash) and then has a longer flash for 200 ms. The effect is known as a “stutter flash effect” and is compliant with the Manual on Uniform Traffic Control Devices (MUTCD) RRFB flash pattern 2/4-1 (2012).
- c) The RRFBs must also be capable of flashing in compliance with MUTCD RRFB flash pattern WW+S (2014) (Wig-Wag plus Simultaneous).
- d) The unit’s flash pattern shall be capable of being easily set in the field through manual means (switch, dial, etc.).
- e) When the RRFB is flashing, the two tell-tale end indicators on the unit shall be on. Otherwise, they are to be off.
- f) The time lapse between the push button activation and start of the RRFB flashing should be less than 1 second and in no case more than 3 seconds.
- g) If a pedestrian pushes the button midway through a flashing cycle, the unit is to reset the RRFB flash duration for another full cycle.
- h) The flash rate of each individual yellow indication, as applied over the full on-off sequence of a flashing period of the indication, shall not be between 5 and 30 flashes per second.
- i) The flash duration cycle of the RRFB must be variable. The flash duration cycle must be capable of being set (in 5 seconds increments) for a minimum of 5 seconds up to 60 seconds.
- j) Generally more than one (1) RRFB unit is installed at a PXO. The operation of these units must be synchronized to enable the activation of one RRFB unit to automatically activate up to four (4) additional RRFBs.

- k) The communication “channel” for the RRFB to synchronize with other RRFB units shall be capable of being easily set in the field through manual means (switch, dial, etc.).
- l) Communication enabling the synchronization of the RRFB units shall be wireless and must operate within a minimum line-of-sight distance of 350m.
- m) Communication between RRFB units to enable synchronized activation must be secure and designed to avoid interference between multiple locations or other electrical devices.
- n) The RRFB units must provide a night time auto brightness feature. This feature must be capable of being turned off.
- o) The RRFB unit shall provide a visual indicator of substandard operating condition.

6.0 Operational Requirements

- a) A five (5) year warranty is to be provided for workmanship and materials.
- b) The RRFB enclosure and controller cabinet (if applicable) shall have a five (5) year corrosion damage warranty.
- c) One (1) written copy of the installation and operating manual must be supplied for each unit supplied. The manual is to contain the information necessary to install, operate, and maintain the RRFB unit and all associated components.
- d) Keys and/or special tools that may be required to access and maintain the unit shall be supplied.
- e) Parts covered by warranty must be available within twenty (20) calendar days. The supplier shall be responsible for all delivery costs, including those for the return of defective components as may be required.

APPENDIX K2

City of Ottawa Pedestrian Crossover (PXO) Program

APPENDIX K2

City of Ottawa Pedestrian Crossover (PXO) Program

Appendix K2 - City of Ottawa Pedestrian Crossover (PXO) Program

OVERVIEW

The City of Ottawa Pedestrian Crossover (PXO) Program provides the basis for PXO implementation in Ottawa. The program's processes for the screening, warranting and implementing the PXOs are extracted directly from those identified in the recently updated and soon to be released Ministry of Transportation of Ontario's (MTO) Ontario Traffic Manual (OTM) Book 15 – Pedestrian Crossing Treatments.

Book 15 includes all of the background information and justification regarding the use of PXOs as safe pedestrian crossing treatments in Ontario. Book 15 must be referred to for clarification on any interpretation of the PXOs outside of the definitions stated further below as defined in Book 15. Book 15 reflects the legal framework in which the program needs to operate; and this includes the following items:

- *Ontario Highway Traffic Act (HTA)*
 - Categories of Pedestrian Crossings
 - Pedestrian Rights and Responsibilities
 - Ontario Regulations
- Accessibility
 - Legislative Requirements - *Accessibility for Ontarians with Disabilities Act (AODA)*
 - Designing for Accessibility
 - Curb Ramps and Depressions

PXOs are one of a few traffic control devices that are available to road authorities throughout Ontario to establish the right-of-way for pedestrians; other control devices include stop and yield signs, adult school crossing guards and traffic control signals. The material extracted from Book 15 for this program addresses, for the most part, the use of PXOs and which type of treatment is the most appropriate device amongst the three new versions of the PXO for facilitating the movement of pedestrians across the road. While other devices also facilitate the control of traffic for all types of travel modes, the PXO focuses solely on pedestrians, including cyclists that need to dismount and cross as pedestrians. Definitions for key terms pertaining to the PXO Program are included below:

- **Crossings** - The *HTA* recognizes two crossing categories.
 - **Controlled:**
 - A crossing that is supported by one of the three control measures; Stop/Yield Signs, Pedestrian Crossovers (PXOs), or one of the Traffic Control Signal variations. **This document focuses on the controlled crossing type.**

- Vehicles are required to stop or yield to pedestrians.
- At a PXO, no pedestrian or person in a wheelchair shall leave the curb or other place of safety at a pedestrian crossover and walk, run or move the wheelchair into the path of a vehicle that is so close that it is impracticable for the driver of the vehicle to yield the right-of-way.
- **Uncontrolled:**
 - All other crossings including unmarked crossings at intersections, marked crossings but unsigned or unsignalized, school crossings when the adult school crossing guard is not present.
 - Pedestrians must yield to traffic and wait for a safe gap sufficient for them to cross the roadway, prior to attempting to enter the roadway. Pedestrians *do not* have the right-of-way at uncontrolled crossings.
- **Pedestrian Responsibility** - Pedestrians must exercise due care even when they are lawfully within a crossing and have right-of-way. It is not an absolute right and they must still exercise care to avoid a collision with a vehicle.
- **Pedestrian**
 - A person who is not in or upon a vehicle, motorized or otherwise propelled
 - A person in a wheelchair driven by muscular or any other kind of power
 - A person pushing a bicycle, or a wheelchair
- **Vehicle** - includes a motor vehicle, trailer, traction engine, farm tractor, road-building machine, bicycle, and any vehicle drawn, propelled or driven by any kind of power, including muscular power. It is pertinent to note that *HTA* considers bicycles as vehicles and are required to yield right-of-way to pedestrians on controlled crossings similar to other vehicles. While using a pedestrian crossing, cyclists must dismount and walk across the pedestrian crossing.

There are three important parts to the Ottawa PXO Program which have been added to the updated Book 15. These include:

- the **screening process** for potential crossing locations,
- the **selection process** for the type of PXO when the location is warranted, and
- the **conditions required** for the installation of the PXO.

SCREENING PROCESS

Book 15 provides a Decision Support Tool (DST) which includes two components: (1) Preliminary Assessment, and (2) Pedestrian Crossing Selection. The preliminary assessment is used to check whether a location is a candidate site for a pedestrian crossing control, whether its warranted or not, and then the pedestrian crossing selection assists practitioners to choose an appropriate pedestrian crossing treatment system for the site in question.

Preliminary Assessment

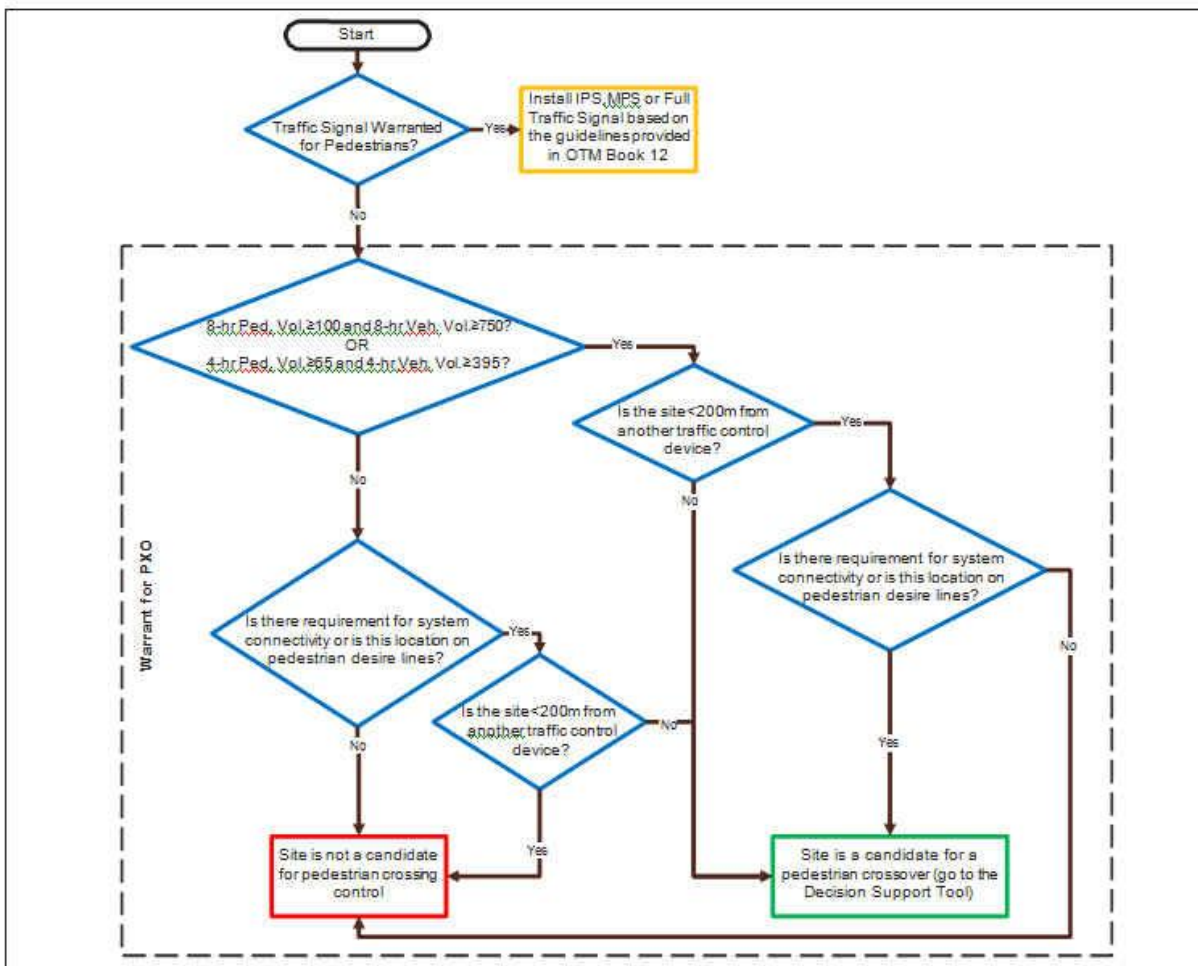

Even before the preliminary assessment is undertaken, it must be confirmed that the identified location has adequate sight distance for both motorists and pedestrians. Motorists must be able to see pedestrians in the waiting area adjacent to the crossing in sufficient time to perceive their intent to cross, react and brake to a stop comfortably. Similarly, pedestrians must be able to see oncoming traffic in both directions of travel so that they do not begin to cross when motorists have insufficient time to stop. To accommodate sight lines, it may be necessary to modify curb side regulations which may include the removal or relocation of on-street parking, bus stops, loading zones, etc.

The preliminary assessment involves the following steps:

- Step 1: Check whether a traffic signal is warranted for pedestrians based on Justification 6 of OTM Book 12.
- Step 2: If a traffic signal is not warranted, the flow chart conditions identified below in Figure 1 must be used to assist in checking whether a PXO is warranted for the site.

The Decision Support Tool (DST) – Preliminary Assessment flow chart identified in Book 15 is used to identify whether a site is a candidate for pedestrian crossing control.

Figure 1 - Decision Support Tool (DST) – Preliminary Assessment Flow Chart

In completing the process identified in Figure 1, the following elements are applied:

- Eight hour volumes will be used for urban areas, and four hour counts will be used for rural areas
- Assisted pedestrians, which include children under 12, seniors and those disabled with or without assistance, will count as two persons.

SELECTION PROCESS - PXO

Pedestrian Crossing Control Selection

The second component of the DST provides guidance for pedestrian crossing treatment selection to assist practitioners to identify which treatment system is applicable to the site based on its traffic and geometric characteristics.

The following table, as provided in Book 15, provides a guideline for the treatment system and the likely application environment.

Table 1 - Pedestrian Crossing Treatment System Selection

| Type of Crossing | Treatment System | Mid-block | Intersection | Roundabout | Right-turn Channel |
|-----------------------|--------------------------------|-----------|--------------|------------|--------------------|
| Traffic Signal | Full Signal | | • | | |
| | Intersection Pedestrian Signal | | • | | |
| | Mid-block Pedestrian Signal | • | | | |
| Pedestrian Crossover | PXO A | • | • | | |
| | PXO B | • | • | • | |
| | PXO C | • | • | • | |
| | PXO D | • | • | • | • |
| Stop or Yield Control | | | • | | • |
| Crossing Guard | | • | • | • | • |

The selection of an appropriate PXO treatment (i.e. Type A, B, C, or D) is determined based on the Pedestrian Crossover Selection Matrix as shown in Table 2. The matrix has been developed based on the following criteria:

- Application of PXOs is limited to road segments with a posted speed limit of 60 km/h or less
- A PXO can be installed on roadways with a maximum of 4 lanes.
- Vehicular traffic volumes are collected during the 8 or 4 hours with the highest pedestrian volumes.
- A PXO must not be used where the road volume exceeds 35,000 AADT (Average Annual Daily Traffic).
- PXOs should not be installed within 200m of other signal-protected pedestrian crossings, although there are some exceptions.

As a result of the criteria used to develop the matrix, four variables are used to select a PXO for a site:

- 8-hour (urban) or 4-hour (rural) two-way vehicular volume of the roadway at the location of the crosswalk
- Posted speed limit of the roadway

- Total number of lanes for the entire roadway cross section
- Presence of raised pedestrian refuge (i.e., refuge island or median)

Note: In the City of Ottawa Pedestrian Crossover (PXO) Program, the Selection Matrix will be used irrespective of the type of environment, such as one-way/two-way roadways, roundabouts, intersections, etc. Also, if the use of a PXO is desired based on the connectivity (i.e. pedestrian and vehicular volume conditions are not fulfilled), then the matrix can still be used based on speed and geometry of the roadway by using the top two rows of the matrix.

Table 2 - Pedestrian Crossover Selection Matrix

| Two-way Vehicular Volume | | | Speed Limit (km/h) | Total Number of Lanes for the Roadway Cross Section ¹ | | | |
|--------------------------|-------------|-------------|--------------------|--|--------------------|-------------------------|---------------------------|
| Time Period | Lower Bound | Upper Bound | | 1 or 2 Lanes | 3 lanes | 4 lanes w/raised refuge | 4 lanes w/o raised refuge |
| 8 Hour | 750 | 2,250 | ≤50 | PXO D | PXO C ² | PXO D ² | PXO B |
| 4 Hour | 395 | 1,185 | | | | | |
| 8 Hour | 750 | 2,250 | 60 | PXO C | PXO B | PXO C ² | PXO B |
| 4 Hour | 395 | 1,185 | | | | | |
| 8 Hour | 2,250 | 4,500 | ≤50 | PXO D | PXO B | PXO D ² | PXO B |
| 4 Hour | 1,185 | 2,370 | | | | | |
| 8 Hour | 2,250 | 4,500 | 60 | PXO C | PXO B | PXO C ² | PXO B |
| 4 Hour | 1,185 | 2,370 | | | | | |
| 8 Hour | 4,500 | 6,000 | ≤50 | PXO C | PXO B | PXO C ² | PXO B |
| 4 Hour | 2,370 | 3,155 | | | | | |
| 8 Hour | 4,500 | 6,000 | 60 | PXO B | PXO B | PXO C ² | PXO B |
| 4 Hour | 2,370 | 3,155 | | | | | |
| 8 Hour | 6,000 | 7,500 | ≤50 | PXO B | PXO B | PXO C ² | PXO A |
| 4 Hour | 3,155 | 3,950 | | | | | |
| 8 Hour | 6,000 | 7,500 | 60 | PXO B | PXO B | | |
| 4 Hour | 3,155 | 3,950 | | | | | |
| 8 Hour | 7,500 | 17,500 | ≤50 | PXO B | PXO B | | |
| 4 Hour | 3,950 | 9,215 | | | | | |
| 8 Hour | 7,500 | 17,500 | 60 | PXO B | | | |
| 4 Hour | 3,950 | 9,215 | | | | | |

¹The total number of lanes is representative of crossing distance. The width of these lanes is assumed to be between 3.0 m and 3.75 m according to MTO Geometric Design Standards for Ontario Highways (Chapter D.2). A cross sectional feature (e.g. bike lane or on-street parking) that extends the average crossing distance beyond this range of lane widths may need to be considered as an additional lane in this table.

²Use of two side mounted signs per direction (one on the right side and on the median).

³Use PXO B for one-way streets.

CONDITIONS REQUIRED

There are a number of conditions required in the pedestrian crossing facility design to implement controlled crossings.

General Considerations

Controlled crossings manage the interaction between pedestrians and vehicles, and present operational benefits to pedestrians by providing priority over vehicles either at all times or for allocated periods of time. This priority may provide a sense of security for pedestrians, encourage pedestrians to cross at the controlled location and limit the number of locations where pedestrian crossings occur.

The OTM guidelines that would automatically limit the distance between pedestrian crossings are as follows:

- According to OTM Book 12, the minimum distance between traffic signals for roads posted at 60 km/h or less is 215 m and for roads posted at 80 km/h is 350 m.
- According to OTM Book 12, PXOs should not be installed within 200 m of other signal-protected pedestrian crossings. Although this is the general rule, OTM Book 15 does make some exceptions for this separation.

Adequate sight distance for all road users must be provided as a fundamental component of all controlled crossing design. Visibility of all signs and signals should be confirmed.

Physical Design Components

The following provides an overview of the geometric requirements of a PXO. Should more detailed information on the design components for PXOs be sought, Book 15 Chapter 6 - Pedestrian Crossing Facility Design: Controlled Crossings should be reviewed.

Crosswalk

According to the *HTA*, a “crosswalk” means,

- a. that part of a highway at an intersection that is included within the connections of the lateral lines of the sidewalks on opposite sides of the highway, measured from the curbs or, in the absence of curbs, from the edges of the roadway, or
- b. any portion of a roadway at an intersection or elsewhere distinctly indicated for pedestrian crossing by signs or by lines or other markings on the surface.

Crosswalks must be marked for all controlled pedestrian crossing treatments.

Curb Ramps and Depressions

Curb ramps provide access for people using wheelchairs or scooters at crossings where there is an elevation change between the sidewalk and the street level crossing.

Curb depressions improve accessibility for crossing activity for all pedestrians. They are typically provided in urban areas where pedestrian activity exists. Curb depressions are not intended to imply right-of-way, but rather to improve accessibility and safety where pedestrian activity has been demonstrated, or is anticipated.

Specific requirements for depressed curbs are provided in Book 15 Section 2.3.3 – Designing for Accessibility.

Signs

The regulatory signs must be provided, wherever conditions are met according to OTM Book 5 – Regulatory Signs and *Ontario Regulation 615* with all amendments. Where right-of-way to pedestrians is being assigned at new locations through the provision of a PXO, an introductory period is required to safely carry out the transition. The complete procedure with required regulatory signs is also included in *Ontario Regulation 615*.

Rapid Rectangular Flashing Beacons with Tell Tale

Rapid Rectangular Flashing Beacons (RRFBs) are pedestrian-activated, high-intensity flashing beacons that warn drivers of the presence of a pedestrian in the crosswalk. RRFBs consist of two rectangular yellow indications with two tell-tale end indicators to let pedestrian know that the beacon is flashing.

RRFBs are required components for PXO Types B and C. Wherever required for an applicable PXO, an RRFB must be used for each direction of travel (see installation layouts of PXO Types B and C).

Markings

The guidelines related to design, installation, and application of pavement markings are provided in OTM Book 11 – Markings and Delineation. Additionally, Ontario Regulation 615 provides information regarding requirements for pavement markings utilized with PXOs.

A yield to pedestrian line is used to indicate the point at which a vehicle approaching a crosswalk must yield to pedestrians in the crosswalk. A yield to pedestrian line is a mandatory component for PXO Types B, C, and D, and is a desirable component for PXO Type A.

Ladder crosswalk markings are a mandatory component for PXO Types B, C, and D. The outer edge of the ladder crosswalks must be minimum 1.5m from the yield to pedestrian line for two-lane roadways and minimum 6.0m from the yield to pedestrian line for multi-lane roadways.

Illumination

The design of all pedestrian crossing treatments (controlled or uncontrolled) must provide adequate lighting to enhance the safety of pedestrians. The guidelines related to planning and design of roadway lighting including lighting of pedestrian crosswalks at intersections, roundabouts and mid-blocks are provided in the TAC Guide for the Design of Roadway Lighting (Roadway Lighting Guide). The Guide also includes the warranting criteria for each application of roadway lighting.

Design Approach

Design, application and operational guidelines and procedures should be used with judicious care and proper consideration of the prevailing circumstances. In some

designs, applications, or operational features, the traffic practitioner's judgement is to meet or exceed a guideline while in others a guideline might not be met for sound reasons, such as space availability, yet still produce a design or operation which may be judged to be safe. Every effort should be made to stay as close to the guidelines as possible in situations like these, and to document reasons for departures from them.

However, no manual can cover all contingencies or all cases encountered in the field. Therefore, field experience, knowledge of application, and engineering judgement are essential in deciding what to do in the absence of specific direction from Book 15 itself and in overriding any recommendations in the manual. Similarly, municipalities may need to adopt policies that reflect local conditions. The traffic practitioner's fundamental responsibility is to exercise engineering judgment on technical matters in the best interests of the public and workers. Guidelines are provided in the Ontario Traffic Manuals to supplement professional experience and assist in making those judgments.

**SCHEDULE 15-2
DESIGN AND CONSTRUCTION REQUIREMENTS**

**PART 2
CIVIL AND GUIDEWAY**

ARTICLE 1 INTRODUCTION

1.1 General

- (a) The Existing Confederation Line is a dual Track system from Tunney's Pasture Station to Blair Station.
- (b) The Confederation Line shall be extended west from Tunney's Pasture Station to Lincoln Fields Station. From Lincoln Fields Station, separate branches will extend to Moodie Station and to Baseline Station. New Stations will be located at Westboro Station, Dominion Station, Cleary Station, New Orchard Station, Lincoln Fields Station, Queensview Station, Pinecrest Station, Bayshore Station, Iris Station and Baseline Station.
- (c) The Confederation Line shall be extended east from Blair Station to a new Trim Station with Stations also located at Montreal Road Station, Jeanne d'Arc Station, Place d'Orléans Station, and Orléans Boulevard Station.

1.2 General Description of the Guideway and Guideway Requirements

- (a) DB Co shall design the Guideway with two Tracks for operation extending:
 - (i) west from the Existing Confederation Line terminus at Tunney's Pasture to Moodie and Baseline Stations for a total length of approximately 15.3km;
 - (ii) DB Co shall provide the Systems in accordance with the requirements set out in this Project Agreement and any deviations or variances to the application of the selected standards shall be subject to approval by the City; and,
 - (iii) east from the Existing Confederation Line terminus at Blair Station to Trim Station for a length of approximately 12.8km.
- (b) The Guideway alignment characteristics shall be as follows:
 - (i) At grade section, within the existing Transitway trench, from Tunney's Pasture Station to Dominion Station with an approximate length of 2.45 km;
 - (ii) Tunnel section from west of Dominion Station to west of Richmond Road with an approximate length of 3.0 km;
 - A. The Tunnel section that is constructed within NCC property shall be no more than 10.5m wide (for tangent Track, increased on curves for

superelevation and carbody overhang) from exterior face of permanent Tunnel Structure to exterior face of permanent Tunnel Structure and located within the permanent Lands such that there is at least a 3m permanent buffer on each side of the permanent Tunnel Structure to the permanent Lands property parcel limits.

- (iii) At grade section from the West Portal south of Richmond Road through Lincoln Fields Station, where it splits to Baseline Station and to Moodie Station of approximate lengths of 2.7km and 6.1km respectively; includes a 370m tunnel under Connaught Avenue between Lincoln Fields Station and Queensview Station;
- (iv) Lincoln Fields Station shall include a 3rd Track as a Pocket Track between the two Mainline Tracks;
- (v) The Guideway to Moodie Station shall cross over the Guideway to Baseline Station on a continuous elevated structure crossing over the SB Guideway to Baseline Station, over Pinecrest Creek and over a MUP;
- (vi) Baseline Station is a Terminal Station located below ground in the existing Structure and shall include:
 - A. Two storage Tracks located in front of the Station Platform of sufficient length to accommodate two Trains of maximum length plus a safety buffer distance on each end in each Track, coordinated with the CBTC system designer.
 - i. At least one side of each Vehicle parked in the storage Track shall be accessible from a paved surface of adequate width. Space shall be provided for a short Operator platform, to allow the Operator to transfer from one car to the other car, with a safety fence separating the Operator from the mainline.
- (vii) At grade section from Blair Station to the elevated section (Flyover Structure) located just east of the existing Transitway overpass over OR174 of an approximate length of 0.8 km including:
 - A. A Pocket Track of sufficient length to accommodate one Train of maximum length plus a safety buffer distance on each end to allow for uninterrupted movement of a Train into the storage Track (Train shall be able to enter in ATO mode without manual intervention) coordinated with the CBTC system designer. The maximum length Train to be accommodated shall include the future additional 10m long body section in one Vehicle of the trainset.

- i. Space shall be provided for a short (10m long minimum) Operator platform with a safety fence separating the Operator from the mainline.
 - (viii) Elevated Section (Flyover Structure) crossing over the OR174 WB lanes to the OR174 center median of an approximate length of 0.25km; and,
 - (ix) At grade section located in the OR174 center median from the Flyover Structure to Trim Station for an approximate length of 11.6 km including;
 - A. Two Tail Tracks beyond Trim Station as follows:
 - i. The northern Track shall be an approximate length of 130m with OCS terminating 90m beyond the end of the Platform.
 - ii. The southern Track shall extend at least 50m beyond the Train stop location on the Platform and shall meet the requirements of Clause 2.6(d) of Schedule 15-2, Part 1 – General Requirements.
 - iii. Measures to prevent Vehicles from travelling beyond the Tail Track and into the at-grade intersection shall be installed.
 - iv. A secure gated vehicle access to the Tail Track area with a drivable route along one side of the northern Tail Track.
- (c) The Guideway shall include components for safe and efficient operation of the system, including but not limited to:
 - (i) Traction Power;
 - (ii) OCS;
 - (iii) Communications and low voltage power duct banks;
 - (iv) Signal and control Systems;
 - (v) Drainage systems and SWM;
 - (vi) Other appurtenances as required by DB Co's design for the safe and efficient operation of the system;
 - (vii) Track Switch Control.
- (d) Lighting shall be provided to the required safety walkway area as per the requirements of NFPA 130.

1.3 Access of Emergency Services Vehicles to the Guideway

- (a) All sections of the Guideway shall be designed and constructed with a means of Emergency egress in compliance with the requirements of NFPA 130 via an unobstructed clear width.
- (b) DB Co shall provide Emergency egress points along the Guideway that will allow ESP access as per the requirements of NFPA 130. These locations shall be in addition to end of Platform egress points. These points shall be provided with a gated entry through the security fencing of the Guideway where they are located between Stations. A unique identification system shall be developed for the gates in consultation with the City and signage shall be fixed to both sides of each gate for identification purposes.
- (c) Emergency vehicles shall be able to travel by a paved route to within 15m of the gated entry point. The route may be by existing Transitway roadway, nearby public roadway allowance, nearby commercial parking lot or public MUP. If the route is more than 90m in length then a turnaround for the Emergency vehicle shall be provided at the gated entry point. A minimum of one turnaround shall be provided at the end of the route if multiple entry points are being accessed from one route. The turnaround shall be designed for a minimum centreline radius of 12m. The turnaround shall be either a circular cul-de-sac or a hammerhead with minimum dimensions of 14m x 14m.
- (d) DB Co shall provide an identification scheme for the gates on OR174 that includes a reference to the OR174 mileage marker number.
- (e) Access gate locations shall be located to provide Emergency access from both directions of travel on OR174 in alternating fashion along the Guideway.
- (f) The use of the existing Queensway Transitway Station Platforms shall be permitted as an emergency access point on south side only. DB Co shall confirm during the design that such an approach is in conformance with NFPA 130.
- (g) The guideway shall be fenced or otherwise enclosed for security.

ARTICLE 2 GEOMETRIC DESIGN CRITERIA FOR TRACK ALIGNMENT

2.1 Reference Documents

- (a) The design and construction of the alignment work shall comply with the criteria contained within this Article and the Applicable Law, guidelines or practices applicable to the Project, including the following Reference Documents. In the event of a conflict between the criteria, commitments or requirements contained within one document when compared with another, the more stringent shall apply. The Order of Precedence for this portion of the Contract shall be as follows:
 - (i) The criteria in this Article;
 - (ii) Transit Cooperative Research Program TCRP Report 155 – Track Design Handbook for Light Rail Transit, 2nd Edition;
 - (iii) The American Railway Engineering and Maintenance-of-Way Association (AREMA) Manual for Railway Engineering;
 - (iv) European (EN) Standards for Railway Applications
 - (v) OHSA R.S.O. 1990;
 - (vi) Standard Respecting Railway Clearance - Transport Canada - TC E-05 (1992)

2.2 Use of Minimum or Maximum Criterion

- (a) Where specific numbers are given for limitations on alignment elements, such limitations are not targets to be achieved by DB Co, but limits to be avoided. DB Co shall meet or exceed the minimum requirements.
 - (i) Design for maximum Passenger comfort where no physical restrictions or significant construction cost differences are encountered.
 - (ii) Design shall meet the operating objectives, without compromising ride quality or taxing the mechanical limits of the Vehicle, and meet the operational performance requirements.
 - (iii) Minimum and maximum values are determined primarily by the Vehicle design limitations and/or safety considerations, with maximum operating speeds and Passenger comfort as secondary considerations. Minimum and maximum values have potential impacts in terms of maintenance costs, noise, wheel life and Track life. Minimum and maximum values shall only be used where physical restrictions prevent the use of Passenger comfort values. The use of minimum and maximum values shall be justified and documented in a design report, and shall require approval by the City.

2.3 General

- (a) DB Co shall provide the Mainline Track, non-revenue Track, including Connecting Track, storage Track, and Yard Track, for maximum operating speed to satisfy the criteria identified in Schedule 15-2, Part 1, Article 3 – Operational Performance Requirements; as dictated by existing topography, permanent physical features, property, and alignment constraints.
- (b) DB Co shall ensure that the design and construction for the Confederation Line East Extension and Confederation Line West Extension is integrated with the Existing Confederation Line.

2.4 Horizontal Alignment

- (a) DB Co shall design the horizontal Track alignment in accordance with the requirements of Clause 2.2 of this Part 2, and shall be such that all of the SI is contained within the Lands as defined in Schedule 20 – Lands.
- (b) DB Co shall design the Mainline Track for an operating speed of 100km/h unless Physical Constraints do not allow, in which case DB Co shall design the Mainline Track so as to maximize the operating speed.
- (c) DB Co shall design the LMSF Connecting Track for a speed of no less than 30 km/hr and shall also consider the safety of the geometrics.
- (d) DB Co shall provide a tangent horizontal alignment through Station Platform limits for a distance of 25m beyond the end of Platforms. Where a Physical Constraint exists this may be reduced to a minimum of 15m subject to approval from the City, and only if sufficient running clearance between the Revenue Vehicle or Non-Revenue Vehicles, and Platform is achieved. The distance from the end of the Platform to spiral transition curve may be further reduced if site conditions do not provide sufficient length, provided the requirements of Clause 2.7 (a), of this Part 2, at a pass through speed of 30 km/h and clearance requirements for Maintenance Vehicles are considered.
- (e) All non-Track related Construction layout shall be related to or dimensioned from the centreline of the EB Track, unless otherwise noted.

2.5 Track Centres

- (a) Minimum Tunnel Track centre spacing with a center wall shall be 5.3m on tangent Track, increased on curves for superelevation and carbody overhang.
- (b) Ballasted Track centre spacing shall be 4.0m or greater.
- (c) Where Physical Constraints are present, Track centre spacing of less than 4.0m on tangent Track, and increased on curves for superelevation and carbody overhang, may be constructed, subject to approval by the City.

2.6 Horizontal Curves

- (a) DB Co shall define circular curves by the arc definition of curvature and specified by their radius in metres to three decimal places.
- (b) Mainline Track curves shall be designed to maintain the maximum operating speed as dictated by existing topography, permanent physical features, property, and the alignment constraints per Clause 2.7 of this Part 2. The minimum radius used shall be 95m.
- (c) DB Co shall provide the LMSF Track with curves of the following radii:
 - (i) LMSF Connecting Track radii shall be designed to operate with maximum design speed of 30km/h. The minimum radius of curve shall be 55m.
 - (ii) LMSF Yard Track shall be designed to operate with maximum speed of 15km/h. The minimum radius of curve shall be 55m.
- (d) DB Co shall provide a tangent distance between horizontal curves, including reverse curves, for the Mainline Track, Connecting Track and Yard Track as per the following formula where V is speed in km/h and L_T is the length of the tangent:
 - (i) $L_T = 0.57V$;
 - (ii) the minimum tangent length between curves for Mainline Track and Connecting Track shall be 25 m; and,
 - (iii) The minimum tangent length between curves for Yard Track shall be 15m.
- (e) Compound Curves
 - (i) Compound curves shall be permitted on the Mainline Track design.
 - (ii) Circular curves shall be joined by a spiral curve where two or more circular curves will be connected into a compound curve. The superelevation of each circular curve shall be adjusted to ensure that the maximum permissible speeds for all parts of the compound curve are identical, except as indicated below:
 - A. For Confederation Line East Extension, a compound curve shall be provided approximately 1km east of Blair Station on the flyover

2.7 Spirals

- (a) Spiral transition curves shall be used on all mainline and LMSF connection Tracks to connect circular curves to tangents, with the exception that spirals are not required where both actual superelevation is zero and unbalanced superelevation is less than 50mm.

- (b) DB Co shall determine the minimum length of a spiral transition curve (L_s) by selecting the following greatest value, based upon the actual superelevation (E_a , mm), unbalanced superelevation (E_u , mm), and design speed (V , km/h):

(i) $L_s = E_a V/108$; and

(ii) $L_s = E_u V/180$

Where E_a = actual superelevation in mm

E_u = unbalanced superelevation in mm

V = design speed in km/h

L_s = length of spiral in meters

- (iii) The absolute minimum length of spiral shall be 10m.

2.8 Superelevation

- (a) Superelevation shall be linearly attained throughout the full length of the spiral curve by raising the rail farthest from the curve centre, while maintaining the top of the inside rail at profile grade.

- (b) Superelevation shall be determined by DB Co by applying the following equations:

(i) $E_e = 11.83 V^2/R$

(ii) $E_a = (V^2/(12.96 \cdot R \cdot 9.81) - 0.0499) \cdot 1505$

(iii) $E_u = E_e - E_a$

where E_e = equilibrium superelevation in mm

E_a = actual or applied superelevation in mm

E_u = unbalanced superelevation in mm

V = design speed in km/h

R = horizontal curve radius in meters

- (iv) The Track superelevation shall be adjusted as needed to meet or exceed the following criteria for all Track types:

A. Absolute maximum unbalanced superelevation, E_u of 115mm

B. Desired maximum unbalanced superelevation, E_u of 75mm

- C. Absolute maximum actual superelevation, Ea of 150mm
 - D. Desired maximum actual superelevation, Ea of 100mm
 - E. Actual superelevation shall be rounded to the nearest 5mm
 - F. Superelevation, Ea and Eu shall be applied equally or proportionally up to maximum Eu with no Eu until Ea = 13mm.
- (c) For Special Trackwork, zero actual superelevation shall be used by DB Co, with a maximum unbalanced superelevation of 75mm at turnouts.

2.9 Vertical Alignment

(a) General

- (i) All references to profile in the vertical alignment shall represent the top of the low rail for a given Track.
- (ii) DB Co shall provide vertical curves separated by a minimum tangent length of:
 - A. the greater of either: $L_t = 30\text{m}$ or $L_t = 0.57V$;
 - B. minimum: $L_t = 12\text{m}$; and,
 - C. where L_t = minimum vertical tangent length in metres
 - D. V = design speed in km/h.

(b) Grades

- (i) DB Co shall not apply changes in grade or vertical curves within the limits of Station Platforms and future Platforms.
- (ii) DB Co shall provide grades through Stations of a minimum grade of 0.5% and a maximum grade of 1.5%. A minimum grade of 0.0% shall be permitted when additional measures to accommodate positive drainage are provided.
- (iii) DB Co shall provide the Mainline Track with a maximum tangent grade of 4.0%.
 - A. Grades between 4.0% and 5.0% shall only be permitted for a maximum distance of 250m, with the following exception:
 - i. Between the Connaught Tunnel and the Lincoln Fields flyover the maximum distance shall be 350m.
 - B. Grades between 5.0% and 6.0% shall only be permitted for a maximum distance of 250m and are subject to City approval.

- C. Grades of 6% shall only be permitted subject to City approval where physical constraints prohibit lesser grades.
- D. Grades of more than 6% shall not be permitted.
- E. The maximum grades, stated above, are after compensating for any horizontal curvature.

- i. compensation for horizontal curvature:

$$1 \quad G_c = G + 0.04\% \times (5729.6/R \times 3.28)$$

Where

G_c = compensated gradient to account for horizontal curvature, in percent;

G = grade before adjustment in percent;

R = horizontal curve radius in metres

- (iv) Where a continuously ascending or descending profile is composed of a series of vertical tangents of varying grades, DB Co shall provide the alignment such that the weighted average gradient does not exceed 4.0%, with the exception of the Lincoln Fields flyover where the maximum weighted average gradient shall not exceed 4.3%. Calculation of the weighted average gradient shall ignore vertical curves and consider gradients from PVI to PVI.
 - (v) DB Co shall provide the alignment such that the maximum grade for mainline turnouts is 2.0% with the following exceptions:
 - A. Lincoln Fields Split Structure: the maximum grade shall be no more than 3.75%; and,
 - B. Moodie Extension approach to LMSF grade shall be no more than 3%.
 - (vi) DB Co shall provide Mainline Storage Track and Tail Tracks with a maximum grade of 0.3% with Tail Tracks sloped away from the mainline, or provide means of mitigating potential Vehicle rollaway onto Mainline Track in case of brake failure with the following exception:
 - A. Blair Pocket Track shall be no more than 2%.
 - (vii) All Special Trackwork shall be located on constant grades with no vertical curves within the limits of Special Trackwork.
- (c) Vertical Curves

- (i) DB Co shall provide parabolic vertical curves for all grade changes.
- (ii) DB Co shall provide a minimum distance of 15m between Platform limits and any point of vertical curvature.
- (iii) Length of vertical curves shall be as long as practicable, but not less than shown below:
 - A. The minimum length of vertical curve (LVC, m) for mainline and connection tracks shall be determined by the following equations, where A = algebraic difference in grades and V = speed:
 - i. $LVC = 60A$; or where Physical Constraints do not allow
 - 1 $LVC = 0.005AV^2$, for crest curves; and,
 - 2 $LVC = 0.003AV^2$, for sag curves.

2.10 Special Trackwork

- (a) Alignment
 - (i) DB Co shall provide the Special Trackwork on tangent Track and on a constant vertical grade.
 - (ii) DB Co shall provide the alignment such that the minimum horizontal tangent length beyond Special Trackwork located on Mainline Track and Connecting Track shall be 15m.
 - (iii) A minimum tangent length of 20m shall be inserted between the back to back switch points where the turnout arrangement may entail a reverse curve movement through turnouts.
 - (iv) Special Trackwork shall not be located within 15m from the end of the Station Platform and shall not be within a Station Platform.
 - (v) Special Trackwork shall not be located within 50m of the transition between ballasted and direct fixation Track as outlined in the TCRP Light Rail Handbook. DB Co shall provide for special accommodations to mitigate the effects of different Track modulus under various geometric conditions.
 - (vi) Crossover locations shall be integrated with signaling and OCS system designs.
 - (vii) The location of all mainline turnouts and crossovers shall be optimized to meet or exceed the operations performance requirements outlined in Schedule 15-2, Part 1, Article 3 – Operational Performance Requirements.

2.11 Other Alignment Requirements

- (a) Combined horizontal and vertical curvature shall be avoided. Where this situation is unavoidable, DB Co shall provide justification in its Trackwork design report with reference to alignment safety at the design speed.

2.12 Clearances

- (a) Vehicle Clearances
 - (i) Horizontal clearance dimensions shall always be measured perpendicular to the Track centreline accounting for any superelevation and curvature in the Track.
 - (ii) DB Co shall account for structure chord lengths, tilt from superelevation, Track type, and outswing and inswing of a Vehicle that occurs along horizontal curves in their horizontal clearance calculations.
 - (iii) DB Co shall define the Revenue Vehicle clearance envelope as the space occupied by the dynamic envelope, or maximum movement, of the Vehicle as it travels along the Track plus an additional running clearance of 150mm or any other dimension in excess of 150mm deemed pertinent by DB Co's own analysis.
 - (iv) DB Co shall provide the alignment based on the information of the Vehicle dynamic envelope which is defined in Figure 2-2.1 of this Part 2.
 - (v) Where a walkway is present:
 - A. On tangent Track a minimum side clearance of 2500mm from the Track centreline to a curb, railing, fence, wall, OCS Pole or other physical feature shall be maintained on at-grade, elevated, Tunnel and retained cut Guideway Track;
 - B. On curved Track the minimum side clearance from the Track centreline to a curb, railing, fence, wall, OCS Pole or other physical feature shall be the maximum internal or external dimension for each radius which is defined in Figure 2-2.1 of this Part 2, increased by 885mm.
 - (vi) Where no walkway is present:
 - A. On a tangent Track, a minimum side clearance of 1800mm from the Track centreline to a curb, railing, fence, wall, OCS Pole or other physical feature shall be maintained on at-grade, elevated, Tunnel and retained cut Guideway Track.
 - B. On curved Track, the minimum side clearance from the Track centreline to a curb, railing, fence, wall, OCS Pole or other physical feature shall be the maximum internal or external dimension for each radius which is defined in Figure 2-2.1 of this Part 2, increased by 226mm.

- (vii) DB Co shall determine the horizontal clearance distance from the centreline of Track to the finished edge of Station Platform based on the criteria identified in Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria, Revenue Vehicle pass-through speed criteria, and compliance with applicable accessibility standards.
 - (viii) Vertical clearance dimensions shall always be measured in a vertical plane irrespective of any superelevation or profile grade. When superelevation is present, the top of low rail shall be used as the reference elevation when calculating vertical clearance.
- (b) Other Clearance Requirements
 - (i) Signal and Trackwork equipment mounted on Track slab along the alignment shall be kept clear of the under car clearance envelope of the Vehicle.
 - (ii) Temporary clearance requirements for construction shall be assessed on an individual basis.
 - (iii) Vertical clearance to contact wire shall be as described in Figure 2-2.2 of this Part 2.

ARTICLE 3 TRACKWORK

3.1 Reference Documents

- (a) DB Co shall provide Trackwork, in accordance with the criteria contained in this Article; and all standards, regulations, policies, Applicable Law, guidelines or practices applicable to the Project, including but not limited to each of the following Reference Documents:
 - (i) APTA Manual of Standards and Recommended Practices for Rail Transit Systems;
 - (ii) European (EN) Standards For Railway Applications
 - (iii) AREMA Manual for Railway Engineering;
 - (iv) International Union of Railways (UIC) ;
 - (v) ASTM Standards;
 - (vi) ISO 2631 Mechanical Vibration and Shock;
 - (vii) NFPA 130 Standard for Fixed Guideway Transit and Passenger Rail Systems;
 - (viii) TCRP Report 155 – Track Design Handbook for Light Rail Transit, Latest Edition;
- (b) In the event of a conflict between the criteria, commitments, or requirements contained within one document when compared with another, the more stringent shall apply.

3.2 Scope of Work

- (a) DB Co shall provide all Works related to the complete Construction of Special Trackwork, including the design, supply, installation and testing of Special Trackwork, including all turnouts, crossover components, adjoining Track, fastening components, Track materials, end-of-track devices, wheel/rail friction control devices, and all other Track materials.
- (b) DB Co shall be responsible for control and any mitigation which may be a result of wheel-rail noise throughout the system in accordance with Schedule 17 - Environmental Obligations.

3.3 Track Classification

- (a) DB Co shall classify Track as follows:

- (i) Mainline Track: used for the operation of Revenue Vehicles carrying Passengers and railbound Maintenance Vehicles;
- (ii) Tail Track: located at Terminal Stations to provide for potential Vehicle storage;
- (iii) Mainline Storage Track/Pocket Track: used to store Revenue Vehicles adjacent to Mainline Track and for potential crossover functionality;
- (iv) Yard Track: includes shop Tracks located in maintenance shops, storage Tracks, spur Tracks, and other Tracks required beyond Connecting Tracks within the LMSF;
- (v) Connecting Track/Lead Track: links Yard Track to Mainline Track.

3.4 General Requirements

- (a) DB Co shall provide Track that is durable for more than or equal to the Design Life identified in Schedule 15-2, Part 1, Article 4 – Design and Construction.
- (b) DB Co shall provide Track that is safe, efficient and allows continuous operation under all operating conditions.
- (c) DB Co shall provide Track that performs safely and efficiently under all local, site-specific climatic and environmental conditions.
- (d) DB Co shall provide Track that allows for expandability and extendibility of the system without major reconstruction.
- (e) DB Co shall provide for the coordination of Track with conduits, cabling, duct banks, raceways, wayside equipment, and Track-mounted equipment for associated TPSS, OCS, S&TCS, communications, electrical, and other systems.
- (f) DB Co shall submit a Track Design and Construction Test Plan in accordance with Schedule 10 – Review procedure.
- (g) Track Gauge and Rail Cant
 - (i) DB Co shall provide 1435mm Track gauge on tangent Track.
 - (ii) DB Co shall provide 1:40 cant Trackwork.
- (h) DB Co shall set the criteria for total and differential post-construction settlements along the Track bed to satisfy the requirements of Clauses 3.10 through 3.12 of this Part 2.
- (i) Track Loading
 - (i) DB Co shall provide Track to accommodate the vertical, horizontal and longitudinal loading from the Revenue Vehicles and Maintenance Vehicles,

without exceeding permissible stress limits of the elements comprising the Track system or Track subgrade.

- (ii) DB Co shall incorporate loading arising from thermal stress within the rail, based on the rail temperature range for local climatic and environmental conditions, into the Track system design, including allowance for heating due to direct sunlight exposure and extreme cold.
- (j) Corrosion Control
 - (i) DB Co shall protect all Track components from corrosion in accordance with the requirements outlined in Schedule 15-2, Part 3, Article 12 - Corrosion Control.
 - (ii) DB Co shall provide reinforcing steel compliant with structural grounding requirements identified in Schedule 15-2, Part 3, Article 12 - Corrosion Control, and compliant with ACI 318M and AREMA Chapter 8 requirements.
 - (iii) DB Co shall provide a Track system that is electrically isolated from ground.
 - (iv) Electrical Continuity of Track
 - A. DB Co shall ensure rail electrical continuity and rail bonding are in accordance with the requirements identified in Schedule 15 – Output Specifications.
 - B. DB Co shall ensure that the rails shall be electrically bonded at locations requiring bolted rail joints. All rail shall be CWR meeting AREMA requirements.
 - C. DB Co shall provide electrical continuity of the Traction Power negative return system at locations requiring insulated joints.
 - D. DB Co shall provide rail bonding compliant with the standards identified in AREMA Chapter 33 Part 7 and Chapter 4 Section 3.7.
 - E. DB Co shall employ means to lower the negative return resistance to the TPSS.
 - F. DB Co shall employ means of protecting rail bonds from ground for rail bonding of embedded Track.

3.5 Track Structure Types

- (a) General
 - (i) DB Co shall provide Track to support and hold the rails in place to the correct alignment, profile, cross level, and Track gauge.

- (ii) DB Co shall provide Track fasteners that have Design Life and maintenance requirements integrated with and similar to the Existing Confederation Line.
- (iii) DB Co shall provide Track compliant with NFPA 130 requirements for trainways.
- (iv) DB Co shall coordinate the placement of Track fastener assemblies and ties with the location of deck or slab steel reinforcement, rail joints, Track-mounted equipment, and wayside equipment.
- (v) DB Co shall provide a direct fixation Track system with Track noise and vibration mitigation measures for Tunnel and underground locations where an invert slab exists, compliant with the noise and vibration criteria defined in Schedule 17 – Environmental Obligations.
- (vi) DB Co shall provide any of the following permitted Track types for at-grade locations or elevated Guideways,:
 - A. direct fixation; or,
 - B. ballasted.
- (b) Direct fixation Track
 - (i) DB Co shall provide direct fixation Track as an open Track form consisting of a resilient, elastic direct fixation Track fastener system anchored into a concrete foundation slab or elevated structure deck.
 - (ii) Direct fixation Track for Tunnel and underground locations where an invert slab exists:
 - A. DB Co shall provide Track directly fixed onto a concrete slab with Track noise and vibration mitigation measures.
 - B. The Track shall be integrated with the Tunnel by DB Co as stated in Schedule 15-2, Part 8, Article 6 - Systems Interface.
 - C. The Tunnel invert shall act as an interface between the Track and Tunnel structure to provide the following minimum functions:
 - i. vertically and laterally support the Track system;
 - ii. provide for Track drainage requirements; and,
 - iii. provide a safety walkway.
 - D. DB Co shall provide Track directly fixed onto the box Culvert under West Transitway (SN018231 and SN018232).

- (c) Ballasted Track
 - (i) DB Co shall provide ballasted Track as an open Track form consisting of a resilient, elastic fastening system and precast concrete ties.
 - (ii) Ballasted Track shall be permitted for use for at-grade locations, provided that:
 - A. Vehicle clearance envelope for ballasted Track is applied;
 - B. Guideway fits within prescribed property limits; and,
 - C. NFPA 130 requirements are satisfied.
 - (iii) Material Requirements
 - A. Crushed stone or other material shall conform to AREMA ballast specifications, with evidence of previous approval on a similar or heavier electrified rail system within the last 5 years provided to the City.
 - B. The particle size requirements shall conform to AREMA requirements in relation to the crushed stone ballast, class number 4A.
 - C. DB Co shall provide ballast gradation that has sufficient voids to permit water to migrate freely and shall not contact the running rails for mitigation of stray current and loss of shunting or calibration with signal systems. Ballast shall be at least 25mm clear of the rail of any fixation so as to mitigate stray current leakage.
 - D. DB Co shall provide sub-ballast that is compliant with the requirements of AREMA Chapter 1 Part 2.
- (d) Track Transition Area
 - (i) DB Co shall provide a gradual, uniform change in Track modulus, by means of a Track transition area of sufficient length, at the interface point where two Track structure types abut one another, in compliance with the principles found in AREMA Chapter 8 and Chapter 30 and TCRP Report 155. Track transition area shall extend from the end of the Structure abutment or the end of slab Track, a minimum of 6.0m into the ballasted Track section

3.6 Guard Rail Configurations

- (a) Restraining Rail
 - (i) All Restraining Rail for Track shall be new and shall conform to the associated AREMA or UIC specifications.
 - (ii) Application:

- A. DB Co shall install Restraining Rails along the gauge side of the low rail for all mainline horizontal curves with a radius of 145m or less.
- B. Restraining Rail shall be electrically isolated from running rail.
- C. Restraining Rail may use bolted joints to avoid differences in thermal stress levels between the restraining rail and adjacent CWR running rail.

(b) Emergency (Steel Inner) Guard Rail

- (i) Emergency Guard Rail shall be provided at locations where it is important to prevent a derailed Train from leaving the Track section. Emergency Guard Rails shall be installed at retained embankments, on approaches to Tunnel portals, near overhead Structure abutments and at locations where a derailed Train would likely impact critical non-transit facilities such as high tension power line poles.
- (ii) DB Co shall provide Emergency Guard Rail at the following direct fixation and ballasted Track locations where structural lateral restraints capable of containing a derailed Train within the Guideway are not present:
 - A. Adjacent (within Train car length) to pier or column
 - B. Track is on embankment near the top of retaining walls where the top of rail is a minimum of 600mm above the surrounding grade, or other value agreed upon by DB Co and the City.
 - C. Track is located on a Bridge or aerial structure;
 - D. At approaches to obstructions or other adjacent Structure.
- (iii) DB Co shall provide Emergency Guard Rail that:
 - A. On Mainline Tracks shall extend 30m ahead of the beginning of the Bridge Structure or area being protected on the approach end, and 15m beyond the end of the protected Structure on the departure end.
- (iv) Emergency Guard Rail shall not be required on Tracks where structural lateral restraints occur and such restraints have been designed to contain a derailed Vehicle.

3.7 Track Materials

(a) General

- (i) Track materials provided by DB Co shall be new, with the exception of Emergency Guard Rail.

(b) Rail

(i) General

A. DB Co shall provide new 115 RE running rail that meets:

- i. AREMA Volume 1, Chapter 4, Part 2;
- ii. ASTM A1; and,
- iii. 115RE Rail Profile shown below.

B. DB Co shall provide Standard and Head-hardened rails that meet the following requirements:

- i. Standard Rail—310 minimum BHN.
- ii. High-strength rail—341 to 388 BHN (may be exceeded provided a fully pearlitic microstructure is maintained).

C. Head hardened (high strength) rail shall be used:

- i. on all curves with radius 500m or lower
- ii. on vertical gradients steeper than 4.0%
- iii. On Special Trackwork sections

- D. DB Co shall provide running rail as CWR in accordance with AREMA Chapter 4 Section 3.11, and Chapter 5 Part 4 and Part 5 standards.

(c) Track Fasteners

(i) General

- A. All Track fasteners shall have Design Life as identified in Schedule 15-2, Part 1, Article 4 – Design and Construction.
- B. DB Co shall provide Track fastening systems that:
- i. provides vertical and lateral stability to the rail;
 - ii. Restrain the rail movement during rail break incidents limiting the rail break gap to 55mm;
 - iii. distributes loadings to the Track substructure;
 - iv. resists longitudinal CWR forces due to thermal, acceleration and braking forces;
 - v. prevents rail buckling under all climatic and environmental conditions;
 - vi. resists corrosion and electrically insulate the rail from ground;
 - vii. absorbs vibration energy in order to attenuate noise and vibration and reduce Track Substructure loading;
 - viii. are of a standardized elastic, resilient, self-tensioning type that applies a constant toe load to the rail under all service conditions;
 - ix. permits the removal and re-installation of the rail vertically without loss of fastener function;
 - x. are easily installed and removed by one person with standard hand tools;
 - xi. are capable of being removed and reinstalled without loss in toe load, stiffness, or other performance properties; and,
 - xii. are compatible with the Revenue Vehicle dynamic envelope and clearances.

(ii) Track DFF

- A. DB Co shall provide the DFF:

- i. to be compliant with AREMA Chapter 8 Section 27.7;
- ii. to accommodate structural interface forces;
- iii. to provide means of achieving a minimum of 12mm rail lateral adjustment in 3mm maximum increments utilizing a mechanical interlocking system;
- iv. to provide means of achieving vertical rail adjustment;
- v. to permit Track gauge adjustment without removal of elements below the rail; and,
- vi. to provide a means of preventing not more than 2mm lateral movement of the rail base relative to the Track fastener in the event of failure or loosening of the anchorage devices, or other acceptable value agreed upon by DB Co and the City.

B. DB Co shall implement a DFF qualification test program as part of the Track Design and Construction Test Plan in accordance with Schedule 10 – Review Procedure.

(d) Concrete Ties

- (i) Concrete ties shall be made from monoblock pre-stressed reinforced concrete, conforming to the requirements of Chapter 30, Part 4 of the AREMA Manual for Railway Engineering.
- (ii) Concrete Ties shall be chosen based on having consistent design life and maintenance requirements to the Existing Confederation Line.
- (iii) Concrete ties shall have a minimum Design Life as per Schedule 15-2, Part 1, Article 4 – Design and Construction.
- (iv) Concrete ties may also be furnished with elastomeric pads attached to the underside of the tie to protect the tie from abrasion against the ballast.
- (v) Concrete ties shall be constructed on a minimum 225mm ballast section measured beneath the underside of the tie.
- (vi) Tie spacing shall be determined by DB Co on a system-wide basis, considering factors such as loading, allowable bearing pressure, Vehicle speed, cost, allowable Track deflection, lateral stability, ability to maintain gauge, etc. Tie spacing shall not result in over-stress on ballast, sub-ballast, and sub-grade. Centre-to-centre tie spacing shall never exceed 750mm for concrete crossties.

(e) Timber Ties

- (i) Timber ties shall be made from hardwood and shall conform to the requirements of Chapter 30, Part 3 of the AREMA Manual for Railway Engineering.
 - (ii) Timber ties shall be treated with a wood preservative, and shall be furnished with anti-splitting devices. All wooden ties shall be predrilled to prevent splitting of the ties.
 - (iii) Hardwood ties shall have a minimum Design Life as per Schedule 15-2, Part 1, Article 4 – Design and Construction.
 - (iv) Wood ties within Special Trackwork layouts shall be provided in various lengths to suit the size and layout of the turnout. The Special Trackwork designer or supplier shall determine the appropriate tie layout for the appropriate fastening assembly.
- (f) Rail Joints
 - (i) Insulated Joints
 - A. DB Co shall determine the need for and the positioning of insulated rail joints based on coordination with the S&TC requirements and in compliance with applicable AREMA standards and industry best practice.
 - B. DB Co shall provide factory bonded insulated joints compliant with the requirements of AREMA Chapter 4 Section 3.8 or equivalent where insulated rail joints are required.
 - C. DB Co shall provide field bonded insulated joints where the use of factory bonded insulated joints is not practical.
 - D. DB Co shall provide insulated rail joints to isolate Special Trackwork and to support the broken rail protection maintenance regime developed for the Existing Confederation Line with a maximum spacing of 3000m.
 - (ii) Welded Joints
 - A. General
 - i. DB Co shall provide no holes in the rail located within a minimum of 150mm of the weld location, including for temporary bolted locations.
 - B. Flash-Butt Welds
 - i. All CWR shall be welded by means of electric flash-butt method compliant with the requirements of AREMA Chapter 4 Section 3.10. Electric flash-butt welds shall be used for all running rail

connections consistent with CWR practice. Rail shall be welded into the longer strings practical during Construction.

C. Thermite Welds

- i. DB Co shall perform the thermite welding method compliant with the requirements of AREMA Chapter 4 Section 3.13, where impossible to weld rail joints by means of flash-butt welding.

(iii) Bolted Joints

- A. Standard bolted joints shall not be installed in Mainline Track. Bolted Joints shall be accepted as a temporary condition only.
- B. DB Co shall provide bolted joints with standard diameter holes and standard hole-spacing for the rail type.

(iv) Rail Expansion Joints

- A. DB Co shall determine the need for rail expansion joints at elevated Structures based on rail-to-structure interface analysis.

3.8 Special Trackwork

(a) General

- (i) DB Co shall provide Special Trackwork that incorporates standard 115RE rail and complies with:
 - A. Union Internationale des Chemins de Fer (International Union of Railway – UIC) Standards.
 - B. European Norm Standards for railway applications.
 - C. AREMA Manual for Railway Engineering
- (ii) DB Co shall provide Special Trackwork that is compatible with the Revenue Vehicle used on the existing system and shall be responsible for obtaining any additional information that may be required to ensure compatibility.
- (iii) DB Co shall provide Special Trackwork designed for concrete slab or ballasted Track on concrete ties for mainline installations and Special Trackwork designed for ballasted Track on timber ties for LMSF installations.
- (iv) All components and the final assembly of components shall be designed such that the specified tolerances can be maintained throughout the operating life of the Special Trackwork with minimal maintenance.

- (v) DB Co shall provide drainage for switch machines and turnouts in accordance with the requirements of Article 5 – Drainage and Stormwater Management Design Criteria, of this Part 2 such that Revenue Service operations can safely continue.
- (b) Design
 - (i) DB Co shall only use No. 12 and No. 8 tangential geometry turnouts and crossovers on Mainline Tracks and No. 6 and No. 4-equilateral turnouts for Yard Tracks and storage Tracks.
 - (ii) DB Co shall provide Special Trackwork with fabrication tolerances that conform with +2mm and -1mm track gauge tolerance and ± 1 mm horizontal, vertical and crosslevel tolerances measured in 2m chords.
 - (iii) The radius of the gauge corner in the wheel contact area for all Special Trackwork components shall be based on the Revenue Vehicle wheel profile. A maximum differential wear of 3mm between new and worn wheel profiles shall be considered in the design of Special Trackwork.
 - (iv) DB Co shall provide Special Trackwork that is electrically isolated from ground. The pads, insulators and other electrical insulation features shall be designed to ensure that there is not electrical continuity between the Special Trackwork and ground. There shall be a minimum air gap of 10mm and a surface electrical tracking distance of not less than 13mm between the Special Trackwork and ground.
 - (v) All rail joints shall be welded or insulated bonded joints.
 - (vi) DB Co shall provide boltless monoblock frogs or moveable-point frogs in turnouts and crossovers.
 - (vii) Frog guard rails shall be adjustable to accommodate rail wear. Guard rail mounting plates shall be integral to running rail plates. Flangeways shall be designed to accommodate the Revenue Vehicle.
 - (viii) DB Co shall provide switch point rails machined from 60E1A1 Rail with a forged transition to 115RE rail. Plant welded rail joints shall not be placed within the limits of the switch point rails supported on slide chairs.
 - (ix) DB Co shall provide point rails of Grade R350HT in accordance with EN13674, or approved equal.
 - (x) DB Co shall provide asymmetric rail profiles for switch points that match the profile shown below:

- (i) DB Co shall provide reusable end-of-Track protection devices at stub-end storage, Pocket Tracks and Tail Tracks and shall be suitable for permanent exterior exposure.
 - (ii) End-of-Track shock-absorbing devices shall meet the following criteria:
 - A. be capable of stopping an unoccupied Train travelling at 25 km/hr;
 - B. engage the Vehicle symmetrically about the coupler at bumper height; and,
 - C. have a cushioned face and not produce any damage to a Vehicle at Vehicle speeds less than 5km/hr. DB Co shall coordinate the design of the stopping device to ensure engagement to the car is adequate to prevent damage.
- (b) Wheel/Rail Friction Control
 - (i) DB Co shall provide wheel/rail friction control measures in locations consistent with the practices identified in AREMA Chapter 5 Section 5.9 and Chapter 4 Section 4.11.
 - (ii) DB Co shall provide lubricant selection and application aimed at minimizing loss of traction and electrical conductivity of the Traction Power negative return rail.
 - (iii) DB Co shall provide lubricators capable of adjusting lubricant application based on site-specific conditions.
 - (iv) DB Co shall provide space within the Guideway for lubricator cabinets, tubing, ancillary equipment, and maintenance access. DB Co shall protect tubing from impact damage.

3.10 Track Commissioning Tests

- (a) DB Co shall complete and submit the following minimum verification tests of Track installation to the City, in accordance with Schedule 10 – Review Procedure prior to Revenue Service:
 - (i) Track geometry measurement;
 - (ii) Track clearances measurement;
 - (iii) Revenue Vehicle clearance to Platform measurement;
 - (iv) rail measurement;
 - (v) rail defects assessment; and,

- (vi) ride quality measurement.

3.11 Track Measurement and Assessment Standards

- (a) DB Co shall implement the following Track measurement and assessment standards:
 - (i) Track parameters as follows:
 - A. Track gauge limits;
 - B. gauge-side rail wear and vertical rail wear;
 - C. cross level and superelevation;
 - D. horizontal lateral misalignment;
 - E. relative horizontal deviation;
 - F. relative vertical deviation;
 - (ii) Track clearances compliant with the criteria in this Part 2;
 - (iii) Revenue Vehicle clearance to Platforms compliant with the criteria defined in Schedule 15-2, Part 4, Article 2 - Architectural Design Criteria; and,
 - (iv) Other measurement and assessment criteria conforming to:
 - A. AREMA;
 - B. APTA Manual of Standards and Recommended Practices for Rail Transit Systems;
 - C. UIC and EN Standards for new Construction.

3.12 Track Measurement and Assessment Methodology

- (a) DB Co shall complete verification of Track geometry by means of a self-propelled Track geometry measuring vehicle in accordance with EN or AREMA Chapter 2 Part 1 practices. The measuring vehicle shall provide measurements at the intervals and tolerances per EN or AREMA for alignment, gauge and superelevation.
- (b) DB Co shall complete verification of Track clearances by means of a Track clearance measuring system in accordance with Good Industry Practice and AREMA Chapter 2 practices.
- (c) DB Co shall complete verification of rail measurement by means of a rail measuring system in accordance with AREMA Chapter 2 Part 2 practices.

- (d) DB Co shall complete verification of rail defect removals by means of an ultrasonic rail flaw detection system in accordance with practices identified in AREMA Chapter 4, Part 4 and Part 5.
- (i) Requirements, applicable to visual Trackwork and CWR inspections; and,
- (ii) For other Track measurement and assessment activities, the more stringent requirements identified in APTA Manual of Standards and Recommended Practices for Rail Transit Systems or Transport Canada Track Safety Rules.
- (iii) Track Construction tolerances shall be as shown in “Trackwork Design Brief Issued for Construction” RES-22-0-0000-DBC-003_0, Section 5.0 Construction Tolerances and Appendix A Construction Tolerances.

ARTICLE 4 STRUCTURAL DESIGN CRITERIA AND REQUIREMENTS

4.1 Scope

- (a) This Article governs the design, modification, rehabilitation and construction of Bridges, Elevated Guideways, at-grade Guideways, portal walls, retaining walls, Culverts, pole bases and other Structures not included elsewhere.
- (b) The design and construction of Underground Structures shall be per the requirements of Schedule 15-2, Part 8 – Underground Structures and Stations and Ancillary Facilities shall be in accordance with Schedule 15-2, Part 4 – Stations.

4.2 Codes, Standards and Manuals

- (a) The codes, standards, and references indicated in this clause shall be utilized for the design and construction of the Structures indicated in this Article, except as explicitly indicated in other articles. The structural design shall conform to the most current edition of the following codes and standards. If the criteria sources conflict, unless otherwise noted, the following shall apply in descending order of precedence:
 - (i) Applicable laws and regulations;
 - (ii) Specific obligations and Design Criteria identified in this Part 2 – Civil and Guideway;
 - (iii) CAN/CSA S6 Canadian Highway Bridge Design Code; and Exceptions to the Canadian Highway Bridge Design Code CAN/CSA S6 for Ontario;
 - (iv) City of Ottawa Standard Tender Documents for Unit Price Contracts;
 - (v) MTO Structural Manual;
 - (vi) OPSS;
 - (vii) OPSD;
 - (viii) CAN/CSA A23.3 Design of Concrete Structures;
 - (ix) CAN/CSA A23.1 Concrete Materials and Methods of Construction;
 - (x) AASHTO Guide Specifications for Design and Construction of Segmental Concrete Bridges;
 - (xi) CAN/CSA S16 Design of Steel Structures;
 - (xii) CAN/CSA G40.20/G40.21 General Requirements for Rolled or Welded Structural Quality Steel/Structural Quality Steel;

- (xiii) AREMA Manual for Railway Engineering, hereinafter referred to as AREMA;
- (xiv) MTO RSS Guidelines;
- (xv) MTO Reports and Guidelines;
- (xvi) MTO Design Supplement for TAC Geometric Design Guide for Canadian Roads;
and,
- (xvii) TAC Geometric Design Guide for Canadian Roads.

4.3 General Requirements

- (a) DB CO shall design all Structures by the Limit States Design method in accordance with CAN/CSA-S6. The design of all Structures shall also consider loads due to system-wide elements such as electrification, signalization and communication equipment.
- (b) DB Co Shall design all Roadway and pedestrian Structures in accordance with the Load Factors and Load Combinations as indicated in CAN/CSA S6.
- (c) DB Co Shall design all Guideway Structures subject to Vehicle loadings in accordance with the Load Factors and Load Combinations indicated in CAN/CSA S6, supplemented as indicated in Clause 4.5 of this Part 2, to recognize the listed permanent, transitory and exceptional loads.
- (d) The loading criteria to which the Structures are designed shall appear on the Structural drawings. Concrete placing sequence shall be indicated on the drawings or in the supplementary conditions, when required by design conditions.

4.4 Design Requirements

- (a) Minimum Clearance Requirements
 - (i) New Overhead Structures and existing Overpass/Underpass Structures being modified to Overhead Structures shall span the alignment and meet the minimum horizontal clearance requirements for the Vehicle, in accordance with Clause 2.12 of this Part 2.
 - (ii) New Guideway Structures and existing Structures being modified to Guideway Structures shall have a minimum structure width to allow for the passage of the alignment and meet the minimum horizontal clearance requirements for the Vehicle, in accordance with Clause 2.12 of this Part 2.
 - (iii) The minimum vertical clearance shall be as specified below unless stated otherwise in Appendix E of this Part 2.

- A. New Overhead Bridge Structures shall be designed to ensure they achieve a minimum vertical clearance of 4.5m from the TOR to the underside of the Structure.
 - B. New Overpass/Underpass Bridge Structures shall be designed to ensure they achieve a minimum vertical clearance in accordance with the MTO Design Supplement for TAC Geometric Design Guide for Canadian Roads.
 - C. Existing Overpass/Underpass Bridge Structures being modified to Overhead structures shall achieve a minimum vertical clearance of 4.5m from the TOR to the underside of the Structure.
- (b) Seismic Design
- (i) Importance Categories
 - A. DB Co shall design new Guideway Bridge Structures to meet major-route importance category.
 - B. Existing Bridge Structures being repurposed to Guideway Structures shall be seismically retrofitted as required and shall be classified as major-route Bridges.
 - C. DB Co shall design new Bridge Structures not subject to Vehicle loads to meet importance category “Other”.
 - (ii) DB Co shall use the PBD approach for all Bridge Structures.
 - (iii) New Bridges shall be analyzed for design earthquake loads for all three return periods and damage states in accordance with CAN/CSA S6.
 - (iv) Existing Bridges shall be analyzed for design earthquake loads for two return periods (975 years and 2475 years) and performance levels as specified in Table 2-4.1. The ASL category shall be determined in accordance with the Report on Study of Return Period Selection for Seismic Evaluation and Retrofit of Bridges in City of Ottawa. The seismic evaluation of existing buried Structures is not required.
 - (v) Table 2-4.2 summarizes the design approach, return period and performance requirements.
 - (vi) Seismic design for buried Structures and retaining walls shall be as per CAN/CSA S6

Table 2-4.1: Return Period and Performance Requirements for Existing Bridges

| Importance Category | Return Period (Years) | ASL 1 0-15 yrs | | ASL 2 16-50 yrs | | ASL 3 >50 yrs | |
|---------------------|-----------------------|-------------------|--------|--------------------|----------------------|------------------|----------------------|
| | | Service | Damage | Service | Damage | Service | Damage |
| Major-Route | 2475 | - | - | Life Safety | Probable Replacement | Disruption | Extensive |
| | 975 | - | - | Disruption | Extensive | Limited | Repairable |
| Other | 2475 | - | - | Life Safety | Probable Replacement | Life Safety | Probable Replacement |
| | 975 | - | - | -* | -* | Disruption | Extensive |

*No need for evaluation/retrofit design since performance objectives will automatically be satisfied after meeting the requirements of longer return periods

Table 2-4.2: Design Approach, Return Period and Performance Requirements

| | New Bridges | Existing Bridges |
|---|---|-----------------------------------|
| Design Approaches | PBD | PBD |
| Seismic ground motion probability of exceedance in 50 years (return period) | 2%, 5% and 10% (2475yrs, 975yrs, and 475yrs) | 2% and 5% (2475yrs and 975yrs) |
| Performance Level and Criteria | As per CAN/CSA S6 | As per Table 2-4.1 |

(c) Collision Protection

- (i) Piers supporting new and existing Bridges over the alignment and with a clear distance of less than 6m from the centerline of a Track shall be of heavy construction or shall be protected by a reinforced concrete crash wall.
 - A. Crash walls shall have a minimum height of 1200mm above the top of rail. The crash wall shall be at least 600mm thick and at least 3.5m long. When two or more columns compose a pier, the crash wall shall connect the columns and extend at least 900mm beyond the outermost columns parallel to the Track. The crash wall shall be anchored to the footings and columns, if applicable, with adequate reinforcing steel and shall extend to at least 1200mm below the lowest surrounding grade.
 - B. Piers shall be considered of heavy construction if they have a cross-sectional area equal to or greater than that required for the crash wall and the larger of its dimensions is parallel to the Track.

(d) Vibration and Deflection Control

- (i) Vibration and deflection control for pedestrian Structures shall be in accordance with CAN/CSA S6 and the MTO Structural Manual.

- (ii) Vibration and deflection control for Guideway Structures shall be in accordance with the following:
 - A. All Structures supporting the Guideway including all elements of retaining walls, infill, retaining, and backfill material, and supporting Guideway fill shall have a proven performance record with respect to detrimental effects of vibration, and other long term factors such as loss of fines and aggregates, and corrosion for the duration of the Design Life.
 - B. Provision for vibration and deflection control shall be incorporated into the design of new Structures. Vibration and deflection shall be reviewed for existing Structures and mitigated to meet the applicable criteria. Proposed variances for vibration and deflection limits for existing structures shall be submitted for approval in accordance with Schedule 10 – Review Procedure. The design for vibration and deflection control shall be based on the characteristics of the vehicle.
 - C. Girders of simple or continuous spans shall be designed so that deflections due to live load plus dynamic load allowance shall not exceed 1/1000 of the span length. The deflection of cantilever arms due to live load plus dynamic load allowance shall not exceed 1/300 of the cantilever arm.
 - D. To limit vibration amplification due to the dynamic interaction between the superstructure and the rail Vehicle, the Guideway spans shall be designed so that the natural frequency of the first mode of vertical vibration is not less than 2.5 Hz.
- (e) DB Co shall design or modify new or existing Guideway Bridges such that major rehabilitation work can be performed while maintaining a minimum of one Vehicle Track. DB Co shall design or modify new or existing Roadway Bridges such that major rehabilitation work can be performed while maintaining a minimum of one vehicle traffic lane in each direction, bicycle lanes and one sidewalk, as applicable.
- (f) The structural capacity and condition of existing Structures being modified to carry Vehicle loading or subject to DB Co construction activities shall be assessed and confirmed in coordination with the applicable Governmental Authorities. DB Co shall perform any repairs or strengthening required to accommodate the Vehicle loading or DB Co construction activities.
- (g) DB Co shall note all Design Criteria, including geotechnical and condition survey information to which the Structures are designed on submissions and/or structural drawings.
- (h) Design of new Structures, which are interfacing with existing Structures, shall be coordinated with the City and shall comply with the design and construction requirements of the applicable Governmental Authorities. Environmental, hydrology and hydraulic studies shall be performed to address all immediate and long-term impacts and issues for

Culverts and all Bridges, including Elevated Guideways, over water in coordination with the applicable Governmental Authorities, and the design shall comply with the requirements of the applicable Governmental Authorities.

- (i) New steel girder Structures over and adjacent to highways or exposed to salt spray shall be steel box girders.
- (j) Access to steel girders for inspection purposes shall be incorporated into the design, including devices/system to enable inspectors to walk along all girders and tie-off safely.
- (k) All new Bridges, Elevated Guideways and at-grade Guideways designed exclusively for Vehicle operation shall meet NFPA 130 requirements. Emergency walkways on Guideway Structures and under Overhead Structures shall be in accordance with NFPA 130.
- (l) Noise and vibration measures and control shall comply with the requirements of Schedule 17 – Environmental Obligations.
- (m) Aesthetic Design
 - (i) All new Structures shall meet the requirements of the MTO Aesthetic Guidelines for Bridges, supplemented by the additional requirements of this Article. All references in the MTO Aesthetics Guideline to Ministry Bridge Aesthetics Evaluation Group or MBAEG shall be replaced with the City. The aesthetic design review process and approval procedures as detailed in Chapter 11 of the MTO Aesthetic Guidelines for Bridges shall not be applicable to this Project. Chapter 11 of the MTO Aesthetic Guidelines for Bridges shall be considered deleted in its entirety.
 - (ii) The Bridge Aesthetic Level and Classification for new Structures is specified in Appendix E of this Part 2.
 - (iii) The aesthetic design of Level One Bridges (High Aesthetic Classification) is subject to City review and approval. DB Co shall prepare and submit an Aesthetic Design Report for all Level One Structures.
 - A. Be signed by the Design Architect.
 - B. Document the consideration of the following aesthetic design principals, as defined in the MTO Aesthetic Guidelines for Bridges, and how each of the aesthetic design principals were successfully addressed in the preliminary bridge design:
 - i. Functional clarity – The size and shape of each primary element shall be appropriate for its respective structural task and the form of the Structure shall truthfully and clearly express the loads that are being carried and transferred to the ground;

- ii. Economy and simplicity – The number of materials, textures, colours and architectural features shall be kept at a minimum without becoming visually monotonous and shall be applied consistently to provide a continuity of appearance;
 - iii. Scale and proportion – The Structure shall be designed to minimize the overall dimensions of elements and shall appear in scale with its surroundings;
 - iv. Harmony and visual balance – The Structure exhibits visual balance amongst its component part as well as with its surroundings;
 - v. Contrast and complexity – The design of the Structure shall introduce complexity as a means of relieving visual monotony without the use of excessive eye-catching elements, colours or superfluous decoration;
 - vi. Enduring visual quality, with a focus on surface finishes – The Structure shall be designed and constructed to ensure the quality and durability of base materials in order to achieve a lasting positive visual effect; and,
 - vii. Integration with context – The Structure shall be designed to make a positive aesthetic contribution to its physical setting.
- C. Include drawings of Bridge alternatives, details of specific aesthetic enhancements and 3D computer renderings of the proposed Structure viewed at perspective angles. Renderings shall be inclusive of the surrounding context.
- (iv) Level Three Bridges (Low Aesthetic Classification) do not require aesthetic design approval by the City. Submission of Aesthetic Design Report is not required for Level Three Bridges (Low Aesthetic Classification).
 - (v) There are no Level Two Bridges (Medium Aesthetic Classification) on this project.
 - (vi) Chain link fencing shall not be used on pedestrian Structures.
 - (vii) DB Co shall detail and protect the structural steel-to-concrete interface in a way that no rust staining of the concrete occurs.
- (n) Durability
- (i) New Structures shall be designed to attain the indicated Design Life as detailed in Schedule 15-2, Part 1, Article 4 – Design and Construction. Time dependent

design calculations, including corrosion, creep and fatigue shall be based on indicated Design Life. Design Life calculations shall be per CAN/CSA-S6.

- (ii) Time dependent design calculations for modified existing Structures, shall take into account the age and condition of the Structure.
- (iii) Guideway Structures shall be designed to protect against salt spray or exposure.
- (iv) Fatigue cycles for Guideway Structures shall be a minimum 15,000,000 cycles for peak period Trains of 120m to 150m length.
- (v) The durability of concrete Structures shall be assured through design and detailing, application of high performance materials, protection of reinforcing steel, and application of concrete sealers.
- (vi) Waterproofing shall be required for all Structure decks. The top of the existing and new concrete Structures shall be waterproofed as per applicable standards. Where direct fixation is utilized, a waterproofing technology compatible with direct fixation shall be applied. In-situ testing and warranties shall be required.
- (vii) Corrosion protection for below grade elements shall be in accordance with AREMA and shall meet the requirements in Schedule 15-2, Part 3, Article 12 – Corrosion Control. Steel piles shall not be used in corrosive ground water. Precast concrete piles may be used under these conditions, if specified with sulphate resisting cement.
- (viii) Where technically feasible, new Bridges shall be designed with integral or semi-integral abutments.
- (o) Stray current corrosion control for all Structures shall be in accordance with Schedule 15-2, Part 3, Article 12 – Corrosion Control.
- (p) A depressed approach slab shall be provided at all transitions between Track slab or Bridge decks with DFF and tie and ballast Track. Approach slabs of Guideway structures shall be waterproofed.
- (q) Approach slabs shall be designed and constructed for all new Structures supporting highway loads. Approach slabs of Roadway structures shall be waterproofed.
- (r) Drainage
 - (i) All Structures shall include provisions for drainage in accordance with Article 5 – Drainage and Stormwater Management Design Criteria, of this Part 2.
 - (ii) Joints shall be detailed to allow longitudinal conveyance of runoff without leaking at the joints.
 - (iii) Drain pipes shall be external to the concrete.

- (iv) Drainage from Structures within RVCA or SNC regulated floodplains shall be in accordance with Article 5 – Drainage and Stormwater Management Design Criteria, of this Part 2 and meet the requirements of applicable Governmental Authorities within whose jurisdiction the Structures are located.
- (v) Drainage pipes shall not reduce the vertical clearance of Structures.
- (vi) Catch basins shall not be located within the approach slab area.
- (s) Ductbanks
 - (i) Ductbanks shall be provided as necessary for Systems and operation conduits, including pull boxes and access to connecting devices.
 - (ii) The design of ductbanks at Structures shall comply with the requirements of the applicable Governmental Authorities.
 - (iii) Services carried through or under Bridges shall be located as per the requirements of the MTO Structural Manual.
- (t) The OCS foundation and structural design shall include, but not be limited to, consideration of wind, ice accretion, wire tensioning forces, upward force to the contact wire or contact rail, and the effect of wire break. The OCS foundation shall be designed in conjunction with the requirements in Schedule 15-2, Part 3, Clause 14.4.
- (u) Design of “U” Approaches and other Retaining Structures
 - (i) A drainage layer shall be provided behind the wall to mitigate the build-up of hydrostatic pressure, where Structures are designed as drained. Both the water pressure and the lateral soil pressure shall be considered in the design. Water from the drainage layer shall be removed with a drainage system acceptable to the local Governmental Authority.
 - (ii) MSE walls and MSE true abutments shall not be utilized as the primary support paths for Bridge beams and girders.
 - (iii) Earth retaining Structures, whether temporary or permanent, greater than 3m in height shall be designed on the basis of specific soils information relating to the backfill material. Such walls shall be analyzed using a recognized numerical design method accounting for the rigidity or flexibility of the soil-structure interaction.
 - (iv) All Tunnel approach retaining walls with exposed faces below the water table shall be waterproofed in accordance with the requirements of Schedule 15-2, Part 8, Clause 3.4.
- (v) Demolition and Restoration

- (i) Demolition and restoration shall be as per Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal, in addition to the provision contained in this clause.
 - (ii) The condition of the existing Structures within the Project ZOI of the demolition shall be surveyed and recorded with the cooperation of the owners of the Structures affected and the Governmental Authorities. The condition of Structures to be demolished is not required to be surveyed and recorded.
 - (iii) The demolition, including protective measures, site maintenance and restoration shall comply with the requirements of the owners and the Governmental Authorities.
- (w) DB Co shall provide a barrier, in accordance with CAN/CSA S6, at the exterior face of all new and existing Structures. The barrier type provided on each Structure shall be based on the following:
- (i) A bicycle barrier shall be provided on all pedestrian/MUP Structures.
 - (ii) A combination (bicycle) barrier shall be provided on all roadway Structures accessible to pedestrians and/or cyclists. In site specific locations, where a traffic barrier is specified between the Roadway lanes and the pedestrians and/or cyclists, a bicycle barrier shall be provided at the exterior face of the Structure.
 - (iii) A traffic barrier shall be provided on all Roadway Structures, not accessible to pedestrians and/or cyclists, and Guideway Structures. The Test Level for barriers used on Guideway Structures shall be Test Level 4 (TL-4).
- (x) Existing Structure foundations may be reused where DB Co has demonstrated them to be structurally adequate and capable of safely supporting the design load for the duration of the Design Life of the Structure.
- (y) Any structural work or upgrades undertaken by DB Co shall not obstruct existing MUP, sidewalk, Roadway or waterway connections on or under the Structure.

4.5 Loads and Forces

- (a) Guideway Structures shall use the following load combinations in addition to those given in CAN/CSA S6. It is imperative that Guideway Structures remain standing after experiencing one of these exceptional events.

$$\text{ULS Combination 10a}^1 = \alpha_D D + \alpha_E E + \alpha_P P + 1.0LR + 1.1L + 1.0K + 1.3LE$$

$$\text{ULS Combination 10b} = \alpha_D D + \alpha_E E + \alpha_P P + 1.0LR + 1.1L + 1.0K + 1.3DR$$

$$\text{ULS Combination 10c} = \alpha_D D + \alpha_E E + \alpha_P P + 1.0LR + 1.0L + 1.3H$$

$$\text{ULS Combination 10d} = \alpha_D D + \alpha_E E + \alpha_P P + 1.0LR + 1.0L + 1.3BR$$

$$\text{ULS Combination 10e} = \alpha_D D + \alpha_E E + \alpha_P P + 1.0LR + 1.0L + 1.3A$$

¹For ULS Combination 10a, do not use LF in L.

Where:

- LR Longitudinal Restraint
- LE - Emergency braking (from LF)
- DR - Derailment load (by LRV)
- H - Collision with pier or column (by other LRV)
- BR - Broken rail
- A - Ice Accretion

(b) Permanent Loads

- (i) Dead Load (D) shall be determined in accordance with CAN/CSA S6 for roadway and pedestrian Structures and in accordance with AREMA for Guideway Structures.
- (ii) Loads due to horizontal earth pressure and hydrostatic pressure (E) shall be determined in accordance with CAN/CSA S6. For lateral earth pressure, a maximum load factor of 1.5 shall be used for proportioning wall sections of “U” approach and other earth retaining Structures.
- (iii) Longitudinal Restraint (LR) for direct fixation Track, the structural design shall make provision for transverse and longitudinal forces due to temperature variations in the rail. These forces shall be applied in a horizontal plane at the top of the low rail. The magnitude of the forces shall be established based on the characteristics of the direct fixation system and the continuity of the Tracks. Longitudinal restraint shall have a load factor of 1.0 and shall be applied to all ULS load combinations.

(c) Transitory Loads

- (i) Live Load (L)
 - A. Live Load for highway and pedestrian loading shall be determined in accordance with CAN/CSA S6.
 - B. Guideway Structures
 - i. The [REDACTED] electrical vehicle shall be used as the Confederation Line Vehicle. The maximum axle load for this Vehicle is 14.9 tonnes (126kN), as shown in Figure 2-4.1.

Figure 2-4.1: [REDACTED]

[REDACTED]

- ii. The ballast vehicle, as shown in Figure 2-4.2 shall be used as the Confederation Line maintenance vehicle. The maximum axle load is 20 tonnes (196.1kN).

Figure 2-4.2: Maintenance Vehicle Loading

- iii. The Live Load (L) indicated in CAN/CSA S6 shall include the following effects:
- 1 L – Vehicle or Maintenance Vehicle live load
 - 2 DLA – dynamic load allowance (impact)
 - 3 LF_1 – Longitudinal traction/breaking force
 - 4 LF_2 – Longitudinal acceleration/deceleration force
 - 5 CF – Centrifugal force
- iv. For Structures carrying more than one Track, any combination of Vehicle axle loading on one or more Tracks which produces the critical design loading shall be the vertical live load used for structural design. It should be noted therefore, that the vehicle live load shall include as many cars as can be accommodated on the span or span(s) under consideration.
- v. Design situations such as Train evacuations, Train breakdown, and Train derailment shall be taken into account. This analysis shall consider the recovery of a disabled Vehicle, which could result in a crush loaded Train in combination with an empty Train.
- vi. All Guideway Structures shall be designed to accommodate highway vehicular loading CL-625-ONT Loading (CL-625-ONT Truck or CL-625-ONT Lane Load), as specified in CAN/CSA S6, in addition to the rail Vehicle loading.
- C. The DLA or impact is an equivalent static load expressed as a percentage of the vehicle vertical live load (L) which is considered to be equivalent to the dynamic and vibratory effects of the interaction of the moving vehicle

and the structure including the vehicle response to irregularity in the riding surface. The DLA or impact shall be determined in accordance with CAN/CSA S6 for highway loading and in accordance with AREMA for Vehicle loading, supplemented by the following:

- i. For direct fixation decks, the DLA shall be 30% for Vehicle loading.
 - ii. Impact shall be applied to the superstructure and generally to those members of the Structure that extend down to the top of footings. The portion above the ground line of concrete or steel piles rigidly connected to the superstructure as in rigid frame or continuous design is included. Impact shall not be considered for abutments, retaining walls, wall-type piers, piles, footings and service walks, except for the portion of piles rigidly connected to the superstructure, underground Structures with 900mm or more of cover and base slabs supported by earth (either at-grade or in subways).
 - iii. The impact force shall be applied at the top of low rail, distributed the same as outlined for the axle loads.
 - iv. In addition to the vertical impact, a horizontal impact or hunting (nosing) force (HF) equal to 10% of the Vehicle load shall be applied. This force shall be equally distributed to the individual axles of the Vehicle and shall be assumed to act in either direction transverse to the Track at the top of the low rail. Hunting force shall be applied to one Track only of any tangent duel-Track Structure. On horizontal curves the more critical of hunting force or centrifugal force shall be applied.
 - v. Rolling (Rocking) Force (RF) is a force equal to 10% of the Vehicle loading per Track shall be applied downwards on one rail and upwards on the other, on one or all Tracks. The rolling or rocking force is an impact load in addition to other vertical impact loads and shall be considered when detrimental to the Structure.
- D. Longitudinal Force (LF) shall be determined in accordance with CAN/CSA S6 for highway loading and as per the requirements below for Vehicle loading.
- i. A longitudinal traction and braking force equal to 25% of the static vertical live load shall be applied on all loaded Tracks at the level of the uppermost rail. The force generated is offset by the resistive clamping force of the rail clip and the number of plinths on the Bridge. The clip clamping force (typically 13.35 kN) shall be

checked and confirmed by DB Co for each individual case prior to being used in the design.

- ii. A longitudinal acceleration/deceleration force equal to 21% of the Vehicle design load, without impact, per Track, shall be applied at the center of gravity of the Vehicle above the top of the rail. Consideration shall be given to combinations of acceleration and deceleration forces where there is more than one Track on the Structure.
 - E. Centrifugal Force (CF) shall be determined in accordance with CAN/CSA S6 for highway loading and as per the requirements of AREMA for Vehicle loading.
- (ii) The effects of strains (K) due to temperature (T), shrinkage (SH), creep (CR) shall be considered in accordance with CAN/CSA S6 unless noted otherwise below:
- A. Provision shall be made for all movements and forces that can occur in the Structure as a result of shrinkage, creep and temperature variations as well as for the presence of thermal gradients through the depth of the superstructure. Load effects that may be induced by a restraint of these movements, including temporary restraints required during construction and restraints imposed by rail fasteners, shall be included in the analysis.
 - B. Thermal forces resulting from the temperature variations in the OCS shall be considered. Loads shall be determined in accordance with AREMA unless otherwise determined by DB Co using other established codes of practice.
- (iii) Wind Load on Structure (W) shall be designed to withstand wind loads in accordance with the CAN/CSA S6. Wind loading on the OCS shall be considered in the design of both superstructure and substructure elements.
- (iv) Wind Load on traffic (V) is wind load acting on the rail Vehicle and/or highway vehicular traffic and shall be in accordance with CAN/CSA S6. The entire length of the vehicle or any part or parts of that length producing critical response multiplied by the actual height of the vehicle above the side wall shall be considered as the frontal area.
- (v) Differential Settlement (S) are loads induced on the Structure and shall be considered.
- (d) Exceptional Loads
- (i) Earthquake (EQ) load shall be in accordance with CAN/CSA S6 and as modified by Clause 4.4 of this Part 2.

- (ii) Loads due to stream pressure and ice flows (F) shall be considered in accordance with CAN/CSA S6.
- (iii) Ice Accretion (A) Load shall be in accordance with CAN/CSA S6 and as modified below:
 - A. During normal operations, ice accretion equivalent to an average thickness of 40mm shall be applied to the roof of the Vehicles. It shall be assumed that there will be no ice build-up on vertical surfaces of the Vehicle.
 - B. During normal operations, ice (9.8 kN/m^3) accretion on the Guideway deck slab to the top of the running rails shall be applied as well as an additional accumulation of compacted snow (4.7 kN/m^3) on catwalks to the top of the barrier wall.
 - C. Snow and ice load during suspended operations is less than that caused by normal operating vehicle live loads; and shall not be included as a design case under load combinations in this Article.
- (iv) Collision Load (H) shall be in accordance with CAN/CSA S6 for roadway and pedestrian Structures and as modified below for Guideway Structures:
 - A. Piers or other Guideway Structure support elements that are situated less than 3m from the edge of an adjacent street or highway shall be designed to withstand a horizontal static force of 1000 kN, unless protected with suitable barriers. This force is to be applied on the support element at an angle of 10 degrees from the direction of the road traffic and at a height of 1200mm above ground level. This condition occurs with the dead load of the Structure but need not be applied concurrently with other loadings. The provisions of this clause shall apply to existing and proposed Guideway Structures.
- (v) Potential Derailment Load (DR) effects shall be considered. In the absence of actual crash test data or the results of a detailed dynamic crash/impact analysis the load effect of a derailment event can be accounted for by applying concurrently vertical and horizontal (transverse) forces to the supporting Structure as follows:
 - A. The vertical derailment load of the Vehicle shall consist of the Vehicle's maximum weight multiplied by an impact factor. A vertical impact factor of 100% of the Vehicle weight shall be used to compute the equivalent static derailment load.
 - B. Horizontal (transverse) load effect – equal to 20% of the Vehicle load, distributed proportionately along the length of the Vehicle in accordance with the axle load distribution along the length of the Train, acting perpendicular (transverse) to the Track alignment at the top surface of the rail.

- C. When checking any component of superstructure to substructure that supports two or more Tracks, only one Vehicle on one Track shall be considered to have derailed, with the other Track being loaded with a stationary work train, including work train, cranes, flats, etc., or another Vehicle, ready to receive Passengers from the derailed Train. The design load used shall be the greatest of these loadings.
 - D. For derailment events that would cause the Vehicle's wheels to bear directly on the Structure slab, the wheel load distribution on the slab shall be established using a rational method. Location of derailed wheel excursion limited by guard rails or curbs shall be that location that achieves maximum loading condition.
 - E. All elements of the Guideway Structure shall be checked assuming simultaneous application of all derailed wheel loads. The reduction of positive moment in continuous slabs due to derailed wheel loads in adjacent spans shall not be permitted.
- (vi) Broken Rail (BR) forces are those which are transferred to the Structure in longitudinal shear by the fasteners when a pull-apart occurs. The rail will slip, on both sides of the pull-apart, until the tensile force in the rail before the break is counteracted by the reversed fastener restraint forces.
- A. The unbalanced force from the broken rail is resisted by both the unbroken rails and the Guideway Structure support system, in proportion to their relative stiffness's. The distribution to the Structure shall be determined by analysis. The probability that more than one rail will break at the same time on a given dual-lane Structure or single-lane Structure is very small and shall not be considered.
 - B. The longitudinal restraint of the fastener shall be such that the calculated gap of a pull-apart will be less than 65mm at the minimum expected rail temperature. Computation of this gap shall include both rail slip in the fasteners and deflection of the Guideway Structure.
- (e) Construction loads shall be determined in accordance with CAN/CSA S6.

4.6 Distribution of Loads

- (a) Distribution of Wheel Loads to Slab for Tie and Ballast Track
 - (i) For tie and ballast Track, wheel loads are transmitted to the deck slab through the ballast. Wheel loads shall be uniformly distributed longitudinally over a length of 900mm, plus the depth of the Track Structure, plus twice the effective depth of slab, except as limited by wheel spacing. Wheel loads shall have uniform lateral distribution over a width equal to the length of the tie plus the depth of ballast

under the tie, except as limited by the proximity of adjacent Tracks or the extent of the Structure.

(b) Distribution of Wheel Loads to Slab for direct fixation Track

- (i) For direct fixation Track, wheel loads are transmitted to the deck slab through the rail fastening system placed directly on the slab. Wheel loads shall be uniformly distributed over a length of 900mm along the rail. This load shall be distributed transversely (normal to the rail and centered on the rail) by the width of the rail fastener plus twice the depth of the deck and Track support Structure except as limited by the proximity of adjacent Tracks or the extent of the Structure.

4.7 Material

- (a) Material used for the modification, repair and rehabilitation of existing Structures shall be compatible with the existing in-situ material.
- (b) Material selection and/or coating of attached elements shall be used to minimize staining to concrete elements.
- (c) All material for the Structures as identified in this Clause shall conform to OPSS.
- (d) Earth Retaining Structures
 - (i) Permanent RSS systems located beyond the salt spray zone, shall meet, as a minimum, medium performance and low appearance requirements in accordance with MTO RSS Design Guidelines. RSS systems within 10m of a salt spray zone or associated with the Bridge Structure shall meet high performance and high appearance requirements in accordance with MTO RSS Design Guidelines.
 - (ii) Where accessible to Passengers within the Fare Paid Zone, including bus Platform areas and adjacent to public areas at Station entrances, gabion stones at the face of gabion walls shall be sized to prevent removal.
- (e) Concrete
 - (i) Concrete shall conform to OPSS 1350 and City Special Provision F-9045 and F-9043.
 - (ii) All concrete mixes shall be in accordance with CAN/CSA A23.1
 - (iii) Concrete strength for Roadway and pedestrian Structures shall be as per MTO Structural Manual, except for Bridge decks and sidewalks which shall be 35 MPa.
 - (iv) Chloride Permeability - Rapid Chloride Permeability as determined by ASTM C1202 and measured at 91 days, shall not exceed 1000 coulombs for the superstructure mix.

- (f) Reinforcing Steel
 - (i) Reinforcing Steel shall meet the material requirements as defined in OPSS 905 and OPSS 1440.
 - (ii) Minimum reinforcement designation shall be 15M.
 - (iii) Welded splices or joints in reinforcing steel shall not be permitted. Welding for purposes of bonding and grounding continuity is permitted.
 - (iv) Couplers shall not be permitted in plastic hinge zones.
 - (v) No splices shall be permitted in plastic hinge zones for substructure components.
 - (vi) Premium reinforcing for Roadway and pedestrian Structures shall be used where required in accordance with the MTO Structural Manual.
 - (vii) Premium reinforcing for Guideway Structures shall be used in:
 - A. Top and bottom of cantilevers;
 - B. Guideway plinths that may be subject to de-icing salts, such as adjacent to Platforms;
 - C. Substructure elements that are located within the splash zone of Roadways treated with de-icing salts;
 - D. Barrier and parapet walls; and,
 - E. Sidewalks.
 - (viii) Where electrical continuity is required for managing stray currents, weldable reinforcement and suitable welding shall be used.
- (g) GFRP Reinforcing bars
 - (i) GFRP reinforcing bar shall only be permitted in barrier and parapet wall applications.
 - (ii) The GFRP reinforcing bars shall conform to the following standards:
 - A. CAN/CSA S806: Design & Construction of Building Structures with Fibre Reinforced Polymer
 - B. CSA S807: Fibre Reinforced Polymers
 - (iii) GFRP shall have a minimum modulus of elasticity of 40 GPa.
 - (iv) GFRP shall have a specified minimum tensile strength of 1000 MPa.

- (v) GFRP shall be type 2 and type 3.
- (h) Prestressing Tendons
 - (i) Internal unbonded post-tensioning tendons shall not be permitted.
 - (ii) External grouted post-tensioning tendons shall be permitted for segmental Construction and shall be corrosion protected.
- (i) Structural Steel
 - (i) Structural steel for Roadway and pedestrian Structures shall conform to the material requirements in the MTO Structural Manual.
 - (ii) Structural steel for Guideway Structures
 - A. Superstructure primary members shall be grade 350AT Category 3 for primary plates, girders and rolled section members.
 - B. Primary members made from pipe sections shall meet the minimum Charpy impact energy specified in Table 9 of CSA G40.21 for the similar yield strength of steel tested at a Category 3 temperature.
 - C. Secondary steel members shall be grade 350W or 350A.
 - D. ASTM A 588 may be substituted for grade 350A or grade 350AT. ASTM A 588 shall only be substituted for grade 350AT steel when the Charpy impact energy requirements are verified by the submission of test documentation.
 - (iii) Steel fabrication companies shall be CWB certified.
- (j) Deck joint assemblies shall comply with City of Ottawa Special Provision F-9201, including the 5 year warranty period for all NMI Structures.
- (k) Bearings shall comply with City of Ottawa Special Provision F-9221, including the 5 year warranty period for all NMI Structures.
- (l) Corrugated steel pipe, regardless of thickness or type, shall not be used for Bridge or Culvert construction.

4.8 Construction

- (a) Concrete Construction shall be in accordance with OPSS 904 and City of Ottawa Special Provision F-9040.
- (b) Precast Prestressed Concrete

- (i) Construction shall be in accordance with OPSS 909.
 - (ii) Precast members shall not be erected until sample cylinders tested per OPSS 1350 achieve a design 28 day compressive strength.
 - (iii) Precast Segmental Concrete Bridges shall be constructed in accordance with the requirements of AASHTO's Guide Specifications for the Design and Construction of Segmental Concrete Bridges except where it conflicts with CAN/CSA S6.
- (c) Structural Steel shall be Constructed in accordance with OPSS 906.
 - (d) Soffits shall be uncovered and without coatings.
 - (e) Bearings shall be uncovered.
 - (f) Bolted connections shall have a minimum diameter of 22mm and A325M designation of weathering steel.
 - (g) Welded connections – critical welds, such as over supports and midspan, shall be treated as tension splices subjected to more stringent tests (Non-Destructive Testing). Testing schemes shall be submitted by DB Co for review in accordance with Schedule 10 – Review Procedure.

4.9 Description of Project Structures

- (a) Provisions contained in this Clause shall be read in conjunction with Appendix E of this Part 2.
- (b) DB Co shall perform the following as part of the work for Confederation Line East Extension:
 - (i) Blair Road Bridge over Transitway (SN226780)
 - A. Repurpose the existing Underpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit, abutment walls, wingwalls and retaining walls;

- ii. Concrete patch repairs to all delaminated areas on the wingwalls; and,
 - iii. Replace longitudinal joint seal.
- (ii) Blair Road E-N/S Ramp (SN226790)
 - A. Repurpose the existing Underpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit, abutment walls, ballast walls, wingwalls and retaining walls;
 - ii. Concrete patch repairs to all delaminated areas on the soffit, abutment walls, bearing seat, wingwalls and piers; and,
 - iii. Replace the abutment bearings.
- (iii) Transitway Bridge over OR174 (SN224880)
 - A. Remove existing Bridge in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal.
 - B. Remove culverts A224636 and A224635 in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal. These culverts located along the shoulder shall be removed and replaced with open ditch.
- (iv) Montreal Road Flyover (SN224980)
 - A. Design and construct a new Elevated Guideway to carry the alignment over OR174 WB lanes. The new Structure shall accommodate:
 - i. The EB and WB alignment, including Emergency walkways on the Structure; and,
 - ii. The proposed OR174 WB roadway cross section in accordance with Clause 6.19 of this Part 2 under the Structure.
- (v) Westbound OR174 Bridge over Montreal Road (SN224850)
 - A. Remove existing Bridge in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal.

- B. Design and construct a new Overpass Bridge to carry OR174 WB lanes over Montreal Road. The new Structure shall accommodate:
 - i. The proposed OR174 WB roadway cross section in accordance with Clause 6.19 of this Part 2 on the Structure; and,
 - ii. The proposed Montreal Road cross section in accordance with Clause 6.19 of this Part 2 under the Structure.
 - iii. Scour/erosion protection treatments at the bridge including embankment slopes.
 - C. Bridge shall be an independent structure and designed in conjunction with the Montreal Road Station Bridge and the Eastbound OR174 Bridge over Montreal Road.
 - D. Retaining walls, abutments and Bridge superstructure shall be of concrete construction.
 - E. Bridge abutments shall be semi-integral and designed with deep foundations extending to bedrock.
 - F. Architectural concrete shall be used for all concrete elements exposed to the adjacent Station and/or within the Station limits. Architectural concrete shall be as per ACI 347.3R and shall meet the requirements in Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.
 - G. Construction of the new structure shall be staged in accordance with Schedule 15-2, Part 7, Article 2 – Existing Municipal Roadways.
- (vi) Montreal Road Station Bridge (SN224855)
- A. Design and construct a new Elevated Guideway to carry the alignment over Montreal Road. The new Structure shall accommodate:
 - i. The EB and WB alignment and the Montreal Road Station Train Platform on the Structure; and,
 - ii. The proposed Montreal Road cross section in accordance with Clause 6.19 of this Part 2 and the east and west Montreal Road Station entry plazas under the Structure.
 - B. Design of the Elevated Guideway shall be coordinated with the design of the Montreal Road Station. Refer to Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.

- C. The Elevated Guideway shall be an independent structure and designed in conjunction with the Westbound OR174 Bridge over Montreal Road and the Eastbound OR174 Bridge over Montreal Road Bridges.
 - D. Architectural concrete shall be used for all concrete elements exposed to the adjacent Station and/or within the Station limits. Architectural concrete shall be as per ACI 347.3R and shall meet the requirements in Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.
 - E. Retaining walls, abutments and superstructure shall be of concrete construction.
 - F. Bridge abutments shall be designed with deep foundations extending to bedrock.
 - G. Construction of the new Structure shall be staged in accordance with Schedule 15-2, Part 7, Article 2 – Existing Municipal Roadways.
 - H. Design of Station elements, on or below the Structure, shall meet the structural requirements of Schedule 15-2, Part 4, Article 4 – Structural Design Criteria and Requirements in addition to the requirements of this Article.
- (vii) Eastbound OR174 Bridge over Montreal Road (SN224851)
- A. Remove existing Overpass Bridge in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal.
 - B. Design and construct a new Overpass Bridge to carry OR174 EB lanes over Montreal Road. The new Bridge shall accommodate:
 - i. The proposed OR174 EB roadway cross section in accordance with Clause 6.19 of this Part 2 on the Structure; and,
 - ii. The proposed Montreal Road cross section in accordance with Clause 6.19 of this Part 2 under the Structure.
 - iii. Scour/erosion protection treatments at the bridge including embankment slopes.
 - C. Bridge shall be an independent structure and designed in conjunction with the Montreal Road Station Bridge and the Westbound OR174 Bridge over Montreal Road.
 - D. Retaining walls, abutments and Bridge superstructure shall be of concrete construction.

- E. Bridge abutments shall be semi-integral and designed with deep foundations extending to bedrock.
 - F. Architectural concrete shall be used for all concrete elements exposed to the adjacent Station and/or within the Station limits. Architectural concrete shall be as per ACI 347.3R and shall meet the requirements in Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.
 - G. Construction of the new Structure shall be staged in accordance with Schedule 15-2, Part 7, Article 2 – Existing Municipal Roadways.
- (viii) Green’s Creek Culvert under OR174 (SN227110)
- A. Design and construct a section of this culvert to facilitate the future replacement of the existing Green’s Creek culvert without interruption to the rail service. Following the future removal of the existing culvert by the City, it is intended that the new Structure section will serve as part of the new Green’s Creek Culvert. DB Co shall be responsible to provide a design of the complete Culvert to replace the existing Green’s Creek Culverts to demonstrate feasibility.
 - B. Design and construct a new Culvert section over the two easterly cells of the existing Green’s Creek Culvert and under the alignment in accordance with Clause 5.7 of this Part 2. The new Culvert shall accommodate:
 - i. The EB and WB alignment, including Emergency walkways; and,
 - ii. The two easterly cells of the existing Green’s Creek Culvert.
 - C. Design and construct new retaining walls at the south sides of the existing Culvert with concrete traffic barrier to retain the road section.
 - D. Construction of the new Culvert section shall be staged in accordance with Schedule 15-2, Part 7, Article 2 – Existing Municipal Roadways.
 - E. The new Culvert section shall be designed and constructed to allow for future extension to accommodate the ultimate OR174 roadway cross section. Design and construction of the new Culvert section shall:
 - i. Ensure a future Culvert extension to both the north and south sides of the new Culvert section can be constructed without causing disruption to the Confederation Line;
 - ii. Not cause any damage to the existing Green’s Creek Culvert;
 - iii. Ensure the future removal of the existing Green’s Creek Culvert can be performed without causing disruption to the Confederation Line;

- iv. The design of the complete Culvert replacement shall ensure to keep a minimum horizontal clearance of 5m from the existing watermain at north side from the proximate structural components of the future extension of the Culvert.
- (ix) Green's Creek Pedestrian Bridge (SN221250)
 - A. Design and construct a pedestrian Bridge over Green's Creek located north of the Green's Creek Culvert in accordance with Clause 5.7 of this Part 2. The new Structure shall accommodate:
 - i. A MUP on the Structure; and,
 - ii. Green's Creek.
 - B. Bridge shall be an independent Structure and designed in conjunction with the Green's Creek Culvert under OR174.
 - C. Scour/erosion protection treatments shall be provided at the Bridge embankment slopes.
- (x) Sir George-Etienne Cartier Parkway Bridge over OR174 (SN224860)
 - A. Repurpose the existing Underpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent inspection report and shall include the following, as a minimum:
 - i. All medium cracks on the soffit.
- (xi) Jeanne d'Arc Boulevard Bridge over OR174 (SN224870)
 - A. Repurpose the existing Underpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - C. Modify the existing Bridge to provide access to and accommodate the new Jeanne d'Arc Station and provide access to the Station from Jeanne d'Arc Boulevard. Modifications to the existing Bridge shall meet the

requirements in Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.

- i. DB Co shall ensure the existing Structure has adequate structural capacity to accommodate all required modifications. Any required repairs or strengthening shall be performed by DB Co.
- ii. Modifications to the Bridge for the Station shall include the relocation of conflicting Utilities.

D. Undergo a structural rehabilitation of the existing Underpass Bridge to address all substructure and superstructure deficiencies. The scope of rehabilitation shall be based on the most recent conditions reports and shall include the following, as a minimum:

- i. Crack repairs to all medium and wide cracks on the soffit, abutment walls, wingwalls, median island, sidewalk and barrier/parapet walls;
- ii. Concrete patch repairs to all delaminated and spalled areas on the soffit, abutment walls, piers, ballast walls, sidewalk and barrier/parapet walls;
- iii. Provide concrete sealer on the inside face of barriers;
- iv. Replace the abutment bearings;
- v. Mill and pave the asphalt wearing surface on the Bridge and approach slabs;
- vi. Replace concrete end dams and deck joint seals; and,
- vii. Reconstruct adjacent areas affected by construction of the proposed Jeanne d'Arc Station.

(xii) Orléans Boulevard Bridge over OR174 (SN224240)

- A. Repurpose the existing Underpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
- C. Modify the existing Bridge to provide access to and accommodate the new Orléans Boulevard Station. Modifications to the existing Bridge shall meet the requirements in Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.

- i. DB Co shall ensure the existing Structure has adequate structural capacity to accommodate all required modifications. Any required repairs or strengthening shall be performed by DB Co.
 - ii. Modifications to the Bridge for the Station shall include the relocation of conflicting Utilities.
- (xiii) Bilberry Creek Culvert under OR174 (SN224510)
 - A. Ensure structural capacity of Culvert not be exceeded with passage of the alignment and/or the increase of fill over the Structure. Any required repairs or strengthening shall be performed by DB Co.
- (xiv) Place d'Orléans Pedestrian Bridge over OR174 (SN228030)
 - A. Repurpose the existing Underpass pedestrian Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Modify the existing Bridge to provide access to and accommodate the new Place d'Orléans Station. Modifications to the existing Bridge shall meet the requirements in Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.
 - i. DB Co shall ensure the existing Structure has adequate structural capacity to accommodate all required modifications. Any required repairs or strengthening shall be performed by DB Co.
 - ii. Modifications to the Bridge for the Station shall include the relocation of conflicting Utilities.
 - C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following as a minimum:
 - i. Crack repairs to all medium cracks on the soffit;
 - ii. Concrete patch repairs to all spalled areas of the piers; and,
 - iii. Concrete repairs to exposed pier foundations.
- (xv) Place d'Orléans Station Pedestrian Bridge over EB OR174 (SN228025)
 - A. Design and construct a new pedestrian Bridge over OR174 EB lanes in accordance with the requirements in Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria. The new Structure shall accommodate:

- i. A fare paid pedestrian connection between the Bus Station to the LRT Station on the Structure; and,
 - ii. The proposed OR174 EB roadway cross section in accordance with Clause 6.19 of this Part 2 under the Structure.
 - B. Architectural concrete shall be used for all concrete elements exposed to the adjacent Station and/or within the Station limits. Architectural concrete shall be as per ACI 347.3R and shall meet the requirements in Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.
 - C. The new Bridge shall be designed and constructed in conjunction with the Place d’Orléans Station. Refer to Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.
- (xvi) Champlain Street Bridge over OR174 (SN224890)
- A. Repurpose the existing Underpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following as a minimum:
 - i. Crack repairs to all medium cracks on the abutment walls.
- (xvii) Tenth Line Road Bridge over OR174 (SN894010)
- A. Repurpose the existing Underpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Install Bridge Structure fencing in accordance with Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the abutment walls, ballast walls, soffit, diaphragms and piers; and,

- ii. Replace south transverse expansion joint seal.
- (xviii) Box Culvert under OR174 (SN894040)
 - A. Complete a structural evaluation to ensure the structural capacity of the Structure is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2 and/or increase of fill over the Structure. Any required repairs or strengthening shall be performed by DB Co.
- (xix) Taylor Creek Culvert under OR174 (SN894050)
 - A. Complete a structural evaluation to ensure the structural capacity of the Culvert is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2 and/or increase of fill over the structure. Any required repairs or strengthening shall be performed by DB Co.
- (xx) DB Co shall design and construct retaining walls as dictated by grade and where site conditions do not allow for an embankment with a stable slope to be installed. Retaining wall locations include but shall not be limited to the following:
 - A. Directly adjacent to the wingwalls on the west side of the new Westbound OR174 Bridge (SN224850) over Montreal Road.
 - B. Directly adjacent to the wingwalls on the east side of the new Eastbound OR174 Bridge (SN224851) over Montreal Road.
 - C. Along Ramp S-E OR174 EB between the Montreal Road Interchange and Green's Creek Culvert.
 - D. Along Ramp E-N/S OR174 WB off-ramp to Montreal Road.
- (c) DB Co shall perform the following work as part of the work for Confederation Line West Extension:
 - (i) Box Culvert under West Transitway (SN018231 and SN018232)
 - A. Complete a structural evaluation to ensure the structural capacity of the Culvert is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2 and/or increase of fill over the Structure. Any required repairs or strengthening shall be performed by DB Co.
 - B. Replacement of Culvert joints includes the replacement of all joint accessories (i.e. dowels). Premium reinforcing shall be used for all reinforcing steel, including dowels, required as part of the replacement of the Culvert joints.
 - (ii) West Transitway South Rock Wall (SN019991)

- A. DB Co shall complete an updated condition assessment including a detailed field survey to verify location and extent of wall defects and locations of increased deterioration on the existing rock wall and concrete retaining wall between SJAM Parkway and Piney Street. DB Co shall perform the updated condition assessment and categorize specific segments of the rock wall based on the following probability of failure:
- i. Low Risk:
 - 1 Rock is currently considered stable (i.e., clean rock face, thickly bedded rock layers with very little loose rock or rock which is slightly overhanging but is situated on a flat lying ledge or the rock is currently keyed into the rock mass) and it is unlikely that the rock will become unstable in the next 30 years.
 - ii. Medium Risk:
 - 1 Rock is stable at present (i.e., rock is overhanging but supported on loose rock or rock that is susceptible to weathering and further deterioration) but could become unstable within the next 30 years if acted upon by external forces including ongoing weathering and groundwater.
 - iii. High Risk:
 - 1 Rock is marginally stable at present (i.e., rock is overhanging and only partially supported on loose rock or rock that is susceptible to weathering or is situated on a potential sliding plane and could slide with increased groundwater pressure) and would very likely become unstable within the next 30 years.
 - iv. Very High Risk:
 - 1 Rock is currently considered unstable and could fail at any time. The rock is situated on a steeply inclined sliding plane possible with an open tension crack at the back of the block or has a very significant overhang. There is also evidence of some past movement (offset across open joints or disturbance of the soil/vegetation).
- B. DB Co shall implement rock face stabilization for all medium, high and very high risk zones. Acceptable stabilization strategies shall include, at a minimum:
- i. Acceptable stabilization strategies shall include, at a minimum::

- 1 Concrete re-facing with drainage system for the sections of the rock face that is comprised of siltstone and eroded limestone; and,
 - 2 Installation of a drapery system on the remaining sections.
- ii. Preparatory works for both strategies shall include removal of loose blocks & vegetation, filling weak shelly interbeds (>100mm into the rock) and filling underside of overhangs (>300mm) with shotcrete where bottom ledge exists. The required minimum Design Life shall be 10 years.
- C. DB Co shall complete an updated post construction condition assessment including a detailed field survey to confirm that only low risk failure zones are present following rock wall stabilization.
- (iii) West Transitway North Rock Wall (SN019992)
- A. DB Co shall complete an updated condition assessment including a detailed field survey to verify location and extent of wall defects and locations of increased deterioration on the existing rock wall and concrete retaining wall between SJAM Parkway and Piney Street. DB Co shall perform the updated condition assessment and categorize specific segments of the rock wall based on the following probability of failure:
- i. Low Risk:
 - 1 Rock is currently considered stable (i.e., clean rock face, thickly bedded rock layers with very little loose rock or rock which is slightly overhanging but is situated on a flat lying ledge or the rock is currently keyed into the rock mass) and it is unlikely that the rock will become unstable in the next 30 years.
 - ii. Medium Risk:
 - 1 Rock is stable at present (i.e., rock is overhanging but supported on loose rock or rock that is susceptible to weathering and further deterioration) but could become unstable within the next 30 years if acted upon by external forces including ongoing weathering and groundwater.
 - iii. High Risk:
 - 1 Rock is marginally stable at present (i.e., rock is overhanging and only partially supported on loose rock or rock that is susceptible to weathering or is situated on a

potential sliding plane and could slide with increased groundwater pressure) and would very likely become unstable within the next 30 years.

iv. Very High Risk:

- 1 Rock is currently considered unstable and could fail at any time. The rock is situated on a steeply inclined sliding plane possible with an open tension crack at the back of the block or has a very significant overhang. There is also evidence of some past movement (offset across open joints or disturbance of the soil/vegetation).

B. DB Co shall implement rock face stabilization for all medium, high and very high risk zones.

i. Acceptable stabilization strategies shall include, at a minimum:

- 1 Concrete re-facing with drainage system for the sections of the rock face that is comprised of siltstone and eroded limestone; and,
- 2 Installation of a drapery system on the remaining sections.

ii. Preparatory works for both strategies shall include removal of loose blocks & vegetation, filling weak shelly interbeds (>100mm into the rock) and filling underside of overhangs (>300mm) with shotcrete where bottom ledge exists. The required minimum Design Life shall be 10 years.

C. DB Co shall complete an updated post construction condition assessment including a detailed field survey to confirm that only low risk failure zones are present following rock wall stabilization.

(iv) Goldenrod Bridge at Tunney's Pasture (SN016255)

A. Design and construct a new Bridge to carry Goldenrod Driveway over the alignment. The new Structure shall accommodate the following:

- i. The proposed Goldenrod Driveway roadway cross section in accordance with Clause 6.19 of this Part 2 on the Structure; and,
- ii. The EB and WB alignment, including Emergency walkways under the Structure.

B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.

- C. Ensure no conflict between the Structure and the box Culvert under the West Transitway.
 - D. Track elevation under Structure to be optimized in order to allow for maximum vertical clearance and shall meet the vertical clearance indicated in Appendix E of this Part 2.
- (v) Ross Avenue Bridge (SN016260)
- A. Repurpose the existing Underpass Structure to accommodate the OCS in accordance with Schedule 15-2 Part 3, Article 14 – Overhead Contact System.
 - B. Ensure the existing Bridge Structure fencing meets the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria. DB Co shall perform any required fence upgrade, rehabilitation or replacement.
 - C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit;
 - ii. Concrete patch repairs to all delaminated areas on the soffit; and,
 - iii. Concrete patch repairs to all spalled areas on the retaining walls.
- (vi) Northwestern Avenue Bridge (SN016270)
- A. Repurpose the existing Underpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium cracks on the soffit;
 - ii. Concrete patch repairs to all delaminated areas on the abutment walls; and,
 - iii. Mitigate and repair undermining of wingwall.

(vii) Carleton Avenue Bridge (SN016330)

- A. Repurpose the existing Underpass Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. Ensure the existing Bridge Structure fencing meets the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria. DB Co shall perform any required upgrade, rehabilitation or replacement
- C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium cracks on the abutment walls and soffit;
 - ii. Concrete patch repairs to all spalled areas on the abutment walls and soffit; and,
 - iii. Concrete patch repairs to all delaminated areas on the soffit.

(viii) Island Park Drive Bridge (SN016280)

- A. Repurpose the existing Underpass Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
- C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit, wingwalls, and abutment walls; and,
 - ii. Concrete patch repairs to all delaminated areas on the abutment walls.

(ix) Lanark Avenue Bridge (SN016290)

- A. Repurpose the existing Underpass Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.

- B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit and abutment walls; and,
 - ii. Concrete patch repairs to all spalled areas on the abutment walls and slope protection.
- (x) Hydro Utility Bridge (SN019890)
- A. Repurpose the existing Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- (xi) Tweedsmuir Avenue Bridge (SN016300)
- A. Repurpose the existing Underpass Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - C. Modify the existing Bridge to provide access to the new Station in accordance with the requirements in Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.
 - i. DB Co shall ensure the existing Structure has adequate structural capacity to accommodate all required modifications. Any required repairs or strengthening shall be performed by DB Co.
 - ii. Modifications to the Structure for the Station shall include the relocation of conflicting Utilities.
 - D. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit and abutment walls; and,
 - ii. Concrete patch repairs to all spalled areas on the abutment walls.

(xii) Westboro Station Pedestrian Bridge (SN018240)

- A. If the Structure is not incorporated into DB Co design solution, DB Co shall decommission the superstructure in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal; or
- B. If the Structure is incorporated into DB Co design solution, DB Co shall:
 - i. Repurpose the existing Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System;
 - ii. Modify the existing Bridge to accommodate DB Co design solution as required. Any required repairs or strengthening required by DB Co's design shall be performed by DB Co; and,
 - iii. Perform structural rehabilitation to address all substructure, deck and soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - 1 Crack repairs to all medium and wide cracks;
 - 2 Concrete patch repairs to all spalled and delaminated areas; and,
 - 3 Replacement of wearing surfaces.

(xiii) Athlone Avenue Bridge (SN016310)

- A. Repurpose the existing Underpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
- C. Modify the existing Bridge to provide access to and accommodate the new Station to meet the requirements in Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.
 - i. DB Co shall ensure the existing Structure has adequate structural capacity to accommodate all required modifications. Any required repairs or strengthening shall be performed by DB Co.
 - ii. Modifications to the Structure for the Station shall include the relocation of conflicting utilities.

- D. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium cracks on the abutment walls and soffit; and,
 - ii. Concrete patch repairs to all spalled areas on the wingwalls.
- (xiv) Churchill Avenue Bridge (SN016320)
 - A. Repurpose the existing Underpass Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
 - B. Ensure the existing Bridge Structure fencing meets the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria. DB Co shall perform any required upgrade, rehabilitation or replacement.
- (xv) Roosevelt Avenue Bridge (SN018220)
 - A. Remove existing Bridge in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal and replace with a temporary Structure as part of the Transitway detour along Scott Street in accordance with the requirements in Schedule 15-2, Part 7, Article 3 – Existing Transitway System.
 - B. Once the Transitway detour is no longer in service, DB Co shall design and construct a new pedestrian Bridge over the alignment. The new Structure shall be constructed in the location of the existing Bridge and shall accommodate the following:
 - i. A reinstated MUP connection at Roosevelt Avenue providing a minimum clear width of 4.2m on the Structure; and,
 - ii. The EB and WB alignment under the Structure.
 - C. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.
 - D. DB Co shall install cyclist/pedestrian counters on the new Roosevelt Avenue Structure in accordance with Schedule 15-2, Part 7, Article 3 – Existing Transitway System.
- (xvi) SJAM Parkway at Carleton Avenue Pedestrian Overpass (SN018620, SN018621)

- A. DB Co shall ensure the structural capacity of EB and WB Structures is not exceeded with the passage of laden and unladen OC Transpo Buses. The design and installation of a temporary support system, if required, shall be performed by DB Co. Uninterrupted pedestrian passage under the Bridges shall be maintained at all times.
- B. Undergo a structural rehabilitation to address all identified Structure deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks;
 - ii. Concrete patch repairs to all spalled and delaminated areas; and,
 - iii. Replace barrier with owner specified modified Type Wyoming 830WYBRAIL 2-Tube Curb Mounted (PL-2) guiderail. The installation shall include all associated transitions, terminal elements and end treatments as per the details in Appendix F, Drawings F-3 to F-5, of this Part 2 and in accordance with Clause 6.21 of this Part 2.

(xvii) SJAM Parkway at Lanark Avenue Pedestrian Overpass (SN018610, SN018611)

- A. DB Co shall design and construct all necessary modifications to the existing WB pedestrian Overpass Structure as required in order to accommodate a widened MUP. Lane and MUP configuration shall be in accordance with Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.
 - i. DB Co shall ensure the existing Structure has adequate structural capacity to accommodate all required modifications for the MUP and lane reconfiguration. Any required repairs or strengthening shall be performed by DB Co.
- B. DB Co shall ensure that the structural capacity of the WB and EB Structures is not exceeded with the passage of laden and unladen OC Transpo Buses. The design and installation of a temporary support system, if required, shall be performed by DB Co. Uninterrupted pedestrian passage under the Bridges shall be maintained at all times.
- C. Undergo a structural rehabilitation to address all identified Structure deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks;
 - ii. Concrete patch repairs to all spalled and delaminated areas; and,

- iii. Replace barrier with owner specified modified Type Wyoming 830WYBRAIL 2-Tube Curb Mounted (PL-2) guiderail. The installation shall include all associated transitions, terminal elements and end treatments as per the details in Appendix F, Drawings F-3 to F-5, of this Part 2 and in accordance with Clause 6.21 of this Part 2.

(xviii) U Approach – Depressed Guideway Parkway East Portal (SN019212)

- A. Design and construct and new tunnel portal at the east end of the Parkway tunnel. The new portal shall accommodate the EB and WB alignment, including Emergency walkways.
- B. Design and construction of the portal shall be completed in conjunction with the design and construction of the Parkway Tunnel.
- C. Architectural concrete shall be used for all exposed concrete elements. Architectural concrete shall be as per ACI 347.3R and shall meet the requirements of Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.

(xix) U Approach – Depressed Guideway Parkway West Portal (SN019213)

- A. Design and construct and new tunnel portal at the west end of the Parkway tunnel. The new portal shall accommodate the EB and WB alignment, including Emergency walkways.
- B. Design and construction of the portal shall be completed in conjunction with the design and construction of the Parkway Tunnel.
- C. Architectural concrete shall be used for all exposed concrete elements. Architectural concrete shall be as per ACI 347.3R and shall meet the requirements of Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.

(xx) SJAM Parkway at Churchill Avenue Pedestrian Overpass (SN018920)

- A. Design and construct new twin Bridge Structures to provide MUP connection between the north and south pathway systems along the SJAM Parkway corridor. The new Bridges shall accommodate the following:
 - i. The SJAM Parkway roadway cross section, at Churchill Avenue in accordance with Clause 6.21 of this Part 2 on both the east and west Structure; and,
 - ii. A MUP under the Structures.

- B. Install City specified modified Type Wyoming 830WYBRAIL 2-Tube Curb Mounted (PL-2) guiderail, including all associated transitions, terminal elements and end treatments as per the details in Appendix F, Drawings F-3 to F-5, of this Part 2 and in accordance with Clause 6.21 of this Part 2.
- C. The minimum pathway width under the Structure shall be in accordance with Schedule 15-2, Part 6, Appendix A. A minimum vertical clearance of 3m unencumbered by haunches, shall be achieved over the full width of the pathway.

(xxi) SJAM Parkway at Cleary Avenue Pedestrian Overpass (SN018910)

- A. Design and construct new twin Bridge Structures to provide MUP connection between Cleary Station and NCC's proposed linear pathway system on the north side of the proposed SJAM Parkway corridor. The new Bridges shall accommodate the following:
 - i. The SJAM Parkway roadway cross section at Cleary Station in accordance with Clause 6.21 of this Part 2 on both the east and west Structure; and,
 - ii. A MUP under the Structures.
- B. Install City specified modified Type Wyoming 830WYBRAIL 2-Tube Curb Mounted (PL-2) guiderail, including all associated transitions, terminal elements and end treatments as per the details in Appendix F, Drawings F-3 to F-5, of this Part 2 and in accordance with Clause 6.21 of this Part 2.
- C. The minimum pathway width under the Structure shall be in accordance with Schedule 15-2, Part 6, Appendix A. A minimum vertical clearance of 3m, unencumbered by haunches, shall be achieved over the full width of the pathway.

(xxii) Lincoln Fields Station Pedestrian Bridge (SN018400)

- A. Structure to be decommissioned in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal.

(xxiii) Carling Avenue Bridge at Lincoln Fields Station (SN016070)

- A. Design and construct and a new Bridge to carry Carling Avenue over the alignment. The new Bridge shall accommodate the following:
 - i. The proposed Carling Avenue roadway cross section in accordance with Clause 6.19 of this Part 2 on the Structure; and,

ii. The EB and WB alignment under the Structure

B. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Article 2 – Design Criteria.

(xxiv) Pedestrian Bridge at [REDACTED]

A. Design and construct a new pedestrian Bridge over the alignment. The new structure shall be constructed north of the existing pedestrian Bridge (SN018380) and meet the requirements in Schedule 15-2, Part 6, Article 5 – Site Specific Temporary Requirements. The new Structure shall accommodate the following:

i. A MUP connection to existing pathway at Sackville Connaught Avenue intersection on the Structure; and,

ii. Existing Transitway; EB, WB and SB alignment, including Emergency walkways, MUP and the 100 year flood plain under the Structure.

B. Remove the existing pedestrian Bridge in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal. The new structure shall be Constructed and in service prior to the decommissioning of the existing pedestrian Bridge.

(xxv) Lincoln Fields Split Structure (SN015050)

A. Design and construct a new elevated Guideway to carry the EB and WB alignment to Bayshore over the SB alignment to Baseline. The new elevated Guideway shall be a single, multi-span Structure and shall accommodate the following:

i. EB and WB alignment, including Emergency walkways on the Structure

ii. Southbound alignment, including Emergency walkways, existing Transitway roadway cross section, Pinecrest Creek and a MUP under the Structure.

B. Construction of the new Structure shall be staged in accordance with Schedule 15-2, Part 7, Article 3 – Existing Transitway System.

C. Retaining walls shall not be used between the SB alignment and Pinecrest Creek.

(xxvi) U Approach – Depressed Guideway Connaught East Portal (SN015130)

- A. Design and construct and new Tunnel portal at the east end of the Connaught Tunnel. The new portal shall accommodate the EB and WB alignment, including Emergency walkways.
- B. Design and construction of the portal shall be done in conjunction with the design and construction of the Connaught Tunnel.
- C. Architectural concrete shall be used for all exposed concrete elements. Architectural concrete shall be as per ACI 347.3R and shall meet the requirements of Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.

(xxvii) U Approach – Depressed Guideway Connaught West Portal (SN015140)

- A. Design and construct and new Tunnel portal at the west end of the Connaught Tunnel. The new portal shall accommodate the EB and WB alignment, including Emergency walkways.
- B. Design and construction of the portal shall be done in conjunction with the design and construction of the Connaught Tunnel.
- C. Architectural concrete shall be used for all exposed concrete elements. Architectural concrete shall be as per ACI 347.3R and shall meet the requirements of Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.

(xxviii) Pedestrian Bridge at Queensview Station (SN018460)

- A. Design and construct a new pedestrian Bridge over Highway 417 in accordance with the requirements in Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria. The new Structure shall accommodate the following:
 - i. A pedestrian connection between the north and south side of Queensview Station on the Structure; and,
 - ii. The proposed Highway 417 roadway configuration in accordance with Schedule 15-2, Part 9 – Highway Works under the Structure.
- B. New structure shall be designed to span over Highway 417 in one span.
- C. Design of the Bridge shall be coordinated with the design of Queensview Station. Refer to Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.
- D. Architectural concrete shall be used for all concrete elements exposed to the adjacent Queensview Station Platforms. Architectural concrete shall be

as per ACI 347.3R and shall meet the requirements of Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.

(xxix) Highway 417 Westbound Off-Ramp at Richmond Road (SN116410)

- A. Repurpose the existing Underpass Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit, and abutment walls.
 - ii. Concrete patch repairs to all spalled areas on the soffit and retaining walls.

(xxx) Richmond Road Bridge (SN116420)

- A. Repurpose the existing Underpass Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. Install Bridge Structure fencing in accordance with Schedule 15-2, Part 6, Article 2 – Design Criteria.
- C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit, wingwalls, abutment walls, and retaining walls.
 - ii. Concrete patch repairs to all spalled areas on the soffit.
- D. Reconfigure Richmond Road cross section in accordance with the requirements of Schedule 15-2, Part 9, Part B, Clause 1.3.
- E. Complete a structural evaluation to ensure the structural capacity of the Bridge is not exceeded following reconfiguration of Richmond Road. Any required repairs or strengthening shall be performed by DB Co.

(xxxix) Richmond Road O/P Bayshore Drive (SN116110)

- A. Reconfigure Richmond Road cross section in accordance with the requirements of Schedule 15-2, Part 9, Part B, Clause 1.3.
- B. Complete a structural evaluation to ensure the structural capacity of the Bridge is not exceeded following reconfiguration of Richmond Road. Any required repairs or strengthening shall be performed by DB Co.

(xxxii) Highway 417 On-Ramp at Richmond Road (SN116430)

- A. Repurpose the existing Underpass structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit, wingwalls, abutment walls and retaining walls.
 - ii. Concrete patch repairs to all delaminated areas on the soffit.
 - iii. Stabilize southeast retaining wall.

(xxxiii) Graham Creek Culvert (SN117020)

- A. Ensure the structural capacity of the Culvert is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2 and/or increase of fill over the Structure. Any required repairs or strengthening shall be performed by DB Co.

(xxxiv) Stillwater Creek Culvert 1 (SN117440)

- A. An extension to this Culvert was constructed as part of the West Transitway construction.
- B. DB Co shall ensure that the structural capacity of the Culvert is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2 and/or increase of fill over the Structure. Any required repairs or strengthening shall be performed by DB Co.

(xxxv) Stillwater Creek Culvert 2 (SN117450)

- A. An extension to this Culvert was constructed as part of the West Transitway construction.

- B. DB Co shall ensure that the structural capacity of the Culvert is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2 and/or increase of fill over the Structure. Any required repairs or strengthening shall be performed by DB Co.

(xxxvi) Highway 417 E-N/S Ramp at Moodie Drive (SN116390)

- A. Repurpose the existing ramp Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. The existing ramp Structure shall not be modified or removed and shall accommodate the following under the structure:
 - i. The proposed EB and WB alignment, including emergency walkways; and,
 - ii. Bus access ramp to Moodie Station.

(xxxvii) Queensway (Hwy 417) Bridge (SN014490)

- A. Repurpose the existing Overpass Bridge to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. The existing Transitway Station shall be decommissioned with no alterations or impacts to the existing substructure and superstructure in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal. All components of the existing Queensway Transitway Station shall be removed, including but not limited to the following:
 - i. Lower Station Platforms and shelters;
 - ii. Upper Station Platforms and shelters;
 - iii. Elevator shafts and stairwells on the north side of the Structure; and,
 - iv. One elevator shaft and corresponding stairwell on the south side of the Structure.
- C. DB Co shall have the option to repurpose one of the south elevator shafts and corresponding stairwell as an Emergency access point. One south elevator shaft and stairwell and required components for operation shall only remain to be used as an Emergency access point, otherwise both south elevator shafts and stairwells shall be removed.

(xxxviii) Iris Street Bridge (SN015210)

- A. Design and construct a new Overhead Bridge to carry Iris Street over the alignment. The new Structure shall accommodate the following:
 - i. The proposed Iris Street roadway cross section in accordance with Clause 6.19 of this Part 2 on the Structure; and,
 - ii. The NB and SB alignment, east and west Train Platforms and a MUP under the Structure.
- B. Install Bridge Structure fencing in accordance with Schedule 15-2, Part 6, Article 2 – Design Criteria.
- C. The new Bridge shall be designed and constructed in conjunction with Iris Station. Refer to Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.
- D. Architectural concrete shall be used for all concrete elements exposed to the adjacent Station and/or within the Station limits. Architectural concrete shall be as per ACI 347.3R and shall meet the requirements in Schedule 15-2, Part 4, Article 2 – Architectural Design Criteria.
- E. Piers, if required, shall not be located on or directly adjacent to the Station Platforms.

(xxxix) Pinecrest Creek Iris Street Culvert (SN018350)

- A. Structure shall be decommissioned in accordance with Schedule 15-2, Part 1, Article 14 – Demolition, Removals and Disposal and shall meet the requirements in Clause 5.7 of this Part 2.

(xl) Pinecrest Creek Culvert Under Iris (SN017710)

- A. Design and construct a new Culvert under Iris Street over Pinecrest Creek. The design of the Culvert shall meet the requirements of Clause 5.7 of this Part 2. The new Culvert shall accommodate the following:
 - i. The proposed Iris Street roadway cross section in accordance with Clause 6.19 of this Part 2 and north and south embankment slopes over the Culvert; and,
 - ii. Pinecrest Creek under the Culvert.
- B. The new Culvert shall:
 - i. Be constructed with reinforced concrete;
 - ii. Be open bottom; and,

- iii. Convey a 100-Year Storm event.
- (xli) Pinecrest Creek Culvert Under Alignment (SN017720)
 - A. Design and construct a new Culvert to carry the alignment over Pinecrest Creek. The design of the Culvert shall meet the requirements of Clause 5.7 of this Part 2. The new Culvert shall accommodate the following:
 - i. The NB and SB alignment, including Emergency walkways, a west MUP and embankment slopes over the Culvert; and,
 - ii. Pinecrest Creek under the Culvert.
 - B. The new Culvert shall:
 - i. Be constructed with reinforced concrete;
 - ii. Be open bottom; and,
 - iii. Convey a 100-Year Storm event.
- (xlii) Pinecrest Creek Kenson Park Culvert (SN018360)
 - A. Complete a structural evaluation to ensure the structural capacity of the Culvert is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2 and/or increase of fill over the structure. All required repairs or strengthening shall be performed by DB Co.
 - B. Ensure Culvert has adequate length to accommodate embankments, alignment and MUP. Any required Culvert lengthening shall be performed by DB Co.
 - C. Undergo a structural rehabilitation to address all Culvert deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the Culvert barrel, and the inlet and outlet components;
 - ii. Concrete patch repairs to all delaminated areas on the Culvert barrel; and,
 - iii. Concrete patch repairs to all spalled areas on the Culvert barrel and inlet component.
- (xliii) Pinecrest Creek Baseline Road Culvert (SN018370)

- A. Complete a structural evaluation to ensure the structural capacity of the Culvert is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2 and/or increase of fill over the structure. All required repairs or strengthening shall be performed by DB Co.
- B. Ensure Culvert has adequate length to accommodate embankments, alignment and MUP. Any required Culvert lengthening shall be performed by DB Co.

(xlv) Baseline Road Bridge (SN016080)

- A. Repurpose the existing Underpass Structure to accommodate the OCS in accordance with Schedule 15-2, Part 3, Article 14 – Overhead Contact System.
- B. Install Bridge Structure fencing in accordance with Schedule 15-2, Part 6, Article 2 – Design Criteria.
- C. Undergo a structural rehabilitation to address all substructure and deck soffit deficiencies. The scope of rehabilitation shall be based on the most recent OSIM inspection report and shall include the following, as a minimum:
 - i. Crack repairs to all medium and wide cracks on the soffit, wingwalls, ballast walls and abutment walls;
 - ii. Concrete patch repairs to all delaminated areas on the soffit;
 - iii. Concrete patch repairs to all spalled areas on the soffit; and,
 - iv. Replace abutment bearings.

(xlv) Pinecrest Stormwater Management Facility Inlet Chamber and Inlet Culvert

- A. Design and construct a new continuous inlet chamber and inlet Culvert in accordance with the requirements in Clause 5.7 of this Part 2.
- B. The inlet chamber and inlet Culvert shall form a continuous enclosed channel, with a minimum width of 3m, from the existing Baseline Storm Sewer Outfall to the sediment forebay, as shown in Appendix J of this Part 2.
- C. Inlet Chamber
 - i. The new inlet chamber shall accommodate the following:
 - 1 Access for maintenance personnel on the chamber; and,

- 2 Stormwater flow from the Baseline Storm Sewer Outfall and an 8m wide bypass weir to Pinecrest Creek in the chamber.
- ii. The Structure shall be constructed of reinforced concrete walls with a reinforced concrete slab footing and a steel grate top.
- iii. The steel grate top shall include two access hatches and access to stop log gains. The location of the hatch openings and access to the stop log gains shall be in accordance with Clause 5.7 of this Part 2.
- iv. The existing Baseline Storm Sewer Outfall and the inlet chamber shall be structurally connected to prevent differential settlement and separation. The existing sewer and inlet chamber connection shall include the design of a grade beam at the connection interface.
- v. A minimum height of 2.4m shall be provided throughout the chamber, excluding areas over the weir and weir benching.

D. Inlet Culvert

- i. The new inlet Culvert shall accommodate the following:
 - 1 A MUP and maintenance road on the Structure; and,
 - 2 Flow from the inlet chamber to the pond.
- ii. The Culvert shall be designed to support CL-625-ONT live loading in accordance with CHBDC.
- iii. The Structure shall be a rigid frame concrete box Culvert with a minimum opening size of 3m wide by 2.4m high.
- iv. The outlet of the Culvert shall be mitered to match the adjacent slope.
- v. A steel pedestrian railing shall be installed on top of the Structure at the outlet end of the Culvert. The pedestrian railing shall continue down the mitered portion of the outlet.

(xlvi) DB Co shall design and construct retaining walls as dictated by grade and where site conditions do not allow for an embankment with a stable slope to be installed. Retaining wall locations include but are not limited to the following:

- A. Directly adjacent to the abutment walls, on the north and south of the new Carling Avenue Bridge at Lincoln Fields Station.

- B. On the north side of the Queensway, on the south side of Holly Acres Road
- C. Directly adjacent to the wingwalls on the east and west side of the new Iris Street Bridge.

**ARTICLE 5 DRAINAGE AND STORMWATER MANAGEMENT DESIGN
CRITERIA**

5.1 Reference Documents

- (a) Drainage and Stormwater Management shall be provided in accordance with the criteria contained in this Article and the Applicable Law, the Project Agreement, including but not limited to the latest edition of the following Reference Documents:
- (i) City Publications;
 - A. City of Ottawa Sewer Design Guidelines, including Technical bulletins
 - B. Stormwater Management Facility Design Guidelines
 - C. City of Ottawa By-Laws
 - D. “Stormwater Management Guidelines for the Pinecrest Creek/Westboro Area”, JFSA, 2012
 - (ii) Federal and Provincial Codes, Acts and Regulations;
 - A. Fisheries Act (Canada)
 - B. Ontario Water Resources Act
 - C. Drainage Act (Ontario)
 - D. Ontario Regulation 525/98 - Approval Exemption
 - E. Ontario Building Code
 - F. OPSS and OPSD
 - (iii) Conservation Authority Publications
 - A. RVCA: Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses (Ontario Regulation 174/06)
 - B. SNC: Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses (Ontario Regulation 170/06), Conservation Authorities Act, R.S.O. 1990, c. C.27
 - C. RVCA: Solutions for Shoreline Erosion
 - D. TRCA/CVC: Low Impact Development Stormwater Management Planning and Design Guideline
 - E. CVC: Low Impact Development Construction Guide

- F. RVCA: Ottawa River Flood Risk Mapping from Shirley's Bay to Cumberland
- (iv) MOECC Publications;

 - E. Permit To Take Water Manual
- (v) Ontario MNR Publications;
 - A. Technical Guide – River & Stream Systems: Flooding Hazard Limit
- (vi) MTO Publications;
 - A. Drainage Management Manual
 - B. Highway Drainage Design Standards
 - C. Gravity Pipe Design Manual
 - D. Environmental Guide for Erosion and Sediment Control during Construction of Highway Projects
- (vii) CHBDC;
- (viii) AREMA Manual for Railway Engineering;
- (ix) Standards Respecting Pipeline Crossings Under Railways (Transport Canada TC E-10);
- (x) NFPA 130; and,
- (xi) Other applicable policies, acts and guidelines by the City, Regulators, and applicable Governmental Authorities.

5.2 General Criteria

- (a) DB Co shall design and construct a drainage and SWM system such that Revenue Service operations can safely continue and such that surface ponding remains below the TOR during the 100-Year Storm event.

- (b) DB Co shall evaluate the performance of the drainage and SWM system under historical storms and 100-Year Storm Plus 20% (stress test condition) and modify the design as needed in accordance with the City of Ottawa Sewer Design Guidelines and Technical Bulletins.
- (c) DB Co shall design and construct Drainage and SWM systems for the Guideway and Stations such that the maximum depth of flow on local and collector streets remains below 0.35 m during the 100-Year Storm event. The depth of flow may extend adjacent to the ROW provided that the water level does not touch any part of building envelopes and shall remain below the lowest Station and building opening during the 100-Year Storm Plus 20% event (stress test condition).
- (d) Runoff from at-grade and below grade segments shall be collected by trackside ditches or storm sewers. All Guideway drainage shall be captured and managed within the Guideway ROW with SWMPs that provide attenuation up to the 100-Year Storm and water quality protection that meets MOECC's 'Enhanced' standard before discharging to outlet locations. Discharge shall be to outlets at the locations identified in Clause 5.7 – Site Specific Criteria, of this Part 2.
- (e) Runoff from raised Guideway, where Guideway is an embankment, may be discharged along the embankment, provided runoff is evenly distributed to prevent erosion, before being collected by SWMPs that provide attenuation up to the 100-Year Storm and water quality protection that meets MOECC's 'Enhanced' standard.
- (f) Runoff from raised Guideway, where Guideway is a Structure, shall be conveyed by gutter systems to inlets. Inlets shall discharge to SWMPs that provide attenuation up to the 100-Year Storm and water quality protection that meets MOECC's 'Enhanced' standard.
- (g) DB Co shall secure all permits and approvals, where necessary for the implementation of the Drainage and SWM systems for the Project, and shall be responsible for preparing and submitting all necessary drawings and supporting documentation associated with obtaining those permits and approvals in accordance with Schedule 10 – Review Procedure.
- (h) DB Co shall be responsible for all costs associated with obtaining the required permits and approvals, and those associated with providing the Drainage and SWM systems.
- (i) DB Co shall obtain sewer discharge permits and approvals in accordance with the City, MOECC and CA (RVCA, SNCA) requirements. Sewer discharge permits and approvals shall be obtained a minimum of two weeks prior to the anticipated discharge date.
- (j) DB Co shall obtain all PTTWs and/or Environmental Activity and Sector Registry registrations, in accordance with current MOECC requirements, for the Works.
- (k) All additions or modifications to existing sewers and related appurtenances will require municipal approval and shall conform to the requirements of the City.

- (l) DB Co shall ensure services to adjoining properties are supported in place and maintained in operation during additions to or modifications of the existing sewers.
- (m) Without limiting any other obligations of DB Co, DB Co shall be in compliance with Ontario Regulation 166/06 (Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses) for Works within RVCA/SNCA regulated areas.
- (n) No sanitary sewer discharge shall be permitted to enter the Drainage and SWM systems supporting SI.
- (o) DB Co shall design and construct Drainage and SWM systems such that existing Drainage systems and overland flow paths are free of Hazard and such that any impact to these is mitigated.
- (p) DB Co shall provide complete design packages for all Drainage and SWM components submitted in accordance with Schedule 10 – Review Procedure. Design packages shall include all Drainage and SWM works including detailed drawings, calculations, reports, and related ECA applications.

5.3 Drainage Criteria

- (a) The Drainage Design Criteria provided herein are considered a minimum standard. The design of drainage facilities belonging to the City or other applicable Governmental Authorities which are to be relocated or modified to accommodate SI shall conform to the Design Criteria and standards of the City or the applicable Governmental Authorities. Required relocation of existing drainage facilities shall be Replacement-In-Kind, unless otherwise instructed.
- (b) Drainage and SWM systems for the Project including the Guideways, Tunnels, Stations, LMSFs, roadways, parking lots, and other SI shall be designed in accordance with City and provincial standards.
- (c) DB Co shall not increase flow rates to existing combined sewers or separated sewers unless the increase is approved by the City. Flow rates shall be limited in accordance with Section 3.2 of the Ottawa Sewer Design Guidelines.
- (d) New storm sewers for the Project to convey minor system flows shall be designed to capture and convey a design storm event in accordance with Section 5.10 of the City of Ottawa Sewer Design Guidelines.
- (e) Where the minor system for the Project is proposed to discharge to an existing municipal storm sewer, Ottawa Sewer Design Guidelines section 8.3.7.3 shall apply.
- (f) In urban areas, DB Co shall design and construct on-site controls for flows from SI runoff in excess of the design capacity of the receiving minor system, for all storms up to the 100-Year Storm. For the stress test storm (100-Year Plus 20% Storm) excess flows shall

- be conveyed via the Guideway, streets, open channels and walkways to a City approved public outlet, in accordance with the City of Ottawa Sewer Design Guidelines flow spread and velocity-depth criteria, without introducing property damage, limiting Emergency vehicle access, or endangering users of the roadway.
- (g) The combination of a minor system and an overland flow system shall be designed for a 100-Year Storm or larger in accordance with the City of Ottawa Sewer Design Guidelines and Technical Bulletin and not create flow depths above the TOR.
 - (h) DB Co shall demonstrate to the City through hydrologic/hydraulic analysis that the flow rates or the hydraulic grade line in the receiving storm sewers does not adversely affect the existing level of service, in terms of flood protection and minor system performance, as a result of the Works.
 - (i) Guideway runoff (up to and including the 100-Year Storm) to Tunnels (or other section of below-grade Guideway), shall be intercepted and diverted by gravity to an outlet as close as possible to each Tunnel portal (or other section of below-grade Guideway). For clarity, possible gravity drainage outlets include new or existing outlets within the Lands, including City Road Allowance Lands. In the below-grade sections of the Guideway, DB Co shall keep Tunnel portals, Tunnels and Stations free from Flooding due to all storms up to and including the 100-Year Plus 20% Storm.
 - (j) DB Co shall design and construct all Drainage and SWM systems required to ensure adequate Drainage during Construction of the Works. Discharges shall comply with Applicable Law and City requirements.
 - (k) DB Co shall comply with the following requirements for Guideway Drainage:
 - (i) The Guideway Drainage system shall be designed and constructed such that ponding levels do not exceed TOR elevation and such that ponding does not contribute to subgrade instability for all storms up to and including the 100-Year Storm, as applicable to East Works, West Works, and Stage 1 Connection Infrastructure;
 - (ii) All Drainage discharges from the Guideway shall be in accordance with Applicable Codes and the requirements of the City and other applicable Governmental Authorities;
 - (iii) DB Co shall provide maintenance holes (access points) outside of the Guideway on all new service connections, between the City's ROW and the Guideway, in accordance with City requirements. The maintenance holes and sewers shall be turned over to the City to enable the City to perform its maintenance responsibility for storm drain/sewer service connections located beyond the limits of the Guideway.

- (l) Groundwater, fireflow discharge, and storm runoff at all underground structures and other areas without a gravity outlet, shall be collected and pumped to a municipal storm sewer in compliance with the City of Ottawa Sewer Use By-Law.
- (m) All new Culverts under the Guideway, regardless of size, shall be of reinforced concrete construction.
- (n) All trackside swales within the Pinecrest Creek and SJAM Parkway corridors shall have side slopes no steeper than 3:1.

5.4 Stormwater Management Criteria

- (a) SWM for the Project shall be provided in accordance with the City's "Sewer Design Guidelines" and "Stormwater Management Facilities Design Guidelines", MOECC's "Stormwater Management Planning and Design Manual", and other applicable sub-watershed studies and guidelines.
- (b) DB Co shall prepare complete SWM plans and design packages in accordance with the City and Provincial requirements for all drainage and SWM aspects of the Works to address at a minimum:
 - (i) Water balance, quantity and quality control requirements imposed by local, provincial and federal government regulations along with the Project environmental impacts and mitigations;
 - (ii) Impact on existing municipal drainage and storm water management systems, and natural drainage systems;
 - (iii) Existing ditches, watercourses, Culvert crossings, and storm sewers that will be affected or are relevant to the Project;
 - (iv) Potential impacts of the Project on the existing drainage system and on any environmentally sensitive areas, in consultation with applicable Governmental Authorities;
 - (v) Existing drainage patterns and how the proposed Drainage System design will extend the existing minor and major drainage systems;
 - (vi) Directions by applicable Governmental Authorities in respect to changes in drainage patterns, upgrades to drainage infrastructure or modifications, and any agreements reached with the City or applicable Governmental Authorities;
 - (vii) Proposed SWMPs to mitigate potential impacts of the Works, including appropriate plans and drawings to illustrate the same; and,
 - (viii) All pertinent background information, calculations and model output to support the proposed designs and Works.

- (c) DB Co shall submit complete SWM plan and design packages to the City as part of the Works Submittals in accordance with Schedule 10 – Review Procedure.
- (d) Drainage and SWM designs of Facilities that require review and approval from applicable Governmental Authorities shall be submitted in accordance with the procedures established by the respective Governmental Authority. DB Co shall comply with the Governmental Authority permit requirements and conditions.
- (e) The design of stormwater detention facilities and control measures proposed as part of the Works shall be submitted to the City and other applicable Governmental Authorities for approval.
 - (i) Where LID measures are required, they shall be designed in accordance with the “Low Impact Development Stormwater Management Planning and Design Guidelines”. Refer to Schedule 15-2, Part 6, Article 2 – Design Criteria for landscaping requirements of LID measures.
- (f) Roof Drainage (above-grade structures) shall be managed in accordance with a site-specific SWMP. Roof Drainage shall not be routed to the underground Track Drainage system.
- (g) Unless otherwise noted, all SWM facilities shall be designed to meet the MOECC’s “Enhanced” standard.
- (h) Project site components that ultimately drain to the Ottawa River or Rideau River, and are considered Infill Development, as defined in section 8.3.7.2 of the City of Ottawa Sewer Design Guidelines, shall control peak flows to the minor system as prescribed in Section 3.2.2 and 8.3.7 of the City of Ottawa Sewer Design Guidelines. Water quality SWMPs for Infill Development are to provide a net improvement over existing conditions.
- (i) Extended detention or “wet-pond” SWM facilities shall be designed and constructed to prevent both losses of permanent pool due to infiltration and losses of active storage due to intrusion of groundwater, if required.
- (j) OGS structures shall be designed and specified with a required performance of removal of fine sediment, oil, floating and sinking debris, and 80% removal efficiency for TSS. OGS structures located outside of the Guideway shall be accessible by rubber tire vehicle.
- (k) All Drainage within the Pinecrest Creek/Westboro watersheds shall be subject to specific quantity and quality criteria as outlined in Table 2-5.1

Table 2-5.1 - SWM Guidelines for the Pinecrest Creek/Westboro

| Soil Infiltration Characteristic | Runoff Volume Reduction | Water Quality | Water Quantity |
|---|------------------------------------|----------------------|-----------------------|
|---|------------------------------------|----------------------|-----------------------|

| | | TSS Removal | Flooding | Erosion |
|---|---------------------------------------|-------------------------|--|--|
| A Draining to Ottawa River (Westboro) | | | | |
| soil infiltration > 1mm/hr | On-site retention of 10mm of rainfall | On-site removal 80% TSS | OSDG Section 8.3.7.3 (Sept 2008) | Does not apply |
| soil infiltration < 1mm/hr | Best effort based on opportunity | | | |
| B Draining to Pinecrest Creek | | | | |
| B1 Discharging upstream of Ottawa River Parkway (ORP) Pipe inlet | | | | |
| soil infiltration > 1mm/hr | On-site retention of 10mm rainfall | On-site 80% TSS removal | More stringent of 33.5 L/s/ha (1:100 yr) or OSDG 8.3.7.3 | Control peak flow (25mm) to 5.8 L/s/ha |
| soil infiltration < 1mm/hr | Best effort based on opportunity | | | |
| B2 Discharging directly to the Ottawa River Parkway (ORP) Pipe | | | | |
| soil infiltration > 1mm/hr | On-site retention of 10mm rainfall | On-site 80% TSS removal | More stringent of 33.5 L/s/ha (1:100 yr) or OSDG 8.3.7.3 | Does not apply |
| soil infiltration < 1mm/hr | Best effort based on opportunity | | | |

5.5 Numerical Computational Procedures and Models

- All numerical computation procedures shall comply with the requirements of the City of Ottawa Sewer Design Guidelines. Computer models used shall comply with the guidelines for model selection provided in the MTO's "Drainage Management Manual."
- DB Co shall confirm the suitability and acceptance of any computer model nominated for use in the design and analysis of Drainage or SWM system for the Project with the City and other approving agencies.
- Peak flows to be used for design purposes for drainage areas greater than 40 hectares shall be verified using a method approved by the City and other applicable Governmental Authorities.

5.6 Erosion and Sediment Control Requirements

- DB Co shall implement stormwater control, mitigation, and ESC measures appropriate for the urban context of the Project to ensure deleterious substances and other pollutants do not leave the Site and enter watercourses or the municipal drainage infrastructure.
- DB Co shall prepare an ESC Plan for the Project, as a component plan of the Environmental Management Plan described in Schedule 17 – Environmental Obligations, to comply with environmental approvals and commitments and with any and all Applicable Codes. In addition, site-specific ESC Plans shall be developed to address local

potential environmentally sensitive site conditions, including watercourse crossings. The ESC Plan for the Project and the site specific ESC Plans shall be submitted to the City in accordance with Schedule 10 – Review Procedure.

- (c) In addition to City and other Governmental Authority requirements, ESC Plans shall be prepared in accordance with the following documents:
 - (i) MNR, et al., 1987, Guidelines on Erosion and Sediment Control for Urban Construction Sites.
 - (ii) MTO's Environmental Guide for Erosion and Sediment Control during Construction of Highway Projects.
- (d) DB Co shall obtain all permits and approvals for all in-water works in accordance with all applicable Governmental Authorities' requirements.
- (e) DB Co shall adhere to all fisheries (timing) window restrictions imposed by the RVCA, SNC, or other applicable Governmental Authorities on activities on or adjacent to watercourses associated with the Works.

5.7 Site-Specific Criteria

- (a) DB Co shall comply with the following site-specific requirements to satisfy the Drainage and Stormwater Management Design Criteria outlined in this Article.
- (b) Confederation Line East Extension Stations:
 - (i) Blair Station (Existing Confederation Line)
 - A. Expansion of the Station is considered Infill Development. As such, it shall comply with the provisions of Sections 3.2.2 and 8.3.7 of the City of Ottawa Sewer Design Guidelines (latest version).
 - (ii) Montreal Station
 - A. The Station shall be considered Greenfield Development. SWM requirements as per this Article.
 - (iii) Jeanne d'Arc Station
 - A. Drainage to existing outlets to the east of the Station. The Station shall be considered Greenfield Development. SWM requirements as per this Article.
 - (iv) Orléans Boulevard Station
 - A. Station drainage shall be to the existing Orléans Boulevard storm sewer, located approximately 230m west of the Station. The Station shall be

considered Greenfield Development. SWM requirements as per this Article.

(v) Place d'Orléans Station

- A. Station drainage shall be to the 900mm -1350mm diameter storm sewer, which is currently located within the OR174 median. This sewer shall be relocated by DB Co as per the requirements in Article 8 – Utility Infrastructure Design Criteria, of this Part 2. The Station shall be considered Greenfield Development. SWM requirements as per this Article.

(vi) Trim Station

- A. The Station and Park and Ride shall be considered Greenfield Development. SWM requirements as per this Clause.

(c) At-Grade Guideway – Blair to Trim

- (i) The Guideway shall be considered Greenfield Development. SWM requirements as per this Article.
- (ii) DB CO shall design and construct a Drainage system for the OR174 in accordance with the MTO GDSOH. For additional requirements of roadway design for OR174, refer to Article 6 – Roadways, Bus Terminals and Lay-bys, of this Part 2.
- (iii) DB Co shall replace all existing centreline and median Culverts underneath the Guideway and OR174 unless specified otherwise in this Clause.
- A. DB Co shall design the replacement of the Green's Creek culverts under the Guideway and OR174, but shall construct only the portion under the Guideway. The hydraulic capacity of the interim condition shall not be less than the existing system. The future replacement of the Culverts under the OR174 (ultimate condition) will be completed by the City.
- (iv) DB Co shall replace all Culverts identified in Table 2-5.2.
- (v) DB Co shall decommission existing Culverts underneath the Guideway and reconstructed OR174 that become redundant or ineffectual as a result of the Works. Culverts to be decommissioned shall be filled with non-shrink grout or concrete. DB Co shall provide access points to allow for confirmation that decommissioned Culverts have been completely filled.
- (vi) Blair to Montreal
- A. Between Blair Station and Gloucester High School, approximately 350m to a high point just east of the OR174 WB off ramp at Blair Road, the

Guideway shall be drained by installing a subdrain system under the Guideway. Drainage of this segment shall be to the relocated 450mm Transitway storm sewer that drains in a westerly direction. The existing 450mm Transitway sewer shall be relocated by DB Co to avoid conflict with the LRT guideway for a distance of approximately 250m as per the requirements in this Article and Article 8 – Utility Infrastructure Design Criteria, of this Part 2. No quantity or quality SWMPs are required.

- B. From the high point just east of the OR174 WB off ramp at Blair Road to the high point at Gloucester High School, a distance of approximately 720m, runoff shall be collected by trackside swales.
- C. From the high point at [REDACTED] to Montreal Station, a distance of approximately 1,960m, runoff shall be drained by installing a subdrain system under the Guideway. SWM requirements as per this Article.
- D. DB Co may retain the following reinforced concrete Culverts, provided DB Co demonstrates that the Culverts comply with all requirements of this Article 5 and Article 4 – Structural Design Criteria and Requirements, of this Part 2.
 - i. Structure A224700 located at the approximate coordinates with an easting of 375,544.0 and a northing of 5,033,412.2.
 - ii. Structure A224710 located at the approximate coordinates with an easting of 375,698.0 and a northing of 5,033,517.0.
 - iii. Structure A224720 located at the approximate coordinates with an easting of 375,835.6 and a northing of 5,033,682.4.
 - iv. Structure STM80696 located at the approximate coordinates with an easting of 376,050.1 and a northing of 5,034,085.3.
 - v. Structure T224630 located at the approximate coordinates with an easting of 374929.4 and northing of 5033030.0.
- E. DB Co may retain the following CIPP lined CSP Culvert, provided DB Co demonstrates that the Culvert complies with all requirements of this Article 5 and Article 4 – Structural Design Criteria and Requirements, of this Part 2.
 - i. Structure T224650 located at the approximate coordinates with an easting of 375,269.8 and northing of 5,033,252.0.

(vii) Montreal to Jeanne d’Arc

- A. From Montreal Station to Jeanne d'Arc Station, a distance of approximately 3,580m, the Guideway shall be drained by installing a subdrain system under the Guideway.
 - B. DB Co may retain the following reinforced concrete Culvert, provided DB Co demonstrates that the Culvert complies with all requirements of this Article 5 and Article 4 – Structural Design Criteria and Requirements, of this Part 2.
 - i. Structure SN220420 located at the approximate coordinates with an easting of 377,161.4 and northing of 5,035,720.0.
- (viii) Jeanne d'Arc to Orléans Boulevard
- A. From Jeanne d'Arc Station to Orléans Boulevard Station, a distance of approximately 1,060m, the Guideway shall be drained by installing a subdrain system under the Guideway.
- (ix) Orléans Boulevard to Place d'Orléans
- A. From Orléans Boulevard Station to Place d'Orléans Station, a distance of approximately 2,380m, the Guideway shall be drained by installing a subdrain system under the Guideway.
- (x) Place d'Orléans to Trim
- A. From Place d'Orléans to Trim Station, a distance of approximately 3,340m, the Guideway shall be drained by installing a subdrain system under the Guideway.
 - B. DB Co may retain the following reinforced concrete Culvert, provided DB Co demonstrates that the Culvert complies with all requirements of this Article 5 and Article 4 – Structural Design Criteria and Requirements, of this Part 2.
 - i. Structure A894640 located at the approximate coordinates with an easting of 382,627.9 and a northing of 5,038,810.8.
 - C. DB Co may retain the following HDPE lined CSP culvert, provided DB Co demonstrates that the Culvert complies with all requirements of this Article 5 and Article 4 – Structural Design Criteria and Requirements, of this Part 2.
 - i. Structure SN898560 located at the approximate coordinates with easting 384,258.8 and a northing of 5,039,908.8.

- (xi) TPSS shall not be located within RVCA or SNC regulated areas to the extent possible. DB Co shall consult and obtain approval from RVCA/SNC for any TPSS that must be located within regulated areas due to Project constraints.

- (xii) **Table 2-5.2** – Confederation East Culvert Replacements

| Culvert ID | Existing Structure | Northing | Easting |
|------------|--------------------|--------------|------------|
| | Size/Material | | |
| A224900 | 300 diam. CSP | 5,036,832.32 | 379,498.87 |
| A224902 | 600 diam. CSP | 5,036,851.41 | 379,332.49 |
| A224908 | 600 diam. CSP | 5,036,970.09 | 379,425.69 |
| A224940 | 850 diam. CSP | 5,037,505.21 | 380,326.39 |
| A224950 | 1000 diam. CSP | 5,037,559.57 | 380,316.18 |

- (d) Confederation Line West Extension Stations:

- (i) Westboro, Dominion, Cleary and New Orchard Stations

- A. The Westboro and Dominion Stations are located on the former Transitway. This shall be considered Infill development. Drainage from the Stations shall comply with the provisions of Sections 3.2.2 and 8.3.7 of the City of Ottawa Sewer Design Guidelines (latest version).
- B. Existing 675mm diameter outfall at Dominion is in conflict with the station and shall be relocated by DB Co in accordance with the City of Ottawa Sewer Design Guidelines.
- C. Cleary and New Orchard Stations are located within the Parkway Tunnel. As such, they shall comply with the quality and attenuation/retention requirements of Table 2-5.1. Pump station(s) shall be provided at low point(s) of the Tunnel to allow discharge to existing sewer(s).

- (ii) Lincoln Fields Station

- A. Lincoln Fields Station and Ancillary Facilities are located within the Pinecrest Creek watershed. Drainage from the Station shall comply with the quality and attenuation/retention requirements of Table 2-5.1.
- B. The quality and attenuation/retention requirements for the Transitway Station shall be achieved by a combination of infiltration trenches in the traffic islands and shallow swales along the edge of the Transitway Station, designed to LID standards. Refer to Schedule 15-2, Part 6, Article 4 – Site Specific Desired Outcomes for landscaping requirements.

- C. Discharge from the Station and Ancillary Facilities shall be via a new storm sewer. DB Co shall construct this sewer between Carling Avenue and its outfall to the ORPP, located approximately 150m north of Richmond Road.
- D. DB Co shall demonstrate to the City through hydrologic/hydraulic modeling that the cumulative impacts of the Works will not increase peak flow rates or the peak hydraulic grade line of the enclosed portion of Pinecrest Creek known as the ORPP for all rain events up to the 100-Year Storm. This analysis shall be submitted in accordance with Schedule 10 – Review Procedure.

(iii) Queensview and Pinecrest Stations

- A. Queensview Station is located within the Pinecrest Creek watershed. Discharge shall meet the quality and attenuation/retention requirements of Table 2-5.1. Discharge shall also meet the requirements of Clauses 5.3(i) and 5.7(e) of this Part 2.
- B. Pinecrest Station is located within the Pinecrest Creek and Graham Creek watersheds. Discharge to Pinecrest Creek shall meet the quality and attenuation/retention requirements of Table 2-5.1. Discharge to Graham Creek shall be controlled to existing (pre-development) peak flow rates. SWM quality requirements as per this Article.
 - i. Discharge from Pinecrest Station shall be to the existing Transitway sewer that outlets to Graham Creek, or to the existing Transitway sewer that outlets to Graham Creek and the existing 1500mm diameter sewer located approximately 160m east of the Station. Discharge shall be in accordance with the requirements of Clauses 5.3(i) and 5.7(e) of this Part 2.

(iv) Bayshore Station

- A. Bayshore Station and Ancillary Facilities are located on the former Transitway alignment. Discharge shall be controlled to existing (pre-development) peak flow rates. SWM quality requirements as per this Article.

(v) Moodie Station

- A. Moodie Station is located on the existing Transitway Station.
- B. DB Co shall design a storm drain inlet and sewer system to convey the runoff to a SWM storage system. Infiltration shall be reviewed and considered in the design of the storage system. Discharge shall be controlled to existing (pre-development) peak flow rates. DB Co shall

consider the temperature of stored runoff prior to discharge to Stillwater Creek in the design of SWM features.

- C. OGS structures shall be designed and specified with a required performance of removal of fine sediment, oil, floating and sinking debris, and 80% removal efficiency for TSS at the outlet from the drainage system to an existing storm sewer that traverses the site and discharges to Stillwater Creek.
- D. DB Co shall design the drainage and sewer system to maintain the existing sewer system at the Transitway Station where practical. No new additional outlets to Stillwater Creek shall be permitted.
- E. DB Co shall permanently plug any existing storm sewers that are not incorporated into the drainage system design.
- F. DB Co shall design and construct drainage requirements for the reconfigured Corkstown Road.
- G. DB Co shall confirm the value of the loss of floodplain storage volume within the 1:100 year floodplain which will result from the placement of fill by June 1, 2020. The City will be responsible to fully compensate for this loss of floodplain storage volume through a balanced cut (or excavation) to be performed in a location selected by the City. The City will be responsible for permits and approvals for this compensation and the work will be complete by the end of 2020.

(vi) Iris Station

- A. Iris Station is located within the Pinecrest Creek watershed. Drainage from the Station shall be conveyed by trackside swales to Pinecrest Creek. Runoff from below grade segments shall be collected by a storm sewer, if required, and discharged to the trackside swales. All drainage infrastructure shall be designed to LID standards. Discharge shall meet the quality and attenuation/retention requirements of Table 2-5.1.

(vii) Baseline Station

- A. Baseline Station and Ancillary Facilities are located on the former Transitway alignment. Runoff shall be conveyed by existing and new storm sewers to existing non-commissioned outlet. SWMPs that are part of the existing Baseline Transitway Station shall be maintained. New SWMPs shall be installed to provide quality control for new impervious areas. Discharge shall meet the water quality requirements prescribed in Table 2-5.1. No on-site quantity control SWMPs shall be required. Quantity control for Baseline Station and Ancillary Facilities shall be provided by the Pinecrest Stormwater Management Facility to be

constructed by DB Co as per Clause 5.7 (i) of this Part 2 in lieu of on-site SWMPs.

- (e) Guideway from Tunney's Pasture to Moodie
 - (i) Tunney's Pasture to the high point east of Dominion (approximately 200m east of the Station).
 - A. Discharge to existing Transitway sewer. DB CO shall limit discharge to the minor system to the 10-year event. Drainage from the Guideway shall comply with the provisions of Sections 3.2.2 and 8.3.7 of the City of Ottawa Sewer Design Guidelines (latest version).
 - B. Overland flow west of Goldenrod shall be collected, attenuated, retained and treated within the Lands. No increase in flow to the Existing Confederation Line drainage collection system shall be permitted.
 - (ii) High point east of Dominion (approximately 200m east of the station) to Parkway Tunnel portal (approximately 400m southwest of Dominion).
 - A. Trackside swales shall be provided where feasible within the Lands, and shall drain to the Workman Avenue outfall sewer. Attenuation/retention and quality control shall be in accordance with Table 2-5.1.
 - (iii) Parkway Tunnel and Portals.
 - A. Tunnel drainage shall be discharged to the storm system. DB Co shall ensure that all runoff is managed in accordance with Clause 5.3(i) of this Part 2. Storage of runoff in the Tunnel shall be below TOR for all events up to the 100-Year Storm. Discharge from Tunnel and portals shall meet the quality and attenuation/retention requirements of Table 2-5.1.
 - (iv) Parkway Tunnel West Portal to East Portal of Connaught Tunnel
 - A. Drainage from below grade Guideway sections shall be discharged to the storm system in accordance with Clause 5.3(i) of this Part 2. Runoff from at-grade and above-grade Guideway sections shall be conveyed and controlled by trackside swales designed to LID standards. Additional LID SWMPs shall be used in combination with the swales in order to meet quality and attenuation/retention requirements. All swales located between the Parkway Tunnel West Portal and the Lincoln Fields Station Pedestrian Bridge (SN018400) shall have side slopes no steeper than 6:1. Discharge from the swales shall meet the quality and attenuation/retention requirements of Table 2-5.1.
 - (v) Connaught Tunnel and east portal

- A. Drainage shall be discharged to the storm system or to a LID SWMP within the Guideway ROW east of the Connaught tunnel in accordance with Clause 5.3(i) of this Part 2. Storage of runoff in the Tunnel shall be below TOR for all events. Discharge from Tunnel and portals shall meet the quality and attenuation/retention requirements of Table 2-5.1.
- (vi) Connaught Tunnel west portal and Guideway from Connaught Tunnel west portal to high point approximately 120m west of Queensview Station.
 - A. This portion of the Guideway drains to the Connaught Tunnel west portal. Tunnel drainage shall be discharged to the storm system or to a LID SWMP within the Guideway ROW east of the Connaught Tunnel. Due to the larger catchment area, runoff up to the 25-year event shall be intercepted and diverted away from the Guideway at the Connaught Tunnel west portal. For clarity, this drainage shall not be conveyed within or parallel to the Tunnel to the same drainage system that serves the Connaught Tunnel low point. Storage of runoff in the Tunnel shall be below TOR for all events. Discharge shall meet the quality and attenuation/retention requirements of Table 2.5.1.
- (vii) Pinecrest Tunnel and portals (Guideway from high point approximately 120m west of Queensview Station to approximately 60m west of Pinecrest Station).
 - A. Tunnel drainage shall be discharged to the storm system. DB Co shall ensure that all runoff is managed in accordance with Clause 5.3(i) of this Part 2. Storage of runoff in the Tunnel shall be below TOR for all events up to the 100-Year Storm. Discharge to Pinecrest Creek shall meet the quality and attenuation/retention requirements of Table 2-5.1. Discharge to Graham Creek shall be controlled to existing (pre-development) peak flow rates. SWM quality requirements as per this Article.
- (viii) From approximately 60m west of Pinecrest Station west for approximately 360m to high point.
 - A. Runoff shall be conveyed by storm sewers to the existing Transitway storm sewer. SWM requirements as per this Article.
- (ix) From high point approximately 420m west of Pinecrest Station to Bayshore Station
 - A. Existing drainage is to the minor system to the 10-year event. Runoff shall be conveyed by trackside swales where feasible within the Lands. SWM requirements as per this Article.
- (x) From Bayshore Station to Moodie Station

- A. Existing drainage is to the minor system to the 10-year event. Runoff shall be conveyed by trackside swales, with no additional outlets to Stillwater Creek. SWM requirements as per this Article.
- (f) From Moodie Station to LMSF
 - (i) Existing drainage is to the minor system to the 10-year event. Runoff shall be conveyed by trackside swales. SWM requirements as per this Article.
 - (ii) DB Co shall design and construct a pumping station to convey drainage from below grade Guideway sections. The pumping station shall be located within the S-W Ramp connecting Moodie Drive to Highway 417. Stormwater shall be conveyed to a SWM storage system, where it shall be allowed to dissipate energy and cool prior to being discharged through the Moodie Station drainage system to Stillwater Creek. DB Co shall determine all parameters of the proposed stormwater storage basin, including the appropriate location, configuration, and type.
- (g) Guideway from split (approximately 300m south of Lincoln Fields Station) to Baseline Station
 - (i) Split to Baseline Road:
 - A. Runoff from at-grade and above-grade Guideway sections shall be conveyed and controlled by trackside swales designed to LID standards. Additional LID SWMPs shall be used in combination with the swales in order to meet quality and attenuation/retention requirements. All drainage infrastructure shall be designed to LID standards. Discharge shall meet the quality and attenuation/retention requirements of Table 2-5.1.
 - (ii) Baseline Road to Baseline Station
 - A. Runoff shall be conveyed by existing and new storm sewers to existing non-commissioned outlet to Pinecrest Creek. SWMPs shall be installed to meet the water quality requirements prescribed in Table 2-5.1. No quantity control SWMPs are required on-site. Quantity control shall be provided by the Pinecrest Stormwater Management Facility as per Clause 5.7 (i) of this Part 2 in lieu of on-site SWMPs.
- (h) Pinecrest Creek Realignment
 - (i) Pinecrest Creek shall be realigned between approximately 110m north and 200m south of the Iris Street crossing of the alignment. The purpose for the realignment is to allow for the combined construction of the Iris Street overpass, the LRT Guideway, Iris Station, and the related removal of the existing 120m long Culvert under Iris Street. As part of the re-alignment, two new single cell Culverts shall be

constructed to allow the realigned Pinecrest Creek to cross the Guideway and Iris Street:

- A. A 10m span x 32m long concrete frame structure that crosses the alignment approximately 200m south of Iris Street. See Article 4 – Structural Design Criteria and Requirements, of this Part 2 for additional information.
 - B. A 12m span x 41.8m long concrete frame structure that crosses Iris Street west of the LRT alignment and approximately 25m east of the private property line that abuts the western border of the NCC land. See Article 4 – Structural Design Criteria and Requirements of this Part 2 for additional information.
- (ii) Iris Street shall be considered an Urban Major Collector road. The LRT Track shall be classified as an Urban Arterial road for the purpose of drainage design. Culverts shall be designed according to section 5.10 of the City of Ottawa Sewer Design Guidelines.
 - (iii) Both Culverts shall be designed as single-cell open bottom Culverts with the spans described above to ensure proper creek functioning through the structures.
 - (iv) Both Culverts shall be designed with a minimum clearance of 1.0m between the design water level and the low chord. Erosion protection and fish passage shall be included in the design.
 - (v) The channel re-alignment shall be designed and constructed in accordance with Natural Channel Design Principles and with the fluvial-geomorphological criteria for Pinecrest Creek provided in Table 2-5.3.

Table 2-5.3 – Fluvial Geomorphological Criteria for Pinecrest Creek Channel Design

| Bankfull Characteristics of the Low Flow Channel | |
|---|-----------|
| Channel slope | 0.4% |
| Left and right side slopes | 1:1 |
| Minimum Bottom width | 4.0m |
| Minimum Top width | 6.0m |
| Manning's <i>n</i> | 0.035 |
| Depth | 1.0m |
| Floodplain Corridor Characteristics | |
| Channel slope | 0.4% |
| Left and right side slopes* | 2:1 – 3:1 |
| Minimum Bottom width | 28.0m |
| Minimum Top width | 40.0m |
| Manning's <i>n</i> | 0.055 |
| Minimum Depth | 2.0m |

*Side slopes steeper than 3:1 shall be avoided where possible and combined with additional bank protection.

- (vi) The channel re-alignment design is constrained by the LRT alignment along its east bank and a 1500mm watermain. The top of rail and the Iris Station shall be protected from a 100-year flood. A minimum 3m separation shall be provided between the outer edge of the 1500mm watermain and the top of the channel embankment and/or the limit of any grading changes as a result of the channel re-alignment.
 - (vii) It shall be demonstrated that the 100-year flow will be contained within the floodplain corridor by the completion of a hydraulic analysis using a HEC-RAS model of Pinecrest Creek. The HEC-RAS hydraulic model of the existing Pinecrest Creek is available in the reference document (Pinecrest Creek Realignment at Iris Station – Functional Channel Design prepared by CTP2, January 31, 2017). The future conditions HEC-RAS model will be available as part of the City of Ottawa Pinecrest Creek Cumulative Impact Study (CIS).
 - (viii) The hydraulic analysis shall demonstrate that the channel design not increase water levels above existing, and that the alignment, private property and roadways are protected from the 100-year flood level.
 - (ix) Design of the realignment of Pinecrest Creek shall follow hydraulic and sedimentological principles of fluvial process in such a manner that risk to infrastructure and property upstream and downstream of the realignment site is avoided.
 - (x) The channel realignment shall be designed by a fluvial geomorphologist who can demonstrate a Master's degree in fluvial processes (or equivalent), and who has at least 10 years of experience designing channels in urban environments.
 - (xi) DB Co shall submit a Preliminary and Final design report of the Pinecrest Creek Realignment in accordance with Schedule 10 – Review Procedure.
 - (xii) The Pinecrest Creek Channel realignment design and construction shall meet environmental and landscaping requirements described in Schedule 17 – Environmental Obligations and in Schedule 15-2, Part 6, Article 4 – Site Specific Desired Outcomes.
 - (xiii) DB Co shall design and construct the channel realignment in compliance with Ontario Regulation 174/06 (Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses).
- (i) Pinecrest Stormwater Management Facility
 - (i) Order of Precedence

- A. For the design and construction of the Pinecrest Creek SWM Pond, in the event of a conflict between the criteria contained in this Article and any other City reference document(s), the following shall apply in descending order of precedence:
 - i. All criteria and requirements specified in this Clause 5.7(i);
 - ii. All criteria and requirements specified in other pertinent parts of this Part 2;
 - iii. Drawings and Stage-Storage Curve in Appendix J of this Part 2.
- (ii) Background Documents
 - A. DB Co shall review and make itself aware of the conclusions and recommendations of studies completed in relation to the planning and design of the SWM pond, which include but may not be limited to:

[REDACTED]
- (iii) General Requirements
 - A. The Pinecrest Creek SWM Pond shall be located on NCC lands to the northeast of the Baseline Road and Woodroffe Avenue intersection.
 - B. The site and pond layout as presented in Appendix J of this Part 2 has been agreed to in principle by the NCC and is subject to a FLUDTA. Any deviations from this layout shall require additional consultation and approval by the NCC.
 - C. DB Co shall complete the design of and construct a SWM pond that, at a minimum, achieves the following criteria:
 - i. Provides a minimum 70% TSS removal for drainage area of 446 ha with full capture of 25 mm Chicago 3h-hour storm.
 - ii. Attenuates the 100-year peak flow to offset the increase in peak flows from a 14.4 ha drainage area with 86% imperviousness. This attenuation covers the quantity control required for the new Baseline station as defined in Clause 5.7(d)(vii), plus an allowance for future City transit projects.
 - iii. Provides additional quantity control for all storms up to the 100-Year event as further described within this Clause 5.7(i) to the greatest extent possible considering site constraints, as specified within this Clause 5.7(i). The main objective of additional quantity control is to reduce the peak overland flow on the SJAM Parkway between Carling Avenue and Richmond Road.

- iv. Maintains the overall geomorphic stability / balance within Pinecrest Creek.
 - v. Mitigates thermal impacts of the pond to Pinecrest Creek using a bottom-draw outlet design and any other measures identified herein.
 - vi. Does not increase the peak hydraulic gradeline under all normal operating conditions for the 2-year Soil Conservation Service 12-hour storm up to and including the 100-year Soil Conservation Service 12-hour storm peak flow at existing storm maintenance hole MHST27014.
 - D. The SWM pond shall incorporate a sediment forebay, wet cell 1, and wet cell 2 configured in accordance with the drawings and stage-storage curve in Appendix J of this Part 2.
 - E. The SWM pond shall incorporate the measures identified herein to discourage geese and gulls from frequenting the pond. Any changes to the measures identified herein would require verification by the City.
 - F. The length of dry channel in Pinecrest Creek resulting from implementation of the pond shall not exceed that shown on the drawings in Appendix J of this Part 2.
- (iv) Permits and Approvals
- A. DB Co shall obtain all PLAA for the pond in accordance with Schedule 17 – Environmental Obligations and Schedule 35 – Permits, Licences, Approvals and Agreements.
- (v) Submittals
- A. Design submittals shall be in accordance with Schedule 10 – Review Procedure and shall comprise all submittals required by Schedule 10 – Review Procedure and other parts of the Project Agreement, including but not limited to:
 - i. SWM Pond Design Brief Addendum.
 - ii. Design Drawings (all applicable disciplines).
 - iii. Construction Specifications (all applicable disciplines).
 - iv. Copies of all submittals to Governmental Authorities.
 - v. Copies of all required permits and approvals.

- vi. Hazardous Bird Deterrence Plan.
 - vii. Operation and Maintenance Manual.
- B. Submittals shall be made as comprehensive packages containing documents from all applicable disciplines, and shall be made at the following stages:
- i. Final design;
 - ii. Permit applications; and,
 - iii. Construction documents.
- (vi) DB Co shall not modify the hydraulic design or performance of facility components specified herein. Any such changes shall require verification by the City.
- (vii) General Layout
- A. The pond layout shall incorporate a sediment forebay, cell 1, and cell 2 configured in accordance with the drawings in Appendix J of this Part 2. The pond volume and design elevations shall be as listed in Table 2-5.4.

Table 2-5.4 – Pinecrest Creek SWM Pond volume and design elevations

| Design elevations, mASL | Sediment forebay | Cell 1 | Cell 2 |
|--|-------------------------|---------------|---------------|
| 100 year water surface elevation | 80.97 | | |
| Extended detention water surface elevation | 80.09 | | |
| Permanent pool water surface elevation | 78.90 | | |
| Invert elevation | 75.90 | 76.90 | 76.40 |
| Water storage volume (total up to specified elevation), m³ | | | |
| 100 year water surface elevation | 24,643 | 37,789 | 26,733 |
| Extended detention water surface elevation | 18,478 | 27,518 | 19,555 |
| Permanent pool water surface elevation | 10,317 | 14,143 | 10,191 |

- B. The grading of the pond shall be in accordance with the the stage-storage table in Appendix J of this Part 2.
- C. The SWM pond site shall be developed with MUP and landscaping as specified in Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.

(viii) SWM Pond Components

A. Pond Cells

- i. The pond cells shall be curvilinear with variable side slopes, with a maximum slope of 3 horizontal to 1 vertical.
- ii. A 3m-wide submerged aquatic bench shall be provided around the pond, with maximum permanent water depth of 0.3m. The 3m bench shall be 1.5m flat and 1.5m at 5:1 slope.
- iii. The base of the sediment forebay shall be lined with a minimum of 400mm depth Granular ‘B’ type II compacted to 95% SPMDD on woven geotextile class II to OPSS 1860.

B. Inlet Chamber and Culvert

- i. The inlet chamber and Culvert shall be configured as shown in the drawings in Appendix J of this Part 2 and as follows:
 - 1 The inlet Culvert to the pond shall incorporate a bypass weir to the creek within an enclosed inlet chamber.
 - 2 The inlet Culvert shall be a continuous Culvert, 3m in width, from the existing Baseline Storm Sewer Outfall to the sediment forebay. The Culvert shall have a transition from an internal height of 1.8m to a minimum internal clear height of 2.4m immediately downstream of the Baseline Storm Sewer Outfall. The internal clear height shall be a minimum of 2.4m from the transition to the outlet into the sediment forebay.
- ii. The inlet Culvert shall have a continuous slope, a minimum cross-sectional area of 7.2m^2 and minimum clear height of 2.4m maintained throughout the Culvert and inlet chamber, and no obstructions to flow other than bends, each of which shall be no greater than 48 degrees.
- iii. The inlet chamber shall incorporate a concrete weir transverse to the existing Baseline Storm Sewer Outfall with a crest height at 80.20m. The projected length of the weir as measured

- perpendicular to the existing Baseline Storm Sewer Outfall shall be 8m. Up to the height of the weir crest, the inlet Culvert and chamber shall be designed to avoid any expansions or contractions in flow.
- iv. The downstream face of the weir shall be sloped, no steeper than 1 horizontal to 1 vertical.
 - v. Hydraulic modelling reported by [REDACTED] has identified that upstream hydraulic gradeline impacts are sensitive to the configuration of the inlet chamber and Culvert, including but not limited to details of the weir (location, height, alignment, length, downstream slope), Culvert (bend angles, lengths, dimensions, slope), and inlet chamber (size, opening dimensions, benching, safety grille). Any deviation from the information provided in Appendix J of this Part 2 shall therefore be accompanied by a detailed numerical analysis demonstrating that the design remains compliant with Clause 5.7 (i)(iii)C(vi).
 - vi. A 600mm diameter opening covered by a removable stainless steel plate shall be included in the transverse weir for use as a low flow maintenance bypass.
 - vii. The inlet chamber shall extend downstream of the weir for a minimum distance of 2m prior to an opening to the creek. Benching shall be included on the downstream side of the weir with minimum slope 4:1 and maximum slope 1:1. The opening to the creek shall be flanked with concrete wing walls and an apron with baffle blocks to direct the flow into the creek and mitigate the potential for scour and bank erosion. The opening to the creek shall be minimum 6.4m wide by 1.5m high at invert 78.9m.
 - viii. The opening to the creek shall be equipped with a lockable, hinged, outwards opening, safety grate with horizontal bars at 150mm spacing.
 - ix. Openings and ladders shall provide access from the roof of the inlet chamber upstream and downstream of the weir.
 - x. Stop log gains shall be provided to allow isolation of the inlet Culvert at the outlet of the inlet chamber. The stop log gains shall be designed and located to require the stop logs to be no more than 3m in length. Access for stop log operations shall suit equipment currently used by the City. DB Co shall confirm access requirements with the City.

- xi. Steel safety railing shall be installed along all segments of the inlet chamber perimeter where adjacent grading is higher or lower than the top of the structure.
- xii. Refer to Article 4 - Structural Design Criteria and Requirements of this Part 2 for structural requirements.

C. Existing Gabion Basket Retaining Wall

- i. All sections of the existing gabion basket retaining wall at the Baseline Storm Sewer Outfall (and extending along the north bank of Pinecrest Creek for approximately 40m) shall be abandoned in place or removed. Abandonment in place shall be by placement of sufficient compacted fill against the face of the retaining wall, separated by geotextile, to maintain a stable slope assuming complete failure of the gabion baskets.

D. Pinecrest Creek Channel Downstream of Inlet Chamber

- i. The creek channel downstream of the inlet chamber shall be realigned as shown by the drawings included in Appendix J of this Part 2 to form a gentle bend downstream of the inlet chamber. The realigned channel shall have a minimum bottom width of 5m.
- ii. The north bank of the creek downstream of the inlet chamber shall be stabilized to protect from flows that overtop the weir and then travel along the outside bend of the creek as it realigns with the existing creek path. This stabilization shall be provided as shown on Drawing C011 in Appendix J of this Part 2.
- iii. Flow that overtops the weir (i.e. flow in excess of 25mm return storm volumes) shall cascade down to a concrete apron which shall be provided as a component of the inlet chamber to protect from scour. This apron shall be designed based on the bed elevation and the elevation included on Drawing C011 in Appendix J of this Part 2 shall be adjusted to match bed elevations in the creek at the time of construction.
- iv. Scour protection shall be provided on the channel bed downstream of the concrete apron as shown on Drawing C011 in Appendix J of this Part 2.
- v. The design and construction of work within Pinecrest Creek downstream of the inlet chamber shall be under the supervision of the site fluvial geomorphologist (who shall be satisfy the qualifications required by Clause 5.7(h)(x).

E. Mid-pond MUP Crossing

- i. The sediment forebay shall be divided from cell 1 by an embankment carrying a MUP across the pond. The same embankment shall also divide cell 1 from cell 2. The MUP shall be at existing grade and shall be aligned with the existing [REDACTED] buried cables, which shall remain on this alignment following construction.
- ii. A 2.6 m wide by 1.2 m high concrete Culvert (upstream invert 78.40 m and downstream invert 78.30) shall connect the sediment forebay to cell 1. A 1.8 m wide by 1.2 m high Culvert (upstream invert 78.40 m and downstream invert 78.30) shall connect cell 1 to cell 2. Each Culvert shall be no longer than 31 m. These Culverts shall be installed below the existing [REDACTED] cables.
- iii. DB Co shall protect the existing [REDACTED] buried cables during construction in accordance with the requirements of Article 8 – Utility Infrastructure Design Criteria, of this Part 2.
- iv. The crossing shall incorporate an electrical conduit to allow for future pathway lighting.
- v. Between existing grade and elevation 83 m, slopes towards the pond either side of the MUP shall be no steeper than 3 horizontal to 1 vertical. Below this, armourstone retaining walls shall be constructed to minimize the overall width of the embankment.

F. Peninsula

- i. Cell 2 shall be separated from the sediment forebay by a peninsula with a width between 7m of 12m above the permanent pool water level.
- ii. The minimum crest elevation of the peninsula shall be 80.15m, such that the water level does not overtop the peninsula during the 25mm Chicago 3-hour storm.

G. Pond Outlets

- i. The pond outlet, comprising the outlet structure, quantity outlet Culvert, outlet channel, and quality outlet pipe shall be designed in accordance with the layout shown by the drawings in Appendix J of this Part 2.

- ii. The outlet structure shall comprise a single reinforced concrete structure with two compartments; one housing the quantity outlet and one housing the quality outlet.
- iii. The quantity outlet shall incorporate a 1.8m long quantity weir at elevation 80.15m, from which flow shall discharge to Pinecrest Creek via a 26m length 1800mm diameter pipe at upstream invert 78.30m and downstream invert 78.20m.
- iv. The quality outlet shall incorporate a 0.6m by 0.6m bottom-draw opening with invert 76.50m. This opening shall be equipped with a sluice gate. Flow shall discharge to a location within Pinecrest Creek no more than 60m downstream of the inlet chamber via a 600mm diameter quality outlet pipe with upstream invert 78.75m and downstream invert 78.60m. A removable 500mm wide by 300mm high marine grade aluminum orifice plate with invert 78.90m shall be installed within the outlet structure at the upstream end of the quality outlet pipe.
- v. A debris basket shall be incorporated on a rail and cable system fixed to the outside wall of the outlet structure. The debris basket shall have a total surface area no smaller than that shown by the drawings in Appendix J of this Part 2, and shall incorporate sloped bars at 150mm spacing as a safety feature.
- vi. The quality outlet pipe shall be designed in accordance with the Ottawa Sewer Design Guidelines. All maintenance holes required on the pipe shall be located above the 100-year water level, and adjacent to the access road.

H. Pond Outlet Channels

- i. Two proposed outlet pipes will connect to the creek. These are referred to as the quality outlet (releasing flows to approximately 380 l/sec) and the quantity outlet (releasing flows in excess of approximately 380 l/sec).
- ii. The quality outlet shall be angled to join the creek at an angle less than 60 degrees to flow to prevent scour erosion. At the terminus of the pipe, flow shall follow a riverstone-lined channel to join. The channel shall be as shown by Drawing C012 in Appendix J of this Part 2.
- iii. The quantity outlet channel shall join the creek at an angle not exceeding 45 degrees to flow, and shall be as shown by Drawing C012 in Appendix J of this Part 2.

- iv. The design and construction of the outlet channels shall be under the supervision of the site fluvial geomorphologist (who shall be satisfy the qualifications required by Clause 5.7(h)(x).

I. Pond Drains

- i. A 400mm diameter sediment forebay drain shall be provided between the base of the sediment forebay and cell 2. To allow the sediment forebay to be drained by pumping between maintenance holes, two maintenance holes shall be provided on the drain, with a sluice gate installed on the outlet of the upstream maintenance hole.
- ii. The sediment forebay drain shall be designed in accordance with the Ottawa Sewer Design Guidelines. All maintenance holes required on the pipe shall be located above the 100-year water level, and adjacent to the access road.
- iii. Draindown of cell 2 will be via the bottom-draw opening of the quality outlet structure. A 400mm by 400mm opening at invert 78.30m equipped with a sluice gate shall be provided between the quality and quantity compartments of the outlet structure, to allow the draindown flows to outlet to the creek via the quantity outlet Culvert.

J. Access Roads and MUPs

- i. General Requirements
 - 1 All pavements and reinforced grass surfaces shall be designed considering site-specific geotechnical data, and shall incorporate all necessary measures to ensure drainage of the granular sub-base.
 - 2 Pavements and surfaces required to be designed to a 'heavy duty' standard shall be in accordance with Drawing C015 (detail 1) in Appendix J of this Part 2 and shall be suitable for use by SWM pond and [REDACTED] operation and maintenance vehicles, including vehicles necessary for SWM pond sediment removal.
 - 3 All paved access roads and MUPs shall be at longitudinal grades no steeper than 5% and have cross-fall of 2%.
 - 4 CSP cross-Culverts (minimum diameter 400mm) shall be installed where roads and pathways cross overland drainage

paths to prevent flow across the paved surface and/or ponding uphill of the road or pathway.

- 5 Swales shall be constructed on the upslope side of roads and pathways as necessary to capture and direct overland flow to cross-Culverts.
- 6 Erosion protection comprising of rip-rap or geogrid-reinforced grass shall be provided for all swales on slopes 3 horizontal to 1 vertical or greater.

ii. Pond Access Road

- 1 The MUP forming a loop around the sediment forebay and cell 1 of the SWM pond, plus the northernmost connection to Woodroffe Avenue, shall be described as the pond access road.
- 2 The pond access road shall be constructed to a 'heavy duty' standard as defined above.
- 3 The asphalt surface of the pond access road shall be 3m in width. The granular base shall extend 1m beyond both sides of the asphalt surface.
- 4 The existing curb depression at the intersection of the pond access road shall be widened and reconfigured as necessary, complete with tactile walking surface indicators, to provide a permanent vehicle entrance from Woodroffe Avenue to the SWM pond site, suitable for the vehicles identified above. The permanent vehicle entrance shall have a minimum clear width of 3m to the south of the existing traffic signal pole located within the existing MUP. Removeable bollards shall be installed within the permanent vehicle entrance.
- 5 A minimum 80m length of the paved access road between the SWM pond and Pinecrest Creek shall be at a constant elevation of 82m, to serve as an emergency overflow.

iii. MUPs

- 1 DB Co shall design and construct MUPs in accordance with the requirements of Schedule 15-2, Part 6, Article 4 – Site Specific Desired Outcomes.

iv. Access to Structures

- 1 All structure access hatches/covers, maintenance holes and safety or debris grates shall be accessible by asphalt or reinforced grass access roads. Access roads shall be within 1m vertical and 2m horizontal of the top of the item requiring access.

v. Access Ramp to sediment forebay

- 1 A 5m-wide access ramp with a minimum 3m-wide reinforced grass surface at a maximum slope of 5:1 with 2% crossfall shall be provided from the pond access road to the base of the sediment forebay.
- 2 The access ramp shall have a reinforced grass surface, and shall be suitable for use by the SWM pond maintenance and sediment removal traffic described above.

vi. Signage

- 1 Signage shall be installed close to access points and at high visibility locations around the SWM pond to warn the public of the common hazards and prohibitions associated with the facility.
- 2 All signs shall conform to City standards.
- 3 In accordance with commitments made to Transport Canada, signage prohibiting littering and feeding of wildlife shall be installed.

K. Sediment Management Area

- 1 A sediment management area with a minimum area of 2300 m² shall be provided adjacent to the sediment forebay for future use in sediment removal, handling and storage.
- 2 The sediment management area shall be sloped towards the sediment forebay at 1 to 5% slope.
- 3 No structures, pavements, hard landscaping, shrubs or trees shall be located within the sediment management area.

L. Structure Ancillaries

i. Access to Structures

- 1 The Inlet Chamber and Outlet Structure shall be provided with access hatches located to provide maintenance access

to all spaces within the structure, and to facilitate removal and replacement of all sluice gates, stop logs, orifice plates and other installed equipment.

- 2 Access hatches shall be a minimum dimension of 600mm by 600mm.
- 3 All access hatches shall be commercially available.
- 4 All access hatches shall be lockable with locking hasps recessed to avoid trip hazard.
- 5 Access to the floor of spaces within the structure shall be provided by permanent ladders.
- 6 Internal safety platforms shall be provided within all structures deeper than 5m, and within the quality outlet chamber of the outlet structure.

ii. Safety Grates

- 1 Safety grates similar in design to OPSD 804.050 shall be installed on all openings on the inlet chamber, outlet structure and associated Culverts, with the exception of openings which are fully submerged at permanent pool water level other than the bottom draw outlet.
- 2 Safety grates on outlets shall be hinged and shall open in the direction of flow.

iii. Safety Railings

- 1 Safety railings shall be installed on the perimeters of all structures where the top of the structure is higher than adjacent grades.

M. Monitoring Equipment

- i. DB Co shall design, supply, install and commission monitoring equipment in accordance with the following requirements. Final design drawings and instrumentation specifications shall be submitted for City in accordance with Schedule 10 – Review Procedure, prior to construction. To maintain compatibility with existing City equipment, all instrumentation shall be supplied as specified with no substitutions.
- ii. Monitoring Sheds

- 1 A monitoring shed shall be provided adjacent to each of the SWM pond inlet chamber and outlet structure in the locations shown by the drawings in Appendix J of this Part 2.
 - 2 Each shed shall have minimum internal dimensions of 2.4m long by 1.8m wide by 2.1m high, and shall be constructed of precast concrete with a vandal-resistant exposed aggregate finish. Shop drawings for the shed and a sample of the exposed aggregate finish shall be provided for City approval prior to beginning fabrication. Each shed shall have one 914mm-wide metal door. The locking mechanism shall follow the current standard specification of the City.
 - 3 Sheds shall be placed on a compacted granular A base over minimum 50mm rigid high-density Styrofoam insulation, and shall be insulated internally with minimum 19mm high-density Styrofoam and 6.35mm sealed, primed and painted plywood on strapping.
 - 4 DB Co shall coordinate with [REDACTED] to provide electrical services to both monitoring sheds. All new electrical services on the Site shall be buried.
 - 5 Each shed shall be provided with internal lighting (minimum of one 4ft fluorescent strip light), electrical heating, and electrical outlets. A minimum of four spare outlets shall be provided in addition to any required for equipment. The electrical heater shall be sufficient to maintain the internal temperature of the shed above the minimum operating temperatures specified by the manufacturers of all installed equipment, considering the climate data specified in Clause 4.3(b) of Schedule 15-2, Part 1 – General Requirements.
 - 6 Buried rigid PVC electrical conduits shall be installed between each monitoring instrument and the nearest monitoring shed (one conduit per cable/tube).
- iii. The following equipment shall be installed at the pond inlet. Equipment shall be complete with all require ancillaries and accessories, including but not limited to mounting brackets, power cables, and data cables:
- 1 [REDACTED] refrigerated sampler, 2-bottle configuration, with refrigerator battery backup kit. Intake located approximately mid-way along inlet culvert;

- 2 [REDACTED] flow meter system base meter with battery backup, installed in monitoring shed;
 - 3 [REDACTED] ultrasonic level sensor, installed in inlet chamber directly above bypass weir, with stainless steel protective hood;
 - 4 [REDACTED] sensor with surcharge kit and built-in ultrasonic level sensor, installed adjacent to access maintenance hole, approximately mid-way along inlet culvert; and,
 - 5 [REDACTED] sensor for Signature flow meter installed as backup to LaserFlow sensor.
- iv. The following equipment shall be installed at the pond outlet. Equipment shall be complete with all require ancillaries and accessories, including but not limited to mounting brackets, power cables, and data cables:
- 1 [REDACTED] refrigerated sampler, 2-bottle configuration, with refrigerator battery backup kit. Intake located within quality outlet pipe.
 - 2 [REDACTED] flow meter system base meter with battery backup.
 - 3 [REDACTED] ultrasonic level sensor, installed in quality compartment of outlet structure, with stainless steel protective hood.

(ix) Construction

- A. All MUP connectivity across the site shall be maintained throughout construction. The access road along the north-west periphery of the pond between Woodroffe Avenue, the northern extent of construction and Navaho Drive, shall be constructed and placed into service prior to taking the existing MUP out of service.
- B. DB Co shall maintain fencing at all times around the boundaries of the construction site and shall develop hoarding plans as specified in Schedule 15-2, Part 1, Article 4 – Design and Construction.
- C. Construction traffic shall only cross the MUP at defined gates in the site fencing, where appropriate signage and traffic control persons shall be deployed.

- D. Construction traffic shall only enter and exit the site from Woodroffe Avenue. A dedicated temporary access shall be constructed. The presence of existing overhead cables, other utilities, the need to accommodate pedestrians and cyclists, and the location of existing bus stops shall be considered in the design, location and operation of this access.
 - E. DB Co shall prepare and implement an ESC Plan in accordance with Clause 5.6 of this Part 2.
 - F. Deterrence of geese, gulls, and waterfowl during construction
 - i. The location of the proposed SWM pond is within the Ottawa International Airport Bird Hazard Zone. DB Co shall implement measures as necessary to minimize the potential for geese, gulls, and waterfowl (birds considered to pose a hazard and risk to aircraft) frequenting the site at any time during construction.
 - ii. DB Co shall prepare and submit a hazardous bird deterrence plan prior to construction. The plan shall be subject to review by the City and shall detail measures to be implemented during construction to ensure that the site does not become attractive to hazardous birds. The plan shall address each phase of construction, including but not limited to site clearing, excavation, commissioning, and landscaping, through to full establishment of landscaping including deterrent plantings.
 - iii. DB Co shall implement regular monitoring of the site to identify and rectify any situations or areas that could result in hazardous birds frequenting the site, including but not limited to gentle, grass or barren slopes adjacent to waterbodies, emergent vegetation accessible to waterfowl, and inadequate on-site litter management.
 - iv. DB Co shall erect and maintain a silt fence at the top of the aquatic bench immediately after the bench has been planted and before the water level in the pond reaches 78.0m to protect emergent vegetation from geese. The silt fence shall remain in place until emergent vegetation is fully established, for not less than one full growing season. Removal of the fence shall be carried out between November and April to minimize damage to the aquatic bench and plant material.
 - G. DB Co shall maintain a baseflow to the existing creek (downstream of the pond outlet) at all times, including while filling the pond.
- (x) Commissioning and Handover

- A. DB Co shall not redirect flows from the creek into the pond until the following criteria are met:
 - i. All construction complete, with the following exceptions:
 - 1 Landscaping works above 81.0m; and,
 - 2 MUP's and access roads.
 - ii. All sluice gates installed and commissioned;
 - iii. All orifice plates and similar control elements installed;
 - iv. ESC measures in place to prevent silt-laden runoff entry into the pond;
 - v. Operations and Maintenance Manual submitted and reviewed in accordance with Schedule 10 – Review Procedure.
 - vi. Locks installed on all access hatches and safety grates.
 - vii. Pre-commissioning inspection completed by the City and all deficiencies rectified to the satisfaction of the City.
 - B. Acceptance and handover of the SWM pond to the City shall be completed in accordance with the Project Agreement Section 11.27.
- (j) Overland Drainage Swale: Carling Avenue to Richmond Road
- (i) An overland drainage swale shall be constructed as per Schedule 15-2, Part 6, Article 4 – Site Specific Desired Outcomes where the Transitway and existing Lincoln Fields Station are being decommissioned between Carling Avenue and Richmond Road.
 - (ii) The swale shall be designed to convey the flood spill from the ORPP during the 100-year Storm, without Flooding adjacent properties, or endangering or inconveniencing users of the SJAM Parkway.
 - (iii) Discharge from the swale shall be via the existing storm sewer on the SJAM Parkway at the crossing of Richmond Road.
 - (iv) DB Co shall use flows from the modelled future development scenario in Table 4b in the [REDACTED], as the starting point for analysis. The proposed overland swale design and its dynamic interaction with the ORPP may result in a different flow split and associated water depths than those presented in the December 2017 report. The final design shall be validated using appropriate overland flow assessment techniques. The existing conditions 1-D steady-state HEC-RAS model and associated technical memo that is available in the [REDACTED], should

inform the starting point for these analyses. The future (interim and ultimate) conditions HEC-RAS models and associated technical memos are also available in the Background Information, from the City of Ottawa Pinecrest Creek Cumulative Impact Study, for reference and to assist with design.

(k) Green's Creek Culvert Replacement

- (i) DB Co shall complete the design of a full Culvert replacement and install a portion of the new Culvert Structure within the Green's Creek Culvert (SN227110) located beneath the Confederation Line Track portion of OR174. The installation is considered the initial phase of a future replacement of the entire Culvert. DB Co shall complete this initial phase to the limits to enable the complete replacement of the Culvert (by others) without the need to interrupt the Confederation Line operations in the future. The installed Culvert portion shall be a single-span open-bottom Structure with a minimum span of 16.46m. See Article 4 – Structural Design Criteria and Requirements, of this Part 2 for additional information. [REDACTED].
 - A. DB Co DB Co shall be permitted to remove sections of the existing Culverts as needed to construct the permanent Culvert section under the alignment, provided that the Culvert sections are reinstated and that the final installation is hydraulically sufficient and is intended to be permanent until such time that the final installation of the Culverts is performed by others.
- (ii) As part of the initial phase of the Culvert installation, erosion protection shall be provided and fish passage and wildlife passage shall be maintained to meet regulatory requirements.
- (iii) DB Co shall complete the design of the full replacement culvert as per the following parameters:
 - A. A wildlife passage bench shall be designed to be located within the Culvert in the form of a dry ledge with a minimum dry area of 1.5m wide by 1m high (vertical clearance). The wildlife bench shall be extended beyond the Culvert to match the top of the floodplain upstream and downstream of the Culvert, to provide a transition to natural overbanks of creek for access/egress. Refer to the report [REDACTED] for additional design and construction considerations.
 - B. As part of this Culvert installation, mitigation measures for fish and fish habitat as well as freshwater mussels and mussel habitat shall be implemented. For a preliminary assessment of impacts, recommended mitigation measures, as well as design and construction considerations, refer to the following memorandums: [REDACTED]. The assessment of impacts and recommended mitigations related to fish and mussels, as well

as their habitats, shall be revised and updated accordingly by DB Co prior to design completion.

- C. A low flow/bankfull channel shall be designed to be within the Culvert. The channel shall be designed to extend upstream and downstream and shall connect seamlessly to the natural low flow channel of the creek. The channel shall be designed in accordance with Natural Channel Design Principles and with the fluvial-geomorphological criteria provided below in Table 2-5.5. See [REDACTED] technical memorandum for additional design requirements.
- D. Fish passage shall be designed for a maximum velocity of 0.8 m/s within a 0.8m deep migration zone under 2-year flow as per the MTO Drainage Design Guidelines

Table 2-5.5 - Fluvial Geomorphological Criteria for Green's Creek Channel Design

| Bankfull Channel Characteristics - Average Conditions – Green's Creek at Highway 174 | | | |
|---|-------|--------------------------------------|-------|
| Top Width (m) | 15.00 | Area (m²) | 27.09 |
| Depth (Max) (m) | 2.10 | Hydraulic Radius (m) | 1.62 |
| Bottom Width (m) | 10.80 | Wetted Perimeter (m) | 16.74 |
| Side Slopes (L:H) | 1:1 | Average Velocity (m/s) | 0.95 |
| Average Manning 'n' | 0.030 | Estimated Q (m³/s) | 25.81 |

- (iv) The design shall include erosion protection to ensure the stability of the channel banks and channel bed during extreme flow events. Erosion protection shall be designed in accordance with the methodology outlined in the US Army Corps of Engineers (USACE) HEC23 Guidelines (USACE Engineering Manual No. 1110-2-1601 and EM 1601 equation).
 - i. The extreme flow event for erosion protection shall be the 50-year flow. Additionally, a minimum freeboard of 0.5m shall be provided.
 - ii. Erosion protection shall be designed according to the design parameters listed below in Table 2-5.6:

Table 2-5.6 - Green's Creek RipRap Design Parameters

| HEC RAS Station | Location | Average Velocity (50yr) | Channel Width | Water Depth at Toe of | Bank Slope | Radius of Curvature |
|------------------------|-----------------|--------------------------------|----------------------|------------------------------|-------------------|----------------------------|
|------------------------|-----------------|--------------------------------|----------------------|------------------------------|-------------------|----------------------------|

| | | flow) | | Slope | | |
|------|-------------------|--------------|-------|--------------|-----|-----|
| | | (m/s) | (m) | (m) | (°) | |
| 3899 | Upstream | 1.71 | 95.0 | 2.0 | 30 | 65 |
| 3805 | Culvert Outlet | 2.84 | 20.0 | 1.8 | 30 | 200 |
| 3582 | Downstream | 1.86 | 103.0 | 4.7 | 36 | 200 |

- (v) Bank protection shall be designed for a minimum of 110m upstream of the Culvert and 50m downstream of the Culvert. Erosion protection shall be designed to be extended at an elevation of 0.5m above the 50-year water level or to the top-of-bank, whichever is lower.
- (vi) Bed protection shall be designed for the Culvert inlet to ensure channel stability and allow the formation of a natural channel. The top of the bed protection at the inlet shall be located at a minimum of 0.5m below the invert of the low flow channel. Bed protection shall extend a minimum of 5m upstream of the inlet and 2m downstream of the inlet.
- (vii) Bed protection shall be designed for the Culvert outlet to prevent excessive downstream movement of the erodible bed material and to recreate an existing riffle at the outlet. Bed protection at the outlet shall extend 2m inside of the Culvert outlet and 5m downstream. The top of the bed protection shall be flush with the invert of the low flow channel.
- (viii) Additional bed protection shall be designed to extend 5m upstream and 10m downstream of the outlet protection as described in Clause 5.7 (k) (xiv). The top of the bed protection here shall be located at a minimum of 0.5 m below the invert of the low flow channel.
- (ix) Design of any channel realignment shall follow hydraulic and sedimentological principles of fluvial process in such a manner that risk to Infrastructure and property upstream and downstream of the realignment site is avoided.
- (x) Any channel realignment shall be designed by a fluvial geomorphologist who can demonstrate a Master's degree in fluvial processes (or equivalent), and who has at least 10 years of experience designing channels in urban environments.
- (xi) The Culvert replacement and any channel realignment design shall meet environmental and landscaping requirements described in Schedule 17 – Environmental Obligations and in Schedule 15-2, Part 6, Article 4 – Site Specific Desired Outcomes.
- (xii) DB Co shall design any channel realignment in compliance with Ontario Regulation 174/06 (Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses).

- (l) SJAM Parkway – Cleary to Dominion and Churchill MUP Underpass
- (i) For Roadway requirements, refer to Article 6 – Roadways, Bus Terminals and Lay-bys of this Part 2.
 - (ii) DB Co shall design and construct a new storm sewer system to service the SJAM Parkway, sized to convey the 10-year storm flow from the 4-lane arterial roadway, consistent with City of Ottawa Sewer Design Guidelines for arterial roadways.
 - (iii) DB Co shall identify and locate all existing Ottawa River outfalls servicing the reconstructed segment of the SJAM Parkway as described in Clause 6.21 – Federal Roads Improvements of this Part 2. DB Co shall replace these outfalls with concrete storm sewers and headwalls that shall be designed in accordance with Article 4 – Structural Design Criteria and Requirements, of this Part 2. The new storm sewer under SJAM shall outlet to the replacement outfalls. Existing City of Ottawa storm sewers and outfalls shall not be used as outlets from the new storm sewer on SJAM Parkway. Replacement outfalls that are not utilized for the new storm sewer system shall extend from the Ottawa River to the north side of the MUP that is located north of the SJAM Parkway, and shall be terminated with a cap and a clean-out extending to the surface. The minimum size for the replaced outfalls and sewers shall be 300mm diameter.
 - (iv) The SJAM shall include a stormwater treatment system capable of providing 80% removal of TSS. This system shall be provided by means of bio-retention swales to be located within the proposed median of the SJAM Parkway where feasible. Where the median is less than 4m wide, or where superelevation of the Roadway prevents surface drainage to the median, bio-retention swales shall be located as close as possible to the SJAM eastbound or westbound lane. The bio-retention swales shall be designed in accordance with the TRCA/CVC Low Impact Development Stormwater Management Planning and Design Guidelines. The design constraints for the bio-retention swales shall be as follows:
 - A. The roadway design shall include side-inlet catch basins on the roadway to allow capture of runoff directly to the storm sewer during winter conditions and during storm events that exceed the capacity of the bio-retention swales.
 - B. The roadway shall be designed to allow for both lanes of traffic to drain toward opening in the inner (median) and outer curbs of the Roadway to capture all of the runoff in the bio-retention system.
 - C. DB Co shall convey runoff to the bio-retention swales using a combination of the two following methods:
 - i. Provide concrete spillways between the curb openings and bio-retention swales where erosion protection is required. River stone

- riprap shall be placed at the bottom of bio-retention swales where additional erosion protection is required. Angular riprap shall not be used. Concrete spillways shall have a maximum length of 2m.
- ii. Where the length of erosion protection between the Roadway and the bioswale exceeds 2m, runoff shall be captured by a catch basin and conveyed by a sewer to the bioswale.
- D. Bio-retention swales shall have a maximum longitudinal slope of 0.5%. Checkdams constructed of clay with a reinforced grass revetment shall be used as required to meet the maximum longitudinal slope requirement. Checkdams shall not be constructed of riprap.
- E. Bio-retention swales shall be underlain by an infiltration trench, lined with geotextile filter fabric, 50mm stone, and a perforated 200mm diameter storm sewer which connects to the storm sewer system. Raised, beehive-type catch basins within the bio-retention swale will allow direct discharge of runoff to the storm sewer for events that exceed the volume of the swale. The bio-retention swale shall be completed with a 0.5m media filter bed composed of shredded hardwood mulch layer (75mm depth) placed over an engineered mixture of sand, soil, and organic material, the design of which must consist of the following:
- i. Sand (2 to 0.05mm grain size) making up 85 to 88% of the weight;
 - ii. Fines (grain size <.050mm) making up 8 to 12 % of weight; and,
 - iii. Leaf compost making up 3 to 5% of weight.
- F. Media shall be tested to confirm design specifications and approved by the owner prior to installation.
- G. The edges of the raised, beehive type catch basins located in bio-retention swales shall be covered by river stone with minimum diameter of 100mm such that only the cover of the catch basin is visible
- (v) DB Co shall design and construct drainage systems to service the Cleary and Churchill MUP underpasses at the SJAM. The underpasses shall be designed to drain to the Ottawa River. At the Churchill MUP underpass, the MUP surface shall have a minimum elevation of 56.0m to maintain ponding depth on the MUP to 600mm during a 1:2 year flood of the Ottawa River, according to the RVCA Ottawa River Floor Risk Mapping report. Refer to Clause 6.21 of this Part 2.
- (vi) Overland flow spillways shall be provided at low points of the SJAM Parkway to allow for major flows to spill out of the Roadway toward the Ottawa River. Overland flow spillways shall be designed such that the maximum depth of flow on the SJAM Parkway meets the City guidelines for arterial Roadways, and such

that the flow is distributed evenly across the spillway to minimize erosion potential. Reinforced grass slopes shall be provided to prevent erosion of the overland flow spillway. Refer to Schedule 15-2, Part 6, Article 4 – Site Specific Desired Outcomes, for landscaping requirements of spillways from the SJAM.

(m) [REDACTED]

- (i) DB Co shall implement all recommendations of [REDACTED] necessary for the implementation of the Confederation Line, currently being completed by the City.

(n) Richmond Road Complete Streets Improvements

- (i) DB Co shall design and construct localized grading and new Drainage facilities including but not limited to catch basins, maintenance holes, curb and gutters, and storm sewers to ensure positive Drainage along and across the reconstructed Richmond Road and Byron Avenue in accordance with the City of Ottawa Sewer Design Guidelines and with Clause 8.10 of this Part 2.
- (ii) DB Co shall design and construct the site grading of Byron Avenue such that the existing ditches along the south side of Byron Avenue are maintained and continue to capture runoff from catchments external to the Byron Avenue roadway as per existing conditions. The existing ditches shall be re-graded and re-vegetated, along with replacement of driveway entrances within the Byron Avenue ROW, to accommodate a new sidewalk on the south side of Byron Avenue as outlined in Part 6, Article 4 – Site Specific Desired Outcomes. Culverts under driveways shall also be replaced.
- (iii) DB Co shall design and construct a stormwater treatment system capable of providing 80% removal of TSS for a minimum of 1.4ha of the Richmond Road Complete Streets road reconstruction area. This system shall be provided through the design and construction of bioswale and bio-retention LID facilities to be located on the reconstructed segment of Richmond Road. The bioswale and bio-retention facilities shall be designed in accordance with the TRCA/CVC Low Impact Development Stormwater Management Planning and Design Guidelines. The design of the facilities shall be as follows:
 - A. The roadway design shall include side-inlet catch basins on the roadway to allow capture of runoff directly to the storm sewer during winter conditions and during storm events that exceed the capacity of the LID facilities.
 - B. Bioswale and bio-retention facilities shall be located between the cycle track and the roadway, and shall immediately precede all bus stops in the direction of travel of the cycle track.
 - C. Bioswale and bio-retention facilities shall extend to the adjacent curb of private or public access to Richmond Road where the difference in offset

is 20m or less. Refer to Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements, for landscaping requirements.

- D. Bioswale and bio-retention facilities' width shall extend from the back of curb to the cycle track and shall not be less than 1.8m.
- E. DB Co shall construct bio-retention facilities where bedrock is 2.2m or greater below the finished ground surface. The bio-retention facility shall consist of an infiltration trench, lined with geotextile filter fabric, a minimum 300mm layer of clear stone, and a perforated sub-drain which connects to the storm sewer system. The invert of the perforated sub-drain shall be at least 100 mm above the bottom of the clear stone layer to allow infiltration of the 10mm rainfall event. The bio-retention facility shall be completed with a 500mm media filter bed composed of shredded hardwood mulch layer (75mm depth) placed over an engineered mixture of sand, soil, and organic material, the design of which must consist of the following:
 - i. Sand (2 to 0.05mm grain size) making up 85 to 88% of the weight;
 - ii. Fines (grain size <.050mm) making up 8 to 12 % of weight; and,
 - iii. Leaf compost making up 3 to 5% of weight.
- F. DB Co shall construct bioswale facilities where bedrock is less than 2.2m below the finished ground surface. The bioswale shall consist of a trench, lined with geotextile filter fabric, a perforated sub-drain which connects to the storm sewer system, and a clear stone layer with depth equal to or greater than the outside diameter of the perforated sub-drain. The bioswale shall be completed with a 500mm media filter bed composed of shredded hardwood mulch layer (75mm depth) placed over an engineered mixture of sand, soil, and organic material, the design of which must consist of the following:
 - i. Sand (2 to 0.05mm grain size) making up 85 to 88% of the weight;
 - ii. Fines (grain size <.050mm) making up 8 to 12 % of weight; and,
 - iii. Leaf compost making up 3 to 5% of weight.
- G. Raised catch basins within the bioswale and bio-retention facilities will allow direct discharge of runoff to the storm sewer for events that exceed the volume of the facility. The maximum rate of capture to the storm sewer shall not exceed the peak flow from a 2-year event.

- H. Media shall be tested to confirm design specifications and approved by the City prior to installation.
- (iv) DB Co shall design and construct bioswale LID facilities in Byron Linear Park such that runoff from the park is managed in accordance with the Pinecrest Creek SWM criteria. The bioswale facilities shall be designed in accordance with the TRCA/CVC Low Impact Development Stormwater Management Planning and Design Guidelines. The design constraints for the facilities shall be as follows:
 - A. The design shall include catch basins to allow capture of runoff directly to the storm sewer during winter conditions, and during storm events that will exceed the capacity of the LID facilities. The maximum rate of capture to the storm sewer shall not exceed the peak flow from the 2-year storm.
 - B. Where the bioswale facility crosses a pedestrian pathway, DB Co shall design and construct a footbridge for the crossing and shall not use any Culverts.
 - C. DB Co shall design the bioswales with maximum 3:1 side slopes.
- (o) Moodie LMSF
 - (i) DB Co shall design a storm drain inlet and sewer system to convey the runoff to an underground storage system which permits infiltration. Discharge shall be controlled to existing (pre-development) peak flow rates.
 - (ii) OGS structures shall be designed and specified with a required performance of removal of fine sediment, oil, floating and sinking debris, and 80% removal efficiency for TSS at the outlet from the drainage system prior to discharge to Stillwater Creek.
 - (iii) DB Co shall construct any box Culvert extensions as open bottom.
 - (iv) DB Co shall confirm the value of the loss of floodplain storage volume within the 1:100 year floodplain which will result from the placement of fill by June 1, 2020. The City will be responsible to fully compensate for this loss of floodplain storage volume through a balanced cut (or excavation) to be performed in a location selected by the City. The City will be responsible for permits and approvals for this compensation and the work will be complete by the end of 2020.
 - (v) DB Co shall design the site considering future expansion requirements outlined in Schedule 15-2, Part 5 – LMSF and to demonstrate that expansion of the site does not require the removal of underground storage facilities constructed as part of the DB Co site construction. DB Co shall demonstrate how the expansion of drainage facilities can be achieved.

ARTICLE 6 ROADWAYS, BUS TERMINALS AND LAY-BYS

6.1 Reference Documents

- (a) DB Co shall complete the Work in accordance with the criteria contained within this Article, the Applicable Law, all the City of Ottawa's by-laws, regulations, policies, standards, guidelines and practices applicable to the Project, including but not limited to the following Reference Documents:
- (i) The criteria in this Article, as well as Appendices to this Part 2;
 - (ii) AASHTO, Guide for the Design of Pavement Structures;
 - (iii) City of Ottawa, Standard Tender Documents;
 - (iv) City of Ottawa, Transportation Master Plan;
 - (v) City of Ottawa, Official Plan;
 - (vi) City of Ottawa, OC Transpo - Transitway and Station Design Guidelines (June 2013);
 - (vii) City of Ottawa, Municipal Road Activity (By-law No. 2003-445) and Guidelines For Completing the Application for Road Cut Permit;
 - (viii) City of Ottawa, Municipal Traffic and Parking (By-law No. 2003-530) - City of Ottawa Regulating Traffic and Parking on Highways;
 - (ix) City of Ottawa, Municipal Zoning (By-law No. 2008-250) Consolidation;
 - (x) City of Ottawa, Transit-Oriented Development Guidelines;
 - (xi) City of Ottawa, Pedestrian Crossover Program and Examples Documents 1 and 2;
 - (xii) City of Ottawa, CADD Standards;
 - (xiii) City of Ottawa, Urban and Rural Truck Routes Maps;
 - (xiv) City of Ottawa, Road Corridor Planning & Design Guidelines - Urban and Village Collectors / Rural Arterials and Collectors;
 - (xv) City of Ottawa, Right-of-Way Lighting Policy;
 - (xvi) City of Ottawa, Accessibility Design Standards;
 - (xvii) City of Ottawa, Transportation Impact Assessment Guidelines;
 - (xviii) Region of Ottawa-Carleton, Regional Road Corridor Design Guidelines;

- (xix) MTO, Ontario Pavement and Rehabilitation Manual;
 - (xx) MTO, Ontario Provincial Standard Drawings;
 - (xxi) MTO, Ontario Provincial Standard Specifications;
 - (xxii) MTO, Materials Information Report MI-183 “Adaptation and Verification of AASHTO Pavement Design Parameters for Ontario Conditions”;
 - (xxiii) MTO, Ontario Traffic Manual Books 1 through 18;
 - (xxiv) MTO, Roadside Safety Manual;
 - (xxv) MTO, Sign Sheeting Memorandum, February 21, 2008;
 - (xxvi) MTO, King’s Highway Guide Signing Policy Manual;
 - (xxvii) TAC, Geometric Design Guide for Canadian Roads;
 - (xxviii) TAC, The Canadian Road Safety Audit Guide;
 - (xxix) TAC, Guide to Bridge Traffic and Combination Barriers;
 - (xxx) US Department of Transportation, Roundabouts: An Informational Guide (FHWA-RD-00-067);
 - (xxxi) MTO Design Supplement to TAC Geometric Design Guide for Canadian Roads, June 2017;
 - (xxxii) Other relevant City of Ottawa Operation Policy, Procedures and Guidelines.
- (b) DB Co shall design and construct all Roadways under the scope of Works in accordance with the geometric Design Criteria contained in this Article and applicable appendices, and standards and manuals included in Clause 6.1(a) of this Part 2, and if there is any conflict between the criteria contained in this Part 2 and standards and manuals included in Reference Documents, the following shall apply in descending order of precedence:
- (i) The criteria contained in Schedule 15-2, Part 2, Appendices A, B, C and D;
 - (ii) The criteria contained in this Article;
 - (iii) The applicable City of Ottawa Standard Tender Documents and applicable standards and guidelines;
 - (iv) TAC, Geometric Design Guide for Canadian Roads;

- A. In all cases for OR174 and Hwy 417, including all associated interchanges, DB Co shall also reference the MTO Design Supplement to TAC Geometric Design Guide for Canadian Roads.
- (v) TAC, The Canadian Road Safety Audit Guide;
- (vi) MTO, Roadside Safety Manual.

6.2 General Requirements

- (a) DB Co shall provide the design, including obtaining all necessary approvals, and supply the materials, labour, equipment, inspection and testing in order to fulfill the requirements for the execution and commissioning of the Works.
- (b) The overall engineering design and construction requirements of the Works, including typical cross-sections and geometric Design Criteria, are primarily based on the contents of this Part 2, and the Reference Documents from the City of Ottawa, TAC and MTO.
 - (i) DB Co shall design the proposed improvements on all Works according to the Design Criteria included in Appendix A of this Part 2. In all cases where a specific Design Criteria is not provided for a Roadway and/ or interchange in Appendix A of this Part 2, DB Co shall undertake a detailed survey and review of the existing conditions, confirm the Roadway and/or interchange ramps geometric Design Criteria by referencing the existing, appropriate standard and proposed design parameters, in order to address the necessary improvements.
 - A. Under the circumstances whereby an existing interchange ramp, impacted by the Works, does not meet current standards, DB Co shall design and construct the necessary ramp improvements to maximize the radius used so that the impacted ramp will be upgraded to meet the standards. Under circumstances where upgrading the ramps to current standards is not feasible within the available Lands, DB Co shall design the improvements so that current ramp geometry will be maintained.
 - B. DB Co shall also undertake a detailed intersection operations and level of service analysis associated with the necessary improvements on all impacted signalized intersections and interchange ramps. DB Co shall demonstrate that the traffic operations and levels of service are acceptable and feasible using projected traffic volumes, expected transit operations for 2031 horizon year per the requirements of the City of Ottawa Transportation Impact Assessment guideline, including pedestrian and cyclist movements.
 - i. For all permanent Roadway improvements within MTO's jurisdiction, DB Co shall demonstrate that the traffic operations and LOS are acceptable and feasible considering three scenarios

forecasting traffic volumes and expected transit operations for 5, 10 and 20 year horizons beyond the Substantial Completion.

- C. DB Co shall submit to the City the results of above-noted investigations by submitting an existing conditions report, a preliminary design report including the proposed Design Criteria and design synopsis, and a separate traffic analyses report and seek approval from the City at least 20 calendar days prior to initiating the development of geometric design.
- (ii) DB Co shall undertake all necessary traffic and transit assessments, modelling and analysis including vehicular and non-vehicular road user needs, using projected traffic volumes as specified in Appendix A of this Part 2 for a horizon year of 2031 to determine the necessary Roadways and traffic improvements and provide the requisite design and construction of such works, as per the requirements of the City of Ottawa's TIA guidelines and other applicable standards.
- A. All traffic data used for analysis for traffic management purposes shall be based on the most current data and shall be no older than two years. The information to be collected shall include, but not be limited to, all of the hourly traffic volumes and AADTs for all modes of travel on all Roadways, bus Facilities, bike facilities and pedestrian facilities, which will be affected by the Project and as a part of the permanent Works. DB Co shall be responsible for obtaining or collecting all traffic data necessary for its traffic analysis if traffic data less than two years old is not relevant to the traffic analysis due to temporary conditions that existed at the time the data was collected. DB Co shall confirm with the City that the data is appropriate prior to conducting an analysis using said data.
 - B. DB Co shall undertake a traffic management study to determine the traffic impacts on other intersections and local road networks that are impacted as the result of the Project permanent Works and to determine appropriate mitigation measures, if road capacity and level of service is reduced. The traffic management study shall involve area wide traffic modeling to determine impacts to all modes of transportation, including adjacent corridors impacted by the permanent Works. The study shall include DB Co's forecast for, but not limited to, changed traffic volumes, speeds, and travel times for all modes of travel on all routes subject to the study. The traffic management study shall be submitted as a part of the DB Co's traffic report document in accordance with Schedule 10 – Review Procedure.
 - C. All vehicle, transit customer, pedestrian, and cycling data used for analysis for traffic management purposes shall be based on the most current data, and no older than two years with growth factors acceptable to the City. DB Co shall be responsible for obtaining any vehicle, pedestrian, and cycling data necessary for its traffic management analysis.

- (iii) Appendix B of this Part 2 demonstrates only the minimum lane requirements and lane configurations at certain intersections that DB Co is responsible for in their design and construction. Shall DB Co's traffic and transit assessment, modelling and analysis determine that additional traffic lanes and improvements are required in addition to the information shown in Appendix B of this Part 2, DB Co shall be responsible for the design and construction of all such improvements.
- (c) Basic ROW widths and protection requirements shall reference the City of Ottawa's Transportation Master Plan and Official Plan (Annex 1).
- (d) Design Criteria, Road Classifications and Design Speed Considerations
 - (i) Design Criteria parameters, based on the Roadway classifications, shall reference:
 - A. City of Ottawa Transportation Master Plan – Annex B Maps
 - B. City of Ottawa Official Plan – Schedule B and Annex 1
 - C. City of Ottawa Road Design Guidelines:
 - i. Region of Ottawa-Carleton, Regional Road Corridor Design Guidelines;
 - ii. City of Ottawa Road Corridor Planning & Design Guidelines - Urban and Village Collectors / Rural Arterials and Collectors; and,
 - D. Appendix B of this Part 2.
 - (ii) In general, the designation of design speeds shall be based on the speed limits currently posted for the respective Roadways, unless specified otherwise in this Article. DB Co shall design the modifications intended on the existing urban collectors or arterials that have design speed of 60 km/hr or lower as per the TAC GDGCR guidelines applicable to low-speed roads subject to retrofit conditions. The design of new or existing arterial roads and highways with design speeds greater than 60 km/hr shall meet the requirements of high-speed roads as per TAC GDGCR requirements accordingly.
 - (iii) In the absence of City of Ottawa adopted standards, Design Criteria parameters shall reference the TAC GDGCR.
- (e) DB Co shall obtain the approval of the City for all Works, including construction Works that involve the modification of existing City infrastructure, contained within the scope of Works.
- (f) DB Co shall determine the road cross-slope based on the road classification using the City standards and TAC requirements and to match the existing cross-slope of the undisturbed section.

- (g) Superelevations shall satisfy the pertinent requirements as per the road classification, and City of Ottawa's Design guidelines and standards and TAC GDGCR requirements.
- (h) DB Co shall design and construct all necessary requirements for landscape, road furniture and streetscape elements required in all Works as per the requirements of Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.
- (i) DB Co shall design and construct the necessary utilities and associated underground and aboveground infrastructures for the Works per the requirements of Article 8 – Utility Infrastructure Design Criteria, of this Part 2.
- (j) DB Co shall design and construct all necessary temporary improvements, traffic staging detours, and all associated improvements necessary to support the construction of permanent Works as per the requirements of Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.
- (k) DB Co shall design and construct all Roadway improvements to meet the applicable accessibility requirements, including but not limited to COADS or AODA.
- (l) DB Co shall refer to Article 4 – Structural Design Criteria and Requirements, of this Part 2, for any structural requirements associated with the Roadway improvements specified in this Article 6.
- (m) DB Co shall set the criteria for total and differential post-construction settlements of the Pavement to satisfy the requirements of Clauses 6.10 through 6.13 of this Part 2 including Embankment Settlement Criteria for Design, July 2010, MTO.

6.3 Horizontal Alignment

- (a) The geometric characteristics of the horizontal alignment shall meet the requirements of the TAC GDGCR, unless otherwise specified in this Article. In particular, the following requirements shall apply:
 - (i) Minimum radius and maximum superelevation rate requirements shall correspond to the existing road characteristics as per the road classifications in Clause 6.2 of this Part 2. For urban collectors, the maximum superelevation rate (e_{\max}) shall be limited to 2% and no superelevation is required on urban local roads. For new construction road improvements, the maximum superelevation rate (e_{\max}) shall be 0.04 m/m for low-speed urban arterial roads with design speed of 60 km/hr or lower. For new rural roads and new high speed urban arterial applications (i.e. urban roads with design speeds greater than 60 km/hr) the maximum superelevation rate shall be 0.06 m/m. DB Co shall follow the criteria specified in TAC GDGCR (Clause 2.1.2.2) for all other retrofit conditions.
 - (ii) For urban conditions, the minimum length of curve shall be between 30m to 60m.

- (iii) For high-speed urban roads (i.e. Urban roads with design speeds greater than 60 km/hr) and all rural roads, DB Co shall apply spiral curves to the design of the horizontal alignment.
- (iv) DB Co shall provide a shy line offset from edge of road lane to Station walls, portal walls, bridge railings, barriers, stop structures, retaining walls and any other obstruction located within the road clear zone for the safe operation of vehicular traffic in the road ROW. The shy line offset values shall be to TAC standards and treatment within the shy line distance and shall be to the guidelines specified in TAC Guide to Bridge Traffic and Combination Barriers and MTO Road Side Safety Manual.

6.4 Vertical Alignment

- (a) Vertical alignment shall meet the requirements of the TAC GDGCR, unless specified otherwise in this Article. The following main geometric parameters pertinent to the vertical alignment shall apply:
 - (i) Minimum gradient: Minimum grades shall satisfy the requirements of TAC GDGCR Section 2.1.3 under Minimum Grades: Design Domain Application Heuristics - Urban Areas.
 - (ii) Equivalent minimum “K” Values: The vertical curve geometry shall reference the requirements of the TAC GDGCR Section 2.1.3.3 – Item 2:
 - A. “K” value for crest curves shall satisfy the upper limits of the SSD requirements. In all cases, DB Co shall confirm appropriate SSDs by calculating the distance travelled during deceleration and perception and reaction time, considering the effect of grades on deceleration and verified against available sight lines according to TAC GDGCR;
 - B. “K” value for sag curves shall satisfy the upper limit of the requirements of headlight control and comfort control.

6.5 Sight Distance Requirements

- (a) DB Co shall satisfy the upper limit of the required sight distances beyond the minimum sight distance requirements at all intersections and in particular in situations where there are increased interactions between vehicular traffic and non-vehicular modes of traffic, such as areas within 150 m of Stations entrances.
 - (i) DB Co shall determine visibility sight triangles and SSD for road horizontal and vertical geometry. DB Co shall ensure that the sight distances provided in the design meet or exceed the minimum sight distance requirements of the TAC GDGCR based on calculations considering the corresponding Design Criteria parameters.

- (ii) DB Co shall design DSD in accordance with requirements of the TAC GDGCR.
- (b) DB Co shall determine all ISD design requirements, including approach, departure, and crossing ISDs, and visibility triangles using the appropriate design vehicle(s) at all intersections according to the criteria specified in the TAC GDGCR.

6.6 Access and Intersection Layout

- (a) DB Co shall design and construct Pavement markings, traffic signs, traffic control signals and underground traffic plants in accordance with the requirements of the applicable Reference Documents.
- (b) DB Co shall design all intersection layouts and lane configurations to address all system user's requirements, including pedestrian, cyclist, transit and vehicular traffic. DB Co shall give precedence to intersection design characteristics which preserve and enhance public Safety, minimize the area impacts, and respond to traffic demands.
- (c) DB Co shall design and construct street lighting in accordance with Clause 6.16 – Street Lighting of this Part 2.
- (d) DB Co shall design and construct all intersection layouts, lane widths, ramp throats, and Pavement widths using the appropriate design vehicle as defined in Clauses 6.8 and 6.9 of this Part 2, and Appendix A of this Part 2.
 - (i) DB Co shall design intersection geometry such that the turning radius of the selected design vehicles is applied from traffic lane to traffic lane.
 - (ii) DB Co shall design intersection layouts so that turning movements will not encroach on cycling lanes.
- (e) DB Co shall design specific intersection improvements to include typical characteristics and requirements of Protected Intersections, according to site-specific application of these elements, such as the following:
 - (i) Crossing setback;
 - (ii) Cyclist crossing;
 - (iii) Cyclist queuing area/ safety refuge;
 - (iv) Pedestrian crosswalk;
 - (v) Pedestrian queuing area/ safety refuge;
 - (vi) Pedestrian crossing of bike lane;
 - (vii) Advanced stop bar;

- (viii) Yield lines;
 - (ix) Corner safety island;
 - (x) Minimum curb radius (considering the appropriate design vehicle); and,
 - (xi) Lateral approach/ departure taper.
- (f) All pedestrian and cycling crossing facilities shall meet City requirements and reference OTM Book 15 and OTM Book 18.
- (g) DB Co shall not design raised intersections, except at locations where they are specifically prescribed in this Part 2, or Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.

6.7 Cross-Section Elements

- (a) DB Co's design of typical cross-sections for Roadways shall be in accordance to the requirements of City of Ottawa Design standards and TAC GDGCR, unless specified otherwise in the Roadways corresponding Design Criteria (Refer to Clause 6.19 – Municipal Roads of this Part 2);
- (i) Auxiliary lane width, where applicable, shall satisfy the requirements of Special Purpose Lanes as specified under Clause 2.2.3 of TAC GDGCR; and,
 - (ii) DB shall provide a cross-slope of 2% toward the curbs or shoulders in order to provide improved surface drainage runoff on paved tangent Roadways, unless specifically noted otherwise in the specific municipal Roadway improvements in Clause 6.19 – Municipal Roads of this Part 2.

6.8 Design Vehicles

- (a) DB Co shall use the appropriate design vehicles to design the intersection layout geometry, and to accommodate the applicable sight distances and horizontal and vertical Roadway clearance requirements. For additional requirements pertinent to horizontal and vertical clearances under Overhead structures, refer to Article 4 – Structural Design Criteria and Requirements, of this Part 2. Selection of the largest design vehicle for each Roadway, bus facility, ramp, etc. shall follow the subsequent criteria:
- (i) Commercial Trucks, including WB-20 shall govern the design for all intersections, roads, and streets that are designated as a truck route in the City of Ottawa's Urban and Rural Truck Route Maps.
 - (ii) Commercial Heavy Single Unit Trucks, and the largest emergency vehicles, including fire and paramedic vehicles shall govern the design for all other intersections, roads, and streets that are listed as non-truck routes.

- (iii) All roads and streets that are a designated transit bus routes shall accommodate the turning movement requirements of the City's B-12 standard bus, articulated bus, double decker bus, and Para Transpo vehicles.
- (iv) Where applicable, Inter-City bus and school bus shall govern the design of roads, streets, and intersections.
- (v) Where applicable, maintenance vehicles including snow removal vehicles and garbage trucks shall govern the design of roads, streets, and intersections.
- (vi) Clearance requirements for opposing left-turn design: in design of intersections with multiple left-turn lanes, especially where simultaneous opposing left turns exist, DB Co shall ensure that design vehicle is appropriately selected. In the design of intersection layouts with double turn left lanes, the design shall accommodate the simultaneously turning manoeuvres of the largest design vehicle with a second Light Single Unit truck. Under extremely constrained conditions, as a minimum, a simultaneous double left-turn design shall accommodate the largest design vehicle turn with a passenger car.
- (vii) DB Co shall design and construct all improvements on intersection layouts, and Roadways geometry using turning simulation software (Transoft AutoTURN) with the appropriate design vehicle turning templates to allow for simple turning movements using the generate corner path method.
 - A. Minimum turning speed of a design vehicle shall not be assumed less than 15 km/hr. Only in extremely constrained conditions, where DB Co can demonstrate that no feasible design solution can be developed considering a 15 km/hr turning speed, a minimum 10 km/hr turning speed may be acceptable.
 - B. The design of OC Transpo bus turning paths shall satisfy the requirements of the OC Transpo - Transitway and Station Design Guidelines. Bus design turning speeds at intersection corners and curb returns shall not be less than 15 km/hr. Also refer to Clause 6.9 of this Part 2.
- (b) DB Co shall have regard to the Official Plan and Policy designations for the affected areas and Roadways, including the City of Ottawa Multi-Modal LOS targets which are affected by curb radii. Pedestrian and cycling LOS targets are especially high in the central area, near schools and rapid transit stations and every effort shall be made to achieve these targets within the context of the City of Ottawa Complete Streets Implementation Framework.

6.9 Facilities Operated by OC Transpo

- (a) DB Co shall design and construct all OC Transpo Roadways and Facilities to meet the interim and ultimate operational requirements of the City during all construction stages

and following Revenue Service. DB Co shall obtain the City's approval prior to advancing the design of all Roadways and Facilities operated by OC Transpo.

- (b) DB Co's design and construction of all temporary or permanent bus stop Facilities, station amenities, infrastructure and shelters shall meet the requirements of Schedule 15-2, Part 7, Appendix E and Schedule 15-2, Part 4, Appendix E and shall comply with City of Ottawa accessibility design standards and features, including but not limited to COADS requirements.
- (c) Unless specified otherwise, DB Co shall accommodate the following requirements:
 - (i) The primary reference for the design, construction and operational requirements of all roads, accesses, bus Platforms, PPUDO and Park and Ride facilities operated by OC Transpo is OC Transpo's Transitway and Station Design Guidelines.
 - (ii) The primary reference for the design of all Roadways and bus transit facilities operated by OC Transpo including but not limited to the design speeds, geometric Design Criteria, horizontal and vertical alignments, auxiliary lanes, intersection geometry, cross-section components, drainage requirements, ramp design, pedestrian and cyclists connectivity, safety and security, accessibility, bus station Platform layouts and turnaround circulation geometry and other Roadways, facilities, and structural details shall meet the requirements of OC Transpo's Transitway and Station Design Guidelines. For specific Station site design layout requirements with respect to pedestrian and cyclists' connectivity refer to Schedule 15-2, Part 4 – Stations, and Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements.
 - (iii) For the design and construction of Park and Ride Facilities, in the event of a conflict between the criteria contained in this Article and any other City or OC Transpo's reference document(s), the following shall apply in descending order of precedence:
 - A. All criteria and requirements specified in this Article and in other pertinent parts and clauses of this Part 2;
 - B. City of Ottawa, OC Transpo - Transitway and Station Design Guidelines (June 2013);
 - C. COADS;
 - D. City of Ottawa, Municipal Traffic and Parking (By-law No. 2003-530) - City of Ottawa Regulating Traffic and Parking on Highways;
 - E. City of Ottawa, Municipal Zoning (By-law No. 2008-250) Consolidation;
 - F. City of Ottawa, Transit-Oriented Development Guidelines.

- (iv) Sidewalks associated with bus stops and Station Platform areas shall accommodate positive drainage and have a minimum grade of 0.5% towards the curb.
- (v) Bus shelters, bus stop pad, shelters with sidewalk and boulevard shall satisfy the requirements of both the City's Standard Tender Documents and the OC Transpo's Transitway and Station Design Guidelines, unless specifically noted otherwise in Schedule 15-2, Part 4 – Stations, and/or in Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements. In particular, for additional landscape site design provisions such as bus shelters, lighting, and shade tree requirements refer to Schedule 15-2 Part 4 – Stations, and Schedule 15-2 Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements.
- (vi) Design of bus loops, bus driveway accesses, bus stops, bus Platforms, and bus lay-bys in bus Station Facilities shall meet the following requirements:
 - A. DB Co shall design and construct the bus Facilities, Station amenities and infrastructure that will be used for the operation of buses as per the standard established in this Part 2. DB Co shall submit the design of all bus Station Facilities for review in accordance with Schedule 10 - Review Procedure. The bus Station Facility submission shall include sufficient detail to allow the City to understand the full operation of the bus Facility, including interface with any other activities on the site, all station amenities and infrastructure.
 - B. DB Co shall run AutoTURN analysis to confirm the suitability of the design. DB Co shall obtain the dimensions and characteristics of a typical OC Transpo bus vehicle prior to performing the AutoTURN analysis for the appropriate bus design vehicles. DB Co shall submit the turning movement results for review and approval in accordance with Schedule 10 – Review Procedure and shall consider the following requirements:
 - i. Buses shall line up parallel to the bus Platforms with a distance of no more than 150mm (preferred)/ 300mm (absolute maximum) from Platform curbs.
 - ii. All bus turning manoeuvres in the swept path analysis shall ensure a smooth, continuous movement, without instantaneous steering movements. The swept path analysis shall not include 0m radius turns, with the exception of the first turn away from a parking spot under constrained conditions.
 - iii. DB Co shall perform field tests for compliance and functionality of bus movement clearance through the means of a bus test on mock-up facilities (demarcating curbs and other features using traffic

- cones and or paint lines) with dimensions identical to the proposed bus Facilities.
- iv. DB Co shall design bus loops and driveways for one way circulation at bus terminals. Exceptions to the above requirement may be acceptable where a two-way circulation offers better transit operations, for which DB Co shall consult with and seek approval from the City prior to proceeding with such alternative design.
 - v. All bus loops and driveway accesses shall allow buses to safely pass stalled or parked buses.
 - vi. DB Co shall ensure a bus can maneuver parallel to the Platform curbs and depart independently of parked busses with the assistance of vehicle turning movement simulation software or the appropriate turning movement templates. DB Co shall submit the turning analysis to the City for review and approval in accordance with Schedule 10 – Review Procedure.
 - vii. DB Co shall provide a clearance of 0.5m between bus movements and all obstructions, including the worst case stopping positions of buses in bus bays and lay-by areas.
 - viii. DB Co shall simulate the appropriate bus turning movements considering the minimum outside turning radius (wall to wall radius) to allow for simple turning movements using the “Generate Corner Path” function (Transoft AutoTURN) at the appropriate turning speeds referenced in Clause 6.8 of this Part 2 for operating efficiency.
- C. DB Co shall design and construct bus Platforms, Station amenities, and associated infrastructure located on the Platforms so that these elements are unobstructed and appropriately sized to accommodate the volume of Passengers boarding and exiting the buses. DB Co’s design shall provide for additional area to accommodate peak load volumes, not less than the minimum stated as per the OC Transpo’s Transitway and Station Design Guidelines.
- D. DB Co shall design and orient bus stops to allow Passengers to load and unload from the right side of a bus, providing Passengers with direct access to pedestrian pathways and / or into the bus terminals or Station entrance, without having to cross the front or rear of a bus. DB Co shall not provide pedestrian crossings within bus Facilities without written consent and approval from the City. The design shall preclude such behaviour in addition to placing appropriate and accessible TCDs. Under exceptional circumstances, where the above requirements cannot be met due to constrained conditions and a crossing facility is required, DB Co

shall confirm the appropriate traffic control requirements and demonstrate that the pedestrian crossing facility is safe and meets bus operational requirements. DB Co shall present a risk analysis developed by a certified traffic Safety auditor prior to design and implementation and seek approval from the City.

- E. DB Co shall locate bus stops, designated as drop-off Platforms, as close as possible to the driveway entrances and Station entries.
- F. DB Co shall consult with and seek approval from the City and OC Transpo with respect to the dimensions, layout, and location of all bus stops and bus lay-by areas and the preferred bus stop grouping and arrangements at Platform locations (i.e. single, double, or triple stops).
- G. Bus Platforms shall not be located on curved laneways.
- H. DB Co shall design and construct all permanent and temporary bus stops during staged construction to include safe and secure pedestrian access from / to bus stops and all bus stop shelters as per the requirements specified in COADS and Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access. DB Co shall reference Schedule 15-2, Part 4, Appendix E and Schedule 15-2, Part 7, Appendix E for the requirements of both permanent and temporary bus terminal requirements, respectively.

6.10 Pavement - Municipal Roads

(a) Order of Precedence

- (i) DB Co shall provide the Pavements in compliance with the criteria contained in this Article, the Applicable Law, standards, guidelines or practices applicable to the Project and including but not limited to each of the following Reference Documents.
- (ii) In the event of a conflict between the criteria contained in this Article and any Reference Document(s), the following shall apply in descending order of precedence for design and construction of Pavements:
 - A. The criteria contained within this Article;
 - B. OPSS;
 - C. OPSD;
 - D. The City's Current Version of Design Guidelines, Standard Tender Documents and Specifications

- E. Ontario Provincial Standards for MTO Designated Source of Materials (DSM);
 - F. Procedures for Estimating Traffic Loads for Pavement Design, 1995, MTO;
 - G. MTO Materials Information Report MI-183 “Adaptation and Verification of AASHTO Pavement Design Parameters for Ontario Conditions”;
 - H. MTO Ontario’s Default Parameters for AASHTOWare Pavement ME Design Interim Report, 2014;
 - I. AASHTO Guide for the Design of Pavement Structures;
 - J. Canadian Portland Cement Association – Thickness Design for Streets and Highways;
 - K. MTO Directive PHM-C-001 The Use of Surface Course Types on Provincial Highways;
 - L. MTO Pavement Design and Rehabilitation Manual (Second Edition);
 - M. The criteria contained within Schedule 15-2, Part 2, Article 7 – Geotechnical Design Criteria and Requirements;
 - N. Embankment Settlement Criteria for Design, July 2010, MTO;
 - O. ASTM Standards; and,
 - P. MTO Laboratory Standards.
- (iii) For the design of rigid concrete Pavements, DB Co shall use both MTO’s Routine Method as described in the Pavement Design and Rehabilitation Manual and the Canadian Portland Cement Association’s Simplified Design Procedure in addition to the foregoing AASHTO guide for Design of Pavement Structures.
- (b) General Requirements
- (i) In general, the design of Pavement structure(s) shall be the responsibility of DB Co’s and be based on the City’s current Pavement design practices.
 - A. DB Co shall follow the requirements of the OC Transpo’s Transitway and Station Design Guidelines for Pavement design of paved areas subject to bus traffic, Park and Ride lots, and facilities operated by OC Transpo vehicles.

- B. Pavement structure shall be of a flexible (asphalt) Pavement design outside bus Station Platform areas, where paved areas are subject to bus traffic, unless otherwise approved by the City.
 - C. DB Co shall incorporate a rigid (concrete) Pavement structure within, at a minimum, the limits of the concrete Platforms. OC Transpo's Transitway and Station Design Guidelines shall be utilized for the approximate limits for concrete Pavement for a typical side loading Station. DB Co shall review the concrete Pavement limits for Stations with center loading Platforms, based on the Station layout, bus access and operational requirements, recommend an appropriate Pavement design and seek approval from the City prior to advancing the design. DB Co shall provide an extension of concrete Pavement 30m exceeding the Platform. A proper transition treatment shall be provided from one Pavement type to another.
- (ii) DB Co shall be responsible for design of all new Pavements and all existing paved areas that are subject to upgrade or reinstatement as a part or result of the Work both during temporary staged construction and in post construction. DB Co shall reinstate the Pavement to match the standards of either the existing adjacent Pavement structure or the current City and OC Transpo's standards and requirements specified in this Article, whichever is more stringent. In all cases, the Pavement reconstruction shall be in accordance with the following requirements:
- A. Where the existing Pavement structure adjacent to a localized widening is greater than current City standards and requirements specified in this Article, the new Pavement structure shall match the existing Pavement structure; and,
 - B. Where the existing Pavement structure adjacent to a localized widening is the same or less than the current City Standards, the new Pavement structure shall match the current City standards and requirements specified in this Article.
- (iii) DB Co shall design and build all Pavement structures in compliance with City standards in areas where Pavement structures will be built as NMI, in City ROW. DB Co shall be responsible to obtain the acceptance from the City of all works within the City ROW prior to construction. In areas where the Pavement structures will be built as NMI on Federal lands, DB Co shall complete Pavement designs following City standards for review and approval from applicable Governmental Authorities in accordance with the procedures established by the respective Governmental Authority. DB Co shall comply with the Governmental Authority permits requirements and conditions.
- (iv) DB Co shall ensure that any roads or sections of roads with unfinished Pavement including, but not limited to, milled Pavement or Pavement without a surface course opened to traffic, including but not limited to public or construction traffic,

are designed to carry the expected traffic and to prevent water penetration. DB Co shall maintain and ensure all unfinished pavement opened to traffic are in compliance with the City standards prior to final paving. For milled pavement surfaces, DB Co shall follow the requirement of Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

- (v) DB Co shall ensure that design and construction of flexible and rigid Pavement structures for all paved Roadways and paved bus Facilities such as lanes, ramps, lay-bys, and Park and Ride Facilities, and paved storage areas, as per the following:
 - A. For the bus terminals and loops, DB Co shall design and construct the Pavement of the bus Facilities for uninterrupted operation of the OC Transpo's buses in light of the expected bus volumes. DB Co shall submit a Pavement Design Report in accordance with Schedule 10 – Review Procedure for all paved facilities stating their consideration of the bus volumes and assumptions of private vehicles. DB Co's report shall also include a site-specific recommendation for the periodical maintenance and rehabilitation of the paved facility considering the facilities Design Life.
 - B. DB Co shall consider factors such as traffic volumes, subgrade conditions, environmental effects, construction traffic, availability and suitability of construction materials and performance of similarly loaded Pavements in the area, and economics when determining a suitable Pavement Design.
 - C. DB Co shall provide site-specific Pavement design reports for the Project in accordance with Schedule 10 – Review Procedure.
 - D. DB Co shall consider the influence of heavy equipment and delivery vehicles during construction during the design process, particularly with respect to the thickness of sub-base material and the native subgrade conditions.
 - E. DB Co's Pavement design report shall provide localized Pavement designs that shall mitigate potential Pavement sliding or rutting in areas along bus Platforms, within access ramps, bus stops, and bus lay-by locations, which are subject to repeated bus turning movements.
- (vi) Byron Avenue Pavement improvement requirements:
 - A. DB Co shall design and construct an appropriate Pavement improvement treatment for the full width of the existing Byron Avenue in the sections between west of Richardson Avenue and east of Redwood Avenue, so that the Pavement shall meet the requirements of Schedule 15-2, Part 2, Clause 6.10 and associated requirements outlined in Schedule 15-2, Part 1, Table 1-4.1. DB Co shall design and construct all improvements required to reinstate the existing Pavement sections that are impacted due to above

ground and underground Works on Byron Avenue. DB Co shall design and rehabilitate an appropriate thickness of milling and resurfacing treatment to improve the Byron Avenue's existing Pavement structure. For the purpose of Pavement design and analysis of Byron Avenue:

- i. DB Co shall consider the section of Byron Avenue west of Woodroffe Avenue as a 2-lane local road and use 1% annual traffic growth rate to calculate the projected traffic volumes for the intended traffic horizon assuming the 2017 AADT is 500.
- ii. DB Co shall consider the section of Byron Avenue east of Woodroffe Avenue as a 2-lane collector road and use 1% annual traffic growth rate to calculate the projected traffic volumes for the intended traffic horizon assuming the 2016 AADT is 3,170.

(c) Design and Performance Requirements

- (i) DB Co shall ensure that the Roadway Pavement structure conform to the latest standards of the applicable Governmental Authorities.
- (ii) DB Co shall ensure that designed Pavement structure have a Pavement life cycle as specified in Schedule 15-2, Part 1, Article 4 – Design and Construction. In the absence of City standards, DB Co shall comply with the following specific OPSS requirements related to the Pavement works, where applicable:
 - A. OPSS 510 for Removals;
 - B. OPSS 206, and 514 for Excavation;
 - C. OPSS 212 for Filling;
 - D. OPSS 501, 1010 for Granular Material. Thickness shall be suitable for the Roadway's intended use;
 - E. OPSS 310, 311, 312 for Hot Mix Asphalt paving. Thicknesses shall be suitable for the Roadway's intended use;
 - F. OPSS 350 for concrete Pavement and Concrete base. Thickness shall be suitable for its intended use;
 - G. OPSS 353 and 312 for Concrete/Asphalt, curb and gutter, and medians, where applicable;
 - H. OPSS 405 for Pipe Subdrains; and,
 - I. OPSS 355 for Interlocking concrete pavers suitable for its intended use.

- (iii) DB Co shall ensure that all the Pavement surfaces in areas drivable by vehicles shall have paved surfaces and comply with all expected performance characteristics for safe use by the public.
 - (iv) DB Co shall design and construct appropriate drainage systems that meet the City's standard when Pavement type is transitioned from interlocking pavers to flexible Pavement.
 - (v) DB Co shall ensure that the grading conform to the requirements of OPSS 206 (Construction Specification for Grading) for work within municipal jurisdictions. The Compaction shall conform to the requirements of OPSS 501 (Construction Specification for Compacting) for work within municipal jurisdictions. Granular Base and Sub-base shall be according to OPSS 314.
- (d) Smoothness and Other Ride Quality
- (i) Following Substantial Completion, the completed Pavements shall meet the smoothness criteria provided in SP 103F31 for hot mix asphalt Pavements.

6.11 Pavement – OR174

- (a) DB Co shall ensure that the design and construction of Pavements be in accordance with the criteria contained in this Article and the following Reference Documents, and if there is any conflict between the criteria contained in this Article and any Reference Document(s), the following shall apply in descending order of precedence for design and construction of Pavements:
 - (i) The criteria contained in this Article;
 - (ii) MTO Special Provisions as identified in this Article;
 - (iii) OPSS;
 - (iv) OPSD;
 - (v) DSM;
 - (vi) Procedures for Estimating Traffic Loads for Pavement Design, 1995, MTO;
 - (vii) MTO Materials Information Report MI-183 "Adaptation and Verification of AASHTO Pavement Design Parameters for Ontario Conditions";
 - (viii) MTO Ontario's Default Parameters for AASHTOware Pavement ME Design Interim Report, 2014;
 - (ix) 1993 AASHTO Guide for the Design of Pavement Structures;

- (x) Canadian Portland Cement Association – Thickness Design for Streets and Highways;
 - (xi) Pavement Design and Rehabilitation Manual – Second Edition (MTO);
 - (xii) Embankment Settlement Criteria for Design, July 2010, MTO;
 - (xiii) MTO Directive PHM-C-001 The Use of Surface Course Types on Provincial Highways;
 - (xiv) Manual for Condition Assessment of Flexible Pavements – Pavement Performance Monitoring using Automated Pavement Distress Data (Nov 2015) (MTO);
 - (xv) The Formulations to Calculate Pavement Condition Indices, September 2009, MTO;
 - (xvi) American Society for Testing and Materials (ASTM) Standards;
 - (xvii) MTO Laboratory Standards; and,
 - (xviii) AASHTO Materials Specifications and Standards.
 - (xix) For the design of rigid concrete or composite Pavements, both MTO's Routine Method as described in the Pavement Design and Rehabilitation Manual and the Canadian Portland Cement Association's Simplified Design Procedure shall be used in addition to the foregoing AASHTO guide for Design of Pavement Structures.
- (b) General Requirements
- (i) DB Co shall ensure that all products used on the Pavement construction meet applicable Project Agreement requirements and, where specified in Schedule 15-2 – Design and Construction Requirements, be in accordance with the MTO Designated Sources of Materials List. The use of products that are not on the MTO Designated Sources of Materials List shall require the prior written approval of the City, in its sole discretion, and acceptance shall be subject to DB Co demonstrating in its submission sufficient experience with the proposed product and acceptable performance for the proposed product under conditions and applications similar to those existing for this Project.
 - (ii) DB Co shall be responsible for the investigation and subsequent design and construction of all Pavements.
 - (iii) The soil boreholes advanced by DB Co shall be in accordance with the requirements of the *Ontario Water Resources Act* (Ontario).

- (iv) DB Co shall be responsible for the design of all proposed slopes in cut and fill areas, including slope geometry, drainage treatments and erosion control measures for embankments and ditches.
- (v) DB Co shall be responsible for effective subsurface drainage and frost protection, including the provision of subdrains or any other drainage treatments.
- (vi) DB Co shall ensure that design of new Pavement structures be in accordance with the “1993 AASHTO Guide for the design of Pavement Structures” and AASHTOWare Pavement ME Design software. The AASHTO 93 method will provide structural Pavement thickness design based on traffic volumes. DB Co shall use the ME Design method to assess the suitability of the chosen AASHTO Design for meeting Pavement performance parameters described elsewhere in this Part 2. DB Co shall select AASHTO Pavement Design parameters as described in the MTO Materials Information Report MI-183 “Adaptation and Verification of AASHTO Pavement Design Parameters for Ontario Conditions”. DB Co shall implement calibrated models for the AASHTOWARE Pavement ME design software or default parameters for any non-calibrated models as described in MTO Ontario’s Default Parameters for AASHTOWare Pavement ME Design Interim Report, 2014. DB Co shall submit the use of alternate design methods and parameters in accordance with Schedule 10 - Review Procedure.
- (vii) Within a segment of OR174, a composite Pavement structure is found. DB Co shall remove the entire width and length of the existing concrete Pavements under all OR174 lanes in the EB and WB lanes, including auxiliary lanes along the following sections and where they are impacted as the result of the Works. DB Co shall not leave any intermediate section of the existing concrete slabs in place, where adjacent sections of concrete slab are removed as the result of the Works.
 - A. In the EB direction, the entire section from 450 m east of Blair Road, through the Montreal Interchange, to the most easterly limits of the existing concrete slabs where it ends in the EB direction.
 - B. In the WB direction, the entire section from a location west of the Montreal Road interchange, where the existing concrete Pavement would become in conflict with the proposed median barrier and / or with any and all Works associated with the Montreal Road Interchange reconstruction all the way to its east end limit, so that:
 - i. Upon the completion of Works, no sections of the existing concrete Pavement shall remain within 1m of the face of the proposed median barrier in any sections.
 - ii. DB Co shall demonstrate that the removal of the remaining sections of composite Pavement within the limits of Works, can be accomplished in the future without any impacts to the concrete median barrier constructed by DB Co.

- (viii) DB Co shall incorporate these changes in the design reports with detailed information about lateral and longitudinal limits, transition treatments, drainage considerations as a minimum and seek approval from the City prior to advancing the design.
 - (ix) If any roads will be opened to traffic prior to completing the surface course paving, DB Co shall ensure that the Pavement design of the unfinished Pavement including, but not limited to, milled Pavement or Pavement without a surface course is designed to carry public and construction traffic and to prevent water penetration until the surface course is placed. For milled pavement surfaces, DB Co shall follow the requirement of Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.
 - (x) DB Co shall ensure that the Pavement surface course is in accordance with MTO's Directive PHM-C-001. This shall be applicable to all flexible Pavements
- (c) Pavement Structures
- (i) DB Co shall not discharge materials containing contaminants and that could have an adverse effect on the natural environment (including air, land or water, and human plant or animal life) into the environment. DB Co shall ensure that granular materials conform to the requirements of Ontario Provincial Standards Specifications OPSS.PROV 1010 and Special Provision SP110S13.
 - (ii) DB Co shall ensure that all Flexible Pavements on the highway through lanes and interchanges incorporate a minimum compacted thickness of 100 mm OGD L layer immediately under the hot mix. This requirement shall be applicable to the widening portion of OR174 where the existing Pavement includes an OGD L layer.
 - (iii) DB Co shall ensure that Asphaltic concrete conform to the requirements of OPSS.PROV 1151 – Material Specification for Superpave and Stone Mastic Asphalt Mixtures.
 - (iv) DB Co shall ensure that Grading and compaction conform to the requirements of OPSS.PROV 206 – Construction Specification for Grading, and OPSS 501 – Construction Specification for Compacting. Granular base and subbase shall be according to OPSS 314.
 - (v) DB Co shall design and construct drainage of the Pavement structure in accordance with the OPSD 300 series.
 - (vi) DB Co shall use subdrains whenever an OGD L is used. DB Co shall ensure that subdrains are provided in accordance with OPSS 405
- (d) Smoothness and Other Ride Quality

- (i) Following Substantial Completion, DB Co shall ensure that the completed Pavements meet the smoothness criteria provided in SP 103F31 for hot mix asphalt Pavements.
- (e) Traffic Volume for Pavement Design
 - (i) DB Co shall design all Pavements based on traffic data provided by the City. DB Co shall be responsible for developing forecasted traffic volumes for Pavement design. DB Co shall submit all forecasted data and supporting methodology to the City for Review in accordance with Schedule 10 - Review Procedure.

6.12 Grading

- (a) DB Co shall design and construct all earthworks and grading requirements so that all such work conforms to the relevant City Standards and Specifications, or in absence of such standards to the following:
 - (i) OPSS 206 - Earth and Rock Excavation;
 - (ii) OPSS 212 – Borrow;
 - (iii) OPSS 501 - Compacting;
 - (iv) OPSS 511 - Rip-Rap, Rock Protection and Gravel Sheeting;
 - (v) OPSS 570 – Topsoil;
 - (vi) OPSS 572 - Seeding and Mulching;
 - (vii) OPSS 803 – Sodding.
- (b) DB Co shall meet the requirements of Schedule 15-2, Part 1, Article 5 – Implementation Constraints, in the design and construction of all earthworks and rock excavations.
- (c) Grading includes excavation of native material and fill of approved materials as required for construction in accordance with the recommendations resulting from Pavement design reports.
- (d) DB Co shall manage all excess and imported material per the requirements described in Schedule 17, Part 4 – Contaminated and Excavated Material Management.
- (e) DB Co shall maintain positive drainage during construction on all areas subject to grading at all times. DB Co shall treat any cut or fill slopes, left unattended for 30 calendar days or more, with temporary hydraulic mulch, erosion control blankets or vegetative cover.
- (f) DB Co shall minimize and control the amount of dust generated by construction operations at all times within and outside the construction zone. DB Co shall remove any

mud, debris and dust deposited outside of the construction zone, on Roadways and in boulevards, resulting from the Works.

- (g) DB Co shall provide the design, approvals, and supply of materials, labour, equipment, inspection and testing associated with application of dust suppressants in accordance with the City of Ottawa Standards and Specifications and OPSS 506.
- (h) Rip Rap Protection and Gravel Sheeting
 - (i) DB Co shall provide the design, approvals, and supply of materials, labour, equipment, inspection and testing associated with rip-rap and rock protection in accordance with the City of Ottawa Standards and Specifications and OPSS 511.
- (i) Dewatering
 - (i) DB Co shall provide the design, approvals (permits to take water, where required), supply of materials, labour, equipment, inspection and testing associated with all the dewatering Works.
- (j) Temporary Measures
 - (i) DB Co shall adjust all roadway infrastructure, including but not limited to catch basins, maintenance holes, valve chambers, and any other structures in the Roadway, flush with the base asphalt lift in order to provide snowplow protection in areas where the final lift of asphalt is not paved in advance of winter shutdown. DB Co shall design and construct temporary asphalt curbs to contain Roadway drainage at the proposed curb line of catch basins and maintenance holes. DB Co shall remove and make final adjustments immediately before the placement of surface course asphalt.
 - (ii) DB Co shall restore all trenches to match the existing original conditions or the new construction cross-section within 24 hours of the completion of the trench. In situations where the trench is Constructed in consecutive stages with a delay in between, DB Co shall restore the trench in stages within 24 hours after the completion of each stage.
 - (iii) DB Co shall provide temporary conditions design drawings to specify all temporary measures and are responsible for all costs associated with the above noted work.

6.13 Drainage

- (a) DB Co shall provide the drainage in accordance with the criteria contained in this Article and in Article 5 – Drainage and Stormwater Management Design Criteria of this Part 2, and the applicable Reference Documents.

6.14 Traffic and Transit Signals

(a) General

- (i) DB Co shall liaise and coordinate with the City and the City's designated traffic control signal contact person, with regards to all modifications that may be required at municipal traffic signals during the design and construction period. DB Co shall support all proposed modifications with traffic engineering analysis to meet the City's traffic signal requirements and standards.
- (ii) DB Co shall define the coordination scheme, and coordinate all work with the City for municipal traffic signals that are included in the traffic signal coordination scheme.
- (iii) DB Co shall reference the information provided in Schedule 15-2, Part 7, Clause 1.11, and coordinate with the City of Ottawa to identify and confirm the location of all existing and new traffic cameras, ITS devices, and all associated infrastructure 60 calendar days in advance of the design stage. DB Co shall require the approval of the City of Ottawa's traffic service group for all relocations, design and construction requirements, and types and specifications of such facilities that are impacted or required as the result of Works.

(b) Design and Performance Requirements

- (i) DB Co shall coordinate the design, approvals and construction requirements for temporary and permanent traffic signals with the City.
- (ii) For temporary and permanent traffic signals that are within MTO's jurisdiction, DB Co shall prepare PHM-125 drawings, and shall coordinate review and approval by MTO prior to commencing construction.
- (iii) For permanent new traffic and transit signal facilities, or new permanent configurations at existing signalized intersections, with the exception of PXOs, the City shall supply and install all above ground traffic signal equipment as required by the governing road authority including but not limited to controller, poles, pedestrian and traffic signal heads with push buttons, audible displays, etc. The City shall supply, install and make all required terminations for the traffic signal wiring. The City shall provide all equipment and labour associated with the installation of permanent above-ground traffic signal infrastructure. DB Co shall coordinate with the City the design of electrical power feeds for all alterations to existing traffic signals, and new traffic signals; the cost of obtaining new electrical power feeds shall be a City responsibility.
 - A. For all permanent signalized intersections, the City shall design the vehicle detection system and specify the type of detection equipment to be used. DB Co shall only be responsible for the cost and coordination of the

- installation of inductive loop detectors; any other detection equipment specified by the City's design shall be supplied and installed by the City
- B. DB Co shall construct all permanent underground traffic infrastructure, including the supply and construction of concrete encased ducts, direct buried ducts, pole foundations, maintenance holes, maintenance hole frames & covers, vehicle loop detection and concrete pads.
 - C. Where the location selected for a traffic signal pole is not suitable for a standard pole foundation, as per City of Ottawa Standard Detail Drawings (e.g., where the pole is designed to go on top of pre-existing utilities), DB Co shall be responsible for the design of the non-standard foundation, in addition to the construction requirement in B above.
- (iv) For all temporary traffic and transit signals, or temporary modifications to existing signalized intersections, the City shall supply and install all above ground traffic signal equipment as required by the governing road authority including but not limited to controller, poles (with the exception of wood poles), pedestrian and traffic signal heads with push buttons, audible signals, etc. The City shall also supply and install and make all required terminations for the traffic signal wiring. The City shall provide all equipment and labour associated with the installation of temporary above-ground traffic signal infrastructure. DB Co shall coordinate with the City the design of electrical power feeds for all temporary traffic signals or temporary modifications to existing signalized intersections; the cost of obtaining new electrical power feeds shall be a City responsibility.
- A. For all temporary signalized intersections, the City shall design the vehicle detection system and specify the type of detection equipment to be used. DB Co shall only be responsible for the cost and coordination of the installation of inductive loop detectors; any other detection equipment specified by the City's design shall be supplied and installed by the City.
 - B. Where temporary signal infrastructure requires the use of wood poles and/or span wire, the City shall be responsible for the design of signal head placement only. DB Co shall design the location of the wood poles, guy wires, and span wires based on the City's signal head placement.
 - C. DB Co shall construct all temporary underground traffic infrastructure, including the supply and construction of concrete encase ducts, direct buried ducts, pole foundations, maintenance holes, maintenance hole frames & covers, vehicle loop detection and concrete pads. DB Co shall construct all above ground infrastructure Work, including but not limited to installation, removals and reinstatement of wood poles, all aerial strand support and suspension cables, guys, anchors, ground rods and plates, along with any required underground Civil Work including conduit, foundations, maintenance holes/hand holes, frames & covers etc., as required to accommodate the staged construction of Work, with the

exception of traffic signal equipment as described above, which shall remain the responsibility of the City.

- (v) For all PXOs, DB Co shall supply and install all above ground equipment, including but not limited to poles, hardware, arms, RRFBs, etc. DB Co shall provide the labour associated with the installation of the PXOs.

A. The design and installation of PXOs shall be in accordance with OTM Book 15, City of Ottawa Pedestrian Crossover Program and Examples Documents 1 and 2, and Appendix K – Pedestrian Crossover Infrastructure Requirements of this Part 2.

- (vi) For all temporary and permanent traffic signals, DB Co shall provide interconnection ensuring that all signals can communicate with the City's Traffic Operations Center. Interconnection duct shall be designed by the City and installed by DB Co. The City will consider City-owned system-connectivity infrastructure prior to private-owned infrastructure to establish this connectivity.

(c) Notification Requirements and Timelines

Table 6-1: Permanent/temporary new traffic signals or permanent/temporary modification to existing traffic signals

| Item | Description | Notification (Calendar Days) | Prior to | Information to be supplied to City | Information to be supplied to DB Co |
|------|--|------------------------------------|---|--|---|
| 1 | Design | 30 | Desired receipt of signal design | 1:250 CADD for the intersection, including pavement markings on all approaches | City provides traffic signal design, including traffic signal displays, traffic signal plant design, detection system design, etc., within 30 calendar days |
| 2 | Commencement of civil works (prerequisite – signal design | 30 | construction of civil works | Date when works are to begin, schedule of work | None |

| | | | | | |
|---|--|----|------------------------------------|---|--|
| | completed) | | | | |
| 3 | Electrical work involving the City (prerequisite – signal design completed) | 30 | construction of civil works | Meeting date regarding electrical works, schedule of work | Contact names and telephone numbers of relevant staff |
| 4 | Scheduling of installation date by City forces (prerequisite – signal design completed) | 30 | Desired signal installation date | Desired installation date by City forces | Scheduled date for installation to be provided to DB Co within eight calendar days of the notification. Scheduled date shall be within 10 calendar days of DB Co's request |
| 5 | City Inspection of civil work completed by DB Co (pre-requisite – signal installation date scheduled) | 14 | Scheduled signal installation date | Confirmation of work being completed | Confirmation that the work was completed to City satisfaction, within 7 calendar days of DB Co's notification that work was completed |

- (i) DB Co shall provide 30 calendar days' notice to the City where modification of an approach to a signalized intersection beyond OTM Book 7 applications is being proposed. DB Co shall submit 1:250 scale CADD drawings for all such modifications, as required.

- (ii) DB Co shall prepare and submit TCPs, which show the signal design for the installation of, or modification of a traffic control signal, in accordance with Schedule 10 – Review Procedure. DB Co shall submit these particular TCP at least 45 calendar days before the start of any construction Work related to the installation or modification. Note however, that in the case of multiple simultaneous traffic control signal installations or modifications, the City may require more than 45 calendar days for submission review. DB Co shall meet with the City at least 60 calendar days in advance of these types of scheduled Works in order to discuss the submission schedule, and DB Co shall adjust the submission lead time to a timeframe acceptable to the City.
- (iii) DB Co shall address the City’s comments and changes on signs and Pavement marking plans developed as a part of DB Co’s TCPs and incorporate the revised plans as applicable. DB Co shall submit the revised drawings to the City at least 30 calendar days prior to the scheduled placement of said signs and Pavement markings, all in accordance with Clause 6.15 of this Part 2 and Schedule 10 – Review Procedure.
- (iv) Per Item 2 from Table 6-1, DB Co shall provide a minimum of 30 calendar days advanced notice to the City prior to commencing the following works:
 - A. Permanent Traffic Signals: Underground construction of the permanent traffic signals including concrete encased ducts, direct buried ducts, pole foundations, maintenance holes, vehicle loop detection and concrete pads;
 - B. Temporary Traffic Signals: Installation of the temporary traffic signal controller cabinet onto the wood pole; wood poles, double span and anchors along with any required Civil Works including conduit, foundations, maintenance holes/hand holes, etc.
- (v) Per item 3 from Table 6-1, a minimum of 30 calendar days prior to construction, DB Co shall arrange a meeting with the City to coordinate the requirements of the electrical work involving the City. DB Co shall provide a schedule of the work to the City.
- (vi) In accordance with the scheduled installation date established per Item 4 from Table 6-1, City forces shall perform all traffic signal activations and deactivations in accordance with OPSS 106.
- (vii) Per Item 5 from Table 6-1, at least 14 calendar days prior to the date scheduled for the City to install the traffic signal equipment, DB Co shall have completed their portion of the Work for permanent and/ or temporary traffic signals modification/installation, and have provided the City with notice that the DB Co Work is complete.

6.15 Pavement Marking and Signing

(a) General

- (i) DB Co shall provide the design drawings and obtain approvals from the City for all permanent and temporary Pavement marking and Roadway signs.
- (ii) DB Co shall provide the design drawings and obtain approvals from the City for all permanent and temporary Pavement marking and signage at the locations of bus Transitway and facilities operated by OC Transpo.
- (iii) Unless specified otherwise in this Article, DB Co shall provide all signing and Pavement markings in accordance with the criteria contained in this Article, the requirements of OPSS, and the applicable Reference Documents.
- (iv) DB Co shall refer to Schedule 15-2, Part 9, Part B, Article 8 for all Pavement marking and signage requirements within MTO jurisdictions.

(b) Design and Performance Requirements

- (i) DB Co shall design, obtain approvals, and comply with construction requirements for permanent Pavement markings as per the City of Ottawa's standards and specifications and applicable OPSS.
- (ii) DB Co shall provide for the supply of materials, labour, equipment, inspection and testing associated with the requirements for all temporary Pavement markings during construction.
- (iii) The City shall supply all labour, equipment and materials for the supply and installation of all permanent Pavement markings between April 16 and November 14. DB Co shall supply all labour, equipment and materials for the supply and installation of permanent Pavement markings between November 15 and April 15.
- (iv) DB Co shall supply all labour, equipment, materials, inspection and testing associated with the requirements for all temporary and permanent non-regulatory signing.
- (v) The City shall supply all labour, equipment and materials for the supply and installation of all temporary and permanent regulatory signing requirements.
- (vi) DB Co shall ensure the Pavement surface is prepared, clean and free of debris.
- (vii) DB Co shall complete final grading prior to installation of all permanent and temporary signs. DB Co shall also be responsible for the reinstatement of all areas disturbed during the installation of new or relocated signs.

- (viii) DB Co shall provide a minimum of 10 Business Days advanced notice to the City for the installation of the permanent Pavement markings and regulatory signing to be completed by the City as illustrated on DB Co's construction documents.
- (ix) DB Co shall make all submissions in relation to the requirements of this section in accordance with Schedule 10 – Review Procedure.
 - A. DB Co shall submit Pavement markings and signage CADD drawings formatted in Microstation V.8i at a scale of 1:500.
- (x) DB Co shall obtain the library of symbols from the City prior to commencing any work.
- (xi) DB Co shall contact the appropriate municipal and/ or provincial road authorities to confirm, in writing, the official municipal road names as well as Civic Address Signs (911 Identification Numbers and signing) requirements and incorporate such signs in the permanent and temporary Pavement and signing design drawings. DB Co shall indicate the location, size and type of each sign on the TCPs. DB Co shall ensure that the above noted signs are in place and visible at all times. If the placement of the signs conflict with DB Co's construction, DB Co may temporarily relocate the signs, provided the sign will remain unobstructed and within the affected property limits for the duration of the Project. DB Co shall replace any damaged signs immediately.
- (xii) DB Co shall prepare and submit a permanent signing plan and a permanent signing table a minimum of 30 calendar days prior to the implementation of the plan. The permanent signing table shall include, but not be limited to information detailing sign location (station of final location, removal location and on which side of the road to be installed in relation to the direction of travel), height to bottom of sign, lateral offset to post, support type with dimensions, alpha-numeric sign code with dimensions and the message/description, etc.
- (xiii) DB Co shall prepare sign details for the following types of ground-mounted guide Signs: Roadway identification, direction & destination, and location identification. DB Co shall design and provide all overhead sign structures, ground-mounted sign break-away steel supports and associated sign footings.

6.16 Street Lighting

- (a) General
 - (i) For all the temporary and permanent street lighting, DB Co shall design, obtain approvals, and supply of materials, labour, equipment, build, provide inspection and testing associated with the City's requirements for Street lighting standards and best practices.
- (b) Design and Performance Requirements

- (i) DB Co shall design and construct all permanent and temporary street lighting including power feeds. Street lighting shall meet the requirements of the City of Ottawa Right of Way Lighting Policy. DB Co shall prepare and submit the lighting design together with the lighting calculation summary in accordance with Schedule 10 – Review Procedure.
 - A. For the design and construction of luminaires, DB Co shall supply and install the appropriate [REDACTED] dimming and monitoring nodes. All other equipment, including but not limited to software, programming, configuration and licensing, required to make the supplied luminaires fully operational and integrated into the existing street lighting system shall be the responsibility of the City. DB Co shall be responsible for the supply and installation of all new utility poles.
- (ii) DB Co shall illuminate cycle lanes based on the required Roadway lighting levels stipulated in the City of Ottawa Right of Way Lighting Policy. Any illumination requirements are governed by the strategy for Roadway lighting.
- (iii) All activities related to Roadway lighting systems (i.e. design, construction) shall meet the Conditions of Service set out by the local Electrical Supply Authorities, the ESA, and any other entity having jurisdiction.
- (iv) The installation of luminaires shall utilize existing above ground utility poles located within public ROW where appropriate. DB Co shall coordinate the use of these joint use [REDACTED]/street light poles with the local Electrical Supply Authority and shall satisfy the requirements of Ontario Regulation 22/04 Electrical Distribution Safety (Electricity Act 1998) for third party equipment mounted on [REDACTED] utility poles. DB Co shall be responsible to cover any costs associated with the use of existing above ground utility poles.
- (v) DB Co shall coordinate with the City the design of electrical power feeds for all alterations to existing street lighting, temporary lighting and new street lighting; the cost of obtaining new electrical power feeds shall be a City responsibility.
- (vi) The City shall perform all work impacting existing City owned street lighting within the contract limits, including pole removal (concrete foundations to be removed by the DB Co), wiring, luminaire replacement and aerial cables. DB Co shall coordinate its work with the City.
- (vii) DB Co shall provide a minimum of 15 Business Days advanced notice to the City for the installation of temporary Roadway illumination and removal of existing Roadway illumination.
- (viii) DB Co shall arrange a meeting with the City, a minimum of 10 Business Days prior to construction, to coordinate the requirements of the electrical work involving the City. DB Co shall provide a schedule of its proposed work to the City in this meeting.

- (ix) Lighting shall not contain an upward component and minimize light trespass and disability glare for drivers.
 - (x) DB Co shall design and construct all Roadway luminaries to be LED and meet the full cut-off type and specifications.
 - (xi) All permanent Roadway lighting levels shall meet the appropriate standard for the Roadway classification.
- (c) Refer to Article 10 – OR174 Street Lighting, of this Part 2 for requirements for street lighting on OR174.

6.17 Passenger Pick Up and Drop Off Facilities

- (a) DB Co shall design and construct PPUDO facilities for the location and number of PPUDO spaces specified in Schedule 15-2, Part 4, Appendix A. DB Co shall obtain approval from the City for the location of all PPUDO locations prior to advancing any Roadway designs.
- (b) DB Co shall satisfy the requirements of OC Transpo's Transitway and Station Design Guidelines, including City of Ottawa By-laws and reference material included in Clause 6.1 of this Part 2.
- (c) The following general requirements shall apply to all PPUDO facilities:
 - (i) DB Co shall limit the location of curbside PPUDO facilities to tangent Roadway segments, offset from adjacent intersections and accesses as per the City of Ottawa By-law 2003-530.
 - (ii) DB Co shall satisfy the upper limit of all geometric dimensions for the design of PPUDO facilities including, but not limited to, parking space dimensions and aisle widths as per the City of Ottawa By-law 2008-250.
 - (iii) DB Co shall ensure the locations and design of PPUDO facilities will avoid conflicts with cycling facilities, bike racks, bus access and egress and operations, and Station operations.
 - (iv) PPUDO facilities shall include a fully accessible, direct, and barrier-free pedestrian access from / to all bus stops and Station access and egress. Each PPUDO facility shall include provisions for boarding and alighting from an accessible parking space as per the accessibility requirements and best practices specified under sections 3.1 and 3.2 of COADS.
 - (v) DB Co shall design and construct PPUDO facilities physically separated from fare paid zones.
 - (vi) DB Co shall ensure all curbside recessed PPUDO stalls can accommodate the safe entry and exit manoeuvres with the use of curb transitions as per the City of

Ottawa Standard Detail Drawing R8 – Typical Intersection Narrowing (Single)
and/or R9 – Typical Mid-Block Narrowing.

6.18 Road Safety Audits and Road Design Safety Reviews

(a) Order of Precedence

- (i) DB Co shall have independent Road Safety Audits and Road Design Safety Reviews completed in accordance with the criteria set out in this Article and the following reference documents. If there is any conflict between the criteria contained in this Article and any of the reference documents, the following shall apply, in descending order of precedence:
 - A. The criteria contained in this Article;
 - B. TAC, Geometric Design Guide for Canadian Roads;
 - C. TAC, The Canadian Road Safety Audit Guide;
 - D. MTO, Roadside Safety Manual;
 - E. MTO, Ontario Traffic Manual Books 1 through 18;
 - F. AASHTO, Roadside Design Guide.
- (ii) DB Co shall perform the necessary Road Safety Audits and Road Design Safety Reviews in the context of the traditional Road Safety Audit processes but shall expand the processes in order to include human factors, the review of drawings and plans (Reviews).

(b) General Requirements

- (i) Road Safety Audits shall include the Road Safety Audit processes as identified in The Canadian Road Safety Audit Guide, and shall for clarity, include human factors considerations.
- (ii) DB Co shall provide to the City of Ottawa with the Road Safety (Review and) Audit team's individuals' qualifications, experience, and knowledge, and letters of reference from the relevant governmental authorities where prior audits were performed, 60 calendar days in advance of any safety review or audit work. DB Co shall receive the City's approval for the proposed Safety Audit team in accordance with the requirements of the Review Procedure specified in Clause 6.18 of this Part 2 and prior to any safety review or audit work being initiated.
- (iii) The Road Safety Audits and Road Design Safety Reviews team's individuals shall not be an employee of any of the companies on DB Co's design and construction team, other than being paid for services rendered to DB Co in their capacity as Road Safety Auditor. The auditing team shall remain fully

independent and at arm's length from any company participating on DB Co's team.

- (iv) All DB Co's Road Safety Audits and Road Design Safety Reviews shall include a human factors expert experienced in road and highway design and construction, who shall provide input and review of the safety and operation of the work from a human factors perspective.
 - (v) DB Co shall immediately correct any "as constructed" element that does not conform to the design, does not meet the required safety standards, or deemed not to meet a reasonable level of safety by the Road Safety Auditor. DB Co shall prepare the corrective measures and rectification recommendations noted above and shall ensure a licensed Professional Engineer stamps and seals the appropriate recommendations for the review and acceptance by the Road Safety Audits and Road Design Safety Reviews team and to the City of Ottawa.
 - (vi) DB Co shall assume responsibility for any existing or proposed site conditions found not to meet a reasonable level of safety, and shall rectify the condition immediately, or otherwise construct temporary works to address the safety concern until repairs are made.
- (c) Road Safety Audits and Road Design Safety Reviews Team
- (i) The Road Safety Audits and Road Design Safety Reviews individual and supporting team is more generally referred in this context as the Road Safety Auditor.
 - (ii) DB Co's Road Safety Audits and Road Design Safety Reviews team shall consist of a team of auditors, with a minimum of three qualified personnel, who are independent of the DB Co's design and construction team, and shall meet the following minimum criteria:
 - A. Be Professional Engineers trained in the area of road and public safety, with over 20 years of engineering experience and demonstrated experience or resume working in the area of public safety and undertaking formal Road Safety (Review and) Audits, with references from government agency;
 - B. Demonstrated experience in undertaking formal safety reviews and experience with The Canadian Road Safety Audit Guide, and Canadian and Ontario roadside safety standards;
 - C. Demonstrated experience in road safety analysis, traffic engineering, geometric design, and demonstrated expertise with human factors in design and safety reviews and audits;
