Schedule 36 - System Extension _____	1927
Schedule 37 - Intentionally Deleted _____	1963
Schedule 38 - Intentionally Deleted _____	1964
Schedule 39 - Revenue Vehicle Supply Contract _____	1965
Schedule 40 - Utility Baseline Report _____	1966
Schedule 41 - Lenders Direct Agreement _____	1967
TLPA _____	1989

**PROJECT AGREEMENT  
(EXECUTION VERSION)**

**TRILLIUM LINE EXTENSION  
OTTAWA STAGE 2 LRT PROJECT**

**TABLE OF CONTENTS**

1.	DEFINITIONS AND INTERPRETATION .....	2
1.1	Definitions and Interpretation .....	2
1.2	Conflict of Terms .....	4
1.3	Conflict of Documents .....	5
1.4	Legal Requirements.....	5
2.	COMMERCIAL CLOSE AND FINANCIAL CLOSE .....	6
2.1	Effective Date.....	6
2.2	Letter of Credit.....	6
2.3	Financial Close.....	7
2.4	Disruption in Financial Markets.....	8
3.	SCOPE OF AGREEMENT .....	8
3.1	Scope of Agreement .....	8
4.	BUSINESS OPPORTUNITIES, ADVERTISING AND PUBLIC EVENTS.....	9
4.1	Business Opportunities.....	9
5.	REPRESENTATIONS AND WARRANTIES.....	10
5.1	Project Co Representations and Warranties .....	10
5.2	Representations and Warranties of the City .....	12
6.	BACKGROUND INFORMATION .....	14
6.1	No Liability .....	14
6.2	No Warranty .....	14
6.3	No Claims.....	14
6.4	Technical Reports.....	15
7.	PROJECT DOCUMENTS.....	15
7.1	Project Documents .....	15
7.2	Ancillary Documents.....	15
7.3	Changes to Lending Agreements and Refinancing .....	16
7.4	Compliance with Lending Agreements.....	16
8.	CITY RESPONSIBILITIES .....	17
8.1	General .....	17
8.2	City Permits, Licences, Approvals and Authorizations.....	17
9.	PROJECT CO RESPONSIBILITIES .....	18
9.1	Other Business.....	18
9.2	General .....	19
9.3	Project Co Parties .....	20
9.4	Project Co Permits, Licences, Approvals and Authorizations.....	20
9.5	Safety and Security.....	24
9.6	Health and Safety Certification .....	26
9.7	Protest and Trespass .....	29

9.8	Additional Works and Third Party Works.....	30
9.9	Adjacent Developments .....	33
9.10	System Extension .....	34
9.11	Revenue Vehicle Supply Contract.....	34
10.	REPRESENTATIVES .....	35
10.1	The City Representative .....	36
10.2	The Project Co Representative .....	36
10.3	Communications to Representatives .....	37
10.4	Key Individuals .....	37
11.	WORKS COMMITTEE .....	38
11.1	Establishment .....	38
11.2	Function and Role .....	39
11.3	Term of Works Committee.....	40
11.4	Replacement of Committee Members.....	40
11.5	Procedures and Practices .....	40
11.6	Proceeding At Risk.....	41
12.	MAINTENANCE COMMITTEE .....	43
12.1	Establishment .....	43
12.2	Function and Role .....	43
12.3	Replacement of Committee Members.....	44
12.4	Procedures and Practices .....	44
13.	INTEGRATED MANAGEMENT SYSTEM.....	45
14.	ACCESS TO THE LANDS .....	47
14.1	Access to Lands.....	47
14.2	Non-exclusive License to Lands / Development of Lands.....	49
14.3	Naming and Signage .....	49
14.4	No Interest in Land, Facilities or Infrastructure .....	50
14.5	Non-Disturbance Agreement.....	50
14.6	Adjustments to Lands Available to Project Co .....	50
15.	ENCUMBRANCES.....	51
15.1	Project Co Shall Perform Obligations Under Encumbrances.....	51
15.2	No Encumbrances.....	51
15.3	Construction Lien Act (Ontario) .....	53
16.	SITE CONDITION.....	54
16.1	Acceptance of Site Condition.....	54
16.2	Contamination .....	56
16.3	Items of Geological, Historical Heritage or Archaeological Interest or Value .....	57
16.4	Species-at-Risk.....	59
16.5	Defects – Existing Vehicle Fleet.....	59

Schedule 35	- Intellectual Property
Schedule 36	- System Extension
Schedule 37	- <b>[Intentionally Deleted]</b>
Schedule 38	- <b>[Intentionally Deleted]</b>
Schedule 39	- Revenue Vehicle Supply Contract
Schedule 40	- Utility Baseline Report
Schedule 41	- Lenders' Direct Agreement

THIS PROJECT AGREEMENT is made as of the 28<sup>th</sup> day of March, 2019

BETWEEN:

**CITY OF OTTAWA**

**(the “City”)**

**AND:**

**TRANSITNEXT GENERAL PARTNERSHIP**

**(“Project Co”)**

**WHEREAS:**

- A. The City wishes to develop a new light rapid transit system which includes the following elements:
- (a) Expanding the Existing Trillium Line with approximately 11.5 km of new single track (with passing sidings) from the existing terminus at Greenboro Station to the proposed new Limebank Station, the majority of which follows the existing City-owned (former CPR) railway corridor;
  - (b) An additional extension of the Existing Trillium Line by way of a 4.5 km-long Airport Link to the Airport that will connect to the mainline at the proposed South Keys Station;
  - (c) Extension of passing sidings within the Existing Trillium Line (at the Gladstone, Brookfield and Carleton locations) to enhance operational reliability;
  - (d) Extension of the five (5) existing station platforms (at the Bayview, Carling, Mooney’s Bay, Carleton and Greenboro locations) to accommodate longer train consists;
  - (e) Addition of new stations at Gladstone and Walkley;
  - (f) Addition of proposed stations on the Trillium Line Extension at the South Keys, Leitrim, Bowesville and Limebank locations;
  - (g) Proposed Stations on the Trillium Line Extension for the proposed connection to the Ottawa MacDonald-Cartier International Airport at the Uplands and Airport Terminal locations;
  - (h) Upgrade of existing bridge structures on the Existing Trillium Line and upgrade of the existing Dow’s Lake tunnel structure and mechanical ventilation system;
  - (i) Expansion of the pedestrian underpasses at Carleton University, new underpass north of Hunt Club Rd and new underpass under the South Keys Station;
  - (j) Construction of rail, pedestrian or other overpass structures at Bayview Station, over the Rideau River, Ellwood Diamond, Hunt Club Road, Lester Road, Leitrim Road, Earl

Armstrong Road, Bowesville Road, Mosquito Creek, Limebank Road, Airport Parkway and Uplands Drive, and ecological overpass (at High Road);

- (k) Construction of the New Walkley Yard to be constructed west of Albion Road, across the street from the Existing Walkley Yard;
  - (l) Improved connectivity for pedestrians and cyclists parallel to the Existing Trillium and Trillium Line Extension and in the vicinity of stations, including construction of a new multi-use path (MUP) system;
  - (m) Extension of and upgrades to the Communications Systems and Signalling and Train Control Systems; and
  - (n) Provisions of a New Vehicle Fleet.
- B. Project Co will provide the Project Operations, which Project Operations include the elements set out in Recital A and (i) the design, construction, financing, maintenance and rehabilitation of the System Infrastructure and the New Municipal Infrastructure, (ii) the procurement, financing, maintenance and rehabilitation of the New Vehicle Fleet, and, (iii) the maintenance and rehabilitation of the Existing Vehicle Fleet (the “**Project**”).
- C. The City and Project Co wish to enter into this project agreement (the “**Project Agreement**”), which sets out the terms and conditions upon which Project Co shall perform the Project Operations.
- D. With a view to ensuring that the Parties are able to properly and effectively discharge their respective duties, functions, and responsibilities under Applicable Law, it is the intent that the City and Project Co work collaboratively, responsibly and cooperatively throughout the Project Term.

**NOW THEREFORE** in consideration of the mutual covenants and agreements of the Parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties covenant and agree as follows:

## **1. DEFINITIONS AND INTERPRETATION**

### **1.1 Definitions and Interpretation**

- (a) This Project Agreement shall be interpreted in accordance with Schedule 1 – Definitions and Interpretation.
- (b) This Project Agreement is comprised of this executed agreement and the following documents, all of which are hereby incorporated by reference into and form part of this Project Agreement.

Schedule No.		Description
Schedule 1	-	Definitions and Interpretation
Schedule 2	-	Completion Documents
Schedule 3	-	Custody Agreement
Schedule 4	-	Funding Requirements
Schedule 5	-	Direct Agreements

Schedule 6	-	Independent Certifier Agreement
Schedule 7	-	Mobility Matters
Schedule 8	-	<b>[Intentionally Deleted]</b>
Schedule 9	-	Key Individuals
Schedule 10	-	Review Procedure
Schedule 11	-	Integrated Management System Requirements
Schedule 12	-	Works Scheduling Requirements
Schedule 13	-	Project Co Proposal Extracts
Schedule 14	-	Testing and Commissioning
Schedule 15	-	Output Specifications
Schedule 15-1	-	Technical Terms and Reference Documents
Schedule 15-2	-	Design and Construction Requirements
Schedule 15-3	-	Maintenance and Rehabilitation Requirements
Schedule 16	-	Encumbrances
Schedule 17	-	Environmental Obligations
Schedule 18	-	Communications and Stakeholder Engagement Obligations
Schedule 19	-	Payment Mechanism
Schedule 20	-	Construction Period Payments
Schedule 21	-	Variation Procedure
Schedule 22	-	Compensation on Termination
Schedule 23	-	Expiry Transition Procedure
Schedule 24	-	Insurance and Performance Security Requirements
Schedule 25	-	Record Provisions
Schedule 26	-	Dispute Resolution Procedure
Schedule 27	-	Refinancing
Schedule 28	-	Insurance Trust Agreement
Schedule 29	-	Project Co Information
Schedule 30	-	<b>[REDACTED]</b>
Schedule 31	-	Works Report Requirements
Schedule 32	-	City Permits, Licences, Approvals and Authorizations
Schedule 33	-	Lands
Schedule 34	-	<b>[Intentionally Deleted]</b>
Schedule 35	-	Intellectual Property
Schedule 36	-	System Extension
Schedule 37	-	<b>[Intentionally Deleted]</b>
Schedule 38	-	<b>[Intentionally Deleted]</b>
Schedule 39	-	Revenue Vehicle Supply Contract
Schedule 40	-	Utility Baseline Report
Schedule 41	-	Lenders' Direct Agreement

- (c) The documents comprising this Project Agreement are complementary and what is called for by any one of them shall be interpreted as if called for by all, except in the event of ambiguities, conflicts or inconsistencies, in which case Section 1.2 shall apply.
- (d) Except for those parts of Project Co's proposal which are incorporated by explicit reference into this Project Agreement by the Project Co Proposal Extracts, on Financial Close, the Request for Proposals and Project Co's proposal shall be superseded entirely by this Project Agreement and

rendered null and void, and shall not be relied upon or used by Project Co, the City or anyone else (including anyone pursuant to Schedule 26 - Dispute Resolution Procedure or any arbitral body or any court) in any way to interpret or qualify the scope of the Project Operations, any obligations or liabilities of Project Co, or anything else contained in this Project Agreement.

- (e) Unless it is specifically provided that a consent, approval or satisfaction is in the sole discretion of the City, no consent, approval, opinion or satisfaction of the City or the City Representative shall be unreasonably withheld or delayed.
- (f) Unless it is specifically provided that a consent, approval or satisfaction is in the sole discretion of Project Co, no consent, approval, opinion or satisfaction of Project Co or the Project Co Representative shall be unreasonably withheld or delayed.
- (g) The organization of the Output Specifications into divisions, sections and parts shall not control Project Co in dividing the Works or the Maintenance and Rehabilitation Services among the Project Co Parties or in establishing the extent of the Works or the Maintenance and Rehabilitation Services to be performed by a trade.

## **1.2 Conflict of Terms**

- (a) In the event of ambiguities, conflicts or inconsistencies between or among any of the provisions of this Project Agreement, the provisions shall govern in the following order of precedence with each taking precedence over those listed subsequently:
  - (i) the provisions of amendments in writing to this Project Agreement signed by the Parties and Variation Confirmations shall govern and take precedence only over those specific provisions of this Project Agreement expressly amended thereby;
  - (ii) any provision establishing a higher standard of safety, reliability, durability, performance or service shall take precedence over a provision establishing a lower standard of safety, reliability, durability, performance or service;
  - (iii) the body of this Project Agreement;
  - (iv) Schedule 1 - Definitions and Interpretation;
  - (v) Schedule 32 - City Permits, Licences, Approvals and Authorizations;
  - (vi) Schedule 33 - Lands;
  - (vii) Schedule 26 - Dispute Resolution Procedure;
  - (viii) Schedule 20 - Construction Period Payments;
  - (ix) Schedule 19 - Payment Mechanism;
  - (x) Schedule 15 - Output Specifications;
  - (xi) Schedule 17 - Environmental Obligations;

- (xii) Schedule 24 - Insurance and Performance Security Requirements;
  - (xiii) Schedule 21 - Variation Procedure;
  - (xiv) Schedule 10 - Review Procedure;
  - (xv) Schedule 14 - Testing and Commissioning;
  - (xvi) Schedule 11 - Integrated Management System Requirements
  - (xvii) Schedule 27 - Refinancing;
  - (xviii) Schedule 22 - Compensation on Termination;
  - (xix) Schedule 25 - Record Provisions;
  - (xx) Schedule 23 - Expiry Transition Procedure;
  - (xxi) the other Schedules in the order in which they are listed in Section 1.1(b); and
  - (xxii) Schedule 13 - Project Co Proposal Extracts.
- (b) Subject to Section 1.2(a), if the ambiguity, conflict or inconsistency is between a provision of general application and a provision that applies only to a specific part of the Project Operations, the provision that applies to the specific part of the Project Operations shall govern for that specific part of the Project Operations.
- (c) If any ambiguity, conflict or inconsistency is not readily resolved by the foregoing provisions of this Section 1.2, then Project Co or the City, upon discovery of same, shall immediately give Notice to the City Representative. The City Representative shall, within 10 Business Days after such Notice, make a determination of which provision governs and give Notice of such determination, in writing, to Project Co.
- (d) The City and Project Co shall comply with the determination of the City Representative pursuant to this Section 1.2 unless Project Co disputes the decision of the City Representative in which event such Dispute may be referred for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.

### **1.3 Conflict of Documents**

- (a) In the event of any ambiguity, conflict or inconsistency between the provisions of this Project Agreement and the Lenders' Direct Agreement, the provisions of the Lenders' Direct Agreement shall prevail and govern to the extent of such ambiguity, conflict or inconsistency. Notwithstanding the foregoing, if there is any right or remedy in favour of the City set out in the Lenders' Direct Agreement or any part thereof which is not set out or provided for in the Project Agreement, such additional right or remedy shall not constitute an ambiguity, conflict or inconsistency.

### **1.4 Legal Requirements**

- (a) Whenever standards of Applicable Law differ (after giving effect to any applicable conflict of law rules), the most stringent standards shall govern.

## **1.5 Early Works Agreement and Enabling Works**

- (a) Upon achievement of Financial Close, this Project Agreement shall supersede and replace the early works agreement in respect of the Project executed by the Parties on or about March 7, 2019 (the “**Early Works Agreement**”). Without prejudice to the generality of the foregoing, any part of the Works performed by Project Co under and in accordance with the Early Works Agreement shall be treated as having been performed under and in accordance with this Project Agreement, and the City’s payment obligations related to that part of the Early Works will be those under this Project Agreement and not under this Early Works Agreement, and shall be accounted for and paid for as part of the Mobilization Credit in accordance with Schedule 20 – Construction Period Payments of the Project Agreement.
- (b) Upon achievement of Financial Close, Project Co shall assume responsibility for all Enabling Works, and all Enabling Works shall be deemed to be Works hereunder and treated as having been performed under the terms of the Project Agreement. The purchase order for Enabling Works shall be assigned to Project Co on Financial Close, and all amounts paid by the City under and in accordance with such purchase order shall be credited by Project Co to the City and set-off against the first Construction Period Payment(s) becoming payable by the City to Project Co hereunder.

## **2. COMMERCIAL CLOSE AND FINANCIAL CLOSE**

### **2.1 Effective Date**

- (a) The provisions of Sections 1 to 11, 15 to 24, 27 to 29, 33, 35 to 37 and 49 to 62, and Schedule 1 – Definitions and Interpretation, Schedule 2 – Completion Documents, Schedule 3 – Custody Agreement, Schedule 9 – Key Individuals, Schedule 10 – Review Procedure, Schedule 11 – Integrated Management System Requirements, Schedule 12 – Works Scheduling Requirements, Schedule 13 – Project Co Proposal Extracts, Schedule 16 – Encumbrances, Schedule 17 – Environmental Obligations, Schedule 18 – Communications and Stakeholder Engagement Obligations, Schedule 21 – Variation Procedure, Schedule 24 – Insurance and Performance Security Requirements, Schedule 25 – Record Provisions, Schedule 26 – Dispute Resolution Procedure, Schedule 32 – City Permits, Licences, Approvals and Authorizations, Schedule 33 – Lands, Schedule 35 – Intellectual Property and Schedule 36 – System Extension will come into effect on Commercial Close. All other provisions of this Project Agreement will come into effect only on Financial Close. The provisions of this Project Agreement will terminate on the Termination Date.

### **2.2 Letter of Credit**

- (a) Unless a Letter of Credit is drawn by the City in accordance with the provisions of this Project Agreement, the City shall release and deliver the Letter of Credit to Project Co on Financial Close.

- (b) Project Co shall ensure that the Letter of Credit (and any replacement therefor) is renewed prior to its expiry date if, as at such date, Financial Close will not, or may reasonably be expected not to, have occurred.
- (c) If Project Co delivers one or more Letter(s) of Credit from one or more Letter of Credit Provider(s) in accordance with Section 9.1(2) of the Request for Proposals, Project Co acknowledges and agrees that:
  - (i) the City may draw upon any Letter of Credit provided by any Letter of Credit Provider in any specified ratable amount in accordance with the terms of this Project Agreement;
  - (ii) the City may draw on any Letter of Credit provided by any Letter of Credit Provider in a disproportionate amount to such Letter of Credit Provider's contribution to security;
  - (iii) the City may draw upon any Letter of Credit provided by any Letter of Credit Provider even in the event that such Letter of Credit Provider is no longer a Project Co Party; and
  - (iv) the provision of a Letter of Credit shall not in any way prejudice or adversely affect the rights of the City to draw on the Letter of Credit in accordance with this Project Agreement, including in a circumstance where the default giving rise to the City's right to draw on the Letter of Credit is not the result of any act or omission of the Letter of Credit Provider whose Letter of Credit is drawn upon.

## **2.3 Financial Close**

- (a) No later than 30 days prior to the Financial Close Target Date, Project Co will deliver to the City drafts of all documents referred to in Section 1 of Schedule 2 - Completion Documents.
- (b) On or before the date of Financial Close:
  - (i) Project Co shall deliver to the City the documents referred to in Section 1 of Schedule 2 - Completion Documents; and
  - (ii) the City shall deliver to Project Co the documents referred to in Section 2 of Schedule 2 - Completion Documents.
- (c) If Project Co fails to deliver to the City any of the documents referred to in Section 1 of Schedule 2 - Completion Documents by the date of Financial Close (other than as a direct result of a breach by the City of its obligations under Section 2.3(b)(ii)) and the City does not waive such requirement, the City will be entitled to draw on the Letter of Credit to retain the proceeds thereof as liquidated damages and may terminate this Project Agreement in its entirety by written Notice having immediate effect. The Parties agree that such liquidated damages are not a penalty but represent a genuine and reasonable pre-estimate of the damages that the City will suffer as a result of the happening of the specified event. Such payment shall constitute full and final settlement of any and all damages that may be claimed by the City as a result of Project Co not achieving Financial Close. The Parties agree that such liquidated damages shall be payable whether or not the City incurs or mitigates its damages, and that the City shall not have any obligation to mitigate any such damages.

- (d) If the City fails to deliver to Project Co any of the documents referred to in Section 2 of Schedule 2 - Completion Documents by the date of Financial Close (other than as a direct result of a breach by Project Co of its obligations under Section 2.3(b)(i)) and Project Co does not waive such requirement, Project Co will be entitled to the return of the Letter of Credit and to terminate this Project Agreement in its entirety by written Notice having immediate effect.

## **2.4 Disruption in Financial Markets**

- (a) If Financial Close cannot be achieved by the Financial Close Target Date by reason solely of a Severe Market Disruption, subject to Project Co's obligation to renew the Letter of Credit pursuant to Section 2.2(b), the Financial Close Target Date will be extended until the date falling 10 Business Days (or such other period as the Parties agree, acting reasonably) after the date on which such Severe Market Disruption ceases.
- (b) If a Severe Market Disruption exists, then, at any time before such Severe Market Disruption ceases and prior to Financial Close, the City may in its sole discretion either:
  - (i) terminate this Project Agreement in its entirety by written Notice having immediate effect; or
  - (ii) direct Project Co to assign to a designee of the City which has agreed to assume:
    - (A) the Project Agreement, and all of Project Co's right, title and interest in the Project Data, the Intellectual Property Rights and the Project Co Permits, Licences, Approvals and Authorizations; and
    - (B) those contracts between Project Co and any Project Co Party which the City elects to be assigned.
- (c) If the City exercises its rights pursuant to Section 2.4(b), and, provided Project Co has, if directed, delivered the assignments provided for in Section 2.4(b)(ii)(A) and (B), Project Co will be entitled to the return of its Letter of Credit and to payment of an amount equal to the Design and Bid Fee pursuant to Section 10.3.2 of the Request for Proposals plus [REDACTED]% of the Design and Bid Fee, plus any applicable HST. The City's obligation to return the Letter of Credit and to pay such fee shall be contingent on the receipt of a waiver, in form and substance satisfactory to the City, that such fee represents full and final satisfaction of any obligation or liability of the City to Project Co and any Project Co Parties in connection with the Project Agreement and the Request for Proposals.

## **3. SCOPE OF AGREEMENT**

### **3.1 Scope of Agreement**

- (a) Project Co shall undertake the Project and perform the Project Operations in accordance with and subject to the provisions of this Project Agreement.
- (b) Project Co shall exercise its rights and perform its obligations at its own cost and risk without recourse to the City, except as otherwise provided in this Project Agreement.

#### 4. BUSINESS OPPORTUNITIES, ADVERTISING AND PUBLIC EVENTS

##### 4.1 Business Opportunities

- (a) Project Co acknowledges that the City: (i) may from time to time develop, or permit the development of, commercial and other opportunities on or associated with the System Infrastructure, including, for greater certainty, the addition of retail facilities, kiosks, and newsstands, the erection of billboards and other forms of advertising, the granting of naming rights associated with the System Infrastructure, wifi, radio and public television on the System Infrastructure (“**Business Opportunities**”); (ii) reserves the right to all Business Opportunities; and (iii) may, as set out in this Project Agreement, grant rights in the Business Opportunities to Project Co or other parties.
- (b) For clarity, and subject to Section 4.1(d) below, Project Co acknowledges and agrees that the addition of retail facilities, kiosks, or newsstands, the erection of billboards and other forms of advertising by the City or the implementation of other Business Opportunities by the City shall not entitle Project Co to any additional compensation or extension of time in relation thereto.
- (c) Project Co shall cooperate with the City in the City’s implementation of Business Opportunities.
- (d) To the extent that the development of a Business Opportunity or any other activities referenced in (b) above by the City (or any third party authorized by the City) interferes with Project Co’s license rights hereunder or interferes with Project Co’s ability to perform the Project Operations, such development shall, subject to and in accordance with Schedule 22 – Variation Procedure, result in a Variation.
- (e) To encourage the development of Business Opportunities, Project Co may, from time to time, propose Business Opportunities for the City’s consideration. All such proposals shall describe the Business Opportunity in full with the expected financial and other advantages to both the City and Project Co. The City may accept any such proposal in its sole discretion and subject to such terms and conditions as the City may require.
- (f) Notwithstanding that Project Co has proposed a Business Opportunity to the City for its consideration, Project Co acknowledges and agrees that:
  - (i) the City reserves the right to proceed with such Business Opportunity or any similar Business Opportunity with Project Co or with any third party;
  - (ii) the City may initiate a separate procurement process for the development of such Business Opportunity; and
  - (iii) Project Co shall not be entitled to receive any payment or compensation from the City (in any form) on the basis that Project Co proposed such Business Opportunity to the City, even if the City proceeds with such Business Opportunity or any similar Business Opportunity with Project Co or with any third party.

## 5. REPRESENTATIONS AND WARRANTIES

### 5.1 Project Co Representations and Warranties

- (a) Project Co represents and warrants to the City that as of Commercial Close:
- (i) Project Co is [REDACTED] formed and validly existing under the laws of the Province of Ontario and has all the requisite corporate power and authority to own its properties and assets, to carry on its business as it is currently being conducted, and to enter into this Project Agreement and to perform its obligations hereunder:
    - (A) [REDACTED] under the laws of Canada, is in good standing with Corporations Canada with respect to the filing of annual reports, and has all the requisite power and authority to own its properties and assets, to carry on its business as it is currently being conducted and to enter into this Project Agreement and to duly observe and perform its obligations hereunder in its capacity as a partner of Project Co;
    - (B) [REDACTED] under the laws of Canada, is in good standing with Corporations Canada with respect to the filing of annual reports, and has all the requisite power and authority to own its properties and assets, to carry on its business as it is currently being conducted and to enter into this Project Agreement and to duly observe and perform its obligations hereunder in its capacity as a partner of Project Co;
  - (ii) all partnership interests in Project Co as of Commercial Close have been disclosed to the City;
  - (iii) Project Co and the Project Co Parties, collectively, have extensive experience and are knowledgeable in the design, construction, maintenance and rehabilitation of light rail transit projects, including the maintenance of light rail vehicles, similar to the Project in scale, scope, type and complexity and have the required ability, experience, skill and capacity to perform the Project Operations in a timely and professional manner as set out in this Project Agreement;
  - (iv) Project Co, and [REDACTED] in its capacity as partner of Project Co have the requisite power, authority and capacity to execute, deliver and perform this Project Agreement, and to do all acts and things, and execute, deliver and perform all other agreements, instruments, undertakings and documents as are required by this Project Agreement to be done, executed, delivered or performed by Project Co or [REDACTED] in its capacity as partner of Project Co;
  - (v) no steps or proceedings have been taken or are pending to supersede or amend:
    - (A) the constating or formation documents of Project Co, including the partnership agreement governing Project Co; or
    - (B) the constating documents, articles or by-laws of [REDACTED],

in each case, in a manner that would impair or limit Project Co's ability to perform its obligations under this Project Agreement;

- (vi) this Project Agreement has been duly authorized, executed, and delivered by Project Co and by [REDACTED] in its capacity as partner of Project Co and constitutes a legal, valid, and binding obligation of Project Co, [REDACTED] enforceable against each of them in accordance with its terms, subject only to:
  - (A) limitations with respect to the enforcement of remedies by bankruptcy, insolvency, moratorium, winding-up, arrangement, reorganization, fraudulent preference and conveyance and other laws of general application affecting the enforcement of creditors' rights generally; and
  - (B) general equitable principles and the fact that the availability of equitable remedies is in the discretion of a court and that a court may stay proceedings or the execution of judgments;
- (vii) the execution, delivery, and performance by Project Co, and by [REDACTED] in its capacity as partner of Project Co, of this Project Agreement does not and will not violate or conflict with, or constitute a default under:
  - (A) its constating, formation or organizational documents, including any by-laws or partnership agreements;
  - (B) any Applicable Law; or
  - (C) any covenant, contract, agreement, or understanding to which it is a party or by which it or any of its properties or assets is bound or affected;
- (viii) no Project Co Event of Default has occurred and is continuing;
- (ix) all of the information regarding [REDACTED] set out in Schedule 29 - Project Co Information is true and correct in all material respects;
- (x) there are no actions, suits, proceedings, or investigations pending or threatened against Project Co, [REDACTED] or, to Project Co's knowledge, any Project Co Party at law or in equity before any Governmental Authority or arbitral body (whether or not covered by insurance) that individually or in the aggregate could result in any material adverse effect on the business, properties, or assets, or the condition, financial or otherwise, of Project Co or in any impairment of its ability to perform its obligations under this Project Agreement, and Project Co has no knowledge of any violation or default with respect to any order, writ, injunction, or decree of any Governmental Authority or arbitral body that could result in any such material adverse effect or impairment;
- (xi) Project Co has conducted its own investigations and has carefully reviewed the whole of this Project Agreement, and all other documents made available to Project Co by or on behalf of the City and, to Project Co's knowledge, nothing contained herein or therein inhibits or prevents Project Co from completing the Works or performing the Maintenance and Rehabilitation Services in accordance with this Project Agreement in a

good and safe manner so as to achieve and satisfy the requirements of this Project Agreement;

- (xii) Project Co, and [REDACTED] in its capacity as partner of Project Co, is able to meet its obligations as they generally become due;
- (xiii) Project Co is registered under Division V of Part IX of the *Excise Tax Act* (Canada);
- (xiv) the Scheduled Substantial Completion Date is a realistic date and is achievable by Project Co performing the Works in accordance with this Project Agreement;
- (xv) each of Project Co, [REDACTED] is not a Non-Resident;
- (xvi) no Restricted Person has Direct or Indirect Power or Control over any member of the Project Co Group in relation to the decisions, management, actions or policies of Project Co or in relation to the operation, management and ownership of the Project;
- (xvii) to the knowledge of Project Co, no Restricted Person has directly or indirectly, an Economic Interest in Project Co or the Project;
- (xviii) either:
  - (A) the COR-Certified Construction Project Co Party is in possession of its COR Certification in good standing as required under this Project Agreement and has the ability to maintain such COR Certification in good standing at all times during the performance of the Works in accordance with its terms, provisions and conditions; or
  - (B) the COR-Qualified Construction Project Co Party:
    - (I) is in possession of its OHSAS 18001 Accreditation which remains in good standing and has the ability to maintain such OHSAS 18001 Accreditation in good standing at all times during the performance of the Works until such COR-Qualified Construction Project Co Party receives its COR Certification as required under this Project Agreement: and
    - (II) has made an application to the IHSA for its COR Certification as required under this Project Agreement (or has made an application to IHSA for its Health and Safety Certificate as required under this Project Agreement) and has the ability to maintain such Health and Safety Certification until the Final Completion Date in accordance with its terms, provisions and conditions.

## **5.2 Representations and Warranties of the City**

- (a) The City represents and warrants to Project Co that as of Commercial Close:
  - (i) the execution and delivery of this Project Agreement and all documents, instruments and agreements required to be executed and delivered by the City pursuant to this Project

Agreement, and the completion of the transactions contemplated by this Project Agreement, have been duly authorized, and this Project Agreement has been duly executed and delivered by the City and constitutes a legal, valid and binding obligation of the City enforceable in accordance with its terms, except as may be limited by laws of general application affecting the enforceability of remedies and rights of creditors and except that equitable remedies such as specific performance and injunction are in the discretion of a court and except as may be subject to the special jurisdiction and powers of the Ontario Municipal Board over defaulting municipalities under the *Municipal Affairs Act*, R.S.O. 1990 c. M.46, as amended;

- (ii) the City is a municipal corporation duly and validly constituted and subsisting under the laws of the Province of Ontario and has full power and capacity to execute and deliver this Project Agreement and carry out the transactions contemplated by and duly observe and perform all of its obligations contained in this Project Agreement and all documents, instruments and agreements required to be executed and delivered by the City pursuant to this Project Agreement;
- (iii) the execution, delivery, and performance by the City of this Project Agreement does not and will not violate or conflict with, or constitute a default under:
  - (A) any Applicable Law (including, for greater certainty, the *City of Ottawa Act 1999* (Ontario) and any by-laws issued in accordance therewith; or
  - (B) any covenant, contract, agreement, or understanding relating to the Project or the Lands to which it is a party or by which it or any of its properties or assets is bound or affected;
- (iv) the City has obtained all consents and approvals required for the execution by the City of, and performance of its obligations under this Project Agreement;
- (v) other than any proceeding under the *Expropriations Act*, (Ontario) which could delay the acquisition by the City of the Lands therein, there are no current and, to the knowledge of the City, there are no pending or threatened actions, claims, demands, lawsuits, assessments, arbitrations, judgments, awards, decrees, orders, injunctions, prosecutions, or other proceedings of, by, against, or relating to, the City which, individually or in the aggregate, could have a material adverse effect on the Project or the ability of the City to perform its obligations under this Project Agreement and the City does not Have Knowledge of any basis for any such action, claim, demand, lawsuit, assessment, arbitration, judgment, award, decree, order, injunction, prosecution or other proceeding;
- (vi) the City has (or, in the case of the Additional Property Interests, will have) acquired the Lands and Additional Property Interests sufficient to enable to City to grant or to cause to be granted to Project Co the license rights contemplated in Section 14.2;
- (vii) the Project is permitted by the existing official plan, zoning and other land use restrictions applicable to the City and the Project; and
- (viii) the City is able to meet its obligations as they generally become due.

- (b) The City represents and warrants to Project Co that as of Commercial Close, no City Event of Default has occurred and is continuing.
- (c) The representations and warranties contained in Sections 5.2(a)(i), 5.2(a)(ii), 5.2(a)(iii), 5.2(a)(iv), 5.2(a)(v), 5.2(a)(vi) and 5.2(a)(vii) shall survive the Financial Close and shall not be deemed to be merged thereon. The remaining representations and warranties contained in Section 5.2(a) shall be deemed to have merged on the Financial Close.

## **6. BACKGROUND INFORMATION**

### **6.1 No Liability**

- (a) Except as expressly provided in Sections 6.4, 16.1, 16.2, 16.3, 16.4 and 16.5 neither the City nor any other City Party shall be liable to Project Co or any Project Co Party for, and Project Co or any Project Co Party shall not seek to recover from the City or any other City Party, any damages, losses, costs, liabilities or expenses which may arise (whether in contract, tort or otherwise) from the adoption, use or application of the Background Information by, or on behalf of, Project Co or any Project Co Party.

### **6.2 No Warranty**

- (a) Except as expressly provided in this Project Agreement, including Sections 6.4, 16.1, 16.2, 16.3, 16.4 and 16.5:
  - (i) neither the City nor any other City Party gives any warranty or undertaking of whatever nature in respect of the Background Information and, specifically (but without limitation), neither the City nor any other City Party warrants that the Background Information represents all of the information in its possession or control (either during the conduct of the procurement process for the Project or at the time of execution and delivery of this Project Agreement) relevant or material to or in connection with the Project or the obligations of Project Co under this Project Agreement or under any of the Project Documents; and
  - (ii) neither the City nor any other City Party shall be liable to Project Co or any Project Co Party in respect of any failure, whether before, on or after the execution and delivery of this Project Agreement:
    - (A) to disclose or make available to Project Co or any Project Co Party any information, documents or data;
    - (B) to review or update the Background Information; or
    - (C) to inform Project Co or any Project Co Party of any inaccuracy, error, omission, defect or inadequacy in the Background Information.

### **6.3 No Claims**

- (a) Project Co acknowledges and confirms that:

- (i) it has conducted its own analysis and review of the Background Information and has, before the execution and delivery of this Project Agreement, satisfied itself as to the accuracy, completeness and fitness for purpose of any such Background Information upon which it places reliance; and
- (ii) except as expressly provided in Sections 6.4, 16.1, 16.2, 16.3, 16.4 and 16.5, it shall not be entitled to and shall not, and shall ensure that no Project Co Party shall, make any claim against the City or any City Party (whether in contract, tort or otherwise), including any claim in damages, for extensions of time or for additional payments under this Project Agreement on the grounds:
  - (A) of any misunderstanding or misapprehension in respect of the Background Information; or
  - (B) that the Background Information was incorrect or insufficient,nor shall Project Co be relieved from any of its obligations under this Project Agreement on any such grounds.

## **6.4 Technical Reports**

- (a) The City agrees that, if as of Commercial Close, except as disclosed in any Background Information or as otherwise disclosed by the City or any City Party, or known by Project Co or any Project Co Party, in each case prior to the date that is 30 days prior to the RFP Technical Submission Deadline, any of the information in the Technical Reports is, to the actual knowledge of the City, incorrect or there is relevant information in the possession or control of the City that would make any of the information in the Technical Reports incorrect, then, to the extent that such incorrect information materially adversely interferes with Project Co's ability to perform the Project Operations or materially adversely affects Project Co's cost of performing the Project Operations, such incorrect information shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation.
- (b) For the purposes of Section 6.4(a), "to the actual knowledge of the City" means to the actual knowledge of the City Project Manager.

## **7. PROJECT DOCUMENTS**

### **7.1 Project Documents**

- (a) Project Co shall perform its obligations under, and observe all of the provisions of, each of the Project Documents to which it is a party, and shall ensure that each Project Co Party shall perform its obligations under, and observe all of the provisions of, each of the Project Documents to which such Project Co Party is a party, so as to ensure that other parties to such Project Documents shall not be entitled to terminate same. In the event that Project Co receives a notice of default under any of the Project Documents, it shall promptly, and, in any event, no later than 2 Business Days after receipt thereof, deliver a copy of such notice of default to the City.

### **7.2 Ancillary Documents**

- (a) Project Co shall not:
- (i) terminate or agree to the termination of all or part of any Ancillary Document, except pursuant to Sections 31.3, 43.5, 57.3 and 58.2 or otherwise to prevent or cure a Project Co Event of Default (provided that commercially reasonable alternative measures would not prevent or cure such Project Co Event of Default);
  - (ii) make or agree to any amendment, restatement or other modification of any Ancillary Document that materially adversely affects Project Co's ability to perform its obligations under this Project Agreement or that has the effect of increasing any liability of the City, whether actual or potential;
  - (iii) breach its obligations (or waive or allow to lapse any rights it may have) or permit others to breach their obligations (or waive or allow to lapse any rights they may have) under any Ancillary Document, that materially adversely affect Project Co's ability to perform its obligations under this Project Agreement or that have the effect of increasing any liability of the City, whether actual or potential; or
  - (iv) enter into, or permit the entry into by any other person of, any agreement replacing all or part of any Ancillary Document, except in the circumstances referenced in Section 7.2(a)(i),

without the prior written consent of the City, provided that, where consent is requested pursuant to Section 7.2(a)(i) or 7.2(a)(iv), such consent shall not be withheld, and shall be provided within a reasonable time, where the relevant matter referred to in Section 7.2(a)(i) or 7.2(a)(iv) will not materially adversely affect Project Co's ability to perform its obligations under this Project Agreement or have the effect of increasing any liability of the City, whether actual or potential. In the event of termination or agreement to the termination of all or part of any Ancillary Document as described in Section 7.2(a)(i) or any agreement replacing all or part of any Ancillary Document as described in Section 7.2(a)(iv), Project Co shall, to the extent applicable, comply with all provisions herein applicable to changes in Project Co Parties, including Section 57.3.

### **7.3 Changes to Lending Agreements and Refinancing**

- (a) Subject to the terms of the Lenders' Direct Agreement, Project Co shall not terminate, amend or otherwise modify the Lending Agreements, or waive or exercise any of its rights under the Lending Agreements, if at the time such action is contemplated and effected, it would materially adversely affect Project Co's ability to perform its obligations under this Project Agreement or the Project Documents or have the effect of increasing the liability of the City whether actual or potential, unless such action is a Permitted Borrowing or a Refinancing effected in accordance with the provisions of Schedule 27 – Refinancing.

### **7.4 Compliance with Lending Agreements**

- (a) Project Co shall keep the Lending Agreements in good standing to the extent necessary to perform its obligations under this Project Agreement and the Project Documents, and shall ensure that none of the terms and conditions of the Lending Agreements shall prevent Project Co from performing its obligations under this Project Agreement or the Project Documents.

## **8. CITY RESPONSIBILITIES**

### **8.1 General**

- (a) The City shall, at its own cost and risk:
  - (i) perform all of its obligations under, and observe all provisions of, this Project Agreement in compliance with Applicable Law;
  - (ii) cooperate with Project Co in the fulfillment of the purposes and intent of this Project Agreement, provided, however, that the City shall not be under any obligation to perform any of Project Co's obligations under this Project Agreement;
  - (iii) acquire and give access to the Lands described in Schedule 33 – Lands, as amended from time to time, in accordance with the Commencement Dates and duration specified in the said Schedule;
  - (iv) make such payments to Project Co as are specifically provided for in this Project Agreement; and
  - (v) perform those additional obligations specifically provided for in this Project Agreement.
- (b) Nothing in this Project Agreement shall in any way fetter the right, authority and discretion of the City or any other counselor, officer, employee or official thereof in fulfilling its statutory or other functions under Applicable Law, and Project Co understands and agrees that nothing in this Project Agreement shall preclude the City from performing, discharging or exercising its duties, responsibilities, and powers under Applicable Law. Project Co further agrees that, subject to Section 37.1(b), it shall comply, and shall cause all relevant Project Co Parties to comply, with all written directions issued by or on behalf of the City from time to time.
- (c) The City shall, and shall cause all the City Parties to, take reasonable steps to minimize undue interference with the provision of the Project Operations by Project Co or any Project Co Party.
- (d) [Intentionally deleted].
- (e) The City shall provide for the attendance of the requisite number of suitably qualified employees for the employee training to be provided by Project Co in accordance with the requirements of Schedule 15-2 – Design and Construction Requirements.
- (f) The City shall provide suitably qualified drivers and controllers to support the required commissioning activities in accordance with the requirements of this Project Agreement.

### **8.2 City Permits, Licences, Approvals and Authorizations**

- (a) The City shall, at its own cost and risk:
  - (i) except as otherwise provided in Schedule 32 – City Permits, Licences, Approvals and Authorizations, obtain on or before Financial Close, and, maintain, and, as applicable,

renew all City Permits, Licences, Approvals and Authorizations which may be required for the performance of the Project Operations;

- (ii) comply with all City Permits, Licences, Approvals and Authorizations, in accordance with their terms, and other Permits, Licences, Approvals and Authorizations to the extent obligations thereunder attributable to the City are not otherwise required be undertaken or assumed by Project Co hereunder; and
  - (iii) execute all documents which, under Applicable Law, only the City as a land owner or as a counterparty to a Third Party Access Agreement is entitled to execute and which are required to obtain, maintain or renew any City Permits, Licences, Approvals and Authorizations.
- (b) The City shall, at its own cost, provide or cause to be provided such information, documentation, and administrative assistance as Project Co may request and as the City may reasonably be able to provide, and shall execute such applications as are required to be in its name, to enable Project Co or any Project Co Party to obtain, maintain or renew any Project Co Permits, Licences, Approvals and Authorizations or to demonstrate compliance with any Permits, Licences, Approvals and Authorizations, provided that the City shall not be responsible for obtaining or for any delay in obtaining or for the failure of Project Co or any Project Co Party to obtain any Project Co Permits, Licences, Approvals and Authorizations, unless such delay or failure is caused by any act or omission of the City, any City Party or any other person for whom the City is responsible at law. For greater certainty, the City shall not be obligated to:
  - (i) exercise any other of its legal rights in order to avoid or eliminate the requirement to obtain any Permits, Licences, Approvals and Authorizations; and
  - (ii) automatically grant Project Co Permits, Licences, Approvals and Authorizations for which it is the authorizing entity and will apply its usual procedures and criteria in considering applications from Project Co or any Project Co Party for such Project Co Permits, Licences, Approvals and Authorizations.
- (c) Notwithstanding the provisions of Section 9.4(a)(i), the City shall be responsible for all designations, assumptions, road closures, transfers and any other applicable requirements relating to the System which can only be effected by the City pursuant to the *Municipal Act, 2001* (Ontario), subject to receipt by the City of any required consent(s) from the Crown in right of Canada and subject to Project Co having, at its own cost, providing or causing to be provided such information, documentation, and technical or administrative assistance, as the City may request and as Project Co may reasonably be able to provide to enable the City to effect such requirements.

## **9. PROJECT CO RESPONSIBILITIES**

### **9.1 Other Business**

- (a) Project Co shall not engage in any activities which are not specifically related to, required by and conducted for the purpose of the Project without the prior written consent of the City, in its sole discretion.

## **9.2 General**

- (a) Project Co shall, at its own cost and risk:
- (i) perform all of its obligations under, and observe all provisions of, this Project Agreement in compliance with Applicable Law;
  - (ii) perform all Project Operations:
    - (A) in compliance with Applicable Law;
    - (B) in compliance with all Permits, Licences, Approvals and Authorizations and so as to preserve the existence and continued effectiveness of any such Permits, Licences, Approvals and Authorizations;
    - (C) so as to satisfy the Output Specifications;
    - (D) in accordance with Good Industry Practice;
    - (E) in a manner consistent with the Integrated Management Systems and Integrated Management Plans, and the Project Co Proposal Extracts;
    - (F) in a timely and professional manner;
    - (G) with due regard to the health and safety of persons and property;
    - (H) subject to the other provisions of this Project Agreement, in a manner which will not impair the ability of the City or any City Party to comply with Applicable Law;
    - (I) subject to the other provisions of this Project Agreement, including as required to enable performance of the Project Operations, in a manner which will not impair the performance of the Governmental Activities; and
    - (J) in accordance with all other terms of this Project Agreement;
  - (iii) cooperate with the City in the fulfillment of the purposes and intent of this Project Agreement, provided however that Project Co shall not be under any obligation to perform any of the City's obligations under this Project Agreement;
  - (iv) cooperate with the City in respect of the City's consultations with Third Party Land Interest Holders in relation to the Project and the Project Operations;
  - (v) [intentionally deleted];
  - (vi) immediately notify the City Representative to the extent that Project Co becomes aware of any defect in the Lands, the Existing Revenue Vehicles or the System Infrastructure;
  - (vii) enter into any Utility Agreements that may be required to complete the Works;

- (viii) coordinate with the City all Construction Activities relating to New Municipal Infrastructure forming part of the Works on those parts of the Lands affected by Third Party Access Agreements, including the provision of the Works Schedule, Progress Works Schedule and any updates to the Works Schedule or Progress Works Schedule relating to such New Municipal Infrastructure, so as to minimize, to the extent reasonably possible, the impact of Construction Activities on the City operations and services provided by the City to the public; and
- (ix) immediately notify the City upon the receipt or notice of (and provide the City with copies of any correspondence received in relation to), any incident report, investigation report or similar correspondence (in each case, whether in draft or final form) issued by the Ministry of Labour or any other Governmental Authority in respect of the Project Operations.

### **9.3 Project Co Parties**

- (a) Project Co shall not be relieved of any liability or obligation under this Project Agreement by the appointment of any Project Co Party, and Project Co shall cause each Project Co Party, to the extent such Project Co Party performs or is specified hereunder to perform the Project Operations, to comply with the obligations of Project Co hereunder in the same manner and to the same extent as Project Co.

### **9.4 Project Co Permits, Licences, Approvals and Authorizations**

- (a) Project Co shall, at its own cost and risk:
  - (i) obtain, maintain, and, as applicable, renew all Project Co Permits, Licences, Approvals and Authorizations which may be required for the performance of the Project Operations;
  - (ii) except for those obligations which are identified as the City obligations in Schedule 32 – Permits, Licences, Approvals and Authorizations, during the Project Term, perform all of the obligations of the City under the City Permits, Licences, Approvals and Authorizations (and for greater certainty, the Development Approvals) relating to the Project Operations;
  - (iii) comply with all Permits, Licences, Approvals and Authorizations in accordance with their terms; and
  - (iv) provide all security, including all letters of credit, that may be required in connection with any Project Co Permits, Licences, Approvals and Authorizations, provided that, if the City is able to obtain an exemption from such security on behalf of Project Co and with respect to the Project,
    - (A) Project Co shall provide to the City an accurate accounting of the costs and expenses avoided by Project Co as a result of any such exemption; and
    - (B) the City shall be permitted to deduct an amount equal to all costs and expenses that were avoided by Project Co as a result of any such exemption from the Substantial Completion Payment.

- (b) Where Project Co Permits, Licences, Approvals and Authorizations have requirements that may impose any conditions, liabilities or obligations on the City or any City Party, Project Co shall not obtain, amend or renew (other than upon the same or better terms and conditions) such Project Co Permits, Licences, Approvals and Authorizations without the prior written consent of the City, provided that, and subject to the City's compliance with its obligations under Section 8.2(b), neither the City nor any City Party shall be responsible for obtaining or for the failure of Project Co to obtain any Project Co Permits, Licences, Approvals and Authorizations. The City shall comply, or shall require compliance, with any conditions, liabilities or obligations as are imposed on the City or any City Party by the requirements of any Project Co Permits, Licences, Approvals and Authorizations obtained with the City's consent under this Section 9.4(b).
- (c) The City shall provide Project Co with such information and administrative assistance as Project Co may reasonably request in relation to the Permits, Licences, Approvals and Authorizations. In respect of Section 9.4(a)(ii), the City shall, in a timely manner,
  - (i) provide Project Co with relevant information and copies of notices received under the applicable City Permits, Licences, Approvals and Authorizations; and
  - (ii) subject to the provisions of this Project Agreement relating to Permits, Licences, Approvals and Authorizations, execute and renew any documents under the applicable City Permits, Licences, Approvals and Authorizations which Applicable Law dictates that only the City can execute and renew.
- (d) Project Co shall, at its own cost, provide or cause to be provided such information, documentation, and administrative assistance as the City may request and as Project Co may reasonably be able to provide, and shall execute such applications as are required to be in its name, to enable the City to obtain, maintain or renew any City Permits, Licences, Approvals and Authorizations or to demonstrate compliance with any Permits, Licences, Approvals and Authorizations, provided that Project Co shall not be responsible for obtaining or for any delay in obtaining or for the failure of the City to obtain any City Permits, Licences, Approvals and Authorizations, unless such delay or failure is caused by any act or omission of Project Co, any Project Co Party or any other person for whom Project Co is responsible at law.
- (e) With respect to the NCC FLUDA:
  - (i) the City shall obtain the NCC FLUDA, but can only do so with Project Co's performance of the obligations set out in Section 9.4(e)(ii);
  - (ii) Project Co shall use commercially reasonable efforts to assist the City in obtaining the NCC FLUDA as required from time to time including, without limitation:
    - (A) the preparation and delivery of all Design Data in respect of the NCC FLUDA pursuant to Schedule 10 – Review Procedure;
    - (B) the preparation and delivery of Design Development Submittals and/or Construction Development Submittals pursuant to Section 20.3 that are reasonably necessary to obtain the NCC FLUDA;

- (C) the preparation and delivery of such other plans, specifications, agreements, documents and instruments in respect of the Design and Construction Works and/or the Maintenance Services and amendments thereto that are reasonably necessary to obtain the NCC FLUDA; and
  - (D) Project Co shall make changes to the Design Data as required by NCC to further assist the City in obtaining the NCC FLUDA and Project Co shall take such other actions as may be reasonably directed by the City from time to time with respect thereto; and
- (iii) if, following Commercial Close:
- (A) NCC requires a change to the Design Data or any other additional obligation to be assumed in respect of the NCC FLUDA pursuant to Section 9.4(a); and
  - (B) the City, in a timely manner, requires Project Co to make such change or to assume such additional obligation,
- provided the change or other obligation is not otherwise a responsibility or obligation of Project Co under this Project Agreement, then such change or obligation shall result in a Variation subject to and in accordance with Schedule 21 – Variation Procedure.
- (f) If, prior to the Scheduled Substantial Completion Date, the City fails to issue to Project Co a final determination (a granting, conditional granting, or refusal) in respect of a Listed Project Co PLAA prior to the expiration of **[REDACTED]** per cent of the number of Business Days (rounding up to Business Days if such calculation results in a certain number of Business Days plus a fraction of a Business Day) designated for a final determination by the City in Appendix A to Schedule 32 – Permits, Licences, Approvals and Authorizations for the applicable Listed Project Co PLAA (the “**City PLAA Deadline**”), then any delay in the Works or additional costs in respect of the Works caused by the failure to make a final determination by the City PLAA Deadline shall, subject to and in accordance with Section 38, be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event, provided that:
- (i) the applicable Project Co Permit, Licence, Approval or Agreement is a Listed Project Co PLAA;
  - (ii) Project Co has fulfilled all obligations pursuant to Applicable Law, in accordance with any deadline applicable to the Listed Project Co PLAA imposed by this Project Agreement or the City, including providing timely and thorough responses to questions or concerns posed by the City in respect of the Listed Project Co PLAA;
  - (iii) Project Co submitted the applicable Listed Project Co PLAA in accordance with the timing for such submission in the Works Schedule or Recovery Schedule, as applicable (in each case, as such submission date may be extended on account of any Delay Event); and
  - (iv) Project Co’s application for the Listed Project Co PLAA and Project Co’s responses to all questions or concerns posed by the City were in accordance with Good Industry Practice.

- (g) For clarity, Section 9.4(f) does not entitle Project Co to a Delay Event or a Compensation Event,
  - (i) in the event that the City's final determination on a Listed Project Co PLAA is made in a timely way, pursuant to the applicable City PLAA Deadline, but is not favourable to Project Co or Project Co disagrees with the substance of the final determination;
  - (ii) in the event that the City fails to issue to Project Co a final determination in respect of a Permit, Licence, Approval or Authorization that is not explicitly listed as a Listed Project Co PLAA; or
  - (iii) with respect to,
    - (A) Permits, Licences, Approvals or Agreements that are related to, but not explicitly included on, the Listed Project Co PLAAs; or
    - (B) the Traffic and Transit Management Plan.
- (h) Project Co shall, at its own cost and risk, provide to the City a system to track the status of each Listed Project Co PLAA through every stage of preparation, submission and approval (the "**Listed PLAA Tracking System**"). More specifically, such Listed PLAA Tracking System shall:
  - (i) be kept updated on a daily basis and be available to the City in real time through a web-based interface which would include functionality to provide automated email alerts to a customizable frequency and set of email addresses;
  - (ii) be operational no later than the date upon which the first Listed Project Co PLAA application is submitted; and
  - (iii) include a feature that highlights to the City each outstanding applicable Listed Project Co PLAA when it reaches the following milestone triggers:
    - (A) **[REDACTED]**% of the number of Business Days designated for a final determination by the City in Appendix A to Schedule 32 – Permits, Licences, Approvals and Authorizations for the applicable Listed Project Co PLAA;
    - (B) **[REDACTED]**% of the number of Business Days designated for a final determination by the City in Appendix A to Schedule 32 – Permits, Licences, Approvals and Authorizations for the applicable Listed Project Co PLAA; and
    - (C) 5 Business Days prior to the expiration of the City PLAA Deadline.
- (i) Project Co shall submit documentation on the proposed design, functionality, and usage of the Listed PLAA Tracking System to the City Representative in accordance with Schedule 10 – Review Procedure no later than 60 days after Financial Close.
- (j) In addition, Project Co shall provide written notice to the City Representative with respect to any outstanding Listed Project Co PLAA when it reaches the milestone triggers outlined in Section 9.4(h)(iii) above.

- (k) With respect to any failure to issue to Project Co a final determination in respect of a Listed Project Co PLAA prior to the expiration of the relevant City PLAA Deadline, Project Co shall not be entitled to the Delay Event or Compensation Event pursuant to Section 38.1(a)(xx) unless the Listed PLAA Tracking System as described in Section 9.4(g) is functional and available to the City, provides notice to the City of the milestone described in Section 9.4(h)(iii), and contains accurate information as to the status of the applicable Listed Project Co PLAA at all material times.

## **9.5 Safety and Security**

- (a) During the Construction Period and following Final Completion solely in relation to Construction Activities, Project Co shall:
- (i) comply with the health and safety requirements in Schedule 11 – Integrated Management System and the Construction Safety Management Plan;
  - (ii) keep the Site, the New Municipal Infrastructure and the System Infrastructure in a safe and orderly state, as appropriate in accordance with the Construction Safety Management Plan and Good Industry Practice, to avoid danger to persons on the Site (including occupants and users of Lands affected by Third Party Access Agreements), on the New Municipal Infrastructure and on the System Infrastructure, and in the immediate vicinity of the Site (including New Municipal Infrastructure on those parts of the Lands affected by Third Party Access Agreements) and System Infrastructure;
  - (iii) take such measures as are reasonable in accordance with Good Industry Practice to maintain and secure the Site, New Municipal Infrastructure and System Infrastructure to prevent access of any persons or creatures not entitled to be there once Project Co has been granted access to the Site or has commenced Works on the New Municipal Infrastructure and System Infrastructure;
  - (iv) comply, and cause each Project Co Party to comply, with Applicable Law relating to health and safety, including the *Occupational Health and Safety Act* (Ontario) and all regulations thereto;
  - (v) with respect to the Works, cause a COR-Certified Construction Project Co Party or, prior to receipt of COR Certification, a COR-Qualified Construction Project Co Party, to perform, all of the obligations of the "constructor", and indemnify the City and each City Party against any and all of the liabilities of the "constructor", under the *Occupational Health and Safety Act* (Ontario) and all regulations thereto;
  - (vi) provide the City with a certificate of good standing from WSIB or any successor thereto once every 90 days from Financial Close until Final Completion, and from Final Completion until the Termination Date, at the request of the City Representative from time to time; and
  - (vii) For clarity, subject to Project Co warranty obligations relating to New Municipal Infrastructure as set out in the Output Specifications and Project Co obligations relating to the condition of the Lands within or upon which the New Municipal Infrastructure has

been constructed, following the delivery of the Final New Municipal Infrastructure Works Acceptance Certificate, Project Co's obligations under this Section 9.5 with respect to the New Municipal Infrastructure shall terminate and be of no further force or effect.

- (b) During the Maintenance Period, Project Co shall:
- (i) cooperate with the City, the Operator, and any Governmental Authority, as appropriate, with a view to securing and protecting the security of the System Infrastructure and protecting the security of System Users;
  - (ii) notify the City of any breach of security or potential breach of security on or off the System Infrastructure of which Project Co is aware;
  - (iii) cooperate with the City, the Operator, any Governmental Authority and the Emergency Service Provider in relation to the planning, organisation and control of extraordinary Passenger movements resulting from the holding of special events as contemplated pursuant to the Output Specifications;
  - (iv) cooperate with any special enquiries or investigations carried out by the City, the Operator, Emergency Service Providers or any Governmental Authority as a result of accidents, incidents or changes in Applicable Law and shall promptly provide to the City, the Emergency Service Providers and any Governmental Authority (as the case may be) all information, resources and facilities within its control which are reasonably required for such enquiries or investigations;
  - (v) comply with the Safety Management Plan and Emergency Response Plan;
  - (vi) cooperate with the Operator and follow the safety and security instructions set out in the Capital Railway Rules and the Standard Operating Procedures, including any verbal instructions by individuals authorized in accordance with the LRT Rules and Standard Operating Procedures, and comply with all requirements set out in the Output Specifications related to safety and security;
  - (vii) in an Emergency situation or when an urgent security matter arises in respect of the safety or security of the System Infrastructure or the System Users, take instruction from the Operator and the City with respect to maintaining the security and safety of the System Infrastructure and the System Users; and
  - (viii) with respect to the Maintenance and Rehabilitation Services, cause a Maintenance and Rehabilitation Project Co Party with an accredited ISO 45001 safety management system or, prior to receipt of accreditation, a Maintenance and Rehabilitation Project Co Party with a safety management system compliant with ISO 45001, to perform all Maintenance and Rehabilitation Services and indemnify the City and each City Party against any and all of the liabilities of the "constructor", under the *Occupational Health and Safety Act* (Ontario) and all regulations thereto at any time that Project Co is acting as a "constructor" on the Site following Substantial Completion.

## 9.6 Health and Safety Certification

- (a) Project Co shall, at its own cost and risk, at all times during the performance of the Works cause a COR-Qualified Construction Project Co Party or COR-Certified Construction Project Co Party, as the case may be, to:
  - (i) to the extent a COR-Qualified Construction Project Co Party has not obtained COR Certification prior to Financial Close,
    - (A) use best efforts to obtain its COR Certification no later than eighteen months following Financial Close. In the event that the City is satisfied, in its sole discretion, that the COR-Qualified Construction Project Co Party has used best efforts to obtain its COR Certification in accordance with this Section 9.6 and the COR-Qualified Construction Project Co Party has not obtained COR Certification by the end of such eighteen month period, then the City shall establish a time period during which the COR-Qualified Construction Project Co Party shall obtain its COR Certification, which time period shall not be less than 30 days, and
    - (B) maintain in good standing and, as applicable, renew its ISO 45001 Accreditation or OHSAS 18001 Accreditation until such time as the COR-Qualified Construction Project Co Party has obtained its COR Certification,
  - (ii) once the COR-Qualified Construction Project Co Party is certified (thereafter referred to as a “**COR-Certified Construction Project Co Party**”), maintain in good standing, and as applicable, renew its COR Certification; and
  - (iii) comply with all requirements of its ISO 45001 Accreditation or OHSAS 18001 Accreditation (if a COR-Qualified Construction Project Co Party) or COR Certification (if a COR-Certified Construction Project Co Party), in accordance with its terms.
- (b) Project Co shall, at its own cost and risk, at all times beginning on the date the Substantial Completion Countdown Notice is issued until the end of the Project Term cause the ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party or ISO 45001 Accredited Maintenance and Rehabilitation Project Co Party to:
  - (i) to the extent a ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party has not obtained its ISO 45001 Accreditation prior to the date the Substantial Completion Countdown Notice is issued, use best efforts to obtain its ISO 45001 Accreditation no later than twelve months following the date the Substantial Completion Countdown Notice is issued. In the event that the City is satisfied, in their sole discretion, that the ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party has used best efforts to obtain its ISO 45001 Accreditation in accordance with this Section 9.6 and the ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party has not obtained its ISO 45001 Accreditation by the end of such twelve month period, then the City shall establish a time period during which the ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party shall obtain its ISO 45001 Accreditation, which time period shall not be less than six months;

- (ii) once the ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party is accredited (thereafter referred to as a “**ISO 45001 Accredited Maintenance and Rehabilitation Project Co Party**”), maintain in good standing, and, as applicable, renew its ISO 45001 Accreditation; and
    - (iii) comply with all requirements of its ISO 45001 Accreditation in accordance with its terms.
  - (c) Without limiting any other provision of this Project Agreement, if at any time during the performance of the Project Operations:
    - (i) a COR-Qualified Construction Project Co Party or a ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party fails to obtain its COR Certification or ISO 45001 Accreditation in accordance with this Project Agreement and the City determines that the failure to obtain the COR Certification or ISO 45001 Accreditation is as a result of such COR-Qualified Construction Project Co Party or such ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party, as the case may be, not using best efforts to obtain such certification or accreditation and the City delivers a Notice to Project Co indicating that a COR-Qualified Construction Project Co Party or a ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party, as the case may be, has failed to obtain its COR Certification or ISO 45001 Accreditation in accordance with this Project Agreement; or
    - (ii) a COR-Qualified Construction Project Co Party fails to maintain its ISO 45001 Accreditation or OHSAS 18001 Accreditation in good standing in accordance with its terms or in accordance with this Project Agreement; or
    - (iii) a COR-Certified Construction Project Co Party or an ISO 45001 Accredited Maintenance and Rehabilitation Project Co Party, as the case may be, fails to maintain its COR Certification or its ISO 45001 Accreditation in good standing in accordance with its terms or in accordance with this Project Agreement;
- (each, an “**H&S Certification Default Event**”); or
- (iv) the City delivers a Notice to Project Co indicating that the City has reasonable cause to believe that a COR-Qualified Construction Project Co Party will fail to maintain its ISO 45001 Accreditation or OHSAS 18001 Accreditation in good standing in accordance with its terms or in accordance with this Project Agreement; or
    - (v) the City delivers a Notice to Project Co indicating that the City has reasonable cause to believe that a COR-Certified Construction Project Co Party or ISO 45001 Accredited Maintenance and Rehabilitation Project Co Party, as the case may be, will fail to maintain its COR Certification or ISO 45001 Accreditation in good standing in accordance with its terms or in accordance with this Project Agreement,

Project Co shall:

- (vi) immediately upon the occurrence of a H&S Certification Default Event, notify the City that a H&S Certification Default Event has occurred, and:
  - (A) produce and deliver to the City a report identifying the reasons for the failure to obtain or maintain in good standing the COR Certification, ISO 45001 Accreditation or OHSAS 18001 Accreditation, as the case may be;
  - (B) produce and deliver to the City a plan showing the steps that are to be taken to have the COR Certification or ISO 45001 Accreditation or OHSAS 18001 Accreditation, as the case may be, obtained or reinstated in good standing within a period of not more than 90 days (the “**H&S Certification Reinstatement Plan**”), which H&S Certification Reinstatement Plan shall be subject to review and approval by the City and, to the extent the City requires any amendments or revisions to be made to the H&S Certification Reinstatement Plan, Project Co shall take, and shall cause the COR-Qualified Construction Project Co Party, the COR-Certified Construction Project Co Party, the ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party, or the ISO 45001 Accredited Maintenance and Rehabilitation Project Co Party, as the case may be, to take, all reasonable steps as may be necessary to make all such required amendments and revisions and deliver to the City an amended H&S Certification Reinstatement Plan not more than 5 Business Days from the date on which such request is made by the City;
  - (C) no later than 5 Business Days after the H&S Certification Default Event occurs, arrange to have conducted a complete H&S Construction Inspection or H&S Maintenance Inspection, as the case may be, in accordance with Section 13(b); and
  - (D) arrange to have conducted an H&S Construction Re-Inspection or H&S Maintenance Re-Inspection, as the case may be in accordance with Section 13(d), if required, or
- (vii) within 10 Business Days of receipt of the Notice from the City under 9.6(c)(iv) or 9.6(c)(v):
  - (A) produce and deliver to the City Representative a report identifying the manner in which the COR Certification or ISO 45001 Accreditation or OHSAS 18001 Accreditation, as the case may be, shall be maintained in good standing or obtained, as applicable;
  - (B) produce and deliver to the City Representative a plan showing the steps that are to be taken to ensure that the COR Certification or ISO 45001 Accreditation or OHSAS 18001 Accreditation, as the case may be, will be maintained in good standing without interruption (the “**H&S Certification Maintenance Plan**”), which H&S Certification Maintenance Plan shall be subject to review and approval by the City and, to the extent the City require any amendments or

revisions to be made to the H&S Certification Maintenance Plan, Project Co shall take all reasonable steps as may be necessary to make all such required amendments and revisions and deliver to the City an amended H&S Certification Maintenance Plan not more than 10 Business Days from the date on which such request is made by the City;

- (C) arrange to have conducted a complete H&S Construction Inspection or H&S Maintenance Inspection, as the case may be, in accordance with Section 13(b); and
- (D) arrange to have conducted an H&S Construction Re-Inspection or H&S Maintenance Re-Inspection, as the case may be, in accordance with Section 13(e)(ii), if required.

## 9.7 Protest and Trespass

- (a) Except as otherwise provided in this Project Agreement, the City shall not be responsible for the presence of any persons participating in civil disobedience, demonstration or protest action (“**Protesters**”) or any other persons otherwise not entitled to be on or around the Lands (“**Trespassers**”). For greater certainty, the presence of, or interference by, any Protesters or Trespassers on or around the Lands shall not be a breach of the obligation of the City to grant license rights of use and access to Project Co on and over the Lands pursuant to Section 14 nor a breach of any other obligation, representation or warranty under this Project Agreement.
- (b) Except as set out in this Project Agreement, throughout the Construction Period, the management of any Protesters or Trespassers shall be the responsibility of Project Co in respect of the Site, to the extent such management is not otherwise the responsibility of the Police Service.
- (c) During the Maintenance Period, if Protesters or Trespassers occupy the System or access to the System is prevented or interfered with by Protesters or Trespassers, Project Co shall use all appropriate measures reasonable in the circumstances to assist the City in managing such Protesters or Trespassers and promptly notify the City Representative of such occurrence. For clarity, during the Maintenance Period, Project Co shall be responsible for the management of any Protesters or Trespassers on the New Walkley Yard to the extent such management is not otherwise the responsibility of the Police Service.
- (d) Project Co may exercise any legal remedy available to it to remove Protesters or Trespassers from the Site, and/or the New Walkley Yard, provided that if Project Co does elect to exercise any such legal remedy, Project Co shall give the City Representative at least 24 hours' Notice prior to commencing any such legal proceeding (except in a case of Emergency, danger to persons or material destruction or material damage to property where, in such circumstances, such Notice may be given to the City less than 24 hours prior to the commencement of such legal proceeding) and shall continually update the City Representative as to the status of any such legal proceeding in reasonable detail and at reasonable intervals, and provided further that:
  - (i) Project Co shall not give directly or indirectly to any Protester or Trespasser any inducement, monetary or otherwise, with a view to avoiding, limiting or influencing the

manner of protest activities by that Protester or Trespasser or by other Protesters or Trespassers; and

- (ii) Project Co shall not by virtue of this Section 9.7(d) be prevented from entering into bona fide settlements of claims brought against it by Protesters or Trespassers which provide for reasonable payments in satisfaction of such claims or agreeing to any reasonable cost orders in any proceedings.
- (e) Project Co may request the assistance of the City (at the cost of Project Co) to remove Protesters or Trespassers during the periods, and for the Site, facilities or infrastructure set out in Section 9.7(b) if Project Co demonstrates to the City's reasonable satisfaction that:
  - (i) Project Co is pursuing legal remedies available to it to remove the Protesters or Trespassers (provided that for this purpose Project Co may, but shall not be obligated to, prosecute injunctive or other judicial remedies beyond the court of first instance); and
  - (ii) the continued presence of the Protesters or Trespassers is having a material adverse effect on the conduct of the Works or the Maintenance and Rehabilitation Services (as the case may be) that Project Co is unable to mitigate.

Following such request, the City shall notify Project Co whether the City can lawfully provide any assistance in relation to the removal of the Protesters or Trespassers that is not independently available to Project Co and, to the extent that such assistance can be lawfully provided, the City shall provide such assistance (at the cost of Project Co) to the extent it is, in the discretion of the City, reasonable and appropriate in the circumstances to do so.

## **9.8 Additional Works and Third Party Works**

- (a) Project Co shall, having regard to Project Co's obligations set out in Section 15, arrange and carry out all coordination of the Project Operations with the Third Party Works directly with the applicable Third Party Contractor.
- (b) The City may, in its sole discretion, carry out Additional Works.
- (c) The City may assign the methods and manner of construction (where applicable) of the Additional Works, the coordination and scheduling of the Additional Works and the safety training in respect of the Additional Works to Project Co. For clarity, the City may, in its sole discretion, assign such responsibilities to Project Co during either or both of the Construction Period or Maintenance Period.
- (d) In connection with the Additional Works, the City shall,
  - (i) cause Additional Contractors to comply with the instructions of Project Co relating to matters of health and safety on the Site, methods and manner of construction (where applicable), and coordination and scheduling of the Additional Works with,
    - (A) the Works during the Construction Period; and
    - (B) the Maintenance and Rehabilitation Services during the Maintenance Period;

- (ii) enter into separate contracts with Additional Contractors,
  - (A) under conditions of contract which are compatible with the conditions of this Project Agreement;
  - (B) that require Additional Contractors to comply with Section 9.8(e) and all directions of Project Co in respect of any matter regarding health and safety on the Site, and methods and manner of construction (where applicable); and
  - (C) that require Additional Contractors to comply with Project Co's coordination and scheduling of the Additional Works; and
- (iii) ensure that insurance coverage is provided by each Additional Contractor as would be required by a prudent owner similarly situated and coordinate such insurance with the insurance coverage of Project Co and in any event, such insurance shall provide for liability insurance of not less than \$[REDACTED].
- (e) In connection with the Additional Works, if the City has assigned responsibilities to Project Co pursuant to this Section 9.8, Project Co shall,
  - (i) provide for the methods and manner of construction (where applicable) of the Additional Works and the coordination and scheduling of the Additional Works with the Works or Maintenance and Rehabilitation Services, as applicable, to be performed under this Project Agreement;
  - (ii) assume overall responsibility for compliance with all aspects of Applicable Law relating to health and safety at the Site, including all the responsibilities of the 'constructor' under the *Occupational Health and Safety Act* (Ontario), prior to Substantial Completion and, exercised in a manner consistent with the said Act, at any time that Project Co is acting as a 'constructor' on the Site following Substantial Completion;
  - (iii) provide Additional Contractors reasonable opportunity to introduce and store their products and use their construction machinery and equipment to execute the Additional Works, as applicable;
  - (iv) participate with the City and Additional Contractors in reviewing the construction schedules of Additional Contractors, when directed to do so by the City; and
  - (v) if part of the Works is affected by or depends upon, for its proper execution, the Additional Works, promptly report to the City in writing and prior to proceeding with that part of the Works any readily apparent deficiencies in the Additional Works. Failure by Project Co to so report shall invalidate any claims against the City by reason of such readily apparent deficiencies.
- (f) In the case of Additional Works carried out prior to Substantial Completion, if:
  - (i) any Additional Contractors cause any damage to the Works;

- (ii) Project Co incurs any additional costs or there is any delay in the Works Schedule as a result of any Additional Contractors not complying with the coordination, scheduling and safety instructions of Project Co; or
- (iii) subject to the performance by Project Co of its obligations under this Section 9.8, if Project Co incurs any additional costs or there is any delay in the Works Schedule as a result of any such Additional Works,

then any such delay in the Works Schedule or additional costs in respect of the Works shall, subject to and in accordance with Section 38 be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event.

- (g) Claims, disputes, and other matters in question between Project Co and Additional Contractors shall be dealt with in substantially the same manner as contemplated in Schedule 26 - Dispute Resolution Procedure provided that the Additional Contractors and the City have made commercially reasonable efforts to ensure that provisions similar to Schedule 26 – Dispute Resolution Procedure have been included in the contracts between the City and the Additional Contractors. Project Co shall be deemed to have consented to arbitration of any dispute with any Additional Contractor whose contract with the City contains a similar agreement to arbitrate.
- (h) In connection with the Additional Works, Project Co may request a Variation as follows:
  - (i) Project Co shall have a period of 10 Business Days following Notice from the City of the City's intention to carry out such Additional Works, including a reasonable description of such Additional Works, to request a Variation if such Additional Works are,
    - (A) reasonably expected to make void a warranty made in favour of Project Co from a Project Co Party or equipment supplier and given in accordance with Good Industry Practice; or
    - (B) reasonably expected to have a material negative consequence on Project Co's ability to perform any of the Project Operations;
  - (ii) If the City assigns responsibilities to Project Co pursuant to Section 9.8(c) and Section 9.8(e) after Substantial Completion, and Project Co demonstrates to the City, acting reasonably, that it is unable to carry out such responsibilities without adding additional resources to the resources providing the Maintenance and Rehabilitation Services at the relevant time, Project Co shall have a period of 10 Business Days following Notice from the City of such an assignment of responsibilities to request a Variation in respect of the cost of such additional resources;
  - (iii) If Project Co has made a request for a Variation in accordance with Section 9.8(h)(i) or Section 9.8(h)(ii), the City shall, within 10 Business Days of such request, either issue a Variation Enquiry or give Notice to Project Co that they do not agree that a Variation is required;
  - (iv) Either Party may refer the question of whether a Variation is required as the result of a warranty risk or risk in the performance of the Project Operations or, whether Project Co

has to add additional resources to the resources providing the Maintenance and Rehabilitation Services at the relevant time for resolution in accordance with Schedule 26 - Dispute Resolution Procedure; and

- (v) If the City has, under Section 9.8(h)(iii), given Notice to Project Co that it does not agree that a Variation is required, the City shall, within 10 Business Days of a subsequent agreement or of a determination that a Variation is required, issue a Variation Enquiry and the relevant provisions of Schedule 21 - Variation Procedure shall apply except that:
  - (A) the City shall not be entitled to withdraw any such Variation Enquiry unless the City determines not to proceed with the Additional Works or to proceed only in a manner that the Additional Works will not result in a warranty becoming void or will not result in any material negative consequence on Project Co's ability to perform any of the Project Operations and Project Co has agreed with such conclusion, or the Parties otherwise agree; and
  - (B) the Parties shall, without prejudice to their respective general obligations to comply with the terms of this Project Agreement, use commercially reasonable efforts to mitigate the adverse effects with respect to any void or voidable warranty and take commercially reasonable steps to minimize any increase in costs arising from any void warranty.
- (i) Placing, installing, applying or connecting the Additional Works performed by Additional Contractors on and to the Works performed by Project Co shall not relieve Project Co from its obligations under the Project Agreement with respect to the Works, except to the extent expressly described in any Variation Confirmation.

## **9.9 Adjacent Developments**

- (a) Project Co shall having regard to this Section 9.9, review all planning and development applications received from the City in connection with proposed Adjacent Developments.
- (b) Project Co shall permit the developer of an Adjacent Development to post or affix signage as and if required by the City and in locations required by the City, in connection with such Adjacent Development application.
- (c) At the City's request, Project Co shall provide to the developer of an Adjacent Development all relevant Project documentation in respect of the design and construction of elements of the System Infrastructure that may be impacted by the proposed Adjacent Development, subject to the developer of the Adjacent Development executing a confidentiality agreement and a waiver of liability, each in a form and substance satisfactory to the City and Project Co, each acting reasonably.
- (d) All work and activities undertaken by Project Co or any Project Co Party pursuant to this Section 9.9 shall be at Project Co's own cost, provided that in the event that more than **[REDACTED]** Adjacent Development applications are referred to Project Co by the City in a calendar year, then Project Co shall be entitled to a Variation in respect of the review of such development applications in excess of **[REDACTED]** applications per calendar year referred to them.

#### **9.10 System Extension**

- (a) The City shall be entitled to carry out or procure the carrying out of any System Extension at any time during the Project Term and Project Co shall not be entitled to object or prevent the carrying out of any such System Extension.
- (b) Project Co shall make available those parts of the System Infrastructure to enable an Extension Contractor to connect the System Infrastructure with the System Extension.
- (c) Project Co and the City shall comply with Schedule 36 – System Extension in connection with any System Extension considered by the City at any time during the Project Term.

#### **9.11 Revenue Vehicle Supply Contract**

- (a) On Financial Close, Project Co shall cause the Construction Contractor to execute the Revenue Vehicle Supply Contract substantially in the form attached as Schedule 39 hereto (“**Revenue Vehicle Supply Contract**”) and thereafter shall execute and deliver such supporting documentation as may be reasonably required by the City from time to time with respect to the Revenue Vehicle Supply Contract. For clarity, Project Co acknowledges and agrees that:
  - (i) Subject to Section 9.11(b), any and all costs associated with the performance of the obligations under the Revenue Vehicle Supply Contract shall be at Project Co’s cost; and
  - (ii) any and all obligations under the Revenue Vehicle Supply Contract are included in and form part of the Works.
- (b) The RVSC Fixed Cost Amount shall be reviewed, certified, financed and paid for in accordance with this Section 9.11. Project Co shall not obtain financing for the RVSC Fixed Cost Amount.
- (c) The City shall open the RVSC Cash Allowance Account on or before Financial Close and shall manage the RVSC Cash Allowance Account in accordance with this Section 9.11.
- (d) The cash flow process applicable to the RVSC Cash Allowance Account will be as follows:
  - (i) the City will deposit the applicable portion of the RVSC Fixed Cost Amount relating to the particular RVSC Milestone to be achieved into the RVSC Cash Allowance Account five (5) Business Days prior to the dates and in the amounts set out in the RVSC Cash Flow at Financial Close;
  - (ii) the City will hold and manage all monies in the RVSC Cash Allowance Account;
  - (iii) without derogating from the City’s obligations pursuant to Section 47.1(a), if, at the earlier to occur of (i) Final Completion, (ii) the Termination Date or (iii) the City’s exercise of its termination right under Section 43.6, there exists a positive balance in the RVSC Cash Allowance Account, such balance will be the property of the City; and
  - (iv) the Parties, together with the Construction Contractor and the Revenue Vehicle Supplier shall review the operation of the RVSC Cash Allowance Account on a regular basis and make any appropriate modifications to ensure its efficient operation.

- (e) Upon the achievement of any RVSC Milestone, Project Co shall provide to the City Representative and the Independent Certifier a copy of the request for payment approval (each, an “**RVSC Request for Payment Approval**”) prepared by the Revenue Vehicle Supplier that includes the following information:
  - (i) details of all invoices and certifications relating to any RVSC Milestone that are due for payment, including relevant supporting documentation; and
  - (ii) evidence that all deliverables (including without limitation, the applicable Revenue Vehicles) which are required to have been provided in accordance with the Revenue Vehicle Supply Contract have, as of the RVSC Milestone, been duly delivered in accordance with the Revenue Vehicle Supply Contract.
- (f) The Independent Certifier shall, within 10 Business Days of receipt of a RVSC Request for Payment Approval, advise Project Co, in writing, whether or not payment of the applicable RVSC Milestone set out in such RVSC Request for Payment Approval is approved.
- (g) The Independent Certifier shall only be permitted to withhold its approval if the Independent Certifier determines that the RVSC Request for Payment Approval does not contain the information that the Independent Certifier requires, acting reasonably, under Section 9.11(e).
- (h) If the Independent Certifier withholds its approval pursuant to Section 9.11(f) in respect of any invoice submitted as part of any RVSC Request for Payment Approval and the Independent Certifier subsequently receives the information that the Independent Certifier requires under Section 9.11(e), the Independent Certifier shall, within 10 Business Days of its receipt of such information, provide to Project Co, in writing, the Independent Certifier’s approval of the applicable RVSC Milestone set out in the subject RVSC Request for Payment Approval.
- (i) If the Independent Certifier approves the payment of the invoices set out in an RVSC Request for Payment Approval pursuant to Section 9.11(f) and each of Project Co and the Construction Contractor approves the RVSC Request for Payment Approvals, acting reasonably, the City shall release (and Project Co and the Construction Contractor shall be deemed to have directed the release of) the applicable portion of the RVSC Fixed Cost Amount from the RVSC Cash Allowance Account for payment to the Revenue Vehicle Supplier in accordance with Part 1, Section 12.2 of the Revenue Vehicle Supply Contract.
- (j) To the extent payment for any invoice set out in a RVSC Request for Payment Approval, which is approved by the Independent Certifier pursuant to Section 9.11(f), is not made and received by Project Co due to a Delay Event occurring after the Revenue Vehicle Supplier has achieved the relevant RVSC Milestone but prior to invoicing or payment, or a Delay Event which generally does not prevent or delay achievement of the relevant RVSC Milestone by Revenue Vehicle Supplier, such payment requested by Project Co, shall be due and payable for all purposes of this Project Agreement on the relevant date, otherwise provided for and that non-payment of the amount that would have been required to be paid, but for this Section 9.11(j), will be a non-payment for purposes of Section 44.1(a)(i).

## **10. REPRESENTATIVES**

## **10.1 The City Representative**

- (a) Subject to the limitations set out in Section 10.1(d), the City Representative shall exercise the functions and powers identified in this Project Agreement as functions or powers to be performed by the City Representative and such other functions and powers of the City under this Project Agreement as the City may notify Project Co from time to time.
- (b) The City may, from time to time by written Notice to Project Co, change the City Representative. Such change shall have effect on the later of the date of delivery of such Notice and the date specified in such Notice.
- (c) During any period when no City Representative has been appointed, or when the City Representative is unable, through illness, incapacity or any other reason whatsoever, to perform the City Representative's functions under this Project Agreement, the City shall perform or may, by written Notice to Project Co, promptly appoint an alternative City Representative to perform the functions which would otherwise be performed by the City Representative. Upon receipt of such written Notice, Project Co and the Project Co Representative shall be entitled to treat any act of such alternative City Representative which is permitted by this Project Agreement as being authorized by the City, and Project Co and the Project Co Representative shall not be required to determine whether authority has in fact been given.
- (d) The City Representative shall not, except as otherwise provided in this Project Agreement, be entitled to modify or waive any provision of this Project Agreement or to authorize a Variation.
- (e) Subject to the limitations set out in Sections 10.1(a) and 10.1(d), unless otherwise notified in writing, Project Co and the Project Co Representative shall be entitled to treat any act of the City Representative which is explicitly authorized by this Project Agreement as being authorized by the City, and Project Co and the Project Co Representative shall not be required to determine whether authority has in fact been given.

## **10.2 The Project Co Representative**

- (a) Subject to the limitations set out in Section 10.2(d), the Project Co Representative shall have full authority to act on behalf of Project Co for all purposes of this Project Agreement.
- (b) Project Co may change the Project Co Representative with the prior written consent of the City.
- (c) During any period when the Project Co Representative is unable, through illness, incapacity or any other reason whatsoever, to perform the Project Co Representative's functions under this Project Agreement, Project Co shall perform or may, by written Notice to the City, promptly appoint an alternative Project Co Representative to perform the functions which would otherwise be performed by the Project Co Representative, provided that, Project Co must seek the City's consent in accordance with Section 10.2(b) if such alternative Project Co Representative is in place for more than 180 days. Upon receipt of such written Notice, the City and the City Representative shall be entitled to treat any act of such alternative Project Co Representative which is permitted by this Project Agreement as being authorized by Project Co, and the City and the City Representative shall not be required to determine whether authority has in fact been given.

- (d) The Project Co Representative shall not, except as otherwise provided in this Project Agreement, be entitled to modify or waive any provision of this Project Agreement.
- (e) Subject to the limitations set out in Section 10.2(d), unless otherwise notified in writing, the City and the City Representative shall be entitled to treat any act of the Project Co Representative which is explicitly authorized by this Project Agreement as being authorized by Project Co, and the City and the City Representative shall not be required to determine whether authority has in fact been given.

### **10.3 Communications to Representatives**

- (a) At the time that a Party appoints or changes the appointment of the City Representative or the Project Co Representative, as applicable, that Party shall also provide the other Party with contact information for delivery of communications to such representative. Communications to such representative shall not constitute Notices to the Party appointing such representative.

### **10.4 Key Individuals**

- (a) The individuals who are critical to the performance of the Works are identified in Schedule 9 - Key Individuals. Project Co shall use commercially reasonable efforts to ensure that such persons remain involved in the Works in the capacity set out in Schedule 9 - Key Individuals (unless such Key Individuals are not available for reasons beyond the control of Project Co or a Project Co Party) for the whole of, but not subsequent to the Construction Period. Project Co or a Project Co Party shall not, for the duration of the Works, require or request any such person to be involved in any other project, if, in the reasonable opinion of the City such involvement would have a material adverse effect on the Works. If Project Co fails to comply with this Section 10.4(a), Project Co shall pay to the City the liquidated damages amount, if any, ascribed for such Key Individual in Schedule 9 – Key Individuals. The Parties agree that the liquidated damages set out Schedule 9 – Key Individuals are not a penalty but represent a genuine and reasonable pre-estimate of the damages that the City will suffer as a result of Project Co's failure to provide the applicable Key Individual. For clarity, Project Co and the Project Co Parties' reasonable commercial efforts, in accordance with this Section 10.4(a), shall include the denial of promotions or relocations of a Key Individual, to the extent such denial is permitted by the Applicable Law. For the purposes of this section, only the following reasons will be considered beyond the control of Project Co or a Project Co Party: death; short term disability; or long term disability or any other reason in the opinion of the City, acting reasonably (Project Co shall provide to the City any further documentation as may be reasonably requested by the City to assess any reason beyond the control of Project Co).
- (b) The individuals who are critical to the performance of the Maintenance and Rehabilitation Services are identified in Schedule 9 - Key Individuals. Project Co shall use commercially reasonable efforts to ensure that such persons are involved in the Maintenance and Rehabilitation Services in the capacity set out in Schedule 9 - Key Individuals at the outset of the Maintenance Period (unless such Key Individuals are not available for reasons beyond the control of Project Co or a Project Co Party). Project Co shall ensure that such Key Individuals are replaced over the duration of the Maintenance Period in a planned and orderly fashion and in consultation with the City and with explicit identification of each Key Individual's length of time as a Key Individual during the Maintenance Period. Once a Key Individual has been identified and approved by the

City as part of the planned and orderly replacement of Key Individuals pursuant to this Section 10.4(b), Project Co or a Project Co Party shall not, for the planned period of the Maintenance and Rehabilitation Services, require or request any such person to be involved in any other project if, in the reasonable opinion of the City, such involvement would have a material adverse effect on the Maintenance and Rehabilitation Services. For the purposes of this section, only the following reasons will be considered beyond the control of Project Co or a Project Co Party: death; short term disability; or long term disability or any other reason determined in the opinion of the City, acting reasonably (Project Co shall provide to the City any further documentation as may be reasonably requested by the City to assess any reason beyond the control of Project Co).

- (c) Subject to Project Co's obligations to ensure that Key Individuals remain involved in the Works and in the Maintenance and Rehabilitation Services as set out in Sections 10.4(a) and 10.4(b), if it becomes necessary for Project Co to replace any individual identified in Schedule 9 - Key Individuals, Project Co shall nominate a competent suitably qualified and experienced permanent replacement or replacements as soon as practicable and provide the City with relevant information on the proposed replacement and shall consult with the City before finalizing the appointment of such replacement. Project Co shall not replace any of the individuals identified in Schedule 9 - Key Individuals without the prior written consent of the City, which consent shall not be withheld or delayed where Project Co is compliant with Sections 10.4(a), 10.4(b) and 10.4(d) and the proposed replacement is suitably qualified and experienced. For those Key Individual's in respect of whom liquidated damages amounts are ascribed in Schedule 9 – Key Individuals, in the event Project Co fails to nominate a competent suitably qualified and experienced permanent replacement or replacements for a period of greater than 60 days from the date it became necessary for Project Co to replace any such Key Individual, Project Co shall pay to the City the liquidated damages ascribed in Schedule 9 – Key Individuals. The Parties agree that the liquidated damages set out in this 10.4(c) are not a penalty but represent a genuine and reasonable pre-estimate of the damages that the City will suffer as a result of Project Co's failure to provide the applicable Key Individual.
- (d) If the City determines, acting reasonably, that it is in the best interests of the City that any individual identified in Schedule 9 - Key Individuals be replaced, the City shall notify Project Co (including a detailed explanation of the reasons for such determination), and, within 60 days after receipt by Project Co of such Notice, Project Co shall provide the City with relevant information on the proposed replacement and shall consult with the City before finalizing the appointment of such replacement.

## **11. WORKS COMMITTEE**

### **11.1 Establishment**

- (a) The Parties shall, within 30 days following Financial Close, establish a committee (the “**Works Committee**”) consisting of:
  - (i) six representatives appointed by the City from time to time, one of whom will be the City Representative; and
  - (ii) the following five representatives appointed by Project Co:

- (A) the Project Co Representative;
  - (B) one representative of the Construction Contractor;
  - (C) the Design Build Director;
  - (D) the Director of Communications and Stakeholder Engagement; and
  - (E) such other representative appointed by Project Co from time to time.
- (b) The Independent Certifier shall be entitled, but not required, to attend meetings as a non-voting member of the Works Committee. Members of the Works Committee may invite, on prior Notice to all members, such advisors and consultants as they require from time to time to attend meetings and to provide briefings to the Works Committee.
- (c) The City Representative shall be the chairperson of the Works Committee.

## **11.2 Function and Role**

- (a) The Works Committee shall assist the Parties by promoting cooperative and effective communication with respect to matters related to the Works. The Works Committee shall interface with the Maintenance Committee as and when required.
- (b) The Works Committee shall be responsible for receiving and reviewing all matters related to the Works, including:
- (i) any design, construction and commissioning issues;
  - (ii) the Works Schedules;
  - (iii) any issues arising from reports or documents provided by Project Co or the Independent Certifier;
  - (iv) any quality assurance and safety and security issues, including any design, configuration control, interfacing, training, testing, operational impact and other matters creating or giving rise to a safety or security issue or otherwise requiring attention and oversight;
  - (v) the Works Reports;
  - (vi) any special matters referred to the Works Committee by Project Co;
  - (vii) any Proceeding At Risk Matters referred to the Works Committee in accordance with Section 11.6.
  - (viii) any community and media relations issues in accordance with Schedule 18 - Communications and Stakeholder Engagement Obligations;
  - (ix) any issues related to Schedule 7 – Mobility Matters; and

- (x) any other issues pertaining to the Works.
- (c) Subject to Section 11.2(d), any unanimous decision of the Works Committee shall be final and binding on the Parties. If the Works Committee is unable to reach a unanimous decision, either Party may refer the matter for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.
- (d) The Works Committee shall not have authority to make decisions with respect to or approve:
  - (i) any amendment to or waiver of any provision of this Project Agreement;
  - (ii) any change to Key Works Milestones set out in the Works Schedule, the Scheduled Substantial Completion Date or the Scheduled Final Completion Date;
  - (iii) any Variation;
  - (iv) any change that may materially adversely affect Project Co's ability to achieve Substantial Completion by the Scheduled Substantial Completion Date or Final Completion by the Scheduled Final Completion Date; or
  - (v) any matter with respect to which the City has a right of consent or in respect of which the City may exercise discretion pursuant to this Project Agreement.

### **11.3 Term of Works Committee**

- (a) Unless otherwise agreed by the Parties, the Works Committee shall operate only until the Final Completion Date.

### **11.4 Replacement of Committee Members**

- (a) The City shall be entitled to replace any of its respective representatives on the Works Committee by written Notice to Project Co. The City will use commercially reasonable efforts to deliver prior written Notice of any such replacements to Project Co. Project Co may replace any of its representatives on the Works Committee with the prior written consent of the City.

### **11.5 Procedures and Practices**

- (a) The members of the Works Committee may:
  - (i) adopt such procedures and practices for the conduct of the activities of the Works Committee as they consider appropriate from time to time;
  - (ii) invite to any meeting of the Works Committee such other persons as the members of the Works Committee may agree;
  - (iii) exclude from any meeting of the Works Committee such persons as the members of the Works Committee may agree; and

- (iv) receive and review reports from any person or organization agreed to by the members of the Works Committee.
- (b) Once established, the Works Committee shall meet at least once each month from Financial Close until the Final Completion Date, unless otherwise agreed by the members of the Works Committee or the Parties.
- (c) Any one of the Project Co Representative or the City Representative may convene a special meeting of the Works Committee at any time. Special meetings of the Works Committee may be convened on not less than five Business Days' Notice to all members of the Works Committee identifying the agenda items to be discussed at the special meeting, provided that, in an Emergency, a meeting may be called at any time on such Notice as may be reasonable in the circumstances.
- (d) Unless otherwise agreed by the members of the Works Committee, the Works Committee shall meet at the Site in the City of Ottawa or in any other location in Ontario. Meetings of the Works Committee may be held by means of such telephonic, electronic or other communication facilities as permit all persons participating in the meeting to communicate with each other simultaneously and instantaneously. A person participating in a meeting by such means will be deemed to be present at such meeting, provided that each member of the Works Committee must attend in person at least once each calendar quarter.
- (e) Four representatives of the City (one of whom shall be the City Representative) and the three representatives of Project Co shall constitute a quorum at any meeting of the Works Committee. A quorum of members may exercise all the powers of the Works Committee. The members shall not transact business at a meeting of the Works Committee unless a quorum is present.
- (f) Minutes of all meetings, recommendations and decisions of the Works Committee, including those made by telephone or other form of communication, shall be recorded and maintained by Project Co. Project Co shall circulate copies of such minutes within five Business Days of the holding of the meeting or the making of the recommendation or decision. Unless the City notifies Project Co within five Business Days of receipt of the minutes that the City disagrees with the contents of the minutes, the City and Project Co shall be deemed to have approved such minutes. Project Co shall maintain a complete set of all minutes of the meetings of the Works Committee and shall make such minutes available for inspection by the City during regular business hours.

## 11.6 Proceeding At Risk

- (a) If at any time:
  - (i) in the reasonable opinion of the City, Project Co is performing the Works (excluding for greater certainty, the supply of the New Revenue Vehicles) in a manner that may result in Project Co becoming unable to satisfy the requirements for Substantial Completion; or
  - (ii) the City Representative has noted a Works Submittal as "CRITICAL COMMENT" in accordance with Schedule 10 – Review Procedure (each of the matters described in clauses (i) and (ii) of this Section 11.6(a), a "**Proceeding At Risk Matter**");

- then the City may issue to Project Co (with a copy to the Independent Certifier) a notice (the “**Proceeding At Risk Notice**”) identifying the City’s reasons for issuing the Proceeding At Risk Notice and requesting Project Co to deliver any relevant Design Data and any other information reasonably required by the City from Project Co to review the Proceeding At Risk Matter.
- (b) Following the issuance of a Proceeding At Risk Notice, the City Representative and the Project Co Representative, together with the other members of the Works Committee, shall each promptly and diligently make a reasonable *bona fide* effort to resolve the Proceeding At Risk Matter. The Independent Certifier shall be required to attend all meetings and deliberations of the Works Committee at which the Proceeding At Risk Matter is considered, but shall not be entitled to participate in any decisions of the Works Committee.
  - (c) Within 10 Business Days after receipt by Project Co of a Proceeding At Risk Notice, Project Co shall deliver a response to the City and each member of the Works Committee, which shall include:
    - (i) the Design Data and any other information reasonably requested by the City in the Proceeding At Risk Notice;
    - (ii) Project Co’s opinion confirming agreement with, or disputing the opinion of, the City regarding the Proceeding At Risk Matter;
    - (iii) any additional Design Data and other information in support of Project Co’s opinion regarding the Proceeding At Risk Matter; and
    - (iv) Project Co’s proposal to rectify the Proceeding at Risk Matter.
  - (d) Within 5 Business Days after receipt by the City of the response from Project Co pursuant to Section 11.6(c), the City shall notify Project Co if the City requires any additional information from Project Co. Project Co shall provide such additional information to the City, each member of the Works Committee and the Independent Certifier within 5 Business Days after receipt of such notice.
  - (e) The Independent Certifier shall, within 30 Business Days of the Proceeding At Risk Notice, deliver to each of the City and Project Co its written opinion as to whether the City acted reasonably in delivering the Proceeding At Risk Notice.
  - (f) Within 15 Business Days after receipt by the City of all deliverables contemplated by Section 11.6(c) and, if applicable, Section 11.6(d), and in any event, no later than 35 Business Days after receipt by Project Co of the Proceeding At Risk Notice, the Works Committee shall meet in person (the “**PAR Meeting**”), to attempt to resolve the Proceeding At Risk Matter.
  - (g) Within 5 Business Days after the PAR Meeting and, in any event, no later than 40 Business Days after receipt by Project Co of the Proceeding At Risk Notice (the “**PAR Meeting Expiry Date**”), the Works Committee shall attempt to reach a final decision with respect to the Proceeding At Risk Matter. If the Works Committee is unable to reach a final decision, and the Independent Certifier’s opinion delivered pursuant to Section 11.6(e) confirms that the City acted reasonably in delivering the Proceeding At Risk Notice, Project Co shall be deemed to be “**Proceeding At**

**Risk**” and the City may, in its sole discretion, give notice to the Lenders’ Agent pursuant to Section 15 of the Lenders’ Direct Agreement, that Project Co is Proceeding At Risk, together with the relevant information supporting the City’s opinion that Project Co is Proceeding at Risk.

- (h) Regardless of the Independent Certifier’s opinion, if the Works Committee fails to reach a final decision with respect to the Proceeding At Risk Matter by the PAR Meeting Expiry Date, either Party may refer the Proceeding At Risk Matter for resolution in accordance with Schedule 26 – Dispute Resolution Procedure.
- (i) The Proceeding At Risk Notice, review, and comments made during the process set out in this Section 11.6 are for general conformity to the obligations and requirements of this Project Agreement, and any such notice, review and comment shall not relieve Project Co of the risk and responsibility for the Project Operations and for meeting all of its obligations under and the requirements of this Project Agreement, and shall not create any new or additional obligations or liabilities for the City
- (j) If it is determined in accordance with Schedule 26 – Dispute Resolution Procedure that Project Co should not have been deemed to be Proceeding at Risk under Section 11.6(g), the City shall (i) promptly notify the Lender’s Agent that it is withdrawing its notice given pursuant to Section 11.6(g), if applicable, and (ii) reimburse Project Co for its reasonable costs incurred in connection with responding to a Proceeding at Risk Notice and for its participation in the Proceeding at Risk Matter.

## **12. MAINTENANCE COMMITTEE**

### **12.1 Establishment**

- (a) The Parties shall, not later than 18 months prior to the Scheduled Substantial Completion Date, establish a committee (the “**Maintenance Committee**”) to serve until the Termination Date consisting of:
  - (i) 4 representatives appointed by the City from time to time, one of whom may be the Operator;
  - (ii) 1 senior representative of Project Co; and
  - (iii) 1 senior representative of the Maintenance and Rehabilitation Contractor.
- (b) Members of the Maintenance Committee may invite, on prior Notice to all members, such advisors and consultants as they require from time to time to attend meetings and provide briefings to the Maintenance Committee.
- (c) One of the representatives of the City shall be the chairperson of the Maintenance Committee.

### **12.2 Function and Role**

- (a) The Maintenance Committee shall assist the Parties by promoting cooperative and effective communication with respect to matters related to the Project Operations, both prior to and during

the Maintenance Period. The Maintenance Committee shall interface with the Works Committee as and when required.

- (b) The Maintenance Committee shall be responsible for receiving and reviewing all matters related to the System Infrastructure, both prior to and during the Maintenance Period, including:
  - (i) any joint review of the System Infrastructure and the Output Specifications;
  - (ii) any performance issues;
  - (iii) any special matter referred to the Maintenance Committee by the City or Project Co;
  - (iv) any community and media relations issues in accordance with Schedule 18 - Communications and Stakeholder Engagement Obligations; and
  - (v) any other issues pertaining to the Project Operations (excluding the Works).
- (c) Subject to Section 12.2(d), any unanimous decision of the Maintenance Committee shall be final and binding on the Parties. If the Maintenance Committee is unable to reach a unanimous decision, either Party may refer the matter for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.
- (d) The Maintenance Committee shall not have authority to make decisions with respect to or approve:
  - (i) any amendment to or waiver of any provision of this Project Agreement;
  - (ii) any Variation;
  - (iii) any change that may materially adversely affect Project Co's ability to perform the Maintenance and Rehabilitation Services or the performance by the relevant parties of any Governmental Activities; or
  - (iv) any matter with respect to which the City has a right of consent or in respect of which the City may exercise discretion pursuant to this Project Agreement.

### **12.3 Replacement of Committee Members**

- (a) The City shall be entitled to replace any of its representatives on the Maintenance Committee by written Notice to Project Co. The City will use commercially reasonable efforts to deliver prior written Notice of any such replacement to Project Co. Project Co may replace any of its representatives on the Maintenance Committee with the prior written consent of the City.

### **12.4 Procedures and Practices**

- (a) The members of the Maintenance Committee may:
  - (i) adopt such procedures and practices for the conduct of the activities of the Maintenance Committee as they consider appropriate from time to time;

- (ii) invite to any meeting of the Maintenance Committee such other persons as the members of the Maintenance Committee may agree;
  - (iii) exclude from any meeting of the Maintenance Committee such persons as the members of the Maintenance Committee may agree; and
  - (iv) receive and review reports from any person or organization agreed to by the members of the Maintenance Committee.
- (b) Once established, the Maintenance Committee shall meet at least once each month during the Maintenance Period, unless otherwise agreed by the members of the Maintenance Committee or the Parties.
- (c) Any member of the Maintenance Committee may convene a special meeting of the Maintenance Committee at any time. Special meetings of the Maintenance Committee may be convened on not less than 5 Business Days' Notice to all members of the Maintenance Committee identifying the agenda items to be discussed at the special meeting, provided that, in an Emergency, a meeting may be called at any time on such Notice as may be reasonable in the circumstances.
- (d) Unless otherwise agreed by the members of the Maintenance Committee, the Maintenance Committee shall meet at the Site in the City of Ottawa or in any other location in Ontario. Meetings of the Maintenance Committee may be held by means of such telephonic, electronic or other communication facilities as permit all persons participating in the meeting to communicate with each other simultaneously and instantaneously. A person participating in a meeting by such means will be deemed to be present at such meeting, provided that each member of the Maintenance Committee must attend in person at least once each calendar quarter.
- (e) One representative of Project Co, one representative of the Maintenance and Rehabilitation Contractor, and two representatives of the City shall constitute a quorum at any meeting of the Maintenance Committee. A quorum of members may exercise all the powers of the Maintenance Committee. The members shall not transact business at a meeting of the Maintenance Committee unless a quorum is present.
- (f) Minutes of all meetings, recommendations and decisions of the Maintenance Committee, including those made by telephone or other form of communication, shall be recorded and maintained by the City. The City shall circulate copies of such minutes within 5 Business Days of the holding of the meeting or the making of the recommendation or decision. Unless Project Co notifies the City within 5 Business Days of receipt of the minutes that Project Co disagrees with the contents of the minutes, the City and Project Co shall be deemed to have approved such minutes. The City shall maintain a complete set of all minutes of the meetings of the Maintenance Committee and shall make such minutes available for inspection by Project Co during regular business hours.

### **13. INTEGRATED MANAGEMENT SYSTEM**

- (a) Project Co shall comply with the provisions of Schedule 11 – Integrated Management System Requirements.

- (b) Project Co shall cause (A) the Construction Contractor, at its sole cost and expense, to conduct an inspection of its facilities and of its health and safety management systems on an annual basis until Final Completion or as otherwise required in accordance with Sections 9.6(c)(vi)(C) or 9.6(c)(vii)(C) (each, an “**H&S Construction Inspection**”), and (B) cause the Maintenance and Rehabilitation Contractor, at its sole cost and expense, to conduct an inspection of its facilities and its health and safety management systems on an annual basis commencing on the first anniversary of the Substantial Completion Date and thereafter until the end of the Project Term or as otherwise required in accordance with Sections 9.6(c)(vi)(C) or 9.6(c)(vii)(C), (each, an “**H&S Maintenance Inspection**”), which H&S Construction Inspection and H&S Maintenance Inspection shall:
- (i) be conducted by a Certified H&S Inspector;
  - (ii) during the performance of the Works, include, at a minimum (A) a review of general compliance with all applicable *Occupational Health and Safety Act* (Ontario) requirements, compliance with all safety manuals applicable to the Site at which the Works are being conducted and (B) a review of the Construction Contractor’s job hazard analysis documentation on any portion of the Lands which could endanger or put at risk the safety of any Person working at the Site; and
  - (iii) during the performance of the Maintenance and Rehabilitation Services, include, at a minimum (A) a review of general compliance with all applicable *Occupational Health and Safety Act* (Ontario) requirements, and compliance with all safety manuals applicable to the provision of the Maintenance and Rehabilitation Services and (B) a review of the Maintenance and Rehabilitation Contractor’s job hazard analysis documentation relating to the provision of Maintenance and Rehabilitation Services.
- (c) Project Co shall cause the results of each H&S Construction Inspection (such results referred to as the “**H&S Construction Inspection Report**”) to be delivered to the City and the Works Committee not more than 10 Business Days from the date on which a H&S Construction Inspection is completed. An H&S Construction Inspection Report arising from an H&S Construction Inspection shall be tabled and presented by Project Co for discussion by the Works Committee at the next meeting of the Works Committee that follows the date on which such H&S Construction Inspection Report was issued.
- (d) Project Co shall cause the results of each H&S Maintenance Inspection (such results referred to as the “**H&S Maintenance Inspection Report**”) to be delivered to the City and the Maintenance Committee not more than 10 Business Days from the date on which a H&S Maintenance Inspection is completed. Any H&S Maintenance Inspection Report arising from an H&S Maintenance Inspection shall be tabled and presented by Project Co for discussion by the Maintenance Committee at the next meeting of the Maintenance Committee that follows the date on which such H&S Maintenance Inspection Report was issued.
- (e) To the extent an H&S Construction Inspection Report or H&S Maintenance Inspection Report, as the case may be, discloses any non-compliance by the COR-Qualified Construction Project Co Party, the COR-Certified Construction Project Co Party, the ISO 45001 Certified Maintenance and Rehabilitation Project Co Party, or the COR-Qualified Maintenance and Rehabilitation Project Co Party, as the case may be, with the terms of the COR Certification or OHSAS 18001

Accreditation, as the case may be, the City shall have the right to require Project Co to cause the COR-Qualified Construction Project Co Party, the COR-Certified Construction Project Co Party, the COR-Qualified Maintenance and Rehabilitation Project Co Party and the ISO 45001 Certified Maintenance and Rehabilitation Project Co Party, as the case may be, at its sole cost and expense:

- (i) to take any corrective and remedial action required by the H&S Construction Inspection Report or H&S Maintenance Inspection Report, as the case may be, to correct any such non-compliance, and Project Co shall cause the COR-Qualified Construction Project Co Party, the COR-Certified Construction Project Co Party, the COR-Qualified Maintenance and Rehabilitation Project Co Party and the ISO 45001 Certified Maintenance and Rehabilitation Project Co Party, as the case may be, to comply with all instructions given by the Certified H&S Inspector in respect of actions required to be taken to correct any such non-compliance;
- (ii) to arrange to have conducted by a Certified H&S Inspector such follow-up H&S Construction Inspections and H&S Maintenance Inspections, as the case may be, of those facilities and health management systems associated with the non-compliances identified in the relevant H&S Construction Inspection Report (each, an “**H&S Construction Re-Inspection**”) or in the relevant H&S Maintenance Inspection Report (each an “**H&S Maintenance Re-Inspection**”), in each case, within 10 Business Days from the date on which any such request is made by the City, until any and all corrective and remedial actions required by the Certified H&S Inspector with respect to the correction of each identified non-compliance is completed to the satisfaction of the Certified H&S Inspector;
- (iii) to cause the results of each H&S Construction Re-Inspection (such results referred to as the “**H&S Construction Re-Inspection Report**”) to be delivered to the City and the Works Committee not more than 10 Business Days from the date on which an H&S Construction Re-Inspection is completed. An H&S Construction Re-Inspection Report arising from an H&S Construction Re-Inspection shall be tabled and presented by Project Co for discussion by the Works Committee at the next meeting of the Works Committee that follows the date on which such H&S Construction Re-Inspection Report was issued; and
- (iv) to cause the results of each H&S Maintenance Re-Inspection (such results referred to as the “**H&S Maintenance Re-Inspection Report**”) to be delivered to the City and the Maintenance Committee not more than 3 Business Days from the date on which an H&S Maintenance Re-Inspection is completed. An H&S Maintenance Re-Inspection Report arising from an H&S Maintenance Re-Inspection shall be tabled and presented by Project Co for discussion by the Maintenance Committee at the next meeting of the Maintenance Committee that follows the date on which such H&S Maintenance Re-Inspection Report was issued.

## 14. ACCESS TO THE LANDS

### 14.1 Access to Lands

- (a) Subject to this Section 14 and the provisions of Schedule 33 – Lands, including any restrictions on use and access set out in Schedule 33 – Lands, the City shall grant or have caused to be granted, and shall continuously grant or cause to be granted, to Project Co and Project Co Parties, non-exclusive license right of use and access to the Lands as are required by Project Co and Project Co Parties sufficient (subject to Project Co performing its obligations described in the Project Co Permits, Licences, Approvals and Authorizations and subject to the timing and extent of the grant of use and access to the Lands set out in Schedule 33 – Lands) to allow Project Co and Project Co Parties to perform those Project Operations to be performed on the Lands. The rights granted to Project Co pursuant to this Section 14.1(a) shall be effective on the later of,
  - (i) the date of Financial Close; and
  - (ii) the commencement date for access to individual parcels of the Lands as set out in Schedule 33 – Lands.
- (b) Subject to Project Co's obligation to comply with the other terms and conditions set forth in this Project Agreement and the other Project Documents, Project Co shall ensure that each Project Co Party shall at all times, when entering the Lands, act in a manner consistent with the obligations of Project Co under the Project Agreement.
- (c) In consideration for the use and access granted pursuant to Section 14.1(a), Project Co shall provide the Project Operations subject to and in accordance with this Project Agreement.
- (d) Without derogating from any of the City's rights hereunder, in particular, its rights of access to the Lands prior to the Substantial Completion Date for the purposes of any City Commissioning, and subject to any restrictions set out in Schedule 33 – Lands, the City acknowledges that, in respect of the Project Operations, Project Co and the Project Co Parties require, and the City shall provide access to the Lands without material interference by the City or any City Party for such period of time identified in Sections 14.1(a) applicable thereto.
- (e) None of the rights granted pursuant to this Section 14.1 shall:
  - (i) grant access to any lands beyond the boundaries of the Lands, or to any lands other than the Lands, other than easements and similar interests of the City which are obtained after Commercial Close and which are intended to benefit the Lands, to the extent the same are necessary for the Project Operations or exceed any restrictions set out in Schedule 33 - Lands;
  - (ii) grant access to any facilities or infrastructure of the City, Utility Companies or any other third parties, except as set out in Schedule 33 – Lands (which access, if any, is subject to Section 14.2); or
  - (iii) except as otherwise expressly provided in this Project Agreement, be interpreted as permitting Project Co to alter, damage, remove or destroy any structure that may be extending over or encroaching upon the Lands from adjoining properties without the prior written consent of the City, such consent not to be unreasonably withheld it being acknowledged that Project Co will be required to provide the City with reasonable prior written notice of any such interference or encroachment encountered during the course of

the Works and to achieve a consensus with the City as to the means to address such interference or encroachment.

- (f) The use and access rights provided in this Section 14.1 shall automatically terminate as of the Termination Date, save and except for the earlier termination of the use and access rights specified in Schedule 33 – Lands.
- (g) For greater certainty, the use and access rights provided in this Section 14.1 shall not entitle Project Co or any Project Co Party to extract any mineral from the Lands for use in the Project Operations.
- (h) The City shall acquire use of and access to the Lands described in Schedule 33 – Lands on or prior to the applicable commencement date for access set out in Schedule 33 – Lands. The City shall provide Notice to Project Co of the commencement of access rights to the Lands as such access is obtained by the City.

#### **14.2 Non-exclusive License to Lands / Development of Lands**

- (a) Project Co acknowledges and agrees that the rights granted to Project Co and the Project Co Parties hereunder to the Lands shall be non-exclusive and that the City and any person authorized by the City may occupy and possess the Lands, the System Infrastructure and the New Municipal Infrastructure (in each case on the Lands) without the prior consent of Project Co, including for the purposes of carrying out the Governmental Activities and the Other Works. In exercising its rights Project Co shall not, and shall require that the Project Co Parties shall not, except as permitted under this Project Agreement, disrupt the performance of the Governmental Activities or the Other Works.
- (b) Without limiting Section 14.2(a), Project Co acknowledges that the City may, from time to time, use or develop (including by way of subdivision), or permit the use or development of, or dispose of, portions of the Lands (or interests in the Lands), other than those portions of the Lands (or interests in the Lands) necessary for the performance of the Project Operations. To the extent that such use, development or disposition materially adversely interferes with Project Co's license rights hereunder or materially adversely interferes with Project Co's ability to perform the Project Operations, such use, development or disposition shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation. For greater certainty, but without limiting the generality of the foregoing, Project Co acknowledges and agrees that certain of the Lands, shall be subject to the restrictions set out in Schedule 33 – Lands.
- (c) Project Co shall be solely responsible to arrange all access to lands that it requires to access System Infrastructure or New Municipal Infrastructure not otherwise provided for in accordance with Schedule 33 – Lands and any Permits, Licences, Approvals and Authorizations. Project Co shall observe, perform and comply with all terms and conditions in Third Party Access Agreements applicable to the access, use and occupation of those parts of the Lands affected by Third Party Access Agreements and the performance of Project Operations on New Municipal Infrastructure or any component thereof.

#### **14.3 Naming and Signage**

- (a) Project Co acknowledges that the City reserves and retains,
  - (i) all rights to designate the name for the System Infrastructure, or any part thereof, and the New Municipal Infrastructure and to retain all revenues derived from the sponsorship of such names;
  - (ii) all rights to signage in relation to the Lands and any part of the System Infrastructure and the New Municipal Infrastructure; and
  - (iii) all rights, Trade-Marks, naming or branding regarding the System Infrastructure, or any parts thereof and the New Municipal Infrastructure.
- (b) Without limiting the City's rights pursuant to Section 14.3(a), with the prior written consent of the City, which may take into consideration any applicable governmental guidelines, including guidelines set out in Schedule 18 - Communications and Stakeholder Engagement Obligations and Schedule 33 – Lands, Project Co, the Project Co Parties and the Lenders may, for the period prior to Substantial Completion, erect and maintain signage (which may include such parties' logos and trade names) at or on the Lands identifying their respective roles in connection with the development and construction of the Project provided that such signage is erected and maintained in accordance with the requirements and restrictions set out in this Project Agreement, including Schedule 15 – Output Specifications and Schedule 18 – Communication and Stakeholder Engagement Obligations.

#### **14.4 No Interest in Land, Facilities or Infrastructure**

- (a) Project Co acknowledges and agrees that neither Project Co nor the Lenders shall acquire any estate, right, title or ownership interest in the Lands or any part of the System Infrastructure or the New Municipal Infrastructure or any other interest in land, facilities or infrastructure pursuant to this Project Agreement or otherwise. Notwithstanding any provision herein or in any of the Project Documents to the contrary, all fee simple interest in and freehold title to the Lands, or any part thereof, shall at all times remain unencumbered by any interest of Project Co or the Lenders. Project Co and the Lenders shall have access to the Lands and the New Municipal Infrastructure under and subject to the licences and access rights granted under this Section 14 and the Lenders' Direct Agreement, respectively.

#### **14.5 Non-Disturbance Agreement**

- (a) If the City mortgages, charges or otherwise encumbers the Lands, the City shall notify Project Co and, at the request of Project Co, provide Project Co with an agreement, in form satisfactory to Project Co, acting reasonably, executed by the mortgagee of the Lands permitting Project Co and the Lenders' Agent to access and use the Lands under the use and access granted pursuant to this Section 14 and the Lenders' Direct Agreement, respectively, free from interference from such mortgagee or any person claiming by or through such mortgagee. This Section 14.5 shall not apply in respect of any portion of such Lands used or developed pursuant to Section 14.2(b) if neither the license granted pursuant to this Section 14 nor the Project Operations pertain to such portion of the Lands.

#### **14.6 Adjustments to Lands Available to Project Co**

- (a) [REDACTED]
- (b) [REDACTED]
- (c) Project Co shall be entitled to obtain any properties (or obtain temporary access to any properties) at its own cost and expense, however, such properties shall not, for the purposes of this Project Agreement, be Lands and no System Infrastructure or New Municipal Infrastructure shall be located on, or rely in any way upon, on any properties which Project Co acquires pursuant to this Section 14.6(c).

## **15. ENCUMBRANCES**

### **15.1 Project Co Shall Perform Obligations Under Encumbrances**

- (a) Project Co's access to and use of the Lands or any part thereof granted in Article 14 shall be subject to the Encumbrances.
- (b) Subject to Section 15.2, Project Co shall perform all obligations of the City under all Encumbrances for or on behalf of the City, other than:
  - (i) obligations which Project Co is not legally capable of performing for or on behalf of the City; and
  - (ii) obligations which the applicable counterparty to such Encumbrance formally relieves or waives Project Co from performing, with the consent of the City, in its sole discretion (and if such relief or waiver is not consented to by the City, and subject to Section 15.1(b)(i), Project Co shall perform such obligations in accordance with this Section 15).
- (c) Project Co, whether before, during or after the completion of the Works, shall not in any manner breach the Encumbrances.

### **15.2 No Encumbrances**

- (a) Project Co shall not create, incur, permit or suffer to exist any Encumbrance to be created, filed, issued or registered upon or against the Lands or any part of them or any interest therein due to an act or omission of Project Co or any Project Co Party.
- (b) Project Co does not have title to the Lands or any interest therein, and no act or omission by Project Co or any Project Co Party shall give rise to a right for any person to obtain title to or any interest in the Lands or any part thereof, except:
  - (i) as may be expressly agreed to in writing by the City;
  - (ii) as may be expressly permitted by the terms of this Project Agreement; or
  - (iii) as may be permitted under Applicable Law, but without limiting Project Co's obligations under Sections 15.2(c)(i) and 15.3(a).

- (c) In the event that the Lands or any part thereof or any interest therein becomes subject to any Encumbrance following Financial Close:
- (i) due to an act or omission of Project Co or any Project Co Party (which has not been consented to in writing by the City), Project Co shall immediately take all steps necessary to terminate, remove, vacate or discharge such Encumbrance. If such Encumbrance is not terminated, removed, vacated or discharged within ten (10) Business Days of Project Co becoming aware of the creation, filing, issuance or registration of such Encumbrance, then, without prejudice to any other rights or remedies it may have, the City may take whatever steps it deems necessary and appropriate (in its sole discretion) to terminate, remove, vacate or discharge the Encumbrance, including payment of any amount owing or claimed thereunder, and seek immediate recovery from Project Co of the amount of any such payment and any associated costs, including legal costs (on a full indemnity basis), all of which shall be payable on demand, and Project Co hereby appoints the City as Project Co's attorney to execute any termination or discharge of an Encumbrance referred to in this Section 15.2(c)(i), which appointment is coupled with an interest and shall be irrevocable for the Project Term and thereafter so long as any of Project Co's obligations under this Section 15.2(c)(i) are outstanding;
  - (ii) due to an act or omission of Project Co or any Project Co Party (which has been consented to in writing by the City), Project Co shall perform all obligations under such Encumbrance in accordance with Sections 15.1 and 15.3 (as is applicable) and at its sole cost and expense; or
  - (iii) which is not due to an act or omission of Project Co or any Project Co Party, prior to performing obligations under any such Encumbrance, Project Co shall promptly notify the City of any such Encumbrance and the City may elect, in its sole discretion, to:
    - (A) have such Encumbrance be removed, vacated or discharged at the City's sole cost and expense;
    - (B) perform the required obligations thereunder; or
    - (C) instruct Project Co to perform the required obligations thereunder.
- (d) For the purposes of this Section 15 if,
- (i) an encumbrance otherwise identified in Sections (b) (viii), (ix) or (x) of Schedule 16 – Encumbrances has not been complied with (excluding non-compliance by Project Co and Project Co Parties) and such non-compliance materially interferes with the use of the Lands for the purposes of the Project Operations; or
  - (ii) an encumbrance otherwise identified in Sections (b) (vii), (viii), (ix) or (x) of Schedule 16 – Encumbrances was not disclosed to Project Co and was not ascertainable through commercially standard off-title searches, and such encumbrance materially interferes with the use of the Lands for the purposes of Project Operations,

the City shall be entitled to the same election as set out in Section 15.2(c)(iii), subject to Section 15.2(e). Project Co shall promptly notify the City of any such encumbrance upon Project Co becoming aware of such encumbrance.

- (e) If Project Co is instructed to perform obligations under an Encumbrance pursuant to Section 15.2(c)(iii) or Section 15.2(d), which performance imposes costs or delays in the performance of Project Operations, such performance,
  - (i) prior to Substantial Completion shall, subject to and in accordance with Section 38, be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event; and
  - (ii) following Substantial Completion shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation.
- (f) In the event that any portion of the Lands becomes subject to any encumbrance following Financial Close due to an act or omission of Project Co or any Project Co Party, Project Co acknowledges and agrees that it will be required to remove, vacate or discharge such encumbrance. For the purposes of the foregoing, “encumbrance” includes those matters included in Encumbrances, insofar as they relate to or affect the Lands.
- (g) In respect of Encumbrances that are contained in Third Party Access Agreements, Project Co shall, as part of the Project Operations, at its own cost and risk and in a manner compliant with and so as not to cause a default by the City under the terms of the Third Party Access Agreement, (i) observe, comply with, perform and complete all obligations of the City contained in all Third Party Access Agreements, and (ii) schedule the performance of the Project Operations in accordance with the requirements set out in the Third Party Access Agreements and in Schedule 15-Output Specifications. In the event that any act or omission of Project Co or any Project Co Party causes a default under a Third Party Access Agreement, Project Co shall indemnify, save harmless and pay all costs (including legal costs), damages (including liquidated damages), penalties, fines, charges and other amounts payable under the Third Party Access Agreement as a result of such act or omission.
- (h) Unless expressly stated in Schedule 15 – Output Specifications that the Third Party Access Agreement is to be fully and formally assigned to and assumed by Project Co as part of its obligations under this Project Agreement, the City shall continue to maintain the contractual interface with the counterparties to the Third Party Access Agreements, to pay all amounts required to be paid under the applicable Third Party Access Agreement, and continue to collect all payments, rents, fees, costs, charges and other amounts payable under the applicable Third Party Access Agreement. Without diminishing the responsibility of Project Co under this Section 15.2, the City and Project Co will discuss and coordinate the performance of their respective roles and responsibilities under each of the Third Party Access Agreements with a view to minimizing the potential for default thereunder.

### **15.3 Construction Lien Act (Ontario)**

- (a) The Parties acknowledge that Section 15.2 shall apply to claims for liens made against the Lands pursuant to the CLA and shall also apply to claims made against the City or the holdback under the CLA as though such a claim were an Encumbrance against the Lands as referred to therein.

- (b) Project Co shall withhold from each Subcontractor the holdbacks required under the CLA and shall deal with such holdbacks in accordance with the CLA.
- (c) Project Co shall, as a condition of final payment under any Subcontract for which lien rights or rights in respect of the holdback may be claimed under the CLA, require that a certificate of completion under Section 33(1) of the CLA for such Subcontract be issued and the relevant Subcontractor provide statutory declarations or other assurances confirming that all those engaged by the Subcontractor have been paid in accordance with Applicable Law.
- (d) Project Co shall follow the requirements of the CLA and Good Industry Practice for posting and advertising certificates of completion when issued.
- (e) Project Co shall promptly provide the City with a copy of any materials which are provided to the Lenders to evidence compliance with the CLA.
- (f) Upon request by the City, Project Co shall perform and deliver to the City a sub-search of title on the Lands or any part thereof. The City shall pay the reasonable costs of any such search except (i) a search that reveals Encumbrances that are not permitted by this Project Agreement, (ii) a search requested based on a reasonable suspicion that an Encumbrance that is not permitted by this Project Agreement has been registered on title to the Lands, and (iii) a search requested for the purpose of confirming that an Encumbrance that is not permitted by this Project Agreement has been discharged from title to the Lands.
- (g) Project Co shall cause a Payment Certifier to be appointed under the Construction Contract and shall cause such Payment Certifier to certify the substantial performance of the Construction Contract in accordance with the CLA.
- (h) The City shall provide Project Co with any notice of lien that is delivered to the City in connection with the Works promptly (and in any event within 5 Business Days) following receipt thereof.

## **16. SITE CONDITION**

### **16.1 Acceptance of Site Condition**

- (a) Subject to Sections 6.4, 16.1(b), 16.2, 16.3, 16.4, 16.5, 16.7, 16.8, 16.9 and 16.10, Project Co acknowledges and agrees that it has inspected or investigated the Lands, the Existing Trillium Line Assets and the Site Conditions, including the Background Information, prior to executing this Project Agreement and agrees to accept the Lands, the Existing Trillium Line Assets and the Site Conditions on an “as is, where is” basis. Without limiting the generality of the foregoing, but subject to Sections 6.4, 16.1(b), 16.2, 16.3, 16.4, 16.5, 16.7, 16.8, 16.9 and 16.10, Project Co shall not be entitled to make any claim of any nature whatsoever against the City or any City Party on any grounds relating to the Lands, the Existing Trillium Line Assets or the Site Conditions, including the fact that incorrect or insufficient information on any matter relating to the Lands, the Existing Trillium Line Assets or the Site Conditions was given to it by any person, whether or not a City Entity or a City Party.

- (b) Section 16.1(a) is not intended to prohibit Project Co from relying upon information that has been provided by a person or other entity who has given Project Co an express written entitlement to rely on that information, provided, however, that, subject to Sections 6.4, 16.2, 16.3, 16.4, 16.5, 16.7, 16.8, 16.9 and 16.10, Project Co shall not be entitled to make any claim of any nature whatsoever against the City or any City Party on any grounds relating to the information provided by that person. For clarity, subject to Sections 6.4, 16.2, 16.3, 16.4, 16.5, 16.7, 16.8, 16.9 and 16.10, Project Co's legal recourse shall be against the person or other entity that provided the express written entitlement to rely on the information and not the City or any City Party.
- (c) Subject to Sections 6.4, 16.1(b), 16.2, 16.3, 16.4, 16.5, 16.7, 16.8, 16.9 and 16.10 Project Co acknowledges and agrees that it has and shall be deemed to have:
  - (i) performed all necessary due diligence and investigation or inspection on the Lands and examined the Lands and their surroundings and the Existing Trillium Line Assets;
  - (ii) performed all necessary due diligence and investigation or inspection on Existing Trillium Line Assets and satisfied itself prior to executing this Project Agreement as to the structural, environmental and general condition of such Existing Trillium Line Assets;
  - (iii) satisfied itself as to the presence of any Contamination on, in or under the Lands, or migrating to or from the Lands in accordance with Good Industry Practice, taking into account all matters relating to the Lands, including any Existing Trillium Line Assets, and any other buildings, structures and works, on, over and under the Lands existing on the date hereof;
  - (iv) satisfied itself as to the adequacy of the rights of access to, from and through the Lands and any accommodation it may require for the purposes of fulfilling its obligations under this Project Agreement;
  - (v) satisfied itself as to the possibility of interference by persons of any description whatsoever with access to or use of, or rights in respect of, the Lands;
  - (vi) satisfied itself as to the precautions, times and methods of working necessary to prevent any nuisance or interference, whether public or private, being caused to any third parties; and
  - (vii) in accordance with Good Industry Practice, taking into account all matters relating to the Lands, including the presence of any Existing Trillium Line Assets and any other buildings, structures and works, on over and under the Lands existing on the date hereof satisfied itself as to the nature of the Site Conditions, the ground and the subsoil, the level and quantity of groundwater, the form and nature of the Lands, the loadbearing and other relevant properties of the Lands, the risk of injury or damage to property affecting the Lands, the nature of the materials (whether natural or otherwise) to be excavated and the nature of the design, work and materials necessary for the execution and delivery of the Works.
- (d) Project Co further acknowledges and agrees that, other than as referred to or contained in this Project Agreement, no representations or warranties have been made, nor documentation

delivered to Project Co or any Project Co Party, which would indicate that Project Co would be unable to perform the Project Operations in a lawful manner.

## 16.2 Contamination

- (a) To the extent required to complete the Works, at all times throughout the Project Term, Project Co shall be responsible for managing, remediating and/or removing, in accordance with Section 4.5(a) of Schedule 17 – Environmental Obligations, any Contamination located on, in or under the Lands which was described in, or was properly inferable, readily apparent or readily discoverable from, the Environmental Reports or the Geotechnical Reports (“**Existing Contamination**”). Notwithstanding the forgoing or anything else to the contrary contained in this Agreement, Project Co shall have no responsibility for any Contamination that is migrating to or from the Lands, except (I) to the extent that Project Co or any Project Co Party Released such Contamination in a manner which does not comply with Applicable Law or (II) Project Co or any Project Co party is causing the migration of Existing Contamination.
- (b) Project Co shall be responsible for removing or remediating, in accordance with Section 4.5(g) of Schedule 17 – Environmental Obligations:
  - (i) any Contamination which Project Co or any Project Co Party has brought onto the Lands and caused or permitted to be Released in a manner which does not comply with Applicable Law; or
  - (ii) any Existing Contamination which was harmless or stored, contained or otherwise dealt with in accordance with Applicable Law which Project Co or any Project Co Party causes or permits to be Released in a manner which does not comply with Applicable Law.

In addition, and without limiting any other obligation of Project Co under the Project Agreement, Project Co shall be responsible for all Direct Losses associated with the Releases of Contamination or Existing Contamination described in Sections b(i) and b(ii) above.

- (c) Contamination which is not the responsibility of Project Co pursuant to Sections 16.2(a) and 16.2(b) shall be the responsibility of the City.
- (d) [Intentionally Deleted].
- (e) Upon the discovery of any Contamination, Project Co shall immediately inform the City Representative and shall comply, and ensure compliance by all Project Co Parties, with all Applicable Law and Schedule 17 - Environmental Obligations in respect thereof:
  - (i) at the City’s cost pursuant to Section 16.2(h), in respect of Contamination for which the City is responsible pursuant to Section 16.2(c); and
  - (ii) at its own cost in respect of Contamination for which it is responsible pursuant to Section 16.2(a) or 16.2(b).
- (f) Except to the extent required to prevent or mitigate an Emergency or to comply with Applicable Law, Project Co shall not undertake any significant work pursuant to Section 16.2(e) in respect of

Contamination for which the City is responsible pursuant to Section 16.2(c) until the City Representative has been given a reasonable opportunity to review the nature and extent of the Contamination and has instructed Project Co to proceed with such work.

- (g) In the event that the City wish Project Co to perform actions in respect of any Contamination which are in addition to any required pursuant to Section 16.2(e), then the City shall issue an instruction to Project Co specifying what action the City requires Project Co to take and Project Co shall promptly and diligently comply with all such instructions at the City's cost pursuant to Section 16.2(h).
- (h) If Sections 16.2(e), 16.2(f) or 16.2(g) require Project Co to perform any alteration, addition, demolition, extension or variation in the Project Operations as a result of Contamination for which the City is responsible pursuant to Section 16.2(c) or as a result of any instructions given by the City pursuant to Section 16.2(f) and which would not otherwise be required under this Project Agreement, then any such alteration, addition, demolition, extension or variation:
  - (i) prior to Substantial Completion, shall, subject to and in accordance with Section 38, be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event; and
  - (ii) following Substantial Completion, shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation.
- (i) In the event that the City and Project Co do not agree as to the nature or extent of Contamination, or in the event of a disagreement as to whether Project Co. is responsible for Contamination pursuant to either Sections 16.2(a) or 16.2(b), or the actions to be performed by Project Co pursuant to Section 16.2(d) or Schedule 17 - Environmental Obligations, such disagreement shall be referred for determination to the Independent Certifier, and if the Independent Certifier is unable to make the determination, then he or she shall appoint an independent and suitably qualified and experienced person to make such determination (and the costs and expenses of retaining such person shall be borne by the unsuccessful Party). Such person's decision shall be final and binding on the Parties only in respect of the nature or extent of the Contamination and any action to be performed by Project Co pursuant to Section 16.2(e) and Schedule 17 – Environmental Obligations, except to the extent that either Party alleges that such decision would result in non-compliance with Applicable Law or this Project Agreement, in which event either Party may refer the disagreement for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.

### **16.3 Items of Geological, Historical Heritage or Archaeological Interest or Value**

- (a) As between the Parties, all fossils, artifacts and other objects having artistic, historic, archaeological or monetary value, including human remains and burial sites, which may be found on or at the Lands are or shall be the sole and absolute property and responsibility of the City or the owner of the relevant property, as applicable.
- (b) The City shall be responsible for items referred to in Section 16.3(a) except for any such items that were described in, or were properly inferable, readily apparent or readily discoverable from,
  - (i) the Archaeological Reports; or

- (ii) any Cultural Heritage Reports.
- (c) Upon the discovery of any item referred to in Section 16.3(a), Project Co shall:
  - (i) immediately inform the City Representative of such discovery; and
  - (ii) take all steps not to disturb the item and, if necessary, cease any Project Operations in so far as performing such Project Operations would endanger the item or prevent or impede its excavation, take all necessary steps to preserve and ensure the preservation of the item in the same position and condition in which it was found, and comply, and ensure compliance by all Project Co Parties, with Applicable Law and all requirements of Governmental Authorities with respect to such discovery, including the *Funeral, Burial and Cremations Services Act, 2002* (Ontario) and the *Standards & Guidelines for Conservation of Provincial Heritage Properties* issued under the *Ontario Heritage Act* (Ontario) and the *Standards and Guidelines for the Conservation of Historic Places in Canada*:
    - (A) at the City's cost pursuant to Section 16.3(e), in respect of any such discovery for which the City is responsible pursuant to Section 16.3(b); and
    - (B) at its own cost in respect of any such discovery for which it is responsible pursuant to Section 16.3(b),
  - (iii) comply with all requirements set out in Part 6 of Schedule 17-Environmental Obligations.
- (d) In the event that the City wishes Project Co to perform actions in respect of any discovery of any item referred to in Section 16.3(a) which are in addition to any required pursuant to Section 16.3(c), then the City shall issue an instruction to Project Co specifying what action the City requires Project Co to take and Project Co shall promptly and diligently comply with all such instructions at the City's cost pursuant to Section 16.3(e).
- (e) If Sections 16.3(c) or 16.3(d) require Project Co to perform any alteration, addition, demolition, extension or variation in the Project Operations as a result of any such discovery for which the City is responsible pursuant to Section 16.3(b) or as a result of any instructions given by the City pursuant to Section 16.3(d) and which would not otherwise be required under this Project Agreement, then any such alteration, addition, demolition, extension or variation shall,
  - (i) prior to Substantial Completion (but in the case of Section 16.3(c), only to the extent it directly results in the interruption of the Works), subject to and in accordance with Section 38, be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event; and
  - (ii) following Substantial Completion, subject to and in accordance with Schedule 21 – Variation Procedure, result in a Variation.
- (f) In the event that the City and Project Co do not agree as to the nature or extent of the actions required to be performed by Project Co pursuant to Section 16.3(c)(ii), such disagreement shall be referred for determination to the Independent Certifier, and if the Independent Certifier is unable to make the determination, then he or she shall appoint an independent and suitably qualified and

experienced person to make such determination (and the costs and expenses of retaining such person shall be borne by the unsuccessful Party). Such person's decision shall be final and binding on the Parties except to the extent that either Party alleges that such decision would result in non-compliance with Applicable Law or this Project Agreement, in which event either Party may refer the disagreement for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.

#### **16.4 Species-at-Risk**

- (a) Project Co shall be responsible for any Species-at-Risk which may be found on, in or at the Site, the occurrence of which, in the location in which it is found was described in the Environmental Assessments. The City shall be responsible for any Species-at-Risk which may be found on, in or at the Site, except for any Species-at-Risk the occurrence of which, in the location in which it is found was described in the Environmental Assessments
- (b) In respect of Species-at-Risk for which Project Co is responsible pursuant to Section 16.4(a), Project Co shall, at its own cost, comply, and ensure compliance by all Project Co Parties, with all Applicable Law and the provisions of Schedule 17 – Environmental Obligations. Upon the discovery of any Species-at-Risk for which the City is responsible pursuant to Section 16.4(a), Project Co shall:
  - (i) immediately inform the City Representative of such discovery; and
  - (ii) comply, and ensure compliance by all Project Co Parties, with all Applicable Law and the provisions of Schedule 17 - Environmental Obligations in respect thereof, including taking all necessary steps to preserve the respective habitat and relocate the Species-at-Risk at the City's cost pursuant to Section 16.4(d).
- (c) In the event that the City wishes Project Co to perform actions which are in addition to any required pursuant to Section 16.4(b), then the City shall issue an instruction to Project Co specifying what action the City requires Project Co to take and Project Co shall promptly and diligently comply with all such instructions at the City's cost pursuant to Section 16.4(d).
- (d) If Sections 16.4(b) or 16.4(c) require Project Co to perform any alteration, addition, demolition, extension or variation in the Project Operations as a result of the discovery of any Species-at-Risk for which the City is responsible pursuant to Section 16.4(a) or as a result of any instructions given by the City pursuant to Section 16.4(c) and which would not otherwise be required under this Project Agreement, then any such alteration, addition, demolition, extension or variation:
  - (i) prior to Substantial Completion shall, subject to and in accordance with Section 38, be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event; and
  - (ii) following Substantial Completion shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation.

#### **16.5 Defects – Existing Vehicle Fleet**

- (a) From Financial Close to the commencement of the Shutdown Period, the City agrees (i) to

continue to use and operate the Existing Vehicle Fleet in a manner and at service levels consistent with the manner and service levels with which the Existing Vehicle Fleet was used prior to Financial Close, and (ii) to cause the maintenance, repair, refurbishment and replacement of the components of the Existing Vehicle Fleet in accordance with Existing Vehicle Maintenance Standard.

- (b) As at 9:00 a.m. on the commencement date of the Shutdown Period, the City shall hand over, and Project Co shall assume, full care, custody, control, risk and responsibility for the Existing Vehicle Fleet, including any Defects or Latent Defects in the Existing Vehicle Fleet, and, for greater certainty, notwithstanding that Project Co may be disputing, in accordance with this Section 16.5, that the Existing Vehicle Maintenance Standard has not been observed and complied with by the City. The City shall, concurrent with the hand over, prepare a report summarizing the status of all outstanding Defects in the Existing Vehicle Fleet which have been identified to the City as at that time.
- (c) Project Co acknowledges having been provided with Background Information relating to, and several opportunities prior to Financial Close to inspect, the Existing Vehicle Fleet. Following Financial Close, and on a monthly basis thereafter until the commencement of the Shutdown Period, the City shall, with reasonable promptness, provide to Project Co (i) written confirmation from the City that the maintenance requirements prescribed in the Existing Vehicle Maintenance Standard have been performed, together with copies of the maintenance records relating to the Existing Vehicle Fleet (collectively, the “**Vehicle Maintenance Records**”), (ii) the schedule of future dates and proposed major maintenance activities to be performed in connection with the Existing Vehicle Fleet (the “**Major Maintenance Schedule**”), and (iii) 5 Business Days’ notice and the opportunity to have a competent representative present to observe the planned major maintenance and repair activities relating to the Existing Vehicle Fleet (a “**Planned Major Maintenance Activity**”). Project Co shall provide to the City written notice of its intention to attend and observe a Planned Major Maintenance Activity and the persons who will be attending and observing such event at least 3 Business Days prior to the applicable date stipulated in the Major Maintenance Schedule. The City shall make reasonable efforts to accommodate such requests, but Project Co acknowledges and agrees that on occasion, unscheduled and emergency maintenance or repair items are required to be performed, and that on such occasions, it may be expedient to attend to upcoming scheduled maintenance or repair activities while the emergency maintenance or repair item is addressed. In these circumstances, the City will not be able to provide 5 Business Days notice of the event to allow for observation of such activities, but will provide as much notice to Project Co as is reasonably practicable in the circumstances.
- (d) The City shall be deemed to have complied with its obligations to maintain the Existing Vehicle Fleet to the Existing Vehicle Maintenance Standard as detailed in the applicable Vehicle Maintenance Records and Project Co shall be deemed to have accepted that the Existing Vehicle Maintenance Standard as reflected by the applicable Vehicle Maintenance Records has been observed and complied with by the City unless it provides to the City, within 10 Business Days of (i) each delivery of copies of Vehicle Maintenance Records from time to time, or (ii) each Planned Major Maintenance Activity in accordance with the Major Maintenance Schedule (or each unscheduled emergency maintenance or repair activity as set out in Section 16.5(c)) written notice of any failures of the City to meet the Existing Vehicle Maintenance Standard revealed by the relevant Vehicle Maintenance Records or, subject as aforesaid, such Planned Major Maintenance Activity.

- (e) The City shall consider the contents of any notice provided by Project Co pursuant to Section 16.5(d), and shall advise Project Co within a reasonable time of receipt of such notice as to whether it agrees with the contents of the notice and, if applicable, what steps the City proposes to take to comply with the Existing Vehicle Maintenance Standard. In the event that the City and Project Co do not agree as to the nature or extent of the actions required to be performed by the City to meet the requirements of the Existing Vehicle Maintenance Standard, such disagreement shall be referred for determination to the Independent Certifier, and if the Independent Certifier is unable to make the determination, then he or she shall appoint an independent and suitably qualified and experienced person acceptable to Project Co and the City, each acting reasonably, to make such determination (and the costs and expenses of retaining such person shall be borne by the unsuccessful Party). Such person's decision shall be final and binding on the Parties except to the extent that either Party alleges that such decision would result in non-compliance with Applicable Law or this Project Agreement, in which event either Party may refer the disagreement for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.

#### **16.6 Defects – Existing Trillium Line Assets**

- (a) As of and from Financial Close, save and except for the City Retained Existing Structures Latent Defect Responsibility, Project Co shall assume full responsibility for any Latent Defects in the Existing Trillium Line Assets. From Financial Close to the commencement of the Shutdown Period, the City agrees to continue to operate the Existing Trillium Line in a manner and at service levels consistent with the operation of the Existing Trillium Line prior to Financial Close. For clarity, Project Co shall not be responsible for any costs or expenses related to the operation and maintenance of the Existing Trillium Line at any time prior to the commencement of the Shutdown Period except for any damages, costs, expenses, losses or claims arising from any acts or omissions of Project Co or any Project Co Party in respect of the Existing Trillium Line.
- (b) As at 9:00 a.m. on the commencement date of the Shutdown Period the City shall hand over, and Project Co shall assume full care, custody, control, risk and responsibility for the Existing Trillium Line Assets, including without limitation (but subject as hereinafter provided), any Defects or Latent Defects in the Existing Trillium Line Assets. Such assumption of responsibility and liability in respect of the Existing Trillium Line Assets by Project Co is subject only to (i) the City Retained Dow's Lake Latent Defect Responsibility, and, (ii) the City Retained Existing Structures Latent Defect Responsibility.
- (c) Project Co shall maintain the Existing Trillium Line Assets in accordance with the Shutdown Period Transition and Maintenance Plan.

#### **16.7 Latent Defects – Dow's Lake Tunnel Structure**

- (a) At the commencement of the Shutdown Period, Project Co shall, subject to Section 16.7(b), undertake and assume responsibility and liability for (i) performing the maintenance and repairs to the Dows Lake Tunnel Structure described in section 4.8(c)(xxvi) of Part 2 of Schedule 15-2 to the Project Agreement; (ii) performing the installation, maintenance, repair and replacement of the structural or other component within or on the Dows Lake Tunnel Structure affixed, installed or constructed by Project Co; and (iii) the repair of any damage to the Dows Lake Tunnel Structure caused by or resulting from the performance, or any failure by Project Co to perform,

the Project Operations in accordance with the provisions of this Project Agreement (the “**Project Co Assumed Responsibilities for the Dow’s Lake Tunnel Structure**”).

- (b) The City shall retain the City Retained Dow’s Lake Latent Defect Responsibility. In the event that any Latent Defect in the Dows Lake Tunnel Structure is demonstrated by Project Co to impact the ability of Project Co to perform and complete the Project Operations in accordance with the requirements of this Project Agreement, such event shall:
  - (i) prior to Substantial Completion, subject to and in accordance with Section 38, be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event; and,
  - (ii) following Substantial Completion, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation,

provided that any failure by the City in fulfilling this City Retained Dow’s Lake Latent Defect and Maintenance Responsibility or any such Latent Defect in the Dow’s Lake Tunnel Structure was not caused or contributed to by Project Co or a Project Co Party.

#### **16.8 Latent Defects – Existing City Retained Latent Defect Structures**

- (a) Project Co shall, subject to Section 16.8(b), be responsible for the maintenance and repair of the Existing City Retained Latent Defect Structures throughout the Project Term, subject only to the City Retained Existing Structures Latent Defect Responsibility.
- (b) In the event that Project Co is able to demonstrate to the reasonable satisfaction of the City that a Latent Defect exists in the Existing City Retained Latent Defect Structures that:
  - (i) was not within the actual knowledge of Project Co or a Project Co Party, as of Financial Close;
  - (ii) was not referenced or described in, or was not properly inferable, readily apparent or readily discoverable from the Background Information; or
  - (iii) was not caused or contributed to by Project Co or a Project Co Party,

such event shall:

- (A) prior to Substantial Completion, subject to and in accordance with Section 38, be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event; and,
- (B) following Substantial Completion, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation.

#### **16.9 Defects Correction – General Provisions**

- (a) Upon the discovery of a matter that Project Co alleges is a City Retained Dow’s Lake Latent Defect Responsibility or a City Retained Existing Structures Latent Defect Responsibility

(collectively, a “**City Retained Latent Defect Responsibility**”), Project Co shall immediately provide written notice to the City Representative.

- (b) Project Co shall not undertake any work in respect of any alleged City Retained Latent Defect Responsibility until the City Representative has been given a reasonable opportunity to review the nature and extent of the issue and has instructed Project Co to proceed with such work.
- (c) In the event that the City wishes Project Co to remedy any City Retained Latent Defect Responsibility, then the City shall issue an instruction to Project Co specifying what action the City requires Project Co to take and Project Co shall promptly and diligently comply with all such instructions at the City’s cost, subject to and in accordance with Section 16.9(d).
- (d) If the City requires Project Co to perform any alteration, addition, demolition, extension or variation in the Works as a result of instructions given by the City pursuant to Section 16.9(c) and which would not otherwise be required to be performed by Project Co under this Project Agreement, then, if such request is made prior to Substantial Completion, any such alteration, addition, demolition, extension or variation in the Works shall, subject to and in accordance with Section 38, be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event, and if such request is made following Substantial Completion shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation.

#### **16.10 Mislocated or Unknown Utilities**

- (a) Project Co shall be responsible for Utility Infrastructure on the Site pursuant to Schedule 15 – Output Specifications, except for any Utility Infrastructure that is Mislocated Utility Infrastructure within the study area limits represented by the Subsurface Utility Engineering Reports, or is Utility Infrastructure that:
  - (i) was not within the actual knowledge of Project Co or a Project Co Party, as of the date which is 30 days prior to the RFP Technical Submission Deadline; and
  - (ii) was not referenced or described in, or was not inferable, readily apparent or readily discoverable, from the Background Information.
- (b) For the purposes of Section 16.10(a)(i), “actual knowledge” shall mean knowledge that is actually held by the person who was identified as the project manager (or analogous position) for the Project in Project Co’s proposal in response to the Request for Proposals.
- (c) If Utility Infrastructure on the Site that is not the responsibility of Project Co pursuant to Section 16.10(a) delays Project Co’s performance of the Works then any such delay or additional costs in respect of the Works shall, subject to and in accordance with Section 38 be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event.

### **17. GOVERNMENTAL AND THIRD PARTY FINANCIAL OBLIGATIONS**

#### **17.1 Governmental and Utility Company Fees**

- (a) Project Co shall be responsible for,

- (i) all Financial Obligations under or in respect of all Project Co Permits, Licences, Approvals and Authorizations; and
- (ii) all Financial Obligations in respect of the City Permits, Licences, Approvals and Authorizations that are set out as being Project Co's responsibility in Schedule 15 – Output Specifications, Schedule 17 – Environmental Obligations or Schedule 32 – City Permits, Licences, Approvals and Authorizations.

For clarity, and notwithstanding the foregoing, Project Co shall not be responsible for payment of any development charges relating to the Works, System Infrastructure or the New Municipal Infrastructure.

- (b) Subject to Section 17.1(a)(ii), the City shall be responsible for all Financial Obligations under or in respect of all the City Permits, Licences, Approvals and Authorizations, including to the City, any Utility Company, any Governmental Authority or any third party in respect of the Project Operations, including:
  - (i) any engineering administration and inspection fees required in respect of works or services required to be performed;
  - (ii) any security deposits required under any City Permits, Licences, Approvals and Authorizations; and
  - (iii) any other amounts payable under any City Permits, Licences, Approvals and Authorizations.
- (c) The Parties agree that any refund, partial rebate or credit granted by the City, any applicable Utility Company, any applicable Governmental Authority or any other third party relating to the Financial Obligations referred to in Sections 17.1(a) and 17.1(b) shall be for the benefit of the City to the extent such Financial Obligations were paid by the City and shall be for the benefit of Project Co to the extent such Financial Obligations were paid by Project Co. Without limiting the generality of the foregoing, to the extent that the City enters into any cost sharing arrangements with the City, any Utility Company, any Governmental Authority or any third party, Project Co acknowledges and agrees that the City shall be the sole beneficiary of any such cost sharing arrangements and Project Co shall have no entitlement whatsoever to any benefit arising from any such cost sharing arrangements.

## **18. CHANGE IN STANDARDS**

- (a) Where this Project Agreement requires Project Co to comply with a technical standard in respect of the Project Operations, and that standard has changed between the date of this Project Agreement (or in respect of the Revenue Vehicle Supplier only, November 2, 2017) and the date that such compliance is required, then Project Co shall give Notice to the City of such change. If, after such Notice, the City requires compliance with the changed standard (rather than the standard applicable as of the date of this Project Agreement), then, to the extent such change impacts the Project Operations and would not have otherwise been taken into account by compliance with Good Industry Practice, such changed standard shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation. If the City does not

require compliance with the changed standard, then Project Co shall continue to comply with the standard applicable as of the date of this Project Agreement (or in respect of the Revenue Vehicle Supplier only, November 2, 2017), without a Variation therefor. This Section 18 shall not apply where a change in a technical standard is also a Change in Law.

## **19. COORDINATION AND NO DISRUPTION**

- (a) Project Co shall perform the Project Operations so as to coordinate with,
  - (i) subject to and in accordance with Section 9.8 (to the extent applicable), the operations of and the performance of any services by the City, any City Party, any Governmental Authority, any Railway Company, any counterparty to a Third Party Access Agreement and any Utility Company including the performance of the Governmental Activities and the Other Works;
  - (ii) the construction, operation and maintenance of the System Extension in accordance with Schedule 36 – System Extension;
  - (iii) the construction of the interface, connection or inter-connection between the System Infrastructure and the existing City network, including any existing transit systems, highway systems, railway systems, railway networks and any other Ontario or City of Ottawa road or roadway;
  - (iv) Future Known Expansions; and
  - (v) the performance of any services by any Operator.
- (b) Project Co shall use commercially reasonable efforts to minimize:
  - (i) any interference with the operations, construction and maintenance of:
    - (A) the City, any City Party, any Governmental Authority, Fare Control Service Provider, any Other Contractor or Utility Company, including the performance of the Governmental Activities and the Other Works;
    - (B) the existing City network; and
    - (C) the existing City road network;
  - (ii) any lane closures, traffic diversions or restrictions or other impairment of the public's use and enjoyment of the System Infrastructure.

## **20. DESIGN AND CONSTRUCTION OBLIGATIONS**

### **20.1 Overall Responsibility**

- (a) Project Co shall perform and complete the Works:
  - (i) so as to satisfy the Output Specifications;

- (ii) in accordance with the Project Co Proposal Extracts;
  - (iii) in accordance with the Design Data;
  - (iv) in accordance with the Works Schedule; and
  - (v) in accordance with the other terms and conditions of this Project Agreement.
- (b) Without prejudice to Section 20.1(a), but subject to the provisions of the Maintenance and Rehabilitation Requirements, Schedule 19 - Payment Mechanism and Schedule 23 - Expiry Transition Procedure, if, at any time during the Project Term, any of the Works, the System Infrastructure, the New Municipal Infrastructure or any parts thereof do not fully satisfy the Output Specifications and/or any other term or condition of this Project Agreement (other than the Project Co Proposal Extracts) Project Co shall, at its own cost and expense, rectify the Works, the System Infrastructure, the New Municipal Infrastructure and any part thereof so that:
  - (i) the Works, the System Infrastructure, the New Municipal Infrastructure and all parts thereof shall, at all times, comply with and satisfy in full the Output Specifications and the other terms and conditions of this Project Agreement (other than the Project Co Proposal Extracts); and
  - (ii) the Works, the System Infrastructure, the New Municipal Infrastructure and all parts thereof will, at all times, be able to meet all safety and performance standards and other requirements set out in the Output Specifications and the Project Agreement.

## **20.2 Completion of System Infrastructure and New Municipal Infrastructure**

- (a) Project Co shall design, engineer, construct and commission the System Infrastructure and the New Municipal Infrastructure so as to provide the City complete and operational System Infrastructure the New Municipal Infrastructure in accordance with the Output Specifications and the Project Co Proposal Extracts, and that will allow Project Co to perform the Works and the Maintenance and Rehabilitation Services, all in accordance with and subject to the terms of this Project Agreement.

## **20.3 Development of Design**

- (a) Project Co shall, at its own cost, develop and complete the design of the System Infrastructure, the New Municipal Infrastructure and all Design Data in accordance with the requirements of this Project Agreement, including Schedule 10 - Review Procedure and this Section 20.3.
- (b) The further development of the design of the System Infrastructure and New Municipal Infrastructure and the process by which such design is progressed must fully comply with the requirements of this Project Agreement.
- (c) In order to develop the detailed design of the System Infrastructure and the New Municipal Infrastructure, Project Co shall consult with the Stakeholders (which consultation requirements pursuant to the Environmental Assessments are further described in Schedule 17 - Environmental Obligations) the City Representative and the City Design Team in an interactive process. If the result of any consultation with Stakeholders is a change to the scope, configuration or size of any

System Infrastructure, the New Municipal Infrastructure or a change in the Construction Activities, or a change in the Maintenance and Rehabilitation Services, then such change shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation.

- (d) The Parties agree that Appendix A to Schedule 10 - Review Procedure is an initial list of Design Data and other items that will require design review, which Design Data and other items shall include (to a scale required by the City Representative):
  - (i) design development drawings, reports, schedules and specifications progressed from Commercial Close with extensive user group input, showing all architectural, engineering and landscape design information sufficient to allow for the development of working drawing documentation, submitted at
    - (A) Pre-Final Design Development (PFDD); and
    - (B) Final Design Development (FDD);
  - (collectively, the “**Design Development Submittals**”);
  - (ii) working drawing documentation, being construction drawings, reports, schedules and specifications progressed from the Design Development Submittals, showing all architectural, engineering and landscape design information in accordance with the requirements of this Project Agreement, submitted upon completion thereof and as required in accordance with Schedule 10 - Review Procedure (collectively, the “**Construction Document Submittals**”); and
  - (iii) all other reports, studies, plans and documentation required pursuant to Schedule 10 - Review Procedure or otherwise identified in the Project Agreement.
- (e) Project Co shall submit to the City Representative for review in accordance with Schedule 10 - Review Procedure all Design Data and other items listed in Section 20.3(d).
- (f) The Design Data and other items listed in Section 20.3(d) must contain, at a minimum, the information required pursuant to Article 3 of Schedule 10 – Review Procedure, and must identify where changes have been submitted, an indication of how the changes meet the requirements of this Project Agreement.
- (g) The Design Data and other items listed in Section 20.3(d) must contain, at a minimum, the following additional information:
  - (i) identification of the stage of design or construction to which the documentation relates;
  - (ii) all design or construction drawings and specifications necessary to enable the City Representative to make an informed decision as to whether Project Co is permitted to proceed pursuant to Schedule 10 - Review Procedure;
  - (iii) for each stage of the design or construction documentation, a schedule identifying all changes to the relevant documentation that has occurred from the previous stage of design or construction documentation; and

- (iv) where changes have been submitted, an indication of how the changes meet the requirements of this Project Agreement.
- (h) If Project Co commences or permits the commencement of the next level of design or construction of any part or parts of the System Infrastructure or the New Municipal Infrastructure prior to being entitled to proceed in accordance with Schedule 10 - Review Procedure and it is subsequently determined in accordance with Schedule 10 - Review Procedure or Schedule 26 - Dispute Resolution Procedure that the design or construction does not comply with this Project Agreement, then Project Co shall forthwith, at its own cost and risk undo, remove from the System Infrastructure or the New Municipal Infrastructure and replace and restore, as applicable, any parts of the design or construction that do not comply with this Project Agreement.
- (i) [Intentionally deleted].
- (j) Neither the City nor any City Party will have any liability:
  - (i) if a document submitted by Project Co and reviewed by the City, the City Representative or the City Design Team results in non-compliance with this Project Agreement by Project Co or a breach by Project Co of Applicable Law; or
  - (ii) for any loss or claim arising due to any defect in any documents, drawings, specifications or certificates submitted by Project Co.
- (k) Project Co and the City will cooperate with each other in the design review process. Notwithstanding such cooperation by the City, such review shall not constitute acceptance of the Works, and Project Co shall remain solely responsible for compliance in full with all requirements of this Project Agreement.
- (l) Project Co shall allow the City Representative and the City Design Team, at any time, a reasonable opportunity to view any items of Design Data, which shall be made available to the City Representative and/or the City Design Team, as applicable, as soon as practicable following receipt of a written request from the City Representative.
- (m) Project Co shall cause the Construction Contractor to establish and maintain a computerized design database and a web based Review Procedure Activities Register, which Project Co and the City may access remotely by computer to:
  - (i) view drawings comprised within the Design Data;
  - (ii) electronically store and print copies of such Design Data; and
  - (iii) track the status of each Works Submittal, pursuant to Article 3 of Schedule 10 – Review Procedure.

#### 20.4 Start-Up Meeting

- (a) Within 10 Business Days after Commercial Close, Project Co and the Design Team shall attend a start-up meeting (the “**Start-Up Meeting**”) with the City to set out the design development process in greater detail.

- (b) The agenda for the Start-Up Meeting shall include the following:
- (i) Project Co's plan to develop a successful long-term partnership with the City for the purpose of supporting the City in achieving its vision, mission and core values;
  - (ii) Project Co's plan to ensure that the Works are completed in accordance with the requirements set forth in this Project Agreement;
  - (iii) Project Co's process to ensure optimum design quality;
  - (iv) Project Co's approach to ensure that all Project Co Parties perform the Works, as applicable, as a fully integrated team;
  - (v) a proposed schedule of Works Submittals which is consistent with the Current PBS and which provides for a progressive and orderly flow of Works Submittals from Project Co to the City Representative to allow sufficient time for review of each Works Submittal by the City Representative, and taking into account both the resources available to the City Representative to conduct such review and whether delay in the review of the subject matter of the Works Submittal will have a material impact on Project Co's ability to progress future anticipated Works Submittals and the Works in accordance with the Current PBS;
  - (vi) Project Co's plan to successfully integrate feedback from consultations with Stakeholders and the City Design Team;
  - (vii) Project Co's approach to timing, construction, and adjustment; and
  - (viii) a communication process that includes an electronic data room and the use of a computerized document tracking system that has the capacity to report, on request, the status of all design and construction documentation and that takes into account the document security protocol described in Section 50.5(f).

## **20.5 Design Review Meetings**

- (a) In order to obtain input in the preparation of, and prior to submitting, the Design Development Submittals and the Construction Document Submittals, Project Co and the Design Team shall hold design review meetings (the "**Design Review Meetings**") with the City and the City Design Team upon the following terms:
- (i) the Project Co Representative shall arrange the Design Review Meetings in consultation with the City Representative;
  - (ii) all Design Review Meetings shall be held in the City of Ottawa unless the City agrees otherwise in writing;
  - (iii) the Parties shall cooperate to develop a reasonable schedule for the Design Review Meetings and shall incorporate such schedule into the draft Works Schedule;

- (iv) Project Co shall circulate to the City and the City Design Team an agenda for each of the Design Review Meetings no later than 10 Business Days prior to the relevant Design Review Meeting;
  - (v) in advance of a Design Review Meeting, Project Co may submit to the City Design Team for comment any interim drafts of any designs or plans required under this Project Agreement, which submissions shall be used to inform the City on the development of System Infrastructure and New Municipal Infrastructure design and provide an opportunity for dialog on compliance with the requirements of the Project Agreement. For greater certainty, interim submissions shall be informal and shall not be reviewed in accordance with Schedule 10 - Review Procedure;
  - (vi) the Design Review Meetings shall be held in person, except where otherwise agreed by the Parties, acting reasonably;
  - (vii) Project Co shall maintain minutes of the Design Review Meetings, including possible design solutions and changes in design, and, within 5 Business Days after each Design Review Meeting, Project Co shall provide to the City and the City Design Team a copy of the minutes, together with a copy of any notes, comments, sketches, drawings, tracings, lay-outs, plans or diagrams prepared at the Design Review Meeting; and
  - (viii) the City and Project Co agree that the subject matter of the Design Review Meetings shall not be regarded as Submittals to which Schedule 10 - Review Procedure applies, and that the City shall not be bound by the input provided in connection with the Design Review Meetings.
- (b) The Parties shall, together with the City Design Team, hold Design Review Meetings prior to the submission of:
- (i) each of the Design Development Submittals; and
  - (ii) each of the Construction Document Submittals.
- (c) The purpose of the Design Review Meetings is to facilitate the incorporation of the City input, involvement and feedback into the Design Data prior to submission of such Design Data in accordance with Schedule 10 - Review Procedure.

## **20.6 Testing**

- (a) To the extent and in the manner provided by the Quality Documentation and other terms of this Project Agreement, all testing shall be carried out by a duly accredited and certified testing facility and organization. The City Representative shall be given timely advance Notice (being not less than 2 Business Days) of the date of such tests, except for categories of tests (if any) in respect of which the City Representative gives written Notice to Project Co that it does not require such Notice. The City Representative and any other City Party at the City's option shall be entitled to attend at any test. Any material or plant which fails such tests shall be rejected.

- (b) Project Co shall develop a test recording system which shall permit ready retrieval of all test readings and shall provide information relating to tests proposed, test methodology and test readings to the City Representative on request.
- (c) With respect to continuous testing operations (such as concrete quality, structural concrete strengths, aggregate quality, compaction tests and bituminous material quality), Project Co shall provide to the City Representative at regular intervals (not to exceed weekly unless otherwise agreed by the Parties) test summary sheets and statistical analyses indicating strength and quality trends.

#### **20.7 Performance of Design Obligations**

- (a) In the design and engineering of the System Infrastructure and New Municipal Infrastructure, Project Co, its consultants and the Project Co Parties shall exercise the standard of care normally exercised by licensed or registered professional engineering and architectural personnel and other licensed or registered professionals, as applicable, having knowledge and experience in performing design activities of a similar nature, scope and complexity.
- (b) Project Co shall ensure that all parts of the Works shall, as required by Applicable Law, be performed or reviewed by licensed or registered professional engineers and architects registered to practice in the Province of Ontario. Such architects and engineers shall certify and, if required by Applicable Law, sign and seal, all designs, drawings and technical reports confirming that they comply with all prevailing design standards and design practices for such work in the Province of Ontario and all other applicable standards, specifications and codes, as otherwise required by Applicable Law.

#### **20.8 General Construction Obligations**

- (a) Project Co is responsible for all construction means, methods and techniques used to undertake the Works and must provide everything (including labour, plant, equipment and materials) necessary for the construction and commissioning of the System Infrastructure and New Municipal Infrastructure, and other performance of the Works.
- (b) Project Co shall in a timely and professional manner and in accordance with the requirements of this Project Agreement:
  - (i) construct the Works diligently, expeditiously and in a thorough and workman-like manner consistent with Schedule 11 – Integrated Management System Requirements;
  - (ii) ensure that no works other than the Works under this Project Agreement are constructed on the Lands by Project Co or any person for whom Project Co is responsible at law;
  - (iii) protect the Works from all of the elements, casualty and damage; and
  - (iv) in respect of plant, equipment and materials incorporated in the Works, use plant, equipment and materials that:
    - (A) are of a kind that are consistent with the Output Specifications;

- (B) are new, of good quality and are used, handled, stored and installed in accordance with Applicable Law and Good Industry Practice with respect to health and safety so as not to be hazardous or dangerous; and
  - (C) where they differ from the Output Specifications, have been substituted with the City's prior written consent in accordance with Section 20.9.
- (c) [Intentionally deleted].
- (d) Without limiting the provisions of Sections 20.8(a), (b), and (c), Project Co shall:
  - (i) have complete control of the Works and shall be responsible for the integration of the various parts and systems comprising any portions of the Works with existing parts of the municipal infrastructure systems and Existing Trillium Line Assets impacted by the Works;
  - (ii) prior to commencing applicable procurement and construction activities, verify, at the Site, all measurements and levels necessary for proper and complete fabrication, assembly and installation of the relevant Works, and shall further carefully compare such field measurements and conditions with the requirements of this Project Agreement. Where dimensions are not included or exact locations are not apparent, Project Co shall immediately notify the City Representative in writing and obtain written instructions from the City Representative (which written instructions shall be provided by the City within one (1) Business Day of receipt of such notification from Project Co) before proceeding with any part of the Works affected thereby; and
  - (iii) comply with all rules, directives and requirements of the City in respect of the Works as set forth in the Output Specifications so as not to disrupt (unless otherwise agreed to by the City) the operations of the existing municipal infrastructure systems.
- (e) Project Co acknowledges that in addition to the use of Good Industry Practice, this Project Agreement includes instructions as to the manner in which the Works are to be performed in order to minimize disturbance to properties and operations adjacent to the Lands, including with respect to noise, dust control and access to the Lands. Project Co shall develop and implement protocols in furtherance of the foregoing in accordance with the Output Specifications.
- (f) Project Co shall, at its own cost, use all methods required to comply with the instructions set out in this Project Agreement, during the performance of the New Municipal Infrastructure Works. Project Co shall, at its own cost, fully cooperate with the City in complying with said instructions during the performance of the New Municipal Infrastructure Works.
- (g) Should Project Co, in the performance of this Project Agreement, damage the Works, the property of the City at the Site, or property adjacent to the Site, Project Co shall be responsible to Make Good such damage at Project Co's expense.
- (h) Project Co shall maintain the Works in a tidy condition and free from the accumulation of waste products and debris, confine construction machinery and equipment, storage of products, and operations of employees to limits indicated by Applicable Law or this Project Agreement, and not

unreasonably encumber the Site with products. Project Co shall not load or permit to be loaded any part of the Works with a weight or force that will endanger the safety of the Works.

- (i) In performing the Works, Project Co shall have the sole responsibility for the design, erection, operation, maintenance, and removal of temporary supports, structures, and facilities and the design and execution of construction methods required in their use. Any review of Project Co's temporary supports, structures, or facilities or any shop drawings related thereto by the City or City Representative does not relieve Project Co of its "sole responsibility" under this section. Project Co shall engage registered professional engineering personnel skilled in the appropriate disciplines to perform the functions referred to in this Section 20.8(i) where required by Applicable Law or by this Project Agreement and in all cases, where such temporary supports, structures, and facilities and their method of construction are of such a nature that professional engineering skill is required to produce safe and satisfactory results.
- (j) Prior to application for the Final Completion Certificate, Project Co shall remove waste products and debris, and shall leave the Lands and the System clean and suitable for operation of the System. Project Co shall remove products, tools, construction machinery, and equipment not required for the performance of the remaining Works.

## **20.9 Substitutions**

- (a) Whenever equipment, components, materials, supplies, tools, and other items are specified or otherwise described in this Project Agreement by using the name or catalogue or model number of a particular manufacturer, fabricator, vendor or distributor, or any other material name or description, the naming or identification of the item is intended to establish the type and the minimum function and quality required, and equipment, components, materials, supplies, tools, and other items of other manufacturers, fabricators, vendors or distributors shall not be substituted without the prior written consent of the City, which shall not be unreasonably withheld by the City if any such item is no longer commercially available.

## **20.10 Works Submittals**

- (a) Any and all items, documents and anything else required or specified by this Project Agreement in respect of the Works to be submitted to, reviewed or otherwise processed by the City prior to Substantial Completion, including any and all subsequent revisions, amendments and changes thereto, shall be subject to review by the City pursuant to Schedule 10 - Review Procedure. The first document to be submitted by Project Co for review by the City pursuant to Schedule 10 - Review Procedure shall be the draft document control and security protocol described in Section 50.5(f).

## **20.11 [Intentionally Deleted]**

## **20.12 Apprenticeship Plan and Program**

- (a) No later than six months after Financial Close, Project Co shall provide a plan setting out Project Co's Project-specific approach to maximizing apprenticeship opportunities on the Project in connection with the completion of the Works (the "**Apprenticeship Plan**") for review and approval by the City. The Apprenticeship Plan shall include,

- (i) specific objectives for apprenticeship opportunities for the Project on a trade-by-trade basis;
  - (ii) apprenticeship opportunities for each trade required on the Project;
  - (iii) a confirmation that apprenticeships will be registered with the Ministry of Advanced Education and Skills Development and the Ontario College of Trades, as applicable;
  - (iv) a program to ensure the required supply of apprentices to meet Project Co's Apprenticeship Plan targets and requirements; and
  - (v) a program to support apprentices on the Project, to complete their apprenticeships prior to the Substantial Completion Date and, for those whose apprenticeships are not complete by the Substantial Completion Date a program to support apprentices to complete their apprenticeships after the Substantial Completion Date.
- (b) Project Co shall implement the approved Apprenticeship Plan.
- (c) Project Co shall provide an annual report to the City on the implementation of the Apprenticeship Plan which report shall include,
- (i) statistics on the number of apprentices involved in the Project relative to the number of journeypersons, for each month of the Project; and
  - (ii) detailed information setting out Project Co's progress toward achieving the objectives set out in the Apprenticeship Plan, including an identification of barriers that prevented Project Co from achieving its objectives.
- (d) The City may require Project Co to amend its Apprenticeship Plan if, in its opinion, acting reasonably, Project Co is failing to maximize apprenticeship opportunities on the Project pursuant to the then current Apprenticeship Plan.
- (e) The City may, in its sole discretion, release Project Co's Apprenticeship Plan to the public. Project Co's Apprenticeship Plan shall not be Confidential Information.

#### **20.13 Utility Works - Cash Allowance**

- (a) Project Co shall perform and complete, the Project Co Utility Works, and shall procure and coordinate the performance and completion of the Utility Company Self-Performed Works by the applicable Utility Company pursuant to Utility Agreements:
- (i) so as to satisfy the Output Specifications, and in particular, Article 8 of Schedule 15-2—Design and Construction Requirements;
  - (ii) so as to satisfy the Design and Construction Specifications;
  - (iii) in accordance with the Works Schedule; and
  - (iv) in accordance with the other terms and conditions of this Project Agreement.

- (b) Project Co shall complete or cause the completion of the Utility Works as a precondition to achieving Substantial Completion. Project Co shall be solely responsible for coordinating the Utility Works with its activities in respect of the Project Operations and shall not be entitled to an extension of time or additional compensation in respect of the remainder of the Works as a result of the Utility Works or any matter relating thereto, except as provided for in this Section 20.13 or in Section 16.10.
- (c) The Project Co Utility Works shall be reviewed, certified, financed and paid for as part of Earned Value in accordance with Schedule 20 – Construction Period Payments. The Utility Company Self-Performed Works shall be reviewed, certified, financed and paid for in accordance with this Section 20.13. Project Co shall not be required to obtain financing for the costs of the Utility Company Self-Performed Works.
- (d) Prior to entering into a Utility Agreement for the performance of Utility Company Self-Performed Work, Project Co shall submit to the City Representative a draft of such agreement setting out the scope and pricing proposed by the Utility Company for the performance of the Utility Company Self-Performed Work for review and approval by the City. The City may, in conjunction with Project Co, for a period not to exceed 10 Business Days from receipt of the draft agreement, engage with the Utility Company to negotiate final scope and pricing for inclusion in the Utility Agreement based upon preferential pricing arrangements which the City may have with the applicable Utility Company, and notify Project Co by the end of such 10 Business Day period of the results of such discussions, and the City's approval of the final scope and pricing to be contained in the applicable Utility Agreement. Project Co shall enter into the Utility Agreement on such City approved terms. The City will only pay the Utility Company Works Cash Allowance and Utility Works Fee in respect of Utility Agreements which have been approved by the City in accordance with this subsection 21.13(d). Failure for the City to provide comments on the draft agreements within the 10 Business Day period mentioned above will be deemed an acceptance of such draft by the City.
- (e) The estimated cost of the Utility Company Self-Performed Works is \$[REDACTED] (the "**Utility Company Works Cash Allowance**") plus applicable HST, and shall be paid for by the City on a monthly progress basis as the Utility Company Self-Performed Works are progressed and invoiced by the applicable Utility Company to Project Co. In the event that the actual costs of the Utility Company Self-Performed Works as evidenced by invoices rendered by the applicable Utility Company exceeds the estimated Utility Company Works Cash Allowance for any cause other than the negligence, default or willful misconduct of Project Co or any Project Co Party, the City shall pay such additional cost, plus applicable HST and the applicable Utility Works Fee applicable to such additional cost.
- (f) The City shall also pay Project Co a fee of [REDACTED]% of the Utility Works Cost (the "**Utility Works Fee**"), plus applicable HST, for the management, coordination and administration of the completion of the Utility Company Self-Performed Works.
- (g) Project Co may, on a monthly basis, provide to the City Representative and the Independent Certifier a request for payment (each, a "**Request for Utility Works Payment**") that includes (i) an itemized breakdown of the applicable Utility Company Self-Performed Works invoiced in the previous month by a Utility Company, (ii) the Utility Works Fee applicable to the costs of the Utility Company Self-Performed Works included in such invoice, and (iii) applicable HST in

respect of the amounts specified in (i) and (ii) above. Such Request for Utility Works Payment may be delivered concurrently with an application for progress payments on account of Earned Value achieved in respect of Project Co Utility Works in accordance with Schedule 20 – Construction Period Payments, but shall be presented separately for processing and payment by the City.

- (h) Project Co shall include with each Request for Utility Works Payment the certification of the Independent Certifier that the relevant Utility Company Self-Performed Works described in such Request for Utility Works Payment is eligible for payment by the City in accordance with this Section 20.13.
- (i) Project Co shall include with each Request for Utility Works Payment such additional supporting documentation as the City Representative may reasonably require in connection with the claimed base progress payments, the estimated cost to complete the Utility Company Self-Performed Works, any cumulative projected variance from the estimated Utility Company Works Cash Allowance and any discounts, rebates, refunds, chargebacks, credits, price adjustments and other allowances available to Project Co in connection with the Utility Company Self-Performed Works. Each Request for Utility Works Payment submitted to City shall be in a form stipulated by the City, acting reasonably, and shall support an “open-book” pricing approach for the completion of the Utility Company Self-Performed Works.
- (j) Within 10 Business Days of receipt of a Request for Utility Works Payment, the City shall, in consultation with the Independent Certifier, advise Project Co, in writing, whether or not it agrees with the particulars set out in the Request for Utility Works Payment. The City shall only be permitted to withhold its approval if either the City, or the Independent Certifier determine that the Request for Utility Works Payment does not contain the information that the City or the Independent Certifier require, acting reasonably, to discharge their obligations under this Section 20.13. If the City withholds its approval pursuant to this Section 20.13(j) and subsequently receives the information that the City requires, acting reasonably, to discharge its obligations under this Section 20.13, it shall, within 10 Business Days of its receipt of such information, make payment of the amount set out in the aforementioned Request for Utility Works Payment. Any Disputes with respect to determinations made under this Section 20.13 shall be resolved in accordance with Schedule 26 – Dispute Resolution Procedure.
- (k) If the City approves in writing the payment of the amount set out in a Request for Utility Works Payment, it shall make payment of the amount set out in the approved Request for Utility Works Payment within 10 Business Days of receipt of the Request for Utility Works Payment.
- (l) Project Co acknowledges and agrees that:
  - (i) all costs and expenses related to the administration and scheduling of the Utility Company Self-Performed Works, including, without limitation, the preparation of Requests for Utility Works Payment and any required reporting, shall be compensated solely by the Utility Works Fee; and,
  - (ii) all discounts, rebates, refunds, chargebacks, credits, price adjustments and other allowances available to Project Co or any Subcontractor in connection with the Utility Company Self-Performed Works shall be to the credit of the City.

#### 20.14 Category 1 Utility Company Tracking System

- (a) Project Co shall, at its own cost and risk, provide to the City a system to track the progress made by the Category 1 Utility Companies in performing the activities described in the Utility Baseline Report. More specifically, such system shall:
  - (i) be kept updated on a daily basis and be available to the City in real time during normal business hours through a web-based interface which would include functionality to provide automated email alerts to a customizable frequency and set of email addresses;
  - (ii) be operational no later than the date upon which the first Category 1 Utility Company activity described in the Utility Baseline Report is commenced;
  - (iii) include a feature that highlights to the City and the applicable Category 1 Utility Company each outstanding applicable activity described in the Utility Baseline Report when it reaches the following milestone triggers:
    - (A) [REDACTED]% of the number of Business Days designated for completion by the Category 1 Utility Company in the Utility Baseline Report for the applicable activity described in the Utility Baseline Report; and
    - (B) [REDACTED]% of the number of Business Days designated for completion by the Category 1 Utility Company in the Utility Baseline Report for the applicable activity described in the Utility Baseline Report.
- (b) Project Co shall provide written notice to the City Representative with respect to any outstanding Category 1 Utility Company activity described in the Utility Baseline Report when it reaches the milestone triggers outlined in Section 20.14(a)(iii)(A) and Section 20.14(a)(iii)(B).
- (c) With respect to any failure by a Category 1 Utility Company to perform the obligations set out in the Utility Baseline Report, Project Co shall not be entitled to the Delay Event or Compensation Amount pursuant to Section 38.1(a)(xxii) unless the tracking system as described in this Section 20.14(a) is fully functional and available to the City, provides notice to the City of the milestones described in Section 20.14(a)(iii) and contains accurate information as to the progress made by the Category 1 Utility Companies in performing the activities described in the Utility Baseline Report at all material times.

#### 20.15 Documents

- (a) For the duration of the Works, Project Co shall keep one copy of the current digital files of the Project Agreement, Project Documents, Works Schedule, submittals, reports, Variation Confirmations, Project Co Variation Notices, Variation Directives, partnering documents, records of meetings and all other documents necessary for the administration of the Project, all in good order and readily accessible and available to the City and the City Representative.
- (b) Project Co shall, where practical, keep one copy of current standards and manufacturers' literature specified in the Project Documents in good order and readily accessible and available to the City Representative for the duration of the Works.

## **21. ACCESS AND MONITORING**

### **21.1 Access for City Parties**

- (a) Subject to Section 21.1(b), but without limiting any of the City's rights in respect of the Lands, the System Infrastructure or the New Municipal Infrastructure, or the right of any third party in relation to that third party's portion of the Lands or New Municipal Infrastructure, Project Co acknowledges and agrees that throughout the Project Term, Project Co shall not restrict the access of the City, the City Parties, the Operator, and their respective representatives, to the Lands, the System Infrastructure or the New Municipal Infrastructure and any workshop where materials, plant or equipment are being manufactured, prepared or stored at all reasonable times during normal working hours, including for the purposes of general inspection or audit, or of attending any test or study being carried out in respect of the Works, or to fulfill any statutory, public or other duties or functions.
- (b) In exercising their access rights under Section 21.1(a) in respect of the Lands, the City, City Parties, the Operator and their respective representatives shall:
  - (i) provide reasonable prior Notice appropriate to the circumstances (other than for any offices or other facilities provided for the use of the City and/or City Parties); and
  - (ii) comply with all relevant safety procedures and any reasonable directions with regard to site safety that may be issued by or on behalf of the Project Co Representative from time to time.

### **21.2 Increased Monitoring**

- (a) If, at any time during the Project Term, the City is of the opinion, acting reasonably, that there are defects in the Works or that Project Co has failed to comply, in any material respect, with the requirements of this Project Agreement (including the Output Specifications and the Project Co Proposal Extracts), the City may, without prejudice to any other right or remedy available to it, by Notice to Project Co, increase the level of monitoring of Project Co from that set out in this Project Agreement to such level as the City considers reasonable taking into account the nature of the relevant defect or failure until such time as Project Co shall have demonstrated, to the City's satisfaction, that it is capable of performing and will perform, in all material respects, its obligations under this Project Agreement. Project Co will compensate the City for any reasonable costs incurred as a result of such increased monitoring.

### **21.3 Right to Uncover**

- (a) Project Co shall ensure that the City is afforded advance Notice of, and that the City is afforded a full opportunity to witness, all inspection and test activity in accordance with the Inspection and Test Plan. If Project Co does not provide such Notice and opportunity, Project Co shall at the request of the City uncover any relevant part of the Works which have been covered up or otherwise put out of view or remove any relevant part of the Works that have been proceeded with in order to permit the City to witness the relevant inspection or test activity. Project Co shall bear all costs of any such uncovering or removal, regardless of whether or not any defect is discovered in the relevant Works.

- (b) The City shall have the right, at any time during the Project Term, to request Project Co to uncover and inspect (or allow the City to inspect) any part or parts of the Works, or to require testing of any part or parts of the Works, where the City reasonably believes that such part or parts of the Works is or are defective or that Project Co has failed to comply with the requirements of this Project Agreement (including the Output Specifications, the Project Co Proposal Extracts and the Design Data) relevant to such part or parts of the Works, and Project Co shall comply with such request. When the City makes such a request, the City shall include reasonably detailed reasons with such request.
- (c) If an inspection shows that the relevant part or parts of the Works is or are defective or that Project Co has failed to comply with the requirements of this Project Agreement (including the Output Specifications, the Project Co Proposal Extracts and the Design Data) relevant to such part or parts of the Works, Project Co shall rectify all such defects and non-compliance diligently and at no cost to the City and Project Co shall not be entitled to any additional compensation or extension of time in relation thereto.
- (d) If an inspection shows that the relevant part or parts of the Works is or are not defective and that Project Co has complied with the requirements of this Project Agreement (including the Output Specifications, the Project Co Proposal Extracts and the Design Data) relevant to such part or parts of the Works, the exercise by the City of its rights pursuant to this Section 21.3:
  - (i) prior to Substantial Completion shall, subject to and in accordance with Section 38, be treated as a Delay Event and, subject to and in accordance with Section 39, be treated as a Compensation Event; and
  - (ii) following Substantial Completion shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation.
- (e) The obligations in Section 21.3(a) shall not apply to the Revenue Vehicle Supplier.

#### **21.4 No Relief from Obligations**

- (a) The Parties acknowledge that the exercise by the City or the City Representative of the rights under this Section 21 shall in no way affect the obligations of Project Co under this Project Agreement except as set out in this Section 21.

#### **21.5 Access by Others**

- (a) Subject to Section 21.5(b) and subject to and in accordance with Section 9.8 (to the extent applicable), Project Co shall ensure that throughout the Project Term, without prejudice to any access rights of any such person as a member of the general public or pursuant to Applicable Law, that it does not restrict access to the Lands, System Infrastructure or the New Municipal Infrastructure for:
  - (i) the Independent Certifier to the extent required to perform its obligations pursuant to Schedule 6 – Independent Certifier Agreement;
  - (ii) inspectors and other persons authorized to act on behalf of the City and any counterparty to a Third Party Access Agreement, for inspection and/or acceptance purposes;

- (iii) all Other Contractors, including the owners or operators of any third party facilities and their agents at all reasonable times to exercise any right or power or perform any duty or obligation under any Applicable Law or the Utility Agreements, provided that, wherever consistent with the requirements of Applicable Law and the requirements of this Project Agreement, Project Co may limit such access so as to not unnecessarily impede or restrict traffic flows or any Project Operations;
  - (iv) all Governmental Authorities and Emergency Service Providers in order to carry out any work (including surveys and inspections) in accordance with or to exercise any right or power or perform any duty or obligation under any Applicable Law and provided that, whenever consistent with the applicable requirements of such Governmental Authority, Emergency Service Providers or Applicable Law and the requirements of this Project Agreement (as the case may be), Project Co may limit such access so as to not unnecessarily impede or restrict traffic flows or any Project Operations;
  - (v) any City Party, Other Contractors, owners or operators of third party facilities, Governmental Authorities, Emergency Service Providers and Utility Companies for the purposes of access to and from any other lands and/or facilities adjacent to or in proximity to the Lands, the System Infrastructure or the New Municipal Infrastructure owned or operated by such person or in which such person has any interest, provided that, whenever consistent with the requirements of Applicable Law and the requirements of this Project Agreement, Project Co may limit such access so as to not unnecessarily impede or restrict traffic flows or any Project Operations; and
  - (vi) any City Party to undertake emergency training in relation to the System Infrastructure or the New Municipal Infrastructure.
- (b) Subject to Section 21.5(c), the City shall require persons accessing Site(s) on the Lands in accordance with access rights under Section 21.5(a) to:
  - (i) provide reasonable prior Notice to Project Co appropriate to the circumstances;
  - (ii) comply with all relevant health and safety procedures and any reasonable directions with regard to health and safety that may be issued by or on behalf of the Project Co Representative from time to time; and
  - (iii) if reasonably required by Project Co, be accompanied by a representative of Project Co or a Project Co Party.
- (c) Section 21.5(b) shall not apply,
  - (i) to Additional Contractors, who shall instead comply with any instructions or procedures made by Project Co pursuant to Section 9.8;
  - (ii) in the case of access rights described in Section 21.5(a) for the purpose of responding to an Emergency;
  - (iii) for the purposes of responding to an emergency declared by the City or by a Governmental Authority; and

- (iv) in circumstance where the requirements of Section 21.5(b) are inconsistent with the requirements of the applicable Governmental Authority or Emergency Service Provider.

## **21.6 Public Use**

- (a) Project Co shall have no right to grant, to the general public, the right to use either the System Infrastructure or the New Municipal Infrastructure. It shall be the right of the City to grant the right of use to the general public to the System Infrastructure and the New Municipal Infrastructure once completed in accordance with the provisions of this Project Agreement.
- (b) Except as explicitly permitted by the City or this Project Agreement, and subject to Project Co's compliance with all applicable Permits, Licences, Approvals and Authorizations, Project Co shall,
  - (i) minimize interference with the existing transit system at all times during the Construction Period; and
  - (ii) to the extent that the Project necessitates interference, in any way, with the operation of the existing transit system, including the imposition of any closures or detours on the existing transit system, use commercially reasonable efforts to cooperate with the City and other relevant third parties to ensure the continued operation of the existing transit system.
- (c) Except as otherwise expressly provided in this Project Agreement, Project Co shall not have any claim whatsoever against the City, any City Party, Emergency Service Providers or any other Governmental Authority for, or in respect of, any lane closure or diversion, including any lane closure or diversion as a result of the exercise of any other rights or powers or the discharge of any other duties or functions by any such authority, affecting all or any part of the Lands, the System Infrastructure or the New Municipal Infrastructure, at any time.
- (d) Subject to closures or diversions of traffic flow permitted by this Project Agreement, Project Co shall cause all Works and Maintenance and Rehabilitation Services to be carried on so as not to interfere unnecessarily with, and so as to minimize any necessary interference with, the convenience of the public in respect of, and the access of the public to and use of, any public or private roads or highways or other transportation infrastructure (other than the System Infrastructure and the New Municipal Infrastructure), whether under the control or in the possession of the City or any other person.

## **22. WORKS SCHEDULE**

### **22.1 Completion of Works**

- (a) Project Co shall complete the Works in accordance with this Project Agreement and achieve:
  - (i) Substantial Completion by the Scheduled Substantial Completion Date; and
  - (ii) Final Completion by the Scheduled Final Completion Date.

### **22.2 The Works Schedule**

- (a) From Financial Close until PBS-2 becomes the Current PBS, PBS-1 shall be deemed to be the Current PBS and, until such time, the following provisions of the Project Agreement applicable to the Current PBS shall be applicable to PBS-1: Sections 9.2(a)(viii), 9.8(f)(ii), 9.8(f)(iii), 11.2(d), 20.1(a)(iv), 20.5(a)(iii) and 27.4(a)(i) of the Project Agreement; Sections 3.1(c)(ix) of Schedule 17 – Environmental Obligations; Section 1.6(b)(vii) of Schedule 21 - Variation Procedure; and Sections 1(b) and 1(c) of Schedule 31 – Works Report Requirements.
- (b) Project Co shall, in accordance with Schedule 12 – Works Scheduling Requirements, prepare and submit to the City and the Independent Certifier:
  - (i) within 75 days after Financial Close, PBS-2 and a schedule narrative in accordance with Section 2.3 of Schedule 12 - Works Scheduling Requirements indicating the differences between PBS-1 and PBS-2;
  - (ii) every month, within 10 Business Days after the end of each calendar month from Financial Close until Final Completion, the Monthly Progress Report and PBS Update in accordance with Schedule 31 – Works Reports Requirements;
  - (iii) within 10 Business Days after receipt of a written request from the City, acting reasonably, a Micro-Works Schedule for any specific area in accordance with Schedule 12 – Works Scheduling Requirements; and
  - (iv) Recovery Schedules, PBS Submittal, Look-ahead Schedules and As-built Schedules in accordance with Schedule 12 – Works Scheduling Requirements,each meeting the requirements of Schedule 12 – Works Scheduling Requirements to the satisfaction of the City that support the completion of the Works in accordance with Section 22.1.
- (c) The City shall review all submissions in accordance with Schedule 10 – Review Procedure.
- (d) At the request of the City Representative, the Project Co Representative shall review the Works Schedules with the City Representative to explain to the City Representative's satisfaction:
  - (i) the activity logic and planning assumptions contained in the Works Schedule;
  - (ii) any proposed changes to the Critical Path of the Works; and
  - (iii) any other matter raised by the City Representative concerning the Works Schedules.
- (e) Project Co and the City shall comply with the provisions of Schedule 12 – Works Scheduling Requirements.
- (f) Any comment or lack of comment by the City in regards to any Works Schedule indicating potential Delay Events pursuant to Section 38.2(a) of the Project Agreement shall not constitute any acknowledgement or acceptance of the potential delay.

## **23. LEED, ENERGY AND ENVIRONMENTAL REQUIREMENTS**

### **23.1 Environmental Management / Contamination and Hazardous Substances**

- (a) Project Co shall comply with the provisions of Schedule 17 - Environmental Obligations.

### **23.2 LEED Design and Construction Obligations**

Project Co shall perform the Works relating to the New Walkley Yard so as to achieve the prerequisites and credits required to achieve LEED® Canada Certified and, except as set out in the Output Specifications, Project Co may, in its sole discretion, determine which additional credits to pursue.

### **23.3 Mandatory Prerequisites and Credits**

- (a) Project Co shall, at a minimum, achieve the credits and prerequisites under the LEED Rating System provided for in the Output Specifications.
- (b) Project Co shall, at a minimum, achieve the “Credit 1 Optimize Energy Performance under Performance Category: Energy & Atmosphere” credit, and obtain a minimum of 5 points in respect of such credit.

### **23.4 LEED Progress Reports**

As part of each Works Report, Project Co shall submit a progress report comparing actual construction and procurement activities with LEED® Canada Certified requirements.

### **23.5 LEED Certified Rating**

- (a) If there is a change in the requirements for achievement of LEED® Canada Certified under the LEED Rating System, and Project Co is required by the CaGBC to comply with such change, then Project Co shall notify the City of such change and such change shall, subject to and in accordance with Schedule 21 - Variation Procedure, result in a Variation.
- (b) Project Co shall apply to the CaGBC to obtain LEED® Canada Certified for the New Walkley Yard as soon as possible.
- (c) In the event that:
- (i) Project Co fails to obtain the minimum number of points required pursuant to Section 23.3(b); or
  - (ii) LEED® Canada Certified is not obtained within 24 months after the Substantial Completion Date,

other than as a direct result of any act or omission of the City or any City Party, Project Co shall pay to the City liquidated damages in the amount of \$[REDACTED]. The Parties agree that such liquidated damages are not a penalty but represent a genuine and reasonable pre-estimate of the damages that the City will suffer as a result of the happening of either of the specified events and would be difficult or impossible to quantify upon the happening of either of the specified events. Such payment shall constitute full and final settlement of any and all damages that may be claimed by the City as a result of a failure by Project Co to obtain the minimum number of points required pursuant to Section 23.3(b) or to achieve LEED® Canada Certified and, for greater

certainty, a failure by Project Co to obtain any of the mandatory prerequisites or credits set out in the Output Specifications or to achieve LEED® Canada Certified for the New Walkley Yard shall not result in a Project Co Event of Default. The Parties agree that such liquidated damages shall be payable whether or not the City incurs or mitigates its damages, and that the City shall not have any obligation to mitigate any such damages.

### **23.6 Greenhouse Gas Credits**

- (a) Any greenhouse gas credits which may be guaranteed as a result of the Project shall be owned by the City and Project Co shall have no entitlement to any of such credits whatsoever.

## **24. INDEPENDENT CERTIFIER**

### **24.1 Appointment**

- (a) On or prior to Financial Close, the Parties shall appoint an independent, suitably qualified and experienced consultant to act as the Independent Certifier for the purposes of this Project Agreement and shall enter into an agreement with the Independent Certifier substantially in the form of Schedule 6 - Independent Certifier Agreement. If the Parties are unable to agree upon the Independent Certifier within such period of time, then the determination of the Independent Certifier shall be made in the same manner as the identification of a replacement Independent Certifier under Section 24.7(b).
- (b) Neither Party shall, without the prior written consent of the other Party, enter into any agreement with the Independent Certifier in connection with the Project other than the Independent Certifier Agreement, and Project Co shall ensure that no Project Co Party enters into any separate agreement with the Independent Certifier in connection with the Project.

### **24.2 Role of Independent Certifier**

- (a) The general role, obligations and functions of the Independent Certifier are described in Schedule 6 - Independent Certifier Agreement.

### **24.3 Changes to Terms of Appointment**

- (a) Neither the City nor Project Co shall without the other's prior written approval:
  - (i) waive, settle, compromise or otherwise prejudice any rights or claims which the other may from time to time have against the Independent Certifier; or
  - (ii) vary the terms of the Independent Certifier Agreement or the services performed or to be performed by the Independent Certifier.
- (b) The Parties shall perform their respective obligations arising under or in connection with the Independent Certifier Agreement.

### **24.4 Right to Change Appointment**

- (a) The Parties agree that the Independent Certifier shall not provide any services or reports or other information to Project Co, the Lenders, the Project Co Parties or any other person other than pursuant to the performance of the functions of the Independent Certifier under this Project Agreement unless agreed to in writing by the Parties. The Parties may agree to terminate the Independent Certifier Agreement upon 30 days' Notice to the Independent Certifier. If such Notice is given, then, pursuant to Section 24.7, a new Independent Certifier will be appointed. The Parties agree that, notwithstanding the 30 days' Notice of termination, the Independent Certifier shall continue on a day-to-day basis thereafter until a new Independent Certifier is appointed.

#### **24.5 Cooperation**

- (a) The Parties agree to cooperate with each other generally in relation to all matters within the scope of or in connection with the Independent Certifier Agreement. All instructions and representations issued or made by either of the Parties to the Independent Certifier shall be simultaneously copied to the other and the Parties shall be entitled to attend all inspections performed by or meetings involving the Independent Certifier.

#### **24.6 Payment of Independent Certifier**

- (a) Project Co and the City shall share equally the responsibility for the payment of all fees and costs of the Independent Certifier.

#### **24.7 Replacement**

- (a) In the event of the Independent Certifier's engagement being terminated otherwise than for full performance, the Parties shall liaise and cooperate with each other in order to appoint a replacement consultant to act as the Independent Certifier as soon as reasonably practicable. The identity of any such replacement shall be as agreed by the Parties and the terms of his/her appointment shall, unless otherwise agreed by the Parties, be as set out in the Independent Certifier Agreement.
- (b) In the event the Parties fail to agree upon the identity of a replacement Independent Certifier within 5 Business Days of the original Independent Certifier's appointment being terminated, then a replacement Independent Certifier shall be chosen as follows:
  - (i) each Party shall, within 5 Business Days thereafter, select 3 suitably qualified and experienced replacements that would be acceptable to that Party, and shall provide Notice thereof to the other Party, with a ranking of preference for replacements;
  - (ii) if the Parties have both selected a common replacement, then such common replacement shall be the Independent Certifier, and if there is more than one common replacement, then the common replacement with the highest overall ranking (calculated by adding together the ordinal rank assigned by the Parties) shall be selected, and in the event of a tie, the lowest-cost of such tied replacements shall be selected; and

- (iii) if the Parties have not selected a common replacement, then the determination of the new replacement may be referred for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.

## **25. COMMISSIONING AND COMPLETION**

### **25.1 Commissioning Activities**

- (a) Project Co shall perform all Commissioning, and shall support and facilitate, as necessary, the performance of all City Commissioning, if any, pursuant to the Testing and Commissioning Plan.

### **25.2 Commencement of Commissioning**

- (a) Project Co shall give 30 days' written Notice to the Independent Certifier and the City Representative of the proposed commencement of the Commissioning Tests.
- (b) Project Co shall give at least 5 Business Days' Notice to, and shall invite, the Independent Certifier and the City Representative to witness, and to comment on, each aspect of the Commissioning. Project Co shall, together with such Notice, provide all information that the Independent Certifier and the City Representative may reasonably require in relation thereto, including:
  - (i) tests proposed;
  - (ii) test methodology; and
  - (iii) expected test results.

### **25.3 Substantial Completion Certificate**

- (a) Subject to Section 25.4, Project Co shall give the Independent Certifier and the City Representative at least 10 Business Days' Notice prior to the date upon which Project Co anticipates delivering the Substantial Completion Notice.
- (b) Project Co shall give the Independent Certifier and the City Representative Notice (the "**Substantial Completion Notice**") and upon the satisfaction of all requirements for Substantial Completion, which Substantial Completion Notice shall, describe, in reasonable detail, the satisfaction of the requirements for Substantial Completion, together with Project Co's opinion as to whether the conditions for issuance of the Substantial Completion Certificate have been satisfied.
- (c) The City shall, within 5 Business Days after receipt of a Substantial Completion Notice, provide the Independent Certifier and Project Co with the City's opinion as to whether the conditions for issuance of the Substantial Completion Certificate have been satisfied and, if applicable, any reasons as to why it considers that the Substantial Completion Certificate should not be issued.
- (d) Within 5 Business Days after Project Co's receipt of the City's opinion pursuant to Section 25.3(c), the Parties shall cause the Independent Certifier to determine whether the conditions for issuance of the Substantial Completion Certificate have been satisfied, having regard for the

opinions of both Project Co and the City, to determine whether any Minor Deficiencies exist, and to issue to the City and to Project Co either:

- (i) the Substantial Completion Certificate, confirming the date of issue as the Substantial Completion Date and setting out the Minor Deficiencies List (if applicable) in accordance with Section 25.7; or
  - (ii) a report detailing the matters that the Independent Certifier considers are required to be performed by Project Co to satisfy the conditions for issuance of the Substantial Completion Certificate.
- (e) Where the Independent Certifier has issued a report in accordance with Section 25.3(d)(ii) and Project Co has not referred a Dispute in relation thereto for resolution in accordance with Schedule 26 - Dispute Resolution Procedure, Project Co shall, within 5 Business Days after receipt of such report, provide the Independent Certifier and the City Representative with:
- (i) a detailed list indicating the rectification actions proposed for all matters raised in such report;
  - (ii) the schedule for completion of all such rectification actions; and
  - (iii) any additional Commissioning that needs to be undertaken as a result of the rectification actions,

and Project Co shall perform all such additional rectification actions and Commissioning in a timely manner. Upon completion thereof, Project Co may give a further Substantial Completion Notice and Sections 25.3(c) to (e), inclusive, shall be repeated until the Substantial Completion Certificate has been issued.

- (f) The Independent Certifier's decision to issue or not to issue the Substantial Completion Certificate shall be final and binding on the Parties solely in respect of determining the Payment Commencement Date, and a Dispute in relation to the Payment Commencement Date shall not be subject to resolution pursuant to Schedule 26 - Dispute Resolution Procedure, provided, however, that any other Dispute in relation to the Independent Certifier's decision to issue or not to issue the Substantial Completion Certificate may be referred for resolution pursuant to the Dispute Resolution Procedure.

#### **25.4 Substantial Completion Countdown Notice and Liquidated Damages for Failure to Achieve Substantial Completion**

- (a) Project Co shall deliver to the City and the Independent Certifier a Notice (a "**Substantial Completion Countdown Notice**") not less than 180 days prior to (i) the Scheduled Substantial Completion Date, if Project Co anticipates that Substantial Completion will be achieved by or after the Scheduled Substantial Completion Date or (ii) such other date on which Project Co anticipates that Substantial Completion will be achieved, if Project Co anticipates that Substantial Completion will be achieved prior to the Scheduled Substantial Completion Date (in each case, the "**Anticipated Substantial Completion Date**").
- (b) [Not used].

- (c) In the event that Project Co has not provided a Substantial Completion Countdown Notice to the City in accordance with the requirements of Section 25.4(a), then Project shall,
  - (i) within 3 Business Days after the date that the Substantial Completion Countdown Notice was to have been delivered to the City, pay to the City the sum of \$[REDACTED] as liquidated damages in respect of damages suffered and costs incurred by the City related to Project Co's failure to deliver the Substantial Completion Countdown Notice in a timely manner; and
  - (ii) pay to the City the additional sum of \$[REDACTED] per calendar day as liquidated damages in respect of damages suffered and costs incurred by the City related to Project Co's failure to deliver such notice for each day after the date that the Substantial Completion Countdown Notice was to have been delivered to the City that the Substantial Completion Date Notice has not been delivered to the City in accordance with the requirements of Section 25.4(a).
- (d) In accordance with Schedule 12 – Works Scheduling Requirements, any Anticipated Substantial Completion Date shall not be earlier than the Scheduled Substantial Completion Date, without the prior written consent of the City, in its sole discretion.
- (e) Notwithstanding any other provision of this Project Agreement, if Project Co has not achieved Substantial Completion by the Outside Substantial Completion Date, as such date may be extended in accordance with Section 38, Project Co shall, in addition to any other liquidated damage payment obligations incurred under this Section 25.4, pay to the City the sum of \$[REDACTED] as liquidated damages in respect of damages suffered and costs incurred by the City related to Project Co's failure to achieve Substantial Completion by such date.
- (f) In the event that Project Co provides a Substantial Completion Countdown Notice establishing an Anticipated Substantial Completion Date in accordance with Section 25.4(a), or otherwise provides notice of an Anticipated Substantial Completion Date in accordance with the provisions of this Section 25.4 (the “**Initial Countdown Notice**”), but Project Co determines following such notification that Substantial Completion shall not be achieved on or before the Anticipated Substantial Completion Date established by such notices as aforesaid, Project Co shall forthwith notify the City in writing in respect thereof (the “**Subsequent Notice**”) and shall:
  - (i) in such Subsequent Notice establish a revised date by which Project Co expects to achieve Substantial Completion (the “**Revised Substantial Completion Date**”), which Revised Substantial Completion Date shall be no earlier than,
    - (A) the Anticipated Substantial Completion Date established by the Initial Countdown Notice, and
    - (B) 15 days after the delivery of such Subsequent Notice;
  - (ii) pay to the City, as liquidated damages in respect of damages suffered and costs incurred by the City related to Project Co's failure to achieve Substantial Completion by the Anticipated Substantial Completion Date established as aforesaid, the following sums:

- (A) If the Subsequent Notice is delivered between 1 and 29 days of the delivery of the Initial Countdown Notice, the sum of \$[REDACTED];
  - (B) If the Subsequent Notice is delivered between 30 and 59 days of the delivery of the Initial Countdown Notice, the sum of \$[REDACTED];
  - (C) If the Subsequent Notice is delivered between 60 and 89 days of the delivery of the Initial Countdown Notice, the sum of \$[REDACTED];
  - (D) If the Subsequent Notice is delivered between 90 and 119 days of the delivery of the Initial Countdown Notice, the sum of \$[REDACTED];
  - (E) If the Subsequent Notice is delivered between 120 and 149 days of the delivery of the Initial Countdown Notice, the sum of \$[REDACTED];
  - (F) If the Subsequent Notice is delivered more than 149 days of the delivery of the Initial Countdown Notice, the sum of \$[REDACTED].
- (iii) Notwithstanding Section 25.4(f)(ii), Project Co may, on one occasion only, issue a Subsequent Notice establishing a Revised Substantial Completion Date which is no later than 10 days after the Anticipated Substantial Completion Date without incurring the liquidated damages set out in Section 25.4(f)(ii) in whole or in part.
- (g) In the event that Project Co fails to achieve Substantial Completion by the Anticipated Substantial Completion Date without having delivered to the City a Subsequent Notice, or in the event that Project Co has issued a Subsequent Notice establishing a Revised Substantial Completion Date and Project Co fails to achieve Substantial Completion by such Revised Substantial Completion Date, without having delivered a further Subsequent Notice, then Project shall:
- (i) forthwith issue a Subsequent Notice to the City establishing a further revised date by which Project Co expects to achieve Substantial Completion (the “**Further Revised Substantial Completion Date**”), which Further Revised Substantial Completion Date shall be no earlier than 15 days after the delivery of such Subsequent Notice;
  - (ii) within 3 Business Days after the Anticipated Substantial Completion Date or the Revised Substantial Completion Date, as the case may be, pay to the City the amount of \$[REDACTED] as liquidated damages in respect of damages suffered and costs incurred by the City related to Project Co’s failure to achieve Substantial Completion and deliver notice thereof in a timely manner; and
  - (iii) If the Subsequent Notice in paragraph 25.4(g)(i) has not been delivered by Project Co, pay to the City the additional sum of \$[REDACTED] per calendar day for each day after the Anticipated Substantial Completion Date or the Revised Substantial Completion Date, as the case may be, that such Subsequent Notice in respect of the Further Revised Substantial Completion Date has not been delivered to the City, as liquidated damages in respect of damages suffered and costs incurred by the City related to Project Co’s failure to deliver such notice.

- (h) The provisions of this Section 25.4 shall repeat, *mutatis mutandis*, until such time as Project Co has achieved Substantial Completion or the Project Agreement has been terminated, whichever is the first to occur.
- (i) The Parties agree that the liquidated damages set out in this Section 25.4 are not a penalty but represent a genuine and reasonable pre-estimate of the damages that will be suffered by the City related to Project Co's failure to comply with and observe the provisions of this Section 25.4.
- (j) Project Co acknowledges and agrees that all liquidated damages set out in this Section 25.4 shall be payable whether or not the City incurs or mitigates these damages, and that the City shall have no obligation to mitigate these damages. Project Co further agrees that it is, and shall be, estopped from alleging that any liquidated damages set out in this Section 25.4 are a penalty and not liquidated damages, or are otherwise unenforceable for any reason, including that such damages were not incurred.
- (k) In the event that there is a Dispute concerning Substantial Completion and such Dispute is ongoing, the City shall not be entitled to payment of liquidated damages pursuant to this Section 25.4 unless and until such Dispute is resolved in accordance with the Dispute Resolution Procedure outlined in Schedule 26 – Dispute Resolution Procedure and, if resolved in favour of the City, the provisions respecting liquidated damages contained in this Section 25.4 shall apply with retroactive effect, except that there shall be added to the amount payable by Project Co on account of liquidated damages, the Payment Compensation Amount from the date the liquidated damages were required to be paid in the absence of the Dispute to the date of payment.
- (l) Notwithstanding any other provision of this Project Agreement, the payment of the liquidated damages amount pursuant to paragraph 25.4(e) shall not reduce the maximum amount of liability of Project Co as provided for in Section 55.4 of the Project Agreement.

## **25.5 City Commissioning**

- (a) The Parties acknowledge that the City may perform City Commissioning both before and after the Substantial Completion Date. Prior to Substantial Completion, Project Co shall not restrict the City, and any of its employees and subcontractors from full access to the Lands, the System Infrastructure and the New Municipal Infrastructure and all relevant parts thereof at such times as may be set out in the Testing and Commissioning Plan to enable the City to undertake any City Commissioning in accordance with the Testing and Commissioning Plan. The City shall comply, and shall ensure that all other City Parties comply with the directions, procedures and safety guidelines established by Project Co for the Lands, the System Infrastructure and the New Municipal Infrastructure and shall use commercially reasonable efforts to minimize disruption to the Project Operations in performing any City Commissioning.
- (b) The City acknowledges that, during the City Commissioning Period, Project Co and its Subcontractors will be active on the Lands, the System Infrastructure and the New Municipal Infrastructure in both the rectification of Minor Deficiencies and the completion of Commissioning Tests, and the City shall take commercially reasonable steps to allow such activities to proceed in accordance with the Testing and Commissioning Plan.

- (c) Project Co acknowledges that, prior to and during the City Commissioning Period, Project Co and its Subcontractors shall cooperate with the City and all other City Parties and use commercially reasonable efforts to ensure that all requirements, and the timing and sequence of such requirements, of the City Commissioning activities are able to be completed in the timeframe for completion set out in the Testing and Commissioning Plan.

**25.6 [Intentionally Deleted]**

**25.7 Minor Deficiencies**

- (a) In the event that Minor Deficiencies exist when Project Co gives a Substantial Completion Notice, the Independent Certifier, in consultation with Project Co and the City, shall, within 15 Business Days of Project Co's application, prepare a list of all Minor Deficiencies (the "**Minor Deficiencies List**") identified at that time and an estimate of the cost for the City and the time for Project Co to complete and rectify such Minor Deficiencies. The City may withhold from the Substantial Completion Payment a holdback amount that is [REDACTED]% of the amount estimated by the Independent Certifier for the City to complete and rectify all Minor Deficiencies (the "**Completion Holdback**"), which holdback shall be held in an interest bearing account.
- (b) The Minor Deficiencies List will contain the schedule for the completion and rectification of the Minor Deficiencies. In determining the relevant time for rectifying Minor Deficiencies, Project Co shall schedule the completion and rectification of Minor Deficiencies so as to minimize, to the greatest extent reasonably possible, any lane or track closures, traffic diversions or restrictions or other impairment of the public's use and enjoyment of the System Infrastructure and the New Municipal Infrastructure or the relevant portion thereof, or disruption of the Project Operations or of the operations of the City, any City Party, any Governmental Authority or any Other Contractor, including the performance of the Governmental Activities and the Other Works, and otherwise in accordance with the Traffic and Transit Management Plan.
- (c) The Independent Certifier must prepare the Minor Deficiencies List in relation to the Substantial Completion Notice as soon as reasonably practicable and, in any event, before the Substantial Completion Certificate is issued, but shall not withhold the Substantial Completion Certificate by reason solely that there are Minor Deficiencies.
- (d) No later than 20 Business Days prior to the Anticipated Substantial Completion Date, the City may direct the Independent Certifier to amend, in consultation with Project Co and the City, the Minor Deficiencies List on one occasion to include a list of any and all Minor Deficiencies that were identified after the preparation of, or not included in, the Minor Deficiencies List pursuant to Section 25.7(a). The Independent Certifier shall prepare the amended Minor Deficiencies List as soon as reasonably practicable and, in any event, within 10 Business Days of such direction given by the City. The amended Minor Deficiencies List shall, following its preparation, be deemed to be the Minor Deficiencies List for the purposes of this Project Agreement, including, without limitation, for the purposes of Sections 25.7 to 25.9 inclusive. The amount of the Completion Holdback shall not be affected by the amended Minor Deficiencies List.
- (e) Where the Independent Certifier has been directed by the City to amend the Minor Deficiencies List pursuant to Section 25.7(d), the Independent Certifier shall specify commercially reasonable completion and rectification times for any newly added Minor Deficiencies.

- (f) The City may, in its sole discretion, waive any requirement for Substantial Completion, and the failure to meet any such requirement shall constitute a Minor Deficiency.
- (g) Nothing in this Section 25.7 shall prevent the City from making any adjustments to the Monthly Service Payments in accordance with Schedule 19 – Payment Mechanism following expiry of the period of time granted to Project Co to rectify the relevant Minor Deficiency, as set out in Section 25.8(a)(i) or 25.8(a)(ii), as applicable.

## **25.8 Rectification of Minor Deficiencies**

- (a) Project Co shall, in consultation with the City Representative and so as to minimize, to the greatest extent reasonably possible, any lane or track closures, traffic diversions or restrictions or other impairment of the public's use and enjoyment of the System Infrastructure and the New Municipal Infrastructure or any portion thereof or disruption of the Project Operations or of the operations of the City, any City Party, any Governmental Authority or any Other Contractor, including the performance of the Governmental Activities and the Other Works, and otherwise in accordance with the Traffic and Transit Management Plan, complete and rectify all Minor Deficiencies:
  - (i) within 180 days of the issuance of the Minor Deficiencies List pursuant to Section 25.7(a) for all Minor Deficiencies where no time for completion and rectification has been specified by the Independent Certifier; or
  - (ii) within the time for completion and rectification of any Minor Deficiency where such a time was specified by the Independent Certifier in the Minor Deficiencies List.
- (b) Project Co acknowledges and agrees that the completion and rectification of Minor Deficiencies may require work outside of normal working hours in order to accommodate the efficient operation of the System Infrastructure and the New Municipal Infrastructure or any portion thereof and to ensure compliance with the Traffic and Transit Management Plan.

## **25.9 Failure to Rectify Minor Deficiencies**

- (a) If Project Co fails to complete and rectify any Minor Deficiency within the time for its completion and rectification specified in Section 25.8, the City may engage others to perform the work necessary to complete and rectify such Minor Deficiency at the risk and cost of Project Co, and the City may deduct such cost from the Completion Holdback and interest accrued thereon.
- (b) Within 2 Business Days of Final Completion, the City shall release to Project Co the Completion Holdback (less any amounts deducted in accordance with Section 25.9(a)), together with all interest accrued thereon and applicable HST. Where the City exercises its rights pursuant to 25.9(a), if the cost of such completion and rectification exceeds the amount of the Completion Holdback and interest, then Project Co shall reimburse the City for all such excess cost.

### **25.9A Final Completion Countdown Notice**

- (a) Project Co shall deliver a notice (the “**Final Completion Countdown Notice**”) to the City and the Independent Certifier specifying the date (which, for greater certainty, will be on or before the

Scheduled Final Completion Date) on which Project Co anticipates that Final Completion will be achieved (the “**Anticipated Final Completion Date**”).

- (b) The Final Completion Countdown Notice shall be delivered not less than 90 days prior to the Anticipated Final Completion Date. If Project Co fails to deliver the Final Completion Countdown Notice not less than 90 days prior to the Scheduled Final Completion Date, the Anticipated Final Completion Date shall be deemed to be the same date as the Scheduled Final Completion Date.

#### **25.10 Final Completion Certificate**

- (a) Project Co shall give the Independent Certifier and the City Representative at least 10 Business Days’ Notice prior to the date upon which Project Co anticipates delivering the Final Completion Notice.
- (b) Project Co shall give the Independent Certifier and the City Representative Notice (a “**Final Completion Notice**”) upon the satisfaction of all requirements for Final Completion, which Final Completion Notice shall describe, in reasonable detail:
  - (i) the items of minor work of a seasonal nature that cannot be completed prior to the Final Completion Date, if any, and the time for completion of such work as agreed between the City and Project Co, each acting reasonably; and
  - (ii) the satisfaction of the requirements for Final Completion, including the completion and rectification of all Minor Deficiencies other than any outstanding seasonal work identified in the Final Completion Notice, and the submission of all records and data as set forth in the Commissioning Program, together with Project Co’s opinion as to whether the conditions for issuance of the Final Completion Certificate have been satisfied.
- (c) The City shall, within 5 Business Days after receipt of the Final Completion Notice, provide the Independent Certifier and Project Co with the City’s opinion as to whether the conditions for issuance of Final Completion Certificate have been satisfied and, if applicable, any reasons as to why it considers that the Final Completion Certificate should not be issued.
- (d) Within 5 Business Days after Project Co’s receipt of the City’s opinion pursuant to Section 25.10(c), the Parties shall cause the Independent Certifier to determine whether the conditions for issuance of the Final Completion Certificate have been satisfied, having regard for the opinions of both Project Co and the City, and to issue to the City and to Project Co either:
  - (i) the Final Completion Certificate, confirming the date of issue as the Final Completion Date; or
  - (ii) a report detailing the matters that the Independent Certifier considers are required to be performed by Project Co to satisfy the conditions for issuance of the Final Completion Certificate, including any items on the Minor Deficiencies List which remain outstanding.
- (e) Where the Independent Certifier has issued a report in accordance with Section 25.10(d)(ii) and Project Co has not referred a Dispute in relation thereto for resolution in accordance with

Schedule 26 - Dispute Resolution Procedure, Project Co shall, within 5 Business Days after receipt of such report, provide the Independent Certifier and the City Representative with:

- (i) a detailed list indicating the rectification actions proposed for all matters raised in such report;
- (ii) the schedule for completion of all such rectification actions; and
- (iii) any additional Commissioning that needs to be undertaken as a result of the rectification actions,

and Project Co shall perform all such additional rectification actions in a timely manner. Upon completion thereof, Project Co may give a further Final Completion Notice and Sections 25.10(c) to (e), inclusive, shall be repeated until the Final Completion Certificate, has been issued.

- (f) Any Dispute in relation to the Independent Certifier's decision to issue or not to issue the Final Completion Certificate may be referred for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.
- (g) If, within 30 days after the time specified in the Final Completion Notice for completion of seasonal work, Project Co has failed to complete such seasonal work, the City may engage others to perform the work necessary to complete the seasonal work, at the risk and cost of Project Co. Project Co shall pay to the City the costs incurred by the City to complete such seasonal work within 10 Business Days of presentation of an invoice for such costs.

#### **25.11 Effect of Certificates/Use**

- (a) The issue of a Substantial Completion Certificate or the Final Completion Certificate, the commencement of use by the City or the public of any part of the System Infrastructure under the terms of this Project Agreement or the commencement of any Governmental Activities shall, in no way:
  - (i) limit the obligations of Project Co under this Project Agreement including in respect of any defects, deficiencies or items of outstanding work existing or discovered prior to or after the date of any of such certificates or the date of the Minor Deficiencies List or of the amended Minor Deficiencies List described in Section 25.7(d); or
  - (ii) be construed as an approval by the City of the Works or the way in which they have been carried out.

#### **25.12 Post-Completion Survey**

- (a) Not more than 90 days after the Final Completion Date, Project Co, at its own cost and expense, shall prepare and submit to the City a reference plan of survey for the System Infrastructure built:
  - (i) on or within the City Road Allowance, identifying the location of the System Infrastructure together with a certain distance calculated from the outer boundary of such System Infrastructure, as well as all encumbrances and encroachments; and

- (ii) at the Stations, identifying the location of the System Infrastructure as well as all encumbrances and encroachments.
- (b) The reference plan of survey set out in Section 25.12(a) shall be prepared by a duly qualified Ontario Land Surveyor.
- (c) The reference plans of survey prepared and submitted by Project Co in accordance with Sections 25.12(a) and 25.12(b) that pertain to any below grade System Infrastructure and the New Municipal Infrastructure on the City Road Allowance or at the Stations (as the case may be) shall be a strata plan showing such System Infrastructure and the New Municipal Infrastructure as three dimensional parts on such reference plan. The reference plan of surveys shall be sufficient for conveyancing purposes and be in registrable form. Project Co, at its expense, shall correct or amend the reference plans if required by the City for purposes of depositing them on title, which corrections and amendments shall be made by Project Co within thirty (30) days after receipt of a Notice from the City.

### **25.13 New Municipal Infrastructure Works**

- (a) Project Co shall achieve all New Municipal Infrastructure Works Acceptances by the Scheduled Substantial Completion Date.
- (b) The City Engineer shall:
  - (i) receive and monitor all drawings, specifications, plans and documents related to the design and development of the New Municipal Infrastructure Works;
  - (ii) receive and monitor all progress reports as necessary for the City Engineer to be in a position to confirm progress and extent of completion of the New Municipal Infrastructure Works;
  - (iii) review and monitor the tests described in Schedule 15 – Output Specifications in respect of the New Municipal Infrastructure Works;
  - (iv) prior to any certification and/or acceptance of New Municipal Infrastructure Works, consider the views and comments of both Project Co and the City in relation to the satisfaction of the conditions for such certification and/or acceptance;
  - (v) conduct inspections and reviews of the New Municipal Infrastructure Works as necessary for the City Engineer to be satisfied that the New Municipal Infrastructure Works are proceeding in accordance with the requirements of the Project Agreement;
  - (vi) review relevant documentation, including the Design Development Submittals relating to New Municipal Infrastructure Works, certificates and approvals, Permits, Licences, Approvals and Authorizations, certifications, test results, quality assurance audits, letters of assurance from professionals, schedules of equipment and staff profile schedules, in each case, relating to New Municipal Infrastructure Works provided to the City Engineer pursuant to this Project Agreement and within the timeframes contemplated for such review within Schedule 10 – Review Procedure; and

- (vii) provide all other services set forth in Schedule 15 – Output Specifications as it relates to the New Municipal Infrastructure Works, in each case, for purposes of enabling the City Engineer to confirm satisfaction of the conditions for issuance of the New Municipal Infrastructure Component Acceptance Certificate for each New Municipal Infrastructure Component and the Final New Municipal Infrastructure Works Acceptance Certificate in relation to all of the New Municipal Infrastructure.
- (c) Project Co shall deliver a notice (a “**New Municipal Infrastructure Works Component Countdown Notice**”) to the City and the City Engineer specifying the date on which Project Co anticipates that New Municipal Infrastructure Component Acceptance will be achieved in respect of such New Municipal Infrastructure Component (the “**Anticipated New Municipal Infrastructure Component Acceptance Date**”). The New Municipal Infrastructure Works Component Countdown Notice shall be delivered not less than 90 days prior to the Anticipated New Municipal Infrastructure Component Acceptance Date. Project Co shall give the City Engineer and the City Representative at least 10 Business Days’ notice prior to the date upon which Project Co anticipates all requirements for New Municipal Infrastructure Component Acceptance shall be satisfied.
- (d) Project Co shall give the City Engineer and the City Representative notice (the “**New Municipal Infrastructure Component Acceptance Notice**”) upon the satisfaction of all requirements of the New Municipal Infrastructure Component Acceptance, together with Project Co’s opinion as to whether the conditions for issuance of the New Municipal Infrastructure Component Acceptance Certificate have been satisfied, and each of the following:
  - (i) to the extent transferable and without prejudice to the City’s rights pursuant to Section 49 and Schedule 35 – Intellectual Property, all copyright licences for computer programs, or licences to use the same, used in connection with the applicable New Municipal Infrastructure Components together with all technical drawings and data, supplier agreements and contracts, utilities consumption information, environmental and technical reports, leases, licence and subletting data and contracts, asset conditions data, standard operating procedures processes and manuals, and all other information related to the New Municipal Infrastructure Works in respect of the applicable New Municipal Infrastructure Component accumulated up until the New Municipal Infrastructure Component Acceptance Date, in each case, in electronic format acceptable to the City, acting reasonably, where it exists in electronic format, and in original format, when not in electronic format;
  - (ii) the most recent Record Drawings relating to the New Municipal Infrastructure Works in the format that the City, acting reasonably, considers most appropriate at the time;
  - (iii) copies of all test results performed and test reports prepared in accordance with Schedule 15, together with all Project Co Permits, Licences, Approvals and Authorizations obtained and/or entered into in connection with the New Municipal Infrastructure Works in PDF or CADD format;
  - (iv) all Project Data and Intellectual Property relating to the design, construction and completion of the New Municipal Infrastructure Component; and

- (v) all information, reports, documents, records and the like referred to in the Project Agreement as it relates to New Municipal Infrastructure Works including as referred to in Schedule 25 – Record Provisions, in each case as it relates to New Municipal Infrastructure and New Municipal Infrastructure Works only;

(collectively, the “**New Municipal Infrastructure Component Works Requirements**”).

Within 10 Business Days after receipt of a New Municipal Infrastructure Component Acceptance Notice, the City Engineer shall determine whether the conditions for issuance of the New Municipal Infrastructure Component Acceptance Certificate have been satisfied and to issue to the City and Project Co either:

- (A) the New Municipal Infrastructure Component Acceptance Certificate, setting out in such certificate the New Municipal Infrastructure Component Acceptance Date; or
  - (B) a report detailing the matters that the City Engineer considers are required to be performed by Project Co to satisfy the conditions for issuance of the New Municipal Infrastructure Component Acceptance Certificate.
- (e) Where the City Engineer has issued a report in accordance with Section 25.13(d)(vi)(B) above, Project Co shall, within 5 Business Days after receipt of such report, provide the City Engineer and the City Representative with:
  - (i) a detailed list indicating the rectification actions proposed for all matters raised in such report;
  - (ii) the schedule for completion of all such rectification actions; and
  - (iii) any additional tests that need to be undertaken in respect of the New Municipal Infrastructure Works as a result of the rectification actions,

and Project Co shall perform all such additional rectification actions and testing in a timely manner. Upon completion thereof, Project Co may give a further New Municipal Infrastructure Component Acceptance Notice and Section 25.13(c) to (e) inclusive shall be repeated until the New Municipal Infrastructure Component Acceptance Certificate has been issued.

- (f) Notwithstanding the provisions of Section 25.13(e), in respect of the New Municipal Infrastructure components consisting of the Earl Armstrong Bridge and Leitrim Bridge structures, and the Park and Ride facilities at Bowesville and Leitrim stations, as well as the South Keys Fare Control building (all as described in the Output Specifications [which are important to the Works Schedules for the Project, the City Engineer may, upon the request and in consultation with Project Co, and being satisfied that the components have been completed to a point which would allow their use notwithstanding that they remain incomplete, accept the handover to and conditional acceptance by the City of, and permit the issuance of a conditional New Municipal Infrastructure Component Acceptance Certificate (a “**Conditional New Municipal Infrastructure Component Acceptance Certificate**”) to Project Co for, such New Municipal Infrastructure components, which would stipulate the deficiencies or incomplete items in such

New Municipal Infrastructure components (the “**NMI Minor Deficiencies**”) that would have to be corrected or completed before a final New Municipal Infrastructure Component Acceptance Certificate could be issued for such components. The Conditional New Municipal Infrastructure Component Acceptance Certificate would stipulate the schedule for the completion and rectification of the NMI Minor Deficiencies, and provide for an amount equal to **[REDACTED]**% of the amount estimated by the City Engineer to complete and rectify all NMI Minor Deficiencies (the “**NMI Minor Deficiency Deduction**”) to be deducted from the Earned Value calculation for such New Municipal Infrastructure components until the NMI Minor Deficiencies have been satisfactorily completed. Following completion of all of the NMI Minor Deficiencies to the satisfaction of the City Engineer, a final New Municipal Infrastructure Component Acceptance Certificate shall be issued in respect of the applicable components of the New Municipal Infrastructure, and the NMI Minor Deficiency Deduction shall be certified for payment in the Earned Value calculations.

- (g) On each New Municipal Infrastructure Component Acceptance Date in respect of each New Municipal Infrastructure Component:
  - (i) Project Co shall cooperate fully with the City and any persons providing services on or at the New Municipal Infrastructure Components in order to avoid or mitigate, insofar as commercially reasonable, any inconvenience or any risk to the health and safety of any person at, on or under the Lands on which the New Municipal Infrastructure Works are or were performed, including those areas where any warranty work is or has been performed;
  - (ii) insofar as title to the New Municipal Infrastructure Components shall not have already passed to the City pursuant to Section 53.1, Project Co shall transfer to, and there shall vest in the City, free from all Encumbrances (other than the Encumbrances caused or consented to by the City), the New Municipal Infrastructure Components;
  - (iii) Project Co shall use commercially reasonable efforts to assign, or otherwise transfer, to the City, free from all Encumbrances (other than any Encumbrances caused or consented to by the City), the benefit of all manufacturers' warranties, including all documentation in respect thereof, in respect of mechanical and electrical plant and equipment used or made available by Project Co under this Project Agreement which is included in the New Municipal Infrastructure Components; and
  - (iv) subject to Section 49 and Schedule 35 - Intellectual Property, all information obtained by Project Co in connection with the New Municipal Infrastructure Works relating to the applicable New Municipal Infrastructure Components, including Record Drawings and other technical drawings and data, supplier agreements and contracts, utilities consumption information, environmental and technical reports, lease, licence and subletting data and contracts, asset conditions data, standard operating procedure, processes and manuals, and all other information directly related to the New Municipal Infrastructure Works relating to the applicable New Municipal Infrastructure Component accumulated over the course of the Project Term shall be the property of the City;
- (h) Subject to the warranty obligations described below, the issuance by the City Engineer in accordance with Section 25.13(d) of the New Municipal Infrastructure Component Acceptance

Certificate in respect of any New Municipal Infrastructure Component shall result in the responsibility for traffic management, maintenance, repair of the New Municipal Infrastructure Component described in such New Municipal Infrastructure Component Acceptance Certificate reverting back to the City.

- (i) After all final New Municipal Infrastructure Component Acceptance Certificates for all New Municipal Infrastructure Components have been delivered by the City Engineer to Project Co, Project Co shall deliver a notice to the City Engineer requesting delivery of the Final New Municipal Infrastructure Works Acceptance Certificate. Upon satisfaction of all conditions to complete the New Municipal Infrastructure Works and achievement of New Municipal Infrastructure Works Acceptance, the City Engineer shall deliver to Project Co the Final New Municipal Infrastructure Works Acceptance Certificate.
- (j) Project Co shall deliver to the City and the City Engineer the following, in each case, in form and substance satisfactory to the City and the City Engineer, acting reasonably, in order to be eligible to receive the Final New Municipal Infrastructure Works Acceptance Certificate one complete set of the New Municipal Infrastructure Component Works Requirements divided up in separate packages for each New Municipal Infrastructure Component (i) showing all alterations made to the New Municipal Infrastructure Works since the New Municipal Infrastructure Component Acceptance Date in respect of each New Municipal Infrastructure Component and (ii) including updates and additions to any of the New Municipal Infrastructure Works Requirements since the New Municipal Infrastructure Component Acceptance Date (the “**Final New Municipal Infrastructure Works Requirements**”).

#### 25.14 Warranties on New Municipal Infrastructure

- (a) Project Co warrants that the New Municipal Infrastructure Works (i) shall conform to the specifications set out in Schedule 15 in all respects as it relates to the New Municipal Infrastructure, (ii) shall otherwise comply with the requirements and Project Co obligations applicable to all New Municipal Infrastructure Works and other Works (insofar as they relate to the New Municipal Infrastructure Works), (iii) shall be new, of good quality material as described in the Project Agreement, and (iv) shall be free of defects in materials, equipment and workmanship and the obligations of this Project Agreement shall apply *mutadis mutandis* to each New Municipal Infrastructure Component for a period or two (2) years from the New Municipal Infrastructure Acceptance Date in respect of such New Municipal Infrastructure Component, and Project Co shall extend the warranty on replaced parts and workmanship replaced during the initial warranty period as it relates to such New Municipal Infrastructure Component to the later of (y) six (6) months from the date of acceptance of the replacement parts and/or workmanship by the City acting reasonably, or (z) the expiry date of the initial warranty period in respect of such New Municipal Infrastructure Component.
- (b) If Project Co fails to perform its obligations set out in Section 25.14(a) in the time specified or subsequently agreed upon, without prejudice to any other right or remedy the City may have under the Project Agreement, the City may correct such New Municipal Infrastructure Works and/or other work described in Section 25.13 and any damage to the Lands on which the New Municipal Infrastructure Works have been performed by Project Co or a Project Co Party and deduct the cost and expense thereof from any holdback amount held by the City or from any payment then or thereafter due to Project Co under the Project Agreement.

## 25.15 Interim Substantial Completion

(a) In the event that either:

- (i) the first New Revenue Vehicle has not been Delivered on or before the date which is 120 days prior to Scheduled Substantial Completion, or
- (ii) the entire Fleet (as defined in the Revenue Vehicle Supply Contract) has not been Delivered on or before the date which is 60 days prior to Scheduled Substantial Completion,

and in each case, Project Co is ready to receive, and capable of receiving, Delivery of such New Revenue Vehicles (collectively, the “**Interim Substantial Completion Conditions**”), Project Co shall provide prompt notice (and in any event within two (2) Business Days of such dates referenced above) confirming the Interim Substantial Completion Conditions (the “**Interim Substantial Completion Notice**”) to the City Representative. Following the issuance of the Interim Substantial Completion Notice, Project Co shall only be required to achieve Interim Substantial Completion on or prior to the Scheduled Substantial Completion Date and all references herein (other than those references in this Section 25.15 and the definition of Substantial Completion in Schedule 1) to Substantial Completion, Substantial Completion Date and Substantial Completion Certificate shall be automatically amended and read as references to Interim Substantial Completion, Interim Substantial Completion Date and Interim Substantial Completion Certificate such that all other requirements that would have been required to be performed by the City or Project Co in connection with, or as a result of, Substantial Completion shall be performed in connection with, or as a result of, Interim Substantial Completion.

(b) In the event Project Co delivers a valid Interim Substantial Completion Notice:

- (i) Project Co shall complete the Remaining Works forthwith upon Delivery of the relevant New Revenue Vehicles and such Remaining Works shall form part of and be required to have been completed in connection with Final Completion;
- (ii) the then current date specified as the Scheduled Substantial Completion Date shall automatically be amended and read as the date prior to which Project Co will achieve Interim Substantial Completion;
- (iii) any Substantial Completion Countdown Notice previously delivered pursuant to Section 25.4 shall be deemed to be a notice of Project Co’s anticipation to achieve Interim Substantial Completion and the Anticipated Substantial Completion Date referenced therein shall be the date on which Project Co anticipates the achievement of Interim Substantial Completion; and
- (iv) the City and Project Co shall enter into a Variation with respect to the Maintenance and Rehabilitation Services as more particularly described in Section 7 of Schedule 19 - Payment Mechanism.

## 26. MAINTENANCE AND REHABILITATION SERVICES

### 26.1 Overall Responsibility

- (a) Project Co shall, following the Substantial Completion Date, perform the Maintenance and Rehabilitation Services:
  - (i) so as to satisfy the Output Specifications;
  - (ii) in accordance with the Project Co Proposal Extracts;
  - (iii) in accordance with Good Industry Practice;
  - (iv) in accordance with the Maintenance Plan; and
  - (v) in accordance with the other terms of this Project Agreement.
- (b) During the Maintenance Period, the City may, from time to time, grant a licence or licences for the temporary use of any Station Plaza or portion thereof for use as special event space (a “**Station Plaza Licence**”) to a person or persons (each, a “**Station Plaza Licensee**”). The City’s granting of a license for temporary use of any Station Plaza by a Station Plaza Licensee shall be in accordance with the following:
  - (i) The City shall consult with Project Co from time to time with a view to considering Project Co’s recommendations regarding permitted uses, permitted times of day and days of the week, maximum number of people, and other appropriate restrictions on the temporary use of the Station Plazas;
  - (ii) If the City intends to grant a Station Plaza Licence, the City shall give Project Co Notice setting out the proposed terms of such Station Plaza Licence. Project Co may provide comments, if any, to the City for its consideration, which the City will take into account, acting reasonably. The City shall advise Project Co if in the City’s opinion, acting reasonably, any such Station Plaza Licence is likely to significantly impede Project Co from the performance of its obligations during the Maintenance Period or adversely affect safety and security;
  - (iii) In respect of Maintenance and Rehabilitation Services provided by Project Co exclusively in respect of Station Plaza Licences, the City shall pay to Project Co an amount equal to,
    - (A) Project Co’s Direct Costs, as defined in Appendix A to Schedule 21 – Variation Procedure; and
    - (B) Project Co’s applicable margins, as determined in accordance with Appendix B to Schedule 21 – Variation Procedure.
  - (iv) Project Co acknowledges and agrees that the granting of any Station Plaza Licence or Licences shall not, in and of itself, automatically entitle Project Co to a Variation; and

- (v) Project Co shall not prevent Station Plaza Licencees from occupying and using the Station Plazas in accordance with the terms of any such Station Plaza Licence;

## **26.2 Commencement of Maintenance and Rehabilitation Services**

- (a) Project Co shall commence the Maintenance and Rehabilitation Services on the day immediately after the Substantial Completion Date and shall perform the Maintenance and Rehabilitation Services until the end of the Maintenance Period.

## **26.3 Equipment for Maintenance and Rehabilitation Services**

- (a) Project Co will procure, deliver, install, commission, maintain, repair, decommission, upgrade and replace any equipment required by Project Co to perform the Maintenance and Rehabilitation Services.

## **26.4 No Closure of the System Infrastructure**

- (a) During the Maintenance Period, Project Co shall not close all or a portion of the System Infrastructure in any circumstances other than as directed or approved by the City, acting reasonably.

## **26.5 Maintenance Plans**

- (a) No later than 90 days prior to the Substantial Completion Date, Project Co shall submit to the City for review pursuant to Schedule 10 - Review Procedure, the Maintenance Plan for the first Contract Year, and shall update such plans as provided for in the Output Specifications annually thereafter.

## **26.6 Revisions to Maintenance Plan**

- (a) No later than 30 days prior to the commencement of any calendar quarter, Project Co may submit to the City a revision to the applicable Maintenance Plan for the Contract Year in which the relevant calendar quarter falls showing the effect of the proposed changes. If Project Co is entitled to proceed with such changes pursuant to Schedule 10 - Review Procedure, then the Maintenance Plan as so amended shall become the Maintenance Plan in respect of that calendar quarter.

## **27. HUMAN RESOURCES**

### **27.1 Admittance of Personnel**

- (a) The City shall have the right to order the removal from the Lands, the System Infrastructure and the New Municipal Infrastructure of any person employed by (or acting on behalf of) Project Co, or any Project Co Party, whose presence, in the reasonable opinion of the City is likely to have an adverse effect on the Other Works or the Governmental Activities or who, in the reasonable opinion of the City is not a fit and proper person to be at the Lands, the System Infrastructure and the New Municipal Infrastructure for any reason, including a failure to comply with any City policy or any immediate obligation of the City to ensure the safety and well-being of persons at the Lands, the System Infrastructure and the New Municipal Infrastructure.

**27.2 Confirmation of Action**

- (a) Any action taken under Section 27.1 shall promptly be confirmed by the City to Project Co and, for greater certainty, shall not relieve Project Co of any of its obligations under this Project Agreement.

**27.3 Finality as to Admission**

- (a) Any decision of the City made pursuant to Section 27.1 shall be final and conclusive.

**27.4 Staff Competency**

- (a) Project Co shall ensure that:
  - (i) there shall at all times be a sufficient number of persons employed or engaged by Project Co or any Project Co Party (including all relevant grades of supervisory staff) engaged in the performance of the Project Operations with the requisite level of skill and experience to perform the Project Operations in accordance with this Project Agreement. For greater certainty, this obligation shall include ensuring that there are a sufficient number of such skilled and experienced persons employed or engaged by Project Co or any Project Co Party to complete the Works in accordance with the Works Schedule and to cover periods of holiday, sickness, other absence, and anticipated and actual peaks in the Maintenance and Rehabilitation Services;
  - (ii) all persons employed or engaged by Project Co or any Project Co Party (including all relevant grades of supervisory staff) engaged in the provision of the Project Operations receive such training and supervision as is necessary to ensure the proper performance of this Project Agreement and compliance with all health and safety rules, procedures and requirements, Authority Requirements and the City HR Policy; and
  - (iii) it creates and maintains, and causes all Project Co Parties to create and maintain, a process which allows it to assess, monitor and correct, on an ongoing basis, the competency of persons employed or engaged by Project Co or any Project Co Party (including all relevant grades of supervisory staff) engaged in the provision of the Project Operations to ensure the proper performance of this Project Agreement.

**27.5 Employee Training**

- (a) Project Co shall and shall ensure all Project Co Parties establish and provide formal training programs and certification for the staff of Project Co and of all Project Co Parties required to be certified to perform specific tasks related to the Maintenance and Rehabilitation Services as required by any provincial or federal regulatory body. All training programs and activities shall be designed, developed, and implemented in accordance with established professional standards for performance based development. Project Co shall and shall ensure that all Project Co Parties consider all suggestions provided by the City to improve the training by Project Co and all Project Co Parties; however, the final decision on any training program is the responsibility of Project Co and the relevant Project Co Parties.

- (b) Project Co shall and shall ensure that the relevant Project Co Parties, upon the City's request, provide training program materials to the City for filing with regulatory agencies as and when required. All such training program materials or other documentation provided by Project Co and the relevant Project Co Parties shall be provided in both paper and digital formats, and shall be written in English.
- (c) Project Co and all Project Co Parties shall be responsible for the cost of all training and certification for all employees of Project Co and Project Co Party employees.

## **27.6 Convictions**

- (a) Project Co (to the extent permitted by Applicable Law) shall, and shall cause such Project Co Party to, ensure that all potential employees (including, for greater certainty, permanent, temporary, full time and part time employees) and persons who may otherwise perform the Maintenance and Rehabilitation Services:
  - (i) are questioned concerning Relevant Convictions; and
  - (ii) are required to complete and deliver to Project Co a criminal records search form.
- (b) To the extent permitted by Applicable Law, Project Co shall, and shall cause each Project Co Party to, ensure that no person who discloses any Relevant Conviction, or who is found to have any Relevant Conviction following the completion of a criminal records search, in either case of which Project Co or a Project Co Party is aware or ought to be aware, is allowed access to the Lands, the System Infrastructure or the New Municipal Infrastructure to perform any Maintenance and Rehabilitation Services, without the prior written consent of the City, in its sole discretion.
- (c) To the extent permitted by Applicable Law, Project Co shall ensure that the City is kept advised at all times of any person employed or engaged by Project Co or any Project Co Party in the provision of any of the Maintenance and Rehabilitation Services who, subsequent to the commencement of such employment or engagement, (i) has been arrested or detained; (ii) receives a Relevant Conviction; or (iii) is charged with an offence that could lead to a Relevant Conviction (of which Project Co or a Project Co Party becomes aware or whose previous Relevant Convictions become known to Project Co or a Project Co Party). Project Co shall use commercially reasonable efforts to obtain, or to cause all Project Co Parties to obtain, all consents as may be required by Applicable Law or otherwise authorizing the disclosure of such information to the City as contemplated in this Section 27.6.

## **27.7 Disciplinary Action**

- (a) The City, acting reasonably, may notify Project Co of any Project Co or Project Co Party employee who engages in misconduct or is incompetent or negligent in the performance of duties or whose presence or conduct on the Lands or at work is otherwise considered by the City to be undesirable, to constitute a threat to the health and/or safety of any of the users of the Lands and/or System Users or which the City considers may potentially compromise (i) the City's reputation or integrity, or (ii) the nature of the public transit system in the City of Ottawa so as to affect public confidence in the public transit system in the City of Ottawa or the Project. Upon

investigation, Project Co may institute, or cause the relevant Project Co Party to institute, disciplinary proceedings, which shall be in accordance with the requirements of Applicable Law, and shall advise the City in writing of the outcome of any disciplinary action taken in respect of such person.

## **27.8 Human Resources Policies**

- (a) Project Co shall ensure that there are set up and maintained by it and by all Project Co Parties, human resources policies and procedures covering all relevant matters relating to the Project Operations (including, for example, health and safety). Project Co shall ensure that the terms and the implementation of such policies and procedures comply with Applicable Law, Authority Requirements, the City HR Policy and Good Industry Practice and that they are published in written form and that copies of them (and any revisions and amendments to them) are available to the City on a timely basis.

## **27.9 Management Organizations**

- (a) Project Co shall provide, and shall ensure that all Project Co Parties provide, to the City, as required to keep such information current, the names of the management teams responsible for the performance of the Project Operations.

## **27.10 Governmental Authority**

- (a) Project Co shall ensure that it and all Project Co Parties comply at all times with any regulations, policies or directions set by any Governmental Authority related to labour, employment and/or human resources.

# **28. GOODS, EQUIPMENT, CONSUMABLES AND MATERIALS**

## **28.1 Standards**

- (a) Project Co shall cause the goods, equipment, consumables and materials used or supplied by it or any Contractor or Subcontractor in connection with the Project Operations to be:
  - (i) of good quality, fit for their intended purpose (other than to the extent a specific type of good, equipment, consumable or material is specified in the Output Specifications) and maintained in a safe, serviceable and clean condition in accordance with the Output Specifications and Good Industry Practice;
  - (ii) of the type specified in the Output Specifications, if applicable; and
  - (iii) in compliance with all Applicable Law,

and shall, as soon as practicable after receiving a request from the City Representative, supply to the City Representative evidence to demonstrate its compliance with this Section 28.1(a).

## **28.2 Stocks**

- (a) Project Co shall cause sufficient stocks of goods, consumables, equipment and materials to be held in compliance with its obligations under this Project Agreement.

## 29. DAMAGE AND DESTRUCTION

### 29.1 Restoration and Reinstatement of Damage or Destruction

- (a) Project Co shall protect (i) the Works, (ii) the property of the City on the Site and (iii) the System Infrastructure, in each case, from damage or destruction which may arise as a result of Project Co's performance of the Project Operations under this Project Agreement, and Project Co shall be responsible for such damage or destruction, except for any damage or destruction which occurs as a result of acts or omissions by the City or any City Party.
- (b) Unless this Project Agreement is terminated in accordance with its terms, if all or any part of,
  - (i) the Works, including the System Infrastructure and New Municipal Infrastructure, is damaged or destroyed prior to the Substantial Completion Date in respect of the System Infrastructure, or prior to the applicable New Municipal Infrastructure Component Acceptance Date in respect of the relevant New Municipal Infrastructure Component, or by an act or omission of Project Co or any Project Co Party; or;
  - (ii) the property of the City on the Site, property adjacent to the Site, or the System Infrastructure is damaged or destroyed by an act or omission of Project Co or any Project Co Party,

Project Co shall, at its own cost and expense, Make Good and repair and replace the property of the City on the Site for which Project Co is responsible pursuant to (a) above, the property adjacent to the Site for which Project Co is responsible pursuant to in (a) above, the relevant New Municipal Infrastructure Component or the System Infrastructure or any part thereof, as applicable, (the "**Reinstatement Work**") promptly and in any event as soon as practicable in the circumstances. Except as otherwise expressly provided in this Project Agreement, damage to or destruction of all or any part of the System Infrastructure or the New Municipal Infrastructure shall not terminate this Project Agreement or relieve Project Co of any of its obligations hereunder or entitle Project Co to any compensation from the City.

- (c) Project Co shall not undertake to repair and/or replace any damage or destruction whatsoever to adjacent property or any infrastructure owned by third parties without first consulting the City and receiving written instructions as to the course of action to be followed.

### 29.2 Reinstatement Plan

- (a) If the Reinstatement Work in respect of the System Infrastructure or New Municipal Infrastructure is reasonably estimated to cost more than \$[REDACTED] (index linked) or in any other case where the City Representative, having regard to the nature of the damage or destruction, notifies Project Co that a Reinstatement Plan is required (excluding where the damage or destruction occurs before the Final Completion Date and the City Representative acting reasonably considers that the continued application of the Design and Construction Certification Procedure would be able to adequately address the Reinstatement Work without the

need for a separate Reinstatement Plan), Project Co shall, as soon as practicable and in any event within 20 Business Days after the occurrence of the damage or destruction or receipt of notification from the City Representative, as the case may be, (or if, with the exercise of all due diligence more than 20 Business Days is reasonably required for such purposes, then within such longer period of time after the occurrence of such damage or destruction or receipt of notification from the City Representative, as the case may be, as may be reasonably required with the exercise of all due diligence, provided Project Co exercises and continues to exercise all such due diligence) submit to the City Representative pursuant to Schedule 10 - Review Procedure a plan (a **“Reinstatement Plan”**) prepared by Project Co for carrying out the Reinstatement Work setting out, in reasonable detail, *inter alia*:

- (i) a description of the Reinstatement Work required to restore, replace and reinstate the damage or destruction;
- (ii) Project Co’s proposed schedule for the execution of the Reinstatement Work; and
- (iii) the information required pursuant to Schedule 21 - Variations as if such plan were an Estimate;

and the Reinstatement Work must not be commenced until the City Representative consents thereto in accordance with Schedule 10 - Review Procedure except to the extent necessary to address any Emergency or public safety needs.

### **29.3 Conduct of Reinstatement Work**

- (a) Project Co shall cause the Reinstatement Work in respect of the System Infrastructure or New Municipal Infrastructure to be carried out in accordance with the Output Specifications and all other applicable requirements under this Project Agreement and, where applicable, in accordance with the Reinstatement Plan consented to by the City Representative in accordance with Schedule 10 - Review Procedure. All designs, plans and specifications in respect of the Reinstatement Work shall be subject to the Design and Construction Certification Procedure. If requested by the City Representative, the persons (and if applicable, a suitable parent entity thereof acceptable to the City) retained by Project Co to design and carry out any Reinstatement Work shall, as a condition to their retainer and prior to commencing any Reinstatement Work or design work in connection therewith, enter into a construction contract with Project Co and a direct agreement with the City in substantially the same forms as the Construction Contract and the Construction Contractor’s Direct Agreement.
- (b) In the event any Insurance Proceeds under Insurance Policies as referred to in Schedule 28 - Insurance Trust Agreement are available to carry out the Reinstatement Work in respect of the System Infrastructure or New Municipal Infrastructure, such Insurance Proceeds shall be paid into the Insurance Trust Account and shall be dispensed in accordance with the provisions of the Insurance Trust Agreement to carry out the Reinstatement Work.

## **30. MONITORING AND PERFORMANCE AUDITS**

### **30.1 Performance Audits**

- (a) If the City reasonably believes that Project Co is in breach of its obligations with respect to Maintenance and Rehabilitation Services, including:
  - (i) under Sections 26 and 27;
  - (ii) under the Output Specifications; or
  - (iii) in respect of any defects, deficiencies or items of outstanding work that should have been completed as part of the Works,then the City may cause to be performed, by an arm's length consultant appointed by the City, a performance audit, inspection and survey of the System Infrastructure to assess whether the System Infrastructure has been and is being maintained by Project Co in accordance with Project Co's obligations (the "**Performance Audit**").
- (b) The City shall notify Project Co in writing at least 10 Business Days prior to the date that the City wishes to cause a Performance Audit to be undertaken. The City shall, acting in good faith, consider any reasonable request by Project Co for the Performance Audit to be performed on an alternative date if such request is made by Project Co in writing at least 5 Business Days prior to the date originally requested by the City, on the basis that performing the Performance Audit on the date originally requested by the City would materially prejudice Project Co's ability to provide the Maintenance and Rehabilitation Services.
- (c) When causing any Performance Audit to be undertaken, the City shall use commercially reasonable efforts to minimize any disruption caused to the provision of the Maintenance and Rehabilitation Services. The cost of a Performance Audit, except where Section 30.1(e) applies, shall be borne by the City. Project Co shall provide the City, at no additional cost or charge, with any reasonable assistance required by the City from time to time during the Performance Audit.
- (d) If a Performance Audit shows that Project Co has not performed or is not performing its obligations in any material respect, the City shall:
  - (i) provide Project Co with a written Notice of non-compliance;
  - (ii) provide Project Co with instructions regarding rectification or Maintenance and Rehabilitation Services, as the case may be, required to be performed by Project Co in order for Project Co to perform its obligations;
  - (iii) specify a reasonable period of time within which Project Co must perform such rectification or Maintenance and Rehabilitation Services; and
  - (iv) be entitled to exercise all rights pursuant to Section 31.
- (e) If a Performance Audit shows that Project Co has not performed or is not performing its obligations in any material respect, Project Co shall:
  - (i) perform any rectification or Maintenance and Rehabilitation Services, as the case may be, required by the City within a reasonable period of time specified by the City, and be

responsible for any costs incurred in performing such rectification or Maintenance and Rehabilitation Services, as the case may be; and

- (ii) pay or reimburse the City for the reasonable costs of the Performance Audit and any administrative costs incurred by the City in relation to the Performance Audit.
- (f) Nothing in this Section 30.1 shall limit or restrict the City's rights hereunder to perform any other performance audits, inspections and surveys at its own cost and expense.
- (g) The City's right to cause a Performance Audit to be undertaken may not be exercised more than once every 180 days unless any Performance Audit performed in the preceding 12 month period shows that Project Co has not performed or is not performing its obligations in any material respect.

### 30.2 Monitoring of Performance

- (a) Project Co shall monitor the performance of the Maintenance and Rehabilitation Services in the manner and at the frequencies set out in the Output Specifications and the Payment Mechanism, and shall compile and at all times maintain records which are accurate and complete of such monitoring and performance. In addition to Project Co's obligations as set out in the Output Specifications and the Payment Mechanism, Project Co shall, as reasonably requested by the City, provide the City Representative with relevant particulars of any aspects of Project Co's performance which fail to meet the requirements of this Project Agreement.
- (b) The City may, at any and all reasonable times, observe, inspect, monitor, audit and take any steps reasonably necessary to satisfy itself as to the adequacy of the monitoring, including performing sample checks.
- (c) The City may in its sole discretion and notwithstanding anything else to the contrary in this Project Agreement, share all performance monitoring information in respect of the Maintenance and Rehabilitation Period with the Operator.

### 30.3 Failure Points

- (a) In each Payment Period, Project Co shall measure the performance of the Maintenance and Rehabilitation Services, and based on the performance of the Maintenance and Rehabilitation Services in the applicable Payment Period, Failure Points may be awarded, as applicable, in accordance with the Payment Mechanism.

### 30.4 Warning Notices

- (a) Without prejudice to the City's rights under Section 43 and any other rights under this Project Agreement, if Project Co accrues the following number of Failure Points or more in any one Payment Period, then the City may give written Notice (a "**Warning Notice**") to Project Co setting out the matter or matters giving rise to such Notice and stating that it is a "Warning Notice":
  - (i) **[REDACTED]** Failure Points in respect of Train Kilometres Availability Failures; or

- (ii) [REDACTED] Failure Points in respect of Quality Failures and Service Failures combined.

### 30.5 Monitoring Notices

- (a) Without prejudice to the City's rights under Section 43 and any other rights under this Project Agreement, if Project Co accrues the following number of Failure Points or more in any rolling 3 Payment Periods, the City may, by Notice (a "**Monitoring Notice**") to Project Co require Project Co to increase the level of Project Co's monitoring of its own performance of its obligations under this Project Agreement until such time as Project Co shall have demonstrated to the reasonable satisfaction of the City that it is performing, and is capable of continuing to perform, its obligations under this Project Agreement in respect of the relevant Maintenance and Rehabilitation Services:

- (i) [REDACTED] Failure Points in respect of Train Kilometres Availability Failures; or
- (ii) [REDACTED] Failure Points in respect of Quality Failures and Service Failures combined.

The City may also issue a Monitoring Notice in the event that the Capital Coverage Ratio as reported in three consecutive Contract Months is less than the Threshold Capital Coverage Ratio.

- (b) The City may give a Warning Notice pursuant to Section 30.4 despite the issuance of a Monitoring Notice in respect of the same matter where a further breach occurs or the original breach has not been remedied within a reasonable period, and whether or not the previous Monitoring Notice remains in effect.
- (c) If a Monitoring Notice is given, then:
  - (i) such Monitoring Notice shall specify in reasonable detail the additional measures to be taken by Project Co in monitoring its own performance;
  - (ii) if Project Co, acting reasonably, objects to any of the specified measures on the grounds that they are excessive or that the City was not entitled to give the Monitoring Notice, Project Co shall, within 5 Business Days of the receipt of the Monitoring Notice, provide Notice to the City's setting out matters objected to and any changes necessary in order to prevent prejudice to Project Co's performance of its obligations under this Project Agreement;
  - (iii) if Project Co provides the City a Notice under Section 30.5(c)(ii), the measures to be taken by Project Co shall be agreed between the Parties or, in the absence of agreement within 10 Business Days of the City's receipt of such Notice, may be referred for resolution in accordance with Schedule 26 - Dispute Resolution Procedure;
  - (iv) if Project Co fails to increase Project Co's monitoring as provided herein, the City may perform such monitoring save where Project Co, acting in good faith, is pursuing a Dispute pursuant to Section 30.5(c)(iii);

- (v) if it is determined in accordance with Schedule 26 - Dispute Resolution Procedure that the City was entitled to give the applicable Monitoring Notice, Project Co shall bear its own costs and reimburse the City for any reasonable costs and expenses incurred by or on behalf of the City in relation to the giving of such Monitoring Notice; and
- (vi) if it is determined in accordance with Schedule 26 - Dispute Resolution Procedure that the City was not entitled to give the applicable Monitoring Notice, the City shall bear its own costs and reimburse Project Co for any reasonable costs and expenses incurred by or on behalf of Project Co in relation to the giving of such Monitoring Notice.
- (d) In respect of any Monitoring Notice, if Project Co shall have demonstrated to the reasonable satisfaction of the City that Project Co has performed its obligations under this Project Agreement for a period of 90 consecutive days and during such period has not received a Warning Notice or Monitoring Notice in respect of the same or similar Maintenance and Rehabilitation Services, as applicable, Project Co may apply for the withdrawal of such Monitoring Notice. If the City is satisfied, acting reasonably, that Project Co has satisfied the aforesaid requirements, it shall, within 10 Business Days of receipt of such application, withdraw such Monitoring Notice and cease to perform or require the performance of the increased monitoring implemented in respect of such Monitoring Notice.
- (e) If it is determined in accordance with Schedule 26 - Dispute Resolution Procedure that the City was not entitled to give any Monitoring Notice, the City shall promptly withdraw such Monitoring Notice and cease to perform or require the performance of the increased monitoring implemented in respect of such Monitoring Notice.

## **31. CITY'S REMEDIAL RIGHTS**

### **31.1 Exercise of Remedial Rights**

- (a) The City may exercise all rights set out in this Section 31 at any time and from time to time if:
  - (i) The City, acting reasonably, considers that a breach by Project Co of any obligation under this Project Agreement, or any act or omission on the part of Project Co or any Project Co Party:
    - (A) does or can reasonably be expected to create a serious threat to the health, safety or security of any person, including any System User or City Party;
    - (B) does or can reasonably be expected to result in a materially adverse interruption in the Maintenance and Rehabilitation Services or the availability of the System Infrastructure to System Users;
    - (C) does or can reasonably be expected to materially prejudice the performance of any Governmental Activities; or
    - (D) may potentially compromise (I) the City's reputation or integrity, or (II) the nature of the public transit system in the City of Ottawa so as to affect public confidence in the public transit system in the City of Ottawa or the Project,

provided that:

- (E) in respect of a breach by Project Co of any obligation under this Project Agreement, or any act or omission on the part of Project Co or any Project Co Party, which can reasonably be expected to cause any of the consequences set out in Sections 31.1(a)(i)(A), 31.1(a)(i)(B) and 31.1(a)(i)(C), the City shall not exercise its rights under this Section 31 unless Project Co has failed to cure the relevant breach, act or omission within 5 Business Days of Notice from the City or, if such breach, act or omission cannot reasonably be cured within such 5 Business Day period, Project Co thereafter fails to diligently and continuously pursue such cure and to cure such breach, act or omission within a reasonable period thereafter, provided that Project Co shall not be entitled to a cure period if any of the consequences set out in Sections 31.1(a)(i)(A), 31.1(a)(i)(B) and 31.1(a)(i)(C) actually occur; and
  - (F) in respect of Section 31.1(a)(i)(D), the City shall not exercise its rights under this Section 31 unless Project Co has failed to cure the relevant breach, act or omission within 5 Business Days of Notice from the City or, if such breach, act or omission cannot reasonably be cured within such 5 Business Day period, Project Co thereafter fails to diligently and continuously pursue such cure and to cure such breach, act or omission within a reasonable period thereafter.
- (ii) Project Co accrues the following number of Failure Points or more in any one Payment Period:
    - (A) **[REDACTED]** Failure Points in respect of Train Kilometres Availability Failures; or
    - (B) **[REDACTED]** Failure Points in respect of Quality Failures and Service Failures combined.
  - (iii) while a Monitoring Notice is in effect that is not being disputed by Project Co, acting in good faith, Project Co receives a Warning Notice in respect of the same or similar Maintenance and Rehabilitation Services.
  - (iv) pursuant to Schedule 11 – Integrated Management System Requirements, an IMS Audit that is not being disputed by Project Co, acting in good faith, shows that Project Co has not performed or is not performing its obligations and Project Co has failed to perform the rectification or Maintenance and Rehabilitation Services, as applicable, as provided in the Output Specifications.
  - (v) a labour dispute materially affects or can reasonably be expected to materially affect the Project Operations, the Governmental Activities or the availability of the System Infrastructure to System Users.
  - (vi) the City has received a notice under the Maintenance and Rehabilitation Contractor's Direct Agreement that entitles the City to exercise step-in rights thereunder.

- (vii) Project Co has failed to comply with any written direction issued by or on behalf of the City.
- (viii) Project Co has not caused the COR-Qualified Construction Project Co Party or the COR-Certified Construction Project Co Party, as the case may be, to perform its obligations with respect to its COR Certification or OHSAS 18001 Accreditation, as the case may be, in accordance with Section 9.6, or Project Co has not caused the COR-Qualified Construction Project Co Party or the COR-Certified Construction Project Co Party, as the case may be, to perform its obligations with respect to H&S Construction Inspections in accordance with Section 13(b), or to perform its obligations to rectify any non-compliance noted in any H&S Construction Inspection Report in accordance with Section 13(e).
- (ix) Project Co has not caused the COR-Qualified Maintenance Project Co Party or the ISO 45001 Certified Maintenance and Rehabilitation Project Co Party, as the case may be, to perform its obligations with respect to its COR Certification in accordance with Section 9.6, or Project Co has not caused the COR-Qualified Maintenance Project Co Party or the ISO 45001 Certified Maintenance and Rehabilitation Project Co Party, as the case may be, to perform its obligations with respect to H&S Maintenance Inspections in accordance with Section 13(b), or to perform its obligations to rectify any non-compliance noted in any H&S Maintenance Inspection Report in accordance with Section 13(e).

### **31.2 Emergency**

- (a) Notwithstanding that Project Co is not in breach of its obligations under this Project Agreement, the City may exercise all of the rights set out in this Section 31 at any time and from time to time during the Maintenance Period if the City, acting reasonably, considers the circumstances to constitute an Emergency.

### **31.3 Rectification**

- (a) Without prejudice to the City's rights under Section 43 and any other rights under this Project Agreement, in any of the circumstances set out in Sections 31.1 or 31.2, the City may, by written Notice, require Project Co to take such steps as the City, acting reasonably, considers necessary or expedient to mitigate, rectify or protect against such circumstance, including, if applicable, the termination and replacement of Subcontractors or a limited suspension of the performance of the Works, and Project Co shall use commercially reasonable efforts to comply with the City's requirements as soon as reasonably practicable.
- (b) If the City gives Notice to Project Co pursuant to Section 31.3(a) and either:
  - (i) Project Co does not either confirm, within 5 Business Days of such Notice or such shorter period as is appropriate in the case of an Emergency or in the event the City is entitled to exercise step-in rights under the Maintenance and Rehabilitation Contractor's Direct Agreement that it is willing to take the steps required in such Notice or present an alternative plan to the City to mitigate, rectify and protect against such circumstances that the City may accept or reject acting reasonably; or

- (ii) Project Co fails to take the steps required in such Notice or accepted alternative plan within such time as set out in such Notice or accepted alternative plan or within such longer time as the City, acting reasonably, shall think fit,

then the City may take such steps as it considers to be appropriate, acting reasonably, including, if applicable, exercising step-in rights under the Maintenance and Rehabilitation Contractor's Direct Agreement and requiring the termination and replacement of Subcontractors, either itself or by engaging others (including a third party) to take any such steps, and may perform or obtain the performance of the relevant Maintenance and Rehabilitation Services to the standards required by this Project Agreement, and the provisions of Section 40, including Section 40.1(a)(iv) and Section 40.1(a)(x), shall apply.

- (c) Notwithstanding the foregoing provisions of this Section 31.3, in the event of an Emergency, the Notice under Section 31.3(a) shall be given as promptly as possible having regard to the nature of the Emergency and the City may, prior to Project Co's confirmation under Section 31.3(b)(i), take such steps as are appropriate having regard to the nature of the Emergency.
- (d) Where the City considers it to be necessary to do so, the steps which the City may take pursuant to this Section 31.3 subsequent to the provision of the Notice under Section 31.3(a) unless the Notice is given at a later time as provided in Section 31.3(c), may, at the City's option, include the partial or total suspension of Project Co's right and obligation to perform any Maintenance and Rehabilitation Services having regard to the circumstances in question (without any extension of the Project Term or suspension of any other Maintenance and Rehabilitation Services, and the provisions of Section 40, including Section 40.1(a)(iv) and Section 40.2, shall apply, but such suspension shall be only for so long as, as applicable:
  - (i) the circumstances referred to in Section 31.1 or 31.2 subsist; or
  - (ii) in respect of any such circumstances relating to Project Co's performance of the Maintenance and Rehabilitation Services, until such time as Project Co shall have demonstrated to the reasonable satisfaction of the City that, notwithstanding such circumstances, Project Co has taken such steps, including, if applicable, the termination and replacement of Subcontractors, as are required pursuant to this Section 31.3 and as are necessary to be capable of performing its obligations in respect of the relevant Maintenance and Rehabilitation Services to the required standard in accordance with this Project Agreement, and thereafter Project Co shall perform its obligations as aforesaid.

#### **31.4 Costs and Expenses**

- (a) Subject to the City's obligations pursuant to Sections 31.5 and 31.6:
  - (i) Project Co shall bear all costs and expenses incurred by Project Co in relation to the exercise of the City's rights pursuant to this Section 31; and
  - (ii) Project Co shall reimburse the City for all reasonable costs and expenses incurred by the City in relation to the exercise of the City's rights pursuant to this Section 31.

### 31.5 Reimbursement Events

- (a) In this Section 31.5, a “**Reimbursement Event**” means:
- (i) an act or omission of Project Co or any Project Co Party or a breach by Project Co or any Project Co Party of any obligation under this Project Agreement, but only to the extent such act, omission or breach is caused by a City Party;
  - (ii) a labour dispute involving employees of any City Party that materially affects or can reasonably be expected to materially affect the Project Operations; or
  - (iii) an Emergency that is not caused or contributed to by an act or omission of Project Co or any Project Co Party or a breach by Project Co or any Project Co Party of any obligation under this Project Agreement.
- (b) If the City either takes steps itself or requires Project Co to take steps in accordance with this Section 31 as a result of a Reimbursement Event:
- (i) the City shall reimburse Project Co for the reasonable costs and expenses incurred by Project Co in relation to the exercise of the City’s rights pursuant to this Section 31 that would not otherwise have been incurred by Project Co in the proper performance of its obligations under this Project Agreement; and
  - (ii) subject to Section 31.5(c), the City shall bear all costs and expenses incurred by the City in relation to the exercise of the City’s rights pursuant to this Section 31.
- (c) If, in exercising its rights pursuant to this Section 31, the City performs any part of the Maintenance and Rehabilitation Services either itself or by engaging others, the City shall be entitled to deduct from any Monthly Service Payment the reasonable cost of performing such Maintenance and Rehabilitation Services. If the City makes such a deduction, then Project Co shall be relieved of its reimbursement obligations under Section 31.4(a)(ii) up to the amount equal to the deduction.

### 31.6 Reimbursement if Improper Exercise of Rights

- (a) If the City exercises its rights pursuant to this Section 31, but the City was not entitled to do so, the City shall reimburse Project Co for the reasonable costs and expenses directly incurred by Project Co over and above those that would otherwise have been incurred by Project Co in the proper performance of its obligations under this Project Agreement and that are directly and reasonably incurred by Project Co in complying with those written requirements of the City issued as a result of the City having exercised such rights.
- (b) Project Co acknowledges and agrees that Project Co has no right to require a determination of whether or not the City is entitled to exercise its rights pursuant to this Section 31 before taking any such action that the City may require and Project Co shall comply with all of the City’s requirements. Only concurrently with or after complying with the City’s requirements shall Project Co be entitled to refer any Dispute for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.

## **32. PAYMENT**

### **32.1 Construction Period Payments**

- (a) The City shall pay to Project Co the Construction Period Payments, plus, for clarity, applicable HST in accordance with Schedule 20 – Construction Period Payments and this Project Agreement.
- (b) The City shall pay to Project Co the Substantial Completion Payment plus, for clarity, applicable HST, less any Lane Closure Adjustment on the Substantial Completion Payment Commencement Date in accordance with Schedule 20 – Construction Period Payments and this Project Agreement.

### **32.2 Monthly Service Payments**

- (a) Subject to and in accordance with this Project Agreement, including this Section 32 and Schedule 19 - Payment Mechanism, the City shall pay to Project Co the Monthly Service Payments, plus, for clarity, any applicable HST.

### **32.3 Payment Adjustments**

- (a) Project Co acknowledges and agrees that:
  - (i) the amount of any Monthly Service Payment may be adjusted pursuant to Schedule 19 - Payment Mechanism; and
  - (ii) such adjustments are integral to the provisions of this Project Agreement.
- (b) If, for any reason, any adjustment (including a Deduction) made pursuant to Schedule 19 - Payment Mechanism is invalid and unenforceable, and an Applicable Law that is a Change in Law is enacted that permits the City to recover or to cause such adjustment to be enforceable, such Change in Law (only to the extent that it permits the City to recover or to cause such adjustment to be enforceable) shall be deemed to not be a Relevant Change in Law and Project Co shall not be entitled to any compensation hereunder for such Change in Law.

### **32.4 Payment Commencement**

- (a) Subject to and in accordance with this Project Agreement, the City shall pay Project Co the Monthly Service Payments calculated as being due to Project Co in respect of each Payment Period following the Payment Commencement Date in accordance with Schedule 19 - Payment Mechanism.
- (b) Project Co shall not be entitled to any Monthly Service Payments for any period prior to the Payment Commencement Date.

### **32.5 Adjustments to Payment Periods**

- (a) The Annual Service Payment payable in respect of each of the first Contract Year and the last Contract Year shall be adjusted in accordance with Schedule 19 - Payment Mechanism.

### **32.6 Invoicing and Payment Arrangements**

- (a) Within 5 Business Days following the end of each Payment Period, Project Co shall issue to the City an invoice for the amount of the Monthly Service Payment owing by the City to Project Co for such Payment Period, with such adjustments as provided in the Payment Adjustment Report issued in the previous Payment Period.
- (b) Project Co shall comply with all requirements of Schedule 19 - Payment Mechanism in respect of invoices and shall include with each invoice such supporting documentation as the City may reasonably require in connection with payments hereunder.
- (c) Each invoice shall be in a form agreed by the Parties, acting reasonably, and shall include as a minimum:
  - (i) the Monthly Service Payment payable in respect of the applicable Payment Period;
  - (ii) any adjustments set out in the Payment Adjustment Report issued in the previous Payment Period that have been approved by the City;
  - (iii) any other adjustments to reflect overpayments and underpayments, as agreed between the Parties or determined in accordance with Schedule 26 - Dispute Resolution Procedure;
  - (iv) any amount owing to the City under this Project Agreement;
  - (v) any amount owing to Project Co under this Project Agreement;
  - (vi) the net amount owing by the City to Project Co, or by Project Co to the City, as applicable; and
  - (vii) a statutory declaration in form and in substance satisfactory to the City with respect to CLA compliance and payment to all lien claimants:
    - (A) from Project Co, and
    - (B) upon request by the City, from any Project Co Party.
- (d) The invoices issued to the City in respect of the first Monthly Service Payment following the Payment Commencement Date (or the first invoice following expiry of the 45-day period referred to below) shall include up-to-date copies of the parcel registers for all of the Lands, which sub searches of title in support thereof shall not be performed earlier than 45 days following publication of a certificate of substantial performance of the Works pursuant to section 32(1) of the CLA.
- (e) HST shall be shown separately on all invoices from Project Co, together with Project Co's HST registration number.
- (f) Upon agreement of the Parties, the form of invoice may be changed from time to time.

- (g) The City Representative shall review each invoice submitted in accordance with this Section 32.6. the City shall pay the amount stated in such invoice on the first Business Day of the Payment Period next following the Payment Period in which the invoice is received. Any such payment shall be subject to adjustment pursuant to Section 32.6(k).
- (h) The City shall not be obligated to make any payment to Project Co unless all conditions precedent applicable to such payment under this Project Agreement have been satisfied by Project Co. Further, the City shall not be obligated to pay an invoice delivered by Project Co after the second Payment Period following the Payment Commencement Date until Project Co has delivered the Payment Adjustment Report referred to in Section 32.6(i) for the previous Payment Period. In the event that Project Co delivers any Payment Adjustment Report later than the stipulated date in Section 32.6(i), the City's obligation to pay the invoice issued by Project Co for the immediately following Payment Period shall be extended by the number of days by which Project Co was late in delivering the applicable Payment Adjustment Report to the City.
- (i) Within 5 Business Days following the end of each Payment Period, Project Co shall also submit to the City:
  - (i) a Performance Monitoring Report in respect of the Payment Period just ended (as further described in Schedule 11 – Integrated Management System Requirements); and
  - (ii) a report (a “**Payment Adjustment Report**”) setting out any adjustments required between the actual Monthly Service Payments determined by Project Co to be owing by the City to Project Co in respect of the Payment Period just ended and the amount that was paid by the City during such Payment Period, including details of:
    - (A) all Deductions in relation to Availability Failures;
    - (B) all Deductions in relation to Quality Failures;
    - (C) all Deductions in relation to Service Failures; and
    - (D) any Gainshare Adjustment or Painshare Adjustment.
- (j) Project Co shall include with each Payment Adjustment Report such supporting documentation as is reasonably required to substantiate and confirm the adjustments set out in each Payment Adjustment Report.
- (k) Within 10 Business Days of receipt by the City of the Payment Adjustment Report, the City Representative shall:
  - (i) determine and advise Project Co that the Payment Adjustment Report is approved by the City, in which case the adjustments set out therein will be reflected by Project Co in the invoice next issued by Project Co; or
  - (ii) if the City disputes Project Co's entitlement to any part of the amounts set out therein, notify Project Co in writing of that part of the amounts (insofar as at the time of such Notice the City are reasonably able to quantify it) which the City dispute and submit to Project Co such supporting documentation as is reasonably required to substantiate and

confirm such claim. In such event, the City shall withhold payment of any disputed amount pending agreement or determination of Project Co's entitlement to the disputed amount in accordance with Section 32.9.

### **32.7 Electronic Invoicing**

- (a) Project Co shall cooperate with the reasonable requirements of the City, and shall submit its invoices and all other documentation relating to this Project Agreement in a form and with the structure and content as is reasonably required to be compatible with the City's information systems.

### **32.8 Final Payment Periods**

- (a) At the beginning of each of the final 3 Payment Periods immediately prior to the Expiry Date, the City shall estimate, acting reasonably, the adjustments to the Monthly Service Payments for each such Payment Period. The City may withhold the amounts that it has reasonably estimated for such adjustments from amounts paid to Project Co during each of the final 3 Payment Periods.
- (b) Within 10 Business Days of receipt by the City of the applicable Payment Adjustment Report for each of the final 3 Payment Periods, the City Representative shall either:
  - (i) determine and advise Project Co that the Payment Adjustment Report is approved by the City and perform a reconciliation between the amount payable based on such Payment Adjustment Report and the amount the City previously paid in respect of the applicable Payment Period. Based on such reconciliation, either the City or Project Co shall pay to the other Party the amount properly owing in accordance with such reconciliation; or
  - (ii) if the City disputes Project Co's entitlement to any part of the amounts set out therein, notify Project Co in writing of that part of the amounts (insofar as at the time of such Notice the City are reasonably able to quantify it) which the City disputes and submit to Project Co such supporting documentation as is reasonably required to substantiate and confirm such claim. In such event, the City Representative shall perform a reconciliation between the undisputed amount payable based on such Payment Adjustment Report and the amount the City previously paid in respect of the applicable Payment Period. Based on such reconciliation, either the City or Project Co shall pay to the other Party the amount properly owing in accordance with such reconciliation, provided that the City shall withhold payment of any disputed amount pending agreement or determination of Project Co's entitlement to the disputed amount in accordance with Section 32.9.

### **32.9 Disputes**

- (a) If the City, acting in good faith, disputes all or any part of a Payment Adjustment Report and/or the Monthly Service Payments payable thereunder, it shall notify Project Co in writing of that part of the amounts (insofar as at the time of such Notice the City is reasonably able to quantify it) which the City disputes and submit to Project Co such supporting documentation as is reasonably required to substantiate and confirm such claim. The Parties shall use commercially reasonable efforts to resolve the Dispute in question within 10 Business Days of the aforesaid Notice of the Dispute. If they fail to so resolve the Dispute within such period, the Dispute may

be referred for resolution in accordance with Schedule 26 – Dispute Resolution Procedure. Following resolution of the Dispute, any amount which has been paid by the City that is determined not to have been payable shall be paid forthwith by Project Co to the City, and Project Co shall indemnify and hold harmless the City from and against any damages suffered or incurred resulting from such overpayment by the City as provided for at Section 54.1(e) on the basis that the due date was the date of the overpayment by the City. Following resolution of the Dispute, any amount that has been withheld by the City that is determined to have been payable shall be paid forthwith by the City to Project Co and the City shall indemnify and hold harmless Project Co from and against any damages suffered or incurred resulting from such withholding by the City as provided for at Section 54.2(c) on the basis that the due date was the date upon which such amount became payable to Project Co.

### **32.10 Payments**

- (a) Unless specific timeframes are stipulated for payment of any amounts owing or payable by one Party to the other Party under this Project Agreement, such amounts shall be due within 30 days of receipt or deemed receipt of an invoice therefor.
- (b) Project Co shall maintain or cause to be maintained all holdbacks required pursuant to the CLA which may be maintained by way of cash, Letter of Credit or holdback release bond, and shall only release holdbacks on being satisfied that no claims for lien can be claimed in respect of the Subcontracts for which holdbacks are to be released.

### **32.11 Manner of Payment**

- (a) All payments under this Project Agreement shall be made in Canadian dollars and shall be electronically transferred, quoting the invoice number or description against which payment is made, in immediately available funds on the due date to a single bank account located in Canada as may be designated by the recipient from time to time by written Notice to the other Party.
- (b) If the due date is not a Business Day, then the electronic transfer shall be made on the Business Day immediately succeeding such day.

### **32.12 Set-Off**

- (a) The Parties agree that their rights of set-off at law or in equity are limited to the right of:
  - (i) the City to set off against any amounts otherwise due to Project Co pursuant to the terms of this Project Agreement (other than any Construction Period Payment and Unpaid Construction Period Payments), any amounts (including any amounts payable in accordance with Section 54) that are due to the City by Project Co pursuant to the terms of this Project Agreement; and
  - (ii) Project Co to set off against any amounts otherwise due to the City pursuant to the terms of this Project Agreement, any amounts (including any amounts payable in accordance with Section 54) that are due to Project Co by the City pursuant to the terms of this Project Agreement.

### **32.13 Effect of Payment**

- (a) No payment hereunder shall be construed as an acceptance or approval of incomplete, defective or improper performance by Project Co of any of its obligations under this Project Agreement, nor shall it operate to relieve Project Co from the performance of any of its obligations under this Project Agreement which have not been performed.

#### **32.14 Audit of Performance and Payment**

- (a) Without limiting the City's rights and Project Co's obligations pursuant to Section 35.2, at any time and from time to time until 365 days after the Termination Date, the City may give Notice to Project Co requiring an audit of any matter relating to performance of the Project Operations and payments by or to the City within the 7 year period prior to the date of such Notice, including any Payment Adjustment Reports, and any other records, reports, information, documents or data relating to performance and payments to verify their accuracy, correctness and completeness.
- (b) The City shall appoint an auditor to perform and complete such audit at the City's cost and expense and pursuant to terms of reference determined by the City.
- (c) Within a reasonable time following receipt of a Notice referred to in Section 32.14(a), Project Co shall make available to the City's auditor, any Payment Adjustment Reports, and any other records, reports, information, documents or data relating to performance and payments.
- (d) The City shall notify Project Co of the results of the audit, and if the City's auditor discovers any inaccuracy, incorrectness or incompleteness, then, subject to Project Co's right to dispute the same in accordance with Schedule 26 – Dispute Resolution Procedure:
  - (i) Project Co shall:
    - (A) remedy any such inaccuracy, incorrectness or incompleteness and issue a revision to the applicable Payment Adjustment Report or other record, report, information, document or data; and
    - (B) where the inaccuracy, incompleteness or incorrectness has resulted in any material overpayment by the City, reimburse the City for all costs relating to the auditor and audit to a maximum amount that is the lesser of:
      - (I) the actual costs relating to the auditor and audit; or
      - (II) an amount equal to the amount of any overpayment;
  - (ii) where the inaccuracy, incompleteness or incorrectness has resulted in any overpayment, whether or not material, by the City, Project Co shall reimburse the City for the amount of such overpayment and, further, shall indemnify and hold harmless the City from and against any damages suffered or incurred resulting from such overpayment by the City as provided for at Section 54.1(e) on the basis that the due date was the date of the overpayment by the City; and
  - (iii) where the inaccuracy, incompleteness or incorrectness has resulted in any underpayment by the City, whether or not material, the City shall pay Project Co the amount of such underpayment and, further, shall indemnify and hold harmless Project Co from and

against any damages suffered or incurred resulting from such underpayment by the City as provided for at Section 54.2(c) on the basis that the due date was the date of the underpayment by the City.

**32.15 No Other Entitlement**

- (a) Project Co shall not be entitled to any payments, compensation, rights, remedies, benefits or entitlements under or in connection with this Project Agreement, except as specifically and expressly set out in this Project Agreement

**33. TAXES**

**33.1 Taxes**

- (a) All amounts specified in this Project Agreement, including, for clarity, any compensation payable on termination, are expressed exclusive of HST, but inclusive of all other Taxes payable pursuant to Applicable Law. For clarity, the City shall not be required to pay any interest and/or penalties that are imposed on or assessed against Project Co or any Project Co Party for non-compliance with Applicable Law. If Project Co is required by Applicable Law to collect any such HST from the City, the City shall pay such HST to Project Co simultaneously with the amount to which such applicable HST relates or applies.
- (b) The City shall pay, when due and payable, all property taxes or payments in lieu of property taxes that are assessed in respect of ownership or use of the Lands, the System Infrastructure and the New Municipal Infrastructure.
- (c) The City shall pay all applicable HST properly payable in accordance with the *Excise Tax Act* (Canada) by the City upon and in connection with payments by the City to Project Co under this Project Agreement. For greater certainty, the Parties agree that the conditions set out in paragraph 168(3)(c) of the *Excise Tax Act* (Canada) are not satisfied at the time of Substantial Completion hereunder and, unless otherwise required by Applicable Law, any HST payable by the City hereunder shall be calculated solely by reference to the amount of the payment, without any deductions or adjustments on account of paragraph 168(3)(c) of the *Excise Tax Act* (Canada).

**33.2 Changes in Scope of Taxation**

- (a) If, as a result of a Change in Law, the application of Taxes under Part IX of the *Excise Tax Act* (Canada) or any provincial sales tax legislation changes with respect to the provision of any goods or services by Project Co in connection with the performance of the Works, the City and Project Co agree to cooperate to determine how such change affects their respective obligations under this Project Agreement to the extent not already addressed in this Project Agreement.

**33.3 Changes in Recoverability of Tax Credits**

- (a) The City will pay to Project Co from time to time, as the same is incurred by Project Co, amounts equal to any Irrecoverable Tax to the extent such Irrecoverable Tax results from a Change in Law. Project Co will pay to the City from time to time, as the same is incurred by Project Co, amounts equal to any Recoverable Tax to the extent such Recoverable Tax results from a Change in Law.

- (b) For the purposes of this Section 33.3, the term “**Irrecoverable Tax**” means HST or an irrecoverable sales tax levied by the Province in lieu of all or a portion of HST incurred by Project Co in respect of the supply of any good or service to the City which is consumed, used or supplied, or to be consumed, used or supplied, exclusively by Project Co in the course of carrying out the Works or otherwise performing the Project Operations to the extent that Project Co is unable to recover or be credited with input tax credits, refunds, rebates or exemptions for such HST.
- (c) For the purposes of this Section 33.3, the term “**Recoverable Tax**” means HST incurred by Project Co in respect of the supply of any good or service to the City which is consumed, used or supplied, or to be consumed, used or supplied, exclusively by Project Co in the course of carrying out the Works or otherwise performing the Project Operations to the extent that Project Co is able to recover or be credited with input tax credits, refunds, rebates or exemptions for such HST.

#### **33.4 Information and Assistance Provided by Project Co**

- (a) Project Co shall, at the City’s request and cost, assist the City in applying for and obtaining all remissions and credits of Taxes to which the City is entitled.
- (b) The City may apply for a global or general exemption, waiver, remission, or refund of some or all Taxes which may otherwise be applicable in relation to this Project Agreement. Project Co shall, at the City’s cost, assist the City in making any applications for such global or general exemption, waiver, remission or refund and shall provide the City with such documentation as the City may reasonably require to support such application and, in any event, shall provide such consent as the City may require. Any exemption, waiver, remission, refund or other recovery of Taxes obtained by the City through such application shall accrue to the sole benefit of the City.
- (c) Project Co will provide the City with any information reasonably requested by the City from time to time in relation to any Taxes chargeable in accordance with this Project Agreement and payable by the City to Project Co from time to time.

#### **33.5 Residency – *Income Tax Act* (Canada)**

- (a) Project Co shall not undertake any action or transaction that, if undertaken, would cause or result in Project Co becoming a Non-Resident without the City’s prior written consent, which consent may be withheld in the City’s sole discretion.

#### **33.6 Taxes – General**

- (a) Project Co shall not, without the prior written consent of the City (which consent may be withheld in its sole discretion), undertake any action or transaction that, if undertaken, would cause the City or any the City Party to have (or result in the City or any City Party having) any obligation to deduct, withhold or remit any Taxes that are required by Applicable Law to be deducted, withheld or remitted from any amounts paid or credited to Project Co or any Project Co Party under this Project Agreement or under any other Project Document.

#### **33.7 Taxes – Indemnity**

- (a) If:

- (i) Project Co becomes a Non-Resident, or
- (ii) The City or any City Party are or become required by Applicable Law to deduct or withhold any amount in respect of Taxes on or in respect of any amounts paid or credited to Project Co or a Project Co Party by the City or any City Party under this Project Agreement or under any of the Project Documents,

then the City or any City Party shall be entitled to make any applicable deductions or withholdings required by Applicable Law from any amount paid or credited or to be paid or credited to Project Co or a Project Co Party on or after the date on which:

- (iii) Project Co or the Project Co Party becomes a Non-Resident and at all times while it remains a Non-Resident; or
- (iv) the City or any City Party are required by Applicable Law to deduct or withhold amounts in respect of any such amounts,

in each case, in respect of all Taxes that are required by Applicable Law to be deducted or withheld from amounts paid or credited to a Non-Resident or otherwise as required by Applicable Law; and all amounts paid or credited by the City or any City Party under this Project Agreement or under any other Project Document to Project Co or a Project Co Party shall be paid or credited net of such deductions or withholdings.

(b) If:

- (i) Project Co becomes a Non-Resident, or
- (ii) the City or any City Party are or become required by Applicable Law to deduct and withhold any amount in respect of Taxes on or in respect of any amounts paid or credited to Project Co or a Project Co Party by the City or any City Party under this Project Agreement or under any of the Project Documents,

Project Co shall, in each case, indemnify and hold harmless the City and the City Parties for:

- (iii) the full amount of all Taxes (“**Indemnifiable Taxes**”) that arise, are imposed on or are required to be paid by the City or any City Party in respect of any amounts paid or credited by the City or any City Party to Project Co or any Project Co Party under this Project Agreement or under any other Project Document as a result of either of the foregoing items less any amount withheld or deducted by the City or any City Party in respect of such Taxes, and
- (iv) any liability payable or incurred in connection with Indemnifiable Taxes (including penalties, interest and reasonable expenses associated with Tax compliance, reporting and contesting such liability for Indemnifiable Taxes, including reasonable professional expenses payable or incurred in connection therewith) arising from or with respect to Indemnifiable Taxes, whether or not they were correctly or legally asserted (“**Associated Liabilities**”).

Payment under this indemnification shall be made within 30 days from the date the City makes written demand for it. A certificate containing reasonable detail as to the amount of Indemnifiable Taxes and Associated Liabilities submitted to Project Co by the City shall be conclusive evidence, absent manifest error, of the amount due from Project Co to the City. The City shall be entitled to exercise its rights of set-off under Section 32.12 against any amounts owing under this indemnification. In the event that it is finally determined that such Indemnifiable Taxes were not correctly or legally asserted or remitted, then such Indemnifiable Taxes shall be reimbursed to Project Co following such final determination.

## **34. FINANCIAL MODEL**

### **34.1 Appointment of Custodian**

- (a) On or prior to Financial Close, the Parties shall appoint a suitably qualified and experienced person to act as the custodian for the purposes of this Project Agreement, and shall enter into an agreement with the Custodian substantially in the form of Schedule 3 - Custody Agreement.

### **34.2 Delivery and Use of Financial Model**

- (a) In accordance with Schedule 2 - Completion Documents, Project Co shall deliver copies of the Financial Model (1 printed copy and 2 copies on CD-Rom) to the City and the Custodian to be held in custody on terms to be agreed by the Parties.
- (b) Following the approval by the City of any amendment to the Financial Model, Project Co shall promptly deliver copies of the revised Financial Model, in the same form as the original Financial Model (or such other form as may be agreed by the Parties from time to time), to the City and the Custodian.
- (c) The Parties shall instruct the Custodian to keep both a hard copy and an electronic copy of all versions of the Financial Model.
- (d) Project Co hereby grants to the City an irrevocable, royalty free, perpetual, non-exclusive and transferable license, including the right to grant sub-licences, to use the Financial Model or any revised Financial Model for any purpose in connection with this Project Agreement, whether during or after the Project Term.
- (e) For greater certainty, Project Co acknowledges and agrees that the City shall not be liable to Project Co for, and Project Co shall not seek to recover from the City or any City Party, any damages, losses, costs, liabilities or expenses which may arise (whether in contract, tort or otherwise) as a result of any errors in the Financial Model.

## **35. RECORDS, INFORMATION AND AUDIT**

### **35.1 Records Provisions**

- (a) Project Co shall comply with Schedule 25 - Record Provisions.

### **35.2 Information and General Audit Rights**

- (a) Project Co shall provide and shall cause each Subcontractor to provide to the City all information, reports, documents, records and the like, including as referred to in Schedule 25 - Record Provisions, in the possession of, or available to, Project Co as the City may reasonably require from time to time for any purpose in connection with this Project Agreement, other than Sensitive Information. Project Co shall use commercially reasonable efforts to ensure that, for such purpose, all such information, reports, documents, records and the like in the possession of, or available to, the Contractors shall be available to Project Co and Project Co shall include relevant terms in all Subcontracts to this effect.
- (b) Project Co shall also provide to the City, and shall require each Subcontractor, including the Contractors, to provide to the City (at the City's reasonable cost), all information, reports, documents, records and the like required to be provided pursuant to Section 35.2(a) which subsequently come into the possession of, or become available to, Project Co or each Subcontractor, as the City may reasonably require from time to time to enable the City to provide reports, notices, returns and the like pursuant to Applicable Law, including information and documentation pertaining to the physical condition of the System Infrastructure and the New Municipal Infrastructure, security, health and safety, fire safety, emergency preparedness, environmental matters, employees and human resources related matters, other than Sensitive Information.
- (c) Project Co shall promptly after receipt provide the City with a copy of any material notice, order, direction, requirement or other similar communication received by it or by any Subcontractor from any Governmental Authority in relation to any of the Project Operations or the System Infrastructure and the New Municipal Infrastructure, and Project Co shall include relevant terms in all Subcontracts to this effect.
- (d) Project Co shall promptly notify the City of any actions, suits, proceedings, or investigations commenced, pending or threatened against Project Co or, to Project Co's knowledge, any Subcontractor at law or in equity before any Governmental Authority or arbitral body (whether or not covered by insurance) that individually or in the aggregate could result in any material adverse effect on the business, properties, or assets or the condition, financial or otherwise, of Project Co or in any impairment of its ability to perform its obligations under this Project Agreement.
- (e) All information, reports, documents and records in the possession of, or available to, Project Co, including as referred to in Schedule 25 - Record Provisions, which are required to be provided to or available to the City hereunder, shall be subject and open to inspection and audit by the City at any time and from time to time, which inspection and audit shall take place during normal business hours and at Project Co's normal places of business unless the City and Project Co otherwise agree. The City shall also have the right to monitor and audit the performance of any and all parts of the Project Operations wherever located, and Project Co shall cooperate with, and shall require each Subcontractor to cooperate with, and provide access to the representatives of the City monitoring and auditing such parts of the Project Operations, including providing it with access and copies (at the City's reasonable cost) of all relevant information, reports, documents and records pertaining to the performance of such parts of the Project Operations. Except as otherwise provided herein, all of the City's costs for the inspections, audits and monitoring shall be borne by the City.

- (f) In conducting an audit of Project Co under Section 35.2(e) or as otherwise provided under this Project Agreement, the City shall have all rights necessary or incidental to conducting an audit, including the right to have access to and inspect and take copies (at the City's reasonable cost) of all books and records of Project Co required to be provided to or available to the City hereunder, upon reasonable Notice and at reasonable times. Project Co shall fully cooperate with the City and its auditors in the conduct of any audits, including by making available all such records and accounts (other than Sensitive Information) in existence at that time as they may require to perform a full and detailed audit, and Project Co further agrees to promptly review and settle with the City all matters arising from such audits, including the refunding of monies to the City where applicable. At the reasonable request of the City's auditors, Project Co shall provide such information, reports, documents and records as the City's auditors may reasonably require, other than Sensitive Information.
- (g) The City's rights pursuant to this Section 35.2 shall be in addition to, and shall not limit, any other audit, information, inspection or similar rights under this Project Agreement.
- (h) The City's rights pursuant to this Section 35.2 shall not limit or restrict any Governmental Authority's right of review, audit, information or inspection under Applicable Law. The City's right pursuant to this Section 35.2 may also be exercised by the Auditor General of Ontario, Her Majesty the Queen in right of Canada and the Auditor General of Canada without the requirement for further action on the part of the City.
- (i) Without limiting the generality of Section 35.2(a) and subject to Section 50.1(a) and 50.3, in the event that the City is required to provide information, including financial information, in relation to the Project, to the Province for corporate or financial reporting purposes, Project Co shall provide such information to the City as the City may reasonably require in order to comply with its corporate or financial reporting obligations. Project Co acknowledges and agrees that such information may include Sensitive Information.

### **35.3 Delivery of Reports to the City**

- (a) During the Maintenance Period, in addition to Project Co's obligations pursuant to this Section 35, Project Co shall provide the City with a copy of all reports required pursuant to the Project Agreement including, but not limited to, the Performance Monitoring Report, the Payment Adjustment Report, the Joint Insurance Cost Report and any other reports which are required to be delivered to the City pursuant to this Project Agreement and which are requested by the City.

### **35.4 Lenders' Consultant Reports**

- (a) Project Co shall cause the Lenders' Agent to cause, in accordance with Section 5(j) of Schedule 41 – Lenders' Direct Agreement, the Lenders' Consultant to provide the City a copy of any written assessment or report of the Works under the Design and Construction Contract, including but not limited to, any certificate of payment, concurrently with its delivery to the Lenders' Agent.

## **36. CHANGES IN LAW**

### **36.1 Performance after Change in Law**

- (a) Following any and all Changes in Law, Project Co shall perform the Project Operations in accordance with the terms of this Project Agreement, including in compliance with Applicable Law.

### **36.2 Works Change in Law**

- (a) On the occurrence of a Works Change in Law:
  - (i) either Party may give Notice to the other of the need for a Variation as a result of such Works Change in Law;
  - (ii) the Parties shall meet within 10 Business Days of such Notice to consult with respect to the effect of the Works Change in Law and to reach an agreement on whether a Variation is required as a result of such Works Change in Law, and, if the Parties have not, within 10 Business Days of this meeting, reached an agreement, either Party may refer the question of whether a Works Change in Law has occurred or the effect of any Works Change in Law for resolution in accordance with Schedule 26 – Dispute Resolution Procedure; and
  - (iii) the City shall, within 10 Business Days of agreement or determination that a Variation is required, issue a Variation Enquiry and the relevant provisions of Schedule 21 - Variation Procedure shall apply except that:
    - (A) Project Co may only object to any such Variation Enquiry on the grounds that the implementation of the Variation would not enable it to comply with the Works Change in Law;
    - (B) Project Co shall be responsible for obtaining all Project Co Permits, Licences, Approvals and Authorizations required in respect of the Variation;
    - (C) the City shall not be entitled to withdraw any such Variation Enquiry unless the Parties otherwise agree;
    - (D) Project Co shall proceed to implement the Variation within such period as will enable it to comply with the Works Change in Law as soon as reasonably practicable; and
    - (E) Project Co shall not be entitled to any payment or other compensation or relief from performance of its obligations under this Project Agreement in respect of any Works Change in Law or associated Variation other than as established pursuant to Schedule 21 - Variation Procedure.

### **36.3 Relevant Change in Law**

- (a) On the occurrence of a Relevant Change in Law, either Party shall be entitled to seek compensation for any increase or decrease (as the case may be) in the net cost to Project Co of performing the Project Operations so as to put such Party in no better and no worse position than it would have been in had the Relevant Change in Law not occurred. Any such compensation shall be calculated in accordance with this Section 36.3.

- (b) On the occurrence of a Relevant Change in Law:
- (i) either Party may give Notice to the other of the need for a Variation as a result of such Relevant Change in Law;
  - (ii) the Parties shall meet within 10 Business Days of such Notice to consult with respect to the effect of the Relevant Change in Law and to reach an agreement on whether a Variation is required as a result of such Relevant Change in Law, and, if the Parties have not, within 10 Business Days of this meeting, reached an agreement, either Party may refer the question of whether a Relevant Change in Law has occurred or the effect of any Relevant Change in Law for resolution in accordance with Schedule 26 - Dispute Resolution Procedure; and
  - (iii) the City shall, within 10 Business Days of agreement or determination that a Variation is required, issue a Variation Enquiry and the relevant provisions of Schedule 21 - Variation Procedure shall apply except that:
    - (A) Project Co may only object to any such Variation Enquiry on the grounds that the implementation of the Variation would not enable it to comply with the Relevant Change in Law;
    - (B) Project Co shall be responsible for obtaining all Development Approvals and Project Co Permits, Licences, Approvals and Authorizations required in respect of the Variation;
    - (C) the City shall not be entitled to withdraw any such Variation Enquiry unless the Parties otherwise agree;
    - (D) Project Co shall proceed to implement the Variation within such period as will enable it to comply with the Relevant Change in Law as soon as reasonably practicable;
    - (E) the Parties shall, without prejudice to their respective general obligations to comply with the terms of this Project Agreement:
      - (I) use commercially reasonable efforts to mitigate the adverse effects of any Relevant Change in Law and take commercially reasonable steps to minimize any increase in costs arising from such Relevant Change in Law; and
      - (II) use commercially reasonable efforts to take advantage of any positive or beneficial effects of any Relevant Change in Law and take commercially reasonable steps to maximize any reduction in costs arising from such Relevant Change in Law; and
    - (F) any entitlement to compensation payable shall be in accordance with this Section 36.3, and any calculation of compensation shall take into consideration, *inter alia*:

- (I) any failure by a Party to comply with Section 36.3(b)(iii)(E);
  - (II) the extent to which a Party has been, or shall be, compensated in respect of such Relevant Change in Law as a result of any indexation or adjustment of the Monthly Service Payments under this Project Agreement;
  - (III) any increase or decrease in its costs resulting from such Relevant Change in Law; and
  - (IV) any amount which Project Co recovers under any insurance policy (or would recover if it complied with its obligations to insure under this Project Agreement or the terms of any policy of insurance required under this Project Agreement) which amount, for greater certainty, shall not include the amount of any excess or deductibles or any amount above the maximum insured amount applicable to any such insurance policy.
- (c) Project Co shall not be entitled to any payment or compensation or, except as provided in Section 38 or otherwise in this Project Agreement, relief in respect of any Relevant Change in Law, or the consequences thereof, other than in accordance with this Section 36.3, and Section 39 shall be construed accordingly.

## **37. VARIATIONS**

### **37.1 Variation Procedure**

- (a) Except as otherwise expressly provided in this Project Agreement, Schedule 21 - Variation Procedure shall apply in respect of Variations and Small Works.
- (b) For greater certainty, Project Co shall, subject to and in accordance with Schedule 21 - Variation Procedure, be entitled to a Variation if a written direction issued by or on behalf of the City to Project Co or any Project Co Party results in a variation, addition, reduction, substitution, omission, modification, deletion, removal or other change to the whole or any part of the Project Operations, including in relation to the whole or any part of the Works or the Maintenance and Rehabilitation Services. Furthermore, Project Co shall be entitled to request and claim for the occurrence of a Variation as otherwise provided for in this Project Agreement, including in respect of any provision requiring a determination as to the need for a Variation or whether a Variation is required.
- (c) Without limiting Project Co's obligations pursuant to Section 9.3 and Schedule 21 - Variation Procedure, Project Co shall include in each Subcontract, and shall cause each Project Co Party to comply with, the Variation Procedure, to the extent that the Variation Procedure requires Project Co to minimize the cost and impact of Variations, including Variations as to scope of the Works or the Maintenance and Rehabilitation Services.

### **37.2 Innovation and Value Engineering**

- (a) Project Co acknowledges that the City at all times desires to reduce the Monthly Service Payments and the overall cost to the City of the Works and the Maintenance and Rehabilitation

Services, and Project Co agrees to cooperate, explore and work with the City in investigating and considering innovation and value engineering and other cost saving measures.

- (b) If an innovation and value engineering proposal is at any time and from time to time originated and initiated solely by Project Co, Project Co may make a proposal (the “**Innovation Proposal**”) by Notice to the City.
- (c) The Parties agree that the subject of an Innovation Proposal shall not include:
  - (i) any Variation Enquiry initiated by the City;
  - (ii) any Variation resulting from a Change in Law; or
  - (iii) any change to City Activities.
- (d) The Innovation Proposal must:
  - (i) set out sufficient detail to enable the City to evaluate the Innovation Proposal in full;
  - (ii) specify Project Co’s reasons and justification for proposing the Innovation Proposal;
  - (iii) request the City to consult with Project Co with a view to deciding whether to agree to the Innovation Proposal and, if so, what consequential changes the City requires as a result;
  - (iv) indicate any implications of the Innovation Proposal, including a difference between the existing and the proposed requirements of this Project Agreement, and the comparative advantages of each to Project Co and the City;
  - (v) indicate, in particular, whether an increase or decrease to the Monthly Service Payments is proposed, and, if so, give a detailed cost estimate of such proposed change;
  - (vi) indicate if there are any dates by which a decision by the City must be made;
  - (vii) indicate the capital cost of the Innovation Proposal, including the cost of financing; and
  - (viii) include such other information and documentation as may be reasonably requested by the City to fully evaluate and consider the Innovation Proposal.
- (e) The City shall, acting in good faith, evaluate the Innovation Proposal, taking into account all relevant issues, including whether:
  - (i) a change in the Monthly Service Payments will occur;
  - (ii) the Innovation Proposal affects the quality of the Works, the Maintenance and Rehabilitation Services, or the likelihood of successful completion of the Works or performance of the Maintenance and Rehabilitation Services;

- (iii) the Innovation Proposal will benefit or interfere with the efficient operation of the System Infrastructure, the New Municipal Infrastructure or the performance of the City Activities;
  - (iv) the Innovation Proposal will interfere with the relationship between the City and third parties;
  - (v) the financial strength of Project Co is sufficient to deliver the changed Works or perform the changed Maintenance and Rehabilitation Services, as applicable;
  - (vi) the residual value of the System Infrastructure or the New Municipal Infrastructure is affected;
  - (vii) the Innovation Proposal will change the Monthly Service Payment;
  - (viii) the Innovation Proposal materially affects the risks or costs to which the City is exposed; or
  - (ix) any other matter the City considers relevant.
- (f) The City may request clarification or additional information regarding the Innovation Proposal, and may request modifications to the Innovation Proposal.
- (g) The City may, in its sole discretion, accept or reject any Innovation Proposal.
- (h) If the City accepts the Innovation Proposal, with or without modification, the relevant Innovation Proposal shall be documented and evidenced by a written Variation Confirmation, together with any other documents necessary to amend this Project Agreement or any relevant Project Documents to give effect to the Innovation Proposal.
- (i) Unless the City specifically agrees to an increase in the Monthly Service Payments in accepting an Innovation Proposal pursuant to Section 37.2(h), there shall be no increase in the Monthly Service Payments as a result of an Innovation Proposal.
- (j) If, after taking into account the agreed implementation and reasonably allocated development costs incurred by Project Co in connection with the Innovation Proposal and any other uses of the Innovation Proposal by Project Co, the Innovation Proposal causes or will cause the costs of Project Co and/or of a Subcontractor to decrease, the net savings in the costs of Project Co and/or the Subcontractor will be shared equally by Project Co and the City, and the City's share of the net savings shall, as agreed by the Parties, be reflected in either a lump sum payment or in a reduction of the Monthly Service Payments.
- (k) If an Innovation Proposal causes or will cause the costs of the City to decrease, the net savings in the costs of the City will be shared as follows:
- (i) equally by Project Co and the City for the first 5 years following the implementation of the Innovation Proposal; and

- (ii) thereafter, the City shall be entitled to the full benefit of the net savings in costs (if applicable),

and Project Co's share of the net savings shall, at the City's sole option, be reflected in either a lump sum payment or in an increase in the Monthly Service Payments.

## **38. DELAY EVENTS**

### **38.1 Definition**

- (a) For the purposes of this Project Agreement, "**Delay Event**" means any of the following events or circumstances only to the extent, in each case, that it affects the Works so as to cause a delay in achieving Substantial Completion by the Scheduled Substantial Completion Date:
  - (i) the implementation of a Variation to the extent Project Co has identified such delay in its Estimate and such delay has been documented in the Variation Confirmation;
  - (ii) any breach by the City of any of the City's obligations under this Project Agreement (including any delay by the City in giving access to the Lands pursuant to Section 14.1, any obstruction of the rights afforded to Project Co under Section 14.1, or any delay by the City in carrying out its obligations set forth in Schedule 10 - Review Procedure), except to the extent that any such breach is caused, or contributed to, by Project Co or any Project Co Party;
  - (iii) an uncovering of the Works pursuant to Section 21.3 where such Works are not subsequently found to be defective or not in compliance with the requirements of this Project Agreement (including the Output Specifications, the Project Co Proposal Extracts and the Design Data), unless such uncovering of the Works was reasonable in the light of other defects or non-compliance previously discovered by the City in respect of the same or a similar component of the Works or subset of the Works;
  - (iv) a requirement pursuant to Section 16.2(h)(i) and Section 16.2(g) for Project Co to perform any alteration, addition, demolition, extension or variation in the Works, or to suspend or delay performance of the Works, upon the discovery of Contamination, which alteration, addition, demolition, extension or variation in the Works, or suspension or delay in the performance of the Works, would not otherwise be required under this Project Agreement;
  - (v) a requirement pursuant to Sections 16.3(c)(ii)(A) or 16.3(d) for Project Co to perform any alteration, addition, demolition, extension or variation in the Works, or to suspend or delay performance of the Works, upon the discovery of any fossils, artifacts and other objects having artistic, historic, archaeological or monetary value, including human remains and burial sites, which alteration, addition, demolition, extension or variation in the Works, or suspension or delay in the performance of the Works, would not otherwise be required under this Project Agreement;
  - (vi) a requirement pursuant to Sections 16.4(b) or 16.4(c) for Project Co to perform any alteration, addition, demolition, extension or variation in the Works, or to suspend or

delay performance of the Works, upon the discovery of Species-at-Risk for which the City is responsible, which alteration, addition, demolition, extension or variation in the Works, or suspension or delay in the performance of the Works, would not otherwise be required under this Project Agreement;

- (vii) subject to compliance by Project Co with the provisions of Section 9.8, damage, costs or delays from the execution of Additional Works on the Lands by Additional Contractors, as applicable, in the circumstances described in Section 9.8(f), as applicable;
- (viii) a requirement pursuant to Section 13.1 of Schedule 26 - Dispute Resolution Procedure for Project Co to proceed in accordance with the direction of the City during the pendency of a Dispute, which Dispute is subsequently determined in Project Co's favour;
- (ix) an event of Force Majeure;
- (x) a Relief Event;
- (xi) a Relevant Change in Law;
- (xii) [not used];
- (xiii) a requirement pursuant to Section 16.9 for Project Co to perform any alteration, addition, demolition, extension or variation in the Works, or to suspend or delay performance of the Works, upon discovery of a City Retained Latent Defect Responsibility, which alteration, addition, demolition, extension or variation in the Works, or suspension or delay in the performance of the Works, would not otherwise be required under the Project Agreement;
- (xiv) a stop work order issued by a Governmental Authority in respect of the System Infrastructure or the Works, provided that such order was not issued as a result of a Relief Event, an act of Force Majeure, or as a result of an act, omission or fault of Project Co or a Project Co Party;
- (xv) changes to the terms, conditions or requirements of the Environmental Assessments (except to the extent resulting from any change by Project Co to the design of the Project or any act, omission or fault of Project Co or a Project Co Party);
- (xvi) a Delay Event determined by the Adjudicator pursuant to Section 6.4(b) of Schedule 26 – Dispute Resolution Procedure;
- (xvii) a requirement that Project Co perform obligations under an Encumbrance pursuant to Section 15.2(c)(iii) or Section 15.2(d), which performance imposes costs or delays in the performance of Project Operations;
- (xviii) a requirement for Project Co to perform any alteration, addition, demolition, extension or variation in the Works, or to suspend or delay performance of the Works, upon the discovery of unknown Utility Infrastructure or Mislocated Utility Infrastructure pursuant to Section 16.10, which alteration, addition, demolition, extension or variation in the

Works, or suspension or delay in the performance of the Works, would not otherwise be required under this Project Agreement;

- (xix) a requirement for Project Co to perform any alteration, addition, demolition, extension or variation in the Works, or to suspend or delay performance of the Works, as a result of error in the Geotechnical Report;
  - (xx) subject to compliance with Section 9.4(g), the City's failure to issue to Project Co a final determination in respect of a Listed Project Co PLAA as set out and subject to Section 9.4;
  - (xxi) pursuant to an explicit provision in a permit, licence or approval granted by the City to a third party developer in respect of an Adjacent Development, that third party developer,
    - (A) constructs a physical barrier that prevents Project Co from carrying out the Works or any of the Maintenance and Rehabilitation Services; or
    - (B) creates a significant physical impediment that prevents Project Co from carrying out the Works;
  - (xxii) failure by a Category 1 Utility Company to perform its obligations, as set out in the Utility Baseline Report within the applicable time periods set out in the Utility Baseline Report, to the extent that such event does not arise (directly or indirectly) as a result of any act or omission of the Project Co or any Project Co Party. For clarity, for the purposes of determining whether a failure of a Category 1 Utility Company described in this Section 38.1(a)(xxii) has caused a delay in achieving Substantial Completion by the Scheduled Substantial Completion Date, or a delay in achieving Final Completion by the Scheduled Final Completion Date, the Parties shall have regard to the cumulative effect of all failures by the Category 1 Utility Company in accordance with this Section 38.1(a)(xxii).
- (b) For clarity, in respect of Section 38.1(a)(xxii), a failure by a Category 1 Utility Company to perform its obligations as set out in the Utility Baseline Report within the applicable time periods set out in the Utility Baseline Report shall not, in any event, be cause for a Delay Event unless Project Co has,
- (i) fully complied with its obligations pursuant to the applicable Utility Agreement and the Baseline Utility Report;
  - (ii) properly coordinated the work being performed by the applicable Category 1 Utility Company with the Works; and
  - (iii) provided sufficient access to Site to the applicable Category 1 Utility Company for the purposes of carrying out the Category 1 Utility Company's work.
- (c) For further clarity, Section 38.1(a)(xxii) does not apply in respect of,
- (i) Category 1 Utility Companies in circumstances other than those specifically set out in the Utility Baseline Report;

- (ii) failures of any Utility Companies that are not Category 1 Utility Companies including failures of such Utility Companies to perform in accordance with the applicable Utility Agreement; or
- (iii) Works carried out by Project Co or Project Co Parties or goods or services provided by Project Co or Project Co Parties to the Utility Companies.

### 38.2 Consequences of a Delay Event

- (a) Project Co shall provide written Notice to the City Representative and the Independent Certifier within 5 Business Days of becoming aware of the occurrence of any event or circumstances described in Sections 38.1(a)(ii), 38.1(a)(iv), 38.1(a)(v), 38.1(a)(vi), 38.1(a)(vii), 38.1(a)(xii), 38.1(a)(xiii), 38.1(a)(xiv), 38.1(a)(xv), 38.1(a)(xvi), 38.1(a)(xvii), 38.1(a)(xviii), 38.1(a)(xix), 38.1(a)(xx), 38.1(a)(xxi), or 38.1(a)(xxii) which, at the time of its occurrence, is reasonably likely to form the basis of a future claim by Project Co for relief under Section 38.2(e) as a Delay Event (a “**Notice of Pending Claim**”).
- (b) Project Co shall, within 10 Business Days (or such longer period of time as the Parties may agree) after delivering such notification under Section 38.2(a), provide further written details to the City Representative and the Independent Certifier which shall include:
  - (i) identification of the category of Delay Event on which Project Co’s future claim for relief would be based if such event or circumstances were to form the basis of a claim for relief as a Delay Event;
  - (ii) details of the event or circumstances forming the basis of Project Co’s notification under Section 38.2(a);
  - (iii) details of the contemporary records which Project Co shall thereafter maintain to substantiate its claim for extra time if the event or circumstances detailed in accordance with Section 38.2(b)(ii) forms the basis of a future claim by Project Co for relief as a Delay Event;
  - (iv) details of the consequences (whether direct or indirect, financial or non-financial) that such event or circumstances may have upon the Scheduled Substantial Completion Date, if such event or circumstances forms the basis of a future claim by Project Co for relief as a Delay Event; and
  - (v) details of any measures that Project Co proposes to adopt to prevent such event or circumstances from forming the basis of a future claim by Project Co for relief as a Delay Event or to mitigate the consequences of such claim if such event or circumstances were to become a Delay Event.
- (c) As soon as possible but in any event within 3 Business Days of Project Co receiving, or becoming aware of, any supplemental information pertaining to the event or circumstances disclosed in Section 38.2(a), Project Co shall submit further particulars based on such information to the City Representative and the Independent Certifier.

- (d) The City Representative shall, after receipt of written details under Section 38.2(b), or of further particulars under Section 38.2(c), be entitled by written notice to require Project Co to provide such further supporting particulars as the City Representative may reasonably consider necessary. Project Co shall afford the City Representative and the Independent Certifier reasonable facilities for their investigations, including, without limitation, on-site inspection.
- (e) In addition to complying with its obligations under Sections 38.2(a) and 38.2(b), Project Co shall provide written notice to the City Representative and the Independent Certifier within 5 Business Days of: (A) becoming aware that an event or circumstances has satisfied, or will satisfy, in the opinion of Project Co, the applicable definition of Delay Event, or (B) becoming aware of the occurrence of an event to which Section 38.2(k) applies. Project Co shall, within 10 Business Days after such notification, provide further written details of the Delay Event or the event to which Section 38.2(k) applies to the City Representative and the Independent Certifier, including, if and as applicable, to substitute or supplement the information given in Sections 38.2(a), 38.2(b) and 38.2(c), to further substantiate or support Project Co's claim which shall include, to the extent not previously provided:
  - (i) a statement of which Delay Event (or event pursuant to Section 38.2(k)) upon which the claim is based;
  - (ii) details of the circumstances from which the Delay Event (or event pursuant to Section 38.2(k)) arises;
  - (iii) details of the contemporary records which Project Co shall maintain to substantiate its claim for extra time or pursuant to Section 38.2(k);
  - (iv) details of the consequences (whether direct or indirect, financial or non-financial) which such Delay Event may have upon the Scheduled Substantial Completion Date, including a Critical Path analysis of the event or circumstance indicating the impact on the Scheduled Substantial Completion Date; and
  - (v) details of any measures which Project Co proposes to adopt to mitigate the consequences of such Delay Event or event pursuant to Section 38.2(k).
- (f) As soon as possible but in any event within 3 Business Days of Project Co receiving, or becoming aware of, any supplemental information which may further substantiate or support Project Co's claim under Section 38.2(e), Project Co shall submit further particulars based on such information to the City Representative and the Independent Certifier.
- (g) The City Representative shall, after receipt of written details under Section 38.2(e), or of further particulars under Section 38.2(f), be entitled by written Notice to require Project Co to provide such further supporting particulars as the City Representative may reasonably consider necessary. Project Co shall afford the City Representative and the Independent Certifier reasonable facilities for investigating the validity of Project Co's claim, including on-site inspection.
- (h) Subject to the provisions of this Section 38, the City Representative shall allow Project Co an extension of time equal to the delay caused by the Delay Event and shall fix a revised Scheduled

Substantial Completion Date or Outside Substantial Completion Date, as applicable, as soon as reasonably practicable and in any event within 10 Business Days of the later of:

- (i) the date of receipt by the City Representative of Project Co's Notice given in accordance with Section 38.2(e) and the date of receipt of any further particulars (if such are required under Section 38.2(f)), whichever is later; and
  - (ii) the date of receipt by the City Representative of any supplemental information supplied by Project Co in accordance with Section 38.2(f) and the date of receipt of any further particulars (if such are required under Section 38.2(g)), whichever is later.
- (i) For the avoidance of doubt, there shall be no extension to the Project Term as a result of any delay caused by a Delay Event.
- (j) If:
- (i) the City Representative declines to fix a revised Scheduled Substantial Completion Date or Outside Substantial Completion Date, as applicable;
  - (ii) Project Co considers that a different Scheduled Substantial Completion Date or Outside Substantial Completion Date, as applicable, should be fixed;
  - (iii) there is a dispute as to whether a Delay Event (or event pursuant to Section 38.2(k)) has occurred; or
  - (iv) there is a dispute as to whether Project Co is entitled to the relief set out in Section 38.2(k),
- then Project Co shall be entitled to refer the matter for determination by the Independent Certifier. The decision of the Independent Certifier may be disputed by either Party and referred for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.
- (k) Subject to Project Co meeting the obligations set out in Section 38.2 and Section 38.3, if,
- (i) a Lane Closure is directly caused or extended by one or more of the events set out in Section 38.1(a), whether or not such event constitutes a Delay Event, such Lane Closure or extension thereof shall not be included in the Aggregate Actual Lane Closures or the Aggregate Actual Lane Closures Cost for the relevant Road Section for the purposes of calculating the Lane Closure Adjustment in accordance with the process set out in Schedule 7 – Mobility Matters;
  - (ii) a Construction Period Quality Failure,
    - (A) has been assessed in accordance with Schedule 20 – Construction Period Payments; and
    - (B) has arisen from a Non-Conformance that has been directly caused by one or more of the events set out in Section 38.1(a), whether or not such event constitutes a Delay Event,

such Construction Period Quality Failure shall not be applied as part of the Construction Period Deduction for the relevant Payment Period in accordance with Section 6 of Schedule 20 – Construction Period Payments.

- (iii) For clarity, Section 38.2(k)(i) shall apply only to the extent that a Lane Closure was not contemplated by the Aggregate Target Lane Closures and not merely because a Lane Closure has been deferred.
- (l) To the extent Project Co does not comply with its obligations under Sections 38.2(a), 38.2(b), 38.2(c), 38.2(d), 38.2(e), 38.2(f) or 38.2(g), subject to Section 38.2(m) such failure shall be taken into account in determining Project Co's entitlement to an extension of time pursuant to this Section 38.
- (m) If Project Co does not provide further written details to the City and the Independent Certifier as required under Section 38.2(b) within the 10 Business Day period referred to in such Section, Project Co acknowledges and agrees that, after a further 10 Business Days, Project Co shall not be entitled to rely upon, and the City shall not be obligated to consider, the notice given under Section 38.2(a) for the purposes of determining Project Co's entitlement to relief under this Section 38. Project Co, at its option, may submit a new, currently dated notice which complies with the provisions of Section 38.2(a) for the same event or circumstance which gave rise to the previous, unsubstantiated notice, and the provisions of this Section 38 shall apply to such new notice, *mutatis mutandis*. Project Co acknowledges and agrees that the City, in determining Project Co's entitlement to an extension of time pursuant to this Section 38 and without limiting any other right of the City under this Project Agreement, shall be entitled to take into account the delay between:
  - (i) Project Co becoming aware of the occurrence of the event or circumstance forming the basis of the original notice delivered pursuant to Section 38.2(a), and
  - (ii) Project Co submitting the new notice pursuant to Section 38.2(a) in respect of that event or occurrence.

### **38.3 Mitigation**

- (a) If Project Co is (or claims to be) affected by a Delay Event or an event pursuant to Section 38.2(k), Project Co shall, and shall require all Project Co Parties to, take and continue to take commercially reasonable steps:
  - (i) to eliminate or mitigate the consequences of such event upon the performance of its obligations under this Project Agreement;
  - (ii) to continue to perform its obligations under this Project Agreement to the extent possible notwithstanding the Delay Event or event pursuant to Section 38.2(k); and
  - (iii) to resume performance of its obligations under this Project Agreement affected by the Delay Event (or event pursuant to Section 38.2(k)) as soon as practicable.
- (b) To the extent that Project Co does not comply with its obligations under this Section 38.3, such failure shall be taken into account in determining,

- (i) Project Co's entitlement to an extension of time pursuant to this Section 38; and
- (ii) Project Co's entitlement to the relief contemplated in Section 38.2(k).

### **39. COMPENSATION EVENTS**

#### **39.1 Definition**

- (a) For the purposes of this Project Agreement, "**Compensation Event**" means any event referred to in Sections 38.1(a)(ii), 38.1(a)(iii), 38.1(a)(iv), 38.1(a)(v), 38.1(a)(vi), 38.1(a)(vii), 38.1(a)(viii), 38.1(a)(xii), 38.1(a)(xiii), 38.1(a)(xiv), 38.1(a)(xv), 38.1(a)(xvi), 38.1(a)(xvii), 38.1(a)(xviii), 38.1(a)(xix), 38.1(a)(xxi) and 38.1(a)(xxi) as a direct result of which Project Co has incurred loss or expense, whether or not any of these events has also caused a delay and the procedure described in Section 38.2 shall apply, *mutatis mutandis*, to such events as Compensation Events (including, for certainty, Section 38.2(l)).

#### **39.2 Consequences of a Compensation Event**

- (a) If a Compensation Event occurs, Project Co's sole right to compensation shall be as set out in this Section 39. For greater certainty, except as aforesaid, no other Delay Event shall entitle Project Co to receive any compensation, except as otherwise provided in:
  - (i) Schedule 21 - Variation Procedure, in the case of a Delay Event referred to in Section 38.1(a)(i);
  - (ii) Section 42, in the case of a Delay Event referred to in Section 38.1(a)(ix);
  - (iii) Section 41, in the case of a Delay Event referred to in Section 38.1(a)(x); and
  - (iv) Section 36.3, in the case of a Delay Event referred to in Section 38.1(a)(xi).
- (b) Subject to Sections 39.3 and 39.4, if it is agreed, or determined in accordance with Schedule 26 - Dispute Resolution Procedure, that there has been a Compensation Event, Project Co shall be entitled to such compensation as would place Project Co in no better and no worse position than it would have been in had the relevant Compensation Event not occurred. For greater certainty, in respect of a Compensation Event that is also a Delay Event, such compensation will include amounts which, but for the Delay Event, would have been paid by the City to Project Co. Project Co shall promptly provide the City Representative with any information the City Representative may require in order to determine the amount of such compensation.
- (c) If the City is required to compensate Project Co pursuant to this Section 39.2, then the City may either pay such compensation as a lump sum payment or payments at times and in a manner to be agreed with Project Co, acting reasonably, or, alternatively, the City may request Project Co to agree to an adjustment to the Monthly Service Payments. If Project Co agrees to an adjustment to the Monthly Service Payments, then the provisions of Schedule 21 - Variation Procedure shall apply.
- (d) To the extent that Project Co does not comply with its obligations under Sections 38.2(a), 38.2(b), 38.2(c), 38.2(d), 38.2(e), 38.2(f), 38.2(g) or 38.2(m), and subject to Section 38.2(m), such failure

shall be taken into account in determining Project Co's entitlement to relief pursuant to this Section 39.

### **39.3 Mitigation**

- (a) If Project Co is (or claims to be) affected by a Compensation Event, Project Co shall, and shall require all Project Co Parties to, take and continue to take commercially reasonable steps to minimize the amount of compensation due in accordance with this Section 39 in relation to any Compensation Event.
- (b) To the extent that Project Co does not comply with its obligations under this Section 39.3, such failure shall be taken into account in determining Project Co's entitlement to relief pursuant to this Section 39.

### **39.4 Insured Exposure**

- (a) The compensation payable to Project Co pursuant to this Section 39 shall be reduced by any amount which Project Co or a Project Co Party recovers, or is entitled to recover, under any insurance policy, or would have recovered if it had complied with the requirements of this Project Agreement in respect of insurance or the terms of any policy of insurance required under this Project Agreement, which amount, for greater certainty, shall not include any excess or deductibles or any amount over the maximum amount insured under any such insurance policy.

### **39.5 Delivery of PBS-2**

- (a) If an event referred to in Sections 38.1(a)(iii), 38.1(a)(iv), 38.1(a)(v), 38.1(a)(vi), 38.1(a)(vii), 38.1(a)(viii) or 38.1(a)(xv) occurs after the date that is 150 days following Financial Close as such date may be extended in accordance with Section 38.2(h) and prior to the City assigning the comment "NO COMMENT" or "MINOR COMMENT" to PBS-2 in accordance with Schedule 12 – Works Scheduling Requirements, Project Co shall not be entitled to receive any compensation under this Section 39 in respect of such Compensation Event unless such Compensation Event is also a Delay Event, in which case Project Co shall be entitled to compensation in an amount equal to the lesser of:
  - (i) the Debt Service Amount accrued and paid or that became payable in accordance with the Lending Agreements during the period of delay; and
  - (ii) the compensation which, but for the application of this Section 39.5, Project Co would have been entitled to pursuant to Section 39.2(b).

### **39.6 Special Compensation Regarding Category 1 Utility Company**

- (a) For the purposes of the special compensation regarding Category 1 Utility Companies, the following shall apply:
  - (i) Sections 39.3 and 39.4 shall apply to the compensation set out in this Section 39.6 notwithstanding that the Delay Event referred to in Section 38.1(a)(xxii) is not a Compensation Event;

- (b) If it is agreed, or determined in accordance with Schedule 26 - Dispute Resolution Procedure, that there has been a Delay Event referred to in Section 38.1(a)(xxii), Project Co shall be entitled to the following:
- (i) an amount calculated in accordance with the following:
- (A) For the purpose of this Section 39.6(b)(i), “**Non-Debt Compensation Amount**” means an amount that would place Project Co in no better and no worse position than it would have been in had the applicable Delay Event referred to in Section 38.1(a)(xxii) not occurred but excluding any interest or financing costs accrued and paid or which became payable in accordance with the Lending Agreements during the period of the applicable Delay Event (such excluded amount, the “**Special Utility Debt Compensation Amount**”);
- (B) If the applicable Delay Event delays any Substantial Completion for 30 or fewer days, the City shall pay to Project Co an amount equal to [REDACTED] per cent of the Non-Debt Compensation Amount and [REDACTED] per cent of the Special Utility Debt Compensation Amount for the period of the delay;
- (C) If the applicable Delay Event delays any Substantial Completion for 60 or fewer days, the City shall pay to Project Co an amount equal to,
- (I) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the first 30 days of the delay, plus,
- (II) [REDACTED] per cent of the Non-Debt Compensation Amount for the number of days of delay exceeding 30 days of delay; plus
- (III) [REDACTED] per cent of the Special Utility Debt Compensation Amount for the period of the delay.
- (D) If the applicable Delay Event delays any Substantial Completion for 180 or fewer days, the City shall pay to Project Co an amount equal to,
- (I) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the first 30 days of delay, plus,
- (II) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the next 30 days of delay, plus,
- (III) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the number of days exceeding 60 days of delay; plus
- (IV) [REDACTED] per cent of the Special Utility Debt Compensation Amount for the period of the delay.
- (E) If the applicable Delay Event delays any Substantial Completion for more than 180 days, the City shall pay to Project Co an amount equal to,

- (I) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the first 30 days of delay, plus,
- (II) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the next 30 days of delay, plus,
- (III) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the number of days exceeding 120 days of delay, plus,
- (IV) [REDACTED] per cent of the Non-Debt Compensation Amount in respect of the number of days exceeding 180 days of delay, plus,
- (V) [REDACTED] per cent of the Special Utility Debt Compensation Amount for the period of the delay.

#### 40. EXCUSING CAUSES

##### 40.1 Definition

- (a) For the purposes of this Project Agreement, “**Excusing Cause**” means any of the following events or circumstances if it occurs after the Substantial Completion Date and to the extent, in each case, that it interferes adversely with, or causes a failure of, the performance of the Maintenance and Rehabilitation Services:
  - (i) the implementation of a Variation to the extent Project Co has identified any impact on the Maintenance and Rehabilitation Services in its Estimate and such impact has been documented in the Variation Confirmation;
  - (ii) any breach by the City of any of the City’s obligations under this Project Agreement (including any obstruction of the rights afforded to Project Co under Section 14.1), except to the extent that any such breach is caused, or contributed to, by Project Co or any Project Co Party;
  - (iii) any deliberate or negligent act or omission of any City Party or any failure by any City Party (having regard to the interactive nature of the activities of the City and Project Co) to take commercially reasonable steps to perform its activities in a manner which minimizes undue interference with Project Co’s performance of the Maintenance and Rehabilitation Services, except to the extent:
    - (A) any such act, omission or failure is caused, or contributed to, by Project Co or any Project Co Party;
    - (B) any City Party is acting in accordance with a recommendation or instruction of Project Co or any Project Co Party;
    - (C) any such act, omission or failure was contemplated in Schedule 15 - Output Specifications or was otherwise provided for in this Project Agreement; or

- (D) the consequences of any such act, omission or failure would have been prevented by the proper performance of Project Co's obligations under this Project Agreement;
- (iv) the implementation of any action taken by the City, or any suspension of Project Co's obligation to deliver all or any part of the Maintenance and Rehabilitation Services, or the compliance by Project Co with instructions given by the City, in each case in the circumstances referred to in Section 31;
- (v) the performance of any Small Works in accordance with the terms of this Project Agreement during the period of time agreed between the City and Project Co;
- (vi) any official or unofficial strike, lockout, work to rule or other labour-related action involving employees of any City Party, except to the extent that any such labour-related action is caused, or contributed to, by Project Co or any Project Co Party;
- (vii) the occurrence of any Contamination for which the City is responsible pursuant to Section 16.2;
- (viii) the discovery of any fossils, artifacts and other objects having artistic, historic, archaeological or monetary value, including human remains and burial sites for which the City is responsible pursuant to Section 16.3;
- (ix) the discovery of any Species-at-Risk for which the City is responsible pursuant to Section 16.4;
- (x) a derailment, collision, or any other accident involving the exterior of a Revenue Vehicle, including at intersections, except to the extent that any such derailment, collision, or other accident is caused, or contributed to, by Project Co or any Project Co Party;
- (xi) a derailment, collision, or any other accident involving both an element of Fixed Infrastructure (as defined in Schedule 15-1 – Technical Terms and Reference Documents) and a road vehicle except to the extent that any such collision is caused, or contributed to, by Project Co or any Project Co Party;
- (xii) any civil disobedience or protest action, including any action taken by any person or persons protesting or demonstrating against the carrying out of any part of the Project Operations or during the Maintenance Period in general, provided, however, that a civil disobedience or protest action shall not, in any event, be an Excusing Cause unless Project Co has fully complied with Section 9.7;
- (xiii) the operation of additional rail vehicles on the System by third parties unrelated to: (i) Project Co's performance of the Project Operations; (ii) a breach by Project Co of its other obligations under this Project Agreement; (iii) an act or omission of Project Co or any Project Co Party; or (iv) any other matter within Project Co's control.

## **40.2 Consequences of an Excusing Cause**

- (a) Provided that the effect of an Excusing Cause is claimed by Project Co, in writing, within 10 Business Days of the date on which Project Co or any Project Co Party became aware of the occurrence of such Excusing Cause, then (subject to Sections 40.3 and 40.4):
- (i) any failure by Project Co to perform, and any poor performance of, any affected Maintenance and Rehabilitation Services shall not constitute a breach of this Project Agreement by Project Co, no Failure Points shall accrue in respect of such failure and Project Co shall be relieved of its obligations to perform such Maintenance and Rehabilitation Services for the duration and to the extent prevented by such Excusing Cause;
  - (ii) any interference shall be taken into account in measuring the performance of any affected Maintenance and Rehabilitation Services in accordance with the Performance Monitoring Program, which shall be operated as though the relevant Maintenance and Rehabilitation Services had been performed free from such adverse interference;
  - (iii) any interference shall be taken into account in operating the Payment Mechanism, which shall be operated as though any Availability Failure, Quality Failure or Service Failure resulting from such interference had not occurred, so that Project Co shall be entitled to payment under this Project Agreement as if there had been no such interference with the Maintenance and Rehabilitation Services, provided however that Project Co shall not be entitled to any additional compensation, except as may be provided hereunder for compensation under Section 39 or otherwise in accordance with this Project Agreement and for compensation on termination of this Project Agreement, if this Project Agreement is terminated as provided herein;
  - (iv) this Section 40.2 shall not limit the City's entitlement to reimbursement pursuant to Section 31.4;  
  
the City shall reimburse Project Co for all incremental Direct Costs (including all applicable Taxes and all legal or professional services, legal costs being on a full indemnity basis) incurred by Project Co as a result of any Excusing Cause referred to in Section 40.1(a)(ii), 40.1(a)(iii), 40.1(a)(vi), 40.1(a)(vii), 40.1(a)(viii), 40.1(a)(ix), 40.1(a)(xii) or 40.1(a)(xiii), including costs arising from any steps taken to cure or mitigate against such events, together with any applicable margin for overhead and profit on such Direct Costs as set out in Schedule 21 - Variation Procedure; and
  - (v) the Monthly Service Payments payable by the City shall be reduced by any savings in Direct Costs arising from Project Co being relieved of its obligations to perform the Maintenance and Rehabilitation Services, as otherwise provided herein, together with any applicable margin for overhead and profit on such Direct Costs as set out in Schedule 21 - Variation Procedure.

## **40.3 Mitigation**

- (a) If Project Co is (or claims to be) affected by an Excusing Cause, Project Co shall, and shall require all Project Co Parties to, take and continue to take commercially reasonable steps:
  - (i) to eliminate or mitigate the consequences of such event upon the performance of its obligations under this Project Agreement;
  - (ii) to continue to perform its obligations under this Project Agreement to the extent possible notwithstanding the Excusing Cause; and
  - (iii) to resume performance of its obligations under this Project Agreement affected by the Excusing Cause as soon as practicable.
- (b) To the extent that Project Co does not comply with its obligations under this Section 40.3, such failure shall be taken into account in determining Project Co's entitlement to relief pursuant to this Section 40.

#### **40.4 Insured Exposure**

- (a) The compensation payable to Project Co pursuant to this Section 40 shall be reduced by any amount which Project Co or a Project Co Party recovers, or is entitled to recover, under any insurance policy, or would have recovered if it had complied with the requirements of this Project Agreement in respect of insurance or the terms of any policy of insurance required under this Project Agreement, which amount, for greater certainty, shall not include any excess or deductibles or any amount over the maximum amount insured under any such insurance policy.

### **41. RELIEF EVENTS**

#### **41.1 Definition**

- (a) For the purposes of this Project Agreement, "**Relief Event**" means any of the following events or circumstances to the extent, in each case, that it causes any failure by a Party to perform any of its obligations under this Project Agreement:
  - (i) fire, explosion, lightning, storm, tempest, hurricane, tornado, flood, ionizing radiation (to the extent it does not constitute Force Majeure), earthquake, riot or civil commotion;
  - (ii) failure by any Utility Company, local authority or other like body to enter into a Utility Agreement, perform works or provide services (solely in its role as utility service provider or similar service provider to the Project), provided, however, that such a failure shall not, in any event, be cause for a Relief Event, unless Project Co:
    - (A) has performed its obligations under any applicable agreement with the Utility Company with respect to the provision of such services and the relevant Utility Company has failed to meet its obligations thereunder; and
    - (B) has made all, and is continuing to make all, commercially reasonable efforts to diligently enforce its legal rights under any applicable agreement in respect of such services and otherwise cause the Utility Company to perform those works or services.

For clarity, Section 41.1(a)(ii) shall apply only in circumstances where the Utility Company is providing services to Project Co of the type provided by the Utility Company in the normal course of its business. For further clarity, Section 41.1(a)(ii) shall not apply in circumstances where Project Co has entered into a Utility Agreement for the design and construction of Utility Infrastructure and the applicable Utility Company has failed to comply with its obligations under such an agreement;

- (iii) accidental loss or damage to the Works and/or the System Infrastructure or any roads servicing the Lands;
- (iv) without prejudice to any obligation of Project Co to provide stand-by power facilities in accordance with this Project Agreement, failure or shortage of power, fuel or transport;
- (v) blockade or embargo falling short of Force Majeure;
- (vi) any official or unofficial strike, lockout, work to rule or other labour-related action generally affecting the System Infrastructure or the New Municipal Infrastructure or the construction or facility maintenance industry (or a significant sector of that industry) in the Province of Ontario; or
- (vii) any civil disobedience or protest action, including any action taken by any person or persons protesting or demonstrating against the carrying out of any part of the Project Operations or the construction and/or operation of transit systems in general, provided, however, that a civil disobedience or protest action shall not, in any event, be cause for a Relief Event unless Project Co has fully complied with Section 9.7.

#### **41.2 Consequences of a Relief Event**

- (a) Subject to Section 41.3:
  - (i) no right of termination, other than either Party's right to terminate this Project Agreement pursuant to Section 45.1, shall arise under this Project Agreement by reason of any failure by a Party to perform any of its obligations under this Project Agreement; and
  - (ii) as soon as the events or circumstances constituting a Relief Event have ceased any Failure Points accrued in respect of any failure by Project Co to perform any of its obligations under this Project Agreement shall be cancelled and any related Warning Notices and Monitoring Notices shall be withdrawn,

but only to the extent that such failure to perform, is caused by the occurrence of a Relief Event (it being acknowledged and agreed by the Parties that all other rights and obligations of the Parties under this Project Agreement remain unaffected by the occurrence of a Relief Event). For greater certainty, the City shall be entitled to make Deductions in accordance with Schedule 19 - Payment Mechanism notwithstanding the cancellation of Failure Points pursuant to Section 41.2(a)(ii).

- (b) In respect of a Relief Event that is also a Delay Event pursuant to Section 38.1(a)(x):

- (i) Project Co shall only be relieved of its obligations under this Project Agreement to the extent, if any, provided for in Section 38; and
- (ii) in respect of a Relief Event occurring prior to the Substantial Completion Date affected by that Delay Event and referred to in Section 41.1(a)(ii) (but only in respect of failure by a Utility Company to perform works or provide services), 41.1(a)(v), 41.1(a)(vi) or 41.1(a)(vii), on the earlier of (A) the Substantial Completion Date and (B) the date of payment of the City Default Termination Sum, Non-Default Termination Sum or Breach of Refinancing Termination Sum (and as a part thereof) in accordance with Schedule 22 - Compensation on Termination, the City shall pay to Project Co an amount equal to the Debt Service Amount accrued and paid or that became payable in accordance with the Lending Agreements during the period of delay by Project Co or any Project Co Party to the Lenders up to and including the Scheduled Substantial Completion Date or the date of payment of the City Default Termination Sum, Non-Default Termination Sum or Breach of Refinancing Termination Sum, as applicable, together with interest thereon at the rate payable on the Debt Amount, which, but for the Delay Event, would not have been paid by Project Co to the Lenders.
- (c) If a Relief Event occurs prior to the Substantial Completion Date, Project Co shall not be entitled to receive any compensation other than as expressly provided in Sections 41.2(b)(ii) and 47.
- (d) During a Relief Event which occurs on or after the Substantial Completion Date, the provisions of Schedule 19 - Payment Mechanism will continue to be in full force and effect, subject to Section 41.2(a).
- (e) Subject to Section 47, Project Co's sole right to payment or otherwise in relation to the occurrence of a Relief Event shall be as provided in this Section 41.
- (f) In respect of a Relief Event that,
  - (i) occurs prior to the Initial Capital Investment Date; and
  - (ii) causes a delay to Project Co in performing the Works,

the City shall pay to Project Co, on the first Construction Period Payment date after the Initial Capital Investment Date is achieved, an amount equal to the Debt Service Amount accrued and paid, or which became payable, by Project Co or any Project Co Party to the Lenders, in accordance with the Lending Agreements, during the period of delay, up to and including the first Construction Period Payment date, together with interest thereon at the rate payable on the Debt Amount, which, but for the delay caused by the Relief Event would not have been paid by Project Co to the Lenders.

#### **41.3 Mitigation and Process**

- (a) Where a Party is (or claims to be) affected by a Relief Event, such Party shall take commercially reasonable steps to mitigate the consequences of the Relief Event upon the performance of its obligations under this Project Agreement, shall resume performance of its obligations affected by

the Relief Event as soon as practicable and shall use commercially reasonable efforts to remedy its failure to perform.

- (b) To the extent that the Party claiming relief does not comply with its obligations under this Section 41.3, such failure shall preclude such Party's entitlement to relief pursuant to this Section 41.
- (c) The Party claiming relief shall give written Notice to the other Party within 5 Business Days of such Party becoming aware of the relevant Relief Event. Such initial Notice shall give sufficient details to identify the particular event claimed to be a Relief Event.
- (d) A subsequent written Notice shall be given by the Party claiming relief to the other Party within a further 5 Business Days of the initial Notice, which Notice shall contain such relevant information relating to the failure to perform (or delay in performing) as is available, including the effect of the Relief Event on the ability of the Party to perform, the action being taken in accordance with Section 41.3(a), the date of the occurrence of the Relief Event, and an estimate of the period of time required to overcome the Relief Event and/or its effects.
- (e) The Party claiming relief shall notify the other as soon as the consequences of the Relief Event have ceased and of when performance of its affected obligations can be resumed.
- (f) If, following the issue of any Notice referred to in Section 41.3(d), the Party claiming relief receives or becomes aware of any further information relating to the Relief Event and/or any failure to perform, such Party shall submit such further information to the other Party as soon as reasonably possible.

#### **41.4 Insured Exposure**

- (a) The compensation payable to Project Co pursuant to this Section 41 shall be reduced by any amount which Project Co or a Project Co Party recovers, or is entitled to recover, under any insurance policy, or would have recovered if it had complied with the requirements of this Project Agreement in respect of insurance or the terms of any policy of insurance required under this Project Agreement, which amount, for greater certainty, shall not include any excess or deductibles or any amount over the maximum amount insured under any such insurance policy.

### **42. FORCE MAJEURE**

#### **42.1 Definition**

- (a) For the purposes of this Project Agreement, "**Force Majeure**" means any of the following events or circumstances which directly causes either Party to be unable to perform all or a material part of its obligations under this Project Agreement:
  - (i) war, civil war, armed conflict, terrorism, acts of foreign enemies or hostilities;
  - (ii) nuclear or radioactive contamination of the Works, the System Infrastructure and/or the Lands, unless Project Co or any Project Co Party is the source or cause of the contamination;

- (iii) chemical or biological contamination of the Works, the System Infrastructure and/or the Lands from any event referred to in Section 42.1(a)(i);
- (iv) pressure waves caused by devices traveling at supersonic speeds; or
- (v) the discovery of any Species-at-Risk, fossils, artifacts and other objects having artistic, historic, archaeological or monetary value, including human remains and burial sites, which, as a result of Applicable Law, requires the Works to be abandoned.

## **42.2 Consequences of Force Majeure**

- (a) Subject to Section 42.3, the Party claiming relief shall be relieved from liability under this Project Agreement to the extent that, by reason of the Force Majeure, it is not able to perform its obligations under this Project Agreement.
- (b) In respect of an event of Force Majeure that is also a Delay Event pursuant to Section 38.1(a)(ix):
  - (i) Project Co shall only be relieved of its obligations under this Project Agreement to the extent, if any, provided for in Section 38; and
  - (ii) on the earlier of (A) the Substantial Completion Date and (B) the date of payment of the City Default Termination Sum, Non-Default Termination Sum or Breach of Refinancing Termination Sum (and as a part thereof) in accordance with Schedule 22 - Compensation on Termination, the City shall pay to Project Co an amount equal to the Debt Service Amount accrued and paid or which became payable in accordance with the Lending Agreements during the period of delay by Project Co or any Project Co Party to the Lenders up to and including the Scheduled Substantial Completion Date or the date of payment of the City Default Termination Sum, Non-Default Termination Sum or Breach of Refinancing Termination Sum, as applicable, together with interest thereon at the rate or rates payable on the principal amount of debt funded under the Lending Agreements, which, but for the Delay Event, would not have been paid by Project Co to the Lenders.
- (c) If an event of Force Majeure occurs prior to the Substantial Completion Date, Project Co shall not be entitled to receive any compensation other than as expressly provided in Sections 42.2(b)(ii) and 47.
- (d) During an event of Force Majeure which occurs on or after the Substantial Completion Date, the provisions of Schedule 19 - Payment Mechanism will be suspended, and the City shall pay to Project Co, for each Payment Period, an amount which reflects the cost to Project Co of the Maintenance and Rehabilitation Services performed, provided that, during such Payment Period, the amount paid to Project Co pursuant to this Section 42.2(d) shall never be more than the Maximum Service Payment.
- (e) Subject to the provisions of this Section 42, and with respect to an event of Force Majeure that is not a Delay Event and that arises prior to the Substantial Completion Date,
  - (i) a Lane Closure that is directly caused or extended by the occurrence of an event of Force Majeure shall not be included in the Aggregate Actual Lane Closures or the Aggregate Actual Lane Closure Cost for the relevant Road Section for the purposes of calculating

the Lane Closure Adjustment in accordance with the process set out in Schedule 7 – Mobility Matters;

- (ii) a Construction Period Quality Failure that,
  - (A) has been assessed in accordance with Schedule 20 – Construction Period Payments; and
  - (B) has arisen from a Non-Conformance that has been directly caused by an event of Force Majeure,

shall not be applied as part of the Construction Period Deduction for the relevant Payment Period in accordance with Section 6 of Schedule 20 – Construction Period Payments.

- (f) Subject to Section 47, Project Co's sole right to payment or otherwise in relation to the occurrence of an event of Force Majeure shall be as provided in this Section 42.
- (g) In respect of an event of Force Majeure that,
  - (i) occurs prior to the Initial Capital Investment Date; and
  - (ii) causes a delay to Project Co in performing the Works,

the City shall pay to Project Co, on the first Construction Period Payment date after the Initial Capital Investment Date is achieved, an amount equal the Debt Service Amount accrued and paid, or which became payable, by Project Co or any Project Co Party to the Lenders, in accordance with the Lending Agreements, during the period of the delay, up to and including the first Construction Period Payment date, together with interest thereon at the rate payable on the Debt Amount, which, but for the delay caused by the event of Force Majeure would not have been paid by Project Co to the Lenders.

#### **42.3 Mitigation and Process**

- (a) Where a Party is (or claims to be) affected by an event of Force Majeure, such Party shall take commercially reasonable steps to mitigate the consequences of such event of Force Majeure upon the performance of its obligations under this Project Agreement, shall resume performance of its obligations affected by the event of Force Majeure as soon as practicable and shall use commercially reasonable efforts to remedy its failure to perform.
- (b) To the extent that the Party claiming relief does not comply with its obligations under this Section 42.3, such failure shall be taken into account in determining such Party's entitlement to relief pursuant to this Section 42.
- (c) The Party claiming relief shall give written Notice to the other Party within 5 Business Days of such Party becoming aware of the relevant event of Force Majeure. Such initial Notice shall give sufficient details to identify the particular event claimed to be an event of Force Majeure.

- (d) A subsequent written Notice shall be given by the Party claiming relief to the other Party within a further 5 Business Days of the initial Notice, which Notice shall contain such relevant information relating to the failure to perform (or delay in performing) as is available, including the effect of the event of Force Majeure on the ability of the Party to perform, the action being taken in accordance with Section 42.3(a), the date of the occurrence of the event of Force Majeure, and an estimate of the period of time required to overcome the event of Force Majeure and its effects.
- (e) The Party claiming relief shall notify the other as soon as the consequences of the event of Force Majeure have ceased and of when performance of its affected obligations can be resumed.
- (f) If, following the issue of any Notice referred to in Section 42.3(d), the Party claiming relief receives or becomes aware of any further information relating to the event of Force Majeure and/or any failure to perform, such Party shall submit such further information to the other Party as soon as reasonably possible.

#### **42.4 Insured Exposure**

- (a) The compensation payable to Project Co pursuant to this Section 42 shall be reduced by any amount which Project Co or a Project Co Party recovers, or is entitled to recover, under any insurance policy, or would have recovered if it had complied with the requirements of this Project Agreement in respect of insurance or the terms of any policy of insurance required under this Project Agreement, which amount, for greater certainty, shall not include any excess or deductibles or any amount over the maximum amount insured under any such insurance policy.

#### **42.5 Modifications**

- (a) The Parties shall use commercially reasonable efforts to agree to any modifications to this Project Agreement which may be equitable having regard to the nature of an event or events of Force Majeure. Schedule 26 - Dispute Resolution Procedure shall not apply to a failure of the City and Project Co to reach agreement pursuant to this Section 42.5.

### **43. PROJECT CO DEFAULT**

#### **43.1 Project Co Events of Default**

- (a) Subject to Section 43.1(b), for the purposes of this Project Agreement, “**Project Co Event of Default**” means any one or more of the following events or circumstances:
  - (i) the occurrence of any of the following events other than as a consequence of a breach by the City of its payment obligations hereunder:
    - (A) Project Co admits in writing its inability to pay its debts generally as they become due, or makes a general assignment for the benefit of creditors, or a receiver, manager, administrator, administrative receiver, receiver and manager, trustee, custodian or other similar official or any other like person is appointed by or on behalf of or at the instance of a creditor of Project Co with respect to Project Co or any of the property, assets or undertaking of Project Co, or any creditor of Project Co takes control, or takes steps to take control, of Project Co

or any of Project Co's assets, or any proceedings are instituted against Project Co that result in Project Co being declared or ordered bankrupt or in administration, liquidation, winding-up, reorganization, compromise, arrangement, adjustment, protection, relief or composition of it or with respect to it or its debts or obligations, or any such proceedings are instituted by Project Co seeking any such result, or any such proceedings are instituted by a person other than Project Co, the City, a City Party or a person related to any of them seeking such result and such proceedings have or will have a material adverse effect on the Governmental Activities or the availability of the System Infrastructure to System Users (where such proceedings have not been withdrawn, stayed, discharged, or are otherwise of no further effect, within 90 days of being instituted), under any Applicable Law (including the *Bankruptcy and Insolvency Act* (Canada) and the *Companies' Creditors Arrangement Act* (Canada)) relating to bankruptcy, insolvency or reorganization of or relief with respect to debtors or debtors' obligations or assets or other similar matters, or seeking the appointment of a receiver, manager, administrator, administrative receiver, receiver and manager, trustee, custodian or other similar official or like person for it or with respect to any of its assets, or any resolutions are passed or other corporate actions of Project Co are taken to authorize any of the actions set forth in this Section 43.1(a)(i)(A);

- (B) Project Co ceases performing a substantial portion of its business, or a substantial portion of such business is suspended or is not being performed, whether voluntarily or involuntarily, that has or will have a material adverse effect on Project Co's ability to perform its obligations under this Project Agreement;
  - (C) if any execution, sequestration, extent, garnishment or other process of or order by any court becomes enforceable against Project Co or if a distress or analogous process is levied against any property of Project Co that materially adversely affects Project Co's ability to perform its obligations hereunder; or
  - (D) Project Co suffers any event, or any event or set of circumstances occurs or comes about, analogous to the foregoing events or sets of circumstances set out in this Section 43.1(a)(i) in any jurisdiction in which it is incorporated or resident and such event or set of circumstances would, if set out in Section 43.1(a)(i)(A), (B) or (C), constitute a Project Co Event of Default;
- (ii) Project Co failing to achieve Substantial Completion within 365 days after the Scheduled Substantial Completion Date (the "**Longstop Date**");
  - (iii) Project Co either:
    - (A) failing to deliver a Recovery Schedule in accordance with Schedule 12 – Works Scheduling Requirements;
    - (B) delivering a Recovery Schedule under Schedule 12 – Works Scheduling Requirements which indicates that Project Co will not achieve Substantial Completion by the Longstop Date; or

- (C) delivering a Recovery Schedule under Schedule 12 – Works Scheduling Requirements that is not acceptable to the Independent Certifier, acting reasonably, as to the matters set out in Section 2.4 of Schedule 12 – Works Scheduling Requirements;
- (iv) Project Co making any representation or warranty herein that is false or misleading when made, and that has or will have at any time a material adverse effect on the performance of Project Operations, the Governmental Activities or the availability of the System Infrastructure to System Users, or that may compromise (A) the City’s reputation or integrity, or (B) the nature of the public transit system in the City of Ottawa so as to affect public confidence in the public transit system in the City of Ottawa or the Project and, in the case of a false or misleading representation or warranty that is capable of being remedied, such breach is not remedied within 10 Business Days of receipt of Notice of the same from the City;
- (v) Project Co committing a breach of Section 50 or Section 51 or a breach of its obligations under this Project Agreement (other than a breach that is referred to in Sections 43.1(a)(i) to (iv) inclusive or 43.1(a)(vi) to (xx) inclusive) which has or will have a material adverse effect on the Governmental Activities or the availability of the System Infrastructure to System Users, other than where such breach is a consequence of a breach by the City of its obligations under this Project Agreement, and upon becoming aware of such breach Project Co failing to remedy such breach in accordance with all of the following:
  - (A) Project Co shall:
    - (I) immediately commence and thereafter diligently continue to remedy the breach and to mitigate any adverse effects on the City and the Governmental Activities or the availability of the System Infrastructure to System Users;
    - (II) put forward, within 5 Business Days of receipt of Notice of such breach from the City, a reasonable plan and schedule for diligently remedying the breach and mitigating its effect, which plan and schedule shall specify in reasonable detail the manner in which, and the latest date by which, such breach is proposed to be remedied, which latest date shall in any event be within 60 days of Notice of such breach, or if such breach is not capable of being rectified in such period then such longer period as is reasonable in the circumstances; and
    - (III) thereafter perform its obligations to achieve all elements of such plan and schedule in accordance with its terms within the time for the performance of its obligations thereunder; and
  - (B) upon Project Co failing to comply with any of the provisions of Section 43.1(a)(v)(A):

- (I) Project Co shall continue to diligently remedy the breach and to mitigate any adverse effects on the City and the Governmental Activities or the availability of the System Infrastructure to System Users;
  - (II) Project Co shall, within 3 Business Days after Notice from the City, submit a plan and schedule, which the City shall have no obligation to accept, for remedying the breach and mitigating its effect within such period, if any, acceptable to the City, in its sole discretion, and thereafter perform its obligations to achieve all elements of such plan and schedule in accordance with its terms within the time for the performance of its obligations thereunder; and
  - (III) for greater certainty, Project Co failing to comply with any of the provisions of this Section 43.1(a)(v)(B), or the City, in its sole discretion, not accepting the plan and schedule submitted by Project Co pursuant to Section 43.1(a)(v)(B)(II), shall constitute a Project Co Event of Default;
- (vi) Project Co wholly abandoning the Works for a period which exceeds 3 Business Days from receipt by Project Co of a written request to return to the Site, other than as a consequence of a breach by the City of its obligations under this Project Agreement;
  - (vii) Project Co ceasing to perform any Maintenance and Rehabilitation Services in accordance with this Project Agreement which is necessary for the Governmental Activities or the availability of the System Infrastructure to System Users, other than as a consequence of a breach by the City of its obligations under this Project Agreement;
  - (viii) Project Co failing to comply with Sections 57.1 or 57.3;
  - (ix) the occurrence of any Change in Ownership or Change in Control which is prohibited by Section 57.4;
  - (x) Project Co being awarded a total of [REDACTED] or more Failure Points in any rolling 3 Payment Periods;
  - (xi) Project Co being awarded a total of [REDACTED] or more Failure Points in any rolling 6 Payment Periods;
  - (xii) Project Co being awarded a total of [REDACTED] or more Failure Points in any rolling 12 Payment Periods;
  - (xiii) Project Co failing to remove an Encumbrance that arose due to an act or omission of Project Co or any Project Co Party (other than any Encumbrance derived through the City) within 45 days of the earlier of:
    - (A) the registration of such Encumbrance against title to the Lands or any part thereof; and
    - (B) the date on which Project Co or any Project Co Party knew, or ought to have known, about the existence of the Encumbrance;

- (xiv) Project Co failing to pay any sum or sums due to the City under this Project Agreement, which sum or sums are not being disputed by Project Co in accordance with Schedule 26 - Dispute Resolution Procedure or have not been set off by Project Co pursuant to Section 32.12(a)(ii), and which sum or sums, either singly or in aggregate, exceed(s) \$[REDACTED] (index linked), and such failure continues for 30 days from receipt by Project Co of a Notice of non-payment from the City;
- (xv) Project Co failing to comply with Section 58;
- (xvi) Project Co failing to comply with Section 7.3 or Schedule 27 - Refinancing;
- (xvii) Project Co failing to obtain any bond, security or insurance required to be obtained by or on behalf of Project Co pursuant to this Project Agreement or any such bond, security or insurance being vitiated or otherwise ceasing to be in full force and effect or in material compliance with the requirements set out in this Project Agreement, other than as a consequence of a breach by the City of its obligations under this Project Agreement, and:
  - (A) in respect of insurance, such breach by Project Co is not remedied within 10 Business Days of the occurrence of the breach; and
  - (B) in respect of a bond or security, such breach by Project Co is not remedied within 5 Business Days of Project Co becoming aware of such breach;
- (xviii) Project Co failing to comply with any determination, order or award made against Project Co in accordance with Schedule 26 - Dispute Resolution Procedure;
- (xix) at any time after the Substantial Completion Date, Project Co committing a breach of its obligations under this Project Agreement (other than as a consequence of a breach by the City of its obligations under this Project Agreement) which results in a health and safety related criminal conviction or a conviction under the *Occupational Health and Safety Act* (Ontario) against Project Co or any Project Co Party or the City (an “**H&S Conviction**”) provided however that:
  - (A) an H&S Conviction against Project Co, a Project Co Party or the City shall not constitute a Project Co Event of Default if, within 90 days from the date of the H&S Conviction (whether or not the H&S Conviction is subject to an appeal or any further judicial process), the involvement in the Project Operations of each relevant Project Co Party (which in the case of an individual director, officer or employee shall be deemed to include the Project Co Party of which that person is a director, officer or employee) is terminated in accordance with Section 57.3 or Project Co takes such other disciplinary action against each such Project Co Party as is acceptable to the City, in its sole discretion; and
  - (B) in determining whether to exercise any right of termination for a Project Co Event of Default pursuant to this Section 43.1(a)(xix), the City shall:

- (I) act in a reasonable and proportionate manner having regard to such matters as the gravity of any offence and the identity of the person committing the act leading to the H&S Conviction; and
  - (II) give all due consideration, where appropriate, to action other than termination of this Project Agreement; or
- (xx) Project Co failing to comply with Section 27.4 and 27.8.
- (b) The City shall not exercise any rights under this Section 43 (except its rights under Section 43.5(a)(i)) as a result of a Project Co Event of Default referred to in Sections 43.1(a)(vii), 43.1(a)(x), 43.1(a)(xi) and 43.1(a)(xii) until the day following the Substantial Completion Payment Commencement Date. For greater certainty, if the City is prevented from exercising any rights under this Section 43 by the terms of the immediately preceding sentence, then, notwithstanding the passage of time or any intervening event (including that the City may have exercised its rights under Section 43.5(a)), on and after the day following the Substantial Completion Payment Commencement Date, the City may exercise any such rights.

#### **43.2 Notification of Occurrence**

- (a) Project Co shall, promptly upon Project Co becoming aware of the occurrence, notify the City of the occurrence, and details, of any Project Co Event of Default and of any event or circumstance which is likely, with the passage of time, giving of Notice, determination of any condition, or otherwise, to constitute or give rise to a Project Co Event of Default.

#### **43.3 Right to Termination**

- (a) On the occurrence of a Project Co Event of Default, or at any time after the City becomes aware of a Project Co Event of Default (and, if the occurrence of a Project Co Event of Default is disputed by Project Co in good faith, then following confirmation in accordance with Schedule 26 - Dispute Resolution Procedure that a Project Co Event of Default has occurred), the City may, subject to Section 43.4, terminate this Project Agreement in its entirety by written Notice having immediate effect given to Project Co, and to any person specified in the Lenders' Direct Agreement to receive such Notice.

#### **43.4 Remedy Provisions**

- (a) In the case of a Project Co Event of Default referred to in Sections 43.1(a)(i)(B), 43.1(a)(i)(C), 43.1(a)(i)(D) (where the Project Co Event of Default referred to in Section 43.1(a)(i)(D) is analogous to a Project Co Event of Default referred to in Section 43.1(a)(i)(B) or 43.1(a)(i)(C)), 43.1(a)(iii), 43.1(a)(iv), 43.1(a)(vi), 43.1(a)(vii), 43.1(a)(viii), 43.1(a)(ix) (where the Project Co Event of Default referred to in Section 43.1(a)(ix) is capable of being remedied), 43.1(a)(xiv), 43.1(a)(xvi), 43.1(a)(xvii) (where the Project Co Event of Default referred to in Section 43.1(a)(xvii) is not in respect of insurance), 43.1(a)(xviii), 43.1(a)(xix) or 43.1(a)(xx), the City shall, prior to being entitled to terminate this Project Agreement, give Notice of default to Project Co, and to any person specified in the Lenders' Direct Agreement to receive such Notice, and Project Co shall:

- (i) within 5 Business Days of such Notice of default, put forward a reasonable plan and schedule for diligently remedying the Project Co Event of Default, which schedule shall specify in reasonable detail the manner in, and the latest date by which, such Project Co Event of Default is proposed to be remedied, which latest date shall, in any event, be within 30 days of the Notice of default, or if such breach is not capable of being remedied in such period then such longer period as is acceptable to the City, acting reasonably; and
  - (ii) thereafter, perform its obligations to achieve all elements of such plan and schedule in accordance with its terms within the time for the performance of its obligations thereunder.
- (b) Where Project Co puts forward a plan and schedule in accordance with Section 43.4(a)(i) that has a date for the Project Co Event of Default to be remedied that is beyond 30 days from the Notice of default, the City shall have 5 Business Days from receipt of the same within which to notify Project Co that the City does not accept such longer period in the plan and schedule and that the 30 day limit will apply, failing which the City shall be deemed to have accepted the longer period in the plan and schedule.
- (c) If a Project Co Event of Default, of which a Notice of default was given under Section 43.4(a), occurs and:
  - (i) Project Co fails to immediately commence and thereafter diligently continue to remedy the Project Co Event of Default and to mitigate any adverse effects on the City and the Governmental Activities or the availability of the System Infrastructure to System Users; or
  - (ii) Project Co fails to put forward a plan and schedule pursuant to Section 43.4(a)(i); or
  - (iii) such Project Co Event of Default is not remedied within 30 days of such Notice of default or such longer period as is established pursuant to the plan and schedule established pursuant to Sections 43.4(a) and (b); or
  - (iv) where Project Co puts forward a plan and schedule pursuant to Section 43.4(a)(i) and Project Co fails to perform its obligations thereunder necessary to achieve all elements of such plan and schedule in accordance with its terms within the time for the performance of its obligations,then the City may terminate this Project Agreement in its entirety by written Notice with immediate effect, such Notice to be given to Project Co, and to any person specified in the Lenders' Direct Agreement to receive such Notice.
- (d) Notwithstanding that the City may give the Notice referred to in Section 43.4(a), and without prejudice to the other rights of the City in this Section 43.4, at any time during which a Project Co Event of Default is continuing, the City may, at Project Co's risk and expense, take such steps as the City considers appropriate, either itself or by engaging others (including a third party) to take such steps, to perform or obtain the performance of Project Co's obligations under this Project Agreement or to remedy such Project Co Event of Default.

- (e) Upon the occurrence of a Project Co Event of Default that Project Co has remedied pursuant to this Section 43.4, such occurrence of a Project Co Event of Default shall thereafter cease to be a Project Co Event of Default and the City shall not be entitled to terminate this Project Agreement for that occurrence of a Project Co Event of Default.

#### **43.5 Replacement of Non-Performing Maintenance and Rehabilitation Contractor**

- (a) The City may, acting reasonably, require Project Co to terminate the Maintenance and Rehabilitation Contractor and ensure that a replacement Maintenance and Rehabilitation Contractor is appointed in accordance with Section 57.3 to provide the Maintenance and Rehabilitation Services within 60 days:
  - (i) as an alternative to termination of this Project Agreement pursuant to Sections 43.3 or 43.4, in any circumstance in which the City could exercise such right of termination, if the Project Co Event of Default was caused, or contributed to, by the Maintenance and Rehabilitation Contractor or otherwise relates to the Maintenance and Rehabilitation Services; or
  - (ii) if Project Co accrues, in any rolling 6 Payment Periods more than:
    - (A) **[REDACTED]** Failure Points in respect of Train Kilometres Availability Failures; or
    - (B) **[REDACTED]** Failure Points in respect of Quality Failures and Service Failures combined,

provided that this Section 43.5 shall not give rise to partial termination of either the obligation to provide the Project Operations or this Project Agreement.
- (b) If the City exercises its rights under this Section 43.5, Project Co shall, within 5 Business Days, put forward a proposal for the interim management or performance of the Maintenance and Rehabilitation Services until such time as a replacement Maintenance and Rehabilitation Contractor can be engaged by Project Co. If Project Co fails to do so, or if its proposal is not reasonably likely to give adequate performance of the Maintenance and Rehabilitation Services and the Parties cannot agree within a further 3 Business Days to a plan for the interim management or performance of the Maintenance and Rehabilitation Services, then, without prejudice to the other rights of the City in this Section 43.5, the City itself may perform, or engage others (including a third party) to perform, the Maintenance and Rehabilitation Services and Section 31.4 shall apply, *mutatis mutandis*, to the Maintenance and Rehabilitation Services. Any Dispute in respect of the interim management or provision of the Maintenance and Rehabilitation Services may be referred for resolution in accordance with Schedule 26 - Dispute Resolution Procedure.
- (c) If Project Co fails to terminate, or secure the termination of, the Maintenance and Rehabilitation Contractor and to secure a replacement Maintenance and Rehabilitation Contractor in accordance with this Section 43.5, the City shall be entitled to exercise its termination rights in accordance with Sections 43.3 and 43.4, as applicable.

- (d) Where a replacement Maintenance and Rehabilitation Contractor is appointed in accordance with this Section 43.5, [REDACTED]% of the Failure Points accrued by Project Co prior to such replacement shall be cancelled.

#### **43.6 Replacement of Non-Performing Revenue Vehicle Supplier**

- (a) The City may, acting reasonably, require Project Co to terminate the Revenue Vehicle Supplier as an alternative to termination of this Project Agreement pursuant to Sections 43.3 or 43.4, in any circumstance in which the City could exercise such right of termination, if the Project Co Event of Default was caused, or contributed to, by the Revenue Vehicle Supplier. In the event the City does not exercise its rights and if the Project Co Event of Default was caused by the Revenue Vehicle Supplier, Project Co may, acting reasonably, with the consent of the City, terminate the Revenue Vehicle Supplier as an alternative to termination of this Project Agreement pursuant to Sections 43.3 or 43.4.
- (b) If Project Co fails to terminate, the City shall be entitled to exercise its termination rights in accordance with Sections 43.3 and 43.4, as applicable.
- (c) If the City or Project Co exercises its right under this Section 43.6, then:
  - (i) the subject Project Co Event of Default that was caused, or contributed to, by the Revenue Vehicle Supplier shall be deemed to be cured and there shall no longer be a Project Co Event of Default in respect of such event or events;
  - (ii) Project Co and the City shall work together in good faith and use reasonably commercial efforts to attempt to secure an appropriate replacement Revenue Vehicle Supplier to supply the New Revenue Vehicles and to mitigate the impact of such replacement Revenue Vehicle Supplier on the Works Schedule and the performance of the Project Operations;
  - (iii) if such right is exercised by the City prior to the date which is one year prior to the Scheduled Substantial Completion Date, Project Co shall only be required to achieve Interim Substantial Completion on or prior to the Scheduled Substantial Completion Date and all references herein to Substantial Completion and Scheduled Substantial Completion shall be automatically amended and read as references to Interim Substantial Completion and Scheduled Interim Substantial Completion, respectively, such that all other requirements that would have been required to be performed in connection with Substantial Completion shall be performed in connection with Interim Substantial Completion; and
  - (iv) to the extent the City provides any replacement vehicles to replace any New Revenue Vehicles that were not delivered by the Revenue Vehicle Supplier or that were delivered after the original Revenue Vehicle Supplier was terminated, and as a result thereof Project Co incurs any delays or increased costs in the performance of the Project Operations, such performance shall, subject to and in accordance with Schedule 21 – Variation Procedure, result in a Variation.

#### 43.7 City's Costs

- (a) Project Co shall reimburse the City for all reasonable costs (including all applicable Taxes and all legal or professional services, legal costs being on a full indemnity basis) properly incurred by the City in exercising its rights under this Section 43, including any relevant increased administrative expenses. The City shall take commercially reasonable steps to mitigate such costs.

#### 43.8 No other Rights to Terminate

- (a) The City shall have no right or entitlement to terminate this Project Agreement, or to accept any repudiation of this Project Agreement, and shall not purport to exercise any such right or entitlement except as set forth in Sections 43 and 45.

#### 43.9 Project Co Termination of Revenue Vehicle Supplier

- (a) Project Co shall not exercise any right to terminate the Revenue Vehicle Supply Contract without the consent of the City.

### 44. CITY DEFAULT

#### 44.1 City Events of Default

- (a) For the purposes of this Project Agreement, “**City Event of Default**” means any one or more of the following events or circumstances:
  - (i) the City failing to pay any sum or sums due to Project Co under this Project Agreement, which sum or sums are not being disputed by the City in accordance with Schedule 26 - Dispute Resolution Procedure or have not been set off by the City pursuant to Section 32.12(a)(ii), and which sum or sums, either singly or in aggregate, exceed(s) \$[REDACTED] (index linked), and:
    - (A) in respect of a Construction Period Payment or the Substantial Completion Payment, such failure continues for 30 Business Days;
    - (B) subject to Section 44.1(a)(i)(C), in respect of any Monthly Service Payment, such failure continues for 30 days;
    - (C) in respect of any 3 Monthly Service Payments in any rolling 9 month period, such failure continues for 15 Business Days in respect of each such Monthly Service Payment; or
    - (D) in respect of any other payment due and payable by the City to Project Co under this Project Agreement, such failure continues for 90 days,in any such case, from receipt by the City of a Notice of non-payment from or on behalf of Project Co;
  - (ii) the City committing a material breach of its obligations under Section 14 (other than as a consequence of a breach by Project Co of its obligations under this Project Agreement),

which breach materially adversely affects the ability of Project Co to perform its obligations under this Project Agreement for a continuous period of not less than 60 days; or

- (iii) an act of any Governmental Authority which renders it impossible for Project Co to perform all or substantially all of its obligations under this Project Agreement (other than as a consequence of a breach by Project Co of its obligations under this Project Agreement) for a continuous period of not less than 60 days (for greater certainty, the non-issuance of, or the imposition of any conditions or limitations in, any of the Project Co Permits, Licences, Approvals and Authorizations shall not constitute an “act of any Governmental Authority”).

#### **44.2 Project Co’s Options**

- (a) On the occurrence of a City Event of Default and while the same is continuing, Project Co may give Notice to the City of the occurrence of such City Event of Default, which Notice will specify the details thereof. If Project Co gives such Notice and the applicable City Event of Default has not been remedied within 30 days of receipt by the City of Notice of the occurrence of such City Event of Default, at Project Co’s option and without prejudice to its other rights and remedies under this Project Agreement, Project Co may:
  - (i) suspend performance of the Works and the Maintenance and Rehabilitation Services until such time as the City has remedied such City Event of Default; or
  - (ii) terminate this Project Agreement in its entirety by Notice in writing having immediate effect.

#### **44.3 Project Co’s Costs**

- (a) The City shall reimburse Project Co for all reasonable costs (including all applicable Taxes and all legal or professional services, legal costs being on a full indemnity basis) properly incurred by Project Co in exercising its rights under this Section 44, including any relevant increased administrative expenses. Project Co shall take commercially reasonable steps to mitigate such costs.

#### **44.4 No Other Rights to Terminate**

- (a) Project Co shall have no right or entitlement to terminate this Project Agreement, nor to accept any repudiation of this Project Agreement, and shall not exercise, nor purport to exercise, any such right or entitlement except as expressly set forth in this Project Agreement.

### **45. RELIEF EVENT AND NON-DEFAULT TERMINATION**

#### **45.1 Termination for Relief Event**

- (a) Subject to Section 45.1(b), if a Relief Event occurs and the effects of the Relief Event continue for 180 days from the date on which the Party affected gives Notice to the other Party pursuant to Section 41.3(c), either Party may, at any time thereafter, terminate this Project Agreement by written Notice to the other Party having immediate effect, provided that the effects of the Relief

Event continue during such period to prevent either Party from performing a material part of its obligations under this Project Agreement.

- (b) Neither Party shall be entitled to exercise its right to terminate this Project Agreement in accordance with Section 45.1(a) if Project Co or a Project Co Party recovers, or is entitled to recover, under any insurance policy, or would have recovered if it had complied with the requirements of this Project Agreement in respect of insurance or the terms of any policy of insurance required under this Project Agreement, an amount which is equal to or greater than the Monthly Service Payment.

#### **45.2 Termination for Force Majeure**

- (a) If an event of Force Majeure occurs and the Parties, having used commercially reasonable efforts, have failed to reach agreement on any modification to this Project Agreement pursuant to Section 42.5 within 180 days from the date on which the Party affected gives Notice to the other Party as set out therein, either Party may, at any time thereafter, terminate this Project Agreement by written Notice to the other Party having immediate effect, provided that the effects of the event of Force Majeure continue during such period to prevent either Party from performing a material part of its obligations under this Project Agreement.

#### **45.3 Termination for Convenience**

- (a) The City shall, in its sole discretion and for any reason whatsoever, be entitled to terminate this Project Agreement at any time on 180 days' written Notice to Project Co.
- (b) In the event of Notice being given by the City in accordance with this Section 45.3, the City shall, at any time before the expiration of such Notice, be entitled to direct Project Co to refrain from commencing, or allowing any third party to commence, the Works, or any part or parts of the Works, or the Maintenance and Rehabilitation Services, or any element of the Maintenance and Rehabilitation Services, where such Works or Maintenance and Rehabilitation Services have not yet been commenced.

#### **45.4 Automatic Expiry on Expiry Date**

- (a) This Project Agreement shall terminate automatically on the Expiry Date.
- (b) Project Co shall not be entitled to any compensation due to termination of this Project Agreement on expiry of the Project Term on the Expiry Date.

### **46. EFFECT OF TERMINATION AND TRANSITIONAL ARRANGEMENTS**

#### **46.1 Termination**

- (a) Notwithstanding any provision of this Project Agreement, upon the service of a Notice of termination or termination on the Expiry Date pursuant to Section 45.4, this Section 46 shall apply in respect of such termination.

#### **46.2 Continued Effect - No Waiver**

- (a) Notwithstanding any breach of this Project Agreement by a Party, the other Party may elect to continue to treat this Project Agreement as being in full force and effect and to enforce its rights under this Project Agreement without prejudice to any other rights which such other Party may have in relation to such breach. The failure of either Party to exercise any right under this Project Agreement, including any right to terminate this Project Agreement and any right to claim damages, shall not be deemed to be a waiver of such right for any continuing or subsequent breach.

#### **46.3 Continuing Performance**

- (a) Subject to any exercise by the City of its rights to perform, or to seek, pursuant to this Project Agreement, a third party to perform, the obligations of Project Co, the Parties shall continue to perform their obligations under this Project Agreement (including, if applicable, pursuant to Schedule 22 - Compensation on Termination) notwithstanding the giving of any Notice of default or Notice of termination, until the termination of this Project Agreement becomes effective in accordance with this Section 46.

#### **46.4 Effect of Notice of Termination**

- (a) On the service of a Notice of termination, or termination on the Expiry Date pursuant to Section 45.4:
  - (i) if termination is prior to the Substantial Completion Date, in so far as any transfer shall be necessary to fully and effectively transfer such property to the City as shall not already have been transferred to the City pursuant to Section 53.1, Project Co shall transfer to, and there shall vest in, the City, free from all Encumbrances (other than the Encumbrances caused or consented to by the City), such part of the Works, the System Infrastructure and the New Municipal Infrastructure as shall have been constructed and such items of plant, infrastructure and equipment as shall have been procured by Project Co, and, if the City so elects:
    - (A) all plant, equipment and materials (other than those referred to in Section 46.4(a)(i)(B)) on or near to the Site shall remain available to the City for the purposes of completing the Works; and
    - (B) all construction plant and equipment shall remain available to the City for the purposes of completing the Works, subject to payment by the City of the Construction Contractor's reasonable charges;
  - (ii) if termination is prior to the Substantial Completion Date, Project Co shall deliver to the City (to the extent such items have not already been delivered to the City) one complete set of all Project Data and Intellectual Property relating to the design, construction and completion of the Works, the System Infrastructure and the New Municipal Infrastructure;
  - (iii) in so far as title shall not have already passed to the City pursuant to Section 53.1 or Section 46.4(a)(i), Project Co shall hand over to, and there shall vest in, the City, free from all Encumbrances (other than any Encumbrances caused or consented to by the

City), the System Infrastructure and the New Municipal Infrastructure, together with all other assets and rights capable of being transferred that are necessary for the performance of the Project and the Project Operations and all facilities and equipment including, notwithstanding that termination may occur prior to the Expiry Date, the verification and transfer of inventory as set forth in Appendix C (Expiry Date Requirements) of the Maintenance and Rehabilitation Requirements, and to the extent that any such assets or rights are not capable of being transferred by Project Co to the City, Project Co shall enter into agreements or make other arrangements in order to permit the use of the assets or rights by the City in order to enable it, or its designated agents or subcontractors, to continue to perform the activities which would have otherwise been performed by Project Co if this Project Agreement had not been terminated;

- (iv) if the City so elects, Project Co shall ensure that any of the Subcontracts between Project Co and a Subcontractor (including the Construction Contract and the Maintenance and Rehabilitation Contract), and any other instrument entered into between any such Subcontractor and Project Co for securing the performance by such Subcontractor of its obligations in respect of the Project Operations or to protect the interests of Project Co, shall be novated or assigned to the City or its nominee, provided that where termination occurs other than as a result of a Project Co Event of Default, the consent of the relevant Subcontractor shall be required, and further provided that any such novation or assignment of a Subcontract with any Contractor shall be made to the City pursuant to, and subject to, the terms of the applicable Direct Agreement;
- (v) Project Co shall, or shall ensure that any Project Co Party shall, offer to sell (and if the City so elects, execute such sale) to the City at a fair value (determined as between a willing vendor and willing purchaser, with any Disputes as to such fair value being resolved in accordance with Schedule 26 - Dispute Resolution Procedure), free from all Encumbrances (other than any Encumbrances caused or consented to by the City), all or any part of the stocks of material and other assets, road vehicles, construction equipment, spare parts and other moveable property owned by Project Co or any Project Co Parties and dedicated to or predominantly used in respect of the System Infrastructure, and reasonably required by the City in connection with the operation of the System Infrastructure or the performance of the Maintenance and Rehabilitation Services;
- (vi) Project Co shall deliver to the City (to the extent such items have not already been delivered to the City) one complete set of:
  - (A) the most recent Record Drawings in the format that the City, acting reasonably, considers most appropriate at the time showing all alterations made to the System Infrastructure since the Substantial Completion Date;
  - (B) the most recent maintenance, operation and training manuals for the System Infrastructure; and
  - (C) current regulations and standards governing the System Infrastructure.
- (vii) Project Co shall use commercially reasonable efforts to assign, or otherwise transfer, to the City, free from all Encumbrances (other than any Encumbrances caused or consented

to by the City), the benefit of all manufacturers' warranties, including all documentation in respect thereof, in respect of mechanical and electrical plant and equipment used or made available by Project Co under this Project Agreement and included in the System Infrastructure and the New Municipal Infrastructure;

- (viii) Project Co shall deliver to the City all information, reports, documents, records and the like referred to in Section 35, including as referred to in Schedule 25 - Record Provisions, except where such are required by Applicable Law to be retained by Project Co or the Project Co Parties (in which case complete copies shall be delivered to the City);
- (ix) in the case of the termination of this Project Agreement on the Expiry Date in accordance with Section 45.4, the System Infrastructure and elements of the System Infrastructure shall be in the condition required in accordance with Section 48 and Schedule 23 - Expiry Transition Procedure; and
- (x) in the case of termination prior to the Expiry Date, Project Co shall implement the requirements set out in Sections 2.2, 2.3(a)(ii) and 2.5 to 2.9 of Appendix C to Schedule 15-3 of this Project Agreement, taking into account the circumstances of termination occurring prior to the Expiry Date, and meet any timeframes set out in the notice of termination for the implementation of such requirements.

#### **46.5 Ownership of Information**

- (a) Subject to Section 49, all information obtained by Project Co, including the Record Drawings and other technical drawings and data, supplier agreements and contracts, utilities consumption information, environmental and technical reports, lease, license and subletting data and contracts, asset condition data, standard operating procedures, processes and manuals and all other information directly related to the Project Operations accumulated over the course of the Project Term shall be the property of the City and upon termination of this Project Agreement shall be provided or returned to the City, as applicable, in electronic format acceptable to the City, acting reasonably, where it exists in electronic format, and in its original format, when not in electronic format.

#### **46.6 Provision in Subcontracts**

- (a) Project Co shall make provision in all Subcontracts to which it is a party (including requiring the relevant Project Co Parties to make such provision and to require other Project Co Parties to make such provision) to ensure that the City shall be in a position to exercise its rights, and Project Co shall be in a position to perform its obligations, under this Section 46.

#### **46.7 Transitional Arrangements**

- (a) On the termination of this Project Agreement for any reason, for a reasonable period both before and after any such termination, Project Co shall, subject to the continued performance of Maintenance and Rehabilitation Services pursuant to Sections 3.2 and 3.3 of Schedule 22 - Compensation on Termination if applicable:

- (i) cooperate fully with the City and any successors providing services in the nature of any of the Maintenance and Rehabilitation Services and any part of the Maintenance and Rehabilitation Services in order to achieve a smooth transfer of the manner in which the Maintenance and Rehabilitation Services is performed and to avoid or mitigate, in so far as reasonably practicable, any inconvenience or any risk to the health and safety of any System Users;
  - (ii) as soon as practicable remove from the Lands all property belonging to Project Co or any Project Co Party that is not acquired by the City pursuant to Section 46.4 or otherwise, and, if Project Co has not done so within 60 days after any Notice from the City requiring it to do so, the City may, without being responsible for any loss, damage, costs or expenses, remove and sell any such property and shall hold any proceeds, less all costs incurred to the credit of Project Co;
  - (iii) forthwith deliver to the City Representative:
    - (A) all keys to, and any pass cards and other devices used to gain access to any part of the System Infrastructure; and
    - (B) to the extent transferable and without prejudice to the City's rights pursuant to Section 49, any copyright licences for any computer programs, or licences to use the same, used in connection with the operation of the System Infrastructure;
  - (iv) as soon as practicable vacate the Lands and, without limiting Project Co's obligations under Schedule 23 - Expiry Transition Procedure, shall leave the Lands and the System Infrastructure in a safe, clean and orderly condition.
- (b) If the City wishes to conduct a competition prior to the Expiry Date with a view to entering into an agreement for the provision of services, which may or may not be the same as, or similar to the Maintenance and Rehabilitation Services or any part of the Maintenance and Rehabilitation Services, following the expiry of this Project Agreement, Project Co shall, subject to payment of Project Co's reasonable costs, cooperate with the City fully in such competition process, including by:
- (i) providing any information which the City may reasonably require to conduct such competition, including all information contained in any asset management system maintained by Project Co not otherwise transferred to the City, other than Sensitive Information; and
  - (ii) assisting the City by allowing any or all participants in such competition process unrestricted access to the Lands and the System Infrastructure.

#### **46.8 Cessation of Rights and Obligations on Termination**

- (a) On completion of Project Co's obligations pursuant to this Section 46, this Project Agreement shall terminate and, except as provided in Section 46.9, all rights and obligations of the City and Project Co under this Project Agreement shall cease and be of no further force and effect.

#### **46.9 Survival**

- (a) Except as otherwise provided in this Project Agreement, termination of this Project Agreement shall be without prejudice to, and shall not affect:
  - (i) all representations, warranties and indemnities under this Project Agreement; and
  - (ii) Sections 1.2, 5, 7, 15.2, 16.1, 16.3(a), 16.4(a), 16.5(a), 24.6, 25.11, 25.14, 30.1, 30.5, 31, 32.6, 32.8, 32.12, 32.13, 32.14, 33, 34, 35, 43.6, 44.3, 45.4, 46, 47, 48, 49 with the exception of 49.4(b), 50, 51, 53, 54, 55, 56, 58.3, 59.1, 62.4, 62.8, 62.9, 62.10, 62.11 and 62.12 of this Project Agreement, Schedule 7 – Mobility Matters, Schedule 22 – Compensation on Termination, Sections 2, 4 and 5 of Schedule 23 – Expiry Transition Procedure, Sections 1.2 to 1.8 of Schedule 25 – Record Provisions, Schedule 26 – Dispute Resolution Procedure, Sections 2.1 – 2.7, and 3.2-3.9 of Schedule 35 – Intellectual Property, Schedule 36 – System Extension and any other provisions of this Project Agreement which are expressed to survive termination and which are required to give effect to such provisions which survive termination or to such termination or the consequences of such termination,

all of which shall survive the termination of this Project Agreement, including for termination on the Expiry Date pursuant to Section 45.4.

## **47. COMPENSATION ON TERMINATION**

### **47.1 Compensation on Termination**

- (a) If this Project Agreement is terminated in accordance with the terms hereof, then Schedule 22 – Compensation on Termination shall apply and the City shall pay Project Co any applicable compensation on termination.

### **47.2 Full and Final Settlement**

- (a) Except as otherwise provided in Section 47.2(b), any compensation paid pursuant to this Section 47, including pursuant to Schedule 22 – Compensation on Termination in the total amount owing thereunder, shall be in full and final settlement of any claims, demands and proceedings of Project Co and the City, and each shall be released from all liability to the other in relation to any breaches or other events leading to such termination of this Project Agreement, and the circumstances leading to such breach or termination, and Project Co and the City shall be precluded from exercising all other rights and remedies in respect of any such breach or termination whether in contract, tort, restitution, statute, at common law or otherwise.
- (b) Section 47.2(a) shall be without prejudice to:
  - (i) any liability of either Party to the other, including under the indemnities contained in this Project Agreement, that arose prior to the Termination Date (but not from the termination itself or the events leading to such termination) to the extent such liability has not already been set off pursuant to Section 32.12 or taken into account pursuant to Schedule 22 – Compensation on Termination in determining or agreeing upon the City Default Termination Sum, Adjusted Highest Qualifying Tender Price, Adjusted Estimated Fair Value, Non-Default Termination Sum or any other termination sum, as the case may be;

- (ii) any liabilities arising under or in respect of any breach by either Party of their obligations under Section 46.9 of this Project Agreement, or the Sections referred to therein, which did not lead to such termination and which arises or continues after the Termination Date; and
- (iii) any amount owing to the City in relation to:
  - (A) Taxes or tax withholdings, including workers' compensation levies;
  - (B) fines, penalties or restitution orders by a court under any Federal or Provincial statute;
  - (C) any order made by a court under the *Civil Remedies Act* (Ontario); and
  - (D) any fraud or other criminal offence committed against the City.

## **48. EXPIRY TRANSITION PROCEDURE**

### **48.1 Expiry Transition**

- (a) Project Co and the City shall each comply with the requirements of Schedule 23 – Expiry Transition Procedure.

## **49. INTELLECTUAL PROPERTY**

### **49.1 Ownership of Intellectual Property**

- (a) Subject to Section 49.4, the Ownership of Intellectual Property shall be as set out in Schedule 35 – Intellectual Property. Project Co and the City shall each comply with the requirements of Schedule 35 – Intellectual Property.

### **49.2 Licences to Intellectual Property**

- (a) Schedule 35 – Intellectual Property sets out the terms on which Intellectual Property used or supplied in connection with the Project will be licensed.

### **49.3 Representation and Warranty**

- (a) Project Co represents, warrants and covenants to the City that:
  - (i) Project Co has and shall have the full and unencumbered right to provide all rights and Licences granted to the City in this Project Agreement and to make all assignments of Intellectual Property as contemplated in this Project Agreement and to otherwise fully comply with the terms and requirements of Schedule 35 – Intellectual Property and its obligations therein;
  - (ii) any Intellectual Property Licences to the City pursuant to this Project Agreement does not and shall not infringe, and is not and shall not be misappropriation of, any third party Intellectual Property rights;

(iii) as of Commercial Close:

- (A) Project Co has not received any alleged infringement or misappropriation notices from third parties regarding the any such Intellectual Property; and
- (B) no fact is known to Project Co (including in respect of any actual, pending or threatened disputes, claims, suits, actions or proceedings or any other circumstance or event) that will, or could reasonably, effect, limit or prevent Project Co from fully complying with this Section 49.3(a).

#### 49.4 Jointly Developed Materials

- (a) To the extent any data, documents, drawings, reports, plans, software, formulae, calculations or designs or any other materials or Intellectual Property are developed jointly by, Project Co or any Subcontractor and the City to the exclusion of any other party pursuant to this Project Agreement or in relation to the System Infrastructure, the Lands or Project Operations (the “**City Jointly Developed Materials**”), then the Parties hereby acknowledge and agree that the City shall be the sole and exclusive owner of all right, title and interest in and to the City Jointly Developed Materials, any Intellectual Property associated therewith and any and all Modifications thereto and Project Co shall, at the request of the City, execute such further agreements and cause the Subcontractors to execute any and all assignments, waivers of moral rights and other documents as may be reasonably required to fulfill the intent of this provision.
- (b) The City hereby grants Project Co a royalty free, non-exclusive and non-transferable license, with a right to grant sub-licences to each Subcontractor, to use the City Jointly Developed Materials during the Project Term for the sole purposes of Project Co or any Subcontractor performing its obligations under this Project Agreement or its Subcontract, as applicable. For clarity, the license granted to Project Co in accordance with this Section 49.4(b) shall not extend to any City Jointly Developed Materials.
- (c) Upon termination of this Project Agreement, all rights and licences whatsoever granted to Project Co in the Jointly Developed Materials shall automatically terminate, and Project Co shall return any and all Jointly Developed Materials in the custody or possession of Project Co to the City, in the case of the City Jointly Developed Materials.
- (d) In the event of any inconsistency between this Section 49.4 and any provision of Schedule 35 – Intellectual Property, the wording of this Section 49.4 shall prevail.

#### 49.5 Maintenance of Data

- (a) To the extent that any of the data, materials and documents referred to in this Section 49 or Schedule 35 – Intellectual Property are generated by, or maintained on, a computer or similar system, Project Co shall procure for the benefit of the City, either at no charge or at the lowest reasonable fee, the grant of a license or sub-license for any relevant software to enable the City or its nominee to access and otherwise use, subject to the payment by the City of any relevant fee) such data, materials and documents in accordance with rights granted pursuant to Schedule 35 – Intellectual Property.

- (b) For the purposes of Section 49.5(a), “use” has the meaning set out in Schedule 35 – Intellectual Property, and includes the Limited Modification Rights.
- (c) Without limiting the obligations of Project Co under Section 49.5(a), Project Co shall ensure the back-up and storage in safe custody of the data, materials and documents referred to in this Section 49 in accordance with Good Industry Practice. Project Co shall submit to the City Representative Project Co’s proposals for the back-up and storage in safe custody of such data, materials and documents and the City shall be entitled to object if the same is not in accordance with Good Industry Practice. Project Co shall comply, and shall cause all Project Co Parties to comply, with all procedures to which the City Representative has not objected. Project Co may vary its procedures for such back-up and storage subject to submitting its proposals for change to the City Representative, who shall be entitled to object on the basis set out above. Any Disputes in connection with the provisions of this Section 49.5(c) may be referred for resolution in accordance with Schedule 26 - Dispute Resolution Procedure with reference to Good Industry Practice.

#### **49.6 City Trade-Marks**

- (a) Project Co shall not:
  - (i) use any City Trade-Marks without obtaining a trade-mark license on terms and conditions mutually satisfactory to the City and Project Co, each acting reasonably; or
  - (ii) use the names or any identifying logos or otherwise of the City or the City Representative in any advertising or permit them so to be used except with the prior written consent of the City.

#### **49.7 Confidential Information**

- (a) It is expressly acknowledged and agreed that nothing in this Section 49 shall be deemed to create or convey to a Party any right, title, or interest in and/or to the Confidential Information of the other Party.

#### **49.8 Government Use of Documents**

- (a) Project Co hereby disclaims any right, title or interest of any nature whatsoever it may have in or to this Project Agreement that might prohibit or otherwise interfere with the City’s ability to use this Project Agreement in any manner desired by the City.
- (b) Project Co hereby consents to the use by the City of this Project Agreement, and any portion thereof, subject to compliance with FIPPA and to the removal by the City (in consultation with Project Co) of any information supplied in confidence to the City by Project Co in circumstances where disclosure may be refused under Section 17(1) of FIPPA.

#### **49.9 Restrictions**

- (a) The Parties hereby agree that either Party may use the Project Know-How for any purpose, provided, however, that neither Project Co nor any Subcontractor shall use the Project Know-How to the extent that such Project Know-How incorporates, references or is otherwise based on

the Project Data, the Intellectual Property Rights, the Jointly Developed Material, the Intellectual Property of the City, the Intellectual Property of any City Party or any third party provided by the City, the Confidential Information of the City, the Confidential Information of any City Party or any third party provided by the City, including the Output Specifications unless such use is otherwise permitted pursuant to this Project Agreement in order to enable Project Co and the Project Co Parties to meet Project Co's obligations under this Project Agreement.

- (b) Project Co hereby covenants and agrees that it will not make any commercial use, including use in any other request for proposal or similar procurement process, of the Project Data, the Intellectual Property Rights, the Jointly Developed Material, the Intellectual Property of the City, the Intellectual Property of any City Party or any third party provided by the City, the Confidential Information of the City, the Confidential Information of any City Party or any third party provided by the City, including the Output Specifications, or any other drawings, reports, documents, plans, formulae, calculations, manuals, or other data that was created specifically for the Project or was based upon the Project Data, the Intellectual Property Rights, the Jointly Developed Material, the Intellectual Property of the City, the Intellectual Property of any City Party provided by the City, the Confidential Information of the City, the Confidential Information of any City Party provided by the City, including the Output Specifications.
- (c) Nothing in this Section 49.9 shall be deemed to grant to any party (including any Subcontractor or any personnel thereof) any right or License in respect of any other party's or other persons' Intellectual Property.

## **50. CONFIDENTIALITY/COMMUNICATIONS**

### **50.1 Disclosure**

- (a) Subject to Sections 50.1(b), 50.1(c) and 50.2, but notwithstanding anything else in this Project Agreement to the contrary, Project Co acknowledges and agrees that, in accordance with the transparency and accountability principles of the IPFP Framework, the City has a right to disclose or publish (including on websites) this Project Agreement, any or all terms hereof, including any or all contractual submissions and other records kept in accordance with this Project Agreement, any information related to the performance of Project Co (or any Project Co Party) or any information derived from this Project Agreement or the information related to the performance of Project Co (or any Project Co Party) as the City, in its sole discretion, may consider appropriate. In exercising its discretion, the City will be guided by the principles set out in Sections 50.1(b) and 50.1(c).
- (b) The City will not disclose portions of this Project Agreement, any terms hereof, including any contractual submissions or other records kept in accordance with this Project Agreement, any information related to the performance of Project Co (or any Project Co Party) or any information derived from this Project Agreement or the information related to the performance of Project Co (or any Project Co Party) which would be exempt from disclosure under Section 17(1) of FIPPA.
- (c) Notwithstanding Section 50.1(b), but subject to Section 50.2, where a compelling public interest in the disclosure of the information clearly outweighs the public interest in limiting the disclosure of the information supplied by Project Co (or any Project Co Party), the City may disclose such information.

## **50.2 Redaction**

- (a) Prior to disclosing or publishing this Project Agreement, any terms hereof, including any contractual submissions or other records kept in accordance with this Project Agreement, any information related to the performance of Project Co (or any Project Co Party) or any information derived from this Project Agreement or the information related to the performance of Project Co (or any Project Co Party), the City shall provide to Project Co a redacted version of this Project Agreement or other documents or information to be disclosed or published, on the basis that the information so redacted constitutes information which should not be disclosed pursuant to Section 50.1(b). The Parties acknowledge and agree that the Annual Service Payment, but not the breakdown thereof, may be disclosed.
- (b) If Project Co, acting in good faith, contends that any of the information not redacted constitutes information that falls within the scope of Section 50.1(b) and, accordingly, would be exempt from disclosure under FIPPA, the dispute may be referred for resolution in accordance with Schedule 26 - Dispute Resolution Procedure, and the City shall not disclose any information in dispute until a determination is made. Any such determination shall be made with reference to the text and principles of FIPPA.

## **50.3 Disclosure to Government**

- (a) Project Co acknowledges and agrees that subject to compliance with FIPPA, the City will be free to use, disclose or publish (including on websites) any information, including Confidential Information, on such terms and in such manner as the City sees fit.
- (b) For greater certainty, Project Co acknowledges and agrees that, subject only to the removal of any information which Project Co is (or would be) entitled to refuse to disclose pursuant to section 17(1) of FIPPA, this Project Agreement, any contractual submissions or other records kept in accordance with this Project Agreement, any information related to the performance of Project Co (or any Project Co Party) or any information derived from this Project Agreement or the information related to the performance of Project Co (or any Project Co Party) are public documents and information and, as such, may be disclosed by the City.

## **50.4 *Freedom of Information and Protection of Privacy Act (Ontario)***

- (a) The Parties acknowledge and agree that FIPPA applies to the City, and that the City is required to fully comply with FIPPA.
- (b) The City shall, within the time periods provided in FIPPA for a party to exercise rights to prevent disclosure of information, advise Project Co of any request for Confidential Information that relates to Project Co (or any Project Co Party) or of the City's intention to voluntarily release any information or documents which contain Confidential Information that relates to Project Co (or any Project Co Party).

## **50.5 Use and Disclosure of Confidential Information**

- (a) Except as authorized hereunder, each Party shall hold in confidence, not disclose and not permit any person any manner of access to, whether directly or indirectly, any Confidential Information

of the other Party, provided that this Section 50 shall not restrict either Party from disclosing such Confidential Information to its professional advisors, to the extent necessary, to enable that Party to perform, to cause to be performed, or to enforce, its rights or obligations under this Project Agreement.

- (b) Project Co may:
  - (i) disclose in confidence to the Lenders and prospective Lenders, including any trustee or agent of the Lenders and the Lenders' Agent, and their respective professional advisors such Confidential Information as is reasonably required by the Lenders in connection with the raising or syndication of the financing or any sub-participation in the financing of the Works or which Project Co is obliged to supply by the terms of the Lending Agreements; and
  - (ii) disclose in confidence to any Project Co Party and their professional advisors, such Confidential Information as is necessary for the performance by that Project Co Party of that Project Co Party's obligations under this Project Agreement.
- (c) Project Co acknowledges that the City may use the Confidential Information of Project Co for purposes not specific to the Project, but for other general governmental purposes, such as development of the City's alternate procurement and financing policies and framework. the City will advise Project Co prior to using any Confidential Information of Project Co for non-Project purposes.
- (d) Subject to the foregoing, neither Party shall use, or directly or indirectly cause, authorize or permit any other person to use, any Confidential Information of the other Party except for the purposes of this Project Agreement, as permitted by this Project Agreement or as authorized by the disclosing Party in writing.
- (e) Each Party shall,
  - (i) protect all Confidential Information of the disclosing Party with the same degree of care as it uses to prevent the unauthorized use, disclosure, publication, or dissemination of its own confidential information of a similar nature or character, but in no event with less than a reasonable degree of care;
  - (ii) if legally compelled to disclose any Confidential Information,
    - (A) provide the disclosing Party with prompt Notice to that effect to allow the disclosing Party to seek any appropriate remedies and cooperate with the disclosing Party and its legal counsel; and
    - (B) disclose only that portion of the Confidential Information that it is legally required to disclose; and
  - (iii) provide Confidential Information to the disclosing Party upon demand by the disclosing Party.

Section 50.5(e)(iii) shall not apply to Confidential Information in relation to which a Party has been provided a license pursuant to Schedule 35 – Intellectual Property provided that the use of such Confidential Information is in accordance with Schedule 35 – Intellectual Property.

- (f) Without limiting the generality of this Section 50.5, Project Co shall comply with the document control and security protocol submitted by Project Co pursuant to Section 20.10 and approved by the City, which protocol shall prescribe limitations on the use, disclosure and storage of this Project Agreement and any other Confidential Information specified by the City.

## 50.6 Exceptions

- (a) Information of a Party (the “**Proprietor**”), other than Government Sensitive Information and other than Personal Information, will not be considered to be Confidential Information in the following circumstances:
- (i) the Proprietor advises the other Party to whom the information has been disclosed (the “**Confidant**”) that the information is not required to be treated as Confidential Information;
  - (ii) the information is as of Commercial Close, or becomes at any time thereafter, generally available to or accessible by the public through no fault or wrongdoing of the Confidant;
  - (iii) the information is a matter of public record or in the public domain;
  - (iv) the information was in the possession of the Confidant prior to its disclosure and the Confidant came into possession of such information without being in breach of this Project Agreement;
  - (v) the information is received by the Confidant on a non-confidential basis from a source other than the Proprietor, provided that to the best of the Confidant’s knowledge such source is not bound by a confidentiality agreement with the Proprietor or otherwise prohibited from disclosing the information to the Confidant by a contractual, legal or fiduciary obligation;
  - (vi) the information was independently developed by the Confidant without access to the Confidential Information, as evidenced by written records;
  - (vii) the information is required to be disclosed pursuant to Applicable Law, provided that the Confidant provides the Proprietor with reasonable notification and an opportunity to contest such requirement prior to disclosure;
  - (viii) the information is disclosed to the City upon a termination of this Project Agreement, pursuant to Section 46 or is otherwise required by the City for the purposes of performing (or having performed) the Project Operations, including the design or construction of the System Infrastructure, the operation, maintenance or improvement of the System Infrastructure, or any other operations or services the same as, or similar to, the Project Operations, or to exercise any right granted pursuant to Schedule 35 – Intellectual Property that survives the termination of this Project Agreement; or

- (ix) the information would not be exempt from disclosure under FIPPA.

#### **50.7 Survival of Confidentiality**

- (a) The obligations in Section 50.1 to Section 50.6 will cease on the date that is 3 years after the Termination Date and accordingly shall survive the termination of the Project Agreement.

#### **50.8 Communication and Stakeholder Engagement Obligations**

- (a) The Parties shall comply with the provisions of Schedule 18 - Communications and Stakeholder Engagement Obligations. The Revenue Vehicle Supplier shall not be required to comply with the provisions of Schedule 18 - Communications and Stakeholder Engagement Obligations.

#### **50.9 Confidentiality of Intellectual Property**

- (a) Nothing in this Section 50 shall prevent the City from exercising any right granted to the City pursuant to Schedule 35 – Intellectual Property. The City shall have the right to disclose Confidential Information of Project Co Parties when exercising the rights granted pursuant to Schedule 35 – Intellectual Property in accordance therewith.

### **51. PERSONAL INFORMATION**

#### **51.1 General**

- (a) Project Co acknowledges the importance of maintaining the confidentiality and privacy of Personal Information.
- (b) Project Co shall, and shall require each Project Co Party to, only collect, hold, process, use, store and disclose Personal Information with the prior consent of the City and: (i) shall not collect, hold, process, use or store Personal Information except to the extent necessary to perform Project Co's obligations under this Project Agreement; and (ii) shall not disclose Personal Information or otherwise permit access to or make Personal Information available to any person except as expressly permitted or instructed by the City.
- (c) Project Co shall, and shall require each Project Co Party to, at all times treat Personal Information as strictly confidential and shall comply with all applicable requirements of the Output Specifications and the requirements of Applicable Law, including FIPPA, the *Personal Information Protection and Electronic Documents Act* (Canada), and any other Canadian federal or provincial legislation now in force or that may in the future come into force governing the collection, use, disclosure and protection of personal information applicable to Project Co, each Project Co Party or to the Project Operations.
- (d) Project Co shall take all necessary and appropriate action, and shall require each Project Co Party to take all necessary and appropriate action, against any person who fails to comply with this Section 51.
- (e) Project Co shall allow the City on reasonable Notice to inspect any Personal Information in the custody or possession of Project Co or a Project Co Party and to audit Project Co and each Project Co Party's compliance with this Section 51 including the measures used by Project Co and each

Project Co Party to protect Personal Information, and otherwise promptly and properly respond to all reasonable inquiries of the City with respect to Project Co or each Project Co Party's handling of Personal Information.

- (f) Project Co shall not subcontract or delegate to any third party any of the Project Operations that involve or may involve the collection, use, storage, processing or any other handling of Personal Information without the express consent of the City and without obtaining written contractual commitments of such third party substantially the same as those of this Section 51.

## **51.2 Protection of Personal Information**

- (a) Project Co shall implement and use, and shall require each Project Co Party to implement and use, appropriate technical, organizational and physical security measures to protect Personal Information against loss, theft and unauthorized access, disclosure, copying, use, modification or disposal, and shall otherwise ensure that Project Co, the Project Co Parties, and its and their staff shall protect, secure and keep confidential any Personal Information.
- (b) Project Co shall and shall cause each Project Co Party to restrict access to Personal Information to only those authorized employees and permitted Project Co Parties that require access to such Personal Information to fulfil their job requirements in connection with the Project Operations and that are subject to obligations of confidentiality and Personal Information protection no less stringent than those of this Section 51.
- (c) Upon termination of this Project Agreement or upon request of the City, whichever comes first, Project Co shall immediately cease all use of and return to the City or, at the direction of the City, dispose of, destroy or render permanently anonymous all Personal Information, in each case using appropriate technical, organizational and physical security measures to protect Personal Information against loss, theft and unauthorized access, disclosure, copying, use or modification.
- (d) To the extent that any of the Project Operations involve or may involve destruction or disposal of Personal Information, including any disposal or destruction pursuant to Section 51.2(c), such activities shall include, at a minimum, irreversible destruction, shredding or pulverizing of all documents, records or media containing Personal Information to a size or state that ensures that the document, record or other medium is permanently destroyed and that no information contained therein can be read, reconstructed or deciphered.
- (e) Project Co shall immediately inform the City of any actual or suspected loss, theft or accidental or unauthorized access, disclosure, copying, use, modification or destruction of Personal Information by Project Co or any Project Co Party or any other breach of this Section 51.
- (f) The City may from time to time require that Project Co and any Project Co Party or member of its or their staff execute and deliver within two Business Days of such request an agreement satisfactory to the City, acting reasonably, requiring such person to keep Personal Information confidential.

## **51.3 Personal Information**

- (a) Project Co shall provide, and shall cause each Project Co Party to provide, in a timely manner, all necessary and reasonable information and co-operation to the City and to any regulatory or other governmental bodies or authorities with jurisdiction or oversight over Applicable Law governing the collection, use, disclosure and protection of personal information in connection with any investigations, audits or inquiries made by any such bodies or authorities under such legislation.
- (b) To the extent of any conflict or inconsistency between this Section 51 and any other provision of the Project Agreement, this Section 51 shall prevail.
- (c) The obligations in this Section 51 shall survive the termination of this Project Agreement.

## **52. INSURANCE AND PERFORMANCE SECURITY**

### **52.1 General Requirements**

- (a) Project Co and the City shall comply with the provisions of Schedule 24 - Insurance and Performance Security Requirements.

### **52.2 No Relief from Liabilities and Obligations**

- (a) Neither compliance nor failure to comply with the insurance provisions of this Project Agreement shall relieve Project Co or the City of their respective liabilities and obligations under this Project Agreement.

## **53. TITLE**

### **53.1 Title**

- (a) Title to each item and part of the System Infrastructure or the New Municipal Infrastructure, including any materials, supplies, equipment, facilities, parts and any other deliverable or component items, but not the risk of loss or damage or destruction thereto or thereof, shall pass to the City (or as the City may direct) upon the receipt of such item on the Lands, provided however that title to items of tangible personal property (personal property that can be seen, weighed, measured, felt or touched or that is in any way perceptible to the senses and includes computer programs, natural gas and manufactured gas) that comprise the System Infrastructure and the New Municipal Infrastructure or are to be affixed or attached to the System Infrastructure and the New Municipal Infrastructure prior to Substantial Completion shall pass to the City (or as the City may direct) at the time that such items are included in the System Infrastructure and the New Municipal Infrastructure or are to be affixed or attached to the System Infrastructure and the New Municipal Infrastructure.

## **54. INDEMNITIES**

### **54.1 Project Co Indemnities to the City**

- (a) Project Co shall indemnify and save harmless the City and City Parties and each of their respective directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any one or more of the following:

- (i) a failure by Project Co to achieve Substantial Completion by the Scheduled Substantial Completion Date;
- (ii) any physical loss of or damage to all or any part of the Lands, lands that are adjacent to the Lands (but that are not Lands), the System Infrastructure or of any part of the New Municipal Infrastructure prior to being handed over to the City pursuant to Section 25.13, or to any equipment, assets or other property related thereto;
- (iii) the death or personal injury of any person;
- (iv) any physical loss of or damage to property or assets of any third party including, for clarity, any physical loss of or damage to the System Infrastructure, or New Municipal Infrastructure after Handover to the City;
- (v) any other loss or damage of any third party (except for Injurious Affection claims under (vi)); or
- (vi) Injurious Affection claims made by third parties,  
  
in the case of Section 54.1(a)(i) to Section 54.1(a)(v), arising, directly or indirectly, out of, or in consequence of, or involving or relating to, the performance or any breach of this Project Agreement by Project Co or any act or omission of Project Co or any Project Co Party, and in the case of Section 54.1(a)(vi) arising, directly or indirectly, out of, or in consequence of, or involving or relating to, any breach of this Project Agreement by Project Co or any Project Co Party, except, in all cases, to the extent caused, or contributed to, by:
  - (vii) the breach of this Project Agreement by the City; or
  - (viii) in respect of Section 54.1(a)(i), deliberate or negligent act or omission of the City or any City Party; or
  - (ix) in respect of Sections 54.1(a)(ii), 54.1(a)(iii), 54.1(a)(iv), 54.1(a)(v) or 54.1(a)(vi), any act or omission of the City or any City Party; or
  - (x) a deliberate or negligent act or omission of a System User that results in undue interference with Project Co's performance of the Maintenance and Rehabilitation Services and Project Co has been unable to take commercially reasonable steps necessary to prevent, negate or mitigate the undue interference due to acting in accordance with a recommendation or instruction of the City or an appropriate City Party, except to the extent:
    - (A) any such deliberate or negligent act or omission is caused or contributed to by Project Co or any Project Co Party; or
    - (B) the System User is acting in accordance with a direction, recommendation or instruction of Project Co or any Project Co Party.
- (b) Project Co shall indemnify and save harmless the City and each of its directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be

suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any breach of a representation or warranty by Project Co herein.

- (c) Project Co shall indemnify and save harmless the City and each of its directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, arising out of, or involving or relating to any one or more of the following:
  - (i) the performance by Project Co of this Project Agreement not in accordance with or in breach of the requirements of any Permits, Licences, Approvals and Authorizations, Applicable Law or requirements of Governmental Authorities, or the failure of Project Co to obtain all necessary Project Co Permits, Licences, Approvals and Authorizations in accordance with this Project Agreement;
  - (ii) any Contamination on, in or under, or migrating to or from, the Lands, for which Project Co is responsible pursuant to Section 16.2; or
  - (iii) the provision of assistance by the City to Project Co pursuant to Section 9.7(e),except to the extent that such Direct Losses are caused, or contributed to, by the breach of this Project Agreement by the City or by any act or omission of the City or any City Party.
- (d) Without prejudice to the City's rights under Section 43 and any other rights under this Project Agreement, if the City exercises its step-in rights under any Direct Agreement, Project Co shall indemnify the City for all obligations of Project Co assumed by the City under the Contracts, and for all reasonable costs and expenses incurred by the City in relation to the exercise of the City's rights.
- (e) Project Co shall indemnify the City for damages suffered or incurred on account of: (i) any payment not duly made by Project Co pursuant to the terms of this Project Agreement on the due date; (ii) any overpayment to or underpayment by Project Co; or (iii) an amount determined as payable by Project Co to the City under Schedule 26 - Dispute Resolution Procedure, by payment of an amount equal to the Payment Compensation Amount calculated from the day after the date on which payment was due, the day on which overpayment was made by the City, or from the date identified (if any) applicable to an amount determined as payable by Project Co to the City under Schedule 26 - Dispute Resolution Procedure, up to and including the date of payment.
- (f) Project Co shall defend, in accordance with the procedures of Section 54.3, and indemnify and save harmless the City and City Parties and each of their respective directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any one or more of the following:
  - (i) any breach of Section 49.3;
  - (ii) any claim, suit, action or proceeding by a Person alleging that (x) any Intellectual Property Licensed or assigned to and used by the City pursuant to this Project Agreement; or (y) any Intellectual Property or other materials used by Project Co or any

Project Co Party or any Subcontractor in the performance of the Project Operations and the Project, infringes or misappropriates any Intellectual Property rights of that Person, other than where such claim, suit, action or proceeding is directly caused by,

- (A) the use of such Intellectual Property by the City not in accordance with this Project Agreement or the applicable Technical Information; or
- (B) the use of such Intellectual Property by the City in combination with other products, software or equipment not supplied by or on behalf of Project Co or the Subcontractors and not authorized by any of them;
- (iii) any claim, suit, action or proceeding by any Licensor alleging that Project Co or any Project Co Party or any Subcontractor has used any City Supplied Third Party Intellectual Property in breach of Sections 3.1(a)(ii), 3.1(b), 3.1(c) or 3.1(d) of Schedule 35 – Intellectual Property.
- (g) Without limiting and in addition to the obligations in Section 54.1(f), if, as a result of a claim under Section 54.1(f)(i) or Section 54.1(f)(ii), all or any part of any Intellectual Property Licensed or assigned to and used by the City pursuant to this Project Agreement; or any Intellectual Property or other materials used by Project Co or any Subcontractor in the performance of the Project Operations and the Project (any or all of the foregoing the “**Infringing Material**”) becomes, or in Project Co’s opinion is likely to be, enjoined from use, Project Co will:
  - (i) give notice to the City of the same; and
  - (ii) at its sole option and expense, either:
    - (A) procure for itself and the City, to the extent required, the right to continue to use the infringing element or component of the Infringing Material as contemplated in this Project Agreement; or
    - (B) modify the infringing element or component of the Infringing Material so that it is non-infringing without materially affecting the quality, performance and functionality of such infringing element or component, or replace the infringing element or component with a substitute of materially equivalent quality, performance and functionality.

## 54.2 City Indemnities to Project Co

- (a) The City shall indemnify and save harmless Project Co and the Project Co Parties and each of their respective directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any one or more of the following:
  - (i) the death or personal injury of any person arising, directly or indirectly, out of, or in consequence of, or involving or relating to, the performance or breach of this Project Agreement by the City or any act or omission of any City Party, except to the extent caused, or contributed to, by the breach of this Project Agreement by Project Co or by any act or omission of Project Co or any Project Co Party;

- (ii) any physical loss of or damage to all or any part of any property or assets of Project Co or any Project Co Party, arising, directly or indirectly, out of, or in consequence of, or involving or relating to, breach of this Project Agreement by the City or any deliberate or negligent act or omission of any City Party, except to the extent caused, or contributed to, by the breach of this Project Agreement by Project Co or by any act or omission of Project Co or any Project Co Party; and
- (iii) any physical loss of or damage to property or assets of any third party, or any other loss or damage of any third party, arising, directly or indirectly, out of, or in consequence of, or involving or relating to, breach of this Project Agreement by the City or any deliberate or negligent act or omission of any City Party, except to the extent caused, or contributed to, by the breach of this Project Agreement by Project Co or by any act or omission of Project Co or any Project Co Party,

provided that there shall be excluded from the indemnity given by the City any liability for the occurrence of risks against which Project Co is required to insure under this Project Agreement to the extent of the proceeds available or that should have been available but for a failure by Project Co to comply with its obligations to properly insure under this Project Agreement.

- (b) The City shall indemnify and save harmless Project Co and its directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any breach of a representation or warranty by the City herein.
- (c) The City shall indemnify Project Co for damages suffered or incurred on account of: (i) any payment not duly made by the City pursuant to the terms of this Project Agreement on the due date; (ii) any overpayment to or underpayment by the City; or (iii) an amount determined as payable by the City to Project Co under Schedule 26 - Dispute Resolution Procedure, by payment of an amount equal to the Payment Compensation Amount calculated from the day after the date on which payment was due, the day on which overpayment was made by Project Co, or from the date identified (if any) applicable to an amount determined as payable by the City to Project Co under Schedule 26 - Dispute Resolution Procedure, up to and including the date of payment.
- (d) The City shall indemnify and save harmless Project Co and its directors, officers, employees, agents and representatives from and against any and all Direct Losses which may be suffered, sustained, incurred or brought against them as a result of, in respect of, or arising out of any breach of a representation or warranty by the City set out in Section 5.2(a).

### 54.3 Conduct of Claims

- (a) This Section 54.3 shall apply to the conduct of claims, made by a third person against a Party having, or claiming to have, the benefit of an indemnity pursuant to this Project Agreement. The Party having, or claiming to have, the benefit of the indemnity is referred to as the “**Beneficiary**” and the Party giving the indemnity is referred to as the “**Indemnifier**”.
- (b) If the Beneficiary receives any Notice, demand, letter or other document concerning any claim for which it appears that the Beneficiary is, or may become entitled to, indemnification under this Section 54, the Beneficiary shall give written Notice to the Indemnifier as soon as reasonably

practicable and in any event within 10 Business Days of receipt of the same. Such Notice shall specify with reasonable particularity, to the extent that information is available, the factual basis for the claim and the amount of the claim.

- (c) Subject to Sections 54.3(d), 54.3(e) and 54.3(f), on the giving of such Notice by the Beneficiary, where it appears that the Beneficiary is or may be entitled to indemnification from the Indemnifier in respect of all, but not part only, of the liability arising out of the claim, the Indemnifier shall (subject to providing the Beneficiary with a secured indemnity to the Beneficiary's reasonable satisfaction against all costs and expenses that the Beneficiary may incur by reason of such action) be entitled to dispute the claim in the name of the Beneficiary at the Indemnifier's own expense and take conduct of any defence, dispute, compromise, or appeal of the claim and of any incidental negotiations. The Beneficiary shall give the Indemnifier all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. The Beneficiary shall have the right to employ separate counsel in respect of such claim and the reasonable fees and expenses of such counsel shall be to the account of the Indemnifier only where representation of both the Indemnifier and Beneficiary by common counsel would be inappropriate due to any actual or potential conflicting interests between the Indemnifier and Beneficiary.
- (d) With respect to any claim conducted by the Indemnifier:
  - (i) the Indemnifier shall keep the Beneficiary fully informed and consult with it about material elements of the conduct of the claim;
  - (ii) the Indemnifier shall not bring the name or reputation of the Beneficiary into disrepute;
  - (iii) the Indemnifier shall not pay, compromise or settle such claims without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed;
  - (iv) the Indemnifier shall not admit liability or fault to any third party without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed; and
  - (v) the Indemnifier shall use commercially reasonable efforts to have the Beneficiary named as a beneficiary under any release given by the persons bringing the claim to which this Section 54.3 relates.
- (e) The Beneficiary shall be free to pay or settle any such claim on such terms as it thinks fit and without prejudice to its rights and remedies under this Project Agreement if:
  - (i) the Indemnifier is not entitled to take conduct of the claim in accordance with Section 54.3(c);
  - (ii) the Indemnifier fails to notify the Beneficiary of its intention to take conduct of the relevant claim within 10 Business Days of the Notice from the Beneficiary under Section 54.3(b) or notifies the Beneficiary that the Indemnifier does not intend to take conduct of the claim; or
  - (iii) the Indemnifier fails to comply in any material respect with Section 54.3(d).

- (f) The Beneficiary shall be free at any time to give Notice to the Indemnifier that the Beneficiary is retaining or taking over, as the case may be, the conduct of any defence, dispute, compromise or appeal of any claim, or of any incidental negotiations, to which Section 54.3(c) applies. For greater certainty, Project Co acknowledges and agrees that where the City is the Beneficiary, the City may retain or take over such conduct in any matter involving Personal Information or any matter involving public policy. On receipt of such Notice the Indemnifier shall promptly take all steps necessary to transfer the conduct of such claim to the Beneficiary, and shall provide to the Beneficiary all relevant documentation and all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. If the Beneficiary gives any Notice pursuant to this Section 54.3(f), then the Indemnifier shall be released from any liabilities arising under the applicable indemnity hereunder in respect of the applicable claim.
- (g) If the Indemnifier pays to the Beneficiary an amount in respect of an indemnity and the Beneficiary subsequently recovers, whether by payment, discount, credit, saving, relief or other benefit or otherwise, a sum or anything else of value (the “**Recovery Amount**”) which is directly referable to the fact, matter, event or circumstances giving rise to the claim under the indemnity, the Beneficiary shall forthwith repay to the Indemnifier whichever is the lesser of:
- (i) an amount equal to the Recovery Amount less any out-of-pocket costs and expenses properly incurred by the Beneficiary in recovering the same; and
  - (ii) the amount paid to the Beneficiary by the Indemnifier in respect of the claim under the relevant indemnity,
- provided that there shall be no obligation on the Beneficiary to pursue any Recovery Amount and that the Indemnifier is repaid only to the extent that the Recovery Amount, aggregated with any sum recovered from the Indemnifier, exceeds the loss sustained by the Beneficiary except, however, that if the Beneficiary elects not to pursue a Recovery Amount, the Indemnifier shall be entitled to require an assignment to it of the right to do so.
- (h) Any person taking any of the steps contemplated by this Section 54.3 shall comply with the requirements of any insurer who may have an obligation to provide an indemnity in respect of any liability arising under this Project Agreement.

#### **54.4 Mitigation - Indemnity Claims**

- (a) For greater certainty, Section 62.4 applies to any indemnity given under this Project Agreement and any such indemnity shall not extend to Direct Losses which could have been reduced or avoided by the Beneficiary complying with such Section.

### **55. LIMITS ON LIABILITY**

#### **55.1 Indirect Losses**

- (a) Subject to Section 55.1(b), without prejudice to the City’s rights under the Payment Mechanism, or the Parties’ rights in respect of payments provided for herein, the indemnities under this Project Agreement shall not apply and there shall be no right to claim damages for breach of this

Project Agreement, in tort or on any other basis whatsoever, to the extent that any loss claimed by either Party is:

- (i) for punitive, exemplary or aggravated damages;
- (ii) for loss of profits, loss of use, loss of production, loss of business or loss of business opportunity; or
- (iii) a claim for consequential loss or for indirect loss of any nature suffered or allegedly suffered by either Party,

(collectively, “**Indirect Losses**”).

- (b) With respect to the indemnity in Section 54.1(a)(i), the exceptions in Sections 55.1(a)(ii) and (iii) shall not apply as a result of, or in relation to, the City’s loss of use of the System Infrastructure or the New Municipal Infrastructure or a portion thereof, which for the purposes of Section 54.1(a)(i), shall be Direct Losses.

## **55.2 No Liability in Tort**

- (a) Subject to the indemnities provided herein, neither the City nor any City Party shall be liable in tort to Project Co or any Project Co Party, and neither Project Co nor any Project Co Party shall be liable in tort to the City or any City Party in respect of any negligent act or omission of any such person relating to or in connection with this Project Agreement and no such person shall bring such a claim.

## **55.3 Sole Remedy**

- (a) Subject to:
  - (i) any other rights of the City expressly provided for in this Project Agreement; and
  - (ii) the City’s right to claim, on or after termination of this Project Agreement, the amount of its reasonable costs, losses, damages and expenses suffered or incurred by it as a result of rectifying or mitigating the effects of any breach of this Project Agreement by Project Co except to the extent that the same has already been recovered by the City pursuant to this Project Agreement or has been taken into account to reduce any compensation payable by the City pursuant to Section 47,

the sole remedy of the City in respect of a failure to perform the Maintenance and Rehabilitation Services in accordance with this Project Agreement shall be the operation of the Payment Mechanism.

- (b) Nothing in Section 55.3(a) shall prevent or restrict the right of the City to seek injunctive relief or a decree of specific performance or other discretionary remedies of a court of competent jurisdiction.
- (c) Notwithstanding any other provision of this Project Agreement, and except to the extent recovered under any of the insurances required pursuant to Schedule 24 - Insurance and

Performance Security Requirements, neither Party shall be entitled to recover compensation or make a claim under this Project Agreement, or any other agreement in relation to the Project, in respect of any loss that it has incurred (or any failure of the other Party) to the extent that the Party has already been compensated in respect of that loss or failure pursuant to this Project Agreement, or otherwise.

- (d) For clarity, the following shall apply with respect to the following deductions and liquidated damages set out in the Project Agreement:
- (i) the liquidated damages paid by Project Co pursuant to Section 25.4 and any amounts recovered under the indemnity in Section 54.1(a)(i) shall be the sole remedy in respect of (A) Project Co's failure to achieve Substantial Completion by the date established pursuant to Section 25.4(a) and (B) Project Co's failure to achieve Substantial Completion by the Scheduled Substantial Completion Date, but, for clarity, shall not limit the City's termination rights otherwise provided for herein;
  - (ii) the liquidated damages paid by Project Co pursuant to Section 10.4 shall be the sole financial remedy in respect of failure by Project Co to provide the Key Individuals named in Schedule 9 – Key Individuals (in respect of the Works) immediately after Commercial Close, but, for clarity, shall not be the City's sole remedy with respect to damages that may otherwise be incurred by the City with respect to a delay to the Project caused by Project Co as a result of Project Co's contravention of Section 10.4;
  - (iii) the liquidated damages paid by Project Co pursuant to Section 23.5 shall be the sole remedy in respect of Project Co's failure to obtain the minimum number of points required pursuant to Section 23.3(b) and to obtain LEED® Canada Certified 24 months after the Substantial Completion Date (where such failure is not as a direct result of any act or omission of the City or any City Party); and
  - (iv) the amounts deducted from the Substantial Completion Payment pursuant to Schedule 20 – Construction Period Payments shall not be the City's sole remedy in respect of Project Co's failure to perform in accordance with the Project Agreement.

#### 55.4 Maximum Liability

- (a) Subject to Section 55.4(b), the maximum aggregate liability of each Party, shall,
- (i) in respect of all claims under Section 54 which arise during or are in respect of the Construction Period, not exceed \$[REDACTED] (the “**Construction Period Limit**”); and
  - (ii) in respect of all claims under Section 54 which arise during or are in respect of the Maintenance Period, not exceed \$[REDACTED] (the “**Maintenance Period Limit**”),

provided that the Construction Period Limit and the claims associated therewith shall be exclusive of the Maintenance Period Limit and the claims associated therewith. The Construction Period Limit and Maintenance Period Limit shall be index linked and shall be exclusive of any insurance or performance security proceeds received or which will be received pursuant to

performance security or policies maintained in accordance with Schedule 24 - Insurance and Performance Security Requirements. Neither the Construction Period Limit nor the Maintenance Period Limit shall apply in cases of wilful misconduct or deliberate acts of wrongdoing.

- (b) Project Co's maximum aggregate liability in respect of all claims under Section 54.1(a)(i) and the liquidated damages paid by Project Co pursuant to Section 25.4 shall not exceed \$[REDACTED]. This limit shall be included within Project Co's Construction Period Limit, shall be index linked and shall be exclusive of any insurance or performance security proceeds received or which will be received pursuant to policies maintained in accordance with Schedule 24 - Insurance and Performance Security Requirements. This limit shall not apply in cases of wilful misconduct or deliberate acts of wrongdoing.
- (c) Nothing in this Section 55.4 shall restrict, limit, prejudice or in any other way impair the rights and/or remedies of the Parties under any other provision of this Project Agreement.
- (d) For clarity, nothing in this Section 55.4 shall restrict or limit, or establish any maximum liability, in respect of any amount payable, by Project Co to the City, as the Lane Closure Adjustments pursuant to Schedule 7 – Mobility Matters.

## **56. DISPUTE RESOLUTION PROCEDURE**

- (a) All Disputes shall be resolved in accordance with, and the Parties shall comply with, Schedule 26 - Dispute Resolution Procedure.

## **57. ASSIGNMENT, SUBCONTRACTING AND CHANGES IN CONTROL**

### **57.1 Project Co Assignment**

- (a) Project Co shall not assign, transfer, charge, dispose of or otherwise alienate any interest in this Project Agreement, any of the Contracts or any agreement entered into in connection with this Project Agreement without the prior written consent of the City, which shall not be unreasonably withheld or delayed, and which shall, in any event, be conditional upon Project Co paying to the City any amount calculated under Section 57.6(a)(ii) and that no assignment, transfer, charge, disposition or other alienation shall be permitted to a person where that person or its Affiliate is a Restricted Person or a person whose standing or activities may compromise (i) the City's reputation or integrity, or (ii) the nature of the public transit system in the City of Ottawa so as to affect public confidence in the public transit system in the City of Ottawa or the Project.
- (b) Section 57.1(a) shall not apply to the grant of any security for any loan made to Project Co under the Lending Agreements provided that any grantee of such security shall enter into the Lenders' Direct Agreement in relation to the exercise of its rights, if the City so requires.

### **57.2 Assignment by the City**

- (a) The City, upon providing written notice to Project Co, may assign, transfer, dispose of or otherwise alienate any interest in this Project Agreement or any agreement in connection with this Project Agreement to which Project Co and the City are parties:
  - (i) to the Province;

- (ii) as may be required to comply with Applicable Law;
  - (iii) to any minister of the Province;
  - (iv) to an agency of the Province having the legal capacity, power, authority and ability to become a party to and to perform the obligations of the City under this Project Agreement provided that such person confirms in writing to Project Co that it will perform all of the City's obligations hereunder and under the other Project Documents to which the City is party in respect of the period from and after the assignment; and
  - (v) in circumstances other than those described in Sections 57.2(a)(i) to 57.2(a)(iv), with the prior written consent of Project Co; provided that the person to whom any such assignment, transfer, disposition or other alienation is made has the capacity to perform, and confirms in writing to Project Co that it will perform all the obligations of the City hereunder and under any agreement in connection with this Project Agreement to which Project Co and the City are parties in respect of the period from and after the assignment.
- (b) The City shall not be released of any of its obligations under this Project Agreement except upon an assignment, transfer, disposition or other alienation of its interest in this Project Agreement in accordance with this Section 57.2.

### **57.3 Subcontractors**

- (a) Project Co shall not subcontract any interest in this Project Agreement, or any of the Contracts, and shall not permit the Contractors to subcontract any interest in any of the Contracts to a Restricted Person, or any Affiliate thereof, or a person whose standing or activities may compromise (i) the City's reputation or integrity, or (ii) the nature of the public transit system in the City of Ottawa so as to affect public confidence in the public transit system in the City of Ottawa or the Project.
- (b) Project Co shall not terminate, agree to the termination of or replace any Contractor unless Project Co has complied with Sections 7.2(a), 57.3(c) and 57.3(d) or received the prior written consent of the City.
- (c) Subject to Section 57.3(d), if any of the Contracts shall at any time lapse, terminate or otherwise cease to be in full force and effect, whether by reason of expiry, default or otherwise, with the effect that the Contractor, shall cease to act in relation to the Project, Project Co shall forthwith appoint a replacement, subject to the City's prior written consent, acting reasonably, as to the suitability of the replacement.
- (d) It is a condition of replacement of the Construction Contractor, Maintenance and Rehabilitation Contractor and Revenue Vehicle Supplier that, and Project Co shall require that, any replacement enter into a contract upon the same or substantially similar terms as the person so replaced and into a direct agreement on the same terms as the Direct Agreement entered into by the person so replaced, unless any material variations are approved by the City, acting reasonably.

### **57.4 Changes in Ownership and Control**

- (a) No Restricted Person or a person whose standing or activities are inconsistent with the City's reputation or integrity shall be permitted to have at any time or acquire, Direct or Indirect Power or Control over any member of the Project Co Group in relation to the decisions, management, actions or policies of Project Co or in relation to the operation, management and ownership of the Project.
- (b) No Change in Ownership of Project Co, or of any Control Party, shall be permitted:
  - (i) where the person acquiring the ownership interest is a Restricted Person or a person whose standing or activities may compromise (A) the City's reputation or integrity, or (B) the nature of the public transit system in the City of Ottawa so as to affect public confidence in the public transit system in the City of Ottawa or the Project; or
  - (ii) if such Change in Ownership would have a material adverse effect on the performance of the Project Operations, the Governmental Activities or the availability of the System Infrastructure to System Users.
- (c) In the event that a person having Direct or Indirect Power or Control over any member of the Project Co Group in relation to the decisions, management, actions or policies of Project Co or in relation to the operation, management and ownership of the Project becomes a Restricted Person, the City may:
  - (i) in the case of an individual who becomes a Restricted Person, require that such Restricted Person be divested of his or her Direct or Indirect Power or Control; or
  - (ii) in any other circumstance, require a Change in Ownership so that the Restricted Person shall be divested of its Direct or Indirect Power or Control,in each case, on such terms as are satisfactory to the City, in its discretion.
- (d) Project Co shall provide notice to the City of any Change in Ownership of Project Co or of any Control Party, as the case may be, that is not a Change in Control within 5 Business Days after such Change in Ownership, and such notice shall include:
  - (i) a statement identifying all persons with an ownership interest in Project Co or the relevant Control Party, as the case may be, and their respective holdings of such ownership interests, in each case prior to and following such Change in Ownership; and
  - (ii) a statement identifying the Excess Equity Gain arising from such Change in Ownership together with supporting calculations and documents.
- (e) Subject to Sections 57.4(a), (b) and (c) and to the payment by Project Co of any Excess Equity Gain under Section 57.6(a)(i), no Change in Control of Project Co, or of any Control Party, shall be permitted without the prior written consent of the City, not to be unreasonably withheld or delayed.
- (f) Project Co shall provide notice to the City of any proposed Change in Control of Project Co or of any Control Party, as the case may be, not less than 20 Business Days prior to such proposed Change in Control, and such notice shall include:

- (i) a statement identifying all persons with an ownership interest in Project Co or the relevant Control Party, as the case may be, and their respective holdings of such ownership interests in each case prior to and following any such proposed Change in Control;
- (ii) as applicable, the legal name, registered address, directors and officers of, and nature of the business and activities carried on by, the person who would acquire control over Project Co or the relevant Control Party pursuant to such Change in Control; and
- (iii) a statement identifying the Excess Equity Gain which would arise from such proposed Change in Control together with supporting calculations and documents.

Following the delivery to the City of the notice referred to in this Section 57.4(f), Project Co shall provide the City with such other information pertaining to the proposed Change in Control as the City may reasonably request.

- (g) Upon request by Project Co and delivery of the information required by the City, the City shall advise Project Co whether the person described in such particulars is a Restricted Person or a person whose standing or activities may compromise (A) the City's reputation or integrity, or (B) the nature of the public transit system in the City of Ottawa so as to affect public confidence in the public transit system in the City of Ottawa or the Project.
- (h) Notwithstanding the definition of "Control Parties" set out Schedule 1 – Definitions and Interpretation, this Section 57.4 shall not apply to a Change in Ownership or Change in Control of persons whose equity securities or units evidencing ownership or any other ownership interests are listed on a recognized stock exchange.

#### **57.5 City's Due Diligence**

- (a) Project Co shall promptly reimburse the City for the City's reasonable due diligence costs (including fees of professional advisors) in connection with any consent required of the City pursuant to, or the City's determination of Project Co's compliance with, Sections 57.1, 57.3 or 57.4, whether or not such consent is granted.

#### **57.6 Gain Share**

- (a) The City shall be entitled to receive a **[REDACTED]**% share of:
  - (i) any Excess Equity Gain arising from a Change in Ownership of Project Co; and
  - (ii) the amount from the proceeds of a sale of any of Project Co's assets to a third party, which sale includes an assignment, transfer, disposition of or other alienation of an interest in the Project Agreement by Project Co made in accordance with Section 57.1, that is equal to the amount that would have been payable in accordance with Section 57.6(a)(i) if such sale had proceeded as a Change in Ownership of Project Co.

For all sales of Equity Capital subsequent to the initial sale, Threshold Equity Sale Amount shall mean an Equity Sale Amount that would result in an Equity Sale IRR equal to the Equity Sale IRR of the previous sale of Equity Capital.

## 58. PROHIBITED ACTS

### 58.1 Definition

(a) The term “**Prohibited Act**” means:

- (i) offering, giving or agreeing to give to the City or any public body (or anyone employed by or acting on their behalf), or to any family member of such person, any gift or consideration of any kind as an inducement or reward:
  - (A) for doing or not doing, or for having done or not having done, any act in relation to the obtaining or performance of this Project Agreement or any other agreement with the City or any public body in connection with the Project; or
  - (B) for showing or not showing favour or disfavour to any person in relation to this Project Agreement or any other agreement with the City or any public body in connection with the Project;

provided that this Section 58.1(a)(i) shall not apply to Project Co or any Project Co Party (or anyone employed by or acting on their behalf) providing consideration to the City or any public body in the ordinary course, or as reasonably necessary, to fulfill or comply with the obligations and liabilities of Project Co under this Project Agreement or any other agreement with the City or any public body in connection with the Project;

- (ii) entering into this Project Agreement or any other agreement with the City or any public body in connection with the Project if a commission or a fee has been paid or has been agreed to be paid by Project Co, or on its behalf or to its knowledge, to the City or any public body (or anyone employed by or acting on their behalf), or to any family member of such person, unless, before the relevant agreement is entered into, particulars of any such commission or fee have been disclosed in writing to the City, provided that this Section 58.1(a)(ii) shall not apply to a fee or commission paid by Project Co or any Project Co Party (or anyone employed by or acting on their behalf) to the City or any public body pursuant to an agreement where such fee or commission is paid in the ordinary course, or as reasonably necessary, to fulfill or comply with the obligations and liabilities of Project Co under this Project Agreement or any other agreement with the City or any public body in connection with the Project without contravening the intent of this Section 58;
- (iii) breaching or committing any offence under Applicable Law in respect of corrupt or fraudulent acts in relation to this Project Agreement or any other agreement with the City or any public body in connection with the Project; or
- (iv) defrauding or attempting to defraud or conspiring to defraud the City or any other public body.

### 58.2 Remedies

- (a) If Project Co or any Project Co Party (or anyone employed by or acting on their behalf) commits any Prohibited Act, then the City shall be entitled to act in accordance with the following:

- (i) if the Prohibited Act is committed by Project Co or by an employee acting under the direction of a director or officer of Project Co, then the City may give written Notice to Project Co and Section 43 shall apply;
  - (ii) if the Prohibited Act is committed by an employee of Project Co acting independently of a direction of a director or officer of Project Co, then the City may give written Notice to Project Co and Section 43 shall apply, unless, within 30 days of receipt of such Notice, Project Co terminates the employee's employment and ensures that the relevant part of the Project Operations shall be performed by another person;
  - (iii) if a Prohibited Act is committed by a Project Co Party or by an employee of that Project Co Party not acting independently of a direction of a director or officer of that Project Co Party, then the City may give written Notice to Project Co and Section 43 shall apply, unless, within 30 days of receipt of such Notice, Project Co terminates the relevant Subcontract and ensures that the relevant part of the Project Operations shall be performed by another person, where relevant, in accordance with Section 57.3;
  - (iv) if the Prohibited Act is committed by an employee of a Project Co Party acting independently of a direction of a director or officer of that Project Co Party, then the City may give Notice to Project Co and Section 43 shall apply, unless, within 30 days of receipt of such Notice, Project Co causes the termination of the employee's employment and ensures that the relevant part of the Project Operations shall be performed by another person; and
  - (v) if the Prohibited Act is committed on behalf of Project Co or a Project Co Party by a person not specified in Sections 58.2(a)(i) to 58.2(a)(iv), then the City may give Notice to Project Co and Section 43 shall apply, unless, within 30 days of receipt of such Notice, Project Co causes the termination of such person's employment or the appointment of their employer and, if necessary, ensures that the relevant part of the Project Operations shall be performed by another person.
- (b) Any Notice of termination under this Section 58.2 shall specify:
- (i) the nature of the Prohibited Act;
  - (ii) the identity of the person whom the City believes has committed the Prohibited Act; and
  - (iii) the date of termination in accordance with the applicable provisions of this Project Agreement.
- (c) Without prejudice to its other rights or remedies under this Section 58.2, the City shall be entitled to recover from Project Co any Direct Loss sustained in consequence of any breach of this Section 58.

### **58.3 Permitted Payments**

- (a) Nothing contained in this Section 58 shall prevent Project Co or any other person from paying any proper commission, fee or bonus whether to its employees within the agreed terms of their

employment or otherwise, and such commission fee or bonus shall not constitute a Prohibited Act.

#### 58.4 Notification

- (a) Project Co shall notify the City of the occurrence and details of any Prohibited Act promptly on Project Co becoming aware of its occurrence.

#### 58.5 Replacement of Project Co Party

- (a) Where Project Co is required to replace any Project Co Party pursuant to this Section 58, the party replacing such Project Co Party shall from the time of the replacement be deemed to be a Project Co Party and the provisions of this Project Agreement shall be construed accordingly.

### 59. NOTICES

#### 59.1 Notices to Parties

- (a) All notices, requests, demands, instructions, certificates, consents and other communications (each being a “**Notice**”) required or permitted under this Project Agreement shall be in writing (whether or not “written notice” or “notice in writing” is specifically required by the applicable provision of this Project Agreement) and served by sending the same by registered mail, facsimile or by hand, as follows:

If to Project Co:

[REDACTED]

Email: [REDACTED]

Attn.: [REDACTED]

If to City of Ottawa:

City of Ottawa  
110 Laurier Ave West  
Ottawa, Ontario K1P 1J1  
Mail code: [REDACTED]

Email: [REDACTED]

Attn: [REDACTED]

#### 59.2 Notices to Representatives

- (a) In addition to the notice requirements set out in Section 59.1, where any Notice is to be provided or submitted to the City Representative or the Project Co Representative it shall be provided or submitted by sending the same by registered mail, facsimile or by hand, as follows:

If to Project Co Representative:

[REDACTED]

Email: [REDACTED]

Attn: [REDACTED]

with a copy to:

[REDACTED]

Attn: [REDACTED]

If to the City Representative:

City of Ottawa  
110 Laurier Ave West  
Ottawa, Ontario K1P 1J1  
Mail code: [REDACTED]

Email: [REDACTED]

Attn: [REDACTED]

### **59.3 Facsimile**

- (a) Where any Notice is provided or submitted to a Party via facsimile, an original of the Notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a Notice given via facsimile shall not be invalid by reason only of a Party's failure to comply with this Section 59.3.

### **59.4 Change of Address**

- (a) Either Party to this Project Agreement may, from time to time, change any of its contact information set forth in Sections 59.1 or 59.2 by prior Notice to the other Party, and such change shall be effective on the Business Day that next follows the recipient Party's receipt of such Notice unless a later effective date is given in such Notice.

### **59.5 Deemed Receipt of Notices**

- (a) Subject to Sections 59.5(b), 59.5(c) and 59.5(d):
  - (i) a Notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
  - (ii) a Notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
  - (iii) a Notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.
- (b) If the Party giving the Notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such Notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 59.

- (c) If any Notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such Notice shall be deemed to have been received by such recipient on the next Business Day.
- (d) A Notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such Notice was successful.

#### **59.6 Service on the City**

- (a) Where any Notice is required to be served on the City, the obligation to serve such Notice shall be fulfilled by serving it on the City in accordance with the provisions of this Section 59.

### **60. EMERGENCY MATTERS**

#### **60.1 Emergency**

- (a) From Financial Close until Substantial Completion Date, upon the occurrence of an Emergency, Project Co shall comply with the Emergency Response Plan.
- (b) From and after Substantial Completion Date, upon the occurrence of an Emergency, Project Co shall comply with its Emergency Response Plan in accordance with the Output Specifications.
- (c) If, in respect of any Emergency, the City notifies Project Co that it requires compliance with any additional or overriding procedures as may be determined by the City or any other statutory body, then Project Co shall, subject to Schedule 21 - Variation Procedure (if compliance with such procedures constitutes a Variation), comply with such procedures (whether such procedures are specific to the particular Emergency or of general application and on the basis that such procedures shall take precedence to the extent that they overlap with the procedures mentioned in Section 60.1(a) or (b)).

### **61. INTENTIONALLY DELETED**

### **62. GENERAL**

#### **62.1 Amendments**

- (a) This Project Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Project Agreement.

#### **62.2 Waiver**

- (a) No waiver made or given by a Party under or in connection with this Project Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect

to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.

- (b) Failure by either Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

### **62.3 Relationship Between the Parties**

- (a) The Parties are independent contractors. This Project Agreement is not intended to and does not create or establish between the Parties, or between the City and any Project Co Party, any relationship as partners, joint venturers, employer and employee, master and servant, or (except as provided in this Project Agreement), of principal and agent, and does not create or establish any relationship whatsoever between the City and any representative or employee of Project Co or the Project Co Parties.
- (b) The Parties further agree that:
  - (i) except as expressly provided in this Project Agreement, neither Party shall be, or be deemed to be, an agent of the other Party, and neither Party shall have authority hereunder to represent that it is an agent of the other Party, or to accept any order, or enter into any contract or agreement, or make any representations or warranties of any kind to any person, or to assume or create any obligation, express or deemed, on behalf of or binding, or purportedly binding upon, the other Party;
  - (ii) neither Party shall be required to make or pay employment benefits, contributions for Employment Insurance, Canada Pension Plan, Workers' Compensation Board or other similar levies with respect to any persons employed or engaged by the other Party;
  - (iii) except as otherwise expressly provided in this Project Agreement, each Party shall be free from the control of the other Party as to the manner in which it shall perform its obligations, or cause same to be performed, under this Project Agreement; and
  - (iv) any person which a Party may engage as an agent, employee, subcontractor or otherwise, to perform such Party's obligations under this Project Agreement, as permitted hereby, shall, unless the Parties otherwise agree in writing, be engaged by such Party to act solely on behalf of such Party, and such person shall not act, or be deemed to act, on behalf of the Party that did not engage its services.

### **62.4 General Duty to Mitigate**

- (a) The City and Project Co shall at all times take commercially reasonable steps to minimize and mitigate any loss for which the relevant Party is entitled to bring a claim against the other Party pursuant to this Project Agreement.

### **62.5 Actual Knowledge**

- (a) Except where limited to actual knowledge and/or such knowledge which they, at law, may from time to time, be deemed to have, Project Co and the City shall, for all purposes of this Project Agreement, be deemed to have such knowledge in respect of the Project as is actually held (or ought reasonably to be held) by the directors, officers and senior management of Project Co and in the case of the City, its directors, officers and senior management, and the City Representative or the Project Co Representative, as applicable. For clarity, except as expressly set out to the contrary, a reference in this Project Agreement to the “knowledge” of Project Co or of the City shall be construed in a manner consistent with the foregoing sentence.

#### **62.6 Entire Agreement**

- (a) Except where provided otherwise in this Project Agreement, this Project Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Project Agreement.

#### **62.7 No Reliance**

- (a) Each of the Parties acknowledge that:
  - (i) it has not entered into this Project Agreement on the basis of and does not rely, and has not relied, upon any statement or representation, whether negligent or innocent, or warranty or other provision, whether oral, written, express or implied, made or agreed to by any person, whether a Party to this Project Agreement or not, except those expressly made, given or repeated in this Project Agreement and the only remedy or remedies available in respect of any misrepresentation or untrue statement made to it shall be those expressly provided for in this Project Agreement; and
  - (ii) this Section 62.7 shall not apply to any statement, representation or warranty made fraudulently, or to any provision of this Project Agreement which was induced by fraud, for which the remedies available shall be all those available under the law governing this Project Agreement.

#### **62.8 Severability**

- (a) Each provision of this Project Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Project Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Project Agreement. If any such provision of this Project Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Project Agreement as near as possible to its original intent and effect.

#### **62.9 Enurement**

- (a) This Project Agreement and any other agreement entered into in connection with the Project to which the City and Project Co are parties shall enure to the benefit of, and be binding on, the City and Project Co and their respective successors and permitted transferees and assigns.

#### **62.10 Governing Law and Jurisdiction**

- (a) This Project Agreement, and each of the documents contemplated by or delivered under or in connection with this Project Agreement, shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) Subject to Schedule 26 - Dispute Resolution Procedure, the Parties hereby irrevocably attorn to the exclusive jurisdiction of the courts of the Province of Ontario and all courts competent to hear appeals therefrom.

#### **62.11 Cumulative Remedies**

- (a) Except as otherwise set forth in this Project Agreement, the rights, powers and remedies of each Party set forth in this Project Agreement are cumulative and are in addition to and without prejudice to any other right, power or remedy that may be available to such Party under this Project Agreement.

#### **62.12 Further Assurance**

- (a) Each Party shall do all things, from time to time, and execute all further documents necessary to give full effect to this Project Agreement.

#### **62.13 Costs**

- (a) Each Party shall be responsible for paying its own costs and expenses incurred in connection with the negotiation, preparation and execution and delivery of this Project Agreement.

#### **62.14 Language of Agreement**

- (a) Each of the parties acknowledges having requested and being satisfied that this Project Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en déclare satisfaite.
- (b) For greater certainty, all correspondence, notices, drawings, test reports, certificates, specifications, information, operating and maintenance instructions, name plates, identification labels, instructions and notices to the public and staff and all other written, printed or electronically readable matter required in accordance with, or for purposes envisaged by, this Project Agreement shall be in English.

#### **62.15 Proof of Authority**

- (a) The City and Project Co each reserve the right to require any person executing this Project Agreement on behalf of the other Party to provide proof, in a form acceptable to the City or

Project Co, as applicable, that they have the requisite authority to execute this Project Agreement on behalf of and to bind the City or Project Co, as applicable.

#### 62.16 Counterparts

- (a) This Project Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any Party providing its signature in faxed form shall promptly forward to the other Party an original signed copy of this Project Agreement which was so faxed.

#### 62.17 City Party as Third Party Beneficiaries

- (a) The provisions of Sections 6.1, 6.2(a), 6.3(a), 8.1(b), 9.2(a)(i), 9.2(a)(ii), 9.4(b), 9.5(a)(iv), 16.1(a), 20.3(h), 21.1, 33.7, 34.2(e), 54.1, and 55.2(a) and each other provision of this Project Agreement which is expressed to be for the benefit of a City Party or a City Party, as applicable, are:
  - (i) intended for the benefit of each City Party, or City Party, as applicable and, if so set out in the relevant Section, each City Party's or City Party's, as applicable, directors, officers employees, board appointees, agents and representatives, and shall be enforceable by each of such persons and his or her heirs, executors, administrators and other legal representatives (collectively, in respect of each City Party, the "**City Party Third Party Beneficiaries**", and in respect of each City Party, the "**City Third Party Beneficiaries**"); and
  - (ii) are in addition to, and not in substitution for, any other rights that the City Party Third Party Beneficiaries may have in contract or otherwise.
- (b) The City shall hold the rights and benefits of Sections 6.1, 6.2(a), 6.3(a), 8.1(b), 9.2(a)(i), 9.2(a)(ii), 9.4(b), 9.5(a)(iv), 16.1(a), 20.3(h), 21.1, 33.7, 34.2(e), 54.1, and 55.2(a) and each other provision of this Project Agreement which is to the benefit of each City Party or City Party, as applicable, in trust for and on behalf of the City Party Third Party Beneficiaries or the City Third Party Beneficiaries, as applicable, and the City hereby accepts such trust and agrees to hold the benefit of and enforce performance of such covenants on behalf of the City Party Third Party Beneficiaries or the City Third Party Beneficiaries, as applicable.

#### 62.18 Copyright Notice

- (a) The Parties acknowledge that the City is the exclusive owner of the copyright in the Project Agreement.

**IN WITNESS WHEREOF** the Parties have executed this Project Agreement as of the date first above written.

## SCHEDULE 1

### DEFINITIONS AND INTERPRETATION

1. **Definitions.** In the Project Agreement, unless the context otherwise requires, the following terms have the following meanings:
  - 1.1 “**Accessibility for Ontarians with Disabilities Act (Ontario)**” means the *Accessibility for Ontarians with Disabilities Act*, S.O. 2005, c. 11, as amended from time to time.
  - 1.2 “**Account Trustee**” has the meaning given in Schedule 28 – Insurance Trust Agreement.
  - 1.3 “**Activity**” or “**Activity Id**” shall mean an element of Work performed during the course of the Project. An Activity has an expected duration and cost requirements, and shall be the lowest level of any Works Schedule.
  - 1.4 “**Actual Relevant Insurance Cost**” has the meaning given in Section 7.1(a) of Schedule 24 - Insurance and Performance Security Requirements.
  - 1.5 “**Additional Contractor**” means any independent contractor (not being, for the avoidance of doubt, any of the Third Party Contractors or Project Co or any Project Co Party) or the City’s own forces, engaged by the City to carry out the Additional Works.
  - 1.6 “**Additional Property Interest**” has the meaning given in Schedule 33 – Lands.
  - 1.7 “**Additional Works**” means those works or services, in relation to any of the System Infrastructure which are not Works or Maintenance and Rehabilitation Services and which are to be carried out by an Additional Contractor, including works or services to be performed either before or after Substantial Completion.
  - 1.8 “**Adjacent Developments**” means any development works or like activity carried out during the Project Term by or on behalf of any third party adjacent to or which otherwise affects or may potentially affect any part of the Works, the Maintenance and Rehabilitation Services, the Lands or the System Infrastructure.
  - 1.9 “**Adjudicator**” has the meaning given in Schedule 26 - Dispute Resolution Procedure.
  - 1.10 “**Adjusted Estimated Fair Value**” has the meaning given in Schedule 22 – Compensation on Termination.
  - 1.11 “**Adjusted Highest Qualifying Tender Price**” has the meaning given in Schedule 22 – Compensation on Termination.
  - 1.12 “**Affiliate**” means an “**affiliate**” as that term is used in the *Business Corporations Act* (Ontario) and any successor legislation thereto, and, in the case of Project Co, shall include each of its unitholders, shareholders, partners or owners as the case may be.
  - 1.13 “**Aggregate Actual Lane Closures**” or “**AALC**” has the meaning given in Schedule 7 – Mobility Matters.

- 1.14 “**Aggregate Actual Lane Closure Cost**” or “**AALCC**” has the meaning given in Schedule 7 – Mobility Matters.
- 1.15 “**Airport**” means the Ottawa MacDonald Cartier International Airport in Ottawa, Canada.
- 1.16 “**Airport Authority**” means the Ottawa MacDonald Cartier International Airport Authority and its agents and representatives.
- 1.17 “**Airport Authority Construction Agreement**” has the meaning given in the Airport Authority MOU.
- 1.18 “**Airport Authority MOU**” means the “Ottawa Airport-Airport Link Memorandum of Understanding” between the Airport Authority and the City relating to the Airport Link and the Station to be built at the Airport.
- 1.19 “**Airport Authority Operating Agreement**” has the meaning given in the Airport Authority MOU.
- 1.20 “**Airport Link**” has the meaning given in Schedule 15 – Output Specifications.
- 1.21 “**Airport Link Lands**” has the meaning given in the Airport Authority MOU.
- 1.22 “**Airport Link Lands Sublease**” has the meaning given in the Airport Authority MOU.
- 1.23 “**Ancillary Documents**” means the Construction Contract; the Maintenance and Rehabilitation Contract; the Performance Security; [REDACTED]; [REDACTED]; and [REDACTED].
- 1.24 “**Annual Service Payment**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.25 “**Anticipated Final Completion Date**” has the meaning given in Section 25.9A(a) of the Project Agreement.
- 1.26 “**Anticipated New Municipal Infrastructure Components Acceptance Date**” has the meaning given in Section 25.13(c) of the Project Agreement.
- 1.27 “**Anticipated Substantial Completion Date**” has the meaning given in Section 25.4(a) of the Project Agreement.
- 1.28 “**Applicable Law**” means:
- (a) any statute or proclamation or any delegated or subordinate legislation including regulations and by-laws;
  - (b) any Authority Requirement; and

- (c) any judgment of a relevant court of law, board, arbitrator or administrative agency which is a binding precedent in the Province of Ontario,
- in each case, in force in the Province of Ontario, or otherwise binding on Project Co, any Project Co Party, the City or any City Party.
- 1.29 “**Appointed Representative**” has the meaning given in Schedule 41 – Lenders’ Direct Agreement.
- 1.30 “**Appointed Representative Notice**” has the meaning given in Schedule 41 – Lenders’ Direct Agreement.
- 1.31 “**Apprenticeship Plan**” has the meaning given in Section 20.12 of the Project Agreement.
- 1.32 “**Arbitration Act, 1991 (Ontario)**” means the *Arbitration Act, 1991*, S.O. 1991, c. 17, as amended from time to time.
- 1.33 “**Archaeological Reports**” means collectively the following reports:
- a) [REDACTED];
  - b) [REDACTED];
  - c) [REDACTED];
  - d) [REDACTED];
  - e) [REDACTED];
  - f) [REDACTED]; and
  - g) [REDACTED].
- 1.34 “**Architect**” means an architect licensed by the Ontario Association of Architects to practice in the Province of Ontario.
- 1.35 “**As-built Schedule**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.36 “**Associated Liabilities**” has the meaning given in Section 33.7(b)(iv) of the Project Agreement.
- 1.37 “**Authority Requirements**” means any order, direction, directive, request for information, policy, administrative interpretation, guideline or rule of or by any Governmental Authority.
- 1.38 “**Availability Failure**” has the meaning given in Schedule 19 - Payment Mechanism.

- 1.39 “**Background Information**” means any and all drawings, reports (including the Environmental Reports, the Archaeological Reports, the Geotechnical Reports, the Cultural Heritage Reports and the Environmental Assessments, and any other report given or otherwise referred to in the Output Specifications), studies, data, documents, or other information, given or made available to Project Co or any Project Co Party by the City or any City Party, or which was obtained from or through any other sources prior to Commercial Close.
- 1.40 “**Bank**” has the meaning given in Schedule 28 - Insurance Trust Agreement.
- 1.41 “**Bank Act (Canada)**” means the *Bank Act*, S.C. 1991, c. 46, as amended from time to time.
- 1.42 “**Bankruptcy and Insolvency Act (Canada)**” means the *Bankruptcy and Insolvency Act*, R.S.C. 1985, c. B-3, as amended from time to time.
- 1.43 “**Base Case Equity IRR**” means [REDACTED]%, which for greater certainty, is calculated on a pre-tax basis.
- 1.44 “**Base Relevant Insurance Cost**” has the meaning given in Schedule 24 - Insurance and Performance Security Requirements.
- 1.45 “**Beneficiary**” has the meaning given in Section 54.3(a) of the Project Agreement.
- 1.46 “**Board Order**” means an order, decision or directive governing the construction, modification, reconstruction, expansion, use, operation and/or maintenance of the Existing Trillium Line Assets and/or the System Infrastructure and issued by the Board of Transport Commissioners, the Canadian Transportation Commission (including the Railway Transport Committee), the National Transportation Agency of Canada and/or the Canadian Transportation Agency or any predecessor or successor board, commission, agency or committee of any of the foregoing.
- 1.47 [REDACTED]
- 1.48 “[REDACTED] **Vehicle Maintenance Contract**” has the meaning given in Schedule 15 – Output Specifications.
- 1.49 “**Bonds**” means any one or more of the Performance Bond and the Labour and Material Payment Bond described in Section 19 of Schedule 24 – Insurance and Performance Security Requirements, and, collectively, means all of them.
- 1.50 “**Blocked Accounts Agreement**” means the account control agreement to be entered into between Project Co, the City and [REDACTED] (or another account bank acceptable to Project Co and the City, acting reasonably) on or prior to Substantial Completion in substantially the same form as the Blocked Accounts Agreements (as defined in the Lending Agreements).
- 1.51 “**Business Corporations Act (Ontario)**” means that *Business Corporations Act*, R.S.O. 1990, c. B.16, as amended from time to time.

- 1.52 “**Business Day**” means any day other than Saturday, Sunday, a statutory holiday in the Province of Ontario or any day on which banks are not open for business in the City of Ottawa, Ontario.
- 1.53 “**Business Opportunities**” has the meaning given in Section 4.1(a) of the Project Agreement.
- 1.54 “**CaGBC**” means the Canadian Green Building Council.
- 1.55 “**Canadian and Industry Standards**” means, at the applicable time, those standards, practices, methods and procedures applicable to Good Industry Practice.
- 1.56 “**Canadian GAAP**” shall be deemed to be the generally accepted accounting principles from time to time approved by the Canadian Institute of Chartered Accountants, or any successor institute, applicable as at the date on which such calculation is made or required to be made in accordance with generally accepted accounting principles, as such principles may be amended or varied by International Financial Reporting Standards then in effect in Canada, in any case consistently applied from one period to the next.
- 1.57 “**Capital Expenditure**” means capital expenditure as interpreted in accordance with Canadian GAAP.
- 1.58 “**Capital Railway Rules**” has the meaning given in Schedule 15 – Output Specifications.
- 1.59 “**Carleton University**” means Carleton University and its agents and representatives.
- 1.60 “**Category 1 Utility Company**” means any one of:
- (a) [REDACTED];
  - (b) [REDACTED];
  - (c) [REDACTED];
  - (d) [REDACTED];
  - (e) [REDACTED];
  - (f) [REDACTED];
  - (g) [REDACTED];
  - (h) [REDACTED]; and
  - (i) [REDACTED].
- 1.61 “***Cemeteries Act (Revised) (Ontario)***” means the *Cemeteries Act (Revised)*, R.S.O. 1990, c. C.4, as amended from time to time.

- 1.62 “**Certificate of Recognition**” means the certification issued by IHSA to a person confirming that the health and safety management systems of such person comply with the terms, provisions and conditions of the COR Program.
- 1.63 “**Certification Services**” has the meaning given in Schedule 6 - Independent Certifier Agreement.
- 1.64 “**Certification Services Variation**” has the meaning given in Schedule 6 - Independent Certifier Agreement.
- 1.65 “**Certified H&S Inspector**” means an individual who is an employee or contractor of the IHSA and has the necessary credentials recognized by the COR Program for the purpose of such individual performing any inspections as may be required to be performed in accordance with Section 13(b) of the Project Agreement.
- 1.66 “**Change in Control**” means, with respect to a person:
- (a) any Change in Ownership, where the effect of such change is to result in control of the decisions made by or on behalf of such person subsequently being with a different entity or entities than prior to such change;
  - (b) any other change in respect of the power to elect a majority of the directors of the person or otherwise control the decisions made on behalf of such person; or
  - (c) any other change of direct or indirect power or authority through any contractual right or other power or interest with or over a person to influence, direct, cause to change or prevent from changing the approval of a decision, direction of the management, actions or policies of such person, to direct or cause the direction of the management, actions or policies of such person.
- 1.67 “**Change in Law**” means the coming into effect or repeal (without re-enactment or consolidation) in Ontario of any Applicable Law, or any amendment or variation of any Applicable Law, including any judgment of a relevant court of law which changes binding precedent in Ontario in each case after Commercial Close.
- 1.68 “**Change in Ownership**” means, with respect to a person, any change in ownership, whether beneficial or otherwise, of any of the shares or units of ownership of such person, or in the direct or indirect power to vote or transfer any of the shares or units of ownership of such person.
- 1.69 “**Changed Cost for Utilities**” means an amount equal to,
- (a) the total aggregate price actually paid by Project Co for the Eligible Utilities Costs minus any Ineligible Cost Increase; minus,
  - (b) the Original Eligible Utilities Cost.
- 1.70 “**City**” means the City of Ottawa.

- 1.71 “**City Activities**” means the provision of all governmental services and the conduct of all activities provided in connection or otherwise associated with transit and other similar services, including the operation and maintenance of a live rail transit system on the System Infrastructure corridor.
- 1.72 “**City Commissioning**” means the commissioning activities to be carried out by the City or any other person on behalf of the City in accordance with the Commissioning Plan.
- 1.73 “**City Commissioning Period**” means the period during which the City, or any other person on behalf of the City, are performing the City Commissioning.
- 1.74 “**City Default Termination Sum**” has the meaning given in Schedule 22 - Compensation on Termination.
- 1.75 “**City Design Team**” means any of the City, its agents, contractors and subcontractors of any tier and its or their directors, officers and employees, and other persons engaged in respect of design reviews, design evaluation, or design consultation processes with respect to the System Infrastructure or the City Activities, but excluding Project Co and any Project Co Party.
- 1.76 “**City Engineer**” means the engineer appointed by the City in connection with, among other things, acceptance of the New Municipal Infrastructure Work.
- 1.77 “**City Event of Default**” has the meaning given in Section 44.1(a) of the Project Agreement.
- 1.78 “**City HR Policy**” means the City’s human resources policies and guidelines, as they may be amended from time to time and provided to Project Co in writing.
- 1.79 “**City Jointly Developed Materials**” has the meaning given in Section 49.4(a) of the Project Agreement. Any reference to “**Jointly Developed Materials**” shall mean City Jointly Developed Materials.
- 1.80 “**City Party**” means any of the City’s agents, contractors and subcontractors of any tier engaged with respect to the Project Operations and its or their directors, officers and employees, including for clarity the Operator but excluding Project Co and any Project Co Party, and “**City Parties**” shall be construed accordingly.
- 1.81 “**City Permits, Licences, Approvals and Authorizations**” means those permissions, consents, approvals, certificates, permits, licences, agreements and authorizations, Utility Agreements, and Development Approvals which are the responsibility of the City to obtain as set out Schedule 32 – City Permits, Licences, Approvals and Authorizations, but for greater certainty shall not include any permission, consent, approval, certificate, permit, licence, agreement or authorization not set out in Schedule 32 – City Permits, Licences, Approvals and Authorizations but required by the terms of any such item set out in such Schedule.
- 1.82 “**City PLAA Deadline**” has the meaning given in 9.4(f) of the Project Agreement.

- 1.83 “**City Project Manager**” means the [REDACTED].
- 1.84 “**City Representative**” means the person designated as such by the City on or prior to Commercial Close and any permitted replacement.
- 1.85 “**City Reserve**” has the meaning given in Schedule 33 – Lands.
- 1.86 “**City Retained Dow’s Lake Latent Defect Responsibility**” means any Latent Defect in the Dow’s Lake Tunnel Structure.
- 1.87 “**City Retained Existing Structures Latent Defect Responsibility**” means any Latent Defect in the Existing City Retained Latent Defect Structures.
- 1.88 “**City Retained Latent Defect Responsibility**” has the meaning given in Section 16.9 of the Project Agreement.
- 1.89 “**City Road Allowance**” has the meaning given in Schedule 33 – Lands.
- 1.90 “**City Standards**” means the more recent version of (a) the standards of the City as of December 31, 2016, and (b) the standards of the City set out in Article 3 of Schedule 15-1 of the Output Specifications. For clarity, where there is a conflict, inconsistency or duplication of a standard referenced in items (a) and (b) of this definition of City Standards, the more recent standard shall apply.
- 1.91 “**City Taxes**” means taxes, or payments in lieu of taxes, imposed by the City and HST and property taxes for which the City is responsible pursuant to Section 35 of the Project Agreement.
- 1.92 “**City Third Party Beneficiaries**” has the meaning given in Section 62.17(a)(i) of the Project Agreement.
- 1.93 “**City Trade-Marks**” means any and all Trade-Marks used by the City in any manner whatsoever.
- 1.94 “**City Warranty Deliverables**” means, in respect of New Municipal Infrastructure only, each of the following:
- (a) a copy of a water wellness report prepared, stamped, signed and dated by a professional engineer licensed in the Province of Ontario for all applicable items under the heading “Sanitary, Storm and Combined Sewers”, “Watermains”, “Underground Storage Tanks/Superpipes”, “Oil Grit Separators”, and “Wet or Dry Pond or Other Stormwater Management Facilities”;
  - (b) for sanitary sewers, storm water sewers and combined sewers, four CDs/DVDs and one hard copy set, in PDF format and generated from the source electronic document and scanned from hard copies, of each of the following:
    - (i) material testing results;

- (ii) performance test results; and
    - (iii) video report and detailed written report and electronic files containing chainage-specific defect codes from a CCTV inspection, and where deficiencies have been identified by a CCTV inspection, delivery of evidence that all deficiencies have been rectified;
  - (c) for special infrastructure, five CDs/DVDs and two hard copy sets, in PDF format and generated from the source electronic document and not scanned from hard copies of each of the following:
    - (i) material testing results;
    - (ii) performance test results; and
    - (iii) video report and detailed written report and electronic files containing chainage-specific defect codes from a CCTV inspection and where all deficiencies have been identified by the CCTV inspection, delivery of evidence that all deficiencies have been rectified;
  - (d) if significant repairs were carried out by Project Co to correct any defects, deficiencies or non-compliant items in the New Municipal Infrastructure during the warranty inspection period for the New Municipal Infrastructure set out in Section 25.15 of the Project Agreement, a written certification of the New Municipal Infrastructure in a form acceptable to the City, acting reasonably, from professionals licensed in the Province of Ontario qualified to certify the specific type of work and equipment being certified, each such certificate shall be stamped, signed and dated by the licensed professional; and
  - (e) for trees, a written report on the results of an arborist inspection, conducted two years after planting, to demonstrate that trees are in good health.
- 1.95 “**Civil Remedies Act (Ontario)**” means the *Civil Remedies Act*, S.O. 2001, c.28, as amended from time to time.
- 1.96 “**CLA**” means the *Construction Lien Act* (Ontario).
- 1.97 “**Commercial Close**” means the date of the Project Agreement.
- 1.98 “**Commissioning Plan**” means the commissioning activities to be carried out by the City or any other person on behalf of the City in accordance with the Testing and Commissioning Plan.
- 1.99 “**Commissioning Tests**” means all commissioning tests:
- (a) described in Schedule 14 – Testing and Commissioning;
  - (b) required by Applicable Law, Canadian and Industry Standards or CSA Standards;

- (c) recommended by the manufacturer of any part of the System Infrastructure; and
  - (d) required to be included in the Testing and Commissioning Plan by the Independent Certifier, the City Commissioning Agent or the City Representative pursuant to Section 25.2 of the Project Agreement.
- 1.100 “**Communications System**” has the meaning given in Schedule 15-1 of the Output Specifications.
- 1.101 “**Companies’ Creditors Arrangement Act (Canada)**” means the *Companies’ Creditors Arrangement Act*, R.S.C. 1985, c. C-36, as amended from time to time.
- 1.102 “**Compensation Event**” has the meaning given in Section 39.1(a) of the Project Agreement.
- 1.103 “**Completion Holdback**” has the meaning given in Section 25.7(a) of the Project Agreement.
- 1.104 “**Complex Structure**” means any post-tensioned or pre-tensioned structure that has undergone significant structural alteration making it difficult for personnel at the Site to predict the direction of forces or likely collapse mechanism to be experienced by such structure in connection with any Demolition of all or any part of such structure.
- 1.105 “**Complex Structure Demolition**” means any Demolition where:
- (a) significant structural elements, such as girders, columns, shearwalls or slabs, or Complex Structures are being removed, de-stressed, altered or removed;
  - (b) large penetrations are being created through slabs;
  - (c) any Demolition may cause the collapse of any building or structure (or any portion thereof) and such collapse may directly impact adjacent occupied areas of a building or structure and potentially jeopardize the safety of workers, staff or the general public using such building or structure; and
  - (d) the Demolition of any building or structure (or any portion thereof) has the potential to result in any materials collapsing onto or interfering with any pedestrian right-of-way or into an occupied part of any building or structure
- 1.106 “**Conditional New Municipal Infrastructure Component Acceptance Certificate**” has the meaning given in Section 25.13(f) of the Project Agreement.
- 1.107 “**Confederation Line**” means Stage 1 of the light rail transit line under construction in Ottawa, Ontario, Canada from Tunney’s Pasture in the west end of Ottawa to Blair Road in the east end of Ottawa.
- 1.108 “**Confidant**” has the meaning given in Section 50.6(a)(i) of the Project Agreement.

- 1.109 “**Confidential Information**” means all confidential and proprietary information which is supplied by or on behalf of a Party, whether before or after Commercial Close.
- 1.110 “**Construction Activities**” means construction, rehabilitation, Reinstatement Work, rectification work, and any other aspect of the Works that:
- (a) comprises the alteration, augmenting, upgrading, construction, completion, inspection, calibration, testing or commissioning of any part of the System Infrastructure ;
  - (b) comprises the assessment of any System Infrastructure;
  - (c) may affect the structural integrity of any System Infrastructure and including any such aspect of the Works carried out as part of any Force Majeure Event, Relief Event, Variation, or Innovation Proposal accepted by the City; or
  - (d) comprises Construction Clearing and Grubbing.
- 1.111 “**Construction Certificate**” means a certificate with contents described in Attachment 2 to Appendix A of Schedule 10 – Review Procedure.
- 1.112 “**Construction Clearing and Grubbing**” means the stage of the Works in which vegetation and debris is cleared from the Lands (clearing) and a root rake or similar device is employed to remove roots remaining in the soil (grubbing).
- 1.113 “**Construction Contract**” means the construction contract between Project Co and the Construction Contractor dated on or about Financial Close.
- 1.114 “**Construction Contractor**” means [REDACTED], engaged by Project Co to perform the Works and any substitute construction contractor engaged by Project Co as may be permitted by the Project Agreement.
- 1.115 “**Construction Contractor’s Direct Agreement**” means the direct agreement between the City, Project Co, the Construction Contractor and the Construction Guarantor in the form set out in Schedule 5-1 - Construction Contractor’s Direct Agreement.
- 1.116 “**Construction Document Submittals**” has the meaning given in Section 20.3(d)(ii) of the Project Agreement.
- 1.117 “**Construction Guarantor**” means [REDACTED].
- 1.118 “**Construction Lien Act (Ontario)**” means the *Construction Lien Act*, R.S.O. 1990, c. C.30, as amended from time to time.
- 1.119 “**Construction Management Plan**” or “**CMP**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.120 “**Construction Period**” means the period of time commencing on Financial Close to and including the Final Completion.

- 1.121 “**Construction Period Complaint Protocol**” has the meaning given in Schedule 18 – Communications and Stakeholder Engagement Obligations.
- 1.122 “**Construction Period Deduction**” has the meaning given in Schedule 20 – Construction Period Payments.
- 1.123 “**Construction Period Lands**” has the meaning given in Schedule 33 – Lands.
- 1.124 “**Construction Period Limit**” has the meaning given in Section 55.4(a)(i) of the Project Agreement.
- 1.125 “**Construction Period Payment**” has the meaning given in Schedule 20 – Construction Period Payments.
- 1.126 “**Construction Period Quality Failure**” has the meaning given in Schedule 20 – Construction Period Payments.
- 1.127 “**Construction Safety Management Plan**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.128 “**Contamination**” means the presence of any Hazardous Substance in the environment, except Hazardous Substances present in the environment in concentrations below applicable standards as set by Applicable Laws. If Contamination is present in soil, surface water or groundwater, then the soil, surface water or groundwater, as applicable, containing the Contamination shall also be deemed to be Contamination for the purposes of the Project Agreement.
- 1.129 “**Contract Month**” has the meaning given in Schedule 19 - Payment Mechanism.
- 1.130 “**Contract Year**” has the meaning given in Schedule 19 - Payment Mechanism.
- 1.131 “**Contractors**” means the Construction Contractor and the Maintenance and Rehabilitation Contractor.
- 1.132 “**Contracts**” means the Construction Contract and the Maintenance and Rehabilitation Contract.
- 1.133 “**Control Party**” means:
- (a) any person with any form of direct ownership interest in Project Co;
  - (b) [REDACTED]; and
  - (c) [REDACTED].
- 1.134 “**Controlled Elements**” means any of (i) the System Infrastructure and (ii) during the Construction Period, the Site (which, for greater certainty, shall include the City Reserve to the extent it forms part of the Site).

- 1.135 “**Copyrights**” means all copyrights (registered or otherwise) and registrations and applications for registration thereof, and all rights therein provided by multinational treaties or conventions.
- 1.136 “**COR Certification**” means, in respect of a person, receipt by such person of its: (i) Certificate of Recognition; and (ii) Letter of Good Standing.
- 1.137 “**COR-Certified Construction Project Co Party**” has the meaning given in Section 9.6(a)(ii) of the Project Agreement.
- 1.138 “**COR Program**” means the national safety program known as “The Certificate of Recognition (COR™)”, being a safety program that enables persons to assess their health and safety management systems to manage risks, establish controls, and minimize the incidence of injury and illness to their workers, and being nationally trademarked and endorsed by participating members of the Canadian Federation of Construction Safety Associations, or such other national safety program approved by HMQ.
- 1.139 “**COR-Qualified Construction Project Co Party**” means one of the following:
- (a) where the Construction Contractor is a single legal entity, the Construction Contractor; or
  - (b) where the Construction Contractor is a joint venture, each member of the joint venture, or
  - (c) where the Construction Contractor is a partnership, each partner of the partnership.
- provided that each such person has current OHSAS 18001 Accreditation in good standing.
- 1.140 “**CP License**” has the meaning given in Schedule 15 – Output Specifications.
- 1.141 “**CP Rail**” means the Canadian Pacific Railway and its agents and representatives.
- 1.142 “**CPI**” means CPI-XFET for Canada, as published by Statistics Canada from time to time, or failing such publication, such other index as the Parties may agree, or as may be determined in accordance with Schedule 26 - Dispute Resolution Procedure, which most closely resembles such index.
- 1.143 “**CPI<sub>n</sub>**” is the value of CPI on January 1 of the relevant Contract Year “n”, to be determined by reference to the relevant index in the month immediately preceding the indexation date.
- 1.144 “**CPI<sub>0</sub>**” is the value of CPI on the Inflation Base Date, to be determined by reference to the relevant index in the month immediately preceding the Inflation Base Date.
- 1.145 “**Crisis Communications Plan**” has the meaning given in Schedule 18 – Communications and Stakeholder Engagement Obligations.

- 1.146 “**Critical Comment**” means any Non-Conformance or combination of Major Comments that:
- (a) In the reasonable opinion of the City, demonstrates that Project Co is performing the Works in a manner that may result in Project Co becoming unable to satisfy the requirements for Substantial Completion;
  - (b) Is persistent, ongoing or repeated; or
  - (c) In the reasonable opinion of the City, by its continued existence or through the process of rectification, would:
    - (i) result in a Critical Qualifying NCR;
    - (ii) result or is reasonably expected to result in material disruption to the public or a materially adverse disruption to traffic flow or the public transit system in the City of Ottawa;
    - (iii) prejudice or is reasonably expected to materially prejudice the performance of any Governmental Activities;
    - (iv) create or is reasonably expected to create a serious threat to the health, safety or security of any person, including any System User or City Party;
    - (v) materially increase the City’s risk or risk transfer to the City or any City Party;
    - (vi) materially adversely affect the ability of any City Party, Other Contractor or the Operator to perform their activities as permitted or contemplated by the Project Agreement;
    - (vii) materially adversely affect or change the critical path of the Project as defined in the Current Progress Works Schedule, adversely affect Project Co’s ability to achieve Substantial Completion by the Scheduled Substantial Completion Date, require a material re-sequencing of the Works or cause any delay in achieving Substantial Completion; or
    - (viii) potentially compromise (A) the reputation or integrity of the City and/or any City Party; or (B) the nature of the public transit system in the City of Ottawa so as to affect public confidence in the public transit system in the City of Ottawa or the Project.
- 1.147 “**Critical Path(s)**” has the meaning given to in Schedule 12-Works Scheduling Requirements.
- 1.148 “**Critical Qualifying NCR**” has the meaning given to it in Schedule 20 – Construction Period Payments.
- 1.149 “**Crossing Agreement**” means an agreement, entered into by a previous owner or operator of part of the railway corridor which accommodates or will accommodate the

Existing Trillium Line and/or Trillium Line Extension for the purposes of establishing terms and conditions governing crossings of the railway corridor including but not limited to a utility crossings, pedestrian crossings (at grade or grade separated) and/or roadway crossings (at grade or grade separated) which agreements were assigned to and assumed by the City pursuant to the Existing Trillium Line P&S Agreements dated December 6, 2002 and March 21, 2005 respectively and described in more detail in Section 1.1 of Schedule 33 – Lands.

- 1.150 “**Crown**” means Her Majesty the Queen.
- 1.151 “**Crown Agency Act (Ontario)**” means the *Crown Agency Act*, R.S.O. 1990, c.48, as amended from time to time.
- 1.152 “**CSA**” means the Canadian Standards Association.
- 1.153 “**CSA Standards**” means, at the applicable time, the Canadian Standards Association standards.
- 1.154 “**Cultural Heritage Reports**” means the reports set out in Appendix D to this Schedule 1 – Definitions and Interpretation and includes the following reports:
- (a) [REDACTED].
- 1.155 “**Currency Act (Canada)**” means the *Currency Act*, R.S.C., 1985, c. C-52, as amended from time to time.
- 1.156 “**Current PBS**” is, at any point in time, the latest version of the PBS which has been reviewed by the City in accordance with Schedule 10 – Review Procedure. The Current PBS shall be used for Project Co Construction Period Payment Documentation.
- 1.157 “**Custodian**” means the person appointed as Custodian pursuant to the Custody Agreement and as may be permitted pursuant to the Project Agreement.
- 1.158 “**Custody Agreement**” means the custody agreement between Project Co, the Lenders’ Agent, the City and the Custodian in the form set out in Schedule 3 - Custody Agreement.
- 1.159 “**Daily Performance Report**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.160 “**Data Room**” has the meaning given in section 2.4(1) of the RFP.
- 1.161 “**Debt Service Amount**” means, for any period, the principal and interest payable by Project Co or any Project Co Party to the Lenders in the normal course under the Lending Agreements, provided that at any time where any portion of the interest payable to the Lenders is subject to a Hedging Agreement between Project Co and a Hedge Provider, interest payable on account of such portion of interest payable to the Lenders shall be calculated based on the fixed rate payable by Project Co under such Hedging Agreement without regard to whether such fixed rate is payable directly to a Lender or to the Hedge

Provider under the relevant Hedging Agreement and all references to interest payable to the Lenders under this Project Agreement shall be construed accordingly.

- 1.162 “**Deduction**” has the meaning given in Schedule 19 - Payment Mechanism.
- 1.163 “**Defect**” means a defect or deficiency in an item that is readily apparent on reasonable inspection or described in, properly inferable, or readily discoverable from the Background Information.
- 1.164 “**Delay Event**” has the meaning given in Section 38.1(a) of the Project Agreement.
- 1.165 “**Delivered**” has the meaning given thereto in the Revenue Vehicle Supply Contract.
- 1.166 “**Demolition**” means the removal of a building or structure, as the case may be, or of any material part of a building or structure.
- 1.167 “**Design and Bid Fee**” has the meaning given in the Request for Proposals.
- 1.168 “**Design Certificate**” means a certificate with contents described in Attachment 1 to Appendix A of Schedule 10 – Review Procedure.
- 1.169 “**Design and Construction Certification Procedure**” means the process for review and issuance of Design Certificates and Construction Certificates in accordance with Schedule 10 – Review Procedure.
- 1.170 “**Design and Construction Requirements**” means the relevant specifications, standards, procedures and other requirements for the design and construction of the System Infrastructure, the New Municipal Infrastructure, final disposition of the Existing Trillium Line Assets, all as set out in Schedule 15-2 of the Output Specifications.
- 1.171 “**Design and Construction Specifications**” means the specifications as set out in Schedule 15-2 of the Output Specifications.
- 1.172 “**Design Brief**” means a narrative document to accompany Works Submittals with contents described in Schedule 10 – Review Procedure.
- 1.173 “**Design Data**” means all drawings, reports, documents, plans, software, formulae, calculations, and other data prepared or obtained by Project Co relating to the design, construction, testing or monitoring of the System Infrastructure and the New Municipal Infrastructure, but excluding Intellectual Property Rights of third parties, such as CAD software, that is used only in the process of design and construction.
- 1.174 “**Design Development Submittals**” has the meaning given in Section 20.3(d)(i) of the Project Agreement.
- 1.175 “**Design Management Plan**” or “**DMP**” has the meaning given in Schedule 11 – Integrated Management System Requirements.

- 1.176 “**Design Review Meetings**” has the meaning given in Section 20.5(a) of the Project Agreement.
- 1.177 “**Design Team**” means [REDACTED], engaged by Project Co to design the System Infrastructure and the New Municipal Infrastructure and any substitute design team engaged by Project Co as may be permitted by the Project Agreement.
- 1.178 [Not used]
- 1.179 “**Development Approval**” means development permits, building permits, zoning approvals and any other planning or development permit, consent or applicable Permits, Licences, Approvals and Authorizations required from time to time for construction of the System Infrastructure and the New Municipal Infrastructure.
- 1.180 “**Direct Agreements**” means the Construction Contractor’s Direct Agreement and the Maintenance and Rehabilitation Contractor’s Direct Agreement.
- 1.181 “**Direct Cost**” has the meaning given in Schedule 21 -Variation Procedure.
- 1.182 “**Direct Losses**” means all damage, losses, liabilities, penalties, fines, assessments, claims, actions, costs, expenses (including the cost of legal or professional services, legal costs being on a substantial indemnity basis), proceedings, demands and charges whether arising under statute, contract or at common law, except Indirect Losses.
- 1.183 “**Direct or Indirect Power or Control**” means the direct or indirect power or control over the decisions, management, actions or policies of a person, including through the direct or indirect power or control over the decisions, management, actions or policies of any persons having direct or indirect power or control over the decisions, management, actions or policies of any other person, whether through:
- (a) ownership, beneficial or otherwise, of greater than [REDACTED] percent of any of the shares, units or equity interests of a person;
  - (b) the direct or indirect power to vote any of the shares, units or equity interests of a person where an individual’s ownership, beneficial or otherwise, is equal to or exceeds [REDACTED] percent of the voting securities, units or equity interests of such person; or
  - (c) the direct or indirect power or authority to influence or direct the approval of a decision, the management, actions or policies of a person or to prevent the approval of a decision, the management, actions or policies of a person through any contractual right or other power or interest with or over a person.
- 1.184 “**Discount Rate**” has the meaning given in Schedule 22 - Compensation on Termination.

1.185 “**Discriminatory Change in Law**” means any Change in Law the effect of which is to discriminate directly against or impose additional Taxes which apply specifically to:

- (a) transit systems, including transit systems whose design, construction, financing, maintenance and rehabilitation and facilities management are procured by a contract similar to the Project Agreement in relation to other similar transit systems;
- (b) the System Infrastructure or the New Municipal Infrastructure in relation to other transit systems, including light rail transit systems;
- (c) Project Co in relation to other persons; or
- (d) Persons undertaking projects for design, construction, financing, maintenance and rehabilitation and facilities management that are procured by a contract similar to the Project Agreement in relation to other persons undertaking similar projects procured on a different basis,

except that such Change in Law shall not be a Discriminatory Change in Law:

- (e) where it is in response to any act or omission on the part of Project Co which contravenes Applicable Law (other than an act or omission rendered illegal by virtue of the Discriminatory Change in Law itself);
- (f) solely on the basis that its effect on Project Co is greater than its effect on other companies; or
- (g) where such Change in Law is a change in Taxes that affects companies generally.

1.186 “**Dispute**” has the meaning given in Schedule 26 – Dispute Resolution Procedure.

1.187 “**Dispute Resolution Procedure**” means the procedure set out in Schedule 26 - Dispute Resolution Procedure.

1.188 “**Distributions**” means distributions paid in respect of the Equity Capital permitted under Schedule 4 – Wide Equity Funding Requirements.

1.189 “**Distribution Account**” means the following account opened at the [REDACTED] in the name of Project Co:

SWIFT:	[REDACTED]
Canadian Routing Code:	[REDACTED]
Account No.:	[REDACTED]
Beneficiary Name:	[REDACTED]

1.190 “**Dow’s Lake Tunnel Structure**” means the structural system of the existing Dow’s Lake tunnel, the maintenance responsibilities of which are provided for in Attachment 8 of Appendix A to Schedule 15-3 of the Output Specifications.

- 1.191 “**Dust Control Plan**” has the meaning given in Schedule 17 – Environmental Obligations.
- 1.192 “**Early Works Agreement**” has the meaning given in Section 1.5(a) of the Project Agreement.
- 1.193 “**Earned Value**” has the meaning given in Schedule 20 – Construction Period Payments.
- 1.194 “**Economic Interest**” means any right to receive, directly or indirectly and whether in cash or in kind, a payment, repayment, fee, interest, dividend, distribution, redemption or any other consideration of benefit or value to the recipient of any nature whatsoever, but excluding wages, salaries or other employment-related benefits.
- 1.195 “**Embargo Period**” means the dates when Utility Companies do not permit works to be undertaken.
- 1.196 “**Emergency**” means any situation, event, occurrence, multiple occurrences or circumstances:
- (a) that:
    - (i) constitutes or may constitute a hazard to or jeopardizes or may jeopardize or pose a threat to health and safety of any persons (including System Users and City Parties) or any part of or the whole of the System Infrastructure;
    - (ii) causes or may cause damage or harm to property, buildings and/or equipment;
    - (iii) constitutes a hostage situation or state of emergency declared as such by the City Representative or the City (acting reasonably);
    - (iv) materially interferes with or prejudices or may materially interfere with or prejudice the safe operation of the System Infrastructure, any part of the Lands, the conduct of Project Operations, or the conduct of Governmental Activities; or
    - (v) constitutes a period of transition to or from war;and which, in the opinion of the City, requires immediate action to prevent and/or mitigate the occurrence (or risk of the occurrence) of the foregoing; or
  - (b) which gives rise to an emergency, as determined by any statutory body including (notwithstanding the generality of the foregoing) an Emergency Service Provider.
- 1.197 “**Emergency Response Plan**” means the plan to be prepared, submitted and implemented by Project Co in accordance with Schedule 15 - Output Specifications.
- 1.198 “**Emergency Service Providers**” means any Police Service, firefighting service, ambulance service, armed forces or other authority with emergency service authority

pursuant to Applicable Law which may require access to the System Infrastructure from time to time.

- 1.199 **“Enabling Works”** means that scope of work described in the City’s purchase order [REDACTED] performed by or on behalf of [REDACTED].
- 1.200 **“Encumbrances”** means the Encumbrances listed in Schedule 16 - Encumbrances and any other encumbrances deemed to be Encumbrances as described in and for the purposes set out in Section 15.2(d) of the Project Agreement.
- 1.201 **“Environmental Approvals”** means:
- (a) any authorization(s) issued by the Ontario Ministry of the Environment and Climate Change relating to the Environmental Assessments;
  - (b) the Fisheries Act Authorizations; and
  - (c) any Permits, Licences, Approvals and Authorizations relating to environmental matters.
- 1.202 **“Environmental Assessments”** means the documents listed in Appendix “B” of Schedule 1 – Definitions and Interpretation.
- 1.203 **“Environmental Law”** means all Applicable Law relating to public health or the protection of the environment or Species-at-Risk.
- 1.204 **“Environmental Management Plan”** has the meaning given in Schedule 17 – Environmental Obligations.
- 1.205 **“Environmental Manager”** has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.206 **“Environmental Reports”** means collectively, the following reports:
- (a) [REDACTED]
  - (b) [REDACTED]
  - (c) [REDACTED]
  - (d) [REDACTED]
  - (e) [REDACTED]
  - (f) [REDACTED]
  - (g) [REDACTED]
  - (h) [REDACTED]

- (i) [REDACTED]
- (j) [REDACTED]
- (k) [REDACTED]
- (l) [REDACTED]
- (m) [REDACTED]
- (n) [REDACTED]
- (o) [REDACTED]
- (p) [REDACTED]
- (q) [REDACTED]
- (r) [REDACTED]
- (s) [REDACTED]
- (t) [REDACTED]
- (u) [REDACTED]
- (v) [REDACTED]
- (w) [REDACTED]
- (x) [REDACTED]
- (y) [REDACTED]
- (z) [REDACTED]
- (aa) [REDACTED]
- (bb) [REDACTED]
- (cc) [REDACTED]
- (dd) [REDACTED]
- (ee) [REDACTED]
- (ff) [REDACTED]
- (gg) [REDACTED]

(hh) [REDACTED]  
(ii) [REDACTED]  
(jj) [REDACTED]  
(kk) [REDACTED]  
(ll) [REDACTED]  
(mm) [REDACTED]  
(nn) [REDACTED]  
(oo) [REDACTED]  
(pp) [REDACTED]  
(qq) [REDACTED]  
(rr) [REDACTED]  
(ss) [REDACTED]  
(tt) [REDACTED]  
(uu) [REDACTED]  
(vv) [REDACTED]  
(ww) [REDACTED]

(ccc) [REDACTED]  
(ddd) [REDACTED]  
(eee) [REDACTED]  
(fff) [REDACTED]

(ggg) [REDACTED]

- 1.207 **“Equity Capital”** means the aggregate (without double counting) of all subscribed share capital, shareholder loans, loans made or capital contributed to Project Co by any Affiliate of Project Co or of a Project Co Party, and other contributed capital of Project Co.
- 1.208 **“Equity Contribution Agreement”** means the equity contribution agreement date on or about the date hereof between Project Co and [REDACTED] and the Lenders’ Agent setting out, *inter alia*, the terms and conditions of the Equity Contributions.
- 1.209 **“Equity Contributions”** means the equity contributed to Project Co pursuant to the Equity Contribution Agreement.
- 1.210 **“Equity Gain”** means an amount equal to the greater of zero and the difference between:
- (a) the amount paid in consideration of the percentage of Equity Capital (as at Financial Close) sold in a particular sale of Equity Capital; and
  - (b) the amount, calculated on a pre-tax basis, paid in consideration of the percentage of Equity Capital (as at Financial Close) sold in a particular sale of Equity Capital received in full on the day of the sale of Equity Capital, taken together with all Distributions paid in respect of the Equity Capital, and taking account of the actual timing of payment of all such amounts.
- 1.211 **“Equity IRR”** means the projected internal rate of return to the Equity Provider over the full term of this Project Agreement, taking into account the aggregate of all its investments and of all Distributions made and projected to be made.
- 1.212 **“Equity Lock-Up Account”** means the following account opened at [REDACTED] in the name of Project Co:
- |                        |            |
|------------------------|------------|
| SWIFT:                 | [REDACTED] |
| Canadian Routing Code: | [REDACTED] |
| Account No.:           | [REDACTED] |
| Beneficiary Name:      | [REDACTED] |
- 1.213 **“Equity Provider”** means each of [REDACTED] and [REDACTED].
- 1.214 **“Equity Sale Amount”** means the gross amount, without taking into account any transaction costs and fees, received in consideration of a percentage of Equity Capital.
- 1.215 **“Equity Sale IRR”** means the annualized internal rate of return realized by the seller on a sale of any percentage Equity Capital, between the date on which such seller initially invests in or acquires such percentage of Equity Capital, and the date on which the sale of such percentage of Equity Capital occurs. Equity Sale IRR shall be calculated using the XIRR function in Excel, by taking into account the Equity Sale Amount, together with all Distributions received by the seller with respect to such percentage of Equity Capital, and the amount initially paid by the same seller to invest in or acquire the percentage of the

Equity Capital in question, as well as the actual timing of payment and/or receipt of all such amounts.

- 1.216 “**ESA**” means the *Endangered Species Act, 2007 (Ontario)*.
- 1.217 “**Escrow Account**” has the meaning given in Schedule 23 - Expiry Transition Procedure.
- 1.218 “**Estimate**” has the meaning given in Schedule 21 - Variation Procedure.
- 1.219 “**Estimated Fair Value**” has the meaning given in Schedule 22 - Compensation on Termination.
- 1.220 “**Event of Vandalism**” has the meaning given in Schedule 15 – Output Specifications.
- 1.221 “**Excess Equity Gain**” means an amount equal to the greater of zero and the difference between:
- (a) the Equity Sale Amount; and
  - (b) the Threshold Equity Sale Amount.
- 1.222 “**Excise Tax Act (Canada)**” means the *Excise Tax Act*, R.S.C., 1985, c. E-15, as amended from time to time.
- 1.223 “**Excusing Cause**” has the meaning given in Section 40.1(a) of the Project Agreement.
- 1.224 “**Executive Council Act (Ontario)**” means the *Executive Council Act*, R.S.O. 1990, c. E. 25, as amended from time to time.
- 1.225 “**Existing City Retained Latent Defect Structures**” means the following structures forming part of the Existing Trillium Line Assets as more fully described in Appendix “C” of Part 2 of Schedule 15-2 - Output Specifications:
- (a) [REDACTED];
  - (b) [REDACTED];
  - (c) [REDACTED];
  - (d) [REDACTED];
  - (e) [REDACTED];
- 1.226 “**Existing Contamination**” has the meaning given in Section 16.2(a) of the Project Agreement.
- 1.227 “**Existing Trillium Line**” means the approximately 8km long passenger rail line currently operated and maintained by the City of Ottawa from Bayview Station in the

north to Greenboro Station in the south. The Existing Trillium Line also has stations at Carling, Carleton and Mooney's Bay.

- 1.228 **“Existing Trillium Line Assets”** means the infrastructure, assets and systems of the Existing Trillium Line which are located in, on or adjacent to the Lands and which are handed over by the City to Project Co at the commencement of the Shutdown Period, but excluding the Existing Vehicle Fleet.
- 1.229 **“Existing Vehicle Fleet”** has the meaning given in Schedule 15-1 of the Output Specifications.
- 1.230 **“Existing Vehicle Maintenance Standard”** means the vehicle maintenance of the Existing Vehicle Fleet in accordance with (i) the [REDACTED], (ii) the LINT DMU Inspection & Safety Rules approved by Transport Canada , and (iii) the vehicle cleaning, fueling, inspections, maintenance, and field technical support regime contemplated in the [REDACTED], including the “Annex A Terms of Reference” thereto.
- 1.231 **“Existing Walkley Yard”** has the meaning given in Schedule 15-1 of the Output Specifications.
- 1.232 **“Expanded Trillium Line”** means, collectively, the Existing Trillium Line and the Trillium Line Extension.
- 1.233 **“Expert”** has the meaning given in Schedule 26 - Dispute Resolution Procedure.
- 1.234 **“Expiry Date”** means the 27<sup>th</sup> anniversary of the Scheduled Substantial Completion Date and in no event will the Expiry Date be adjusted.
- 1.235 **“Expiry Rehabilitation Costs”** has the meaning given in Schedule 23 - Expiry Transition Procedure.
- 1.236 **“Expiry Transition Amount”** has the meaning given in Schedule 23 - Expiry Transition Procedure.
- 1.237 **“Expiry Transition Procedure”** means the procedure for expiry transition described in Schedule 23 - Expiry Transition Procedure.
- 1.238 **“Expiry Transition Process Asset Preservation Work Schedule”** has the meaning given in Schedule 15 – Output Specifications.
- 1.239 **“Expiry Transition Requirements”** has the meaning given in Schedule 23 - Expiry Transition Procedure.
- 1.240 **“Expiry Transition Security”** has the meaning given in Schedule 23 - Expiry Transition Procedure.
- 1.241 **“Expiry Transition Works”** has the meaning given in Schedule 23 - Expiry Transition Procedure.

- 1.242 “**Expiry Transition Works Costs**” has the meaning given in Schedule 23 - Expiry Transition Procedure.
- 1.243 “**Extension Contractor**” has the meaning given in Schedule 36 – System Extension.
- 1.244 “**External IMS Audit**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.245 “**Facilities**” has the meaning given in Schedule 15 – Output Specifications.
- 1.246 “**Factory Acceptance Test**” or “**FAT**” has the meaning given in Schedule 14 – Testing and Commissioning.
- 1.247 “**Failure Points**” has the meaning given in Schedule 19 - Payment Mechanism.
- 1.248 “**Fare Control Service Provider**” means the Third Party Contractor responsible for supply, installation, operation and non-custodial maintenance of all fare control equipment.
- 1.249 “**Final Completion**” means the completion of the Works in accordance with the Project Agreement, including completion of all Minor Deficiencies, other than any minor work that is seasonal in nature and cannot be completed by the Final Completion Date.
- 1.250 “**Final Completion Certificate**” means the certificate to be issued by the Independent Certifier in accordance with Section 25.10 of the Project Agreement.
- 1.251 “**Final Completion Date**” means the date on which Final Completion is achieved as evidenced by the Final Completion Certificate, as such date shall be stated therein.
- 1.252 “**Final Completion Notice**” has the meaning given in Section 25.10(b) of the Project Agreement.
- 1.253 “**Final Completion Countdown Notice**” has the meaning given in Section 25.9A(a) of the Project Agreement.
- 1.254 “**Final Design Development**” or “**FDD**” has the meaning given in Schedule 10 – Review Procedure.
- 1.255 “**Final New Municipal Infrastructure Works Acceptance Certificate**” means the certificate issued by the City Engineer to Project Co confirming New Municipal Infrastructure Works Acceptance.
- 1.256 “**Final New Municipal Infrastructure Works Requirement**” has the meaning given in Section 25.13(j) of the Project Agreement.
- 1.257 “**Final New System Infrastructure Condition Report**” has the meaning given in Schedule 23 – Expiry Transition Procedure.

- 1.258 “**Financial Administration Act, R.S.O. 1990, c. F.12**” means the *Financial Administration Act*, R.S.O. 1990, c. F.12, as amended from time to time.
- 1.259 “**Financial Close**” means the first date that funding is available under the Lending Agreements.
- 1.260 “**Financial Close Target Date**” means Friday March 29, 2019, as such date may be extended in accordance with the provisions of the Project Agreement.
- 1.261 “**Financial Model**” means the computer spreadsheet model for the Project incorporating statements of Project Co’s cashflows including all expenditure, revenues, financing and taxation of the Project Operations together with the profit and loss accounts and balance sheets for Project Co throughout the Project Term accompanied by details of all assumptions, calculations and methodology used in their compilation and any other documentation necessary or desirable to operate the model.
- 1.262 “**Financial Obligations**” means the obligation to pay any application fees, third party fees, costs or charges (including all applicable taxes thereon), the provision of any letters of credit, instruments of guarantee, bonds or security deposits, or any other financial security obligations.
- 1.263 “**FIPPA**” means the *Freedom of Information and Protection of Privacy Act* (Ontario).
- 1.264 “**Fisheries Act Authorizations**” means the authorization(s) issued by Fisheries and Oceans Canada in connection with the Project, and any amendment or supplement to the authorization(s) as may be issued after Commercial Close or required in connection with the Project from time to time during the Project Term.
- 1.265 “**Float**” has the meaning given to in Schedule 12 - Works Scheduling Requirements .
- 1.266 “**Force Majeure**” has the meaning given in Section 42.1(a) of the Project Agreement.
- 1.267 “**Freedom of Information and Protection of Privacy Act (Ontario)**” means the *Freedom of Information and Protection of Privacy Act*, R.S.O. 1990, c. F.31, as amended from time to time.
- 1.268 “**Funeral, Burial and Cremations Services Act, 2002 (Ontario)**” means the *Funeral, Burial and Cremations Services Act*, S.O. 2002, c. 33, as amended from time to time.
- 1.269 “**Future Known Expansion**” includes, without limitation and subject to further approval by the City, the future works in the design of the Project listed in Article 2.9(d) of Part 1 in Schedule 15-2 of the Output Specifications.
- 1.270 “**Geotechnical Reports**” means the reports listed in Appendix E to this Schedule 1 – Definitions and Interpretation.
- 1.271 “**Good Industry Practice**” means using standards, practices, methods and procedures to a good commercial standard, conforming to Applicable Law and exercising that degree of skill and care, diligence, prudence and foresight which would reasonably and ordinarily

be expected from a qualified, skilled and experienced person engaged in a similar type of undertaking under the same or similar circumstances.

- 1.272 **“Government Sensitive Information”** means any information which is designated as such by the City from time to time, or which a reasonable person, having regard to the circumstances, would regard as sensitive, including (i) all confidential information that is designated as such by Applicable Law, and (ii) any record, the disclosure of which could be injurious to the interests of the City.
- 1.273 **“Governmental Activities”** means the provision of all governmental services and the conduct of all activities provided in connection or otherwise associated with the Lands or the System Infrastructure by any Governmental Authority or Emergency Service Provider, and includes the City Activities.
- 1.274 **“Governmental Authority”** means any federal, provincial, territorial, regional, municipal or local governmental authority, quasi-governmental authority, court, government or self-regulatory organization, commission, board, tribunal, organization, or any regulatory, administrative or other agency, or any political or other subdivision, department, or branch of any of the foregoing, having legal jurisdiction in any way over the City, any aspect of the performance of the Project Agreement, the operation of the Trillium Line Extension or the Governmental Activities, in each case to the extent it has or performs legislative, judicial, regulatory, administrative or other functions within its jurisdiction.
- 1.275 **“Guarantors”** means the Construction Guarantor and the Maintenance and Rehabilitation Guarantor.
- 1.276 **“Guideway”** has the meaning given in Schedule 15 – Output Specifications.
- 1.277 **“H&S Certification Default Event”** has the meaning given in Section 9.6(c) of the Project Agreement.
- 1.278 **“H&S Certification Maintenance Plan”** has the meaning given in Section 9.6(c)(vii)(B) of the Project Agreement.
- 1.279 **“H&S Certification Reinstatement Plan”** has the meaning given in Section 9.6(c)(vii)(B) of the Project Agreement.
- 1.280 **“H&S Construction Inspection”** has the meaning given in Section 13(b) of the Project Agreement.
- 1.281 **“H&S Construction Inspection Report”** has the meaning given in Section 13(c) of the Project Agreement.
- 1.282 **“H&S Construction Re-Inspection”** has the meaning given in Section 13(e)(ii) of the Project Agreement.
- 1.283 **“H&S Construction Re-Inspection Report”** has the meaning given in Section 13(e)(iii) of the Project Agreement.

- 1.284 “**H&S Conviction**” has the meaning given in Section 43.1(a)(xix) of the Project Agreement.
- 1.285 “**H&S Maintenance Inspection**” has the meaning given in Section 13(b) of the Project Agreement.
- 1.286 “**H&S Maintenance Inspection Report**” has the meaning given in Section 13(d) of the Project Agreement.
- 1.287 “**H&S Maintenance Re-Inspection**” has the meaning given in Section 13(e)(ii) of the Project Agreement.
- 1.288 “**H&S Maintenance Re-Inspection Report**” has the meaning given in Section 13(e)(iv) of the Project Agreement.
- 1.289 “**Handover**” means, as applicable, the successful handover, by Project Co of,
- (a) the New Municipal Infrastructure, or a component thereof, to the City in accordance with Section 25.13 of the Project Agreement including, for clarity, the delivery of the Final New Municipal Works Acceptance Certificate by the City Engineer to Project Co in accordance with Section 25.13(i) of the Project Agreement; or
  - (b) the New Utility Infrastructure to the Utility Companies and in accordance with the requirements agreed to between Project Co and the Utility Companies.
- 1.290 “**Has Knowledge**” or “**Have Knowledge**” means:
- (a) a natural person knows or has knowledge when information is received or acquired by the person under the circumstances in which a reasonable person would take cognizance of it; and
  - (b) corporation knows or has knowledge when information has been received or has come to the attention of:
    - (i) a director or officer of the corporation; or
    - (ii) a senior employee of the corporation with responsibility for matters to which the information relates,
  - (c) the City knows or has knowledge when information has been received or has come to the attention of:
    - (i) [REDACTED];
    - (ii) [REDACTED]; or
    - (iii) [REDACTED];

under circumstances in which a reasonable person would take cognizance of it and, in the case of Project Co, shall include matters referred to in subparagraph (a) or (b) above with respect to the Contractors, and “**Knowledge**” has a corresponding meaning.

- 1.291 “**Hazardous Substances**” means any contaminant, pollutant, dangerous substance, toxic substance, liquid waste, industrial waste, gaseous waste, hauled liquid waste, hazardous material, or hazardous substance as defined or identified pursuant to any Applicable Law.
- 1.292 “**Health and Safety Certification Maintenance Plan**” has the meaning given in Section 9.6(b)(iv)(B) of the Project Agreement.
- 1.293 “**Health and Safety Certification Reinstatement Plan**” has the meaning given in Section 9.6(b)(iii)(B) of the Project Agreement.
- 1.294 “**Hedge Provider**” means a person that has entered into a Hedging Agreement with Project Co pursuant to the Lending Agreements, together with their successors and permitted assigns.
- 1.295 “**Hedging Agreement**” means an agreement relating to the hedging of interest rate risk entered into by Project Co and the Hedge Provider(s) pursuant to the Lending Agreements.
- 1.296 “**HST**” means the value-added tax imposed pursuant to Part IX of the *Excise Tax Act* (Canada), and any successor legislation thereto.
- 1.297 “**IHSA**” means Infrastructure Health and Safety Association, a not-for-profit occupational safety organization formed on January 1, 2010 that provides health and safety training material and services to Ontario construction, electrical utilities and transportation industries, and is accredited in Ontario to issue and grant Certificates of Recognition and Letters of Good Standing, or such other person so accredited in Ontario to issue and grant Certificates of Recognition and Letters of Good Standing.
- 1.298 “**IMS Audit**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.299 “**Initial Capital Investment Date**” has the meaning given in Schedule 20 – Construction Period Payments.
- 1.300 “**Income Tax Act (Canada)**” means the *Income Tax Act*, R.S.C., 1985, c. 1, as amended from time to time.
- 1.301 “**Income Tax Act (Ontario)**” means the *Income Tax Act*, R.S.O. 1990, c. I.2, as amended from time to time.
- 1.302 “**Indemnifiable Taxes**” has the meaning given in Section 33.7(b)(iii) of the Project Agreement.
- 1.303 “**Indemnifier**” has the meaning given in Section 54.3(a) of the Project Agreement.

- 1.304 “**Independent Certifier**” means the person appointed as the Independent Certifier pursuant to the Independent Certifier Agreement and as may be permitted pursuant to the Project Agreement.
- 1.305 “**Independent Certifier Agreement**” means the contract entered into between Project Co, the City and the Independent Certifier in substantially the form attached hereto as Schedule 6 - Independent Certifier Agreement.
- 1.306 “**Independent Inspector**” has the meaning given in Schedule 23 - Expiry Transition Procedure.
- 1.307 “**Independent Safety Assessor**” means an independent party appointed by Project Co to assess:
- (a) the safety and security of the Works prior to Substantial Completion; and
  - (b) changes to System Infrastructure after Substantial Completion, if any.
- 1.308 “**Indirect Losses**” has the meaning given in Section 55.1(a) of the Project Agreement.
- 1.309 “**Inflation Base Date**” has the meaning given in Schedule 19 - Payment Mechanism.
- 1.310 “**Injurious Affection**” has the meaning given in the *Expropriations Act*, R.S.O. 1990, c. E. 26, as amended from time to time.
- 1.311 “**Innovation Proposal**” has the meaning given in Section 37.2(b) of the Project Agreement.
- 1.312 “**IPFP Framework**” means the alternative financing and procurement project framework which complies with the principles set out in *MOI’s Building a Better Tomorrow: An Infrastructure Planning, Financing and Procurement Framework for Ontario’s Public Sector*.
- 1.313 “**Inspection and Test Plan**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.314 “**Insurance Adjustment**” has the meaning given in Section 7.3 of Schedule 24 - Insurance and Performance Security Requirements.
- 1.315 “**Insurance Cost Differential**” has the meaning given in Section 7.1(c) of Schedule 24 - Insurance and Performance Security Requirements.
- 1.316 “**Insurance Policies**” has the meaning given in Schedule 28 - Insurance Trust Agreement.
- 1.317 “**Insurance Proceeds**” has the meaning given in Schedule 28 - Insurance Trust Agreement.

- 1.318 “**Insurance Review Date**” has the meaning given in Schedule 24 - Insurance and Performance Security Requirements.
- 1.319 “**Insurance Review Period**” has the meaning given in Schedule 24 - Insurance and Performance Security Requirements.
- 1.320 “**Insurance Trust Account**” means Account No. [REDACTED] at [REDACTED].
- 1.321 “**Insurance Trust Agreement**” means the insurance trust agreement to be entered into between the City, Project Co, the Lenders’ Agent and the Account Trustee in the form set out in Schedule 28 - Insurance Trust Agreement.
- 1.322 “**Integrated Management Plans**” or “**IMP**” have the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.323 “**Integrated Management System**” and “**IMS**” have the meanings given in Schedule 11 – Integrated Management System Requirements.
- 1.324 “**Integrated System Extension**” has the meaning given in Schedule 36 – System Extension.
- 1.325 “**Intellectual Property**” means all intellectual and industrial property, including without limitation: (i) Trade-Marks; (ii) Patents; (iii) Copyrights; (iv) inventions, whether or not patentable, whether or not reduced to practice or whether or not yet made the subject of a pending patent application or applications; (v) ideas and conceptions of potentially patentable subject matter, including, without limitation, any patent disclosures, whether or not reduced to practice and whether or not yet made the subject of a pending patent application or applications; (vi) trade secrets and confidential, technical or business information (including ideas, formulas, compositions, designs, inventions, and conceptions of inventions whether patentable or unpatentable and whether or not reduced to practice); (vii) whether or not confidential, technology (including know-how and show-how), manufacturing and production processes and techniques, methodologies, research and development information, drawings, specifications, designs, plans, proposals, technical data, copyrightable works, marketing and business data, pricing and cost information, business and marketing plans; (xiv) copies and tangible embodiments of all the foregoing, in whatever form or medium; (ix) all rights to obtain and rights to apply for any of the foregoing and all rights therein provided by multinational treaties or conventions; (x) all rights under any agreements or instruments with respect to items in (i) to (ix) above; and (xi) all rights to sue and recover and retain damages and costs and attorneys’ fees for present and past infringement or other violation of any of the intellectual property rights hereinabove set out.
- 1.326 “**Intellectual Property Rights**” means all right, title and interest in, to and under the Intellectual Property in or associated with the Project Data and all Intellectual Property which, or the subject matter of which, is at any time before or after Commercial Close created, brought into existence, acquired, used or intended to be used by Project Co, any Subcontractor or by other third parties (for such third parties’ use by or on behalf of or for the benefit of Project Co) for any or all of the purposes of:

- (a) the Works, including the design and construction of the System Infrastructure (excluding Intellectual Property Rights of third parties, such as CAD software, that is used only in the process of design and construction);
  - (b) the Maintenance and Rehabilitation Services, including the maintenance, improvement, testing and rehabilitation of the System Infrastructure;
  - (c) any other Project Operations; or
  - (d) the Project Agreement.
- 1.327 **“Interim Maintenance Period”** has the meaning given in Section 7 of Schedule 19 – Payment Mechanism.
- 1.328 **“Interim Substantial Completion”** means the point at which (i) the System Infrastructure, the New Municipal Infrastructure, the New Utility Infrastructure have been completed in accordance with the Project Agreement; (ii) the Payment Certifier appointed pursuant to Section 15.3(g) of the Project Agreement has certified the substantial performance of the Construction Contract and the related certificate of substantial performance of the Works is published pursuant to Section 32(1) of the CLA; and (iii) all requirements for Readiness for Revenue Service described in Schedule 14 – Testing and Commissioning have been satisfied in respect of the System Infrastructure and the New Municipal Infrastructure as a whole, in each case, other than in respect of Minor Deficiencies and Remaining Works. For clarity, Interim Substantial Completion shall include the successful completion of the SIT required to verify the System Infrastructure will: comply with the AODA/ADA requirements relative to the New Revenue Vehicles; comply with all the required clearances relative to the New Revenue Vehicles.
- 1.329 **“Interim Substantial Completion Certificate”** means, following the delivery of the Interim Substantial Completion Notice, the certificate to be issued by the Independent Certifier in accordance with Section 25.3 of the Project Agreement.
- 1.330 **“Interim Substantial Completion Date”** means the date on which Interim Substantial Completion is achieved as evidenced by the Interim Substantial Completion Certificate, as such date shall be stated therein.
- 1.331 **“Internal IMS Audit”** has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.332 **“International Financial Reporting Standards”** means international financial reporting standards within the meaning of the IAS Regulation 1606/2002 and in effect from time to time, consistently applied.
- 1.333 **“ISO 45001 Accreditation”** means, in respect of an entity, such entity having received certification in respect of its health and safety management systems that such systems comply with the requirements of ISO 45001.

- 1.334 **“ISO 45001 Compliant Maintenance and Rehabilitation Project Co Party”** means one of the following:
- (a) where the Maintenance and Rehabilitation Contractor is a single legal entity, the Maintenance and Rehabilitation Contractor; or
  - (b) where the Maintenance and Rehabilitation Contractor is a joint venture, each member of the joint venture; or
  - (c) where the Maintenance and Rehabilitation Contractor is a partnership, each partner of the partnership.
- 1.335 **“ISO 45001 Accredited Maintenance and Rehabilitation Project Co Party”** has the meaning given in Section 9.6(b)(ii) of the Project Agreement.
- 1.336 **“Joint Insurance Cost Report”** has the meaning given in Schedule 24 - Insurance and Performance Security Requirements.
- 1.337 **Key Individual**” means those Project Co Parties listed in Schedule 9 - Key Individuals.
- 1.338 **Key Works Milestones**” has the meaning given in Schedule 12 - Works Scheduling Requirements.
- 1.339 **“Labour and Material Payment Bond”** means, collectively, the Labour and Material Payment Bond and the Multiple Obligee Rider to Labour and Material Payment Bond in the form attached as Appendix C to Schedule 24 – Insurance and Performance Security Requirements.
- 1.340 **“Lands”** has the meaning given in Schedule 33 – Lands.
- 1.341 **“Lands Table”** has the meaning given in Schedule 33 – Lands.
- 1.342 **“Lane Closure”** has the meaning given in Schedule 7 – Mobility Matters.
- 1.343 **“Lane Closure Adjustment”** has the meaning given in Schedule 7 – Mobility Matters.
- 1.344 **“Lane Closure Target Letter”** has the meaning given in Schedule 7 – Mobility Matters.
- 1.345 **“Latent Defect”** means a shortcoming, failure, fault, inadequacy, weakness, deficiency or imperfection whether caused by inappropriate or inadequate design, construction, installation, affixation or material, lack of or improper maintenance, negligence or wilful damage by a third party that is not visible or readily apparent through normal inspection, investigation or use or that is not properly inferable from the age and prior use of the item; provided that: (i) any condition described in, properly inferable, readily apparent or readily discoverable from the Background Information; (ii) any condition that (A) is attributable to the failure by Project Co to perform the Project Operations in accordance with the Project Agreement, (B) is caused by Project Co or any Project Co Party, or (C) is attributable to Project Co’s design or construction means and methods, shall not constitute a Latent Defect.

- 1.346 “**LEED**” means Leadership in Energy & Environmental Design.
- 1.347 “**LEED Rating System**” means the CaGBC’s Leadership in Energy & Environmental Design (LEED) Green Building Rating System for New Construction and Major Renovations, LEED® Canada-NC 2009.
- 1.348 “**Lenders**” means any or all of the persons acting arm’s length to Project Co and each Project Co Party who provide the financing, and for greater clarity, excludes the Hedge Provider(s) or any other hedge providers and their respective permitted successors and assigns and any Affiliate of Project Co or a Project Co Party.
- 1.349 “**Lenders’ Agent**” has the meaning given in Schedule 41 – Lenders’ Direct Agreement.
- 1.350 “**Lenders’ Consultant**” means [REDACTED].
- 1.351 “**Lenders’ Direct Agreement**” means the direct agreement to be entered into between the City, the Lenders’ Agent and Project Co in the form set out in Schedule 41 - Lenders’ Direct Agreement.
- 1.352 “**Lending Agreements**” means any or all of the agreements or instruments to be entered into by Project Co or any of its Affiliates relating to the financing of the Project Scope, including, for greater certainty, any interest rate hedging arrangements entered into between Project Co and any hedge providers in connection with the foregoing and any agreements or instruments to be entered into by Project Co or any of its Affiliates relating to the rescheduling of their indebtedness in respect of the financing of the Works or the refinancing of the Works.
- 1.353 “**Letter of Credit**” means the letter or letters of credit delivered in accordance with Section 9.1(2) of the Request for Proposals.
- 1.354 “**Letter of Credit Provider**” has the meaning given in the Request for Proposals.
- 1.355 “**Letter of Good Standing**” means the document issued by IHSA to a person confirming that the internal maintenance audit performed by such person regarding its health and safety management systems has been approved by ISHA, and that such person has successfully completed such internal audit pursuant to the terms and conditions of the COR Program.
- 1.356 “**Line Replaceable Unit**” means a modular component which is removed and replaced at the field level to restore the end item to an operational ready condition.
- 1.357 “**Limited Modification Rights**” has the meaning given in Schedule 35 – Intellectual Property.
- 1.358 “**Limitations Act, 2002 (Ontario)**” means the *Limitations Act*, 2002, S.O. 2002, c. 24, Sch. B, as amended from time to time.
- 1.359 “**Listed PLAA Tracking System**” has the meaning given in Section 9.4(h) of the Project Agreement.

- 1.360 “**Listed Project Co PLAAs**” means those Project Co Permits, Licences, Approvals and Authorizations listed in Appendix F to this Schedule 1 – Definitions and Interpretation.
- 1.361 “**Liquid Market**” has the meaning given in Schedule 22 - Compensation on Termination.
- 1.362 “**Load-Path Diagram**” means a graphically illustrated diagram that indicates in all relevant detail (including by use of colour-coded arrows indicating the directions of forces caused by dead loads, live loads, vertical loads and lateral loads) how the structural loads are transferred throughout a building or structure that is to be the subject of a Demolition.
- 1.363 “**Longstop Date**” has the meaning given in Section 43.1(a)(ii) of the Project Agreement.
- 1.364 “**Look-ahead Schedule**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.365 “**Maintenance and Rehabilitation Contract**” means the agreement between Project Co and the Maintenance and Rehabilitation Contractor or such other party as shall be approved by the City to perform the Maintenance and Rehabilitation Services with respect to the System Infrastructure.
- 1.366 “**Maintenance and Rehabilitation Contractor**” means [REDACTED] engaged by Project Co to perform the Maintenance and Rehabilitation Services and any substitute person engaged by Project Co to perform such work as may be permitted by the Project Agreement.
- 1.367 “**Maintenance and Rehabilitation Contractor’s Direct Agreement**” means the direct agreement to be entered into amongst the City, the Maintenance and Rehabilitation Contractor and the Maintenance and Rehabilitation Guarantor, in the form set out in Schedule 5-2 – Maintenance and Rehabilitation Contractor’s Direct Agreement.
- 1.368 “**Maintenance and Rehabilitation Guarantor**” means [REDACTED].
- 1.369 “**Maintenance and Rehabilitation Plan**” has the meaning given in Schedule 15-1 of the Output Specifications.
- 1.370 “**Maintenance and Rehabilitation Management Plan**” or “**M&RMP**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.371 “**Maintenance and Rehabilitation Requirements**” means the maintenance and rehabilitation requirements as set out in Schedule 15-3 of the Output Specifications.
- 1.372 “**Maintenance and Rehabilitation Services**” has the meaning given in Schedule 15-1 of the Output Specifications, as such work and services may from time to time be varied in accordance with the Project Agreement, but specifically excluding Governmental Activities and the Works.
- 1.373 “**Maintenance and Rehabilitation Submittals**” has the meaning given in Section 1.1 of Part B of Schedule 10 – Review Procedure.

- 1.374 “**Maintenance Committee**” has the meaning given in Section 12.1(a) of the Project Agreement.
- 1.375 “**Maintenance Period**” means the period from the Substantial Completion Date and expiring at midnight on the Termination Date.
- 1.376 “**Maintenance Period Limit**” has the meaning given in Section 55.4(a)(ii) of the Project Agreement.
- 1.377 “**Maintenance Plan**” has the meaning given in Schedule 15 – Output Specifications.
- 1.378 “**Maintenance Vehicles**” has the meaning given in Schedule 15 – Output Specifications”.
- 1.379 “**Major Comment**” means any Non-Conformance that:
- (a) contains significant deficiencies;
  - (b) is reasonably expected to result in a Medium Qualifying NCR; or
  - (c) the continued existence of which is reasonably expected to result in Project Co being unable to satisfy the requirements of Substantial Completion by the Longstop Date.
- 1.380 “**Major Maintenance Schedule**” has the meaning given in Section 16.5(c) of the Project Agreement.
- 1.381 “**Make Good**”, “**Made Good**” and derivatives thereof, means repairing, restoring, refurbishing, rehabilitating or performing filling operation on the Works as required under the Project Agreement or any existing components disturbed due to the Works, to at least the condition existing at the commencement of the Works, in terms of construction integrity, finishes, alignment with existing adjoining surfaces, compatibility of materials, sound attenuation criteria, exfiltration/infiltration requirements, air/vapour barrier and thermal continuity.
- 1.382 “**Maximum Service Payment**” has the meaning given in Schedule 22 - Compensation on Termination.
- 1.383 “**Medium Qualifying NCR**” has the meaning given to it in Schedule 20 – Construction Period Payments.
- 1.384 “**Milestone**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.385 “**Minimum Required Fleet**” has the meaning given in Schedule 15-1 – Output Specifications: Technical Terms and Reference Documents.
- 1.386 “**Minor Deficiencies**” means any defects, deficiencies and items of outstanding work (including in relation to seasonal work) arising from or related to the work required to achieve Substantial Completion, and that would not materially impair:

- (a) the public's, System Users', or the City's use and enjoyment of the System Infrastructure or any third parties use and enjoyment of their respective System Infrastructure (including any City Commissioning);
- (b) the performance of the Governmental Activities;
- (c) the performance of the Maintenance and Rehabilitation Services by Project Co;
- (d) safety, security, or traffic flow on the System Infrastructure in any relevant respect.

For greater certainty Minor Deficiencies shall not be applicable to nor shall Minor Deficiencies include defects, deficiencies and items of outstanding work arising from or related to the supply of the New Revenue Vehicles.

1.387 **"Minor Deficiencies List"** has the meaning given in Section 25.7(a) of the Project Agreement.

1.388 **"Minor Comment"** means any Non-Conformance that:

- (a) generally conforms to the requirements of the Project Agreement, but in which immaterial deficiencies have been found; or
- (b) the continued existence of which is not reasonably expected to result in Project Co becoming unable to satisfy the requirements for Substantial Completion but may result in a Minor Deficiency.

1.389 **"Minor System User Contamination"** means Contamination where the costs of clean up or remediation shall not exceed \$[REDACTED] on a per occurrence basis (and not in the aggregate).

1.390 **"Mislocated Utility Infrastructure"** means:

- (a) Utility Infrastructure that is discovered more than 200mm horizontally from the provided surveyed point via any Quality Level A investigation in the Subsurface Utility Engineering Report;
- (b) Utility Infrastructure that is discovered more than 150mm vertically from the provided surveyed point via any Quality Level A investigation in a Subsurface Utility Engineering Report;
- (c) Utility Infrastructure that is discovered more than 1500mm horizontally from the location provided via any Quality Level B investigation in a Subsurface Utility Engineering Report;
- (d) Utility Infrastructure that is discovered more than 2000mm horizontally from the location provided in the Quality Level C investigation in a Subsurface Utility Engineering Report

- (e) Utility Infrastructure that is discovered more than 3000mm horizontally from the location provided in the Quality Level D investigation in a Subsurface Utility Engineering Report; or
- (f) Utility Infrastructure that is owned by the City that is discovered more than 600mm vertically from the location provided in a Subsurface Utility Engineering Report,

provided, however, that the following shall be excluded from the definition of “**Mislocated Utility Infrastructure**”:

- (g) any Utility Infrastructure that is a service connection;
- (h) any Utility Infrastructure that is above-ground, aerial, or at-grade;
- (i) any of the following Utility Infrastructure that is owned by the City;
  - (A) watermains of nominal diameter less than 150mm;
  - (B) combined sewers or storm sewers of nominal diameter less than 300mm;
  - (C) sanitary sewers of nominal diameter less than 225mm; and
  - (D) street lighting and traffic signal cables.
- (j) any Utility Infrastructure relocations carried out at the Site subsequent to Commercial Close, including with respect to,
  - (A) the Works; and
  - (B) Third Party Works and Additional Works.

1.391 “**Modification**” has the meaning given in Schedule 35 – Intellectual Property.

1.392 “**MOI**” means Her Majesty The Queen in right of Ontario as represented by the Minister of Infrastructure, and includes any successors thereto or persons exercising delegated power under the Minister’s authority.

1.393 “**Monitoring Notice**” has the meaning given in Section 30.5(a) of the Project Agreement.

1.394 “**Monthly Equity Distribution Ratio**” has the meaning given in the Financial Model.

1.395 “**Monthly Previously Paid HST Amount**” means, if applicable, a monthly HST amount to be determined as provided for below which in the aggregate is equal to the amount of the Section 35.1(c) Payment. The amount of each Monthly Previously Paid HST Amount shall be:

- (a) the amount of the Section 35.1(c) Payment amortized on a straight line basis over the Monthly Service Payments due over the remainder of the Maintenance Period

following the payment of the Section 35.1(c) Payment subject to an alternative basis on which to amortize the remaining unapplied Section 35.1(c) Payment as provided for by Applicable Law in which case the City shall determine the Monthly Previously Paid HST Amount in accordance with such Applicable Law, provided that the City may, at any time, proceed to obtain an advance ruling under the *Excise Tax Act* (Canada) (or rely upon an existing advance ruling under the *Excise Tax Act* (Canada)) in respect to some other basis for amortizing the remaining unapplied Section 35.1(c) Payment over the Monthly Service Payments due over the remainder of the Maintenance Period, and in such event, the remaining unapplied Section 35.1(c) Payment may be amortized over the Monthly Service Payments in a manner provided for in the advance ruling if the City so determines in its sole discretion;

- (b) communicated by the City to Project Co in writing at the same time that the City pays Project Co the Section 35.1(c) Payment; and
- (c) credited to the City in each Monthly Service Payment invoice sent by Project Co to the City following the payment of the Section 35.1(c) Payment.

- 1.396 **“Monthly Progress Report”** means a monthly progress report submitted by Project Co in accordance with Part 2 of Schedule 31 – Works Report Requirements.
- 1.397 **“Monthly Service Payment”** has the meaning given in Schedule 19 – Payment Mechanism.
- 1.398 **“MTO”** means the Ministry of Transportation of Ontario and its agents and representatives.
- 1.399 **“Multiple Obligee Rider to Labour and Material Payment Bond”** means the Multiple Obligee Rider amending the Labour and Material Payment Bond to add the City and Lenders as additional named Obligees, in the form attached as Exhibit 1 to Appendix C of Schedule 24 – Insurance and Performance Security Requirements.
- 1.400 **“Multiple Obligee Rider to Performance Bond”** means the Multiple Obligee Rider amending the Performance Bond to add the City and Lender as additional named Obligees, in the form attached as Exhibit 1 to Appendix B of Schedule 24 – Insurance and Performance Security Requirements.
- 1.401 **“NCC”** means the National Capital Commission and its agents and representatives.
- 1.402 **“NCC Act”** means the *National Capital Act* (Canada).
- 1.403 **“NCC FLUDA”** means the federal land use, design approval of the NCC under section 12 of the National Capital Act required in respect of the change of use of, or erection, alteration, extension or demolition of a building or other work on, Crown Lands which are “public lands” within the “National Capital Region” (as such terms are defined in the NCC Act), as indicated in Appendix 2 – Lands – After – Acquired Lands – Crown Lands to this Schedule 1, which approval may include and be subject to conditions.

- 1.404 “**NMI Minor Deficiencies**” has the meaning given to it in “Section 25.13(f) of the Project Agreement.
- 1.405 “**NMI Minor Deficiency Deduction**” has the meaning given in Section 25.13(f) of the Project Agreement.
- 1.406 “**New Agreement**” has the meaning given in Schedule 22 - Compensation on Termination.
- 1.407 “**New Municipal Infrastructure**” means the infrastructure to be installed, relocated, upgraded, reinstated, downsized, restored, designed and/or built by Project Co for the City in accordance with Article 14 of Part 1 of Schedule 15-2 Output Specifications to the Project Agreement.
- 1.408 “**New Municipal Infrastructure Component**” means a component or element of the New Municipal Infrastructure, as set out in the Works Schedule.
- 1.409 “**New Municipal Infrastructure Component Acceptance**” means the point in time at which the City Engineer determines that an individual New Municipal Infrastructure Component has been completed in accordance with the Project Agreement and all requirements for New Municipal Infrastructure Component Acceptance described in the Output Specifications in respect of New Municipal Infrastructure Works have been satisfied, the New Municipal Infrastructure Component Works Requirements have been satisfied and the issuance by the City Engineer of a New Municipal Infrastructure Component Acceptance Certificate.
- 1.410 “**New Municipal Infrastructure Component Acceptance Certificate**” means, in respect of an individual New Municipal Infrastructure Component, the certificate issued by the City Engineer to Project Co confirming acceptance of the applicable New Municipal Infrastructure Component.
- 1.411 “**New Municipal Infrastructure Component Acceptance Date**” means, in respect of an individual New Municipal Infrastructure Component, the date on which the City Engineer has issued a New Municipal Infrastructure Component Acceptance Certificate in respect of such New Municipal Infrastructure Component.
- 1.412 “**New Municipal Infrastructure Component Acceptance Notice**” has the meaning given in Section 25.13(d) of the Project Agreement.
- 1.413 “**New Municipal Infrastructure Component Works Requirements**” has the meaning given in Section 25.13(d) of the Project Agreement.
- 1.414 “**New Municipal Infrastructure Work**” means the temporary and permanent installation, relocation, upgrading, reinstatement, restoration, downsizing, designing and/or building works by Project Co relating to the New Municipal Infrastructure for the City, carried out in connection with or as part of the Project Operations.
- 1.415 “**New Municipal Infrastructure Works Acceptance**” means the receipt by Project Co of New Municipal Infrastructure Component Acceptance Certificates for all New

Municipal Infrastructure Components and completion and satisfaction of all Final New Municipal Infrastructure Works Requirements.

- 1.416 “**New Municipal Infrastructure Works Acceptance Date**” means the date on which New Municipal Infrastructure Works Acceptance is achieved.
- 1.417 “**New Municipal Infrastructure Works Component Countdown Notice**” has the meaning given in Section 25.13(c) of the Project Agreement.
- 1.418 “**New Revenue Vehicles**” means the Revenue Vehicles supplied under the Revenue Vehicle Supply Contract under Section 9.11(a) of the Project Agreement.
- 1.419 “**New Utility Infrastructure**” means the Utility Infrastructure to be installed, relocated, upgraded, reinstated, restored, designed and/or built by Project Co for a Utility Company in accordance with the Project Agreement with reference to the applicable City Standards and Utility Company standards.
- 1.420 “**New Walkley Yard**” has the meaning given in Schedule 15 – Output Specifications.
- 1.421 “**New Walkley Yard Facilities Management Services**” means facilities management services to be delivered by Project Co at the New Walkley Yard as specified in Schedule 15 - Output Specifications.
- 1.422 “**Noise and Vibration Control Plan**” has the meaning given in Schedule 17 – Environmental Obligations.
- 1.423 “**Noise and Vibration Survey**” has the meaning given in Schedule 17 – Environmental Obligations.
- 1.424 “**Non-Conformance**” means any failure by Project Co to perform any of its obligations under the Project Agreement in respect of any aspect of the Works and which failure is not rectified by Project Co within the applicable time period, if any, stipulated in this Project Agreement.
- 1.425 “**Non-Conformance Tracking System**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.426 “**Non-Default Termination Sum**” has the meaning given in Schedule 22 - Compensation on Termination.
- 1.427 “**Non-Disclosure Agreement**” has the meaning given in Schedule 26 - Dispute Resolution Procedure.
- 1.428 “**Non-Project Co Cause**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.429 “**Non-Resident**” means a person that is, at the relevant time, a non-resident of Canada for the purposes of the *Income Tax Act* (Canada).
- 1.430 “**Non-Revenue Vehicle**” has the meaning given in Schedule 15 – Output Specifications.

- 1.431 “**Notice**” has the meaning given in Section 59.1(a) of the Project Agreement.
- 1.432 “**Notice of Dispute**” has the meaning given in Schedule 26 - Dispute Resolution Procedure.
- 1.433 “**Notice of Pending Claim**” has the meaning given in Section 38.2(a) of the Project Agreement.
- 1.434 “**NRC**” means the National Research Council of Canada and its agents and representatives.
- 1.435 “**OC Transpo**” means OC Transpo and its agents and representatives .
- 1.436 “**Occupational Health and Safety Act (Ontario)**” means the *Occupational Health and Safety Act*, R.S.O. 1990, c. O.1, as amended from time to time.
- 1.437 “**Off-Peak Period**” has the meaning given in Schedule 15 – Output Specifications.
- 1.438 “**OHSAS 18001**” means the international standard for occupational health and safety management systems developed by the Occupational Health and Safety Advisory Services Project Group, a British body formed to develop the standard.
- 1.439 “**OHSAS 18001 Accreditation**” means, in respect of an entity, such entity having received certification in respect of its health and safety management systems that such systems comply with the requirements of OHSAS 18001.
- 1.440 “**Ontario Heritage Act (Ontario)**” means the *Ontario Heritage Act*, R.S.O. 1990, c. O.18, as amended from time to time.
- 1.441 “**Operator**” means any person directly engaged by the City of Ottawa to carry out the Operator Tasks.
- 1.442 “**Operator Tasks**” means all of the tasks to be performed by the Operator in connection with the operation of the Trillium Line as set out in Schedule 15 – Output Specifications.
- 1.443 “**Operator Transition**” has the meaning given in Section 26.7(a) of the Project Agreement.
- 1.444 “**Operator Transition Notice**” has the meaning given in Section 26.7(b) of the Project Agreement.
- 1.445 “**Order**” has the meaning given in Schedule 28 - Insurance Trust Agreement.
- 1.446 “**Other Contractor**” means an Additional Contractor or a Third Party Contractor.
- 1.447 “**Other Works**” means the Additional Works and the Third Party Works.
- 1.448 “**Output Specifications**” means Schedule 15 – Output Specifications, and includes Schedule 15-1 – Technical Terms and Reference Documents, Schedule 15-2 - Design and

Construction Requirements and Schedule 15-3 – Maintenance and Rehabilitation Requirements.

- 1.449 **“Outside Substantial Completion Date”** means August 1, 2022.
- 1.450 **“Ownership”** has the meaning given in Schedule 35 – Intellectual Property.
- 1.451 **“PA Parties”** or **“PA Party”** has the meaning given in Schedule 6 - Independent Certifier Agreement.
- 1.452 **“PAR Meeting”** has the meaning given in Section 11.6(f) of the Project Agreement
- 1.453 **“PAR Meeting Expiry Date”** has the meaning given in Section 11.6(g) of the Project Agreement.
- 1.454 **“Party”** means either the City or Project Co, and **“Parties”** means collectively the City and Project Co, but, for greater certainty, such definitions do not include MOI.
- 1.455 **“Party Representative”** and **“Party Representatives”** have the meanings given in Schedule 26 - Dispute Resolution Procedure.
- 1.456 **“Passenger”** means a natural person using any segment of the Extended Trillium Line.
- 1.457 **“Patents”** includes all national (including the United States and Canada), regional and multinational statutory invention registrations, patents, patent registrations, patent applications, provisional patent applications, industrial designs, industrial models, including all reissues, divisions, continuations, continuations-in-part, extensions and re-examinations, and all rights therein provided by multinational treaties or conventions and all improvements to the inventions disclosed in each such registration, patent or application.
- 1.458 **“Payment Adjustment Report”** has the meaning given in Section 32.6(i)(ii) of the Project Agreement.
- 1.459 **“Payment Certifier”** means the professional architect of record or engineer of record for the Project.
- 1.460 **“Payment Commencement Date”** means the date that is two (2) Business Days after the Substantial Completion Date.
- 1.461 **“Payment Compensation Amount”** means, with respect to an amount and a specified period of time, such amount multiplied by (i) such period of time in days divided by the actual number of days in the current year multiplied by (ii) the rate of interest per annum in effect on each such day equal to [REDACTED]% over the rate of interest per annum quoted by National Bank of Canada from time to time as its reference rate for Canadian Dollar demand loans made to its commercial customers in Canada and which it refers to as its “prime rate”, as such rate may be changed by it from time to time.

- 1.462 “**Payment Mechanism**” means the payment mechanism set out in Schedule 19 - Payment Mechanism.
- 1.463 “**Payment Periods**” means the payment periods of one calendar month (as adjusted in this definition) established by the City for each Contract Year, provided that the first Payment Period in the first Contract Year and the last Payment Period in the last Contract Year may be a shorter period as a result of the timing of the Payment Commencement Date and the Expiry Date within the Payment Periods otherwise established in accordance with the foregoing.
- 1.464 “**PBS**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.465 “**PBS Update**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.466 “**PBS Submittal**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.467 “**Peak Period**” has the meaning given in Schedule 15 – Output Specifications.
- 1.468 “**Performance Audit**” has the meaning given in Section 30.1(a) of the Project Agreement.
- 1.469 “**Performance Bond**” means any of the Performance Bonds described in Section 17 of Schedule 24 – Insurance and Performance Security Requirements.
- 1.470 “**Performance Criteria**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.471 “**Performance Guarantees**” means the guarantees to Project Co in respect of the Construction Contract and the Maintenance and Rehabilitation Contract provided by the Construction Guarantor and the Maintenance and Rehabilitation Guarantor, respectively.
- 1.472 “**Performance Monitoring Program**” means the monitoring of performance by Project Co through the Non-Conformance reporting process detailed in Schedule 11 – Integrated Management System Requirements and the Performance Monitoring Reports prepared and submitted in accordance with Schedule 11 – Integrated Management System Requirements.
- 1.473 “**Performance Monitoring Report**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.474 “**Performance Security**” means the performance security required pursuant to Article 19 of Schedule 24 – Insurance and Performance Security Requirements.
- 1.475 “**Permits, Licences, Approvals and Authorizations**” means the City Permits, Licences, Approvals and Authorizations and the Project Co Permits, Licences, Approvals and Authorizations.

- 1.476 “**Permitted Borrowing**” means any additional financing approved by the City in accordance with Section 1.9 of Schedule 21 - Variation Procedure to the Project Agreement.
- 1.477 “**Personal Information**” means all personal information (as the term “personal information” is defined in the *Personal Information Protection and Electronic Documents Act* (Canada)) in the custody or control of Project Co or any Project Co Party other than personal information of the employees of Project Co or the Project Co Parties and other than personal information that is wholly unrelated to the Project Operations and not derived directly or indirectly from the City in respect of the Project.
- 1.478 “**Personal Information Protection and Electronic Documents Act (Canada)**” means the *Personal Information Protection and Electronic Documents Act*, S.C. 2000, c. 5, as amended from time to time.
- 1.479 “**Phase 1 and Phase 2 Environmental Site Assessment Reports**” means the reports set out in Appendix B to this Schedule 1 – Definitions and Interpretation.
- 1.480 “**Planned Major Maintenance Activity**” has the meaning given in Section 16.5(c) of the Project Agreement.
- 1.481 “**Planned Value**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.482 “**Police Service**” means the Royal Canadian Mounted Police, the Ontario Provincial Police, the Ottawa Police Service and any other law enforcement agency with jurisdiction pursuant to Applicable Law, as applicable.
- 1.483 “**Post-Installation Checkout**” or “**PICO**” has the meaning given in Schedule 14 – Testing and Commissioning.
- 1.484 “**Pre-Existing Environmental Site Conditions**” means the environmental condition of the Lands as set out in the Environmental Reports.
- 1.485 “**Pre-Final Design Development**” or “**PFDD**” has the meaning given in Schedule 10 – Review Procedure.
- 1.486 “**Private Capital Advance Confirmations**” has the meaning given in Schedule 20 – Construction Period Payments.
- 1.487 “**Private Capital Funding Confirmations**” has the meaning given in Schedule 20 – Construction Period Payments.
- 1.488 “**Preparatory Activities**” has the meaning given in Schedule 15 – Output Specifications.
- 1.489 “**Proceeding At Risk**” has the meaning given in Section 11.6(g) of the Project Agreement.

- 1.490 “**Proceeding At Risk Matter**” has the meaning given in Section 11.6(a)(ii) of the Project Agreement.
- 1.491 “**Proceeding At Risk Notice**” has the meaning given in Section 11.6(a) of the Project Agreement.
- 1.492 “***Proceedings Against the Crown Act (Ontario)***” means the *Proceedings Against the Crown Act*, R.S.O. 1990, c. P.27, as amended from time to time.
- 1.493 “**Proceeds Account**” means the following account opened at [REDACTED] in the name of Project Co:
- |                        |            |
|------------------------|------------|
| SWIFT:                 | [REDACTED] |
| Canadian Routing Code: | [REDACTED] |
| Account No.:           | [REDACTED] |
| Beneficiary Name:      | [REDACTED] |
- 1.494 “**Proceeds Account Cascade**” has the meaning given in Schedule 4 – Wide Equity Funding Requirements.
- 1.495 “**Product**” or “**Products**” means material, machinery, equipment and fixtures forming the New Municipal Infrastructure but does not include machinery and equipment used to prepare, fabricate, convey or erect the New Municipal Infrastructure, which is referred to as construction machinery and equipment.
- 1.496 “**Professional Engineer**” means a professional engineer licensed by Professional Engineers Ontario to practice in the Province of Ontario.
- 1.497 “**Prohibited Act**” has the meaning given in Section 58.1(a) of the Project Agreement.
- 1.498 “**Project**” has the meaning given in the recitals to the Project Agreement.
- 1.499 “**Project Agreement**” has the meaning given in the recitals to the Project Agreement.
- 1.500 “**Project Agreement Arbitration**” has the meaning given in Schedule 26- Dispute Resolution Procedure.
- 1.501 “**Project Co**” means [REDACTED] and any successor or permitted assign.
- 1.502 “**Project Co Assumed Responsibilities for the Dow’s Lake Tunnel Structure**” has the meaning given in Section 16.7(a) of the Project Agreement.
- 1.503 “**Project Co Communications Protocol**” has the meaning given in Schedule 18 – Communications and Stakeholder Engagement Obligations Protocol.
- 1.504 “**Project Co Construction Communications Plan**” has the meaning given in Schedule 18 – Communications and Stakeholder Engagement Obligations Protocol.

- 1.505 “**Project Co Event of Default**” has the meaning given in Section 43.1(a) of the Project Agreement.
- 1.506 “**Project Co Group**” means Project Co together with any person or group of persons, who, either individually or collectively, have Direct or Indirect Power or Control of Project Co.
- 1.507 “**Project Co Operator Transition Services**” has the meaning given in Section 26.7(a) of the Project Agreement.
- 1.508 “**Project Co Party**” means:
- (a) the Construction Contractor;
  - (b) the Maintenance and Rehabilitation Contractor;
  - (c) any person engaged by Project Co, and/or any of the Contractors from time to time as may be permitted by the Project Agreement to procure or manage the provision of the Project Operations (or any of them); and
  - (d) in respect of each of the above, their subcontractors of any tier, agents, employees, officers and directors,
- and “**Project Co Parties**” shall be construed accordingly.
- 1.509 “**Project Co Permits, Licences, Approvals and Authorizations**” means all permissions, consents, approvals, certificates, permits, licences, agreements and authorizations required to perform the Project Operations in accordance with the Project Agreement and as required by Applicable Law, and including those permissions, consents, approvals, certificates, permits, licences, agreements and authorizations which are the responsibility of Project Co to obtain as set out in Schedule 32 – City Permits, Licences, Approvals and Authorizations or which is the responsibility of Project Co to perform or fulfill as set out in Schedule 32 – City Permits, Licences, Approvals and Authorizations, and all necessary consents, approvals, certificates, permits, licences, agreements and authorizations from and with any third parties (including, to the extent applicable, all Development Approvals and Utility Agreements, and the approval of the Fire Marshal of Ontario), needed to perform the Project Operations in accordance with the Project Agreement and as required by Applicable Law, but other than City Permits, Licences, Approvals and Authorizations.
- 1.510 “**Project Co Proposal Extracts**” means the documents attached as Schedule 13 - Project Co Proposal Extracts.
- 1.511 “**Project Co Representative**” means the person designated as such by Project Co on or prior to Commercial Close and any permitted replacement.
- 1.512 “**Project Co Testing and Commissioning**” means the commissioning activities to be carried out by Project Co in order to achieve Readiness for Revenue Service as set forth in Schedule 14 – Testing and Commissioning.

- 1.513 “**Project Co Testing and Commissioning Coordinator**” has the meaning given in Schedule 14 – Testing and Commissioning.
- 1.514 “**Project Co Utility Works**” means the works relating to New Utility Infrastructure carried out by Project Co as part of the Project Operations, including design, construction, installation, commissioning, protection, removal and relocation of duct banks, poles, pole lines, conduits, gas pipes, oil pipes, sewers and telephone and telecommunication lines, and related and ancillary works.
- 1.515 “**Project Co Variation Notice**” has the meaning given in Schedule 21 - Variation Procedure.
- 1.516 “**Project Co’s Expiry Transition Process Asset Preservation Work Schedule**” has the meaning given in Schedule 15 – Output Specifications.
- 1.517 “**Project Data**” has the meaning given in Schedule 35 – Intellectual Property.
- 1.518 “**Project Documents**” means the Ancillary Documents.
- 1.519 “**Project Insurance Change**” has the meaning given in Section 7.1(f) of Schedule 24 - Insurance and Performance Security Requirements.
- 1.520 “**Project Know-How**” means all ideas, concepts, alternatives, methodologies, processes, recommendations and suggestions developed by or through Project Co or any Project Co Party and revealed to or discovered by the City, whether before or after Commercial Close, which may be connected in any way to:
- (a) the Works, including the design and construction of the System Infrastructure;
  - (b) the Maintenance and Rehabilitation Services, including the maintenance, rehabilitation, improvement and testing of the System Infrastructure;
  - (c) any other Project Operations; or
  - (d) the Project Agreement.
- 1.521 “**Project Operations**” means:
- (a) the performance of the Works;
  - (b) the performance of the Maintenance and Rehabilitation Services; and
  - (c) the performance of all other obligations of Project Co under the Project Agreement.
- 1.522 “**Project Term**” means the period commencing on Commercial Close and expiring at midnight on the Termination Date.
- 1.523 “**Project Term Lands**” has the meaning given in Schedule 33 – Lands.

- 1.524 “**Proponent**” has the meaning given in the Request for Proposals.
- 1.525 “**Proprietor**” has the meaning given in Section 50.6(a) of the Project Agreement.
- 1.526 “**Protesters**” has the meaning given in Section 9.7(a) of the Project Agreement.
- 1.527 “**Province**” means Her Majesty the Queen in right of Ontario.
- 1.528 “**Qualifying Tender**” has the meaning given in Schedule 22 - Compensation on Termination.
- 1.529 “**Quality Documentation**” means all documentation to be prepared, submitted (where applicable) and implemented by Project Co in accordance with Schedule 11 – Integrated Management System Requirements.
- 1.530 “**Quality Failure**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.531 “**Quality Manager**” has the meaning given in Schedule 11 – Integrated Management System Requirements.
- 1.532 “**Rail Transit Specific Change in Law**” means any Change in Law which principally affects or principally relates only to the design, construction, maintenance or rehabilitation of rail transit systems.
- 1.533 “**Railway Company**” means CP Rail and any other railway company that owns or operates a rail service, any part of which is on any part of the Lands during the Project Term and “**Railway Companies**” means all of them
- 1.534 “**Readiness for Revenue Service**” has the meaning given in Schedule 14 – Testing and Commissioning.
- 1.535 “**Record Drawings**” means signed and sealed drawings prepared by the inspecting professional engineer, using as-built information, after verifying in detail the actual conditions of the completed project or applicable components as they are constructed, including any changes that were initiated due to site conditions or other causes and where all such changes are clearly identified through redlines or by means of any other format agreed by the City.
- 1.536 “**Recovery Amount**” has the meaning given in Section 54.3(g) of the Project Agreement.
- 1.537 “**Recovery Schedule**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.538 “**Recovery Schedule Report**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.539 “**Rectification Time**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.540 “**Refinancing**” has the meaning given in Schedule 27 – Refinancing.

- 1.541 “**Reimbursement Event**” has the meaning given in Section 31.5(a) of the Project Agreement.
- 1.542 “**Reinstatement Plan**” has the meaning given in Section 29.2(a) of the Project Agreement.
- 1.543 “**Reinstatement Work**” has the meaning given in Section 29.1(a) of the Project Agreement.
- 1.544 “**Release**” has the meaning given in Schedule 17 – Environmental Obligations.
- 1.545 “**Relevant Change in Law**” means a Discriminatory Change in Law or a Rail Transit Specific Change in Law.
- 1.546 “**Relevant Conviction**” means a charge or conviction, at any time within the previous 6 years, of any offense: (i) of moral turpitude in Canada or elsewhere; (ii) for which records exist under the *Criminal Records Act*; or (iii) otherwise designated as a Relevant Conviction by the City from time to time, and that conviction remains in effect at that time and is one for which a pardon has not been granted.
- 1.547 “**Relevant Insurance**” has the meaning given in Section 7.1(g) of Schedule 24 - Insurance and Performance Security Requirements.
- 1.548 “**Relevant Insurance Inception Date**” has the meaning given in Section 7.1(h) of Schedule 24 - Insurance and Performance Security Requirements.
- 1.549 “**Relief Event**” has the meaning given in Section 41.1(a) of the Project Agreement.
- 1.550 “**Remaining Works**” means:
- (a) the provision of the remaining New Revenue Vehicles not yet Delivered to the New Walkley Yard in compliance with Schedule 15-2 Part 8;
  - (b) the testing and commissioning of the New Revenue Vehicles in accordance with 15-2 Part 8 and Schedule 14;
  - (c) completion of the training of the City Operators on the New Revenue Vehicles;
  - (d) completion of a 14 day trial running period simulating full revenue service, and safety certification of the New Revenue Vehicles; and
  - (e) the delivery of all manuals, spare parts, and materials associated with the New Revenue Vehicles otherwise required by the Project Agreement.

For greater certainty, Remaining Works do not constitute Minor Deficiencies.

- 1.551 “**Remedial Period**” has the meaning given in Schedule 19 – Payment Mechanism.

- 1.552 “**Request for Proposals**” or “**RFP**” means the request for proposals issued in respect of the Project on February 19, 2016, as amended from time to time.
- 1.553 “**Request for Utility Works Payment**” has the meaning given in Section 20.13(g) of the Project Agreement.
- 1.554 “**Response**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.555 “**Response Time**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.556 “**Restricted Payment Conditions**” has the meaning given in Schedule 4 – Funding Requirements.
- 1.557 “**Restricted Person**” means any person who, or any member of a group of persons acting together, any one of which:
- (a) has, directly or indirectly, its principal or controlling office in a country that is subject to any economic or political sanctions imposed by Canada or Ontario;
  - (b) has as its primary business the illegal manufacture, sale, distribution or promotion of narcotics substances or arms, or is or has been involved in terrorism;
  - (c) in the case of an individual, (i) he or she has been convicted of any indictable offence less than five years prior to the date at which the consideration of whether such individual is a “**Restricted Person**” is made hereunder, whether or not such person received a custodial sentence; or (ii) he or she has been sentenced to a custodial sentence, other than a suspended sentence, for any regulatory offence other than under the *Highway Traffic Act* (Ontario) or corresponding legislation in any other jurisdiction less than five years prior to the date at which the consideration of whether such individual is a “**Restricted Person**” is made hereunder;
  - (d) in the case of a person other than an individual, (i) it or any of the members of its (or its general partner’s) board of directors or its senior executive managers has been convicted of any indictable offence less than five years prior to the date at which the consideration of whether such person is a “**Restricted Person**” is made hereunder, whether or not such person received a custodial sentence; or (ii) any of the members of its (or its general partner’s) board of directors or its senior executive managers has been sentenced to a custodial sentence, other than a suspended sentence, for any regulatory offence other than under the *Highway Traffic Act* (Ontario) or corresponding legislation in any other jurisdiction less than five years prior to the date at which the consideration of whether such person is a “**Restricted Person**” is made hereunder;
  - (e) has as its primary business the acquisition of distressed assets or investments in companies or organizations which are or are believed to be insolvent or in a financial standstill situation or potentially insolvent;

- (f) is subject to a material claim of the City under any proceedings (including regulatory proceedings) which have been concluded or are pending at the time at which the consideration of whether such person is a “Restricted Person” is made hereunder, and which (in respect of any such pending claim, if it were to be successful) would, in the City’s view, in either case, be reasonably likely materially to affect the ability of Project Co to perform its obligations under the Project Agreement; or
  - (g) has a material interest in the production of tobacco products.
- 1.558 **“Restrictions and Requirements”** means the restrictions, qualifications and requirements contained in the Lands Table forming part of Schedule 33 – Lands.
- 1.559 **“Revenue Service”** has the meaning given in Schedule 15 – Output Specifications.
- 1.560 **“Revenue Service Commencement”** means the commencement of Passenger service to the public on the System by the City on the Revenue Service Commencement Date.
- 1.561 **“Revenue Service Hours”** has the meaning given in Schedule 15 – Output Specifications.
- 1.562 **“Revenue Service Train Kilometres”** has the meaning given in Schedule 19 – Payment Mechanism.
- 1.563 **“Revenue Vehicle Contract Costs”** has the meaning given in Section 9.11(b) of the Project Agreement.
- 1.564 **“Revenue Vehicle Deficiency”** means a defect or deficiency in a Revenue Vehicle such that the Revenue Vehicle does not meet those Revenue Vehicle Technical Specifications that are not Technical Specifications (Built to Specification).
- 1.565 **“Revenue Vehicles”** has the meaning given in Schedule 15 – Output Specifications.
- 1.566 **“Revenue Vehicle Payment Request”** has the meaning given in Section 9.11(c) of the Project Agreement.
- 1.567 **“Revenue Vehicle Supplier”** means [REDACTED].
- 1.568 **“Revenue Vehicle Supply Contract”** has the meaning given in Section 9.11(a) of the Project Agreement.
- 1.569 **“Review Procedure”** means the procedure set out in Schedule 10 - Review Procedure.
- 1.570 **“Review Procedure Activities”** means:
- (a) performance of the requirements of Schedule 10 – Review Procedure for all Works Submittals required to be delivered prior to Substantial Completion, including:

- (i) all Submittals by Project Co;
    - (ii) City review periods and responses regarding Works Submittals;
    - (iii) amendment by Project Co, if required; and
    - (iv) re-submission by Project Co, if required;
  - (b) any other submission activities required by Project Co pursuant to the Project Agreement
- 1.571 **“Review Procedure Activities Register”** means a register of Review Procedure Activities which shall include the submission dates and review periods for all Works Submittals required under Schedule 10 – Review Procedure, Schedule 12 – Work Scheduling Requirements, and elsewhere in the Project Agreement.
- 1.572 **“Revised New System Infrastructure Condition Report”** has the meaning given in Schedule 23 – Expiry Transition Procedure.
- 1.573 **“Road Cut Permit – Major Construction (Civil Works and Utility Relocation)”** has the meaning given in Schedule 15 – Output Specifications.
- 1.574 **“Road Safety Audit”** has the meaning given in Schedule 15-1 of the Output Specifications.
- 1.575 **“Road Sections”** has the meaning given in Schedule 7 – Mobility Matters.
- 1.576 **“RVSC Cash Allowance Account”** means the RVSC Cash Allowance Account to be established in accordance with Section 9.11 of the Project Agreement.
- 1.577 **“RVSC Cash Flow”** means that cash flow defined by the RVSC Milestone dates and corresponding amounts set forth Appendix G.
- 1.578 **“RVSC Fixed Cost Amount”** means \$[REDACTED].
- 1.579 **“RVSC Milestone”** has the meaning assigned to the term Milestone in the Revenue Vehicle Supply Contract.
- 1.580 **“Safety and Security Management Committee”** has the meaning given in Schedule 15 – Output Specifications.
- 1.581 **“Safety Management Plan”** has the meaning given in Schedule 15 – Output Specifications.
- 1.582 **“Schedule”** means a schedule to the Project Agreement.
- 1.583 **“Scheduled Final Completion Date”** means the date that is 202 days following Substantial Completion.

- 1.584 “**Scheduled Passenger Facility Hours**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.585 “**Scheduled Revenue Service Train Kilometres**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.586 “**Scheduled Substantial Completion Date**” means August 10, 2022, as such date may be amended pursuant to Section 38 of the Project Agreement.
- 1.587 “**Security**” has the meaning given in Schedule 41 – Lenders’ Direct Agreement.
- 1.588 “**Security Documents**” has the meaning given in Schedule 41 – Lenders’ Direct Agreement.
- 1.589 “**Sensitive Information**” means financial or commercial information which would, if disclosed to a competitor of Project Co or any Project Co Party, give that competitor a competitive advantage over Project Co or such Project Co Party and thereby prejudice the business of Project Co or such Project Co Party.
- 1.590 “**Service Failure**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.591 “**Severe Market Disruption**” means any occurrence of exceptional circumstances in financial markets in Europe, the United States of America and/or Canada which:
- (a) results in the suspension or cessation of all or substantially all lending activity in national or relevant international capital or interbank markets; and
  - (b) adversely affect access by Project Co to such markets.
- 1.592 “**Shutdown Period**” means the period beginning on May 3, 2020.
- 1.593 “**Shutdown Period Service Obligations**” means the obligations in respect of the care, maintenance and repair of the Existing Trillium Line Assets and the Existing Vehicle Fleet during the Shutdown Period as set out in Schedule 15-3.
- 1.594 “**Shutdown Period Transition and Maintenance Plan**” has the meaning given in Section 10 of the Output Specifications.
- 1.595 “**Signalling and Train Control System**” has the meaning given in Schedule 15 – Output Specifications.
- 1.596 “**Site**” means, at any time and from time to time, that portion of the Lands,
- (a) on which Project Co or any Project Co Party is engaged in any construction or demolition activities or is otherwise engaged in completing the Works;
  - (b) on which any of the Works have been commenced but not completed in their entirety;

- (c) that are hoarded, cordoned, or otherwise fenced off by Project Co, and any Lands immediately surrounding such hoarding, cordons or fencing; or
  - (d) within the active construction footprint of the Works.
- 1.597 “**Site Acceptance Test**” or “**SAT**” has the meaning given in Schedule 14 – Testing and Commissioning.
- 1.598 “**Site Conditions**” means the condition of the Lands, including the physical, geophysical, climatic, ecological, environmental, geotechnical and archaeological conditions.
- 1.599 “**Small Works**” means any works, including facilities and equipment, of a minor nature that are requested by the City to be performed having an individual cost or aggregate cost with other linked works, including facilities and equipment, of a minor nature, not exceeding \$[REDACTED] (index linked), or as otherwise agreed from time to time, but excluding any works, including facilities and equipment, which will increase the likelihood of an Availability Failure or Quality Failure, will increase the cost to Project Co of performing the Project Operations or will materially hinder Project Co in the performance of the Maintenance and Rehabilitation Work.
- 1.600 “**Species-at-Risk**” means any member of a species, subspecies, variety or genetically or geographically distinct population of animal, plant or other organism that is listed in the Species at Risk in Ontario List maintained pursuant to the ESA and any analogous federal list under the *Species at Risk Act* (Canada), and any other species that has been classified as being threatened or endangered under Applicable Law.
- 1.601 “**Stakeholders**” means individuals and organizations with an interest in the Project, including those listed in Schedule 15 - Output Specifications, but excluding the City.
- 1.602 “**Standard Operating Procedures**” has the meaning given in Schedule 15 – Output Specifications.
- 1.603 “***Standards & Guidelines for Conservation of Provincial Heritage Properties***” means the Standards & Guidelines for Conservation of Provincial Heritage Properties issued under the *Ontario Heritage Act* (Ontario) on April 28, 2010, as amended from time to time.
- 1.604 “**Start-Up Meeting**” has the meaning given in Section 20.4(a) of the Project Agreement.
- 1.605 “**Station**” or “**Stop**” has the meaning given in Schedule 15 – Output Specifications.
- 1.606 “**Station Plaza**” means a plaza at a Station.
- 1.607 “**Structures**” has the meaning given in Schedule 15 – Output Specifications.
- 1.608 “**Subcontractor**” means any subcontractor of Project Co engaged by or through Project Co to perform any of the Project Operations, including any of the Contractors, any Supplier or consultant, and any subcontractor of any other subcontractor at any tier.

- 1.609 “**Subcontractor Losses**” has the meaning given in Schedule 22 - Compensation on Termination.
- 1.610 “**Subcontracts**” means the contracts entered into by or between Project Co and any Subcontractor or between any Subcontractor at any tier, including any of the Contractors, and any other Subcontractor at any tier in relation to any aspect of the Project Operations.
- 1.611 “**Submittal**” means a Works Submittal or a Maintenance and Rehabilitation Submittal.
- 1.612 “**Substantial Completion**” means the point at which (i) the System Infrastructure, the New Municipal Infrastructure, the New Utility Infrastructure have been completed in accordance with the Project Agreement; (ii) the Payment Certifier appointed pursuant to Section 15.3(g) of the Project Agreement has certified the substantial performance of the Construction Contract and the related certificate of substantial performance of the Works is published pursuant to Section 32(1) of the CLA; and (iii) all requirements for Readiness for Revenue Service described in Schedule 14 - Testing and Commissioning, other than in respect of Minor Deficiencies, have been satisfied in respect of the System Infrastructure and the New Municipal Infrastructure as a whole.
- 1.613 “**Substantial Completion Certificate**” means the certificate to be issued by the Independent Certifier in accordance with Section 25.3 of the Project Agreement.
- 1.614 “**Substantial Completion Countdown Notice**” has the meaning given in Section 25.4(a) of the Project Agreement.
- 1.615 “**Substantial Completion Date**” means the date on which Substantial Completion is achieved as evidenced by the Substantial Completion Certificate, as such date shall be stated therein.
- 1.616 “**Substantial Completion Notice**” has the meaning given in Section 25.3(b) of the Project Agreement.
- 1.617 “**Substantial Completion Payment**” means \$[REDACTED].
- 1.618 “**Substantial Completion Payment Commencement Date**” means the date that is two Business Days after the Substantial Completion Date.
- 1.619 “**Substitute**” has the meaning given in the applicable Direct Agreement.
- 1.620 “**Subsurface Utility Engineering Reports**” or “**SUE**” means the [REDACTED].
- 1.621 “**Supplier**” means a person who supplies to Project Co, or to any Subcontractor, any equipment, materials, supplies or services as part of, or for, the Project Operations.
- 1.622 “**System Event**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.623 “**System Extension**” has the meaning given in Schedule 36 – System Extension.

- 1.624 “**System**” means the rapid transit system to be designed, constructed, supplied, tested, commissioned and maintained by Project Co in accordance with this Project Agreement, in, on, over or under any part of the Lands as part of the Works, including, without limitation, the Vehicles, the System Infrastructure, all site services, utilities, roadways and parking areas required to support such System Infrastructure, all supporting systems and improvements and all other Works, improvements, modifications, additions, demolitions, removals of the Existing Trillium Line Assets required in each case to meet the Output Specifications and all requirements of the Permits, Licenses, Approvals and Authorizations, whether or not in the course of construction, installation, completion or maintenance.
- 1.625 “**System Infrastructure**” at any time means the infrastructure, assets and systems to be designed, constructed and installed by Project Co in, on, over or under any part of the Lands as part of the Works to create the System in accordance with the Project Agreement, and includes those parts of the Existing Trillium Line Assets which Project Co designs, utilizes, relocates, refurbishes, upgrades, reinstates, restores, rebuilds and integrates into the System, but, for purposes of determining the Maintenance and Rehabilitation Services, excludes the New Municipal Infrastructure.
- 1.626 “**System Infrastructure Condition Report**” has the meaning given in Schedule 23 – Expiry Transition Procedure.
- 1.627 “**System Infrastructure Performance Demonstration**” has the meaning given in Schedule 23 – Expiry Transition Procedure.
- 1.628 “**System User**” means any member of the public, any City Party and any other person that is on or about the New Municipal Infrastructure, the System or is otherwise making use of the System Infrastructure for any purpose.
- 1.629 “**Systems Integration Dispute**” means a dispute related to the integration and function of the communications systems.
- 1.630 “**Systems Integration Test**” or “**SIT**” has the meaning given in Schedule 14 – Testing and Commissioning.
- 1.631 “**Taxes**” means any and all taxes, levies, imposts, duties, fees, withholdings, assessments, deductions or charges whatsoever, imposed, assessed, levied or collected by any Governmental Authority, together with interest thereon and penalties with respect thereto, and includes all HST except where stated to the contrary, provided however that “Taxes” shall not include City Taxes.
- 1.632 “**Technical Information**” has the meaning given in Schedule 35 – Intellectual Property.
- 1.633 “**Technical Reports**” means the Environmental Reports, the Geotechnical Reports and the Archaeological Reports.
- 1.634 “**Technical Submission Deadline**” means August 10, 2018.

- 1.635 “**Temporary Street Occupancy Permit**” means the consent(s) and permit(s) to perform street work and for temporary street occupation as set out in the City of Ottawa Road Activity Bylaw (By-law No. 2003-445) and Encroachments on City Highways (By-law No. 2003-446, Streets and Sidewalks, as such consent(s) and permit(s) are related to those portions of the City Road Allowance required by Project Co for the Works.
- 1.636 “**Terminal Station**” has the meaning given in Schedule 15 – Output Specifications.
- 1.637 “**Termination Date**” means the earlier of the Expiry Date and such other date, if any, on which termination of the Project Agreement takes effect in accordance with its terms.
- 1.638 “**Testing and Commissioning Manuals**” has the meaning given in Section 1.6(f) of Schedule 14 – Testing and Commissioning.
- 1.639 “**Testing and Commissioning Plan**” has the meaning given in Section 1.3(a) of Schedule 14 – Testing and Commissioning.
- 1.640 “**Testing and Commissioning Schedule**” has the meaning given in Section 1.3(m) of Schedule 14 – Testing and Commissioning.
- 1.641 “**Testing and Commissioning Team**” has the meaning given in Schedule 14 – Testing and Commissioning.
- 1.642 “**Third Party Access Agreements**” has the meaning given in Schedule 33 – Lands.
- 1.643 “**Third Party Arbitration**” has the meaning given in Schedule 26 - Dispute Resolution Procedure.
- 1.644 “**Third Party Contractors**” means any person (not being, for the avoidance of doubt, Project Co or any Project Co Party or Additional Contractors) that carries out any Third Party Works.
- 1.645 “**Third Party Litigation**” has the meaning given in Schedule 26 - Dispute Resolution Procedure.
- 1.646 “**Third Party Works**” means any work performed by a Third Party Contractor on the Lands, including works in relation to,
- (a) an Encumbrance; and
  - (b) Utility Work and work pursuant to a Utility Agreement or an encroachment permit or other permitting authority of any Governmental Authority under Applicable Law.
- 1.647 “**Total Capital Cost**” means \$[REDACTED].
- 1.648 “**Threshold Equity Sale Amount**” means an Equity Sale Amount that would result in an Equity Sale IRR equal to the Base Case Equity IRR.

- 1.649 **“Track”** has the meaning given in Schedule 15-1 of the Output Specifications.
- 1.650 **“Trade-Marks”** means all trademarks, service marks, trade dress, logos, distinguishing guises and indicia, trade names, corporate names, business names, domain names, whether or not registered, including all common law rights, and registrations, applications for registration and renewals thereof, including, but not limited to, all marks registered in the Canadian Intellectual Property Office and the trademark offices of other nations throughout the world, and all rights therein provided by multinational treaties or conventions.
- 1.651 **“Train Control System”** has the meaning given in Schedule 15 – Output Specifications.
- 1.652 **“Train Kilometres Availability Failure”** has the meaning given in Schedule 19 – Payment Mechanism
- 1.653 **“Train Kilometres Availability Failure Deduction”** has the meaning given in Schedule 19 – Payment Mechanism.
- 1.654 **“Traffic and Transit Management Plan”** or **“TTMP”** has the meaning given in Schedule 15-1 of the Output Specifications.
- 1.655 **“Traffic Control Plan”** has the meaning given in Schedule 15 – Output Specifications.
- 1.656 **“Transit Operations Control Centre”** or **“TOCC”** has the meaning given in Schedule 15 – Output Specifications.
- 1.657 **“Transport Canada Safe Operation Requirements”** means Transport Canada’s track safety standards for safe operation on the Existing Trillium Line at the respective track speeds applicable to the operation of the Existing Trillium Line as set out in Schedule 15-Output Specifications.
- 1.658 **“Trespasser”** has the meaning given in Section 9.7(a) of the Project Agreement.
- 1.659 **“Trial Running”** has the meaning given in Schedule 15-1 of the Output Specifications.
- 1.660 **“Trillium Line Extension”** means the approximately 12km long extension from Greenboro Station to Limebank Station.
- 1.661 **“Tunnels”** has the meaning given in Schedule 15 – Output Specifications.
- 1.662 **“Uninsurable Event”** means any event which arises directly and solely from an Uninsurable Risk.
- 1.663 **“Uninsurable Risk”** has the meaning given in Schedule 24 - Insurance and Performance Security Requirements to the Project Agreement.
- 1.664 **“Unit Rate Price”** has the meaning given in Schedule 7 – Mobility Matters.

- 1.665 “**Unpaid Construction Period Payments**” has the meaning given in Schedule 20 – Construction Period Payments.
- 1.666 “**Updated Shared Use Agreement**” has the meaning given in Schedule 32 – City Permits, Licenses, Approvals and Authorizations.
- 1.667 “**Utilities**” means energy/power supplies, communications, data transmission and waste recovery, including electricity, natural gas/fuel oil, water, sanitary waste and storm water.
- 1.668 “**Utility Agreement**” means any agreement entered into by Project Co with a Utility Company in connection with the design removal, construction, installation, repair, preservation, relocation or maintenance of Utility Infrastructure in, on, under, over or adjacent to the Lands, and includes any site or other permits issued thereunder or pursuant thereto, all as amended, supplemented or replaced from time to time.
- 1.669 “**Utility Baseline Report**” means the Utility Baseline Report submitted by Project Co in its proposal in response to the Request for Proposals and included herein as Schedule 40 – Utility Baseline Report.
- 1.670 “**Utility Company**” means the owner or operator of any Utility Infrastructure.
- 1.671 “**Utility Company Self-Performed Works**” means the temporary and permanent installation, protection, removal, relocation, upgrading, reinstatement, restoration, downsizing, designing, and/or building works relating to Utility Infrastructure or New Utility Infrastructure carried out by a Utility Company under a Utility Agreement in connection with or as part of the Project Operations.
- 1.672 “**Utility Company Works Cash Allowance**” has the meaning given in Section 20.13 of the Project Agreement.
- 1.673 “**Utility Infrastructure**” means privately, publicly or cooperatively owned lines, facilities or systems for transmitting or distributing electricity, lighting, data, communications, gas, oil and petroleum products, water, storm water or sewage, wireless, or other similar commodity or substance which serve the public directly or indirectly, including underground, surface and overhead facilities as well as facilities which use common poles, ducts or conduits on a shared basis, and all related infrastructure.
- 1.674 “**Utility Works**” means, collectively, the Project Co Utility Works and the Utility Company Self Performed Works.
- 1.675 “**Utility Works Cost**” means the actual cost of performing the Utility Company Self Performed Works.
- 1.676 “**Utility Works Fee**” has the meaning given in Section 20.13(f) of the Project Agreement.
- 1.677 “**Variation**” has the meaning given in Schedule 21 - Variation Procedure.
- 1.678 “**Variation Confirmation**” has the meaning given in Schedule 21 - Variation Procedure.

- 1.679 “**Variation Directive**” has the meaning given in Schedule 21 - Variation Procedure.
- 1.680 “**Variation Enquiry**” has the meaning given in Schedule 21 - Variation Procedure.
- 1.681 “**Variation Procedure**” means the procedure set out in Schedule 21 - Variation Procedure.
- 1.682 “**Vehicle Maintenance Records**” has the meaning given in Section 16.5(c) of the Project Agreement.
- 1.683 “**Vehicles**” means , collectively, the Revenue Vehicles and the Maintenance Vehicles.
- 1.684 “**Via Rail**” means Via Rail Canada and its agents and representatives.
- 1.685 “**Volume Payment**” has the meaning given in Schedule 19 – Payment Mechanism.
- 1.686 “**Warning Notice**” has the meaning given in Section 30.4(a) of the Project Agreement.
- 1.687 [Not used]
- 1.688 “**WHMIS**” means the system for labelling, warning and worker education of Hazardous Substances used in the workplace, commonly referred to as workplace hazardous materials information system, prescribed by Applicable Law over the delivery, storage and use of Hazardous Substances in the Province of Ontario.
- 1.689 “***Workplace Safety and Insurance Act, 1997 (Ontario)***” means the *Workplace Safety and Insurance Act, 1997*, S.O. 1997, c. 16, Sch. A, as amended from time to time.
- 1.690 “**Works**” means all design and construction works to be performed by Project Co under the Project Agreement to meet the Output Specifications, including the supply of New Revenue Vehicles, the New Municipal Infrastructure Work, the Project Co Utility Works and the design, construction, refurbishing, alteration, integration, installation, testing, commissioning and completion of the System Infrastructure, including rectification of any Minor Deficiencies, and any other activities required to enable or facilitate the commencement of the Maintenance and Rehabilitation Services, and all other work under the Permits, Licences, Approvals and Authorizations, except for (i) all work which is expressly described in Schedule 32 – City Permits, Licences, Approvals and Authorizations as being the responsibility of the City, and (ii) any City Commissioning.
- 1.691 “**Works Area Micro-Schedule**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.692 “**Works Change in Law**” means any Change in Law that:
- (a) is not a Relevant Change in Law;
  - (b) occurs after Commercial Close;

- (c) requires Project Co to perform any work of alteration, addition, demolition, extension or variation in the quality or function of the System Infrastructure which is similar in nature to the Works but is not Works or capital replacement work which Project Co would otherwise be required to perform in order to comply with its obligations under the Project Agreement; and
  - (d) was not reasonably foreseeable at Commercial Close by an experienced contractor carrying out activities and/or performing design and/or other operations similar to those to be carried out and/or performed by any Project Co Party in relation to the Project.
- 1.693 “**Works Committee**” has the meaning given in Section 11.1(a) of the Project Agreement.
- 1.694 “**Works Report**” means those updates and reports to be issued by Project Co in accordance with Schedule 31 – Works Report Requirements.
- 1.695 “**Works Schedules**” has the meaning given in Schedule 12 – Works Scheduling Requirements.
- 1.696 “**Works Submittal**” has the meaning given in Section 1.1 of Schedule 10 - Review Procedure.
- 1.697 “**WSIB**” means the Ontario Workplace Safety and Insurance Board that is responsible for administering the *Workplace Safety and Insurance Act, 1997* (Ontario).
- 2. **Interpretation.** The Project Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:
  - 2.1 The tables of contents, headings, marginal notes and references to them in the Project Agreement are for convenience of reference only, shall not constitute a part of the Project Agreement, and shall not be taken into consideration in the interpretation of, or affect the meaning of, the Project Agreement.
  - 2.2 Except where the context requires otherwise (irrespective of whether some, but not all, references in a Schedule specifically refer to that Schedule or to other portions of the Project Agreement) references to specific Sections, Clauses, Paragraphs, Subparagraphs, Schedules, and other divisions of the Project Agreement are references to such Sections, Clauses, Paragraphs, or Subparagraphs of, Schedules to, or divisions of the Project Agreement and the terms “Section” and “Clause” are used interchangeably and are synonymous.
  - 2.3 Except where the context requires otherwise, references to specific Sections, Clauses, Paragraphs, Subparagraphs, Schedules, and other divisions of the Project Agreement followed by a number are references to the whole of the Section, Clause, Paragraph, Subparagraphs, Schedule or other division of the Project Agreement as applicable, bearing that number, including all subsidiary provisions containing that same number as a prefix.

- 2.4 Except where the context requires otherwise, references in the Output Specifications to specific Parts, Sections, Clauses, Paragraphs, Subparagraphs, Schedules, and other divisions of the Output Specifications shall be construed such that each such reference on a page of the Output Specifications will be read to be preceded by and to include the prefix Section number or other reference at the top of the applicable page, and all cross-references to any Section in Schedule 15 - Output Specifications shall be interpreted to include the applicable prefix Section number or other reference.
- 2.5 The Schedules to the Project Agreement are an integral part of the Project Agreement and a reference to the Project Agreement includes a reference to the Schedules.
- 2.6 All references in the Project Agreement to a Schedule shall be to a Schedule of the Project Agreement.
- 2.7 All capitalized terms used in a Schedule shall have the meanings given to such terms in Schedule 1 - Definitions and Interpretation, unless stated otherwise in a particular Schedule in which case such definition shall have the meaning given to it in that Schedule solely for the purposes of that Schedule.
- 2.8 The language of the Output Specifications and other documents comprising the Project Agreement is in many cases written in the imperative for brevity. Clauses containing instructions, directions or obligations are directed to Project Co and shall be construed and interpreted as if the words “Project Co shall” immediately preceded the instructions, directions or obligations.
- 2.9 Words importing persons or parties are to be broadly interpreted and include an individual, corporation, limited liability company, joint stock company, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.
- 2.10 Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.
- 2.11 Unless otherwise provided in the Project Agreement, all accounting and financial terms used in the Project Agreement shall be interpreted and applied in accordance with Canadian GAAP.
- 2.12 References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of the Project Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- 2.13 References to any Applicable Law, including any statutes or other Applicable Law specifically referred to herein, whether or not amendments or successors to such Applicable Law are referred to herein, are to be construed as references to that Applicable Law as from time to time amended or to any Applicable Law covering the

same or similar subject matter from time to time replacing, extending, consolidating or amending the same.

- 2.14 References to a statute shall include all regulations, by-laws, ordinances and orders made under or pursuant to the statute.
- 2.15 References to persons shall include their successors and assigns. References to a public organization shall include their successors and assigns, and if a public organization ceases to exist or ceases to perform its functions without a successor or assign, references to such public organization shall be deemed to include a reference to any public organization or any organization or entity which has taken over either or both the functions and responsibilities of such public organization.
- 2.16 A reference in the Project Agreement or in any Project Document to any right, power, obligation or responsibility of any Governmental Authority shall be deemed to be a reference to the Governmental Authority that, pursuant to Applicable Laws has such right, power, obligation or responsibility at the relevant time.
- 2.17 References to a deliberate act or omission or deliberate or negligent act or omission of any City Party shall be construed having regard to the interactive nature of the activities of the City Party and Project Co and further having regard to:
- (a) acts contemplated by the Output Specifications;
  - (b) acts or omissions in the ordinary course of the Governmental Activities and expressly or reasonably inferred from the Output Specifications to be taken into account by Project Co in the performance of the Maintenance and Rehabilitation Services; or
  - (c) acts otherwise provided for in the Project Agreement.
- 2.18 The words in the Project Agreement shall bear their natural meaning.
- 2.19 Each of Project Co's and the City's respective obligations shall be construed as separate obligations owed to the other.
- 2.20 References containing terms such as:
- (a) "hereof", "herein", "hereto", "hereinafter", and other terms of like import are not limited in applicability to the specific provision within which such references are set forth but instead refer to the Project Agreement taken as a whole; and
  - (b) "includes" and "including", whether or not used with the words "without limitation" or "but not limited to", shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean "includes without limitation" and "including without limitation".

- 2.21 In construing the Project Agreement, the rule known as the *ejusdem generis* rule shall not apply nor shall any similar rule or approach apply to the construction of the Project Agreement and, accordingly, general words introduced or followed by the word “other” or “including” or “such as” or “in particular” shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- 2.22 Where the Project Agreement states that an obligation shall be performed “no later than” or “within” or “by” a stipulated date or event which is a prescribed number of days after a stipulated date or event the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- 2.23 Where the Project Agreement states that an obligation shall be performed “no later than” or “by” a prescribed number of days before a stipulated date or event or “by” a date which is a prescribed number of days before a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- 2.24 Where the Project Agreement states that an obligation shall be performed “on” a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- 2.25 Any reference to time of day or date means the local time or date in Ottawa, Ontario. Any reference to a stipulated “day” which is not specifically referred to as a “Business Day” shall be deemed to be a calendar day measured from midnight to midnight.
- 2.26 Unless otherwise indicated, time periods will be strictly construed.
- 2.27 Whenever the terms “will” or “shall” are used in the Project Agreement in relation to Project Co or the City they shall be construed and interpreted as synonymous and to read “Project Co shall” or “the City shall” as the case may be.
- 2.28 Any reference to currency is to Canadian currency and any amount advanced, paid or calculated is to be advanced, paid or calculated in Canadian currency.
- 2.29 Unless otherwise identified in the Project Agreement, all units of measurement in any documents submitted by Project Co to the City shall be in accordance with the SI system of units.
- 2.30 Terms not defined herein and used in the Project Agreement which have a technical meaning commonly understood by the transit system construction and maintenance industry in Ontario will be construed as having that meaning unless the context otherwise requires.
- 2.31 Save where expressly stated otherwise, references to amounts or sums expressed to be “indexed” or “index linked” are references to amounts or sums which require adjustment to reflect the effects of inflation. Such adjustment shall be calculated in accordance with the following formula:

Adjusted amount or sum = Amount or sum x  $\frac{CPI_n}{CPI_o}$

- 2.32 The terms “properly inferable”, “readily apparent” and “readily discoverable” as used in the Project Agreement, shall be interpreted by taking into consideration Project Co’s and any Project Co Party’s experience and the investigations, inspections and examinations of the Background Information and in respect of the Lands carried out by Project Co or by any Project Co Party during the Request for Proposals process or other due diligence; and by taking into consideration reasonable, normal course and industry standard investigations, inspections or other due diligence; in each case in accordance with Good Industry Practice.

## **SCHEDULE 2**

### **COMPLETION DOCUMENTS**

In this Schedule 2, “certified” shall mean that the relevant document is certified as a true and complete copy in full force and effect and unamended as of the date of the relevant certificate by an officer or director of the relevant corporation. Any capitalized term not defined in this Schedule 2 shall have the meaning given to such term in the Project Agreement.

#### **1. DOCUMENTS TO BE DELIVERED BY PROJECT CO**

Unless an original document is specifically required, a certified copy of each of the following documents (in each case, executed by the parties to such agreement other than the City and the Independent Certifier and in form and substance satisfactory to the City, acting reasonably) is to be delivered by Project Co to the City on or prior to the Financial Close Target Date:

- 1.1 an original of the Project Agreement;
- 1.2 an original of the Custody Agreement;
- 1.3 an original of the Lenders’ Direct Agreement;
- 1.4 an original of the Construction Contractor’s Direct Agreement;
- 1.5 an original of the Maintenance and Rehabilitation Contractor’s Direct Agreement;
- 1.6 an original of the Independent Certifier Agreement;
- 1.7 an original of the Insurance Trust Agreement;
- 1.8 an original Notice of appointment of the Project Co Representative;
- 1.9 an original of the undertaking and acknowledgement in the form attached as Appendix A to this Schedule 2;
- 1.10 not used;
- 1.11 the Construction Contract;
- 1.12 the Maintenance and Rehabilitation Contract;
- 1.13 a certificate of insurance and draft policies of insurance for the insurances required to be taken out by the Construction Contractor for the period prior to the Substantial Completion Date in accordance with the Project Agreement;
- 1.14 one (1) printed copy of the Financial Model (as revised pursuant to Section 2.3(d) of the Project Agreement, if applicable) and two (2) on universal serial bus (USB) flash drive;
- 1.15 a certificate of an officer of Project Co certifying:

- (a) a true copy of the Financial Model audit report dated [REDACTED] prepared by [REDACTED]; and
  - (b) that the Financial Model algorithms have not changed from the audit report referred to in (a) above;
- 1.16 the PBS-1, in form and substance satisfactory to the City;
- 1.17 a certificate of an officer of Project Co substantially in the form attached as Appendix B to this Schedule 2;
- 1.18 a certificate of an officer of each of the Construction Contractor and the Maintenance and Rehabilitation Contractor substantially in the form attached as Appendix B to this Schedule 2;
- 1.19 an original of the opinion from counsel to Project Co, the Construction Contractor and the Maintenance and Rehabilitation Contractor substantially in the form attached as Appendix C to this Schedule 2 and otherwise acceptable to the City and its counsel;
- 1.20 a final Lane Closure Target Letter;
- 1.21 not used;
- 1.22 [intentionally deleted];
- 1.23 written confirmation that the list of Key Individuals with respect to the Works submitted by Project Co as part of its proposal in the RFP process, is unchanged;
- 1.24 evidence that the COR-Qualified Construction Project Co Party has its COR Certification in good standing (or to the extent that the COR-Qualified Construction Project Co Party does not have its COR Certification by Financial Close, evidence that the COR-Qualified Construction Project Co Party has its current OHSAS 18001 Accreditation in good standing and has made an application to IHSA for its COR Certification);
- 1.25 the form of the following documents:
  - (i) Maintenance and Rehabilitation Contractor:
    - A. the Maintenance LC (as defined in Schedule 4 – Funding Requirements); and
    - B. the Maintenance PCG (as defined in Schedule 4 – Funding Requirements);
- 1.26 a form of the Blocked Accounts Agreement to be dated on the Substantial Completion Date, in form and substance satisfactory to the parties thereto; and
- 1.27 the Equity Contribution Agreement.

## **2. DOCUMENTS TO BE DELIVERED BY THE CITY**

Unless an original document is specifically required, a certified copy of each of the following documents (in each case, where the City is a party to such document, executed by the City and, if applicable, any

City Party or Governmental Authority) is to be delivered by the City to Project Co on or prior to the Financial Close Target Date:

- 2.1 an original of the Project Agreement;
- 2.2 an original of the Custody Agreement;
- 2.3 an original of the Lenders' Direct Agreement;
- 2.4 an original of the Construction Contractor's Direct Agreement;
- 2.5 an original of the Maintenance and Rehabilitation Contractor's Direct Agreement;
- 2.6 an original of the Independent Certifier Agreement (executed by the City and the Independent Certifier);
- 2.7 an original of the Insurance Trust Agreement;
- 2.8 an original Notice of appointment of the City Representative;
- 2.9 such other documents as the Parties may agree, each acting reasonably;
- 2.10 a certificate of an officer of the City confirming that the representations and warranties of the City in Section 5.2(a) of the Project Agreement remain true and correct as of the date of Financial Close in the form attached as Appendix D to this Schedule 2; and
- 2.11 an original opinion from counsel to the City and such other City Parties as Project Co may reasonably require in respect of customary corporate and enforceability matters and otherwise acceptable to Project Co and its counsel, addressed to Project Co, the Lenders' Agent, the Construction Contractor and the Maintenance and Rehabilitation Contractor.

APPENDIX A

FORM OF UNDERTAKING AND ACKNOWLEDGEMENT

**TO:** City of Ottawa (the “City”)

**RE:** Project agreement (as amended, supplemented or modified from time to time, the “**Project Agreement**”) dated the [•] day of [•], 20• between the City and [•] (“**Project Co**”)

---

1. The undersigned acknowledges that:
  - (a) The Project will proceed as an alternative financing and procurement project and complies with the principles which guide the financing and procurement of public infrastructure projects in Ontario.
  - (b) Consistent with the principle of appropriate public ownership/control, public ownership of assets will be preserved in the public sector.
2. Capitalized terms used but not defined herein have the respective meanings ascribed thereto in the Project Agreement.

APPENDIX B

FORM OF PROJECT CO/PROJECT CO PARTY OFFICER'S CERTIFICATE

Certificate of an Officer of

[•]

(the "Corporation")

TO: CITY OF OTTAWA ("THE CITY")

AND TO: NORTON ROSE FULBRIGHT CANADA LLP

AND TO: [ ]

I, [•], being the [•] of the Corporation and an authorized signatory of the Corporation and being duly authorized by the Corporation to deliver this certificate, hereby make the following certifications and confirmations for and on behalf of the Corporation and without incurring personal liability and that the same may be relied upon by you without further inquiry:

1. Constatng Documents

- (a) The Corporation is a subsisting corporation duly incorporated under the laws of [the Province of Ontario].
- (b) Attached hereto as **Schedule "A"** are true and complete copies of the articles, together with all amendments thereto, of the Corporation (the "**Articles**"). The Articles are in full force and effect on the date hereof and no other articles have been issued and no proceeding has been taken or is contemplated to the date hereof to authorize the Corporation to amend, surrender or cancel the Articles.
- (c) Attached hereto as **Schedule "B"** are true and complete copies of the by-laws of the Corporation (the "**By-laws**") enacted on or before the date hereof. The By-laws have been in full force and effect from and after the date thereof as set out therein and are in full force and effect, unamended as of the date hereof. No proceeding has been taken to the date hereof to authorize the Corporation to amend the By-laws and neither the directors nor the shareholders of the Corporation have passed, confirmed or consented to any resolutions amending or varying the By-laws.
- (d) Attached hereto as **Schedule "C"** is a true and complete copy of a unanimous shareholders' agreement between the shareholders of the Corporation and the Corporation (the "**Unanimous Shareholders' Agreement**") executed on or before the date hereof. The Unanimous Shareholders' Agreement has been in full force and effect from and after the date thereof as set out therein and is in full force and effect, unamended as of the date hereof.
- (e) The minute books and corporate records of the Corporation made available to [•] are the original minute books and corporate records of the Corporation and contain all minutes of meetings, resolutions and proceedings of the shareholders and directors of the

Corporation to the date hereof and there have been no meetings, resolutions or proceedings authorized or passed by the shareholders or directors of the Corporation to the date hereof not reflected in such minute books and corporate records. Such minute books and corporate records are true, complete and correct in all material respects and there are no changes, additions or alterations necessary to be made thereto to make such minute books and corporate records true, complete and correct in all material respects.

- (f) At the date hereof, no winding-up, liquidation, dissolution, insolvency, bankruptcy, amalgamation, arrangement, reorganization or continuation proceedings in respect of the Corporation have been commenced or are being contemplated by the Corporation, and the Corporation has no knowledge of any such proceedings having been commenced or contemplated in respect of the Corporation by any other party.
- (g) At the date hereof, the Corporation is up-to-date in the filing of all returns and other documents required to be filed by it by governmental authorities, including under corporate, securities and tax legislation, and no notice of any proceedings to cancel its certificate of incorporation or otherwise to terminate its existence has been received by the Corporation.
- (h) Pursuant to the Unanimous Shareholders' Agreement, the powers of the directors of the Corporation to manage the business and affairs of the Corporation, whether such powers arise from the **[Business Corporations Act (Ontario) (the "Act")]**, the Articles or the By-laws of the Corporation, or otherwise, are restricted to the fullest extent permitted by law, and, in accordance with the Act and the Unanimous Shareholders' Agreement, the shareholders of the Corporation have and enjoy and may exercise and perform all the rights, powers, and duties of the directors of the Corporation to manage the business and affairs of the Corporation.
- (i) There are no provisions in the Articles, By-laws, Unanimous Shareholders' Agreement or in any other agreement binding on the Corporation which:
  - (i) restrict or limit the powers of the Corporation to enter into:
    - (1) a certain project agreement with the City made as of [●], 20● (as the same may be amended, supplemented, restated or otherwise modified from time to time, the "**Project Agreement**") pursuant to which the Corporation will design, build, finance and maintain a new light rail transit system;
    - (2) not used;
    - (3) direct agreements between the Contractors, the Corporation, **[the Guarantors]** and the City;
    - (4) **[Note to Proponents: List other documents delivered at Financial Close.]**,
  - (collectively, the "**Documents**") or

- (ii) restrict or limit the authority of the directors or shareholders of the Corporation by resolution to delegate the powers set out in subparagraph (i) to a director or an officer of the Corporation.

## 2. Resolutions

- (a) Annexed hereto, forming part hereof and marked as **Schedule “D”** are true and complete copies of the resolutions of the **[directors/shareholders]** of the Corporation (the “**Resolutions**”), which have been duly and validly passed in accordance with applicable law, constituting authority and approval for the Corporation, *inter alia*, to enter into the Documents. The Resolutions are the only resolutions of the Corporation pertaining to the subject matter thereof and the same are in full force and effect, unamended as of the date hereof.
- (b) The authorization, execution and delivery of each Document contemplated in the Resolutions, and the performance by the Corporation of its obligations thereunder, do not constitute or result in a violation or breach or default under:
  - (i) the Articles, By-laws or the Unanimous Shareholders’ Agreement;
  - (ii) to the best of my knowledge and belief after due diligence, any order of any Canadian or **[Ontario]** governmental body by which it is bound;
  - (iii) to the best of my knowledge and belief after due diligence, the terms of any agreement or instrument under which any of its property or assets is bound; or
  - (iv) to the best of my knowledge and belief after due diligence, any writ, judgment, injunction, determination or award which is binding on the Corporation or any of its properties.
- (c) To the best of my knowledge and belief after due diligence, there are no actions, suits, proceedings, or investigations pending or threatened in writing against the Corporation at law or in equity before any Governmental Authority or arbitral body (whether or not covered by insurance) of which the Corporation has received written notice and that individually or in the aggregate could result in any material adverse effect on the business, properties, or assets, or the condition, financial or otherwise, of the Corporation or in any impairment of its ability to perform its obligations under the Documents, and the Corporation has no knowledge of any violation or default with respect to any order, writ, injunction, or decree of any Governmental Authority or arbitral body that could result in any such material adverse effect or impairment.
- (d) To the best of my knowledge and belief after due diligence, no consent, approval or other order of any Canadian or **[Ontario]** Governmental Authority which has not been obtained is required to permit the Corporation to execute and deliver the Documents.

## 3. No Breach or Default

Neither the execution and delivery by the Corporation of the Documents nor the consummation of the transactions therein contemplated nor the fulfilment or compliance with the terms thereof will contravene or result in a breach of any of the terms, conditions or provisions of, or constitute a default under the

Articles, By-laws, Unanimous Shareholders' Agreement or under any other agreement binding on the Corporation.

**4. Specimen Signatures**

The persons whose names are set forth below are, at the date hereof, officers and/or directors of the Corporation, duly elected or appointed to the office or offices set forth opposite their respective names and authorized to execute the Documents on behalf of the Corporation. The signatures set forth opposite their respective names are the true signatures of those persons:

NAME	POSITION	SIGNATURE

**5. Capital**

Listed below are all of the issued and outstanding shares in the capital of the Corporation and the registered owner of such shares:

ISSUED SHARES	REGISTERED OWNER
---------------	------------------

Attached hereto as **Schedule "E"** are true copies of all certificates in respect of such issued and outstanding shares. The Corporation has issued no securities, including (without limitation) securities convertible or exchangeable into shares and/or securities in respect of debt, other than such issued and outstanding shares as are listed above.

DATED this \_\_\_\_ day of \_\_\_\_\_, 20●.

Dear Sirs/Mesdames:

**Re: Trillium Line Extension – Ottawa Stage 2 LRT Project**

We have acted as counsel to [●] (“**Project Co**”), [●] (the “**Construction Contractor**”) and [●] (the “**Maintenance and Rehabilitation Contractor**”) in connection with the alternative financing and procurement transaction whereby Project Co has agreed to enter into a design, build, finance and maintain agreement for the extension of the Trillium Line light rail transit system in the City of Ottawa, Ontario. **[Note to Proponents: Additional parties to be added depending on consortium structure and/or the financing package.]**

This opinion is being delivered to the City of Ottawa (the “**City**”) and their counsel pursuant to Section 1.19 of Schedule 2 to the project agreement made as of [●] between the City and Project Co (as the same may be amended, supplemented, restated or otherwise modified from time to time, the “**Project Agreement**”).

All capitalized terms used but not otherwise defined in this opinion shall have the respective meanings ascribed thereto in the Project Agreement.

In our capacity as counsel to Project Co, the Construction Contractor and the Maintenance and Rehabilitation Contractor, we have participated in the preparation and negotiation, and have examined an executed copy, of each of the following documents (unless otherwise indicated, all documents are dated as of [●]):

1. the Project Agreement; and
2. the following project documents (collectively, the “**Implementation Documents**”):
  - (a) the Construction Contract;
  - (b) the Maintenance and Rehabilitation Contract;

- (c) the Lenders' Direct Agreement;
- (d) the Construction Contractor's Direct Agreement;
- (e) the Maintenance and Rehabilitation Contractor's Direct Agreement;
- (f) not used;
- (g) the Insurance Trust Agreement;
- (h) the Custody Agreement;
- (i) the Independent Certifier Agreement; and
- (j) the Performance Guarantees.

The Project Agreement and the Implementation Documents are hereinafter collectively referred to as the **"Documents"**, and each is individually referred to as a **"Document"**. **[Note to Proponents: Additional documents to be added depending on consortium structure and/or the financing package.]**

We are qualified to practise law in the Province of Ontario. We have made no investigation of the laws of any jurisdiction other than Ontario, and the opinions expressed below are confined to the laws of Ontario and the federal laws of Canada applicable therein as at the date hereof.

We do not act as corporate counsel to **[Project Co, the Construction Contractor or the Maintenance and Rehabilitation Contractor]**, nor have we participated in the general maintenance of their corporate records and corporate proceedings. Therefore, in expressing certain of the opinions below, we have, where indicated, relied exclusively, and without any independent investigation or enquiry, on certificates of public officials and a certificate of an officer of each of Project Co, the Construction Contractor and the Maintenance and Rehabilitation Contractor dated as of the date hereof (the **"Officer's Certificates"**) as to certain factual matters.

### **Searches and Reliance**

We have conducted, or have caused to be conducted, the searches identified in Schedule "A" (the **"Searches"**) for filings or registrations made in those offices of public record listed in Schedule "A". The Searches were conducted against the current name and all former names of Project Co, the Construction Contractor and the Maintenance and Rehabilitation Contractor (including, in each case, both the English and French versions, if any). The results of the Searches are set out in Schedule "A".

We have also made such investigations and examined originals or copies, certified or otherwise identified to our satisfaction, of such certificates of public officials and of such other certificates, documents and records as we have considered necessary or relevant for purposes of the opinions expressed below, including, without limitation, the Officer's Certificates.

We have relied exclusively, and without any independent investigation or enquiry, on the Officer's Certificates and the certificates of public officials with respect to certain factual matters.

In connection with the opinions set forth in paragraphs 1, 2 and 3 below, we have relied exclusively on certificates of status issued by the **[Ministry of Government Services (Ontario)]** of even date, copies of which are attached as Schedule "B".

In connection with the opinions set forth in paragraphs 5, 8, 11, 17 and 20 below, we have relied exclusively, and without any independent investigation or enquiry, upon the opinion of [●] dated [●] (the “**CC Opinion**”), a copy of which has been delivered to you. To the extent that the CC Opinion contains assumptions, qualifications, limitations or definitions, or is expressed as relying on any certificate(s) or other documents identified therein, the opinions herein expressed in reliance on the CC Opinion should be read as incorporating the identical assumptions, qualifications, limitations, definitions and reliances.

In connection with the opinions set forth in paragraphs 6, 9, 12, 18 and 21 below, we have relied exclusively, and without any independent investigation or enquiry, upon the opinion of [●] dated [●] (the “**Maintenance Contractor Opinion**”), a copy of which has been delivered to you. To the extent that the Maintenance Contractor Opinion contains assumptions, qualifications, limitations or definitions, or is expressed as relying on any certificate(s) or other documents identified therein, the opinions herein expressed in reliance on the Maintenance Contractor Opinion should be read as incorporating the identical assumptions, qualifications, limitations, definitions and reliances.

### **Assumptions**

For the purposes of the opinions expressed herein, we have assumed:

1. The genuineness of all signatures, the authenticity of all documents submitted to us as originals, the conformity to originals of all documents submitted to us as certified, true, conformed, photostatic or notarial copies or facsimiles thereof and the authenticity of the originals of such certified, true, conformed, photostatic or notarial copies or facsimiles.
2. Each of the parties (other than Project Co, the Construction Contractor and the Maintenance and Rehabilitation Contractor) to each of the Documents is and was, at all relevant times, a subsisting corporation, partnership, limited partnership, limited liability company or trust, as applicable, under the laws of its jurisdiction of formation.
3. Each of the parties (other than Project Co, the Construction Contractor and the Maintenance and Rehabilitation Contractor) has (and had) the corporate power, authority and capacity to own its property and assets and to carry on its business as such business is now (or as was then) being carried on by it, has (or had) all requisite corporate power, authority and capacity to execute and deliver each Document to which it is party and to perform its obligations thereunder, has taken all necessary corporate action, as applicable, to authorize the execution and delivery of each Document to which it is a party and the performance of its obligations thereunder, and has duly executed and delivered each Document to which it is a party and each Document to which it is a party is a legal, valid and binding obligation of such party enforceable against it in accordance with its terms.
4. The completeness, truth and accuracy of all facts set forth in the Officer’s Certificates.
5. The completeness, truth and accuracy of all facts set forth in official public records and certificates and other documents supplied by public officials.
6. Value has been given by each of the parties (other than Project Co, the Construction Contractor and the Maintenance and Rehabilitation Contractor) to Project Co, the Construction Contractor and the Maintenance and Rehabilitation Contractor.

### **Opinions**

Based upon and subject to the foregoing, and to the qualifications, exceptions and limitations hereinafter expressed, we are of the opinion that, as of the date hereof:

### **INCORPORATION AND EXISTENCE**

1. Project Co is a corporation incorporated under the laws of **[the Province of Ontario]** and has not been dissolved.
2. The Construction Contractor is a corporation incorporated under the laws of **[the Province of Ontario]** and has not been dissolved.
3. The Maintenance and Rehabilitation Contractor is a corporation incorporated under the laws of **[the Province of Ontario]** and has not been dissolved.

### **CORPORATE POWER AND CAPACITY**

4. Project Co has the corporate power and capacity to own or lease its properties and assets, to carry on its business as it is currently being conducted and as it is contemplated to be conducted under the Project Agreement, and to enter into and perform its obligations under each of the Documents to which it is a party.
5. The Construction Contractor has the corporate power and capacity to own or lease its properties and assets, to carry on its business as it is currently being conducted and as it is contemplated to be conducted under the Documents, and to enter into and perform its obligations under each of the Documents to which it is a party.
6. The Maintenance and Rehabilitation Contractor has the corporate power and capacity to own or lease its properties and assets, to carry on its business as it is currently being conducted and as it is contemplated to be conducted under the Documents, and to enter into and perform its obligations under each of the Documents to which it is a party.

### **CORPORATE AUTHORIZATION**

7. Project Co has taken all necessary corporate action to authorize the execution and delivery of, and the performance of its obligations under, each of the Documents to which it is a party.
8. The Construction Contractor has taken all necessary corporate action to authorize the execution and delivery of, and the performance of its obligations under, each of the Documents to which it is a party.
9. The Maintenance and Rehabilitation Contractor has taken all necessary corporate action to authorize the execution and delivery of, and the performance of its obligations under, each of the Documents to which it is a party.

### **EXECUTION AND DELIVERY**

10. Project Co has duly executed and delivered each of the Documents to which it is a party.

11. The Construction Contractor has duly executed and delivered each of the Documents to which it is a party.
12. The Maintenance and Rehabilitation Contractor has duly executed and delivered each of the Documents to which it is a party.

#### **ENFORCEABILITY**

13. Each of the Documents to which Project Co is a party constitutes a legal, valid and binding obligation of Project Co, enforceable against it in accordance with its terms.
14. Each of the Documents to which the Construction Contractor is a party constitutes a legal, valid and binding obligation of the Construction Contractor, enforceable against it in accordance with its terms.
15. Each of the Documents to which the Maintenance and Rehabilitation Contractor is a party constitutes a legal, valid and binding obligation of the Maintenance and Rehabilitation Contractor, enforceable against it in accordance with its terms.

#### **NO BREACH OR DEFAULT**

16. The execution and delivery by Project Co of the Documents to which it is a party does not, and the performance by Project Co of its obligations under each such Document in accordance with its terms will not, breach or constitute a default under (i) its articles, by-laws or unanimous shareholders' agreement, or (ii) the provisions of any law, statute, rule or regulation to which Project Co is subject.
17. The execution and delivery by the Construction Contractor of the Documents to which it is a party does not, and the performance by the Construction Contractor of its obligations under each such Document in accordance with its terms will not, breach or constitute a default under (i) its articles, by-laws or unanimous shareholders' agreement, or (ii) the provisions of any law, statute, rule or regulation to which the Construction Contractor is subject.
18. The execution and delivery by the Maintenance and Rehabilitation Contractor of the Documents to which it is a party does not, and the performance by the Maintenance and Rehabilitation Contractor of its obligations under each such Document in accordance with its terms will not, breach or constitute a default under (i) its articles, by-laws or unanimous shareholders' agreement, or (ii) the provisions of any law, statute, rule or regulation to which the Maintenance and Rehabilitation Contractor is subject.

#### **REGULATORY APPROVALS**

19. No authorization, consent, permit or approval of, or other action by, or filing with or notice to, any governmental agency or authority, regulatory body, court, tribunal or other similar entity having jurisdiction is required in connection with the execution and delivery by Project Co of the Documents to which it is a party and the performance of its obligations thereunder.
20. No authorization, consent, permit or approval of, or other action by, or filing with or notice to, any governmental agency or authority, regulatory body, court, tribunal or other similar entity having jurisdiction is required in connection with the execution and delivery by the Construction

Contractor of the Documents to which it is a party and the performance of its obligations thereunder.

21. No authorization, consent, permit or approval of, or other action by, or filing with or notice to, any governmental agency or authority, regulatory body, court, tribunal or other similar entity having jurisdiction is required in connection with the execution and delivery by the Maintenance and Rehabilitation Contractor of the Documents to which it is a party and the performance of its obligations thereunder.

### **Qualifications**

Our opinions herein are subject to the following qualifications and reservations, namely:

1. The enforceability of any Document and the rights and remedies set out therein or any judgment arising out of or in connection therewith is subject to and may be limited by any applicable bankruptcy, reorganization, winding-up, insolvency, moratorium or other laws of general application affecting creditors' rights from time to time in effect.
2. The enforceability of each of the Documents and the rights and remedies set out therein is subject to and may be limited by general principles of equity, and no opinion is given as to any specific remedy that may be granted, imposed or rendered, including equitable remedies such as those of specific performance and injunction, or the availability of equitable defences.
3. The enforceability of any Document will be subject to the limitations contained in the *Limitations Act, 2002* (Ontario), and we express no opinion as to whether a court may find any provision of any Document to be unenforceable as an attempt to vary or exclude a limitation period under that Act.
4. Pursuant to the *Currency Act* (Canada), a judgment in money rendered by a court in the Province of Ontario must be awarded in Canadian currency and such judgment may be based on a rate of exchange in effect other than the day of payment of the judgment.
5. To the extent that a particular contractual provision is characterized by a court as a penalty and not as a genuine pre-estimate of damages, it will not be enforceable.
6. A court may not treat as conclusive those certificates and determinations which the Documents state are to be so treated.
7. A receiver or receiver and manager appointed pursuant to the provisions of any Document, for certain purposes, may not be treated by a court as being solely the agent of Project Co notwithstanding any agreement to the contrary.
8. The ability to recover or claim for certain costs or expenses may be subject to judicial discretion.
9. With respect to any provisions of the Documents pursuant to which the parties to such Documents are permitted or required to submit a dispute arising out of such Documents to arbitration, we express no opinion as to the enforceability of such arbitration provisions in all circumstances since under the *Arbitration Act, 1991* (Ontario) a court of competent jurisdiction in Ontario may, in its discretion and upon certain grounds, refuse to stay judicial proceedings in which event an arbitration under such arbitration provisions may not be commenced or continued.

In addition, the *Arbitration Act, 1991* (Ontario) provides that a court may hear an appeal of an arbitration award on a question of law, or set aside an arbitration award or declare it invalid, in each case on certain prescribed grounds.

10. Any requirement in any of the Documents that interest be paid at a higher rate after than before default may not be enforceable.
11. The effectiveness of provisions which purport to relieve a person from a liability or duty otherwise owed may be limited by law, and provisions requiring indemnification or reimbursement may not be enforced by a court, to the extent that they relate to the failure of such person to perform such duty or liability.
12. No opinion is expressed as to the enforceability of any provision contained in any Document which purports to sever from the Document any provision therein which is prohibited or unenforceable under applicable law without affecting the enforceability or validity of the remainder of the document.
13. No opinion is expressed regarding any waiver of service of process, presentment, demand, protest or notice of dishonour which may be contained in any of the Documents.
14. Any award of costs is in the discretion of a court of competent jurisdiction.
15. The enforceability of rights of indemnity set out in the Documents may be limited under applicable law to the extent that they directly or indirectly relate to liabilities imposed by law on the City for which it would be contrary to public policy to require Project Co to indemnify the City or to the extent that they constitute the indirect enforcement of a foreign revenue or penal law.

This opinion is being delivered solely in connection with the transaction addressed herein and may not be relied upon by any person other than the addressees, and their successors and permitted assigns, or for any purpose other than the transaction addressed herein.

Yours very truly,

AND TO: [\_\_\_\_\_]

AND TO: [\_\_\_\_\_]

RE: Project agreement (as amended, supplemented or modified from time to time, the "Project Agreement") dated the [●] day of [●], 201[●] between THE CITY OF OTTAWA ("City"), and [\_\_\_\_\_] ("Project Co")

I, [●], the [●] of the City and an authorized signatory of the City and being duly authorized by the City to deliver this certificate, hereby make the following certifications and confirmations for and on behalf of the City and without incurring personal liability and that the same may be relied upon by you without further inquiry:

1. Attached hereto as [●] is a true and complete copy of (i) the resolutions of the directors of the City regarding the execution of public works projects assigned to the City and certain other matters set forth therein; and (ii) an excerpt of the resolutions of the directors of the City relating to delegation of signing authority (collectively, the "[●]"), which have been duly and validly passed in accordance with applicable law. The Execution Resolutions are the only resolutions of the City pertaining to the subject matter thereof and the same is in full force and effect, unamended as of the date hereof.
2. Attached hereto as **Schedule "B"** is a true and complete copy of the resolutions of the directors of the Corporation approving the selection of Project Co as the designated proponent for the Project (the "**Project Resolutions**"). The Project Resolutions are the only resolutions of the City pertaining to the subject matter thereof and the same is in full force and effect, unamended as of the date hereof.
3. The following named persons, on or as of the date hereof, are duly elected or appointed officers of the City, as evidenced by the holding of the office or offices set forth opposite their names, are proper signing officers of the City and are authorized to execute and deliver Contracts Documents (as such a term is defined in the Execution Resolutions referenced in Item 1(i) above) relating to the Project (as defined in the Project Agreement) on behalf of the City.

The signatures set forth opposite their respective names are the true signatures of those persons.

**SCHEDULE 3**

**CUSTODY AGREEMENT**

**THIS AGREEMENT** is made as of the 28<sup>th</sup> day of March, 2019

**BETWEEN:**

**THE CITY OF OTTAWA**

(the “City”)

**AND:**

[REDACTED]

(the “Custodian”)

**AND:**

[REDACTED]

(the “Lenders’ Agent”)

**AND:**

**TRANSITNEXT GENERAL PARTNERSHIP [REDACTED]**

(“Project Co”)

**WHEREAS:**

- A. The City and Project Co (collectively, the “**PA Parties**” and each, a “**PA Party**”) have entered into the Project Agreement.
- B. Pursuant to the terms of the Project Agreement, the PA Parties wish to appoint the Custodian, and the Custodian wishes to accept such appointment, to perform certain services in connection with the Project Agreement.
- C. The PA Parties and the Custodian wish to enter into this Custody Agreement in order to record the terms by which the Custodian shall perform such services, in accordance with Applicable Law.

**NOW THEREFORE** in consideration of the mutual covenants and agreements of the PA Parties and the Custodian herein contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the PA Parties and the Custodian covenant and agree as follows:

## 1. DEFINITIONS

In this Custody Agreement, including the recitals and appendices, unless the context indicates a contrary intention, terms which are defined in the Project Agreement (and not otherwise defined in this Custody Agreement) shall have meanings given to them in the Project Agreement. Any capitalized term not defined in this Schedule 3 shall have the meaning given to such term in the Project Agreement and the following terms shall have the following meanings:

- (a) **“City Signatories”** has the meaning given in Section 6(a)(i).
- (b) **“Material”** means hard and electronic copies of the Financial Model.
- (c) **“PA Parties”** means the City and Project Co, and **“PA Party”** means the City or Project Co, as the context requires.
- (d) **“Party”** means the City, the Custodian, Project Co or the Lenders’ Agent, and **“Parties”** means the City, the Custodian, Project Co and the Lenders’ Agent.
- (e) **“Project Agreement”** means the project agreement made on or about March 28, 2019 between the City and Project Co.
- (f) **“Project Co Signatory”** has the meaning given in Section 6(a)(ii).
- (g) **“Step-Out Date”** has the meaning given in Section 14(e).

## 2. Interpretation

This Custody Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings in this Custody Agreement are for convenience of reference only, shall not constitute a part of this Custody Agreement, and shall not be taken into consideration in the interpretation of, or affect the meaning of, this Custody Agreement.
- (b) Unless the context otherwise requires, references to specific Sections, Paragraphs, Subparagraphs, and other divisions are references to such Sections, Paragraphs, Subparagraphs, or divisions of this Custody Agreement and the terms “Section” and “Clause” are used interchangeably and are synonymous.
- (c) Words importing persons or parties are to be broadly interpreted and include an individual, corporation, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.
- (d) Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.

- (e) References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of this Custody Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- (f) The words in this Custody Agreement shall bear their natural meaning.
- (g) References containing terms such as:
  - (i) “hereof”, “herein”, “hereto”, “hereinafter”, and other terms of like import are not limited in applicability to the specific provision within which such references are set forth but instead refer to this Custody Agreement taken as a whole; and
  - (ii) “includes” and “including”, whether or not used with the words “without limitation” or “but not limited to”, shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean “includes without limitation” and “including without limitation”.
- (h) In construing this Custody Agreement, the rule known as the *ejusdem generis* rule shall not apply nor shall any similar rule or approach to the construction of this Custody Agreement and, accordingly, general words introduced or followed by the word “other” or “including” or “in particular” shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (i) Where this Custody Agreement states that an obligation shall be performed “no later than” or “within” or “by” a stipulated date or event which is a prescribed number of days after a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (j) Where this Custody Agreement states that an obligation shall be performed “on” a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (k) Any reference to time of day or date means the local time or date in Ottawa, Ontario.
- (l) Unless otherwise indicated, time periods will be strictly construed.
- (m) Whenever the terms “will” or “shall” are used in this Custody Agreement they shall be construed and interpreted as synonymous and to read “shall”.

### **3. Project Co’s Duties and Warranties**

- (a) The City will, together with Project Co, verify the identity and consistency of one copy of the Material, which shall be delivered by Project Co to the Custodian on the date of this Custody Agreement.
- (b) Project Co shall at all times ensure that the Material as delivered to the Custodian is capable of being used to generate the latest version of the Financial Model issued to the City and shall deliver further copies of the Material to the Custodian as and when necessary.

- (c) Upon creation of any new versions of the Financial Model and within 30 days from receipt of a notice served upon it by the Custodian under the provisions of Section 4(a)(v), the replacement copy of the Material shall be verified by the PA Parties in accordance with Section 3(a) and delivered by Project Co to the Custodian.
- (d) Project Co warrants that:
  - (i) it owns the Intellectual Property Rights in the Material and has authority to enter into this Custody Agreement;
  - (ii) the use of the Materials by the City under the terms of this Custody Agreement shall not infringe any Intellectual Property Rights of any person; and
  - (iii) the Material delivered under Section 3(a) shall contain all information in human-readable form and on suitable media to enable a reasonably skilled programmer or analyst to understand, maintain and correct the Material without the assistance of any other person.

#### **4. Custodian's Duties**

- (a) The Custodian shall:
  - (i) hold in safe custody all versions of the Financial Model delivered to it pursuant to the terms hereof, and the provisions of this Custody Agreement shall apply (with any necessary changes being made) to any revised Financial Model;
  - (ii) hold the Material in a safe and secure environment;
  - (iii) inform Project Co and the City of the receipt of any copy of the Material;
  - (iv) at all times retain a copy of the latest verified deposit of the Material; and
  - (v) promptly notify Project Co and the City if it becomes aware at any time during the term of this Custody Agreement that any copy of the Material held by it has been lost, damaged or destroyed.
- (b) The Custodian shall not be responsible for procuring the delivery of the Material in the event of failure by Project Co to do so.
- (c) In accordance with Section 10, the Custodian shall allow the PA Parties, the Lenders' Agent and the auditor retained by the Lenders' Agent to inspect and audit the Financial Model from time to time.

#### **5. Payment**

- (a) In consideration of the Custodian performing the services contemplated by this Custody Agreement, Project Co shall pay the Custodian's fees as agreed from time to time between the Custodian and Project Co.

**6. Release Events**

- (a) The Custodian shall hold the Material to the order of the PA Parties and shall honour the instructions and signatures of:
  - (i) the designated signing officers of the City or such other persons nominated by them and notified to the Custodian and Project Co in writing (the “**City Signatories**”); and
  - (ii) the president & chief executive officer and designated signing officers of Project Co or such other person nominated by it and notified to the Custodian and the City in writing (the “**Project Co Signatory**”);

and shall, subject to Section 6(b), upon receiving signed joint instructions from the City Signatories and the Project Co Signatory, release one copy of the Material to the person either named in such instructions or previously identified in writing by the City Signatories and the Project Co Signatory.

- (b) The PA Parties each agree that they shall give joint instructions to the Custodian for the release of the Material, in accordance with Section 6(a), on each occasion that the Material is required to be released pursuant to the Project Agreement or that the Material must be released to allow the Material to be maintained and/or corrected.
- (c) The Custodian shall release the Material to a duly authorized representative of the City on any termination of the Project Agreement prior to the Expiry Date.

**7. Records**

- (a) The PA Parties shall be entitled, at reasonable hours and upon giving the Custodian reasonable notice, to inspect any records kept by the Custodian in accordance with this Custody Agreement.

**8. Confidentiality**

- (a) The Material shall remain the confidential property of Project Co and, in the event that the Custodian provides a copy of the Material to the City, the City shall be permitted to use the Material only in accordance with the intellectual property and confidentiality obligations in the Project Agreement.
- (b) The Custodian agrees for itself, its directors, officers, employees, sub-contractors and agents, to maintain all information and/or documentation in whatever form coming into its possession or to its knowledge under or in connection with this Custody Agreement in strictest confidence and secrecy. The Custodian further agrees not to make use of such information and/or documentation other than for the purposes of this Custody Agreement and will not disclose or release it other than in accordance with the terms of this Custody Agreement.
- (c) In the event that the Material is released under Section 6, the City shall:
  - (i) use the Material only for the purpose of understanding, maintaining and correcting the Financial Model exclusively on behalf of the City;

- (ii) not use the Material for any other purpose nor disclose it to any person, save such of its employees or contractors who need to know the same in order to understand, maintain and correct the Financial Model exclusively on behalf of the City;
- (iii) hold all media containing the Material in a safe and secure environment when not in use; and
- (iv) forthwith destroy the same should the City cease to be entitled to use the Financial Model.

## **9. Intellectual Property Rights**

- (a) The release of the Material to the City and to the Custodian will not act as an assignment of any Intellectual Property Rights that Project Co possesses in the Material.

## **10. Inspection**

- (a) Subject to the following provisions of this Section 10, the Custodian shall bear no obligation or responsibility to any person, firm, company or entity whatsoever to determine the existence, relevance, completeness, accuracy, effectiveness or any other aspect of the Financial Model.
- (b) The PA Parties shall be entitled, at reasonable hours and upon giving the Custodian reasonable notice, to inspect and audit or to procure the inspection and audit of the Financial Model in accordance with this Section 10.
- (c) The Custodian shall, upon receiving duly signed instructions from both of the PA Parties (but only upon receiving such instructions), provide facilities for the City and/or Project Co and/or such person identified in the duly signed written instructions to inspect and audit the Financial Model.
- (d) The Custodian shall maintain a record of any inspection and audit made pursuant to Section 10(b), including details of the person who made the inspection and/or audit and the date of the same.

## **11. Custodian's Liability**

- (a) The Custodian shall not be liable for any loss or damage caused to Project Co or the City either jointly or severally except to the extent that such loss or damage is caused by the negligent acts or omissions of or a breach of any contractual duty by the Custodian, its employees, agents or sub-contractors, and in such event, the Custodian's total liability in respect of all claims arising under or by virtue of this Custody Agreement shall not (except in the case of claims for personal injury or death) exceed the sum of \$[REDACTED] (index-linked).
- (b) The Custodian shall in no circumstances be liable to Project Co or the City for indirect or consequential loss of any nature whatsoever whether for loss of profit, loss of business or otherwise.
- (c) Subject to complying with the provisions of Section 6, and save in the case of manifest error, the Custodian shall be protected in acting upon any written request, waiver, consent, receipt or other document furnished to it pursuant to this Custody Agreement, not only in assuming its due

execution and the validity and effectiveness of its provisions but also as to the truth and acceptability of any information contained in it, which the Custodian in good faith believes to be genuine and what it purports to be.

- (d) The duties, responsibilities and obligations of the Custodian shall be limited to those expressly set forth herein and no duties, responsibilities or obligations shall be inferred or implied. The Custodian shall not be subject to, nor required to comply with, any other agreement between or among any or all of the other Parties or to which any Party is a party, even though reference thereto may be made herein, or to comply with any direction or instruction (other than those contained herein or delivered in accordance herewith). The Custodian shall not be required to expend or risk any of its own funds or otherwise incur any financial liability in the performance of any of its duties hereunder except ordinary corporate costs incurred in the performance of such duties.
- (e) If at any time the Custodian is served with any judicial or administrative order, judgment, decree, writ or other form of judicial or administrative process which in any way affects the Material (including, but not limited to, orders of attachment or garnishment or other forms of levies or injunctions or stays relating to the transfer of property), the Custodian is authorized to comply therewith in any manner as it or its legal counsel deems appropriate, acting reasonably; provided that the Custodian, when so served, shall promptly notify Project Co and the City, in writing, of such process and the Custodian's intended action in order to provide Project Co and the City a reasonable opportunity to intervene or challenge such process in a court or tribunal of competent jurisdiction.
- (f) The Custodian may consult with legal counsel at the expense of Project Co and the City as to any matter relating to this Custody Agreement, and the Custodian shall not incur any liability in acting in good faith in accordance with any advice from such counsel. All reasonable fees and disbursements incurred by the Custodian shall be added to the fees otherwise payable hereunder.
- (g) The Custodian shall not incur any liability for not performing any act or fulfilling any duty, obligation or responsibility hereunder by reason of any occurrence beyond the control of the Custodian (including, but not limited to, any act or provision of any present or future law or regulation or governmental authority, any act of God or war, or the unavailability of any wire or communication facility).
- (h) The Custodian shall not be responsible in any respect for the form or content of the Material delivered to it hereunder.
- (i) In the event of any ambiguity or uncertainty hereunder or in any notice, instruction or other communication received by the Custodian hereunder, the Custodian shall notify Project Co and the City in writing of such ambiguity or uncertainty and request instructions to eliminate such ambiguity or uncertainty. The Custodian may, acting reasonably, refrain from taking any action other than to retain possession of the Material, unless the Custodian receives written instructions, signed by Project Co and the City, which eliminates such ambiguity or uncertainty.
- (j) In the event of any dispute between or conflicting claims by or among the PA Parties and/or any other person or entity with respect to the Material, the Custodian shall be entitled, acting reasonably, to refuse to comply with any and all claims, demands or instructions with respect to the Material so long as such dispute or conflict shall continue, and the Custodian shall promptly

notify Project Co and the City of its intention to do so. In such circumstances, the Custodian shall not be or become liable in any way to Project Co or the City for failure or refusal to comply with such conflicting claims, demands or instructions. The Custodian shall be entitled to refuse to act until, acting reasonably, either (i) such conflicting or adverse claims or demands shall have been determined by a final order, judgment or decree of a court of competent jurisdiction, which order, judgment or decree is not subject to appeal, or settled by agreement between the conflicting parties as evidenced in writing satisfactory to the Custodian or (ii) the Custodian shall have received security or an indemnity satisfactory to it acting reasonably sufficient to hold it harmless from and against any and all losses which it may incur by reason of so acting. The Custodian may, in addition, elect, acting reasonably, to commence an interpleader action or seek other judicial relief or orders as it may deem, acting reasonably, necessary, including, without limiting the generality of the foregoing, depositing all or any part of the Material into court. The costs and expenses (including reasonable attorneys' fees and expenses) incurred in connection with such proceeding shall be paid by, and shall be deemed a joint and several obligation of, Project Co and the City.

- (k) Each of Project Co and the City shall provide to the Custodian an incumbency certificate setting out the names and sample signatures of persons authorized to give instructions to the Custodian hereunder. The Custodian shall be entitled to rely on such certificate until a revised certificate is provided to it hereunder. The Custodian shall be entitled to refuse to act upon any instructions given by a party which are signed by any person other than a person described in the incumbency certificate provided to it pursuant to this Section 11.
- (l) The Custodian shall be entitled to rely, and act upon, on any direction, order, instruction, notice or other communication provided to it hereunder which is sent to it by facsimile transmission.
- (m) This Section 11 shall survive the termination of this Custody Agreement.

## **12. Indemnity**

- (a) Save for any claim falling within the provisions of Section 11(a), Project Co and the City, on a joint and several basis, shall be liable for and shall indemnify and hold harmless the Custodian, and its officers, directors and employees, from and against any and all claims, losses, liabilities, costs, damages or expenses (including reasonable attorneys' fees and expenses) arising from or in connection with or related to this Custody Agreement or acting as Custodian hereunder (including, but not limited to, losses incurred by the Custodian in connection with its successful defense of any claim of negligence or willful misconduct on its part), provided, however, that nothing contained herein shall require the Custodian to be indemnified for losses caused by its negligence or willful misconduct.
- (b) Claims made by a third person against a party having, or claiming to have, the benefit of an indemnity pursuant to this Custody Agreement, shall be conducted in accordance with the conduct of claims procedure described in Appendix A – Conduct of Claims to this Custody Agreement.

## **13. Termination**

- (a) The Custodian may terminate this Custody Agreement for failure by Project Co to pay any outstanding fee provided for herein within 30 days of receipt of written notice in respect thereof.

- (b) The Custodian may terminate this Custody Agreement by giving 120 days' prior written notice to Project Co and the City. In that event, Project Co and the City shall appoint a mutually acceptable new custodian on terms similar to those contained in this Custody Agreement.
- (c) If the Custodian is not notified of the new custodian within the notice period given in Section 13(b), the Custodian will destroy the Material.
- (d) The City may terminate this Custody Agreement by giving 30 days' prior written notice to the Custodian and Project Co.
- (e) Project Co may, with the prior written consent of the City, terminate this Custody Agreement by giving 30 days' prior written notice to the Custodian and the City.
- (f) This Custody Agreement shall terminate upon release of the Material to the City in accordance with Section 6(c).
- (g) Upon termination under the provisions of Sections 13(d) or 13(e), the Custodian will deliver the Material to Project Co. If the Custodian is unable to trace Project Co within 60 days of writing to the last registered address notified by Project Co to the Custodian, the Custodian will destroy the Material.
- (h) Upon termination under the provisions of Section 13(a), the Material will be available for collection by Project Co from the Custodian for 60 days from the date of termination. After such 60-day period, the Custodian will destroy the Material.
- (i) The Custodian may forthwith terminate this Custody Agreement and destroy the Material if it is unable to trace Project Co within 60 days of writing to the last registered address notified by Project Co to the Custodian having used all reasonable endeavours to do so.
- (j) The provisions of Sections 8, 11 and 12 shall continue in full force and effect after termination of this Custody Agreement.
- (k) The Agreement shall terminate on the Expiry Date, at which time Project Co will write to the Custodian requesting the release of the Materials to it. The Custodian agrees that it will notify the City of Project Co's request and, failing receipt of any notice of objection from the City within 30 days of the receipt of the notice by the City, it shall release the Materials to Project Co.
- (l) On termination of this Custody Agreement, Project Co shall remain liable to the Custodian for payment in full of any fee which has become due but which has not been paid as at the date of termination.

#### **14. Step-In Rights**

- (a) The Custodian shall, from time to time:
  - (i) permit the City to perform or discharge any obligation of Project Co under this Custody Agreement, where Project Co is in breach of the same;
  - (ii) permit Project Co to perform or discharge any obligation of the City under this Custody Agreement, where the City is in breach of the same; and

- (iii) following notification by the Lenders' Agent (who at the same time shall provide a copy of any such notification to the City), permit the Lenders' Agent or another person specified in such notice with effect from the date specified in the same to perform or discharge all the obligations of Project Co under this Custody Agreement, provided that the Lenders' Agent shall have the benefit of and be entitled to enforce against the Custodian any and all of the Custodian's obligations to Project Co under this Custody Agreement and the Custodian undertakes to perform such obligations in favour of the Lenders' Agent.
- (b) Project Co consents to the performance or discharge of its obligations by the City pursuant to Section 14(a)(i).
- (c) The City consents to the performance or discharge of its obligations by Project Co pursuant to Section 14(a)(ii).
- (d) The PA Parties consent to the performance or discharge of Project Co's obligations by the Lenders' Agent pursuant to Section 14(a)(iii).
- (e) The City or the Lenders' Agent shall be entitled to terminate the Lenders' Agent's obligations pursuant to Section 14(a)(iii) on giving the Custodian prior notice (the City or the Lenders' Agent at the same time shall provide a copy of any such notification to the other party) of at least 15 Business Days. On and from the date of expiry of such notice (the "**Step-Out Date**"), the Lenders' Agent shall be automatically released from all obligations pursuant to this Custody Agreement, except for any which have fallen due for performance or discharge on or before the Step-Out Date and which have not been fully and unconditionally performed or discharged.
- (f) The occurrence of the Step-Out Date shall not affect the continuation of Project Co's obligations towards the Custodian under this Custody Agreement.
- (g) The Lenders' Agent is a Party to this Custody Agreement solely for the purposes of taking the benefit of its rights under Section 4(c) and this Section 14 and shall have no rights or obligations or liabilities hereunder, except pursuant to the operation of Section 4(c) and this Section 14.

## **15. Assignment**

- (a) This Custody Agreement shall be binding on, and enure to the benefit of, the Custodian, Project Co and the City and their respective successors and permitted transferees and assigns.
- (b) Project Co may assign, transfer or otherwise dispose of the benefit of this Custody Agreement to any person to whom Project Co assigns, transfers or otherwise disposes of its interest in the Project Agreement pursuant to Section 57.1 of the Project Agreement.
- (c) The City may assign, transfer or otherwise dispose of the benefit of this Custody Agreement to any person to whom the City assigns, transfers or otherwise disposes of its interest in the Project Agreement pursuant to Section 57.2 of the Project Agreement.
- (d) The Custodian shall not, without the prior written consent of the PA Parties assign, transfer or otherwise dispose of the benefit of this Custody Agreement to any person.

- (e) The Custodian acknowledges that Project Co has granted a security interest over its rights under this Custody Agreement to the Lenders' Agent.

**16. Notices**

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Custody Agreement shall be in writing (whether or not "written notice" or "notice in writing" is specifically required by the applicable provision of this Custody Agreement) and served by sending the same by registered mail, facsimile or by hand (in each case, with a copy by electronic transmission), as follows:

If to the City:

City of Ottawa  
110 Laurier Ave West  
Ottawa, Ontario K1P 1J1

Email: [REDACTED]  
Attn.: [REDACTED]

If to Project Co:

TransitNEXT General Partnership  
[REDACTED]

Email: [REDACTED]  
Attn.: [REDACTED]

If to the Custodian:

[REDACTED]

Fax: [REDACTED]  
Attn.: [REDACTED]

If to the Lenders' Agent:

[REDACTED]

Attention: [REDACTED]  
Facsimile: [REDACTED]  
Email: [REDACTED]

- (b) Where any notice is provided or submitted to a Party via facsimile, an original of the notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a Party's failure to comply with this Section 16(b).
- (c) Any Party to this Custody Agreement may, from time to time, change any of its contact information set forth in Section 16(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows the recipient Party's receipt of such notice unless a later effective date is given in such notice.

- (d) Subject to Sections 16(e), 16(f) and 16(g):
  - (i) a notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
  - (ii) a notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
  - (iii) a notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.
- (e) If the Party giving the notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 16.
- (f) If any notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such notice shall be deemed to have been received by such recipient on the next Business Day.
- (g) A notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such notice was successful.

**17. [Intentionally deleted]**

**18. Amendments**

- (a) This Custody Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Custody Agreement.

**19. Waiver**

- (a) No waiver made or given by a Party under or in connection with this Custody Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

**20. Relationship Between the Parties**

- (a) The Parties are independent contractors. This Custody Agreement is not intended to and does not create or establish between the Parties any relationship as partners, joint venturers, trustee and beneficiary, employer and employee, master and servant, or principal and Lenders' Agent.

**21. Entire Agreement**

- (a) Except where provided otherwise in this Custody Agreement, this Custody Agreement and the Project Agreement constitute the entire agreement between the Parties in connection with the subject matter of this Custody Agreement and supersede all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Custody Agreement.

**22. Severability**

- (a) Each provision of this Custody Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Custody Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Custody Agreement. If any such provision of this Custody Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Custody Agreement as near as possible to its original intent and effect.

**23. Enurement**

- (a) This Custody Agreement shall enure to the benefit of, and be binding on, each of the Parties and their respective successors and permitted transferees and assigns.

**24. Governing Law and Jurisdiction**

- (a) This Custody Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The Parties agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Custody Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.

**25. Further Assurance**

- (a) Each Party shall do all things, from time to time, and execute all further documents necessary to give full effect to this Custody Agreement.

**26. Language of Agreement**

- (a) Each Party acknowledges having requested and being satisfied that this Custody Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ces documents soient rédigés en anglais et s'en declare satisfaite.

**27. Proof of Authority**

- (a) The City reserves the right to require any person executing this Custody Agreement on behalf of Project Co or the Lenders' Agent to provide proof, in a form acceptable to the City, that such person has the requisite authority to execute this Custody Agreement on behalf of and to bind Project Co or the Lenders' Agent, respectively.

**28. Counterparts**

- (a) This Custody Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any Party providing its signature in faxed form shall promptly forward to such Party an original signed copy of this Custody Agreement which was so faxed.

IN WITNESS WHEREOF the Parties have executed this Custody Agreement as of the date first above written.

## APPENDIX A

### CONDUCT OF CLAIMS

This Appendix A shall apply to the conduct of claims, made by a third person against a party having, or claiming to have, the benefit of an indemnity pursuant to this Custody Agreement. The party having, or claiming to have, the benefit of the indemnity is referred to as the “**Beneficiary**” and the City and Project Co are referred to, collectively, as the “**Indemnifier**”.

- (1) If the Beneficiary receives any notice, demand, letter or other document concerning any claim for which it appears that the Beneficiary is, or may become entitled to, indemnification under Section 12 of the Custody Agreement, the Beneficiary shall give written notice to the Indemnifier as soon as reasonably practicable and in any event within 10 Business Days of receipt of the same. Such notice shall specify with reasonable particularity, to the extent that information is available, the factual basis for the claim and the amount of the claim.
- (2) Subject to Sections (3), (4) and (5) of this Appendix A, on the giving of such notice by the Beneficiary, where it appears that the Beneficiary is or may be entitled to indemnification from the Indemnifier in respect of all, but not part only, of the liability arising out of the claim, the Indemnifier shall be entitled to dispute the claim in the name of the Beneficiary at the Indemnifier’s own expense and take conduct of any defence, dispute, compromise, or appeal of the claim and of any incidental negotiations. In such case, the City may, but shall not be obligated to, assume (on prior written notice to Project Co) control of any such defence for and on behalf of itself and Project Co, and Project Co hereby consents to such assumption. The Beneficiary shall give the Indemnifier all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. The Beneficiary shall have the right to employ separate counsel in respect of such claim at its own cost and expense.
- (3) With respect to any claim conducted by the Indemnifier:
  - (i) the Indemnifier shall keep the Beneficiary fully informed and consult with it about material elements of the conduct of the claim;
  - (ii) the Indemnifier shall not bring the name or reputation of the Beneficiary into disrepute;
  - (iii) the Indemnifier shall not pay, compromise or settle such claims without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed;
  - (iv) the Indemnifier shall not admit liability or fault to any third party without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed; and
  - (v) the Indemnifier shall use commercially reasonable efforts to have the Beneficiary named as a beneficiary under any release given by the persons bringing the claim to which Section (3) of this Appendix A relates.
- (4) The Beneficiary shall be free to pay or settle any such claim on such terms as it thinks fit and without prejudice to its rights and remedies under this Custody Agreement if:
  - (i) the Indemnifier is not entitled to take conduct of the claim in accordance with Section (2) of this Appendix A; or

- (ii) the Indemnifier fails to notify the Beneficiary of its intention to take conduct of the relevant claim as soon as reasonably practicable and in any event within 10 Business Days of the notice from the Beneficiary under Section (1) of this Appendix A or the Indemnifier notifies the Beneficiary that the Indemnifier does not intend to take conduct of the claim.
- (5) The Beneficiary shall be free at any time to give notice to the Indemnifier that the Beneficiary is retaining or taking over, as the case may be, the conduct of any defence, dispute, compromise or appeal of any claim, or of any incidental negotiations, to which Section (2) of this Appendix A applies. On receipt of such notice the Indemnifier shall promptly take all steps necessary to transfer the conduct of such claim to the Beneficiary, and shall provide to the Beneficiary all relevant documentation and all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. If the Beneficiary gives any notice pursuant to this Section (5) of this Appendix A, then the Indemnifier shall be released from any liabilities arising under the applicable indemnity hereunder in respect of the applicable claim.
- (6) If the Indemnifier pays to the Beneficiary an amount in respect of an indemnity and the Beneficiary subsequently recovers, whether by payment, discount, credit, saving, relief or other benefit or otherwise, a sum or anything else of value (the “**Recovery Amount**”), the Beneficiary shall forthwith repay to the Indemnifier whichever is the lesser of:
  - (i) an amount equal to the Recovery Amount less any out-of-pocket costs and expenses properly incurred by the Beneficiary in recovering the same; and
  - (ii) the amount paid to the Beneficiary by the Indemnifier in respect of the claim under the relevant indemnity,provided that there shall be no obligation on the Beneficiary to pursue any Recovery Amount and that the Indemnifier shall be repaid only to the extent that the Recovery Amount, aggregated with any sum recovered from the Indemnifier, exceeds the loss sustained by the Beneficiary except, however, that if the Beneficiary elects not to pursue a Recovery Amount, the Indemnifier shall be entitled to require an assignment to it of the right to do so.
- (7) Any person taking any of the steps contemplated by this Appendix A shall comply with the requirements of any insurer who may have an obligation to provide an indemnity in respect of any liability arising under this Custody Agreement.

## SCHEDULE 4

### FUNDING REQUIREMENTS

#### 1. Definitions

Any capitalized term not defined in this Schedule 4 shall have the meaning given to such term in the Project Agreement. In this Schedule 4, unless the context otherwise requires:

- (a) **“Actual Monthly Project Co Costs”** means all costs incurred by Project Co in a given Contract Month including, without being limited to, maintenance expenses, lifecycle expenses, payments to the Maintenance and Rehabilitation Contractor, insurance premiums, administrative costs (including Special Purpose Vehicle expenses). For clarity, Distributions to Equity Capital shall not be included as part of the Actual Monthly Project Co Costs.
- (b) **“Actual Monthly Project Co Payments”** means the Monthly Service Payment received by Project Co from the City in a given Contract Month in accordance with Schedule 19.
- (c) **“Capital Coverage Ratio”** has the meaning set out in Section 2.3.
- (d) **“Capital Coverage Ratio Calculation Period”** on a given calculation date shall be the period which ends on the last day of the Contract Month that is 2 Contract Months prior to such date, and commences on the later of (i) the start of the Contract Month that is 11 (eleven) Contract Months prior to such period end date and (ii) the Payment Commencement Date. For clarity, the Capital Coverage Ratio Calculation Period shall capture a twelve (12) month period other than in respect of reporting for the first 13 Contract Months.
- (e) **“Capital Coverage Ratio Reporting Period”** means the period commencing on the first day of Contract Month three (3) and ending on the Expiry Date.
- (f) **“Maintenance Fee Reference Amount”** means with respect to any Contract Year, the total Annual Service Payment (excluding any Lifecycle Payments payable in that year) PLUS the average annual Lifecycle Payments over the Maintenance Period, in each case indexed in accordance with the provisions of the Project Agreement, all amounts being exclusive of HST.
- (g) **“Threshold Capital Coverage Ratio”** has the meaning set out in Section 2.1.

#### 2. Financing of the Project

- 2.1 At Financial Close, the Financial Model shall show Project Co maintaining a minimum annual Capital Coverage Ratio equal to [REDACTED] or, for Service Levels other than Service Level 1, such lower value as indicated in the Financial Model (**“Threshold Capital Coverage Ratio”**). Project Co’s Performance Monitoring Report during the Capital Coverage Ratio Reporting Period shall include confirmation of Project Co’s actual Capital Coverage Ratio.

For clarity, in no cases shall the Threshold Capital Coverage Ratio be less than [REDACTED].

2.2 For each month during the Capital Coverage Ratio Reporting Period, confirmation of Project Co's actual Capital Coverage Ratio shall be based on data from monthly unaudited financial statements. Where audited financial statements are available, Project Co shall use such statements for purposes of calculating the Capital Coverage Ratio. The City reserves the right to request from Project Co evidence validating the calculation of the Capital Coverage Ratio for any given Contract Month within the Capital Coverage Ratio Reporting Period.

2.3 **"Capital Coverage Ratio"** shall be calculated as the quotient of (i) the aggregate Actual Monthly Project Co Payments for the relevant Capital Coverage Ratio Calculation Period, and (ii) the aggregate Actual Monthly Project Co Costs for the relevant Capital Ratio Calculation Period.

### 3. Positive Covenants

3.1 Project Co shall provide to the City:

(a) for Project Co:

(i) within forty-five (45) days of Project Co's first three (3) fiscal quarter ends, quarterly unaudited management financial statements prepared in accordance with Canadian GAAP or International Financial Reporting Standards; and

(b) for Maintenance and Rehabilitation Guarantor:

(i) within sixty (60) days of the second and fourth quarter ends, semi-annual unaudited financial statements prepared in accordance with Canadian GAAP or International Financial Reporting Standards; and

(ii) within one hundred and eighty (180) days of Maintenance and Rehabilitation Guarantor's fiscal year-end, annual audited financial statements prepared in accordance with Canadian GAAP or International Financial Reporting Standards;

(c) from the Project Co Parties and the Maintenance and Rehabilitation Guarantor, as applicable, the security set out in Section 4;

(d) For each of the accounts specified in Sections 3.2, 3.3 and 3.4:

(i) within thirty days following each calendar month following Substantial Completion, an account statement showing all transactions, including, without being limited to, any deposits, draws, interest earned and balance changes, issued by the financial institution holding such account.

3.2 Project Co shall establish and maintain following Substantial Completion, at its sole expense, the Proceeds Account which shall be opened in the name of Project Co and the balance of which, including all income and returns thereon, shall be for the benefit of Project Co which, save as provided below, shall be subject to Project Co control at all times, but shall be subject to the relevant Blocked Accounts Agreement in favour of the City. Project Co shall deposit, or cause to be deposited, to the Proceeds Account (a) any interest income from investments; (b) all revenues; (c) all payments by the City under the Project Agreement; (d) all other monies paid to or received by Project Co (including liquidated damages and insurance proceeds) and (e) the Equity

Contributions. On the occurrence and during the continuation of a Project Co Event of Default, the City will control the Proceeds Account. For greater certainty, so long as a Project Co Event of Default is not continuing, Project Co shall be entitled to deal with amounts in the Proceeds Account in its sole discretion.

- 3.3 Project Co shall establish and maintain following Substantial Completion, at its sole expense, the Distribution Account which shall be opened in the name of Project Co and the balance of which, including all income and returns, shall be for the benefit of Project Co and which shall not be subject to the control of the City under and in accordance with the relevant Blocked Accounts Agreement and shall not be subject to the security in favour of the City. Distributions on Equity Capital shall be made to the Distribution Account.
- 3.4 Project Co shall establish and maintain, at its sole expense, the Equity Lock-Up Account which shall be opened in the name of Project Co and the balance of which, including all income and returns, shall be for the benefit of Project Co and which shall be subject to the relevant Blocked Accounts Agreement and subject to the security in favour of the City. Amounts which would otherwise be capable of being transferred from the Proceeds Account to the Distribution Account shall be deposited into the Equity Lock-Up Account where any failure to meet the Restricted Payment Conditions has occurred and is continuing. So long as the Restricted Payment Conditions are not met, funds on deposit in the Equity Lock-Up Account shall be available, at the discretion of Project Co, to cover any costs or other amounts payable by Project Co (other than for certainty, Distributions) to provide or otherwise remediate Maintenance and Rehabilitation Services. Once the Restricted Payment Conditions are satisfied, amounts in the Equity Lock-Up Account shall be available for distribution to the Distribution Account.
- 3.5 Project Co shall not make any payment or distribution from the Proceeds Account to the Distribution Account unless at such time each of the following conditions (the “**Restricted Payment Conditions**”) are satisfied:
- (a) Substantial Completion has been achieved; and
  - (b) the Capital Coverage Ratio is greater than or equal to [REDACTED].

#### 4. Security

- 4.1 Project Co shall cause the Maintenance and Rehabilitation Contractor to deliver the following documents and agreements no later than Substantial Completion:
- (a) a letter of credit as security for Maintenance and Rehabilitation Services, in form and content satisfactory to the Parties, each acting reasonably (each a “**Maintenance LC**”);
  - (b) a parent company guarantee, in form and substance satisfactory to the Parties, each acting reasonably and executed by Maintenance and Rehabilitation Guarantor with respect to the Maintenance and Rehabilitation Services (the “**Maintenance PCG**”);
  - (c) the Blocked Accounts Agreement; and
  - (d) such other documents and agreements as the City may require, acting reasonably, based on the financial structure proposed in the Financial Model.

The letter of credit will be delivered to, and held by, the Insurance Trustee.

- 4.2 With respect to any Contract Year, the Maintenance LC amount shall be established at the start of the Contract Year (no later than 20 days from the start of such Contract Year) and will be equal to **[REDACTED]**% of the Maintenance Fee Reference Amount.
- 4.3 With respect to any year, the Maintenance PCG amount shall be equal to **[REDACTED]**% of the Maintenance Fee Reference Amount.
- 4.4 Security requirements identified in Section 4.1(a) and (b) may be submitted by the Maintenance and Rehabilitation Contractor identifying both Project Co and the City as joint beneficiaries of such security. Any Maintenance LC and the Maintenance PCG shall be released on or after the Expiry Date once Project Co's responsibilities with respect to the Maintenance and Rehabilitation Services have been completed.

**SCHEDULE 5-1**

**CONSTRUCTION CONTRACTOR'S DIRECT AGREEMENT**

**THIS AGREEMENT** is made as of the 28<sup>th</sup> day of March, 2019

**BETWEEN:**

**CITY OF OTTAWA**

(the “City”)

- AND -

**TRANSIT NEXT GENERAL PARTNERSHIP, [REDACTED]**

(“Project Co”)

- AND -

**[REDACTED]**

(the “Construction Contractor”)

- AND -

**[REDACTED]**

(the “Construction Guarantor”)

**WHEREAS:**

- A. The City and Project Co have entered into the Project Agreement dated March 28, 2019, which requires Project Co to enter into, and to cause the Construction Contractor and the Construction Guarantor to enter into, this Construction Contractor's Direct Agreement with the City.
- B. Project Co and the Construction Contractor have entered into the Construction Contract, which requires the Construction Contractor and the Construction Guarantor to enter into this Construction Contractor's Direct Agreement with the City.
- C. In consideration of the City entering into the Project Agreement with Project Co, the Contractor agrees to enter into this agreement with the City

**NOW THEREFORE** in consideration of the mutual covenants and agreements of the Parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties covenant and agree as follows:

**1. DEFINITIONS**

In this Construction Contractor's Direct Agreement, unless the context otherwise requires:

- (a) “**Applicable Law**” has the meaning given in the Project Agreement.

- (b) “**Business Day**” has the meaning given in the Project Agreement.
- (c) “**Construction Contract**” has the meaning given in the Project Agreement.
- (d) “**Construction Contractor’s Direct Agreement**” means this Construction Contractor’s Direct Agreement.
- (e) “**Default Notice**” has the meaning given in Section 5(a).
- (f) “**Governmental Authority**” has the meaning given in the Project Agreement.
- (g) “**Lenders**” has the meaning given in the Project Agreement.
- (h) “**Lenders’ Direct Agreement**” has the meaning given in the Project Agreement.
- (i) “**Party**” means the City, the Construction Contractor, the Construction Guarantor or Project Co, and “**Parties**” means the City, the Construction Contractor, the Construction Guarantor and Project Co.
- (j) “**Project**” has the meaning given in the Project Agreement.
- (k) “**Project Agreement**” means the project agreement made on or about March 28, 2019 between the City and Project Co.
- (l) “**Step-In Notice**” has the meaning given in Section 6(a).
- (m) “**Substitute**” has the meaning given in Section 6(a).
- (n) “**Variation**” has the meaning given in the Project Agreement.

## 2. INTERPRETATION

This Construction Contractor’s Direct Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings in this Construction Contractor’s Direct Agreement are for convenience of reference only, shall not constitute a part of this Construction Contractor’s Direct Agreement, and shall not be taken into consideration in the interpretation of, or affect the meaning of, this Construction Contractor’s Direct Agreement.
- (b) Unless the context otherwise requires, references to specific Sections, Clauses, Paragraphs, Subparagraphs, and other divisions are references to such Sections, Clauses, Paragraphs, Subparagraphs, or divisions of this Construction Contractor’s Direct Agreement and the terms “Section” and “Clause” are used interchangeably and are synonymous.
- (c) Words importing persons or parties are to be broadly interpreted and include an individual, corporation, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.

- (d) Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.
- (e) References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of this Construction Contractor's Direct Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- (f) The words in this Construction Contractor's Direct Agreement shall bear their natural meaning.
- (g) References containing terms such as:
  - (i) "hereof", "herein", "hereto", "hereinafter", and other terms of like import are not limited in applicability to the specific provision within which such references are set forth but instead refer to this Construction Contractor's Direct Agreement taken as a whole; and
  - (ii) "includes" and "including", whether or not used with the words "without limitation" or "but not limited to", shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean "includes without limitation" and "including without limitation".
- (h) In construing this Construction Contractor's Direct Agreement, the rule known as the *ejusdem generis* rule shall not apply nor shall any similar rule or approach to the construction of this Construction Contractor's Direct Agreement and, accordingly, general words introduced or followed by the word "other" or "including" or "in particular" shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (i) Where this Construction Contractor's Direct Agreement states that an obligation shall be performed "no later than" or "within" or "by" a stipulated date or event which is a prescribed number of days after a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (j) Where this Construction Contractor's Direct Agreement states that an obligation shall be performed "on" a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (k) Any reference to time of day or date means the local time or date in Ottawa, Ontario.
- (l) Unless otherwise indicated, time periods will be strictly construed.
- (m) Whenever the terms "will" or "shall" are used in this Construction Contractor's Direct Agreement they shall be construed and interpreted as synonymous and to read "shall".

**3. CONFLICT IN DOCUMENTS**

- (a) In the event of ambiguities, conflicts or inconsistencies between or among this Construction Contractor's Direct Agreement, the Project Agreement and the Construction Contract, this Construction Contractor's Direct Agreement shall prevail.
- (b) In the event of ambiguities, conflicts or inconsistencies between or among this Construction Contractor's Direct Agreement and the Lenders' Direct Agreement, the Lenders' Direct Agreement shall prevail.

**4. AGREEMENTS**

- (a) Project Co and the Construction Contractor shall not amend, modify, or depart from the terms of the Construction Contract without the prior written consent of the City, acting reasonably, which consent shall not be withheld or delayed where such amendment, modification or departure does not materially and adversely affect the ability of Project Co to perform its obligations under this Construction Contractor's Direct Agreement and does not have the effect of increasing any liability of the City, whether actual or potential. Project Co and the Construction Contractor shall provide to the City a written copy of all such amendments, modifications or departures. The Parties acknowledge and agree that this Section 4(a) shall not apply to Variations provided for under the Project Agreement.
- (b) Each of the Parties acknowledges having received a copy of the Project Agreement and the Construction Contract.
- (c) If the Construction Contractor gives Project Co any notice of any default(s) under the Construction Contract that may give the Construction Contractor a right to terminate the Construction Contract or to treat it as having been repudiated by Project Co or to discontinue the Construction Contractor's performance thereunder, then the Construction Contractor shall concurrently provide the City with a copy of such notice and set out in reasonable detail the default(s).

**5. NO TERMINATION BY CONSTRUCTION CONTRACTOR WITHOUT DEFAULT NOTICE**

The Construction Contractor shall not exercise any right it may have to terminate the Construction Contract or to treat it as having been repudiated by Project Co or to discontinue the Construction Contractor's performance thereunder unless:

- (a) the Construction Contractor first delivers a written notice (a "**Default Notice**") to the City setting out in reasonable detail the default(s) on which the Construction Contractor intends to rely in terminating the Construction Contract or to treat it as having been repudiated by Project Co or to discontinue the Construction Contractor's performance thereunder; and
- (b) within a period of 5 Business Days of the City receiving the Default Notice:
  - (i) the default(s) on which the Construction Contractor intends to rely in terminating the Construction Contract or to treat it as having been repudiated by Project Co

or to discontinue the Construction Contractor's performance thereunder have not been remedied; and

- (ii) the Construction Contractor has not received a Step-In Notice from the City,

provided that if, within such period of 5 Business Days, the City agrees to pay the Construction Contractor's reasonable costs of continued performance, such period of 5 Business Days shall be extended to 45 days.

## 6. STEP-IN RIGHTS

- (a) The City may at any time:

- (i) within 5 Business Days or, if such period has been extended in accordance with Section 5, 45 days of the City receiving a Default Notice; or
- (ii) if the City has not received a Default Notice and if the City's right to terminate the Project Agreement has arisen and is continuing,

deliver a notice (a "**Step-In Notice**") electing to replace Project Co under the Construction Contract either with the City or a third party designated by the City in the Step-In Notice (the "**Substitute**"), provided that the City can demonstrate to the Construction Contractor, acting reasonably, that the Substitute shall have sufficient financial resources, or shall be supported by a satisfactory guarantee, to carry out the obligations of the Substitute under the Construction Contract.

- (b) Subject to Section 6(d), upon receipt by the Construction Contractor of a Step-In Notice:

- (i) Project Co and the Construction Contractor will be deemed to be released from their existing and future obligations under the Construction Contract to each other (except with respect to any and all indemnities from Project Co or the Construction Contractor to the other in respect of the period prior to the receipt of the Step-In Notice), and the City or the Substitute, as applicable, and the Construction Contractor will be deemed to assume those same existing and future obligations towards each other (except in respect of the aforesaid indemnities);
- (ii) the existing and future rights of Project Co against the Construction Contractor under the Construction Contract and vice versa will be deemed to be cancelled (except with respect to any and all indemnities from Project Co or the Construction Contractor to the other in respect of the period prior to the receipt of the Step-In Notice), and the City or the Substitute, as applicable, and the Construction Contractor will be deemed to acquire those same existing and future rights against each other (except in respect of the aforesaid indemnities), subject to any applicable credit from the Construction Contractor to the City if the City pays for the Construction Contractor's reasonable costs of continued performance pursuant to Section 5;
- (iii) any guarantee, bond, covenant, letter of credit or similar performance security in favour of Project Co from any third party in respect of any term, provision, condition, obligation, undertaking or agreement on the part of the Construction

Contractor to be performed, observed or carried out by the Construction Contractor as contained in, referred to, or inferred from the Construction Contract, except for the “Additional Letter of Credit” (as defined in the Construction Contract) provided in accordance with the Construction Contract, shall be assigned, novated or granted, as required by the City or the Substitute, as applicable, each acting reasonably, to the City or the Substitute, as applicable, and the Construction Contractor shall cause such assignment, novation or grant on substantially the same terms and conditions as the original guarantee, bond, covenant, letter of credit or similar performance security, provided however that where Project Co shall continue to hold, or shall continue to be entitled to or have rights under, such guarantee, bond, covenant, letter of credit or similar performance security as security for any obligations of the Construction Contractor, the assignment, novation or grant of the guarantee, bond, covenant, letter of credit or similar performance security to the extent of any such obligations to Project Co shall be conditional on the satisfaction of those obligations to Project Co; and

- (iv) at the City’s request, the Construction Contractor shall enter into, and shall cause the Construction Guarantor and any other guarantor, covenantor or surety under any guarantee, bond or covenant referred to in Section 6(b)(iii) to enter into, and the City shall or shall cause the Substitute to enter into, as applicable, all such agreements or other documents as reasonably necessary to give effect to the foregoing, including an agreement between the City or the Substitute, as applicable, and the Construction Contractor, acceptable to the City and the Construction Contractor, each acting reasonably, on substantially the same terms as the Construction Contract.
- (c) Subject to Section 6(d), Project Co shall, at its own cost, cooperate fully with the City and the Substitute in order to achieve a smooth transfer of the Construction Contract to the City or the Substitute, as applicable, and to avoid or mitigate in so far as reasonably practicable any inconvenience, including the administration of the Construction Contract, ongoing supervisory activities and scheduling.
- (d) The rights granted by Sections 6(b) and 6(c) shall be of no force or effect if, at any time the Construction Contractor receives a Step-In Notice, the Construction Contractor has already received notice in writing from another entity entitled to the benefit of step-in rights relating to the Construction Contract that it is or has validly exercised those step-in rights. If the Construction Contractor receives any such notice on the same day as a Step-In Notice, the Step-In Notice shall be effective, except where the other notice is given by the Lenders, in which case such other notice and not the Step-In Notice shall be effective.
- (e) If the City gives a Step-In Notice within the time provided hereunder at any time after the Construction Contractor has terminated the Construction Contract or treated it as having been repudiated by Project Co or discontinued the Construction Contractor’s performance thereunder in accordance with the terms of this Construction Contractor’s Direct Agreement, the Construction Contractor agrees that the Construction Contract shall be reinstated and deemed to have continued despite any termination or treatment as having been repudiated, and the City shall pay the Construction Contractor’s reasonable costs for re-commencing the obligations it has under the Construction Contract and the Construction Contractor shall be entitled to reasonable compensation and/or relief for re-

commencing such obligations, having regard to the additional costs and delays incurred as a result of having terminated the Construction Contract or having treated it as being repudiated by Project Co or having discontinued its performance thereunder.

**7. CONSTRUCTION CONTRACTOR LIABILITY**

- (a) The liability of the Construction Contractor hereunder shall not be modified, released, diminished or in any way affected by:
  - (i) any independent inspection, investigation or enquiry into any matter which may be made or carried out by or for the City, or by any failure or omission to carry out any such inspection, investigation or enquiry; or
  - (ii) the appointment by the City of any other person to review the progress of or otherwise report to the City in respect of the Project, or by any action or omission of such person whether or not such action or omission might give rise to any independent liability of such person to the City,

provided always that nothing in this Section 7 shall modify or affect any rights which the Construction Contractor might have otherwise had to claim contribution from any other person whether under statute or common law.

- (b) In the event the City delivers a Step-In Notice, the Construction Contractor shall have no greater liability to the City or any Substitute than it would have had to Project Co under the Construction Contract, and the Construction Contractor shall be entitled in any proceedings by the City or any Substitute to rely on any liability limitations in the Construction Contract.

**8. PROJECT CO AS PARTY**

Project Co acknowledges and agrees that the Construction Contractor shall not be in breach of the Construction Contract by complying with its obligations hereunder.

**9. CONSTRUCTION GUARANTOR AS PARTY**

The Construction Guarantor agrees with the City that the Construction Guarantor has entered into a guarantee or covenant referred to in Section 6(b)(iii), hereby consents to the assignment, novation or grant (including any conditional assignment, novation or grant) as provided herein immediately upon receipt by the Construction Contractor of a Step-In Notice and without the requirement of any further action on the part of the City, and agrees that the Construction Guarantor shall in accordance with Section 6 enter into all such agreements or other documents as reasonably necessary to give effect to the foregoing. The Construction Guarantor enters into this Construction Contractor's Direct Agreement solely for the purposes of this Section 9.

**10. ASSIGNMENT**

- (a) Project Co shall not, without the prior written consent of the City, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Construction Contractor's Direct Agreement except to the extent entitled to do so under the Project Agreement.

- (b) The City may assign or otherwise dispose of the benefit of the whole or part of this Construction Contractor's Direct Agreement to any person to whom the City may assign or otherwise dispose of its interest in the Project Agreement pursuant to Section 59.2 of the Project Agreement but only in conjunction therewith, and shall provide written notice to Project Co and the Construction Contractor of such assignment or disposition.
- (c) The Construction Contractor shall not, without the prior written consent of the City and Project Co, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Construction Contractor's Direct Agreement except as may be permitted under the Construction Contract.

## 11. NOTICES

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Construction Contractor's Direct Agreement shall be in writing (whether or not "written notice" or "notice in writing" is specifically required by the applicable provision of this Construction Contractor's Direct Agreement) and served by sending the same by registered mail, facsimile or by hand (in each case, with a copy by electronic transmission), as follows:

If to the City:

City of Ottawa  
110 Laurier Ave West  
Ottawa, Ontario K1P 1J1  
Mail code: [REDACTED]

Attention: [REDACTED]  
Email: [REDACTED]

If to Project Co:

TransitNEXT General Partnership  
[REDACTED]  
Email: [REDACTED]  
Attn: [REDACTED]

If to the Construction Contractor:

Attn: [REDACTED]

If to the Construction Guarantor:

[REDACTED]  
  
Attention: [REDACTED]  
Title: [REDACTED]  
Email: [REDACTED]  
With copy to: [REDACTED]

- (b) Where any notice is provided or submitted to a Party via facsimile, an original of the notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a Party's failure to comply with this Section 11(b).

- (c) Any Party to this Construction Contractor's Direct Agreement may, from time to time, change any of its contact information set forth in Section 11(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows the recipient Party's receipt of such notice unless a later effective date is given in such notice.
- (d) Subject to Sections 11(e), 11(f) and 11(g):
  - (i) a notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
  - (ii) a notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
  - (iii) a notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.
- (e) If the Party giving the notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 11.
- (f) If any notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such notice shall be deemed to have been received by such recipient on the next Business Day.
- (g) A notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such notice was successful.

## **12. AMENDMENTS**

This Construction Contractor's Direct Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Construction Contractor's Direct Agreement.

## **13. WAIVER**

- (a) No waiver made or given by a Party under or in connection with this Construction Contractor's Direct Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The

single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

**14. RELATIONSHIP BETWEEN THE PARTIES**

The Parties are independent contractors. This Construction Contractor's Direct Agreement is not intended to and does not create or establish between the Parties any relationship as partners, joint venturers, employer and employee, master and servant, or, except as provided in this Construction Contractor's Direct Agreement, of principal and agent.

**15. ENTIRE AGREEMENT**

Except where provided otherwise in this Construction Contractor's Direct Agreement, this Construction Contractor's Direct Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Construction Contractor's Direct Agreement.

**16. SEVERABILITY**

Each provision of this Construction Contractor's Direct Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Construction Contractor's Direct Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Construction Contractor's Direct Agreement. If any such provision of this Construction Contractor's Direct Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Construction Contractor's Direct Agreement as near as possible to its original intent and effect.

**17. ENUREMENT**

This Construction Contractor's Direct Agreement shall enure to the benefit of, and be binding on, each of the Parties and their respective successors and permitted transferees and assigns.

**18. GOVERNING LAW AND JURISDICTION**

- (a) This Construction Contractor's Direct Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The Parties agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Construction Contractor's Direct Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.

**19. [INTENTIONALLY DELETED]**

**20. FURTHER ASSURANCE**

Each Party shall do all things, from time to time, and execute all further documents necessary to give full effect to this Construction Contractor's Direct Agreement.

**21. LANGUAGE OF AGREEMENT**

Each Party acknowledges having requested and being satisfied that this Construction Contractor's Direct Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en declare satisfaite.

**22. COUNTERPARTS**

This Construction Contractor's Direct Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any Party providing its signature in faxed form shall promptly forward to such Party an original signed copy of this Construction Contractor's Direct Agreement which was so faxed.

IN WITNESS WHEREOF the Parties have executed this Construction Contractor's Direct Agreement as of the date first above written.

**SCHEDULE 5-2**

**MAINTENANCE AND REHABILITATION CONTRACTOR'S DIRECT AGREEMENT**

**THIS AGREEMENT** is made as of the 28<sup>th</sup> day of March, 2019

**BETWEEN:**

**THE CITY OF OTTAWA**

(the “City”)

- AND -

**TRANSIT NEXT GENERAL PARTNERSHIP, [REDACTED]**

(“Project Co”)

- AND -

**[REDACTED]**

(the “Maintenance and Rehabilitation Contractor”)

- AND -

**[REDACTED]**

(the “Maintenance and Rehabilitation Guarantor”)

**WHEREAS:**

- A. The City and Project Co have entered into the Project Agreement, which requires Project Co to enter into, and to cause the Maintenance and Rehabilitation Contractor and the Maintenance and Rehabilitation Guarantor to enter into, this Maintenance and Rehabilitation Contractor's Direct Agreement with the City.
- B. Project Co and the Maintenance and Rehabilitation Contractor have entered into the Maintenance and Rehabilitation Contract, which requires the Maintenance and Rehabilitation Contractor and the Maintenance and Rehabilitation Guarantor to enter into this Maintenance and Rehabilitation Contractor's Direct Agreement with the City.

**NOW THEREFORE** in consideration of the mutual covenants and agreements of the Parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties covenant and agree as follows:

**1. DEFINITIONS**

In this Maintenance and Rehabilitation Contractor's Direct Agreement, unless the context otherwise requires:

- (a) “Applicable Law” has the meaning given in the Project Agreement.

- (b) “**Business Day**” has the meaning given in the Project Agreement.
- (c) “**Default Notice**” has the meaning given in Section 5(a).
- (d) “**Governmental Authority**” has the meaning given in the Project Agreement.
- (e) “**Maintenance and Rehabilitation Contract**” has the meaning given in the Project Agreement.
- (f) “**Maintenance and Rehabilitation Contractor’s Direct Agreement**” means this Maintenance and Rehabilitation Contractor’s Direct Agreement.
- (g) “**Party**” means the City, the Maintenance and Rehabilitation Contractor, the Maintenance and Rehabilitation Guarantor or Project Co, and “**Parties**” means the City, the Maintenance and Rehabilitation Contractor, the Maintenance and Rehabilitation Guarantor and Project Co.
- (h) “**Project**” has the meaning given in the Project Agreement.
- (i) “**Project Agreement**” means the project agreement made on or about March 28, 2019 between the City and Project Co.
- (j) “**Step-In Notice**” has the meaning given in Section 6(a).
- (k) “**Substitute**” has the meaning given in Section 6(a).
- (l) “**Variation**” has the meaning given in the Project Agreement.

## 2. INTERPRETATION

This Maintenance and Rehabilitation Contractor’s Direct Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings in this Maintenance and Rehabilitation Contractor’s Direct Agreement are for convenience of reference only, shall not constitute a part of this Maintenance and Rehabilitation Contractor’s Direct Agreement, and shall not be taken into consideration in the interpretation of, or affect the meaning of, this Maintenance and Rehabilitation Contractor’s Direct Agreement.
- (b) Unless the context otherwise requires, references to specific Sections, Clauses, Paragraphs, Subparagraphs, and other divisions are references to such Sections, Clauses, Paragraphs, Subparagraphs, or divisions of this Maintenance and Rehabilitation Contractor’s Direct Agreement and the terms “Section” and “Clause” are used interchangeably and are synonymous.
- (c) Words importing persons or parties are to be broadly interpreted and include an individual, corporation, firm, partnership, joint venture, trust, unincorporated organization, Governmental Authority, unincorporated body of persons or association and any other entity having legal capacity, and the heirs, beneficiaries, executors, administrators or other legal representatives of a person in such capacity.

- (d) Unless the context otherwise requires, wherever used herein the plural includes the singular, the singular includes the plural, and each of the masculine, feminine and neuter genders include all other genders.
- (e) References to any standard, principle, agreement or document include (subject to all relevant approvals and any other provisions of this Maintenance and Rehabilitation Contractor's Direct Agreement concerning amendments) a reference to that standard, principle, agreement or document as amended, supplemented, restated, substituted, replaced, novated or assigned.
- (f) The words in this Maintenance and Rehabilitation Contractor's Direct Agreement shall bear their natural meaning.
- (g) References containing terms such as:
  - (i) "hereof", "herein", "hereto", "hereinafter", and other terms of like import are not limited in applicability to the specific provision within which such references are set forth but instead refer to this Maintenance and Rehabilitation Contractor's Direct Agreement taken as a whole; and
  - (ii) "includes" and "including", whether or not used with the words "without limitation" or "but not limited to", shall not be deemed limited by the specific enumeration of items but shall, in all cases, be deemed to be without limitation and construed and interpreted to mean "includes without limitation" and "including without limitation".
- (h) In construing this Maintenance and Rehabilitation Contractor's Direct Agreement, the rule known as the *ejusdem generis* rule shall not apply nor shall any similar rule or approach to the construction of this Maintenance and Rehabilitation Contractor's Direct Agreement and, accordingly, general words introduced or followed by the word "other" or "including" or "in particular" shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (i) Where this Maintenance and Rehabilitation Contractor's Direct Agreement states that an obligation shall be performed "no later than" or "within" or "by" a stipulated date or event which is a prescribed number of days after a stipulated date or event, the latest time for performance shall be 5:00 p.m. on the last day for performance of the obligation concerned, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (j) Where this Maintenance and Rehabilitation Contractor's Direct Agreement states that an obligation shall be performed "on" a stipulated date, the latest time for performance shall be 5:00 p.m. on that day, or, if that day is not a Business Day, 5:00 p.m. on the next Business Day.
- (k) Any reference to time of day or date means the local time or date in Ottawa, Ontario.
- (l) Unless otherwise indicated, time periods will be strictly construed.

- (m) Whenever the terms “will” or “shall” are used in this Maintenance and Rehabilitation Contractor’s Direct Agreement they shall be construed and interpreted as synonymous and to read “shall”.

### 3. CONFLICT IN DOCUMENTS

- (a) In the event of ambiguities, conflicts or inconsistencies between or among this Maintenance and Rehabilitation Contractor’s Direct Agreement, the Project Agreement and the Maintenance and Rehabilitation Contract, this Maintenance and Rehabilitation Contractor’s Direct Agreement shall prevail.

### 4. AGREEMENTS

- (a) Project Co and the Maintenance and Rehabilitation Contractor shall not amend, modify, or depart from the terms of the Maintenance and Rehabilitation Contract without the prior written consent of the City, acting reasonably, which consent shall not be withheld or delayed where such amendment, modification or departure does not materially and adversely affect the ability of Project Co to perform its obligations under this Maintenance and Rehabilitation Contractor’s Direct Agreement and does not have the effect of increasing any liability of the City, whether actual or potential. Project Co and the Maintenance and Rehabilitation Contractor shall provide a written copy of all such amendments, modifications or departures. The Parties acknowledge and agree that this Section 4(a) shall not apply to Variations provided for under the Project Agreement.
- (b) Each of the Parties acknowledges having received a copy of the Project Agreement and the Maintenance and Rehabilitation Contract.
- (c) If the Maintenance and Rehabilitation Contractor gives Project Co any notice of any default(s) under the Maintenance and Rehabilitation Contract that may give the Maintenance and Rehabilitation Contractor a right to terminate the Maintenance and Rehabilitation Contract or to treat it as having been repudiated by Project Co or to discontinue the Maintenance and Rehabilitation Contractor’s performance thereunder, then the Maintenance and Rehabilitation Contractor shall concurrently provide the City with a copy of such notice and set out in reasonable detail the default(s).

### 5. NO TERMINATION BY MAINTENANCE AND REHABILITATION CONTRACTOR WITHOUT DEFAULT NOTICE

The Maintenance and Rehabilitation Contractor shall not exercise any right it may have to terminate the Maintenance and Rehabilitation Contract or to treat it as having been repudiated by Project Co or to discontinue the Maintenance and Rehabilitation Contractor’s performance thereunder unless:

- (a) the Maintenance and Rehabilitation Contractor first delivers a written notice (a “**Default Notice**”) to the City setting out in reasonable detail the default(s) on which the Maintenance and Rehabilitation Contractor intends to rely in terminating the Maintenance and Rehabilitation Contract or to treat it as having been repudiated by Project Co or to discontinue the Maintenance and Rehabilitation Contractor’s performance thereunder; and

- (b) within the period ending 30 days after the Maintenance and Rehabilitation Contractor notifies the City of the expiry of any relevant period for the exercise of step-in or similar rights, then 30 days after the later of the City receiving Default Notice or the expiry of the applicable cure period under the Maintenance and Rehabilitation Contract:
  - (i) the default(s) on which the Maintenance and Rehabilitation Contractor intends to rely in terminating the Maintenance and Rehabilitation Contract or to treat it as having been repudiated by Project Co or to discontinue the Maintenance and Rehabilitation Contractor's performance thereunder have not been remedied; and
  - (ii) the Maintenance and Rehabilitation Contractor has not received a Step-In Notice from the City,

provided that, until such time as the City gives the Maintenance and Rehabilitation Contractor a notice that the City will not be exercising its step-in rights, the City shall pay the Maintenance and Rehabilitation Contractor's reasonable costs of continued performance.

## 6. STEP-IN RIGHTS

- (a) The City may at any time:
  - (i) within the period referred to in Section 5(b); or
  - (ii) if the City has not received a Default Notice and if the City's right to terminate the Project Agreement has arisen and is continuing,

deliver a notice (a "**Step-In Notice**") electing to replace Project Co under the Maintenance and Rehabilitation Contract either with the City or a third party designated by the City in the Step-In Notice (the "**Substitute**"), provided that the City can demonstrate to the Maintenance and Rehabilitation Contractor, acting reasonably, that the Substitute shall have sufficient financial resources, or shall be supported by a satisfactory guarantee, to carry out the obligations of the Substitute under the Maintenance and Rehabilitation Contract.

- (b) Subject to Section 6(d), upon receipt by the Maintenance and Rehabilitation Contractor of a Step-In Notice:
  - (i) Project Co and the Maintenance and Rehabilitation Contractor will be deemed to be released from their existing and future obligations under the Maintenance and Rehabilitation Contract to each other (except with respect to any and all indemnities from Project Co or the Maintenance and Rehabilitation Contractor to the other in respect of the period prior to the receipt of the Step-In Notice), and the City or the Substitute, as applicable, and the Maintenance and Rehabilitation Contractor will be deemed to assume those same existing and future obligations towards each other (except in respect of the aforesaid indemnities);
  - (ii) the existing and future rights of Project Co against the Maintenance and Rehabilitation Contractor under the Maintenance and Rehabilitation Contract and vice versa will be deemed to be cancelled (except with respect to any and all

indemnities from Project Co or the Maintenance and Rehabilitation Contractor to the other in respect of the period prior to the receipt of the Step-In Notice), and the City or the Substitute, as applicable, and the Maintenance and Rehabilitation Contractor will be deemed to acquire those same existing and future rights against each other (except in respect of the aforesaid indemnities), subject to any applicable credit from the Maintenance and Rehabilitation Contractor to the City if the City pays for the Maintenance and Rehabilitation Contractor's reasonable costs of continued performance pursuant to Section 5;

- (iii) any guarantee, bond, covenant, letter of credit or similar performance security in favour of Project Co from any third party in respect of any term, provision, condition, obligation, undertaking or agreement on the part of the Maintenance and Rehabilitation Contractor to be performed, observed or carried out by the Maintenance and Rehabilitation Contractor as contained in, referred to, or inferred from the Maintenance and Rehabilitation Contract, except for the "Additional Letter of Credit" (as defined in the Maintenance and Rehabilitation Contract) provided in accordance with the Maintenance and Rehabilitation Contract, shall be assigned, novated or granted, as required by the City or the Substitute, as applicable, each acting reasonably, to the City or the Substitute, as applicable, and the Maintenance and Rehabilitation Contractor shall cause such assignment, novation or grant on substantially the same terms and conditions as the original guarantee, bond, covenant, letter of credit or similar performance security, provided however that where Project Co shall continue to hold, or shall continue to be entitled to have rights under, such guarantee, bond, covenant, letter of credit or similar performance security as security for any obligations of the Maintenance and Rehabilitation Contractor, the assignment, novation or grant of the guarantee, bond, covenant, letter of credit or similar performance security to the extent of any such obligations to Project Co shall be conditional on the satisfaction of those obligations to Project Co; and
- (iv) at the City's request, the Maintenance and Rehabilitation Contractor shall enter into, and shall cause the Maintenance and Rehabilitation Guarantor and any other guarantor, covenantor or surety under any guarantee, bond or covenant referred to in Section 6(b)(iii) to enter into, and the City shall or shall cause the Substitute to enter into, as applicable, all such agreements or other documents as reasonably necessary to give effect to the foregoing, including an agreement between the City or the Substitute, as applicable, and the Maintenance and Rehabilitation Contractor, acceptable to the City and the Maintenance and Rehabilitation Contractor, each acting reasonably, on substantially the same terms as the Maintenance and Rehabilitation Contract.
- (c) Subject to Section 6(d), Project Co shall, at its own cost, cooperate fully with the City and the Substitute in order to achieve a smooth transfer of the Maintenance and Rehabilitation Contract to the City or the Substitute, as applicable, and to avoid or mitigate in so far as reasonably practicable any inconvenience, including the administration of the Maintenance and Rehabilitation Contract, ongoing supervisory activities and scheduling.

- (d) The rights granted by Sections 6(b) and 6(c) shall be of no force or effect if, at any time the Maintenance and Rehabilitation Contractor receives a Step-In Notice, the Maintenance and Rehabilitation Contractor has already received notice in writing from another entity entitled to the benefit of step-in rights relating to the Maintenance and Rehabilitation Contract that it is or has validly exercised those step-in rights. If the Maintenance and Rehabilitation Contractor receives any such notice on the same day as a Step-In Notice, the Step-In Notice shall be effective.
- (e) If the City gives a Step-In Notice within the time provided hereunder at any time after the Maintenance and Rehabilitation Contractor has terminated the Maintenance and Rehabilitation Contract or treated it as having been repudiated by Project Co or discontinued the Maintenance and Rehabilitation Contractor's performance thereunder in accordance with the terms of this Maintenance and Rehabilitation Contractor's Direct Agreement, the Maintenance and Rehabilitation Contractor agrees that the Maintenance and Rehabilitation Contract shall be reinstated and deemed to have continued despite any termination or treatment as having been repudiated, and the City shall pay the Maintenance and Rehabilitation Contractor's reasonable costs for re-commencing the obligations it has under the Maintenance and Rehabilitation Contract and the Maintenance and Rehabilitation Contractor shall be entitled to reasonable compensation and/or relief for re-commencing such obligations, having regard to the additional costs and delays incurred as a result of having terminated the Maintenance and Rehabilitation Contract or having treated it as being repudiated by Project Co or having discontinued its performance thereunder.

## **7. MAINTENANCE AND REHABILITATION PROVIDER LIABILITY**

- (a) The liability of the Maintenance and Rehabilitation Contractor hereunder shall not be modified, released, diminished or in any way affected by:
  - (i) any independent inspection, investigation or enquiry into any matter which may be made or carried out by or for the City, or by any failure or omission to carry out any such inspection, investigation or enquiry;
  - (ii) the appointment by the City of any other person to review the progress of or otherwise report to the City in respect of the Project, or by any action or omission of such person whether or not such action or omission might give rise to any independent liability of such person to the City,

provided always that nothing in this Section 7 shall modify or affect any rights which the Maintenance and Rehabilitation Contractor might have otherwise had to claim contribution from any other person whether under statute or common law.

- (b) In the event the City delivers a Step-In Notice, the Maintenance and Rehabilitation Contractor shall have no greater liability to the City or any Substitute than it would have had to Project Co under the Maintenance and Rehabilitation Contract, and the Maintenance and Rehabilitation Contractor shall be entitled in any proceedings by the City or any Substitute to rely on any liability limitations in the Maintenance and Rehabilitation Contract.

## **8. PROJECT CO AS PARTY**

Project Co acknowledges and agrees that the Maintenance and Rehabilitation Contractor shall not be in breach of the Maintenance and Rehabilitation Contract by complying with its obligations hereunder.

**9. MAINTENANCE AND REHABILITATION GUARANTOR AS PARTY**

The Maintenance and Rehabilitation Guarantor agrees with the City that the Maintenance and Rehabilitation Guarantor has entered into a guarantee or covenant referred to in Section 6(b)(iii), hereby consents to the assignment, novation or grant (including any conditional assignment, novation or grant) as provided herein immediately upon receipt by the Maintenance and Rehabilitation Contractor of a Step-In Notice and without the requirement of any further action on the part of the City, and agrees that the Maintenance and Rehabilitation Guarantor shall in accordance with Section 6 enter into all such agreements or other documents as reasonably necessary to give effect to the foregoing. The Maintenance and Rehabilitation Guarantor enters into this Maintenance and Rehabilitation Contractor's Direct Agreement solely for the purposes of this Section 9.

**10. ASSIGNMENT**

- (a) Project Co shall not, without the prior written consent of the City, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Maintenance and Rehabilitation Contractor's Direct Agreement except to the extent entitled to do so under the Project Agreement.
- (b) The City may assign or otherwise dispose of the benefit of the whole or part of this Maintenance and Rehabilitation Contractor's Direct Agreement to any person to whom the City may assign or otherwise dispose of its interest in the Project Agreement pursuant to Section 59.2 of the Project Agreement but only in conjunction therewith, and shall provide written notice to Project Co and the Maintenance and Rehabilitation Contractor of such assignment or disposition.
- (c) The Maintenance and Rehabilitation Contractor shall not, without the prior written consent of the City and Project Co, assign, transfer, charge, subcontract, subparticipate or otherwise dispose of any interest in this Maintenance and Rehabilitation Contractor's Direct Agreement, except as may be permitted under the Maintenance and Rehabilitation Contract.

**11. NOTICES**

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Maintenance and Rehabilitation Contractor's Direct Agreement shall be in writing (whether or not "written notice" or "notice in writing" is specifically required by the applicable provision of this Maintenance and Rehabilitation Contractor's Direct Agreement) and served by sending the same by registered mail, facsimile or by hand (in each case, with a copy by electronic transmission), as follows:

If to the City:

City of Ottawa  
110 Laurier Ave West  
Ottawa, Ontario K1P 1J1  
Mail code: [REDACTED]

- Attention: [REDACTED]  
Email: [REDACTED]
- If to Project Co: TransitNEXT General Partnership  
[REDACTED]
- Email: [REDACTED]  
Attn: [REDACTED]
- If to the Maintenance and Rehabilitation Contractor: [REDACTED]
- Attention: [REDACTED]  
Fax: [REDACTED]  
Email: [REDACTED]  
Copy to: [REDACTED]  
[REDACTED]  
[REDACTED]  
[REDACTED]
- If to the Maintenance and Rehabilitation Guarantor: [REDACTED]
- Attention: [REDACTED]  
Title: [REDACTED]  
Email: [REDACTED]  
With copy to: [REDACTED]
- (b) Where any notice is provided or submitted to a Party via facsimile, an original of the notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a Party's failure to comply with this Section 11(b).
- (c) Any Party to this Maintenance and Rehabilitation Contractor's Direct Agreement may, from time to time, change any of its contact information set forth in Section 11(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows the recipient Party's receipt of such notice unless a later effective date is given in such notice.
- (d) Subject to Sections 11(e), 11(f) and 11(g):
- (i) a notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
- (ii) a notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
- (iii) a notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.

- (e) If the Party giving the notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 11.
- (f) If any notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such notice shall be deemed to have been received by such recipient on the next Business Day.
- (g) A notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such notice was successful.

## **12. AMENDMENTS**

This Maintenance and Rehabilitation Contractor's Direct Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the Parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Maintenance and Rehabilitation Contractor's Direct Agreement.

## **13. WAIVER**

- (a) No waiver made or given by a Party under or in connection with this Maintenance and Rehabilitation Contractor's Direct Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the Party giving such waiver, and delivered by such Party to the other Parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any Party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

## **14. RELATIONSHIP BETWEEN THE PARTIES**

The Parties are independent contractors. This Maintenance and Rehabilitation Contractor's Direct Agreement is not intended to and does not create or establish between the Parties any relationship as partners, joint venturers, employer and employee, master and servant, or, except as provided in this Maintenance and Rehabilitation Contractor's Direct Agreement, of principal and agent.

## **15. ENTIRE AGREEMENT**

Except where provided otherwise in this Maintenance and Rehabilitation Contractor's Direct Agreement, this Maintenance and Rehabilitation Contractor's Direct Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Maintenance and Rehabilitation Contractor's Direct

Agreement.

**16. SEVERABILITY**

Each provision of this Maintenance and Rehabilitation Contractor's Direct Agreement shall be valid and enforceable to the fullest extent permitted by law. If any provision of this Maintenance and Rehabilitation Contractor's Direct Agreement is declared invalid, unenforceable or illegal by the courts of a competent jurisdiction, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Maintenance and Rehabilitation Contractor's Direct Agreement. If any such provision of this Maintenance and Rehabilitation Contractor's Direct Agreement is invalid, unenforceable or illegal, the Parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Maintenance and Rehabilitation Contractor's Direct Agreement as near as possible to its original intent and effect.

**17. ENUREMENT**

This Maintenance and Rehabilitation Contractor's Direct Agreement shall enure to the benefit of, and be binding on, each of the Parties and their respective successors and permitted transferees and assigns.

**18. GOVERNING LAW AND JURISDICTION**

- (a) This Maintenance and Rehabilitation Contractor's Direct Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The Parties agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Maintenance and Rehabilitation Contractor's Direct Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.

**19. [INTENTIONALLY DELETED]**

**20. FURTHER ASSURANCE**

Each Party shall do all things, from time to time, and execute all further documents necessary to give full effect to this Maintenance and Rehabilitation Contractor's Direct Agreement.

**21. LANGUAGE OF AGREEMENT**

Each Party acknowledges having requested and being satisfied that this Maintenance and Rehabilitation Contractor's Direct Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en déclare satisfaite.

**22. COUNTERPARTS**

This Maintenance and Rehabilitation Contractor's Direct Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the Parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any Party providing its signature in faxed form shall promptly forward to such Party an original signed copy of this Maintenance and Rehabilitation Contractor's Direct Agreement which was so faxed.

IN WITNESS WHEREOF the Parties have executed this Maintenance and Rehabilitation Contractor's Direct Agreement as of the date first above written.

**SCHEDULE 6**

**INDEPENDENT CERTIFIER AGREEMENT**

**THIS AGREEMENT** is made as of the 28<sup>th</sup> day of March, 2019

**BETWEEN:**

**THE CITY OF OTTAWA**

(the “City”)

**AND**

**TRANSITNEXT GENERAL PARTNERSHIP, [REDACTED]**

(“Project Co”)

**AND**

**[REDACTED]**

(the “Independent Certifier”)

**WHEREAS:**

- A. The City and Project Co (collectively, the “**PA Parties**” and each, a “**PA Party**”) have entered into the Project Agreement.
- B. Pursuant to the terms of the Project Agreement, the PA Parties wish to appoint the Independent Certifier, and the Independent Certifier wishes to accept such appointment, to perform certain services in connection with the Project Agreement.
- C. The PA Parties and the Independent Certifier wish to enter into this Independent Certifier Agreement in order to record the terms by which the Independent Certifier shall perform such services.

**NOW THEREFORE** in consideration of the mutual covenants and agreements of the PA Parties and the Independent Certifier herein contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the PA Parties and the Independent Certifier covenant and agree as follows:

**1. DEFINITIONS**

**1.1 Definitions**

- (a) In this Independent Certifier Agreement, including the recitals and appendices, unless the context indicates a contrary intention, terms which are defined in the Project Agreement (and not otherwise defined in this Independent Certifier Agreement) shall have meanings given to them in the Project Agreement and the following terms shall have the following meanings:

- (i) **“Certification Services”** means:
  - (A) all of the functions and obligations described in the Project Agreement as being the responsibility of the Independent Certifier;
  - (B) all of the functions and obligations conferred on the Independent Certifier under this Independent Certifier Agreement, including the functions described in Appendix A to this Independent Certifier Agreement; and
  - (C) all other functions or tasks which the Independent Certifier must do to comply with its obligations under this Independent Certifier Agreement.
- (ii) **“Certification Services Variation”** is any change to the Certification Services.
- (iii) **“Contract Material”** means all material:
  - (A) provided to the Independent Certifier or created or required to be created by either PA Party; and
  - (B) provided by or created or required to be created by the Independent Certifier as part of, or for the purpose of, performing the Certification Services,including documents, equipment, reports, technical information, plans, charts, drawings, calculations, tables, schedules and data (stored and recorded by any means).
- (iv) **“Contribution Agreement”** means either the agreement entered into by the City and the Government of Canada, represented by the Ministry of Infrastructure and Communities, or the agreement entered into by the City and the Government of Ontario, represented by the Ministry of Transportation, for the contribution of funding for the Project, and **“Contribution Agreements”** means both.
- (v) **“Contribution Agreement Party”** means either the Government of Canada, represented by the Ministry of Infrastructure and Communities, or the Government of Ontario, represented by the Ministry of Transportation, and **“Contribution Agreement Parties”** means both.
- (vi) **“Earned Value Measurement Techniques”** means the techniques used to measure Earned Value established by Project Co and agreed with the Independent Certifier in accordance with the “Practice Standard for Earned Value Management” (2nd Edition, published in 2011 by the Project Management Institute, Inc.).
- (vii) **“Fee”** means the fees payable by the City and Project Co to the Independent Certifier for the Certification Services, as such fees are specified and made payable in accordance with Appendix B to this Independent Certifier Agreement.
- (viii) **“IC Monthly Report”** has the meaning given in Appendix A to this Independent Certifier Agreement.
- (ix) **“IC Quarterly Report”** has the meaning given in Appendix A to this Independent Certifier Agreement.

- (x) **“Intellectual Property”** means any and all intellectual property rights, whether subsisting now or in the future, including rights of any kind in inventions, patents, copyright, trademarks, service marks, industrial designs, integrated circuit topography rights, applications for registration of any of the foregoing, and know-how, trade secrets, confidential information and trade or business names.
- (xi) **“PA Parties”** means both the City and Project Co, and **“PA Party”** means either the City or Project Co, as the context requires.
- (xii) **“Project Agreement”** means that certain project agreement made on or about the date hereof between the City and Project Co with respect to the design, construction, financing, maintenance and rehabilitation of the Trillium Line Extension Project.

## 2. INTERPRETATION

### 2.1 Interpretation

- (a) In this Independent Certifier Agreement, unless the context indicates a contrary intention:
  - (i) words denoting the singular number include the plural and vice versa;
  - (ii) words denoting individuals include corporations and vice versa;
  - (iii) headings are for convenience only and do not affect interpretation;
  - (iv) references to Clauses, Sections or Parts are references to Clauses, Sections or Parts of this Independent Certifier Agreement;
  - (v) references to this Independent Certifier Agreement or any contract, agreement or instrument are deemed to include references to this Independent Certifier Agreement or such other contract, agreement or instrument as amended, novated, supplemented, varied or replaced from time to time;
  - (vi) references to any party to this Independent Certifier Agreement includes its successors or permitted assigns;
  - (vii) words denoting any gender include all genders;
  - (viii) references to any legislation or to any section or provision of any legislation include any statutory modification or re-enactment of any statutory provision substituted for legislation, section or provision, and ordinances, by laws, regulations and other statutory instruments issued under that legislation, section or provision;
  - (ix) a reference to “\$” is to Canadian currency;
  - (x) the terms “including” and “include” mean “including” or “include” (as applicable) without limitation;
  - (xi) if a word or phrase is defined, then other parts of speech and grammatical forms of that word or phrase have a corresponding meaning; and
  - (xii) unless otherwise indicated, all time periods will be strictly construed.

## **2.2 Obligations and Exercise of Rights by PA Parties**

- (a) The obligations of the PA Parties under this Independent Certifier Agreement shall be several.
- (b) Except as specifically provided for in this Independent Certifier Agreement or the Project Agreement, the rights of the PA Parties under this Independent Certifier Agreement shall be jointly exercised by the PA Parties.

## **3. ROLE OF THE INDEPENDENT CERTIFIER**

### **3.1 Engagement**

- (a) The PA Parties hereby appoint the Independent Certifier, and the Independent Certifier hereby accepts such appointment, to carry out the Certification Services in accordance with this Independent Certifier Agreement. The Independent Certifier shall perform the Certification Services in accordance with this Independent Certifier Agreement.
- (b) Nothing in this Independent Certifier Agreement will be interpreted as giving the Independent Certifier any responsibility for performance of the design or construction, or for the certifications of the professionals of record.
- (c) Neither PA Party shall, without the prior written consent of the other PA Party, enter into any separate agreement with the Independent Certifier in connection with the Project, and Project Co shall ensure that no Project Co Party enters into any separate agreement with the Independent Certifier in connection with the Project. The Independent Certifier shall not enter into any separate agreement with either PA Party in connection with the Project without the prior written consent of the other PA Party.
- (d) The Independent Certifier shall make such observations and evaluations of any Works pursuant to a Variation in order to certify any monthly progress payment to Project Co of the value of work performed, provided the Independent Certifier shall be entitled to a Certification Services Variation Order pursuant to Sections 9.4 and 9.5 of this Independent Certifier Agreement.
- (e) The PA Parties acknowledge and agree that the Independent Certifier may rely on the assessment report prepared by the Independent Safety Assessor with respect to the safety certification of the System Infrastructure. The Independent Certifier acknowledges and agrees that, in carrying out the Certification Services, it shall be bound to the assessment report and shall consider the Independent Safety Assessor's views with respect to the safety of the System Infrastructure in making its determination as to whether Project Co has satisfied the conditions of Substantial Completion.
- (f) The PA Parties acknowledge and agree that, notwithstanding anything to the contrary in this Agreement, the Certification Services described in paragraph (hh) of Appendix A do not, nor shall such Certification Services be construed so as to, change, modify or have any impact whatsoever on the PA Parties' respective rights, entitlements and obligations as against each other pursuant to the provisions of the Project Agreement.

### **3.2 Acknowledgement of Independent Certifier**

- (a) The Independent Certifier hereby acknowledges in favour of the PA Parties that it has received a copy of the Project Agreement.

### **3.3 Standard of Care**

- (a) The Independent Certifier must exercise the standard and skill, care and diligence in the performance of the Certification Services that would be expected of an expert professional experienced in providing services in the nature of the Certification Services for projects similar to the Project.

### **3.4 Duty of Independent Judgment**

- (a) In exercising its Certification Services, the Independent Certifier must:
  - (i) act impartially, honestly and independently in representing the interests of both PA Parties in accordance with the terms of the Project Agreement and this Independent Certifier Agreement;
  - (ii) act reasonably and professionally;
  - (iii) act in a timely manner:
    - (A) in accordance with the times prescribed in this Independent Certifier Agreement and the Project Agreement; or
    - (B) where no times are prescribed, within 10 days or such earlier time so as to enable the PA Parties to perform their respective obligations under the Project Agreement; and
  - (iv) act in accordance with the joint directions of the PA Parties provided that the directions are not inconsistent with the other terms of this Independent Certifier Agreement or the terms of the Project Agreement and do not vary or prejudice the Independent Certifier's authority or responsibilities or the exercise by the Independent Certifier of its professional judgment under this Independent Certifier Agreement.
- (b) Although the Independent Certifier may take account of any opinions or representations made by the PA Parties, the Independent Certifier shall not be bound to comply with any opinions or representations made by either of them in connection with any matter on which the Independent Certifier is required to exercise its professional judgment.
- (c) The Independent Certifier acknowledges that the PA Parties may rely on the Certification Services, including determinations, findings and certifications made by the Independent Certifier, and accordingly, the Independent Certifier represents and warrants that will use its best skill and judgment in providing the Certification Services, and that information provided and/or submitted to the PA Parties in accordance with this Independent Certifier Agreement is true and accurate, and prepared in good faith to the best of the Independent Certifier's skill, judgment and knowledge.
- (d) The Independent Certifier acknowledges that all Certification Services, Contract Material and all determinations, findings, reports, certificates and other information delivered by the Independent Certifier to the City pursuant to the Project Agreement may be relied upon by the Contribution Agreement Parties, and that the Independent Certifier shall owe each an equal duty of care as is owed to the City hereunder, notwithstanding the fact that the Contribution Agreement Parties are not parties to this Independent Certifier Agreement or the Project Agreement. The Independent

Certifier will confirm the foregoing directly to either Contribution Agreement Party, if requested by the City.

### **3.5 Authority to Act**

- (a) The Independent Certifier:
  - (i) is an independent consultant and is not, and must not purport to be, a partner, joint venturer or agent of either PA Party;
  - (ii) other than as expressly set out in this Independent Certifier Agreement or the Project Agreement, has no authority to give any directions to a PA Party or its officers, directors, members, employees, contractors, consultants or agents; and
  - (iii) has no authority to waive or alter any terms of the Project Agreement, nor to discharge or release a party from any of its obligations under the Project Agreement unless jointly agreed by the PA Parties in writing.
- (b) The Independent Certifier will confirm the foregoing directly to either Contribution Agreement Party, if requested by the City.

### **3.6 Knowledge of the PA Parties' Requirements**

- (a) The Independent Certifier warrants that:
  - (i) it has informed and will be deemed to have informed itself fully of the requirements of the Project Agreement;
  - (ii) it will inform itself fully of the requirements of such other documents and materials as may become relevant from time to time to the performance of the Certification Services;
  - (iii) without limiting Sections 3.6(a)(i) or 3.6(a)(ii), it has and will be deemed to have informed itself fully of all time limits and other requirements for any Certification Service which the Independent Certifier carries out under the Project Agreement and this Independent Certifier Agreement;
  - (iv) it has and will be deemed to have informed itself completely of the nature of the work necessary for the performance of the Certification Services and the means of access to and facilities at or on the Lands and Site including restrictions on any such access or protocols that are required; and
  - (v) it has satisfied itself as to the correctness and sufficiency of its proposal for the Certification Services and that the Fee covers the cost of complying with all of the obligations under this Independent Certifier Agreement and of all matters and things necessary for the due and proper performance and completion of the Certification Services.

### **3.7 Co-ordination and Information by Independent Certifier**

- (a) The Independent Certifier must:
  - (i) fully cooperate with the PA Parties and their consultants and advisors;

- (ii) carefully co-ordinate the Certification Services with the work and services performed by the PA Parties;
- (iii) carefully co-ordinate the Certification Services with the safety assessment performed by the Independent Safety Assessor;
- (iv) without limiting its obligations under Sections 3.4 and 3.7(a)(ii), perform the Certification Services so as to avoid unreasonably interfering with, disrupting or delaying the work and services performed by the PA Parties;
- (v) include both PA Parties in all discussions, meetings, or any other communications regarding the Project;
- (vi) provide copies to the PA Parties of all reports, communications, certificates and other documentation that it provides to either PA Party; and
- (vii) provide a copy of the Contract Material to each of the Contribution Agreement Parties at the same time as it is provided to the PA Parties. In respect of such Contract Material, either Contribution Agreement Party may make inquiries of the Independent Certifier and request further investigation or clarification in connection with, and subject to, its contribution agreement.

### **3.8 Conflict of Interest**

- (a) The Independent Certifier warrants that:
  - (i) at the date of this Independent Certifier Agreement, no conflict of interest exists or is likely to arise in the performance of its obligations under this Independent Certifier Agreement, and the Independent Certifier further warrants that it has not been retained as an advisor to either of the PA Parties or any of their respective related entities in respect of the Project Agreement (including, but not limited to, acting as a transaction advisor to either PA Party); and
  - (ii) if, during the term of this Independent Certifier Agreement, any such conflict or risk of conflict of interest arises, the Independent Certifier will notify the PA Parties immediately in writing of that conflict or risk of conflict and take such steps as may be required by either of the PA Parties to avoid or mitigate that conflict or risk.

### **3.9 Independent Certifier Personnel**

- (a) The Independent Certifier shall make reasonable efforts to ensure that the individuals listed in Appendix C remain involved in the performance of the Certification Services and, in particular, will not, for the duration of this Independent Certifier Agreement, require any such person to be involved in any other project on behalf of the Independent Certifier if, in the reasonable opinion of the PA Parties, such involvement would have a material adverse effect on the performance of the Certification Services.
- (b) Any replacement of the individuals listed in Appendix C is subject to the PA Parties' prior written approval.

- (c) The Independent Certifier shall ensure that its personnel providing the Certification Services in respect of the Works shall:
  - (i) possess a current professional designation of not less than membership in Professional Engineers Ontario (PEO), the Ontario Association of Certified Engineering Technicians and Technologists or such similar professional or consulting designation recognized in North America for Mechanical, Electrical, Civil, Structural, Transportation, Geotechnical, Mining, Tunnels, Environmental, Utilities, Rail Systems, and Vehicles and Industrial leads;
  - (ii) possess a current professional designation of not less than Professional Quantity Surveyors (PQS) for the cost estimator and any individuals who will prepare and evaluate construction and development information for the cost control and Works measurements for Payment;
  - (iii) have demonstrated competence in the planning, design, construction and commissioning of comparable and complex facilities and in having completed or monitored the planning, design, construction and commissioning of a comparable light rail transit systems;
  - (iv) have an understanding of the appropriate standards, guidelines and policies related to planning, design, construction and commissioning for light rail transit systems,;
  - (v) have an understanding of any documentation to be provided pursuant to this Independent Certifier Agreement and the Project Agreement, including not only the start-up procedures but any pre-commissioning and post-commissioning activities; and
  - (vi) have the relevant qualifications for their specified area of expertise and membership to the relevant professional bodies which licences them to give their opinions and carry out the relevant works as detailed within this agreement.
- (d) The Independent Certifier shall furnish the City with evidence satisfactory to the City of any such personnel's compliance with the foregoing requirements within a reasonable time prior to the proposed commencement of the Certification Services in respect of the Works.
- (e) The Independent Certifier shall engage the personnel listed in Appendix C in all day-to-day activities relevant to their area of expertise for the Certification Services.

### **3.10 Minimize Interference**

- (a) The Independent Certifier shall perform the Certification Services in such a way as to minimize any undue interference with the progress of the Works.

## **4. ROLE OF THE PA PARTIES**

### **4.1 Assistance**

- (a) The PA Parties agree to cooperate with and provide reasonable assistance to the Independent Certifier to familiarize the Independent Certifier with all necessary aspects of the Project to enable the Independent Certifier to carry out its obligations under this Independent Certifier Agreement.

#### **4.2 Instructions in Writing**

- (a) Unless otherwise provided in this Independent Certifier Agreement or the Project Agreement, all instructions to the Independent Certifier by the PA Parties shall be given in writing and accepted or endorsed by both of the PA Parties.

#### **4.3 Information and Services**

- (a) The PA Parties shall make available to the Independent Certifier, as soon as practicable from time to time, all information, documents and particulars necessary for the Independent Certifier to carry out the Certification Services, including such information, documents and particulars required in order for the Independent Certifier to certify Construction Period Payments and to determine whether Substantial Completion and Final Completion have occurred, and shall provide copies of all such information, documents and particulars to the other party hereto.
- (b) Project Co shall promptly provide all information received from the Independent Safety Assessor, including the assessment report, required in order for the Independent Certifier to determine whether Substantial Completion and Final Completion have occurred.

#### **4.4 Additional Information**

- (a) If any information, documents or particulars are reasonably required to enable the Independent Certifier to perform the Certification Services and have not been provided by the PA Parties, then:
  - (i) the Independent Certifier must give notice in writing to the Project Co Representative or the City Representative, as the case may be, of the details of the information, documents or particulars demonstrating the need and the reasons why they are required; and
  - (ii) Project Co or the City, as the case may be, must arrange the provision of the required information, documents or particulars.

#### **4.5 Right to Enter and Inspect**

- (a) Upon giving reasonable notice to the Project Co Representative, the Independent Certifier (and any person authorized by it) may enter and inspect the Lands, the System Infrastructure or the Works at any reasonable time in connection with the exercise or proposed exercise of rights under this Independent Certifier Agreement, subject to:
  - (i) observance of the reasonable rules of Project Co as to safety and security for the Lands, the System Infrastructure and the Works;
  - (ii) not causing unreasonable delay to the carrying out of the Works by reason of its presence on the Lands, the System Infrastructure or the Works; and
  - (iii) not causing any damage to the Lands, the System Infrastructure or the Works.

#### **4.6 PA Parties Not Relieved**

- (a) Neither PA Party shall be relieved from performing or observing its obligations, or from any other liabilities, under the Project Agreement as a result of either the appointment of, or any act or omission by, the Independent Certifier.

**4.7 PA Parties not Liable**

- (a) On no account will a PA Party be liable to another PA Party for any act or omission by the Independent Certifier whether under or purportedly under a provision of the Project Agreement, this Independent Certifier Agreement or otherwise, provided that any such act or omission shall not extinguish, relieve, limit or qualify the nature or extent of any right or remedy of either PA Party against or any obligation or liability of either PA Party to the other PA Party which would have existed regardless of such act or omission.

**5. CERTIFICATION QUALITY PLAN**

**5.1 Certification Quality Plan**

- (a) The Independent Certifier must:
- (i) develop and implement a certification quality plan identifying the processes and outcomes of the Certification Services, including but not limited to timelines, deliverables and input required from the PA Parties, that complies with all requirements of the Independent Certifier's quality assurance accreditation, and is otherwise satisfactory to each of the City Representative and the Project Co Representative;
  - (ii) within 15 days after the date of this Independent Certifier Agreement, provide a draft of such certification quality plan to each of the City Representative and the Project Co Representative;
  - (iii) within 30 days after the date of this Independent Certifier Agreement, provide the final certification quality plan to each of the City Representative and the Project Co Representative;
  - (iv) if satisfactory to each of the City Representative and the Project Co Representative, implement such certification quality plan; and
  - (v) if not satisfactory to each of the City Representative and the Project Co Representative, within 7 days after receiving notice thereof from either PA Party to that effect, revise and resubmit the certification quality plan to each of the City Representative and the Project Co Representative, and implement it if satisfactory to each of the City Representative and the Project Co Representative.

**5.2 Certification Quality Plan not to Relieve Independent Certifier**

- (a) The Independent Certifier will not be relieved of any responsibilities or obligations in respect of the performance of the Certification Services and will remain solely responsible for them notwithstanding:
- (i) the obligation of the Independent Certifier to develop and implement a certification quality plan; or
  - (ii) any comment or direction upon, review or acceptance of, approval to proceed with or request to vary any part of the certification quality plan by either the City Representative or the Project Co Representative.

**6. SUSPENSION**

**6.1 Notice**

- (a) The Certification Services (or any part) may be suspended at any time by the PA Parties:
  - (i) if the Independent Certifier fails to comply with its obligations under this Independent Certifier Agreement, immediately by the PA Parties giving joint notice in writing to the Independent Certifier; or
  - (ii) in any other case, by the PA Parties giving 7 days' joint notice in writing to the Independent Certifier.

**6.2 Costs of Suspension**

- (a) The Independent Certifier will:
  - (i) subject to the Independent Certifier complying with Article 9, be entitled to recover the extra costs incurred by the Independent Certifier by reason of a suspension directed under Section 6.1(a)(ii) valued as a Certification Services Variation under Section 9; and
  - (ii) have no entitlement to be paid any costs, expenses, losses or damages arising from a suspension under Section 6.1(a)(i).

**6.3 Recommencement**

- (a) The Independent Certifier must immediately recommence the carrying out of the Certification Services (or any part) on receipt of a joint written notice from the PA Parties requiring it to do so.

**7. INSURANCE AND LIABILITY**

**7.1 Independent Certifier's Insurance**

- (a) The Independent Certifier must have in place at all times during the term of this Independent Certifier Agreement:
  - (i) professional liability insurance:
    - (A) in the amount of \$[REDACTED] per claim and \$[REDACTED] in the aggregate, a deductible of not more than \$[REDACTED] per claim and from an insurer and on terms satisfactory to each of the PA Parties; and
    - (B) covering liability which the Independent Certifier might incur as a result of a breach by it of its obligations owed by the Independent Certifier in a professional capacity to the PA Parties, or either of them, under or in connection with this Independent Certifier Agreement or the provision of the Certification Services; and
  - (ii) commercial general liability insurance in the amount of \$[REDACTED] per claim and in the aggregate, no deductible for personal injury or bodily injury, a deductible of not more than \$[REDACTED] per occurrence for property damage and from an insurer and on terms satisfactory to each of the PA Parties.

- (b) The Independent Certifier must provide copies of its insurance policies to each of the PA Parties upon execution of this Independent Certifier Agreement, and, at least 5 Business Days prior to the expiry date of any such insurance policy, the Independent Certifier must provide evidence of the renewal of any such insurance policy satisfactory to the PA Parties, acting reasonably.

## **7.2 Workers' Compensation Insurance**

- (a) The Independent Certifier must, at its own cost and at all times during the term of this Independent Certifier Agreement, insure its liability (including its common law liability) as required under any applicable workers compensation statute or regulation in relation to its employees engaged in the Certification Services.

## **8. PAYMENT FOR SERVICES**

### **8.1 Payment of Fee**

- (a) In consideration of the Independent Certifier performing the Certification Services in accordance with this Independent Certifier Agreement, each PA Party shall pay one-half of the Fee to the Independent Certifier in accordance with the payment schedule specified in Appendix B.
- (b) The obligation of each PA Party to pay one-half of the Fee to the Independent Certifier is: (i) a several obligation, and neither PA Party shall have any liability in respect of the non-payment by the other PA Party of any fees or costs payable by such other PA Party under this Independent Certifier Agreement, and (ii) contingent upon the Independent Certifier issuing a separate invoice to each PA Party for its one-half share of a given payment and providing each PA Party with a copy of the related separate invoice issued to the other PA Party.
- (c) The Fee includes all taxes (except for HST), overheads and profit, all labour and materials, insurance costs, travel, hospitality, food and incidental expenses, and all other overhead including any fees or other charges required by law to perform the Certification Services.
- (d) The PA Parties acknowledge and agree that if any approved amount due and payable by the PA Parties to the Independent Certifier in excess of \$[REDACTED] is outstanding for more than 60 days, the Independent Certifier shall not have any obligation to make any certification under the Project Agreement.

## **9. CERTIFICATION SERVICES VARIATIONS**

### **9.1 Notice of Certification Services Variation**

- (a) If the Independent Certifier believes, other than a "Certification Services Variation Order" under Section 9.4(c), that any direction by the PA Parties constitutes or involves a Certification Services Variation it must:
  - (i) within 7 days after receiving the direction and before commencing work on the subject matter of the direction, give notice to the PA Parties that it considers the direction constitutes or involves a Certification Services Variation; and
  - (ii) within 21 days after giving the notice under Section 9.1(a)(i), submit a written claim to each of the City Representative and the Project Co Representative which includes detailed particulars of the claim, the amount of the claim and how it was calculated.

- (b) Regardless of whether the Independent Certifier considers that such a direction constitutes or involves a Certification Services Variation, the Independent Certifier must continue to perform the Certification Services in accordance with this Independent Certifier Agreement and all directions, including any direction in respect of which notice has been given under this Section 9.1.

## **9.2 No Adjustment**

- (a) If the Independent Certifier fails to comply with Section 9.1, the Fee will not be adjusted as a result of the relevant direction.

## **9.3 External Services**

- (a) In the event that external personnel or consultants are required for expert opinion with respect to a Certification Services Variation, then, with the prior written approval of the PA Parties, any additional fees relating to such external personnel or consultants will be payable by the PA Parties at the agreed upon amount.

## **9.4 Certification Services Variation Procedure**

- (a) The City Representative and the Project Co Representative may jointly issue a document titled “Certification Services Variation Price Request” to the Independent Certifier which will set out details of a proposed Certification Services Variation which the PA Parties are considering.
- (b) Within 7 days after the receipt of a “Certification Services Variation Price Request”, the Independent Certifier must provide each of the City Representative and the Project Co Representative with a written notice in which the Independent Certifier sets out the effect which the proposed Certification Services Variation will have on the Fee.
- (c) Each of the City Representative and the Project Co Representative may then jointly direct the Independent Certifier to carry out a Certification Services Variation by written document titled “Certification Services Variation Order” which will state either that:
  - (i) the Fee is adjusted as set out in the Independent Certifier’s notice; or
  - (ii) the adjustment (if any) to the Fee will be determined under Section 9.5.

## **9.5 Cost of Certification Services Variation**

- (a) Subject to Section 9.2, the Fee will be adjusted for all Certification Services Variations or suspensions under Section 6.1(a)(ii) carried out by the Independent Certifier by:
  - (i) the amount (if any) stated in the “Certification Services Variation Order” in accordance with Section 9.4(c);
  - (ii) if Section 9.5(a)(i) is not applicable, an amount determined pursuant to the fee schedule in Appendix B; or
  - (iii) where such rates or prices are not applicable, a reasonable amount to be agreed between the PA Parties and the Independent Certifier or, failing agreement, determined by the City Representative and the Project Co Representative jointly.

- (b) Any reductions in the Fee shall be calculated on the same basis as any increases.

## **10. TERM AND TERMINATION**

### **10.1 Term**

- (a) Subject to earlier termination, this Independent Certifier Agreement will commence on the date of the Project Agreement and continue in full force until:
- (i) the completion of the Works and the performance of the Certification Services set forth herein; or
  - (ii) such other date as may be mutually agreed between the PA Parties and the Independent Certifier.

### **10.2 Notice of Breach**

- (a) If the Independent Certifier commits a breach of this Independent Certifier Agreement, the PA Parties may give written notice to the Independent Certifier:
- (i) specifying the breach; and
  - (ii) directing its rectification in the period specified in the notice being a period not less than 7 days from the date of service of the notice.

### **10.3 Termination for Breach**

- (a) If the Independent Certifier fails to rectify the breach within the period specified in the notice issued under Section 10.2, the PA Parties may, without prejudice to any other rights of the PA Parties or either of them, immediately terminate this Independent Certifier Agreement.

### **10.4 Termination for Financial Difficulty or Change in Control**

- (a) The PA Parties may, without prejudice to any other rights which the PA Parties or either of them may have, terminate this Independent Certifier Agreement immediately if:
- (i) events have occurred or circumstances exist which, in the opinion of the PA Parties, may result in or have resulted in an insolvency or a Change in Control of the Independent Certifier; or
  - (ii) the Independent Certifier has communications with its creditors with a view to entering into, or enters into, any form of compromise, arrangement or moratorium of any debts whether formal or informal, with its creditors.

### **10.5 Termination for Convenience**

- (a) Notwithstanding anything to the contrary in this Independent Certifier Agreement, the PA Parties may, at any time, jointly terminate this Independent Certifier Agreement upon 30 days written notice to the Independent Certifier. The PA Parties and the Independent Certifier agree that, notwithstanding the 30 days' notice of termination, the Independent Certifier shall continue on a day-to-day basis thereafter until a new Independent Certifier is appointed.

**10.6 Independent Certifier's Rights upon Termination for Convenience**

- (a) Upon a termination under Section 10.5, the Independent Certifier will:
- (i) be entitled to be reimbursed by the PA Parties for the value of the Certification Services performed by it to the date of termination; and
  - (ii) not be entitled to any damages or other compensation in respect of the termination and (without limitation) any amount in respect of:
    - (A) the lost opportunity to earn a profit in respect of the Certification Services not performed at the date of termination; and
    - (B) any lost opportunity to recover overheads from the turnover which would have been generated under this Independent Certifier Agreement but for it being terminated.

**10.7 Procedure upon Termination**

- (a) Upon completion of the Independent Certifier's engagement under this Independent Certifier Agreement or earlier termination of this Independent Certifier Agreement (whether under Section 10.3, 10.4 or 10.5 or otherwise), the Independent Certifier must:
- (i) cooperate with the PA Parties with respect to the transition of the Certification Services to a replacement certifier;
  - (ii) deliver to the PA Parties all Contract Material and all other information concerning the Project held or prepared by the Independent Certifier during the execution of work under this Independent Certifier Agreement; and
  - (iii) as and when required by the PA Parties, meet with them and such other persons nominated by them with a view to providing them with sufficient information to enable the PA Parties to execute the Project or the persons nominated to provide the Certification Services.

**10.8 Effect of Termination**

- (a) Except as otherwise expressly provided in this Independent Certifier Agreement, termination of this Independent Certifier Agreement shall be without prejudice to any accrued rights and obligations under this Independent Certifier Agreement as at the date of termination (including the right of the PA Parties to recover damages from the Independent Certifier).

**10.9 Survival**

- (a) Termination of this Independent Certifier Agreement shall not affect the continuing rights and obligations of the PA Parties and the Independent Certifier under Sections 7, 8, 10.6, 10.7, 10.8, 11, 12.7 and 12.8 and this Section 10.9 or under any other provision which is expressed to survive termination or which is required to give effect to such termination or the consequences of such termination.

## **11. INDEMNITY**

### **11.1 PA Parties to Save Independent Certifier Harmless**

- (a) The PA Parties hereby indemnify and save the Independent Certifier completely harmless from any actions, causes of action, suits, debts, costs, damages, expenses, claims and demands whatsoever, at law or in equity, arising directly or indirectly in whole or in part out of any action taken by the Independent Certifier within the scope of its duties or authority hereunder.
- (b) The indemnity provided under this Section 11.1 shall not extend:
  - (i) to any breach of this Independent Certifier Agreement, or any part or parts hereof, by the Independent Certifier, its employees, servants, agents or persons for whom it is in law responsible, or any negligent or unlawful act or omission or willful misconduct of the Independent Certifier, its employees, servants or persons for whom it is in law responsible (in respect of which the Independent Certifier shall indemnify the PA Parties, as referred to in Section 11.2);
  - (ii) to any action taken by the Independent Certifier outside the scope of authority set forth in this Independent Certifier Agreement, or any part or parts hereof; or
  - (iii) to any debt, cost, expense, claim or demand for which insurance proceeds are recoverable by the Independent Certifier.
- (c) This indemnity shall survive the termination of this Independent Certifier Agreement.

### **11.2 Independent Certifier to Save PA Parties Harmless**

- (a) The Independent Certifier hereby indemnifies and saves the PA Parties, and their affiliated entities, subsidiaries and their respective directors, officers, employees, agents, permitted successors and assigns, completely harmless from any actions, causes of action, suits, debts, costs, damages, expenses, claims and demands whatsoever, at law or in equity, arising directly or indirectly in whole or in part out of any breach of this Independent Certifier Agreement, or any part or parts hereof, by the Independent Certifier, its employees, servants, agents or persons for whom it is in law responsible, or any negligent or unlawful act or omission or willful misconduct of the Independent Certifier, its employees, servants or persons for whom it is in law responsible.
- (b) The indemnity provided under this Section 11.2 to a PA Party shall not extend:
  - (i) to any negligent or unlawful act or omission or willful misconduct of such PA Party, its employees, servants or persons for whom it is in law responsible (in respect of which such PA Parties shall indemnify the Independent Certifier, as referred to in Section 11.1) directly caused the losses described in Section 11.2(a); or
  - (ii) to any debt, cost, expense, claim or demand for which insurance proceeds are recoverable by such PA Party.
- (c) This indemnity shall survive the termination of this Independent Certifier Agreement.

### **11.3 Conduct of Claims**

- (a) Claims made by a third person against a party having, or claiming to have, the benefit of an indemnity pursuant to this Independent Certifier Agreement shall be conducted in accordance with the conduct of claims procedure described in Appendix D – Conduct of Claims to this Independent Certifier Agreement.

## **12. GENERAL**

### **12.1 Entire Agreement**

- (a) Except where provided otherwise in this Independent Certifier Agreement, this Independent Certifier Agreement constitutes the entire agreement between the parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Independent Certifier Agreement.

### **12.2 Negation of Employment**

- (a) The Independent Certifier, its officers, directors, members, employees, servants and agents and any other persons engaged by the Independent Certifier in the performance of the Certification Services will not by virtue of this Independent Certifier Agreement or the performance of the Certification Services become in the service or employment of the PA Parties for any purpose.
- (b) The Independent Certifier will be responsible for all matters requisite as employer or otherwise in relation to such officers, directors, members, employees, servants and agents and other persons who are engaged by the Independent Certifier.

### **12.3 Waiver**

- (a) No waiver made or given by a party under or in connection with this Independent Certifier Agreement shall be binding or effective unless the waiver is in writing, signed by an authorized representative of the party giving such waiver, and delivered by such party to the other parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.
- (b) Failure by any party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

### **12.4 Notices**

- (a) All notices, requests, demands, instructions, certificates, consents and other communications required or permitted under this Independent Certifier Agreement shall be in writing (whether or not “written notice” or “notice in writing” is specifically required by the applicable provision of this Independent Certifier Agreement) and served by sending the same by registered mail, facsimile or by hand, (in each case, with a copy by electronic transmission), as follows:

If to the City:

City of Ottawa

110 Laurier Ave West  
Ottawa, Ontario  
K1P 1J1

Email: [REDACTED]

Attn.: [REDACTED]

If to Project Co:

TransitNEXT General Partnership

[REDACTED]

Email: [REDACTED]

Attn.: [REDACTED]

If to the Independent Certifier:

[REDACTED]

[REDACTED]

Email: [REDACTED]

Attn.: [REDACTED]

- (b) Where any notice is provided or submitted to a party via facsimile, an original of the notice sent via facsimile shall promptly be sent by regular mail or registered mail. For greater certainty, a notice given via facsimile shall not be invalid by reason only of a party's failure to comply with this Section 12.4(b).
- (c) Any party to this Independent Certifier Agreement may, from time to time, change any of its contact information set forth in Section 12.4(a) by prior notice to the other Parties, and such change shall be effective on the Business Day that next follows the recipient party's receipt of such notice unless a later effective date is given in such notice.
- (d) Subject to Sections 12.4(e), 12.4(f) and 12.4(g):
  - (i) a notice given by registered mail shall be deemed to have been received on the third Business Day after mailing;
  - (ii) a notice given by hand delivery shall be deemed to have been received on the day it is delivered; and
  - (iii) a notice given by facsimile shall be deemed to have been received on the day it is transmitted by facsimile.
- (e) If the party giving the notice knows or ought reasonably to know of difficulties with the postal system which might affect negatively the delivery of mail, any such notice shall not be mailed but shall be made or given by personal delivery or by facsimile transmission in accordance with this Section 12.4.

- (f) If any notice delivered by hand or transmitted by facsimile is so delivered or transmitted, as the case may be, either on a day that is not a Business Day or on a Business Day after 4:00 p.m. (recipient's local time), then such notice shall be deemed to have been received by such recipient on the next Business Day.
- (g) A notice given by facsimile shall be deemed to have been received by the recipient on the day it is transmitted only if a facsimile transmission report (maintained by the sender) indicates that the transmission of such notice was successful.

## **12.5 Transfer and Assignment**

- (a) The Independent Certifier:
  - (i) must not assign, transfer, mortgage, charge or encumber any right or obligation under this Independent Certifier Agreement without the prior written consent of the PA Parties, which each PA Party may give or withhold in its absolute discretion (including, in respect of the City, if so required pursuant to a Contribution Agreement); and
  - (ii) agrees that any assignment, transfer, mortgage, charge or encumbrance will not operate to release or discharge the Independent Certifier from any obligation or liability under this Independent Certifier Agreement.
- (b) For the purposes of this Section 12.5, an assignment will be deemed to have occurred where there is a Change in Control of the Independent Certifier after the date of this Independent Certifier Agreement.
- (c) Each of the PA Parties may assign, transfer, mortgage, charge or encumber any right or obligation under this Independent Certifier Agreement in accordance with the terms of the Project Agreement.

## **12.6 Governing Laws and Jurisdictions**

- (a) This Independent Certifier Agreement shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein and shall be treated in all respects as an Ontario contract, without regard to conflict of laws principles.
- (b) The PA Parties and the Independent Certifier agree that the courts of the Province of Ontario and all courts competent to hear appeals therefrom shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Independent Certifier Agreement and hereby irrevocably attorn to the exclusive jurisdiction of such courts.
- (c) Nothing in this Independent Certifier Agreement affects the rights, protections and immunities of the Crown under the *Proceedings Against the Crown Act* (Ontario).

## **12.7 City Designate**

- (a) At any time and from time to time, the Crown may designate any ministry, branch, agency, division, department or office of the Government of Ontario to carry out administrative responsibility for the rights and obligations of the City under this Independent Certifier Agreement and Project Co and the Independent Certifier may deal exclusively with the designated person in respect of all such matters and is entitled to rely on the actions, directions, requests, notices, consents, approvals, waivers, comments relating to the review of documentation

and other administrative matters and decisions determined by such designated person from time to time, until the Crown has notified Project Co and the Independent Certifier in writing that such designated person is no longer the person designated by the Crown hereunder and such notice shall have effect on the later of the date of delivery of such notice and the date specified in the written notice. The Crown shall advise Project Co and the Independent Certifier in writing of any designation hereunder. The rights and obligations of the parties to this Independent Certifier Agreement shall be in no way affected by reason of any such designation. Project Co and the Independent Certifier acknowledge the right of the Crown to delegate administrative responsibilities hereunder as set forth in this Section 12.7.

## **12.8 Confidentiality**

- (a) The Independent Certifier must ensure that:
  - (i) neither it nor any of its officers, directors, members, employees, servants and agents disclose, or otherwise make public, any Contract Material or any other information or material acquired in connection with or during the performance of the Certification Services without prior written approval of the PA Parties; and
  - (ii) no Contract Material is used, copied, supplied or reproduced for any purpose other than for the performance of the Certification Services under this Independent Certifier Agreement.
- (b) The PA Parties may at any time require the Independent Certifier to give and to arrange for its officers, directors, members, employees, servants and agents engaged in the performance of the Certification Services to give written undertakings, in the form of confidentiality agreements on terms required by the PA Parties, relating to the non-disclosure of confidential information, in which case the Independent Certifier must promptly arrange for such agreements to be made.

## **12.9 Contract Material**

- (a) The PA Parties and the Independent Certifier agree that the Independent Certifier does not and will not have any rights, including any Intellectual Property, in any Contract Material provided to the Independent Certifier or created or required to be created by either PA Party.
- (b) As between the PA Parties and the Independent Certifier, all title and ownership, including all Intellectual Property, in and to the Contract Material created or required to be created by the Independent Certifier as part of, or for the purposes of performing the Certification Services, is hereby assigned jointly to the PA Parties on creation, or where such title, ownership and Intellectual Property cannot be assigned before creation of the Contract Material, it will be assigned to the PA Parties on creation. In addition, to the extent that copyright may subsist in such Contract Material so created by the Independent Certifier, the Independent Certifier hereby waives all past, present and future moral rights therein and the Independent Certifier shall ensure that any agent or employee of Independent Certifier shall have waived all such moral rights. The PA Parties acknowledge and agree that as between the PA Parties, title, ownership and other rights to the foregoing shall be governed by the Project Agreement.
- (c) The Independent Certifier will do all such things and execute all such documents as reasonably requested by either of the PA Parties in order to confirm or perfect the assignment of Intellectual Property in the Contract Material referred to in Section 12.9(b).

#### **12.10 Amendment**

- (a) This Independent Certifier Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the PA Parties (provided that, in respect of the City, such agreement may be subject to its obligations under a Contribution Agreement and require the consent of a Contribution Agreement Party) and the Independent Certifier and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Independent Certifier Agreement.

#### **12.11 Severability**

- (a) Each provision of this Independent Certifier Agreement shall be valid and enforceable to the fullest extent permitted by law. If the courts of a competent jurisdiction shall declare any provision of this Independent Certifier Agreement invalid, unenforceable or illegal, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Independent Certifier Agreement. If any such provision of this Independent Certifier Agreement is invalid, unenforceable or illegal, the parties shall, acting in good faith, promptly negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Independent Certifier Agreement as near as possible to its original intent and effect.

#### **12.12 Enurement**

- (a) This Independent Certifier Agreement shall enure to the benefit of, and be binding on, each of the parties and their respective successors and permitted transferees and assigns.

#### **12.13 Counterparts**

- (a) This Independent Certifier Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any party providing its signature in faxed form shall promptly forward to such party an original signed copy of this Independent Certifier Agreement which was so faxed.

#### **12.14 Maintenance of Records**

- (a) The Independent Certifier shall retain and maintain in safe storage, at its expense, complete and accurate records related to all work performed under this Independent Certifier Agreement (i) for a minimum period of 7 years after Substantial Completion or such longer period as required by Applicable Law, or (ii) until delivery of such Contract Material to the PA Parties in accordance with Section 10.7(a)(ii), and such records will be made available to the PA Parties and/or Contribution Agreement Parties upon request.

## **APPENDIX A**

### **CERTIFICATION SERVICES**

Without limiting the other provisions of this Independent Certifier Agreement and the Project Agreement, the Independent Certifier shall provide the following:

- (a) Develop and implement a certification quality plan identifying the processes and outcomes of the Certification Services including timelines, deliverables and a description of the input required from the PA Parties to carry out the Certification Services.
- (b) Receive, monitor and review all relevant Project documentation including drawings, plans, reports, certifications, schedules, letters, notices and test results as necessary for the Independent Certifier to be informed as to the progress of the Works (including, for certainty, the reports described in Section 22.2(b) and Section 22.3 of the Project Agreement), and to provide an opinion in the event of a Dispute related to the development of the design. The Independent Certifier personnel listed in Appendix C shall be up to date with all Project documentation relevant to their area of expertise.
- (c) Review information relating to Construction Period Quality Failures, Delay Events and the events described in Section 40.2 of the Project Agreement, and Compensation Events.
- (d) Review information relating to Variation Enquiries, Project Co Variation Notices, Variations, Estimates, claims for extension of time and compensation and consult with the relevant party.
- (e) In accordance with Section 11.1(b) of the Project Agreement, attend all meetings of and participate, as necessary, in the activities of the Works Committee.
- (f) Identify any risks that may impede the issuance of the Substantial Completion Certificate or the Final Completion Certificate and inform the PA Parties thereof.
- (g) In accordance with Section 25.13(b)(ii) of the Project Agreement, certify the cost of remediation and correction of Warranty Work related to New Municipal Infrastructure.
- (h) In accordance with Section 11.6 of the Project Agreement, perform all responsibilities of the Independent Certifier in connection with Proceeding At Risk Matters, including attending all meetings and deliberations of the Works Committee with respect to Proceeding At Risk Matters.
- (i) Issue its opinion as to whether the City acted reasonably in delivering the subject Proceeding At Risk Notice pursuant to Section 11.6(e) of the Project Agreement.
- (j) Review the draft Testing and Commissioning Submittals and the detailed test, test methodology and expected test results proposed by Project Co, including any review comments from the City, and provide a report on the effectiveness of the Testing and Commissioning Program, to identify any errors or omissions and to report any risks.
- (k) Monitor, and report on, the implementation of the Testing and Commissioning Plan (as indicatively described in Schedule 14 – Testing and Commissioning to the Project Agreement) and other tests, including re-tests, to be performed as set out in the Testing and Commissioning Program or as otherwise required for Project Co to achieve Substantial Completion and Final Completion.

- (l) In accordance with Schedule 14 – Testing and Commissioning, validate Trial Running acceptance for the System Infrastructure.
- (m) Witness the implementation of a sample of the Commissioning Tests and a sample of the other testing and commissioning procedures at random times, locations and frequencies, in each case to the extent required for the Independent Certifier to verify that the requirements of Substantial Completion and Final Completion have been met.
- (n) In accordance with Sections 20.13(j) and 20.13(k), assist the City with determinations related to Cash Allowances in respect of Utility Works, including certifying any Utility Works undertaken by Project Co and evaluating all Requests for Utility Works Payment Approvals submitted by Project Co.
- (o) In accordance with Sections 25.13 of the Project Agreement, make a determination with respect to unresolved Testing and Commissioning or Handover issues.
- (p) Prior to any certification, consider the views and comments of Project Co, the City (including their consultants and advisors) and the Independent Safety Assessor, as applicable, in relation to the satisfaction of the conditions for certification.
- (q) Employing the relevant personnel, conduct regular inspections of the Works and attend site progress meetings at a minimum on a monthly basis or more regularly as deemed necessary for the Independent Certifier to be satisfied that the Works are proceeding in accordance with the requirements of the Project Agreement. Report on the observations, findings and potential risks to certification as a result of the regular inspections as part of the IC Monthly Report.
- (r) Upon receipt of notice from Project Co requesting the issuance of an IC Initial Capital Investment Certificate, Substantial Completion Certificate (or Interim Substantial Completion Certificate as the case may be) or Final Completion Certificate, consider such request and, within the time period set out in the Project Agreement and in accordance with the Project Agreement, either:
  - (i) issue the applicable certificate; or
  - (ii) issue a report detailing the matters that the Independent Certifier considers are required to be performed prior to issuing the applicable certificate.
- (s) Upon notice from Project Co that the matters required to be performed prior to issuing the applicable certificate have been completed, re-inspect the Works or re-consider the matters specified to be performed, and repeat the procedures in Section (o) of this Appendix A until the issuance of the applicable certificate.
- (t) In accordance with Sections 25.7, 25.8 and 25.9 of the Project Agreement, perform all responsibilities of the Independent Certifier in connection with the Minor Deficiencies regime.
- (u) After Substantial Completion, reconcile Project Co invoices for expenditure recovery against the budgets of the City.
- (v) Review and monitor the installation of all equipment, fixtures, information technology, communication equipment, telephone equipment and anything similar to the foregoing (collectively, the “**Installed Equipment**”) into the System Infrastructure by the City or any agent or contractor of the City either before or after Substantial Completion and provide a report to the City and Project Co identifying any damage to the System Infrastructure which has been caused

as a result of the installation of such Installed Equipment into the System Infrastructure by the City, its contractors and/or agents.

- (w) Provide any determinations contemplated in the Project Agreement, which determinations may be subject to final resolution between the PA Parties pursuant to Schedule 26 – Dispute Resolution Procedure to the Project Agreement.
- (x) Participate in and give the PA Parties and their counsel reasonable cooperation, access and assistance (including providing or making available documents, information and witnesses for attendance at hearings and other proceedings) in connection with any proceedings between the PA Parties that relate to the Certification Services.
- (y) Provide periodic reports to the PA Parties, as follows:
  - (i) a progress report on the progress of the Works no later than fifteen Business Days following the end of each month of the Construction Period in respect of the previous month or as otherwise agreed by the PA Parties (the “IC Monthly Report”) which includes the following:
    - (A) summary of activities carried out by the Independent Certifier, making specific reference to each of the Independent Certifier’s obligations;
    - (B) the status of any risks that may impede the issuance of the Substantial Completion Certificate or the Final Completion Certificate;
    - (C) an opinion on Non-Conformances, if any, and whether or not such Non-Conformances are of the extent and nature that would normally be expected on projects of this kind;
    - (D) progress on all aspects of the Works; and
    - (E) Commencing no less than 180 days prior to Scheduled Substantial Completion Date, the IC Monthly Report shall contain specific reference to and listing of the work that needs to be done before a Substantial Completion Certificate or Final Completion Certificate can be issued;
  - (ii) Accompanying the IC Monthly Reports delivered for the months of May, August, November and February, a quarterly report (the “**IC Quarterly Report**”) for the quarters ending March 31st, June 30th, September 30th and December 31st respectively, in substantially the form as that in Appendix E and that contains the following information certified in accordance with the standard of care set out in Section 3.3 of the Independent Certifier Agreement:
    - (A) the extent (expressed as a percentage) of completion of the Works as of the last day of the applicable quarter;
    - (B) the value of the Works completed as of the last day of the applicable quarter;
    - (C) the forecasted extent (expressed as a percentage) of completion of the Works as of the last day of the applicable quarter and for the next four quarters; and
    - (D) the forecasted value of the Works anticipated to be completed as of the last day of the applicable quarter and for the next four quarters.

- (z) Participate in meetings with the PA Parties as required for the Independent Certifier to perform Certification Services.
- (aa) Acknowledge receipt of all Design Certificates and Construction Certificates delivered by Project Co in accordance with Schedule 10 – Review Procedure to the Project Agreement.
- (bb) Provide the Certification Services with respect to Construction Period Payments set out in Schedule 20 – Construction Payments, including use and application of the Earned Value Measurement Techniques and the Credit Rules attached hereto as Appendix F;
- (cc) In accordance with Section 16.2(i) of the Project Agreement, make a determination (or appoint an independent and suitably qualified person to make such determination) with respect to the party responsible for any Contamination located on, in or under or migrating to or from the Lands;
- (dd) In accordance with Section 16.3(f) of the Project Agreement, make a determination (or appoint an independent and suitably qualified person to make such determination) with respect to the nature or extent of the actions required to be performed by Project Co to not disturb any and all fossils, artifacts and other objects having artistic, historic, archaeological or monetary value, including human remains and burial sites, which may be found on or at the Lands, including:
  - (i) ceasing any Project Operations in so far as performing such Project Operations would endanger the item or prevent or impede its excavation;
  - (ii) take all necessary steps to preserve and ensure the preservation of the item in the same position and condition in which it was found; and
  - (iii) ensure compliance by all Project Co Parties, with Applicable Law and all requirements of Governmental Authorities.
- (ee) In accordance with Section 16.5(e) of the Project Agreement, make a determination (or appoint an independent and suitably qualified person to make such determination) with respect to the nature or extent of the actions required to be performed by the City to meet the requirements of the Existing Vehicle Maintenance Standard, as defined in Schedule 1 – Definitions and Interpretation.
- (ff) In accordance with Section 9.11 of the Project Agreement, provide the Certification Services with respect to the RVSC Fixed Cost Amount under the Revenue Vehicle Supply Contract.
- (gg) Provide advice on other matters that may arise that both PA Parties may jointly require.
- (hh) To the extent not already contemplated in the other Certification Services or otherwise in this Agreement, review and certify the determination of eligible costs under the Contribution Agreements to the Contribution Agreement Parties, including:
  - (i) conducting a due diligence assessment of the schedule and cash flow forecast and certifying that this schedule and cash flow forecast is achievable, reviewing and certifying that eligible costs are reasonable and meet the eligible cost criteria in a Contribution Agreement, and reviewing and certifying the percentage of a Contribution Agreement Party's eligible costs of the total eligible costs under a Contribution Agreement;

- (ii) reviewing and certifying for each claim by the City under a Contribution Agreement, including interim claims, that all costs are eligible costs and that the work has been constructed and completed in accordance with the terms and conditions of the Contribution Agreement;
- (iii) confirming to the Contribution Agreement Parties that all information provided and/or submitted to the PA Parties and/or the Contribution Agreement Parties in accordance with this Agreement is true and accurate and prepared in good faith to the best of its skill, judgement and knowledge;
- (iv) Executing and delivering certificates in the form attached hereto as Appendix G when requested by the City.

## APPENDIX B

### INDEPENDENT CERTIFIER FEE

The Fee shall be invoiced by the Independent Certifier to each PA Party in accordance with Section 8 of the Independent Certifier Agreement, using invoices in form and substance acceptable to the PA Parties, acting reasonably, on a monthly basis. The total fixed fee of \$[REDACTED], plus HST, for all Certification Services described in Appendix A (other than item (gg) in Appendix A), shall be accounted for and invoiced in accordance with monthly billing schedule attached to this Appendix B. Such fixed fee shall not be subject to escalation or adjustment except by Certification Services Variation. Each monthly invoice shall also include, and separately identify, any amounts claimed for services performed pursuant to any Certification Services Variation, and/or Certification Services jointly required by the PA Parties in accordance with item (gg) in Appendix A, for such payment period, and shall set out as a separate line item the HST payable. Each PA Party shall pay its respective portion of the Fee within 30 days of receipt of a complete and valid invoice.

The following hourly rates shall apply for Certification Services jointly required by the PA Parties in accordance with item (gg) in Appendix A, and may apply to Certification Services Variations in accordance with Sections 9.4 and 9.5 of the Independent Certifier Agreement. Hourly rates set out below are all inclusive and include applicable taxes (other than HST), all labour and materials, insurance costs, disbursements (examples: duplicating, delivery and communications) and all other overhead including any fees or other charges required by law. The PA Parties will not reimburse the Independent Certifier for any costs or expenses for hospitality, food or other incidental expenses.

[REDACTED]	Back-up Electrical & Commissioning
[REDACTED]	Project Coordinator & Document Control
[REDACTED]	Project Coordinator & Document Control
[REDACTED]	Back-up Mechanical & Commissioning

## APPENDIX D

### CONDUCT OF CLAIMS

This Appendix D shall apply to the conduct of claims, made by a third person against a party having, or claiming to have, the benefit of an indemnity pursuant to this Independent Certifier Agreement. The party having, or claiming to have, the benefit of the indemnity is referred to as the “**Beneficiary**” and a party giving the indemnity is referred to as an “**Indemnifier**”.

- (1) If the Beneficiary receives any notice, demand, letter or other document concerning any claim for which it appears that the Beneficiary is, or may become entitled to, indemnification under Section 11 of the Independent Certifier Agreement, the Beneficiary shall give written notice to each Indemnifier potentially obligated in respect thereof, as soon as reasonably practicable and in any event within 10 Business Days of receipt of the same. Such notice shall specify with reasonable particularity, to the extent that information is available, the factual basis for the claim and the amount of the claim.
- (2) Subject to Sections (3), (4) and (5) of this Appendix D, on the giving of such notice by the Beneficiary, where it appears that the Beneficiary is or may be entitled to indemnification from an Indemnifier in respect of all, but not part only, of the liability arising out of the claim, such Indemnifier shall (subject to providing the Beneficiary with a secured indemnity to the Beneficiary’s reasonable satisfaction against all costs and expenses that the Beneficiary may incur by reason of such action) be entitled to dispute the claim in the name of the Beneficiary at the Indemnifier’s own expense and take conduct of any defence, dispute, compromise, or appeal of the claim and of any incidental negotiations. The Beneficiary shall give such Indemnifier all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. The Beneficiary shall have the right to employ separate counsel in respect of such claim and the reasonable fees and expenses of such counsel shall be to the account of the Indemnifier only where representation of both the Indemnifier and the Beneficiary by common counsel would be inappropriate due to any actual or potential conflicting interests between the Indemnifier and the Beneficiary. If and to the extent that both the City and Project Co are given notice in respect of the same claim, they shall cooperate in the conduct of the claim and give each other such reasonable access and assistance as may be necessary or desirable for purposes of considering, resisting and defending such claim.
- (3) With respect to any claim conducted by an Indemnifier:
  - (i) the Indemnifier shall keep the Beneficiary fully informed and consult with it about material elements of the conduct of the claim;
  - (ii) the Indemnifier shall not bring the name or reputation of the Beneficiary into disrepute;
  - (iii) the Indemnifier shall not pay, compromise or settle such claims without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed;
  - (iv) the Indemnifier shall not admit liability or fault to any third party without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed; and
  - (v) the Indemnifier shall use commercially reasonable efforts to have the Beneficiary named as a beneficiary under any release given by the persons bringing the claim to which Section (3) of

this Appendix D relates.

- (4) The Beneficiary shall be free to pay or settle any such claim on such terms as it thinks fit and without prejudice to its rights and remedies under this Independent Certifier Agreement if:
- (i) none of the Indemnifiers is entitled to take conduct of the claim in accordance with Section (2) of this Appendix D;
  - (ii) none of the Indemnifiers notifies the Beneficiary of its intention to take conduct of the relevant claim as soon as reasonably practicable and in any event within 10 Business Days of the notice from the Beneficiary under Section (1) of this Appendix D or each of the Indemnifiers notifies the Beneficiary that it does not intend to take conduct of the claim; or
  - (iii) none of the Indemnifiers complies in any material respect with Section (3) of this Appendix D.
- (5) The Beneficiary shall be free at any time to give notice to the applicable Indemnifier that the Beneficiary is retaining or taking over, as the case may be, the conduct of any defence, dispute, compromise or appeal of any claim, or of any incidental negotiations, to which Section (2) of this Appendix D applies. For greater certainty, the Independent Certifier acknowledges and agrees that where the City is the Beneficiary, the City may retain or take over such conduct in any matter involving Personal Information or any matter involving public policy. On receipt of such notice the applicable Indemnifier shall promptly take all steps necessary to transfer the conduct of such claim to the Beneficiary, and shall provide to the Beneficiary all relevant documentation and all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. If the Beneficiary gives any notice pursuant to Section (5) of this Appendix D, then the applicable Indemnifier shall be released from any liabilities arising under the applicable indemnity hereunder in respect of the applicable claim.
- (6) If an Indemnifier pays to the Beneficiary an amount in respect of an indemnity and the Beneficiary subsequently recovers, whether by payment, discount, credit, saving, relief or other benefit or otherwise, a sum or anything else of value (the “**Recovery Amount**”) which is directly referable to the fact, matter, event or circumstances giving rise to the claim under the indemnity, the Beneficiary shall forthwith repay to that Indemnifier whichever is the lesser of:
- (i) an amount equal to the Recovery Amount less any out-of-pocket costs and expenses properly incurred by the Beneficiary in recovering the same; and
  - (ii) the amount paid to the Beneficiary by such Indemnifier in respect of the claim under the relevant indemnity,
- provided that there shall be no obligation on the Beneficiary to pursue any Recovery Amount and that the Indemnifier shall be repaid only to the extent that the Recovery Amount, aggregated with any sum recovered from the Indemnifier, exceeds the loss sustained by the Beneficiary except, however, that if the Beneficiary elects not to pursue a Recovery Amount, the Indemnifier shall be entitled to require an assignment to it of the right to do so.
- (7) Any person taking any of the steps contemplated by this Appendix D shall comply with the requirements of any insurer who may have an obligation to provide an indemnity in respect of any liability arising under this Independent Certifier Agreement.

**APPENDIX E**  
**FORM OF IC QUARTERLY REPORT**  
**[ON THE INDEPENDENT CERTIFIER'S LETTERHEAD]**

[date]

City of Ottawa  
[insert address]

and to:

[Project Co]  
[Project Co address]  
Attention: [•]

Dear [•],[•] and [•]:

This report, for the quarter ending [•], is delivered to you pursuant to Section v(ii) of Appendix A of the Independent Certifier Agreement between the City of Ottawa and [Project Co] and is dated [•] (the “**IC Agreement**”). Terms not otherwise defined herein have the meaning ascribed to them in the IC Agreement.

All values stated herein are based on the cost of the Works and are exclusive of HST. This report has taken into account the following information: **[insert particulars of sources of information (e.g., works reports, site visits) used to prepare the report]**.

Based on our analysis of the foregoing, we confirm the following to the best of our professional knowledge and judgment:

- As of the date hereof, the value of the Works is \$• and the Works are •% complete.
- At the end of this quarter, the estimated value of the Works will be \$• and the Works are forecasted to be •% complete.

We estimate that the value of the Works and the extent of their completion will be as follows for the next four quarters (not including the present quarter):

	[quarter end date]	[quarter end date]	[quarter end date]	[quarter end date]
\$				
%				

We have prepared this report for the specific use of the City of Ottawa and [Project Co]. This letter is not intended for general circulation, publication or reproduction for any other person or purpose without express written permission to each specific instance.

Yours truly,  
[Name and Signature of Independent Certifier]

**APPENDIX F  
CREDIT RULES**

**1. CREDIT RULES FOR THE EVALUATION OF EARNED VALUE**

**1.1 Purpose of Credit Rules**

- (a) The Credit Rules set out requirements agreed between the City and Project Co for use and interpretation of the Earned Value Measurement Techniques, pursuant to Schedule 20 of the Project Agreement.

**1.2 Change of Credit Rules**

- (a) In the event that Project Co or the City propose a change to the Credit Rules, the Independent Certifier may agree to such proposed change to the Credit Rule, provided that:
  - (i) any proposed change the Credit Rules will result in revised Credit Rules that:
    - (A) continue to meet the Earned Value Measurement Techniques; and
    - (B) follow the principles, guidance, and intent of the Credit Rules set out in this Attachment F, wherever possible;
  - (ii) any proposed change to the Credit Rules is subject to consultation with the City and Project Co at least three months prior to the first Construction Period that uses those revised Credit Rules;
  - (iii) the Independent Certifier considers any responses made by the City and Project Co to a proposed change to the Credit Rules and the Independent Certifier provides a report justifying its decision regarding acceptance or rejection of any proposal to change the Credit Rules; and
  - (iv) prior to the start of the first Construction Period that is to use the revised Credit Rules for the evaluation of Earned Value:
    - (A) the proposed changes to the Credit Rules are agreed to by the Independent Certifier; and
    - (B) both the City and Project Co receive the revised Credit Rules from the Independent Certifier.

**1.3 Selection of Measurement Methods**

- (a) In principle, when selecting the appropriate measurement methods from the Earned Value Measurement Techniques, the following principles shall be applied:
  - (i) for tangible work or tasks taking three Construction Periods or more to perform, the measurement methods shall be considered in the following decreasing order of preference:
    - (A) firstly, physical measurement;

- (B) secondly, weighted milestone; and
  - (C) thirdly, percent complete;
- (ii) for tangible work or tasks taking one or two Construction Periods to perform, the measurement methods shall be considered in the following decreasing order of preference:
  - (A) fixed formula using the 0/100 method or 0/50/100 method; and
- (iii) for intangible work or tasks, the measurement methods shall be considered in the following decreasing order of preference:
  - (A) firstly, apportioned effort; and
  - (B) secondly, only where apportioned effort is not possible, level of effort.
- (b) Table 1 sets out the measurement methods that shall be used from the Earned Value Measurement Techniques for specific cost categories, unless there are technical reasons preventing these measurement methods from being used. The specific cost categories in Table 1 are set out in 'Standard Cost Codes for Capital Projects – Definitions', US Federal Transportation Administration.

- (c) The measurement methods associated with procurement of materials shall be in accordance with the following principles:
  - (i) except as set out in Section 1.3(c)(ii), the costs of materials used in construction shall be included in the cost of each construction task and shall be evaluated for the purposes of Earned Value as part of each construction task using physical measurement; and
  - (ii) the costs of rail and large long-lead equipment manufactured off-site before installation, such as transformers and packaged air conditioning units, shall be evaluated for the purposes of Earned Value using the fixed formula measurement method, based on the payment terms of the supply contract, except that [REDACTED]% of any payments made by Project Co to the supplier will not be credited for the purposes of Earned Value until the rail or large equipment manufactured off-site is delivered to the Lands or a bonded warehouse.
- (d) The measurement methods associated with procurement of plant, such as cranes and road vehicles, shall be in accordance with the following principles:
  - (i) the costs of plant, such as cranes and road vehicles, shall be evaluated for the purposes of Earned Value using the fixed formula measurement method, based on the payment terms of the supply contract, except that [REDACTED]% of any payments made by Project Co to the supplier will not be credited for the purposes of Earned Value until the plant is delivered to the Lands or a bonded warehouse.
- (e) The measurement method to be used for the procurement of the Revenue Vehicles shall be evaluated and paid in accordance with Section 9.11 of the Project Agreement.
- (f) In order to make the measurement of Earned Value more efficient during mobilization, Project Co may choose to identify a tranche of its mobilization cost, the amount of which will be equal to the mobilization cost agreed to between Project Co and the Lenders or Lenders' Consultant of the Total Capital Cost that shall be automatically credited for the purposes of measuring Earned Value at Financial Close (the "**Mobilization Credit**"), where:
  - (i) the sum of the costs identified to the Mobilization Credit and the costs identified to the cost codes from Table 1 shall remain equal to the Total Capital Cost;
  - (ii) the Mobilization Credit shall not include costs associated with the following cost codes from Table 1:
    - (A) 80.09 Other Transaction Costs during Bid and Construction Period; and
    - (B) 100.01 Financing Costs during Construction Period;
  - (iii) the scope of activity associated with the Mobilization Credit shall be documented by Project Co to the satisfaction of the Independent Certifier before the end of the first Construction Period Month in order to avoid double counting with the Earned Value for activities that are not included within the Mobilization Credit; and
  - (iv) the Earned Value for the activities included within the Mobilization Credit shall be credited as Earned Value without using a measurement method from the Earned Value Management Techniques.

**APPENDIX G**

**CONTRIBUTION AGREEMENT CERTIFICATES**

**[Federal and Provincial certificates to be appended upon execution.]**

## SCHEDULE 7

### MOBILITY MATTERS

#### 1. DEFINITIONS

Any capitalized term not defined in this Schedule 7 shall have the meaning given to such term in the Project Agreement. In this Schedule 7, the following definitions shall have the following meanings:

- 1.1 **“Aggregate Actual Lane Closures”** or **“AALC”** means the actual number of Lane Closures, measured in hours per hour type (“Peak,” Off Peak,” and “Night”).
- 1.2 **“Aggregate Actual Lane Closures Cost”** or **“AALCC”** means the total cost of Lane Closures.
- 1.3 **“Aggregate Target Lane Closures”** or **“ATLC”** means the total target Lane Closures, which,
  - (a) are set forth in the Lane Closure Target Letter; and
  - (b) include and account for all requirements of Schedule 15 - Output Specifications.
- 1.4 **“Aggregate Target Lane Closure Cost”** or **“ATLCC”** means the total cost of the target Lane Closures, as set forth in the Lane Closure Target Letter submitted by Project Co at Commercial Close and which has been accepted by the City.
- 1.5 **“Arterial”** has the meaning given in the City of Ottawa’s Road Classification System (City of Ottawa).
- 1.6 **“Blocks”** are the physical units upon which Lane Closure Costs are to be calculated for the purposes of this Schedule 7, and,
  - (a) for any streets proposed to be occupied by Project Co are delineated between two adjacent intersections, irrespective of whether the intersections are signalized or unsignalized.

For clarity, a laneway opening shall not constitute an intersection for the purposes of this Section 1.6.

- 1.7 **“Carleton University Roadways”** meaning roadways under the ownership and operations of Carleton University
- 1.8 **“Collector”** has the meaning given in the City of Ottawa’s Road Classification System (City of Ottawa).
- 1.9 **“Federal Roadways”** means roadways under the ownership and operation of the Federal Government and Ottawa International Airport Authority (OIAA).
- 1.10 **“High Cost Measures”** means, in respect of a Milestone period, discrete Lane Closure saving measures that incur capital expenditure greater than [REDACTED]% of the discrete Lane Closure savings cost.

- 1.11 **“Lane Closure” or “Lane Closures** “means any restriction or closure of a lane in any Block, as a result of Works, to bus or vehicular traffic or parking and loading between two intersecting streets, including tapers with the exception of where an equivalent facility to the one that has been closed has been provided in accordance with Section 1.11(c). All partial restrictions or closures within any Block will be considered as a full Lane Closure. Lane Closures will be measured on a per Block, per hour basis. **“Peak”** means Monday through Friday between the hours of 0630h – 0930h, or 1500h – 1830h. **“Night”** means the hours between 2200h – 0500h. **“Off Peak”** means all other hours not defined as “Peak” or “Night”. Lane Closures will no longer be in effect once Substantial Completion has been achieved:
- (a) lanes that have limited openings such as “local traffic only” shall be considered not available for use for the purpose of this Section 1.11; and
  - (b) any restriction or closure of a lane that is solely as a result of a Utility Company carrying out activities with respect to its own New Utility Company Infrastructure following the Handover of the applicable New Utility Company Infrastructure to such Utility Company shall be deemed not to constitute a Lane Closure or contribute to any Lane Closure for the purposes of this Schedule 7.
  - (c) where the traffic management associated with a lane closure provides an equivalent facility to the one closed with respect to a) traffic level of service, b) truck level of service, c) transit level of service, d) lane width, e) posted speed, and f) on-road cycling facilities, such a lane closure shall not be considered a “Lane Closure” for the purposes of this Schedule 7.
- 1.12 **“Lane Closure Adjustment” or “LCA”** means the deduction which may be made by The City from Project Co (which amount will be deducted from the Substantial Completion Payment) as calculated pursuant to Section 5.
- 1.13 **“Lane Closure Analysis Report”** has the meaning given to it in Section 2.2.
- 1.14 **“Lane Closure Measurement and Verification Plan”** has the meaning given to it in Section 7.2(j) of Part 7 to Schedule 15-2 – Design and Construction Requirements – Traffic Management and Construction Access of the Project Agreement.
- 1.15 **“Lane Closure Target Letter”** means the letter set out in Appendix D.
- 1.16 **“Left Turn Lane Closure”** means any restriction of an exclusive left turn lane within the Road Sections, of Arterial or Collector road classification, at the Site, such that the lane is not available for use by the public due to the Works. For clarity, lanes that have limited openings such as “local traffic only” shall be considered not available for use by the public for the purposes of this Section 1.16.
- 1.17 **“Local”** has the meaning given in City of Ottawa’s Road Classification System (City of Ottawa).
- 1.18 **“Arterial”** has the meaning given in the City of Ottawa’s Road Classification System (City of Ottawa).
- 1.19 **“Major Collector”** has the meaning given in the City of Ottawa’s Road Classification System (City of Ottawa).

- 1.20 “**Mobility Matters Review Meeting**” has the meaning given in Section 3.7.
- 1.21 “**Monthly Lane Closure Adjustment Contribution**” means the value for any given month that shall contribute to the Lane Closure Adjustment as calculated pursuant to Section 5.
- 1.22 “**Peak Hour Lane Interruptions**” means unplanned interruptions to the operation of roadway lanes, excluding BRT lanes, during Peak periods by either an unplanned event or a planned event exceeding the time restrictions granted. For further clarity Peak Hour Lane Interruptions would only be for interruptions caused by the actions of Project Co or their subcontractors.. Peak Hour Lane Interruptions as defined above are not included in AALC.
- 1.23 “**Right Turn Lane Closure**” means any restriction of an exclusive right turn lane within the Road Sections, of Arterial or Collector road classification, at the Site, such that it is not available for use by the public due to the Works. For clarity, lanes that have limited openings such as “local traffic only” shall be considered “not available for use by the public” for the purposes of this Section 1.23.
- 1.24 “**Road Sections**” means the defined portions of the Site where Works are to be undertaken in which the Unit Rate Prices for Lane Closure are to be applied for any Lane Closure, Left Turn Lane Closure or Right Turn Lane Closure. Each of the Road Sections has a Unit Price structure for Lane Closure costs per Block, defined in Appendix B to this Schedule, and based on the City’s roadway classification. Any portion of an individual roadway requiring Lane Closures shall be considered a Road Section. A Road Section can be a single isolated block, or a continuous stretch of adjacent blocks having the same roadway classification.. The Road Sections are delineated as follows:
- (a) Road Section 1 – Leitrim Road-Albion Road to Bowesville Road;
  - (b) Road Section 2 - Lester Road –Albion Road to Alert Road ;
  - (c) Road Section 3 – Hunt Club Road – Mac Street to McCarthy Road ;
  - (d) Road Section 4 – Uplands Drive – Breadner Blvd to Alert Road;
  - (e) Road Section 5 - Airport Parkway – Hunt Club Road to Lester Road/Uplands Drive;
  - (f) Road Section 6 – Earl Armstrong Road – Bowesville Road to High Road;
  - (g) Road Section 7 – Bowesville Road – Leitrim Road to Ficko Crescent;
  - (h) Road Section 8 - Carleton University Roadways;
  - (i) Road Section 9 – Federal Roadways (Ottawa International Airport); and
  - (j) Project Co shall include any additional Road Sections not identified in this Schedule 7, where Project Co identified lane closures requirements.
- 1.25 “**Traffic and Transit Management Plan**” or “**TTMP**” means the plan for the manner in which traffic and transit will be managed during construction activities and the method used to determine the magnitude of the impacts.

- 1.26 “**Unit Rate Price**” for each Lane Closure, Left Turn Lane Closure or Right Turn Lane Closure means the prices for each Block of each Road Section, and for each type of lane, as set out in Appendix B. The prices are hourly rates.

**2. CONTENT AND FORMAT OF THE LANE CLOSURE ANALYSIS REPORT**

- 2.1 Project Co shall quantify its projected occupation of lanes on City roadways on the basis of the formulae and procedures contained in this Schedule 7. Project Co shall monitor its occupation of the lanes on a monthly basis.
- 2.2 Project Co shall deliver to the City a report summarizing the findings of AALC (the “**Lane Closure Analysis Report**”), on a monthly basis, no later than 5 Business Days after the end of each month.
- 2.3 Project Co shall include copies of all documents to fully support the Lane Closure Analysis Report.
- 2.4 The Lane Closure Analysis Report shall, at a minimum, include the following information for the relevant month:
- (a) using the template shown in Appendix A to this Schedule, a summary of target and actual Lane Closures by Road Section and breakdown by road classification (Arterial, Major Collector, Collector, Local), location, time, date and duration, indicating Weekday Peak, Weekday Off Peak or Night/Weekend, including any exceptional changes forecasted for the upcoming monthly period (being changes of plus or minus [REDACTED] %);
  - (b) projected Lane Closures for the remaining duration of the Construction Period along with trends and potential risks associated with these Lane Closures;
  - (c) accurate and precise data in support of the items set out in Sections 2.4(a) and 2.4(b);
  - (d) presentation of AALC and the AALCC for the applicable month, and on a cumulative basis as of the applicable month;
  - (e) establishment of a basis for continued monitoring of Lane Closures and adjustments to the AALC;
  - (f) outline of any outstanding issues from any previous Lane Closure Analysis Reports and mitigating strategies to address those issues;
  - (g) adjustments to the ATLC and the ATLCC for the applicable month, and on a cumulative basis as of the applicable month;
  - (h) Project Co’s estimate of the Monthly Lane Closure Adjustment Contribution;
  - (i) measurement and verification of lane closures in accordance with Lane Closure Measurements and Verification Plan in Section 3.6; and
  - (j) summary tables from all previous Lane Closure Analysis Reports delivered by Project Co to the City.

- 2.5 Following the review of the final Lane Closure Analysis Report by the City Representative, the data set out in the Lane Closure Analysis Report will be used by the City to determine the Monthly Lane Closure Adjustment Contribution.

**3. PROCEDURES FOR DETERMINING MONTHLY LANE CLOSURE ADJUSTMENT CONTRIBUTIONS**

- 3.1 The City shall not consider the following closures of lanes to be Lane Closures for the purposes of this Schedule 7, and such closures of lanes shall not contribute to the Monthly Lane Closure Adjustment Contribution:
- (a) where an existing lane width is less than the minimum lane width requirements during construction, specified in Schedule 15-2 Part 7 Table 7-1.3, maintaining the lane as open for traffic operations at its existing width.
- 3.2 Project Co shall not use lane configurations that will remain after Substantial Completion to determine Lane Closures. For clarity, the lane configuration of each roadway as of Financial Close shall be the configuration used to calculate Lane Closures.
- 3.3 The City shall assess Project Co for the cost of Lane Closures based on the total Lane Closures that occur during Peak, Off Peak, and Night hours. All Lane Closures shall be included in the calculation of the Monthly Lane Closure Adjustment Contribution as provided in Section 5.
- 3.4 The ATLC shall form the benchmark for calculating the Lane Closure cost with respect to the AALC. The AALCC shall be used to calculate the Monthly Lane Closure Adjustment Contribution. The Lane Closure Target shall not be amended, altered or adjusted except by the process described in Section 4.
- 3.5 No later than 30 calendar days prior to the first Lane Closure, Project Co shall deliver to the City the initial Traffic and Transit Management Plan (TTMP). Following the acceptance of the initial TTMP by the City, Project Co shall submit all subsequent proposed changes to the TTMP to the City in accordance with Schedule 10 – Review Procedure. Project Co shall deliver to the City the Traffic Control Plans that address the Lane Closure(s) associated with the initial areas of the Site at which it plans to commence Works as part of the initial TTMP submission.
- 3.6 No later than 30 days prior to the initial Lane Closure within any Road Section, Project Co shall provide The City with a Lane Closure Measurement and Verification Plan. All subsequent Lane Closure Analysis Reports are to be based on this plan.
- 3.7 No later than 5 Business Days following the submission of the Lane Closure Analysis Report (or as agreed to between the Parties), Project Co and the City shall convene a review meeting (the “**Mobility Matters Review Meeting**”) to be attended by the Project Co Representative and the City Representative. At the Mobility Matters Review Meeting, Project Co shall present the Lane Closure Analysis Report to the City. The City and Project Co shall discuss the Aggregate Actual Lane Closure for the preceding period as well as review any proposed “equivalent facilities” as described in Section 1.10(c). Project Co’s measurement and verification of Lane Closure(s) shall be reviewed and confirmed by the City Representative.
- 3.8 Project Co shall assist the City Representative by providing information with respect to Lane Closures and access to the Lane Closure records, and by other means as may reasonably be

required to confirm the information in the Lane Closure Analysis Report. The City shall promptly give Notice to Project Co of the details of any disagreement with respect to all or any aspect of the Lane Closure Analysis Report, and the Parties shall then seek to agree to any matters in dispute. The process shall be as follows:

- (a) AALC and AALCC shall be determined at the Mobility Matters Review Meeting.
  - (b) No later than 20 Business Days following each Mobility Matters Review Meeting, or within such period as may be otherwise agreed between the City Representative and the Project Co Representative, acting reasonably:
    - (i) The City shall confirm their acceptance of all or any aspect of the Lane Closure Analysis Report; and
    - (ii) Subject to Section 4, Project Co and the City shall agree to any adjustments to the ATLC and ATLCC.
  - (c) If the City dispute Project Co's estimate of the Monthly Lane Closure Adjustment Contribution in the Lane Closure Analysis Report, the City shall, no later than 10 Business Days following receipt of the Lane Closure Analysis Report, or within such other period as may be agreed by the City Representative and Project Co, acting reasonably, submit an account to Project Co setting out their calculations and justifying the quantification of Project Co's estimate of the Monthly Lane Closure Adjustment Contribution. If either Project Co or the City wish to dispute any account presented pursuant this Section 3.8(c), they must do so by written Notice to the other Party no later than ten Business Days following receipt of such account. The City Representative and the Project Co Representative shall use reasonable efforts to resolve the dispute for an additional ten Business Days. If there is no agreement within a further 10 Business Days, then either Party may refer the matter to the Dispute Resolution Procedure.
  - (d) If neither Party objects in accordance with Section 3.8(c), or, following final determination of the disputed account in accordance with Section 3.8(c), Project Co shall use the relevant Monthly Lane Closure Adjustment Contribution to determine the Lane Closure Adjustment. The Lane Closure Adjustment shall be shown as a separate item within the invoice for the Substantial Completion Payment.
- 3.9 For the purpose of calculating the Lane Closure Adjustment, the calculation shall be completed 60 days prior to the Scheduled Substantial Completion Date (or at a later date as mutually agreed to by the City Representative and Project Co), comparing the total AALCC of each Road Section for the entire Construction Period to the total ALTCC for that same Road Section for the entire Construction Period. If, subsequent to this calculation being completed, there is a change to the Scheduled Substantial Completion Date, Project Co shall amend their Lane Closure Target (in accordance with Section 4) and the Lane Closure Adjustment. For clarity, over-performance of any one Road Section cannot be added to underperformance of any other.
- 4. PROCESS FOR AMENDING THE AGGREGATE TARGET LANE CLOSURE AND ASSOCIATED COST**
- 4.1 In all cases, corrections to the ATLC and ATLCC must be consistent with the principles outlined in the TTMP.

- 4.2 Project Co and the City shall, acting reasonably, agree to make any adjustments to the ATLC, ATLCC, AALC and AALCC, but only in the event of changes implemented due to an amendment of the Project Agreement or a Variation that would cause Lane Closure changes. The City, at its discretion, may allow a revision to the Target Letters to reflect an agreed-upon change in the project schedule, in the absence of an amendment of the Project Agreement or a Variation.
- 4.3 The Party requesting an amendment to the ATLC in accordance with Section 4.2 shall initiate a Variation in accordance with Schedule 21 – Variation Procedure. The amended TTMP shall include a detailed analysis of the impacts to traffic and transit services, including an analysis of Lane Closure requirements. The amended TTMP shall include a recommendation regarding amendments to the ATLC. Both the City and Project Co shall agree to the amended ATLC no later than 20 Business Days following receipt of amended TTMP. If there is no agreement within a further 10 Business Day period, then either Party may refer the matter to the Dispute Resolution Procedure.

**5. CALCULATION OF MONTHLY LANE CLOSURE ADJUSTMENT CONTRIBUTION AND LANE CLOSURE ADJUSTMENT**

- 5.1 Comparing Aggregate Actual Lane Closures Costs to Aggregate Target Lane Closure Costs:
- (a) After the acceptance of the final Lane Closure Analysis Report described in Section 0 and no later than 30 Business Days before the Scheduled Substantial Completion Date, Project Co shall compare the total AALCC for each Road Section to the total ATLCC for each Road Section, and if the AALCC is more than [REDACTED]% greater than the ATLCC, for any Road Section, then Project Co shall calculate the Monthly Lane Closure Adjustment Contribution set out in Section 5.2 and deduct the amount of the Lane Closure Adjustment from the Substantial Completion Payment to be made in accordance with the Project Agreement. For clarity, the Lane Closure Adjustment deduction from the Substantial Completion Payment shall not be subject to the limitations set out in Section 55.4 of the Project Agreement.
  - (b) If the AALCC is greater than [REDACTED]% of the ATLCC for any monthly period for any Road Section, then Project Co shall submit a detailed remediation plan no later than 10 Business Days following the end of the month to explain how it will reduce the AALCC for the Road Section in subsequent period(s), such that the variance will not exceed the [REDACTED]% for the subsequent periods. Project Co shall present progress and achievements of the remediation plan at subsequent Mobility Matters Review Meeting(s).
- 5.2 The formulae to calculate the Monthly Lane Closure Adjustment Contribution are set out in this Section 5.2.
- (a) For the purposes of Section 5.2(b), in respect of each Road Section:
    - A = the AALCC for each Road Section in the relevant month
    - B = the ATLCC for each Road Section in the relevant month

- (b) In respect of any given month during the period leading up to Substantial Completion for each Road Section:
- (i) If [REDACTED], then Monthly Lane Closure Adjustment Contribution = [REDACTED];
  - (ii) If [REDACTED], then Monthly Lane Closure Adjustment Contribution = [REDACTED];
  - (iii) If [REDACTED], then Monthly Lane Closure Adjustment Contribution = \$[REDACTED];
  - (iv) if the sum of all Monthly Lane Closure Adjustment Contributions in each month prior to Substantial Completion <\$[REDACTED], then Lane Closure Adjustment for that Road Section = \$[REDACTED]; and
  - (v) if the sum of all Monthly Lane Closure Adjustment Contributions in each month prior to Substantial Completion >\$[REDACTED], then Lane Closure Adjustment for that Road Section = the sum of all Monthly Lane Closure Adjustment Contributions in each month prior to Substantial Completion.

5.3 For the purposes of calculating the Lane Closure Adjustment in accordance with this Schedule 7, the Parties shall have regard to Sections 38.2(k) and 42.2(e) of the Project Agreement.

## 6. PEAK HOUR LANE INTERRUPTIONS

6.1 The City will assess Project Co for Peak Hour Lane Interruptions in accordance with Table 6.1 for the following non-performance measures per lane that is not open.

**Table 6.1**

<b>ROAD CLASSIFICATION* INCLUDING TRANSIT ROUTES AND LANES</b>	Initial value to be assessed if lane is not open as required	Additional value to be assessed at the end of each additional 10 minute period that the lane is not open.
Federal Roadways	\$[REDACTED]	\$[REDACTED]
Federal Roadways with Transit	\$[REDACTED]	\$[REDACTED]
Carleton University Roadways	\$[REDACTED]	\$[REDACTED]

Arterial with Transit	\$[REDACTED]	\$[REDACTED]
Major Collector	\$[REDACTED]	\$[REDACTED]
Major Collector with Transit	\$[REDACTED]	\$[REDACTED]
Collector	\$[REDACTED]	\$[REDACTED]
Collector with Transit	\$[REDACTED]	\$[REDACTED]
Transit Only Lane	\$[REDACTED]	\$[REDACTED]

\* See the following link for City Road Classifications: <http://ottawa.ca/en/city-hall/planning-and-development/official-plan-and-master-plans/official-plan/volume-1-official-11>

6.2 Any time assessed in the cost associated with Peak Hour Lane Interruptions will not be included in calculations of Lane Closure Adjustments.

6.3 The City shall assess Project Co for the cost of Peak Hour Lane Interruptions. All Peak Hour Lane Interruptions shall be formulated into a Monthly Peak Hour Lane Interruption Report to be submitted by Project Co with the Lane Closure Analysis Report.

6.4 Project Co shall calculate the cost of Peak Hour Lane Interruptions and the City shall deduct this amount from the next Construction Period Payment or Substantial Completion Payment, as applicable, following the most recent Monthly Peak Hour Lane Interruption Report in accordance with Schedule 20 – Construction Period Payments.

**7. APPLICATION**

7.1 The Lane Closure provisions of this Schedule 7 will no longer be in effect once Substantial Completion has been achieved.

## APPENDIX A

Re: Trillium Line Extension Project - Lane Closure Target Letter

Dear Sir/Madam:

As per the requirements of Schedule 3, Part 1, TransitNEXT is pleased to provide this Lane Closure Target Letter as part of our technical and financial submission for the Trillium Line Extension Project (the Project). This letter adheres to the requirements of Schedule 3, Part 1 of this RFP.

**Primary Traffic and Transit Management Plan (TTMP) Features and Construction Management Plans**

We have explored construction staging options that will minimize lane closures, traffic impacts, and associated costs by adopting the following approaches. We will:

- Design structural elements as far from traffic as practical
- Use construction methodologies that allow the shortest occupancy of traffic lanes
- Schedule just-in-time material deliveries during off-peak hours when feasible
- Schedule major-impact construction on weekends or during off-peak hours
- Maximize progress during shutdown periods for trains and airport roads
- Provide detours where possible

By designing all bridge structures as rail-over-road, construction interference will be minimized compared to the road over rail method. This will simplify the required traffic control requirements, lowering the impact on traffic, and consequently reducing the number of lane closures required to complete the project. This also de-risks the project with respect to potential delays and safety hazards.

The traffic impact zones in this project are mostly localized to structure sites on the alignment of the proposed track extension. Because of the physical separation between sites, there will be no traffic interference between adjacent sites; hence, individual sites should have their own TTMPs. Based on our proposed construction staging approach, the individual TTMP sites are listed below:

- Rail-over-road structure at Transitway for the Ellwood Diamond grade separation
- Hunt Club Road rail-over-road and MUP bridge structures
- Lester Road rail-over-road and MUP bridge structures
- Leitrim Road rail-over-road and MUP bridge structures
- Earl Armstrong Road rail-over-road and MUP bridge structures and Earl Armstrong/Bowesville Road intersection reconfiguration
- Bowesville Road rail-over-road bridge structure
- Uplands Road rail-over-road bridge structure
- Airport Road rail-over-road bridge structure
- Airport elevated guideway adjacent to Airport Station
- Limebank Road rail-over-road bridge structure

### **Target Lane Closure Estimate Process including Software and Calculations Used**

From our preliminary TTMPs of each site and stage of this Project, TransitNEXT has extracted the Total Target Lane Closures with respect to sections and prices as defined in PA Schedule 7 - Mobility Matters, and RFP Schedule 8 - Price Form. Using several macro-enabled spreadsheets with linkages to construction dates, we estimated the Aggregate Target Lane Closure Cost (ATLCC) to be \$[REDACTED]. The ATLCC values estimated include closures for lanes, left turns and right turns. We will update these closures according to any change of dates in the construction schedule, enabling the monthly Aggregate Target Lane Closure summaries to be calculated.

During execution of the Project, TransitNEXT will use this same tool for lane closure tracking, allowing monthly Aggregate Actual Lane Closures (AALC) summaries and Monthly Lane Closure Adjustment Contributions to be made.

### **Variation between TTMP and Aggregate Target Lane Closure**

The Traffic Control Plans (TCPs) in each site-specific TTMP submission will depict the lane closures specific to each stage of construction on the individual site. We will also summarize these in the Lane Closure Measurement and Verification Plan as part of each site-specific TTMP submission. The ATLCCs derived from these TCPs do not include the closures required for the following short duration tasks as their locations are unknown at this phase of the Project. However, the necessity for these is foreseeable and may or may not cause variation between the AALCCs and ATLCCs. These activities may include:

- Additional site investigations
- Closed-circuit television installation as required by the City for monitoring a construction site
- Deficiency rectification
- Emergency safety mitigations
- Changes in construction schedule
- Any work delay caused by third parties not affiliated with TransitNEXT

Sincerely,

TransitNEXT

**SCHEDULE 8**

**[Intentionally Deleted]**

## SCHEDULE 9

### KEY INDIVIDUALS

Project Co may propose multiple Key Individuals where multiple Key Individuals are allowed, as set out in this Schedule 9. Where multiple Key Individuals are allowed, Project Co shall identify the lead for each position. The lead for that position would be responsible for all functions of each Key Individual listed for that position. The functions listed below for each Key Individual position are not intended to be an exhaustive list of the functions expected to be performed by each Key Individual position.

#### A. Key Individuals – Works

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Project Co	Project Co Representative	Project Co Representative shall have full authority to act on behalf of Project Co, and shall be responsible for overall authority and leadership of Project Co, and all Project Co parties, in accordance with the Project Agreement.	The Project Co Representative shall have a minimum of 10 years' experience. This shall include executive and P3 experience.  *Project Co Representative	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>
Construction Contractor	Design Build Director	The Design Build Director shall be responsible for ensuring that all activities with respect to the Works are fully integrated with each other.	The Design Build Director shall have a minimum of 15 years' experience. This shall include design, construction, and P3 or Design-Build experience on projects of similar scope and complexity.	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Construction Contractor	Design Manager	<p>The Design Manager shall be responsible for:</p> <ul style="list-style-type: none"> <li>(i) coordinating all designs produced by the Design Team;</li> <li>(ii) ensuring the schedule for Design Development Submittals is reflected in each update of the Works Schedule;</li> <li>(iii) coordinating with the City Representative, or its designate, to prioritize the review of each of the Works Submittals, if necessary; and</li> <li>(iv) ensuring obligations set out in Schedule 10 – Review Procedure are fulfilled for each Works Submittal.</li> </ul>	<p>The Design Manager shall be a Professional Engineer with a minimum 15 years of design experience. This should include Design Build or P3 experience on rail projects of similar scope and complexity.</p> <p>*Design Manager</p>	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Construction Contractor	Systems Integration Manager	The Systems Integration Manager shall have the responsibility for all activities as outlined in Article 11 of Part 1 of Schedule 15-2 of the Output Specifications and Schedule 14 Testing and Commissioning.	<p>The Systems Integration Manager shall have a degree in engineering from a recognized university and a minimum of 15 years' experience in systems design, requirements traceability, interface capture and management, integration management plan development, systems test plan and procedure development, test program management and systems commissioning.</p> <p>Experience managing and coordinating systems integration activities.</p> <p>*System Integration</p>	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>
Construction Contractor	Utility Work Manager	The Utility Work Manager shall be responsible for all activities required to fulfill Project Co's obligations as set out in Article 8 to Part 2 of Schedule 15-2 of the Output Specifications and will act as a single point of contact on all utility related matters.	<p>The Utility Work Manager shall have a minimum of 10 years' experience in Utility Works on rail projects.</p> <p>*Utility Coordination</p>	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Construction Contractor	Design Architect	The Design Architect shall have the qualifications and responsibilities as set out in Schedule 15-2, Part 4	The Design Architect shall be a licensed Architect and have a minimum of 15 years' experience designing transit projects of similar scope and complexity  *Architecture	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>
Construction Contractor	Environmental Manager	The Environmental Manager shall have the responsibilities set out in Schedule 17 – Environmental Obligations.	<p>The Environmental Manager shall have a relevant Sciences degree from a recognized university and a minimum of 15 years' experience including environmental management on projects of similar scope and complexity.</p> <p>The Environmental Manager shall have successfully completed a recognized ISO 14001 Lead Auditor Course.</p>	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Construction Contractor	Director of Communications and Stakeholder Engagement	The Director of Communications and Stakeholder Engagement shall be responsible for all activities required to fulfill Project Co's obligations as set out in Schedule 18 – Communication and Stakeholder Engagement Obligations.	<p>The Director of Communications and Stakeholder Engagement shall have a degree from a recognized university and or college in communications, media relations or other relevant speciality, with a minimum of 10 years' experience leading communications and stakeholder engagement on transit or transportation construction projects of similar scope and complexity, and is bilingual in Canada's two official languages (English and French).</p> <p>*Stakeholder Communications and Public Engagement</p>	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Construction Contractor	Construction Manager	The Construction Manager shall be responsible for all Construction Activities and compliance of Construction Activities with the Project Agreement.	The Construction Manager shall have a degree from a recognized university or technical college in engineering, management, or other relevant specialty, with a minimum of 15 years of heavy civil transit orientated construction experience on projects of similar scope and complexity.  *Construction Manager	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>
ProjectCo	IMS Director	The IMS Director shall have the responsibilities set out in Schedule 11 – Integrated Management System.	The IMS Director shall be a certified QMS 2000 series Auditor, or at a minimum will have successfully completed a recognized ISO 9001, 14001, or OHSAS 18001 Lead Auditor Course and have at least 15 years of experience including IMS/Quality Management experience on projects of similar scope, and complexity.	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Construction Contractor	Maintenance Director	The Maintenance Director shall have the responsibilities set out in Part 1 of Schedule 15-3 of the Output Specifications.	The Maintenance Director shall have a degree from a recognized university or technical college and have a minimum of 15 years' experience in the maintenance of vehicles, systems and/or infrastructure on projects of similar scope and complexity.  *Maintenance Director	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>
Construction Contractor	Safety and Security Certification Manager	The Safety and Security Certification Manager shall have the responsibilities set out in Part 1, Article 7 of Schedule 15-2 of the Output Specifications.	The Safety and Security Certification Manager shall have a minimum of 15 years' experience in the development and implementation of an SSCP.	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>
Construction Contractor	Project Co Testing and Commissioning Coordinator	The Testing and Commissioning Coordinator shall have the responsibilities set out in Schedule 14 – Testing and Commissioning.	The Testing & Commissioning Coordinator shall have a minimum of 10 years' experience in the management and oversight of the testing and commissioning of System Infrastructure of similar scope and complexity.	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Project Co	OHS Manager	The OHS Manager shall have the responsibilities set out in Schedule 11.	<p>The OHS Manager shall be a Canadian Registered Safety Professional (CRSP) having successfully completed the courses required under the COR program and OHSAS 18001 Lead Auditor course with a minimum of 10 years' experience in the development, implementation, and audit of an IMS-OHS for projects of similar scope and complexity.</p> <p>*Health and Safety</p>	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4 (a) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

**B. Key Individuals – Maintenance Period**

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Project Co	Project Co Representative	Project Co Representative shall have full authority to act on behalf of Project Co, and shall be responsible for overall authority and leadership of Project Co, and all Project Co parties, in accordance with the Project Agreement.	<p>The Project Co Representative shall have a minimum of 10 years' experience. This shall include executive and P3 experience.</p> <p>*Project Co Representative</p>	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4(b) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

Project Co Party	Position	Function / Responsibility	Qualifications	Name and Contact Information	Liquidated Damages Amount
Project Co	IMS Director	The IMS Director shall have the responsibilities set out in Schedule 11 – Integrated Management System.	The IMS Director shall be a certified QMS 2000 series Auditor, or at a minimum will have successfully completed a recognized ISO 9001, 14001, or OHSAS 18001 Lead Auditor Course and have at least 15 years of experience including IMS/Quality Management experience on projects of similar scope, and complexity.	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4(b) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>
Maintenance and Rehabilitation Contractor	Maintenance Director	The Maintenance Director shall have the responsibilities set out in Part 1 of Schedule 15-3 of the Output Specifications.	<p>The Maintenance Director shall have a degree from a recognized university or technical college and have a minimum of 15 years' experience in the maintenance of vehicles, systems and/or infrastructure on projects of similar scope and complexity.</p> <p>*Maintenance Director</p>	[REDACTED]	<ul style="list-style-type: none"> <li>- [REDACTED] pursuant to Section 10.4(b) of the Project Agreement</li> <li>- [REDACTED] per day, pursuant to Section 10.4 (c) and 10.4(d) of the Project Agreement</li> </ul>

\* Notes a role to be filled by the same Key Individual qualified for such role as part of the RFQ process. If, given the required qualifications indicated herein, the Proponent determines that any Key Individual qualified for such role as part of the RFQ process does not meet the required qualifications for the particular role, pursuant to Section 3.6(3) of the RFP, any changes in Identified Proponent Parties from the RFQ must be made no later than the deadline set out in the RFP Timetable.

**SCHEDULE 10**

**REVIEW PROCEDURE**

**PART A – DESIGN AND CONSTRUCTION REQUIREMENTS**

**ARTICLE 1 WORKS SUBMITTALS**

- 1.1. The provisions of Part A of this Schedule 10 shall apply to the Design Development Submittals, the Construction Document Submittals, the Design Data and any and all items, documents and anything else required or specified by the Project Agreement, including all Works Submittals listed in Appendix A to this Schedule 10, in respect of the Works to be submitted to, reviewed or otherwise processed by the City in accordance with the Review Procedure prior to Substantial Completion, or after Substantial Completion in respect of the completion of Minor Deficiencies, including any and all subsequent revisions, amendments and changes thereto (collectively and individually, “Works Submittal” or “Works Submittals” as applicable in Part A of this Schedule 10).
- 1.2. For clarity, the provisions of Part A of this Schedule 10, including any deadlines for submission or review set out herein, shall not apply to any processing or review of any Permits, Licences, Approvals and Agreements.
- 1.3. Subject to Article 1.2, if the City fails to meet the timelines set out in this Schedule 10 with respect to its review of any Submittals, such failure shall be deemed to be a breach by the City to comply with the timelines set out in this Schedule 10.
- 1.4. In general, Works Submittals shall consist of the following. Specific requirements for each of these Work Submittals are detailed further in Appendix A.
  - (a) Design Development Submittals:
    - (i) Basis of design reports

Prior to the preparation of each Pre-Final Design Development Submission, Project Co shall develop a basis of design report for each discipline, based on the PA and PSOS project requirements. The basis of design report shall describe the technical approach planned for the project as well as the technical requirements, security mitigation and measures to be employed, design codes and parameters to be used.
    - (ii) Pre-Final Design Development (PFDD), which is the stage of design development where the design details of the relevant Works Submittal are established and drawings and specifications for construction have been developed, but are not yet fully finalized.
    - (iii) Final Design Development (FDD), which is the stage of design development where the design details of the relevant Works Submittal are finalised and the construction drawings and construction specifications for the designed element

are also finalized.

- (b) Construction Document Submittals;
  - (c) Other reports, studies, matrices and plans listed in this Schedule 10 and in Appendix A to this Schedule 10;
  - (d) Other reports, studies, matrices and plans listed in the relevant sections of the Project Agreement; and
  - (e) Works Schedules, in accordance with Schedule 12 – Works Scheduling Requirements and as per Article 3.13.
- 1.5. Project Co shall be responsible for determining any and all necessary Works Submittals, as specified in the relevant sections of the Project Agreement.
- 1.6. Other reports, studies and plans shall be submitted as follows:
- (a) Project Co shall be responsible for determining the timing of the preparation of reports, studies and plans required in the preparation of the PFDD, FDD and Construction Document Submittals, unless timing of these reports, studies and plans are identified in this Schedule 10 or in other relevant sections of the Project Agreement. Project Co shall include the timing and submission sequence of all reports, studies and plans which will inform the Design Development Submittals in the schedule of Works Submittals pursuant to Section 20.4(b)(v) of the Project Agreement. Project Co shall prepare a minimum of two hard copies and one electronic upload of submissions of reports, studies, matrices and plans for review by the City as follows:
    - (i) Draft format; and,
    - (ii) Final format (signed and sealed).
  - (b) Project Co shall be responsible for preparing and submitting additional updated submissions of reports, studies and plans, if the validity of such is altered due to design changes or if more frequent submissions are identified in this Schedule 10 or in other relevant sections of the Project Agreement.
- 1.7. [Intentionally Deleted]
- 1.8. Requirement for a Compliance Verification & Validation Matrix:
- (a) Project Co. shall use the Requirements Management tool to develop reports on compliance with the Output Specifications and other requirements (e.g. new rail vehicle interface) in the form of Compliance Verification & Validation Matrix. The Compliance Verification & Validation Matrix shall provide line by line reporting of all applicable requirements and shall provide full traceability between requirements and compliance demonstration including preliminary and final design references, quality assurance & control, testing & commissioning (including but not limited to FAT, PICO, SAT, SIT, and system wide testing); and
  - (b) Project Co shall submit the Compliance Verification & Validation Matrix in accordance with this

Schedule 10 a as part of the Basis for Design submittal, at the Pre-Final Design Development stage, Final Design Development stage, and prior to system wide testing.

(c) [Intentionally Deleted]

1.9. Design review workshops

- (a) Project Co shall schedule and coordinate design review workshops in advance of issuing Pre-Final Design Development Submittals;
- (b) The Project Co Representative shall arrange the design review workshops in consultation with the City Representative;
- (c) The Parties shall cooperate to develop a reasonable schedule for the design review workshops and shall incorporate such schedule into the Current PBS;
- (d) Project Co shall circulate to the City Representative an agenda for each of the design review workshops no later than 5 Business Days prior to the relevant design review workshop;
- (e) The design review workshops shall be held in person in the City of Ottawa, Ontario, except where otherwise agreed by the Parties, acting reasonably; and
- (f) In advance of a design review workshop, Project Co may submit to the City Design Team for comment any interim drafts of any designs or plans required under this Project Agreement, which submissions shall be used to inform the City on the development of New City Infrastructure design and provide an opportunity for dialog on compliance with the requirements of the Project Agreement. For greater certainty, interim submissions shall be informal and shall not be reviewed in accordance with Schedule 10 - Review Procedure.

## **ARTICLE 2 SCHEDULE FOR WORKS SUBMITTALS**

- 2.1. Project Co shall schedule the Review Procedure Activities, including the submission dates for all Works Submittals and the City review period in accordance with Part A of this Schedule 10.
- 2.2. The Works Schedule and any amendment to the Works Schedule shall allow:
  - (a) A period of 15 Business Days (or such longer period as the Parties may agree) from the date of receipt for the City's review of and response to each Works Submittal for all Works; and
  - (b) A period of 20 Business Days (or such longer period as the Parties may agree) from the date of receipt for the City's review of and response to each Works Submittal containing elements of the Works to be constructed within or adjacent to MTO and NCC Lands. Refer to the Lands Table in Schedule 33 – Lands for the extent of these Lands.

This period of time may be subject to modification as agreed upon with the City.

- 2.3. Project Co shall submit all Works Submittals to the City no later than the dates identified in the Current PBS, as defined in Schedule 12 – Works Scheduling Requirements. The City Representative shall review and respond to each Works Submittal in accordance with the review time periods specified in Article 2.2 of this Schedule 10 – Review Procedure, or as otherwise agreed to between the Parties.
- 2.4. If, at any time, any or all of:
- (a) Revised PBS is under review by the City;
  - (b) Project Co submits a volume of Works Submittals not contemplated by the Current PBS; or
  - (c) a Works Submittal was, or Works Submittals were, received for review later than indicated in the Current PBS, such that the City Representative cannot review the Works Submittal or Works Submittals within the time permitted in the Current PBS,

then the City Representative shall, within five Business Days of receipt of such Works Submittal or Works Submittals, provide Project Co with a reasonable estimate of the time necessary for processing such Works Submittal or Works Submittals which estimate Project Co shall take into account for the purposes of Schedule 12 – Works Scheduling Requirements, provided that an extension shall not be greater than 5 Business Days.

### **ARTICLE 3 GENERAL REQUIREMENTS FOR WORKS SUBMITTALS**

- 3.1. Unless otherwise specified by the City Representative, Project Co shall issue all Works Submittals to the City in the format described in Appendix A to this Schedule 10, and one printed copy of each Works Submittal to the Independent Certifier.
- 3.2. Project Co shall, at its own cost and risk, compile and maintain a Review Procedure Activities Register, to be uploaded to the Electronic Data Management System (EDMS) as detailed in Article 4.10 and Appendix A, to track the status of each Works Submittal through every stage of preparation, submission, and review by the City, and approval by the applicable third party, including for clarity, approval from the City. Project Co shall submit documentation on the proposed design, functionality, and usage of the Review Procedure Activities Register to the City Representative in accordance with Schedule 10 – Review Procedure no later than Financial Close.
- 3.3. The Review Procedure Activities Register shall:
- (a) be updated on a daily basis by Project Co and be accessible by the City, any other entity as requested by the City and Project Co, in real time, through a web-based project management system, unless otherwise permitted by the City;
  - (b) be in place and operational no later than 30 days after Financial Close; and
  - (c) include identification of each of the following:

- (i) the submittal date and contents of all Works Submittals;
- (ii) the date of receipt and content of all returned Works Submittals;
- (iii) status of comments on all Work Submittals in accordance with Article 4.1 of this Schedule 10;
- (iv) vulnerability or security breaches
- (v) review and update City's SSCP and SSeCP to be submitted 30 days after Financial Close; and
- (vi) tracking ID's (in a format reasonably acceptable to the City) supporting the requirements of Article 3.7; and
- (vii) include a tracking log to monitor the resolution of comments that arise during the Review Procedure, as per Article 4.10 of this Schedule 10.

3.4. All Works Submittals shall be in English.

3.5. All Works Submittals required by the Project Agreement or by Applicable Law to be signed or sealed by persons with professional designations, registered in the Province of Ontario (including, where applicable, by registered professional engineers, professional geo-scientists, architects or landscape architects) shall be so signed and sealed.

3.6. All Works Submittals shall:

- (a) include copies of all documents to be reviewed;
- (b) be uploaded to the EDMS and are to include an electronic file-naming convention acceptable to the City; and
- (c) shall clearly identify the purpose of the Works Submittal, Project Co's proposed course of action relating to the Works Submittal and the Project Operations that are the subject of the Works Submittal.

3.7. All Works Submittals shall, where applicable, refer to and be in accordance with the relevant provisions of the Output Specifications, any other applicable Schedule to the Project Agreement and to any Design Data that has previously been subject to review.

3.8. Each Works Submittal shall be clearly identified as a Works Submittal and shall be delivered with appropriate covering documentation, which shall include:

- (a) a summary table which lists all revisions or changes from previous Works Submittals; and
- (b) a list of all attached Works Submittals and for each Works Submittal;

- (i) identification of whether the Works Submittal contains System Infrastructure, New Municipal Infrastructure, and elements of Works on or adjacent to MTO and NCC Lands.
  - (ii) the document number(s) or drawing number(s);
  - (iii) revision numbers (if applicable);
  - (iv) document or drawing title(s);
  - (v) name of entity that prepared the Works Submittal;
  - (vi) name and signature of the Design Manager and other Key Individual(s) responsible for content of the Works Submittal;
  - (vii) quality control documentation in accordance with Schedule 11 – Integrated Management System Requirements;
  - (viii) the Works Submittal history, including reviewer and checker initials, date and delivery information, log number of all previous submissions of that Works Submittal, Project Agreement provisions, comments from reviewers from the previous Works Submittal, all outstanding comments, and responses to addressing those comments, all submitted in a format reasonably acceptable to the City; and
  - (ix) identification of any previous Works Submittal superseded by the current Works Submittal.
- 3.9. To facilitate the City’s distribution of Works Submittals to the NCC and MTO, all Works Submittals that are to be reviewed by the NCC and MTO, shall be separated accordingly and submitted individually.
- 3.10. Each Works Submittal shall be organized into relevant sections. Each Work Submittal shall contain pertinent correspondence, shall be arranged by subject matter in chronological order, and shall include the final calculations, reports and backup information. All Works Submittals shall, without limitation, include copies of all final approvals, design reports, correspondence and calculations, in both electronic and hard copy.
- 3.11. [Intentionally Deleted]
- 3.12. Issued For Construction Works Submittals
- (a) Construction Document Submittals submitted in accordance with this Schedule 10 – Review Procedure and assigned comments “NO COMMENT” or “MINOR COMMENT” with all of the comments resolved, shall become Issued For Construction and Project Co shall stamp them as “Issued For Construction”. Works Submittals used for the construction of any part or parts of the Project prior to being entitled to proceed, as noted above, shall not be stamped as Issued For Construction.
  - (b) Project Co shall submit copies of all drawings that are Issued For Construction, together with manuals and instructions, to the City Representative and to the Independent Certifier.
  - (c) Revisions to Issued For Construction documents shall be submitted for review as

Construction Document Submittals, being stamped “Issued For Construction” upon being entitled to proceed in accordance with this Schedule 10 – Review Procedure. Issued For Construction documents are required for the certification of construction detailed in Appendix A of this Schedule 10.

**3.13. Works Schedule Re-baseline Submittals**

- (a) Project Co shall prepare Works Schedules re-baselines in accordance with Schedule 12 – Works Scheduling Requirements. Project Co shall submit the Works Schedules re-baselines for review in accordance with this Schedule 10.
- (b) All non-draft submissions shall include Project Co Representative’s dated signature on the front cover of each document.
- (c) All Works Schedules submitted to the City shall be submitted in two electronic file formats. The first format shall be in the native file format of the software used to generate and manage the Works Schedules, which shall be the exported .XER file for the latest version of Primavera Professional Project Management (PPM). The second format shall be a word-searchable high resolution colour PDF version. Upon City’s request, Project Co shall provide the details of the software and any additional software plug-ins used by Project Co, a copy of any templates, and the details for any software settings it has used in its scheduling software, such as calendar settings, user and administrative preferences, schedule settings, and any other information required to enable the City to replicate the Works Schedules submitted by Project Co using the native file formats provided by Project Co.
- (d) At each submission, Project Co shall provide at least two hardcopies of the PBS printed in colour in a reasonable scale and on an appropriate paper size. Project Co shall submit one .XER file used to generate the Works Schedule re-baseline and the resultant PDF.
- (e) All tabular information including numerical data or calculations shall be submitted in two electronic file formats. The first format shall be in the Microsoft Excel file format that would allow the City to review formulas and manipulate the data for the purpose of evaluation and the second format shall be a high resolution PDF version.
- (f) The filename of each of the electronic files submitted shall indicate the project name acronym, schedule type, revision number and the schedule status date in the format ‘YYYYMMDD’ - e.g. PBS-4 shall be named “TRI PBS-4 – 20180731”.
- (g) The requirements of Article 3 shall apply to all PBS Submittals.

**ARTICLE 4 COMMENTS**

- 4.1. The City Representative shall review and respond to each Works Submittal in accordance with the time periods specified in Article 2.2. The City Representative shall return Works Submittals to Project Co with a copy to the Independent Certifier and assign one of the following four comments:

- (a) “NO COMMENT”;
  - (b) “MINOR COMMENT”;
  - (c) “MAJOR COMMENT”; or
  - (d) “CRITICAL COMMENT”.
- 4.2. The comment “NO COMMENT” will be assigned to those Works Submittals that, in the opinion of the City Representative, generally conform to the requirements of the Project Agreement, and recognizing the degree of design development. Project Co shall comply with and implement such Works Submittals.
- 4.3. The comment “MINOR COMMENT” will be assigned to those Works Submittals that, in the opinion of the City Representative, generally conform to the requirements of the Project Agreement, recognizing the degree of design development, but in which non-material deficiencies have been found by the City Representative’s review. Project Co shall correct these Works Submittals in the submission immediately subsequent, and shall comply with and implement such Works Submittals after correction, including in accordance with the comments. If the City Representative assigns to a Works Submittal the additional comment “RE-SUBMIT”, then,
- (a) Project Co shall correct and re-submit such Works Submittal, in its entirety and at its own cost, to the City Representative no later than 20 Business Days after the comment has been provided to Project Co, or as agreed between Project Co and the City Representative, and as set out in writing.
  - (b) If at any time it is discovered that Project Co has not corrected the deficiencies on Works Submittals stamped “MINOR COMMENT”, then Project Co will be required to modify the Works Submittals and Project Operations as required to ensure that the Works comply with the Output Specifications, any other applicable Schedule to the Project Agreement, and the Project Co Proposal Extracts and Project Co may be required, at the City Representative’s discretion, to resubmit the relevant Works Submittals.
  - (c) In such circumstances the City Representative shall act promptly in considering whether such deficiencies have been corrected. At the City Representative’s discretion, comments addressed as “MINOR COMMENT” that have not been addressed in the subsequent submission may be escalated to “MAJOR COMMENT” or “CRITICAL COMMENT”.
  - (d) No extension of time will be given or additional compensation paid in respect of any such modification or re-submittal.
- 4.4. The comment “MAJOR COMMENT” or “CRITICAL COMMENT” will be assigned to those Works Submittals that, in the opinion of the City Representative, contain significant deficiencies or do not generally conform to the requirements of the Project Agreement, including this Schedule 10.

- (a) Project Co shall correct and re-submit these Works Submittals within 20 Business Days after the comment has been provided to Project Co, or such other time period as agreed between Project Co and the City Representative, and as set out in writing.
  - (b) The City Representative will then review such re-submitted Works Submittals and assign a comment to the corrected Works Submittal. The Works Submittals shall be corrected, revised and resubmitted as often as may be required to obtain a comment that permits Project Co to proceed.
  - (c) No extension of time will be given or additional compensation paid in respect of any such modification or re-submittal. In addition to the above, a Works Submittal with a “CRITICAL COMMENT” comment will be a Proceeding At Risk Matter in accordance with Section 11.6(a) of the Project Agreement.
- 4.5. Where the City Representative issues the comment “MINOR COMMENT”, “MAJOR COMMENT” or “CRITICAL COMMENT”, the City Representative shall provide reasons for the comment, referencing the particulars of the Section(s) of the Project Agreement that the Works Submittal fails to satisfy. Project Co shall schedule a meeting between the Project Co Representative and the City Representative to discuss the resolution of “MAJOR COMMENT” and “CRITICAL COMMENT” comments. At the City Representative’s discretion, a meeting may be requested to resolve “MINOR COMMENT” comments.
- 4.6. If, at any time after assigning any comment to a Works Submittal, the City Representative or Project Co discovers any significant deficiencies or any failure to conform to the requirements of the Project Agreement, the City Representative may revise the comment assigned to any Works Submittal. If the Parties agree or it is determined in accordance with Article 5 of this Schedule that the revised comment is correct, Project Co shall make all such corrections to the Works Submittals and the Project Operations. No extension of time will be given or additional compensation paid in respect of any such modification or re-submittal.
- 4.7. For the purpose of facilitating and expediting the review and correction of Works Submittals, the City Representative and the Project Co Representative shall meet, as may be mutually agreed, to discuss and review any outstanding Works Submittals and any comments thereon.
- 4.8. Where a Works Submittal is voluminous, the City Representative at his or her discretion may elect to stamp only the cover page or first sheet of the Works Submittal with the appropriate comment, if any, and return to Project Co the cover page or first page together with individual pages or sheets on which comments are made, together with an explanation of the status of all pages not returned to Project Co. Any pages returned without such an explanation as to their status shall be deemed to be “NO COMMENT” by the City.
- 4.9. In lieu of returning a Works Submittal, the City Representative may notify Project Co of the comment assigned to the Works Submittal and if such comment is “MINOR COMMENT”, “MAJOR COMMENT” or “CRITICAL COMMENT”, then the notification shall contain comments in sufficient detail for Project Co to identify the correction sought.
- 4.10. Project Co shall be responsible for creating and maintaining an EDMS as defined in Appendix A, as a tracking log to monitor, as a minimum, the approval of submittals and the resolution of

comments (in a format reasonably acceptable to the City) which is to be available to the City, as described in Article 3. The EDMS will also be used as a repository for all other electronic submittal uploads and document control. The EDMS shall be in place and operational the earlier of, the date upon which the first Works Submittal is submitted or 60 days after Financial Close. The EDMS shall be deemed reasonably acceptable to the City prior to implementation.

- (a) The City accepts that there may be an occasional requirement for routine system shutdowns and/or maintenance. This maintenance shall take place when it will minimize the effect on the obligations as set out in this Project Agreement.
- 4.11. At the City Representative's discretion, Project Co may be requested to attend a meeting to discuss the resolution of any unresolved comments.

## **ARTICLE 5 DISPUTES**

- 5.1. If Project Co disputes any act of the City or the City Representative in respect of a Works Submittal under this Part A of Schedule 10, Project Co shall promptly notify the City Representative and the Independent Certifier of the details of such Dispute and shall submit the reasons why Project Co believes a different comment should be assigned, together with appropriate supporting documentation. The City Representative shall review the Works Submittal, the reasons and supporting documentation and within five Business Days after receipt thereof shall either confirm the original comment or notify Project Co of a revised comment. If the City Representative confirms the original comment, Project Co may request that the Independent Certifier resolve the Dispute and render a decision within five Business Days of such request.
- 5.2. If either Party is not satisfied, acting reasonably, with the resolution of the Independent Certifier, subject to Article 10.2 of Part A of Schedule 10, either Party may refer the matter for determination in accordance with Schedule 26 - Dispute Resolution Procedure.
- 5.3. Notwithstanding the provisions of Articles 5.1 and 5.2, the City Representative may direct that Project Co revise the Works Submittals in accordance with the comments of the City Representative and proceed to perform and complete the Works on the basis of such revised Works Submittals. For clarity, such direction shall be considered a Dispute and Project Co may proceed in accordance with this Article 5 and Schedule 26 – Dispute Resolution Procedure.

## **ARTICLE 6 EFFECT OF REVIEW**

- 6.1. Any review and comment by the City or the City Representative of any Works Submittals are for general conformity to the obligations and requirements of the Project Agreement, and any such review and comment shall not relieve Project Co of the risk and responsibility for the Project Operations and for meeting all of Project Co's obligations under and requirements of the Project Agreement, and shall not create any new or additional obligations or liabilities for the City. Without limiting the generality of the foregoing, any and all errors or omissions in Works Submittals or of any review and comment shall not exclude or limit Project Co's obligations or liabilities in respect of the Works under the Project Agreement or exclude or limit the City's rights in respect of the Works under the Project Agreement.

## **ARTICLE 7 WORKS SUBMITTAL EXPLANATION**

- 7.1 At any time, the City Representative may, acting reasonably, require Project Co or any Project Co Parties, including Project Co's consultants and any other relevant personnel, at no additional cost to the City, to explain to the City Representative and the City advisors the intent of Project Co's Works Submittals, including in relation to any design and any associated documentation and as to its satisfaction of the Output Specifications or any other Schedule to the Project Agreement, as applicable. Project Co shall provide the explanation to the City Representative within five Business Days (or such longer period as the Parties may agree) from the date of receipt of the request from the City Representative.

## **ARTICLE 8 REVISIONS**

- 8.1. Project Co shall ensure that each Works Submittal keeps the same unique reference number throughout the review process, and that subsequent revisions of the same Works Submittal are identified by a sequential revision number. Correspondence related to such Works Submittal shall reference the reference number and revision number.
- 8.2. Re-submittals shall clearly show all revisions from the previous Works Submittal. Bound documents, including reports and manuals, shall contain a preface that clearly states how revisions are marked and the previous revision number against which the revisions have been marked. A consistent format for mark-ups of documents shall be used (e.g. deletions struck out and additions underscored). Revised portions of drawings shall be clearly marked (with appropriate means to visually distinguish between the parts of the drawing that are revised and the parts that are not revised) and the revision number and description of the revision shall be included on the drawing. Drawings produced during Design Development shall be exempt from the requirements in Article 8.2.
- 8.3. All revisions on print media shall be initialled by hand by the individual designer, design checker and, where applicable, by the drafter and the drafting checker and shall identify the persons who initialled the Works Submittal. Electronic versions of the Works Submittal shall identify the persons who initialled the revisions to the printed version of the Works Submittal. All such revisions must be able to be integrated into the As-built Drawings and the Record Drawings.
- 8.4. Project Co shall keep all Design Data current. If any Design Data is revised as part of a Works Submittal, all other Design Data relying on or based on that Design Data shall also be revised accordingly. All such revised Design Data shall also be submitted with the Works Submittal to which it relates.
- 8.5. [Intentionally Deleted]

## **ARTICLE 9 AUDIT BY THE CITY REPRESENTATIVE**

- 9.1. Without limiting any other right under the Project Agreement, the City Representative shall have the right to audit all Works Submittals, including comparing all Works Submittals to previous Works Submittals.

- 9.2. If during an audit or at any other time it is discovered by the City or Project Co (or resolved pursuant to Article 9.3) that any Works Submittals were not correctly implemented, Project Co shall at its sole cost immediately take all necessary steps to correct and modify the applicable Works Submittals and the Project Operations to which they relate and shall advise the City Representative of all such corrections and modifications.
- 9.3. Any Dispute concerning the implementation of a Works Submittal, subject to Article 5.1, shall be referred in the first instance to the Independent Certifier for resolution.

## **ARTICLE 10 VARIATIONS**

- 10.1. [Not used]
- 10.2. If, having received comments from the City Representative on any Works Submittal, Project Co considers that compliance with those comments would amount to a Variation, Project Co shall, within ten (10) Business Days of receipt of and before complying with the comments, provide written Notice to the City of the same and, if it is agreed by the Parties that a Variation would arise if the comments were complied with, the City may, at their election, issue a Variation Enquiry (which shall be dealt with in accordance with Schedule 21 - Variation Procedure) or amend their comment on the Works Submittal. If the Parties do not agree that a Variation would arise if the comments were complied with, either party may proceed to resolve the matter in accordance with Article 5, including for clarity, the exercise by the City of their rights under Article 5. Subject to the foregoing sentence, any failure by Project Co to notify the City in accordance with this Article 10.2 that Project Co considers that compliance with any comments of the City Representative would amount to a Variation shall constitute an irrevocable acceptance by Project Co that any compliance with the City Representative's comments shall be without cost to the City and without any extension of time.

## **ARTICLE 11 GENERAL**

- 11.1. Any capitalized terms used in the appendices to this Schedule 10 that are not defined in this Schedule 10, the Project Agreement or in Schedule 1 – Definitions and Interpretation, shall have the meanings given to them in Schedule 15-1 – Technical Terms and Reference Documents.

**SCHEDULE 10**

**REVIEW PROCEDURE**

**PART B – MAINTENANCE PERIOD**

**ARTICLE 1 MAINTENANCE AND REHABILITATION SUBMITTALS**

- 1.1. The provisions of Part B of this Schedule 10 shall apply to any and all items, documents and anything else required or specified by the Project Agreement (other than the Design Development Submittals, the Construction Document Submittals and the Design Data) and the Maintenance and Rehabilitation Submittals listed in Appendix B, to be submitted to, reviewed or otherwise processed by the City in accordance with the Review Procedure in respect of the Project, after Substantial Completion, except in respect of the completion of Minor Deficiencies, including any and all subsequent revisions, amendments and changes thereto (collectively and individually, “Maintenance and Rehabilitation Submittal” or “Maintenance and Rehabilitation Submittals” as applicable in Part B of this Schedule 10).
- 1.2. All Works Schedules required under Part B shall be prepared and submitted in accordance with Schedule 12 – Works Scheduling Requirements, and Schedule 15-3 – Maintenance & Rehabilitation Requirements.
- 1.3. For clarity, the provisions of Part B of this Schedule 10, including any deadlines for submission or review set out herein, shall not apply to any processing or review of any Permit, Licences, Approval or Agreements.
- 1.4. Project Co shall allow a period of 15 Business Days (or such longer period as the Parties may agree) from the date of receipt for the review of and response to each Maintenance and Rehabilitation Submittal.
- 1.5. Project Co shall, in scheduling Maintenance and Rehabilitation Submittals and in the performance of the Project Operations, allow adequate time prior to performing the Project Operations that are the subject of the Maintenance and Rehabilitation Submittals, for review of the Maintenance and Rehabilitation Submittals and for Project Co to make changes to Maintenance and Rehabilitation Submittals that may be required if comments are received on the Maintenance and Rehabilitation Submittals, such review and required changes to be in accordance with Part B of this Schedule 10.
- 1.6. Requirement for a Compliance Verification & Validation Matrix:
  - (a) Project Co. shall use the Requirements Management tool to develop reports on compliance with the Output Specifications and other requirements in the form of a Maintenance & Rehabilitation Compliance Verification & Validation Matrix. The Compliance Verification & Validation Matrix shall provide line by line reporting of all PSOS requirements and shall provide full traceability between maintenance and rehabilitation requirements and compliance demonstration including preliminary and final design references (where applicable), maintenance procedures and plans, demonstration of training plans and training delivery, final design of the performance

reporting requirements including testing of the performance reporting system, and compliance with any other maintenance related deliverables; and

- (b) Project Co shall submit the Maintenance & Rehabilitation Compliance Verification & Validation Matrix in accordance with this Schedule 10 at two intervals: 6 months prior to Trial Running and 30 days prior to Trial Running.
- (c) [Intentionally Deleted].

## **ARTICLE 2 GENERAL REQUIREMENTS FOR MAINTENANCE AND REHABILITATION SUBMITTALS**

- 2.1. Unless otherwise specified by the City Representative, Project Co shall issue three printed copies of all Maintenance and Rehabilitation Submittals to the City, together with an electronic copy to the EDMS in a format agreed by the Parties acting reasonably.
- 2.2. Project Co shall utilize the Review Procedure Activities Register provided in accordance with the requirements of Article 3.2 of Part A of this Schedule 10, to track the status of each Maintenance and Rehabilitation Submittal through every stage of preparation, submission, review by the City, and approval by the applicable third party, including for clarity, approval from the City. The Review Procedure Activities Register shall be maintained in respect of Maintenance and Rehabilitation Submittals at all times during the Maintenance Period and shall:
  - (a) be maintained up-to-date by Project Co and be accessible by the City, any other entity as requested by the City and Project Co in real time, through a web-based project management system, unless otherwise permitted by the City;
  - (b) include identification of the following:
    - (i) the submittal date and contents of all Maintenance and Rehabilitation Submittals;
    - (ii) the date of receipt and content of all returned Maintenance and Rehabilitation Submittals;
    - (iii) the status of comments on all Maintenance and Rehabilitation Submittals in accordance with Article 3.1 of this Part B of Schedule 10; and
    - (iv) tracking ID's (in a format reasonably acceptable to the City) supporting the requirements of Article 2.7.
- 2.3. All Maintenance and Rehabilitation Submittals shall be in English.
- 2.4. All Maintenance and Rehabilitation Submittals required by the Project Agreement or by Applicable Law to be signed or sealed by persons with professional designations registered in the Province of Ontario (including, where applicable, by registered professional engineers, geoscientists, architects or landscape architects) shall, where applicable, be so signed and sealed.
- 2.5. All Maintenance and Rehabilitation Submittals shall:
  - (a) include copies of all documents to be reviewed;

- (b) include an electronic file-naming convention acceptable to the City, acting reasonably; and
  - (c) clearly identify the purpose of the Maintenance and Rehabilitation Submittal, Project Co's proposed course of action relating to the Maintenance and Rehabilitation Submittal and the Project Operations that are the subject of the Maintenance and Rehabilitation Submittal.
- 2.6. All Maintenance and Rehabilitation Submittals shall, where applicable, refer to the relevant provisions of the Output Specifications and/or any other applicable Schedule to the Project Agreement.
- 2.7. All Maintenance and Rehabilitation Submittals shall be clearly identified as a Maintenance and Rehabilitation Submittal and shall be delivered with appropriate covering documentation, which shall include a list of all attached Maintenance and Rehabilitation Submittals, and for each Maintenance and Rehabilitation Submittal:
  - (a) the document number(s) or drawing number(s);
  - (b) revision numbers (if applicable);
  - (c) document or drawing title(s);
  - (d) name of entity that prepared the Maintenance and Rehabilitation Submittal;
  - (e) name and signature of the Maintenance Director and other Key Individual(s) responsible for content of the Maintenance and Rehabilitation Submittal;
  - (f) Quality control documentation in accordance with Schedule 11 – Integrated Management System Requirements;
  - (g) the Maintenance and Rehabilitation Submittal history showing date and delivery information and/or log number of all previous submissions of that Maintenance and Rehabilitation Submittal as per the EDMS as detailed in 4.10 in Part A; and
  - (h) identification of any previous Maintenance and Rehabilitation Submittal superseded by the current Maintenance and Rehabilitation Submittal.
- 2.8. Each Maintenance and Rehabilitation Submittal shall be organized and shall have indexes and sectional dividers. The Maintenance and Rehabilitation Submittals shall contain pertinent correspondence, shall be arranged by subject matter in chronological order, and shall include the final calculations, reports and backup information. Submissions shall include copies of all final approvals, design reports, correspondence and calculations.

**ARTICLE 3 COMMENTS**

- 3.1. The City Representative shall review and respond to each Maintenance and Rehabilitation Submittal in accordance with the time periods specified in Article 1.4. The City Representative shall return Maintenance and Rehabilitation Submittals to Project Co and assign one of the following four comments:
- (a) “NO COMMENT”;
  - (b) “MINOR COMMENT”;
  - (c) “MAJOR COMMENT” or
  - (d) “CRITICAL COMMENT”.
- 3.2. The comment “NO COMMENT” will be assigned to those Maintenance and Rehabilitation Submittals that, in the opinion of the City Representative, conform to the requirements of the Project Agreement. Project Co shall comply with and implement such Maintenance and Rehabilitation Submittals.
- 3.3. For Maintenance and Rehabilitation Submittals that require approval from third parties, including, for clarity, approval from the City, the City Representative may not issue a “NO COMMENT” or a “MINOR COMMENT” comment if the applicable third party has not approved those Maintenance and Rehabilitation Submittals.
- 3.4. The comment “MINOR COMMENT” will be assigned to those Maintenance and Rehabilitation Submittals that, in the opinion of the City Representative, generally conform to the requirements of the Project Agreement, but in which non-material deficiencies have been found by the City Representative’s review. Project Co shall correct these Maintenance and Rehabilitation Submittals and shall comply with and implement such Maintenance and Rehabilitation Submittals after correction, including in accordance with the comments. If the City Representative assigns to a Maintenance and Rehabilitation Submittal the additional comment “RE-SUBMIT”, then,
- (a) Project Co shall correct and re-submit such Maintenance and Rehabilitation Submittal, in its entirety and at its own cost to the City Representative no later than 20 Business Days after the comment has been provided to Project Co, or such other time period as determined by the City Representative, acting in its sole discretion and as set out in writing.
  - (b) If at any time it is discovered that Project Co has not corrected the deficiencies on Maintenance and Rehabilitation Submittals stamped “MINOR COMMENT”, then Project Co will be required to modify the Maintenance and Rehabilitation Submittals and Project Operations as required to ensure that the Project Operations comply with the Output Specifications and Project Co may be required, at the City Representative’s discretion, to resubmit relevant Maintenance and Rehabilitation Submittals.
  - (c) In such circumstances, the City Representative shall act promptly in considering whether such deficiencies have been corrected. At the City Representative’s discretion,

comments addressed as “MINOR COMMENT” that have not been addressed in the subsequent submission may be escalated to “MAJOR COMMENT” or “CRITICAL COMMENT”.

- (d) No extension of time will be given or additional compensation paid in respect of any such modification or re-submittal.
- 3.5. The comment “MAJOR COMMENT” or “CRITICAL COMMENT” will be assigned to those Maintenance and Rehabilitation Submittals that, in the opinion of the City Representative, contain significant deficiencies or do not generally conform to the requirements of the Project Agreement, including this Schedule 10.
- (a) Project Co shall correct and re-submit these Maintenance and Rehabilitation Submittals within 15 Business Days after the comment has been provided to Project Co, or such other time period, as determined by the City Representative, acting in its sole discretion and as set out in writing.
  - (b) The City Representative will then review such re-submitted Maintenance and Rehabilitation Submittals and assign a comment to the corrected Maintenance and Rehabilitation Submittal. The Maintenance and Rehabilitation Submittals shall be corrected, revised and resubmitted, in their entirety, as often as may be required to obtain a comment that permits Project Co to proceed.
  - (c) No extension of time will be given or additional compensation paid in respect of any such modification or re-submittal. In addition to the above, a Maintenance and Rehabilitation Submittal with a “CRITICAL COMMENT” comment shall be escalated to the Maintenance Committee.
- 3.6. Where the City Representative issues the comment “MINOR COMMENT”, “MAJOR COMMENT” or “CRITICAL COMMENT”, the City Representative shall provide reasons for the comment, referencing the particulars of the Section(s) of the Project Agreement that the Maintenance and Rehabilitation Submittal fails to satisfy, and, if requested by the Project Co Representative, the City Representative shall meet with the Project Co Representative to discuss the reasons for the comment.
- 3.7. If, at any time after assigning any comment to a Maintenance and Rehabilitation Submittal, the City Representative or Project Co discovers any significant deficiencies or any failure to conform to the requirements of the Project Agreement, the City Representative may revise the comment assigned to any Maintenance and Rehabilitation Submittal. If the Parties agree or it is determined in accordance with Article 3.11 of this Schedule 10 that the revised comment is correct, Project Co shall make all such corrections to the Maintenance and Rehabilitation Submittals and the Project Operations. No extension of time will be given or additional compensation paid in respect of any such modification or re-submittal.
- 3.8. For the purpose of facilitating and expediting the review and correction of Maintenance and Rehabilitation Submittals, the City Representative and the Project Co Representative shall meet as may be mutually agreed to discuss and review any outstanding Maintenance and Rehabilitation Submittals and any comments thereon.

- 3.9. Where a Maintenance and Rehabilitation Submittal is voluminous, the City Representative at his or her discretion may elect to stamp only the cover page or first sheet of the Maintenance and Rehabilitation Submittal with the appropriate comment, if any, and provide Project Co with the cover page or first page together with individual pages or sheets on which comments are made, together with an explanation of the status of all pages not returned to Project Co. Any pages returned without such an explanation as to their status shall be deemed to be “NO COMMENT” by the City.
- 3.10. In lieu of returning a Maintenance and Rehabilitation Submittal, the City Representative may notify Project Co of the comment assigned to the Maintenance and Rehabilitation Submittal and if such comment is “MINOR COMMENT”, “MAJOR COMMENT” or “CRITICAL COMMENT”, then the notification shall contain comments in sufficient detail for Project Co to identify the correction sought.
- 3.11. Project Co shall be responsible for creating and maintaining a tracking log to monitor the resolution of comments (in a format reasonably acceptable to the City) which is to be available to the City, as described in Article 2.
- 3.12. At the City Representative’s discretion, Project Co may be requested to attend a meeting to discuss the resolution of any unresolved comments.

#### **ARTICLE 4 DISPUTES**

- 4.1. If Project Co disputes any act of the City or the City Representative in respect of a Maintenance and Rehabilitation Submittal under this Part B, Project Co shall promptly notify the City Representative of the details of such Dispute and shall submit the reasons why Project Co believes a different comment should be assigned, together with appropriate supporting documentation. The City Representative shall review the Maintenance and Rehabilitation Submittal, the reasons and supporting documentation and within five (5) Business Days after receipt thereof shall either confirm the original comment or notify Project Co of a revised comment.
- 4.2. If after such review by the City Representative Project Co disputes the comment on a Maintenance and Rehabilitation Submittal, subject to Article 9.1, Project Co may refer the matter for determination in accordance with Schedule 26 - Dispute Resolution Procedure.

#### **ARTICLE 5 EFFECT OF REVIEW**

- 5.1. Any review and comment by the City or the City Representative of any Maintenance and Rehabilitation Submittals are for general conformity to the obligations and requirements of the Project Agreement, and any such review and comment shall not relieve Project Co of the risk and responsibility for the Project Operations and for meeting all of its obligations under and requirements of the Project Agreement, and shall not create any new or additional obligations or liabilities for the City. Without limiting the generality of the foregoing any and all errors or omissions in Maintenance and Rehabilitation Submittals or of any review and comment shall not exclude or limit Project Co.’s obligations or liabilities under the Project Agreement in respect of matters related to the Maintenance and Rehabilitation Submittal or exclude or limit the City’s

rights under the Project Agreement in respect of matters related to the Maintenance and Rehabilitation Submittal.

## **ARTICLE 6 MAINTENANCE AND REHABILITATION SUBMITTAL EXPLANATION**

- 6.1 At any time, the City Representative may, acting reasonably, require Project Co or any Project Co Parties at no additional cost to the City, to explain to the City Representative and the City's advisors the intent of Project Co.'s Maintenance and Rehabilitation Submittals, including as to its satisfaction of the Output Specifications and its impact on the Project Operations.

## **ARTICLE 7 REVISIONS**

- 7.1. Project Co shall ensure that Maintenance and Rehabilitation Submittals keep the same, unique reference number throughout the review process, and that subsequent revisions of the same Maintenance and Rehabilitation Submittal are identified by a sequential revision number. Correspondence related to such Maintenance and Rehabilitation Submittal shall reference the reference number and revision number.
- 7.2. Re-submittals shall clearly show all revisions from the previous Maintenance and Rehabilitation Submittal. Bound documents, including reports and manuals, shall contain a preface that clearly states how revisions are marked and the previous revision number against which the revisions have been marked. A consistent format for mark-ups of documents shall be used (e.g. deletions struck out and additions underscored). Revised portions of drawings shall be clearly marked (with appropriate means to visually distinguish between the parts of the drawing that are revised and the parts that are not revised) and the revision number and description of the revision shall be included on the drawing.
- 7.3. All revisions on print media shall be initialled by hand by the individual designer, design checker and, where applicable, by the drafter and the drafting checker and shall identify the persons who initialled the Maintenance and Rehabilitation Submittal. Electronic versions of the Maintenance and Rehabilitation Submittal shall identify the persons who initialled the revisions to the printed version of the Maintenance and Rehabilitation Submittal.

## **ARTICLE 8 AUDIT BY THE CITY REPRESENTATIVE**

- 8.1 Without limiting any other right under the Project Agreement, the City Representative shall have the right to audit all Maintenance and Rehabilitation Submittals, including comparing all Maintenance and Rehabilitation Submittals to previous Maintenance and Rehabilitation Submittals.
- 8.2 If during an audit or at any other time it is discovered by the City or Project Co that any Maintenance and Rehabilitation Submittals were not correctly implemented, Project Co shall at its sole cost immediately take all necessary steps to correct and modify the applicable Maintenance and Rehabilitation Submittals and the Project Operations to which they relate and shall advise the City Representative of all such corrections and modifications.

## **ARTICLE 9 VARIATIONS**

- 9.1 If, having received comments from the City Representative on any Maintenance and Rehabilitation Submittal, Project Co considers that compliance with those comments would amount to a Variation, Project Co shall, within 10 Business Days of receipt of and before complying with the comments, provide written Notice to the City of the same and, if it is agreed by the Parties, or is determined pursuant to Schedule 26 - Dispute Resolution Procedure, that a Variation would arise if the comments were complied with, the City may at their election, either issue a Variation Enquiry and it shall be dealt with in accordance with Schedule 21 - Variation Procedure or amend their comment on the Maintenance and Rehabilitation Submittal. Any failure by Project Co to notify the City in accordance with this Article 9.1 that Project Co considers compliance with any comments of the City Representative would amount to a Variation shall constitute an irrevocable acceptance by Project Co that any compliance with the City Representative's comments shall be without cost to the City and without any extension of time.

## **ARTICLE 10 GENERAL**

- 10.1 Any capitalized terms used in the appendices to this Schedule 10 – Review Procedure, that are not defined in this Schedule 10 – Review Procedure or in Schedule 1 – Definitions and Interpretation of the Project Agreement, shall have the meanings given to them in Schedule 15-1 – Technical Terms and Reference Documents.

**APPENDIX A - MINIMUM WORKS SUBMITTAL REQUIREMENTS**

**ARTICLE 1    FORMAT FOR WORKS SUBMITTALS**

1.1    All Works Submittals shall be submitted to the City in hardcopy and electronic format as follows:

(a)    Hardcopy requirements:

- (i)    three sets of all Work Submittals shall be submitted in reduced format drawings (11” x 17”, fold-outs, folded to 8.5” x 11”) and design briefs, included in 3-hole ring binders; and
- (ii)   three sets of Works Submittals which are not drawings shall be submitted in 8.5” x 11” format, unless otherwise specified.

(b)    All other Submittals not otherwise specified shall be submitted to an EDMS as detailed below. In addition to hard copies, all Works Submittals (or as otherwise agreed upon by the Parties) shall be submitted to an EDMS and in an electronic format that is deemed reasonably acceptable to the City. As a minimum, this system shall comprise the following:

- (i)    a cloud-based single platform which provides an easily configurable solution;
- (ii)   user group security and restricted authorization function;
- (iii)   browsing by project, folder or file name with drag and drop function;
- (iv)   collaboration functions with the ability to electronically approve and stamp documents;
- (v)    text searchable functions for PDF and native files;
- (vi)   seamless integration;
- (vii)   audit trail;
- (viii) pre-defined workflow & quality management systems;
- (ix)   read-only, real-time access for the City Representative and their nominated personnel;

- (x) version control and notification capability;
    - (xi) analytics and reporting function; and
    - (xii) a review function with customizable mark-up tools.
  - (c) CAD drawings shall be provided in accordance with the City of Ottawa's CADD Standards Manual; and
  - (d) All Works Submittals shall be uploaded to the web based project management system, in text-searchable PDF and in their native format, simultaneously with the submission to the City.
- 1.2 All Works Submittals shall also be provided in the format set forth in Appendix A.

## **ARTICLE 2 SUBMITTALS**

- 2.1. The following is a detailed list of the Works Submittals that Project Co is required to provide to the City for review and comment in accordance with this Schedule 10.
- 2.2. Additional Works Submittals may be requested by the City Representative at any time in order to understand the Works, and Project Co shall be required to provide same to the City for review in accordance with this Schedule 10. A description of the minimum content of each Work Submittal provided is set out in the following sections.
- 2.3. [Intentionally Deleted].
- 2.4. Works Submittal deliverables which are applicable to satisfying the requirements of multiple Works Submittal sections are permitted to be reused, granted they meet all the requirements of each Works Submittal section they are applied to.
- 2.5. Submission Requirements
  - (a) The Works Submittal Requirements are detailed in the tables below.

### DESIGN CERTIFICATE (GENERAL)

In respect of :.....

(Provide submittal details)

*Project Agreement between the City and Project Co dated XX XX, XXXX (“the Project Agreement”) relating to the Project. Defined terms and expressions used in the Project Agreement have the same meanings in this Certificate.*

*Form of Certificate to be used by the Design Team for certifying the design of the Works to the extent that such Works components have been constructed, installed, altered, upgraded, and/or augmented, in accordance with Schedule 15-2 – Design and Construction Requirements.*

1. We certify that we have the requisite professional qualifications, skill and experience to prepare the Design Data referred to herein in accordance with the requirements of the Project Agreement and all relevant Output Specifications.
2. We certify that we have prepared the Design Data for [.....] listed in the Schedule hereto in accordance with all applicable requirements contained in the Design Management Plan and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking the preparation of such Design Data, and that in our professional opinion such Design Data:
  - (a) complies with all applicable Output Specifications, as amended by the following:
    - (i) **[List, if any, the changes made by the issue of Variation(s)];**
  - (b) complies with all applicable design requirements of the Project Agreement;
  - (c) complies with all applicable standards, codes and current Good Industry Practice; and
  - (d) accurately describes and depicts the Works to be undertaken.

### DESIGN CERTIFICATE (ENVIRONMENTAL)

*Project Agreement between the City and Project Co dated XX XX, XXXX (“the Project Agreement”) relating to the Project. Defined terms and expressions used in the Project Agreement have the same meanings in this Certificate.*

*Form of certificate to be used by the Design Team and the Environmental Director for certifying the design of environmental works incorporated in the Works in accordance with the Project Agreement.*

- 1) We certify that we have the requisite professional qualifications, skill and experience to prepare the Design Data referred to herein in accordance with the requirements of the Project Agreement and all relevant Output Specifications.
- 2) We certify that we have prepared the Design Data for [.....] [Name and list of all elements of the environmental works] in the Schedule hereto in accordance with all applicable requirements contained in the Design Quality Management Plan and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking the preparation of such Design Data, and that in our professional opinion:
  - a) the said Design Data complies with all applicable Output Specifications, including Technical Appraisal Form No. [.....] dated [.....], as amended by the following:
    - i) **[List, if any, the changes made by the issue of Variation(s), and any Addenda to the foregoing Technical Appraisal Form];**
  - b) the said Design Data complies with all applicable design requirements of the Project Agreement;
  - c) the said Design Data complies with all applicable standards, codes, environmental permits licences approvals and authorizations, and current Good Industry Practice; and
  - d) the said Design Data accurately describes and depicts the Works to be undertaken.

### CONSTRUCTION CERTIFICATE

*Project Agreement between the City and Project Co dated XX XX, XXXX (“the Project Agreement”) relating to the Project. Defined terms and expressions used in the Project Agreement have the same meanings in this Certificate.*

Form of Certificate to be used by the Design Team for certifying, as applicable:

- a) the substantial completion of construction activities in respect of those components of the Works set out in paragraph 1 of this Construction Certificate;
- b) the Total Completion of construction activities in respect of the Works, including Minor Deficiencies; or
- c) the total completion of construction activities in respect of any Reinstatement Work carried out by the Construction Contractor pursuant to Section 30 **[Damage and Destruction]** in accordance with a Reinstatement Plan.

in accordance with Schedule 15-2 – Design and Construction Requirements.

#### Construction Contractor’s Statement

We certify that **[name and element of the Works in respect of the Substantial Completion Certificate][the Works in respect of the Final Completion Certificate][the Works in respect of the Final Completion Certificate (Reinstatement Work)]** has been designed, constructed, **[substantially completed]**, **[totally completed]**, commissioned and tested in all respects in accordance with: **[Note to Proponents: Inapplicable language to be deleted.]**

- a) the relevant Design Data and Design Certificates in each case to which there has been no objection under the Review Procedure; and
  - b) the provisions of the Project Agreement, including all applicable Output Specifications, as amended by the following Variation(s):
- (i) **[List, if any, the changes made by the issue of Variation(s), and any Addenda to the foregoing Technical Appraisal Form];**

Signed.....

### Design Team's Statement

1. We certify that we have examined the [name and element of the Works in respect of the Substantial Completion Certificate][the Works in respect of the Final Completion Certificate][the Works in respect of the Final Completion Certificate (Reinstatement Work)] in accordance with the requirements for examination of the Works contained in the Design Quality Management Plan and the Construction Quality Management Plan and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking such examinations, and that in our professional opinion [the said element of the Works][the Works] has been designed, constructed, [substantially completed][totally completed], commissioned and tested in all respects in accordance with: **[Note to Proponents: Inapplicable language to be deleted.]**
  - (a) the relevant Design Data and Design Certificates in each case to which there has been no objection under the Review Procedure; and
  - (b) the provisions of the Project Agreement, including all applicable Output Specifications, as amended by the following Variation(s):

**[List, if any, the changes made by the issue of Variation(s), and any Addenda to the foregoing Technical Appraisal Form];**

## APPENDIX B - MINIMUM MAINTENANCE AND REHABILITATION

### SUBMITTAL REQUIREMENTS

#### 1. FORMAT FOR MAINTENANCE AND REHABILITATION SUBMITTALS

1.1 All Maintenance and Rehabilitation Submittals shall be submitted to the City in hardcopy and electronic format as follows:

- (a) Hardcopy Requirements
  - (i) three sets of all Maintenance and Rehabilitation Submittals shall be submitted in reduced format drawings (11" x 17", fold-outs, folded to 8.5" x 11"), included in 3-hole ring binders; and
  - (ii) three sets of Maintenance and Rehabilitation Submittals which are not drawings shall be submitted in 8.5" x 11" format, unless otherwise specified.
- (b) All other Submittals not otherwise specified shall be submitted to an EDMS as detailed below. In addition to hard copies, all Works Submittals (or as otherwise agreed upon by the Parties) shall be submitted to an EDMS and in an electronic format that is deemed reasonably acceptable to the City. As a minimum, this system shall comprise the following:
  - (i) a cloud-based single platform which provides an easily configurable solution;
  - (ii) user group security and restricted authorization function;
  - (iii) browsing by project, folder or file name with drag and drop function;
  - (iv) collaboration functions with the ability to electronically approve and stamp documents;
  - (v) text searchable functions for PDF and native files;
  - (vi) seamless integration;
  - (vii) audit trail;

- (viii) pre-defined workflow & quality management systems;
  - (ix) read-only, real-time access for the City Representative and their nominated personnel;
  - (x) version control and notification capability;
  - (xi) analytics and reporting function; and
  - (xii) a review function with customizable mark-up tools.
- (c) CAD drawings (where applicable) shall be provided in accordance with the City of Ottawa's CADD Standards Manual; and
- (d) All Maintenance and Rehabilitation Submittals shall be uploaded to the web based project management system, in text-searchable PDF and in their native format, simultaneously with the submission to the City.

1.2 For a Maintenance and Rehabilitation Submittal to have been completed, all of the requirements of Article 1.1 shall be met.

## **2. SUBMITTALS**

2.1. The following is a detailed list of the Maintenance and Rehabilitation Submittals that Project Co is required to provide to the City for review and comment in accordance with this Schedule 10. Additional Maintenance and Rehabilitation Submittals may be requested by the City Representative at any time in order to understand the Maintenance and Rehabilitation Services, and Project Co shall be required to provide same to the City for review in accordance with this Schedule 10. A description of the minimum content of each Maintenance and Rehabilitation Submittal provided is set forth in Section 2.3 of this Appendix B.

2.2. Requirement for a Compliance Verification & Validation Matrix:

- (a) Project Co. shall report on PSOS compliance with a Compliance Verification & Validation Matrix. Compliance Verification & Validation Matrix should provide line by line reporting of all PSOS requirements and should provide full traceability between requirements and compliance demonstration including preliminary and final design references, quality assurance & control, testing & commissioning (including but not limited to FAT, PICO, SAT, SIT, and system wide testing).
- (b) The Compliance Verification & Validation Matrix should be submitted under Schedule 10 at three intervals: PDR, FDR, and prior

to system wide testing.

2.3. Unless otherwise specified in the table below, or an alternate date is mutually agreed with the City and confirmed in writing by the City in advance, the following definitions apply in the table below:

(a) “Annually in advance” means:

(i) submit at least ninety (90) days prior to the commencement of Testing and Commissioning;

(ii) re-submitted at least sixty (60) days prior to the commencement of each Contract Year;

(b) “Annually in retrospect” means submitted within thirty (30) days of the final day of each Contract Year;

(c) “Monthly” means submitted within seven (7) days of the end of each calendar month; and

(d) “Quarterly” means submitted within thirty (30) days of the final day of each consecutive period of three (3) calendar months, starting from Substantial Completion.

2.4. Submission Requirements

(a) Submission Requirements are detailed in the table below:

**[REDACTED]**

**SCHEDULE 11**

**INTEGRATED MANAGEMENT SYSTEM REQUIREMENTS**

**[REDACTED]**

**SCHEDULE 12  
WORKS SCHEDULING REQUIREMENTS**

**[REDACTED]**

**SCHEDULE 13**

**PROJECT CO PROPOSAL EXTRACTS**

**[REDACTED]**

## SCHEDULE 14

### TESTING AND COMMISSIONING

#### 1.1 Applicable Standards

- (a) Project Co shall plan, schedule, coordinate and execute the testing and commissioning of the Works. The testing and commissioning of the Works shall be in accordance with the Project Agreement and the standards set out in this Schedule 14.
- (b) Project Co Testing and Commissioning includes required work for LEED Certification at the New Walkley Yard. Project Co shall be responsible for achieving all testing and commissioning prerequisites and credits to achieve the LEED Certification of the New Walkley Yard administration building and maintenance building.
- (c) Project Co Testing and Commissioning includes all New Municipal Infrastructure and New Utility Infrastructure in accordance with the Project Agreement. Without limiting the foregoing or any other provision of the Project Agreement, Project Co shall also comply with:
  - (i) all requirements in Appendix A of this Schedule 14 – Testing and Commissioning in respect of, among other things, testing and commissioning of New Municipal Infrastructure; and
  - (ii) all requirements in Appendix B of this Schedule 14 – Testing and Commissioning in respect of, among other things, testing and commissioning of New Utility Infrastructure.
- (d) Project Co shall comply with Good Industry Practice for all Project Co Testing and Commissioning activities. Project Co shall provide all of the documentation to the City in accordance with the requirements of Schedule 10 – Review Procedure.

#### 1.2 Project Co Testing and Commissioning Coordinator

- (a) Project Co shall appoint a testing and commissioning coordinator (the “**Project Co Testing and Commissioning Coordinator**”) to perform the testing and commissioning obligations of Project Co. The Testing and Commissioning Coordinator shall have the qualifications as set out in Schedule 9 – Key Individuals.

#### 1.3 Project Co Testing and Commissioning Parameters

- (a) Project Co shall be responsible for preparing and executing a testing and commissioning plan/strategy required to successfully demonstrate the performance of the System Infrastructure in accordance with the Project Agreement (the “**Testing and Commissioning Plan**”). The scope of the Testing and Commissioning Plan will include all aspects of factory and site testing, static testing, systems integration testing and Trial

Running of the System Infrastructure as a fully integrated system to demonstrate the functional capability and safety of the System Infrastructure.

- (b) The Testing and Commissioning Plan shall include, but not be limited to, the following:
  - (i) Relationship to safety and security management and other related System safety and security requirements;
  - (ii) Resumes of key personnel involved detailing years of experience;
  - (iii) Organization chart of the testing and commissioning team and their discipline responsibilities;
  - (iv) Planned resources;
  - (v) Specific requirements for the City interfaces;
  - (vi) Specific requirements for other third party interfaces;
  - (vii) Testing regime and test documentation procedures; and
  - (viii) Testing and Commissioning Schedule.
- (c) The Testing and Commissioning Plan shall demonstrate how Project Co intends to validate and verify that the functional and technical requirements, Trial Running, performance criteria, Maintenance and Rehabilitation Requirements, quality and safety aspects of the Expanded Trillium Line have been met or exceeded to allow the City to operate and Project Co to maintain the Expanded Trillium Line.
- (d) The Testing and Commissioning Plan shall be developed and modified as required to address the evolution of the Project.
- (e) Project Co is solely responsible for all checking and verification activities relating to individual components, sub-systems, Vehicles, communication and train control systems, all associated equipment and facilities required prior to the formal testing and commissioning and acceptance testing programs necessary to demonstrate the fully integrated operation of the System Infrastructure to the satisfaction of Independent Certifier. Project Co is responsible for providing all test procedures and test reports for all subsystems including FAI, FAT, SAT, SIT, and System Integration testing. The City shall be responsible for the checking and verification activities relating to the communication system components, subsystems and equipment installed by the City at the TOCC and BCC.
- (f) Project Co shall prepare and formally submit the PFD Testing and Commissioning Plan within six months of Financial Close in accordance with Schedule 12 – Works Scheduling Requirements. The Testing and Commissioning Plan shall be subject to review and acceptance by the City, in accordance with Schedule 10 - Review Procedure.

The Testing and Commissioning Plan shall undergo review and modification as the project progresses as agreed by the City and Project Co. The IFC Testing and Commissioning Plan shall be submitted no less than 300 days prior to testing

- (g) The Testing and Commissioning Plan shall permit the oversight and monitoring of Project Co Testing and Commissioning activities for the duration of the Project.
- (h) With the exception of the testing and commissioning of communication system components, subsystems and equipment installed by the City at the TOCC and BCC and the obligation to supply operators and controllers for Project Co Testing and Commissioning activities, the City accepts no responsibility for Project Co Testing and Commissioning of other System Infrastructure. Each sub-system of the System Infrastructure shall be, wherever possible, thoroughly tested and commissioned as standalone subsystems operating in simulated worst case environments prior to being placed into service. This shall be demonstrated at FAI, FAT or SAT, whichever is applicable.
- (i) [Intentionally Deleted].
- (j) In addition to the Commissioning Tests specified in Schedule 15-2, the City (and its representatives) shall have the right, when acting reasonably, to identify specific Commissioning testing requirements that will require validation.
- (k) Project Co shall prepare individual Commissioning Test plans for each Commissioning Test, and provide advance notice to the City 60 days prior to such testing in accordance with Schedule 12 – Works Scheduling Requirements. Individual test plans shall be subject to review and acceptance by the City, in accordance with Schedule 10 - Review Procedure.
- (l) The Project Co Testing and Commissioning Coordinator shall convene a meeting of the Testing and Commissioning Team to review the Project Co Testing and Commissioning Plan, set testing and commissioning parameters, designate the responsibilities of the various parties and establish the documentation requirements for each stage of the Works and the Project Co Testing and Commissioning.
- (m) Project Co shall create a schedule of testing and commissioning activities (the “**Testing and Commissioning Schedule**”) and shall incorporate the Testing and Commissioning Schedule into the Works Schedule.
- (n) The Project Co Testing and Commissioning Coordinator shall submit monthly reports to the City in regards to progress of Project Co Testing and Commissioning.
- (o) Project Co is responsible for the supply, installation, start-up, testing, adjustment and cleaning of each item of the System Infrastructure provided as part of the Works with the exception of the communication system components, subsystems and equipment installed by the City at the TOCC and BCC, at Bayview Confederation Line station, and along the

- Confederation Line alignment. Where applicable, Project Co Testing and Commissioning shall be completed in accordance with the equipment vendor's guidance.
- (p) Project Co, in implementing the Project Co Testing and Commissioning Plan, shall verify that:
- (i) the System Infrastructure installed by Project Co has been installed and is operating in accordance with the requirements of this Project Agreement;
  - (ii) the Existing Trillium Line Assets have been rehabilitated, maintained and are operating, each in accordance with the requirements of this Project Agreement;
  - (iii) the System Infrastructure performance meets or exceeds the requirements of the Output Specifications and this Project Agreement;
  - (iv) training has been provided and meets or exceeds the requirements of this Project Agreement;
  - (v) Record Drawings and operating and maintenance manuals have been provided in accordance with this Project Agreement;
  - (vi) LEED testing and commissioning documentation required for achieving the LEED Certification has been prepared and copied to the City;
  - (vii) LEED testing and commissioning documentation for achieving the LEED Certification has been submitted per the requirements of LEED;
  - (viii) New Municipal Infrastructure meets or exceeds the requirements of the Project Agreement;
  - (ix) New Utility Infrastructure meets or exceeds the requirements of the Project Agreement; and
  - (x) Maintenance & Rehabilitation Compliance Verification & Validation Matrix has been completed pursuant to Schedule 10 – Review Procedure, Part “B”.
- (q) Project Co shall provide System Infrastructure orientation to the Ottawa Emergency Services, including; the Fire Departments, Paramedics, and Police pursuant to Schedule 15-2, Part 1, Article 26.
- (r) The City shall appoint an arm's length independent third party expert (the “**Systems Integration Verifier**”) to:
- (i) provide a fast track dispute process for Project Co and any City Party as it related to the integration and function of the communications systems as outlined in Schedule 26 – Dispute Resolution Procedure; and

- (ii) during the installation, testing, and commissioning phases, review and comment for compliance and clarity on all Submittals related to communications and Train Control System and will be provided upon request any documents that pertain to:
  - (A) integration, testing and commissioning plans, (B) traceability documents, and
  - (C) test and commissioning procedures.

#### **1.4 Testing and Commissioning Team**

- (a) The **Testing and Commissioning Team** shall be comprised of:
  - (i) a representative of Project Co including, where applicable, subcontractors;
  - (ii) a representative of the City;
  - (iii) the Project Co Testing and Commissioning Coordinator;
  - (iv) the Independent Certifier; and
  - (v) where applicable, representatives of the relevant Vehicle manufacturers and equipment manufacturers.
- (b) Project Co and each of its Subcontractors shall assign, where applicable, individuals from each relevant trade to the Testing and Commissioning Team and shall ensure that representatives of the relevant equipment manufacturers and testing agencies are present during the relevant Project Co Testing and Commissioning meetings.
- (c) Project Co shall provide all necessary labour, materials, equipment, testing apparatus and incidentals necessary to completely start-up, verify, performance test and commission each item of the System Infrastructure provided as part of the Works.
- (d) After Financial Close, the Project Co Testing and Commissioning Coordinator shall establish a schedule for regular meetings of the Testing and Commissioning Team to review the progress of the Project Co Testing and Commissioning.

#### **1.5 Project Co Testing and Commissioning Procedures**

- (a) Project Co shall ensure that all regulation and code references in the Reference Documents, in addition to the provisions of Part 1 of Schedule 15-2 – Design and Construction, have been fully complied with.
- (b) Project Co and the Project Co Testing and Commissioning Coordinator shall plan, prepare documentation and execute the Project Co Testing and Commissioning Plan, process and procedures.
- (c) Project Co shall ensure that each of the requirements set out in this Schedule 14 and those identified in Schedule 15 – Output Specifications are completed.

(d) Training:

- (i) Project Co shall provide a training schedule and agenda for each training session to the City for acceptance in accordance with Schedule 10 - Review Procedure and Schedule 12 – Works Scheduling Requirements. Operational and maintenance training shall be provided for all System Infrastructure. Operations and maintenance training manuals shall be submitted in accordance with Schedule 10 - Review Procedure and Schedule 12 – Works Scheduling Requirements. A complete listing of all training programs that Project Co is responsible for is located in Schedule 15-2, Part 1, Article 12.
- (ii) The Project Co Testing and Commissioning Coordinator or designated delegate shall attend a sample of every training session to ensure the agenda is maintained and that quality training is provided. One training session for each category shall be video recorded in digital format. The video shall be submitted to the City and labelled accordingly.
- (iii) Project Co's design consultants shall provide an overview of the System Infrastructure, including an explanation as to why the solutions and equipment were selected, identification of the design intent and discussion of the operating procedures required to maintain the design intent. These sessions shall be video recorded in digital format.
- (iv) Training sessions for equipment shall be conducted at the location of the equipment or such Project Co supplied equipment.
- (v) A portion of the training sessions for the System Infrastructure shall be conducted at the operating stations (workstations).
- (vi) All training sessions shall be logged and personnel shall be recorded as receiving training. Further refreshers shall be scheduled in line with safety, quality and training requirements.

(e) Trial Running:

- (i) Trial Running Objectives
  - (A) Project Co shall conduct Trial Running when:
    - (I) the integrated System Infrastructure has been tested;
    - (II) the complete fleet is fully tested and ready for passenger service;
    - (III) the complete signalling and train control system and associated TOCC equipment is fully tested and ready for passenger service;

- (IV) there are no outstanding defects (major or minor) affecting rail systems functionality, including track, signals and communications;
  - (V) there are no major defects, safety defects, or incomplete vehicle modification programs;
  - (VI) all Stations are substantially complete with only Minor Deficiencies remaining;
  - (VII) Project Co is fully mobilized and ready to commence maintenance services in accordance with Schedule 15-3 – Maintenance and Rehabilitation Requirements, including availability of required maintenance staff, parts, maintenance equipment, CMMS, and completion of training;
  - (VIII) Project Co has submitted the Maintenance & Rehabilitation Compliance Verification & Validation Matrix pursuant to Schedule 10 – Review Procedure, Part “B”; and
  - (IX) the City is fully mobilized, trained and ready to operate the System.
- (B) Trial Running will be the final step in confirming Readiness for Revenue Service.
- (C) The fundamental objective of Trial Running is to exercise the complete integrated System Infrastructure, including all subsystems, operating personnel and operating procedures, to confirm Readiness for Revenue Service. This can be subdivided into the following key objectives:
- (I) to validate the performance of the System Infrastructure with operating and maintenance staff who are trained on the operation of the System Infrastructure and Standard Operating Procedures;
  - (II) to exercise and validate the operating schedules and operational performance requirements; and
  - (III) to exercise and confirm the operating reliability of the subsystems simulated under various operating conditions (normal and emergency). The basic design requirements and safety and security requirements will have been verified through the testing and commissioning phase prior to this stage of Trial Running.
- (ii) Performance Criteria for Trial Running Acceptance

- (A) Project Co shall conduct the Trial Running for final acceptance which will be conducted for a period of 21 consecutive days following successful completion of the Commissioning Tests and verification by Project Co that there are no deficiencies to prevent safe running of the System Infrastructure, verification that they have an adequate number of trained staff and resources to maintain the System Infrastructure and verification from the City that they have an adequate number of trained staff available to support Trial Running operating requirements. When all of the requirements in this Schedule 14 have been satisfactorily completed and are in place, the System Infrastructure will be ready for Revenue Service (**“Readiness for Revenue Service”**).
- (B) Trial Running shall be reviewed on a day to day basis by the Testing and Commissioning Team.
- (C) Project Co shall communicate with the City Representative to review daily performance, resolve service availability and delay issues and coordinate all Maintenance and Rehabilitation Services on the System that could potentially affect System operation, public safety or concerns and all other related issues.
- (D) Trial Running shall operate a full regular scheduled service on the full line for a 14 day period. Passengers will not be carried. Additional tests during the 21 day period referred to in (A) above shall include a variety of failure management scenarios that could reasonably be expected to occur in regular Revenue Service. The City shall have the opportunity to review and approve the failure management scenarios that will be tested during Trial Running.
- (E) Project Co shall achieve the Service Reliability Standard outlined in Schedule 15-2, Part 1, Article 3.5 wherein the 98.5% on-time performance must be achieved over a 14-day period within the 21 day Trial Running period.
- (F) Project Co shall use the Trial Running period to collect operating data and evaluate system reliability, availability, and maintainability performance and to demonstrate that the process to collect, evaluate, and validate the operating data has been properly established. Using prescribed procedures, data on service deviations will be collected and assigned against the Vehicles and specific subsystems down to the Line Replaceable Unit (LRU) level. The database shall provide verification of system reliability to the LRU level. If the cumulative failure of any LRU exceeds 10% of the total LRU population, up to and including the completion of Trial Running, Project Co shall redesign and replace the defective LRU's.

- (G) Project Co shall demonstrate that the integrated System (vehicles, stations, and infrastructure) perform reliably through the Trial Running period such that the Performance Criteria for Trial Running are achieved and that would otherwise lead to zero performance deductions during the Maintenance Period.
- (H) Validation of the Trial Running acceptance shall be performed by the Independent Certifier.
- (I) The Trial Running of the System Infrastructure will demonstrate to the satisfaction of the Independent Certifier that the specified travel times, headways and operational performance requirements can be achieved.

#### **1.6 Project Co Testing and Commissioning Submittals**

- (a) Project Co shall prepare a design brief describing the System Infrastructure design and performance requirements, including the requirements of the Output Specifications prior to beginning the construction process.
- (b) Project Co shall prepare and submit to the City the Testing and Commissioning Plan identified in this Schedule 14 in accordance with Schedule 10 - Review Procedure and Schedule 12 – Works Scheduling Requirements.
- (c) Project Co shall prepare and submit to the City test forms, verification forms and performance test forms for all equipment, communication systems and train control systems. Test procedures should include but not be limited to the following:
  - (i) Test objectives;
  - (ii) Required Safety methods and prerequisite training required;
  - (iii) Associated tests and pass/fail criteria;
  - (iv) Reference specifications /standards and supporting literature;
  - (v) Staffing required, including requirements from the City;
  - (vi) Test methods;
  - (vii) Test equipment, jigs and supporting systems required;
  - (viii) Test schedule;
  - (ix) Test location;
  - (x) Identification of professional personnel and resumes of those responsible for sign-off;

- (xi) Certified test reports including test results and recommendations; and
- (xii) Compliance matrix to detail contract requirements being tested.
- (d) Project Co shall prepare and submit to the City the performance testing and commissioning progress management forms and the commissioning summary forms to be used for monthly reporting.
- (e) Project Co shall prepare and submit to the City a Testing and Commissioning Schedule of each item of the System Infrastructure, New Municipal Infrastructure and New Utility Infrastructure provided as part of the Works.
- (f) Project Co shall prepare and submit to the City detailed testing and commissioning manuals for each item of the System Infrastructure, New Municipal Infrastructure and New Utility Infrastructure provided as part of the Works (the “**Testing and Commissioning Manuals**”) in accordance with Schedule 10 - Review Procedure and Schedule 12 – Works Scheduling Requirements.
- (g) All Testing and Commissioning Manuals shall include:
  - (i) name and logo as directed by the City;
  - (ii) name of the Project;
  - (iii) project number;
  - (iv) identification of each item of the System Infrastructure tested and commissioned;
  - (v) the date each item of the System Infrastructure was tested and commissioned;
  - (vi) the signature of the Project Co Testing and Commissioning Coordinator;
  - (vii) issue and date;
  - (viii) document version control; and
  - (ix) document amendments table.
- (h) All Testing and Commissioning Manuals shall include:
  - (i) test reports;
  - (ii) configuration control records;
  - (iii) equipment check sheets (start-up, verification and performance) for each item of the System Infrastructure provided as part of the Works; and

- (iv) interim and final acceptance check sheets for each item of the System Infrastructure provided as part of the Works.
- (i) Project Co shall prepare and submit O&M manuals in accordance with Schedule 10 – Review Procedure and Schedule 12 – Works Scheduling Requirements.
- (j) Project Co shall prepare and submit a re-commissioning manual in accordance with the requirements of Schedule 10 – Review Procedure.
- (k) Project Co shall prepare and submit configuration control records in accordance with the requirements of Schedule 10 – Review Procedure and Schedule 12 – Works Scheduling Requirements.

**1.7 Coordination with the City, Systems Integration Verifier and the Independent Certifier**

- (a) The Project Co Testing and Commissioning Coordinator shall co-ordinate with the City, Systems Integration Verifier, CNR, Via Rail, the NRC and the Airport Authority, as applicable, and the Independent Certifier, throughout the Project Co Testing and Commissioning process.
- (b) This co-ordination shall include:
  - (i) review of test, verification and performance test forms;
  - (ii) review of testing and commissioning progress management forms and performance testing;
  - (iii) review of the Testing and Commissioning Plan;
  - (iv) review of the Testing and Commissioning Schedule;
  - (v) sample witnessing of tests and performance testing;
  - (vi) review of the training curriculum and materials as outlined in Part 1 Article 12 of Schedule 15-2 and scheduling;
  - (vii) review of the O&M manuals;
  - (viii) sample witnessing of seasonal performance testing;
  - (ix) review of the testing and commissioning reports;
  - (x) attend Testing and Commissioning Team meetings; and
  - (xi) report to the City and third parties as applicable regarding the progress of testing and commissioning.

**1.8 Systems and Vehicles to be Commissioned**

- (a) The Project Co Testing and Commissioning shall include the testing and commissioning of all Systems and Vehicle items of the System Infrastructure provided as part of the Works including, but not limited to, the following:
  - (i) Revenue Vehicles;
  - (ii) Maintenance Vehicles;
  - (iii) Signalling and Train Control System;
  - (iv) Communications System up to the demarcation point at Bayview Station; and
  - (v) Tracks.

**1.9 Guideway and Building Systems to be Commissioned**

- (a) The Project Co Testing and Commissioning shall include the testing and commissioning of all Guideway and building system items of the System Infrastructure provided as part of the Works including, but not limited to, the following:
  - (i) SCADA system (field devices and equipment);
  - (ii) Maintenance equipment systems;
  - (iii) Building envelope;
  - (iv) Elevators;
  - (v) Fire protection systems;
  - (vi) TVS
  - (vii) Plumbing systems;
  - (viii) HVAC systems;
  - (ix) Building automation systems;
  - (x) Electrical systems;
  - (xi) Security and safety systems;
  - (xii) Communications System up to the demarcation point at Bayview Station;
  - (xiii) CCTV;

- (xiv) Interfaces with OLRT and BRT stations and systems;
  - (xv) Passenger information systems; and
  - (xvi) Intrusion detection systems.
- (b) For further certainty, the City will be responsible for communication system, subsystems and equipment testing and commissioning activities relating to the headend equipment at the TOCC and BCC. Project Co shall be responsible for coordinating this work, and reflecting it in the SIMP and the overall Testing and Commissioning Plan.

**1.10 Civil Engineering Elements Inspection and Testing**

- (a) Project Co Testing and Commissioning shall include inspection and testing of the civil engineering elements of System Infrastructure, New Municipal Infrastructure, and New Utility Infrastructure for purposes of establishing readiness for intended use, including the following:
- (i) Structures;
  - (ii) Underground Structures;
  - (iii) Guideway structures and foundations;
  - (iv) Facility structures, foundations, architectural elements and finishes;
  - (v) roadways and roadway related infrastructure;
  - (vi) landscaping and urban design elements; and
  - (vii) wayfinding, signage and visual displays.

## APPENDIX A

### NEW MUNICIPAL INFRASTRUCTURE

For clarity, the obligations of Project Co in this Appendix A are in addition to and not in substitution of any other requirements for Project Co Testing and Commissioning of the Works and/or any other requirements in respect of New Municipal Infrastructure contained in the Project Agreement or this Schedule 14, including, for clarity, the process and requirements set out in Section 25.13 of the Project Agreement. The obligations in this Appendix A are in respect of New Municipal Infrastructure only.

#### 1. DEFINITIONS

1.1 The following terms shall have the following meanings for purposes of this Appendix A:

- (a) **“Operations Data and Maintenance Manuals”** means the operations data and maintenance manuals Project Co is required to deliver pursuant to Section 2.3 of Attachment 1 of this Appendix A.
- (b) **“Special Infrastructure”** means, for purposes of this Appendix A, the assets described in the Ontario Water Wellness Report under the headings of “Underground Storage Tanks/Superpipes”, “Oil Grit Separators” and “Wet or Dry Pond or Other Stormwater Management Facilities”.
- (c) **“Witness and Hold Points”** has the meaning given in Schedule 11 – Integrated Management System Requirements.

#### 2. INSPECTION, TESTING, COMMISSIONING, AND HANDOVER

##### 2.1 Interim Inspection of New Municipal Infrastructure

- (a) Project Co shall comply with all requirements set out in this Schedule 14- Testing and Commissioning (including, for clarity, this Appendix A) as well as all requirements set out in Section 25.13 of the Project Agreement in connection with interim inspections of New Municipal Infrastructure.
- (b) Project Co shall notify the City of achievement of all milestones set out in the Inspection and Test Plan in respect of New Municipal Infrastructure as well as all Witness and Hold Points in respect of New Municipal Infrastructure.

##### 2.2 Final Inspection of New Municipal Infrastructure

- (a) Project Co shall comply with all requirements set out in this Schedule 14 – Testing and Commissioning (including, for clarity, this Appendix A) as well as all requirements set out in Section 25.13 of the Project Agreement in connection with final inspections of New Municipal Infrastructure.
- (b) Prior to final inspection of New Municipal Infrastructure, Project Co shall, in addition to all other requirements set out in Section 25.13 of the Project Agreement:
  - (i) remove all Temporary Works no longer required from the site subject to final inspection, including but not limited to fencing, sign board, samples, and any other items

not considered to be part of System Infrastructure or New Municipal Infrastructure, except for those items required for ongoing Works; and

- (ii) clean all New Municipal Infrastructure prior to Handover following final inspection of such New Municipal Infrastructure including:
  - (A) sweeping/spraying of roads, boulevards and sidewalks;
  - (B) flushing of sewers; and
  - (C) cleaning out of catch basins, maintenance holes, and valve chambers,all taking into account ongoing Works.
- (c) Prior to final inspection of New Municipal Infrastructure, Project Co shall, in addition to all other requirements set out in Section 25.13 of the Project Agreement, prepare a record of the following, and submit it to the City for review in accordance with Schedule 10 – Review Procedure at least 20 Business Days before the final inspection:
  - (i) a list of any required Operations Data and Maintenance Manuals, as required for New Municipal Infrastructure that is Special Infrastructure and highways, as set forth in Attachment 1 of this Appendix A.

### **2.3 Pre-Conditions to Handover of New Municipal Infrastructure**

In addition to any other requirements in the Project Agreement, Project Co shall satisfy the requirements of this Appendix A, including, for clarity, those set out in Attachment 1 of this Appendix A, prior to, and as a condition of, Handover of New Municipal Infrastructure.

**ATTACHMENT 1**

**NEW MUNICIPAL INFRASTRUCTURE**

**3. REQUIREMENTS FOR TESTING, COMMISSIONING, HANDOVER, AND ACCEPTANCE**

**3.1 Applicable to all New Municipal Infrastructure**

- (a) Project Co shall, prior to and as a pre-condition of achievement of Handover of New Municipal Infrastructure, submit the following to the City in accordance with Section 2.1 of this Attachment 1 for review in accordance with Schedule 10 – Review Procedure:
  - (i) certification of the New Municipal Infrastructure in accordance with Section 3 of this Attachment 1; and
  - (ii) Final Record Drawings in accordance with Sections 2.1 and 2.2 of this Attachment 1, unless final Record Drawings are not reasonably available at the time of Project Co Testing and Commissioning of the New Municipal Infrastructure, in which case Project Co shall:
    - (A) provide red-lined as-built drawings within ten Business Days after final inspection of the New Municipal Infrastructure; and
    - (B) provide final Record Drawings in accordance with Sections 2.1 and 2.2 of this Attachment 1 within three (3) months of Handover of such New Municipal Infrastructure.

**3.2 Applicable to Sanitary, Storm and Combined Sewers**

- (a) For New Municipal Infrastructure comprised of sanitary sewers, storm sewers, and combined sewers, and for maintenance holes and catchbasins in addition to the documents and other items required to be delivered and/or performed by Project Co pursuant to Section 1.1 of this Attachment 1 and other documents, actions or deliverables otherwise required to be delivered or performed pursuant to the Project Agreement, Project Co shall, prior to and as a pre-condition of Handover of such New Municipal Infrastructure, complete and perform the following:
  - (i) complete all tasks listed under the headings ‘Sanitary, Storm and Combined Sewers’, ‘Maintenance Hole’, and ‘Catchbasins’ in the Ontario Water Wellness Report in accordance with the Project Agreement (if a Notice of Delegation has been issued under the Project Agreement in respect of such New Municipal Infrastructure); and
  - (ii) Project Co shall submit the following to the City in accordance with Section 2.1 of this Attachment 1, for review in accordance with Schedule 10 – Review Procedure:
    - (A) a copy of the Ontario Water Wellness Report prepared, stamped, signed and dated by a professional engineer licensed in the Province of Ontario for all applicable items under the headings ‘Sanitary, Storm and Combined Sewers’, ‘Maintenance Hole’, and ‘Catchbasins’ in the Ontario Water Wellness Report;

- (B) material testing results;
- (C) performance test results;
- (D) manufacturer's manuals and instructions;
- (E) compaction testing results for backfilling and paving;
- (F) video report and detailed written report and electronic files containing chainage-specific defect codes from a CCTV inspection. Where deficiencies have been identified by the CCTV inspection, The City shall arrange for additional examinations as required to demonstrate that all deficiencies have been rectified in accordance with the Project Agreement (if a Notice of Delegation has been issued under the Project Agreement in respect of such New Municipal Infrastructure);
- (G) design documents, including design sheets, reports, and technical studies; and
- (H) service connection cards prepared on the standard form supplied by the City.

### **3.3 Applicable to Watermains**

- (a) For New Municipal Infrastructure comprised of watermains, in addition to the documents and other items required to be delivered and/or performed by Project Co pursuant to Section 3.1 of this Attachment 1 and other documents, actions or deliverables otherwise required to be delivered or performed pursuant to the Project Agreement, Project Co shall, prior to and as a pre-condition of Handover of such New Municipal Infrastructure, complete and perform the following:
  - (i) complete all tasks listed under the headings 'Watermain', 'Fire Hydrants', 'Tracer Wires', and 'Water Service Connections' in the Ontario Water Wellness Report in accordance with the Project Agreement (if a Notice of Delegation has been issued under the Project Agreement in respect of such New Municipal Infrastructure); and
  - (ii) submit the following to the City in accordance with Section 2.1 of this Attachment 1, for review in accordance with Schedule 10 – Review Procedure:
    - (A) a copy of the Ontario Water Wellness Report prepared, stamped, signed and dated by a professional engineer licensed in the Province of Ontario for all applicable items under the headings 'Watermain', 'Fire Hydrants', 'Tracer Wires', and 'Water Service Connections';
    - (B) material testing results;
    - (C) performance test results;
    - (D) manufacturer's manuals and instructions;
    - (E) compaction testing results for backfilling and paving;

- (F) documentation related to the applicable hydrostatic pressure testing, disinfection/chlorination and bacteriological test results, and tracer-wire reports;
- (G) design documents, including design reports, and technical studies; and
- (H) service connection cards prepared on the standard form supplied by the City

### **3.4 Applicable to Special Infrastructure**

- (a) For New Municipal Infrastructure comprised of Special Infrastructure, in addition to the documents and other items required to be delivered and/or performed by Project Co pursuant to Section 3.1 of this Attachment 1 and other documents, actions or deliverables otherwise required to be delivered or performed pursuant to the Project Agreement, Project Co shall, prior to and as a pre-condition of Handover of such New Municipal Infrastructure, complete and perform the following:
  - (i) complete all tasks listed under the headings ‘Underground Storage Tanks/Superpipes’, ‘Oil Grit Separators’, and ‘Wet or Dry Pond or Other Stormwater Management Facilities’ in the Ontario Water Wellness Report in accordance with the Project Agreement (if a Notice of Delegation has been issued under the Project Agreement in respect of such New Municipal Infrastructure);
  - (ii) submit the following to the City in accordance with Section 2.1 of this Attachment 1, for review in accordance with Schedule 10 – Review Procedure:
    - (A) a copy of the Ontario Water Wellness Report prepared, stamped, signed and dated by a professional engineer licensed in the Province of Ontario for all applicable items under the headings ‘Underground Storage Tanks/Superpipes’, ‘Oil Grit Separators’, and ‘Wet or Dry Pond or Other Stormwater Management Facilities’;
    - (B) material testing results;
    - (C) performance test results;
    - (D) manufacturer's manuals and instructions;
    - (E) compaction testing results for backfilling and paving;
    - (F) video report and detailed written report and electronic files containing chainage-specific defect codes from a CCTV inspection. Where deficiencies have been identified by the CCTV inspection, Project Co shall arrange for additional examinations as reasonably required to demonstrate that all deficiencies have been rectified in accordance with the terms of the Project Agreement;
    - (G) design documents, including design sheets, reports, and technical studies; and
    - (H) Operations Data and Maintenance Manuals in accordance with the requirements set out in Section 2.3 of this Attachment 1.

- (iii) Project Co shall have provided system demonstration and training to the City for all Special Infrastructure, which training shall include hands-on instruction of City personnel in the operation, adjustment and maintenance of the Special Infrastructure. At the time of the instruction, Project Co shall provide an operations and maintenance manual (in form and content to satisfy the requirements of Section 2.3 of this Attachment 1), which shall be used by Project Co to assist in the instructions; and
- (iv) Project Co shall complete all other requirements for testing, commissioning and acceptance that are conditions to approvals and permits obtained for Special Infrastructure.

### **3.5 Applicable to Highways**

- (a) For New Municipal Infrastructure comprised of highways as defined in the City of Ontario Act, 2006, in addition to the documents and other items required to be delivered and/or performed by Project Co pursuant to Section 3.1 of this Attachment 1 and other documents, actions or deliverables otherwise required to be delivered or performed pursuant to the Project Agreement, Project Co shall, prior to and as a pre-condition of Handover of such New Municipal Infrastructure, complete and perform, as applicable, the following:
  - (i) rectify and repair of all damages, settlements and depressions to the above ground road subgrade;
  - (ii) submit the following to the City in accordance with Section 2.1 of this Attachment 1, for review in accordance with Schedule 10 – Review Procedure:
    - (A) Electrical Safety Authority (ESA) certificate for any traffic signal plant including red light cameras; and
    - (B) inspection and testing reports for all traffic plant including traffic control signals, Red Light Cameras, and arterial cameras; and
  - (iii) For any special equipment associated with traffic management, Project Co shall provide:
    - (A) system demonstration and training to the City for all highways, which training shall include hands-on instruction of City personnel in the operation, adjustment and maintenance of the highways. At the time of the instruction, Project Co shall also provide an operations and maintenance manual (in form and content to satisfy the requirements of Section 2.3 of this Attachment 1), which shall be used by Project Co to assist in the instructions; and
    - (B) an Operations Data and Maintenance Manual, in form and content shall satisfy the requirements in Section 4.3 of this Attachment 1.

### **3.6 Applicable to Street Trees**

- (a) For New Municipal Infrastructure comprised of street trees, in addition to the documents and other items required to be delivered and/or performed by Project Co pursuant to Section 3.1 of this Attachment 1 and other documents, actions or deliverables otherwise required to be delivered or performed pursuant to the Project Agreement, Project Co shall, prior to and as a pre-condition

of Handover of such New Municipal Infrastructure, submit the following in accordance with Section 2.1 of this Attachment 1:

- (i) A full list of trees planted by Project Co on public lands, including on City Road Allowance.

#### **4. DOCUMENTATION**

##### **4.1 Submittals**

- (a) Project Co shall submit to the City all documentation (including drawings) required to be delivered under this Attachment 1 as follows:
  - (i) to the City for review in accordance with Schedule 10 – Review Procedure; and
  - (ii) in the following formats and quantities in respect of all Record Drawings required to be delivered to the City pursuant to this Attachment 1.
    - (A) for Record Drawings, four CDs/DVDs, one (1) full size hard copy set, and one (1) reduced size hard copy set unless specified otherwise by the City;
    - (B) for Special Infrastructure, five (5) CDs/DVDs and two (2) hard copy sets, unless specified otherwise by the City; and
    - (C) for all other documents (other than documents referenced in (A) and (B), four CDs/DVDs and one (1) hard copy set, unless otherwise specified by The City; and
    - (D) each of the foregoing shall be in PDF format generated from the source electronic document and not scanned from hard copies.

##### **4.2 Record Drawings**

- (i) Project Co shall provide Record Drawings for the New Municipal Infrastructure in compliance with the City Standards, or such other standards as are agreed to by Project Co and The City.
- (ii) Project Co shall provide Record Drawings for New Municipal Infrastructure for review in accordance with Schedule 10 – Review Procedure, as follows:
  - (A) Record Drawings shall be in Microstation and PDF format showing the final plan and profile locations of the New Municipal Infrastructure, including service connections;
  - (B) Only the plan and profile drawings shall be updated and submitted as the Record Drawings;
  - (C) Profile drawings shall not be required if profile drawings are not required by the City during the approval and permitting stage; and

- (D) Record Drawings shall accurately record deviations from the original drawings accepted by the City, including changes caused by site conditions.

#### **4.3 Operations Data and Maintenance Manuals**

- (a) In respect of New Municipal Infrastructure that is Special Infrastructure or Highways, as contemplated in Sections 3.4 and 3.5 of this Attachment 1, Project Co shall prepare operations data and maintenance manuals for the City in accordance with the following requirements:
  - (i) Vinyl, hard covered, three ring, loose leaf binder for 215 mm X 280 mm sized paper;
  - (ii) Title sheet, labelled 'Operations Data and Maintenance Manual', project name, date, and list of contents;
  - (iii) Contents organized in the respective sections of work with each section marked by labelled tabs protected with celluloid covers fastened to hard paper dividing sheets. The electronic copy shall be bookmarked with the list of contents hyperlinked;
  - (iv) Details of operation and maintenance instructions for equipment and systems, including a complete list of equipment and part lists consisting of make, size, capacity, and serial number;
  - (v) Names, addresses, and phone numbers of subcontractors and suppliers;
  - (vi) Warranties showing the 'Title' of the Project, guarantee periods reflecting the start date, a clear indication on parts and parcels that are covered under guarantee, and due authorization of competent signatories; and
  - (vii) Any additional materials used in the applicable New Municipal Infrastructure showing names of manufacturers and source supplies including manufacturers' literature.
- (b) All PDF documents included within all Operations Data and Maintenance Manuals shall be generated from the source electronic document and not scanned from hard copies

#### **5. CERTIFICATION**

- (a) Prior to achievement of Handover of New Municipal Infrastructure, and as a pre-condition of Handover, Project Co shall submit to the City (if a Notice of Delegation has been issued in respect of the New Municipal Infrastructure) written certification of the New Municipal Infrastructure in the form attached as Attachment 2 of this Appendix A. Each certificate shall be stamped, signed and dated by professionals licensed in the Province of Ontario qualified to certify the specific type of work and equipment being certified.

ATTACHMENT 2

FORM OF NEW MUNICIPAL INFRASTRUCTURE CERTIFICATION

Certificate Reference Number [...]  
(insert reference number)

CERTIFICATE OF MUNICIPAL INFRASTRUCTURE

**A. General**

- 1 This certificate is in respect of:
  - (a) [...] (insert details of the New Municipal Infrastructure to be certified) (the “Certificate”); and
  - (b) the Project Agreement between The City and Project Co dated [...] (insert date of Project Agreement) (the “Project Agreement”) relating to the Project.
2. Defined terms and expressions used in the Project Agreement have the same meanings in this Certificate.
3. This Certificate is used by Project Co for certifying, as applicable:
  - (a) the substantial completion of construction activities in respect of those components of the Works set out in paragraph A1 of this Construction Certificate; or
  - (b) the total completion of construction activities in respect of any Reinstatement Work carried out by the Construction Contractor pursuant to Section 30 of the Project Agreement in accordance with a Reinstatement Plan,in accordance with the Project Agreement, City Standards, the designs and plans submitted by Project Co and accepted by the City, other standards that have been agreed to in writing by the City and Project Co, and good engineering practices.

**B. Construction Contractor’s Statement**

1. We certify that the components of the Works set out in paragraph A1 of this Construction Certificate have been designed, constructed, **[substantially completed as set out in paragraph A2(a)], [totally completed as set out in paragraph A2(b)]**, commissioned and tested in all respects in accordance with: *(Inapplicable language to be deleted)*
  - (a) the relevant Design Data, Design Certificates, and Construction Certificates pursuant to Schedule 10 of the Project Agreement in each case to which there has been no objection under the Review Procedure;
  - (b) the provisions of the Project Agreement, including all applicable Output Specifications, as amended by the following Variation(s):
    - (i) [...] (List, if any, the change(s) made by the issue of any Variation(s)); and
  - (c) the requirements of City Standards, the designs and plans submitted by Project Co and accepted by the City, other standards that have been agreed to in writing by the City and Project Co, and good engineering practices.

Signed..... (Construction Contractor's representative)

Name.....

Date.....

**C. Design Team's Statement**

1. We certify that the components of the Works set out in paragraph A1 of this Construction Certificate have been designed, constructed, **[substantially completed as set out in paragraph A2(a)], [totally completed as set out in paragraph A2(b)]**, commissioned and tested in all respects in accordance with: the requirements for examination of the Works contained in the Design Management Plan and the Construction Design Management Plan and utilizing the standards of care, skill and diligence that, in accordance with the standards of our profession, are required of experienced professionals undertaking such examinations. *(Inapplicable language to be deleted)*
2. We further certify that in our professional opinion the components of the Works set out in paragraph A1 of this Construction Certificate have been designed, constructed, **[substantially completed as set out in paragraph A2(a)], [totally completed as set out in paragraph A2(b)]**, commissioned and tested in all respects in accordance with: *(Inapplicable language to be deleted)*
  - (a) the relevant Design Data, Design Certificates, and Construction Certificates pursuant to Schedule 10 of the Project Agreement in each case to which there has been no objection under the Review Procedure;
  - (b) the provisions of the Project Agreement, including all applicable Output Specifications, as amended by the following Variation(s):
    - (i) [...] *(List, if any, the change(s) made by the issue of any Variation(s));* and
  - (c) the requirements of City Standards, the designs and plans submitted by Project Co and accepted by the City, other standards that have been agreed to in writing by the City and Project Co, and good engineering practices.

Signed..... (Design Team's Principal)

Name.....

Date.....

Professional Registration Number: ..... (Affix Professional Seal)

**D. The City Representative**

1. This Certificate is:
  - i. reviewed\*
  - ii. reviewed as noted as follows\*
  - iii. returned marked "rejected" as follows: .....\*

**SCHEDULE 15-1**

**TECHNICAL TERMS AND REFERENCE DOCUMENTS**

SCHEDULE 15-1	TECHNICAL TERMS AND REFERENCE DOCUMENTS .....	i
PART 1	TECHNICAL TERMS AND REFERENCE DOCUMENTS .....	1
ARTICLE 1	DEFINITIONS.....	1
ARTICLE 2	ACRONYMS.....	29
ARTICLE 3	REFERENCE DOCUMENTS.....	47

**PART 1**  
**TECHNICAL TERMS AND REFERENCE DOCUMENTS**

**ARTICLE 1            DEFINITIONS**

**100-Year Storm** means a storm event with a return period of one hundred (100) years (1-percent annual exceedance probability), as described in the City of Ottawa Sewer Design Guidelines.

**100-Year Plus 20% Storm** means a 100-Year Storm calculated on the basis of a 20% increase of the City's Intensity Duration Frequency (IDF) curves.

**Accident** means an unforeseen event or occurrence which causes death, injury or property damage. Any event involving the revenue service operation of a rail fixed guideway system if as a result:

- An individual dies;
- An individual suffers bodily injury and immediately receives medical treatment away from the scene of the accident; or
- A collision, derailment, or fire causes substantial property damage.

**Action Plan** has the meaning given in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Airport Link** means the approximately 4km long spur line connecting South Keys Station to the OMCIA. The Airport Link includes Stations at Uplands and the OMCIA.

**Airport Restricted Area** means any area on the OMCIAA property to which access is signed as restricted.

**Airport Restricted Area Pass** means a pass that allows non-passengers access to the Airport Restricted Areas.

**Airport Security Requirements** has the meaning given in Schedule 15-2, Part 1, Article 4.6.

**Airport Station Concourse** means the portion of the construction to be completed by the OMCIAA as per Schedule 15-2, Part 4 – Stations.

**Airport Zoning Regulations** means the Transport Canada regulations that restrict the heights of buildings, structures and objects (including natural growth, such as trees) on regulated land.

**Airside** means the part of an airport used by aircraft for loading and unloading and takeoffs and landings.

**Airside Vehicle Operator's Permit** means a permit issued by the OMCIAA to certify those able to drive in the gate, runway and aircraft taxi areas.

**Airside Vehicle Operator's Permit D** means a permit issue to those with a need and right to regularly access runways and taxiways in the ongoing and regular performance of their duties.

**Airside Vehicle Operator's Permit DA** means a permit issued to those with a need and right to access airside aprons and vehicle corridors in the ongoing and regular performance of their duties.

**Alert Level** has the meaning given in Schedule 15-2, Part 2, Article 9.

**Ancillary Facilities** means those facilities, buildings, or structures adjacent to or directly linked to Stations. They can also be standalone facilities or structures located within or adjacent to the alignment. They include the following elements:

- Pedestrian overpass or underpass structures;
- Passenger shelter structures;
- Structures containing mechanical, electrical, communications or other service equipment;
- Signal equipment enclosures and bungalows;
- Parking areas;
- Entrances;
- PPUDO;
- Public washrooms;
- Bus Platforms;
- Bus layby areas; and,
- Bus Operations support building (including bus supervisor office).

**Annual Preventive Maintenance Plan** means at any time during the Maintenance Period, that component of the Maintenance and Rehabilitation Plan describing the Preventive Maintenance for the then current or immediately following Contract Year, as the context requires.

**Appointed Railway Bridge Engineer** means a Project Co team member with the responsibilities outlined in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Art Program** includes both temporary and permanent artwork projects that may be linked, permanently affixed to and / or integrated into the architectural and / or landscape design along the streets, guideway, park land or on the exterior or within the interior of the Stations.

**Asset Management Plan** means a plan which identifies the replacement schedule for the Expanded Trillium Line components based on their expected Design Life, and based on the relevant lifespan projections of the individual and combined assets through applicable analysis founded on the design, specifications and asset performance and maintenance, which will be included within the Asset Management Plan, which plan forms part of the Maintenance and Rehabilitation Plan.

**Asset Preservation Performance Measures** has the meaning given in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Authorities Having Jurisdiction** has the meaning given in NFPA 130.

**Availability** means the probability that a system or system element will be operational when required. Mathematically, that equals the ratio of the mean time between failure and the sum of the mean time between failure and the mean down time.

**Backup Control Centre** means an emergency control center facility providing a remote location complete with the basic functioning systems to dispatch, monitor, and control operations of the System in case the TOCC at 875 Belfast is unavailable.

**Baseline Vehicle Kilometers** means the scheduled annual Revenue Service Vehicle Kilometers set out for each Service Level in the Operations Service Plan as of Financial Close.

**Basic Day Demand** is as defined in Schedule 15-2, Part 2, Article 8 – Utility Design Criteria.

**Booking** means the schedule of work assignments for Operators established by the City, several times a year (beginning of January, end of April, end of June, and beginning of September) in accordance with the Operations Service Plan.

**Bridge** means a structure that provides a Roadway, railway or walkway for the passage of vehicles, pedestrians or cyclists (or other similar forms of transportation) across an obstruction, gap or facility that is greater than 3m in span.

**Bridge Condition Index** means a condition rating index for bridges, in accordance with MTO's bridge condition rating procedure.

**Bridge Safety Management Plan** has the meaning given to it in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

The **Canadian Rail Operation Rules** is the official set of rules governing the operation of railways in Canada. The CROR is used by every Canadian Railway.

**Capital Railway** means the entity under which the City of Ottawa operates the Expanded Trillium Line.

**Central Instrument House** means a wayside control room housing all the controls for an interlocking or group of interlockings.

**Certifiable Elements (Lists)** has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

**Certificate of Fitness** means the certificate issued by the CTA to a company proposing to construct or operate a railway under federal jurisdiction, when the company holds adequate liability insurance. Certified companies are monitored by the CTA for continued compliance.

**Certification Program Representative** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Checked Redundancy Principle** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**City Direction** has the meaning given to it in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Civil Works** means the installation or relocation of duct banks, manholes, hand wells, vaults, transformer bases, and pads, or underground support structures in speciality structures.

**Closed Circuit Television** means a video transmission system monitoring a location, recording images and presenting the images to a central location.

**[REDACTED] Walkley Line** is a **[REDACTED]** operated freight rail line that encompasses the Existing Walkley Yard and connects with the Existing Trillium Line via the north connecting Track and the south connecting Track.

**Compensating Construction** has the meaning given to that term in the OBC.

**Computerized Maintenance Management System** means part of an overall integrated information management system which includes a work order based system, maintenance schedule tool, asset registry and inventory, help desk functionality, control room log and performance reporting.

**Concourse Level** means the intermediate level of a Station that connects Platform Level and Entry Level.

**Confederation Line** means all of the existing Confederation Line, located between and including Blair Station in the east and Tunney's Pasture Station in the west; the Confederation Line west extension, an expansion west between and including Tunney's Pasture Station and Baseline and Moodie Stations; and the Confederation Line east extension, an expansion east between and including Blair Station and Trim Station.

**Connecting Track** has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

**Construction Impact Assessment Report – Level 1** has the meaning given in Schedule 15-2, Part 2, Article 9 – Protection of Existing Adjacent Structures.

**Construction Impact Assessment Report – Level 2** has the meaning given in Schedule 15-2, Part 2, Article 9 – Protection of Existing Adjacent Structures.

**Construction Security Plan** means a plan that is developed to establish the procedures required to provide the Security measures necessary to achieve Security on the Site as outlined in in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

**Controller** means a City employee that will be assigned to the TOCC and will be responsible for all dispatching functions for the System.

**Controller Training** means a program of Controller Training a City employee must attend prior to becoming a certified Controller. The program is provided by a Project Co Trainer.

**Corrective Maintenance** means the repair of failed E&M and/or Vehicles or the repair of any portion of the fixed facilities to restore normal operating condition to a state in accordance with the Standard and includes the repair or replacement of a failed system or subsystem through actions such as:

- investigation, localization and isolation of faults (troubleshooting);
- disassembly, reassembly, repair or replacement of the affected part or parts;
- retesting of the repaired system or subsystem; and
- correcting Defects.

**Corrective Maintenance Plan** means the plan establishing the general policies, procedures and methodology which Project Co shall apply to perform Corrective Maintenance, including without limitation to identify and analyze existing and anticipated Deficiencies, including inspection and testing, and which shall be employed by Project Co to affect the Repairs and Correction of Deficiencies when they occur during the Maintenance Period.

**Cost Recovery** means total actual net cost to Project Co based on an open book system.

**Crime Prevention through Environmental Design** means the design, maintenance, and use of the built environment in order to reduce both the incidence and fear of crime. It involves the application of these three core principles: natural surveillance, natural access control, and territorial reinforcement.

**Crossing Agreements** means [REDACTED] and [REDACTED].

**Critical** means failure conditions which could result in significant system damage or adverse effects on one or more occupants (including fatal injury).

**Culvert** means a structure that forms an opening through soil to allow the passage of surface water, livestock or pedestrians under a Roadway, railway or roadside entrance.

**Custodial Maintenance** means all forms of cleaning and clearance of unwanted items from New System Infrastructure including clearance of snow, ice, debris, garbage, trash, litter, stickers, gum and graffiti to restore the normal operating condition to meet the Standard.

**Custodial Maintenance Areas** means those areas and elements of the System included in Schedule 15-3 – Maintenance and Rehabilitation Requirements and identified therein as the responsibility of Project Co with respect to Custodial Maintenance, and for further certainty, includes Vehicles, the New Walkley Yard, the alignment, the Tracks and, to the extent identified in Schedule 15-3 – Maintenance and Rehabilitation Requirements, the Stations.

**Daily Lane Closure Report** has the meaning given in Schedule 15-2, Part 7, Appendix D.

**Daily Traffic Management Site Record** has the meaning given in Schedule 15-2, Part 7, Appendix C.

**Daily Traffic Monitoring Report** has the meaning given in Schedule 15-2, Part 7, Appendix D.

**Defect** means the condition of any part of the work which does not meet the contract document requirements; cause a train or a portion of the Work to cease operating or operate in a degraded mode; or inflicts damage or harm on any other portion of a train or the Work.

**Deficiency** means any condition which exists with respect to any aspect of the System and which requires Maintenance, including without limitation any failure of the System to meet the Standard, other than a Non Maintenance Repair.

**Design Criteria** means established parameters used during design.

**Design Life** means the period of time specified by the Owner during which an asset is intended to remain in service.

**Design Safety** means safety achieved by the integration of safety features into the system design characteristics to prevent or minimize the probability of operation in an unsafe manner.

**Developer's Guide** has the meaning given in Schedule 15-2, Part 1, Article 9 – Future Adjacent Construction Requirements.

**Disposed, Disposed of or Disposal** means disposal as identified in the “Waste and Excess Materials Management for Maintenance (MTO)” operational specification.

**Documentation Plan** has the meaning given in Schedule 15-2, Part 3, Article 1 – Introduction.

**Drainage** means the interception and removal of surface water or groundwater by constructed or natural means.

**Dwell Time** means the amount of time a Train resides at a Station.

**Elements of Continuity** has the meaning given in Schedule 15-2 Part 4, Section 2.3(c).

**Elements of Variability** has the meaning given in Schedule 15-2 Part 4, Section 2.3(c).

**Elevated Guideway** means a Guideway elevated above grade by means of a Structure.

**Emergency Costs** has the meaning given to it in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Emergency Guard Rail** (Steel Inner) is intended to contain and guard a derailed truck, keeping the Vehicle upright and on the Track structure.

**Emergency Traffic Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Employee Security Standard** means the security clearance and identification procedures and requirements mandated by the hiring policies, practices and standards of the City's Human Resources Department, as may be amended from time to time.

**Epidemic Defect** shall be deemed to have occurred at any time during the Maintenance Period when the Failure Rate within a Population of a component, subsystem or system exceeds the Constant Failure Rate by [REDACTED] measured over the time period in which the constant Failure rate is expressed but, for the avoidance of doubt, an Epidemic Defect shall exclude any Defect which arises:

- as a result of the failure by the Operator to operate the System in accordance with the Operation Requirements;
- out of the replacement or repair of any component, subsystem or system where such replacement or repair is the responsibility of the Operator or the City;
- out of the replacement or repair of any component, subsystem or system by the Maintenance and Rehabilitation Contractor where such replacement or repair is a product of the Design Life and Constant Failure Rate of the applicable component, subsystem or system; and/or
- any Defect which occurs after the expiration of the Design Life of such component, subsystem or system.

For the purposes hereof, the “**Population**” of a component, subsystem or system means the total number of identical line replaceable units (as identified in the Response) of a distinct type and function, whether the line replaceable unit consists of individual components, subassemblies or unit assemblies, incorporated in the fleet of Vehicles provided as part of the Project.

**Erosion and Sediment Control Plan** means the approach, techniques and measures used to prevent erosion during the construction process, to deal with suspended sediment at the source and minimize sediment transport from leaving the Construction site.

**Existing Adjacent Structures** means Adjacent Structures and other structures that are susceptible to ground movements caused by construction activities.

**Existing Vehicle Fleet** means the six Alstom 41m long DMUs in service on the Expanded Trillium Line.

**Existing Trillium Line ROW** means those Lands where the Existing Trillium Line operates subject to federal rail regulations apply.

**Existing Walkley Yard** is the existing Capital Railway facility east of Albion Road used for the maintenance and service of the Existing Vehicle Fleet.

**Facilities** means the above-grade structures, at-grade structures, below-grade structures, mechanical elements, electrical elements, interior areas, and exterior areas described in Schedule 15-2, Part 4 – Stations and Schedule 15-2, Part 5 – New Walkley Yard, including but not limited to: Stations, New Walkley Yard, and Ancillary Facilities.

**Failure** means the event, or inoperable state, in which any item or part of an item does not, or would not perform as previously specified, regardless of the operational state of the subsystem.

**Failure Mode, Effects and Criticality Analysis** outlines the Failure cases and assesses the impact on the System. It has the meaning defined in Schedule 15-2, Part 1, Article 7 – System Safety Certification. Reference MIL-STD 1629A or EN 60812.

**Failure Review Board** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Fail Safe (Safety)** A characteristic of a system which insures that any and all failure modes result in the system defaulting to a safe mode in regard to Passengers, personnel, Track, wayside and Vehicle.

**Fail Safe Principle** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Fare Paid Zone** means the area within transit stations in which Passengers shall have paid a fare and allows customers to transfer between modes of transit without passing through fare control barriers, revalidating fare payment on either the bus or when entering a train station, or passing in and out of a proof of payment zone.

**Fault Tree Analysis** means a systematic analysis of single and multiple events used for identifying the probability of occurrence of an undesired event using AND gates, OR gates, and Boolean algebra. FTA's produce graphic representations of failures and events which may result in a pre-selected top-level event to occur.

**Federal Lands** mean all lands owned and managed by all federal government departments.

**Federally Mandated Stations** means those stations within the project that are subject to Federal Land Use Agreement letters.

**Final Safety Certificate** is a certificate provided by Project Co signifying that the System Safety elements have been fulfilled and the System is safe for Revenue Service.

**Fire Life Safety** means those aspects of safety specifically related to the prevention, detection and response to fire, smoke and toxicity hazards.

**Fire Life Safety and Security Committee** means the committee that acts as a review board of the activities, analyses, and reports generated on fire/life safety and security issues.

**Fire/Life Safety System** means: (a) emergency exit buildings, emergency pathways, emergency walkways, tunnel cross passages, emergency stairs, emergency doors and emergency way-finding signage any other elements provided for the purposes of emergency egress; and (b) fire alarms, fire sprinkler systems, fire extinguishers, fire standpipe, emergency ventilation systems, fire fighter telephones, emergency lighting, emergency and standby power sources, and emergency response vehicles; and (c) any other assets provided for the purposes of fire/life safety and evacuation.

**Fitups** means infrastructure required to operate a bus stop or a bus station, such as, but not limited to, shelters, benches, signage, garbage cans, lighting, PIDS, and power and communications necessary to support the elements.

**Fixed Component Availability Standard** has the meaning given in Schedule 15-3 - Maintenance and Rehabilitation Requirements, as applicable to Attachments 3, 4, 8 and 9.

**Foundation** means a Structure that transfers loads to the earth.

**General Traffic** when used in Table 7-1.3 of Part 7 – Traffic and Transit Management and Construction Access, means Roadways that are not part of the City's Truck Route Network and accommodate no scheduled transit routes.

**Geotechnical Instrumentation and Monitoring Plan** has the meaning given in Schedule 15-2 Part 2 - Article 7, Geotechnical Design Criteria and Requirements.

**Greenfield** has the meaning given in the City of Ottawa Sewer Design Guidelines.

**Guideway** means the part of a passenger rail transit System on which the Trackwork is located, with a boundary marked by ROW fences, curbs and parapets or in a Tunnel.

**Handover Maintenance** means the testing, disassembly, refurbishment, rebuilding and/or repair of any components of the System to be completed by Project Co within the last 60 months of the Maintenance Period and prior to the expiry of the Maintenance Period in accordance with the requirements contained in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Handover Maintenance Period** means the last 60 calendar months of the Maintenance Period.

**Handover Maintenance Plan** means the documented plan for the performance of the Handover Maintenance in compliance with the requirements of Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**HASTUS** means a software package by GIRO used by Public Transit. The HASTUS software solution includes a suite of integrated modules for improved planning, scheduling, operations, passenger information, and analysis.

**Hazard** means any real or potential condition that can cause injury, death, or damage to or loss of equipment or property.

**Hazard Analysis** means any analysis performed to identify hazardous conditions for the purpose of their elimination or control.

**Hazard Log** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Hazard Resolution** means the analysis and subsequent actions taken to reduce, to the lowest level practical, the risk associated with an identified Hazard.

**Headway** means the time separation between two Trains, both traveling in the same direction on the same Track. It is measured from the time the head end of the leading Train passes a given reference point to the time the head end of the Train immediately following passes the same reference point.

**Immediate** or **Immediately** means the initiation of an activity as soon as possible after Detection or being Made Aware and no later than two hours from the time of Detection or being Made Aware. If more than one activity requires immediate action at the same time, Project Co shall give priority to the highest degree of Hazard.

**Infill** has the meaning given in the City of Ottawa Sewer Design Guidelines.

**Initial Works** means the Works undertaken by Project Co in the first 120 days following Commercial Close.

**ISO 9001:2008** means the quality management system so designated and established by the International Organization for Standardization.

**Landscape Plan** means a plan that specifies the hard and soft landscape material.

**Lane Closure Measurement and Verification Plan** has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Lane Shift** means a transfer of traffic along lane(s) of the same route and which, using existing Roadway lanes or surfaces, guides traffic around the work zone.

**Legal Survey** means a survey that is prepared by an Ontario Land Surveyor for the Registration or Deposit in the Provincial Land Registry Office to facilitate a conveyance by providing a Registerable description, effect an expropriation or to confirm the location of a property boundary.

**Leitrim Service Road** has the meaning given to it in Schedule 15-2, Part 2 – Civil and Guideway.

**Level of Service**, when used with respect to Roadway operation, has the meaning as described in the City of Ottawa's Transportation Impact Assessment Guidelines.

**Line Replaceable Unit** means components that are replaceable on the Vehicle.

**Low Impact Development** means a SWM strategy that seeks to mitigate the impacts of increased runoff and stormwater pollution by managing runoff as close to its source as possible.

**Lowest Line Replaceable Unit** means the lowest level assembly of components or piece parts to which a failure can be isolated and that can be readily replaced in its field application.

**Mainline Track** has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

**Mainline Storage Track or Storage Track** has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

**Maintain** means to perform the Maintenance, as required in accordance with the Project Agreement including the Maintenance and Rehabilitation Requirements, and “**Maintained**” shall have a corresponding meaning.

**Maintainability** means the quality of the combined features of equipment design and installation that facilitates the accomplishment of inspection, test, checkout, servicing, repair, and overhaul with a minimum of time, skill, and resources in the planned maintenance environments.

**Maintenance** means Preventive Maintenance, Corrective Maintenance, Custodial Maintenance and Handover Maintenance.

**Maintenance and Rehabilitation Plan** means the documented plan for the performance of the Maintenance and Rehabilitation Services, provided to the City and with respect to which the City has no material objection at the time of the Final Design Submittal as contemplated in the RFP, which shall thereupon be attached as Appendix A Attachment 1, as revised from time to time in accordance with the Project Agreement.

**Maintenance and Rehabilitation Services** means Maintenance to be provided by Project Co to the City in accordance with Schedule 15-3 – Maintenance and Rehabilitation Requirements and the other terms of the Project Agreement and shall also include the supply, operation and maintenance of any vehicle and or equipment used to provide Maintenance.

**Maintenance Dispute** has the meaning given to it in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Maintenance Dispute Resolution Procedure** has the meaning given to it in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Maintenance Emergency** means any Emergency which is caused by, or which arises as a result of:

- Project Co’s performance of, or failure to perform, the Maintenance and Rehabilitation Services;
- a Defect or Deficiency of the fixed equipment, Vehicles or fixed facilities;
- any act or omission of Project Co or any employee or officer, agent or contractor of Project Co; or

except to the extent that such Emergency is not caused by or does not arise as a result of any of subparagraphs (a), (b) and (c) above, and except to the extent that such Emergency is caused by or arises as a result of a Force Majeure.

**Maintenance Management System** has the meaning given to it in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Maintenance Responsibility Table** means the table set out in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Maintenance Vehicles** means vehicles that are capable of being rail-mounted and used by staff in the performance of maintenance duties on the System Infrastructure.

**Major Maintenance Shutdown Period** means any period of time during the Maintenance Period during which Project Co is permitted to partially or fully shut down the System during Revenue Service Hours without deductions under the Payment Mechanism, compliance with Section 1.5 of Schedule 15-3 – Maintenance and Rehabilitation Requirements, in order to carry out major maintenance works.

**Major Municipal Roads** means a City freeway, Arterial Roadway or Major Collector Road as defined in the City of Ottawa Transportation Master Plan.

**Master Test Plan** is as defined in Schedule 15-2, Part 8 – Vehicles.

**Maximum Day Demand** is as defined in Schedule 15-2, Part 2, Article 8 – Utility Design Criteria.

**Mean Distance Between Failure** means the average number of kilometres traveled between independent component malfunctions or failures, regardless of time or status of Train.

**Mean Time Between Failure** means the average equipment operating time per independent equipment failure. MTBF is the reciprocal of failure rate and is expressed mathematically as:  $MTBF = (\text{Equipment Operating Time} / \text{Independent Failures})$

**Mean Time to Repair** means the mean elapsed time required to perform the task of isolating an independent failure to the LLRU to remove and replace the malfunctioned LLRU and to verify proper equipment function. It is expressed in hours.

**Minor Municipal Roads** means a Collector Road or Local Road as defined in the latest City of Ottawa Transportation Master Plan.

**Monthly Activity Report** has the meaning given in Schedule 15-3, Appendix A, Article 1.8 – Records and Reporting.

**Multi-Use Path** means a formalized travel surface intended for a wide variety of non-motorized travelers that is physically separated from motorized vehicular traffic, with the exception of bridges, sidewalks and walkways.

**Network Management System** means a management software package that collects and manages information about the CTS network equipment including switches, routers, servers, etc. The NMS provides a browser interface to allow operators, administrators and network engineers an easy to understand manner to help them quickly identify and correct network problems with the CTS.

**New Vehicle Fleet** means the new Vehicles being procured for service on the Expanded Trillium Line.

**New Walkley Yard** means the proposed Capital Railway facility located west of Albion Road to be used for the maintenance and service of the Revenue Vehicles.

**Night Period** means the period of time between 22:00 and 5:00 hrs, when used in Schedule 15-2, Part 7 – Traffic and Transit Management Requirements.

**Noise and Vibration Control Plan** has the meaning given in Schedule 17 – Environmental Obligations.

**Non Maintenance Emergency** means an Emergency that is not a Maintenance Emergency.

**Non-Revenue Vehicles** means vehicles that are used by staff in the performance of maintenance and operational duties on the Existing Trillium Line and its related facilities.

**North Prescott Spur** is an existing freight rail line that extends southward from Greenboro Station (Existing Trillium Line) to the NRC Facility, and is to be part of the Trillium Line Extension.

**Not Shared** when used in Table 7-1.3 of Part 7 – Traffic and Transit Management and Construction Access, means a lane intended for use by vehicles only (usually the median lane on a multi-lane highway).

**NRC 6 Month Shutdown Period** is as defined in the Rail Car Transfer Agreement.

**NRC 7 Day Freight Access Periods** is as defined in the Rail Car Transfer Agreement.

**NRC Facility** means the NRC Automotive and Surface Transportation site located at 2320 Lester Road.

**Obstacle Limitation Surfaces** means a surface that establishes the limit to which objects may project into the airspace associated with an aerodrome consisting of the following; a takeoff surface, an approach surface, a transitional surface and an outer surface.

**OC Transpo Trainer(s)** means City employee(s) or contractor who has been trained and certified to instruct OC Transpo employees in certain classifications who are assigned to or have any duties and responsibilities on the System. These classifications include but are not limited to Operator, Station Attendant, Customer Service Staff, Controllers, Supervisors and Superintendents, and security personnel.

**Off Peak Period** means any period of time which is not a Peak Period or Night Period, when used in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Off Peak Period** means any period of time during Revenue Service Hours which is not a Peak Period, when used in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Open Process Control** means a software interface standard that allows Windows programs to communicate with industrial hardware devices.

**Operation(s)** means operation of the System commencing upon the Revenue Service Commencement in accordance with Schedule 15-3 – Maintenance and Rehabilitation Requirements, and shall specifically exclude Maintenance.

**Operations Crew Facility** means the space within the New Walkley Yard occupied and used by the City for purposes of the operation of the System, including dispatching of Operators and Trains, lunch rooms and locker rooms, training centre, and reception area for Operators and supervisors.

**Operations Service Plan** means the operations schedule as outlined in Schedule 15-3 – Maintenance and Rehabilitation Requirements, and includes Train movements in support of Revenue Service.

**Operator** means the driver of a Revenue Vehicle, which is a City employee who has been trained and certified by an OC Transpo Trainer to operate on the Trillium Line.

**Operator Training** means a program of training a City employee must attend prior to becoming a certified Operator.

**O-Train** means the rail system operated by OC Transpo, including both the Confederation Line and the Expanded Trillium Line.

**Over-Dimensional Vehicle** is as defined under the City of Ottawa By-law No. 2003-497.

**Overhead** means a Structure where a roadway goes over the railway when used in Schedule 15-2, Part 2, Article 4 – Structural Design Criteria and Requirements.

**Overhead Contact System** sometimes referred to as **Overhead Catenary System** means a system that distributes DC power from the traction power System to the Vehicle via a pantograph on the Vehicle. The OCS consists of a conductive messenger wire suspending a contact wire between poles and/or attachments to provide the DC propulsion power requirements of the Vehicle to the Train consist maintaining continuous contact between the pantograph and the contact wire.

**Overpass** means a structure where the major road goes over a lower category road when used in Schedule 15-2, Part 2, Article 4 – Structural Design Criteria and Requirements.

**Park and Ride** means parking lots located adjacent to Transitway Stations or important transit nodes that are readily accessible by the public from the nearest major Roadway.

**Passenger Pick-Up and Drop-Off** means a designated pick-up and drop-off area for Passengers from private vehicles adjacent to a Station.

**Passing Siding** means an auxiliary Track to the mainline for meeting or passing Trains which is also operated by one or more methods of control (i.e. Train Control System).

**Pavement** means all structural elements or layers including granular, above the subgrade of a road and shoulders, such as a road, shoulder, sidewalk, plaza or other artificially-covered thoroughfare.

**Peak Period** means the AM and PM periods each weekday as determined by the City, which encompasses 6:30 to 9:30 hrs and 15:00 to 18:30 hrs, when used in Schedule 15-2, Part 7 – Traffic and Transit Management Requirements.

**Peak Period** means the AM and PM periods each weekday as defined in the Operations Service Plan or otherwise determined by the City in its discretion by written notice to Project Co, when used in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Pedestrian Access Plan** means a plan that outlines and shows the pedestrian flow, directions, route, volumes to, from and around all facilities, Guideway and Stations.

**Permit to Take Water** is required for any taking of more than a total of 50,000 litres of water in a day under the *Ontario Water Resources Act*.

**Permitted Periods for Closures** means the periods during which Project Co may implement closures, full closures, detour routes, Lane Shifts and diversions in respect of the various Roadways, as set forth in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Physical Constraints** means existing Structures (Bridges, Tunnels, buildings, retaining walls), existing Stations, environmentally protected elements (water bodies, SAR, archeological sites, etc.) and the Lands. Physical Constraints shall be at the sole discretion of the City.

**Platform** means that portion of the Station where Trains and or buses stop to load and unload Passengers. There are two basic types of O-Train Platform configurations: centre loading which has the Platform located between each set of Tracks, and side loading, which has the Platforms located on the outside of each set of Tracks. Both Platform types are in use on the System.

**Platform Level** means the level of a Station with Platform(s) used by Passengers to board and alight from Trains.

**Pre-Handover Inspection** has the meaning given in Schedule 15-3, Appendix C, Article 3.0 – General Requirements.

**Preventive Maintenance** means any action that is performed at scheduled intervals in accordance with the Maintenance and Rehabilitation Plan or as otherwise required to maintain the System at a constant level of performance to comply with the Maintenance and Rehabilitation Requirements and ensuring that the Maintenance of the System is sufficient to permit the Operation of the System in accordance with the Operation Requirements and Specifications (and, for further certainty, to meet or exceed the Maintenance Service

Requirements), including the detection and correction of deviations from normal operation before a major system or subsystem failure occurs, periodic inspections and testing, condition monitoring, critical item replacement, lubrication, adjustment, cleaning and calibration.

**Preventive Maintenance Plan** means the plan establishing the Preventive Maintenance which Project Co is required to perform, which plan forms part of the Maintenance and Rehabilitation Plan.

**Private Approach Permit** has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Project** means the Trillium Line Extension Project, which consists of the design and construction Works and the Maintenance for the System, including the extension to the Existing Trillium Line.

**Project Co Operator** means a Project Co employee or contractor who is trained and certified to operate a Revenue Vehicle without passengers on the Trillium Line.

**Project Co Operator Training** means a program of training a Project Co employee or contractor must attend prior to being allowed to operate an out of service Revenue Vehicle anywhere on the alignment or in the New Walkley Yard. The program is provided by a Project Co Trainer.

**Project Co Trainer** means a Project Co employee or contractor who is assigned the task of instructing and certifying a Project Co employee, Contractor or a City employee in a specific classification.

**Property Access and Business Continuity Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Quality Performance Criteria** means the qualitative standards of service and the performance criteria set out in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Quarterly Performance Report** has the meaning given in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Quarterly Performance Review** has the meaning given in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Radio System Supplier** means the City corporate radio nominated manufacturer determined by an external radio contract issued by the City.

**Rail Transfer Agreement** means the agreement between the City of Ottawa and the National Research Council of Canada as represented by its Centre for Surface Transportation Technology. The Rail Transfer Agreement sets out, among other things, terms and conditions on which the Transfer Segment can be used to provide the NRC the service of moving rail cars over the

Transfer Segment between the Siding and the Connecting Track before, during and after the O-Train Expansion and maintenance requirements in respect of the Transfer Segment.

**Railway Bridge Engineer** means a City team member with the responsibilities outlined in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Railway Operating Certificate** means an official document issued by Transport Canada that authorizes a federal railway company or a local railway company to operate in Canada.

**Railway Works** means a line work or any part thereof, a crossing work or any part thereof, or any combination of the foregoing.

**Reference Concept** means the plans, drawings, reports and other information prepared during the preliminary design for the Project and which reside in the Data Room.

**Reference Documents** means the references, codes, standards, specifications, guidelines, policies, reports, publications, manuals, bulletins and other such documents listed throughout the Output Specification.

**Reference Plan** is defined in Ontario Regulation 43/96 Part I as a plan deposited under section 150 of the Land Titles Act or section 80 or 81 of the Registry Act and includes any other plan deposited as a reference plan. Part IV describes the requirements, contents, and procedures to be followed for a reference plan.

**Reliability** means the probability that the system or subsystem will perform satisfactorily for a given period of time when used under stated conditions.

**Reliability/Availability Program Plan** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Reliability Block Diagram** means a diagrammatical representation of Systems elements in a series and/or parallel configuration to represent the reliability impact of complete System. Refer to IEC 61078.

**Remedial Action Notice** has the meaning given to it in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Replacement-In-Kind** means replacement of identical or similar nature that satisfies the original design specification.

**Replacement Parts** has the meaning given to it in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Requirements Management Plan** has the meaning given in Schedule 15-2, Part 3, Article 1 - Introduction.

**Response Action Plan** has the meaning given in Schedule 15-2, Part 2, Article 9 – Protection of Existing Adjacent Structures.

**Restraining Rail** is an additional rail installed alongside of the gauge side of the low (inner) rail of a sharp radius curve which share with the running rails the lateral forces generated while the Train is traversing the curve. Restraining rail is to enhance safety by providing additional Vehicle truck guidance, divide lateral wheel forces between two rails, reducing forces on the rail fastening system and divide rail wear over two rail surfaces increasing the time between running rail replacements.

**Revenue Service** means the carriage of paying Passengers on the System.

**Revenue Service Hours** means the hours during which Revenue Service is provided on the System as set out in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Revenue Service Vehicle Kilometres** means the distance travelled by Vehicles while in Revenue Service, measured in kilometres.

**Revenue Vehicles** or **Vehicles** means the diesel multiple unit passenger cars. Revenue Vehicles includes the Existing Vehicle Fleet in service as well the New Vehicle Fleet currently being procured.

**Review Level** has the meaning given in Schedule 15-2, Part 2, Article 9 – Protection of Existing Adjacent Structures.

**Risk Assessment** has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

**Risk Log** has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

**Road Close Permit** has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Road Safety Design Reviews** means Design safety reviews that are to be carried out in accordance with Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

**Road Safety Audit** means an audit carried out in accordance Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

**Road Safety Audit Team** means a group of individuals appointed by Project Co from time to time to carry out Road Safety Audits in respect of the Works.

**Road Safety Auditor** has the meaning given in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

**Road Safety Audit Certificates** has the meaning given in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-bys.

**Roadway** means the driving surfaces including travelled lanes, shoulders and shoulder rounding.

**Roadway Works** is defined as the design and construction of all temporary or permanent Roadway modifications, improvements or new construction of municipal and federal Roadway infrastructure, including but not limited to travelled lanes, auxiliary lanes, bike lanes, shoulders, boulevards, accesses, intersections, interchanges and the associated ramps, related to the scope of the Stage 2 Project.

**Room Data Sheets** means the room data sheets in Schedule 15-2, Part 5 – New Walkley Yard, Appendix A.

**Safety** means freedom from harm resulting from unintentional acts or circumstances.

**Safety Certification** means the process of verifying compliance with a set of formal safety requirements. The requirements are defined by a safety certification plan, design criteria and technical specifications and applicable codes and industry standards. Specifically, certifiable elements need to be identified, verification activities need to be performed and documented, and certificates of conformance need to be signed and issued by the responsible and accountable parties as described in Schedule 15-2, Part 1, Article 7 - System Safety Certification.

**Safety Certification Program** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Safety and Security Certification Review Team** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Safety and Security Operations Review Committee** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Safety Audit** means an inspection by the City of the System, the books and records and/or procedures of Project Co relating to the Safety Standards, and includes an inspection of the Safety Management System and the Safety Case.

**Safety Case** means the submission of Safety evidence at prescribed intervals in the Project lifecycle. It has the meaning outlined in EN 50129.

**Safety Certification Report** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Safety Critical** means a designation placed on a system, subsystem, element, component, device or function denoting that satisfactory operation of such is mandatory to safety assurance of patrons, personnel, equipment, or facilities. Such a designation dictates incorporation of special safety design features.

**Safety Integrity Level** means a relative level of risk-reduction provided by a safety function, or to specify a target level of risk reduction. The requirements for a given SIL are not consistent among all of the functional safety standards. In the functional safety standards based on the IEC 61508 standard, four SILs are defined, with SIL 4 the most dependable and SIL 1 the least. A SIL is determined based on a number of quantitative factors in combination with qualitative factors such as development process and safety life cycle management.

**Safety Management System** means the Safety protocol (including without limitation the activities, resources, procedures, methodologies, responsibilities and organizational structure) which Project Co shall assist Capital Railway in updating, taking into account the Design and Construction Specifications and is implemented to ensure the Safety of the System and compliance with the Safety Standards, and which is authorized by the City Manager and filed with the City Manager, adherence to which Safety protocol shall be mandatory in all Operations and Maintenance activities, and which shall without limitation include the Capital Railway rules and the Standard Operating Procedures.

**Safety Requirements Traceability Matrix** is a means of tracking all Project Safety requirements identified by the PA or Project Co to ensure Safety elements are captured and fulfilled for the System with a direct link to the source of the Safety requirement.

**Safety Standards** means all mandatory Safety standards for the System, being the requirements of Law relating to health and Safety matters respecting the Design, Construction, Maintenance and Operation of the System, including all such Safety standards established by Project Co, in conjunction with the City, taking into account Comparable LRT Safety Standards, the Safety Case, and all Safety standards established by the Design and Construction Performance Requirements.

**Safety Verification Matrix** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Scheduled Revenue Service Vehicles** has the meaning given in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**Seasonal Load Restriction** regulations are applicable to commercial vehicles or trailers with a gross vehicle weight in excess of 5 tonnes or 11,000 lbs per axle that are prohibited on roads where restriction signage is posted or on all truck routes identified on the most current City of Ottawa Urban and Rural Truck Route Maps.

**Security** means freedom from harm resulting from intentional acts or circumstances.

**Security and Emergency Preparedness Plans** means plans that outline Security and Emergency procedures and activities that will occur in response to a Security or Emergency incident.

**Security Certification** means the process of verifying compliance with a set of formal security requirements. The requirements are defined by a security certification plan, design criteria and

technical specifications and applicable codes and industry standards. Specifically, certifiable elements need to be identified, verification activities need to be performed and documented, and certificates of conformance need to be signed and issued by the responsible and accountable parties as described in Schedule 15-2, Part 1, Article 8 - Security and Emergency Management.

**Security Certification Checklists** means checklists that are used to validate the design and implementation of Security equipment and processes to verify compliance with a set of formal Security requirements.

**Security Certification Program** has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

**Security Management System** means the Security protocol (including, without limitation, the activities, resources, procedures, methodologies, responsibilities and organizational structure), which Project Co shall assist Capital Rail in updating, taking into account the Design and Construction Specifications and the initial Threat and Vulnerability Assessment, and implement to ensure the Security of the System and compliance with the Safety Standards, and which is authorized by the City Manager and filed with the City Manager, adherence to which Security protocol shall be mandatory in all Operations and Maintenance activities, and which shall without limitation include the Capital Railway rules and the Standard Operating Procedures.

**Security Requirements Traceability Matrix** has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management. For clarity, the Security Requirement Traceability Matrix is a matrix format document used to verify and certify that the Security requirements have been incorporated in the design and certify that all Security requirements of the design are constructed and/or installed in accordance with the Project Agreement.

**Security Standard** means all mandatory Security standards for the System, being the requirements of Law relating to Public and Security matters respecting the Design, Construction, Maintenance and Operation of the System, including all such Security standards established by Project Co, in consultation with the City, taking into account all Security standards established by the Design and Construction Specifications and the initial TVA, as approved and amended from time to time by the City, identifying the mandatory Security Standards to be followed by the City and Project Co (including personnel employed in the performance of Operations and Maintenance), including in response to conditions, events, or Deficiencies which cause interruption to or interference with the Operation of the System.

**Security Verification Matrix** has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

**Service Change** means a modification to the Operations Service Plan whereby the then-prevailing Operations Service Plan is replaced by one of the other Service Levels identified in Schedule 15-3 Appendix A – Attachment 2.

**Service Level** means the sets of operational parameters set out by the City in the Operations Service Plan in Schedule 15-3 Appendix A – Attachment 2 and labeled as Service Levels 1 to 4,

describing the , headways, consist sizes, hours of operation, and other key parameters to be attained by the System in each case, which Project Co's provision of the Maintenance and Rehabilitation Services must accommodate, and the term also includes any additional or modified operational parameters which may be developed and agreed by the City and Project Co from time to time.

**Service Level Decrease** means a requirement by the City for Project Co to provide a Service Level with a lower revenue train kilometres as compared to the then-prevailing Service Level.

**Service Level Increase** means a requirement by the City for Project Co to provide a Service Level with a greater revenue train kilometres as compared to the then-prevailing Service Level.

**Service Proven Vehicle** means a Vehicle that is substantially compliant with the following characteristics:

- The major Vehicle sub systems (including bogies, braking systems, diesel engines, etc.) have been integrated in a comparable Vehicle currently in Revenue Service.
- A minimum of 10 of these Vehicles have been in Revenue Service on a comparable-Design based system for a minimum of two years.

**Service Reliability Standard** has the meaning given in Schedule 15-2, Part 1, Article 3 – Operational Performance Requirements.

**Shared Lane** when used in Table 7-1.3 of Part 7 – Traffic and Transit Management and Construction Access, means a lane intended for shared use between vehicles and cyclists. Such lanes may be marked by a “sharrow” pavement marking.

**Shutdown Period** means the period during which the City will cease operations of the Existing Trillium Line in order to facilitate the implementation of the Project. The Shutdown Period will commence on May 3, 2020 and will cease at Revenue Service Availability.

**Signalling and Train Control System** has the meaning given in Schedule 15-2, Part 3 – Systems.

**Site Office** has the meaning given in Schedule 15-2, Part 1, Article 9 – Project Office.

**Special Constables Unit** means sworn-in Peace Officers who have the powers of a Police Officer to enforce the Criminal Code of Canada, the Controlled Drugs and Substances Act, the Liquor License Act, Trespass to Property Act, and the Safe Streets Act on all transit vehicles and properties.

**Special Trackwork** refers to all rail installations where Tracks converge, diverge or cross. Standard Trackwork is made simply from rolled rails of a constant cross-section, while rails in several special Trackwork components are cast or machined and have cross-sections that vary along their length.

**Spur Track** has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

**the Standard(s)** means a standard of Maintenance which complies with all of the standards and terms set out in Schedule 15-3, Appendix A, Article 2 – Maintenance and Performance Standards and described in the Attachments to Schedule 15-3, Appendix A.

**Standard Operating Procedures** means the standard operating procedures which Project Co shall assist Capital Railway in updating, taking into account the Design and Construction Specifications, Maintenance and Rehabilitation Services, Operation of the System, and Good Industry Practice, as approved and amended from time to time by the City, identifying any new mandatory procedures to be followed by the City and Project Co (including personnel employed in the performance of Operations and Maintenance), including in response to conditions, events, or Deficiencies which cause interruption to or interference with the Operation of the System. The Standard Operating Procedures shall incorporate as required the provisions of the Safety Management System, Security Management System, Capital Railway rules, and regulations governing the Operation and Maintenance of the System.

**Station** means a Facility where Trains and or buses stop to pick up or drop off customers. The Station primarily consists of Platform areas for Passenger loading/unloading, fare control equipment, and passenger information. Other related components include: service rooms, stairs, ramps, escalators, elevators, advertising, public art, and Train and bus Operator support Facilities, customer amenities, etc. On the Ottawa System, O-Train stations are classified as follows:

- **At Grade Station:** A Station at which the platform is at grade, above grade, below grade, and meets the criteria for an open station as defined in NFPA 130
- **Transfer Station:** A Station with the incorporation of Facilities to support the transfer of passengers between modes of transportation or between the O-Train Lines, within a fare paid area.
- **Terminal Station:** A Station that is located at the terminus of a line.
- **Line Station:** A Station that is located along the alignment providing service in both directions of the line.

**Station Plaza** means a plaza at a Station.

**Storage Yard** means the outdoor areas located within the New Walkley Yard, not including the Maintenance Building or the Operations Crew Facility, but including the open space, parking areas, Track area, storage of Maintenance of Way equipment and supplies (unless incorporated within Maintenance Building), outdoor storage (ties, Track, poles, etc.) and Vehicle storage.

**Stormwater Management** means the integrated process of capturing, treating and/or controlling of stormwater runoff to maintain the natural hydrologic cycle, prevent undesirable stream erosion, prevent an increased risk of flooding, and protect water quality of receiving waters.

**Stormwater Management Practice** means the combination of strategies, techniques and measures used on or off-site for Stormwater Management or a document containing the combination of strategies, techniques and measures used on or off-site for Stormwater Management.

**Structure** means any building, Bridge, Tunnel, structural Culvert, or retaining wall.

**Supervisory Control and Data Acquisition** means the system that allows the supervision and control of wayside and Station equipment and devices from TOCC. SCADA collects alarm and indication functions for transmission and implements control commands initiated from TOCC and other control locations. The SCADA functions are an addition to local control, alarm, and indications associated with each equipment or system.

**Supply Point** is defined in [REDACTED].

**Surplus Vehicle Fleet** means, following a Service Level Decrease, any vehicles which are in excess of:

- the maximum fleet required to provide the service plan;
- the number of Vehicle required to maintain Project Co's spare Vehicle ratio; and,
- the quantity of Non-Revenue Vehicles called for by Project Co's maintenance plans.

**System Element** has the meaning given in Schedule 15-3 – Maintenance and Rehabilitation Requirements.

**System Engineering Management Plan** has the meaning given in Schedule 15-2, Part 3, Article 1 - Introduction.

**System Safety** means the application of operating, technical, and management techniques and principles to the safety aspects of a system throughout its life to reduce hazards to the lowest practical level through the most effective use of available resources.

**System Safety and Assurance Plan** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**System Security Certification** means the process of verifying compliance with a set of formal Security requirements. The requirements are defined by a System Security Certification Plan, design criteria and technical specifications and applicable codes and industry standards. Specifically, certifiable elements need to be identified, verification activities need to be performed and documented, and certificates of conformance need to be signed and issued by the responsible and accountable parties as described in Schedule 15-2, Part 1, Article 8 - Security and Emergency Management.

**System Security Certification Plan** means a detailed plan used to verify compliance with a set of formal security requirements as outlined in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

**Systems Integration Verifier** is a key member of the overall Expanded Trillium Line's project team. The Systems Integration Verifier will review and provide confirmation of the successful completion of the systems integration work related to the communication integration at the TOCC, BCC and at Bayview Station. The Systems Integration Verifier will also act as adjudicator in a fast track dispute resolution procedure to resolve any disputes as to the source of the inability to successfully complete integration of the communication system at the TOCC, BCC and Bayview Station. The Systems Integration Verifier will review and comment on the Expanded Trillium Line's Systems integration design for the communications system and associated integration documents. During the installation, testing, and commissioning phases, the Systems Integration Verifier will review and comment on the communications, integration, test and commissioning plans, traceability documents, and test procedures.

**Tail Track** has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

**Threat and Vulnerability Assessment** has the meaning given in Schedule 15-2, Part 1, Article 7 – System Safety Certification.

**Threat Log** has the meaning given in Schedule 15-2, Part 1, Article 8 – Security and Emergency Management.

**Ticket Machine** means a piece of City supplied and installed equipment where customers purchase a fare for OCT services.

**Tolerable Hazard Rate** has the meaning given in EN 50129.

**Track** means the system of ballast, rails, ties and fastenings composing the Track structure.

**Trackwork** means all work related to the construction of a complete rail passenger system Track structure from subgrade to top of rail including the design, supply, installation and Quality Control of ballast and sub-ballast, ballast curbs, ties, rails, guardrails, fastenings, subdrains, Special Trackwork, end of Track devices, Track drains, rail welds, rail insulated joints, direct-fixation baseplates as well as concrete slab inserts, and other Track materials.

**Trackwork Design and Construction Test Plan** has the meaning given in Schedule 15-2, Part 2 – Civil and Guideway.

**Traffic Advisory Temporary Signage Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic and Transit Management Communications Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic and Transit Management Monitoring Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic and Transit Management Plan** means a written plan, and a series of sub-plans, describing all direct and indirect impacts on all road users, including pedestrians, cyclists, transit vehicles and private vehicles of all types, at each stage of Project Co's construction sequencing plan, and outlining Project Co's measures and strategies to manage the impacts on road user traffic, parking, access for Emergency Services , as well as access to businesses and properties during construction. A Traffic and Transit Management Plan shall comply with the relevant standards, guidelines, policies and procedures of the City, OC Transpo, NCC and MTO as applicable. Further requirements are found in Schedule 15-2, Part 7, Article 6 – Traffic and Transit Management Plan.

**Traffic Control Device(s)** is a term used to describe any person, sign, signal, marking or device placed upon, over or adjacent to a roadway by or at the direction of a Relevant Authority or their designate, for the purpose of regulating, warning, guiding or informing a vehicle operator or pedestrian of an existing condition or hazard.

**Traffic Control Persons/Personnel** means a person duly trained and authorized to direct traffic at a Work zone through the use of the Traffic Control Sign (STOP/SLOW Paddle).

**Traffic Control Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic Control Supervisor(s)** has the meaning given in has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic Engineer** has the meaning given in has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic Incident Management Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic Management Committee** has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic Management Implementation Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic Management Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic Manager** has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Traffic Risk Assessment Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Train** means a consist of one or two Vehicles.

**Train Control** or **Train Control System** means a safety critical computer based control system for Vehicle identification, Vehicle location control and monitoring, maintaining safe headway between Vehicles, Vehicle speed control, maintaining safe brake rates, Vehicle route selection and fleet management, interlocking control and power consumption optimization.

**Train Structures** means any structures (excluding Tunnels) that support any form of Train loading including but not limited to grade-supported slabs, elevated Train supports, foundations supporting Train loads, retaining walls supporting Train surcharges and other similar Structures.

**Train the Trainer** means the training program conducted by a Project Co employee(s) or contractor(s) that trains and certifies a City employee to serve as an OC Transpo Trainer.

**Transfer Segment** has the meaning given in the Rail Transfer Agreement.

**Transit Information Panel** has the meaning given in Schedule 15-2, Part 4 – Stations.

**Transit Management Plan** is a sub-plan of the TTMP and has the meaning given in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.

**Transit Operations Control Centre** means the facility that is located at 875 Belfast Road, in the City of Ottawa and provides the primary operation and control center for Revenue Service of the Confederation Line. It also operates and controls the mainline Guideway during maintenance hours, which typically occur overnight. The TOCC integrates all the LRT systems to allow operation of the scheduling, command and control, supervision & data acquisition, communications, surveillance, power and Emergency responses for the Confederation Line.

**Transit Priority Lanes** is as defined by the City of Ottawa.

**Transition and Maintenance Plan** has the meaning given in Schedule 10 – Review Procedure.

**Transit Operating in Lane** when used in Table 7-1.3 of Part 7 – Traffic and Transit Management and Construction Access, means lanes that will not have transit operating in them.

**Transitway** is a dedicated road network system that is open only to OC Transpo and Emergency vehicles, which includes physically separated ROW from mixed traffic and on-street bus lanes.

**Tree Mitigation Plan** means a plan to audit, monitor, protect, and preserve trees to comply with City regulations.

**Trial Running** means a 21 consecutive day period that may commence upon the successful completion of testing and commissioning. Upon successful completion of trial running, the integrated system will be ready for revenue service.

**Tunnel** means Structures located below finished grade containing the Guideway.

**Tunnel Equipment and Systems** has the meaning provided in Table 4.2 of Schedule 15-3, Appendix B.

**Underground Structures** means Tunnels excluding buried pipes and utilities, Bridge foundations and above ground Station foundations and including existing Tunnels.

**Underpass** means a structure where the major road goes under the lower category road when used in Schedule 15-2, Part 2, Article 4 – Structural Design Criteria and Requirements.

**Universal Design** means the design of products and environments to be usable by all people, to the greatest extent possible, without the need for adaptation or specialized design.

**Utility Infrastructure Relocation Plan** has the meaning given in Schedule 15-2 Part 2 Article 8 (Utility Infrastructure Design Criteria)

**Vital Microprocessor Interlocking System** means a vital microprocessor based system for controlling switches and signals at an interlocking. This system may also be known as a CBI controller.

**Voice and Data Radio System** has the meaning given in Schedule 15-2, Part 3, Article 5.

**Walkley Diamond** means the at grade rail Track intersection of the Ellwood Subdivision at Mileage 0.18 (KM 0.29) and the [REDACTED] Walkley Line at Mileage 4.1.

**Weekend Period(s)** means the period of time from a Saturday at 0:00 hrs to Sunday at 23:59 hrs.

**Yard Limits** means a point designated by a yard limit sign which separates the mainline from the yard and the demarcation point for management of train operations. Yard Limits are typically located at the governing signal protecting movement of trains onto the mainline.

**Yard Track** has the meaning given in Schedule 15-2, Part 2, Article 3 – Trackwork.

**Zone of Influence** means the area within the subsurface and surface boundaries where Ground Movement arising from Project Co construction activities is expected to occur.

## ARTICLE 2            ACRONYMS

**AABC** means Associated Air Balance Council.

**AAMA** means American Architectural Manufacturers Association.

**AAR** means Association of American Railroads.

**AASHTO** means American Association of State Highway and Transportation Officials.

**ABS** means absolute block signal.

**AC** means alternating current.

**ACGIH** means American Conference of Governmental Industrial Hygienists.

**ACI** means American Concrete Institute.

**ACP** means access control panels.

**ADA** means *Americans with Disabilities Act*.

**AED** means automated external defibrillator.

**AESS** means Architecturally Exposed Structural Steel.

**AHJ** means Authorities Having Jurisdiction.

**AHRI** means Air-conditioning, Heating, and Refrigeration Institute

**AIC** means Amp Interrupting Capacity.

**AISC** means American Institute of Steel Construction.

**AISI** means American Iron and Steel Institute.

**ALCTV** means Automotive Lifts – Safety Requirements for Construction, Testing and Validation.

**ALI** means Automotive Lift Institute.

**AMCA** means Air Movement and Control Association.

**AMS** means Aerospace Material Specifications.

**ANSI** means American National Standards Institute.

**AODA** means *Accessibility for Ontarians with Disabilities Act*.

**APC** means automatic passenger counting.

**APPM** means Asset Preservation Performance Measures.

**APTA** means American Public Transportation Association.

**AREMA** means American Railway Engineering Maintenance-of-Way Association.

**ARBE** means Appointed Railway Bridge Engineer.

**ASCE** means American Society of Civil Engineers.

**ASHRAE** means American Society of Heating, Refrigerating and Air-Conditioning Engineers.

**ASME** means American Society of Mechanical Engineers.

**ASPE** means American Society of Plumbing Engineers.

**ASSE** means American Society of Safety Engineers.

**ASTM** means American Society for Testing and Materials.

**ATC** means automatic Train Control.

**ATIS** means automated traveler information system.

**ATP** means automatic Train protection.

**ATS** means Automatic Train supervision or automatic transfer switch.

**AWMAC** means Architectural Woodwork Manufacturers Association of Canada.

**AWS** means American Welding Society.

**AWS BRH** means American Welding Society Brazing Handbook.

**AWS WHB** means American Welding Society Welding Handbook.

**AWWA** means American Water Works Association.

**AZR** means Airport Zone Regulations.

**BAS** means Building Automation System.

**BCC** means Back-up Control Centre.

**BCI** means bridge condition index, in accordance with MTO's bridge condition rating procedure.

**BIA** means business improvement association.

**BMS** means Building Management System.

**BSMP** means Bridge Safety Management Plan.

**BSS** means British Standards Society.

**CADD** means computer aided design and drafting.

**CaGBC** means Canada Green Building Council.

**CALA** means Canadian Association for Laboratory Accreditation.

**CATSA** means the Canadian Air Transport Security Authority.

**CB** means Certification Body Scheme (for “Scheme of the IECEE for Mutual Recognition of Test Certificates for Electrical Equipment”).

**CBI** means Computer Based Interlocking.

**CCIL** means Canadian Council of Independent Laboratories.

**CCIP** means Cement and Concrete Industry Publications.

**CCOHS** means Canadian Centre for Occupational Health and Safety.

**CCTV** means Closed Circuit Television.

**CE** means Conformité Européene / European Conformity or consumer electronics.

**CEAA** means Canadian Environmental Assessment Agency.

**CEC** means Canadian Electrical Code.

**CEL** means Certifiable Elements List

**CEM** means crash energy management

**CFAA** means Canadian Fire Alarm Association.

**CFC** means chlorofluorocarbon.

**CFD** means computational fluid dynamics.

**CFEM** means Canadian Foundation Engineering Manual.

**CFR** means Code of Federal Regulations.

**CGC** means Canadian Gypsum Company.

**CGSB** means Canadian General Standards Board.

**CHBDC** means Canadian Highway Bridge Design Code.

**CIAR** means Construction Impact Assessment Report.

**CIAR-1** means Level 1 Construction Impact Assessment Report.

**CIAR-2** means Level 2 Construction Impact Assessment Report.

**CIH** means Central Instrument Houses.

**CISC** means Canadian Institute of Steel Construction.

**CMAA** means Crane Manufacturers Association of America.

**CMMS** means Computerized Maintenance Management System.

**[REDACTED]**

**CNLA** means Canadian Nursery Landscape Association.

**COADS** means City of Ottawa Accessibility Design Standards.

**CPCI** means Canadian Precast/Prestressed Concrete Institute.

**CPR** means Cardiopulmonary Resuscitation.

**CPTED** means Crime Prevention through Environmental Design.

**[REDACTED]**

**CPE** means City provided equipment

**CPU** means central processing unit.

**CRCA** means Canadian Roofing Contractors Association.

**CRI** means colour rendering index.

**CROR** means Canadian Rail Operation Rules.

**CSA** means Canadian Standards Association.

**CSMP** means Construction Safety Management Plan.

**CSP** means corrugated steel pipe.

**CSRS** means Canadian Spatial Reference System.

**CSSBI** means Canadian Sheet Steel Building Institute.

**CSV** means Comma Separated Value (type of software file format).

**CTA** means Canada Transportation Act/Agency

**CTS** means communications transmission system.

**CWB** means Canadian Welding Bureau.

**CWDS** means crossing warning device system.

**CWR** means continuous welded rail.

**DAQ** means delivered audio quality.

**DC** means direct current.

**DDU** means driver's display unit

**DF(F)** means direct fixation (fastener).

**DFO** means Department of Fisheries and Oceans (Canada).

**DLA** means dynamic load allowance.

**DMP** means Data Management Protocol.

**DMU** means diesel multiple unit.

**DOB** means Daily Operating Bulletin (from Transport Canada).

**DOT** means U.S. Department of Transportation.

**DOUDS** means Downtown Ottawa Urban Design Strategy.

**DSD** means Decision Sight Distance.

**DSP** means digital signal processor.

**DSS** means designated substance survey.

**DVD** means digital versatile disk.

**E&M** means Electrical and Mechanical.

**EA** means Environmental Assessment.

**EAS** means Emergency Alarm Station or Existing Adjacent Structure(s).

**ECA** means Environmental Compliance Approval

**EEMAC** means Electrical Equipment Manufacturers Association of Canada.

**EGFP** means equipment ground fault protection.

**EMC** means electromagnetic compatibility.

**EMI** means electromagnetic interference.

**EN** means European Norms.

**EPROM** means erasable, programmable read-only memory.

**ERP** means Emergency Response Plan.

**ESA** means Electrical Standards Association or Electrical Safety Authority.

**ESC** means Erosion and Sediment Control (part of Erosion and Sediment Control Plan).

**ESP** means emergency service providers.

**ETEL** means Emergency Telephone.

**FACP** means fire alarm control panel.

**FAI** means First Article Inspection.

**FBCU** means friction brake control unit.

**FCC** means Federal Communications Commission.

**FEA** means Finite Element Analysis.

**FHWA** means Federal Highway Administration.

**FLS** means Fire Life Safety and fatigue limit states.

**FLSSC** means Fire Life Safety and Security Committee.

**FLUDTA** means Federal Land Use, Design and Transaction Approval

**FMEA** means Failure Mode and Effects Analysis.

**FMECA** means Failure Mode, Effect, and Criticality Analysis.

**FRA** means Federal Railroad Administration.

**FRACAS** means Failure Reporting and Corrective Action System

**FRP** means fibre reinforced plastic.

**FTA** means Federal Transit Administration or Fault Tree Analysis.

**FTEL** means Tunnel phones

**GANA** means Glass Association of North America.

**GBC** means Green Building Council.

**GBO** means General Bulletin Order (from Transport Canada).

**GDSOH** means Geometric Design Standards for Ontario Highways (Ministry of Transportation).

**GDGCR** means Geometric Design Guide for Canadian Roads (Transportation Association of Canada).

**GFCI** means ground fault circuit interrupter.

**GFI** means Ground Fault Interrupter.

**GFRP** means glass fibre reinforced polymer.

**GIDS** means guideway intrusion detection system.

**GIMP** means Geotechnical Instrumentation and Monitoring Plan.

**GIS** means geographic information system.

**GPS** means global positioning system.

**GSC** means geological survey of Canada.

**GUI** means graphic user interface.

**HCFC** means hydrochlorofluorocarbon.

**HINT** means Elevator Help Intercoms

**HFI** means Yard Intercoms

**HGCWD** means Highway-Rail Grade Crossing Warning and Detection System.

**HMI** means Hoist Manufacturers Institute or Human Machine Interface

**[REDACTED]**

**[REDACTED]**

**HPPL** means High Performance Photo Luminescent.

**HSDR** means High Speed Data Radio.

**HTM** means Hazard Tracking Matrix.

**HVAC** means heating, ventilation and air conditioning system.

**IAC** means Intrusion Access Control.

**ICD** means interface control documents.

**ICES** means Interference-Causing Equipment Standards (Industry Canada).

**ICNIRP** means International Commission on Non-Ionizing Radiation Protection.

**ICP** means Incident Command Post.

**IDC** means initiation device circuits.

**IEC** means International Electrotechnical Commission.

**IEEE** means Institute of Electrical and Electronics Engineers or International Electrotechnical Commission for Electrical Equipment.

**IES** and **IESNA** mean Illuminating Engineering Society of North America.

**IP** means internet protocol.

**ISD** means Intersection Sight Distance.

**ISFP** means City of Ottawa Integrated Street Furniture Policy and Design Guidelines.

**ISO** means International Standards Organization.

**ITA** means International Tunnelling Association.

**ITEL** means Passenger Assistance Information Telephones

**JHSC** means joint health and safety committee.

**LAN** means local area network.

**LCD** means liquid-crystal display.

**LCU** means local control unit.

**LED** means light emitting diode.

**LEED** means Leadership in Energy and Environmental Design.

**LID** means Low Impact Development.

**LKI** means landmark kilometre inventory.

**LLEPM** means Low Location (or level – in vehicles) Exit Path Marking.

**LLRU** means Lowest Line Replaceable Unit

**LOS** means Level of Service.

**LRT** means Light Rail Transit.

**LRU** means Line Replaceable Unit.

**LRV** means light rail vehicle.

**LSD** means limits state design.

**LV** means low voltage.

**LVC** means length of vertical curve.

**LVPS** means low voltage power supply.

**M&R** means Maintenance and Rehabilitation.

**MDBF** means Mean Distance Between Failure

**MDE** means Maximum Design Earthquake.

**MERV** means Minimum Efficiency Reporting Value.

**MEMS** means micro-electro-mechanical systems.

**MFIPPA** means the Municipal Freedom of Information and Protection of Privacy Act.

**MHIA** means Materials Handling Industry of America.

**MIL** means U.S Military Standard.

**MNECB** means Model National Energy Code for Buildings.

**MOECC** means Ontario Ministry of the Environment and Climate Change.

**MOL** means Ministry of Labour.

**MOW** means maintenance-of-way.

**MSE** means mechanically stabilized earth.

**MTBF** means Mean Time Between Failures.

**MTBSAF** means mean time between service affecting failures.

**MTEL** means Maintenance Telephones.

**MTM** means Modified Transverse Mercator.

**MTO** means Ontario Ministry of Transportation.

**MTTR** means Mean Time To Repair.

**MUP** means Multi-Use Pathway.

**MUTCD** means Manual for Uniform Traffic Control Device.

**MV** means medium voltage.

**NAC** means notification appliance circuits.

**NACE** means National Association of Corrosion Engineers.

**NAD** means North American Datum.

**NB** means northbound.

**NBCC** means National Building Code of Canada.

**NCC** means National Capital Commission.

**NCMA** means National Concrete Masonry Association.

**NEB** means National Energy Board

**NEBB** means National Environmental Balancing Bureau.

**NECB** means National Energy Code (of Canada) for Buildings.

**NEMA** means National Electrical Manufacturer's Association.

**NESC** means National Electrical and Safety Code.

**NFCC** means National Fire Code of Canada.

**NFPA** means National Fire Protection Association.

**NFRC** means National Fenestration Rating Council.

**NHI** means National Highway Institute.

**NMI** means New Municipal Infrastructure.

**NMS** means Network Management System

**NPCC** means National Plumbing Code of Canada.

**NRC** means the National Research Council.

**NRCA** means National Roofing Contractors Association.

**NSF** means National Sanitation Foundation.

**NTD** means note to draft.

**NVR** means network video recorder.

**OBC** means Ontario Building Code.

**OCS** means Overhead Catenary System.

**ODE** means Operating Design Earthquake.

**ODV** means over-dimensional vehicle.

**OESC** means Ontario Electrical Safety Code.

**OFC** means Ontario Fire Code.

**OGS** means oil/grit separators

**OHA** means operating hazard analysis.

**OHSA** means the *Occupational Health and Safety Act* (Ontario).

**O&M** means Operations and Maintenance.

**OMCIA** means the Ottawa Macdonald Cartier International Airport.

**OMCIAA** means the Ottawa Macdonald Cartier International Airport Authority.

**OMNR** means Ontario Ministry of Natural Resources.

**OPP** means Ontario Provincial Police.

**OPS** means Ontario Provincial Standard or Ottawa Police Services.

**OPSD** means Ontario Provincial Standard Drawings.

**OPSS** means Ontario Provincial Standard Specifications.

**OSCE** means Ontario Electrical Safety Code.

**OSIM** means Ontario Structure Inspection Manual.

**OSIMS** means Ontario Structure Inspection Management Systems.

**OSTC** means Ottawa Seniors Transportation Committee.

**OTM** means Ontario Traffic Manual.

**OWS** means Operation Work Station.

**PA** means public address.

**PBD** means performance based design.

**PABX** means private automated branch exchange.

**PCB** means polychlorinated biphenyl.

**PDI** means Plumbing and Drainage Institute.

**PEI** means Passenger Emergency intercom.

**PEO** means Professional Engineers of Ontario.

**PERP** means Ontario Provincial Emergency Response Plan.

**PGFP** means personal ground fault protection.

**PHA** means Preliminary Hazard Analysis.

**PHL** means Preliminary Hazard List.

**PID(S)** means Passenger information display (systems).

**PIS** means public information system.

**PLC** means Programmable Logic Controller.

**PPE** means personal protective equipment.

**PPHPD** means passenger per hour per direction.

**PPUDO** means Passenger Pick-Up and Drop-Off.

**PROM** means programmable read-only memory.

**PRP** means Property Request Plan.

**PSPC** means Public Services and Procurement Canada.

**PTI** means Post-Tensioning Institute.

**PTTW** means Permit to Take Water.

**PTU** means portable test unit.

**PTZ** means pan tilt zoom.

**PVB** means polyvinyl butyral.

**PVC** means polyvinyl chloride.

**PVDF** means polyvinylidene fluoride.

**PVMS** means portable variable-message signs.

**PXO** means pedestrian crossover(s).

**RAMS** means reliability, availability, maintainability and safety.

**RBE** means Railway Bridge Engineer.

**RBM** means rail bound manganese.

**RCMP** means Royal Canadian Mounted Police.

**RCP** means reinforced concrete pipe.

**RETC** means Rapid Excavation and Tunneling Conference.

**RH** means relative humidity.

**RMA** means Roadway Modification Approval.

**RMP** means Requirements Management Plan.

**ROM** means read-only memory.

**ROW** means right-of-way.

**RRFB** means rectangular rapid flashing beacon.

**RRTS** means Rules Respecting Track Safety (TC).

**RSA** means Railway Safety Act.

**RSS** means radio standards specification in Schedule 15-2, Part 3 - Systems.

**RSS** means Retained Soil System in Schedule 15-2, Part 2 – Civil and Guideway.

**RTU** means remote terminal units.

**RVCA** means Rideau Valley Conservation Authority.

**S&TC(S)** means Signalling and Train Control (System).

**SAE** means Society of Automotive Engineers.

**SAP** means System Assurance Program.

**SAR** means Species-at-Risk.

**SAT** means System Acceptance Test(ing)

**SB** means southbound.

**SCADA** means Supervisory Control and Data Acquisition.

**SCIL** means safety critical items list.

**SCM** means Safety Certification Manager.

**SeCM** means Security Certification Manager.

**SEMP** means System Engineering Management Plan.

**SeRTM** means Security Requirement Traceability Matrix.

**SES** means “Subway Environment Simulation” software, originally referenced in the “Subway Environmental Design Handbook” (US Department of Transportation, Washington, DC, USA).

**SeVM** means Security Verification Matrix.

**SI** means System Infrastructure.

**SIL** means Safety Integrity Level.

**SIMP** means systems integration management plan.

**SINAD** means signal-to-noise and distortion ratio.

**SIT** means Systems Integration Test as defined in Schedule 14 – Testing and Commissioning.

**SLC** means subscriber line carrier.

**SLR** means Seasonal Load Restrictions.

**SLS** means Serviceability Limit State.

**SMACNA** means Sheet Metal and Air-conditioning Contractors' National Association.

**SNCA** means South Nation Conservation Authority.

**SOP** means Standard Operating Practice/Procedure.

**SPL** means sound pressure level.

**SRTM** means Safety Requirement Traceability Matrix.

**SSAP** means System Safety Assurance Plan.

**SSCP** means System Safety Certification Plan.

**SSCRT** means Safety and Security Certification Review Team.

**SSD** means Stopping Sight Distance.

**SSeAP** means System Security Assurance Plan.

**SSeCP** means System Security Certification Plan.

**SSePP** means System Security Program Plan.

**SSHL** means Subsystem Hazard List.

**SSORC** means Safety and Security Operations Review Committee.

**SSPC** means Society for Protective Coatings.

**SSPP** means System Safety Program Plan.

**SSRTM** means System Safety Requirement Traceability Matrix.

**SSVM** means System Safety Verification Matrix.

**SVM** means Safety Verification Matrix.

**STEL** means Staff Telephones

**STO** means Société de transport de l'Outaouais.

**SWM** means stormwater management.

**SWMP** means Stormwater Management Practice.

**T&DI** means Transportation and Development Institute.

**TAB** means testing, adjusting and balancing.

**TAC** means Transportation Association of Canada.

**TC** means Transport Canada.

**TCD** means Traffic Control Device.

**TCP** means Traffic Control Plan or Transmission Control Protocol.

**TCRP** means Transit Cooperative Research Program.

**TCS** means Train Control System.

**TCU** means Traction Control Unit.

**THR** means Tolerable Hazard Rate.

**TIA** means Telecommunications Industry Association or Transportation Impact Assessment (City of Ottawa).

**TIAC** means Thermal Insulation Association of Canada.

**TIMP** means Traffic Incident Management Plan.

**TIP** means Transit Information Panel.

**T&I** means Telephones and Intercoms.

**TLV** means Threshold Limit Value.

**TMIP** means Traffic Management Implementation Plan.

**TNPI** means [REDACTED].

**TOCC** means Transit Operations Control Centre.

**TOD** means Transit-Oriented Development.

**TOR** means top of rail.

**TSA** means transsecure area.

**TSB** means Transportation Safety Board (of Canada).

**TSS** means total suspended solids.

**TSSA** means Technical Standards & Safety Authority.

**TTEL** means Tunnel Telephones.

**TTMP** means Traffic and Transit Management Plan.

**TVA** means Threat and Vulnerability Analysis.

**TVS** means Tunnel ventilation system.

**TVSS** means transient voltage surge suppressor.

**TWSI** means tactile walking strip indicators.

**UIC** means Union International Des Chemin de Fer

**UL** means Underwriter's Laboratories.

**ULC** means Underwriter's Laboratories of Canada.

**ULS** means Ultimate Limit State.

**UPS** means uninterruptible power supply.

**UV** means ultraviolet (solar radiation).

**VAC** means volts alternating current.

**VISSIM** means the microscopic multi-modal traffic flow simulation software package used to develop traffic models.

**VL** means vulnerability log.

**VLAN** means virtual local area network.

**VLS** means Vehicle Location System.

**VMIS** means Vital Microprocessor Interlocking System.

**VMS** means Vehicle Monitoring System.

**VOC** means volatile organic compound.

**VoIP** means voice over internet protocol.

**WAN** means wide area network.

**WHMIS** means Health Canada's Workplace Hazardous Materials Information System.

**WNC** means the West Nepean Collector.

**WSD** means Working Stress Design.

**WSIB** means Workplace Safety and Insurance Board.

**YCC** means yard control centre.

**YCS** means yard control system.

**ZOI** means Zone of Influence.

## ARTICLE 3 REFERENCE DOCUMENTS

### 1.1 General

- (a) Codes, standards, manuals, installation, application and maintenance instructions, and other reference documents referred to in the Output Specifications, unless otherwise specified and unless otherwise stated in governing legislation, shall be the latest published editions at the date of Commercial Close.
- (b) Project Co shall conform to codes, standards, manuals, installation, application and maintenance instructions, and other Reference Documents referred to in the Output Specification.
- (c) If there is a question regarding whether any product, material, component, assembly or system is in conformance with applicable requirements, the City reserves the right to have such products, materials, components, assemblies or systems tested at Project Co's cost to prove or disprove conformance. The cost for testing will be borne by the City in the event of conformance with the Output Specification, or by Project Co in the event of non-conformance.
- (d) Refer to the Project Agreement and the Ontario Building Code for definitions applicable to the Project.

### 1.2 Reference Documents

#### Reference Documents in Schedule 15

#### Description of Reference Documents

14 CFR 25.853	Code of Federal Regulations, Title 14: Aeronautics and Space; Part 25.853 – Compartment Interiors
29 CFR 1910.19	Code of Federal Regulations, Title 29: Labor; Part 1910.19 – Special Provisions for Air Contaminants
40 CFR 82	Code of Federal Regulations, Title 40: Protection of Environment; Part 82 – Protection of Stratosphere Ozone
49 CFR 223	Code of Federal Regulations, Title 49: Transportation; Part 223 – Safety Glazing Standards - Locomotives, Passenger Cars and Cabooses
49 CFR Part 238	Code of Federal Regulations, Title 49: Transportation; Part 238 – Passenger Equipment Safety Standards

ASTM A6	ASTM A6 General Requirements for Rolled Structural Steel Bars, Plates, Shapes and Sheet Piling
ASTM A53	ASTM A53 Pipe, Steel, Black and Hot-Dipped, Zinc-Coated, Welded and Seamless
ASTM A82 / A82M	ASTM A82 / A82M Steel Wire, Plain for Concrete Reinforcement
ASTM A105	ASTM A105 Carbon Steel Forgings for Piping Applications
ASTM A106	ASTM A106 Seamless Carbon Steel Pipe for High-Temperature Service
ASTM A123	ASTM A123 Zinc (Hot-Dip Galvanized) Coatings on Iron and Steel Products
ASTM A153M-03e	ASTM A153M-00 Zinc Coating (Hot Dip) on Iron and Steel Hardware
ASTM A167	ASTM A167 Stainless and Heat-Resisting Chromium-Nickel Steel Plate, Sheet, and Strip
ASTM A185	ASTM A185 Steel Welded Wire Reinforcement, Plain, for Concrete
ASTM A193	ASTM A193 Alloy-Steel and Stainless Steel Bolting for High Temperature or High Pressure Service and Other Special Purpose Applications
ASTM A197	ASTM A197 Cupola Malleable Iron
ASTM A234	ASTM A234 Piping Fittings of Wrought Carbon Steel and Alloy Steel for Moderate and High Temperature Service
ASTM A240	ASTM A240 Chromium and Chromium-Nickel Stainless Steel Plate, Sheet and Strip for Pressure Vessels and for General Applications
ASTM A269	ASTM A269 Seamless and Welded Austenitic Stainless steel Tubing for General Service
ASTM A276-04	ASTM A276-04 Stainless Steel Bars and Shapes
ASTM A307	ASTM A307 Carbon Steel Bolts and Studs
ASTM A325M	ASTM A325M Structural Bolts, Steel, Heat Treated, 120/105 ksi Minimum Tensile Strength

**Reference Documents in Schedule 15**

**Description of Reference Documents**

ASTM A416/416M-06	ASTM A416/416M-06 Steel Strand, Uncoated Seven-Wire for Prestressed Concrete
ASTM A421/421M-05	ASTM A421/421M-05 Uncoated Stress-Relieved Steel Wire for Prestressed Concrete
ASTM A496/A496M	ASTM A496/A496M Steel Wire, Deformed for Concrete Reinforcement
ASTM A497/A497M	ASTM A497/A497M Steel Welded Wire Reinforcement, Deformed, for Concrete
ASTM A515	ASTM A515 Pressure Vessel Plates, Carbon Steel, for Intermediate- and Higher-Temperature Service
ASTM A516	ASTM A516 Pressure Vessel Plates, Carbon Steel, for Moderate- and Lower Temperature Service
ASTM A563	ASTM A563 Carbon and Alloy Steel Nuts
ASTM A568	ASTM A568 General Requirements for Steel, Sheet, Carbon, Structural, and High-Strength, Low-Alloy, Hot-Rolled and Cold-Rolled
ASTM A588	ASTM A588 High-Strength Low-Alloy Structural Steel
ASTM A606	ASTM A606 Steel, Sheet and Strip, High-Strength, Low-Alloy, Hot-Rolled and Cold-Rolled, with Improved Atmospheric Corrosion Resistance
ASTM A653/A653M	ASTM A653/A653M Steel Sheet, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvannealed) by the Hot-Dip Process
ASTM A666	ASTM A666 Annealed or Cold-Worked Austenitic Stainless Steel Sheet, Strip, Plate and Flat Bar
ASTM A775/A775M	ASTM A775/A775M Epoxy Coated Reinforcing Steel Bars
ASTM B33	ASTM B33 Tin-Coated Soft or Annealed Copper Wire for Electrical Purposes
ASTM B209	ASTM B209 Aluminum and Aluminum Alloy Sheet and Plate

**Reference Documents in Schedule 15**

**Description of Reference Documents**

ASTM B221	ASTM B221 Aluminum and Aluminum-Alloy Extruded Bars, Rods, Wires, Profiles and Tubes
ASTM B280	ASTM B280 Seamless Copper Tube for Air Conditioning and Refrigeration Field Service
ASTM B584	ASTM B584 Copper Alloy Sand Castings for General Applications
ASTM C67	ASTM C67 Sampling and Testing Brick and Structural Clay Tile
ASTM C260	ASTM C260 Air-Entraining Admixtures for Concrete
ASTM C452-75	ASTM C452-75 Potential Expansion of Portland-Cement Mortars Exposed to Sulfate
ASTM C494/C494M	ASTM C494/C494M Standard Specification for Chemical Admixtures for Concrete
ASTM C507-95a	ASTM C507-95a Reinforced Concrete Elliptical Culvert, Storm Drain and Sewer Pipe
ASTM C534	ASTM C534 Preformed Flexible Elastomeric Cellular Thermal Insulation in Sheet and Tubular Form
ASTM C542	ASTM C542 Lock-Strip Gaskets
ASTM C547	ASTM C547 Mineral Fiber Pipe Insulation
ASTM C553	ASTM C553 Mineral Fiber Blanket Thermal Insulation for Commercial and Industrial Applications
ASTM C568	ASTM C568 Limestone Dimension Stone
ASTM C612	ASTM C612 Mineral Fiber Block and Board Thermal Insulation
ASTM C615	ASTM C615 Granite Dimension Stone
ASTM C716	ASTM C716 Installing Lock-Strip Gaskets and Infill Glazing Materials
ASTM C864	ASTM C864 Dense Elastomeric Compression Seal Gaskets, Setting Blocks and Spacers
ASTM C881/C881M	ASTM C881/C881M Epoxy-Resin-Base Bonding Systems for Concrete

**Reference Documents in Schedule 15**

**Description of Reference Documents**

### Disclaimer:

The contractor is responsible to ensure that all safety codes are adhered to during performance of work associated with this permit. Construction materials and tools must NOT be left unattended at any time. ALL tools and construction materials MUST be removed from the worksite at the end of each work day.

**Work Plan - Provide complete details and / or schedule as well as specifics for each checkbox marked "yes"**

### On-Site Service Personnel Information

\*Restricted Area Identity Card - if "yes", complete the tab marked "RAIC"

## **APPENDIX B**

### **City Systems Integration Obligations**

Task Name	Duration*
<b>Expand NMS</b>	
Draft head end specs and procure	80 days
Upgrade /install hardware	15 days
Software/licenses	15 days
NMS GUI station design	40 days
Integrate new station CTS equipment to NMS	20 days
Station SAT & regression test	10 days
Complete CTS SIT(NMS to station) after fibre loops closed	5 days
<b>Telephone &amp; Intercom System (Article 3)</b>	
<b>Expand PABX</b>	
Draft head end specs and procure	80 days
Upgrade /install hardware	10 days
Software/licenses	10 days
PABX upgrade SAT regression test	10 days
<b>PA/PIDS (Article 4)</b>	
ICD Centralized message generator	20 days
ICD supervision/failure management	0 days
PIDS Database	20 days
<b>Expand PA/PIDS Head End</b>	
Draft head end specs and procure	80 days
Upgrade /install hardware	10 days
Software/licenses	10 days
PA/PIDS upgrade SAT regression test	10 days
<b>VDRS (Article 5)</b>	
Perform spec and design criteria	40 days
<b>CCTV System (Article 7)</b>	
<b>Expand CCTV Head End</b>	
Draft head end specs and procure	80 days
Upgrade /install server hardware	15 days
Procure Software/licenses	10 days
Conduct CCTV head-end upgrade SAT regression test	10 days
<b>SCADA System (Article 8)</b>	
<b>Expand SCADA Head End</b>	
Draft head end specs and procure	80 days
Upgrade and/or install hardware	15 days
Procure software/licenses	10 days
GUI station design	40 days
Conduct SAT /regression test of head-end	10 days

Task Name	Duration*
<b>Intrusion Access Control System (Article 9)</b>	
<b>Expand IAC Head End</b>	
Draft head end specs and procure	80 days
Upgrade /install hardware	10 days
Software/licenses	10 days
GUI station design	40 days
<b>Cellular System (Article 12)</b>	
Produce Cellular System specifications and design criteria	80 days
Procure and install active repeater equipment for coverage	80 days
SIT	5 days

\* Durations are provided in Business Days

APPENDIX A	OMCIAA Work Permit	

**SCHEDULE 15-2  
DESIGN AND CONSTRUCTION**

**PART 1        DESIGN AND CONSTRUCTION REQUIREMENTS - GENERAL  
REQUIREMENTS**

**ARTICLE 1        REFERENCE DOCUMENTS AND SUBMITTALS**

**1.1        Application of the Reference Documents, Standards and Procedures, City Standards, Ontario Provincial Standards for Roads and Public Works and Other Manuals, Codes and Standards**

- (a)        The Works, shall be carried out in accordance with the applicable Reference Documents, and with the following amendments:
  - (i)        Requirements related to design and submission requirements and quality assurance in the Reference Documents do not apply; rather, the Output Specifications and express requirements of this Project Agreement, including Schedule 11 – Integrated Management System Requirements, respectively shall apply;
  - (ii)       Requirements and specifications in the Reference Documents related to equipment for performing the Works do not apply;
  - (iii)      Sections within the Reference Documents that are not applicable to this Project, such as payment terms, do not apply;
  - (iv)      Any and all references to “approval by the Contract Administrator” or other such reference in the Reference Documents, in terms of acceptance of materials, permission to proceed, work methodology or end product, shall be construed as being the responsibility of Project Co, but each such instance shall be in consultation applicable Governmental Authorities;
  - (v)       Project Co shall consult with the City to determine which Reference Documents submissions are to be submitted under Schedule 10 – Review Procedure;
  - (vi)       Project Co shall, when required in the Reference Documents to submit for approval by the City samples of any products proposed by Project Co, submit such samples with supporting documentation to the City in accordance with the Schedule 10 - Review Procedure; and,
  - (vii)      The OPS specifications that apply to the Works shall only include the municipal and provincial common standards in OPS Volumes 1 through 4 and the municipal-oriented specifications in OPS Volumes 7 and 8, unless specified otherwise in Schedule 15 – Output Specifications.

**1.2        Reference Documents**

- (a)        Without limiting any other provision in this Project Agreement, the Reference Documents shall apply to the Works as described in Schedule 15-2 – Design and Construction Requirements.

### **1.3 Order of Precedence**

- (a) Unless otherwise expressly provided in Schedule 15-2 – Design and Construction Requirements, if there is any conflict between any of the provisions of this Project Agreement and any of the Reference Documents, the following shall apply in descending order of precedence:
  - (i) Applicable laws and regulations;
  - (ii) the provisions of this Project Agreement;
  - (iii) City Standards and procedures;
  - (iv) OPS; and,
  - (v) any other applicable Reference Documents.

### **1.4 Reference Concept**

- (a) Any use by Project Co of any or all aspects of the Reference Concept in performing the design and construction Works shall be entirely at Project Co's own risk. Use of the Reference Concept as a basis for Project Co's design for any part of the Project does not guarantee the City approval of Project Co's design.

### **1.5 Submittals**

- (a) Project Co shall be responsible for determining any and all necessary Works Submittals, as specified in the relevant sections of this Schedule 15-2 – Design and Construction Requirements, whether or not a specific reference to Schedule 10 – Review Procedure is specifically mentioned.

**ARTICLE 2                      PHYSICAL LAYOUT**

**2.1        Existing Infrastructure**

- (a) Existing infrastructure is comprised of, but not limited to, the following existing major components:
- (i) Approximately 8km of single Track from Greenboro Station north to Bayview Station used to provide Passenger service.
  - (ii) Approximately 4km of single Track south of Greenboro Station used to facilitate freight movements to the NRC Facility.
  - (iii) Passing sidings at Brookfield, Carleton and Gladstone.
  - (iv) Absolute block signal system, with Indusi intermittent, inductive automatic Train stop devices.
  - (v) Five Stations:
    - A. Bayview Station;
    - B. Carling Station;
    - C. Carleton Station;
    - D. Mooney's Bay Station; and,
    - E. Greenboro Station.
  - (vi) Dow's Lake Tunnel and associated systems
  - (vii) Rail Carrying Bridge Structures:
    - A. Rideau River Bridge (SN015290);
    - B. Southeast Transitway Bridges – Ellwood diamond (SN055930);
    - C. Sawmill Creek Bridge (SN055200);
    - D. Sawmill Creek Culvert (SN055470);
    - E. Walkley Yard Lead over Transitway (SN055900);
    - F. Rail Bridge over Transitway at Walkley Yard Connecting Track (SN055910);
    - G. Hunt Club Road Bridge (SN055350);
    - H. Rail Bridge over MUP at South Keys Station (SN058490);
    - I. South Rail Bridge over MUP at Carleton University (SN018510); and,

- J. North Rail Bridge over MUP at Carleton University (SN018490)
- (viii) Drainage infrastructure, including ditches, storm sewers, and Culverts, associated with the Track and passing sidings.
- (ix) Perimeter fencing of the alignment and landscape features within the Existing Trillium Line corridor and from Greenboro Station to the NRC Facility.
- (b) Upon commencement of the Shutdown Period, Project Co shall take full responsibility for all existing infrastructure and the Existing Vehicle Fleet including the Maintenance and Security of such infrastructure. For further clarity, upon commencement of the Shutdown Period, the Existing Trillium Line ROW including all existing infrastructure will be deemed Project Co's construction Site under the Occupational Health and Safety Act (Ontario).
- (i) The Ellwood and [REDACTED]/Walkley diamonds are active railway crossings that are subject to crossing agreements with Railway Companies described in Schedule 16 – Encumbrances. Upon the start of the Shutdown Period, Project Co shall be required to take full responsibility for the Maintenance and operation of these crossing agreements in accordance with the requirements set out in the crossing agreements, as outlined in Schedule 16 Article B, and as further outlined in Article 5 – Implementation Constraints, of this Part 1.
- (ii) Project Co shall be responsible for rail traffic control, dispatch and maintenance over the Ellwood Diamond from the start of the Shutdown Period until such time as Project Co has completed the decommissioning of the interlocking infrastructure at the diamond and [REDACTED] has assumed full control and responsibility for dispatch on their line.
- (iii) Project Co shall be responsible for rail traffic control, dispatch (east-west movements across the Walkley Diamond or movements to the NRC Facility) and maintenance over the Walkley Diamond from the start of the Shutdown Period until such time as Project Co has commissioned and turned over the new dispatch system as outlined in Schedule 15-2 Part 3 Article 10.2 to the City and the City has assumed full control and responsibility for dispatch. Project Co shall provide flagging or other suitable rail traffic controls to enable [REDACTED] and NRC rail traffic through the interlocking during the construction period.
- (iv) Project Co acknowledges that the Existing Trillium Line is not entirely fenced. Project Co shall determine where gaps in the fence exist and where repair work is required to the fence and shall complete fence installation and repairs prior to the Shutdown Period to ensure Security of the Site and compliance with this Article 2.
- (v) Project Co shall prepare and submit, in accordance with Schedule 10 – Review Procedure, a Transition and Maintenance Plan no later than three months in advance of the Shutdown Period that outlines how Project Co intends to comply with the requirements of this Article 2 and the Project Agreement as of the Shutdown Period commencement. Project Co shall co-ordinate with the City, the City's current Maintenance providers on the Existing Trillium Line, [REDACTED] and [REDACTED] in the preparation of the Transition and Maintenance Plan.

## **2.2 System Infrastructure**

(a) System Infrastructure shall include the following:

(i) Project Co may incorporate any of the existing infrastructure in whole or in part, modified or unmodified into the System Infrastructure with the exception of the following:

- A. The Existing Walkley Yard currently located east of Albion Road; and,
- B. The Dow's Lake Tunnel structure.

(ii) System Infrastructure shall consist of the following:

- A. Approximately 19.5km of Guideway and Track from Bayview Station to Limebank Station;
- B. A 4.5km Airport Link from South Keys Station to the OMCIA;
- C. Passing sidings at Gladstone, Carleton, Brookfield, South Keys and Leitrim;
- D. Passing siding at Uplands;
- E. Eleven Stations on the Expanded Trillium Line:
  - i. Bayview Station;
  - ii. Gladstone Station;
  - iii. Carling Station;
  - iv. Carleton Station;
  - v. Mooney's Bay Station;
  - vi. Walkley Station;
  - vii. Greenboro Station;
  - viii. South Keys Station;
  - ix. Leitrim Station;
  - x. Bowesville Station; and,
  - xi. Limebank Station.
- F. Two Stations on the Airport Link:
  - i. Uplands Station; and,
  - ii. Airport Station.

- G. New Walkley Yard to be constructed west of Albion Road with northbound and southbound connection Tracks;
  - H. New rail, road and pedestrian facilities and Structures;
  - I. New Signalling and Train Control System;
  - J. New communications systems and infrastructure;
  - K. Perimeter fencing and landscaping;
  - L. Drainage infrastructure, including ditches, storm sewers, and Culverts, associated with the Track and passing sidings;
  - M. Dow's Lake Tunnel ventilation and drainage systems and facilities;
  - N. The Existing Vehicle Fleet; and,
  - O. The New Vehicle Fleet.
- (iii) Project Co shall decommission and remove any Existing Trillium Line assets that are not being incorporated into SI and have been made redundant following the implementation of the Expanded Trillium Line, including but not limited to, existing signal bungalows, existing signal infrastructure and existing Bridges.
- (b) All SI shall be designed and constructed in accordance with Transport Canada rules and regulations including, but not limited to, the Canadian Transportation Agency Code of Practice in addition to the OC Transpo Transitway and Station Design Guidelines, June 2013.
- (c) All SI shall be upgraded and / or designed and constructed to meet the requirements of NFPA130 and OBC313.
- (i) A consolidated NFPA requirements matrix shall be provided for review and approval by the AHJ in accordance with Schedule 10 – Review Procedure.

### **2.3 New Municipal Infrastructure**

- (a) The New Municipal Infrastructure physical layout is detailed in Article 14.4.

### **2.4 General Alignment Requirements**

- (a) The alignment falls within existing City ROW and the permanent takings as described in Schedule 33 – Lands. Project Co shall Design the Guideway alignment within the Lands as prescribed in Schedule 33 – Lands.
- (b) Guideway Requirements.
- (i) The Guideway shall be completely fenced and segregated from any pedestrian and vehicular traffic, with the exception of the following:

- A. The Walkley diamond where the Guideway fence shall be connected to the existing fence associated with the crossing railway.
    - B. If required, the NRC spur line crossing of Lester Road at-grade as outlined in Schedule 15-2, Part 3, Article 10 – Signalling and Train Control System.
  - (ii) Fencing location, type and height shall be as outlined in Schedule 15-2, Part 6, Article 2 – Design Criteria.
  - (iii) Emergency egress points that will allow ESP access as per the requirements of NFPA 130 shall be provided with secure Maintenance/Emergency access gates, where fences are installed for separation as per clause (i) above. A unique identification system shall be developed for the gates in consultation with the City and signage shall be fixed to both sides of each gate for identification purposes. Maintenance access gates shall be coordinated with Emergency egress and access gates.
    - A. The Airport Emergency route ER-2 vehicular crossing shall be as outlined in Schedule 15-2, Part 3, Article 10 – Signalling and Train Control System.
  - (iv) Project Co shall provide all fencing, gates and Security required to secure the NRC spur line and the Trillium Line from the NRC Facility.
- (c) Crossings
  - (i) The following rail and vehicular at-grade crossings shall be incorporated into the Project:
    - A. Walkley diamond rail crossing;
    - B. Airport Emergency Route ER-2 vehicular crossing; and,
    - C. NRC Spur Line crossing of Lester Road vehicular crossing, if required.
- (d) The Airport Link is primarily located on Federal Lands leased to the OMCIAA, and is therefore subject to review by the NCC as are other components of the Project proposed on Federal Lands as outlined in the NCC Trillium Line South Extension Approval Letter dated September 14, 2017. Project Co shall be responsible for design and construction of all components of the Project on Federal Lands in accordance with the following:
  - (i) The National Capital Act makes the NCC responsible for coordinating and approving projects related to Federal Lands and buildings in Canada's National Capital Region. The NCC is a Crown Corporation and therefore functions at a distance from the federal government, reporting to Parliament through the Minister of Canadian Heritage.
  - (ii) All individuals and federal organizations need NCC approval before undertaking projects on Federal Lands and buildings in Canada's National Capital Region.
  - (iii) The NCC's mandate to approve federal land uses, transactions and designs is set out in sections 12 and 12.1 of the National Capital Act.

- (iv) Project Co's approach to Works on Federal Lands including the Airport Link shall be subject to review by the NCC and shall be assessed in terms of compliance with the guiding principles contained within this Project Agreement:
  - A. Project Co shall be responsible to develop designs and design documentation to support the City and the OMCIAA in obtaining NCC approval, including but not limited to:
    - i. Attending meetings with the City, the OMCIAA and NCC;
    - ii. Providing design documentation, reports, renderings and specifications to be used in the approval process; and,
    - iii. Presenting the Airport Link to the Advisory Committee on Planning Design and Realty at the NCC.

## **2.5 Systems Requirements**

- (a) Project Co shall be responsible for the design, construction testing, Commissioning Plans, Commissioning Tests and Maintenance of a new S&TCS capable of providing continuous cab signaling and Train protection required for the safe and efficient operation of the Expanded Trillium Line, including a head-end management platform and dispatch function at the TOCC & BCC. The head-end management platform for the S&TC system shall be comprised of both hardware and software that provides the command and control capability for the Expanded Trillium Line's new S&TCS and shall include new operator workstations along with the graphical user interfaces connected to servers running industry standard operating systems, and the communications transmission infrastructure required to support operations, monitoring and alarm handling of the field equipment along the alignment.
- (b) Project Co shall be responsible for the design, construction, testing, Commissioning Plans, Commissioning Tests and Maintenance of the following communications systems and co-ordination with the City the integration of these communications systems with the existing head-end management platform at the TOCC & BCC;
  - (i) CTS;
  - (ii) PA/PIDS;
  - (iii) CCTV;
  - (iv) IAC;
  - (v) T&I System;
  - (vi) SCADA system; and,
  - (vii) Voice and Data Radio System.
- (c) The head-end management platform for the communications systems is the existing communications system architecture made up of both hardware and software that provides the command and control capability for the communications systems. It includes existing operator

workstations along with the graphical user interfaces connected to servers running industry standard operating systems, and the communications transmission infrastructure required to support operations, monitoring and alarm handling of the field equipment along the alignment.

- (d) Project Co shall be responsible for overall Systems Integration Tests, coordination and integration between all System elements and interfacing disciplines including integration with the Revenue Vehicles, fare collection system, communications systems, and other interfacing systems. Interfacing disciplines includes but is not limited to infrastructure, facilities, subsystems, software, Operations personnel and Maintenance personnel, etc.
- (e) The City shall integrate the Expanded Trillium Line's communications systems into the Confederation Line's existing head-end management platform. Project Co's physical cable and equipment demarcation for all communications systems shall be the CTS equipment cabinet at Bayview Station. Project Co shall connect the Expanded Trillium Line's new CTS to the Confederation Line's CTS. As the systems integrator, Project Co shall be responsible for the overall systems integration including the planning, scheduling, coordination, and acceptance of this work.

## **2.6 Vehicle Requirements**

- (a) Project Co shall provide all Non-Revenue Vehicles, including Maintenance Vehicles required to Maintain the SI.
- (b) The City shall turnover to Project Co the existing fleet of 6 Alstom LINT 41 Vehicles. Project Co shall be responsible for all upgrades, Maintenance and retrofits required to the Existing Vehicle Fleet.
- (c) Project Co shall provide appropriate standstill Maintenance on the six Alstom LINT 41 Vehicles until such time that they are required for testing and commissioning and/or to be placed into service.
- (d) Project Co shall be responsible for undertaking the scheduled Alstom "F6" 8-year overhaul including a powerpack and transmission overhaul during the Shutdown Period and any other scheduled Maintenance activities that are required by the Alstom inspection and Maintenance schedule, LINT DMU rules, or other Maintenance requirements arising for the Vehicle.
- (e) Project Co shall provide new vehicles as outlined in Schedule 15-2, Part 8 – Vehicles.

## **2.7 Facilities Requirements**

- (a) Station Requirements:
  - (i) The Stations shall be designed and constructed in accordance with any and all applicable standards regarding accessibility and Fire Life Safety, including but not limited to, Emergency egress, lighting and ventilation.
  - (ii) Stations shall be provided with space and Utility services provisions for installation of a fare control system including but not limited to fare control gates and Ticket Machines to be installed by the City.

- A. Project Co shall provide the required supporting infrastructure to allow power and communications connections, including walker ducts and conduits.
  - B. Project Co shall design and construct the location of equipment as to ensure the year round operation of the fare equipment by ensuring that all fare gate equipment is protected from the weather, including rain, snow and sleet in accordance with Schedule 15-2, Part 4, Clause 2.7 (d)(iv) A.
  - C. All fare collection, vending, and control equipment shall be located within the Station structure. If it is not feasible to locate all fare equipment within the Station structure, the equipment shall be protected from the elements in accordance with Schedule 15-2, Part 4 - Stations.
- (iii) All Stations shall be designed and constructed to accommodate the requirements of all Vehicles in the fleet.
  - (iv) Stations shall be designed and constructed with Ancillary Facilities as outlined in Schedule 15-2, Part 4 – Stations.
  - (v) The Stations shall be located along the corridor as described below (note a two-track Station requires Project Co to provide either two side Platforms or a single centre Platform):
    - A. Bayview Station is an existing Terminal Station and Transfer Station to the Confederation Line. Project Co shall extend the existing Platform to accommodate the Revenue Vehicles, expand the Station to provide a second Platform able to accommodate the Revenue Vehicles and provide a new fare paid entrance on the west side of the alignment with a pedestrian Bridge including vertical circulation outside of the Fare Paid Zone as detailed in Schedule 15-2, Part 4 - Stations.
    - B. Gladstone Station shall be a new two-Track Station located on the Existing Trillium Line.
    - C. Carling Station is an existing Station on the Existing Trillium Line. Project Co shall extend the single Track Platform to be able to accommodate the Revenue Vehicles and perform Station upgrades as outlined in Schedule 15-2, Part 4 – Stations.
    - D. Carleton Station is an existing two-Track Station on the Existing Trillium Line. Project Co shall extend both Platforms to be able to accommodate the Revenue Vehicles and perform Station upgrades as outlined in Schedule 15-2, Part 4 – Stations.
    - E. Mooney's Bay Station is an existing single-Track Station on the Existing Trillium Line. Project Co shall extend the single Track Platform to be able to accommodate the Revenue Vehicles and perform Station upgrades as outlined in Schedule 15-, Part 4 – Stations.
    - F. Walkley Station shall be a new single-Track Station located on the Existing Trillium Line.

- G. Greenboro Station is an existing single-Track Station on the Existing Trillium Line. Project Co shall extend the single Track Platform to be able to accommodate the Revenue Vehicles and perform Station upgrades as outlined in Schedule 15-2, Part 4 – Stations.
- H. South Keys Station shall be a new two-Track Station on the Trillium Line Extension and shall operate as a Transfer Station between the Airport Link and the Expanded Trillium Line. A new fare controlled entrance shall be provided to access the Trillium Line.
- I. Leitrim Station shall be a new two-Track Station on the Trillium Line Extension. Leitrim Station shall include an expanded Park and Ride Facility and bus Platforms.
- J. Bowesville Station shall be a new two-Track Station on the Trillium Line Extension. Bowesville Station shall include a Park and Ride Facility and bus Platforms.
- K. Limebank Station shall be a new two-Track Station on the Trillium Line Extension and represents the terminus of the Expanded Trillium Line. Limebank Station shall include an on-street bus Facility.
- L. Uplands Station shall be a new two-Track Station on the Airport Link with an on-street bus Facility.
- M. Airport Station shall be a new single-Track Station on the Airport Link and represents the terminus of the Airport Link. Airport Station shall abut a new Airport Station Concourse and entry to be designed and constructed by the OMCIAA. Project Co shall ensure the design and construction of Airport Station is co-ordinated with the OMCIAA.

**(b) Facilities Requirements – TOCC**

- (i) The City shall integrate all the Expanded Trillium Line communications systems into the head-end management platform at the TOCC including hardware, software and licenses. Refer to Schedule 15-2, Part 3 – Systems.
- (ii) Project Co shall plan, design, install, test and commission all equipment required for the Expanded Trillium Line S&TC head-end management system required at the TOCC.
- (iii) The City shall reserve space in one of the IT equipment rooms in the TOCC for Project Co to install the new S&TCS servers, switches, patch panels and other equipment as required to connect the field S&TCS equipment to the new workstation in the TOCC operational theater.
- (iv) The City shall reserve space in the TOCC operational theater for the two new S&TCS operator workstations.
- (v) The City shall reserve space in the equipment room at 875 Belfast Road TOCC for Project Co to install the new S&TCS equipment as required to connect the field S&TCS equipment to the new workstations and the BCC operational theater.

- (vi) Project Co shall plan, design, install, test and commission all equipment required for the Expanded Trillium Line S&TC head-end management platform.
- (c) Facilities Requirements – BCC
  - (i) The City shall integrate all Expanded Trillium Line communications systems into the BCC including hardware, software and licenses. Refer to Schedule 15-2, Part 3 – Systems.
  - (ii) The City shall reserve space in the BCC operational theater for one new S&TCS operator workstation.
- (d) Facilities Requirements – New Walkley Yard
  - (i) Project Co shall be responsible for the complete planning, design, construction, testing and commissioning, O&M of a New Walkley Yard facility, including the supply of all equipment and Facilities to Maintain the Revenue Vehicles and SI.
  - (ii) The New Walkley Yard shall be designed to meet the functional, accessibility, aesthetic, environmental, Safety, Operation and technical requirements of the City as contained and described in Schedule 15-2, Part 5 – New Walkley Yard.
  - (iii) The New Walkley Yard shall achieve “LEED Certified Rating”.
  - (iv) The New Walkley Yard shall be secured by fencing that is continuous with the fencing that protects the Guideway.
  - (v) Project Co shall provide Security for the New Walkley Yard Site.

## **2.8 Structure Requirements**

- (a) New Structures
  - (i) New Structures located along the Guideway shall include:
    - A. Rail Bridge over Hunt Club Road (SN 055440);
    - B. Hunt Club Road MUP Bridge (SN 058620);
    - C. Rail Bridge over Lester Road (SN 225620);
    - D. Trinity Pedestrian Bridge (SN 018430);
    - E. Leitrim Road Bridge (SN 225610);
    - F. Earl Armstrong Bridge (SN 225680);
    - G. High Road Bridge (SN 225670);
    - H. Bowesville Road Bridge (SN225690);
    - I. Mosquito Creek Rail Bridge (SN225050);

- J. Limebank Road Bridge (SN225710);
- K. Rail Bridge over MUP North of Hunt Club Road (SN 055740);
- L. Pedestrian Overpass North of South Keys Station (SN 055750);
- M. [REDACTED] Grade Separation at Ellwood diamond;
- N. North Rail Bridge over MUP at Carleton University;
- O. University Road Pedestrian Bridge over Rideau River (SN018750);
- P. Rail Bridge over the Airport Parkway (SN 225630);
- Q. Rail Bridge over Uplands Drive (SN 225640); and,
- R. Elevated Guideway to OMCIA Terminal (SN 225110).

(b) The following requirements apply to existing Structures:

- (i) Project Co shall perform such investigations and design checks as may be required to ensure that any existing Structure can be used to support the Guideway including a design check of existing piers for derailment loads. The design check shall be completed in accordance with all applicable codes and standards.
- (ii) Project Co shall Maintain all existing Structures in accordance with the terms and conditions of Schedule 15-3 – Maintenance and Rehabilitation Requirements and shall perform design checks and investigations on all existing Structures. See Schedule 15-2, Part 2, Article 4 – Structural Design Criteria for additional requirements.
- (iii) Should such design checks demonstrate that modification is required to any portion of the Structure, Project Co shall design and construct such modifications and ensure that all applicable codes are met.

## **2.9 Design and Construction Requirements to Accommodate Concurrent and Future Works**

- (a) Project Co shall coordinate with Third Party Contractors who may be performing work which may connect, complement, interfere, or in any manner impact this Project. It is the responsibility of Project Co to work with these Third Party Contractors to fully coordinate interfaces and resolve any disputes or coordination problems that may arise.
- (b) Project Co shall be responsible to be aware of and obtain information related to all Third Party Contractors and their projects. A list of planned projects and projects currently underway can be found on the City of Ottawa Website [www.ottawa.ca/devapps](http://www.ottawa.ca/devapps).
- (c) In addition to the above, Project Co shall be aware of the following projects:
  - (i) The Confederation Line, which includes a new Station Platform on the Existing Trillium Line at Bayview Station, will be completed and put into Operation.

- (ii) The existing Highway 417 overpass of the Existing Trillium Line will be replaced with a single span structure.
  - (iii) The land east of Bayview Station is planned for mixed-use development that will connect to the Trinity Pedestrian Bridge.
  - (iv) Current Carleton passing siding spring switches are being replaced with powered switches, adjusted Track alignment, and new signal equipment.
  - (v) Fare Control implementation is underway at Carleton, Carling and Mooney's Bay Stations.
  - (vi) Walkley Yard Interlocking project is a capital renewal project to replace ties, rail, switch machines, turnouts, and signal equipment.
  - (vii) **[REDACTED]** intends to add three stories to the parking garage facility located overtop the Trillium Line.
  - (viii) The City is planning structural and architectural upgrades to the Greenboro pedestrian Bridge during the Shutdown Period.
  - (ix) The City Traffic Department is planning to install fibre optic cabling from Gladstone, Mooney's Bay, Walkley, South Keys, Leitrim and Uplands Station through the Project Co installed conduits to the Project Co installed break out points as outlined in Schedule 15-2, Part 2, Clause 8.12.
- (d) Project Co shall protect for future works in the design of the Project, including:
- (i) The future twin-Track electrification of the Expanded Trillium Line and Airport Link and conversion to a higher frequency LRT technology;
  - (ii) A future freight by-pass around the Ellwood diamond Grade Separation;
  - (iii) The widening of Lester Road;
  - (iv) The widening of the Airport Parkway;
  - (v) Elements of the Riverside South Community Design Plan and the Riverside South Core Area Urban Design Guidelines including the following:
    - A. Future Collector Road "G" and "H" overpasses perpendicular to Earl Armstrong Road between Bowesville Station and Limebank Station to allow for future local roads parallel to Earl Armstrong Road intersecting Collectors "G" and "H" at grade at a distance not less than 80m south of Earl Armstrong Road;
    - B. Future Station at Collector Road 'G' to accommodate an 80m Train;
    - C. Future Station at Collector Road 'H' to accommodate an 80m Train; and,
    - D. Future Station at Collector Road 'D' or Collector Road 'E' to accommodate an 80m Train.

- (vi) Future Platform extensions at Uplands Station and Airport Station to accommodate 80m Trains;
- (vii) The future relocation of Mooney's Bay Station and MUP pathway from SN 018750 to the future Station;
- (viii) The expansion of both the Leitrim and Bowesville Park and Ride Lots;
- (ix) The expansion of the New Walkley Yard to accommodate an expanded Vehicle fleet;
- (x) Future overhead connections from development on both the east and west side of Gladstone Station to a future second floor level of the Station;
- (xi) Future elevator and stair construction from the Carleton Tunnel Structure to the Carleton Station entrance;
- (xii) Future modification of South Keys Station to provide a Fare Paid Zone between Transitway and Train service;
- (xiii) Future extension of the Pedestrian Overpass North of South Keys Station to create a fare-free pedestrian and cycling connection;
- (xiv) Future provision of 10-minute headway service by extending the Brookfield siding to south of Walkley Station; and,
- (xv) Future installation of solar panels overtop the Guideway from Somerset Street to Gladstone Ave.

**ARTICLE 3                      OPERATIONAL PERFORMANCE REQUIREMENTS**

**3.1        Introduction**

- (a) Project Co shall provide an integrated System capable of delivering public transit service in a safe, reliable and efficient manner, and in accordance with the following Operational performance parameters.
- (b) The Signalling and Train Control System for the Expanded Trillium Line shall be provided as a standalone system (independent from the Confederation Line S&TCS) located within the City's TOCC at 875 Belfast Road and the BCC located at 805 Belfast Road as further outlined in Schedule 15-2, Part 3 - Systems.
- (c) The communication system and all other operational control functions for the Expanded Trillium Line shall be fully integrated with the Confederation Line's head-end management platform(s) at the City's TOCC and the BCC as further outlined in Schedule 15-2, Part 3 - Systems.
- (d) Safety and Security monitoring of the Expanded Trillium Line shall be functionally integrated with the City's Security control centre located at 875 Belfast Road as further outlined in Schedule 15-2, Part 3 - Systems. The Security control center will be staffed by Special Constables Unit staff that will be responsible for monitoring Passenger assistance intercoms and on-demand real-time CCTV, responding to Security incidents/Emergencies, and coordinating daily fare enforcement patrols as necessary.

**3.2        General**

- (a) Although Operation of service will be the responsibility of the City, Project Co shall thoroughly consider the Operational needs and the functionality of a fully integrated system during design and construction Works and shall validate the Operational capabilities through performance simulation, test, and demonstration.
- (b) Project Co shall be responsible to provide and Maintain the SI to meet the Operational needs and required functionality of the System.
- (c) Project Co shall also be responsible for the testing, commissioning, and Safety and Security Certification of the SI, including new Revenue Vehicles in accordance with the requirements of Schedules 15-2, Part 1 – General Requirements, Schedule 15-2, Part 3 – Systems, and Schedule 14 – Testing and Commissioning to validate that the complete Expanded Trillium Line, including existing fleet and new fleet of vehicles, are ready to deliver a seamless service.
- (d) Project Co shall assist the City in preparing an Operations Service Plan that includes normal, degraded, and failure modes of operation. Project Co shall prepare operating procedures, records, training, and related manuals, in consultation with the City, required to operate the System based on the final System design and results of performance simulations. Project Co shall submit the referenced documents in accordance with Schedule 10 – Review Procedure. Project Co and City shall work cooperatively, each acting reasonably, to achieve an integrated Operations Service Plan. Project Co shall submit all Operating procedures, records, and related manuals at least 9 months prior to Revenue Service.

- (e) Project Co shall be responsible for the initial training of the OC Transpo Trainers in the Operation of the Revenue Vehicles as well as any new or approved revisions to the Capital Railway rules, regulations and SOP.
- (f) Project Co shall also be responsible for training of the Controllers in the use and application of the S&TC System in the TOCC.
- (g) Project Co shall develop, and submit for the City's review and adoption, any new or suggested revisions to existing Capital Railway rules, regulations and SOP governing Operations and Maintenance of the SI in accordance with Schedule 10 – Review Procedure, consulting with the City during their preparation and any subsequent reviews until Revenue Service commences. During Revenue Service, both Project Co and the City shall be responsible for compliance with the Capital Railway rules, regulations and SOP. If either the City or Project Co determines that adjustments to the Capital Railway rules, regulations and SOP are required or prudent, the City or Project Co will consult with the other party and draft the new or revised rule or procedure. The City shall have final approval authority over any new or revised rule or procedure.
- (h) Any new or suggested revisions to the Capital Railway rules, regulations and SOP shall be derived from, and be traceable to, the City's existing rule book and operating procedures, with revisions to reflect the introduction of any new infrastructure or technology, and the different roles of Project Co and the City.
- (i) During the Construction Period, the O&M manuals shall be developed and prepared by Project Co, and reviewed by the City. These manuals shall provide O&M staff with written instructions and documentation regarding the Operation of, and the Maintenance procedures associated with, each system and related piece of equipment supplied and installed by Project Co. O&M manuals shall follow the City's standard for training materials and suitable adult education training material standards.
- (j) For the avoidance of doubt:
  - (i) Project Co shall be responsible for the development of new or revised O&M manuals, new or suggested revisions to existing Capital Railway rules, DMU rules, SOP, and training materials for SI; and,
  - (ii) The City or Project Co will propose and coordinate changes to the Capital Railway rules, regulations, SOP, and associated training materials.
- (k) At the New Walkley Yard, Project Co shall be responsible for monitoring and controlling Revenue Vehicle movements within the yard and up to the Yard Limits.

### **3.3 Environmental Conditions**

- (a) The Train shall be capable of normal Operations under the ambient environmental conditions specified in Schedule 15-2, Part 1, Article 4 – Design and Construction.

### **3.4 Hours of Operation**

- (a) The SI design and ongoing Maintenance and Rehabilitation Services shall support the hours of Revenue Service of the Service Levels presented in Schedule 15-3 – Maintenance and Rehabilitation Requirements, Appendix A, Attachment 2.

- (b) The City will have the flexibility to modify the hours of Revenue Service pursuant to Article 3 of Schedule 15-3 – Maintenance and Rehabilitation Requirements.
- (c) The City will have the flexibility to operate extended hours during special events, including operating hours of 24 hours per day in limited circumstances to be agreed upon by the City and Project Co in advance, each acting reasonably.
- (d) Passenger facilities in a Station shall be available for use by Passengers from 15 minutes prior to the departure of the first scheduled Train from that Station until 15 minutes after the departure of the last scheduled Train from that Station.

### **3.5 Service Reliability**

- (a) Service Reliability Standard:
  - (i) The City has established a Service Reliability Standard of 98.5% on-time performance, where a trip is considered on time if it is available to depart the following Terminal Stations within 30 seconds of scheduled departure time, respecting a minimum terminal time of 3 minutes for:
    - A. Mainline – Bayview and Limebank;
    - B. Airport Shuttle – Airport and South keys
  - (ii) During times when through-service is operated between Airport Station and Bayview Stations, on-time performance shall be assessed for the Limebank Station/South Keys Station trips.
  - (iii) The City may choose, but shall not be obligated, to reduce terminal time for the purposes of achieving an on-time departure.

### **3.6 Operational Design Requirements**

- (a) Operating Headway:
  - (i) Project Co shall design the System to support the reliable operation of a headway of 12 minutes on both the mainline service and Airport Link service utilizing the passing sidings as specified in Schedule 15-2, Part 2, Article 1 - Introduction.
- (b) The SI shall support the following service plan:
  - (i) Trains of approximately 80m in length (single or 2-car consists) operating on 12-minute headways between Bayview Station and Limebank Station.
  - (ii) Trains of approximately 40m in length operating on 12-minute headways on the Airport Link between Airport Terminal Station and South Keys Station.
  - (iii) Occasional Airport to Bayview through-service which would also include a shuttle operation between Limebank Station and South Keys Station.
- (c) South Keys Operations:

- (i) Project Co shall design a System that supports efficient interface and operation of shuttle and mainline services at South Keys Station. For further clarity, the following reflects anticipated Train movements and interaction between mainline and shuttle services at the South Keys Station for both potential shuttle service patterns.
- (ii) Airport Link:
  - A. Northbound Airport Link Train from the Airport arrives at South Keys Station ahead of northbound service from Limebank Station to Bayview Station.
  - B. Airport Link Train discharges passengers and proceeds into the South Keys pocket Track.
  - C. Northbound Bayview Train arrives at South Keys Station, services the Station and departs, and Southbound Limebank Train arrives at South Keys, services the Station and departs.
  - D. Airport Link Train pulls out of the pocket Track southbound, services South Keys Station and proceeds toward the Airport.
- (iii) Limebank Shuttle:
  - A. Northbound shuttle Train from Limebank arrives at South Keys Station ahead of northbound service from Airport to Bayview.
  - B. Shuttle Train discharges Passengers and proceeds into the South Keys pocket Track.
  - C. Northbound Airport-Bayview Train arrives South Keys Station, services the Station and departs, and Southbound Bayview-Airport Train arrives South Keys, services the Station and proceeds south toward Airport.
  - D. Shuttle Train pulls out of the pocket Track southbound, services South Keys Station and proceeds toward Limebank.
- (d) Maximum cycle time
  - (i) The maximum cycle time shall not exceed the following values, as demonstrated by Project Co through simulation in accordance with Clause 3.6 (e) of this Part 1:
    - A. Limebank to Bayview – 84 minutes.
    - B. Airport Link – Airport to South Keys – 24 minutes.
  - (ii) The maximum cycle time shall be determined by summing:
    - A. All Station-to-Station travel times, and the appropriate Station dwell times in both the northbound and southbound directions, following the requirements in (iii) and (iv) below; and,

- B. Terminal layover times at terminal Stations, following the requirements in (v) below:
- i. For the mainline service, terminal times at Bayview Station and Limebank Station; and,
  - ii. For the Airport Link, terminal times at Airport Station and South Keys Station.
- (iii) Station-to-Station travel time shall be defined as the duration of time between the moment the Train wheels start moving at the first Station and the time the wheels come to a standstill at the next Station.
- A. Station dwell times shall not be included in Station-to-Station travel times.
- B. Project Co shall base the nominal Station-to-Station travel times on a maximum permissible speed of 80 km/hr and civil speed restrictions imposed by Track/alignment curvature and Platforms, as well as applicable speed restrictions on the Existing Trillium Line provided as Background Information.
- (iv) Station Dwell Times
- A. For purposes of calculating cycle time, and for simulation, Project Co shall use the following dwell times at each intermediate Station for the listed hours:

**Table 1-3.3- Northbound Station Dwell Times**

Station	Northbound Dwell Times (sec)			
	AM Peak 6am – 9am	Midday 9am – 3pm	PM Peak 3pm – 6pm	Evening 6pm – 12am
Airport	-	-	-	-
EY Centre /Uplands	20	20	20	20
Limebank	-	-	-	-
Bowesville	50	40	49	33
Leitrim	45	36	44	30
South Keys	30	26	29	23
Greenboro	44	35	42	29
Walkley	20	20	20	20
Mooney's Bay	23	21	23	20
Carleton	115	85	110	65
Carling	34	28	33	24
Gladstone	21	20	21	20
Bayview	-	-	-	-

**Table 1-3.4- Southbound Station Dwell Times**

Station	Southbound Dwell Times (sec)			
	AM Peak 6am – 9am	Midday 9am – 3pm	PM Peak 3pm – 6pm	Evening 6pm – 12am
Airport	-	-	-	-
EY Centre /Uplands	20	20	20	20
Limebank	-	-	-	-
Bowesville	20	20	20	20
Leitrim	20	20	20	20
South Keys	20	20	20	20
Greenboro	20	20	20	20
Walkley	20	20	20	20
Mooney's Bay	22	20	21	20
Carleton	90	67	86	52
Carling	25	22	25	20
Gladstone	22	20	22	20
Bayview	-	-	-	-

(v) Minimum Terminal Times:

- A. Terminal time shall be defined as the duration of time spent at the Terminal Stations at the end of a run and before the beginning of the next.
- B. For the purposes of developing the service plan for simulation, the following minimum terminal times shall be met or exceeded:
  - i. Bayview – 10.0 minutes;
  - ii. Limebank – 9.0 minutes;
  - iii. Airport – 3.0 minutes; and,
  - iv. South Keys (pocket Track) – 3.0 minutes.

(e) Simulation Requirements

- (i) Project Co shall verify travel and cycle times and prove service reliability through Operations simulation of the proposed System reflecting Project Co's design according to the following requirements.
  - A. Operating Schedule:
    - i. Five full operating days (weekday) with the prescribed headways reflecting Service Level 1 hours of Operation shall be simulated.
    - ii. For purposes of simulation, operating performance factors (such as, but not limited to: acceleration, braking, maximum allowable speed

adherence) shall be adjusted such that Station-to-Station travel times are 8% longer than the ideal Station-to-Station travel times (i.e. Station-to-Station travel times that could be achieved with full acceleration and braking rates, with perfect adherence to maximum allowable speeds; and perfect timing of brake application) to account for Operator variability and sub-optimal Vehicle performance reflecting real-world conditions. The Proponent shall adjust and calibrate the operating performance factors to achieve the 8% increase in run time and shall document the adjustments in the simulation report. The adjusted operating performance factors shall be applied to all respective trains in all simulations.

B. Infrastructure:

- i. The simulation shall reflect Project Co's final design including Track alignment, special Trackwork, curvature, grades, and Station Platform limits.

C. Rolling Stock:

- i. The simulation shall reflect the parameters of the existing Alstom Coradia LINT 41 DMU Vehicle and the New Vehicle Fleet, as the case may be.

D. Train Control:

- i. The simulation shall capture the influence of the proposed signal system Design and Train protection system in accordance with Schedule 15-2, Part 3 – Systems.

E. Station Dwell Times:

- i. Variable dwell times shall be simulated through stochastic variation in the form of a uniform probability distribution applied around the nominal dwell times at each Station as shown in Tables 1-3.3 and 1-3.4, with minimum and maximum values as outlined below.
- ii. For Carleton Station during the AM and PM peak the uniform distribution parameter shall be:
  - 1 Minimum – Nominal dwell time minus 46 seconds; and,
  - 2 Maximum – Nominal dwell time plus 75 seconds.
- iii. For every other Station and for all operating time periods Tables 1-3.3 and 1-3.4 the uniform distribution parameters shall be:
  - 1 Minimum – Nominal dwell time minus 12 seconds
  - 2 Maximum – Nominal dwell time plus 17 seconds

- iv. If any randomized dwell times from the uniform probability distribution result in values less than 20 seconds, they shall be adjusted upward to a minimum of 20 seconds in the simulation.

**F. Service Reliability:**

- i. The reliability of the operation of the System shall be measured according to the Service Reliability Standards established in Clause 3.5 of this Part 1.
- ii. For purposes of measuring service reliability, terminal times shall not violate the minimum terminal recovery time requirement of three minutes.
- iii. The simulation report shall include statistics on the number or percentage of trains in the five simulated operating days that were not available to depart within 30 seconds of the scheduled departure time after having achieved a minimum terminal time of three minutes.

**3.7 Normal Operations**

**(a) Personnel sign-in**

- (i) The City shall be responsible for scheduling Trains and rostering its staff.
- (ii) City Operators will report to the New Walkley Yard or other designated location at the time designated in their roster.

**(b) Opening/closing Stations**

- (i) Project Co shall be responsible for opening Stations each morning prior to the beginning of Revenue Service in accordance with Clause 3.4 of this Article.
- (ii) Similarly, Project Co shall be responsible for securing Stations after departure of the last Revenue Service Train each day in accordance with Clause 3.4 of this Article.
- (iii) Project Co shall also provide the necessary equipment for remote monitoring of the status of all Station doors.

**(c) Start-Up and Shutdown and Revenue Fleet Transitions**

- (i) Project Co shall provide the capability for insertion of Trains in the northbound and southbound directions on the mainline from the New Walkley Yard.
- (ii) Project Co shall provide the capability for removal of Trains from the mainline and into the New Walkley Yard from the northbound and southbound directions.
- (iii) The insertion/removal of Trains into/from the mainline shall be coordinated by the TOCC.

- (iv) For further certainty, Project Co shall be responsible for monitoring and controlling revenue trains into, and within the New Walkley Yard.
- (v) Prior to the start of Revenue Service, Project Co staff shall confirm with the TOCC that the SI and Trains are ready for start-up in line with the Capital Railway rules, regulations and SOP and the current Operations Service Plan.
- (vi) Pre-conditions for normal start-up shall include:
  - A. All Maintenance work zones cleared by Project Co and confirmation that there are no Hazards associated with the mainline infrastructure that would preclude or restrict mainline Operations: and,
  - B. A sufficient number of Trains, in the required configurations, are available from Project Co to support the Operations Service Plan in effect.
- (vii) The TOCC will be responsible for monitoring and controlling the entry of all Trains onto the mainline in accordance with the Operations Service Plan. The protocols for movement of Trains within the New Walkley Yard and to/from the mainline shall be developed by the City in coordination with Project Co. The following approach is anticipated, subject to City and Project Co coordination, each acting reasonably:
  - A. Project Co shall be responsible for routing and dispatching the Train between its storage berth or Maintenance Track and Yard Limits. Departing Trains shall be routed to the Yard Limits in sufficient time to support the Operational Service Plan;
  - B. Project Co shall assign each Operator a Train consist to board at its designated storage berth or Maintenance Track;
  - C. The Operators will confirm with Project Co yard control staff that essential onboard operating and communication systems are fully functional and readiness to proceed to Yard Limits; and,
  - D. The Operator will proceed onto the mainline only when authorized by the TOCC. The S&TCS shall prevent a manually driven Train with in-active ATP functionality from leaving the yard and entering the mainline.
- (viii) The TOCC staff will be responsible for monitoring and controlling the routing of Trains from the mainline Terminal Station to the Yard Limits, in accordance with the Operational Service Plan. The process of exiting a Train from the mainline into the New Walkley Yard shall be as follows:
  - A. Project Co shall be responsible for ensuring the Train can be routed to a designated storage berth or Maintenance Track in accordance with protocols to be established between Project Co and the City;
  - B. On approach to Yard Limits, the Operator will contact Project Co yard control staff and request authorization to enter the yard; and,

- C. Upon receiving authorization from Project Co, the Operator shall secure the Train at the designated storage berth or Maintenance Track location assigned by Project Co.

### **3.8 Failure Management**

- (a) The procedures and protocols for managing Failures shall be agreed by Project Co with the City, and documented as part of the Capital Railway rules, regulations and SOP.
- (b) The first priority in responding to and recovering from equipment failures shall be to maintain the Safety of Passengers, staff, the general public and others. The secondary priority shall be to institute an appropriate degraded mode of Operation until normal service Operations can resume, and then recovering to normal Operations as expeditiously as possible.
- (c) The City TOCC staff will have the primary responsibility to coordinate responses to equipment Failures that affect Revenue Service and/or Failures that may impact the Safety of line Operations.
- (d) As appropriate, the City TOCC staff will provide direction to a) other City and Project Co staff, b) City and Project Co roving field staff, and c) City Operators. This direction will be provided in accordance with Failure recovery protocols agreed between the City and Project Co consistent with contractual obligations in terms of Failure recovery response times and acceptable service level reductions, etc.
- (e) The City TOCC staff will have the primary responsibility for providing PA announcements to Passengers in Stations and on Vehicles, as appropriate.
- (f) In accordance with direction from the City TOCC staff, the Operator and Project Co field staff shall support Failure recovery and assist in meeting service requirements and safe Station Operations.
- (g) In accordance with direction from the City TOCC staff, and where it is safe to do so, Operators will be responsible for responding to any situation where Train performance is degraded in the course of normal Operations.
- (h) The Operator will also be responsible for reporting Revenue Vehicle malfunctions/anomalies to the City TOCC staff (which may include alarms displayed on the Operator Fault Announcement Screen) as well as anomalies observed along the ROW (e.g. Track irregularities). The City TOCC staff in turn will report to Project Co staff. The Operators will also be responsible for providing PA announcements to Vehicle passengers, as appropriate.
- (i) Project Co staff shall be responsible for responding to equipment Failures and performing required Corrective Maintenance, in accordance with Schedule 15-3 – Maintenance and Rehabilitation Requirements.

### **3.9 Emergency Situations**

- (a) Project Co shall ensure all procedures and protocols for managing Emergency situations are in compliance with the approved ERP, agreed upon by Project Co and the City, and documented as part of the Capital Railway rules, regulations and SOP.

- (b) All City and Project Co staff shall be vigilant and respond to any real or perceived threat to the Safety of Passengers, staff, and the general public by promptly reporting such conditions to the City TOCC staff. Any perceived threat may be investigated and assessed by the City/Project Co field staff (if such investigation/assessment can be accomplished safely, and in accordance with training provided to such staff) prior to declaring an Emergency scenario and notifying ESP.
- (c) Once an Emergency scenario has been declared and ESP have been notified, specific actions by ESP, the City staff and Project Co staff shall be dependent upon the severity and extent of the incident, with priority given to:
  - (i) Responding to the Emergency scenario, moving persons to a place of Safety and treating injured persons as expeditiously as possible;
  - (ii) Correcting the conditions that generated the Emergency scenario such that normal Revenue Service Operations can resume; and,
  - (iii) Documenting and analyzing the root cause of the incident to prevent a re-occurrence.
- (d) Once on-site, ESP will manage and coordinate the response to the Emergency scenario, and shall be supported by the City and Project Co staff.
- (e) The City will designate one individual, at the incident site, as a single-point-of-contact with ESP. This individual shall be responsible for all the City and Project Co staff on scene and for keeping the City TOCC staff apprised of Emergency condition status in a timely manner. Project Co shall designate one individual as a single-point-of contact with the City. The City TOCC staff will also be responsible for communicating with Passengers and public.
- (f) Depending on the nature of the Emergency scenario, the City TOCC staff will attempt to maintain a degraded mode of Operation on the SI not affected by the Emergency scenario.
- (g) The ESP will have control of the incident site until the site is handed back to the City.
- (h) Project Co shall take whatever corrective actions may be required to provide assurance to the City that there are no remaining Hazards associated with the infrastructure and/or Trains that would preclude or restrict resuming Operations through the incident site.
- (i) Once Project Co has advised the City that it is safe for the resumption of service and any operating restrictions, it will be the City TOCC staff responsibility to return to normal Operations as expeditiously as possible.
- (j) To the extent appropriate and practical, the City and Project Co staff shall be responsible for ensuring that the necessary arrangements are made to ensure the preservation of evidence that may be required later to establish the cause of the Emergency scenario. This includes preserving all communications and related records and documenting the Emergency scenario in accordance with Applicable Law, regulations and the City / Project Co procedures.

### **3.10 Non-Emergency situations**

- (a) Incidents that can be addressed without the services of external ESP are not considered Emergency scenarios. The procedures and protocols for managing these non-Emergency

situations shall be agreed by Project Co and the City, and documented as part of the Capital Railway rules, regulations and SOP.

### **3.11 Capital Railway Rules, Regulations and Standard Operating Procedures**

- (a) The current Capital Railway rules and regulations shall serve as the basis for any new or revised operating rules that may be required as part of SI or Vehicles. Similarly, the City's existing SOP shall serve as the basis for any new or revised SOP that may be required as part of SI or Vehicles.
- (b) Project Co shall review and update existing operating rules and procedures to ensure applicability to SI and Vehicles. Project Co shall submit to the City for review and approval suggested revisions to existing or new operating rules and SOP in accordance with Schedule 10 – Review Procedure as agreed upon by the City.
  - (i) Project Co shall update or develop new procedures with respect to responses to abnormal operating conditions such as:
    - A. weather extremes;
    - B. winter snow and/or freezing rain;
    - C. severe wind;
    - D. extreme rainfalls and/or hail;
    - E. lightning;
    - F. earthquakes;
    - G. extreme hot or cold temperatures;
    - H. flooding;
    - I. asset availability issues;
    - J. insufficient Trains for Revenue Service (including Failures at the yard-to-mainline interface);
    - K. late Station opening; and,
    - L. staffing availability issues.
  - (ii) Roles and responsibilities of the City TOCC and field Operations staff and Project Co staff shall be clearly defined.
  - (iii) Administrative procedures shall also be incorporated.
- (c) Project Co shall comply with all Capital Railway rules, regulations and SOP in accordance with the requirements of Schedule 15-2, Part 1, Article 6 – Rail Regulatory Structure and Obligations.

## ARTICLE 4 DESIGN AND CONSTRUCTION

### 4.1 General Construction Requirements

- (a) Project Co shall be responsible for the design and construction of the Project and all other construction activities, including completion, testing and commissioning of the Project, which shall be carried out in strict accordance with the Design and Construction Requirements and in such a manner as to comply with all applicable Project Agreement requirements.
- (b) Limits of construction, occupation and all works, except for Site access, construction of detours and associated works and Works under the Utility Company Works Cash Allowance shall be within the Lands, Temporary Easements and Permanent Easements as shown hatched on the PRPs. See Schedule 33 – Lands for additional information.
- (c) Project Co shall only construct or implement Site access, detours and associated works on existing City/public ROW/property if those Site access, detours and associated works have been approved by the City as part of Project Co's TTMP.
- (d) Construction Mobilization and Staging Areas
  - (i) The only Properties that can be utilized as construction mobilization or staging areas, as defined in Schedule 33 – Lands, Articles 1.4.1.4 and 1.4.1.5, are indicated on the property table Schedule 33 – Lands, Article 3.
- (e) Project Co shall restore or rehabilitate any disturbed areas within or extending beyond the limits of the Works, including but not limited to, road alignment, paving, Trackwork, monitoring wells, landscaped areas including plantings and /or sodding. These areas shall be cleaned of debris and have any temporary paving or structures removed and replaced with planting soil or restored to the same or better condition or as directed by the City in accordance with the requirements of Schedule 15-2, Part 6, Article 2 – Design Criteria. A review of the adjacent land uses and site development shall be completed for these locations and the most appropriate groundcover shall be selected.
  - (i) Project Co shall protect all City and Third Party Facilities adjacent to the Works.
    - A. Protect and/or transplant existing fencing, trees, landscaping, natural features, bench marks, buildings, Pavement, monitoring wells, surface or Utilities which are to remain. If damaged, restore to original or better condition unless directed otherwise. Project Co shall make reference to Schedule 15-2, Part 6, Article 2 – Design Criteria.
    - B. Project Co shall replace any damaged trees designated to remain in accordance with City Urban Forestry guidelines.
    - C. Project Co shall be responsible for installing, Maintaining and removing any temporary facilities necessary to access the Site, including but not limited to fences, gates, constructions, granular, silt fences and TCD.
    - D. Project Co shall be responsible for the removal of furnishing of the assets of BIA, safekeeping and restoration.

- (ii) Project Co shall complete a pre-construction condition survey of the Lands covered by Third Party Access Agreements and adjacent portions of Lands and shall provide the report to the City, not less than eight calendar days prior to the commencement of the Works. Under no circumstances shall Project Co commence the Works until the pre-construction condition survey is provided to the City. Project Co shall complete a post-construction condition survey of the Lands covered by Third Party Access Agreements and adjacent lands and shall provide the report to the City not less than eight calendar days following the completion of the Works. The survey shall record, by way of photographs, videos and written reports, the status, grading, fencing, monitoring wells, and visible condition of the Lands covered by Third Party Access Agreements and immediately adjacent property.
- (f) Project Co shall perform the following for all Lands:
  - (i) Develop hoarding/fencing plans shall be submitted in accordance with Schedule 10 – Review Procedure. The boundaries of the construction Sites shall be fenced. The boundaries of mobilization Sites shall be hoarded. The hoarding/fencing plans shall include details on location, height, materials and expected timing of installation and removal.
  - (ii) In addition, for Lands subject to FLUDTA, hoarding plans shall be in accordance with the NCC hoarding specifications. No use or access to adjacent NCC lands shall be permitted without the express approval by the NCC.
  - (iii) Maintain the construction hoarding and fencing in a good condition of repair at all times.
  - (iv) Project Co shall install and Maintain promotional and advertising materials to be provided by the City in accordance with Schedule 18 – Communications and Stakeholder Engagement Obligations.
- (g) Construction Site camera systems:
  - (i) The City intends to provide a camera system to be installed by Project Co at each construction Site, at a location selected by the City. Project Co shall provide power and internet connectivity to each location selected by the City. The power shall be a hard-wired connection, unless a specific arrangement is made between Project Co and the City for solar power to be used. The internet connectivity shall be high speed, through telephone or cable lines, unless a specific arrangement is made between Project Co and the City for an LTE cellular connection to be used.
    - A. The construction Sites shall be each of the Stations (total of 12 locations).
    - B. The system being developed is closed, password protected, and not publicly accessible. The City shall own the system and the content, and reserves the right to utilize the system in order to create time-lapse videos showing construction progress over time that may be shown to the public as a promotional tool. The system shall adhere to the City of Ottawa’s Surveillance System for Transit Network Access and Privacy Policy.

- (ii) In the event that, upon completion of the System, Project Co wishes to have an additional camera system at any Site beyond the one that the City shall provide, Project Co can purchase the unit from the City at cost, and install it on their Site at their own cost.
- (iii) In the event that the City wishes to have an additional camera system at any Site, Project Co shall install it and provide power and internet connectivity as described in (i) above.
- (h) Project Co shall submit a pre-construction condition survey consisting of photographs, videos and written reports of the South Keys Station plaza area as per Schedule 33 – Lands, not less than seven calendar days prior to the commencement of Works.
- (i) Project Co shall submit a post-construction condition survey consisting of photographs, videos and written reports of the South Keys Station plaza area and adjacent Lands as per Schedule 33 – Lands, not more than seven calendar days following the completion of Works.
- (j) Project Co shall submit a pre-construction condition survey consisting of photographs, videos and written reports of [REDACTED] as per Schedule 33 – Lands, not less than seven calendar days prior to the commencement of Works.
- (k) Project Co shall submit a post-construction condition survey consisting of photographs, videos and written reports of [REDACTED] as per Schedule 33 – Lands, not more than seven calendar days following the completion of Works.

#### **4.2 Surveys**

- (a) Control Survey
  - (i) A control survey of the alignment has been completed by the City for this Project. Existing and new monuments were used in establishing the Project control survey.
  - (ii) Project Co shall evaluate its requirements for a control survey in order to perform the design and construction Works and determine if additional monuments are required. Any such additional monuments shall be of the same order as the control survey provided and installed by Project Co and shall be surveyed to tie into the Project survey control coordinate system. Project Co shall prepare a survey report including field notes, measurements, adjustments, station descriptions and reference tie drawings of each additional survey monument installed and provide a record to the City in accordance with Schedule 10 – Review Procedure.
  - (iii) Project Co shall be solely responsible for protecting and maintaining all existing survey control monuments. In the event that project survey control monuments have been disturbed or destroyed during the Project, then Project Co shall re-establish the survey control at construction completion and provide a survey report to the City for approval at no cost to the City, in accordance with Schedule 10 – Review Procedure.
  - (iv) The Project control survey shall be used as the basis for all Works.
  - (v) Horizontal Control
    - A. Modified Transverse Mercator, MTM 3 degree, zone 9 central meridian 76 degrees 30 minutes West;

- B. NAD83 original as well as in NAD 83 CSRS format;
  - C. The horizontal coordinates for control points are 2nd order as defined by the Specification and Recommendations for Control Surveys and Survey Markers 1978, Natural Resources Canada, Part 2 – Horizontal Control; and,
  - D. All surveys made for the Project shall be referenced and adjusted to the control survey monuments in the Project control network and shall be adjusted by holding these monuments fixed. The adjustments to the data shall be coordinated with the City. The accuracy of these surveys shall be second order.
- (vi) Vertical Control
- A. The vertical control shall be based on the Canadian Geodetic Vertical Datum of CGCD1928 using HT2 Geoid Model.
  - B. The vertical control survey shall be conducted in accordance with Specification and Recommendations for Control Surveys and Survey Markers 1978, Natural Resources Canada, Part 1 - Vertical Control, Levelling. Vertical Deep Benchmarks shall meet or exceed 1st Order Vertical levelling criteria. Non Deep Benchmarks typically set on sidewalks shall be verified for marker stability with a minimum of one adjacent marker prior to accepting the published elevations.
- (b) Aerial Photo and Digital Mapping
- (i) Detailed topographic mapping for the Project has been compiled from field survey and digital aerial imagery acquired over the period from 2012 to 2015.
  - (ii) Project Co shall evaluate their requirements for topographic mapping and augment with additional ground control, if required.
  - (iii) In the event that Project Co requires additional or updated topographic mapping, then the orthophotos and digital vector mapping shall be performed in the Project control survey coordinate system.
- (c) Legal Surveys
- (i) The City shall be responsible for the preparation, by a qualified Ontario Land Surveyor, of reference plans to facilitate the acquisition of fee simple interests in property or long term easements forming part of the Lands as identified in the Lands Table Schedule 33 – Lands, provided however, that in the case of “Additional Property Interests” as defined in Schedule 33 – Lands, the costs of undertaking this surveying work shall be borne by Project Co.
  - (ii) Project Co shall be responsible for the preparation, by a qualified Ontario Land Surveyor, of reference plans describing all of the lands accommodating System Infrastructure and any other lands required for the purposes of using, operating, repairing, Maintaining, or accessing the System so that the City will have a registrable legal description of all lands forming part of the final constructed System.

- (iii) Project Co shall engage, throughout the Construction Period, a duly qualified Ontario Land Surveyor.
  - (iv) Prior to commencing construction on any part of the Lands where construction is proposed to take place within 1m of a property limit, Project Co shall ensure that a qualified Ontario Land Surveyor stakes out the property limit in the field and prepares field notes and sketches to document the fieldwork.
- (d) Post Completion Survey
- (i) Project Co shall provide, at its own cost and expense, a post-completion Survey, in the form of a topographic survey of the entire corridor accurate to a scale of 1:1000, in CADD format, georeferenced to the project control not more than 90 days after the Final Completion Date.
  - (ii) Project Co shall be solely responsible for protecting and maintaining all existing legal survey reference monuments. In the event that Project survey monuments have been disturbed or destroyed during the Project, then Project Co shall re-establish the survey monuments at the time of the post- completion survey and provide a survey report to the City for approval at no cost to the City in accordance with Schedule 10 – Review Procedure.

#### **4.3 Design Requirements**

- (a) Design Components and Design Life
- (i) Project Co shall design the components of the Project to meet the requirements outlined in Table 1-4.1.

**Table 1-4.1: Design Components and Design Life**

Component	Design Life Required (years)
Ancillary Facilities – Structures	50
Ancillary Facilities – Finishes	40
Ancillary Facilities – Bus shelters	15
New Bridge Structures	75
New Retaining Walls	50
New Flexible Pavement (including intervene rehabilitation with initial Design Life of minimum 20 years))	40
New Rigid or Composite Pavement (including intervene rehabilitation with initial Design Life of minimum 30 years)	55
Elevated Guideway	75
Stations – Finishes	40
Stations – At-Grade Station Structures	50
Track – Ballast	20
Track – Fixed	20
Ties - Concrete	40
Ties - Hardwood	25
Switches & Cross-overs	20
Maintenance Building	40
Signalling	30
Communications	20
New Vehicles	30
New Vehicle Carbody	40

(b) Climate Data for Design

- (i) Project Co shall use the following climate data where required for design, unless otherwise specified:

Extreme Maximum Temperature	38°C
Extreme Minimum Temperature	-40°C
Extreme Daily Rainfall	135mm
Extreme Daily Snowfall	56cm
Extreme Daily Precipitation*	135mm
Extreme Snow Depth	135cm
Maximum Hourly Wind Speed	80km/hr
Maximum Wind Gust Speed	135km/hr

\* Freezing rain to be considered.

#### 4.4 Site Works

(a) General

- (i) Project Co obligations under this Article are in addition to the obligations Project Co has under Section 16 of the Project Agreement.
  - (ii) Existing Conditions
    - A. Existing conditions shall be verified and documented by Project Co.
    - B. Project Co shall identify and document all underground and surface Utility lines and buried objects prior to any construction activities and/or excavation work.
  - (iii) Backfill
    - A. Backfill work complete by Project Co shall achieve a performance characteristic not less than the adjacent undisturbed soils and to the satisfaction of the property owner, when backfilling in areas that will not carry any load from the Works and other areas than areas regulated by any applicable standards.
- (b) Conduit Drainage
  - (i) Underground
    - A. All underground conduit, duct banks, and maintenance holes for electrical, communication, and systems shall be designed and constructed to prevent the accumulation of water and formation of ice in any component within the System.
  - (ii) Non-Underground
    - A. All conduit and raceways for electrical, communication, and systems shall be designed and constructed to prevent the accumulation of water to prevent moisture from entering any equipment within the System.
- (c) All Project Site work shall be designed in accordance with the criteria contained or referenced within this Article, specific obligations and criteria identified in the other locations elsewhere in this Project Agreement, the Applicable Law, guidelines or practices applicable to the Project, including but not limited to the following Reference Documents:
  - (i) City Standards:
    - A. City of Ottawa Standard Tender Documents for Unit Price Contracts, current version.
    - B. City of Ottawa Sewer Design Guidelines, October 2012.
    - C. City of Ottawa Water Design Guidelines, 2010.
  - (ii) Geometric Design Guide for Canadian Roads (TAC-1999);
  - (iii) OPSS and OPSD; and,
  - (iv) MOECC.

#### **4.5 Construction on OMCIAA Property**

- (a) Project Co shall comply with all OMCIAA policies and procedures including the Airport Security Requirements detailed below and as may be amended by the OMCIAA for all construction being performed on or adjacent to OMCIAA property.
- (b) Project Co shall be responsible to ensure that all Project Co Parties comply with Airport Security Requirements on the Works Site. Personnel requiring entry to Airside areas to perform duties may be required to possess an identification pass, to be worn or produced as the OMCIAA may require.
- (c) The OMCIAA and the City, at their sole discretion, may order Project Co to provide a minimum of three references and/or other information concerning persons employed or to be employed on the Works within OMCIA property.
- (d) The OMCIAA and the City may at their discretion order the removal of any person from the Works.
- (e) Project Co shall ensure that all construction equipment and vehicles operating near an active runway remain below the height restrictions dictated by the Obstacle Limitation Surfaces for that runway. Project Co shall provide specialized equipment in order to respect the overhead clearance to the Obstacle Limitation Surfaces as required.
- (f) Project Co shall ensure that all permanent Works constructed as part of this Project adjacent to the airport respect the height restrictions set by TC through the Airport Zoning Regulations.
- (g) Project Co shall obtain, abide by and complete an OMCIAA Work Permit for any work on OMCIA lands. The OMCIAA Work Permit is provided in Appendix A of this Part 1.
- (h) Project Co shall co-ordinate and schedule its work with the OMCIAA and appoint a single point of contact for the Airport Link construction to facilitate this co-ordination.
- (i) Project Co shall attend regular weekly meetings with the City and the OMCIAA to facilitate design and construction co-ordination.
- (j) Project Co understands there may be infrequent instances (i.e. visiting head of state) whereby work in close proximity to the Airport shall need to cease.

#### **4.6 Airport Security Requirements**

- (a) Airport Restricted Area
  - (i) Project Co shall only be permitted Airport Restricted Area access for the sole purpose of erecting Elevated Guideway components on a limited overnight basis subject to the approval of the City, OMCIAA and TC.
  - (ii) The OMCIAA will facilitate Project Co mobilization in the Airport Restricted Area by closing Gate 1 between 21:00 hrs – 0:500 hrs for a maximum of eight nights. Project Co shall not impact the operational area of any other aircraft gates.

- (iii) Project Co shall only be permitted access to the Airport Restricted Area from 21:00 hrs – 05:00 hrs and shall fully demobilize after each shift.
  - (iv) Project Co shall abide by all OMCIAA and TC rules for working in the Airport Restricted Area.
  - (v) Airport Restricted Area access shall be limited to eight mobilizations and shall be co-ordinated with OMCIAA and the City.
  - (vi) Project Co shall be responsible for providing their own airside escort services.
  - (vii) Project Co shall be responsible for protection of airside apron Pavement.
  - (viii) Project Co shall be responsible for all costs and delays associated with any TC, CATSA or OMCIAA requirements as it relates to screening and or escorting required for Airport Restricted Area works.
  - (ix) No person shall carry or deposit lighted cigarettes, cigars, pipes, or matches on Airside. This prohibition shall apply to persons both inside and outside of vehicles and equipment. Works requiring an open flame on Airside shall be approved by OMCIAA (i.e. welding permit, available from the OMCIAA security office).
- (b) Additional Project Co Responsibilities
- (i) Project Co shall be responsible for completing a "Contractor's Information Check Sheet" to be provided to the City and the OMCIAA prior to the start of any Works.
  - (ii) Project Co shall be responsible for becoming familiar with and following all Safety and Security regulations pertaining to construction personnel. Failure to comply with federal and provincial government regulations may result in fines against Project Co or delays imposed on Works pending correction by Project Co of any deficiencies.
- (c) Emergency Contacts
- (i) Project Co shall provide to the City and the OMCIAA a list of responsible personnel, including sub-contractors, who may be contacted after working hours in case of Emergency.
- (d) Evacuation
- (i) Project Co shall immediately cease all activities and evacuate the Site as directed by the OMCIAA or the Airport Operations Manager in the event of a declared Emergency by OMCIAA.
- (e) Use of Radios
- (i) All equipment for radio communication required for Project Co personnel shall be supplied by Project Co. The OMCIAA security office shall be advised in order to verify that Project Co's radio frequency will not cause interference with essential communication equipment and navigational aids at the OMCIA.

## ARTICLE 5 IMPLEMENTATION CONSTRAINTS

### 5.1 General Implementation Constraints

- (a) General Requirements
  - (i) Project Co shall reinstate to original condition, unless otherwise indicated elsewhere in the documents, and at Project Co expense, all Lands, Roadways, MUPs and assets affected by the implementation of the Works.
- (b) Access to Adjacent Properties
  - (i) Project Co shall provide access to all adjacent properties, tenants, and residential drives and building entrances, including maintaining access points for fire department connections in accordance with code requirements and for waste removal except as otherwise permitted. Should an existing entrance or access have to be closed or reduced, Project Co shall coordinate with the impacted parties to provide an alternative solution to have continuous access.
- (c) Works Hours Limitations
  - (i) Project Co shall abide by all federal, provincial, and municipal statutes regarding hours of work.
  - (ii) Project Co shall be aware of the local community and political public events that may impact the work on the Project.

### 5.2 Existing Trillium Line Operational Constraints

- (a) Project Co shall not have access to the Existing Trillium Line ROW for any type of construction activity while the current O-Train service is in Operation. Limited access will be granted for non-intrusive tasks such as surveying and geotechnical investigation as well as telecom utility relocations in the vicinity of the [REDACTED] Grade Separation at the discretion of the City and Capital Railway based on the following:
  - (i) Project Co will be provided up to 20 days access to the Existing Trillium Line during Revenue Service hours from Monday to Friday in order to perform any survey work required.
  - (ii) Project Co will be provided up to 20 nights access to the Existing Trillium Line during non-Revenue Service hours in order to perform any geotechnical investigation required.
  - (iii) Project Co will be provided access to the Existing Trillium Line for telecom utility relocations in the vicinity of the [REDACTED] Grade Separation in advance of the grade separation construction.
  - (iv) For all work outlined above, Project Co shall submit an access request to the City and Capital Railway no less than 2 weeks in advance of the requested date. The City and Capital Railway will review the request and advise Project Co of the confirmed access date(s) and arrange for TOP's on behalf of Project Co.

- (b) The City will implement a complete shutdown of the Existing Trillium Line service to facilitate the rehabilitation and construction of Track and Facilities along this line. The Shutdown Period dates are as defined in Schedule 15-1 – Technical Terms and Reference Documents.
- (c) Construction activities, including during the Shutdown Period of the Existing Trillium Line service, shall not block, restrict, interfere with signals operation or cause delay to train movements on the [REDACTED] nor on the [REDACTED]. Project Co shall abide by the terms of the City's Crossing Agreements throughout the Construction Period.
- (d) Project Co shall Maintain, in service, the Transfer Segment and all supporting infrastructure required for movement of freight between [REDACTED] and the NRC Facility for the movement of freight throughout the Construction Period and Maintenance Period subject to the following:
  - (i) Construction Period:
    - A. Project Co shall be responsible for shepherding and coordinating the movement of freight to the NRC Facility as outlined in the Rail Car Transfer Agreement as of and from the time that Project Co mobilizes for Construction Activities on the Transfer Segment.
    - B. In accordance with the Rail Car Transfer Agreement, Project Co shall be permitted to interrupt the movement of freight on the Transfer Segment for a continuous single maximum duration of six months (NRC 6 Month Shutdown Period) for the Construction Activities along the Transfer Segment. Outside of the NRC 6 Month Shutdown Period, Project Co shall provide access windows of at least seven consecutive calendar days at least once every 120 calendar days for the movement of freight on the Transfer Segment (NRC 7 Day Freight Access Periods).
    - C. Project Co shall schedule the NRC 6 Month Shutdown Period and the NRC 7 Day Freight Access Periods in accordance with Schedule 12 – Works Scheduling Requirements.
  - (ii) Maintenance Period:
    - A. Project Co shall facilitate and coordinate the movement of freight to the NRC Facility as outlined in the Rail Car Transfer Agreement for the entire Maintenance Period.
    - B. Project Co shall refer to Schedule 15-3, Appendix A, Article 1.12 for their obligations to facilitate the movement of freight during the Maintenance Period.
- (e) Project Co shall fully comply with Governmental Authorities, Nav Canada and OMCIAA regulations and procedures governing construction activities on or near the airport grounds.
- (f) Blasting shall not be permitted in proximity to the Highway 417 overpass, specifically in areas under which the Ministry of Transportation has jurisdiction of authority.

**5.3 Airport Link Implementation Constraints**

- (a) Project Co shall complete all Airport Station Civil Works prior to November 30, 2020 to allow uninhibited access to the OMCIAA for construction of the Airport Station Concourse.
- (b) See Schedule 15-2, Part 7 - Traffic and Transit Management for restrictions on working on OMCIAA Roadways and the Airport loading dock.
- (c) Project Co shall coordinate with the NRC and Airport Authority on the following items:
  - (i) To protect or reinstate the high-velocity impact berm; and,
  - (ii) Protect the porcine cemetery.
- (d) Project Co shall abide by all OMCIAA construction and Security requirements as outlined in Clauses 4.5 and 4.6 of this Part 1.

**5.4 Construction Planning and Constraints**

- (a) NCC and City MUPs shall remain open to public use during construction. Project Co shall provide temporary detours and temporary signage indicating detours if pathway closures are required. See Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements, for further information.
- (b) Project Co shall limit their material and equipment storage to within the construction boundaries and per Temporary Easement and Permanent Easement as shown hatched on the PRP's Schedule 33 – Lands for additional information.
- (c) Properties that can be utilized as construction staging areas are identified in Schedule 33 – Lands. Should Project Co require additional properties beyond those shown to be provided, it is the responsibility of Project Co to acquire any additional property.
- (d) See Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access for restrictions associated with events and holidays and additional implementation constraint requirements.
- (e) Refer to Schedule 17 – Environmental Obligations for requirements for working around SARs.
- (f) Agreement Constraints:
  - (i) Project Co shall coordinate the Works required for Uplands Station with the EY Centre.
  - (ii) Project Co shall ensure that existing truck access routes to South Keys Shopping Centre are maintained throughout the duration of construction.
  - (iii) Project Co shall coordinate the Works required for South Keys Station with the South Keys Shopping Centre.
- (g) Walkley Yard constraints

- (i) The New Walkley Yard MSF shall be constructed without interfering with access to and operations of the Existing Walkley Yard or train movements on existing rail outside of the Project limits.
  - (ii) Project Co shall be permitted to access the Existing Walkley Yard for the purpose of Existing Vehicle Fleet storage, Maintenance and upgrade, and delivery of new Vehicles.
- (h) Noise and Vibration Mitigation
  - (i) Project Co shall abide by all federal, provincial and municipal statutes regarding noise levels and noise mitigation. Prior to commencement of construction, Project Co shall prepare and implement a Noise and Vibration Control Plan in accordance with Schedule 17 – Environmental Obligations prepared by a Professional Engineer describing the predicted construction noise and mitigation measures required to meet the noise level limitations.
- (i) Transit System constraints:
  - (i) Refer to Schedule 15-2, Part 7, Article 1 – General Traffic and Transit Management Requirements for restrictions and implementation constraints associated with Transit System Work.
- (j) Utility Infrastructure Constraints
  - (i) Refer to Schedule 15-2, Part 2, Article 8 - Utility Infrastructure Design Criteria for restrictions and implementation constraints associated with Utility Works.
- (k) Project Co shall complete the work within the alignment, between Louisa Street and Young Street to complete the reinstatement of the MUP and crosswalk/crossride at Gladstone Street, by May 1, 2021.
- (l) Coordination with City Works
  - (i) Project Co is notified that Third Party Contractors and City personnel will need access to the construction Site at various times and locations during the course of the Works. Therefore, Project Co shall provide the following:
    - A. Coordinating their level of completeness to the City so that the City's coordination with Third Party Contractors can be performed at the appropriate time;
    - B. Coordinate the timing of the access to minimize disturbances;
    - C. Provide Site access to the Third Party Contractors and City staff;
    - D. Provide staging and storage areas to the Third Party Contractors and City staff for their work;
    - E. Provide access for the City's delivery and set up of City equipment (furniture, appliances, computer equipment, etc.) in City spaces; and,

- F. At the City's request, provide up to date as built drawings of the Sites at the time of the coordination.
- (ii) Anticipated coordination issues are, but are not limited to, the following:
  - A. Fare control equipment installation
    - i. Installation by OC Transpo requires one month notice prior to the installation and one week per Station for the actual installation. Access is to be staggered so that installation can be performed one Station at a time. The installation shall be scheduled to begin no more than four months prior to Trial Running.
  - B. Artwork
    - i. Access for installation by the City two months prior to Trial Running.
  - C. OC Transpo spaces
    - i. Access for fit out by OC Transpo is to be provided four months prior to Trial Running.
  - D. Various Communications issues, including:
    - i. Voice and Data Radio: Access for installation shall be provided two months prior to Train movements.
    - ii. Cellular telephone: Access for installation shall be provided two months prior to Trial Running.
    - iii. Nexus PIDS: Access for installation shall be provided two months prior to Trial Running.
    - iv. City Network IT: Access for installation shall be provided two months prior to Trial Running.
    - v. Traffic Conduit: Access for the installation of traffic fiber by City personnel shall be provided.

## 5.5 [REDACTED] Implementation Constraints

- (a) No disruption to [REDACTED]'s operations shall be permitted.
- (b) No modification to the [REDACTED] Track shall be permitted.
- (c) All work within the vicinity of the [REDACTED] Track shall be co-ordinated with [REDACTED] and the City.
- (d) For work within the [REDACTED] ROW see document "Special Provisions [REDACTED]". Project Co shall abide by [REDACTED] rules, policies, standards and procedures outlined in this document when working within the [REDACTED]ROW.

- (i) Prior to any performance of any work within 10m of the nearest Track, the City and [REDACTED] shall be notified 5 Business Days in advance. Project Co shall provide a [REDACTED] approved flag person to protect [REDACTED] trains from Project Co activities. For flagging cost, see document “[REDACTED]”.
- (ii) Project Co shall be permitted to work within the [REDACTED] ROW between trains upon authorization from flagman.
- (iii) The current schedule of trains is available on the [REDACTED] website at [REDACTED] and is as follows (subject to change):
  - A. Monday to Friday: from 5:30am to 11:00pm.
  - B. Saturday: from 6:45am to 11:00pm.
  - C. Sunday: from 9:15am to 11:00pm.
- (iv) Between trains some small work blocks from 20 minutes to two hours may be available to work.
- (v) Outside those hours, no trains are running, but the last train at approximately 11:00pm could be late on route reducing the night work block available.
- (e) Project Co shall be responsible to perform Utility locates and protect all Utilities during construction if required. Fiber optics are running on both sides of the Track in the vicinity of the Ellwood Diamond.
- (f) Project Co shall communicate ahead of time all activities which could disturb the nearby residents and manage residents’ complaints.
- (g) For the [REDACTED] Contractor Orientation course, it is \$15 (US dollars)/individual working within the ROW.

**ARTICLE 6 RAIL REGULATORY STRUCTURE AND OBLIGATIONS**

**6.1 Governance**

- (a) Transport Canada is the federal agency holding jurisdictional authority over the federal railway system as it relates to the design, construction, operation, Maintenance, Safety and Security, as well as the rates and conditions of service of the System. Specific legislation governing said activities include, but are not limited to regulations, rules, standards, orders and matters covered by the following:
  - (i) CTA;
  - (ii) RSA; and,
  - (iii) Canadian Transportation Accident Investigation and Safety Board Act (TSB).
- (b) Project Co acknowledges that the City, as the official owner of the railway, is accountable for all aspects of the System on the Existing Trillium Line including compliance with all applicable regulatory matters. Project Co further acknowledges that the City is the single point of contact with Transport Canada as it relates to all regulatory issues. Regulatory issues affecting the System design, construction, O&M, Safety and Security as well as rates and conditions of service shall be coordinated through the City.
- (c) The City operates the Existing Trillium Line System under the name Capital Railway.
- (d) Project Co shall be responsible for providing information to support regulatory filings by the City including all relevant technical, O&M, and supporting documentation in support of the following work:
  - (i) Modification of the CTA Certification of Fitness;
  - (ii) Modification of Railway Operating Certificates;
  - (iii) Notification of Railway Works for all activities associated with the Works;
  - (iv) Operational risk assessments for all operational changes in compliance with Article 7 - System Safety Certification, and Article 8 – Security and Emergency Management, of this Part 1;
  - (v) Encroachment agreements and/or crane swing agreements to provide clarity on work methods and controls on or near the active Existing Trillium Line;
  - (vi) Changes to Capital Railway rules, regulations, and SOP, DMU rules, timetable and other rules affecting safe O&M of the System; and,
  - (vii) Grade crossing risk assessment and compliance requirements.
- (e) Additional regulatory filings may be required prior to commencement of construction activities or during the Construction Period and Maintenance Period. The City and Project Co shall work together to identify design and Maintenance issues requiring such filings. Project Co shall be required to submit to the City the appropriate supporting documentation for any additional

regulatory submittals that may be required. Regulatory support documentation may be required for modifications/exemptions to existing or the introduction of new legislations, certificates, rules, standards, order, MOUs and guidelines including, but not limited to those, cited in Table 1-6.1 below.

- (f) Project Co shall be responsible for designing, constructing and Maintaining the Project in accordance with all applicable legislation, certificates, rules, standards, orders, MOUs and guidelines that may include, but are not limited to, those cited in the table below.

**Table 1-6.1**

**Applicable Legislation, Certificates, Rules, Standards, Orders, MOUs and Guidelines**

Type/Title
Canada Transportation Act (CTA)
Railway Safety Act (RSA) (R.S., 1985, c. 32 (4 <sup>th</sup> Supp.))
Canadian Transportation Accident Investigation and Safety Board Act (R.S. 1985, c. C-23.4)
Transportation of Dangerous Goods Act (R.S. 1992, c. 34)
Contraventions Act (S.C. 1992, c. 47)
Canadian Environmental Protection Act (R.S. 1999, c. 33)
Non-smokers' Health Act (R.S. 1985, c. 15 (4 <sup>th</sup> Supp.))
<b>Legislation - Regulations</b>
Grade Crossing Regulations
Notice of Railway Works Regulations
Non-smokers' Health Regulations (made pursuant to the Non-smokers' Health Act)
Canada Labour Code:

Guideline: Engineering Work Related to Railway Works
Fatigue Management Plans – Requirements and Assessment Guidelines

## 6.2 General Requirements

- (a) The following lists the responsibilities of the City and Project Co with respect to regulatory requirements.
- (i) The City shall:
- A. Serve as single-point of contact for all regulatory matters;
  - B. Secure exemptions to clearance standards related to the Leitrim Road aerial structure;
  - C. Secure exemptions to airport zoning regulations associated with the alignment and Leitrim Road Bridge;
  - D. Manage operating agreements and establish tariffs for movement of freight traffic on the System;
  - E. Manage operating agreements with [REDACTED] and [REDACTED]; and,

- F. Manage other third party agreements including but not limited to Utilities, developers, [REDACTED], PSPC, MTO, NCC, etc.
- (ii) Project Co shall;
  - A. Be responsible for compliance with all Applicable Law and regulatory requirements;
  - B. Consider, in consultation with the City, all current regulatory standards, regulations and requirements for the System having regard to its technical features and operating environment. Project Co shall support the City in the development of appropriate support documentation for changes, modifications or exemptions to such legislation, certificates, rules, regulations, standards, orders, MOUs, policies and guidelines;
  - C. identify the appropriate scope, detail and timetable for submission of supporting documentation related to modifications/exemptions to existing legislation, certificates, rules, regulations, standards, orders, MOUs, policies and guidelines based on the City's obligations to comply with Transport Canada, Canadian Transportation Agency and the TSB requirements, as shown in Clause 6.3 of this Part 1 or as prescribed in Clause 6.2 (a) (ii) D of this Part 1 and Clause 6.3 (a) (i) of this Part 1. Project Co shall ensure that the regulatory support documentation is thoroughly reviewed for accuracy and completeness by individuals knowledgeable of the applicable regulatory requirements, prior to submittal. The City shall have final review and approval authority of any support documentation submitted by Project Co prior to submission to Transport Canada. The submission of required documentation shall be in accordance with Schedule 10 – Review Procedure;
  - D. meet the established timetable for submission of documentation requested by regulatory agencies during the design, construction and Maintenance Period as outlined in Clause 6.3 (b) of this Part. Delays to design and construction schedules or Revenue Service date resulting from Project Co's failure to comply with regulatory submission requirements shall not entitle Project Co to a Compensation Event, Delay Event, or Excusing Cause, as applicable in the event of a delay in schedule;
  - E. work with the City in a cooperative and collaborative manner in the identification, development and submittal of ongoing support documentation required for meeting regulatory obligations, throughout the Maintenance Period, including the identification and adoption of such changes as the City may, in its discretion, but with the input of Project Co, deem advisable; and,
  - F. shall be responsible for the following in accordance with Part III, Rail Transportation, of the CTA:
    - i. supporting the City in the continued delivery of freight services to the NRC Facility; and,
    - ii. complying with the current Rail Transfer Agreement with the NRC addressing the delivery of freight service to/from the NRC Facility.

### 6.3 Timing and Protocol for Approval

- (a) Project Co shall develop regulatory support documentation and submit the same to the City for approval according to the following process:
  - (i) Submission Requirements and Timing
    - A. from time to time during the design and construction, Project Co shall submit for timely approval by the City any regulatory support documentation required for modifications/exemptions to existing legislation, certificates, rules, regulations, standards, orders, MOUs, policies and guidelines that may be required to support the commencement and completion of scheduled work packages, programs or delineated work or service activities;
    - B. proposed regulatory support documentation for modifications/exemptions to existing legislation, certificates, rules, regulations, standards, orders, MOUs, policies and guidelines that are planned or scheduled to be adopted prior to or following the commencement of Revenue Service shall be submitted by Project Co for review/approval by the City and submission to Transport Canada in a manner consistent with the timeframe set forth in the specific legislation or regulation, as otherwise required or requested by a regulatory agency or a date mutually agreed to by the City and Project Co; and,
    - C. regulatory support documentation for modifications/exemptions to existing legislation, certificates, rules, regulations, standards, orders, MOUs, policies and guidelines shall be submitted in required format and contain all required information together with a brief explanatory note setting out the reason or purpose for the proposed modification or exemption to current regulation.
  - (ii) City Response and Timing
    - A. The City shall initially respond to each regulatory submittal within 14 Business Days of receipt of Project Co's written submission confirming either its approval or rejection (with reasons) of the proposed modifications/exemptions to current regulations, the extent to which the City requires further information from or consultation with, or training services from Project Co, if any, and the timetable in which the City requires this to occur.
    - B. Should the City or Transport Canada reject or return a submittal for further information or clarification, Project Co shall be responsible for responding to and resubmitting the updated document within:
      - i. the time period established by Transport Canada, as set forth in the specific regulation, or as otherwise required or requested by a regulatory agency; or
      - ii. the date mutually agreed to by the City and Project Co.
  - (iii) Should Project Co fail to respond to the City within the stipulated time period, then the City shall penalize Project Co pursuant to Schedule 20 – Construction Period Payments;

- (iv) The City shall endeavour to complete its review of all submissions made by Project Co in accordance with the foregoing submission requirements by the later of:
  - A. the date mutually agreed to by the City and Project Co for each submission; and,
  - B. the date that falls 30 calendar days following the City's receipt of the submission from Project Co.
- (b) Project Co shall not commence or perform any construction activity comprising any portion of the Works or Project Scope unless regulations or supporting documentation that may be appropriately required to support or facilitate that particular portion of the Works or Project Scope have been adopted by Transport Canada, or alternatively the City has confirmed in writing to Project Co that there are no Regulations that are required by Transport Canada to apply to such activity.
- (c) Adoption and implementation date of such modifications/exemptions will be contingent upon Transport Canada approval.

## ARTICLE 7 SYSTEM SAFETY CERTIFICATION

### 7.1 General Requirements

- (a) The Works specified in this Article, as well as portions of Article 8 that refer to Security, consists of the development and implementation of a SSAP. The purpose of the SSAP is to ensure the Project systems and equipment are as safe and secure as reasonably possible including
  - (i) Design and operating Hazards and Security vulnerabilities are identified, evaluated, and properly controlled or mitigated, prior to the commencement of Revenue Service.
  - (ii) All critical system elements are evaluated for compliance with the identified Safety and Security requirements during the design, conform to the drawings and specifications during construction/installation, and function as required during testing, and start-up phases of the Project.
  - (iii) The Project is operationally safe and secure for customers, employees, ESP, and the general public prior to entering Revenue Service.
  - (iv) All Project equipment, Facilities, plans, procedures, and training programs are systematically reviewed for compliance with established system Safety and Security requirements, and so verified prior to implementation of Revenue Service.
- (b) Requirements for human factors are an integral part of this program and shall be considered in the development and implementation of the SSAP plans. The System Safety and Assurance requirements shall apply to all Project Co functions during all phases of the Works including design, construction, testing, commissioning, Trial Running, in-service support, warranty, retrofits and field modifications.
- (c) Objectives: The primary objective is to deliver a Project that meets or exceeds System Safety and Assurance related governmental rules, regulations, standards and industry best practices, and applicable requirements throughout the Project. Thus, leading to delivery of a safe and reliable System for the City, its employees, Project Co, Passengers and the public at large.
- (d) The Project design shall be compliant with Safety and Security design criteria, codes, and regulations including Ontario Human Rights Commission *Policy and Guidelines on Disability and the Duty to Accommodate*, requirements, with Safety and Security of Passengers and employees as the most important requirement of the Project.
- (e) Project Co shall be responsible for compliance with the Project's SSCP and SSeCP developed by the City through strict conformance to contractual obligations. Project Co shall be responsible to update the Project's SSCP and SSeCP throughout the Project lifecycle. Project Co shall manage its Works through design, construction and integrated testing in such a way as to support the overall success of the Safety and Security Certification processes and the ultimate acceptance by the City.
- (f) Project Co shall be responsible for performing Safety Certification tasks as specified herein in accordance with EN 50126, EN 50128, EN 50129. These tasks shall be managed and performed in accordance with the Project SSCP.

- (g) Project Co shall provide an SCM. The SCM shall develop and implement the Safety Certification program to verify the inclusion of Safety items in the design, construction, testing, and commissioning of the Project. The SCM shall oversee and manage all aspects of the certification process. The SCM shall be a Professional Engineer.

## **7.2 References**

- (a) Develop and implement the System Safety and Assurance Plans in accordance with the following guidelines and documents. Where the referenced documents provided below, conflict with these specifications, these specifications shall govern:
  - (i) NFPA 101 Life Safety Code and other relevant NFPA codes and standards.
  - (ii) NFPA 130, Fixed Guideway Transit and Passenger Rail Systems.
  - (iii) MIL-HDBK-470A, Designing and Developing Maintainable Products and Systems (Volume II), December 1997.

### **7.3 System Safety Requirements**

#### **(a) General**

- (i) The Safety program shall establish the Safety requirements and verify Safety of the design through analyses and collaboration with the various disciplines. This approach helps assure that the Works provides for Health and Safety provisions affecting Maintenance and Operations personnel that equal or exceed the requirements of the Ontario OHSA and AODA.

#### **(b) Safety Technical Requirements for Systems Design**

- (i) Safety shall be the primary design and performance requirement for the Project. The entire Expanded Trillium Line shall operate in a safe manner under all operating conditions. Safety components shall be designed according to the Safety principles (see below), and shall incorporate high reliability parts, selective redundancy, and warning and protective devices, as required, to contribute to the achievement of the specified requirements. In addition, Safety shall be provided for when elements fail or malfunction.
- (ii) The Safety of the Expanded Trillium Line, when operating under normal conditions, shall preclude inadvertent/incorrect actions and/or procedures used by operating personnel. In no case shall procedures be substituted to accomplish any Safety functions provided by specific aspects, components, subsystems and/or equipment. Frequent and/or infrequent use shall not be a reason to justify unsafe or marginally safe design. At all other times (when carrying out Maintenance and/or Failure recovery), there shall be minimum dependence on correctness of actions and/or procedures used by operating and Maintenance personnel.
- (iii) Whenever any Hazardous condition occurs, regardless of the cause, and the condition results in a conflicting concern between human Safety and equipment Safety; the conflict shall be resolved in favour of human Safety.
- (iv) Project Co shall be responsible for designing, supplying, constructing, installing, testing and verifying and certifying the System in accordance with the requirements of the Project Agreement and the Safety principles customarily recognized by the transit industry for light rail systems. Project Co shall be responsible throughout the course of the Project for bringing to the attention of the City, in writing, any change in Laws, rules, orders, Regulations and Codes, and any condition(s), whether caused by its design, any Project Agreement requirement, or any other basis, which it believes might result in, or has resulted in, an unsafe condition. Project Co shall remain fully responsible for rectifying any such condition.

#### **(c) Safety Principles**

- (i) The following Safety principles shall be followed in the design and functionality of systems, subsystems, components, and parts.
  - A. Hazard control shall follow the order of precedence:
    - i. design to eliminate Hazards;
    - ii. design to control Hazards;
    - iii. use Safety devices;
    - iv. use warning devices;
    - v. implement special procedures;
    - vi. accept the Hazard; and,
    - vii. eliminate the system/ subsystem/equipment.
  - B. Unacceptable Hazards shall be eliminated by design.
  - C. The System shall be designed such that there shall be no single-point Failures in the System that can result in an unacceptable or undesirable Hazard condition.
  - D. When the System is operating normally there shall be no unacceptable or undesirable Hazard conditions.
  - E. The System design shall require positive actions to be taken in a prescribed manner to either begin or continue System Operation.
  - F. The Safety of the System in the normal automatic operating mode shall not depend on the correctness of actions or procedures used by operating personnel.
  - G. If one Failure combined with a second Failure can cause an unacceptable or undesirable Hazard condition, the first Failure shall be detected, and the System shall achieve a known safe state before the second Failure can occur.
  - H. Software faults shall not cause an unacceptable or undesirable Hazard condition.
  - I. The criteria for accepting a Hazard risk level shall be in accordance with the Safety Management System.
  - J. Maintenance activities required to preserve or achieve acceptable risk levels shall be performed. Personnel qualifications required to adequately implement these activities shall also be identified.
  - K. Consideration shall be given at all times to the Safety of workers, Passengers and staff of Project Co and the City.
  - L. A failure on Safety Critical equipment shall be detected and reported back to the TOCC.

- (ii) Two principles of Safety, a Fail Safe Principle and a Checked Redundancy Principle, shall govern the design of Safety Critical components and subsystems. One or both of these principles shall be used to provide a safe Expanded Trillium Line System. These principles are defined as follows:
  - A. Fail Safe Principle - The Fail Safe Principle applies to both hardware and software configurations, and states the occurrence of any Failure of Safety Critical hardware or software, or any combination thereof, shall not result in a condition known to be unsafe. The Fail Safe Principle shall be applied where a Failure of any critical element is likely to occur more than once in  $10^6$  (one million) hours of active service on the Expanded Trillium Line. For hardware this shall include, as a minimum, Failure modes; and,
  - B. Checked Redundancy Principle - The Checked Redundancy Principle applies to both Safety Critical hardware and software configurations, and states that the probability of any Failure or combination of Failures that would result in a condition known to be unsafe shall pose no greater risk than that associated with Fail Safe design. In the event of a Failure, the Failure shall be detected, reported/alarmed and negated (maintain fail-safe state). Each function of a component or subsystem designed in accordance with the Checked Redundancy Principle shall provide a level of Safety equivalent to that provided by the same function designed in accordance with the Fail Safe Principle.
- (iii) The checked redundant control configuration, whether hardware or software, shall incorporate at least two parallel control units processing a common system characteristic, and means of comparing the output of the control units. If there is agreement from the comparison, the System may be allowed to respond in accordance with the output of the control units. If there is disagreement, the action resulting from that output shall not occur, and the System shall immediately revert to a safe state. For example, if a Vehicle is in motion, the brakes shall be applied, and if the Vehicle is not in motion, it shall not be allowed to move.
- (iv) The following characteristics shall be incorporated into the checked redundancy design.
  - A. The checking process shall, in itself, be Fail Safe or checked redundant; "agreement" shall not be indicated unless the control units output agree.
  - B. The checking process shall include the comparison of control units related to Safety.
  - C. Any Failure of redundancy affecting the Safety of the System shall be detected. Where software is used; errors in programming shall be considered Failures.
  - D. All parallel control units shall be completely independent. No common environmental or power fluctuations, errors, faults, or other problems, shall cause related errors in the output of the control units. Common software modes of Failure shall be prevented by the following methods, or by similar methods, if approved:
    - i. Independent, different programming in the parallel control units.

- ii. The use of logically complemented programs for the parallel elements of functions involving the ATP subsystem.
  - E. The checking process shall be comprehensive and as frequent as the number of Operations of the device or function, to provide a risk comparable to that of Fail Safe design.
  - F. Unless a comparative agreement occurs in the checking process, timely action shall intervene to provide Safety.
- (d) SCIL
- (i) Project Co shall develop a preliminary SCIL. This list shall include all equipment involved in performing a Safety-Critical function as determined by a Failure Mode, Effects and Criticality Analysis or functional Fault Tree Analysis. The SCIL shall be submitted to the City for approval and updated as required throughout the Project lifecycle. Relays certified as "vital" or Safety type shall have Failure characteristics as defined by the AAR.
- (e) System Safety Design Approach
- (i) Project Co shall provide a PHA for the Project. Project Co shall ensure that the analysis reflects all design changes that may impact the Safety of the Expanded Trillium Line. The PHA and resolutions shall be submitted to the City in accordance with Schedule 10 – Review Procedure.
  - (ii) Additionally the Safety program shall be developed to identify Hazards through the preparation of formal Hazard analyses which have been identified in the systems requirements for the specific system elements. The Hazards identified in the various analyses and the mitigation measures proposed will be reviewed and analyzed by the City for acceptance.
  - (iii) Project Co shall track all identified Hazards throughout the Project lifecycle using a Hazard Log and have the capability to provide status reports to the City and SSCRT for review.
  - (iv) Project Co shall identify all Safety Critical functions and allocate the respective SIL of each with supporting analyses.
  - (v) PHA: Project Co shall provide a PHA for the Expanded Trillium Line. During the progress of the Works, Project Co shall be responsible for identifying additional Hazards that are specific to the Expanded Trillium Line and updating the Hazard Log. Additional Hazards identified and analysis shall be submitted to the City for its review in accordance with Schedule 10 - Review Procedure. Project Co shall address and incorporate applicable mitigations from the Expanded Trillium Line PHA into the design of the Project.
- A. Mitigations shall include design considerations, Safety devices, warning devices or recommendations for adopting special procedures or training. The resolution process shall verify but not be limited to the following:

- i. That the resolution of a Hazard in one system does not create a new Hazard in another system;
  - ii. That Hazards involving interfaces between two or more systems have been analyzed and resolved;
  - iii. That all program participants are providing required analyses in a timely manner, and that determination is made where delinquent receipt is delaying Hazard Resolution; and,
  - iv. That proper resolutions are implemented for areas identified with Hazard Resolutions requiring a change in system design or development of special procedures.
- B. Any subsequent Hazard Analysis that may be required shall be performed in accordance with EN 50126 and the Project Co's hazard management procedure.
- C. Mitigations shall be compiled into an independent Hazard Log that identifies Hazards, proposed mitigations to those Hazards. All mitigation references shall state document, revision number, section and paragraph number.
- (vi) Perform additional Hazard analysis as deemed necessary and agreed to by the City for the following system elements including but not limited to:
  - A. Signalling and Train Control System;
  - B. Communications;
  - C. Trackwork;
  - D. Electrical;
  - E. Elevators;
  - F. Fire/Life Safety Systems, including ventilation; and,
  - G. The Vehicle and the on-board Vehicle equipment as required.
- (vii) Safety analysis techniques shall include, but may not be limited to:
  - A. System/Sub-System Hazard Analysis;
  - B. Software Hazard Analysis;
  - C. Failure Mode, Effects and Criticality Analysis; and,
  - D. Fault Tree Analysis.
- (viii) OHA: Project Co shall perform an OHA to identify and analyze Hazards associated with personnel and procedures during production, installation, testing, training, Operations, Maintenance and Emergencies. Project Co shall provide for corrective measures to be

taken to minimize the possibility that a human error or procedure will result in injury or System damage.

#### **7.4 Development of Safety Design Criteria**

- (a) Project Co shall prepare separate, and submit, in accordance with Schedule 10 – Review Procedure, Safety Design Criteria separate from Security Design Criteria at the commencement of the design effort to provide applicable Safety guidelines for proper design, construction, testing, and preparation of the Operation of the System. The purpose for separate Design Criteria documents involves the control or restriction of information that due to its sensitive and confidential nature or content that may, if disclosed or released, identify vulnerabilities to Critical infrastructures or systems. The separation of these documents allows for one criterion to be updated without impact to the other.
  - (i) The Safety Design Criteria shall be submitted within 120 days of Financial Close.
- (b) The Design Criteria shall ensure that the Safety elements identified for the Project will become part of requirements that shall be addressed by Project Co through the development of specifications, drawings, design reviews, and final acceptance.

#### **7.5 Safety and Security Certification**

- (a) Project Co's management responsibilities shall include, but are not limited to, the following:
  - (i) Project Co shall implement a Safety and Security Certification program which shall be compliant with the City's SSCP and SSeCP, which shall verify the inclusion of all Safety and Security items in the design, construction, testing, operation and Maintenance of the Expanded Trillium Line. An SSCRT, independent of the design activities, shall oversee the certification effort.
  - (ii) Project Co shall utilize the SSCP and SSeCP developed by the City that describes and outlines the Project's Safety Certification and Security Certification processes which will be compliant to the City's SSCP and SSeCP. The SSCP and SSeCP developed by the City will describe roles, responsibilities, staffing, schedule and a description of the process, at a minimum. Project Co shall be responsible to develop a project specific SSCP and SSeCP to describe how they will be complaint to the City's SSCP and SSeCP and provide a deliverable timeline in line with the Project schedule.
  - (iii) Project Co shall participate in meetings with the SSCRT, FLSSC, and SSORC.
    - A. SSCRT:
      - i. Shall oversee Project Co's SSCP and SSeCP;
      - ii. Shall conduct meetings at a minimum of quarterly to discuss safety and security concerns;
      - iii. Shall review Project Co's certification activities; and,

- iv. Shall consist of Project Co's SCM and SeCM to liaise with the SSCRT to report status, open items and Hazard, threat and risk management/resolution.
  - B. FLSSC:
    - i. Project Co shall ensure the respective Emergency response agencies are involved including Fire, Police, Emergency Responders, etc.
    - ii. The FLSSC shall be a liaison with respective City representatives and local authorities as defined by Project Co.
    - iii. The FLSSC shall review standards and Safety and Security related designs, tests to verify compliance with FLS codes and Emergency preparedness.
  - C. SSORC:
    - i. Additional committees including an SSORC shall be established as needed to review designs, plans, manuals, rules and procedures, and other documentation necessary for certification prior to Revenue Service operation.
- (iv) Cooperation and facilitation of Safety and Security Certification audits of the Works shall include.
  - A. Coordinating, documenting and performing training as specified in the Project Agreement.
  - B. Maintaining and updating files and submitting required documentation on a timely and sequential milestone schedule basis. Preparing Safety and Security Certification progress reports each month, which shall include submitting a record copy of Safety and Security Certification files to the City in accordance with Schedule 10 – Review Procedure.
- (b) Project Co's responsibilities are defined in the following table. Project Co shall be responsible for the performance of the tasks/activities identified in Table 1-7.1. The SSCP and Safety Management System shall be followed when conducting tasks below. This Table also includes the RAM deliverables described in Clause 7.8 of this Part 1.

Table 1-7.1 – Project Co Deliverable Requirements by Project Phase.

PROJECT PHASE	EN 50126 LIFECYCLE PHASE	PROJECT CO RAM TASKS	PROJECT CO SAFETY TASKS
PRELIMINARY / CONCEPTUAL DESIGN	1. Concept	Review Project Agreement RAM requirements Evaluate past RAM data and experience Preliminary RAM Allocation	Review and Update the City's SSCP
	2. System definition and application conditions	RAM Program Plan Preliminary RAM Allocation Establish RAM Assurance Plan, can be part of SSAP RAM audits (internal and 3 <sup>rd</sup> party)	SSAP Safety audits (Internal and 3 <sup>rd</sup> party) SSPP Provide PHA
	3. Risk Analysis	Preliminary identification of Reliability Critical items	SSAP Update System PHA System Risk Analysis Interface Risk Analysis Review and update Hazard Log Software Safety Plan

PROJECT PHASE	EN 50126 LIFECYCLE PHASE	PROJECT CO RAM TASKS	PROJECT CO SAFETY TASKS
DETAILED / FINAL DESIGN	1. System Requirements	Capture RAM requirements in Traceability Matrix Update RAM Program Plan, as required Update RAM portion of SSAP, as required RAM Demonstration Plan	Hazard Log update Allocation of THR →SIL Function Apportionment Update SSPP Safety Verification and Validation Plan Review/Establish Non-Conformance Procedures and Reports Safety audits (Internal and 3 <sup>rd</sup> party)
	2. Apportionment of System Requirements	RAM Allocation Report FMECA (Can be same as Safety provided it includes all information) Reliability Critical Items List Provide Lifecycle Costing for Operations and Maintenance period	SSAP update * as required SSPP update * as required Software Safety Plan update * as required PHA System Risk Analysis / Subsystem Risk Analysis Interface Risk Analysis OHA FMECA FTA Develop SCIL
IMPLEMENTATION	3. Design and Implementation	RAM Prediction Report Review and update RAM portion of SSAP, as required	Integrated System Safety Case Update Hazard Analysis (Subsystem/Interface, OHA) FMECA Test Plans and Procedures SIL Safety Function Assignment
PROCUREMENT AND MANUFACTURING	4. Manufacturing	Review First Article Inspection Maintainability Demonstration FRACAS Procedure	Hazard Log Update Safety Verification and Validation Report(s) Assess Safety related training Operation and Maintenance Manuals
CONSTRUCTION AND INSTALLATION	5. Installation	Spares List (with separate section for Safety Critical and Reliability Critical items)	SSAP Update Validation Report(s)

PROJECT PHASE	EN 50126 LIFECYCLE PHASE	PROJECT CO RAM TASKS	PROJECT CO SAFETY TASKS
TESTING & COMMISSIONING	6. System Validation	Review and update RAM Demonstration Plan as required RAM Demonstration Report FRACAS Report	System Safety Case System Test Reports Update OHA Safety Related Application Conditions (SRAC), as required Safety Audits (Internal and 3rd party)
HANDING OVER	7. System Acceptance	RAM Demonstration Report Acceptance by City for Revenue Operation	Hazard Log Update Engineering Safety and Assurance Case
OPERATIONS AND MAINTENANCE OBJECTIVES	8. Operation and Maintenance	RAM Demonstration Report during Warranty Period (Monthly Report) FRACAS Report	O&M FRACAS Review and update Hazard Log Review and Update Engineering Safety and Assurance Case Transfer and implement SSAP for Operations Update Operations and Maintenance Manuals Safety Audits (Internal and 3rd party)
	9. Performance Monitoring	RAM Demonstration Report until Warranty expiry and acceptance by City Maintain FRACAS Report	No Safety deliverables required unless assumptions found to be invalid.
	10. Modification and Retrofit	Assess RAM implications as required	Hazard Log Update Engineering Safety and Assurance Case Update as appropriate

## 7.6 Safety Activities

- (a) Project Co shall follow the SSCP and Safety Management System, when conducting the Safety activities listed in Table 1-7.1 above along with the respective standards listed therein.
- (b) Witness point: Witness point selection is a City responsibility with the purpose of defining selected points or locations where the City wishes to formally witness testing. Project Co shall be responsible for scheduling and performing the tests that include those City-selected points; and, for notifying the City at least 14 Business Days in advance of the date and time of the test. Notification procedures shall be established prior to witness point testing, scheduling or performance of testing. Selected areas shall include items of high risk, where concerns of compliance have been raised, or those selected by random sampling. The City shall have the right to attend and witness any and all testing that takes place.
- (c) Safety-related tests: Project Co shall verify that subsystems and systems function safely as specified and do not contain or create unforeseen Hazards. All Safety-related tests shall be

included in the test program plan contained within its own section. The respective Safety-related tests and results shall be documented within test reports to provide Safety evidence for the respective Safety Case. Safety tests shall include, at a minimum:

- (i) An initial Safety related testing conformance checklist shall be prepared for the design level of the Project Agreement. Project Co shall update the Safety related testing conformance checklist and submit it to the City for review. Project Co shall verify that all Safety related tests identified in the specifications and other Project Agreement documents are successfully performed and the completed tests have been verified within defined test parameters and the systems and subsystems function safely as specified, do not contain or create unforeseen Hazards and contain specified Safety features. All requirements on the checklists shall be verified and submitted to the City for review in accordance with Schedule 10 – Review Procedure.
- (ii) At a minimum, each of the identified Safety requirements for Safety Critical Item (unit) and respective Safety function for a Certifiable Element shall be simulated and tested to verify and certify performance in normal modes and associated sequences and the Failure modes and effects, as applicable. These tests shall demonstrate the Safety requirements stated herein have been met. Should the Safety testing identify any Safety issue, they shall be listed in the Safety test reports, indicating remediation and corrective action necessary. All remediation and corrective actions required by Project Co shall be completed within 14 calendar days and documented in a Non-Conformance Report to ensure traceability. All remediation and corrective actions shall be completed prior to the completion of the Works and pre-revenue testing and training. Project Co shall audit all tasks.
- (iii) Safety Testing Documentation - Safety testing shall be separately identified to allow recognition of Safety tests. Project Co shall include a matrix in the SSVM (output from the Hazard Log), addressing Safety tests only, which shall receive the concurrence by signature of the responsible person as defined by Project Co's organization chart. The matrix shall identify Safety parameters and/or other Safety considerations and a cross-reference to the test procedure accomplishing the verification and certification. This matrix shall be kept current throughout the duration of the Project Agreement and shall include the identification of the test reports which confirm verification and certification of the Safety and Security requirements. The references to the Safety tests along with reports shall be checked before every Safety Case submission to ensure that there have been no revisions or modifications.
- (iv) Notification - Project Co shall notify the City in writing 30 calendar days prior to the start of any Safety or Security test. If any of the data indicate conditions which could potentially result in lack of proper Safety or protection of Operations; Project Co shall immediately indicate proposed remedies and/or corrective actions.
- (v) Scheduling - All Safety tests shall be successfully completed by Project Co prior to system or equipment acceptance.
- (vi) Safety Test Reports - Project Co shall ensure test reports which contain Safety verifications and certifications shall receive the concurrence, by signature, of the responsible person, defined by Project Co's organization chart. Safety Test Reports shall be attached to the respective Safety Case and referenced within the SSVM to demonstrate compliance.

- A. Project Co shall report any non-compliance/non-conformance with applicable code and regulatory requirements noted as a result of Safety related testing. All non-compliances shall be rectified in accordance with applicable codes and regulations.
- (d) Safety training and drills: Project Co shall be responsible for the proper coordination and successful completion of this task of Safety drills and exercises with the City and other third parties including but not limited to the [REDACTED], [REDACTED], NRC, [REDACTED] and the OMCAA as applicable. The purpose of the training and drills verification process is to verify that key Safety related training on new equipment and procedures is adequate and appropriate for the tasks performed under typical and Emergency conditions. Project Co shall schedule, arrange, invite participants, provide equipment, and set up locations for drills to occur. Where indicated elsewhere herein, Project Co shall also provide instructors to assist performing the Safety training. This includes but is not limited to:
  - (i) Verifying safe System Operation through drills and exercises is an integral part of a closed-loop, pro-active System Safety process. The methodology employed by the training/drill/exercise process is to obtain written verification from the City that:
    - A. Training and drills are adequate and appropriate for the assigned task, and contain instructions on Safety features for typical and Emergency conditions;
    - B. Lessons learned from training and drills/exercises performed are reviewed and documented and that additional Hazards, vulnerabilities, or open Safety issues have been resolved; and,
    - C. Known issues concerning training and drills, which impact Safety, have been satisfactorily resolved.
  - (ii) Safety information on conformed methods and procedures necessary to maintain safe conditions shall be generated by Project Co and included in a Safety Training Program, to be provided by Project Co, for Safety training consideration of construction, Operations and Maintenance personnel. At a minimum, each of the Safety training requirements disclosed by the PHA and OHA shall be included in the training program and associated documents.
- (e) Project Co shall be responsible for establishing and maintaining a Hazard Log to record and track Hazards for resolution as addressed in the Hazard analysis. The Hazard Log shall describe all identified Hazards, the measures taken to resolve each Hazard (references citing document, revision, section number) and the results of reviews, comments and approvals by the City and other outside agencies. All Hazards shall be tracked through to resolution. Project Co shall submit the most current copy of the Hazard Log to the City for review upon request. After all tracked Hazards are resolved, Project Co shall prepare a SSVM document and submit in accordance with Schedule 10 – Review Procedure.
- (f) Fire Life Safety – Project Co shall be responsible for compliance with Fire Life Safety requirements included in federal, provincial, local codes and regulations, and the Project Agreement. Project Co shall incorporate these requirements into the design and construction of the Project and include all applicable certifiable Fire Life Safety elements in the appropriate SSRTM.

- (g) Project Co shall support the approval process by participating in reviews, inspections and technical discussions between the City and local jurisdictional authorities and other Governmental Authorities, and incorporating the resulting agreements into the design and construction. Project Co shall be responsible for verifying that Project Co's completed design complies with the resolutions of Fire Life Safety issues, and is acceptable to the applicable Governmental Authorities.
- (h) Project Safety Certification Report (Engineering Safety and Assurance Case)
  - (i) A signed report shall be prepared by Project Co, prior to opening, attesting to the overall Safety and Security of the Expanded Trillium Line for public use. This shall include resolution to all non-conformance Hazards and vulnerabilities previously identified through Project Co's detailed Safety Analysis. Upon completion of the Works and pre-revenue testing and training, Project Co shall issue to the City and the SSCRT a signed and sealed Final Safety Certification Report.
  - (ii) The signed Safety Certification Report shall certify to the City that the Works has been designed and constructed in accordance with the Project Agreement Safety requirements, and Project Co has used the Safety principles customarily applied in the transit industry for transit systems in North America and Canada. The report shall further certify the Expanded Trillium Line either meets or exceeds all applicable Federal, Provincial, City, and local Laws, Ordinances, rules, Regulations, Statutes, industry Codes, and other standards and requirements, whichever are the more stringent requirements.
  - (iii) As a basis for making this formal certification, Project Co shall perform a detailed accounting of all correspondence and documentation to verify and certify all Safety requirements, activities, tests, inspections, non-conformances, remediation's and actions have been completed and satisfied, documenting these results in a Safety Certification Report which shall be submitted to the City in accordance with Schedule 10 – Review Procedure.

#### **7.7 Format for System Safety Verification Matrix**

- (a) Project Co shall provide an SSVM in the following format, noting that this shall be an output from the Hazard Log.
  - (i) Item number;
  - (ii) Safety requirement;
  - (iii) Document reference:
    - A. Document name; and,
    - B. Article number.
  - (iv) Evidence:
    - A. Method of verification by Project Co;
    - B. Method of validation by audit team;

- C. Validated by (Name of auditor);
- D. Date; and,
- E. Remarks.

(b) System Safety Requirement Traceability Matrix

- (i) Project Co shall develop an SSRTM for the Project. It shall be used to verify and certify that the Safety requirements have been incorporated in the design and certify that all Safety requirements of the design are constructed and/or installed in accordance with the Project Agreement. Verification reports (outputs of the SSRTM) shall be submitted in accordance with Schedule 10 – Review Procedure.

**7.8 Reliability, Availability, Maintainability**

(a) System Assurance

(i) Introduction

- A. The SSAP shall encompass system RAM. The primary objectives of system assurance are to: ensure RAM, Safety and quality plans, processes and procedures are followed, implemented and in-line with the PA and applicable regulations and standards.
- B. The general design concepts which shall be incorporated include, but are not limited to: use of standards, proven designs; use of reliable equipment, use of interchangeable, modular components; extensive and prominent labeling of parts, wires, etc.; use of standard, prewired harnesses; use of weatherproof seals and latches.
- C. The systems assurance requirements are specified for specific system elements and contract specifications. Project Co shall develop and implement a System RAM Program encompassing system RAM engineering and meet quantitative RAM goals and requirements, which shall be demonstrated through analysis and test. The RAM requirements shall apply to all systems, subsystems and assemblies, software, hardware and firmware provided for the Expanded Trillium Line. The requirements apply during all phases of the work.

(b) RAM Approach

- (i) Project Co shall follow, implement and meet RAM Program requirements including qualitative and quantitative requirements contained in the specific system elements requirements.
- (ii) Quantitative RAM goals/requirements shall be apportioned by Project Co for subsystems/equipment/components comprising the system elements. In addition to the quantitative goals to be met, Project Co shall meet requirements defined for the RAM Program Plan, and specific analyses.

(c) RAM Program Plan

- (i) The Project Co shall prepare a detailed RAM Program Plan in general accordance with applicable provisions of EN 50126. It shall include, at a minimum, the following:
  - A. Description of the System;
  - B. RAM Requirements and Critical items;
  - C. Task listing and time phasing for each task including RAM deliverables as stated in Table 1-7-1;
  - D. Organization and responsibilities of key personnel including the formation of a Failure Review Board;
  - E. Techniques for allocation of quantitative requirements to lower level functional elements;
  - F. Interfaces between RAM and other closely related programs, and support to efforts such as:
    - i. Logistic support and Maintenance planning;
    - ii. Design;
    - iii. Quality assurance and quality control;
    - iv. Standardization;
    - v. Systems engineering; and,
    - vi. Personnel subsystem program (human engineering, life support, training, and personnel resources).
  - G. Methods for assuring that sub-contractor's' RAM efforts are consistent with overall System requirements;
  - H. Provision for source selection, first article inspection, and surveillance of sub-contractor's' RAM activities;
  - I. Analytical methods to be used during design and development for demonstrating compliance with RAM requirements and goals;
  - J. Procedures and controls, including piece part selection and screening, manufacturing process controls, procurement controls, and test procedures, to be utilized during production to ensure achievement of RAM requirements;
  - K. Provisions to evaluate design changes for possible effects upon subsystem and functional level requirements and goals; and,
  - L. Description of failure management and collection.

- (d) Maintenance Approach - Develop a concept of maintenance as part of the RAM Program Plan taking the following into considerations:
  - (i) System parameters as specified above.
  - (ii) Maintenance Assumptions
    - A. Troubleshooting and repair shall be done by qualified technician with a minimum of 2 years' experience and has attended the Maintenance training programs at a minimum; and,
    - B. Spare parts recommended by the Project Co shall be available.
  - (iii) The concept of maintenance shall define the repair, Corrective Maintenance program plans, policies, and support requirements for all equipment supplied under for this Project. It shall:
    - A. Minimize each level of Maintenance consistent with the specification requirements and system Reliability goals; and,
    - B. Recommend policies and practices which ensure that, at the time of a failure, qualified Maintenance personnel shall be promptly notified and shall have the necessary documentation, tools, test equipment, and spare parts to affect the repair in a minimum of time.
  - (iv) The concept of maintenance shall develop recommendations for:
    - A. Depth and frequency of Maintenance requirements at each level;
    - B. Facilities required;
    - C. Support equipment and tools required;
    - D. Skill levels and numbers of personnel required;
    - E. Subsystem, component, and piece part repair policy; and,
    - F. Detailed fault isolation and troubleshooting procedures, diagnostic equipment, and special test equipment.
- (e) Maintainability Design Features
  - (i) The subsystems and components shall incorporate the following design features:
    - A. Accessibility: All routinely serviced subsystems and components shall be readily accessible for service and inspection. Accessibility of components shall be proportional to frequency of Maintenance and repair. No active electrical or mechanical components that can foreseeably require Maintenance shall be structurally embedded to preclude convenient access for repair or replacement.

- B. Modular Design: Modular design principles shall be employed to the greatest extent practicable. Components shall be packaged together in replaceable subassemblies according to the logical function that they perform. Components or subassemblies requiring occasional removal shall preferably be plug-in units.
- C. Interchangeability: Assemblies or components that are functionally interchangeable shall be physically interchangeable. Assemblies or components that are not functionally interchangeable shall not be physically interchangeable.
- D. Adjustments: The need for adjustments shall be avoided. Where adjustment points cannot be avoided, they shall be readily accessible, adequately identified, and self-locking to prevent inadvertent adjustment or drift.
- E. Special Tools: The number of special tools required for Maintenance and repair shall be minimized. However, if they are required, they shall be defined and furnished in a quantity determined as part of the Works of this Project.
- F. Panels and Openings: Panels and openings shall be of sufficient quantity, size, and placement to permit ready access from normal work areas and positions. Adjustment controls, fittings, and such, shall be directly accessible through panels and openings. Self-retaining fasteners shall be used wherever possible. Special access opening tools shall not be used unless considered necessary to prevent vandalism.
- G. Cable Connections: Cable connectors shall be spaced far enough apart so that they can be grasped firmly for connecting and disconnecting. Connectors shall be properly labeled and keyed so that they cannot be interchanged or improperly installed. Signal and power pins shall not be adjacent.
- H. Lifting Assists: Handles, lifting lugs, or reviewed functional equivalents shall be provided on components of 18 kg or more.
- I. Visual Inspection: Visual inspection of equipment shall be unobstructed.
- J. Test Points: Built-in test points shall be provided and marked. Major components having test panels or test points shall be located for easy accessibility and shall permit external monitoring of Critical functions. Test points shall be protected against environmental damage and human error.
- K. Fault Isolation: Failure indicators shall be provided and identified. Systematic fault isolation procedures shall be developed and included in the Maintenance manuals.
- L. Labeling: All test points, fault indicators, modules, wire junctions, pipes, tubes, wires, etc., shall be identified by name plates, colour coding, number coding, or other means to assist Maintenance personnel. All ROMs, PROMs, and EPROMs shall be labeled with the version and date of stored software.
- M. Hardware: Standard, commercially available industrial components and hardware shall be used wherever possible.

- N. Vandalism: The use of vandal and damage resistant materials shall be used whenever possible.
- (f) Preventive Maintenance Plan
- (i) Project Co shall develop and submit a detailed Preventive Maintenance Plan based upon the concept of maintenance and established maintainability requirements. The Preventive Maintenance Plan shall provide all preventive Maintenance tasks needed to Maintain each subsystem/equipment, supplied for this Project, as close as possible to new condition. The Preventive Maintenance task analysis shall include all servicing, inspections, scheduled overhaul, or any task required on a scheduled basis. The elapsed time to perform specific tasks shall be defined in the analysis, and in Maintenance and servicing manuals. All tasks shall be sorted and grouped by time interval (ex. daily, weekly, monthly, etc.), as well as by Subsystem.
- (ii) In addition to Preventive Maintenance tasks recommended by equipment manufacturers to enhance the Reliability/Availability of their equipment, many Safety Critical Preventive Maintenance tasks shall be required as a means of detecting Safety-significant latent failures, which would otherwise remain latent until another subsequent Failure resulted in a potentially hazardous event. The Safety Critical preventive maintenance tasks are a direct result of performing Safety analyses on all required subsystems. Project Co shall use a clear and deliberate method to identify all Safety Critical Preventive Maintenance tasks in the Preventive Maintenance Plan
- (g) Project Co shall apportion and allocate MTBF and MTTR values as applicable to the various systems elements and subsystems using a Reliability Block Diagram model, which shall support and meet the top level RAM goals/requirements. Project Co may use the beneficial effects of redundancy and repair rate (repair rate = reciprocal of MTTR) to reduce the effective Failure frequency and thus increase the effective MTBF of system elements and subsystems due to equipment redundancy, and the ability to repair one failed unit in time before the second (redundant) unit fails. Project Co shall demonstrate through analysis and testing that the apportioned Availability/MTBF values which support the top level inherent RAM are achievable and the equipment shall demonstrate such MTBF through analysis and testing.
- (h) MTBF shall be calculated as the total number of equipment operating hours for the entire population of like items, divided by the number of Failures (loss of function) requiring unscheduled Corrective Maintenance action anywhere within the said population of items during said total accrued operating hours by said population of items. A Failure shall be defined as loss of function. In redundant systems configuration, the function shall not be deemed “lost” until all the redundant items in the “Cut-set” of redundant items have failed. Thus Project Co shall benefit from the effects of redundancy and repair rate to reduce the effective Failure frequency of the system/ subsystems (i.e., increase the effective MTBF) due to redundancy in configuration. Also, scheduled preventive Maintenance to inspect/ repair/ replace items during non-revenue-service hours, shall not be considered chargeable Failure for MTBF calculation.
- (i) RAM Prediction Report
- (i) Project Co shall submit a RAM Prediction Report to demonstrate its proposed equipment will meet RAM goals/requirements. Project Co shall not furnish any equipment until calculations or data is approved by the City.

- (ii) Reliability calculations shall use reliability block diagram, reliability model, probability of success equation, and preventive Maintenance strategies to achieve required MTBF. Sustained field data, Electronic Parts Reliability Data – 2014, Non-Electronic Parts Reliability Data – 2017 and MIL-HDBK-217F shall be used for reliability data in order of precedence. Any assumptions made shall be documented in the RAM Prediction Report, as a minimum shall include de-rating factors for environment, temperature, application and stress and redundancy configurations for MTBSAF calculations, as applicable.
  - (iii) Project Co may propose alternate method of calculating reliability, such as providing service records for proven equipment, provided Project Co can demonstrate similar function and environmental conditions, for approval by the City.
  - (iv) Project Co shall conduct a Maintainability analysis to be included within the RAM Prediction Report to ensure the Maintainability requirements listed herein have been achieved. Project Co shall follow IEC 60706 in general accordance.
- (j) RAM Demonstration Plan and Report:
  - (i) Project Co shall develop a RAM Demonstration Plan outlining the equipment to be tested, acceptance criteria and test conditions to be applied. Project Co shall submit to the City for review and approval.
  - (ii) During testing and commissioning, Project Co shall provide the City a RAM Demonstration Report outlining the performance of the System and to demonstrate the ability to capture and analyze failure data (FRACAS system in place) in accordance to the RAM Demonstration Plan, for review and acceptance
  - (iii) Project Co shall provide monthly reports throughout the Warranty Period to ensure the RAM requirements are being met.
- (k) FRACAS Procedure and Report
  - (i) Project Co shall develop a FRACAS Program and submit to the City for review and approval. The program shall outline the organization in place to support the program and the approach taken by Project Co to detect, collect, diagnose and correct the respective Failure as a minimum.
  - (ii) Project Co shall develop and submit to the City, on a monthly basis starting at testing and commissioning, a detailed FRACAS Report, indicating all system element Failures to the LLRU by subsystem, corrective actions to be implemented and work orders traced to the respective corrective action, identification of any pattern Failures and a summary of the most frequent failing elements.

## ARTICLE 8 SECURITY AND EMERGENCY MANAGEMENT

### 8.1 General Security and Emergency Management Requirements

- (a) The Works specified in this Article consists of the development and implementation of Security and Emergency Management requirements. Requirements for physical and cyber Security and Emergency preparedness of City ESP are integral part of this Project. These Security and Emergency preparedness requirements shall apply to all Project Co functions during all phases of the Works including design, construction, installation, testing, pre-revenue operations, in-service support, warranty, retrofits and field modifications. As well, Project Co shall ensure Security is considered in the development and implementation of the plans, training and supporting documentation including the development and implementation of an SSeAP. The purpose of the SSeAP is to ensure the Project Facilities, systems and equipment are as secure as reasonably possible including:
- (i) Design and operating Security vulnerabilities are identified, evaluated, and properly controlled or mitigated, prior to the commencement of Passenger service on the Expanded Trillium Line.
  - (ii) All Critical system elements are evaluated for compliance with the identified Security requirements during the design, conform to the drawings and specification during construction/installation, and function as required during testing, and start-up phases of the Project.
  - (iii) The Project is operationally secure for customers, employees, ESP, and the general public prior to entering Revenue Service.
  - (iv) All Project equipment, Facilities, plans, procedures, and training programs are systematically reviewed for compliance with established system Security requirements, and so verified prior to implementation of Revenue Service.
- (b) Objectives: The primary mission of the Trillium Line Extension is to provide the City with a safe, secure, reliable, and attractive public rail transportation system. As such, the Trillium Line Extension shall incorporate Security values that affect all levels of the Project activities including; the planning, design, procurement, construction, testing, commissioning, and Operations and Maintenance. Project Co shall deliver a Project that meets or exceeds Security and Emergency preparedness related governmental rules, regulations, standards and industry best practices, and applicable requirements throughout the Project. Project Co and Project Co Parties are charged with the responsibility of delivery of a secure system for the City, its employees, customers, and public at large as well as ensuring ESP are ready to respond to Emergency events through formal training and documentation development.
- (c) The Works shall be accomplished by incorporating Security design features, facilitating Emergency response training drills (which shall include on Site (Guideway and Stations) and on-Train familiarization sessions, in classroom instructions, tabletop exercises and live exercises using Train, Stations, Guideway and maintenance Facilities) and implementing contractual training for the safe and efficient handling of both normal and Emergency conditions. Project Co shall design the Project with provisions to enable safe and timely evacuation of patrons and personnel from all fixed Structures, disabled Vehicles and Facilities. The provisions shall also include necessary safeguards to protect Passengers, personnel and ESP during evacuation and

- shall minimize exposure to all Hazards, including those due to moving Vehicles and potential falls, weather issues and vulnerabilities due to intentional acts.
- (d) The Project design shall be compliant with Security criteria, codes, and regulations and the duty to accommodate Security requirements of Passengers and employees as the most important requirement of the Project.
  - (e) Project Co shall be responsible for compliance with the Project's SSeCP developed by the City through strict conformance to contractual obligations. Project Co shall manage its Works and that of its Subcontractors' through design, construction and integrated testing in such a way as to support the overall success of the Security certification process and the ultimate acceptance by the City.
  - (f) The Expanded Trillium Line ERP shall be in accordance with the criteria contained in this Article and all Applicable Law governing Emergency planning, response and recovery. The ERP shall incorporate requirements contained in the existing "Railway Passenger Handling Safety & Emergency Response Plan".
  - (g) Project Co shall coordinate with the City on the development of an ERP to reflect all elements of the SI and Vehicles. This approach ensures that Project Co has considered, trained, addressed, and planned for all potential catastrophic natural and man-made disasters, and has established protocols, procedures, responsibilities and guidelines to mitigate the potential impacts and respond to and recover from the occurrence of a disaster event, in accordance with the ERP.
  - (h) The ERP shall be completed and submitted as part of the Works Submittals in accordance with Schedule 10 – Review Procedure.
  - (i) It is understood that the ERP developed by Project Co shall be incorporated into the City of Ottawa Emergency Management Plan, and the PERP. As such, the general outline, organization and structure of the ERP shall generally follow the City of Ottawa Emergency Management Plan and the PERP.
  - (j) This Article is provided as a general outline for the requirements of the ERP, as the ERP shall be modified, revised or changed, as appropriate, to address specific issues, needs, threats, Hazards, vulnerabilities, or concerns, including those identified in the PHA, TVA, risk assessment, Hazard analysis and FMEA related to the Expanded Trillium Line System that shall be developed during the Project Term.
  - (k) Project Co shall be responsible for performing Security Certification tasks as specified herein in accordance with U.S. Department of Transportation, Federal Transit Administration's Handbook for Transit Safety and Security Certification, Final Report, November 2002; FTA-MA-90-5006-02-01. These tasks shall be managed and performed in accordance with the Project SSeCP.
  - (l) Project Co shall provide a SeCM to develop and implement the Security Certification processes. The SeCM shall develop and implement the Security Certification Program to verify the inclusion of Security items in the design, construction, testing, and commissioning of the Project. The SeCM shall oversee and manage all aspects of the Security Certification effort.

## **8.2 References**

- (a) Develop and implement the Security and Emergency preparedness deliverables such as plans, procedures and protocols to ensure response activities are defined and outlined for incidents requiring police, fire or paramedic, in accordance with the following guidelines and documents. Where the referenced documents provided below, conflict with these specifications, these specifications shall govern:
  - (i) For Security: Handbook for Transit Safety and Security Certification, Final Report, November 2002; DOT, FTA-MA-90-5006-02-01.
  - (ii) Public Transportation System Security and Emergency Preparedness Planning Guide, January 2003, Final Report, U.S. DOT, FTA, DOT-VNTSC-FTA-03-01.
  - (iii) Transit Security Design Considerations, Final Report, November 2004, US DOT, FTA, DOT-VNTSC-FTA-05-02.
  - (iv) CPTED principles, City of Ottawa, Urban Design, A Reference Guide to Creating Great Places and Great Spaces, Planning, Transit and the Environment, Publication #2103, Summer 2007.
  - (v) NFPA 130, Fixed Guideway Transit and Passenger Rail Systems.
  - (vi) ASIS International Security strategies and procedures.
  - (vii) Transport Canada Rail Codes of Practice for Rail and Transit Operations.
  - (viii) Pathway Lighting Policy, City of Ottawa Policy on Lighting Pathways.

## **8.3 Security and Emergency Response Principles**

- (a) The following Security and Emergency response principles shall be followed in the Design and development of Security plans and procedures, ESP training and overall ESP preparedness.
- (b) Security: The three fundamental principles of Security are:
  - (i) Confidentiality: The principle of confidentiality means that the System's operational and management control assets can be accessed only by authorized parties.
  - (ii) Integrity: The principle of integrity means that the System's operational and management control assets can only be modified or changed by authorized parties in authorized ways.
  - (iii) Availability: The principle of availability means that the System's operational and management control assets should be available to authorized parties at all times.
- (c) Emergency response principles include:
  - (i) Emergency response procedures shall be designed and developed to align with industry accepted principles and follow the current City Emergency response protocols;

- (ii) Emergency responder systems training shall include access, familiarization sessions and tours, and operation of Safety, Security and Emergency response systems;
  - (iii) Emergency response training and familiarization shall consider City protocols for escalation of Emergency events;
  - (iv) Emergency response procedures shall account for changes to the threat as outlined in the Threat Log and Risk Log; and,
  - (v) Emergency response shall be validated through both tabletop and full-scale exercises.
- (d) Emergency response shall consider the Safety of City ESP at all times.

#### **8.4 Development of Security Design Criteria**

- (a) Project Co shall prepare Security Design Criteria at the commencement of the design effort to provide applicable Security guidelines for proper design including CPTED, construction, testing, and preparation of the operation of the Security systems. The purpose for separating Safety and Security Design Criteria documents involves the control or restriction of information that due to its sensitive and confidential nature or content that may, if disclosed or released, identify vulnerabilities to Critical infrastructures or systems. The separation of these documents allows for one criterion to be updated without impact to the other.
- (i) The Security Design Criteria shall be submitted within 150 days of Financial Close.
- (b) The Design Criteria shall ensure that the Security elements identified for the Project shall become part of requirements that shall be addressed by Project Co through the development of specifications, drawings, design reviews, and final acceptance. These Security elements include where appropriate, and to meet the requirements as identified in the Threat Log and Risk Log:
- (i) Perimeter fencing;
  - (ii) Alarms;
  - (iii) Fare gates;
  - (iv) Security laminates;
  - (v) CCTV cameras;
  - (vi) PA systems;
  - (vii) Security signage;
  - (viii) Intrusion detection;
  - (ix) Locks;
  - (x) Key control;
  - (xi) Roll down cooling grills;

- (xii) Blast mitigation;
- (xiii) Vehicular barriers;
- (xiv) Security lighting; and,
- (xv) Cyber protection for IT and SCADA systems.

## **8.5 Security Design Approach**

- (a) Project Co shall follow the Security Management System when designing and developing the Security Plan and Procedures. As outlined in Article 10 – Construction Safety Management, of this Part 1, there is a requirement to develop and implement a systematic, explicit, and comprehensive process for managing Security risks. Project Co shall develop a System Security Certification Plan to support Security integration.
- (b) The Security design approach shall be founded in the TVA and Risk Assessment. As such, Project Co shall develop and maintain a current TVA to identify, mitigate, and/or control threats and vulnerabilities that might arise from design and operational deficiencies associated with the Project. During the progress of the Project, Project Co shall be responsible to update threats and vulnerabilities that are specific to the Trillium Line Extension. Additional threats and vulnerabilities identified and analyzed shall be submitted to the City in accordance with Schedule 10 – Review Procedure.
- (c) Specific Security requirements for Trillium Line Extension facilities or the supporting Systems shall be based on a risk assessment that is conducted by Project Co during the earliest stages of the Project. Project Co shall address and incorporate applicable mitigations identified by the Trillium Line Extension TVA and risk assessment as outlined at Schedule 10 – Review Procedure. Mitigation of Security physical and cyber threats are to apply to the following:
  - (i) Train Control;
  - (ii) New Walkley Yard;
  - (iii) Trillium Stations;
  - (iv) Guideway;
  - (v) Tunnel;
  - (vi) TOCC and BCC;
  - (vii) Fare Collection;
  - (viii) Intrusion Access Control;
  - (ix) CCTV System; and,
  - (x) Rail Vehicle.

- (d) Mitigations shall include design considerations, Security devices, warning devices or recommendations for adopting special procedures or training. These mitigations shall consider an integrated Security approach, CPTED principles and Security defence in depth. The resolution process shall verify the following:
  - (i) That the resolution of a threat or vulnerability in one system does not create a new one in another system;
  - (ii) That threats or vulnerabilities involving interfaces between two or more systems have been analyzed and resolved;
  - (iii) That all program participants provide required analyses results in a timely manner, and that determination is made where delinquent receipt is delaying vulnerability resolution; and,
  - (iv) That proper resolutions are implemented for areas identified with vulnerability mitigations requiring a change in system design or development of special procedures or additional training for ESP or City staff.
- (e) The TVA methodology and the risk assessment process of identifying the likelihood of occurrence and the severity of impact shall be applied and performed in accordance with Public Transportation System Security and Emergency Preparedness Planning Guide, January 2003, Final Report, U.S. DOT, FTA, DOT-VNTSC-FTA-03-01.
- (f) Mitigations shall be compiled into an independent Threat Log and Risk Log that identifies threats, vulnerabilities and among other things, proposed mitigations to vulnerabilities. This Threat Log shall be reviewed and updated on an on-going basis.
- (g) The criteria for accepting a threat risk level shall be in accordance with direction provided by the City and the Security Management System.
- (h) Document confidentiality and control. The TVA, Threat Log, Risk log and the information contained within the documents shall be confidential, restricted and controlled to only those people with the need to know and access the information therein. Project Co shall establish controls and criteria for accessing the documents and information. When no longer necessary, the documents shall be destroyed beyond reconstruction or recognition.

## **8.6 Security Certification**

- (a) Project Co's management responsibilities shall include, but are not limited to, the following:
  - (i) Project Co shall implement a Security Certification Program, which shall ensure compliance with the SSeCP by verifying the inclusion of all Security items into the design, construction, and testing of the Trillium Line Extension. The SSCRT shall oversee the certification effort.
  - (ii) Project Co shall utilize the SSeCP developed by the City that describes and outlines the Project's Security Certification process, which shall be compliant to the City's SSeCP. The SSeCP developed by the City will describe roles, responsibilities, staffing, schedule, deliverables and a description of the process, at a minimum. Project Co shall be

responsible to develop a Project specific SSeCP to describe how they will be complaint to the City's SSeCP and provide a deliverable timeline in-line with the Project schedule.

- (iii) Project Co shall participate in meetings with the SSCRT, FLSSC and SSORC.
- (iv) Cooperation and facilitation of Security Certification audits of the Works shall include.
  - A. Coordinating, documenting and performing training as specified in the Project Agreement.
  - B. Maintaining and updating files and submitting required documentation on a timely and sequential milestone schedule basis. Preparing Security Certification progress reports each month, which shall include submitting a record copy of Security Certification files to the City.
- (b) Project Co's responsibilities are defined in the following table. Project Co shall be responsible for the performance of the task activity identified in Table 1-8.1. The SSeCP and Security Management System shall be followed when conducting tasks below:

**Table 1-8.1 - Project Phases and Project Co Security Tasks**

PROJECT PHASE	EN 50126 LIFECYCLE PHASE	PROJECT CO SECURITY TASKS
PRELIMINARY / CONCEPTUAL DESIGN	1. Concept	Review the City's SSCP
	2. System definition and application conditions	SSeCP SSeAP Security Audits (Internal and 3 <sup>rd</sup> party) SSePP TVA and Risk Assessment
	3. Risk Analysis	SSeAP Update System Risk Analysis Interface Risk Analysis Review and update TVA Cybersecurity Assessment and Management Review and update Threat Log and Risk Log

PROJECT PHASE	EN 50126 LIFECYCLE PHASE	PROJECT CO SECURITY TASKS
DETAILED / FINAL DESIGN	4. System Requirements	Threat Log and Risk Log Review and Update Update SSecP Security Audits (Internal and 3 <sup>rd</sup> party)
	5. Apportionment of System Requirements	SSeAP Update SSeCP update as required System Risk Analysis / Subsystem Risk Analysis Threat Log and Risk Log review and update Cybersecurity assessment and management review and update
IMPLEMENTATION	6. Design and Implementation	Emergency Preparedness (Preliminary) Test Plans and Procedures
PROCUREMENT AND MANUFACTURING	7. Manufacturing	Threat Log and Risk Log review and update Verification and Validation Report(s) Assess Security related training Operation and Maintenance Manuals
CONSTRUCTION AND INSTALLATION	8. Installation	SSeAP Update Validation Report(s)
TESTING & COMMISSIONING	9. System Validation	Security Audits (Internal and 3rd party) Conduct Emergency Training and Drills
HANDING OVER	10. System Acceptance	Threat Log and Risk Log review and update

PROJECT PHASE	EN 50126 LIFECYCLE PHASE	PROJECT CO SECURITY TASKS
OPERATIONS AND MAINTENANCE OBJECTIVES	11. Operation and Maintenance	Review and update Threat Log and Risk Log Transfer and implement SSAP for Operations Update Operations and Maintenance Manuals Conduct Emergency training and drills Security Audits (Internal and 3rd party)
	12. Performance Monitoring	No Security deliverables required unless assumptions found to be invalid.
	13. Modification and Retrofit	Review and update Threat Log
	14. De-commissioning and disposal	To be assessed at time of de-commissioning (Threat Log review and update)

## 8.7 Security Activities and System Testing

- (a) Project Co shall follow the Security Management System when conducting the Security activities, listed in Table 1-8.1 above, along with the respective standards listed therein. The agreed upon design countermeasures identified within the TVA and the corresponding Threat Log and Risk Log shall be incorporated.
- (b) Security Review Documentation - Project Co shall include a matrix in the SeVM (output from the Threat Log and Risk Log) addressing Security tests, which shall receive the concurrence by signature of the responsible person as defined by Project Co's organization chart. The matrix shall identify Security parameters and/or other Security considerations and a cross-reference to the test following the Review Procedure outlined at Schedule 10. This matrix shall be kept current throughout the Project lifecycle and shall include the identification of the test reports, which confirm verification of the Security requirements.
- (c) Security Systems
  - (i) Project Co shall comply with the Security requirements to support systems as outlined in the references below:
    - A. 2.3 LRT Systems Design Submission – Schedule 3 Part 1 Tech Sub Requirements;
    - B. Schedule 15-2, Part 3, Article 4 – Public Address System/Passenger Information Display System;
    - C. Schedule 15-2, Part 3, Article 7 – CCTV System; and,
    - D. Schedule 15-2, Part 3, Article 10 – Signalling and Train Control System.
- (d) System Security Certification Process
  - (i) Project Co shall conduct System Security Certification process using a minimum of the five steps outlined below:

- A. Identification of Certifiable Elements and sub-elements;
  - B. Identification of Security requirements for each Certifiable Element and sub-element;
  - C. Verification and/or validation of Security requirements;
  - D. Tracking, review, update and documentation of certification tasks in Security Certification Checklists; and,
  - E. Issuance of Certification for Certifiable Element or Sub-Element's conformance to all associated Security requirements
- (e) Witness point
- (i) Witness point selection is a City responsibility with the purpose of defining selected points or locations where the City wishes to formally witness testing. Project Co shall be responsible for scheduling and performing the tests that include those City-selected points; and, for notifying the City at least 14 Business Days in advance of the date and time of the test. Notification procedures shall be established prior to witness point testing, scheduling or performance. Selected areas shall include items of high risk, where concerns of compliance have been raised, or those selected by random sampling. The City shall have the right to attend and witness any and all testing that takes place.
- (f) Security systems tests
- (i) Project Co shall verify that Security systems function in accordance with promulgated specifications. All Security systems tests shall be included in the test program plan contained within its own section. The respective Security systems tests and results shall be documented within test reports. Security systems tests shall include, at a minimum:
    - A. An initial Security system testing conformance checklist shall be prepared for the design level of the Project Agreement documents. Project Co shall update the Security systems testing conformance checklist and submit it for review. Project Co shall verify that Security systems tests identified in the specifications and other Project Agreement documents are successfully performed and the completed tests have been verified within defined test parameters and the systems and Subsystems function safely as specified, do not contain or create unforeseen vulnerabilities, and contain specified Security features. All requirements on the checklists shall be verified and submitted to the City for review;
    - B. At a minimum, each of the identified Security requirements for a Security system shall be simulated and tested to verify and certify performance in normal modes and associated sequences and the Failure modes and effects, as applicable. These tests shall demonstrate the Security systems requirements stated herein have been met. Should the Security systems testing identify any issue, they shall be listed in the Security systems test reports, indicating remediation and corrective action necessary. All remediation and corrective actions required by Project Co shall be completed within fourteen calendar days and documented in a Non-Conformance Report to ensure traceability. All remediation and corrective actions shall be

completed prior to the completion of the Works and pre-revenue testing and training. Project Co shall audit all tasks.

- C. Security Systems Testing Documentation - Security Systems testing shall be separately identified to allow recognition of Security systems tests. Project Co shall include a matrix in the SeVM (output from the Threat Log and Risk Log), addressing Security tests only, which shall receive the concurrence by signature of the responsible person as defined by Project Co's organization chart. The matrix shall identify Security parameters and/or other considerations and a cross-reference to the test. This matrix shall be kept current throughout the Project lifecycle and shall include the identification of the test reports which confirm verification of the Security requirements. The references to the Security Systems tests along with reports shall be checked before every submission to ensure that there have been no revisions or modifications.
- D. Notification - Project Co shall notify the City in writing thirty calendar days prior to the start of any Security systems test. If any of the data indicate conditions which could potentially result in lack of proper protection of operations, Project Co shall immediately indicate proposed remedies and/or corrective actions.
- E. Scheduling - All Security tests shall be successfully completed by Project Co prior to system or equipment acceptance.
- F. Security Test Reports - Project Co shall ensure test reports which contain verifications shall receive the concurrence, by signature, of the responsible person, defined by Project Co's organization chart. Security systems reports shall be referenced within the SeVM to demonstrate compliance.
  - i. Project Co shall report any non-compliance/non-conformance with Applicable Codes and regulatory requirements noted as a result of Security systems testing. All non-compliances shall be rectified in accordance with Applicable Codes and regulations.

(g) Security training and drills

- (i) Project Co shall be responsible for proper coordination and successful completion of this task. They shall participate and provide support as defined herein. The purpose of the training and drills verification process is to verify that key Security systems training on new equipment and procedures is adequate and appropriate for the tasks performed under typical and Emergency conditions. Project Co shall schedule, arrange, invite participants, provide equipment, and set up locations for drills to occur. Where indicated elsewhere herein, Project Co shall also provide instructors to assist in performing the training in Security.
- (ii) Verifying Security system operation through drills and exercises is an integral part of the Security Systems process. The methodology employed by the training/drill/exercise process is to obtain written verification from the City that:
  - A. Training and drills are adequate and appropriate for the assigned task, and contain instructions on Security features for typical and Emergency conditions;

- B. Lessons learned from training and drills are performed, reviewed and documented to identify threats, vulnerabilities, or open Security issues have been resolved; and,
  - C. Known issues concerning training and drills, which impact on Security, have been satisfactorily resolved.
- (iii) Security information on conformed methods and procedures necessary to maintain Security conditions shall be generated by Project Co and included in a Security Training Program, to be provided by Project Co, for Security training consideration of construction, operations and maintenance personnel. At a minimum, each of the Security training requirements shall be included in the training program and associated documents.
- (h) Project Co shall be responsible for establishing and maintaining a Threat Log and Risk Log to record and track Threats and Risks for resolution. The Threat Log and Risk Log shall describe all identified threats, the measures taken to resolve each threat (references citing document, revision, section number) and the results of reviews, comments and approvals by the City and other outside agencies. All Threats and Risks shall be tracked through to resolution. Project Co shall submit the most current copy of Threat Log to the City for review upon request. After all tracked Threats and Risks are resolved, Project Co shall prepare a SeVM and submit in accordance with Schedule 10 – Review Procedure.
- (i) FLS
- (i) Project Co shall be responsible for compliance with FLS requirements included in federal, provincial, local codes and regulations, and the Project Agreement. Project Co shall incorporate these requirements into the design and construction of the Project and include all applicable FLS elements in the appropriate SeRTM.
  - (ii) Project Co shall support the approval process by participating in reviews, inspections and technical discussions between the City and local jurisdictional authorities and other Governmental Authorities, and incorporating the resulting agreements into the design and construction. Project Co shall be responsible for verifying that Project Co's completed design complies with the resolutions of FLS issues, and is acceptable to the applicable Governmental Authorities.
  - (iii) Certificates of Conformance shall be signed as certified by the Project Co SeCM and signed as approved by the Project Co's Technical Director and submitted to the City as per Schedule 10 – Review Procedure.

## **8.8 Format for Security Verification Matrix**

- (a) Project Co shall provide an SeVM in the following format, noting that this should be an output from the Threat Log and Risk Log:
- (i) Item Number;
  - (ii) Security requirement;
  - (iii) Document reference:

- A. Document name; and,
  - B. Article number;
- (iv) Evidence:
  - A. Method of verification by Project Co;
  - B. Method of validation by audit team;
  - C. Validated by (name of auditor);
  - D. Date; and,
  - E. Remarks.
- (b) SeRTM
  - (i) Project Co shall develop SeRTM for the Project. It shall be used to verify and certify that the Security requirements have been incorporated in the design and certify that all Security requirements of the design are constructed and/or installed in accordance with the Project Agreement.

## **8.9 Construction Site Security**

- (a) The information provided in this section is intended to establish the minimum requirements to be satisfied in the development of a Construction Security Plan for this Project. Project Co's Security Management Plan shall establish the procedures required to provide the Security measures necessary to achieve Site Security.
- (b) The following issues shall be addressed in the Construction Security Plan and with the processes established by the Project Co, in consultations with City authorities:
  - (i) Project Co shall be responsible for providing Security control capability for the physical Sites throughout all phases of the Project. The physical Security plan shall incorporate identifiable elements of protection, detection, and response capabilities. The Security measures shall be aligned to ensure identifiable Security perimeters are established and access controls to and monitoring of the secured areas are established and achievable for the life of the Project.
  - (ii) Adequate Security safeguards shall be established to ensure the protection of the Sites is provided on a continuous basis for the life of the Project. The measures shall be sufficient to mitigate incursion to the Sites.
  - (iii) Policies and procedures shall be developed and implemented to ensure that any Site Security force is appropriately trained and prepared to provide initial response to Security incidents.
  - (iv) The Construction Security Plan shall provide flexibility in the Security approach to permit adjustments to the Sites as the Project develops. This is to allow Project Co to shift the Site perimeters as needed to meet construction schedules.

**8.10 Emergency Service Personnel Preparedness**

- (a) Project Co shall provide support to the City in the review and update of Emergency response procedures in a timely manner to enable ESP to be ready for Revenue Service. This support shall include:
  - (i) Review and update of current Emergency response procedures;
  - (ii) Development and delivery of up to three Train the Trainer sessions for 20 Emergency response trainers for each session;
  - (iii) Provision familiarization training session and tours on Stations, Guideway, New Walkley Yard, Trains and Systems for ESP and supporting teams;
  - (iv) Development and delivery of up to five tabletop exercises of up to 50 ESP each to address specific topics and issues as designed by the City;
  - (v) Delivery of content to update the City of Ottawa in-house Emergency Responder software related to Confederation Line Extension, which for clarity includes quick references information for first responders such as floor plans, extinguisher locations, stairs, access points, etc.; and,
  - (vi) Development and delivery of a full scale exercise to include all City ESP to validate Emergency response procedures.
- (b) Project Co shall provide support to the City for familiarization training of ESP Trainers on functionality of ESP Systems to include:
  - (i) CCTV;
  - (ii) ETELS;
  - (iii) FTELS;
  - (iv) AEDs;
  - (v) GIDS;
  - (vi) ICP;
  - (vii) Train lifting equipment;
  - (viii) PA;
  - (ix) Tunnel ventilation; and,
  - (x) IAC.

**8.11 ESP Training**

- (a) Project Co shall provide training programs, with special emphasis on ESP responsibilities, for all City ESP to enable a Train the Trainer Emergency response program.

**8.12 Emergency Response Plan**

- (a) Project Co shall implement procedures designed to provide for a safe environment throughout the Project Term and provide to the City. The ERP shall include the required scenario analyses with an incident command hierarchy between ESP and demonstrate in detail how Project Co shall respond to and recover from the occurrence(s) of catastrophic natural and man-made disasters detailed in the PHA and subsequent Safety analysis. The ERP shall be consistent and in accordance with all Applicable Law governing Emergency planning, response and recovery. The plan shall be prepared with the involvement of and input from all applicable ESP and City personnel.
- (b) Project Co's new ERP, as a minimum, shall include the following:
  - (i) Emergency Response Policy Statement;
    - A. The Emergency response policy statement shall clearly articulate the purpose of the ERP; scope and applicability of the ERP; and the methodology utilized to develop and implement the ERP. The Emergency response policy statement shall be communicated to all Project Co Parties and shall be reviewed, as a minimum, and coordinated annually with all ESP and City to ensure it is current.
  - (ii) Situation Analyses;
    - A. The ERP shall be based upon an analysis of the potential Emergency situations specific to this Project.
  - (iii) Planning Assumptions;
    - A. A section describing and indicating the basic planning assumptions upon which the ERP is based. It shall include lead times, effects of Emergencies, when and how an Emergency is to be declared, what outside assistance is available and the conditions under which an evacuation may be required.
  - (iv) Response Capabilities; and,
    - A. A section describing the current response and recovery capabilities of Project Co, which shall summarize the basic capabilities both in-house and from outside sources to deal with response and recovery issues. It shall contain a general description of how resources are currently managed and deployed. It shall also identify shortfalls in response capabilities and strategies to resolve these shortfalls.
  - (v) Critical Facilities.
    - A. Identification of Critical Facilities of Project Co, providing the System name, address, contact person, property classification, primary Emergency function, the

secondary Emergency function, the primary or normal use, the priority for power restoration and the Emergency power requirements. A location map indicating the location of all Critical Facilities shall be included in this section.

**(c) System Management Policies**

- (i) This section shall address the current management policies and practices regarding the major factors that can have an impact on the Operation of the Expanded Trillium Line. Copies of all written policies and procedures shall be included in an appendix to the plan.
- (ii) This section shall contain, at a minimum, a discussion of the following factors:
  - A. Surveillance and Incident detection;
  - B. Interdepartmental dependency and communication;
  - C. Information dissemination;
  - D. Traffic Incident management procedures;
  - E. Interface with the TOCC, the City, Confederation Line and bus Operations;
  - F. Public information and notifications; and,
  - G. Business impact and interruption.

**(d) Project Co Expanded Trillium Line Resources**

- (i) Project Co shall provide a listing and description of the resources that the City and Project Co have available on a day-to-day basis and a listing of Project Co Parties or outside resources that are available on an on-call or contract basis. Project Co shall also include a listing of all vehicles and equipment owned, leased or available on-call by Project Co.

**(e) Day-To-Day Functions and Responsibilities**

- (i) Project Co shall provide details on how the various responsibilities and specific parties are organized and managed with respect to Emergencies.

**(f) Basic Operations**

- (i) Project Co shall provide an overview of the basic operational approach to Emergency situations. Specific details and descriptions of the response organization and assign specific tasks to the agencies and organizations that may be involved in responding to an Emergency. It shall be used by Project Co to guide and direct the development of functional and Emergency specific annexes that provide specific direction and responsibilities for various types and magnitudes of incidents.

**(g) Functional Annexes**

- (i) The functional annexes section of the ERP shall provide specific information and direction and shall focus on Operations of the Expanded Trillium Line. These annexes shall emphasize responsibilities, tasks and Operational actions that pertain to the specific functions. These annexes shall clearly define and describe the policies, processes, roles and responsibilities inherent in the various functions before, during and after any Emergency situation, including how each agency and Project Co shall perform each of the functions. An annex shall include information on the following:
  - A. The purpose of the function;
  - B. A description of the situations that trigger implementation of the function;
  - C. A description of the assumptions that apply to the function;
  - D. The concept of Operations for the function; and,
  - E. Assignment of responsibility for annex Maintenance, review and updating.
- (h) Emergency Specific Annexes
  - (i) The Emergency specific annex section of the ERP shall describe and offer a means of extending functional annexes to address special and unique response procedures, notifications, protective actions and other needs generated by a specific incident. Emergency specific annexes shall follow the same structure and similar content as the Basic Operations and Functional Annexes description above.
  - (ii) The following specific Hazards shall be addressed:
    - A. Major traffic accidents and/or incidents;
    - B. Hazardous material incidents;
    - C. Nuclear or radiological incidents;
    - D. Terrorism incidents;
    - E. Earthquake;
    - F. Biological incident;
    - G. Weather related events;
    - H. Railroad incidents;
    - I. Structural or Tunnel fires;
    - J. Structural Failure;
    - K. Electrical power incidents; and,
    - L. Other Utility incidents.

(i) Recovery Annexes

- (i) The recovery annex section of the ERP shall address the methodology and processes that shall be implemented during the recovery process and shall include, at a minimum the following:
  - A. Identification of the agencies with responsibility for recovery efforts;
  - B. Establishment of the documentation and record keeping requirements following the disaster event;
  - C. Establishment of the initial post disaster priorities and responsibilities (0-12 hours);
  - D. Addressing of human needs; and,
  - E. Developing and addressing mitigation strategies.
- (ii) The recovery annex section of the ERP shall be updated based upon lessons learned from specific incidents

(j) Training and Exercises

- (i) This section of the ERP shall identify and address the specific training program(s) and exercise schedule(s) for Project Co. It shall address, at a minimum, the following:
  - A. Types of training required for each Project Co Party involved in a particular incident;
  - B. A specific annual training program and schedule for each Project Co Party so identified; and,
  - C. Establishment and implementation of the exercise and training program(s) that provides both table-top and full scale training exercises based upon the potential Emergencies to which the Expanded Trillium Line System is exposed.
- (ii) Project Co shall maintain detailed records of all training exercises and drills including identification and tracking of follow-up actions.

(k) ERP Update

- (i) The ERP shall be updated as required throughout the Maintenance Period.

## ARTICLE 9 PROJECT OFFICE

### 9.1 General Requirements

- (a) Project Co shall provide climate controlled offices, at pre-determined, locations set out in Table 1-9.1 along the active construction Sites of the Project alignment for City use.

**TABLE 1-9.1: SITE OFFICE LOCATIONS AND SIZING**

Site Office Locations or within 100 metres	Required Size (based on two offices and one meeting room per location)
Gladstone Station	28 m <sup>2</sup>
Carleton Station	28 m <sup>2</sup>
Uplands Station	28 m <sup>2</sup>
Leitrim Road	28 m <sup>2</sup>

- (b) With reference to the above Table 1-9-1, unless otherwise specified, Project Co shall locate the Site Offices on mobilization Sites as per Schedule 33 - Lands.
- (c) Project Co shall supply a trailer Site for the City of Ottawa management staff at the following locations: Gladstone Station - 18692-PRP\_041, Parcel 1; Carleton Station - 18692-PRP\_046a, Parcel 8; Uplands Station - 18692-PRP\_016b, Parcel 2; and Leitrim Road - 18692-PRP\_003a, Parcel 3.
- (d) Project Co shall ensure that Site Offices shall be compliant with COADS, have entrance/exit signs and lighting and meet the requirements of the Ontario Codes and Guides for Buildings; Fire; Sewage; Plumbing and Electrical and the MOL and WSIB.
- (e) Project Co shall be responsible for all Maintenance and Operational costs in association with Site Offices for the duration of Project Co's occupancy of the Lands.
- (f) The Site Offices shall include the following:
- (i) a secure climate controlled, Site Office area, including all improvements and fixturing costs and all required furniture as per the City standards.
  - (ii) Site Office accommodations include; one meeting room capable of holding 4-6 persons and required connections for laptop display; one restroom, one large heavy duty shredder and kitchen amenities such as counter, sink and storage, small bar fridge, microwave, kettle, coffee machine, storage space for supplies and personal protective equipment;
  - (iii) secure door with controlled access that is only accessible by the City. Signage at each Site Office identifying the occupant and indicate a telephone number in case of Emergency;
  - (iv) cleaning service agreements and costs for daily services of Site Office including rubber entrance mats, commercial grade and bristled scraper type boot cleaners;

- (v) voice and data cabling evaluation and installation costs, with specific location for outlets and all other requirements to be agreed in consultation with the City;
- (vi) equipment such as computers, monitors, keyboards and mouse, phones, printers, copiers and fax machines, polycoms, will be provided and maintained by the City;
- (vii) selection and costs related to the provision of data and voice services will be provided by the City;
- (viii) office supplies and stationary will be provided by the City;
- (ix) temporary buildings and trailers shall be removed upon completion and areas restored to match existing surrounding areas by Project Co; and,
- (x) two reserved parking spaces for the City exclusive use at each Site Office and Maintenance of parking spaces, sidewalks and paved areas at and adjacent to the Site in a safe condition.

**ARTICLE 10                    CONSTRUCTION SAFETY MANAGEMENT**

**10.1    General Requirements**

- (a)    The CSMP shall be in accordance with the criteria contained in this Article and all Applicable Laws, Codes and Standards.
- (b)    The CSMP shall be prepared and submitted in accordance with Schedule 10 – Review Procedure. Project Co shall coordinate with Governmental Authorities to ensure existing Maintenance and Safety plans are not violated.
- (c)    Project Co shall have an active WSIB account in good standing and shall make available a valid Clearance Certificate from the WSIB, upon request.
- (d)    The construction planning for this Project shall consider the existing operations of the City and OC Transpo, and the impacts to the street network within the City, as well as considering adjacent residences, landowners and businesses, with respect to pedestrian and property access and other environmental impacts.

## ARTICLE 11 SYSTEMS INTEGRATION PROGRAM

### 11.1 General Description

- (a) As the systems integrator on the Expanded Trillium Line Project, Project Co shall establish and maintain a systematic, documented, comprehensive, and verifiable systems integration process based on the IEC 15288 standard (Systems and software engineering -- System life cycle processes) to be applied throughout the duration of the Project beginning with requirements management, concept development, design, procurement, manufacture, implementation, integration and testing, through successful commissioning. This process shall ensure that interfaces and interaction between infrastructure, facilities, subsystems, software, and Operations and Maintenance personnel have been identified and engineered to function together as a system. At a minimum, Project Co's system integration effort shall systematically identify and formally document all human interfaces with the elements of the System and all interfaces with external systems. External systems interfaces include other facilities, existing systems, existing facilities, traffic, communities, and other agencies affected by the Project. Project Co shall define methods to confirm compatibility between System elements, and perform the necessary tests or other verification to demonstrate that every element functions and performs properly, both individually and as part of the complete System. As the systems integrator, Project Co shall provide all required resources, work processes and management authority to exercise control over the planning, scheduling, co-ordination, prioritization, and delivery of the works in order to mitigate foreseen systems integration risks, secure successful Project completion and deliver an operationally resilient railway into Project service.
- (b) In the course of complying with the provisions of this Project Agreement, various physical and functional interfaces of both the City's and Project Co's equipment may depend on facilities, equipment, or services of organizations not under with the City's or Project Co's control for successful Operation. The majority of interfaces exist within the Project Agreement between the City and Project Co and its consultants, subcontractors, and suppliers, while the remaining interfaces exist between new and existing facilities and equipment furnished by the City and with other third parties such as Utility companies and Third Party Contractors. It is necessary that all interfaces be identified, coordinated and controlled by Project Co to assure the design at the interface is understood and agreed to by affected parties. Any changes to one side of the interface shall be accepted and accommodated by the opposing interface.
- (c) This Article addresses the interfaces between each of the system elements and the system elements with the infrastructure, facilities, services, system information, or other work being provided by Project Co or others (including the City). This Article is not intended to provide Project Co with a detailed description of all such interfaces; rather, it is a broad description focused on general interface areas and the systems integration needs of the project. Project Co shall inspect the related work, review the drawings and documentation provided by the City, and coordinate with the City to identify and successfully comply with all interface and integration requirements in order to perform all of the work required to complete the Project as defined in broad terms throughout the Project Agreement.
- (d) The City shall integrate the Expanded Trillium Line's Communications Systems into the existing head-end management platform at the TOCC and BCC. The City shall also integrate the new CTS equipment in to the existing Confederation Line's NMS.
- (e) The City will assign a Systems Integration Verifier to review and provide confirmation of the successful completion of the systems integration work related to the communication integration at

the TOCC and BCC. The Systems Integration Verifier will also act as adjudicator in a fast track dispute resolution procedure to resolve any disputes as to the source of the inability to successfully complete integration of the communication system at the TOCC or BCC.

- (f) During the design phase, the Systems Integration Verifier will review and comment on the Expanded Trillium Line's Systems integration design for the communications system and associated integration documents.
- (g) During the installation, testing, and commissioning phases, the Systems Integration Verifier shall review and comment on the communications; (i) integration, test and commissioning plans, (ii) traceability documents, and (iii) test procedures.
- (h) The Systems Integration Verifier shall review and comment on the Project Co's Testing and Commissioning Plan as it relates to the communications systems.
- (i) Project Co, as the Systems Integrator shall develop the necessary Systems Engineering Management Plans, produce the integration test, produce the SIMP, produce the SIT schedule, manage the interface working groups, identify and coordinate all necessary resources required to successfully execute SIT and commissioning of the upgraded head-end management platform for all of the Trillium Line's Communications Systems. These tests shall be executed via the upgraded GUI on the existing Confederation Line's operator workstations in the operational theaters at the TOCC and BCC. Project Co shall provide personnel to coordinate (between operators and field personnel) and witness the test execution from the TOCC and BCC.
- (j) Project Co shall design, procure, install, integrate, test and commission the new head-end management platforms for the new S&TCS and the new TVS. Project Co shall identify, develop, track, test and validate all interfaces between the new S&TCS and the new TVS.
- (k) System Integration Manager
  - (i) Project Co shall appoint a Systems Integration Manager to perform the Systems Integration obligations of Project Co. The Systems Integration Manager shall have the qualifications as set out in Schedule 9 – Key Individuals.

## **11.2 Systems Integration Submittals**

- (a) Project Co shall produce a SEMP, a RMP, a Verification and Validation Plan, an EMC Control Plan, a SIMP and a preliminary Systems Interface Matrix within 60 calendar days following Commercial Close. The City as the Operator will develop a Concept of Operations, while Project Co shall develop a Concept of Maintenance. These and other plans shall be submitted in accordance with Schedule 10 – Review Procedure.
- (b) Project Co shall manage requirements throughout the Project using an object orientated requirements tool (e.g. DOORS), to confirm traceability of requirements from the source through to closure. Project Co shall make available to the City the output of the Requirements Management Plan tool at design reviews and throughout the Project on request.
- (c) The Interface Matrix shall address the interface of the System with itself, the communications systems head-end, the CTS integration at Bayview Station, the ROW, the existing railway systems at Walkley and Ellwood Diamonds and any infrastructure contained therein; any

adjoining facilities; electric, telephone, gas and other Utilities; the City's water and sewer systems; the City's Fire and Police Departments; and any facility not provided by Project Co but which is used by Project Co for the System. The SIMP shall also address integration of the fare control, communications systems, Existing Vehicle Fleet and New Vehicle Fleet, and new S&TCS.

- (d) This SIMP and Interface Matrix shall provide the procedure by which each interface shall be defined, agreed upon and controlled. The SIMP shall contain a responsibility matrix identifying what entity is responsible for controlling the specific elements of the project. The SIMP shall be submitted to the City for review and approval. Updates to the SIMP and Interface Matrix shall be provided by Project Co when significant schedule or Project changes are made.
- (e) Project Co shall coordinate and integrate all System interfaces so that the System is properly integrated with itself and into the Project area, including the ROW, the surrounding communities, and all facilities, equipment, and systems provided by others. This integration effort is critical to allow public and commerce activities to continue with minimal interruption throughout the construction, installation, testing, and commissioning phase of the Project.
- (f) The SIMP shall list all major System elements and define which elements have a direct or indirect interface or interaction. The SIMP shall, as a minimum, define:
  - (i) The entity within Project Co's organization responsible for managing and engineering the integration or interface.
  - (ii) The agreed integration or interface arrangement (physical installation, power supply, signal levels, transfer characteristics, and other factors).
  - (iii) The functional, performance, Reliability, Maintainability, and Safety requirements of the individual elements forming the integration or interface.
  - (iv) The proposed method and schedule for verifying the interface integrity, the individual element performance, and the combined integration or System performance, with appropriate pass/fail criteria for each.
  - (v) The main elements that will be demonstrated through integrated testing.

### **11.3 Interface Control Document & Systems Interface Matrix**

- (a) ICD shall be developed for specific interfaces as defined within the SIMP and managed by Project Co. Contents of these ICDs shall expand as the interface details are developed through the design reviews. Each design submittal and ICD shall be subject to Configuration Management. The ICD shall be developed by Project Co and submitted to the City for review and approval in accordance with Schedule 10 – Review Procedure. Contents in these ICDs shall be maintained current throughout the Project Agreement period Project Co shall be responsible for coordinating all aspects of the system design and the integration of the SI with all other Expanded Trillium Line systems and subsystems as required including Vehicles. The civil infrastructure shall be inclusive of the design of the Stations, Guideway (elevated, at grade exclusive & semi exclusive ROW), Tunnels, Bridges, viaducts, overpasses, underpasses, New Walkley Yard and the TOCC.

- (b) A systems interface register shall be used to track each interface identified within the interface matrix and their relationships, bringing forth the issues that are critical to proper systems integration. The interface register shall be updated throughout the Project Agreement. Periodic reports are processed from the systems interface matrix and distributed for information.
- (c) Project Co shall be responsible for identifying and resolving all system interfaces which contribute to successful achievement of the overall System performance requirements or other Project Agreement requirements. A preliminary list of interfaces to be addressed includes:
  - (i) Track/Vehicle; Wheel/Rail;
  - (ii) Vehicle/Facilities;
  - (iii) Vehicle/Station Platform;
  - (iv) Vehicle/Train Control/Signaling;
  - (v) Vehicle/Wayside Communications;
  - (vi) Vehicle/Operator;
  - (vii) Vehicle/Vehicle;
  - (viii) Stations/Signaling;
  - (ix) Stations/Power;
  - (x) Stations/ SCADA;
  - (xi) Stations/Track;
  - (xii) Stations/Fire detection;
  - (xiii) Stations/Communications;
  - (xiv) TOCC/Signaling;
  - (xv) TOCC/SCADA;
  - (xvi) TOCC/Fire detection;
  - (xvii) TOCC/Communications;
  - (xviii) Existing systems/new systems;
  - (xix) Corrosion Control/Wheel/Rail; and,
  - (xx) Train Control/Tunnel Systems.
- (d) The SIMP shall list all major System elements and define which elements have a direct or indirect interface or interaction. The SIMP shall, as a minimum, define:

- (i) The entity within Project Co's organization responsible for managing and engineering the integration or interface.
  - (ii) The agreed integration or interface arrangement (physical installation, power supply, signal levels, transfer characteristics, and other factors).
  - (iii) The functional, performance, Reliability, Maintainability, and Safety requirements of the individual elements forming the integration or interface.
  - (iv) The proposed method and schedule for verifying the interface integrity, the individual element performance, and the combined integration or System performance, with appropriate pass/fail criteria for each.
  - (v) The main elements that will be demonstrated through integrated testing.
- (e) Project Co shall add other integration or interfaces as the design and system integration process proceeds.
- (f) The following provide additional requirements on the contents of the Systems Integration Program:
- (i) If Project Co fails to provide necessary interface information, or if such information provided by Project Co is incorrect or subsequently changed, Project Co shall be responsible for all facility and equipment redesign and rework, whether the impacted facility and equipment are the responsibility of Project Co or others, or for modifying its Works or any Project Co provided subsystem to match the facility, or for modifying any facility, systems, or subsystems to match systems or subsystems provided by Project Co. Project Co shall also be responsible for any delay to others caused by delaying the furnishing of information, by furnishing incorrect information, or by subsequently changing information for which Project Co is responsible. Project Co shall notify the City immediately when any interface information changes or is found to be incorrect.
- (g) Project Co shall plan, schedule, and lead coordination meetings and finalize all interfaces as required. Updates of the SIMP shall be provided by Project Co whenever significant changes are made to the Works or the Project Works Schedule.
- (h) Design of all elements of the various system designs shall be developed to operate reliably in the environment in which they are installed. Project Co shall design all systems elements to integrate with the environmental conditions present including ambient temperature range, humidity, precipitation and other environmental factors that will impact Operation.
- (i) Failure to list interfaces between systems does not absolve Project Co of their responsibility for integration of the System.

#### **11.4 Design and Coordination Elements**

- (a) Preliminary listing of design elements and required coordination are provided below
- (b) Revenue Vehicles;

- (i) Project Co shall develop all designs to accommodate the New Vehicle Fleet and the Existing Vehicle Fleet. Typical coordination elements between the SI and the Vehicle are:
  - A. Vehicle dimensions shall be coordinated with the Guideway design;
  - B. Vehicle weight shall be coordinated with the Guideway design and selected Vehicle;
  - C. Guideway and alignment design shall be developed to meet the requirements of the braking and propulsion system;
    - i. Project Co shall coordinate with the Vehicle manufacturer to ensure that any limitations (thermal or other) are consistent with Vehicle needs;
  - D. the System Track infrastructure design shall be coordinated with the Vehicle wheel/rail interface criteria;
  - E. Vehicle dynamic and static envelopes for Guideway clearances shall be coordinated with the Guideway design, SI design, and selected Vehicle;
  - F. Vehicle to Platform interface including:
    - i. Vehicle door threshold height above top of rail to Platform edge; and,
    - ii. Platform lateral gap to Vehicle door threshold shall be provided for accessibility as well as to maximize Station pass through speed;
  - G. coordination and integration of Vehicle borne elements of the communications and signals systems with the Vehicle suppliers;
  - H. Project Co designed onboard elements including S&TCS and communication systems shall be EMC/EMI compliant with the Vehicles; and,
  - I. Track Design shall coordinate with the Vehicles to ensure that noise and vibration requirements are in conformance with Schedule 15-2, Part 8 - Vehicles.
- (c) S&TCS
  - (i) Project Co shall coordinate the systems elements and Vehicle between Project Co and the Vehicles supplier for interface design, spacing, mounting and functioning of system elements within the Vehicles.
  - (ii) Project Co shall coordinate the systems elements and the Vehicle between Project Co and the Vehicle suppliers for installation and commissioning of on- board equipment.
  - (iii) Project Co shall coordinate the integrated testing of equipped Vehicles in all types of ROW throughout the System.

- (iv) Project Co shall coordinate the location and mounting of the trackside access points, the location and mounting of termination points, and the cable routing to the signal equipment including:
  - A. locations of S&TCS duct banks along the ROW to support system installation;
  - B. locations of S&TCS equipment and conduit interfaces throughout Expanded Trillium Line; and,
  - C. location of duct banks and conduit interfaces.
- (d) Communications systems
  - (i) Project Co shall coordinate the location and mounting of elements noted below, routing of cabling to each element, termination of cabling to each element, and routing to the main communications equipment either in an equipment room or cabinet including:
    - A. quantity and sizing of ducts within communications duct banks and conduits;
    - B. CTS;
    - C. SCADA system elements;
    - D. PA/PIDS elements;
    - E. Radio elements;
    - F. CCTV system;
    - G. T&I system;
    - H. all communication systems control equipment;
    - I. IAC system elements;
    - J. FLS System elements; and,
    - K. Power provisions for a fare collection machines and ticket gates.
- (e) Trackwork
  - (i) Project Co shall coordinate the integration of the Track to meet the needs of the Expanded Trillium Line with the existing and new civil interface as well as with other elements including:
    - A. Track form shall be developed to adhere to the requirements of the Vehicles as specified in Schedule 15-2, Part 8 - Vehicles;
    - B. Track form shall be developed to comply with the noise and vibration requirements set out in Schedule 15-2, Part 2, Article 3 – Trackwork;

- C. Track form shall be developed to integrate along the ROW and to maintain required clearances along the ROW considering:
    - i. use of ballasted, direct fixation, embedded and other Track forms shall ensure that no unsafe condition exists due to physical interferences with required Vehicle clearances and surrounding infrastructure;
  - D. bonding, insulated joint requirements, and associated cables, conduit, and duct banks shall be identified in conjunction with the S&TCS as well as the communication systems;
  - E. electrical design related to the location of powered wayside Track equipment and electrical outlets along the ROW to support Track Maintenance activities;
  - F. wayside Track equipment includes switch machines, switch element heaters, switch blowers, rail lubricators, and associated cables, wires, conduit, and duct banks;
  - G. Operational requirements to identify special Trackwork locations and configuration, high rail wear locations and superelevation;
  - H. civil, structural and geotechnical disciplines to determine Track Drainage interface with municipal sewers, Roadway requirements, rail expansion accommodation and Emergency Guard Rail requirements on elevated structures, reinforcing steel requirements, Track foundation type and characteristics; and,
  - I. provisions for protection where required in areas of special Trackwork to allow for Vehicle Operators of short-turn or stored trains, to disembark and walk to opposite end of train, without facing Hazards of adjacent traffic and Vehicle flow in opposite direction.
- (f) Corrosion control system
- (i) Project Co shall be responsible for development of an overall approach to corrosion control. Project Co shall coordinate corrosion control designs with the following:
    - A. Track systems to identify the location and typical arrangement for any corrosion control mitigation equipment;
    - B. Utility Companies to identify sensitive Utilities that may require relocation and/or protection; and,
    - C. locations of monitoring and measuring points.
- (g) Non-Revenue Vehicles
- (i) Project Co shall coordinate all Non-Revenue Vehicles with the following:
    - A. Non-Revenue Vehicle dimensions shall be coordinated with the Guideway design and selected Non-Revenue Vehicle type;

- B. Non-Revenue Vehicle weight shall be coordinated with the Guideway design and selected Non-Revenue Vehicle type;
  - C. the wheel/rail interface criteria shall be coordinated with the Guideway design and selected Non-Revenue Vehicle type; and,
  - D. Non-Revenue Vehicle dynamic and static envelopes for Guideway clearances shall be coordinated with the Guideway design.
- (h) Emergency Services
  - (i) Project Co shall coordinate with Emergency services to develop trackside elements in the areas of the Guideway required for ESP access including:
    - A. Track construction type;
    - B. special Trackwork layout and equipment protection;
    - C. CTS and S&TCS trackside equipment location; and,
    - D. any additional information to accommodate access with Emergency Services.
  - (ii) Project Co shall ensure that any trackside element placed within the Guideway is designed to withstand the worst case loading of an Emergency vehicle.
- (i) Third Party Facilities and systems work
  - (i) Project Co shall coordinate all work that requires modification, extension, replacement, or temporary re-configuration of any existing third party infrastructure with the impacted third party.
  - (ii) Any modification, update, or new construction to be operated and maintained by others, including the City, shall be performed in compliance with that agencies existing design criteria, requirements, and manuals or as specifically identified in this Schedule 15-2 – Design and Construction Requirements.

## ARTICLE 12 OPERATIONS TRAINING

### 12.1 Operations Training Curriculum and Materials

- (a) Project Co shall be responsible for the development of all Operations Training Programs referenced in this Article, including training curriculum and materials. Training programs developed by Project Co shall follow the City's standard for training materials and suitable adult education training material standards.
- (b) The City shall be given an opportunity to review the curriculum and all training materials associated with any of the operations training programs referenced in this Article. Project Co shall be responsible to submit all documentation associated with any of the training programs referenced in this Article to the City at a minimum six months prior to the specific training program's commencement in accordance with Schedule 10 – Review Procedure and Schedule 12 – Works Scheduling Requirements.
- (c) Training programs shall be subject to review by the City, in accordance with Schedule 10 – Review Procedure. During the six month interval between the submission of the training program and the commencement of training, the City shall review and suggest changes to any of the material that is submitted. Suggested changes to the training programs shall be incorporated prior to the commencement of training. In addition, Project Co shall abide by the provisions of Schedule 14 – Testing and Commissioning, Clause 1.5 (d). The review of the training curriculum and materials apply to programs provided by Project Co Trainers, in addition to those programs provided by the City or other designated individuals.

### 12.2 OC Transpo Operator Training Simulator

- (a) OC Transpo maintains an operator training simulator for the Existing Trillium Line.
- (b) Project Co shall support the City in the update of the simulator for the Trillium Line Extension by collaboratively providing information requested by the City.
- (c) Requested Information may include, but is not limited to the following:
  - (i) Infrastructure-Related
    - A. Videos/photos for existing portions of the alignment (used as aspect reference for the whole alignment);
    - B. Tracks and ROW: drawings, Track charts, designs, maps; and,
    - C. Stations:
      - i. Design documents (2d/3d CAD maps / mass and sections);
      - ii. Accurate location of Platforms along the Tracks;
      - iii. Ground marks accurate location (if applicable); and,
      - iv. Furniture: design documentation, photos of existing.

- (ii) Vehicle and Systems – Related
  - A. Vehicle
    - i. Aspect / 3D model: Measurements, design documents, CAD files; and,
    - ii. Sounds: Equipment, Rolling/Aerodynamic, Horn/bell, doors, Operator cab alarms/alerts.
  - B. Signals
    - i. Signals library: For each kind of signal: Measurements, Aspects (pictures or drawings), Available states, Logic (block, interlocking, switches protection, etc.); and,
    - ii. Accurate locations (along Tracks): Signals, Signs, Other signaling elements (loops, Track circuits limits, magnets, etc.).
- (d) For clarity, the City is responsible for updating the simulator. Project Co is only responsible for providing the required information, working collaboratively and in good faith.
- (e) The requested information shall be provided 9 months prior to the start of OC Transpo Operator training.
- (f) Project Co shall be responsible for all costs associated with any translation from other project documents, assembly, transfer of information, or any other efforts associated with supporting the City with the simulator update.

### **12.3 Training Provided to Project Co Operators**

- (a) Trained and certified Project Co Operators shall be permitted to operate Revenue Vehicles within the confines of the New Walkley Yard. All movement of Revenue Vehicles on the mainline will be the responsibility of qualified City personnel.
- (b) Project Co Operators shall be trained and certified by Project Co Trainers prior to operating Revenue Vehicles within the confines of the New Walkley Yard.
- (c) The Project Co Operator Training program shall utilize a fully developed curriculum, with all training materials, classroom and field training, testing, pass/fail criteria and certification. The Project Co Operator Training program shall be consistent with the City Operator training program and shall conform to all applicable standards, rules and regulations. The fully developed curriculum and records of certification shall be provided to the City for review to ensure that the City maintains its ongoing regulatory obligations.
- (d) The Project Co Operator Training program shall include a provision for verifying that all potential Project Co Operator candidates possess a valid Driver's license that allows for operating an automobile in the Province of Ontario.
- (e) Project Co shall be responsible for all costs associated with the training of Project Co staff holding responsibility for operating Vehicles within the confines of the New Walkley Yard.

**12.4 Training Provided to the City or Other Designated Individuals - Train the Trainer Program**

- (a) Project Co shall be responsible for training and certifying a maximum of eight designated OC Transpo Trainers (Train the Trainer Program) on new operating rules and procedures, Vehicle Operations, and SI. For clarity, the following minimum criteria shall apply:
  - (i) Field training is preferred and no more than 50% of training time shall be in the classroom provided that classroom materials are highly visual in nature and include hands-on exercises such as paper based mock cab control layouts;
  - (ii) For any onboard Vehicle operations training, the training shall have a limit of one instructor to two students (Train the Trainers) in order to minimize downtime for students; and,
  - (iii) Vehicle training hours should be guided as follows: Vehicle Familiarization (equipment, controls, configuration) 16 hours; Vehicle Operations (normal operations, Station operations, and degraded operations) 24 hours; Vehicle Troubleshooting (doors, engine, brakes, Train Control, other) 24 hours; Vehicle Emergency Operations (Safety equipment, towing, special operations) 16 hours; and, additional hours as required for training on system, signal, and rail network familiarization.
- (b) Project Co's Train the Trainer Program (provided by a Project Co Trainer with at least five years of adult education experience) shall ensure that OC Transpo Trainers have been trained and certified to instruct and certify employees who are assigned to or have any duties and responsibilities on the Expanded Trillium Line. The program shall utilize a fully developed curriculum, with all training materials, classroom and field training, testing, pass/fail criteria and certification. The curriculum shall follow an adult education based approach to teaching and learning. For additional clarity:
  - (i) Comprehensive training materials shall include systematic procedures required by Operators for all aspects of Train operation. Procedures shall include but are not limited to: start-up/shutdown, changing ends, diagnosing faults, fault recovery, isolating doors, etc.;
  - (ii) Clear graphics that visually represent each step of a procedure shall be included;
  - (iii) Training content shall be reflective of OC Transpo's operational rules and procedures for the Trillium Line;
  - (iv) Reference material shall be easy to use and structured in a logical sequence; and,
  - (v) Technical details in the training program shall be relevant to the role of the Operator.
- (c) Project Co shall be responsible for all costs associated with the Train the Trainer Program. The sole exception will be that the City will bear the cost of providing the employees being trained as designated OC Transpo Trainers.
- (d) Training of the designated OC Transpo Trainers and Operators shall be coordinated with the City and scheduled to ensure adequate Operators will be trained and certified on new operating rules and procedures, Vehicle Operations, Vehicle Troubleshooting, Vehicle Emergency Operations, and the SI and available to support new Vehicle and system testing and commissioning.

Designated OC Transpo Trainers shall be trained at least six months prior to commencement of Trial Running on the System.

- (e) Trial Running on the System shall commence when Project Co has fulfilled the criteria identified in Schedule 14, Article 1.5, including but not limited to demonstrating to the City that all testing and commissioning has been successfully completed, all outstanding rail system (signal, Track, communications) defects have been corrected, and all Vehicles are commissioned and ready for Revenue Service.

## **12.5 Operator Training**

- (a) Designated OC Transpo Trainers will be responsible for training and certifying Operators on new operating rules and procedures, Vehicle Operations, and SI.
- (b) The Operator training program shall utilize a fully developed curriculum, with all training materials, classroom and field training, testing, pass/fail criteria and certification. The training curriculum and materials shall be developed by Project Co, and shall be submitted in accordance with Schedule 10 – Review Procedure.
- (c) The training of Operators shall be coordinated between the City and Project Co and scheduled to ensure an adequate number of Operators are trained and certified to support Revenue Service Operations, as identified by the City. At a minimum:
  - (i) Beginning 75 days prior to Trial Running, Project Co shall provide the City with a minimum of 14 hours per day of full System Track access to ensure the requisite number of Operators are trained and certified on the System and new Vehicles.
  - (ii) Project Co shall develop a Track access permit process that allows the City access to the mainline during the 75 day period for Operator training and certification. Project Co shall work cooperatively with the City in the issuance of Track access permits.
  - (iii) Project Co shall ensure the eight Vehicles are available to support the City's Operator training program, as required by the City.
  - (iv) Operator training shall be completed prior to Trial Running.
- (d) Project Co shall be responsible for the maintenance of the SI and all associated costs related to the maintenance of the SI in support of Operator Training. The sole exception will be that the City will bear the cost of providing the employees being trained as Operators.

## **12.6 Training Provided to Controllers**

- (a) Project Co shall be responsible to train Controllers in accordance with all applicable standards, rules and regulations
- (b) Project Co's Controller Training Program (provided by a Project Co Trainer) shall ensure that all Controllers have been trained and certified to safely perform all dispatching functions associated with the System including the use and application of the S&TC System in the TOCC and in accordance with all applicable standards, rules and regulations. The program shall utilize a fully developed curriculum, with all training materials, classroom and hands on, including field and on-

the-job training, testing, pass/fail criteria and certification. Project Co Trainers for the Controller training program shall have a minimum of five years railroad dispatcher experience.

- (c) Project Co shall be responsible for all costs associated with the Controller training program. The sole exception will be that the City will bear the cost of providing the employees being trained as Controllers.
- (d) Project Co shall be responsible for ensuring that 12 Controllers are trained and certified on operating rules and procedures, Vehicle Operations, and SI prior to the commencement of Vehicle movements on the Mainline SI. The development of the Project Co delivered training program will be coordinated with the City and be completed a minimum of 9 months prior to the commencement of Vehicle Operation on the SI. The commencement of Controller training shall be based upon the duration of the proposed Controller training program and as coordinated between the City and Project Co.

## **12.7 Training Provided to Emergency Service Providers**

- (a) Project Co shall develop a training program for ESP.
- (b) Project Co's Train the Trainer Program for ESP trainers (provided by a Project Co Trainer) shall ensure that up to 8 ESP trainers have been trained and certified on all aspects of the SI and Vehicles that they may be required to be knowledgeable of in the event of an Emergency. The program shall utilize a fully developed curriculum, with all training materials, classroom and field training, testing, pass/fail criteria and credentialing. The training curriculum and materials shall be developed by Project Co, and be subject to Schedule 10 – Review Procedure.
- (c) Training of ESP trainers shall be scheduled such that training is complete six months prior to the start of Trial Running.
- (d) Project Co shall be responsible for all costs associated with the ESP Train the Trainer Program. The sole exception will be that the City will bear the cost of providing the employees being trained as Trainers.
- (e) In addition to Project Co's Train the Trainer program and in order to facilitate an appropriate level of understanding of the new system and Vehicle fleet with the ESP, Project Co shall organize and provide appropriate technical support resources for the following events:
  - (i) Site orientation to New Walkley Yard for up to 12 ESP (upon completion);
  - (ii) Two Vehicle Familiarization sessions for the New Vehicle fleet for up to 12 ESP each;
  - (iii) Preliminary review of lifting scenarios; Emergency access, cab access, and Vehicle Safety features for new Vehicles (prior to start of new Vehicle dynamic testing);
  - (iv) Final review of lifting scenarios; Emergency access, cab access, and Vehicle Safety features (three months prior to Trial Running); and,
  - (v) New alignment and Station familiarization session for up to 12 ESP (three months prior to Trial Running).

## ARTICLE 13 DEMOLITION, REMOVALS AND DISPOSAL

### 13.1 General

- (a) Project Co shall demolish any buildings or other Structures on the Lands as required for construction and obtain all Permits, Licenses, Approvals and Authorizations required for Demolition. All Demolition refuse and materials shall be the property of Project Co, with the exception of any materials identified as salvageable materials as outlined in Clause 13.1 of this Part 1. Project Co shall dispose of all such refuse and materials in accordance with Applicable Law and leave the Lands in a clean and tidy condition upon completion of the Works.
- (b) Performance Criteria
  - (i) Project Co shall remove obstructions encountered in the construction of the Project elements that hinder the installation of said elements. Obstructions may include but are not limited to – pipes, conduits, duct banks, foundations, debris, poles and any other object.
  - (ii) Project Co shall remove existing Roadway and sidewalk pavements obstructing the construction of the Project. Use equipment and methods of removal and hauling which protect underlying Pavement or existing Pavement not designated for removal.
  - (iii) Project Co shall remove or relocate existing Utilities where required as per City standards and in accordance with Schedule 15-2, Part 2, Article 8 – Utility Infrastructure Design Criteria.
- (c) Specific Requirements
  - (i) Existing Facilities
    - A. The following Stations shall be selectively demolished and rehabilitated or renovated:
      - i. Bayview Station, Trillium Line Platform area only;
      - ii. Carling Station;
      - iii. Carleton Station;
      - iv. Mooney's Bay Station; and,
      - v. Greenboro Station.
    - B. To the fullest extent possible, all materials shall be recycled.
    - C. The reuse and re-cycle of material shall be reflected in the priorities and objectives of the Sustainability Plan and reported in the Sustainability Annual Report Card as detailed in Schedule 17 – Environmental Obligations, Part 3.
  - (ii) Leitrim Park and Ride

- A. Project Co shall remove:
  - i. All Passenger amenities including shelters, signage, Platforms, lighting and foundations for the same;
  - ii. All paved surfaces not reused in Project Co's design including, Roadways, curbs, parking areas; and,
  - iii. All civil infrastructure not reused in Project Co's design.
- (iii) Other specific Project Lands:
  - A. Private properties being used for development that contain existing structures include:
    - i. [REDACTED]
  - B. Project Co shall perform removals and Demolition as follows:
    - i. Completely remove all existing sidewalks and pavement:
    - ii. Completely remove all Structures on the Site:
    - iii. Removal of structures shall include complete removal of all building foundations;
    - iv. Remove all Utility services on Site. Utilities shall be removed to the point of connection to the Utility service in the ROW and capped in accordance with Utility requirements; and,
    - v. All materials shall be recycled in according to Good Industry Practice and standards.
- (iv) Rail Bridge over Southeast Transitway (SN055930)
  - A. The existing rail bridge over the Transitway shall be removed as per the following:
    - i. The entire Structure, including retaining walls, shall be removed to 1m below top of existing ground.
    - ii. Grade surrounding area to match existing. A minimum of 600mm earth material, that shall sustain plant materials as described in Schedule 15-2, Part 6, Article 2 – Design Criteria, shall be installed.
- (v) Sawmill Creek Bridge (SN055200)
  - A. The existing rail bridge over Sawmill Creek shall be removed as per the following:

- i. The entire Structure shall be removed to 1m below top of existing ground. The existing gabions shall be removed and the approach embankments regraded accordingly.
  - ii. Grade surrounding area to match existing. A minimum of 600mm earth material, that shall sustain plant materials as described in Schedule 15-2, Part 6, Article 2 – Design Criteria, shall be installed.
- (d) All Demolition shall be completed in accordance with City of Ottawa Design Standards.
- (e) The Demolition, selective Demolition and or removals shall be coordinated with the City for any salvageable materials the City may want to reuse elsewhere.
- (f) Materials
  - (i) Project Co shall dispose of all materials removed in accordance with City of Ottawa Standards and OPSS and applicable regulations.
  - (ii) Project Co shall manage hazardous materials in accordance with City of Ottawa Standards, OPSS and applicable regulations. Project Co shall not store materials on Site without precautions to prevent adverse effects of adjacent watercourses, groundwater, the migration of materials offsite, nor allowing the development of a nuisance condition.
  - (iii) Project Co shall properly stockpile the materials resulting from removals and/or Demolition by using separate stockpiles for waste materials and reusable or recyclable materials.
  - (iv) Project Co shall manage Contamination and excess excavated materials in accordance with Schedule 17 – Environmental Obligations.
  - (v) DSS reports have been prepared for structures/facilities/properties that have been identified for removal. Refer to Schedule 17 – Environmental Obligations.

## **ARTICLE 14 NEW MUNICIPAL INFRASTRUCTURE**

### **14.1 Responsibility for New Municipal Infrastructure**

- (a) Project Co shall be responsible for the design and construction, including completion, testing and commissioning, of any New Municipal Infrastructure.
- (b) The New Municipal Infrastructure includes new City infrastructure.
- (c) All design and construction in connection with the New Municipal Infrastructure shall be completed by Project Co and shall incorporate the applicable design and construction standards of the City.
- (d) All design and construction in connection with the New Municipal Infrastructure to be constructed by Project Co shall be subject to the Review Procedure as outlined in Schedule 10 – Review Procedure of the Project Agreement.
- (e) New Municipal Infrastructure shall be turned over to the City after the completion of the construction and testing and commissioning of New Municipal Infrastructure. Project Co shall not be responsible for the ongoing maintenance of the New Municipal Infrastructure, with the exception of the warranty provided for within the City of Ottawa Standard Tender Documents for Unit Price Contracts, Volume 1 and 2.

### **14.2 Design Standard**

- (a) In addition to the City Standards identified in Schedule 15-1 – Technical Terms and Reference Documents, New Municipal Infrastructure shall be designed in accordance with the City of Ottawa Standard Tender Documents for Unit Price Contracts, Volume 1 and 2.
- (b) Where the design and construction of New Municipal Infrastructure includes material types and product types that are covered by the material specifications included in Volume 2 of the City of Ottawa Standard Tender Documents for Unit Price Contracts, only specific materials and products that are listed therein as approved shall be utilized in the Works.
- (c) Pavement design for New Municipal Infrastructure shall be in accordance with Schedule 15-2, Part 2, Article 6 - Roadways, Bus Terminals, and Laybys.

### **14.3 Record Drawings**

- (a) Record Drawings for New Municipal Infrastructure shall be produced in accordance with the requirements of Article 15 - Record Drawings, of this Part 1.

### **14.4 Scope of Works**

- (a) In general, the following types of assets shall be considered New Municipal Infrastructure:
  - (i) New retaining walls required for road construction and grading, and not associated with the Guideway.
  - (ii) New watermain.

- (iii) New street lights and illumination.
  - (iv) New storm and sanitary sewers.
  - (v) New traffic signals.
  - (vi) New Utilities.
  - (vii) New Culverts.
  - (viii) New Roadways (Local, Provincial, Federal).
  - (ix) New bus terminals and connections, operator facilities, Park and Ride Facilities, and PPUDO areas.
  - (x) MUPs on third party lands.
- (b) Any proposed Culverts, storm, or sanitary sewers that exclusively serve the System and falls entirely within the Lands shall be considered SI.
- (c) The items that are to be included in the Works as New Municipal Infrastructure are included in Table 1-14.1 below.

**Table 1-14.1 – New Municipal Infrastructure**

Asset Name / Structure Number (if applicable)
Bowesville Park and Ride
Leitrim Park and Ride
Leitrim Road Bridge (SN225610) – Roadway portion only
Earl Armstrong Bridge (SN225680)– Roadway portion only
University Road Pedestrian Bridge over Rideau River (SN018750)
Bowesville Road Bridge (SN225690) – Roadway portion only
Limebank Road Bridge (SN225710) – Roadway portion only

## ARTICLE 15 RECORD DRAWINGS

### 15.1 General

- (a) The Design Team shall track and document all changes from the IFC drawings up to, and including, the preparation of the Record Drawings which shall be in accordance with Schedule 10 – Review Procedure.
- (b) Project Co shall keep a record of the As-Built condition and the reasons for any changes from the IFC documents, including any necessary authorizations. Where the As-Built condition deviates from the IFC documents, but continues to meet the requirements of the Output Specifications, such that any changes fall within the design and specification tolerances and do not require engineering sign-off by the responsible engineer, Project Co shall ensure that the drawings are marked up with the relevant information required to represent the As-Built condition, highlighting the difference from the IFC documents. At Substantial Completion, Project Co shall sign and seal the Record Drawings as required in Schedule 14 – Testing and Commissioning.
- (c) Where changes in the As-Built condition mean that the constructed Works would no longer meet the specifications outlined in the Output Specifications or would require Design Data to demonstrate compliance with the Output Specifications, then the responsible engineer shall revise the IFC documents and submit the Design Data as a Construction Document Submittal in accordance with Schedule 10 – Review Procedure, and shall be subject to the requirements outlined in this Article 16.
- (d) Project Co shall provide Record Drawings for any New Municipal Infrastructure in accordance with the requirements of any third party owner of such New Municipal Infrastructure as outlined in Schedule 14 – Attachment 1.
- (e) Project Co shall provide separate Record Drawings in both CAD and pdf format for each of the following works within 30 calendar days of completion of those works.
  - (i) Carleton Tunnel as outlined in Schedule 15-2, Part 4, Clause 3.5 (e).
  - (ii) Elevated Guideway to OMCIA Terminal as outlined in Schedule 15-2, Part 2, Clause 4.8 (d) (i).
  - (iii) Airport Station as outlined in Schedule 15-2, Part 4, Clause 3.13.
- (f) Record Drawings for New Municipal Infrastructure shall be produced in accordance with the requirements of the CADD Standards Manual, prepared by the City.
- (g) Temporary Detour Routes/Work
  - (i) As constructed engineering design drawings prepared in accordance with City design standards for each closure, detour route, lane shift, and diversion, or modification thereof, carrying public traffic or transit vehicles and intended to be in service for longer than six months shall be submitted in accordance with Schedule 10 – Review Procedure prior to requesting authorization from the Roadway authority for the closure and/or to utilize the detour route, lane shift or diversion or modified version thereof.

- (ii) As constructed engineering design drawings prepared in accordance with City design standards for each intersection with a new temporary or permanent traffic control signal, or modification to an existing temporary or permanent traffic control signal, shall be submitted in accordance with Schedule 10 – Review Procedure within 30 calendar days of the activation of the traffic control signal, or within 30 days of the modification being made.

**Appendix A**  
**Road Design Criteria Tables**

**Table 1 - Trillium Line Design Criteria**

Criteria Description	Leitrim Road (Existing)		Gilligan Road	Leitrim Service Road (Existing)	Earl Armstrong Road (West of Bowesville Rd. to West of High Rd.) <sup>1</sup>	Bowesville Road (Leitrim Rd. to Rideau Rd.)
	Overhead	Guideway				
Road Classification <sup>2</sup>	RAU		ULU / RLU <sup>3</sup>	RLU	RAU / UAU <sup>4</sup>	RCU
Posted Speed (km/hr) <sup>5</sup>	50		50	50	80	80
Design Speed (km/hr)	60		60	60	90	90
Basic Lanes	2		2	2	2	2

8 Hour Heavy Vehicle %	4.1%				
Traffic Growth Rate Assumption <sup>28, 29, 30</sup>	1.5%				

- 
- <sup>1</sup> The Earl Armstrong Road corridor is subject to a future widening to a 4-lane urban arterial divided cross section with a 5.0m raised median. For the purpose of Project Co's design consideration, the cross section of the future Earl Armstrong Road cross section shall be assumed as follows:
- 2 general purposes lanes (3.50m wide) in both the eastbound and westbound directions;
  - 5.0m raised concrete median;
    - 2.5m shoulder constructed beside the Stage 2 westbound lanes will become half of the future 5.0m raised concrete median.
- <sup>2</sup> Roadway classifications are identified in the City of Ottawa Official Plan – Schedule E. Project Co shall confirm all roadway classifications with the City of Ottawa.
- <sup>3</sup> The west side of Gilligan Road shall be urbanized between Leitrim Road and the Park and Ride, with the east side remaining rural. In addition, sidewalks shall be provided or extended along the curb radii of the southeast and southwest intersection quadrants of Leitrim Road and Gilligan Road.
- <sup>4</sup> The north side of Earl Armstrong Road (i.e. along the westbound lanes) shall have a rural cross section (i.e. shoulder, ditches, etc...) while the south side shall have an urban cross section (i.e. curbs, boulevards, etc...).
- <sup>5</sup> All posted speed limits and advisory speed signs shall be maintained for all design elements, unless specifically noted otherwise in Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals, and Lay-Bys.
- <sup>6</sup> Minimum radius corresponds to maximum superelevation values for road classification and design speed.
- <sup>7</sup> The 4000m minimum radius requirement specified in the design criteria table shall be satisfied for the entire section of the proposed Earl Armstrong Road corridor, between west of Bowesville Road to west of High Road, under the road-over-rail scenario. Under a rail-over-road scenario, the minimum radius requirement is only applicable to and shall be satisfied for the proposed Earl Armstrong Road corridor west of the eastern Bowesville Park and Ride access. Project Co's proposed design of the Earl Armstrong Road corridor east of the eastern Bowesville Park and Ride access may include a transition back to the existing roadway corridor, as appropriate. The geometry of the roadway alignment associated with the transition between the proposed and existing Earl Armstrong Road corridor shall meet the minimum requirements as per TAC GDGCR.
- <sup>8</sup> The minimum K factor for sag vertical curves shall meet the minimum comfort controls based on the presence of illumination.
- <sup>9</sup> Maximum longitudinal grade assumes a rolling terrain, unless otherwise specified.
- <sup>10</sup> Grades steeper than 5% are not acceptable on Leitrim Road due to necessary sight distance requirements and since the corridor is a cross-town bikeway facility according to the City of Ottawa's Cycling Plan.
- <sup>11</sup> Maximum roadway superelevation corresponds to road classification (L – Local, C – Collector, A – Arterial). NC denotes normal crown.
- <sup>12</sup> Under a scenario in which Project Co's proposed grade separation facility involves a road over rail grade separation configuration, Project Co shall provide a consistent 2% cross fall, draining the roadway surface runoff to the south side curb, on the Earl Armstrong Road Overhead Structure across both eastbound and westbound lanes.
- <sup>13</sup> The stopping sight distance parameters provided are minimum typical values. Additional sight distance may be required under certain constrained conditions. In all cases, Project Co's design shall meet the requirements of Schedule 15-2, Part 2, Clause 6.5.
- <sup>14</sup> Minimum decision sight distances shall be based on Avoidance Manoeuvre C, unless otherwise specified.
- <sup>15</sup> General lane width requirements shall meet the minimum lane widths as prescribed in the TAC GDGCR based on the corresponding road classification.
- <sup>16</sup> The median lane shall be 3.75m wide and the curbside lane shall be 3.5m along Earl Armstrong Road.
- <sup>17</sup> Auxiliary lanes with high transit volumes shall be a minimum of 3.5m.

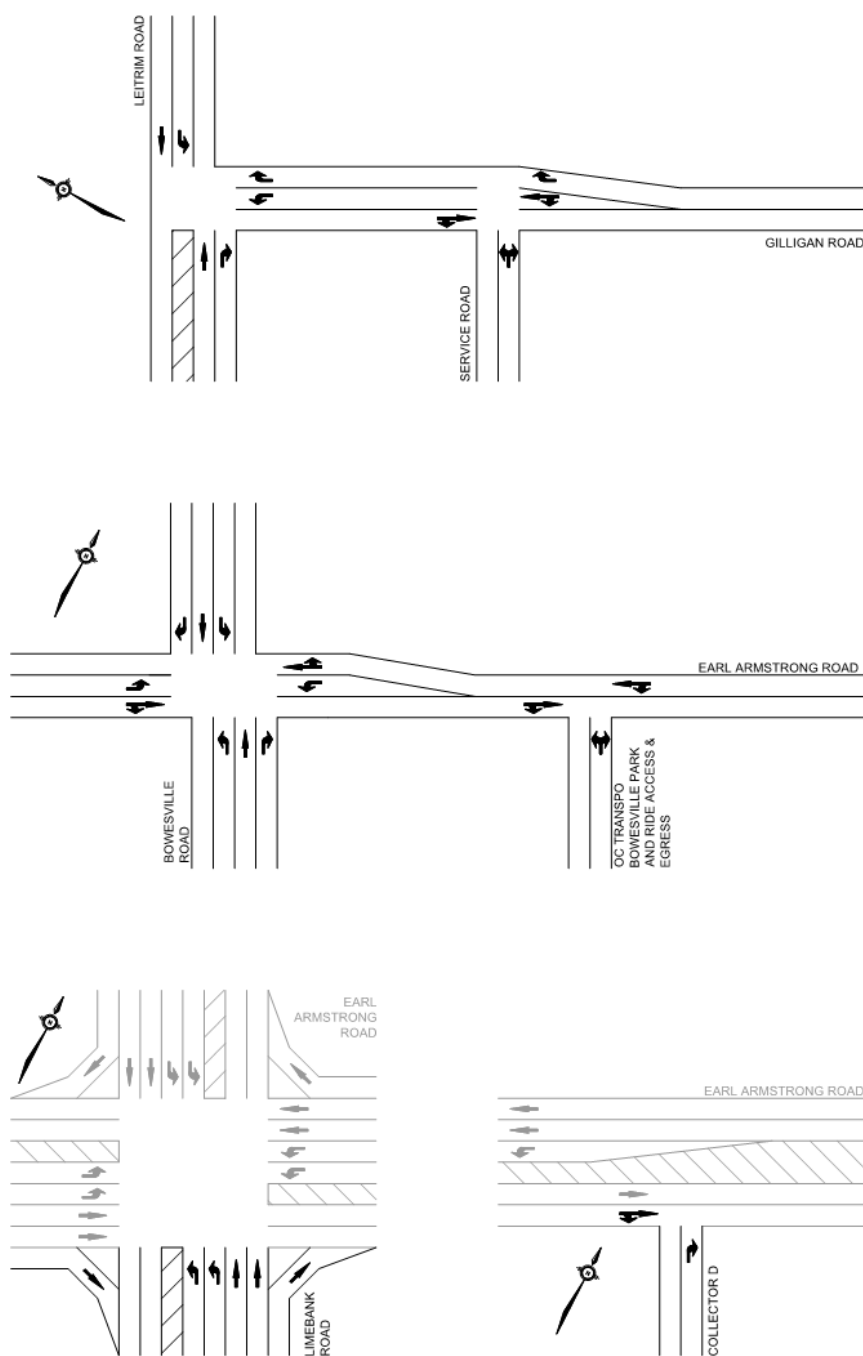

- 
- <sup>18</sup> A 2.0m wide sidewalk shall only be provided on the west side of Gilligan Road.
- <sup>19</sup> Project Co shall provide a 4.0m wide multi-use pathway on the south side of Earl Armstrong Road.
- Under a scenario in which Project Co's proposed grade separation facility involves a road over rail grade separation configuration, Project Co shall widen the multi-use pathway to be 4.5m and be separated from the travelled lanes by a concrete barrier per the applicable bridge codes as per Article 4 – Structural Design Criteria and Requirements of this Part 2.
- <sup>20</sup> All shoulders shall be paved to meet the City's Standard Tender Package Standard Detail Drawings and Specifications.
- <sup>21</sup> According to the City of Ottawa Cycling Plan, Leitrim is identified as a cross-town bikeway facility. Therefore, Leitrim geometry and cross-section shall accommodate the requirement of a standard shoulder bikeway in both eastbound and westbound directions. Appropriate design domain for shoulder bikeways shall meet the requirements of TAC GDGCR Table 3.4.6.2.
- <sup>22</sup> The 1.5m proposed shoulder is only required on the east side of Gilligan Road, south of the intersection with Leitrim Road.
- <sup>23</sup> The shoulder along the westbound lane shall be a minimum of 1.8m and the shoulder on the eastbound lanes shall be 2.5m.
- <sup>24</sup> A 2.5m shoulder is only required on the north side of Earl Armstrong Road beside the westbound lane.
- <sup>25</sup> Cycling facilities shall be a minimum of 1.5m. The type of bike lane facility (on-road, shared, raised cycle track, paved shoulder) are to be confirmed by Project Co with the City of Ottawa.
- <sup>26</sup> All A-Bus and B12 design transit vehicles shall meet the dimensions and specifications per OC Transpo's transit vehicle fleet as per the requirements of Schedule 15-2, Part 2, Clause 6.9(c)(vi).
- <sup>27</sup> Traffic information (AADT and Heavy Truck %) based on 8-hour turning movement counts provided by the City of Ottawa.
- <sup>28</sup> Traffic growth rates are based on 'EMME' model outputs comparing 2011 and 2031 volumes provided by the City of Ottawa.
- <sup>29</sup> Traffic projection horizon shall be year 2031 for all transportation impact assessments and traffic and transit analysis studies, unless otherwise noted.
- <sup>30</sup> For the purpose of determining projected traffic volumes in traffic and transit analysis, Project Co shall reference the traffic growth rates specified in the design criteria, accordingly. Where the growth rates are used for the purpose of calculating pavement design requirements, Project Co shall use a minimum of 1.0% or the traffic growth rates specified in the design criteria, whichever is greater.
- <sup>31</sup> Due to changes in the road network in the immediate vicinity of the subject roadway, this has resulted in higher projected traffic demand patterns.
- <sup>32</sup> Under a scenario in which Project Co's proposed grade separation facility involves a road over rail grade separation configuration, Project Co shall design and construct an Overhead Structure to include the following cross sectional elements, in both the northbound and southbound direction as follows:
- 2 general purpose lanes (3.75m wide median lane and 3.5m wide outside lane);
  - 5.0m raised concrete median;
  - 2.5m shy line offset between the general traffic lanes and appropriate concrete barrier wall to separate the adjacent multi-use pathway (The shy line offset on the Overhead Structure shall transition to introduce the proposed boulevard on the approaches to the Overhead Structure.);
  - 4.0m multi-use pathway between the concrete barrier and appropriate TL-4 parapet wall and railing on the outside of the Structure.
- <sup>33</sup> Project Co shall maintain the existing lane configuration and layout within the limit of the Works on Limebank Road.
- <sup>34</sup> Project Co shall provide a 4.0m wide multi-use pathway on both sides of Limebank Road.

- 
- Under a scenario in which Project Co's proposed grade separation facility involves a road over rail grade separation configuration, the multi-use pathway shall be separated from the travelled lanes by a concrete barrier, per the applicable bridge codes as per Article 4 – Structural Design Criteria and Requirements of this Part 2.

<sup>35</sup> Typical 5.0m wide raised concrete median is required. Where the concrete median is adjacent to auxiliary storage lanes, the minimum width of the concrete median is 1.5m.

## Appendix B - Road Intersection Minimum Lane Configuration Diagram

Appendix B represents the minimum lane configuration requirements at the following intersections. If the findings of Project Co's traffic analysis require additional travelled or auxiliary lanes in order to satisfy the requirements of the City of Ottawa's TIA guidelines, Project Co shall be responsible for the necessary roadway improvements in addition to the requirements shown in this Appendix.

\* The need to repair, modify or replace the structure shall be determined by Project Co following the completion of the required structural reports.

## **Appendix D – Form of Road Safety Audit Certificates**

1. Road Safety Audit Certificate (Stage 1)
2. Road Safety Audit Certificate (Stage 2)
3. Road Safety Audit Certificate (Stage 4)

Certificate Ref No. [ ]

**ROAD SAFETY AUDIT CERTIFICATE (STAGE 1)**

*This Certificate is being delivered pursuant to the agreement between the City of Ottawa and [Project Co] dated • (“the Project Agreement”) relating to the Project. Defined terms and expressions used in this Certificate have the same meanings as ascribed thereto in the Project Agreement.*

*Form of Certificate to be used by the designer for certifying that a Stage 1 Road Safety Audit has been carried out in accordance with Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-Bys of the Design and Construction Specifications.*

1. We certify that the Pre-Final Design Development of [.....] has been the subject of a Stage 1 Road Safety Audit in accordance with Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-Bys of the Design and Construction Specifications, the Design Quality Management Plan and all other relevant provisions of the Project Agreement.
2. The Road Safety Audit Team’s report and statement certifying the audit has been carried out are attached.

Signed: .....

Road Safety Audit Team (Principal)

Name: .....

Title: .....

Date: .....

Professional Registration Number: .....

Affix Professional Seal

3. We certify that the preliminary design of [.....] has been the subject of a Stage 1 Road Safety Audit in accordance with Schedule 15-2, Part 2, Article 6 – Roadways, Bus Terminals and Lay-Bys of the Design and Construction Specifications, the Design Quality Management Plan and all other relevant provisions of the Project Agreement and that all observations and recommendations in the Road Safety Audit Team’s report have been satisfactorily addressed and resolved.

**APPENDIX E**

**[REDACTED]**

## **APPENDIX F**

### **Pedestrian Crossover Infrastructure Requirements**

## 1.0 General

### 1.1 Scope

- a) This general specification identifies additional construction requirements specific to pedestrian crossover (PXO) facilities, including but not limited to, traffic infrastructure, street lighting, traffic signs, and pavement markings.

## 2.0 Reference Standards

- a) These are the primary references for the design and construction of a pedestrian crossover per Schedule 15-2, Part 2, Clause 6.1(a). Project Co shall reference, but not be limited to, the following reference material for the design and construction of a pedestrian crossover:
- City of Ottawa Pedestrian Crossover Program and Example Documents 1 and 2
  - City of Ottawa Right-of-Way Lighting Policy
  - Ministry of Transportation of Ontario (MTO) Ontario Traffic Manual (OTM)

## 3.0 Approval of Source

- a) Project Co shall coordinate and request approval from the City of Ottawa for their pedestrian crossover designs according to the requirements of Schedule 15-2, Part 2, Table 6-1 before proceeding to order, supply and install the pedestrian crossovers. For the permanent installation of pedestrian crossovers, Project Co shall only supply and install materials provided by manufacturers approved by the City of Ottawa or its agent. Only materials evaluated and approved will be accepted. Once the materials are approved, Project Co and the manufacturer shall not change the material type or component parts without prior approval, by the City of Ottawa or its agent, for subsequent orders.

## 4.0 Characteristics (Physical, Electrical, Environmental, Operational)

### 4.1 Physical Characteristics

#### 4.1.1 Traffic Poles and Foundations

- a) Project Co shall supply and install the traffic infrastructure referenced from Table 1 below, based on the PXO Type and presence of street lighting, per the City of Ottawa Standard Detail Drawings.

**Table 1: Pole Type and Foundation Detail for each PXO Type**

PXO Type		City of Ottawa Standard Detail Drawing		
		Pole Type		Foundation Details
Type B	w/ street lighting	Joint Use (32')	J-6-16	As per T23
	w/o street lighting	Mast Pole	J-6-51	As per T22
Type C	w/ street lighting	Joint Use (32')	J-6-16 (w/o arm)	As per T23
	w/o street	Tubular Pole	J-6-49 (w/o	As per T21 (or LID 002D)

	lighting		arm)	
--	----------	--	------	--

- a) Project Co shall refer to the attached design references for the placement and spacing of signs, push buttons, RRFB, etc. on the appropriate poles.

#### **4.1.2 RRFB**

- a) Project Co shall reference the City of Ottawa RRFB specification included with this Appendix. The City has pre-approved the following RRFB models:
- JSF RRFB Model AB 9207 (Single-sided)
  - JSF RRFB Model AB 9407 (Double-sided)
  - Carmanah SC 315 (Single-sided or double-sided)

### **4.2 Electrical Characteristics**

- a) Project Co is to coordinate and provide sufficient notice to the City of Ottawa prior to making any electrical connections per Schedule 15-2, Part 2, Table 6-1. An authorized City of Ottawa electrical maintenance provider shall complete all final electrical connections.
- b) For the installation of the RRFBs, Project Co shall comply with the requirements of the RRFB specifications.

### **4.3 Environmental Characteristics**

- a) For the installation of the RRFBs, Project Co shall comply with the requirements of the RRFB specifications.

### **4.4 Operational Characteristics**

#### **4.4.1 Illumination**

- a) Project Co shall coordinate with the City of Ottawa Street Lighting Group to confirm if the proposed location of the PXO meets the required City of Ottawa lighting level criteria as per City of Ottawa ROW Lighting Policy. If the location does not meet the required lighting level criteria, Project Co shall design, obtain approvals, supply materials and labour, equipment, construct, provide inspection and testing associated with the City's requirements for street lighting standards and best practices, or upgrade the existing fixtures to meet the appropriate lighting levels.
- b) For the installation of new street lights, Project Co shall supply and install all luminaires and the associated traffic fixtures, or an equivalent approved material. The type/model of street light varies for each specific site. As such, Project Co shall confirm with City of Ottawa Street Lighting Group for the appropriate type/model of each material required for new street lights.

- c) An authorized City of Ottawa Street Light maintenance provider shall complete all final electrical connections.

#### **4.4.2 Traffic Signs**

- a) Project Co shall design, supply and install all temporary and permanent traffic signs for a pedestrian crossover per the requirements of OTM Book 5 and Book 15.

#### **4.4.3 Pavement Markings**

- a) Project Co shall design, supply and install all temporary and permanent pavement markings for a pedestrian crossover per the requirements of OTM Book 11 and Book 15.
- b) The dimensions of the “shark tooth” pavement markings in the general traffic lanes shall be:
- Height = 90 cm
  - Width = 60 cm
  - Spacing = 30 cm

## **Appendix F1 - RRFB Specification**

### **1.0 General Requirements**

- a) RRFB's are pedestrian-activated, high-intensity flashing beacons that warn drivers of the presence of a pedestrian in the crosswalk. RRFB's consist of two rectangular yellow indications with two tell-tale end indicators to let pedestrians know that the beacon is flashing. RRFB's must be activated manually by pushbuttons and are to flash in a rapid pattern for a pre-set time.
- b) The Ontario Traffic Manual (OTM) Book 15, outlines the components and installation layouts of RRFB's at pedestrian crossovers. All RRFB's supplied must be compliant with Book 15 applications and requirements and also be compliant with all certifications, as may be required by law.
- c) The RRFB must be widely distributed and have been on the market for more than two (2) years.

### **2.0 General Design**

- a) The unit shall be available in two configurations, double-sided and single-sided. A RRFB unit shall consist of the RRFBs, associated enclosure, and a power supply consisting of a solar panel with rechargeable battery(s) and a push button for activation. The unit may have a separate controller and/or battery cabinet if so required.
- b) The RRFB's must be capable of being mounted on these poles above the Pedestrian Crossing sign and at a height between 3.0m and 4.0m from the base of the pole.

### **3.0 RRFB Specifications**

- a) The enclosure in which the RRFBs are mounted must be yellow. The yellow colour must be similar to that used on warning signs in the Province of Ontario. Refer to the OTM Book 1B. Where a separate controller/battery cabinet is provided, the cabinet shall be grey.
- b) All RRFB enclosures (and controller/battery cabinet if applicable) shall be powder coated aluminum and shall be weather tight, secure and vandal resistant. All enclosures/cabinets shall have a minimum 5 year corrosion damage warranty.
- c) Each single-sided RRFB unit shall provide two (2) LED rectangular-shaped amber indications facing outward toward on-coming traffic. A double-sided unit shall provide an additional two (2) LED indications facing the opposite direction.
- d) Each LED indication shall be a minimum of 125mm wide by 50mm high. The two (2) RRFB indications shall be aligned horizontally, with the longer dimension horizontal and with a minimum space between the two indications of 175 mm, measured from inside edge of one indication to the inside edge of the other indication.

- e) The RRFBs shall provide a minimum of 20 degrees horizontal pivot. When set, the RRFB angle shall remain securely in place.
- f) Each RRFB unit shall provide two (2) yellow LED tell-tale end indicators, one facing inward toward the crossover the other facing outward. Each tell-tale indicator shall be a minimum of 5 sq. cm.

#### **4.0 Power Specifications**

- a) Each unit shall be powered by a rechargeable battery(s). The battery(s) shall be recharged by solar panels.
- b) Each unit must be capable of being connected directly to 120 volt AC power or to be capable of being modified to provide a direct AC connection. In the case where the supplied unit does not provide a direct AC connection, an “AC modification package” must be available from the manufacturer that would enable the unit to accept a direct AC connection. The “AC modification package” must be easily field installable. The cost of the “AC modification package” must be available at a cost of not more than 10% of the RRFB unit cost.
- c) The power supply must be capable of operating the RRFB unit (from full charge) for a minimum of 20 days without re-charging at an average usage rate of 200 cycles per day at 25 seconds of activation/per cycle.
- d) The solar panel and battery(s) must be of sufficient size and capacity to provide the necessary power as recommended by the manufacturer to achieve the rated usage, where installed in Ottawa, Ontario, Canada.
- e) The battery(s) shall be UL certified and field replaceable.
- f) The solar panel must be capable of being securely installed on the top and on the side of the J-6-49, J-6-51 or J-6-16 (side only) pole that the RRFB is mounted.
- g) All brackets and hardware required to mount the solar panels must be supplied with the unit. All brackets and mounting hardware are to be corrosion resistant. Brackets and mounting hardware must be supplied to enable 12 side-of-pole installations and 20 top-of-pole installations.
- h) All wiring connections for the RRFB unit components must be capable of being easily installed within the poles specified (J-6-49, J-6-51, J-6-16). All wiring and connections shall be weather tight, secure and vandal resistant.
- i) The unit is to be supplied with an accessible push button for pedestrians to activate the RRFB’s. The push button is to be yellow and must be capable of being mounted on the same pole that the RRFB is mounted. Brackets and mounting hardware to attach the push button to the poles specified must be supplied.

- j) The pushbutton shall have a two-tone audible confirmation.
- k) The power supply, including battery and solar panel and all other components must be capable of operating at temperatures between -40°C and +40°C. Any upgrades to the power supply or other components recommended by the manufacturer required to ensure the unit operates at its rated usage, within this temperature range are to be included.

## 5.0 Operational Requirements

- a) The operation of the RRFB shall be as outlined in OTM Book 15.
- b) When activated by push button, the two (2) yellow indications in each RRFB unit (two in each direction for double sided units) shall flash in a rapidly alternating “wig-wag” flashing sequence (left light on, then right light on) with a duty cycle of 800 milliseconds (ms). The left LED flashes two times in a slow volley each time it is energized (125 ms on and 75 ms off per flash). This is followed by the right LED, which flashes four times in a rapid volley when energized (25 ms on and 25 ms off per flash) and then has a longer flash for 200 ms. The effect is known as a “stutter flash effect” and is compliant with the Manual on Uniform Traffic Control Devices (MUTCD) RRFB flash pattern 2/4-1 (2012).
- c) The RRFBs must also be capable of flashing in compliance with MUTCD RRFB flash pattern WW+S (2014) (Wig-Wag plus Simultaneous).
- d) The unit’s flash pattern shall be capable of being easily set in the field through manual means (switch, dial, etc.).
- e) When the RRFB is flashing, the two tell-tale end indicators on the unit shall be on. Otherwise, they are to be off.
- f) The time lapse between the push button activation and start of the RRFB flashing should be less than 1 second and in no case more than 3 seconds.
- g) If a pedestrian pushes the button midway through a flashing cycle, the unit is to reset the RRFB flash duration for another full cycle.
- h) The flash rate of each individual yellow indication, as applied over the full on-off sequence of a flashing period of the indication, shall not be between 5 and 30 flashes per second.
- i) The flash duration cycle of the RRFB must be variable. The flash duration cycle must be capable of being set (in 5 seconds increments) for a minimum of 5 seconds up to 60 seconds.
- j) Generally more than one (1) RRFB unit is installed at a PXO. The operation of these units must be synchronized to enable the activation of one RRFB unit to automatically activate up to four (4) additional RRFBs.

- k) The communication “channel” for the RRFB to synchronize with other RRFB units shall be capable of being easily set in the field through manual means (switch, dial, etc.).
- l) Communication enabling the synchronization of the RRFB units shall be wireless and must operate within a minimum line-of-sight distance of 350m.
- m) Communication between RRFB units to enable synchronized activation must be secure and designed to avoid interference between multiple locations or other electrical devices.
- n) The RRFB units must provide a night time auto brightness feature. This feature must be capable of being turned off.
- o) The RRFB unit shall provide a visual indicator of substandard operating condition.

## **6.0 Operational Requirements**

- a) A five (5) year warranty is to be provided for workmanship and materials.
- b) The RRFB enclosure and controller cabinet (if applicable) shall have a five (5) year corrosion damage warranty.
- c) One (1) written copy of the installation and operating manual must be supplied for each unit supplied. The manual is to contain the information necessary to install, operate, and maintain the RRFB unit and all associated components.
- d) Keys and/or special tools that may be required to access and maintain the unit shall be supplied.
- e) Parts covered by warranty must be available within twenty (20) calendar days. The supplier shall be responsible for all delivery costs, including those for the return of defective components as may be required.

**SCHEDULE 15-2  
DESIGN AND CONSTRUCTION**

**PART 2      DESIGN AND CONSTRUCTION REQUIREMENTS – CIVIL AND  
GUIDEWAY**

**ARTICLE 1            INTRODUCTION**

**1.1      General**

- (a) The Expanded Trillium Line intends to improve intermediate recovery time between stopping points, supporting achievable headway service. Key improvements include lengthening existing sidings and improving Track geometry.
- (b) The Existing Trillium Line shall be extended south from Greenboro Station to Limebank Station with new Stations also located at South Keys, adjacent to the existing BRT Station, at Leitrim, about 275m south of Leitrim Road, and at Bowesville Road.
- (c) The entire Expanded Trillium Line, which falls within the existing rail corridor, is subject to be designed to accommodate freight. Project Co shall provide a continuous single-Track freight route, with the following exceptions:
  - (i) The [REDACTED] Grade Separation at Ellwood Diamond is not required to carry freight. Refer to clause 2.9(d)(ii) of Schedule 15-2, Part 1.
  - (ii) A Leitrim Road over Rail grade separation shall not be subject to freight clearance under the Structure. Refer to Schedule 15-2 Part 2 Appendix C.
  - (iii) The alignment of the Trillium Line Extension deviates from the existing rail corridor south of Earl Armstrong Road. The extension which falls outside the existing rail corridor is not required to be designed to accommodate freight.
  - (iv) An Earl Armstrong rail over road grade separation shall not be subject to freight gradients as outlined in Article 2.9 (b) (iii) of this Part 2, however shall be subject to freight loading requirements outlined in Article 4.5 (c) (i) of this Part 2.
- (d) The Existing Trillium Line currently provides access for freight deliveries to and from the NRC Facility ten to twelve times per year from the Walkley Interchange to the NRC Facility about 500m south of Lester Road. The Trillium Line Extension shall include an NRC Spur Line to provide for freight deliveries to the NRC Facility.
- (e) The Trillium Line Extension shall include a branch line to the OMCIA referred to as the Airport Link. The Airport Link shall operate the Expanded Trillium Line Trains exclusively (no freight traffic) from 300m south of Hunt Club road where the alignment extends outside the existing established rail corridor.

## 1.2 General Description of the Guideway and Guideway Requirements

- (a) Project Co shall design and construct the Guideway in the following Track configuration:
  - (i) one Mainline Track for operation from Limebank Station in the south end to Bayview Station in the north end for a length of approximately 19.5km;
  - (ii) with single Track passing sidings off the mainline at:
    - A. Leitrim: of a length of 6.64 km originating at Limebank Station and terminating at 23+511.334 (Reference Concept stationing) with a powered turnout;
    - B. South Keys: of a length of 0.933km from station 27+077 with a powered turnout at station 28+00 (Reference Concept stationing);
    - C. Brookfield: of a length of 0.86km shifting the southerly existing powered turnout to station 29+820 and shifting the northerly powered turnout to station 30+680 (Reference Concept stationing);
    - D. Carleton: of a length of 0.641km with powered turnouts at station 32+314 and station 32+955 (Reference Concept stationing). The existing powered turnouts have recently been replaced with new turnouts. These existing turnouts shall be relocated and used in the design;
    - E. Gladstone: of a length of 1.307km from powered turnout at station 34+847 (Reference Concept stationing) to Bayview Station;
  - (iii) with a single-Track branch line, Airport Link, for operation from the OMCIA in the west to north of South Keys Station, for a length of approximately 4.5km with a single Track passing siding at Uplands Station for a length of 1.15km with powered turnouts at station 11+420 and station 12+577 (Reference Concept stationing);
  - (iv) with two Tracks for non-revenue connections, one going north and one going south, to the Mainline Tracks to/from New Walkley Yard.
  - (v) Project Co shall provide the Track layout so that all Trains can move into and out of service to/from both directions of the Mainline Tracks to/from New Walkley Yard.
- (b) Project Co shall design and construct the Guideway with Guideway alignment characteristics as follows:

- (i) Existing Trillium Line
  - A. Maintain the existing Mainline Track and embankment from about 360m north of South Keys to 250m north of Gladstone Station with short segments of Track shift to improve geometry and to accommodate proposed siding extensions at Brookfield, Carleton, and Gladstone;
  - B. Replacement of existing Track from 250m north of Gladstone Station to Bayview Station including extending Gladstone siding to Bayview Station with new CWR Track for approximately 1.12km and by revising the Track profile, meeting design criteria as required, to provide a TOR to Platform height at Bayview Station as outlined in Schedule 15-2, Part 4, Clause 2.7 (a)(vii)D;
  - C. Maintain the existing Walkley line Connecting Tracks from the mainline 280m south of the Walkley Diamond to New Walkley Yard and from the mainline 400m north of the Walkley Diamond to New Walkley Yard;
  - D. Replacement of existing Track within the limits of Dows Lake Tunnel, including the replacement of all Track ballast and all existing Timber ties with NFPA 130 compliant ties;
  - E. Replacement of existing jointed Track of the North Prescott Spur from the existing NRC freight connection 500m south of Lester Road to Greenboro Station with new CWR Track for approximately 3.5km including a mainline elevated structure crossing over Lester Road; and,
  - F. Construction of a new Spur Track for the NRC freight connection, from the existing NRC internal connection located 500m south of Lester Road to the mainline. Construction of the new spur track shall include but not be limited to, the following:
    - i All new Track shall be constructed with new CWR Track.
    - ii NRC Spur Track shall include a powered turnout at the mainline and a turnout at the NRC internal connection (No. 9 or equal to the existing turnout) and located such that minimal Track rework is required to the internal NRC Tracks.
    - iii NRC Spur Track shall include a gate in the perimeter fence at the NRC connection. Security of this gate shall be the responsibility of Project Co.

- iv An at-grade crossing at Lester Road is acceptable for the NRC freight connection subject to the requirements outlined in Schedule 15-2, Part 3, Clause 10.2 (s).
  - v 200m of runout Track south of the NRC internal connection turnout shall be constructed for storage and marshalling.
- (ii) Proposed Trillium Line Extension
  - A. Construction of a section of mainline double Track from Bowesville Station to the existing established rail corridor through greenfield with new CWR Track for approximately 0.7km;
  - B. Construction of a section of mainline double Track from Limebank Station to Bowesville Station through greenfield with new CWR Track for approximately 3.5km;
  - C. Construction of a passing siding from Limebank Station to 400m north of Leitrim Road with new CWR Track for approximately 6.64km; and,
  - D. Rehabilitation of the abandoned rail corridor ROW, for the Mainline Track, formerly the North Prescott Spur, from 100m south of Earl Armstrong Road to the existing NRC Freight Connection 500m south of Lester Road with new CWR Track for approximately 3.92km, including a mainline at-grade crossing at the Private Airport Access Road;
- (iii) Airport Link
  - A. Construction of a section of Spur Track (Airport Link) on elevated structure operating Expanded Trillium Line Trains exclusively (no freight traffic) from Airport Station to 525m west of Uplands Drive through greenfield with new CWR Track for approximately 0.75km such that;
    - i The elevated Guideway Structure shall not protrude into the future terminal expansion area as defined by a 1.0m offset from column line “M” as shown on the Ottawa Macdonald-Cartier International Airport Expansion Program Terminal Building drawings in the data room.
  - B. Construction of a section of Spur Track (Airport Link) on embankment operating Expanded Trillium Line Trains exclusively (no freight traffic) from approximately 525m west of Upland Drive to approximately 480m east of Airport Parkway, through greenfield with new CWR Track for a length of approximately 1.7km includes Upland Station and elevated structures over Uplands Drive and Airport Parkway;

- C. Construction of a passing siding on embankment operating Expanded Trillium Line Trains exclusively (no freight traffic) from approximately 40m east of Upland Drive to approximately 480m east of Airport Parkway through greenfield with new CWR Track for approximately 1.15km includes an elevated structure over Airport Parkway;
  - D. Construction of an at-grade section of Spur Track (Airport Link) operating Expanded Trillium Line Trains exclusively (no freight traffic) from approximately 480m east of Airport Parkway to approximately 300m south of Hunt Club Road, through greenfield and in the existing rail corridor with new CWR Track for a length of approximately 0.88km; and,
  - E. Construction of an at-grade section of Spur Track (Airport Link) from approximately 300m south of Hunt Club Road, to the turnout approximately 750m north of Hunt Club Road in the existing rail corridor with new CWR Track for a length of approximately 1.1km, includes South Keys Station and a pocket Track north of South Keys Station.
- (c) Project Co shall design and construct the Guideway with components for safe and efficient operation of the System, including but not limited to:
- (i) Trackwork;
  - (ii) Communications and low voltage power duct banks;
  - (iii) Signalling and Train Control System;
  - (iv) Drainage systems and SWM;
  - (v) Other appurtenances as required by Project Co's design for the safe and efficient Operation of the System;
  - (vi) Track turnout power or dual-control switch machines and heaters;
  - (vii) Track turnout hand throw switch stands; and,
  - (viii) Wayside rail lubrication systems.
- (d) Project Co shall design and construct lighting to the required safety walkway area as per the requirements of NFPA 130.

### **1.3 Access of Emergency Services Vehicles to the Guideway**

- (a) Project Co shall design and construct all sections of the Guideway with a means of Emergency egress in compliance with the requirements of NFPA 130 via an unobstructed clear width.
- (b) Project Co shall provide Emergency egress points that will allow ESP access as per the requirements of NFPA 130. These locations shall be in addition to end of Platform egress points. These points shall be provided with a gated entry through the security fencing of the Guideway where they are located between Stations. A unique identification system shall be developed for the gates in consultation with the City and signage shall be fixed to both sides of each gate for identification purposes.
- (c) Project Co shall design and construct the Guideway so that Emergency vehicles are able to travel by a paved route to within 15m of the gated entry point. The route may be from an existing Transitway, nearby public Roadway allowance, nearby commercial parking lot or public MUP. If existing routes are not within 15m Project Co shall construct an access route.
- (d) Project Co shall design and construct access for Emergency egress routes to a minimum paved width of 6.0m and shall be designed to the requirements of Clause 6.10 of this Part 2. The paved route shall be maintained for winter travel by Project Co. If the route is more than 90m in length then a turnaround for the Emergency vehicle shall be provided at the gated entry point or, in the case of multiple entry points being accessed from one route, at the end of the route at a minimum. The turnaround shall be designed for a minimum center line radius of 12m. The turnaround shall be either circular cul-de-sac or a hammer head with minimum dimensions of 14m x 14m.

## **ARTICLE 2            GEOMETRIC DESIGN CRITERIA FOR TRACK ALIGNMENT**

### **2.1      Reference Documents**

- (a)    The design and construction of the alignment work shall comply with the criteria contained within this Article and the Applicable Law, guidelines or practices applicable to the Project, including but not limited to the following Reference Documents. In the event of a conflict between the criteria, commitments or requirements contained within one document when compared with another, the more stringent shall apply. The order of precedence for this portion of the Project Agreement shall be as follows:
  - (i)    The criteria in this Article 2;
  - (ii)   Transit Cooperative Research Program TCRP Report 155 – Track Design Handbook for Light Rail Transit, 2nd Edition;
  - (iii)   The American Railway Engineering and Maintenance-of-Way Association Manual for Railway Engineering (2014);
  - (iv)   European Standard (EN) For Railway Applications;
  - (v)    Union International Des Chemin de Fer (UIC) Standards;
  - (vi)   OHSA; and,
  - (vii)   Standard Respecting Railway Clearance - Transport Canada - TC E-05 (1992).

### **2.2      Use of Minimum or Maximum Criterion**

- (a)    Where specific numbers are given for limitations on alignment elements, such limitations are not targets to be achieved by Project Co, but limits to be avoided if at all practical. Project Co shall in all cases strive to exceed the minimum requirements.
  - (i)    Design for maximum Passenger comfort where no physical restrictions or significant construction cost differences are encountered.
  - (ii)   Design to meet the operating objectives without compromising ride quality or taxing the mechanical limits of the vehicle and maintain the operational performance requirements to the maximum extent possible at reasonable cost where physical restrictions or significant cost differences are encountered.
  - (iii)   Minimum and maximum values are determined primarily by the vehicle design limitations and/or safety considerations, with maximum operating speeds and passenger comfort as secondary considerations. Minimum and maximum values have potential impacts in terms of Maintenance costs, noise, wheel life and Track

life. Minimum and maximum values should be used as a last resort where physical restrictions prevent the use of Passenger comfort values, as extensive use of minimum and maximum values can result in service problems and unacceptable Maintenance costs. The use of minimum and maximum values shall be used when it can be demonstrated that no other value will work and shall be justified and documented in a Basis of Design Report, and shall only be used by Project Co when approved by the City.

## **2.3 General**

- (a) Project Co shall provide the Mainline Track, non-revenue Track, including Connecting Track, Storage Track and Yard Track, for maximum operating speed to satisfy the criteria identified in Schedule 15-2, Part 1, Article 3 - Operational Performance Requirements, as dictated by existing topography, permanent physical features, property, and alignment constraints.
- (b) Project Co shall ensure that the design and construction for the Trillium Line Extension systems are integrated with all systems of the Existing Trillium line.
- (c) Project Co shall design the Spur Track to Mainline Track Design Criteria.

## **2.4 Horizontal Alignment**

- (a) Project Co shall design the horizontal Track alignment in accordance with the requirements of Clause 2.2 of this Part 2, and shall be such that all the SI is contained within the Lands as defined in Schedule 33 – Lands.
- (b) Project Co shall design the mainline and Airport Link Track for the maximum operating speed to satisfy the criteria identified in Schedule 15-2, Part 1, Article 3 – Operational Performance Requirements; 100km/h wherever possible unless Physical Constraints do not allow, in which case Project Co shall design the mainline and Airport Link Track so as to maximize the operating speed. Where the existing Mainline Track is to remain horizontally and vertically unaltered, no design modifications are required.
- (c) Project Co shall provide a tangent horizontal alignment through Station Platform limits and for a minimum of 15m beyond the end of Platforms, with a distance of 25m provided where there are no physical constraints. The spiral transition curve may begin closer to the Platform, with the City's approval, if Site conditions do not provide sufficient length, provided sufficient running clearance between the Vehicle and Platform is achieved and the relationship of the Revenue Vehicle and Platform are achieved as per Schedule 15-2, Part 4, Clause 2.7(a)(vii).
- (d) All non-Track related construction layout shall be related to or dimensioned from the centreline of the Mainline Track, unless otherwise noted.

- (e) Project Co shall design the connections to the New Walkley Yard for a speed of no less than 30 km/hr and shall also consider the safety of the geometrics. Project Co shall design the Connecting Track to maximize the operating speed.

## **2.5 Track Centres**

- (a) Ballasted Track center spacing shall be 4.5m or greater.
- (b) Where Site constraints are physically restricted, ballasted Track centre spacing of 4.0m on tangent Track and increased on curves for superelevation and carbody overhang may be constructed with City approval of the design exception.

## **2.6 Horizontal Curves**

- (a) Project Co shall define circular curves by the arc definition of curvature and specified by their radius in metres to three decimal places.
- (b) For Mainline Tracks, the minimum radii of curves shall be designed to maintain the maximum possible operating speed as dictated by existing topography, permanent physical features, property, and the alignment constraints per this Part 2. The minimum radius shall be 125m.
- (c) Project Co shall provide the New Walkley Yard Track with curves of the following radii:
  - (i) New Walkley Yard Lead Track radii shall be designed to operate with maximum design speed of 30km/hr. The minimum radius of curve shall be 100m; and,
  - (ii) New Walkley Yard Track radii shall be designed to operate with maximum speed of 15km/hr. The minimum radius of curve shall be 100m.
- (d) Project Co shall provide a tangent distance between horizontal curve and reverse curves for the Mainline Track, Connecting Track and Yard Track, as per the following formula where V is speed in km/hr and LT is the length of the tangent:
  - (i)  $LT=0.57V$ ; and,
  - (ii) the minimum tangent length between curves shall be 51.4m unless physical constraints do not allow this then the minimum length shall be 35m.
- (e) Reverse Curves
  - (i) The minimum tangent length between reverse curves in New Walkley Yard shall be per TCRP Report 155 Chapter 3.2.1 or 10m, whichever is higher.

- (ii) The minimum tangent length between reverse curves in a crossover shall be per TCRP Report 155 Chapter 3.2.1 or 10m, whichever is higher.
- (iii) The minimum tangent length between reverse curves in a Track other than mainline shall be per TCRP Report 155 Chapter 3.2.1 or 10m, whichever is higher.
- (iv) There shall be no tangent between curves in the same direction in New Walkley Yard for curves with a ratio of radii less than 1.5:1.
- (v) The minimum distance shall be 17m for back-to-back turnouts with same hand throw.
- (vi) The minimum distance shall be 5m for back-to-back turnouts with a different hand throw.
- (f) Compound Curves
  - (i) Compound curves shall not be permitted on the mainline or Yard Track design, except for the existing mainline curves from Station 29+094 to 29+378.

## 2.7 Spirals

- (a) Spiral transition curves shall be used on all mainline and New Walkley Yard lead Tracks to connect circular curves to tangents, with the exception that spirals are not required where both actual superelevation and unbalanced superelevation is zero.
- (b) Project Co shall determine the minimum length of a spiral transition curve ( $L_s$ ) by the rate of change from zero superelevation to full superelevation being achieved within the length of the spiral at a rate of 25mm Ea per 19m of spiral.

## 2.8 Superelevation

- (a) Superelevation shall be linearly attained throughout the full length of the spiral curve by raising the rail farthest from the curve centre, while maintaining the top of the inside rail at profile grade.
- (b) Project Co shall determine Superelevation by applying the following equations:
  - (i)  $E_e = 12.0 V^2/R$
  - (ii)  $E_a = 6.57(V^2/R) - 5.58$
  - (iii)  $E_a = 100\text{mm}$  maximum. If physical constraints do not allow maximum speeds of 100km/hr, then maximum of 150mm may be applied.

(iv)  $E_u = E_e - E_a$

where  $E_e$  = equilibrium superelevation in mm

$E_a$  = actual or applied superelevation in mm

$E_u$  = unbalanced superelevation in mm

$V$  = design speed in km/hr

$R$  = horizontal curve radius in meters

- (c) Project Co shall use zero actual superelevation for special Trackwork, with a maximum unbalanced superelevation of 50mm at turnouts.
- (d) Project Co shall design the Track superelevation for new Track to meet or exceed the following criteria:
- (i) maximum unbalanced superelevation,  $E_u$  of 50mm.
  - (ii) maximum actual superelevation,  $E_a$  of 100mm unless physical constraints do not allow maximum speeds of 100km/hr then maximum of 150mm may be applied.
  - (iii) Round actual superelevation to the nearest 5mm.
  - (iv) Superelevation,  $E_a$  and  $E_u$  shall be applied equally or proportionally up to maximum  $E_u$  with no  $E_a$  until  $E_u = 13\text{mm}$ .
  - (v) Existing Trackwork that is to be maintained unaltered shall be exempt from these criteria for new Track.

## 2.9 Vertical Alignment

- (a) General
- (i) All references to profile in the vertical alignment shall represent the top of the low rail for a given Track.
  - (ii) Project Co shall provide vertical curves separated by a minimum tangent length of 35m.
  - (iii) Vertical alignment shall conform to the existing freight envelope in the vicinity of the future Golf Course Runway (07C-25C), per Schedule 32 - City Permits, Licences, Approvals and Authorizations.

- (iv) Where the existing Mainline Track is to remain horizontally and vertically unaltered, no design modifications are required.

(b) Grades

- (i) Project Co shall not apply changes in grade or vertical curves within the limits of Station Platforms and future Platforms.
- (ii) Project Co shall provide grades through Stations of a minimum grade of 0.5% and a maximum grade of 1.5%. A minimum grade of 0.0% shall be permitted when additional measures to accommodate positive drainage are provided.
- (iii) Project Co shall provide the mainline between Bayview Station and Earl Armstrong Road for freight service Track with a minimum grade of 0.30% and maximum of 2% with the exception of the [REDACTED] Grade Separation and the Earl Armstrong Grade Separation as outlined in Clauses 1.1(c)(i) and (iv) of this Part 2.
- (iv) Project Co shall provide the mainline where it is Passenger service only Track with a maximum grade of 4.0%, compensated.

A. The maximum grades are after compensating for any horizontal curvature.

i Grade compensation for horizontal curvature:

1.  $G_c = G + 0.04\% \times (5729.6/R \times 3.28)$

Where:

$G_c$  = compensated gradient to account for horizontal curvature, in percent;

$G$  = grade before adjustment in percent; and,

$R$  = horizontal curve radius in metres.

- (v) Project Co shall not overlap horizontal and vertical curvature unless physical constraints do not allow it.
- (vi) Project Co shall provide the alignment such that the maximum grade for mainline turnouts is 2.0%. Where existing turnouts are unaltered no design modifications are required.
- (vii) All special Trackwork shall be located on constant grades with no vertical curves within the limits of the special Trackwork.
- (viii) Project Co shall provide Mainline Storage Track and Tail Tracks with a maximum grade of 0.3% with Tail Tracks sloped away from the mainline, or provide means

of mitigating potential Vehicle rollaway onto Mainline Track in case of brake failure.

(c) Vertical Curves

- (i) Project Co shall provide parabolic vertical curves for all grade changes.
- (ii) Project Co shall provide a minimum distance of 15m between Platform limits and any point of vertical curvature.
- (iii) The length of a vertical curve shall be as long as practicable, but no less than shown below.
  - A. The minimum length of vertical curve ( $L_{VC}$ , m) for mainline and connection Tracks shall be determined by the following equations where  $A$  = Algebraic difference in grades:
    - i  $L_{vc}=60A$
    - ii Minimum, where  $V=100\text{km/hr}$  unless physical constraints do not allow:
      - 1. Greater of either  $L_{vc}= 0.005AV^2$  or 30m, for crest curves;
      - 2. Greater of either  $L_{vc}= 0.003AV^2$  or 30m, for sag curves;

**2.10 Special Trackwork**

- (a) Project Co shall provide Special Trackwork that conforms to AREMA requirements and AREMA Specification for Special Trackwork for rails 115lb and heavier.
- (b) Project Co shall provide the Special Trackwork on tangent Track and on a constant vertical grade.
- (c) Project Co shall provide the alignment such that the minimum horizontal tangent length beyond Special Trackwork located on Mainline Track and Connecting Track is 51.4m unless physical constraints do not allow it in which case the minimum length shall be 35m.
- (d) Project Co shall provide the Special Trackwork at a minimum horizontal tangent distance of 15m from the end of Station Platforms.
- (e) Project Co shall determine minimum horizontal and vertical tangent lengths beyond New Walkley Yard Special Trackwork based on Vehicle requirements as defined in Schedule 15-2, Part 8 - Vehicles.

- (f) Project Co shall use No. 20 turnouts on Mainline Tracks of the Trillium Line Extension Project including diamond cross-overs with the following exceptions: at end of the line where No. 8 turnouts shall be used; at pocket Tracks where No. 8 and No. 4 equilateral turnouts shall be used; at the NRC turnout where No. 8 shall be used; and, at the Bowesville and Bayview diamond cross-overs where No. 8 shall be used. All Existing Trillium Line turnouts shall be reused or relocated. No. 7 turnouts shall be used for yard and Storage Tracks. Special Trackwork with lead curve radii greater than a Standard AREMA No. 7 turnout may also be used for Yard Tracks and Storage Tracks. No. 4 Equilateral turnouts may be used for Storage Tracks (e.g. pocket Tracks).

## **2.11 Other Alignment Requirements**

- (a) Combined horizontal and vertical curvature shall not be used. Where this situation is unavoidable, Project Co shall include justification in its Trackwork Design Report with reference to alignment safety at the design speed.

## **2.12 Clearances**

- (a) Vehicle Clearances
  - (i) Project Co shall measure horizontal clearance dimensions perpendicular to the Track centreline accounting for any superelevation in the Track.
  - (ii) Project Co shall account for structure chord lengths, tilt from superelevation, Track type, and outswing and inswing of a Vehicle that occurs along horizontal curves in their horizontal clearance calculations.
  - (iii) Project Co shall design a single continuous Track for the Freight Vehicle clearances for the alignment which falls within the existing rail corridor including Platform extenders at all Stations. Project Co shall design for the Revenue Vehicle clearance only (not including Freight Vehicle) where the alignment falls outside the existing rail corridor.
  - (iv) Project Co shall define the Revenue Vehicle clearance envelope as the space occupied by the dynamic envelope, or maximum movement, of the Vehicle as it travels along the Track plus an additional running clearance of 150mm, or any other dimension in excess of 150mm deemed pertinent by Project Co's own analysis for the Passenger service route. Project Co shall provide a clearance envelope such that the Revenue Vehicle clearance envelope provides sufficient running clearances and tolerances under all operating conditions.
  - (v) Project Co shall define the Freight Vehicle clearance envelope from freight train clearances Diagram 1 and Diagram 2 found in TC E-05. This document is available on the Transport Canada website.

- (vi) Project Co shall design the alignment based on the information of the Vehicle dynamic envelope.
  - (vii) Project Co shall determine the horizontal clearance dimensions from the centreline of Track to the finished edge of Station Platform based on the criteria identified in Schedule 15-2, Part 8 - Vehicles, Revenue Vehicle pass-through speed criteria, and compliance with applicable accessibility standards. Platforms will require retractable extenders to meet Freight Vehicle clearance requirements where the alignment is within the existing rail corridor.
  - (viii) Vertical clearance dimensions shall always be measured in a vertical plane irrespective of any superelevation or profile grade. When superelevation is present, the top of low rail shall be used as the reference elevation when calculating vertical clearance.
- (b) Other Clearance Requirements
- (i) Temporary clearance requirements for construction shall be assessed on an individual basis.
  - (ii) Project Co shall account for additional clearance requirements for Train overhang and mid-ordinate overhang for all horizontal curves.
  - (iii) Project Co shall allow for the future electrification of the Expanded Trillium Line by providing clearance for a future OCS pole to be installed without impacting Revenue Service or cutting off access to the live Track.
  - (iv) Project Co shall allow for the future electrification of the Expanded Trillium Line by providing a 4.5m clearance for a future OCS under all overhead Structures.
  - (v) Project Co shall not preclude for the future double tracking of the Expanded Trillium Line including all future clearance requirements.
  - (vi) Signal, Trackwork, wayside, and Track-mounted equipment shall be kept clear of the under car clearance envelope of the Revenue Vehicle.
  - (vii) Refer to Schedule 15-2, Part 2, Article 8 – Utility Infrastructure Design Criteria for watermain clearance requirements.

## **ARTICLE 3            TRACKWORK**

### **3.1      Reference Documents**

- (a) Project Co shall provide Trackwork in accordance with the criteria contained in this Article and all standards, regulations, policies, Applicable Law, guidelines or practices applicable to the Project, including but not limited to each of the following Reference Documents:
  - (i) APTA Manual of Standards and Recommended Practices for Rail Transit Systems;
  - (ii) AREMA Manual for Railway Engineering;
  - (iii) European Standard (EN) for Railway Applications;
  - (iv) UIC Standards;
  - (v) ASTM Standards;
  - (vi) ISO 2631 Mechanical Vibration and Shock;
  - (vii) NFPA 130 Standard for Fixed Guideway Transit and Passenger Rail Systems;
  - (viii) TCRP Report 155 Design Handbook for Light Rail Transit, latest edition;
  - (ix) TCRP Report 71 Track-Related Research; and,
  - (x) Transport Canada Track Safety Rules.

### **3.2      Scope of Work**

- (a) Project Co shall provide all Works related to the construction of a complete System for Trackwork, including Track, Track materials, Special Trackwork, and Spur Track as required in this Part 2.
- (b) Project Co shall provide Special Trackwork as described in this Part 2, including all turnouts, crossovers, diamond crossings, adjoining Trackwork, Track materials, switch machines, switch clearing devices, expansion joints, end-of-Track devices, wheel/rail friction control devices, and all other Track materials.
- (c) Project Co. Co shall be responsible for control and any mitigation which may be a result of wheel-rail noise throughout the System in accordance with Schedule 17 - Environmental Obligations.

### **3.3 Track Classification**

- (a) Project Co shall classify Track as follows:
  - (i) Mainline Track: used for the operation of Revenue Vehicles carrying Passengers and railbound Maintenance Vehicles;
  - (ii) Tail Track: located at Terminal Stations to provide overrun protection and potential Vehicle storage;
  - (iii) Mainline Storage Track: used to store Revenue Vehicles adjacent to Mainline Track and for potential crossover functionality;
  - (iv) Yard Track: includes shop Track located in Maintenance shops, Storage Track, Spur Track, and other Track required beyond Connecting Track within the New Walkley Yard;
  - (v) Connecting Track: links Yard Track to Mainline Track; and
  - (vi) Spur Track: Track that branches off the Trillium Line Extension Mainline Track as a secondary Track either for the Airport Link or for allowing for the delivery of freight service to the NRC connection.

### **3.4 General Requirements**

- (a) Project Co shall provide Trackwork that is compatible with the Revenue Vehicle wheel profile and back-to-back gauge identified in Schedule 15-2, Part 8 - Vehicles and that can accommodate Freight traffic.
- (b) Project Co shall provide Trackwork that permits diverging route speeds consistent with Schedule 15-2, Part 1, Article 3 - Operational Performance Requirements.
- (c) Project Co shall provide Trackwork that is durable for more than or equal to the Design Life identified in Schedule 15-2, Part 1, Article 4 – Design and Construction.
- (d) Project Co shall provide Trackwork to meet the requirements identified in Schedule 15-3 - Maintenance and Rehabilitation Requirements.
- (e) Project Co shall provide Trackwork that is safe, efficient and allows continuous Operation under all operating conditions.
- (f) Project Co shall provide Trackwork that performs safely and efficiently under all local, Site-specific climatic and environmental conditions.

- (g) Project Co shall provide for the coordination of Trackwork with conduits, cabling, duct banks, raceways, wayside equipment, and Track-mounted equipment for associated S&TCS, communications, electrical, and other systems.
- (h) A Trackwork Design and Construction Test Plan shall be submitted by Project Co in accordance with Schedule 10 – Review Procedure.
- (i) Track Gauge and Cant
  - (i) Project Co shall provide 1435mm Track gauge on tangent Track.
  - (ii) Project Co shall provide rail cant for Special Trackwork that is compatible with Mainline Track and/or includes appropriate transitions.
- (j) Project Co shall set the criteria for total and differential post-construction settlements along the Track bed to satisfy the requirements of Clauses 3.10, 3.11 and 3.12 of this Part 2.
- (k) Track Loading
  - (i) Project Co shall provide Trackwork to accommodate the vertical, horizontal and longitudinal loading from the Freight Vehicles, Revenue Vehicles and Maintenance Vehicles, without exceeding permissible stress limits of the elements comprising the Track system or Track subgrade.
  - (ii) Project Co shall incorporate loading arising from thermal stress within the rail, based on the rail temperature range for local climatic and environmental conditions, into the Track system design, including allowance for heating due to direct sunlight exposure and extreme cold.
- (l) Corrosion Control
  - (i) Project Co shall protect all Track components from corrosion in accordance with the requirements outlined in Schedule 15-2, Part 3, Article 11 - Corrosion Control.
  - (ii) Project Co shall provide reinforcing steel compliant with structural grounding requirements identified in Schedule 15-2, Part 3, Article 11 - Corrosion Control, and compliant with ACI 318M and AREMA Chapter 8 requirements.
  - (iii) Project Co shall provide Trackwork that ensures the rail and fasteners are electrically insulated from ground.
  - (iv) Electrical Continuity of Rail

- A. Project Co shall ensure rail electrical continuity and rail bonding are in accordance with the requirements identified in this Article.
- B. Project Co shall ensure that the rails shall be electrically bonded at locations requiring bolted rail joints. Otherwise all rail shall be CWR meeting AREMA requirements.
- C. Project Co shall provide rail bonding compliant with the standards identified in AREMA Chapter 33 Part 7 and Chapter 4 Section 3.7.

### **3.5 Track Structure Types**

**(a) General**

- (i) Project Co shall provide Track to support and hold the rails in place to the correct alignment, profile, cross level, and Track gauge.
- (ii) Project Co shall provide Track compliant with NFPA 130 requirements for trainways.
- (iii) Project Co shall coordinate the placement of Track fastener assemblies and ties with the location of deck or slab steel reinforcement, rail joints, Track-mounted equipment, and wayside equipment.
- (iv) Project Co shall provide any of the following permitted Track types for at-grade locations or elevated Guideways, subject to additional conditions in this Clause 3.5:
  - A. direct fixation; or,
  - B. ballasted.

**(b) Direct Fixation Track**

- (i) Project Co shall provide DF Track as an open Track form consisting of a resilient, elastic DFF system anchored into a concrete foundation slab or elevated Structure deck.

**(c) Ballasted Track**

- (i) Project Co shall provide ballasted Track as an open Track form consisting of a resilient, elastic fastening system and concrete, composite, or timber ties.
- (ii) Ballasted Track shall be permitted for use provided that:

- A. At Roadway crossings only fully planked, timber, asphalt concrete or solid rubber planking will be accepted. Gravel or filled crossing surfaces shall not be permitted;
  - B. Vehicle clearance envelope for ballasted Track is applied;
  - C. Guideway fits within prescribed property limits; and,
  - D. NFPA 130 requirements are satisfied.
- (iii) Material Requirements
- A. Crushed stone or other material shall conform to AREMA ballast specifications, with evidence of previous approval on a similar or heavier rail type system within the last 5 years provided to the City.
  - B. The particle size requirements shall conform to AREMA requirements in relation to the crushed stone ballast, class number 4A.
  - C. Project Co shall provide ballast gradation with sufficient voids to permit water to migrate freely.
  - D. Project Co shall provide sub-ballast compliant with the requirements found AREMA Chapter 1 Part 2.
  - E. Project Co shall provide for ballast resistivity of not less than 3000 ohm-metres.

### **3.6 Rail Configurations**

- (a) Project Co shall, as necessary, coordinate the following rail configurations with Track structure types. Project Co may consider the principles identified in TCRP Report 155.
- (b) Rail/ 115 lb RE Rail
  - (i) Supply rail that meets:
    - A. AREMA Volume 1, Chapter 4, Part 2; and
    - B. ASTM A1.
- (c) Restraining Guard Rail
  - (i) All running rail and guard rail for Track shall be new and shall conform to the associated AREMA specifications.

- (ii) Application:
  - A. Project Co shall install restraining rails along the gauge side of the low rail based on Revenue Vehicle requirements related to negotiating short radius mainline horizontal curves.
  - B. Restraining rail shall be electrically isolated from running rail in order to maintain broken rail protection as per Schedule 15-2, Part 3 - Systems.
  - C. Restraining rail may use bolted joints to avoid difference in thermal stress level between the restraining rail and adjacent CWR running rail.
- (d) Emergency (Steel Inner) Guard Rail
  - (i) Emergency Guard Rail shall be provided at location where it is important to prevent a derailed Train from traveling more than a few inches from the running rails. Emergency Guard Rails shall be installed at retained embankments, on approached to Tunnel portals, near Overhead Structure abutments and at location where a derailed Train would likely impact critical non-transit facilities such as high tension power line poles.
  - (ii) Project Co shall provide Emergency Guard Rail at the following DF and ballasted Track locations where structural lateral restraints capable of containing a derailed Train within the Guideway are not present:
    - A. Adjacent (within Train car length) to pier of column;
    - B. Track is on embankment near the top of retaining walls where the top of rail is a minimum of 600mm above the surrounding grade, or other value agreed upon by Project Co and the City;
    - C. Track is located on a Bridge or an aerial Structure;
    - D. At approaches to obstructions or other adjacent Structure.
  - (iii) Project Co shall provide Emergency Guard Rail that:
    - A. On Mainline Tracks extends 30m ahead of the beginning of the Bridge Structure or area being protected on the approach end, and 15m beyond the end of the protected Structure on the departure end.
  - (iv) Emergency guard rail shall not be required on Tracks where structural lateral restraints occur and are strong enough to contain a derailed Vehicle.

- (v) Project Co shall provide lateral structural restraints capable of containing a derailed Train within the Guideway.

### **3.7 Track Materials**

- (a) General

- (i) Project Co shall provide Rail/ 115 lb RE Rail that meets:
  - A. AREMA Volume 1, Chapter 4, Part 2; and
  - B. ASTM A1.
- (ii) Head- Hardened Rail (High-Strength) :
  - A. Shall comply with the requirements of AREMA, Chapter 4.
  - B. Shall be used on 500m radius or lower.
  - C. Shall be used on vertical gradients steeper than 4.0%.
  - D. Shall be used in Special Trackwork sections.

- (b) Rail

- (i) General
  - A. Project Co shall provide running rail as CWR in accordance with AREMA Chapter 4 Section 3.11, and Chapter 5 Part 4 and Part 5 standards.
  - B. Project Co shall provide all new rail that has undergone mill scale removal.
  - C. Project Co shall provide new rail that has a profile as per the Existing Trillium Line current implemented rail.
- (ii) Restraining Guard Rail
  - A. Project Co shall provide restraining rail based on vehicle integration.
- (iii) Emergency (Steel Inner) Guard Rail
  - A. Worn/used rail may be used for Emergency Guard Rails, provided it is free from strength-impairing defects. All Emergency Guard Rail used on the Project shall be the same section and rail drilling. Project Co shall

consider undercar clearances and rail wear limits when determining the vertical position of Emergency Guard Rail.

B. Emergency guard rail shall be electrically isolated from the running rail.

(c) Track Fasteners

(i) General

A. All new Track fasteners shall have Design Life as identified in Schedule 15-2, Part 1, Article 4 – Design and Construction.

B. Project Co shall provide the new Track fasteners as a Track fastening system(s) that:

- i provides vertical and lateral stability to the rail;
- ii distributes loadings to the Track substructure;
- iii resists longitudinal CWR forces due to thermal, acceleration and braking forces;
- iv prevents rail buckling under all climatic and environmental conditions;
- v resists corrosion and electrically insulates the rail from ground;
- vi absorbs vibration energy in order to attenuate noise and vibration and reduce Track substructure loading;
- vii are of a standardized elastic, resilient, self-tensioning type that applies a constant toe load to the rail under all service conditions;
- viii permits the removal and re-installation of the rail vertically without loss of Track fastener function;
- ix are easily installed and removed by one person with standard hand tools;
- x are capable of being removed and reinstalled without loss in toe load, stiffness, or other performance properties;
- xi are compatible with the Revenue Vehicle dynamic envelope and clearances; and,

- xii complies with the criteria identified in Article 4 - Structural Design Criteria and Requirements, of this Part 2.
- (d) Timber ties
  - (i) Project Co shall provide timber ties made from hardwood that shall conform to the requirements of Chapter 30, Part 3 of the AREMA Manual for Railway Engineering.
- (e) Composite ties
  - (i) Project Co shall provide composite ties that conform to the requirements of Chapter 30, Part 5 of the AREMA Manual for Railway Engineering.
- (f) Concrete ties
  - (i) Project Co shall provide concrete ties that shall conform to the requirements of Chapter 30, Part 4 of the AREMA Manual for Railway Engineering.
- (g) Direct fixation plates
  - (i) Project Co shall provide DF plates that:
    - A. are typically used in ballastless Track designs that include concrete base slabs and/or concrete plinths;
    - B. shall incorporate elastomeric elements that permit a controlled amount of vertical deflection under dynamic loads; and,
    - C. shall be secured with anchor bolts and inserts that provide adequate resistance to lateral and vertical forces from Train movements.
- (h) Track Type Transitions
  - (i) Project Co shall design and construct transition sections to facilitate a gradual change in Track stiffness, where Track structure type changes occur. Transition section lengths shall be a minimum of 30m unless otherwise directed by the City.
- (i) Rail Joints
  - (i) Insulated Joints
    - A. Project Co shall provide insulated rail joints wherever it is necessary to electrically isolate contiguous rails from each other in order to comply with Track signalling criteria.

- B. Project Co shall determine the need for and the positioning of insulated rail joints based on coordination with the S&TCS requirements and in compliance with applicable AREMA standards and good industry practice.
  - C. Project Co shall provide bonded insulated joints compliant with the requirements of AREMA Chapter 4 Section 3.8 or equivalent, where insulated rail joints are required.
- (ii) Welded Joints
- A. General
    - i Project Co shall provide no holes in the rail located within a minimum of 150mm of the weld location, including for temporary bolted locations.
  - B. Flash-Butt Welds
    - i All CWR shall be welded by means of electric flash-butt method compliant with the requirements of AREMA Chapter 4 Section 3.10. Electrical flash-butt welds shall be used for all running rail connections consistent with CWR practice. Rail shall be welded into the longest strings practical during Construction.
  - C. Thermite Welds
    - i Project Co shall perform the thermite welding method compliant with the requirements of AREMA Chapter 4 Section 3.13 or CEN EN 14730, where impossible to weld rail joints by means of flash-butt welding.
- (iii) Bolted Joints
- A. Standard bolted joints shall not be installed in Mainline Track. Bolted Joints are acceptable as a temporary condition only.
  - B. Project Co shall provide bolted joints with standard diameter holes and standard hole-spacing for the rail type.
  - C. Project Co shall provide bolted rail joint components compliant with the requirements identified in AREMA Chapter 4 or equivalent standard for 115lb RE rail.
- (iv) Rail Expansion Joints

- A. Project Co shall determine the need for rail expansion joints at elevated Structures due to thermal and longitudinal rail stresses based on rail-to-structure interface analysis.

### 3.8 Special Trackwork

- (a) Special Trackwork refers to all rail installations where Tracks converge, diverge or cross. Standard Trackwork is made simply from rolled rails of a constant cross-section, while rails in several Special Trackwork components are cast or machined and have cross-sections that vary along their length.
- (b) General
  - (i) Turnout materials shall be in general accordance with AREMA or approved equals;
  - (ii) Special Trackwork shall include running surfaces of castings machined to conform to the cross-section of 115lb RE rail;
  - (iii) Special Trackwork shall include running surfaces, flangeways and guarded dimensions that are compatible with the Revenue Vehicle wheels and back-to-back gauge dimensions;
  - (iv) Special Trackwork that is installed at locations with sensitive receptors as indicated in Schedule 17 - Environmental Obligations shall include appropriate “service-proven” mitigation measures;
  - (v) Project Co shall provide the following minimum required operational Track facilities:
    - A. crossovers, turnouts, Storage Tracks and Special Trackwork at locations necessary to comply with the operational requirements identified in Schedule 15-2, Part 1, Article 3 - Operational Performance Requirements while providing maximum redundancy and minimizing single points of failure;
    - B. Tail Tracks and crossovers at Terminal Stations sufficient to facilitate the reversing of trains, accommodate safe braking distance as defined in Schedule 15-2, Part 3, Article 10 – Signalling and Train Control System, and maximize approach speeds;
    - C. inline failure management crossovers comprising single crossovers, double crossovers, and three-Track storage crossovers;
    - D. scissors crossovers or universal crossovers at the following Stations:

- i South Keys; and,
    - ii Bayview.
  - E. storage crossovers at the following Stations:
    - i South Keys.
- (vi) Project Co shall provide turnouts located on Mainline Track that:
  - A. employ standard lateral turnout geometries and straight frogs;
  - B. route mainline traffic through the tangent side of the turnout at inline locations. Routing mainline traffic through the diverging side of turnouts shall be permitted at Terminal Station locations only; and,
  - C. comply with the operational requirements identified in Schedule 15-2, Part 1, Article 3 - Operational Performance Requirements and maximize approach speeds.
- (vii) Project Co shall provide Special Trackwork layouts:
  - A. comprised of a constant Track structure type located entirely within a constant Guideway structure type;
  - B. located clear of road vehicle and pedestrian intersections and crossings;
  - C. located clear of elevated Structures unless structural lateral restraints are present that are capable of containing a derailed Train; and,
  - D. adjacent to a safe walkway compliant with NFPA 130 requirements in order to accommodate an Operator Driver walking the full length of a 3-Revenue Vehicle Train at Storage Track locations and at turnback locations if not located at a Platform. The safe walkway shall be located clear of the Vehicle dynamic envelope if the Operator is exposed to an adjacent live Track.
- (c) Special Trackwork Components
  - (i) Project Co shall design and construct all mainline turnouts to include flangeways that can accommodate both freight and the Revenue Vehicles.
  - (ii) Project Co shall design and construct all mainline Special Trackwork to be boltless welded manganese frogs (conformal frogs).

- (iii) Project Co shall design and construct all new yard Special Trackwork to utilize RBM frogs as well as conformal frogs.
  - (iv) Project Co shall design and construct all mainline and yard Special Trackwork to be equipped with either plate rollers or point rollers installed on concrete ties with heaters.
- (d) End-of-Track Protection Devices
  - (i) Project Co shall provide end-of-Track shock-absorbing devices for use at Terminal Station Tracks. These devices shall be mounted near the end of the Track at Bayview Station, Airport Station and Limebank Station. These devices shall be located to prevent the Train from running over any pedestrian path located adjacent to the end of Track or running off of the elevated Guideway;
  - (ii) End-of-Track shock-absorbing devices shall meet the following criteria:
    - A. suitable for permanent exterior exposure;
    - B. be capable of stopping an unoccupied Train travelling at 10km/hr;
    - C. engage the vehicle symmetrically about the coupler at bumper height;
    - D. have a cushioned face and not produce any damage to a Vehicle at Vehicle speeds less than 5km/hr. Project Co shall coordinate the design of the stopping device to ensure engagement to the car is adequate to prevent damage; and,
    - E. meet requirements as outlined in Schedule 15-2, Part 3, Clause 10.2 (p).
- (e) Wheel/Rail Friction Control
  - (i) Project Co shall provide wheel/rail friction control measures in locations consistent with the practices identified in AREMA Chapter 5 Section 5.9, Chapter 4 Section 4.11, CEN EN 15427, and TCRP Report 71 Volumes 1 and 4.
  - (ii) Project Co shall provide lubricant selection and application aimed at minimizing loss of traction.
  - (iii) Project Co shall provide lubricators capable of adjusting lubricant application based on Site-specific conditions.
  - (iv) Project Co shall provide space within the Guideway for lubricator cabinets, tubing, ancillary equipment, and Maintenance access. Project Co shall protect tubing from impact damage.

### 3.9 Track Commissioning Tests

- (a) Project Co shall complete and submit the following minimum verification tests of Track installation to the City, in accordance with Schedule 10 – Review Procedure prior to Revenue Service:
  - (i) Track geometry assessment by automated self-propelled measuring equipment;
  - (ii) Track clearances measurement;
  - (iii) Revenue Vehicle Platform clearances (horizontal and vertical) measurements;
  - (iv) Track rail profile assessment measurement;
  - (v) Ultrasonic Rail Flaw Detection assessment; and,
  - (vi) Revenue Vehicle ride quality measurement for end-to-end Vehicle operation of the New Vehicle Fleet and Existing Vehicle Fleet across the entire alignment. Project Co shall provide a custom test procedure to demonstrate that interior Vehicle vertical and lateral accelerations across the alignment meet appropriate Passenger comfort criteria and Operator comfort criteria for both Vehicle types.

### 3.10 Track Measurement and Assessment Standards

- (a) Project Co shall implement the following Track measurement and assessment standards:
  - (i) Track parameters based on vehicle integration as follows:
    - A. Track gauge limits measured against construction tolerances of  $\pm 3\text{mm}$ ;
    - B. cross level and superelevation measured against construction tolerances of  $\pm 3\text{mm}$  from design values;
    - C. horizontal curve and spiral alignments compliance with design for radii and lengths;
    - D. relative horizontal alignment measured against construction tolerances of  $\pm 3\text{mm}$  in a 20m chord from design values; and,
    - E. relative vertical alignment measured against construction tolerances of  $\pm 3\text{mm}$  in a 20m chord from design values.
  - (ii) Track clearances compliant with the criteria in this Part 2;
  - (iii) Revenue Vehicle clearance to Platforms compliant with the criteria defined in Schedule 15-2, Part 4, Article 2 - Architectural Design Criteria;

- (iv) Revenue Vehicle ride quality compliant with the criteria defined in Schedule 15-3, Appendix B, Article 4.0, Table 4.1 b, with resulting noise and vibration not to exceed the limits imposed by City Bylaws or Schedule 17 – Environmental Obligations. Ride quality shall be measured across the complete alignment; and,
- (v) rail defect criteria, prioritization, and remedial action compliant with EN 13146 or APTA Standard for Rail Transit Track Inspection and Maintenance.

### **3.11 Track Measurement and Assessment Methodology**

- (a) Project Co shall complete verification of Track geometry by means of a Track geometry measuring vehicle in accordance with AREMA Chapter 2 Part 1 practices.
- (b) Project Co shall complete verification of Track clearances by means of a Track clearance measuring system in accordance with AREMA Chapter 2 practices.
- (c) Project Co shall complete verification of rail profile measurements by means of a rail measuring system in accordance with AREMA Chapter 2 Part 2 practices.
- (d) Project Co shall complete verification of rail defects by means of an ultrasonic rail flaw detection system in accordance with practices identified in AREMA Chapter 4, Part 4 and Part 5.
- (e) The scheduled frequency of Track measurement and assessment activities shall comply with the following criteria:
  - (i) Schedule 15-3 - Maintenance and Rehabilitation Requirements, applicable to visual Trackwork and CWR inspections; and,
  - (ii) automated Track geometry inspections by self-propelled equipment compliant with AREMA or EN standards four times per year as evenly distributed as possible to make allowances for inclement weather.

## ARTICLE 4                      STRUCTURAL DESIGN CRITERIA AND REQUIREMENTS

### 4.1        Scope

- (a)     This Article governs the design and construction for Bridges, Elevated Guideways, at-grade Guideways, portal walls, Culverts, retaining walls, pole bases and other Structures not included elsewhere.
- (b)     Stations and Ancillary Facilities shall be in accordance with Schedule 15-2, Part 4 - Stations.

### 4.2        Reference Documents

- (a)     The codes, standards and references indicated in this clause shall be utilized for the design and construction of the Structures indicated in this Article, except as explicitly indicated in other articles. The structural design shall conform to the most current edition of the following codes and standards. If the criteria sources conflict, unless otherwise noted, the following shall apply in descending order of precedence:
  - (i)     Applicable laws and regulations;
  - (ii)    Specific obligations and Design Criteria identified in this Part 2;
  - (iii)   Pedestrian and Roadway Structures:
    - A.     CAN/CSA-S6 Canadian Highway Bridge Design Code; and Exceptions to the Canadian Highway Bridge Design Code CAN/CSA-S6 for Ontario;
    - B.     City of Ottawa Standard Tender Documents for Unit Price Contracts;
    - C.     MTO Structural Manual;
    - D.     OPSS; and,
    - E.     OPSD.
  - (iv)   Vehicle Guideway Structures:
    - A.     AREMA Manual for Railway Engineering, hereinafter referred to as AREMA;
    - B.     CAN/CSA-S6 Canadian Highway Bridge Design Code; and Exceptions to the Canadian Highway Bridge Design Code CAN/CSA-S6 for Ontario;
    - C.     City of Ottawa Standard Tender Documents for Unit Price Contracts;

- D. MTO Structural Manual;
- E. OPSS; and,
- F. OPSD.
- (v) Freight Guideway Structures:
  - A. AREMA;
  - B. Transport Canada Standards Respecting Railway Clearances (TC E-05);
  - C. CAN/CSA-S6 Canadian Highway Bridge Design Code; and Exceptions to the Canadian Highway Bridge Design Code CAN/CSA-S6 for Ontario;
  - D. City of Ottawa Standard Tender Documents for Unit Price Contracts;
  - E. MTO Structural Manual;
  - F. OPSS; and,
  - G. OPSD.
- (vi) MTO Design Supplement for TAC Geometric Design Guide for Canadian Roads;
- (vii) MTO Roadside Safety Manual;
- (viii) CAN/CSA A23.3 Design of Concrete Structures;
- (ix) CAN/CSA A23.1 Concrete Materials and Methods Construction;
- (x) CAN/CSA A23.2 Test Methods and Standard Practices for Concrete;
- (xi) CAN/CSA S16 Design of Steel Structures;
- (xii) CAN/CSA G40.20-04/G40.21-04 General Requirements for Rolled or Welded Structural Quality Steel/Structural Quality Steel;
- (xiii) MTO Reports and Guidelines; and,
- (xiv) TAC Geometric Design Guide for Canadian Roads.

#### **4.3 General Requirements**

- (a) Roadway and pedestrian Structures shall be designed by the limit states design method in accordance CAN/CSA S6.

- (b) Guideway Structures shall be designed in accordance with AREMA. Live loads shall be as specified in Clause 4.5 of this Part 2. The design of all Guideway Structures shall also consider loads and space requirements due to system-wide elements such as signalization, communication equipment and electrification, for the future Expanded Trillium Line LRV.
- (c) The loading criteria to which the Structures are designed shall appear on the Structural drawings. When required by design conditions, concrete placing sequence shall be indicated on the drawings or in the supplementary conditions.
- (d) Minimum clearance requirements
  - (i) New Overhead Structures and existing Bridge Structures being modified to Overhead Structures shall span:
    - A. The Guideway;
    - B. Emergency access walkways; and,
    - C. The minimum Vehicle clearance in accordance with Clause 2.12 of this Part 2.
  - (ii) New Guideway Structures and existing Bridge Structures being modified to Guideway Structures shall have a Structure width to allow for:
    - A. The Guideway;
    - B. Emergency access walkways; and,
    - C. The minimum Vehicle clearance in accordance with Clause 2.12 of this Part 2.
  - (iii) The minimum vertical clearance for Overhead Structures shall be in accordance with Clause 2.12 of this Part 2.
  - (iv) The minimum vertical clearance for new Guideway Structures over Roadways shall be in accordance with the MTO Design Supplement for TAC Geometric Design Guide for Canadian Roads.

#### **4.4 Design Requirements**

- (a) Pedestrian and Roadway Structures
  - (i) Seismic Design

- A. New Bridge Structure shall be designed to meet importance category “Other”.
- B. PBD approach in accordance with CAN/CSA S6 shall be used for all new Bridge Structures.
- C. New Bridge Structures shall be analyzed for design earthquake loads for all three return periods and damage states in accordance with CAN/CSA S6.
- D. Seismic design for buried Structures and retaining walls shall be as per CAN/CSA S6.
- E. Table 2-4.1 summarizes the design approach, return period and performance requirements.

**Table 2-4.1: Design Approach, Return Period and Performance Requirements**

Seismic Design Summary	
Design Approach	PBD
Seismic ground motion probability of exceedance in 50 years (return period)	2%, 5% and 10% (2475yrs, 975yrs, and 475yrs)
Performance Level and Criteria	As per CAN/CSA S6

- (ii) Collision Protection for Overhead Structures which provide freight clearance under the Structure shall meet the collision requirements as specified in AREMA.
- (iii) Collision Protection for Overhead Structures which do not provide freight clearance under the Structure shall meet the following requirements:
  - A. Piers supporting new and existing Bridges over the alignment and with a clear distance of less than 6m from the centerline of a Track shall be of heavy construction or shall be protected by a reinforced concrete crash wall.
    - i Crash walls shall have a minimum height of 1200mm above the TOR. The crash wall shall be at least 600mm thick and at least 3.5m long. When two or more columns compose a pier, the crash wall shall connect the columns and extend at least 900mm beyond the outermost columns parallel to the Track. The crash wall shall be anchored to the footings and columns, if applicable, with adequate reinforcing steel and shall extend to at least 1200mm below the lowest surrounding grade.

- ii Piers shall be considered of heavy construction if they have a cross sectional area equal to or greater than that required for the crash wall and the larger of its dimensions is parallel to the Track.
  - (iv) Vibration and deflection control for pedestrian Structures shall be in accordance with CAN/CSA S6 and the MTO Structural Manual.
- (b) Guideway Structures
  - (i) Seismic Design
    - A. Seismic design of new Guideway Structures shall be in accordance with AREMA.
    - B. The seismic evaluation of existing Guideway Structures shall be in accordance with AREMA and shall use the return periods specified in Table 2-4.2. The seismic evaluation of existing buried structures is not required.

**Table 2-4.2: Return Period (in Years) for Existing Guideway Structures**

	<b>SN055350</b> Hunt Club Bridge	<b>SN055900</b> Walkley Yard Lead	<b>SN055910</b> Rail Bridge over Transitway			<b>SN015290</b> Rideau River
Serviceability Limit States Return Period	92.5	90.6	90.6			92
Ultimate Limit States Return Period	312.5	260	267.5			312
Survivability Limit States Return Period	1910	1577.5	1857.5			1910

- C. When background information required to undertake a seismic analysis of a Structure is incomplete, Project Co Shall obtain additional information via field measurement, exploratory removals, sampling and material testing.
    - (ii) Structure support elements shall withstand the collision load in accordance with Clause 4.5 of this Part 2.
    - (iii) Vibration and Deflection Control shall be in accordance with AREMA.

- (c) New or existing Guideway Bridges shall be designed or modified such that rehabilitation work can be performed while maintaining a minimum of one Track. New or existing Roadway Bridges shall be designed or modified such that rehabilitation work can be performed while maintaining a minimum of two traffic lanes, bicycle lanes and one sidewalk, as applicable.
- (d) The structural capacity and the condition of existing Structures being modified to carry future electrified Vehicle, Vehicle and freight loading or subject to Project Co Construction Activities shall be assessed and confirmed in coordination with the Governmental Authorities. Project Co shall perform any repairs or strengthening required to accommodate the applicable vehicle loading or Construction Activities.
- (e) Project Co shall note all Design Criteria, including geotechnical and condition survey information, to which the Structures are designed on submissions and/or the structural drawings.
- (f) Design of new Structures which are interfacing with existing Structures shall be coordinated with the owners and shall comply with the design and construction requirements of the Governmental Authorities. Environmental, hydrology and hydraulic studies shall be performed to address all immediate and long-term impacts and issues for Culverts and all Bridges, including Elevated Guideways, over water in coordination with the Governmental Authorities, and the design shall comply with the requirements of the Governmental Authorities.
- (g) Access to steel girders for inspection purposes shall be incorporated into the design, including devices/system to enable inspectors to walk along all girders and tie-off safely.
- (h) All new Bridges, Elevated Guideways and at-grade Guideways shall meet NFPA 130 requirements. Emergency walkways on Guideway Structures and under Overhead Structures shall meet the requirements of Clause 1.3 of this Part 2.
- (i) Noise and vibration measures and control shall comply with the requirements of Schedule 17 – Environmental Obligations.
- (j) Aesthetic Design
  - (i) All new Structures shall meet the requirements of the MTO Aesthetic Guidelines for Bridges, supplemented by the additional requirements of this Article. All references in the MTO Aesthetics Guideline to Ministry Bridge Aesthetics Evaluation Group or MBAEG shall be replaced with the City. The aesthetic design review process and approval procedures as detailed in Chapter 11 of the MTO Aesthetic Guidelines for Bridges are not applicable to this project. Chapter 11 of the MTO Aesthetic Guidelines for Bridges shall be considered deleted in its entirety.

- (ii) The Bridge Aesthetic Level and Classification for new Structures shall be as specified in Appendix C of this Part 2.
- (iii) The aesthetic design of Level One Bridges (High Aesthetic Classification) shall be subject to City review and approval. Project Co shall prepare and submit an Aesthetic Design Report in accordance with Schedule 10 – Review Procedure for all Level One Structures. The Aesthetic Design Report shall:
  - A. Be signed by the Design Architect.
  - B. Document the Architect's consideration of the following aesthetic design principals, as defined in the MTO Aesthetic Guidelines for Bridges, and how each of the aesthetic design principals were successfully addressed in the preliminary bridge design:
    - i Functional clarity – The size and shape of each primary element shall be appropriate for its respective structural task and the form of the Structure should truthfully and clearly express the loads that are being carried and transferred to the ground.
    - ii Economy and simplicity – The number of materials, textures, colours and architectural features should be kept at a minimum without becoming visually monotonous and should be applied consistently to provide a continuity of appearance.
    - iii Scale and proportion – The Structure shall be designed to minimize the overall dimensions of elements and shall appear in scale with its surroundings.
    - iv Harmony and visual balance – The Structure exhibits visual balance amongst its component part as well as with its surroundings.
    - v Contrast and complexity – The design of the Structure shall introduce complexity as a means of relieving visual monotony without the use of excessive eye-catching elements, colours or superfluous decoration.
    - vi Enduring visual quality, with a focus on surface finishes – The Structure shall be designed and constructed to ensure the quality and durability of base materials in order to achieve a lasting positive visual effect.
    - vii Integration with context – The Structure shall be designed to make a positive aesthetic contribution to its physical setting.

- C. Include drawings of Bridge alternatives, details of specific aesthetic enhancements and 3D computer renderings of the proposed Structure viewed at perspective angles. Renderings shall be inclusive of the surrounding context.
- (iv) Level Three Bridges (Low Aesthetic Classification) shall not be subject to aesthetic design approval by the City. Submission of Aesthetic Design Report shall not be required for Level Three Bridges (Low Aesthetic Classification).
- (v) There are no Level Two Bridges (Medium Aesthetic Classification) on this Project.
- (vi) Chain link fencing shall not be used on pedestrian Structures.
- (i) Project Co shall detail and protect the structural steel-to-concrete interface in a way that no rust staining of the concrete occurs.
- (k) Durability
  - (i) New Structures shall be designed to attain the indicated Design Life as detailed in Schedule 15-2, Part 1, Article 4 – Design and Construction. Time dependent design calculations, including corrosion, creep and fatigue shall be based on indicated Design Life.
  - (ii) Time dependent design calculations for modified existing Structures, shall take into account the age and condition of the Structure.
  - (iii) Fatigue cycles for Guideway Structures shall be a minimum 15,000,000 cycles for peak period Trains of 120m to 150m length.
  - (iv) Structures shall be designed to protect against atmospheric corrosion, soil corrosion and stray current corrosion in accordance with Schedule 15-2, Part 3, Article 11 – Corrosion Control.
  - A. New steel girder Structures over and adjacent to highways or exposed to salt spray shall be steel box girders.
  - B. Waterproofing shall be required for all Structure decks. The top of the existing and new concrete Structures shall be waterproofed as per applicable standards. Where DF is utilized, a waterproofing technology compatible with DF shall be applied. In-situ testing and warranties shall be required.

- C. Steel piles shall not be used in corrosive ground water. Precast concrete piles may be used under these conditions, if specified with sulphate resisting cement.
- (v) Where technically feasible, new Bridges shall be designed with integral or semi-integral abutments.
- (l) A depressed approach slab shall be provided at all transitions between Track slab or Bridge decks with DFF and tie and ballast Track. Approach slabs shall be waterproofed.
- (m) Approach slabs shall be designed and constructed for all new Structures supporting highway loads. Approach slabs shall be waterproofed.
- (n) Drainage
  - (i) All Structures shall include provision for drainage in accordance with Article 5 – Drainage and Stormwater Management Design Criteria, of this Part 2.
  - (ii) Joints shall be detailed to allow longitudinal conveyance of runoff without leaking at the joints.
  - (iii) Drain pipes shall be external to the concrete.
  - (iv) Drainage from Structures within RVCA or SNCA Regulated Flood Plains shall be in accordance with Article 5 – Drainage and Stormwater Management Design Criteria, of this Part 2 and requirements of Governmental Authorities within whose jurisdiction the Structures are located.
  - (v) Drainage pipes shall not reduce the vertical and horizontal clearance of existing Structures.
  - (vi) Catch basins shall not be located within the approach slab area.
- (o) Ductbanks
  - (i) Ductbanks shall be provided as necessary for systems and Operation conduits, including pull boxes and access to connecting devices.
  - (ii) The design of ductbanks at existing Structures shall with the requirements of the Governmental Authorities.
  - (iii) Services carried through or under Bridges shall be located as per the requirements of the MTO Structural Manual.
- (p) Design of Retaining Structures

- (i) A drainage layer shall be provided behind the wall to mitigate the build-up of hydrostatic pressure, where Structures are designed as drained. Both the water pressure and the lateral soil pressure shall be considered in the design.
  - (ii) MSE walls and MSE true abutments shall not be utilized as the primary support paths for Bridge beams and girders.
  - (iii) Earth retaining Structures whether temporary or permanent greater than 3m in height shall be designed on the basis of specific soils information relating to the backfill material. Such walls shall be analyzed using a recognized numerical design method accounting for the rigidity or flexibility of the soil-structure interaction.
- (q) Demolition and Restoration
- (i) Demolition and restoration shall be as per Schedule 15-2, Part 1, Article 13 – Demolition, Removals and Disposal in addition to the provision contained in this Clause.
  - (ii) The condition of the existing Structures within the Project ZOI of the demolition shall be surveyed and recorded with the cooperation of the owners of the Structures affected and the Governmental Authorities. The condition of Structures to be demolished shall not be required to be surveyed and recorded.
- (r) Project Co shall provide pedestrian, bicycle or combination barrier in accordance with CAN/CSA S6 on all new and existing Roadway and pedestrian Structures, where applicable.
- (s) Any structural work or upgrades undertaken by Project Co shall not obstruct existing MUP, sidewalk, Roadway or waterway connections on or under the Structure.

#### **4.5 Loads and Forces**

- (a) Pedestrian and Roadway Structures
- (i) All loads, load factors and load combination shall be determined in accordance with CAN/CSA S6, supplemented and/or modified to meet the requirements of this Clause.
  - (ii) Loads due to horizontal earth pressure and hydrostatic pressure (E) shall be determined in accordance with CAN/CSA S6. Lateral earth pressure shall have a maximum load factor of 1.5 when used for proportioning wall sections of earth retaining Structures.

- (iii) Earthquake (EQ) load shall be in accordance with CAN/CSA S6 and as modified by Clause 4.4 of this Part 2.
- (b) Vehicle Guideway Structures
  - (i) Vehicle Guideway Structures shall be designed to support the following Live Load (L) conditions:
    - A. The Alstom CORADIA LINT 41 is the Existing Trillium Line Revenue Vehicle, a low-floor DMU vehicle with maximum axle loads of 196kN, as shown in Figure 2-4.1.

**Figure 2-4.1:** Alstom CORADIA LINT 41 Vehicle Loading

[REDACTED]

- B. Expanded Trillium Line Revenue Vehicle provided by Project Co based on the selected Vehicle. The Revenue Vehicle shall be selected in accordance with Schedule 15-2, Part 8 – Vehicles.
- C. The Alstom CITADIS SPIRIT shall be considered as the future Expanded Trillium Line LRV. The maximum axle load for this vehicle is 14.9 tonnes (126kN), axel loading and spacing shall be as shown in Figure 2-4.2.

**Figure 2-4.2:** Alstom CITADIS SPIRIT Vehicle Loading

[REDACTED]

- D. Maintenance vehicle live load to be determined and provided by Project Co.
- (c) Freight Guideway Structures
  - (i) Freight Guideway Structures shall be designed to support the following Live Load (L) conditions:
    - A. Cooper E80 loading as specified by AREMA.
    - B. The Alstom CORADIA LINT 41 is the Existing Trillium Line Vehicle, a low-floor DMU vehicle with maximum axle loads of 196kN, as shown in Figure 2-4.1.
    - C. Future Expanded Trillium Line Revenue Vehicle provided by Project Co based on the selected Vehicle. The future Revenue Vehicle shall be selected in accordance with Schedule 15-2, Part 8 – Vehicles.
    - D. The Alstom CITADIS SPIRIT electrical vehicle shall be considered as the future Expanded Trillium Line LRV. The maximum axle load for this vehicle is 14.9 tonnes (146kN), axel loading and spacing shall be as shown in Figure 2-4.2.
    - E. Maintenance vehicle live load to be determined and provided by Project Co.
  - (d) The following load conditions for the future OCS shall be taken into consideration for all Guideway Structures:
    - (i) Wind loading on the OCS shall be considered in the design of both superstructure and substructure elements.
    - (ii) Thermal forces resulting from the temperature variations in the OCS shall be considered. Loads shall be determined in accordance with AREMA unless otherwise determined by Project Co using other established codes of practice.

#### **4.6 Material**

- (a) Material used for the modification, repair and rehabilitation of existing Structures shall be compatible with the existing in-situ material.
- (b) Material selection and/or coating of attached elements shall be used to minimize staining to concrete elements.
- (c) All material for the Structures as identified in this article shall conform to OPSS.

- (d) Earth Retaining Structures
  - (i) Permanent RSS systems located beyond the salt spray zone shall meet, as a minimum, medium performance and low appearance requirements in accordance with MTO RSS Design Guidelines. RSS systems within 10m of a salt spray zone or associated with the Bridge Structure shall meet high performance and high appearance requirements in accordance with MTO RSS Design Guidelines.
  - (ii) Where accessible to Passengers within the Fare Paid Zone, including bus Platform areas and adjacent to public areas at Station entrances, gabion stones at the face of gabion walls shall be sized to prevent removal.
- (e) Concrete
  - (i) Concrete shall conform to OPSS 1350 and City Special Provisions F-9045 and F-9043.
  - (ii) All concrete mixes shall be in accordance with CAN/CSA A23.1.
  - (iii) Concrete strength for Roadway and pedestrian Structures shall be as per the MTO Structural Manual, except for Bridge decks and sidewalks which shall be 35 MPa.
- (f) Reinforcing Steel
  - (i) Reinforcing steel shall meet the material requirements as defined in OPSS 905 and OPSS 1440.
  - (ii) Minimum reinforcement designation shall be 15M.
  - (iii) Welded splices or joints in reinforcing steel shall not be permitted. Welding for purposes of bonding and grounding continuity is permitted.
  - (iv) Couplers shall not be permitted in plastic hinge zones.
  - (v) No splices shall be permitted in plastic hinge zones for substructure components.
  - (vi) Premium reinforcing for Roadway and pedestrian Structures shall be used where required in accordance with the MTO Structural Manual.
  - (vii) Premium reinforcing for Guideway Structures shall be used in:
    - A. Guideway plinths that may be subject to de-icing salts, such as adjacent to Platforms; and,

- B. Substructure elements that are located within the splash zone of Roadways treated with de-icing salts. Parking lots will not be considered a splash zone.
- (viii) Where electrical continuity is required for managing stray currents, weldable reinforcement and suitable welding shall be used.
- (ix) Epoxy coated reinforcing shall be used in accordance with Schedule 15-2, Part 3, Article 11 – Corrosion Control.
- (g) GFRP Reinforcing bars:
  - (i) GFRP reinforcing bar shall only be permitted in barrier and parapet wall applications.
  - (ii) The GFRP reinforcing bars shall conform to the following standards:
    - A. CAN/CSA S806: Design & Construction of Building Structures with Fibre Reinforced Polymer
    - B. CSA S807: Specifications for Fibre Reinforced Polymer
  - (iii) GFRP shall have a minimum modulus of elasticity of 40 GPa.
  - (iv) GFRP shall have a specified minimum tensile strength of 1000 MPa.
  - (v) GFRP shall be type 2 or type 3.
- (h) Prestressing Tendons
  - (i) Internal unbonded post-tensioning tendons shall not be permitted.
  - (ii) External grouted post-tensioning tendons are permitted for segmental Construction and shall be corrosion protected.
- (i) Structural Steel
  - (i) Structural Steel for Roadway and pedestrian Structures shall conform to the material requirements in the MTO Structural Manual.
  - (ii) Structural steel for Guideway Structures
    - A. Superstructure primary members shall be grade 350AT Category 3 for primary plates, girders and rolled section members.

- B. Primary members made from pipe sections shall meet the minimum Charpy impact energy specified in Table 9 of CSA G40.21 for the similar yield strength of steel tested at a Category 3 temperature.
  - C. Secondary steel members shall be grade 350W or 350A.
  - D. ASTM A 588 may be substituted for grade 350A or grade 350AT. ASTM A 588 shall only be substituted for grade 350AT steel when the Charpy impact energy requirements are verified by the submission of test documentation.
- (iii) Steel fabrication companies shall be CWB certified.
  - (iv) The use of uncoated weathering steel shall be in accordance with CAN/CSA S6, based on applicable environmental exposure conditions.
- (j) Deck joint assemblies shall comply with City of Ottawa Special Provision F-9201, including the 5 year warranty period for all New Municipal Infrastructure Structures.
  - (k) Bearings shall comply with City of Ottawa Special Provision F-9221, including the 5 year warranty period for all New Municipal Infrastructure Structures.
  - (l) Corrugated Steel Pipe, regardless of thickness or type, shall not be used for Bridge or Culvert construction.

#### **4.7 Construction**

- (a) Concrete construction shall be in accordance with OPSS 904 and City of Ottawa Special Provision F-9040.
- (b) Precast Prestressed Concrete
  - (i) Construction shall be in accordance with OPSS 909.
  - (ii) Precast members shall not be erected until sample cylinders tested per OPSS 1350 achieve a design 28 day compressive strength.
  - (iii) Precast segmental Bridges shall be constructed in accordance with the requirements of AASHTO's Guide Specifications for the Design and Construction of Segmental Bridges except where it conflicts with CAN/CSA S6.
- (c) Structural steel shall be constructed in accordance with OPSS 906.
- (d) Soffits shall be uncovered and without coatings.
- (e) Bearings shall be uncovered.

- (f) Bolted connections shall have a minimum diameter of 22mm and A325M designation of weathering steel.
- (g) Welded connections – critical welds, such as over supports and midspan, shall be treated as tension splices subjected to more stringent tests (Non-Destructive Testing). Testing schemes shall be submitted by Project Co for review Schedule 10 – Review Procedure.
- (h) Project Co shall not store and/or leave exposed to the environment, prefabricated Bridge decks or partially constructed prefabricated Bridge decks in the Construction staging area during the calendar dates from December 1 to March 30. Prefabricated Bridge decks and partially Constructed prefabricated Bridge decks include Structural steel, reinforcing steel bars and concrete.
- (i) Prefabricated Bridge decks shall be constructed in the designated construction staging area, transported to Site and erected into place in the same construction season.

#### **4.8 Description of Project Structures**

- (a) Structures shall meet the requirements in Schedule 15-2, Part 1, Article 2 – Physical Layout, Clause 2.8 as well as the requirements contained in this Clause.
- (b) Provisions contained in this Clause shall be read in conjunction with Appendix C of this Part 2.
- (c) Project Co shall design and construct the following Works for the Expanded Trillium Line Mainline:
  - (i) Limebank Road Bridge (SN225710)
    - A. Design and construct a new grade separation at Limebank Road to either accommodate the alignment over the Roadway or the Roadway over the alignment. The new Structure shall accommodate:
      - i The Limebank Road cross section in accordance with Clause 6.18 of this Part 2 on the Structure;
      - ii The northbound and southbound Track alignment, including Emergency walkway; and,
      - iii The future Roadway cross section for a collector Roadway and a MUP in accordance with Clause 6.18 of this Part 2.
    - B. Design and construction of a new grade separation that accommodates Limebank Road over the alignment shall:

- i Include the installation of Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7; and,
    - ii Accommodate a collector Roadway on the north side of the Track in accordance with Clause 6.18 of this Part 2.
    - iii Accommodate a future MUP on the south side of the Track corridor in accordance with Clause 6.18 of this Part 2.
  - C. Design and Construction of a new grade separation that accommodates the alignment over Limebank Road shall:
    - i Include the installation of a pedestrian barrier/railing system on each side of the Structure.
    - ii Center piers shall not be permitted.
    - iii Accommodate a collector Roadway on the north side of the track corridor in accordance with Clause 6.18 of this Part 2.
    - iv Accommodate a future MUP connection between the north and south sides of the Track corridor, on the east side of Limebank Road, in accordance with clause 6.18 of this Part 2.
- (ii) Mosquito Creek Rail Bridge (SN225050)
  - A. Design and construct a new Guideway Structure to carry the alignment over Mosquito Creek. The new Structure shall accommodate:
    - i The northbound and southbound Track alignment, including Emergency walkway on the Structure;
    - ii Mosquito Creek and wildlife path under the Structure; and,
    - iii The wildlife path shall provide a minimum clearance envelope of 3m wide by 4m high. The wildlife clearance envelope shall be outside of and unobstructed by the channel that contains the average flow.
- (iii) Bowesville Road Bridge (SN225690)
  - A. Design and construct a new grade separation at Bowesville Road to either accommodate the alignment over the Roadway or the Roadway over the alignment. The new Structure shall accommodate:

- i The Bowesville Road cross section in accordance with Clause 6.18 of this Part 2;
    - ii The northbound and southbound Track alignment, including Emergency walkway; and,
    - iii MUP.
  - B. Design and construction of a new grade separation that accommodates Bowesville Road over the alignment shall:
    - i Include the installation of Bridge Structure fencing in accordance with the requirements in Schedule 15-2 Part 6 Clause 2.7; and,
    - ii Accommodate the MUP under the Structure on the south side of the alignment.
  - C. Design and Construction of a new grade separation that accommodates the alignment over Bowesville Road shall:
    - i Include the installation of a pedestrian barrier/railing system on each side of the Structure;
    - ii Allow for an at-grade MUP crossing with Bowesville Road to the south of the Structure; and,
    - iii Center piers shall not be permitted.
- (iv) Earl Armstrong Bridge (SN225680)
  - A. Design and construct a new grade separation at Earl Armstrong Road to either accommodate the alignment over the Roadway or the Roadway over the alignment. The new Structure shall accommodate:
    - i The Earl Armstrong Road cross section in accordance with Clause 6.18 of this Part 2;
    - ii The northbound and southbound Track alignment, including Emergency walkway under the Structure; and,
    - iii A MUP.
  - B. Design and construction of a new grade separation that accommodates Earl Armstrong Road over the alignment shall:

- i Include the installation of Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7; and,
    - ii Accommodate the MUP under the Structure on the east side of the alignment.
  - C. Design and Construction of a new grade separation that accommodates the alignment over Earl Armstrong Road shall:
    - i Include the installation of a pedestrian barrier/railing system on each side of the Structure; and,
    - ii Allow for an at-grade MUP crossing with Earl Armstrong Road to the east of the Structure.
- (v) High Road Bridge (SN225670)
  - A. Design and construct a new Overhead Structure to carry a MUP and ecological corridor over the alignment. The new Structure shall accommodate:
    - i A MUP and ecological corridor on the Structure; and,
    - ii The northbound and southbound Track alignment, including Emergency walkway under the Structure.
  - B. Configuration of the MUP and ecological corridor on the Structure shall be in accordance with Schedule 15-2, Part 6, Clause 4.4.
  - C. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7.
- (vi) Leitrim Road Bridge (SN225610)
  - A. Design and construct a new grade separation at Leitrim Road to either accommodate the alignment over the Structure or the Roadway over the alignment. The Structure shall accommodate:
    - i The Leitrim Road cross section in accordance with Clause 6.18 of this Part 2;
    - ii The northbound and southbound Track alignment, including Emergency walkway; and,
    - iii A MUP.

- B. The new Structure shall abide by the Airport Zoning Regulations Exemption to be secured by the City as outlined in Schedule 32 – City Permits, Licenses, Approvals and Authorizations.
  - C. The two existing watermain adjacent to the alignment shall be protected in accordance with the requirements of Article 8 of this Part 2.
  - D. Design and construction of a new grade separation that accommodates Leitrim Road over the alignment shall:
    - i Include the installation of Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7; and,
    - ii The Design Life for the new Overhead Structure shall be 40 years and.
  - E. Design and construction of a new grade separation that accommodates the alignment over Leitrim Road shall:
    - i Include the installation of a pedestrian barrier/railing system on each side of the Structure; and,
    - iii. Center piers shall not be permitted.
- (vii) Rail Bridge over Lester Road (SN225620)
- A. Design and construct a new elevated Guideway Structure to carry the alignment over the Lester Road. The new Structure shall accommodate:
    - i The single Track alignment, including an Emergency walkway on the Structure; and,
    - ii The Lester Road cross section in accordance with Clause 6.18 of this Part 2 under the Structure.
  - B. Install a pedestrian barrier/railing system on each side of the Structure.
  - C. Center piers shall not be permitted.
  - D. Structure shall be designed and constructed to allow for future widening of the Bridge to accommodate a second Track. Overbuilding of the substructure is not required.

- E. Use of the new rail Bridge over Lester Road for the NRC access to the current NRC yard in lieu of a separate NRC spur line shall be permitted, provided that:
  - i The new Bridge is designed and constructed to allow for the passage of the Vehicle and freight Trains; and,
  - ii Modifications to the existing NRC internal Track and yard are not required.
- (viii) Hunt Club Road Bridge (SN055350)
  - A. Complete a seismic evaluation to determine if seismic upgrades are required to AREMA requirements. Project Co shall perform all required repairs and/or seismic upgrades or replacement.
  - B. Replace the existing railing system on the Structure with a new pedestrian barrier/railing system.
- (ix) Rail Bridge over Hunt Club Road (SN055440)
  - A. Design and construct a new Elevated Guideway to carry the alignment over Hunt Club Road. The new Structure shall accommodate:
    - i The single Track alignment on the Structure; and,
    - ii The existing Hunt Club Road cross section under the Structure.
  - B. Install a pedestrian barrier/railing system on each side of the Structure.
- (x) Hunt Club Road MUP Bridge (SN058620)
  - A. Design and construct a new pedestrian Structure to carry a MUP over Hunt Club Road. The new Structure shall accommodate:
    - i A MUP with a minimum width of 4.2m on the Structure; and,
    - ii The existing Hunt Club Road cross section under the Structure.
    - iii Install a bicycle barrier/railing system on each side of the Structure. Barrier/railing system on the Structure shall be a minimum of 1.37m in height.
- (xi) Rail Bridge over MUP north of Hunt Club Road (SN055740)

- A. Design and construct a new Guideway Structure to carry the alignment over a MUP. The new Structure shall accommodate:
    - i The northbound and southbound alignment, including Emergency walkway on the Structure; and,
    - ii A MUP under the Structure.
  - B. The minimum opening under the Structure shall be 6m wide and 3m high. The haunches of a concrete box section shall be permitted to intrude into this opening provided the haunch dimensions do not exceed 600mm x 600mm.
  - C. Install a pedestrian barrier/railing system on each side of the Structure.
- (xii) Rail Bridge at South Keys Station (SN058490)
- A. Project Co shall complete a structural evaluation to ensure the structural capacity of the Structure is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2.
  - B. Project Co shall ensure that the Structure has adequate width to accommodate a second railway Track and Train platform for the South Keys Station. Project Co shall perform all required Structure modifications and/or repairs needed to accommodate a second Track and Train Platform. Structure modifications shall be completed in conjunction with the South Keys Station.
  - C. Project Co shall perform all required repairs, strengthening or replacement to ensure the structural capacity of the Structure is not exceeded.
- (xiii) Pedestrian Overpass north of South Keys Station (SN055750)
- A. Design and construct a new Guideway Structure to carry the alignment over a future MUP. The new Structure shall accommodate:
    - i The northbound and southbound alignment, including Emergency walkway, on the Structure; and,
    - ii A future MUP under the Structure.
  - B. The minimum opening under the Structure shall be 6m wide and 3m high. The haunches of a concrete box section shall be permitted to intrude into this opening provided the haunch dimensions do not exceed 600mm x 600mm.

- C. The Structure shall be designed and constructed in conjunction with the South Keys Station. Refer to Schedule 15-2, Part 4, Clause 3.9 (e).
- D. Install a pedestrian barrier and/or handrail on each side of the Structure.
- (xiv) Walkley Yard Lead over Transitway (SN055900)
  - A. Project Co shall complete a seismic evaluation to determine if seismic upgrades are required to meet AREMA requirements. Project Co shall perform all required repairs, seismic upgrades or replacement.
- (xv) Rail Bridge over Transitway at Walkley Yard Connecting Track (SN055910)
  - A. Project Co shall complete a seismic evaluation to determine if seismic upgrades are required to meet AREMA requirements. Project Co shall perform all required repairs, seismic upgrades or replacement.
- (xvi) Sawmill Creek Culvert (SN055470)
  - A. Project Co shall complete a structural evaluation to ensure the structural capacity of the Structure is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2. Project Co shall perform all required repairs, strengthening or replacement to ensure the structural capacity of the Structure is not exceeded.
- (xvii) Sawmill Creek Bridge (SN055200)
  - A. Project Co shall decommission and remove the Structure in accordance with Schedule 15-2, Part 1, Article 13 – Demolition, Removals and Disposal.
- (xviii) Rail Bridge over Southeast Transitway (SN055930)
  - A. Project Co shall decommission and remove the Structure in accordance with Schedule 15-2, Part 1, Article 13 – Demolition, Removals and Disposal.
- (xix) [REDACTED] Grade Separation at Ellwood Diamond (SN055940)
  - A. Design and construct a new Guideway Structure to separate the alignment from the [REDACTED] tracks at the Elwood Diamond. The new Structure shall accommodate:
    - i The alignment, including Emergency walkway, on the Structure; and,

- ii The existing [REDACTED], the existing Transitway, Sawmill Creek and the existing Brookfield MUP under the Structure.
  - B. Project Co shall ensure that neither [REDACTED] nor [REDACTED] operations are impacted by the construction of the grade-separation.
  - C. The existing Brookfield MUP connection adjacent to Sawmill Creek shall be maintained and meet the requirements of Schedule 15-2, Part 6 – Landscape Architecture and Connectivity Requirements.
  - D. Project Co shall ensure the design of the Guideway Structure will not obstruct the construction of a future second Track, to be supported on either a widened Structure or an independent twin Structure.
- (xx) Rideau River Bridge (SN015290)
- A. Project Co shall complete a seismic evaluation to determine if seismic upgrades are required to meet AREMA requirements.
  - B. Project Co shall complete a structural evaluation to ensure the structural capacity of the Structure is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2. Project Co shall perform all required repairs, strengthening, seismic upgrades or replacement to ensure the structural capacity of the Structure is not exceeded. At a minimum, Project Co shall perform the following upgrades;
    - i Replacement of span 2 and span 4 bearings to ensure the safe transfer of loads from superstructure to substructure
    - ii Repoint all stone masonry joints in the south abutment and wingwalls
    - iii Repair deteriorated masonry stones in the south abutment and wingwalls
    - iv Remove the existing deteriorated paving, reface the north abutment and wingwalls and install wall drains through the wingwalls to prevent build-up of water behind the abutment
    - v Remove existing concrete refacing and reface pier #1
    - vi Repoint deteriorated stone masonry joints in pier #2 and pier #3 shafts

- vii Remove and replace the concrete collars at the base of pier #2 and pier #3 shafts and
    - viii Repair spalled and delaminated areas of concrete at the top of the South Abutment
  - C. Install a pedestrian barrier/railing system on each side of the Structure.
- (xxi) University Road Pedestrian Bridge over Rideau River (SN018750)
  - A. Design and construct a new single span pedestrian Structure to carry a MUP over the Rideau River. The new Structure shall accommodate:
    - i A MUP with a minimum clear width of 5.0m on the Structure;
    - ii A minimum clear span length of 63.5m; and,
    - iii A design service life of 75 years.
  - B. Bridge superstructure shall be a painted steel Structure with a concrete deck. Concrete deck shall include curbs and a drainage system to prevent runoff onto the supporting superstructure.
  - C. Project Co shall provide bridge with a fabrication camber that counters the effects of full dead load deflection in order to obtain a final vertical camber that matches approach grade slopes.
  - D. Bridge substructure shall be constructed of reinforced concrete. Foundations shall be spread footings bearing on rock. Bottom of footings shall be cast a minimum of 250mm into sound bedrock and sides of footings shall be cast against undisturbed rock.
  - E. Intermediate piers shall be prohibited.
  - F. Outer faces of abutment walls shall accommodate:
    - i A natural stone architectural finish consisting of a 75mm minimum depth as defined in Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements. Relief pattern shall appear natural and non-repeating; and,
    - ii An anti-graffiti coating shall be applied to the full height of the natural stone finish. Coating shall be clear and shall not alter the color of the stone finish.

- G. Install a pedestrian barrier/railing system on each side of the Structure and along retaining walls and wingwalls, as required, a minimum of 1.37m in height consisting of a painted steel guardrail and an IPE wood handrail.
- H. Project Co shall demonstrate that the barrier/railing system is designed to prevent the attachment of pad-locks to longitudinal elements along the Bridge.
- I. Centreline of the Structure shall be offset by a minimum of 23m from the centreline of the adjacent Rideau River Bridge.
- J. Project Co shall design the Structure bottom chord to be above the greater of the following:
  - i A minimum opening under the Structure based on a 3.0m navigational clearance above the normal water elevation of the Rideau River, to be confirmed by Transport Canada's Navigational Protection Act requirements as per Schedule 32 - City Permits, Licences, Approvals and Authorizations; or.
  - ii A 0.3m clearance above the 1:100 year flood elevation which will result from the placement of fill as defined in Clause 5.7 of this Part 2.
- K. The coating system for the steel truss and railing shall conform to the following requirements, at a minimum:
  - i Low VOC Paint Coating System 2 as specified in the MTO Structural Steel Coating Manual; and,
  - ii The colour of the topcoat shall be 17038 black – according to Federal Standard 595B colours.
- L. An anti-slip coating shall be applied to all expansion joint cover plates.
- M. Removable bollards shall be installed at both bridge approaches to prevent vehicular access.
- N. All stone retaining walls along the Bridge approaches required to construct the pedestrian Bridge shall be designed and checked by a Professional Engineer.

(xxii) South Rail Bridge over MUP at Carleton University (SN018510)

- A. Project Co shall complete a structural evaluation to ensure the structural capacity of the Structure is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2. Project Co shall perform all required repairs, strengthening or replacement to ensure the structural capacity of the Structure is not exceeded.
- B. Project Co shall ensure the Structure has adequate width to accommodate siding Track. Project Co. shall carry out all required Structure modifications and/or repairs needed to accommodate the siding Track.
- C. Install a pedestrian barrier/railing system on each side of the Structure.

(xxiii) Carleton University Tunnel at Carleton Station (SN015440)

- A. Design and construct a new pedestrian Tunnel segment. The new Structure shall accommodate:
  - i The southbound and northbound Track alignment over the Structure; and,
  - ii Future pedestrian traffic in the Tunnel.
- B. The Tunnel shall be designed and constructed within the Lands and in accordance with the requirements of Schedule 15-2, Part 4, Clause 3.5.

(xxiv) Existing Carleton University Tunnel System (SN015430)

- A. Project Co shall complete a structural evaluation to ensure the structural capacity of the Structure is not exceeded with the application of all loads as defined in Clause 4.5 of this Part 2. Project Co shall perform all required repairs, strengthening or replacement to ensure the structural capacity of the Structure is not exceeded.

(xxv) North Rail Bridge over MUP at Carleton University (SN018490)

- A. Project Co shall design and construct a new elevated Guideway Structure to carry the alignment over a MUP. The new Structure shall accommodate:
  - i The single Track and siding Track alignment, including an Emergency walkway on the Structure; and,
  - ii A MUP under the Structure

- B. The Structure shall have a minimum opening size of 9m wide by 3m high. The haunches of a concrete box section shall be permitted to intrude into this opening provided the haunch dimensions do not exceed 600mm x 600mm.
- C. Install a pedestrian barrier/railing system on each side of the Structure.

(xxvi) Existing Tunnel under Dow's Lake (SN019020)

- A. Project Co shall design and construct Tunnel upgrades and rehabilitation work for the following components of the Tunnel. Design and construction documents are to be submitted per the requirements of Schedule 10 – Review Procedure.
  - i Concrete structural repairs for spalled surfaces greater than 50mm deep with exposed rebar, crack repairs for crack widths between 0.15mm to 1mm and ballast curb concrete and rebar replacement sections.
  - ii Existing Tunnel Track tie removal and replacement with ties meeting NFPA 130 requirements and having an elastic fastening system per the material requirements of Clause 3.7 of this Part 2.
  - iii Track ballast removal and replacement with material meeting the requirement of Clause 3.5 (c)(iii), of this Part 2.
  - iv Assess the condition of the concrete Tunnel Track slab and curbs after Track and ballast removal. Project Co shall make repairs to the Track slab and curbs as necessary to properly support the Track and to ensure the water infiltration criteria at the expansion joint locations of Clause 4.8 (c)(xxvi)(B) of this Part 2 are met and that the surface and slope of the Track slab allows for positive drainage to the ballast curb weep holes for collection in the Tunnel drainage gutters as originally designed. Track slab repair design and construction shall be in accordance with the applicable criteria for Guideway Structures as specified in this Article 4 and the Track requirements of Article 3 – Trackwork, of this Part 2.
  - v Dry standpipe system upgrades meeting NFPA 130 standards, and the design criteria in Schedule 15-2, Part 4 – Stations, work to include but not be limited to:
    - 1. Removal of all existing standpipe hose connections, shut off valves, drop piping and installation of new components meeting NFPA standards;

2. Provide/relocate fire department connections at locations as required per NFPA standards and modify piping accordingly;
3. Demolish existing standpipe isolation valves and provide new isolation valves at a height that can be operated at floor level;
4. Provide automatic air relief-vacuum valves at all standpipe high points;
5. Provide drains at all fire standpipe system low points;
6. Provide pipe supports to meet requirements for new installations;
7. Replace all existing mechanical couplings for the standpipe main where any existing coupling connection failed the initial pressure test; replace the existing standpipe main in its entirety where any two or more existing connections or pipe failed the initial pressure test; and,
8. The standpipe system upgrades shall not involve any structural modifications and structural lining removals of the Tunnel Structure. If the existing Tunnel Structure and Vehicle clearance envelope prevent compliance with NFPA requirements Project Co shall propose an alternative design that is acceptable with the AHJ and will be documented in the NFPA 130 Compliance Report described herein.

vi The Tunnel Drainage System, including all facilities which remove or are intended to remove water which would otherwise collect within the Tunnel, including but not limited to all ditches, gutters, catch basins and other inlets, grates, catch basin leads, maintenance holes, sewers and other drainage piping, weep holes, screens, pumping stations, force mains and outlets including the outlet pipe and outfall to Dow's Lake. Work shall include but not be limited to:

1. Evaluate the existing Tunnel Drainage system and implement remedial measures as necessary to bring the Tunnel drainage system into compliance with the

- requirements as specified in Article 5 – Drainage and Stormwater Management Design Criteria of this Part 2;
2. Remedial measures may include: improvement of connections between Tunnel Drainage gutters and the external storm sewer; improvement of cross connections between existing east and west drainage gutters; interception of flows within drainage ditches upstream of one or both Tunnel portals and diversion either by gravity or pumping to alternative outlet(s); improvement of the alternative outlet to include upsizing or installation of downstream sewers; the replacement of existing pumps and/or installation of additional pumps; and, installation of storm water quality and quantity controls for outlets; and,
  3. The evaluation of the Dow's Lake Tunnel Drainage System shall make allowance for fire-fighting flows and infiltration.
- vii Tunnel ventilation system meeting the requirements of NFPA 130 for Emergency Tunnel ventilation and the Canada Occupational Health and Safety Regulations for normal operation and ventilation of Revenue Vehicles meeting the requirements of Schedule 15-2, Part 8 - Vehicles. Design Criteria for the ventilation system is outlined in the Emergency Ventilation System and Egress Evaluation Report requirements of this Article.
- viii Expansion joint water infiltration mitigation measures meeting the design requirements of the Water Infiltration Management Plan of this Article.
- ix Upgrades to the Tunnel to comply with NFPA 130 standards. The upgrades are to include but not be limited to, the following:
1. Improvements to the existing Emergency walkway where the walkway does not meet the egress standards of NFPA 130;
  2. Replacement of existing non-fire rated wiring in the Tunnel with wiring meeting NFPA 130 standards;
  3. Provide a battery back-up system for Tunnel lighting;
  4. Provide directional signs in Tunnel and illuminated exit signs at the portals; and,

5. Install FTEs in the Tunnel and upgrade the communications systems in the Tunnel and BAS with the TOCC and ESP. Refer to Schedule 15-2, Part 3, Article 3 – Telephone and Intercom System and Article 5 – Voice and Data Radio System, for radio communications requirements. The FTEs shall provide the same function as the blue light stations of NFPA 130 but shall be modified such that a fluorescent or reflective sign describing the function of the FTE is located at the top of the station instead of the standard blue light. Signage shall be provided adjacent to each FTE station providing information that identifies the location of the Tunnel exits and the distance to the exits in both directions. Refer to Schedule 15-2, Part 4, Article 7 – Wayfinding and Signage for applicable signage design criteria. The FTEs shall be located in the Tunnel at both portal exits and any Emergency egress (two safety bays) locations within the Tunnel. The FTE stations shall be spaced throughout the Tunnel 100m apart along the Emergency walkway. Based on a 600m tunnel, roughly eight FTEs shall be installed in the Dows Lake Tunnel.
- B. Project Co shall prepare and submit a Water Infiltration Management Plan for the 22 existing expansion joints in the Tunnel per the requirements of Schedule 10 – Review Procedure. The plan shall include design drawings showing the means and methods of managing water infiltration at the expansion joints. The plan shall incorporate the following criteria and minimum requirements:
- i Water from the expansion joint shall not be allowed to leak onto the Track, ballast, ballast curbs and Emergency walkway;
  - ii Water from the expansion joints shall not drip onto Tunnel equipment, conduits, piping, lighting and any other system components in the Tunnel;
  - iii Water shall not be allowed to freeze in the joint and the joint shall be kept free of debris;
  - iv Determine a maximum infiltration rate per expansion joint as well as a total Tunnel expansion joint infiltration volume on a total L/day measurement that can be accommodated by the upgraded Tunnel drainage system. The infiltration rate and total infiltration volumes shall incorporate the Drainage and Stormwater

- Management Design Criteria of Article 5 – Drainage and Stormwater Management Design Criteria of this Part 2, and any design improvements required to the existing drainage system as defined in this Article. The maximum infiltration rate at any one expansion joint shall not exceed 500L/day;
- v Schedule for periodic inspections of the expansion joints and the concrete either side of the expansion joint a minimum of once a year for the duration of the Project Term to ensure the water infiltration management plan is performing as designed;
  - vi Schedule for expansion joint water infiltration volume measurements taken during periods when the Tunnel is experiencing the highest rate of water infiltration through the joints for the duration of the Project Term to verify the design maximum infiltration rates are not exceeded; and,
  - vii Designs shall account for the vertical clearances of Clause 2.12 of this Part 2.
- C. Project Co shall prepare and submit in accordance with Schedule 10 – Review Procedure, an Emergency Ventilation System and Egress Evaluation Report for the Tunnel ventilation system per the requirements of NFPA 130. Evaluation shall include at a minimum SES and if required CFD analyses for fire cases in the Tunnels to demonstrate that the existing exhaust fans meet the design criteria of NFPA 130. Modifications to the existing Emergency ventilation system necessary to meet the design criteria based on the SES and CFD study results shall be included in the analyses. The report shall include modelling assumptions, methodology and criteria including reference to applicable Codes and standards, tenability criteria and time of tenability calculations for the Tunnel, fire scenario development, fire detection time and ventilation system start up time, modelling input data and assumptions, acceptable limits and other constraints. The Tunnel ventilation fans shall satisfy the following design criteria:
- i Design Fire Data: Project Co shall determine the fire heat release rate using the Revenue Vehicle properties and fuel capacities based on a probable fire scenario in the Tunnel.
  - ii Maximum Emergency operation air velocity of 11.0 m/s.
  - iii Ventilation equipment noise shall not exceed a speech interference level, measured at 1.5 m above walking surface along the path of

evacuation in the Tunnel, of 78 dBZ Leq ‘slow’ over any period of 1 minute, using the arithmetic average of unweighted sound pressure level in the 500, 1000, 2000 and 4000 Hz octave bands.

- iv Refer to Schedule 17 – Environmental Obligations for external noise level restrictions.
- v Normal fan operation shall ensure carbon monoxide limits in the Tunnel from Revenue Vehicles and the Vehicle requirements of Schedule 15-2, Part 8 - Vehicles do not exceed safe concentrations for exposure to passengers, operators and persons working in the Tunnel. The report shall include limits for carbon monoxide concentrations as well as particulate matter visibility levels in the Tunnel as determined through Code requirements and environmental regulations. At a minimum, the ventilation system shall be designed to operate when carbon monoxide limits are above 100 ppm and the fans shall only turn off when the carbon monoxide level is brought below 30 ppm. For visibility, an extinction coefficient above 0.007 per meter shall activate the ventilation system until visibility falls below 0.005 per meter. Carbon monoxide and visibility monitoring equipment shall be included in the design and connected to the BAS.
- vi Modification or replacement of the existing ventilation system shall be designed and constructed based on the available space and physical constraints of the Tunnel clearance envelope and the ventilation air shaft. Structural modifications to the Tunnel and ventilation shaft shall not be permitted to accommodate a modified or replacement Tunnel ventilation system. Refer to Clause 2.12 of this Part 2 for vertical clearance requirements in the Tunnel.
- vii The existing pump house building may be modified to accommodate an upgraded Tunnel ventilation system as determined by Project Co’s Co’s Emergency Ventilation System and Egress Evaluation Report and the ventilation system maintenance responsibilities of Schedule 15-3 – Maintenance and Rehabilitation Requirements. Pump house modifications shall be subject to the requirements of Schedule 15-2, Part 4 - Stations and all applicable codes and standards referenced therein. Architectural and structural modifications shall also be required to match the existing building materials and structural systems and shall be subject to the City’s and the NCC’s approval.

- viii Any upgrades to the existing Tunnel ventilation system or replacement Tunnel ventilation system shall be classified as a new Tunnel ventilation system. Project Co shall design a new stand-alone head end located in the TOCC and BCC for the new Tunnel ventilation system, which shall not be integrated with the Existing Confederation Line SCADA. The Trillium Line's new S&TCS and fire detection and alarm systems shall be integrated with the Dow's Lake Tunnel Tunnel ventilation system head end to communicate with Vehicle Operators and prevent their entry into Dow's Lake Tunnel during an Emergency. Project Co shall design, procure and install all of the hardware and software necessary to operate and monitor the Tunnel ventilation system including two new operator workstations in the TOCC operational theatre and one new operator workstation in the BCC operational theater. Operator workstation functions shall vary based upon the responsibility and access rights of the person who is logged on at that workstation at any given time. The workstations shall include visual displays, keyboards, telephones, head-set connection and head-set, microphone and printer. Project Co shall connect the new Tunnel ventilation system to the new head end in the TOCC and BCC via the CTS. Refer to Schedule 15-2 Part 3 – Systems for S&TCS and CTS design requirements.
- D. Project Co shall develop an NFPA 130 Compliance Report for the Tunnel components demonstrating design modifications and upgrades to satisfy the requirements for trainways, Emergency ventilation, Emergency procedures, communications, controls, wire, and cable requirements. Refer to Schedule 15-2, Part 4 Stations, clause 5.8 - Building Automation System for BAS design requirements and compatibility with other BAS systems of the Existing Trillium Line to be incorporated along with the NFPA 130 requirements. The CTS requirements of Schedule 15-2 Part 3 – Systems, shall be implemented for all modifications and replacements to the systems and equipment in the Tunnel and pump house building necessary to satisfy compliance. The report shall include a compliance checklist identifying each applicable requirement of NFPA 130 with design narratives and supporting documentation demonstrating how the design addresses these requirements. The report and compliance checklist shall be submitted per the requirements of Schedule 10 – Review Procedure.
- E. Project Co shall design and install an automatic fire detection system in the Tunnel that shall be integrated with the new Dows Lake Tunnel ventilation system head end. The fire detection system shall communicate with the Dows Lake Tunnel ventilation system head end workstations and

an annunciator panel in the pump house via the CTS or otherwise acceptable methods satisfying NFPA 130 and the City and the AHJ. Project Co shall perform a reliability analysis per the requirements of NFPA 130 to satisfy operational continuity of the systems in the Tunnel for a specified time during a fire with acceptance from the City and AHJ. Refer to Schedule 15-2, Part 4 – Stations for electrical requirements for the fire detection system.

- F. Project Co shall perform a smoke dispersion/recirculation study for the existing and modified Emergency ventilation system to demonstrate smoke discharged from Emergency ventilation exhaust points is not drawn into the Tunnel or the pump house;
- G. Project Co shall be permitted to drill into and connect to the existing Tunnel structural lining for supporting the upgrades to the Tunnel drainage, ventilation and FLS, required by the design, subject to the design calculations demonstrating the loads imposed do not overstress the Structure. The connection design and construction shall not reduce the existing structural capacity or water tightness of the Tunnel lining.

(xxvii) Walkley Road Overpass O-Train Line (SN055330)

- A. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7.

(xxviii) Heron Road Overpass O-Train Line (SN055260)

- A. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7.

(xxix) Riverside Drive Overpass O-Train Line (SN055280)

- A. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7.

(xxx) Campus Avenue Overpass O-Train Line (SN015850)

- A. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7.

(xxxi) Somerset Street Overpass O-Train Line (SN015340)

- A. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7.

(xxxii) Trinity Pedestrian Bridge (SN018430)

- A. Design and construct a new pedestrian Structure to carry pedestrian traffic from the development at 900 Albert to the west Bayview Station Platform area. The new Structure shall accommodate:
  - i A pedestrian connection on the Structure; and,
  - ii The northbound and southbound Track alignment, including Emergency walkway and MUP under the Structure.
- B. The Structure shall be designed and constructed in accordance with the requirements of Schedule 15-2, Part 4, Clause 3.2.

(xxxiii) Albert Street Overpass O-Train Line (SN015380)

- A. Install Bridge Structure fencing in accordance with the requirements in Schedule 15-2, Part 6, Clause 2.7.

(d) Project Co shall complete the following work as part of the Airport Link:

(i) Elevated Guideway to OMCIA Terminal (SN225110)

- A. Design and construct a new elevated Guideway Structure to carry the alignment over various Roadway and parking areas. The new Structure shall accommodate:
  - i The single Track alignment, including Emergency walkway on the Structure; and,
  - ii The existing Paul Benoit Driveway, Tracker Private, Silver-Star Private and Convair Private cross sections and existing airport parking lots under the Structure.
- B. Structure shall be designed and constructed to be visually compatible and have similar layout as the existing adjacent airport Bridge Structure while also meeting the aesthetic requirements of a Level 1 Bridge.
- C. The Structure shall be designed and constructed in conjunction with the new elevated Airport Terminal Station. Design shall be coordinated with OMCIAA representatives.
- D. Install a pedestrian barrier/railing system on each side of the Structure.

- E. The substructure and deep foundations shall be designed and constructed to protect for the cantilevered Airport Station concourse, as shown in the STA-AP-A RCD dated April 3, 2017 or as otherwise agreed to by the City and the OMCIAA.
  - F. The Structure and Station Platform shall be designed and constructed in conjunction with the requirements of Schedule 15-2, Part 4, Clause 3.13.
  - G. The Structure shall be designed and constructed to allow for future widening of the Bridge to accommodate a second Track. Overbuilding of the substructure is not required.
  - H. The Structure shall be detailed to discourage bird nesting.
  - I. The Station Platform shall be designed and constructed in a manner which will allow the OMCIAA contractor to safely remove the top 25mm of concrete from the surface of the Station Platform over a 3000mm length measured from the juncture between the Station Platform and the airport facility.
  - J. Graffiti-resistant coating shall be applied to all porous opaque surfaces, including but not limited to, concrete, masonry and stone up to a minimum of 2.5m above the adjacent ground or where surfaces are reachable to tag.
- (ii) Railway Bridge over Uplands Drive (SN 225640)
- A. Design and construct a new single span elevated Guideway Structure to carry the alignment over Uplands Drive. The new single span Structure shall accommodate:
    - i The single Track alignment, including Emergency walkway on the Structure; and,
    - ii The future Uplands Drive cross section in accordance with Clause 6.18 of this Part 2, and MUP in accordance with Schedule 15-2, Part 6, Clause 4.4, under the Structure.
  - B. Install a pedestrian barrier/railing system on each side of the Structure.
  - C. The Structure shall be designed and constructed to allow for future widening of the Bridge to accommodate a second Track. Overbuilding of the substructure is not required.

- D. Graffiti-resistant coating shall be applied to all porous opaque surfaces, including but not limited to, concrete, masonry and stone up to a minimum of 2.5m above the adjacent ground or where surfaces are reachable to tag.
- (iii) Railway Bridge over Airport Parkway (SN 225630)
  - A. Design and construct a new elevated Guideway Structure to carry the alignment over Airport Parkway. The new Structure shall accommodate:
    - i The northbound and southbound Track alignment, including Emergency walkway on the Structure; and,
    - ii The future Airport Parkway cross section in accordance with Clause 6.18 of this Part 2 under the Structure.
  - B. Install a pedestrian barrier/railing system on each side of the Structure.
  - C. Graffiti-resistant coating shall be applied to all porous opaque surfaces, including but not limited to, concrete, masonry and stone up to a minimum of 2.5m above the adjacent ground or where surfaces are reachable to tag.

## ARTICLE 5 DRAINAGE AND STORMWATER MANAGEMENT DESIGN CRITERIA

### 5.1 Reference Documents

- (a) Project Co shall complete the Works in accordance with the criteria contained in this Article, the Project Agreement, and the Applicable Law, including but not limited to the latest edition of the following Reference Documents:
  - (i) City Publications:
    - A. City of Ottawa Sewer Design Guidelines, including Technical bulletins;
    - B. Stormwater Management Facility Design Guidelines;
    - C. City of Ottawa By-Laws; and,
    - D. Riverside South Community Master Drainage Plan, Stantec.
  - (ii) Federal and Provincial Codes, Acts and Regulations:
    - A. Fisheries Act (Canada);
    - B. Ontario Water Resources Act;
    - C. Drainage Act (Ontario);
    - D. Ontario Regulation 525/98 - Approval Exemption; and,
    - E. Ontario Building Code.
  - (iii) Conservation Authority Publications:
    - A. RVCA: Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses (Ontario Regulation 174/06);
    - B. SNCA: Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses (Ontario Regulation 170/06), Conservation Authorities Act, R.S.O. 1990, c. C.27;
    - C. RVCA: Solutions for Shoreline Erosion;
    - D. TRCA/CVC: Low Impact Development Stormwater Management Planning and Design Guideline; and,
    - E. CVC: Low Impact Development Construction Guide.

- (iv) MOECC Publications:
  - A. Stormwater Management Planning and Design Manual;
  - B. Design Guidelines for Sewage Works;
  - C. Guideline B-6 – Guidelines for Evaluating Construction Activities Impacting on Water Resources;
  - D. Environmental Activity and Sector Registry information <https://www.ontario.ca/page/environmental-activity-and-sector-registry>; and,
  - E. Permit To Take Water Manual.
- (v) Ontario MNR Publications:
  - A. Technical Guide – River & Stream Systems: Flooding Hazard Limit.
- (vi) MTO Publications:
  - A. Drainage Management Manual;
  - B. Highway Drainage Design Standards;
  - C. Gravity Pipe Design Manual; and,
  - D. Environmental Guide for Erosion and Sediment Control during Construction of Highway Projects.
- (vii) CHBDC;
- (viii) AREMA Manual for Railway Engineering;
- (ix) NFPA 130; and,
- (x) Other applicable policies, acts and guidelines by the City, Regulators, and Governmental Authorities.

## 5.2 General Criteria

- (a) Project Co shall design and construct a drainage and SWM system such that Revenue Service operations can safely continue, and such that surface ponding remains below the TOR, during the 100-Year Storm event.

- (b) Project Co shall evaluate the performance of the drainage and SWM system under historical storms and 100-Year Storm Plus 20% (stress test condition) and modify the design as needed in accordance with the City of Ottawa Sewer Design Guidelines and Technical Bulletins.
- (c) Runoff from at-grade and below grade segments shall be collected by trackside ditches, perforated underdrain pipes, or storm sewers. All Guideway drainage shall be captured and managed within the Guideway ROW/Lands with SWMPs that provide attenuation up to the 100-Year Storm and water quality protection that meets MOECC's 'Enhanced' standard before discharging to outlet locations. Discharge shall be to outlet locations identified in Clause 5.7 – Site Specific Criteria, of this Part 2. Storm water from the Guideway shall not be allowed to sheet flow onto adjacent properties at greater peak rates than existing.
- (d) Runoff from raised Guideway, where Guideway is an embankment, may be discharged along the embankment provided runoff is evenly distributed to prevent erosion, before being collected by SWMPs that provide attenuation up to the 100-Year Storm and water quality protection that meets MOECC's 'Enhanced' standard.
- (e) Runoff from raised Guideway, where the raised Guideway is a Structure, shall be conveyed by gutter systems to inlets. Inlets shall discharge to SWMPs that provide attenuation up to the 100-Year Storm and water quality protection that meets MOECC's 'Enhanced' standard.
- (f) Project Co shall secure all permits and approvals where necessary for the implementation of the Drainage and SWM systems for the Project, and shall be responsible for preparing and submitting all necessary drawings and supporting documentation associated with obtaining those permits and approvals in accordance with Schedule 10 – Review Procedure.
- (g) Project Co shall be responsible for all costs associated with obtaining the required permits and approvals, and those associated with providing the Drainage and SWM systems for SI.
- (h) Project Co shall obtain sewer discharge permits and approvals in accordance with the City, MOECC, RVCA, and SNCA requirements.
- (i) Project Co shall obtain all PTTWs and/or Environmental Activity and Sector Registry registrations, in accordance with current MOECC requirements, for the Works.
- (j) Project Co shall obtain municipal approval for additions and modifications to existing sewers and related appurtenances and shall ensure that these additions and modifications conform to the requirements of the City or other Governmental Authorities.

- (k) Project Co shall ensure services to adjoining properties are supported in place and maintained in operation during additions to or modifications of the existing sewers.
- (l) Without limiting any other obligations of Project Co, Project Co shall be in compliance with Ontario Regulation 166/06 (Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses) for Works within RVCA and SNCA regulated areas.
- (m) No sanitary sewer discharge shall be permitted to enter the Drainage and SWM systems supporting SI.
- (n) Project Co shall design and construct Drainage and SWM systems such that any impact to existing Drainage systems and overland flow is mitigated and such that new Hazards are not introduced.
- (o) Project Co shall provide complete design packages for all Drainage and SWM components, submitted in accordance with Schedule 10 – Review Procedure. Design packages shall include all Drainage and SWM works including detailed drawings, calculations, reports, and related ECA applications.

### **5.3 Drainage Criteria**

- (a) The Drainage Design Criteria provided herein are considered a minimum standard. The design of drainage facilities belonging to the City and other Governmental Authorities which are to be relocated or modified to accommodate SI shall conform to the Design Criteria and standards of the City and other Governmental Authorities.
- (b) Required relocation of existing drainage facilities shall be Replacement-In-Kind unless specified otherwise.
- (c) Project Co shall design and construct drainage measures for the Project including the Guideways, Tunnels, Stations, the New Walkley Yard, Roadways, parking lots, and other SI, in accordance with City and provincial standards.
- (d) Project Co shall not increase flow rates to existing combined sewers or separated sewers unless the increase is approved by the City. Flow rates shall be limited in accordance with Section 3.2 of the Ottawa Sewer Design Guidelines.
- (e) Project Co shall design and construct new storm sewers to convey minor system flows such that they capture and convey a design storm event in accordance with Section 5.10 of the City of Ottawa Sewer Design Guidelines.
- (f) Project Co shall design and construct on-Site controls and overland flow routes for storage and conveyance of SI runoff in excess of the design capacity of the receiving minor system, in accordance with Section 5 of the City of Ottawa Sewer Design

Guidelines and Technical Bulletins, for all storms up to the 100-Year Storm. The combination of a minor system and an overland flow system shall not create flow depths above the TOR.

- (g) Project Co shall demonstrate to the City through hydrologic/hydraulic analysis that the flow rates and the hydraulic grade line of receiving storm sewers does not adversely affect the existing level of service, in terms of flood protection and minor system performance, as a result of the Works.
- (h) In the below-grade sections of the Guideway and Stations, Project Co shall keep Tunnel portals, Tunnels, and Stations free from flooding due to all storms up to and including the 100-Year Storm event. Refer to Clause 4.8 of this Part 2 for additional Drainage design requirements for the Dow's Lake Tunnel.
- (i) Project Co shall design and construct pedestrian underpasses such that ponding does not occur for all storms up to the 5-year storm event.
- (j) All Drainage for Tunnels and other areas without a local gravity outlet shall be collected and discharged to a storm sewer approved by the City. The Tunnel drainage system shall meet the requirements of Article 4 – Structural Design Criteria and Requirements, of this Part 2.
- (k) Project Co shall design and construct all Drainage and SWM systems required to ensure adequate drainage during Construction of the Works. Discharges shall comply with Applicable Law and City requirements, including the Sewer Use by-law.
- (l) Project Co shall comply with the following requirements for Guideway drainage:
  - (i) The Guideway drainage system shall be designed and constructed such that ponding levels do not exceed TOR elevation and such that ponding does not contribute to subgrade instability for all storms up to and including the 100-Year Storm;
  - (ii) All Drainage discharges from the Guideway shall be in accordance with Applicable Law and the requirements of the City and other Governmental Authorities; and,
  - (iii) Project Co shall provide maintenance holes (access points) outside of the Guideway on all new service connections, between the City's ROW and the Guideway, in accordance with City requirements. The maintenance holes and sewers shall be turned over to the City to enable the City to carry out its maintenance responsibility for storm drain/sewer service connections located beyond the limits of the Guideway.

- (m) Groundwater, fireflow discharge, and storm runoff at all underground structures and other areas without a gravity outlet shall be collected and pumped to a municipal storm sewer in compliance with the City of Ottawa Sewer Use By-Law unless otherwise noted.
- (n) Project Co shall design and construct a drainage system for new MUPs in accordance with the City's MUP standards and such that existing flow direction is maintained. MUP drainage shall not be combined with SI ditch drainage system. Where SI drainage goes to a closed (pipel) system, and where MUPs undergo winter maintenance with de-icing salts, MUP drainage shall be managed separately from SI drainage.
- (o) All new Culverts under the Guideway, regardless of size, shall be of reinforced concrete construction.

#### **5.4 Stormwater Management Criteria**

- (a) SWM for the Project shall be designed and constructed in accordance with the City's "Sewer Design Guidelines" and MOECC's "Stormwater Management Planning and Design Manual".
- (b) Project Co shall prepare complete SWM plans and design packages in accordance with the City and Provincial requirements for all drainage and SWM aspects of the Works to address at a minimum:
  - (i) Water balance, quantity and quality control requirements imposed by local, provincial and federal government regulations along with the Project environmental impacts and mitigations;
  - (ii) Impact on existing municipal drainage and SWM systems, and natural drainage systems;
  - (iii) Existing ditches, watercourses, Culvert crossings, and storm sewers that will be affected or are relevant to the Project;
  - (iv) Potential impacts of the Project on the existing drainage system and on any environmentally sensitive areas, in consultation with Governmental Authorities;
  - (v) Existing drainage patterns and how the proposed Drainage system design will extend the existing minor and major drainage systems;
  - (vi) Directions by Governmental Authorities in respect to changes in drainage patterns, upgrades to Drainage infrastructure or modifications, and any agreements reached with the City or Governmental Authorities;

- (vii) Proposed SWMPs to mitigate potential impacts of the Works, including appropriate plans and drawings to illustrate the same; and,
- (viii) All pertinent background information, calculations and model output to support the proposed designs and Works.
- (c) Project Co shall submit the above SWM Plans and design packages to the City as part of the Works Submittals in accordance with Schedule 10 – Review Procedure.
- (d) Drainage and SWM designs of Facilities that require review and approval from Governmental Authorities shall be submitted in accordance with the procedures established by the respective Governmental Authority and in accordance with Schedule 10 – Review Procedure. Project Co shall comply with the Governmental Authority permit requirements and conditions.
- (e) The design of stormwater detention facilities and control measures proposed as part of the Works shall be submitted to the City and other Governmental Authorities for approval.
- (f) Where LID measures are required, they shall be designed in accordance with the “Low Impact Development Stormwater Management Planning and Design Guidelines”. Refer to Schedule 15-2, Part 6, Article 2 – Design Criteria for landscaping requirements of LID measures.
- (g) Roof Drainage (above-grade structures) shall be managed in accordance with a Site-specific SWMP. Roof drainage shall not be routed to the underground Track Drainage system.
- (h) Unless otherwise noted, all SWM facilities shall be designed to meet the MOECC’s “Enhanced” standard.
- (i) Project Site components that ultimately drain to the Ottawa River or Rideau River, and are considered Infill Development, as defined in section 8.3.7.2 of the City of Ottawa Sewer Design Guidelines, shall control peak flows to the minor system as prescribed in Section 3.2.2 and 8.3.7 of the City of Ottawa Sewer Design Guidelines. Water quality SWMPs for Infill development are to provide a net improvement over existing conditions.
- (j) Extended detention or “wet-pond” SWM facilities shall be designed and constructed to prevent both losses of permanent pool due to infiltration and losses of active storage due to intrusion of groundwater, if required.
- (k) OGS structures shall be designed with a required performance of removal of fine sediment, oil, floating and sinking debris, and 80% removal efficiency for TSS.

- (l) OGS structures located outside of the Guideway shall be accessible by rubber tire vehicle.

## **5.5 Numerical Computational Procedures and Models**

- (a) All numerical computation procedures shall comply with the requirements of the City of Ottawa Sewer Design Guidelines. Computer models used shall comply with the guidelines for model selection provided in the MTO's "Drainage Management Manual."
- (b) Project Co shall confirm the suitability and acceptance of any computer model nominated for use in the design and analysis of drainage or SWM system for the Project with the City and other Governmental Authorities.
- (c) Peak flows to be used for design purposes for drainage areas greater than 40 hectares shall be verified using a method approved by the City and other Governmental Authorities.

## **5.6 Erosion and Sediment Control Requirements**

- (a) Project Co shall implement stormwater control, mitigation, ESC measures appropriate for the urban context of the Project to ensure deleterious substances and other pollutants do not leave the Site and enter watercourses or the municipal Drainage infrastructure.
- (b) Project Co shall prepare an Erosion and Sediment Control Plan for the Project, as a component plan of the Environmental Management Plan described in Schedule 17 – Environmental Obligations, to comply with environmental approvals and commitments and with any and all Applicable Codes. In addition, Site-specific ESC Plans shall be developed to address local potential environmentally sensitive Site conditions, including watercourse crossings. The ESC Plan for the Project and the Site specific ESC Plans shall be submitted to the City in accordance with Schedule 10 – Review Procedure.
- (c) In addition to City and Governmental Authority requirements, Erosion and Sediment Control Plans shall be prepared in accordance with the following documents:
  - (i) MNR, et al., 1987, Guidelines on Erosion and Sediment Control for Urban Construction Sites.
  - (ii) MTO's Environmental Guide for Erosion and Sediment Control during Construction of Highway Projects.
- (d) Project Co shall obtain all permits and approvals for all in-water works in accordance with all Governmental Authorities' requirements.

- (e) Project Co shall adhere to all fisheries (timing) window restrictions imposed by the RVCA, SNCA, or other Governmental Authorities on activities on or adjacent to watercourses associated with the Works.

## **5.7 Site-Specific Criteria**

- (a) New Walkley Yard
  - (i) Project Co shall implement methods, such as OGS units, to control runoff that contains sand (due to braking) or oil and grease (Track lubricant) from operations in compliance with the City of Ottawa Sewer Use By-Law. Runoff shall not be directed to any storm sewer permanently or temporarily unless the runoff is treated to meet Sewer Use By-Law criteria and MOECC's 'Enhanced' standard.
  - (ii) Treated runoff from the New Walkley Yard shall drain to the tributary to Sawmill Creek north of the Facility.
  - (iii) Any SWM facility for the New Walkley Yard shall be constructed in accordance with City requirements and MOECC 'Enhanced' Standards.
  - (iv) Project Co shall assess the condition of the existing Culvert under Albion Road North at the entrance to the New Walkley Yard and shall design and construct modifications and/or replacement of the Culvert as required.
- (b) Gladstone
  - (i) The Gladstone Station is considered infill development. As such, design and construction of this Station shall comply with Section 3.2.2 and 8.3.7 of the Ottawa Sewer design Guidelines.
  - (ii) A storm sewer shall be constructed to convey runoff from the trackside ditches to the south of the Station and outlet to the existing 900mm diameter storm sewer that is located approximately 200m north of the Gladstone Avenue overpass.
  - (iii) Project Co shall include on-site SWM measures to control runoff to the 2-year pre-development level.
- (c) Carling, Carleton, and Confederation
  - (i) The Stations are considered infill development. As such, the design and construction of these Stations shall comply with Section 3.2.2 and 8.3.7 of the Ottawa Sewer design Guidelines.
- (d) Walkley

- (i) The Walkley Station is considered infill development. As such, design and construction of this Station shall comply with Section 3.2.2 and 8.3.7 of the Ottawa Sewer design Guidelines.
  - (ii) The existing 750mm diameter Culvert shall be removed. A new RCP Culvert (minimum 750mm diameter) shall be constructed to the south of the Station Platform and convey runoff from the Station and from the adjacent catchment area east of the alignment, bordered to the north by Bank street, to the west by Walkley road, to the south by the LCBO warehouse property northern boundary, and to the east by the Guideway on the Expanded Trillium Line. This Culvert shall discharge to the west trackside ditch.
- (e) Greenboro
  - (i) Runoff from the Greenboro Station shall drain to the existing “Sawmill Creek Constructed Wetland” SWM Facility.
  - (ii) No specific quantity or quality SWMPs are required.
- (f) South Keys
  - (i) Runoff from the South Keys Station shall drain to the existing “Sawmill Creek Constructed Wetland” SWM Facility.
  - (ii) No specific quantity or quality SWMPs are required.
- (g) Leitrim
  - (i) The SWM system for the Leitrim Station and adjacent Park and Ride shall drain to the existing ditch on the east side of Gilligan Road.
  - (ii) SWM design for the Station and Park and Ride shall be based on LID standards.
  - (iii) SWM and drainage for the Leitrim Station and adjacent Park and Ride shall be designed and constructed to accommodate initial and ultimate Site configuration. Refer to Schedule 15-2, Part 4 – Stations for initial and ultimate Site configuration requirements of the Leitrim Park and Ride.
- (h) Bowesville
  - (i) The Bowesville Park and Ride Station is within the tributary area to Mosquito Creek. Project Co shall confirm the SWM discharge criteria with the City and RVCA. Project Co shall include drainage from areas upstream of the Site and accommodate them in the Bowesville Park and Ride Station design. Project Co

shall design and construct SWM measures within the Bowesville Park and Ride Station site to meet the SWM criteria for Mosquito Creek.

- (ii) SWM design for the Station and Park and Ride shall be based on 80% TSS removal and specific quantity control SWM criteria for Mosquito Creek, consistent with the draft 2015 Master Drainage Plan update for Riverside South, and any required adjustments made necessary by the development of this Site.
  - (iii) SWM and drainage for the Bowesville Station Park and Ride shall be designed and constructed to accommodate the initial Site configuration, and expandable to accommodate the ultimate Site configuration with no interruption of service and no major changes to the initial SWM and drainage layout and location. Refer to Schedule 15-2, Part 4 – Stations for initial and ultimate Site configuration requirements of the Bowesville Station Park and Ride.
  - (iv) Project Co shall design and construct drainage infrastructure downstream of the site necessary to accommodate drainage from the site.
- (i) Limebank
- (i) The City is updating the Master Drainage Plan and a Master Servicing Study for the Riverside South community, which also discharges to Mosquito Creek. SWM design for the Station shall meet 80% TSS removal and the specific quantity and erosion control SWM criteria for Mosquito Creek that are required as part of the Master Drainage Plan update for Riverside South.
- (j) Uplands
- (i) The Uplands Station is considered Greenfield development. Station drainage shall have SWMPs in accordance with this Article.
  - (ii) Runoff from Uplands Station shall drain to an existing ditch along the northern edge of the EY Centre property line. Project Co shall design and construct improvements to the existing ditch as required to manage runoff in accordance with this Article.
- (k) Airport Station
- (i) The Airport Station is considered part of the existing airport development. Station drainage shall be conveyed by the existing Drainage infrastructure. SWM requirements shall be compatible with the existing airport drainage and SWM system to the satisfaction of the OMCIAA.
- (l) At-Grade Guideway – Existing Trillium Line

- (i) The existing Drainage system shall be modified as required to accommodate the additional sidings and/or other modifications associated with the Expanded Trillium Line.
- (m) At-Grade Guideway –Trillium Line Extension, South Keys to Bowesville
  - (i) Project Co shall replace or remove the following Culverts identified in Table 2-5.1.

**Table 2-5.1 – Culvert Replacements and Removals**

ID	Existing Structure	Northing *	Easting*	Replacement/ Removal
	Size/Material			
A	2050 x 1700 Cast-in-Place Concrete	5023567.1	371184.7	Replacement
B	2700 x 1900 Cast-in-Place Frame	5023370.1	371262.8	Removal
C	2000 x 1900 Cast-in-Place Frame	5022602.7	371596.7	Replacement
D	600 diam. CSP	5022367.4	371699.1	Replacement
E	Unknown**	5022167.5	371784.7	Replacement

\* Coordinates are NAD83 MTM Zone 9 Locations are approximate

\*\* Culvert is part of the Alexander Municipal Drain

- (ii) Project Co shall regrade and enlarge the west trackside ditch, also known as the Cahill Drain, between Culverts A and B identified in Table 2-5.1, a distance of approximately 200m. Project Co shall design and construct the enlarged ditch to convey flows from the Cahill Drain to the south in a northerly direction to the

Sawmill Creek Constructed Wetland SWM Facility. Project Co shall design and construct modified and new channel sections using natural channel design principles and shall obtain input and review of the design by a fluvial geomorphologist.

- (iii) Project Co shall relocate an approximate 125m length of a tributary to Alexander Drain that is currently located on the east side of the Guideway, north of Lester Road, between the rail embankment and a gravel access road. This reach has been confirmed as a Coolwater Fishery. Culverts D and E identified in Table 2-5.1 convey flow to this tributary. The design and construction of the realignment shall be completed in accordance with environmental, geomorphological requirements, and meet the conditions of applicable regulatory approvals.
  - (iv) The replacement of Culvert F, as identified in Table 2-5.1, located on the Alexander Drain immediately south of Lester Road shall include the replacement of a beaver control device to prevent the crossing being affected by the formation of a beaver dam.
- (n) At-Grade and Below Grade Guideway – Trillium Line Extension, Bowesville to Limebank
- (i) Project Co shall design and construct Track drainage for the Guideway from Bowesville Station to Limebank Station in accordance with the requirements of this Article.
  - (ii) SWM design for the Guideway shall meet 80% TSS removal and the specific quantity and erosion control criteria for Mosquito Creek that are required as part of the Master Drainage Plan update for Riverside South.
  - (iii) Project Co shall design and construct a Culvert to convey external drainage area flows from south to north of the alignment. The exact location of the culvert will be subject to review by the City to confirm compatibility with the Master Drainage Plan for Riverside South.
  - (iv) Project Co shall relocate a tributary to Mosquito Creek over an approximate channel length of 70m. Project Co shall comply with the following:
    - A. The tributary in question crosses the Track alignment approximately 1.5km west of Bowesville Road, east of Mosquito Creek. Project Co shall relocate the tributary at this crossing with the Track alignment such that existing meanders in the channel are preserved or reinstated and that the overall channel length is equal to or greater than the existing channel length.

- B. The tributary shall be relocated within a 60m wide corridor adjacent to the Guideway. The relocated channel shall be designed and constructed in accordance with natural channel design principles.
  - C. The design and construction of the realignment shall be completed in accordance with environmental, geomorphological requirements, and meet the conditions of applicable regulatory approvals.
  - D. The channel realignment shall be designed by a fluvial geomorphologist who can demonstrate a Master's degree in fluvial processes (or equivalent), and who has at least 10 years' experience designing channels in urban environments.
- (o) At-Grade, Below Grade, and Raised Guideway – Trillium Line Extension to Ottawa MacDonald Cartier International Airport
  - (i) Guideway drainage shall discharge to the existing airport drainage system. Project Co shall design and construct SWM controls as required to be compatible with the SWM requirements of the existing airport drainage and SWM system to the satisfaction of the OMCIAA.
  - (ii) Runoff from the raised Guideway between Uplands Drive and the Airport Terminal shall be discharged to underground SWM controls and existing airport storm sewer system. Project Co shall not construct above-ground SWM controls in the segment of raised Guideway between Uplands Drive and the Airport Terminal.
  - (iii) Project Co shall install new Culverts as required to maintain existing drainage patterns.
- (p) University Rd Ped Bridge over Rideau River
  - (i) SWM design for the Bridge shall be based on MOECC's 'Enhanced' standard for TSS removal and specific quantity control SWM criteria designed to LID standards. Refer to Schedule 15-2, Part 6, Article 4 – Site Specific Desired Outcomes, for landscaping requirements.
  - (ii) Project Co shall demonstrate to the City through hydrologic/hydraulic modeling that the cumulative impacts of the Works will not increase peak flow rates or the peak hydraulic grade line of the Rideau River for all rain events up to the 100-Year Storm. This analysis shall be submitted in accordance with Schedule 10 – Review Procedure.
  - (iii) Project Co shall design for the loss of floodplain storage volume within the 1:100 year floodplain which will result from the placement of fill. Project Co shall fully

compensate for this loss of floodplain storage volume through a balanced cut (or excavation) to be performed in close proximity to and concurrent with the placement of the fill.

- (iv) Two sites on the north side of the Rideau River have been identified for floodplain compensation: 1) to the west of the proposed Structure, adjacent to [REDACTED], and 2) land adjacent to the existing pond, located within Brewer Park. This work shall be performed in accordance with the following requirements:
- A. The volume of available floodplain storage capacity within the affected river or stream reach shall not be reduced;
  - B. The minimum proposed ground elevation in the compensating excavation area shall not be lower than the minimum existing ground elevation in the proposed fill area. Excavation below the normal high water mark shall not be considered for calculation purposes and filling below the normal high water mark shall not be permitted;
  - C. The proposed site grading shall be designed to result in no increase in upstream water surface elevations in the affected channel cross-sections under a full range of potential flood discharge conditions (1:2 year to 1:100 year return periods). Compliance with this requirement shall be demonstrated by means of hydraulic computations completed to the satisfaction of the RVCA.
  - D. Any work located adjacent to existing sports fields shall satisfy the following requirements, at a minimum:
    - i The compensating excavation area shall be located a minimum of 25m from the perimeter of the existing 90m x 54m sports field #3 at Brewer Park;
    - ii Project Co shall plant coniferous and deciduous trees between sports field #3 and the compensating excavation area, to the satisfaction of the City. The tree planting shall be located a minimum of 10m from the field perimeter, and shall be designed to aid in intercepting soccer balls that are struck from the field towards the compensating excavation area.
    - iii The compensating excavation area shall be designed and constructed to maintain a pedestrian trail around the perimeter of Brewer Pond and to accommodate the potential development of a minimum 2m wide accessible pathway around the pond in the future;

- iv Project Co shall submit the following by December 31 of the year prior to commencing construction within Brewer Park, to the satisfaction of the City:
    - 1. Construction schedule;
    - 2. Grading plan;
    - 3. Landscape plan;
    - 4. Tree conservation report; and,
    - 5. Construction staging, hoarding and access plan.
  - v Project Co shall not commence construction within Brewer Park prior to obtaining written authorization from the City.
  - vi Construction shall not be permitted in Brewer Park between May 15 and August 30, of any given year.
  - vii Construction access and staging shall not be permitted on the existing sports field #3 or within a 10m buffer around the field perimeter unless approved in writing by the City.
- (v) All work proposed within Brewer Park shall be performed in accordance with the following requirements:
- A. A pre-consultation meeting to discuss ecological values that should be incorporated into the design shall be held with the following agencies at a minimum:
    - i RVCA;
    - ii MNRF; and,
    - iii City.
  - B. No construction work shall take place between May 1 and August 31, of any given year. No in-water works shall take place between March 15 and June 30, of any given year.
  - C. In-water work shall not be conducted at times when flows are elevated due to local rain events, storms or seasonal floods.
  - D. A [silt](#) curtain shall be installed along the extent of shoreline that will be disturbed to prevent a potential sediment release into the Rideau River.

This shall remain in place until sediment settles and then shall be removed. The majority of the embayment feature shall be constructed/shaped prior to work along the shoreline.

- E. An aquatic species stranding mitigation program shall be implemented by a qualified biologist, familiar with the aquatic species in the area, immediately following isolation to ensure that they are removed from the work site and released immediately downstream of the work area. A report of the results of the species relocation including species and quantities relocated shall be submitted to the MNR and the RVCA.
- F. Any excess excavated material, as a result of the work, shall be **disposed** of in a suitable location outside any regulatory floodplain and fill regulated area.
- G. A temporary construction sign shall be installed outside the construction area between sports field #3 and the compensating excavation area adjacent to the floodplain compensation wetland feature to provide the public with information about the project and its **purpose** during construction.
- H. The floodplain compensation wetland feature and adjacent buffer area will be planted with a native shoreline seed mix and tree/shrub species. A landscape plan shall be submitted in accordance with Schedule 10 – Review Procedure.
- I. A post effectiveness monitoring plan for the wetland embayment **creation** project shall be prepared in consultation with the RVCA and shall be approved prior to commencement of the constructed wetland embayment. The plan shall include three years of monitoring for effectiveness of the new wetland feature (year 1, 3, 5) and shall identify plans to address deficiencies.

## ARTICLE 6 ROADWAYS, BUS TERMINALS, AND LAY-BYS

### 6.1 Reference Documents

- (a) Project Co shall complete the Works in accordance with the criteria contained within this Article, the Applicable Law, all the City of Ottawa's by-laws, regulations, policies, standards, guidelines and practices applicable to the Project, including but not limited to the following Reference Documents:
  - (i) The criteria in this Article 6 – Roadways, Bus Terminals and Lay-Bys, including Appendices;
  - (ii) AASHTO, Guide for Design of Pavement Structures;
  - (iii) City of Ottawa, Standard Tender Documents;
  - (iv) City of Ottawa, Transportation Master Plan;
  - (v) City of Ottawa, Official Plan;
  - (vi) City of Ottawa, OC Transpo - Transitway and Station Design Guidelines (June 2013);
  - (vii) City of Ottawa, Municipal Road Activity (By-law No. 2003-445) and Guidelines for Completing the Application for Road Cut Permit;
  - (viii) City of Ottawa, Municipal Traffic and Parking (By-law No. 2003-530) - City of Ottawa Regulating Traffic and Parking on Highways;
  - (ix) City of Ottawa, Municipal Zoning (By-law No. 2008-250) Consolidation;
  - (x) City of Ottawa, Transit-Oriented Development Guidelines;
  - (xi) City of Ottawa, CADD Standards;
  - (xii) City of Ottawa, Urban and Rural Truck Routes Map;
  - (xiii) City of Ottawa, Road Corridor Planning & Design Guidelines - Urban and Village Collectors / Rural Arterials and Collectors;
  - (xiv) City of Ottawa, Right-of-Way Lighting Policy;
  - (xv) City Of Ottawa, Accessibility Design Standards;
  - (xvi) City of Ottawa, Transportation Impact Assessment Guidelines;

- (xvii) Region of Ottawa-Carleton, Regional Road Corridor Design Guidelines;
  - (xviii) MTO, Ontario Pavement and Rehabilitation Manual;
  - (xix) MTO, Ontario Provincial Standard Drawings;
  - (xx) MTO, Ontario Provincial Standard Specifications;
  - (xxi) MTO Materials Information Report MI-183 “Adaptation and Verification of AASHTO Pavement Design Parameters for Ontario Conditions”;
  - (xxii) MTO, Ontario Traffic Manual Books 1 through 18;
  - (xxiii) MTO, Roadside Safety Manual;
  - (xxiv) TAC, Geometric Design Guide for Canadian Roads;
  - (xxv) TAC, The Canadian Road Safety Audit Guide;
  - (xxvi) TAC, Guide to Bridge Traffic and Combination Barriers;
  - (xxvii) OC Transpo, Interaction Zone Design Guidelines for Bus Stops and Bike Lanes
  - (xxviii) Other relevant City of Ottawa Operation Policy, Procedures and Guidelines.
- (b) Project Co shall design and construct all Roadways under the scope of Works in accordance with the geometric Design Criteria contained in this Article 6 and applicable appendices, and standards and manuals included in Clause 6.1(a) of this Part 2, and if there is any conflict between the criteria contained in this Part 2 and standards and manuals included in Reference Documents, the following shall apply in descending order of precedence:
- (i) The criteria contained in Appendices A and B of this Part 2;
  - (ii) The criteria contained in this Article 6;
  - (iii) The applicable City of Ottawa Standard Tender Documents and applicable standards and guidelines;
  - (iv) TAC, Geometric Design Guide for Canadian Roads;
  - (v) TAC, The Canadian Road Safety Audit Guide;
  - (vi) MTO, Roadside Safety Manual.

## 6.2 General Requirements

- (a) Project Co shall provide the design, including obtaining all necessary approvals, and supply the materials, labour, equipment, inspection and testing in order to fulfill the requirements for the execution and Commissioning of the Works.
- (b) The overall engineering design and construction requirements of the Works, including typical cross-sections and geometric Design Criteria, are primarily based on the contents of this Part 2, and the Reference Documents from the City of Ottawa and TAC.
  - (i) Project Co shall design the proposed improvements on all Works according to the Design Criteria included in Appendix A of this Part 2. In all cases where a specific Design Criteria is not provided for a Roadway and/or interchange in Appendix A of this Part 2, Project Co shall undertake a detailed survey and review of the existing conditions, confirm the Roadway and/or interchange ramps geometric Design Criteria by referencing the existing, appropriate standard and proposed design parameters, in order to address the necessary improvements.
    - A. Under the circumstances whereby an existing Roadway, impacted by the Works, does not meet current TAC standards, Project Co shall design and construct the necessary Roadway improvements so that either the existing conditions of the Roadway will be maintained or upgraded to meet current standards within the available Lands.
    - B. Project Co shall also undertake a detailed intersection operations and level of service analysis associated with the necessary improvements on all impacted signalized intersections. Project Co shall demonstrate that the traffic operations and levels of service are acceptable and feasible using projected traffic volumes, expected transit operations for 2031 horizon year per the requirements of the City of Ottawa Transportation Impact Assessment guideline, including pedestrian and cyclist movements.
    - C. Project Co shall submit to the City the results of above-noted investigations by submitting an existing conditions report, a preliminary design report including the proposed Design Criteria and design synopsis, and a separate traffic analyses report and seek approval from the City at least 20 calendar days prior to initiating the development of geometric design.
  - (ii) Project Co shall undertake all necessary traffic and transit assessments, modelling and analysis including vehicular and non-vehicular road user needs, using projected traffic volumes as specified in Appendix A of this Part 2 for a horizon year of 2031 to determine the necessary Roadways and traffic improvements and provide the requisite design and construction of such works, as per the

requirements of the City of Ottawa's TIA guidelines and other applicable standards.

- A. All traffic data used for analysis for traffic management purposes shall be based on the most current data and shall be no older than two years. The information to be collected shall include, but not be limited to all of the hourly traffic volumes and AADTs for all modes of travel on all Roadways, bus Facilities, bike facilities and pedestrian facilities which will be affected by the Project and as a part of the permanent Works. Project Co shall be responsible for obtaining or collecting all traffic data necessary for its traffic analysis, if traffic data less than two years old is not relevant to the traffic analysis due to temporary conditions that existed at the time the data was collected, then the data shall not be used for analysis for traffic management purposes. Project Co shall confirm with the City that the data is appropriate prior to conducting an analysis using said data.
  - B. Project Co shall undertake a traffic management study to determine the traffic impacts on other intersections and local road networks that are impacted as the result of the Project permanent Works and to determine appropriate mitigation measures, if road capacity and level of service is reduced. The traffic management study shall involve area wide traffic modeling to determine impacts to all modes of transportation including adjacent corridors impacted by the permanent Works. The study shall include Project Co's forecast for, but not limited to, changed traffic volumes, speeds, and travel times for all modes of travel on all routes subject to the study. The traffic management study shall be submitted as a part of the Project Co's traffic report document in accordance with Schedule 10 – Review Procedure.
  - C. All vehicle, transit customer, pedestrian, and cycling data used for analysis for traffic management purposes shall be based on the most current data, and no older than two years with growth factors acceptable to the City. Project Co shall be responsible for obtaining any vehicle, pedestrian, and cycling data necessary for its traffic management analysis.
- (iii) Appendix B of this Part 2 demonstrates only the minimum lane requirements and lane configurations at certain intersections that Project Co is responsible for in their design and construction. Shall Project Co's traffic and transit assessment, modelling and analysis determine that additional traffic lanes and improvements are required in addition to the information shown in Appendix B of this Part 2, Project Co shall be responsible for the design and construction of all such improvements.

- (c) Basic ROW widths and protection requirements shall reference the City of Ottawa's Transportation Master Plan and Official Plan (Annex 1).
- (d) Design Criteria, Road Classifications and Design Speed Considerations.
  - (i) Design Criteria parameters, based on the Roadway classifications, shall reference:
    - A. City of Ottawa Transportation Master Plan – Annex B Maps;
    - B. City of Ottawa Official Plan – Schedule B and Annex 1;
    - C. City of Ottawa Road Design Guidelines:
      - i Region of Ottawa-Carleton, Regional Road Corridor Design Guidelines; and
      - ii City of Ottawa Road Corridor Planning & Design Guidelines - Urban and Village Collectors / Rural Arterials and Collectors.
  - D. Appendix B of this Part 2.
  - (ii) In general, the designation of design speeds shall be based on the speed limits currently posted for the respective Roadways, unless specified otherwise in this Article 6. Project Co shall design the modifications intended on the existing urban collectors or arterials that have design speed of 60 km/hr or lower as per the TAC GDGCR guidelines applicable to low-speed roads subject to retrofit conditions. The design of new or existing arterial roads and highways with design speeds greater than 60 km/hr shall meet the requirements of high-speed roads as per TAC GDGCR requirements accordingly.
  - (iii) In the absence of City of Ottawa adopted standards, Design Criteria parameters shall reference the TAC GDGCR.
- (e) Project Co shall obtain approval from the City for all Works, including construction Works that involves the modification of existing City infrastructure, contained within the scope of Works.
- (f) Project Co shall determine the road cross slope based on the road classification using the City standards and TAC GDGCR requirements and to match the existing cross slope of the undisturbed section.
- (g) Superelevations shall satisfy the pertinent requirements as per the road classification, and City of Ottawa's design guidelines and standards, TAC GDGCR requirements.

- (h) Project Co shall refer to Article 4 – Structural Design Criteria and Requirements, of this Part 2, for any structural requirements associated with the Roadway improvements specified in this Article 6.
- (i) Project Co shall design and construct all necessary requirements for landscape, road furniture and streetscape elements required in all Works as per the requirements of Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.
- (j) Project Co shall design and construct the necessary Utilities and associated underground and above ground infrastructures for the Works per the requirements of Article 8 – Utility Infrastructure Design Criteria, of this Part 2.
- (k) Project Co shall design and construct all necessary temporary improvements, traffic staging detours, and all associated improvements necessary to support the construction of permanent Works as per the requirements of Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.
- (l) Project Co shall design and construct all Roadway improvements to meet the applicable accessibility requirements, including but not limited to COADS or AODA.
- (m) Project Co shall set the criteria for total and differential post-construction settlements of the Pavement to satisfy the requirements of Clauses 6.10, 6.11, and 6.12 of this Part 2, including Embankment Settlement Criteria for Design, July 2010, MTO.

### **6.3 Horizontal Alignment**

- (a) The geometric characteristics of the horizontal alignment shall meet the requirements of the TAC GDGCR, unless otherwise specified in Article 6. In particular, the following requirements shall apply:
  - (i) Minimum radius and maximum superelevation rate requirements shall correspond to the existing road characteristics as per the road classifications in Clause 6.2 – General Requirements of this Part 2. For urban collectors, the maximum superelevation rate ( $e_{\max}$ ) shall be limited to 2%. For local Roadways, no superelevation is required. For new construction road improvements, the maximum superelevation rate ( $e_{\max}$ ) shall be 4% for low-speed urban arterial roads with design speed of 60km/hr or lower. For new rural roads and new high speed urban arterial applications (i.e. urban roads with design speeds greater than 60km/hr) the maximum superelevation rate shall be 6%. Project Co shall follow the criteria specified in TAC GDGCR (Clause 2.1.2.2 – Circular Curves, Maximum Superelevation: Design Domain) for all other retrofit conditions.
  - (ii) For urban conditions, the minimum length of curve shall be between 30m to 60m.

- (iii) For high-speed urban roads (i.e. Urban roads with design speeds greater than 60 km/hr) and all rural roads, Project Co shall apply spiral curves to the design of the horizontal alignment.
- (iv) Project Co shall provide a shy line offset from edge of road lane to Station walls, portal walls, bridge railings, barriers, stop structures, retaining walls and any other obstruction located within the road clear zone for the safe operation of vehicular traffic in the road ROW. The shy line offset values shall be to TAC standards and treatment within the shy line distance and shall be to the guidelines specified in TAC Guide to Bridge Traffic and Combination Barriers and MTO Road Side Safety Manual.

#### **6.4 Vertical Alignment**

- (a) Vertical alignment shall meet the requirements of the TAC GDGCR, unless specified otherwise in this Article 6. The following main geometric parameters pertinent to the vertical alignment shall apply:
  - (i) Minimum gradient: Minimum grades shall satisfy the requirements of TAC GDGCR Section 2.1.3 under Minimum Grades: Design Domain Application Heuristics - Urban Areas.
  - (ii) Equivalent minimum “K” Values: The vertical curve geometry shall reference the requirements of the TAC GDGCR Section 2.1.3.3 – Item 2:
    - A. “K” value for crest curves shall satisfy the upper limits of the SSD requirements. In all cases, Project Co shall confirm appropriate SSDs by calculating the distance travelled during deceleration and perception and reaction time, considering the effect of grades on deceleration and verified against available sight lines according to TAC GDGCR; and,
    - B. “K” value for sag curves shall satisfy the upper limit of the requirements of headlight control and comfort control.

#### **6.5 Sight Distance Requirements**

- (a) Project Co shall satisfy the upper limit of the required sight distances beyond the minimum sight distance requirements at all intersections and in particular in situations where there are increased interactions between vehicular traffic and non-vehicular modes of traffic, such as areas within 150m of Stations entrances.
  - (i) Project Co shall determine visibility sight triangles and SSD for road horizontal and vertical geometry. Project Co shall ensure that the sight distances provided in the design meet or exceed the minimum sight distance requirements of the TAC

GDGCR based on calculations considering the corresponding Design Criteria parameters.

- (ii) Project Co shall design DSD in accordance with requirements of the TAC GDGCR.

- (b) Project Co shall determine all ISD requirements, including approach, departure, and crossing ISDs, and visibility triangles using the appropriate design vehicle(s) at all intersections according to the criteria specified in the TAC GDGCR.

## **6.6 Access and Intersection Layout**

- (a) Project Co shall design and construct Pavement markings, traffic signs, traffic control signals and underground traffic plants in accordance with the requirements of the applicable Reference Documents.
- (b) Project Co shall design all intersection layouts and lane configurations to address all system users' requirements including pedestrian, cyclist, transit and vehicular traffic. Project Co shall give precedence to intersection design characteristics which preserve and enhance the public Safety, minimize the area impacts, and respond to the traffic demand.
- (c) Project Co shall design and construct street lighting in accordance with Clause 6.15 – Street Lighting of this Part 2.
- (d) Project Co shall design and construct all intersection layouts, lane widths, ramp throats, and Pavement widths using the appropriate design vehicle as defined in Clause 6.8 – Design Vehicles, Clause 6.9 – Facilities Operated by OC Transpo, and Appendix A of this Part 2.
  - (i) Project Co shall design intersection geometry such that the turning radius of the selected design vehicles is applied from traffic lane to traffic lane.
  - (ii) Project Co shall design intersection layouts so that turning movements will not encroach on cycling lanes.
- (e) All pedestrian and cycling crossing facilities shall meet the City requirements and reference OTM Book 15 and OTM Book 18.

## **6.7 Cross-Section Elements**

- (a) Project Co's design of typical cross-sections for Roadways shall be in accordance with the requirements of City of Ottawa Design standards, TAC GDGCR and MTO GDSOH, unless specified otherwise in the Roadways corresponding Design Criteria (Refer to Clause 6.18 – Municipal Roads of this Part 2).

- (i) Auxiliary lane width, where applicable, shall satisfy the requirements of Special Purpose Lanes as specified under Clause 2.2.3 of the TAC GDGCR; and,
- (ii) Project Co shall provide a cross-slope of 2% towards the curbs or shoulders in order to provide improved surface drainage runoff on paved tangent Roadways, unless specifically noted otherwise in the specific municipal Roadway improvements in Clause 6.18 – Municipal Roads of this Part 2.

## **6.8 Design Vehicles**

- (a) Project Co shall use the appropriate design vehicles to design the intersection layout geometry, and to accommodate the applicable sight distances and horizontal and vertical Roadway clearance requirements. For additional requirements pertinent to horizontal and vertical clearances under Overhead Structures, refer to Article 4 – Structural Design Criteria and Requirements of this Part 2. Selection of the largest design vehicle for each Roadway, bus facility, ramp, etc. shall follow the subsequent criteria:
  - (i) Commercial Trucks, including WB-20 shall govern the design for all intersections, roads, and streets that are designated as a truck route in the City of Ottawa's Urban and Rural Truck Route Maps.
  - (ii) Commercial Heavy Single Unit Trucks, and the largest Emergency vehicles, including fire and paramedic vehicles shall govern the design for all other intersections, roads, and streets that are listed as non-truck routes.
  - (iii) All roads and streets that are a designated bus routes shall accommodate the turning movement requirements of the City's B-12 standard bus, articulated bus, double decker bus, and Para-Transpo vehicles.
  - (iv) Where applicable, inter-City bus and school bus shall govern the design of roads, streets, and intersections.
  - (v) Where applicable, maintenance vehicles including snow removal vehicles and garbage trucks shall govern the design of roads, streets, and intersections.
  - (vi) Clearance requirements for opposing left-turn design: in design of intersections with multiple left-turn lanes, especially where simultaneous opposing left turns exist, Project Co shall ensure that design vehicle is appropriately selected. In the design of intersection layouts with double turn left lanes, the design shall accommodate the simultaneously turning manoeuvres of the largest design vehicle with a second Light Single Unit truck. Under extremely constrained conditions, as a minimum, a simultaneous double left-turn design shall accommodate the largest design vehicle turn with a passenger car.

- (vii) Project Co shall design and construct all improvements on intersection layouts, and Roadways geometry using turning simulation software (Transoft AutoTURN) with the appropriate design vehicle turning templates to allow for simple turning movements using the generate corner path method.
  - A. Minimum turning speed of a design vehicle shall not be assumed less than 15 km/hr. Only in extremely constrained conditions, where Project Co can demonstrate that no feasible design solution can be developed considering a 15 km/hr turning speed, a minimum 10 km/hr turning speed may be acceptable.
  - B. The design of OC Transpo bus turning paths shall satisfy the requirements of the OC Transpo - Transitway and Station Design Guidelines. Bus design turning speeds at intersection corners and curb returns shall not be less than 15 km/hr. Also refer to Clause 6.9 – Facilities Operated by OC Transpo of this Part 2.
- (b) Project Co shall have regard to the Official Plan and Policy designations for the affected areas and Roadways, including the City of Ottawa Multi-Modal Level of Service targets which are affected by curb radii. Pedestrian and cycling LOS targets are especially high in the central area, near schools and rapid transit stations and every effort shall be made to achieve these targets within the context of the City of Ottawa Complete Streets Implementation Framework.

## **6.9 Facilities Operated by OC Transpo**

- (a) Project Co shall design and construct all OC Transpo Roadways and Facilities to meet the interim and ultimate operational requirements of the City during all Construction stages and following Revenue Service. Project Co shall obtain the City's approval prior to advancing the design of all Roadways and facilities operated by OC Transpo.
- (b) Project Co's design and construction of all temporary or permanent bus stop Facilities, Station amenities, infrastructure and shelters shall meet the requirements of Schedule 15-2, Part 4 - Stations, including Appendix A and B, and shall comply with City accessibility design standards and features, including but not limited to COADS requirements.
- (c) Unless specified otherwise, Project Co shall accommodate the following requirements:
  - (i) The primary reference for the design, construction and operational requirements of all roads, accesses, bus Platforms, PPUDO and Park and Ride facilities operated by OC Transpo is OC Transpo's Transitway and Station Design Guidelines.

- (ii) The primary reference for the design of all Roadways and bus transit Facilities operated by OC Transpo including but not limited to the design speeds, geometric Design Criteria, horizontal and vertical alignments, auxiliary lanes, intersection geometry, cross-section components, drainage requirements, ramp design, pedestrian and cyclists connectivity, safety and security, accessibility, bus station Platform layouts and turnaround circulation geometry and other Roadways, facilities, and structural details shall meet the requirements of OC Transpo's Transitway and Station Design Guidelines. For specific Station Site design layout requirements with respect to pedestrian and cyclists' connectivity refer to Schedule 15-2, Part 4 – Stations and Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements.
- (iii) For the design and construction of Park and Ride facilities, in the event of a conflict between the criteria contained in this Article and any other City or OC Transpo's reference document(s), the following shall apply in descending order of precedence:
  - A. All criteria and requirements specified in this Article 6 and in other pertinent parts and clauses of this Part 2;
  - B. City of Ottawa, OC Transpo - Transitway and Station Design Guidelines (June 2013);
  - C. COADS;
  - D. City of Ottawa, Municipal Traffic and Parking (By-law No. 2003-530) - City of Ottawa Regulating Traffic and Parking on Highways;
  - E. City of Ottawa, Municipal Zoning (By-law No. 2008-250) Consolidation; and,
  - F. City of Ottawa, Transit-Oriented Development Guidelines.
- (iv) Sidewalks associated with bus stops and Station Platform areas shall accommodate positive drainage and have a minimum grade of 0.5% towards the curb.
- (v) Bus shelters, bus stop pad, shelters with sidewalk and boulevard shall satisfy the requirements of both the City's Standard Tender Documents and the OC Transpo's Transitway and Station Design Guidelines, unless specifically noted otherwise in Schedule 15-2, Part 4 – Stations and/or in Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements. In particular, for additional landscape Site design provisions such as bus shelters, lighting, and shade tree requirements refer to Schedule 15-2, Part 4 – Stations and

Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements.

- (vi) Design of bus loops, bus driveway accesses, bus stops, bus Platforms and bus lay-bys in bus Station Facilities shall meet the following requirements:
  - A. Project Co shall design and construct the bus Facilities, Station amenities and infrastructure that will be used for the operation of buses as per the standard established in this Part 2. Project Co shall submit the design of all bus Station Facilities for review in accordance with Schedule 10 - Review Procedure. The bus Station Facility submission shall include sufficient detail to allow the City to understand the full operation of the bus Facility, including interface with any other activities on the Site, all Station amenities, and infrastructure.
  - B. Project Co shall run AutoTURN analysis to confirm the suitability of the design. Project Co shall obtain the dimensions and characteristics of a typical OC Transpo bus vehicle prior to performing the AutoTURN analysis for the appropriate bus design vehicles. Project Co shall submit the turning movement results for review and approval in accordance with Schedule 10 – Review Procedure and shall consider the following requirements:
    - i Buses shall line up parallel to the bus Platforms with a distance of no more than 150mm (preferred)/ 300mm (absolute maximum) from Platform curbs.
    - ii All bus maneuvers in the swept path analysis shall ensure a smooth, continuous movement without instantaneous steering movements. The swept path analysis shall not include 0m radius turns, with the exception of the first turn away from a parking spot under constrained conditions.
    - iii Project Co shall perform field tests for compliance and functionality of bus movement clearance through the means of a bus test on mock-up facilities (demarcating curbs and other features using traffic cones and or paint lines) with dimensions identical to the proposed bus Facilities.
    - iv Project Co shall design bus loops and driveways for one way circulation at bus terminals. Exceptions to the above requirement may be acceptable where a two-way circulation offers better transit operations, for which Project Co shall consult with and seek

- approval from the City prior to proceeding with such alternative design.
- v All bus loops and driveway accesses shall allow buses to safely pass stalled or parked buses.
  - vi Project Co shall ensure a bus can maneuver parallel to the Platform curbs and depart independently of parked busses with the assistance of vehicle turning movement simulation software or the appropriate turning movement templates. Project Co shall submit the turn analysis to the City for review and approval in accordance with Schedule 10 – Review Procedure.
  - vii Project Co shall provide a clearance of 0.5m between bus movements and all obstructions, including the worst case stopping positions of buses in bus bays and lay-by areas.
  - viii Project Co shall simulate the appropriate bus turning movements considering the minimum outside turning radius (wall to wall radius) to allow for simple turning movements using the “Generate Corner Path” function (Transoft AutoTURN) at the appropriate turning speeds referenced in Clause 6.8 of this Article 6 for operating efficiency.
- C. Project Co shall design and construct bus Platforms, Station amenities, and associated infrastructure located on the Platforms so that these elements are unobstructed and appropriately sized to accommodate the volume of Passengers boarding and exiting the buses. Project Co’s design shall provide for additional area to accommodate peak load volumes, not less than the minimum stated as per the OC Transpo’s Transitway and Station Design Guidelines.
- D. Project Co shall design and orient bus stops to allow Passengers to load and unload from the right side of a bus, providing Passengers with direct access to pedestrian pathways and / or into the bus terminals or Station entrance, without having to cross the front or rear of a bus. Project Co shall not provide pedestrian crossings within bus facilities without written consent and approval from the City. The design shall preclude such behaviour in addition to placing appropriate and accessible TCDs. Under exceptional circumstances, where the above requirements cannot be met due to constrained conditions and a crossing facility is required, Project Co shall confirm the appropriate traffic control requirements and demonstrate that the pedestrian crossing facility is safe and meets bus operational requirements. Project Co shall present a risk analysis

developed by a certified traffic Safety auditor prior to design and implementation and seek approval from the City.

- E. Project Co shall locate bus stops, designated as drop-off Platforms, as close as possible to the driveway entrance and Station entries.
- F. Project Co shall consult with and seek approval from the City and OC Transpo with respect to the dimensions, layout, and location of all bus stops and bus lay-by areas and the preferred bus stop grouping and arrangements at Platform locations (i.e. single, double, or triple stops).
- G. Bus Platforms shall not be located on curved laneways.
- H. Project Co shall design and construct all permanent and temporary bus stops during staged Construction to include safe and secure pedestrian access from / to bus stops and all bus stop shelters as per the requirements specified in COADS and Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access. Project Co shall reference Schedule 15-2, Part 4, Appendix B for any applicable permanent bus terminal requirements.

#### **6.10 Pavement**

(a) Order of Precedence

- (i) Project Co shall provide the Pavements in compliance with the criteria contained in this Article, the Applicable Law, standards, guidelines or practices applicable to the Project and including but not limited to each of the following Reference Documents.
- (ii) In the event of a conflict between the criteria contained in this Article and any Reference Document(s), the following shall apply in descending order of precedence for design and construction of Pavements:
  - A. The criteria contained within this Article;
  - B. OPSS;
  - C. OPSD;
  - D. The City's Current Version of Design Guidelines, Standard Tender Documents and Specifications;
  - E. Ontario Provincial Standards for MTO Designated Source of Materials (DSM);

- F. Procedures for Estimating Traffic Loads for Pavement Design, 1995, MTO;
  - G. MTO Materials Information Report MI-183 “Adaptation and Verification of AASHTO Pavement Design Parameters for Ontario Conditions”;
  - H. MTO Ontario’s Default Parameters for AASHTOW are Pavement ME Design Interim Report, 2014;
  - I. 1993 AASHTO Guide for the Design of Pavement Structures;
  - J. Canadian Portland Cement Association – Thickness Design for Streets and Highways;
  - K. MTO Directive PHM-C-001 The Use of Surface Course Types on Provincial Highways;
  - L. MTO Pavement Design and Rehabilitation Manual (Second Edition);
  - M. The criteria contained within Article 7 – Geotechnical Design Criteria and Requirements, of this Part 2;
  - N. Embankment Settlement Criteria for Design, July 2010, MTO;
  - O. ASTM Standards; and,
  - P. MTO Laboratory Standards.
- (iii) For the design of rigid concrete Pavements, Project Co shall use both MTO’s Routine Method as described in the *Pavement Design and Rehabilitation Manual* and the *Canadian Portland Cement Association’s Simplified Design Procedure* in addition to the foregoing AASHTO guide for Design of Pavement Structures.
- (b) General Requirements
- (i) In general, the design of Pavement structure(s) shall be the responsibility of Project Co and be based on the City’s current Pavement design practices.
    - A. Project Co shall follow the requirements of the OC Transpo’s Transitway and Station Design Guidelines for Pavement design of paved areas subject to bus traffic, Park and Ride lots, and Facilities operated by OC Transpo vehicles.

- B. Pavement structure shall be of a flexible (asphalt) Pavement design outside bus Station Platform areas, where paved areas are subject to bus traffic, unless otherwise approved by the City.
  - C. Project Co shall incorporate a rigid (concrete) Pavement structure within, at a minimum, the limits of the concrete Platforms. OC Transpo's Transitway and Station Design Guidelines shall be utilized for the approximate limits for concrete Pavement for a typical side loading Station. Project Co shall review the concrete Pavement limits for Stations with center loading Platforms, based on the Station layout, bus access and operational requirements, recommend an appropriate Pavement design and seek approval from the City prior to advancing the design. Project Co shall provide an extension of concrete Pavement 30m exceeding the Platform. A proper transition treatment shall be provided from one Pavement type to another.
- (ii) Project Co shall be responsible for design of all new Pavements and all existing paved areas that are subject to upgrade or reinstatement as a part or result of the Work both during temporary staged construction and in post construction. Project Co shall reinstate the Pavement to match the standards of either the existing adjacent Pavement structure or the current City and OC Transpo's standards and requirements specified in this Article, whichever is more stringent. In all cases, the Pavement reconstruction shall be in accordance with the following requirements:
- A. Where the existing Pavement structure adjacent to a localized widening is greater than current City standards and requirements specified in this Article, the new Pavement structure shall match the existing Pavement structure; and,
  - B. Where the existing Pavement structure adjacent to a localized widening is the same or less than the current City Standards, the new Pavement structure shall match the current City standards and requirements specified in this Article.
- (iii) Project Co shall design and build all Pavement structures in compliance with City standards in areas where Pavement structures will be built as New Municipal Infrastructure, in City ROW. Project Co shall be responsible to obtain the acceptance from the City of all works within the City ROW prior to construction. In areas where the Pavement structures will be built as New Municipal Infrastructure, on Federal Lands, Project Co shall complete Pavement designs following City standards for review and approval from Governmental Authorities in accordance with the procedures established by the respective Governmental

Authority. Project Co shall comply with the Governmental Authority permits requirements and conditions.

- (iv) Project Co shall ensure that any roads or sections of roads with unfinished Pavement, including but not limited to milled Pavement or Pavement without a surface course opened to traffic, including but not limited to public or construction traffic, are designed to carry the expected traffic and to prevent water penetration. Project Co shall maintain and ensure all unfinished pavement opened to traffic are in compliance with the City standards prior to final paving. For milled pavement surfaces, Project Co shall follow the requirement of Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access.
- (v) Project Co shall ensure that design and construction of flexible and rigid Pavement structures for all paved Roadways and paved bus Facilities such as lanes, ramps, lay-bys, and Park and Ride Facilities, and paved storage areas, as per the following:
  - A. For the bus terminals and loops, Project Co shall design and construct the Pavement of the bus facilities for uninterrupted operation of the OC Transpo's buses in light of the expected bus volumes. Project Co shall submit a Pavement Design Report in accordance with Schedule 10 – Review Procedure for all paved facilities stating their consideration of the bus volumes and assumptions of private vehicles. Project Co's report shall also include a Site-specific recommendation for the periodical Maintenance and rehabilitation of the paved facility considering the facilities Design Life.
  - B. Project Co shall consider factors such as traffic volumes, subgrade conditions, environmental effects, construction traffic, availability and suitability of Construction materials and performance of similarly loaded Pavements in the area, and economics when determining a suitable Pavement design.
  - C. Project Co shall provide Site-specific Pavement design reports for the Project in accordance with Schedule 10 – Review Procedure.
  - D. Project Co shall consider the influence of heavy equipment and delivery vehicles during construction during the design process, particularly with respect to the thickness of sub-base material and the native subgrade conditions.
  - E. Project Co's Pavement design report shall provide localized Pavement designs that shall mitigate potential Pavement sliding or rutting in areas

along bus Platforms, within access ramps, bus stops, and bus lay-by locations, which are subject to repeated bus turning movements.

(c) Design and Performance Requirements

- (i) Project Co shall ensure that the Roadway Pavement structure conforms to the latest standards of the Governmental Authorities.
- (ii) Project Co shall ensure that designed Pavement structure has a Pavement life cycle as specified in Schedule 15-2, Part 1, Article 4 – Design and Construction. In the absence of City standards, Project Co shall comply with the following specific OPSS requirements related to the Pavement works, where applicable:
  - A. OPSS 510 for Removals;
  - B. OPSS 206, and 514 for Excavation;
  - C. OPSS 212 for Filling;
  - D. OPSS 501, 1010 for Granular Material. Thickness shall be suitable for the Roadway's intended use;
  - E. OPSS 310, 311, 312 for Hot Mix Asphalt paving. Thicknesses shall be suitable for the Roadway's intended use;
  - F. OPSS 350 for concrete Pavement and Concrete base. Thickness shall be suitable for its intended use;
  - G. OPSS 353 and 312 for Concrete/Asphalt, curb and gutter, and medians, where applicable;
  - H. OPSS 405 for Pipe Subdrains; and,
  - I. OPSS 355 for Interlocking concrete pavers suitable for its intended use.
- (iii) Project Co shall ensure that all the Pavement surfaces in areas drivable by vehicles shall have paved surfaces and comply with all expected performance characteristics for safe use by the public.
- (iv) Project Co shall design and construct appropriate drainage systems that meet the City's standard when Pavement type is transitioned from interlocking pavers to flexible Pavement.
- (v) Project Co shall ensure that the grading conforms to the requirements of OPSS 206 (Construction Specification for Grading) for work within municipal

jurisdictions. The Compaction shall conform to the requirements of OPSS 501 (Construction Specification for Compacting) for work within municipal jurisdictions. Granular Base and Sub-base shall be according to OPSS 314.

(d) Smoothness and Other Ride Quality

- (i) Following Substantial Completion, the completed Pavements shall meet the smoothness criteria provided in SP 103F31 for hot mix asphalt Pavements.

**6.11 Grading**

- (a) Project Co shall design and construct all earthworks and grading requirements so that all such work conforms to the relevant City Standards and Specifications or in absence of such standards to the following:
- (i) OPSS 206 - Earth and Rock Excavation;
  - (ii) OPSS 212 – Borrow;
  - (iii) OPSS 501 – Compacting;
  - (iv) OPSS 511 - Rip-Rap, Rock Protection and Gravel Sheeting;
  - (v) OPSS 570 – Topsoil;
  - (vi) OPSS 572 - Seeding and Mulching; and,
  - (vii) OPSS 803 – Sodding.
- (b) Project Co shall meet the requirements of Schedule 15-2, Part 1, Article 5 – Implementation Constraints, in the design and construction of all earthworks and rock excavations.
- (c) Grading includes excavation of native material and fill of approved materials as required for Construction in accordance with the recommendations resulting from Pavement design reports.
- (d) Project Co shall manage all excess and imported material per the requirements described in Schedule 17, Part 4 – Contaminated and Excavated Material Management.
- (e) Project Co shall maintain positive drainage during construction on all areas subject to grading at all times. Project Co shall treat any cut or fill slopes, left unattended for 30 calendar days or more, with temporary hydraulic mulch, erosion control blankets or vegetative cover.

- (f) Project Co shall minimize and control the amount of dust generated by construction operations at all times within and outside the construction zone. Project Co shall remove any mud, debris or dust deposited outside of the construction zone, on Roadways and in boulevards, resulting from the Works.
- (g) Project Co shall provide the design, approvals, and supply of materials, labour, equipment, inspection and testing associated with application of dust suppressants in accordance with the City of Ottawa Standards and Specifications and OPSS 506.
- (h) Rip Rap Protection and Gravel Sheeting
  - (i) Project Co shall provide the design, approvals, and supply of materials, labour, equipment, inspection and testing associated with rip-rap and rock protection in accordance with the City Standards and Specifications and OPSS 511.
- (i) Dewatering
  - (i) Project Co shall provide the design, approvals (permits to take water, where required), supply of materials, labour, equipment, inspection and testing associated with all the dewatering Works.
- (j) Temporary Measures
  - (i) Project Co shall adjust all Roadway infrastructure, including but not limited to catch basins, maintenance holes, valve chambers, and any other structures in the Roadway, flush with the base asphalt lift in order to provide snowplough protection in areas where the final lift of asphalt is not paved in advance of winter shutdown. Project Co shall design and construct temporary asphalt curbs to contain Roadway drainage at the proposed curblines of catch basins and maintenance holes. Project Co shall remove and make final adjustments immediately prior to placement of the surface course asphalt.
  - (ii) Project Co shall restore all trenches to match the existing original conditions or to the new construction cross section 24 hours of the completion of the trench. In situations where the trench is Constructed in consecutive stages with a delay in between, Project Co shall restore the trench in stages within 24 hours after the completion of each stage.
  - (iii) Project Co shall provide temporary conditions design drawings to specify all temporary measures and are responsible for all costs associated with the above noted work.

## **6.12 Drainage**

- (a) Project Co shall provide the drainage in accordance with the criteria contained in this Article 6 and in Article 5 – Drainage and Stormwater Management Design Criteria of this Part 2 and the applicable Reference Documents.

## **6.13 Traffic and Transit Signals**

- (a) General
  - (i) Project Co shall liaise and coordinate with the City and the City's designated traffic control signal contact person, with regards to all modifications that may be required at municipal traffic signals during the design and construction period. Project Co shall support all proposed modifications with traffic engineering analysis to meet the City's traffic signal requirements and standards.
  - (ii) Project Co shall define the coordination scheme, and coordinate all work with the City for municipal traffic signals that are included in the traffic signal coordination scheme.
  - (iii) Project Co shall reference the information provided in Schedule 15-2, Part 7, Clause 1.11, and coordinate with the City to identify and confirm the location of all existing and new traffic cameras, ITS devices, and all associated infrastructure 60 calendar days in advance of the design stage. Project Co shall require the approval of the City for all relocations, design and construction requirements, and types and specifications of such facilities that are impacted or required as a result of the Works.
- (b) Design and Performance Requirements
  - (i) Project Co shall coordinate the design, approvals and construction requirements for temporary and permanent traffic signals with the City.
  - (ii) For permanent new traffic and transit signal facilities, or new permanent configurations at existing signalized intersections, with the exception of PXOs, the City shall supply and install all above ground traffic signal equipment as required by the governing road authority, including but not limited to controller, poles, pedestrian and traffic signal heads with push buttons, audible displays, etc. The City shall supply, install and make all required terminations for the traffic signal wiring. The City shall provide all equipment and labour associated with the installation of permanent above-ground traffic signal infrastructure. Project Co shall coordinate with the City the design of electrical power feeds for all alterations to existing traffic signals, and new traffic signals; the cost of obtaining new electrical power feeds shall be a City responsibility.

- A. Project Co shall construct all permanent underground traffic infrastructure, including the supply and construction of concrete encased ducts, direct buried ducts, pole foundations, maintenance holes, maintenance hole frames and covers, vehicle loop detection and concrete pads.
  - B. For all permanent signalized intersections, the City shall design the vehicle detection system and specify the type of detection equipment to be used. Project Co shall only be responsible for the cost and coordination of the installation of inductive loop detectors; any other detection equipment specified by the City's design shall be supplied and installed by the City.
  - C. Where the location selected for a traffic signal pole is not suitable for a standard pole foundation, as per City of Ottawa Standard Detail Drawings (e.g., where the pole is designed to go on top of pre-existing utilities), Project Co shall be responsible for the design of the non-standard foundation, in addition to the construction requirement in A. above.
- (iii) For all temporary traffic and transit signals, or temporary modifications to existing signalized intersections, the City shall supply and install all above ground traffic signal equipment as required by the governing road authority including but not limited to controller, poles (with the exception of wood poles), pedestrian and traffic signal heads with push buttons, audible signals, etc. The City shall also supply and install and make all required terminations for the traffic signal wiring. The City shall provide all equipment and labour associated with the installation of temporary above-ground traffic signal infrastructure. Project Co shall coordinate with the City the design of electrical power feeds for all temporary traffic signals or temporary modifications to existing signalized intersections; the cost of obtaining new electrical power feeds shall be a City responsibility.
- A. For all temporary signalized intersections, the City shall design the vehicle detection system and specify the type of detection equipment to be used. Project Co shall only be responsible for the cost and coordination of the installation of inductive loop detectors; any other detection equipment specified by the City's design shall be supplied and installed by the City.
  - B. Where temporary signal infrastructure requires the use of wood poles and/or span wire, the City shall be responsible for the design of signal head placement only. Project Co shall design the location of the wood poles, guy wires, and span wires based on the City's signal head placement.
  - C. Project Co shall construct all temporary underground traffic infrastructure, including the supply and construction of concrete encased ducts, direct buried ducts, pole foundations, maintenance holes, maintenance hole

frames and covers, vehicle loop detection and concrete pads. Project Co shall Construct all above ground infrastructure Works, including but not limited to installation, removals and reinstatement of wood poles, all aerial strand support and suspension cables, guys, anchors, ground rods, and plates, along with any required underground Civil Works including conduit, foundations, manholes/hand holes, frames and covers, as required to accommodate the staged construction of Work, with the exception of traffic signal equipment as described above, which shall remain the responsibility of the City.

- (iv) For all PXOs, Project Co shall supply and install all above ground equipment, including but not limited to poles, hardware, arms, RRFBs, etc. Project Co shall provide the labour associated with the installation of the PXOs.

- A. The design and installation of PXOs shall be in accordance with OTM Book 15, City of Ottawa Pedestrian Crossover Program and Examples Documents 1 and 2, and Appendix F – Pedestrian Crossover Infrastructure Requirements of this Part 2.

- (v) For all temporary and permanent traffic signals, Project Co shall provide interconnection ensuring that all signals can communicate with the City's Traffic Operations Center. Interconnection duct shall be designed by the City and installed by Project Co. The City will consider City-owned system-connectivity infrastructure prior to private-owned infrastructure to establish this connectivity.

(c) Notification Requirements and Timelines

**Table 6.1:** Permanent/temporary new traffic signals or permanent/temporary modifications to existing traffic signals

Item	Description	Notification (Calendar Days)	Prior to	Information to be supplied to City	Information to be supplied to Project Co
1	Design	30	Desired receipt of signal design	1:250 CADD for the intersection, including pavement markings on all approaches	City provides traffic signal design, including traffic signal displays, traffic signal plant design, detection system

					design, etc., within 30 calendar days
2	Commencement of civil works  (prerequisite – signal design completed)	30	Construction of civil works	Date when works are to begin, schedule of work	None
3	Electrical work involving the City  (prerequisite – signal design completed)	30	Construction of civil works	Meeting date regarding electrical works, schedule of work	Contact names and telephone numbers of relevant staff
4	Scheduling of installation date by City forces  (prerequisite – signal design completed)	30	Desired signal installation date	Desired installation date by City forces	Scheduled date for installation to be provided to Project Co within eight calendar days of the notification. Scheduled date shall be within 10 calendar days of Project Co's request
5	City Inspection of civil work completed by Project Co  (pre-requisite – signal installation date)	14	Scheduled signal installation date	Confirmation of work being completed	Confirmation that the work was completed to City satisfaction, within seven calendar days of Project

	scheduled)				Co's notification that work was completed
--	------------	--	--	--	--

- (i) Project Co shall provide 30 calendar days' notice to the City where modification of an approach to a signalized intersection beyond OTM Book 7 applications is being proposed. Project Co shall submit 1:250 scale CADD drawings for all such modifications, as required.
- (ii) Project Co shall prepare and submit TCPs, which show the signal design for the installation of, or modification of a traffic control signal, in accordance with Schedule 10 – Review Procedure. Project Co shall submit these particular TCPs at least 45 calendar days before the start of any Construction Activities related to the installation or modification. Note however, that in the case of multiple simultaneous traffic control signal installations or modifications, the City may require more than 45 calendar days for submission review. Project Co shall meet with the City at least 60 calendar days in advance of these types of scheduled Works in order to discuss the submission schedule, and Project Co shall adjust the submission lead time to a timeframe acceptable to the City.
- (iii) Project Co shall address the City's comments and changes on signs and Pavement marking plans developed as a part of Project Co's TCPs and incorporate the revised plans as applicable. Project Co shall submit the revised drawings to the City at least 30 calendar days prior to the scheduled placement of said signs and Pavement markings, all in accordance with Clause 6.14 – Pavement Marking and Signing of this Part 2 and Schedule 10 – Review Procedure.
- (iv) Per Item 2 from Table 6-1, Project Co shall provide a minimum of 30 calendar days advanced notice to the City prior to commencing the following works:
  - A. Permanent Traffic Signals: Underground Construction of the permanent traffic signals including concrete encased ducts, direct buried ducts, pole foundations, maintenance holes, vehicle loop detection and concrete pads;
  - B. Temporary Traffic Signals: Installation of the temporary traffic signal controller cabinet onto the wood pole; wood poles, double span and anchors along with any required Civil Works including conduit, foundations, manholes/hand holes, etc.,
- (v) Per Item 3 from Table 6-1, a minimum of 30 calendar days prior to Construction, Project Co shall arrange a meeting with the City to coordinate the requirements of

the electrical work involving the City. Project Co shall provide a schedule of the work to the City.

- (vi) In accordance with the schedule specified in Item 4 from Table 6-1, City forces shall perform all traffic signal activations and deactivations.
- (vii) Per Item 5 from Table 6-1, at least 14 calendar days prior to the date scheduled for the City to install the traffic signal equipment, Project Co shall have completed their portion of the Work for permanent and/or temporary traffic signals modification/installation, and provided the City with notice that the Works are complete.

#### **6.14 Pavement Marking and Signing**

(a) General

- (i) Project Co shall provide the design drawings and obtain approvals from the City for all permanent and temporary Pavement marking and Roadway signs.
- (ii) Project Co shall provide the design drawings and obtain approvals from the City for all permanent and temporary Pavement marking and signage at the locations of bus Transitway and Facilities operated by OC Transpo.
- (iii) Unless specified otherwise in this Article 6, Project Co shall provide all signing and Pavement markings in accordance with the criteria contained in this Article 6, the requirements of OPSS, and the applicable Reference Documents.

(b) Design and Performance Requirements

- (i) Project Co shall design, obtain approvals, and comply with construction requirements for permanent Pavement markings as per the City of Ottawa's standards and specifications and applicable OPSS.
- (ii) Project Co shall provide for the supply of materials, labour, equipment, inspection and testing associated with the requirements for all temporary Pavement markings during construction.
- (iii) The City shall supply all labour, equipment and materials for the supply and installation of all permanent Pavement markings between April 16 and November 14. Project Co shall supply all labour, equipment and materials for the supply and installation of permanent Pavement markings between November 15 and April 15.

- (iv) Project Co shall supply all labour, equipment, materials, inspection and testing associated with the requirements for all temporary and permanent non-regulatory signing.
- (v) The City shall supply all labour, equipment and materials for the supply and installation of all temporary and permanent regulatory signing requirements.
- (vi) Project Co shall ensure the Pavement surface is prepared, clean and free of debris.
- (vii) Project Co shall complete final grading prior to installation of all permanent and temporary signs. Project Co shall also be responsible for the reinstatement of all areas disturbed during the installation of new or relocated signs.
- (viii) Project Co shall provide a minimum of 10 Business Days advanced notice to the City for the installation of the permanent Pavement markings and regulatory signing to be completed by the City as illustrated on Project Co's construction documents.
- (ix) Project Co shall make all submissions in relation to the requirements of this section in accordance with Schedule 10 – Review Procedure.
  - A. Project Co shall submit Pavement marking and signage CADD drawings formatted in Microstation V.8i at a scale of 1:500.
- (x) Project Co shall obtain the library of symbols from the City prior to commencing any work.
- (xi) Project Co shall contact the appropriate municipal and / or provincial road authorities to confirm, in writing, the official municipal road names as well as Civic Address Signs (911 Identification Numbers and signing) requirements and incorporate such signs in the permanent and temporary Pavement and signing design drawings. Project Co shall indicate the location, size, and type of each sign on the TCPs. Project Co shall ensure that the above noted signs are in place and visible at all times. If the placement of the signs conflict with Project Co's construction, Project Co may temporarily relocate the signs, provided the signs remain unobstructed and with the affected property limits for the duration of the Project. Project Co shall replace any damaged signs immediately.
- (xii) Project Co shall prepare and submit a permanent signing plan and a permanent signing table a minimum of 30 calendar days prior to the implementation of the plan. The permanent signing table shall include, but not be limited to information detailing sign location (station of final location, removal location and on which side of the road to be installed in relation to the direction of travel), height to bottom of sign, lateral offset to post, support type with dimensions, alpha-numeric sign code with dimensions and the message/description, etc.

- (xiii) Project Co shall prepare sign details for the following types of ground-mounted guide Signs: Roadway identification, direction & destination, and location identification. Project Co shall design and provide all overhead sign structures, ground-mounted sign break-away steel supports and associated sign footings.

## 6.15 Street Lighting

### (a) General

- (i) For all the temporary and permanent street lighting, Project Co shall design, obtain approvals, and supply of materials, labour, equipment, build, provide inspection and testing associated with the City's requirements for Street lighting standards and best practices.

### (b) Design and Performance Requirements

- (i) Project Co shall design and construct all permanent and temporary street lighting including power feeds. Street lighting shall meet the requirements of the City of Ottawa Right of Way Lighting Policy. Project Co shall prepare and submit the lighting design together with the lighting calculation summary in accordance with Schedule 10 – Review Procedure.
- (ii) Project Co shall illuminate cycle facilities based on the required Roadway lighting levels stipulated in the City of Ottawa Right of Way Lighting Policy.
- (iii) All activities related to Roadway lighting systems (i.e. design, construction, etc.) shall meet the Conditions of Service set out by the local Electrical Supply Authorities, the ESA, and any other entity having jurisdiction.
- (iv) The installation of luminaires shall utilize existing above ground Utility poles located within public ROW to minimize the number of poles. Project Co shall coordinate the use of these joint use [REDACTED]/street light poles with the local Electrical Supply Authority and shall satisfy the requirements of Ontario Regulation 22/04 Electrical Distribution Safety (Electricity Act, 1998) for third party equipment mounted on [REDACTED] Utility poles.
- (v) Project Co shall coordinate with the City the design of electrical power feeds for all alterations to existing street lighting, temporary lighting and new street lighting; the cost of obtaining new electrical power feeds shall be a City responsibility.
- (vi) The City shall perform all work impacting existing City owned street lighting within the contract limits, including pole removal (concrete foundations to be removed by the Project Co), wiring, luminaire replacement and aerial cables. Project Co shall coordinate its work with the City.

- (vii) Project Co shall provide a minimum of 15 Business Days advanced notice to the City for the installation of temporary Roadway illumination and removal of existing Roadway illumination.
- (viii) Project Co shall arrange a meeting with the City, a minimum of 10 Business Days prior to Construction, to coordinate the requirements of the electrical work involving the City. Project Co shall provide a schedule of its proposed work to the City in this meeting.
- (ix) Lighting shall not contain an upward component, minimize light trespass and disability glare for drivers.
- (x) Project Co shall design and construct all Roadway luminaries to be LED and meet the full cut-off type and specifications.
- (xi) All permanent Roadway lighting levels shall meet the appropriate standard for the Roadway classification.

#### **6.16 Passenger Pick-Up and Drop Off Facilities**

- (a) Project Co shall design and construct PPUDO facilities for the location and number of PPUDO spaces specified in Schedule 15-2, Part 4 - Stations, Appendix A – Trillium Line Station Functional Requirements. Project Co shall obtain approval from the City for the location of all PPUDO locations prior to advancing any Roadway designs.
- (b) Project Co shall satisfy the requirements of OC Transpo's Transitway and Station Design Guidelines, including City of Ottawa By-laws and reference material included in Clause 6.1 of this Part 2.
- (c) The following general requirements shall apply to all PPUDO facilities:
  - (i) Project Co shall limit the location of curbside PPUDO facilities to tangent Roadway segments offset from adjacent intersections and accesses as per the City of Ottawa By-law 2003-530.
  - (ii) Project Co shall satisfy the upper limit of all geometric dimensions for the design of PPUDO facilities including, but not limited to, parking space dimensions and aisle widths as per the City of Ottawa By-law 2008-250.
  - (iii) Project Co shall ensure the locations and design of PPUDO facilities will avoid conflicts with cycling facilities, bike racks, bus access and egress and operations, and Station operations.
  - (iv) PPUDO facilities shall include a fully accessible, direct, and barrier-free pedestrian access from / to all bus stops and Station access and egress. Each

PPUDO facility shall include provisions for boarding and alighting from an accessible parking space as per the accessibility requirements and best practices specified under sections 3.1 and 3.2 of COADS.

- (v) Project Co shall design and construct PPUDO facilities physically separated from fare paid zones.
- (vi) Project Co shall ensure all curbside recessed PPUDO stalls can accommodate the safe entry and exit manoeuvres with the use of curb transitions as per the City of Ottawa Standard Detail Drawing R8 – Typical Intersection Narrowing (Single) and/or R9 – Typical Mid-Block Narrowing.

#### **6.17 Road Safety Audits and Road Safety Design Reviews**

(a) Order of Precedence

- (i) Project Co shall have independent Road Safety Audits and Road Safety Design Reviews completed in accordance with the criteria set out in this Article 6 and the following reference documents. If there is any conflict between the criteria contained in this Article 6 and any of the reference documents, the following shall apply, in descending order of precedence:

- A. The criteria contained in this Article 6;
- B. TAC, Geometric Design Guide for Canadian Roads;
- C. TAC, The Canadian Road Safety Audit Guide;
- D. MTO, Roadside Safety Manual;
- E. MTO, Ontario Traffic Manual Books 1 through 18; and,,
- F. AASHTO, Roadside Design Guide.

- (ii) Project Co shall perform the necessary Road Safety Audits and Road Safety Design Reviews in the context of the traditional Road Safety Audit processes but shall expand the process in order to include human factors, the review of drawings and plans (Reviews).

(b) General Requirements

- (i) Road Safety Audits shall include the Road Safety Audit processes as identified in The Canadian Road Safety Audit Guide, and shall for clarity include human factor considerations.

- (ii) Project Co shall provide the City of Ottawa with the Road Safety Review and Audit team's individuals' qualifications, experience, and knowledge, and letters of reference from the relevant Governmental Authorities where prior audits were performed, 60 calendar days in advance of any safety review or audit work. Project Co shall receive the City's approval for the proposed Road Safety Audit Team in accordance with the requirements of the Review Procedure specified in clause 6.17 - Road Safety Audits and Road Safety Design Reviews of this Part 2 and prior to any safety review or audit work being initiated.
  - (iii) The Road Safety Audits and Road Safety Design Reviews team's individuals shall not be an employee of any of the companies on Project Co's design and construction team, other than being paid for services rendered to Project Co in their capacity as Road Safety Auditor. The auditing team shall be fully independent and at arm's length from any company participating on Project Co's team.
  - (iv) All Project Co's Road Safety Audits and Road Safety Design Reviews shall include a human factors expert experienced in road and highway design and construction, who shall provide input and review of the safety and operation of the work from a human factors perspective.
  - (v) Project Co shall immediately correct any "as constructed" element that does not conform to the design, does not meet the required safety standards, or deemed not to meet a reasonable level of safety by the Road Safety Auditor. Project Co shall prepare the corrective measures and rectification recommendations noted above and shall ensure a Professional Engineer stamps and seals the appropriate recommendations for the review and acceptance by the Road Safety Audits and Road Safety Design Reviews team and to the City of Ottawa.
  - (vi) Project Co shall assume responsibility for any existing or proposed Site conditions found not to meet a reasonable level of safety, and shall rectify the condition immediately, or otherwise construct temporary works to address the safety concern until repairs are made.
- (c) Road Safety Audits and Road Safety Design Reviews Team
- (i) The Road Safety Audits and Road Safety Design Reviews individual and supporting team is more generally referred in this context as the Road Safety Auditor.
  - (ii) Project Co's Road Safety Audits and Road Safety Design Reviews team shall consist of a team of auditors, with a minimum of three qualified personnel, who are independent of the Project Co's design and construction team, and shall meet the following minimum criteria:

- A. Be Professional Engineers trained in the area of road and public safety, with over 20 years of engineering experience and demonstrated experience or resume working in the area of public safety and undertaking formal Road Safety Audits and Road Safety Design Reviews, with references from government agency;
  - B. Demonstrated experience in undertaking formal safety reviews and experience with The Canadian Road Safety Audit Guide, and Canadian and Ontario roadside safety standards;
  - C. Demonstrated experience in road safety analysis, traffic engineering, geometric design, and demonstrated expertise with human factors in design and safety reviews and audits;
  - D. Participated in at least two recent formal road safety audits with criteria similar to the Road Safety Audits and Road Safety Design Reviews in this Work, where such previous participation was on projects delivered using design build or public private partnership project delivery methods; and,
  - E. Demonstrated professional independence in undertaking Road Safety Audits and Road Safety Design Reviews in this Work.
- (d) Project Co's Responsibility:
- (i) Project Co shall undertake Road Safety Audit and Road Safety Design Review as per the requirements of this Clause 6.17 of this Part 2 on all temporary and permanent Roadway improvements listed below:
    - A. All facilities operated by OC Transpo including, but not limited to, all bus loops and associated accesses, lay-bys, bus stops, PPUDOs, Park and Ride Facilities, as specified in Clause 6.9 of this Part 2;
    - B. All Roadway improvements listed under Clause 6.18 of this Part 2; and,
    - C. All staging detour routes, Lane Shifts, lane closures and temporary conditions designed and constructed by Project Co as part of the Works per the requirements specified in the Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access.
  - (ii) Project Co shall assume responsibility for the following items:
    - A. Scheduling, initiating, allowing access to the applicable Site and managing the Road Safety Audits and Road Safety Design Reviews process at the appropriate times during the course of the Works;

- B. Providing all necessary design drawings and supporting documentation for the Road Safety Audit Team to conduct the Road Safety Audit and Road Safety Design Reviews;
  - C. Ensuring that the Road Safety Design Reviews and Road Safety Audit is conducted in accordance with good industry practice;
  - D. Receiving and reviewing the Road Safety Audit Team's report with the City of Ottawa representative;
  - E. Responding to the Road Safety Audit Team's report, including presenting rectification alternatives to address deficiencies;
  - F. Implementing required re-design as a result of the corrective suggestions as described in the sub clause noted above in an expeditious and timely manner;
  - G. Updating changes on the required design drawings; and,
  - H. Providing all draft and final documentation related to the Road Safety Audits and Road Safety Design Reviews to the City of Ottawa's representative.
- (iii) Project Co shall accept responsibility for and account for all costs associated with Road Safety Audits and Road Safety Design Reviews, including any re-design and increased costs to the Works that result from the Road Safety Audits and Road Safety Design Reviews.
- (iv) After each Road Safety Audit and Road Safety Design Review, except as otherwise expressly agreed in writing by the City of Ottawa's representative, Project Co shall address all recommendations made by the Road Safety Audit Team.
- (e) Road Safety Design Review
- (i) Project Co shall undertake an initial Road Safety Design Review at the outset of the Works and no later than 60 calendar days after Commercial Close of the Works in order to assess Project Co's proposed design elements including both temporary and permanent improvements that may have any bearing on public, Maintenance or operational safety from the point of view of any user within the Lands.
  - (ii) In each Road Safety Design Review, Project Co shall review, identify and resolve any safety concerns prior to advancing the design of both temporary and permanent improvements such that the design can be modified in a timely fashion

to address the safety concerns within the Works. Project Co shall plan, schedule and execute the review, together with providing a report that addresses any safety concerns and the recommendation or resolution of the initial Road Safety Design Review. The initial Road Safety Design Review shall precede the design activity and the subsequent design stages shall accommodate any required recommendation or resolution of this initial Road Safety Design Review.

- (iii) Project Co shall undertake Road Safety Design Reviews on an ongoing basis through the different stages and duration of all designs and all to be constructed elements, both temporary and permanent improvements that may have any bearing on public, Maintenance or operational safety from the point of view of any users within the Lands.

**(f) Road Safety Audit Process**

- (i) Project Co shall complete the Road Safety Audit process in accordance with The Canadian Road Safety Audit Guide. References to “review” or “response” from the owner agency, or other qualifying phrase with similar connotation in the process, shall be construed as the responsibility of Project Co in accordance with the requirements in this Clause 6.17 of this Part 2.
- (ii) Project Co’s Road Safety Audit Team shall prepare a report to document the audit findings and submit the Road Safety Audit reports to the Design Team for the stages identified in the clause that follows. The Road Safety Audit reports shall clearly identify safety hazards that need to be addressed by Project Co along with recommendations for remediation. Project Co shall respond to the identified hazards and recommendations with remediation counter-measures or provide appropriate reasons why the safety issue may not be addressed as recommended in the reports. Under any circumstances, Project Co’s response and remediation countermeasures shall address the safety issue to the satisfaction of the Road Safety Audit Team.
- (iii) For all temporary conditions and temporary Roadway improvements to accommodate staged construction under long duration Works as specified under Clause 2.5.4 Long Duration (LD) in the MTO’s OTM Book 7, Project Co shall perform Stage 3a and Stage 3b audits for all temporary Roadway improvements according to the requirements outlined in Clause 6.17(f)(v) of this Part 2.
- (iv) Project Co shall perform Stage 3b audits for all Station construction Sites according to the requirements outlined in Clause 6.17(f)(v) of this Part 2.
- (v) Project Co shall submit the Road Safety Audit reports to the City of Ottawa’s representative in accordance with the review procedures specified in Schedule 10 – Review Procedure for review at all the stages identified below:

A. Stage 1: Pre-Final Design Road Safety Audit

- i Project Co shall conduct a Stage 1 Road Safety Audit immediately before submission of the Pre-final Design Development submittals in accordance with the requirements of Schedule 10 – Review Procedure of the Project Agreement. Project Co shall undertake a detailed review of the Pre-final Design Development submittals to identify any potential safety-related enhancements that might have an impact on the design and construction of Works. Issues considered shall include, but not be limited to, the following:
  - 1. Design consistency;
  - 2. Site conditions and visibility;
  - 3. Drivers' work load and perceived road information;
  - 4. Vehicular traffic speed management and associated safety risk factors;
  - 5. Traffic control devices;
  - 6. Human factors;
  - 7. Horizontal and vertical alignment;
  - 8. Cross section design;
  - 9. Intersection design and configuration;
  - 10. Access location;
  - 11. Sight distance including, but not limited, to stopping sight distance and turning sight distance, sight distances to traffic control devices, bullnoses, etc.;
  - 12. Operation of public transit;
  - 13. Operational and Maintenance safety;
  - 14. Traffic operations;
  - 15. Environmental factors;
  - 16. Clearances to roadside objects;

17. Safety barriers; and,
18. Provision for vulnerable road and all multi-modal road ROW users.

B. Stage 2: Final Design Road Safety Audit

- i Project Co shall conduct a Stage 2 Road Safety Audit immediately before submission of the Final Design Development Submittals in accordance with Schedule 10 – Review Procedure of the Project Agreement. The audit shall undertake a detailed review of the completed Final Design Development submittals to identify any potential safety-related enhancements that might have an impact on the operational safety of the Works. Project Co shall consider in the audit and address issues such as the items included, but not be limited to the following items:
  1. Signing and Pavement markings;
  2. All interface with adjacent design disciplines (including rail Track corridors and LRT facilities; Tunnel, civil, facilities including Stations and landscaping, Utilities and Bridges, etc.);
  3. Traffic signal configuration;
  4. Intersection details;
  5. Municipal services;
  6. Drainage and SWM elements;
  7. Lighting;
  8. Fencing;
  9. Clearances to roadside objects;
  10. Safety barriers;
  11. Surface standards including treatments and structures;
  12. Traffic control devices;
  13. Streetscape and road furniture;

14. Provision for vulnerable road and all multi-modal road ROW users;
15. Accommodation of design vehicles;
16. Emergency responses requirements;
17. Road maintenance;
18. Traffic staging plan; and,
19. Any other Stage 1 Road Safety Audit results affected by the final design.

C. Stage 3a: Temporary Traffic Control On-Site Road Safety Audit

- i Project Co shall conduct Stage 3a Road Safety Audits on the applicable Sites within Lands before implementation of temporary traffic and transit control set-ups that meet one or more of the following criteria:
  1. Two or more individual temporary work zones in close proximity to each other such that one would influence the traffic and transit operation of the other. The spacing between the termination area of one work zone and the advance warning area of the next work zone for which one temporary traffic control set-up influences the traffic operations of the next temporary traffic control set-up is 2.0 km or less.
  2. Temporary staging are required within the existing Roadways and the duration of temporary traffic control set-ups is five calendar days or more. The set-up does not necessarily have to be in place for the entire time but can be one of a number of repeating set-ups that are active at different times.
  3. The duration of temporary traffic control set-ups is ten calendar days or more on roads other than those identified (2) above. The set-up does not necessarily have to be in place for the entire time but can be one of a number of repeating set-ups that are active at different times.

D. Stage 3b: Construction Road Safety Audit

- i Project Co shall conduct Stage 3b Road Safety Audits on the applicable Sites within Lands during construction of Works. These audits shall examine the field conditions of the Work under construction and assess any circumstances that may have a bearing on public safety from the point of view of any user and public areas that are within the Lands, or are modified and constructed as a part of the Works. The audits shall meet the following criteria:
  - 1. Project Co shall undertake two of the Stage 3b Road Safety Audits annually within the high construction season, between June and September (i.e. two audits to be performed annually between June and September) and one in the winter season, annually between December and February. Project Co shall preplan for only one of the audits, while Project Co shall perform the other audits unannounced.

E. Stage 4: Post-Construction Road Safety Audit

- i Project Co shall carry out a Stage 4 Road Safety Audit prior to opening any portions of the Roadway Works for traffic operation. Project Co's audit shall investigate and identify potential safety enhancements that may reduce the frequency and/or the severity of collisions. The Road Safety Auditor shall also check for safety deficiencies that result from using particular combinations of design elements not previously detected or any synergistic effects of using minimum Design Criteria for multiple design elements that may compromise users' safety.
- ii Project Co shall plan for and conduct Stage 4 Road Safety Audits prior to and as a condition of the issuance of the substantial completion certificate.
- iii Pursuant to the requirements of the two clause (i) and (ii) of the intended Stage 4 Road Safety Audit noted-above, the Road Safety Audit Team shall fully examine the Works by:
  - 1. Meeting with Project Co to review any issues relating to the Works, in particular design changes that may affect the safety of Roadway Works included in this Article 6;

2. Checking to ensure that safety issues identified in the Stage 2 Road Safety Audit are addressed and the resulting design changes do not create further safety issues;
3. Reviewing any design changes that occurred during the relevant Works to ensure they do not create safety issues; and,
4. Conducting field reviews of such Works, under both daytime and night time conditions.

**(g) City-requested Safety Audit**

- (i) The City of Ottawa reserves the right to request Site-specific Road Safety Audits at any time in addition to the audits required in all other Road Safety Design Reviews and Road Safety Audits specified in Clause 6.17 of this Part 2. Such request may be for any Site conditions, design element, design concern or Constructed element of Works that is of concern to the City of Ottawa. The City's written request will outline the safety concern and the issues required to be investigated and addressed by Project Co.
- (ii) Project Co shall demonstrate that the design and proposed Constructed Works meet a reasonable level of safety for all affected users. Project Co shall provide supporting research or engineering rationale and analyses for the design decisions, and for the support of the proposed design and constructed Works that are subject to investigation.
- (iii) Project Co shall address the concerns and/or modify the proposed design and constructed Works accordingly and provide all available technical information to the Road Safety Audit Team for consideration.
- (iv) The Road Safety Audit Team will render an opinion with the safety issue, and Project Co shall address the safety issue to the satisfaction of the Road Safety Audit Team and the City of Ottawa. The disposition and rectification of the safety concern is Project Co's full responsibility and obligation based on full and due consideration of input from the City of Ottawa and the Road Safety Audit team.

**(h) Road Safety Audit Certificates**

- (i) Project Co shall submit to the City of Ottawa's representative a Road Safety Audit Certificate called in the form attached as Appendix D - Form of Road Safety Audit Certificates to Schedule 15-2 – Design and Construction Requirements in respect of the Stage 1, Stage 2 and Stage 4 Road Safety Audits respectively. Each Road Safety Audit Certificate shall be signed by Project Co's

Design Manager, Project Co's Construction Contractor representative, Project Co's Project Co Representative, and the Road Safety Audit Team.

- (ii) Project Co shall provide the Independent Certifier with the Stage 4 Road Safety Audit Certificate. The Substantial Completion Certificate shall not be issued unless a Stage 4 Road Safety Audit Certificate has been submitted and signed by the Project Co's Design Manager, Project Co's Construction Contractor representative, Project Co's Project Co Representative, and the Road Safety Audit Team.

- (i) Random Audits

- (i) The City of Ottawa retains the right to perform additional independent audits on any part of design and construction Works at any time.

## **6.18 Municipal Roads Improvements**

- (a) Leitrim Road

- (i) Project Co shall design and construct a new Bridge Structure including its approach embankments in order to grade separate Leitrim Road with the proposed Trillium Line Track corridor at a location approximately 260m west of the existing Leitrim Road / Gilligan Road intersection, where the new Track corridor shall cross the existing Leitrim Road corridor.
    - A. Project Co shall ensure the horizontal and vertical clearances for the proposed Bridge Structure meet the requirements of the applicable bridge codes as per Article 4 – Structural Design Criteria and Requirements of this Part 2.
    - B. Under a scenario in which Project Co's proposed grade separation facility may involve a road-over-rail grade separation configuration, Project Co shall design and construct the proposed Bridge Structure and associated approach embankments on a realignment of the Leitrim Road corridor that will be located to the north of existing Leitrim Road, such that the existing section of Leitrim Road between the Track and Gilligan Road can be used as a paved municipal service road, herein referred to as Leitrim Service Road.
      - i Project Co shall design and construct all the necessary improvements on the Leitrim Service Road so that it can provide unobstructed access to / from the following properties located on the south side of the existing Leitrim Service Road at all times during the staged construction and ultimately upon the completion of Works:

1. [REDACTED]
  2. [REDACTED]
  3. [REDACTED]
  4. [REDACTED]
  5. [REDACTED]
- ii Project Co shall design and construct all the necessary improvements on Leitrim Service Road to provide a suitable vehicle turnaround facility for the Design Vehicle specified for this Roadway in Appendix A of this Part 2, as well as for the controlling municipal emergency and maintenance vehicles to service all existing private approach accesses on Leitrim Road per the requirements of Clause 6.8 – Design Vehicles of this Part 2.
- iii Project Co shall ensure the condition of the pavement structure for the intended service road meets the general service life requirements specified in Clause 6.10 – Pavement of this Part 2.
- C. Under a scenario in which Project Co’s proposed grade separation facility may involve a rail-over-road grade separation configuration, Project Co shall satisfy the following requirements for Leitrim Road:
- i Project Co shall design and construct the proposed grade separation facility and associated improvements to accommodate all horizontal and vertical clearances, Roadway geometry, and appropriate cross sectional elements, including roadside barriers, grading, drainage, and pathway connection requirements for Leitrim Road and shall satisfy all associated Roadway design safety requirements as per the Design Criteria in Appendix A of this Part 2.
  - ii Project Co’s design and construction shall provide for full access with appropriate sight lines for all properties affected by Works in both temporary and permanent improvement conditions.
  - iii Project Co shall undertake a traffic analysis study and determine the appropriate type of traffic control for a proposed MUP crossing that will be crossing Leitrim Road at a location on the east side of the rail-over-road grade separation facility under this scenario. Project Co shall prepare a traffic report, including the assumptions and results of the traffic analysis, concluding the design and

construction requirements of the intended MUP crossing facility and seek the City's approval 30 days prior to the PFDD submission.

- (ii) Project Co shall design and construct all the necessary Roadway improvements on Leirim Road, Gilligan Road, and Leirim Service Road, as applicable, per the Design Criteria requirements specified in Appendix A of this Part 2. Project Co shall design and construct a signalized intersection at the intersection of Leirim Road and Gilligan Road, corresponding to the lane configuration requirements shown in Appendix B of this Part 2.
- (iii) Project Co shall undertake a detailed traffic analysis including an intersection level of service analysis as per the City of Ottawa's TIA Guidelines, and confirm the control type, storage lengths and geometry and general layout of all intersections on Leirim Road and Gilligan Road, and Leirim Service Road, as applicable, using projected traffic and transit volumes for a 2031 horizon year. Project Co shall submit a comprehensive traffic report and include the results and recommendations of the above-noted traffic analysis and seek approval from the City at the early stages of the preliminary design, and a minimum of 20 Business Days prior to initiating the detailed design per the requirements of Schedule 10 – Review Procedure.
- (iv) Project Co shall design and construct the proposed Roadway improvements for Leirim Road, Gilligan Road, and Leirim Service Road, as applicable, to include all necessary traffic staging detours and temporary access requirements such that all temporary and permanent Works are contained within the Lands as defined in Schedule 33 – Lands.
- (v) Project Co shall provide the appropriate lighting requirements, including but not limited to, adequate and uniform light levels, appropriate light standards and all associated underground infrastructure along Leirim Road, Gilligan Road, and Leirim Service Road, as applicable, within the limits of the Works, per the requirements specified in Clause 6.15 - Street Lighting of this Part 2.
- (vi) Project Co shall reference the information provided in Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access for the specific traffic staging and access management requirements for all private approaches from the existing Leirim Road and Gilligan Road during staged construction and temporary conditions.
- (vii) Project Co's design and construction of the Roadway improvements for Leirim Road shall meet the requirements of Clause 6.17 – Road Safety Audits and Road Safety Design Reviews of this Part 2.

(b) Lester Road

- (i) Project Co's design and construction of the Track and Guideway Structure over Lester Road shall accommodate and protect for the future widening of Lester Road without a need to undertake any modification or addition to the Guideway Structure facility when Lester Road corridor is widened in the future. Project Co shall design and construct the Guideway Structure to accommodate all horizontal and vertical clearances, Roadway geometry, and all future cross sectional elements, including grading, drainage, and pathway connection requirements, for the future widening of Lester Road. For additional design and construction requirements of the Track and Lester Road Guideway Structure, refer to Article 4 – Structural Design Criteria and Requirements of this Part 2.

A. Project Co's design of the Guideway Structure shall account for all the following specific cross-sectional elements for Lester Road:

- i The ultimate cross section for future Lester Road widening will have a typical 4-lane rural arterial undivided cross section with side ditches.
1. General-purpose lanes shall be 3.75m for inside lanes and 3.5m for outside lanes (i.e. the lanes beside shoulder) in both eastbound and westbound directions of traffic.
  2. Paved shoulders shall be 3.0m under the Guideway Structure and transition to typical 2.5m paved shoulders in the sections away from the Guideway Structure.
  3. A 3.0m MUP is planned to run along the north side of Lester Road under the Guideway Structure. The MUP will be located 1.5m offset from the outside edge of the (westbound) shoulder. Away from the Structure, the offset between the MUP and the outside edge of the westbound shoulder shall transition to 4.5m.
  4. All future improvements for Lester Road shall accommodate a design speed of 90 km/hr, with a posted speed of 80km/hr.
- ii The horizontal and vertical clearances under the proposed Guideway Structure shall meet the requirements of the applicable bridge codes as per Article 4 – Structural Design Criteria, and the requirements of this Part 2.

- (ii) Project Co shall design and construct all necessary Roadway improvements to accommodate the System requirements for the proposed HGCWD equipment specified in Schedule 15-2, Part 3, Clause 10.2 – Scope of Work and the proposed Systems Maintenance Service requirements specified in Schedule 15-3, Appendix A – Attachment 3 – Clause 2 – Service Requirements.
- (c) Airport Parkway
  - (i) Project Co's design and construction of the Track and Guideway Structure over Airport Parkway shall accommodate and protect for the future realignment and widening of Airport Parkway without a need to undertake any modification or addition to the Guideway Structure facility when the Airport Parkway is widened in the future. Project Co shall design and construct the Guideway Structure to accommodate all horizontal and vertical clearances, Roadway geometry, and all future cross sectional elements, including grading, drainage and pathway connection requirements, for the requirements of the future widening of Airport Parkway. For additional design and construction requirements of the Track and Airport Parkway Guideway Structure refer to Article 4 - Structural Design Criteria, and the requirements of this Part 2.
    - A. Project Co's design of the Guideway Structure shall account for all the following specific cross sectional elements for the Airport Parkway:
      - i The ultimate cross section for the Airport Parkway will have a typical 4-lane rural arterial divided cross section with side ditches:
        - 1. The ultimate cross section of the future Airport Parkway realignment and widening will have a minimum 6m wide concrete median at the location under the proposed Guideway Structure.
        - 2. The horizontal and vertical clearances under the proposed Guideway Structure shall meet the requirements of the applicable bridge codes as per Article 4 – Structural Design Criteria, and the requirements of this Part 2.
      - ii The Airport Parkway alignment will be subject to a minimum grade raise of minimum 1.2m above the existing pavement elevations in order to account for the environmental geotechnical conditions associated with the nearby wetland areas in this section. Project Co's design shall account for this grade raise requirement in addition to the vertical clearance requirements under the LRT Guideway Structure.

- iii Future Airport Parkway improvements shall accommodate a design speed of 90 km/hr with posted speed limit of 80 km/hr.
- iv General-purpose lanes shall be 3.75m for inside lanes (beside the raised median) and 3.5m outside lanes (i.e. the lanes beside the shoulder) in both southbound and northbound directions of traffic.
- v Paved shoulders shall be 3.0m under the bridge structure and transition to typical 2.5m paved shoulders in the sections away from the structure.

(d) Uplands Drive

- (i) Project Co's design and construction of the LRT Guideway Structure over Uplands Drive shall accommodate and protect for the future widening of Uplands Drive without a need to undertake any modification or addition to the Guideway Structure facility when Uplands Drive is widened in the future. Project Co shall design and construct the Guideway Structure to accommodate all horizontal and vertical clearances, Roadway geometry, and all future cross sectional elements, including grading, drainage and pathway connection requirements, for the requirements of the future widening of Upland Drive. For additional design and construction requirements of the Track and Uplands Drive Guideway Structure refer to Article 4 - Structural Design Criteria, and the requirements of this Part 2.

A. Project Co's design of the Guideway Structure shall account for all the following specific cross-section elements for Uplands Drive:

- i The ultimate cross section for Uplands Drive will have a typical 4-lane rural arterial undivided cross section with side ditches.
  - 1. A 3m MUP is planned to run along the east side (i.e. along the northbound shoulder) of future Uplands Drive widened corridor under the bridge. The MUP will be located 1.5m offset from the outside edge of the (northbound) shoulder.
- ii The horizontal and vertical clearances under the proposed Guideway Structure shall meet the requirements of the applicable bridge codes as per Article 4 – Structural Design Criteria, and the requirements of this Part 2.
- iii Future Uplands Drive improvements shall accommodate a design speed of 90 km/hr with posted speed limit of 80 km/hr.

- iv General-purpose lanes shall be 3.75m for inside lanes and 3.5m outside lanes (i.e. the lanes beside the shoulder) in both eastbound and westbound directions of traffic.
  - v Paved shoulders shall be 3.0m under the bridge structure and transition to typical 2.5m paved shoulders in the sections away from the structure.
- (e) Earl Armstrong Road
  - (i) Project Co shall design and construct a Bridge Structure, including its approach embankments, in order to grade separate the proposed Earl Armstrong Road with the Track corridor at a location approximately 760m east of the existing Earl Armstrong Road / Bowesville Road intersection, where the new Track corridor shall cross the Earl Armstrong Road corridor.
    - A. Project Co's design and construction of the Bridge Structure shall accommodate and protect for the future widening of Earl Armstrong Road as per the Design Criteria requirements specified in Appendix A of this Part 2 without a need to undertake any modification or addition to the Bridge Structure built by Project Co when Earl Armstrong Road is widened in the future to the north side.
      - i Under a scenario in which Project Co's proposed grade separation facility may involve a road-over-rail grade separation configuration, Project Co shall construct an Overhead Structure for a 2-lane Roadway. The future widening of Earl Armstrong Road will be accomplished through the construction of a separate Overhead Structure to accommodate future lanes.
      - ii Under a scenario in which Project Co's proposed grade separation facility may involve a rail-over-road grade separation configuration, Project Co shall construct a Guideway Structure that spans over a 4-lane Roadway cross-section as per the information provided for the future Earl Armstrong Road widening in Appendix A of this Part 2.
    - B. Project Co shall ensure the horizontal and vertical clearances for the proposed grade separation Structure meet the requirements of the applicable bridge codes as per Article 4 – Structural Design Criteria, and the requirements of this Part 2.
  - (ii) Project Co shall design and construct the Roadway improvements on Earl Armstrong Road per the Design Criteria requirements specified in Appendix A and lane configuration specified in Appendix B of this Part 2.

- A. Project Co's design and construction of the proposed Earl Armstrong Road shall accommodate and protect for the future widening, realignment, and associated improvements of Earl Armstrong Road as per the requirements of the City:
- i Under a scenario in which Project Co's proposed grade separation facility may involve a road-over-rail grade separation configuration, Project Co shall demonstrate early in the design process and design and construct the proposed Earl Armstrong Road improvements and realignment, including the Overpass Structure, to be located as far to the south as necessary within the Lands such that the Roadway and Bridge Works constructed by Project Co will not be impacted by the future construction of a separate Overhead Structure to carry two future westbound lanes. The Roadway and Bridge Works that will be constructed by others under the future Earl Armstrong Road widening and realignment improvements will provide for the two westbound lanes and associated cross section elements in the future. The cross section for the westbound lanes on the future 4-lane Earl Armstrong Road shall be a reflection of the eastbound lanes about the outside edge of the 2.5m north shoulder or the proposed Earl Armstrong Road cross section as described in Appendix A of this Part 2.
  - ii Under a scenario in which Project Co's proposed grade separation facility may involve a rail-over-road grade separation configuration, Project Co shall demonstrate early in the design process and design and construct the proposed Earl Armstrong Road improvements and realignment, including the Guideway Structure and associated embankment approaches, within the Lands such that the Roadway and Bridge Works constructed by Project Co will not be impacted by the future construction of Earl Armstrong Road realignment and widening. The Roadway Works that will be constructed by others under the future Earl Armstrong Road widening and realignment improvements will provide for the two westbound lanes and associated cross section elements in the future. The cross section for the westbound lanes on the future 4-lane Earl Armstrong Road shall be a reflection of the eastbound lanes about the outside edge of the 2.5m north shoulder or the proposed Earl Armstrong Road cross section as described in Appendix A of this Part 2.
  - vi Project Co shall demonstrate in an early stage of the preliminary design process and seek approval from the City a minimum of 60 calendar days in advance of the PFDD submission that a feasible

and economical design can be achieved for such a future widening and realignment improvements of Earl Armstrong Road that would meet the City's planning and design requirements.

- B. Project Co shall design and construct a signalized intersection at the intersection of Earl Armstrong Road and Bowesville Road and associated access requirements to the Bowesville Park and Ride Facility as per the requirements of this Part 2 and associated Appendices.
- C. Project Co shall undertake a detailed traffic analysis including an intersection level of service analysis as per the City of Ottawa's TIA Guidelines, and confirm the control type, transit priority measures as per City requirements, storage lengths, and geometry and general layout of all Park and Ride accesses on Earl Armstrong Road as required using projected traffic and transit volumes for a 2023 horizon year per the requirements of Schedule 15-2, Part 4 - Stations. Project Co shall submit a comprehensive traffic report and include the results and recommendations of the above-noted traffic analysis and seek approval from the City at the early stages of the preliminary design, and a minimum of 20 Business Days prior to initiating the detailed design per the requirements of Schedule 10 – Review Procedure.
- D. Project Co shall design and construct the proposed Roadway improvements for Earl Armstrong Road to include all necessary traffic staging detours and temporary access requirements such that all temporary and permanent Works are contained within the Lands as defined in Schedule 33 – Lands.
- E. Project Co shall reference the information provided in Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access, for the specific traffic staging and access management requirements for all private approaches from Earl Armstrong Road during staged construction and temporary conditions.
- F. Project Co's design and construction of the Roadway improvements for Earl Armstrong Road shall meet the requirements of Clause 6.17 – Road Safety Audits and Road Safety Design Reviews, of this Part 2.

(f) Bowesville Road

- (i) Project Co shall design and construct a Bridge Structure, including its approach embankments, to accommodate for the grade separation of Bowesville Road with the Track corridor at a location approximately 180m south of the existing Earl

Armstrong Road/ Bowesville Road intersection, where the new Track corridor shall cross the Bowesville Road corridor.

- A. Project Co shall ensure the horizontal and vertical clearances for the proposed Bridge Structure meet the requirements of the applicable Bridge codes as per Article 4 – Structural Design Criteria and Requirements of this Part 2.
- (ii) Project Co shall design and construct the Roadway improvements on Bowesville Road per the Design Criteria requirements specified in Appendix A and Appendix B of this Part 2.
  - A. Project Co’s design and construction of the proposed Bowesville Road shall accommodate and protect for future improvements of Bowesville Road as per the requirements of the City.
    - i In addition to the requirements for the design and construction of the intersection of Earl Armstrong Road and Bowesville Road as described in Article 6.18 of this Part 2, Project Co shall undertake a detailed traffic analysis, including an intersection level of service analysis as per the City’s TIA Guidelines, to determine future improvements for the southern leg at the intersection of Earl Armstrong Road and Bowesville Road, using projected traffic and transit volumes for a 2031 horizon year, for the purpose of accommodating the future Roadway cross section on the Bridge Structure so that any future improvements on Bowesville can be accommodated without the need to reconstruct or modify the proposed grade separated Structure and retaining walls/ embankments
- (iii) Project Co shall design and construct all the improvements on Bowesville Road necessary to accommodate the requirements of the Bowesville Park and Ride facility including all the associated Roadway, intersections, and access improvements as specified under Clause 6.18(h) – Bowesville Park and Ride Facility of this Article 6, Schedule 15-2, Part 4 – Stations, and as a part of the scope of Works.
- (iv) Project Co shall design and construct a signalized intersection at the intersection of Earl Armstrong Road and Bowesville Road, including the associated access requirements to the Bowesville Park and Ride Facility, as per the requirements specified in Clause 6.18(e) and (h).
- (v) Project Co shall design and construct the proposed Roadway improvements for Bowesville Road to include all necessary traffic staging detours and temporary

access requirements such that all temporary and permanent Works are contained within the Lands as defined in Schedule 33 – Lands.

- (vi) Project Co shall reference the information provided in Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access, for the specific traffic staging and access management requirements for all private approaches from Bowesville Road during staged construction and temporary conditions.
  - (vii) Project Co's design and construction of the Roadway improvements for Bowesville Road shall meet the requirements of Clause 6.17 – Road Safety Audits and Road Safety Design Reviews of this Part 2.
- (g) Leirim Park And Ride Facility
- (i) Project Co shall design and construct the Leirim Park and Ride Facility to include a bus station Facility with dedicated space for public parking. The bus station Facility shall include a bus loop, bus bays, bus lay-bys and bus station Platforms, ensuring all necessary bus turning movements are accommodated per OC Transpo's Transitway and Station Design Guidelines.
    - A. The proposed improvements, and the specific functional and performance requirements, such as number of parking spaces, bus Platforms, bus lay-bys and bus bays required for the Leirim Park and Ride Facility shall meet the requirements of Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria and Schedule 15-2, Part 4, Appendix A – Trillium Line Station Functional Requirements.
  - (ii) Project Co shall design and construct all the proposed improvements at the Leirim Park and Ride as per the standards and requirements specified in Clause 6.9 – Facilities Operated by OC Transpo of this Part 2, unless specified otherwise in Clause 6.18 – Municipal Roads Improvements of this Part 2.
  - (iii) Project Co's design and construction of the Roadway improvements for Leirim Park and Ride shall meet the requirements of Clause 6.17 – Road Safety Audits and Road Safety Design Reviews of this Part 2.
  - (iv) Refer to Schedule 15-2, Part 6, Article 2 – Design Criteria for the connectivity, landscape and streetscape requirements for the Leirim Park and Ride Facility.
  - (v) Project Co shall design and construct all temporary bus detours, temporary transit operations, traffic staging and access management strategies to ensure access and current functionality of the existing Park and Ride Facility is maintained during staged Construction and temporary conditions. Refer to Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access for the specific improvements noted above.

- (vi) Project Co shall undertake a traffic analysis according to the City of Ottawa's TIA guidelines in order to determine the layout geometry, lane configuration, intersection improvements, and traffic control types for the Park and Ride Facility accesses and all impacted Roadways within the limits of construction of Works including but not limited to Leirtrim Road and Gilligan Road.
  - A. The analysis shall include, but not be limited to, a network analysis and an intersection operation and capacity analysis including traffic operations at the new Park and Ride Facility. In the analysis, Project Co shall also consider the projected traffic and transit volumes for a 2031 horizon year, existing and potential developments in the area, and connectivity for pedestrians and cyclists.
    - i The results of the analysis shall include, but not be limited to intersection layout configuration, traffic control types, and auxiliary storage lane requirements.
  - B. Project Co shall summarize and submit the findings from the analysis in a detailed report to the City of Ottawa for approval, a minimum of 20 Business Days prior to initiating the detailed design.
- (vii) Project Co shall design and construct all internal access road layouts to accommodate all mixed traffic access from Gilligan Road. The layout of the Park and Ride Facility shall accommodate the turning movements of the appropriate design vehicle according to Clause 6.8 – Design Vehicles of this Part 2 and Clause 6.9 – Facilities Operated by OC Transpo of this Part 2.
- (viii) Project Co shall design and construct the Leirtrim Park and Ride Facility to include an exclusive bus access into the bus terminal area in such a way that delays to buses resulting from operating in mixed traffic (including pedestrian and cyclist traffic) are minimized.
- (ix) Project Co shall evaluate the existing conditions and provide any widening or Pavement improvements requirement of the existing roads to accommodate safe bi-directional operation of transit buses. Project Co shall design and construct the widening within the existing ROW and within Lands Schedule 33 – Lands.
- (x) Project Co shall design and construct all intersections to accommodate transit bus access and operations between the local road networks and the proposed Leirtrim Park and Ride Facility.
  - A. Project Co shall confirm the appropriate traffic control type and necessary intersection improvements required at all existing and proposed intersections and where warranted, shall install transit priority measures to provide precedence to transit operations.

- B. Project Co shall develop and confirm the type of transit priority measures appropriate for each intersection, and shall seek approval from the City and OC Transpo prior to proceeding with the implementation of the proposed transit priority measures.
- (xi) Project Co's design and construction of the Leitrim Park and Ride Facility shall not reuse the existing Pavement structure either partially or totally in the new improvements unless Project Co can satisfy the following conditions:
  - A. Project Co shall undertake a traffic assessment, detailed field survey, geotechnical investigation to evaluate the existing ground conditions, Pavement structure, and associated drainage conditions of the existing parking Site.
    - i Project Co shall identify any risks associated with the substandard drainage and underlying ground conditions, evaluate the existing Pavement failure patterns using pertinent pavement condition assessment guidelines and standards and report on the adequacy of the existing subgrade and Pavement structure. Project Co shall calculate the remaining service life of the existing Pavement structure using appropriate lab and field tests and design methods. Project Co shall develop Site specific improvements and Pavement rehabilitation strategies in the proposed design and construction of Leitrim Park and Ride Facility to demonstrate that an acceptable design service life of the Pavement can be achieved that can meet or exceed the requirements of Schedule 15-2, Part 2, Clauses 6.10 – Pavement, 6.11 - Grading, and 6.12 - Drainage of this Part 2 and Schedule 15-1, Part 1, Clause 4.3 – Design Requirements, Table 1-4.1.
  - B. Project Co shall demonstrate in the proposed design and receive approval from the City of Ottawa that use of the existing Pavement in the proposed design and construction will not compromise the future expansion of the Leitrim Park and Ride Facility as specified in Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria.
  - C. Project Co shall submit the findings, results, and recommendations of the above-noted investigations in the form of a comprehensive report and receive approval from the City of Ottawa prior to advancing the design that would make use of the existing Pavement in the proposed design and construction of the Leitrim Park and Ride Facility.

- (h) Bowesville Park and Ride Facility

- (i) Project Co shall design and construct the Bowesville Park and Ride Facility in the southeast quadrant of the Earl Armstrong Road and Bowesville Road intersection within the Lands. The proposed Bowesville Park and Ride Facility shall include a bus station Facility with dedicated space for public parking. The bus station Facility shall include a bus loop, bus bays, bus lay-bys, and bus station Platforms, ensuring all necessary bus turning movements are accommodated per OC Transpo's Transitway and Station Design Guidelines.
  - A. The proposed improvements, and the specific functional and performance requirements, such as number of parking spaces, bus Platforms, bus lay-bys and bus bays required for the Bowesville Park and Ride Facility shall meet the requirements of Schedule 15-2, Part 4, Article 3 – Station Specific Architectural Design Criteria and Schedule 15-2, Part 4, Appendix A – Trillium Line Station Functional Requirements.
- (ii) Project Co shall design and construct all the proposed improvements at the Bowesville Park and Ride as per the standards and requirements specified in Clause 6.9 – Facilities Operated by OC Transpo of this Part 2, unless specified otherwise in Clause 6.18 – Municipal Roads Improvements of this Part 2.
- (iii) Project Co's design and construction of the Roadway improvements for Bowesville Park and Ride shall meet the requirements of Clause 6.17 – Road Safety Audits and Road Safety Design Reviews of this Part 2.
- (iv) Refer to Schedule 15-2, Part 6, Article 2 – Design Criteria for the connectivity, landscape and streetscape requirements for the Bowesville Park and Ride Facility.
- (v) Project Co shall design and construct all temporary traffic staging and access management strategies to ensure property accesses and current access to and from the entire existing local road network is maintained during staged construction and temporary conditions. Refer to Schedule 15-2, Part 7 - Traffic and Transit Management and Construction Access for the specific improvements noted above.
- (vi) Project Co shall undertake a traffic analysis according to the City of Ottawa's TIA guidelines in order to determine the layout geometry, lane configuration, intersection improvements, and traffic control types for any accesses to the Park and Ride Facility, and all impacted Roadways within the limits of construction of Works, including but not limited to Bowesville Road and Earl Armstrong Road.
  - A. The analysis shall include, but not be limited to, a network analysis and an intersection operation and capacity analysis, including traffic operations at the new Park and Ride Facility. In the analysis, Project Co shall also consider the projected traffic and transit volumes for a 2023 horizon year,

existing and potential developments in the area, and connectivity for pedestrians and cyclists.

- i The results of the analysis shall include, but not be limited to determining the intersection layout configuration, traffic control types, and auxiliary storage lane requirements.
- ii Project Co shall ensure that the proposed design of intersections and local road improvements meet the requirements of the City's future development planned in the area. Project Co shall engage the City early in the preliminary design process in order to incorporate in the design, the necessary information from the future planned developments that may impact the design within the limits of Construction.

B. Project Co shall summarize and submit the findings from the analysis in a detailed report to the City of Ottawa and receive approval, a minimum of 20 Business Days prior to initiating the detailed design.

- (vii) Project Co shall design and construct all access roads required to accommodate all mixed traffic access from Bowesville Road and / or Earl Armstrong Road per the requirements of this Part 2 and Schedule 15-2, Part 4 – Stations. The layout of the Park and Ride Facility shall accommodate the turning movements of the appropriate design vehicle according to Clause 6.8 – Design Vehicles of this Part 2 and Clause 6.9 – Facilities Operated by OC Transpo of this Part 2.
- (viii) Project Co shall design and construct the Bowesville Park and Ride Facility to include an appropriate access, or accesses, for buses and general traffic into the intended Bowesville Park and Ride Facility in such a way that delays to buses, pedestrian and cyclist traffic are all minimized.
- (ix) Project Co shall evaluate the existing conditions and provide any widening or Pavement improvements requirement of the existing roads to accommodate safe bi-directional operation of transit buses. Project Co shall design and construct the widening within the existing ROW and within Lands as per the requirements of Schedule 33 – Lands.
- (x) Project Co shall design and construct all intersections to accommodate transit bus access and operations between the local road networks and the proposed Bowesville Park and Ride Facility.

A. Project Co shall confirm the appropriate traffic control type and necessary intersection improvements required at all existing and proposed intersections and where warranted, shall install transit priority measures to provide precedence to transit operations.

- B. Where warranted, Project Co shall develop and confirm the type of transit priority measures appropriate for each intersection, and shall seek approval from the City and OC Transpo prior to proceeding with the implementation of the proposed transit priority measures.
- (i) Limebank Road
- (i) Project Co shall design and construct the Roadway improvements on Limebank Road per the Design Criteria requirements specified in Appendix A of this Part 2.
- (ii) Project Co shall design and construct a grade separation Bridge Structure, including its approach embankments, at a location approximately 300m south of the existing Earl Armstrong Road/ Limebank Road intersection, where the new Track corridor shall cross the Limebank Road corridor.
- A. Under a scenario in which Project Co's proposed grade separation facility may involve a road-over-rail grade separation configuration, Project Co shall construct an Overhead Structure, including its associated approach embankments, to carry the proposed Limebank Road over the Track corridor.
- i Project Co shall design and construct the Overhead Structure to accommodate for a future widening of Limebank Road further south without the need to reconstruct the southern approach embankments for the Overhead Structure.
- ii The entire raised length of Limebank Road over the Track corridor shall meet the 4-lane divided cross section requirements as specified in Appendix A of this Part 2. Project Co shall design and construct an appropriate transition for the improved Limebank Road to change its cross-section from the 4-lane divided urban cross section to the existing 2-lane undivided rural cross section beyond the southerly limits of the proposed grade raise.
- iii The overall length of the Limebank Road Overhead Structure shall provide the span required to:
1. Carry Limebank Road over the Track corridor, and,
  2. Accommodate a collector Roadway on the north side of the Track corridor, and a MUP on the south side of the Track corridor, as prescribed in Clause 6.18(i)(iii)(C) of this Part 2.

- B. Under a scenario in which Project Co's proposed grade separation facility may involve a rail-over-road grade separation configuration, Project Co shall construct a Guideway Structure, including its associated approach embankments, which spans over the Roadway cross-section as described in Appendix A of this Part 2.
- i Project Co shall design and construct the single span Guideway Structure to accommodate for a future widening of Limebank Road without a need to reconstruct any part of the Guideway Structure.
    - 1. The design of the Guideway Structure shall also accommodate and protect for a collector Roadway cross section, on the north side of the Track corridor, and a MUP on the south side of the Track corridor, as prescribed in Clause 6.18(i)(iii)(C) of this Part 2.
    - 2. The design of the Guideway Structure shall also protect for a future MUP connection between the north and south sides of the Track corridor on the east side of Limebank Road (minimum 7.0m between the east abutment and the east edge of the Limebank Road ROW).
  - ii Project Co shall design and construct an at-grade signalized intersection at the intersection of Limebank Road and Connector Road.
    - 1. Project Co shall undertake a detailed traffic analysis, including an intersection LOS analysis considering vehicular and non-vehicular road user needs as per the City of Ottawa's TIA Guidelines, and confirm the intersection control type, storage lengths and geometry and general layout, using projected traffic and transit volumes for a 2031 horizon year, including cyclists and pedestrians.
    - 2. Project Co shall submit a comprehensive traffic report and include the results and approval from the City at the early stages of the preliminary design, and recommendations of the above-noted traffic analysis and seek a minimum of 20 Business Days prior to initiating the detailed design per the requirements of Schedule 10 – Review Procedure.
  - (iii) Project Co shall accommodate a collector Roadway cross section, on the north side of the Track corridor and a MUP on the south side of the Track corridor, as described below.

- A. Project Co shall design and construct the collector Roadway north of the Track corridor, herein referred to as Connector Road. Project Co shall refer to Clause 6.18(j) for the scope of the design and construction requirements of Connector Road.
  - B. Project Co shall design and construct an appropriate transition required for Connector Road as per the requirements of Clause 6.18 (j)(i)(D) of this Part 2.
  - C. Project Co shall protect for a future MUP south of the Track corridor. The future MUP shall have a minimum clear width of 7.0m and a minimum overhead clearance of 3.0m.
- (iv) Project Co shall ensure the horizontal and vertical clearances for the proposed grade separation facility meet the requirements of the applicable Bridge codes as per Article 4 – Structural Design Criteria and requirements of this Part 2.
  - (v) Project Co shall undertake a detailed traffic analysis, including an intersection level of service analysis, as per the City’s TIA Guidelines, to confirm the traffic control types and storage lengths and geometry and general layout for the limit of the Works on the southern leg of the Limebank Road / Earl Armstrong intersection, as required, using a projected traffic and transit volumes for a 2031 horizon year and taking into consideration all associated pedestrian and cycling requirements. Project Co shall submit a comprehensive traffic report and include the results and recommendations of the above-noted traffic analysis and seek approval from the City at the early stages of the preliminary design, and a minimum of 20 Business Days prior to initiating the detailed design per the requirements of Schedule 10 – Review Procedure. Project Co shall provide for all additional intersection improvements as required on the southern leg of the intersection according to the results of the above-noted traffic analysis.
  - (vi) Project Co shall design and construct the proposed Roadway improvements for Limebank Road to include all necessary traffic staging detours and temporary access requirements such that all temporary and permanent Works are contained within the Lands as defined in Schedule 33 – Lands.
  - (vii) Project Co shall reference the information provided in Schedule 15-2, Part 7 – Traffic and Transit Management and Construction Access, for the specific traffic staging and access management requirements for all private approaches from Limebank Road during staged construction and temporary conditions.
  - (viii) Project Co shall refer to Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements, for the pedestrian and cycling

connectivity, landscape and streetscape requirements for Limebank Road and associated intersecting Roadways.

- (ix) Project Co's design and construction of the Roadway improvements for Limebank Road shall meet the requirements of Clause 6.17 of this Part 2.
- (x) Project Co shall protect for future access to/ from Limebank Road as per the requirements of the most current Riverside South community design plans and guidelines.
- (j) Connector Road
  - (i) Project Co shall design and construct the entire length of the proposed Connector Road between Main Street and Collector D.
    - A. The basic cross-section elements for Connector Road between the Limebank Road grade separation facility and Collector D shall include an 8.0m wide 2-lane urban collector undivided Roadway with a 2.1m uni-directional cycle track, located between the collector road and Track corridor, and a 5.1m wide segregated pedestrian and cycling facility on the opposite side.
    - B. Project Co shall design and construct an appropriate connection/transition to the southern limit of the Collector D to accommodate the required turning movements of the appropriate design vehicle according to Clause 6.8 and 6.9 of this Part 2.
    - C. Project Co shall design and construct an urban collector undivided cross-section for Connector Road in the section between Main Street and the Limebank Road grade separation facility. The proposed cross-section of this section of Connector Road shall consist of the following elements:
      - i 4-lanes urban undivided cross-section consisting of one 4.0m wide shared traffic lane and one 3.5m wide curbside bus stop lane to accommodate bus operations at Platforms in each direction of traffic;
      - ii Design and dimensions of the proposed Station Platforms required in the eastbound and westbound directions of traffic and design and construction specifications shall be as per the City of Ottawa Transitway and Station Design Guidelines;
        - 1. Project Co shall design and construct the Terminal Station Platforms for Limebank Station per the requirements of Schedule 15-2, Part 4 – Stations.

- iii Cycling and pedestrian facilities shall include:
    - 1. 2.1m wide cycle track shall be located behind the proposed bus Platform and between the eastbound Station Platform and the Track corridor;
    - 2. A 2.0m wide boulevard shall be provided between the back of each Platform and cycle track, noted above, along the entire length of the bus Platforms; and,
    - 3. 3.0m wide sidewalk on Connector Road shall extend further west along the north side of the above-noted cycle track.
  - D. Project Co shall design and construct appropriate tapers on Connector Road corridor to transition from the 2-lane cross-section on the east end of the Connector Road to the 4-lane cross-section on the west end of the Connector Road.
  - E. Project Co shall refer to Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements, for the connectivity, landscape and streetscape requirements along Connector Road.
- (k) Main Street
- (i) Project Co shall design and construct a 7.0m wide 2-lane urban collector undivided Roadway to connect the west limit of Connector Road to Earl Armstrong Road as per the following cross section:
    - A. One travel lane in each direction (northbound and southbound) with the centerline matching the centerline of the ROW;
    - B. 1.8m wide sidewalk, adjacent to the curblane, on the east and west side between Connector Road and the proposed PPUDO locations;
    - C. 3.0m MUP, adjacent to the sidewalk, on the east side between Connector Road and Earl Armstrong Road; and,
    - D. For additional information regarding the cycling and pedestrian facilities for Main Street, Project Co shall refer to Schedule 15-2, Part 6 - Urban Design, Landscape Architecture and Connectivity Requirements.
  - (ii) Project Co shall provide a PPUDO on both sides of Main Street in the vicinity of the intersection with Connector Road per the requirements of Schedule 15-2, Part 6 – Urban Design, Landscape Architecture and Connectivity Requirements.

- (iii) Project Co shall design and construct Main Street with consideration for a future southerly extension of the Main Street to the west of Limebank Station.
- (iv) Project Co shall design and construct two controlled intersections on Main Street. One intersection shall be located at the southern limit of Main Street where it connects to the west end of Connector Road, which shall provide for two controlled pedestrian crossings across both Main Street and across Connector Road. Project Co shall design and construct another controlled intersection at Main Street / Earl Armstrong Road intersection.
  - A. Project Co shall undertake a detailed traffic analysis to determine the requirements of both intersections noted above, including an intersection level of service analysis, as per the City's TIA Guidelines, to confirm the traffic control types and storage lengths and geometry and general layout for the limit of the Works, as required, using a projected traffic and transit volumes for a 2031 horizon year and taking into consideration all associated pedestrian and cycling requirements. Project Co shall submit a comprehensive traffic report and include the results and recommendations of the above-noted traffic analysis and seek approval from the City at the early stages of the preliminary design, and a minimum of 20 Business Days prior to initiating the detailed design per the requirements of Schedule 10 – Review Procedure. Project Co shall provide for all additional intersection improvements as required on the southern leg of the intersection according to the results of the above-noted traffic analysis.
  - B. The intersection of Main Street, Connector Road and Earl Armstrong Road shall accommodate the required turning movements of the appropriate design vehicle according to Article 6.8 and 6.9 of this Part 2.
- (l) Collector D
  - (i) Project Co shall coordinate with the City of Ottawa early in the design process and evaluate the existing conditions of Collector D and provide any widening or Pavement improvements required for the existing Roadway to accommodate the an appropriate transition and connection from Connector Road to Collector D. Project Co shall design and construct any improvements on Collector D within the existing ROW and within the Lands identified in Schedule 33 - Lands.

## ARTICLE 7 GEOTECHNICAL DESIGN CRITERIA AND REQUIREMENTS

### 7.1 Reference Documents

- (a) Design and construction of all geotechnical and foundation Work shall comply with the criteria contained in this Article, and the Applicable Law, guidelines or practices applicable to the Project, including but not limited to the following Reference Documents. In the event of a conflict between the criteria, commitments or requirements contained within one document when compared with another, the more stringent shall apply:
  - (i) Criteria contained in this Article;
  - (ii) Schedule 15-2, Part 2, Article 9 – Protection of Existing Adjacent Structures;
  - (iii) Schedule 15-2, Part 2, Article 4 – Structural Design Criteria and Requirements;
  - (iv) Schedule 17 – Environmental Obligations;
  - (v) Municipal Standards according to Master Agreement including Schedule B, Appendix 2, Standard and Guidelines;
  - (vi) OBC;
  - (vii) NBCC;
  - (viii) CHBDC;
  - (ix) OPSS/OPSD;
  - (x) CSA;
  - (xi) ASTM;
  - (xii) CFEM;
  - (xiii) MOECC;
  - (xiv) PEO, Guideline for Professional Engineers Providing Geotechnical Engineering Services;
  - (xv) AREMA; and,
  - (xvi) OHSA and Applicable Law.

- (b) Project Co shall comply with the Applicable Law, design manuals or practices applicable to the Project, issued by all relevant third parties including MTO and the City. Project Co shall submit design and construction plan for all geotechnical and foundation works including excavation, backfilling, underpinning, modifications, monitoring and mitigation plans for review and acceptance by all relevant third parties including City, MTO, Utility Companies, other third party owners. Project Co shall comply with the following documents and requirements:
  - (i) Schedule 10 – Review Procedure.
  - (ii) To prevent impact to third parties' structures in the alignment, all Construction Activities such as groundwater control, excavation, underpinning, modification, and support of excavation systems shall meet third party stakeholders' requirements. In particular:
    - A. For construction within or in the vicinity of the NCC land, specific design approaches shall be considered to avoid adverse impacts of construction dewatering operations on NCC land and other existing Structures; and,
    - B. For construction near or under the Highway 417 Bridge, specific design approaches shall be considered to prevent settlement of or other damage to the Bridge.

## 7.2 General Requirements

- (a) Geotechnical and foundations design shall be carried out in accordance with design concepts used in the reference documents listed in Clause 7.1 of this Part 2 such as the principles of LSD based on Load-and-Resistance Factor Design and WSD based on AREMA. The factors of safety and allowable stress for the Track supports should be based on the functional requirements of the structure.
- (b) Project Co shall perform a geotechnical subsurface soil and groundwater conditions assessment using available data for the entire Guideway and shall provide a detailed and complete set of geo-engineering design reports including geo-engineering Design Criteria with a tabulated list of geotechnical and hydrogeological design parameters. The basis for selection of the Design Criteria should be provided for all components of any underground structures, all components of any retaining and support of excavation structures, and at grade and elevated structures. In addition, Project Co shall prepare stratigraphic profiles along the Guideway with proper cross-sections particularly for the underground sections along the alignment that are to be constructed by Project Co. The stratigraphic profiles shall include anticipated distribution of the various ground types and hydrogeological regimes and conditions, and Reports shall be submitted in accordance with Schedule 10 – Review Procedure.

- (c) Project Co shall review all existing geo-environmental data and information and develop an Excess Materials Management Plan. Further details on environmental compliance and management requirements are provided in Schedule 17 – Environmental Obligations.
- (d) Project Co shall retain the services of qualified consultants who hold a Professional Engineers of Ontario Certificate of Authorization and practice as a geotechnical consultant. Geotechnical laboratories shall be certified by CCIL and shall have participated and met the MTO correlation program for soil testing. Environmental laboratories shall be accredited by the CALA for analytical tests.
- (e) Project Co shall retain the services of qualified consultants who hold an Association of Professional Geoscientists of Ontario Certificate of Authorization and practice as a hydrogeological consultant.
- (f) Project Co shall submit details of any proprietary geo-engineering systems, for review by the City in accordance with Schedule 10 – Review Procedure. Project Co shall demonstrate a minimum 10 years of successful performance on at a minimum of three projects of such geo-engineering systems. These three projects must be of a similar scale to the proposed use on this Project.
- (g) The frost penetration depth for Ottawa is 1.8m. Project Co shall consider this and ensure sufficient frost protection is provided for all Structures.
- (h) Project Co shall demonstrate project experience designing and building structures founded on the sensitive marine clays in the Ottawa area, locally known as Leda Clays, and shall retain personnel who have verifiable local design and construction experience with Leda Clay.

### **7.3 Foundations**

- (a) Foundations for structures shall be designed such that their displacements (Serviceability Limit States, as defined in the relevant codes and standards) are compatible with the structural design, function and performance requirements, and clearance envelope requirements over their Design Life. When a WSD is used, the allowable stress shall be checked under the various loading combinations defined in the relevant Codes and Standards.

### **7.4 Permanent Cut and Fill Slopes**

- (a) Permanent cut and fill slopes and geo-structures shall be designed according to applicable Standards and with adequate safety margin (such as factor of safety), as described in the relevant Codes and Standards.

- (b) Total and differential post-construction settlements along the Track bed or Pavement including those due to frost heave shall meet the requirements of Article 3 – Trackwork and Article 6 – Roadways, Bus Terminals and Lay-bys, of this Part 2. Project Co shall ensure that the smoothness and cross-slope requirements are met, ponding and sheeting of water is prevented, Pavement drainage is maintained, and the function of Constructions and ditches is preserved.
- (c) No vertical offset at longitudinal joints in Pavement surfaces shall be permitted after construction.
- (d) No vertical offset at longitudinal or transverse joints along Station Platforms, interior walkways or at building connections shall be permitted after construction.

## **7.5 Permanent Retaining Structures and Cut & Cover Structures**

- (a) The following requirements apply to new cut & cover structures, new retaining systems, and existing retaining walls and cut & cover structures:
  - (i) Permanent water-tight underground structures on the alignment shall be designed to resist groundwater pressures and shall account for the Project flood level requirements provided in Article 5 – Drainage and Stormwater Management Design Criteria, of this Part 2.
  - (ii) The lateral earth pressure coefficient corresponding to the characteristic at-rest conditions ( $K_o$ ) and appropriate to the adjacent native ground or backfill soils shall be applied to determine the magnitude of the characteristic earth pressure distribution. The  $K_o$  conditions must be determined and then reduced according to the proposed structure's characteristics (stiffness, deformability, etc.). Project Co shall estimate, or measure  $K_o$  by conducting testing using the appropriate standard methods in the field and in the laboratory;
  - (iii) Consideration of friction piles, micropiles and anchored systems for resisting uplift forces shall be incorporated into the cut & cover foundations design, provided redundancy is built in the design. For micropiles, the required redundancy shall be achieved by using adequate resistance factor provided that a testing program as indicated in OPSS 903 is followed. For frictional piles, adequate resistance factors with or without a load test shall be used in accordance with relevant design Codes and Standards. For anchored systems, the requirements as indicated in OPSS 942 shall be followed. The design reduction factor to be applied to the uplift resistance capacity of the friction piles and micropiles shall be based on the type of structure, loading, allowable displacements, and soil and groundwater conditions.
  - (iv) Project Co shall not utilize side friction between the soil and Underground Structure walls to resist uplift, unless Project Co can clearly demonstrate that side

friction can be relied upon and will not induce detrimental effects to the Underground Structure. Project Co shall not utilize side friction between the soil and structure walls that have an exterior waterproofing system to resist uplift.

- (v) All temporary excavation support systems for permanent cut and cover structures shall be carried out in accordance with Clause 7.7 of this Article.
- (vi) The upper 1.8m as measured from lowest adjacent grade shall be discounted in any axial and lateral load analyses to account for possible future excavations around the pile group.

## **7.6 Services**

- (a) All services including installation and reconstruction of water and sewer lines, engineering fill application, pipe bedding, cover and trench backfill material shall conform to the City requirements, including but not limited to requirements of Article 8 – Utility Infrastructure Design Criteria, of this Part 2.

## **7.7 Temporary Slopes and Retaining Structures**

- (a) The performance of each temporary Works shall be sufficient for its service life. All temporary Work shall comply with the OHSA, relevant design Codes and Standards and the Project requirements applicable at the time of excavation and the additional criteria:
  - (i) Temporary retaining structures shall meet the requirements of limiting ground movements, such as surface settlement, as stipulated under this Article;
  - (ii) Protection of Existing Adjacent Structures in accordance with Article 9 - Protection of Existing Adjacent Structures, of this Part 2;
  - (iii) Design, installation, and testing of tie backs shall follow OPSS 942;
  - (iv) Project Co shall comply with third party requirements for tie-back de-stressing as stated in this Article. Removal of temporary support system shall follow OPSS 539;
  - (v) Temporary unsupported excavation side slopes shall meet OHSA requirements; and,
  - (vi) All elements of temporary retaining structures within the upper 2m of the ground surface shall be removed and properly disposed of upon completion of backfilling.

## **7.8 Earthwork and Geo Environmental**

- (a) Backfilling and reuse of excavated material on City property and ROW shall follow City Standards, Schedule 17 – Environmental Obligations and third party standards.
- (b) Buoyancy corresponding to inundation of the fill to the flood level shall be considered in the design of using lightweight fills. Permanent flood protection shall be provided for the area in which the fill is to be used. Fuel spills, salt, wheel loading, penetration from landscaping, and penetration from sign foundation shall also be considered.
- (c) Geo-Environmental requirements are specified in Schedule 17, Part 4 - Contamination and Excavated Material Management.

## **7.9 Geotechnical Instrumentation**

- (a) Project Co shall determine and install geotechnical instrumentation in the key and critical areas described as follows where special attention or continued monitoring is required. As a minimum, Project Co shall determine instrumentation requirements, frequency and duration of monitoring for construction-induced noise and vibration, displacement and strains for fill embankments, groundwater elevation and pressure, ground movements adjacent to deep excavations, temporary retaining structures (including piles, struts and tiebacks), Tunnel and Tunnel portals, permanent retaining structures, Utility Infrastructure, hydro towers, existing rail Tracks, highways, Roadways, pathways, existing buildings, bridges or other Structures along the alignment that shall remain in service.
- (b) Design of the geotechnical instrumentation and monitoring program shall be under the direct supervision of a Professional Engineer.
- (c) Staff for the design and implementation of the geotechnical instrumentation and monitoring program shall include personnel who have verifiable design and construction experience with similar programs.
- (d) In accordance with all applicable laws, regulations, and by-laws (as amended), Project Co shall decommission and dispose of all geotechnical, hydrogeological, and/or geo-environmental instrumentation installed by Project Co or the City for the purposes of this Project, at the end of construction or after the instrumentation is no longer required for Project activities. Project Co shall decommission and dispose of any existing geotechnical, hydrogeological, and/or geo-environmental instrumentation, that is documented in the Background Information or that may not be documented and otherwise encountered by Project Co during construction, used for monitoring/not used for monitoring on, in, or under the Lands. Project Co shall obtain acceptance from the City prior to decommissioning and disposal of any existing geotechnical, hydrogeological, and/or geo-environmental instrumentation, that is documented in the Background Information or that may not be documented and otherwise encountered by

Project Co during construction, used for monitoring/not used for monitoring, on, in, or under the temporary Lands as defined in Schedule 33 - Lands. Project Co shall provide decommissioning records to the City.

- (e) GIMP: Project Co shall prepare a comprehensive GIMP and submit to the City for review in accordance with Schedule 10 - Review Procedure. The GIMP shall span the Project Operations for the duration of construction, testing, and Commissioning. As a minimum, the GIMP shall include the following:
  - (i) A DMP which shall be a GIS-based system using a secure internet connection capable of receiving and visualizing near real time monitoring data. The DMP shall be used to create and send alarm reports/notifications and create monitoring reports including batch reports if Response Levels defined by Project Co and indicated in Article 9 – Protection of Existing Adjacent Structures, of this Part 2 are exceeded. Project Co shall provide access credentials to the City for simultaneous users for the DMP. Project Co shall set up the DMP such that the City is immediately notified of exceedances.
  - (ii) Appropriate geotechnical instrumentation for Stations, Structures and Tracks. The instruments shall be capable of collecting and transmitting continuous real time monitoring data to be incorporated and visualized in the DMP. Collecting and transmitting real time monitoring data shall not be required when monitoring Structures that will not experience adverse impacts due to dewatering induced settlement as a result of construction excavation, such as Structures founded directly on intact bedrock or deep foundations extending to bedrock.
  - (iii) All instruments including existing instruments turned over to Project Co by the City and instruments to be installed by Project Co.
  - (iv) Typical installation details and location of additional instruments.
  - (v) Schedule for installation, taking baseline readings, frequency and duration of monitoring for each phase of Construction.
  - (vi) Construction-induced noise and vibration control and monitoring plan.
  - (vii) The plan and schedule for decommissioning and disposing of all additional instruments installed by Project Co as well as all existing instruments turned over to Project Co. Project Co shall notify the City of the intention to decommission instruments.
  - (viii) All Response Levels (refer to Article 9 – Protection of Existing Adjacent Structures, of this Part 2), as specified and defined by Project Co.

- (ix) A Response Action Plan, which shall consist of methods and means to respond to various Review and Alert Level scenarios Article 9 – Protection of Existing Adjacent Structures, of this Part 2 based on types of geotechnical instruments that indicate Review Levels. Project Co shall inform the City of subsequent response actions in accordance with the Response Action Plan. At a minimum, Response Action Plan should include the following:
  - A. Names, telephone numbers, and locations of persons responsible for implementation of contingency plans;
  - B. Materials and equipment required to implement contingency plans;
  - C. Location on Site of all required materials and equipment to implement contingency plans;
  - D. Step-by-step procedure for performing works involved in implementation of the contingency plans;
  - E. Specific actions related to the Alert Level values for all instruments, including means of reducing or eliminating movements and rates of movements;
  - F. Inspection of affected facilities, structures and Utilities and performance of acceptable corrective and restorative measures; and,
  - G. Clear identification of objectives of contingency plans and methods to measure plan success.
- (x) All measures and specific instrumentation and monitoring requirements to protect Existing Adjacent Structures in accordance with Article 9 – Protection of Existing Adjacent Structures, of this Part 2.
- (xi) All measures and specific instrumentation and monitoring requirements for protecting heritage buildings identified in the Project Assessment Study Environmental Project Report and relevant updated revisions which are within the Project ZOI as defined in Article 9 – Protection of Existing Adjacent Structures, of this Part 2.
- (xii) For all Underground Structures, Project Co shall provide, install, maintain, and monitor for the duration of construction, testing, and commissioning a system of instruments that will indicate the pressures and deformations imparted to the permanent structures. The instrumentation shall include:
  - A. Two arrays of pressure cells with one array on each long side of the Station. Each array shall consist of three cells installed at three different

elevations (top, middle and bottom levels along the vertical side walls and away from end walls). Pressure cells shall be installed behind the water proofing system on the overburden side, including soil and rock, prior to start of concrete pouring for the walls.

- B. An instrument on both sides of the longest side of the Station to measure the deformations. This instrument shall consist of an array of either MEMS gravity sensors separated by special joints to measure tilt along three axes, or in-place-inclinometers, or equivalent.
- C. Install a minimum of 3 equally spaced surface settlement monitoring points on both sides of the excavation along a line perpendicular to the excavation, with the first monitoring point located at the edge of the excavation, the second monitoring point located at the farthest point no further away than the limits of the Project ZOI outlined in Article 9 – Protection of Existing Adjacent Structures, of this Part 2, and the third monitoring point located equally between the first and second monitoring points. These lines of monitoring points shall be spaced a maximum of every 30 m running parallel to the excavation.
- D. Install in-place-inclinometers on both sides of the excavation spaced a maximum of 50m running parallel to the alignment. Inclinometers shall be placed a maximum allowable distance of 1m from the edge of excavation.
- E. Install piezometers on both sides of the excavation spaced a maximum of every 50m. Project Co shall locate and monitor piezometers to ensure the groundwater drawdown restrictions of Clause 7.11, of this Part 2, are followed.
- F. All the above instruments shall be connected directly or indirectly to permanent data loggers. Connecting instruments to permanent data loggers shall not be required when monitoring Structures that will not experience adverse impacts due to dewatering induced settlement as a result of construction excavation, such as Structures founded directly on intact bedrock or deep foundations extending to bedrock.
- G. All of the above instruments shall have a minimum daily reading frequency, when located less than or equal to 30m from the edge of excavation, and a weekly reading frequency when located greater than 30m from the edge of excavation.
- H. Project Co shall submit an updated monitoring report in electronic format, in accordance with Schedule 10 – Review Procedure every week.

- (f) Project Co shall establish permanent reference monuments and deep surveying benchmarks as required along the alignment in accordance with the requirements of this Article 7.
- (g) Provide a demonstration of the features of the instrumentation DMP GIS based system to the City prior to the start of construction and afterwards as modifications are made to the website.
- (h) Meet with the City as needed to discuss instrumentation levels and necessary actions to protect EAS.
- (i) Replace damaged or malfunctioning instrumentation. The City may order a temporary work stoppage in areas where there is insufficient working instruments to ensure the protection of EAS.
- (j) Accommodate the City in inspecting the installation of geotechnical instrumentation, related hardware, and in verifying the proper functioning of the instrumentation monitoring system including, but not limited to the collection, transmission, storage, backup, and reduction of data.

#### **7.10 Monitoring Requirements**

- (a) Project Co shall integrate the following monitoring requirements in addition to other monitoring requirements outlined in Clause 7.9 of this Part 2.
- (b) Project Co shall incorporate into the monitoring program, data from existing condition surveys, including data provided by the City.
- (c) The monitoring reports prepared and submitted by Project Co shall be in accordance with the requirements of Schedule 10 – Review Procedure.
- (d) Monitoring shall include logs and survey notes which contain the following information:
  - (i) Record of measurements of in-Tunnel or other deformations;
  - (ii) Construction staging, loading or other construction activities associated with the Works in the vicinity of instruments; and,
  - (iii) Record of any cracks in, or damage to any Structures.
- (e) Project Co shall indicate locations where, due to contractual interfaces or changes in the extent of the Project ZOI Article 9 – Protection of Existing Adjacent Structures, of this Part 2, re-baselining of instrumentation readings shall be conducted.

## 7.11 Groundwater Control – Dewatering/Unwatering and Depressurization

- (a) For the purposes of Clause 7.11 of this Part 2, Unwatering is defined as the removal of water that has accumulated in a project excavation or Tunnel and is an element of groundwater control. Groundwater control is defined as dewatering/unwatering and/or aquifer depressurization.
- (b) Project Co shall develop and submit plans and procedures for groundwater control (including effluent discharge) in accordance with Schedule 10 – Review Procedure. The plans and procedure shall include, but not limited to the following items:
  - (i) Detailed shop drawings of the entire dewatering system(s) that bear the seal and signature of a professional engineer licensed in Ontario, and include, but not be limited to, details, and calculations of proposed type of dewatering system(s), showing arrangement, location, and depths of components of system including details of screens and filter media, complete description of equipment and materials to be used, procedure to be followed, standby equipment, standby power supply, and proposed location(s) of points of discharge of water and abandonment of dewatering system(s), a description of any permits and approvals that pertain to the groundwater control activities;
  - (ii) A discharge plan that includes: Discharge location(s) including methods; procedures and equipment to convey water to Discharge locations; location and dimensions of treatment equipment; procedures for water testing; water quality laboratory analyses procedures, test results or analyses, and water treatment methods; location and construction details of monitoring observation wells, a description of any permits and approvals that pertain to the discharge activities;
- (c) Project Co shall apply for Permits, Licenses, Approvals and Authorizations, including PTTW and/or Environmental Activity and Sector Registry, and discharge permits (e.g., Municipal, Conservation Authority and/or Environmental Compliance Approval).
- (d) Design, construction, and operation of groundwater control measures shall not induce detrimental short- and/or long-term movements of surrounding Structures, infrastructure, and ground surface. Evaluation of detrimental movements shall follow provisions included in Article 9 – Protection of Existing Adjacent Structures, of this Part 2.
  - (i) Project Co shall develop plans and procedures for groundwater control (including effluent discharge), establish monitoring requirements, and carry out a hydrogeological impact assessment and associated risk assessment and submit to the City in accordance with Schedule 10 – Review Procedure. This process shall consider all required project Permits, Licenses, Approvals and Authorizations. Project Co shall ensure that any groundwater control, effluent discharge, and subsequent effects during construction or during the Design Life shall have no

adverse impact on the following features within the Project ZOI: properties, adjacent Structures, infrastructure, active groundwater supply wells, and environmental features. Specifically, the following potential impacts shall be managed/mitigated such that they are not/do not become adverse:

- A. Groundwater drawdown effects including impacts on the quantity and quality of groundwater available for groundwater dependent ecosystems and existing groundwater users;
  - B. Groundwater drawdown effects which may cause settlement of existing Structures or Utilities within the Project ZOI as required in Article 9 – Protection of Existing Adjacent Structures, of this Part 2; and,
  - C. Appropriate quantity and quality of dewatering effluent with respect to the receiver (e.g., Municipal sewer, natural environment, off-site receiver, etc.), in accordance with all applicable project permits and approvals.
- (e) Project Co shall obtain RVCA review and approval for any activity within RVCA or SNCA Regulated Areas and all Works shall be carried out in agreement with the applicable requirements and regulations of RVCA or SNCA.
  - (f) Project Co shall design, install, operate, monitor, maintain, and decommission (as required) the project-specific groundwater control systems, as necessary to meet Project requirements and shall continue proper discharging of effluent according to the relevant City's Sewers Use By-law, as well as any other applicable regulatory (e.g., Conservation Authority and MOECC) approvals without any interruption or negative impact on existing Structures. It will be the sole responsibility of Project Co to verify the condition of the groundwater control systems and operate them as required.
  - (g) Project Co shall submit, on a quarterly basis, the data obtained from all instrumentation utilized for monitoring including hydrogeological and geotechnical instrumentation to the City for review in accordance with Schedule 10 – Review Procedure.
  - (h) Project Co shall conduct all monitoring required by the obtained permits and approvals (including daily pumping volumes).
  - (i) Project Co shall submit the monitoring results to the applicable agencies as stated in the obtained permits and approvals in accordance with Schedule 10 – Review Procedure.
  - (j) Project Co shall respond to/address any complaints received that are potentially related to groundwater control activities.

## **7.12 Seismic Design**

- (a) Seismic Site classification

- (i) Project Co shall complete a Site classification and seismic response study and provide a report to the City in accordance with Schedule 10 – Review Procedure. Site classification and seismic response shall follow NBCC and OBC as applicable.

(b) Seismic Load

- (i) The design of the Underground Structures shall use a dual-level seismic design criterion with an upper level design earthquake to provide a life safety performance objective and a lower level design earthquake for operational performance objective. The design shall conform to Article 4 – Structural Design Criteria and Requirements, of this Part 2, and the following:
  - A. The upper level design earthquake is an MDE where the probability of exceedance is approximately 4% in the 100-year Design Life, which corresponds to the 2% probability of exceedance in 50 years that is specified in the NBCC. The Underground Structures shall be designed with adequate strength and ductility to resist loads and deformations imposed on the structures during the MDE, thereby preventing Structure collapse and maintaining life safety; and,
  - B. The lower level design earthquake shall be the ODE where the probability of exceedance is approximately 20% in the 100-year Design Life, which corresponds to the 10% probability of exceedance in 50 years that is defined by the GSC using the NBCC seismic hazard maps. When subjected to ODE, the Underground Structures shall be designed to respond essentially in elastic manner. There shall be no collapse, and no damage to primary structural elements. The Structure shall remain fully operational immediately after the earthquake, at a full operational status.
- (ii) The design shall use ground deformation analysis methods that account for soil-structure interaction in assessing the seismic effect on Underground Structures. Project Co shall perform in-depth numerical modelling, such as dynamic finite element and/or finite difference methods (as required).
- (iii) For partially buried structures (structures partially above ground and partially below ground surface), the design shall account for the effect of the above-ground portion.
- (iv) Interior structure not rigidly connected to the exterior Tunnel Structure shall be analysed using the response spectra method. Restrained structures that oscillate in phase with or are rigidly attached to the Tunnel shall be analysed using ground deformation methods.

### **7.13 Subsurface Investigations and Testing Prior to Construction**

- (a) Project Co shall review all provided geo-engineering data and be responsible to undertake additional subsurface investigations to enable the detailed design and construction of the Project. Results of investigations shall be provided to the City in accordance with Schedule 10 – Review Procedure. The actual design basis shall conform to the available and additional geo-engineering data. Copies of any reports and interpretations provided by Project Co for design should be submitted to the City to review for design consistency purposes in accordance with Schedule 10 – Review Procedure.
- (b) All field and laboratory testing shall be carried out in accordance with Applicable Law including but not limited to CSA, MTO or ASTM standards. The locations and elevations of all boreholes, test pits, cone penetration tests, and other field testing or sounding locations shall be surveyed in accordance with the requirements of Schedule 15-2, Part 1, Article 4 – Design and Construction.

## ARTICLE 8 UTILITY INFRASTRUCTURE DESIGN CRITERIA

### 8.1 Project Co General Responsibility

- (a) The timing of Utility Work including relocations shall be subject to operational constraints. Project Co shall coordinate the scheduling of all Utility Work including relocation work with the relevant Utility Companies.
- (b) Project Co shall be solely responsible for identifying the actual locations and condition of all existing Utility Infrastructure to complete the Utility Work, identifying all Utility Infrastructure relocation requirements, developing and preparing a Utility Infrastructure Relocation Plan, in accordance with Schedule 10 – Review Procedure and performing all required work to protect, safeguard, remove, and relocate Utility Infrastructure as required and obtaining requisite consents from and with all Utility Companies with respect to the design, construction, installation, servicing, operation, repair, preservation, relocation, and or Commissioning of Utility Infrastructure in, on, under, over, or adjacent to the Lands. The Utility Infrastructure Relocation Plan shall include:
  - (i) identification of existing Utilities;
  - (ii) recommended Utilities Work;
  - (iii) assumptions and considerations;
  - (iv) approach to, and documentation of, communication and coordination with Utility Companies including articulating an understanding of Utility Companies' operational constraints;
  - (v) approach to communication and coordination with other Stakeholders including businesses and property owners;
  - (vi) approach to managing service interruption to Utilities customers including property owners;
  - (vii) providing early identification and approach to mitigation of impacts to critical Utility Work;
  - (viii) identification of, and applications for, Permits, Licenses, Approvals and Authorizations required for Utility Work;
  - (ix) evidence of coordination with all other Utility Infrastructure relocations in the same area; and,
  - (x) approach to supplying Utility services to the Project.

- (c) Project Co shall prepare and submit a Utility Infrastructure Relocation Plan to each Utility Company and a fully coordinated overall Utility Infrastructure Relocation Plan to the City, in accordance with Schedule 10 – Review Procedure.
  - (i) Project Co shall submit the following Utility Relocation Plans, without limitation:
    - A. Utilities on Airport Lands;
    - B. Water infrastructure along the alignment from the South Ottawa Pumping Station to Leitrim Road;
    - C. South Keys Station; and,
    - D. Fibre Optics parallel to the alignment.
- (d) Project Co shall provide to the City, copies of transmittals only, for all submittals provided to and from Utilities Companies within two Business Days of the date of each transmittal. For clarity, transmittals shall be provided to the City for information purposes only.
- (e) Project Co shall provide within two Business Days all documentation to and from Utilities Companies upon the City's request.
- (f) Project Co shall prepare and submit a written workplan, in accordance with Schedule 10 – Review Procedure, separate from the Utility Infrastructure Relocation Plan which shall include:
  - (i) durations and timelines for each Utility relocation and or other strategies, by location; and,
  - (ii) identifying dependencies and conflicts with overall Works Schedule.
- (g) Project Co shall be solely responsible for identifying the requirements for and obtaining all consents and approvals, including without limitation, crossing and other agreements in favour of the City from Utility Companies and others having rights over and an interest in the Lands, whether below, at, or above grade.
- (h) All Utility Work shall be in compliance with all relevant codes and standards of each Utility Company and with the requirements of all Governmental Authorities, and with the requirements of this Project Agreement.
- (i) The Utility Work shall preserve the existing Utility Company network performance and existing capacity subject to relevant codes and standards of each Utility Company and with the requirements of all Governmental Authorities, where Project Co has identified that Utility Infrastructure shall be relocated or removed and replaced.

- (j) Project Co shall provide access within two hours of request from all Utility Companies to their respective Utilities. Project Co shall provide the City uninterrupted access to all watermain valves.
- (k) Project Co shall coordinate Utility Work with the overall System design such that any Operations, Maintenance, repair and/or replacement activities undertaken by the Utility Company shall not interrupt the Operation of the System.
- (l) Project Co shall not construct, install or permit the construction or installation of any Utility Infrastructure on, in, under or over the Lands or any part thereof without the prior written consent of Utility Companies, the City, and any other entity whose consent is required and without obtaining all required permits and approvals.
- (m) Project Co shall replace all surface and subsurface features and Utility Infrastructure disturbed, damaged or temporarily removed during the activities related to Utility Work and reinstate in accordance with the requirements of this Project Agreement.
- (n) All Lane Closures, detour routes, lane shifts and diversions required to undertake Utility Work shall be in accordance with the requirements of this Project Agreement.

## **8.2 General Provisions for Utility Work**

- (a) Project Co shall coordinate and perform Utility Work so as to minimize impact to continuity of service and disruption to property owners and customers of the Utility Companies to the satisfaction of the Utility Companies, private Utility owners and the City.
- (b) Utility Infrastructure shall be relocated such as to provide access, acceptable to the Utility Company, for Maintenance and repairs. Sufficient width shall be provided to accommodate all required Utilities and provide the necessary clearances as determined by the Utility Companies and any applicable City Standards;
- (c) The demarcation point between any Utility service and the System shall be defined as the point where the responsibility of ownership transitions from the Utility Company to the owner. The location and configuration of demarcation points between any Utility service and the System shall comply with relevant Utility Company standards and industry practices between the Utility Company and its customers. Where no such appropriate Utility Company standards and industry practices exists, the location and configuration of demarcation points shall be mutually agreed upon between the Utility Company and Project Co.
  - (i) For [REDACTED], the civil demarcation point shall be defined as the point where the ownership of the civil infrastructure associated with electrical services transitions from [REDACTED] to the City. The location and configuration of the

civil demarcation shall comply with [REDACTED]. The electrical ownership demarcation point may not be the same as the civil demarcation.

- (ii) For [REDACTED], the electrical demarcation point shall be defined as the point where the ownership of electrical infrastructure transitions from [REDACTED] to the City. The location and configuration of the electrical demarcation shall comply with [REDACTED].
- (d) Project Co shall provide or maintain access to maintenance holes and watermain valves located outside the Guideway by rubber tire vehicle.
- (e) Project Co shall not construct, relocate or reinstate Utilities to new, reconstructed, or existing MTO-owned Bridge Structures.
- (f) Project Co shall not be permitted to attach, construct, or relocate any fluid carrying Utilities to new, reconstructed, or existing City owned Bridge Structures.
- (g) Project Co shall be permitted to reinstate non-fluid carrying Utilities into existing conduit on existing City owned Bridge Structures that are otherwise not reconstructed.
- (h) Project Co shall be permitted to attach new non-fluid carrying Utilities to new, existing, or reconstructed City owned Bridge Structures. Utilities shall not be permitted under sidewalks, in parapet walls or directly suspended from thin deck slabs.
- (i) Project Co shall encase all inter city fibre optic carriers ([REDACTED]) conduit or cable crossings of MUPs, Roadways, and Tracks, in split steel. Project Co shall encase all inter city fibre optic carriers' conduit or cable located beneath Platforms and Foundations in split steel.

### **8.3 Protection of Utilities**

- (a) Project Co shall be responsible for protection and all repairs as a result of any damages caused by any actions, or neglect of any actions, by Project Co or any Project Co Party to Utility Infrastructure. Project Co shall further be responsible for ancillary costs related to maintaining normal levels of service or incurred by the Utility Company as a result of these damages. Refer to Article 9 – Protection of Existing Adjacent Structures of this Part 2 for the minimum CIAR requirements for existing Utility Infrastructure within the ZOI and the baseline performance criteria for Utility Infrastructure impact mitigation to be used in the development of the GIMP Response Action Plan.
- (b) All Utility Infrastructure located at Commercial Close, or thereafter, on, in, under, over, or adjacent to the Lands (including Utility Infrastructure within any excavation) shall remain in service and be protected and preserved by Project Co throughout the Construction Period unless otherwise agreed upon by the Utility Company.

- (c) Project Co shall be responsible for any damage done by Project Co or any Project Co Party to Utility Infrastructure throughout the Construction Period.
- (d) For all existing and new Utilities crossing the Lands, Project Co shall utilize and adhere to all requirements of the Transport Canada document titled “Standard Respecting Pipeline Crossings Under Railways TC E10”. Requirements for TC E10 shall apply for all Track segments irrespective as to whether they are subject to the jurisdiction of the Minister of Transport pursuant to the Railway Safety Act.
  - (i) For all existing gravity sewer pipeline crossings, where no record drawing information is available, Project Co may assume requirements for TC E10 are already satisfied or may be waived for pipe segments located beneath the existing track alignment. Where new sidings are constructed or changes to Track alignments relative to existing pipeline crossings are made, Project Co shall adequately uncover pipe segments and verify that TC E10 requirements are satisfied, and/or reconstruct, modify, or provide suitable protection to satisfy requirements of TC E10 as necessary.
  - (ii) For all existing watermain crossings under existing Tracks, where record drawing information is available, there are no requirements to further modify or provide additional protection to satisfy requirements of TC-E10, providing the Track alignment is unchanged from existing and no new sidings are added over the pipeline.
  - (iii) For all existing watermain crossings where no record drawing information is available, Project Co shall adequately uncover the pipeline crossing, assess the pipeline for adherence to TC E10, and reconstruct or provide suitable protection to satisfy requirements of TC E10 as necessary.
  - (iv) For all existing **[REDACTED]** pipeline crossings where no record information is available, Project Co shall include time for **[REDACTED]** to assess the pipeline for adherence to TC E10 with reference to the final Trackwork design, and where necessary, coordinate for **[REDACTED]** to reconstruct or protect the pipeline to satisfy requirements of TC E10.
- (e) Project Co shall maintain the existing OC Transpo optical fibre feed to the Transitway Stations during the Construction Period and for the duration of the Maintenance Period. Any temporary communications arrangements to maintain the OC Transpo communications network during Construction shall not disrupt OC Transpo operations or degrade existing OC Transpo network performance.

#### **8.4 Project Utilities Services**

- (a) Project Co shall be responsible for all Utility Work for all temporary and permanent Utilities services for the Project necessary to comply with the requirements of relevant standards, codes and approvals, as described in this Project Agreement.

#### **8.5 Location and Condition of Utility Infrastructure**

- (a) Project Co shall be responsible for identifying and ascertaining the locations and conditions of all Utility Infrastructure, located on, in, under, over or adjacent to the Lands and ensuring compliance at all times with the provisions of this Project Agreement. Project Co shall not rely solely on previous engineering work, location plans, as-built drawings supplied by Utility Companies or other similar documents for confirming locations of Utility Infrastructure.

#### **8.6 Project Co Responsibilities for Utility Work**

- (a) All Utility Work shall be performed by, or under the supervision of, and at the risk and expense of Project Co subject to the rights of Utility Companies to specify who will perform the Utility Work. Without limiting the generality of the foregoing, Project Co shall be responsible for:
  - (i) obtaining all rights of entry or access to the relevant Utility Infrastructure in connection with the Utility Work and providing access to the relevant Lands if such Utility Work is to be performed by the Utility Company;
  - (ii) identifying all requirements in respect of the Utility Work, including determining the most effective strategies for undertaking the Utility Work;
  - (iii) liaising, arranging, coordinating, and entering into all necessary agreements with relevant Utility Companies in connection with the Utility Work, including obtaining any necessary consents or approvals in connection therewith, providing access for inspections and providing information and plans during and following completion of the Utility Work;
  - (iv) obtaining all Permits, Licenses, Approvals and Authorizations for the Utility Work;
  - (v) observing and complying with any instructions or directions relating to the Utility Work that may be issued by the City on its own behalf or on behalf of a relevant Utility Company;
  - (vi) securing or causing to be secured the entry into or execution of all relevant design, construction, crossing, and maintenance agreements, service contracts, and other agreements in connection with the Utility Work;

- (vii) Project Co shall complete any Utility Infrastructure abandonment as per the standards of relevant Utility Company and City standards, guidelines and specifications. Abandoned underground Utility Infrastructure which results from the relocation of Utility plant, shall be removed up to the first Utility structural chamber beyond the abandoned sections;
- (viii) For telecommunication Utility Companies, Project Co shall design and install all necessary temporary and/or permanent Civil Works associated with the relocation of the Utility Infrastructure, which may include duct banks, maintenance holes, handwells, vaults, pads, etc. for the purpose of the installation of the relevant telecommunication Utility Company's plant. The Civil Works shall be installed as per the standards and specifications of the corresponding Utility Company;
- (ix) For [REDACTED] Project Co shall install all necessary temporary and/or permanent Civil Works associated with the relocation of the Utility Infrastructure, which may include duct banks, maintenance holes, handwells, vaults, pads, grounding grids, etc. for the purpose of the installation of the [REDACTED]'s plant;
- (x) For [REDACTED], Civil Works design for specialty structures inclusive of Bridges, vaults, viaducts, buildings, vent shafts and other [REDACTED] structures shall be Project Co's responsibility and shall be coordinated with other [REDACTED] Civil Works design. The Civil Works shall be installed as per the standards and specifications of [REDACTED];
- (xi) The new installation, modification, relocation, and/or upgrade all Utility services and related assets for existing and new Stations and other systems as necessary to meet Project requirements; and,
- (xii) The installation of any heating equipment required for Track switches from the proposed connection with the Utility Company that is supplying the Utility to such heating equipment.
  - A. Refer to Appendix G of this Part 2 for connection details related to the supply of electricity from [REDACTED] and natural gas from [REDACTED]. Project Co shall at their discretion, request and utilize any of the proposed Utility supply points. Proposed Utility supply points are provided at no cost to Project Co, as related to [REDACTED] and [REDACTED]. Project Co shall coordinate their requirements with the City. Supply coordinates listed in Appendix G of this Part 2 are approximate, and exact final supply point locations shall be designated by the Utility Company.

- B. Any propane supply storage tanks shall be provided by the City. Project Co shall co-ordinate with the City to confirm the number and location of such propane storage tanks. Project Co shall be responsible for all costs to install such supply tanks, and corresponding supply lines.
  - C. All works related to heating equipment required for Track switches shall form part of the Project Co Utility Works.
- (xiii) The provision of new or alteration of low voltage electrical services for streetlighting and traffic signals as coordinated by City signals and streetlighting departments.
- (b) The Utility Companies shall be individually responsible for the following work which will be covered in the Utility Company Works Cash Allowance as noted in Project Agreement Section 20.13. For clarity, only Utility Work explicitly described here shall be subject to cash allowance. Work by the Utilities beyond the Utility ownership demarcation point shall not be attributable to the Utility Company Works Cash Allowance. [REDACTED] work beyond the [REDACTED] civil demarcation point including wiring, transformers and other connection assets shall not be subject to the Utility Company Works Cash Allowance. As exceptions, any [REDACTED] work associated with a change in supply point where there is an existing supply, or where a change in a proposed supply point is requested, additional supply points are requested, or an upgrade to existing connection assets is required, shall not be subject to cash allowance:
- (i) Telecommunication Utility Companies shall be responsible for the design and installation of any temporary and/or permanent plant works including wiring, cables, fibres, equipment, etc., installed or placed in, on, over, under or through the Civil Works including connections to existing Utility Infrastructure that is associated with Utility relocation. Utility Works performed associated with new telecommunication services shall not be attributable to the Utility Company Works Cash Allowance;
  - (ii) Inter city fibre optic carriers ([REDACTED]) maintain duct structure and direct burial cable fibres adjacent to existing Trackwork along the Expanded Trillium Line alignment. The respective carriers shall be responsible for design and construction for relocation of fibre optic cables and related duct structures where in conflict with SI. Project Co shall coordinate with fibre optic carriers and City to arrive at a final design.
  - (iii) [REDACTED] shall be responsible for the design of all necessary temporary and/or permanent Civil Works, excluding specialty structures as per Clause 8.6 of this Part 2, associated with the relocation of the Utility Infrastructure, which may include duct banks, maintenance holes, handwells, pads, etc. for the purpose of the installation of the [REDACTED]'s plant.

- (iv) [REDACTED] shall be responsible for the design and construction of all temporary and/or permanent plant works required including wiring, cables, equipment, etc., installed or placed in, on, over, under or through the civil works associated with the relocation of Utility Infrastructure.
- (v) [REDACTED] shall be responsible for design and construction of all necessary temporary and/or permanent Utility poles, line cover-ups, and associated wiring with the relocation of Utility Infrastructure.
- (vi) [REDACTED] shall be responsible for the design and construction of all temporary and/or permanent plant works required including wiring, cables, equipment, etc., installed or placed in, on, over, under or through the Civil Works associated with the relocation of Utility Infrastructure, that is operated and maintained by [REDACTED] on OMCI lands. Refer to “[REDACTED]” in the background information for clarity on underground electrical that is operated and maintained by [REDACTED].
- (vii) [REDACTED] shall be responsible for the design and construction of all necessary temporary and/or permanent civil works associated with the relocation of the Utility Infrastructure, which may include duct banks, maintenance holes, handwells, vaults, pads, etc. for the purpose of the installation of the [REDACTED]'s plant.
- (viii) [REDACTED] shall be responsible for the design and construction of all temporary and/or permanent plant works required including wiring, cables, equipment, etc., installed or placed in, on, over, under or through the Civil Works associated with the relocation of the Utility Infrastructure.
- (ix) [REDACTED] shall be responsible for design and construction of all necessary temporary and/or permanent Utility poles, line cover-ups, and associated wiring with the relocation of Utility Infrastructure.
- (x) [REDACTED] shall be responsible for all design and construction of all temporary and/or permanent works associated with required relocation for their plant. Works associated with new natural gas services shall not be included in the Utility Company Works Cash Allowance.
- (xi) The City shall be responsible for final connections for watermain equal or less than 406 mm in diameter. The City shall also be responsible for installation of new water services and water meters, and disinfection of new water infrastructure where required.
- (xii) [REDACTED] shall be responsible for all design and construction of all temporary and/or permanent works associated with required relocation, modification and/or inspection for their plant.

- (c) Project Co shall be responsible for the cost of any temporary electrical services and associated energy accounts.
- (d) Inter city fibre optic carriers ([REDACTED]) located in the rail ROW south of station 27+100 (Reference Concept stationing) shall be relocated by others as enabling works in 2018. Project Co shall be responsible for costs that are not attributable to Utility Company Works Cash Allowance, for additional relocations of fiber optic carriers south of station 27+100 (Reference Concept stationing).
- (e) Project Co shall be responsible for the cost of modifications or relocations of [REDACTED] transmission towers between Earl Armstrong Road and Bowesville Road and any such requirements shall not be attributable to cash allowance.

## 8.7 Watermain Requirements

- (a) All watermain design and construction shall conform to all relevant codes, standards and City of Ottawa Design Guidelines – Water Distribution 2010 and Technical Bulletins.
- (b) Project Co shall coordinate the scheduling of all watermain relocation work with the City.
- (c) Project Co shall be responsible for City of Ottawa drinking water permits related costs for final connections, testing, chlorination and Commissioning of all water related works.
- (d) All watermain designs shall be subject to review and final approval by the City in accordance with Schedule 10 – Review Procedure.
- (e) Timing for the temporary removal of watermains from service for relocation, protection, or facilitating other Construction shall be subject to operational constraints. The City will review requests for isolations on a case by case basis with consideration to:
  - (i) Hydraulic modelling performed by the City to verify that adequate supply of water can be maintained;
  - (ii) Seasonal demand variations, where typically Maximum Day Demands are realized May 15th to Oct 15th of any calendar year, and Basic Day Demands are realized elsewhere. Exact dates are dependent on recent climatic conditions and vary from year to year;
  - (iii) Other capital works or Maintenance activities which may impact the water distribution network;
  - (iv) Available redundancy in water distribution system to ensure acceptable levels of risk to normal service delivery are maintained;

- (v) Unforeseeable conditions due to system failures or Maintenance which may impact water service delivery;
  - (vi) Winter potable water treatment and production operation capacities which may be reduced with colder water temperatures;
  - (vii) For large diameter watermain (greater than 406mm) , isolation requests shall be made a minimum of 60 calendar days in advance of the date required, specifying the extents and duration of the isolation in accordance with Schedule 10 – Review Procedure; and,
  - (viii) Known constraints on watermain isolations and the removal of watermain from service. Refer to the “Trillium Line Extension Project Drinking Water Operational Constraints Matrix” for specific references in this Article and other background information.
- (f) Construction of, or near large diameter watermain (greater than 406mm), in a pressurized or non-pressurized state shall be subject to requirements of CIAR submittals in accordance with Article 9 – Protection of Existing Adjacent Structures, of this Part 2. The City retains the right to reject construction means and methods where in the City's opinion there is unacceptable potential for impacting feedermain integrity and or threatening normal service levels in ongoing water service delivery. Requirements for Construction monitoring including but not limited to settlement and vibration monitoring may be imposed by the City as deemed necessary and shall be accommodated by Project Co.
- (g) Project Co shall provide full time qualified inspection services where constructing or altering large diameter watermain (greater than 406mm) and related infrastructure (valves, chambers. etc. ) to witness and ensure quality control activities are completed at prescribed intervals, materials, material handling and construction are as per design specifications and is completed in accordance with industry standards, manufacturer and City standard specifications, report and take corrective action to remedy deficiencies where required.
- (h) Project Co shall engage a company that can demonstrate a minimum of 10 years of experience in large diameter watermain installation, three references where large diameter watermain installation has been provided within the last five years, and describe the experience of said company, as well as the individuals who shall be responsible for the management and services delivery and their relevant experience and qualifications, to the City in accordance with Schedule 10 – Review Procedure.
- (i) For pre-stressed concrete pressure pipe watermain with diameter greater than or equal to 610mm, the following coating, lining and mortar special provisions shall apply:

- (i) The concrete mortar exterior coating mix shall have properties that limit the potential for chloride-induced corrosion by reducing the permeability of the concrete coating. The exterior pipe mortar shall be type 10HSF cement with high quality 9% silica fume additive in accordance with AWWA C205. The high quality silica fume shall comply with C.S.A A23.5-M98. The exterior mortar shall have a thickness of 25mm measured from the outer edge of the prestressed wires. The cement coating shall be able to withstand occasional freezing/thawing cycles during the lifetime of the pipe.
- (ii) The pipe exterior surface shall be completely coated in the factory with a polyurethane coating 40 mils DFT Corrotec, as manufactured by SICO Inc. or an equivalent approved by the City. The coating shall pass an A.C. Holiday Detector Test set at a voltage of 4000 Volts. The adhesion of the Corrotec onto the concrete shall exceed 700 psi (4830 kPa).
- (iii) All piping with coatings and linings delivered to the Site shall be inspected for defects and cracks. Any repairs to coatings and linings shall comply with the applicable AWWA and ASTM standards. Any damages to the pipe exterior surface shall be repaired by cleaning the area affected and completely coating with a polyurethane coating 40 mils DFT Corrotec, as manufactured by SICO Inc. or an equivalent approved by the City. A pipe shall be deemed as extensively damaged and the pipe will be rejected if defects or damages in any section of a pipe are numerous or severe enough that, in the City's judgement, it would be unsatisfactory to make separate repairs to the coating or linings.
- (iv) The exterior pipe joints shall be made using a pre-packaged grout consisting of one part type 10HSF cement with high quality 9% silica fume additive, in accordance with AWWA C205, to two parts of chloride free sand. The high quality silica fume shall comply with C.S.A A23.5-M98. The installation of the field grout shall follow the manufacturer's recommendations. The joint shall be poured using a "Stretch Coat" bituminous diaper that will remain in place after pouring the grout. The addition of excessive water to the grout mix will reduce strength and shall not be tolerated. In order to seal the joints, the diaper shall overlap the pre-stressed concrete pressure pipe Corrotec coating by a minimum of 50mm. The exterior polyurethane coating shall be cut back (not applied) 60mm from both pipe ends to ensure that the poured diaper grout be in contact with the pipe exterior mortar cover for optimal adhesion.
- (v) Pipe interior joints shall be mortar lined to completely fill the gap with an NSF 61 compliant mortar. All interior exposed steel shall also be similarly mortar lined with an NSF 61 compliant mix. An NSF 61 compliant epoxy coating shall be factory applied to the exposed steel of the bell interior and spigot exterior at the pipe joint (around the gasket area), where interior joints cannot be mortar lined due to size restrictions. The epoxy shall have a minimum thickness of 20 mils.
